A 1-year project was undertaken to continue implementation, evaluation, and revision of a model advanced technology partnership between Elgin Community College (ECC) and the Northern Kane Regional Delivery System in Illinois. The model program, which originally included three high schools, was expanded to include five additional high schools in three school districts. Tech prep program enrollment was increased from 13 high school seniors during the pilot year to 43 seniors during FY92, and 5 additional programs (in child care, electronics, heating/air-conditioning, machine tools/computer-aided manufacturing, and welding) were added to the 2 pilot-year programs (automotive and computer-aided design/drafting). Other major project accomplishments included additional planning and coordination meetings, an agreement to use area vocational school facilities for program activities, and additional solicitation of community and industry support (including scholarships and summer internship opportunities). Thirty-nine students successfully completed the FY92 program year, and 69% of them planned to return to ECC to complete its associate degree program. Various program materials, including marketing brochures, student handbooks, and guidance planning sheets, were developed. (Application/information sheets for each of the seven Tech Prep programs are appended.) (MN)

The Tech Prep Partnership was funded through DAVTE utilizing Carl
Perkins funding.
The funding agreement number - JMAAl10
The funding agreement amount - $80,000
FINAL REPORT ABSTRACT

Official Project Title: ECC/Tech Prep Partnership for Northern Kane Regional Delivery System

Department of Adult, Vocational, and Technical Education Funding Agreement Number: JMAA110

Project Director: Dr. Donald Kinzy

Funded Agency: Elgin Community College

Location of Funded Agency: 1700 Spartan Drive, Elgin, IL 60123

Time Period Covered: July 1, 1991 - June 30, 1992

Goal(s) of the Project and its Relevancy to Vocational Education:
- This project will continue to implement, evaluate, and revise the model Advanced Technology Partnership between ECC and District #300 (three high schools) and to integrate academic and technical skills in Tech Prep education that are cost-effective and sequenced.
- This project will be expanded to include five additional high schools in three school districts to strengthen Tech Prep education in the #509 District.
- This project will articulate high school courses with community college courses and state university courses to allow students in a Tech Prep track to have the best of both worlds.
- This project will continue soliciting input from local business and industry to develop specific credentials needed in the community. In addition, it will be the intent of this program to continue soliciting internships and experimental learning opportunities for students enrolled in the program.
- This project will disseminate successful components throughout Illinois to address the state-wide need of a better prepared work force while maximizing vocational education preparation and training resources.

Major Accomplishments of the Project:
- Tech Prep program enrollment grew from 13 seniors during the pilot year to 43 starting seniors fiscal year '92. Enrollment also grew by program area from the two pilot year programs of Automotive and CAD/Drafting to seven programs encompassing Automotive, CAD/Drafting, Child Care, Electronics, Heating/Air Conditioning, Machine Tool/CAM, and Welding.
- Accomplished some initial planning with the Area Vocational Center of the region to utilize their facilities for some of the prerequisite education.
- Coordination meetings with administrators, counselors, and staff have produced a projected enrollment from each feeder district in FY'93.
- The Elgin Chamber of Commerce has actively supported the Tech Prep concept. They have formed a Tech Prep Advisory Council that has been meeting monthly and have targeted a marketing thrust as a major goal.
- Plans of the advisory group are to encourage more scholarships and promote a summer internship work experience for all the Tech Prep graduates.
- Two area meetings for promotion of integration, and a two-day workshop for Applied Math and Science, have been held during this fiscal year.
- Guidance staff have met as a total group and at the sites to address Tech Prep.
- The Tech Prep management team has given presentations relating to the Elgin Tech Prep Program at the National Tech Prep Convention in Dallas, Texas, the American Association of Higher Education in San Diego, California, and the League for Innovation 2000 Conference for Community Colleges in Chicago, Illinois.
- Two meetings have been conducted with representatives of Northern Illinois University to facilitate a non-penalized flow-through for Tech Prep students interested in baccalaureate programs. No decision has been made.
- 86 students have enrolled for FY'93 in 11 of the 18 offerings

**Products Delivered:**
- 39 students successfully completed the FY'92 school year and were awarded certificates. This represents a 290% increase in completions from the pilot year.
- 69% of these graduating seniors indicated they plan to return to ECC for completion of their associate degree program. (64% for the same program, and 5% for a different program)
- 8,000 marketing brochures were developed, tailored to each school district, and distributed to incoming freshmen students and their parents.
- 2,000 handbooks for the Tech Prep students were developed during the year for distribution to the enrolled Tech Prep seniors.
- Guidance 4-year planning sheets for each of the seven Tech Prep programs were developed and provided to each district's Counseling unit.
- Two other school districts signed joint agreements for Tech Prep participation, bringing the total to four, which now gives us total high school district involvement.
MAJOR ACCOMPLISHMENTS AND SIGNIFICANT FINDINGS OF THE PROJECT

GOAL #1

This project will continue to implement, evaluate, and revise the model Advanced Technology Partnership between ECC and District 300 (three high schools) and to integrate academic and technical skills in Tech Prep education that are cost-effective and sequenced.

During FY'92, 43 students enrolled in the Tech Prep program component at Elgin Community College. This component is a segment whereby students attend the community college one-half day for the complete year, and earn between 12-17 college credits, depending on their respective program. Students enrolled from District #300 and District #303 in seven different programs.

39 of these students successfully completed the school year in seven programs of the eighteen available to them. 69% of these students indicated they plan to continue their programs at ECC during FY'93.

The students' evaluation of the program was quite positive, and they enjoyed being mainstreamed with older adults. Many of the graduates indicated that we should do more to coordinate the college segment with the high school staff to enhance the three semesters of prerequisites. (This will become a major goal for FY'93) Other components of the evaluative process indicated considerable support from the high school counselors and from the parents of the seniors.

Efforts to encourage integration of math, science, communications, and technology are also beginning to show. Most of the students have had appropriate math and science courses to allow for success.

It should be noted that approximately 40% of these returning students seeking the associate degree would probably never have attended the community college if not for the Tech Prep program.

Also significant to this partnership is the economic savings to the taxpayers because they do not have to purchase and maintain expensive duplicate laboratory facilities for upper level skill development.

In the area of revision, two very important processes will be developed based on the FY91 outcomes. Considerable in-service for high school and community college staff will be a priority for FY'93 and additional screening or testing will occur to make sure the student is placed in the most appropriate educational level to avoid duplication or failure.

GOAL #2

This project will be expanded to include five additional high schools in three school districts to strengthen Tech Prep education in the #509 District.
The remaining two high school districts within the Elgin Community College system signed joint agreements to participate in Tech Prep for FY'93. These are district #301 - Burlington and District U-46 - Elgin. Elgin will enroll students in five areas who have met the prerequisites, and Burlington will enroll students in four different programs.

The Tech Prep staff has already started working with these two districts relating to staff development, curricula, and integration of learning. It is encouraging to the project to also note an emphasis on integrated teaching also being promoted by the professional associations of math and science.

GOAL #3

This project will articulate high school courses with community college courses and state university courses to allow students in a Tech Prep track to have the best of both worlds.

This continues to be the least successful goal for this site. Articulation is, and has been, ongoing with various universities. But a total commitment to accept, without reservations, the Tech Prep student, does not appear to be visible. Many community college instructors are able to individually promote articulation for their programs through personal agreements, but we would prefer some type of blanket acceptance. DAVTE and ICCB need to make this a major goal, which of course, would make it much easier.

GOAL #4

This project will continue soliciting input from local business and industry to develop specific credentials needed in the community. In addition, it will be the intent of this program to continue soliciting internships and experimental learning opportunities for students enrolled in the program.

This year has been a significant year as it relates to input from local business and industry. We have a very active advisory group with a scope and perspective of the business and industry needs of this area that surpasses our greatest desires. They are active in marketing Tech Prep, promoting internship, and are very instrumental in encouraging financial aid assistance. Within the past two months, they have convinced the Rotary Club and local businesses to provide five scholarships for Tech Prep students. They meet with Guidance personnel and communicate directly with site administration. We are looking forward to these developments as we look to FY'93.
GOAL #5

This project will disseminate successful components throughout Illinois to address the state-wide need of a better prepared work force while maximizing vocational education preparation and training resources.

The management of this Tech Prep site has been active in distributing materials both locally and nationally, in addition to making three presentations to national audiences throughout FY'92.

Principles of technology continue to grow in the feeder systems and in-service programs aligned to integration of subject matter have been more visible during FY'92.

Starting a program with students has allowed us to observe and synthesize components that would be necessary to develop as time progressed.

We believed prerequisite enrollments in heretofore dying programs would begin to increase if the capstone programs were perceived by students as worthwhile. This has started to happen in our pilot district, District #300. In addition to this, we now see clearly the areas where in-service is needed, where marketing is needed, and where assessment can be of value.

EVALUATION AND IMPACT

- Cost-effectively maximizes the use of very expensive labs and equipment - equipment that is changing faster than individual secondary schools can economically accommodate.

- Provides realistic college training for students who previously could not achieve in modern technology education for lack of economic foundation.

- Allows feeder districts to provide less costly prerequisites that are integrated with academics.

- Provides secondary teachers opportunities to develop and teach to a specific level of responsibility rather than attempting to teach multiple levels at the same time.

- Allows for all students to enroll in a capstone program, especially in districts with insufficient enrollment to run an advanced class.

- Provides a long range career development system that is uninterrupted and is not redundant.

- Allows for students to have input into the development and the successes.

- Allows the community to have on-going input to produce a potential employee, skilled to meet their modern work-force needs without additional expensive training.

- Encourages necessary student remediation during the prerequisite years as opposed to remediation after high school, which heretofore has not been extremely successful.
- Allows students an exposure to college life and to a college mode of learning, while acquiring skills in order to make realistic choices about additional education and careers.

RESOURCE LISTING

MATERIAL RESOURCES
None

HUMAN RESOURCES

A - PAID PARTICIPANTS
1. Lloyd Cundiff - Coordinator of Tech Prep
2. Jane Russell - Secretary (1/2 time) to Tech Prep Coordinator
3. Corridor Partnership for Excellence in Education

B - UNPAID PARTICIPANTS
1. Dr. Don Kinzy - Tech Prep Director and Dean of Math, Science, and Advanced Technologies at ECC
2. Dr. Paul Heath - President of ECC
3. Dr. Charles Rorie - Vice Pres. of Instruction at ECC
4. Eric Larson - Dean of Business Education at ECC
5. Polly Nash-Wright - Dean of Liberal Arts and General Education at ECC
6. Dr. Joseph Scime - Superintendent of District #300
7. Dr. Norm Wetzel - Ass’t Superintendent of Dist. #300
8. Mr. Fred Fox - Vocational Director for District #300
9. Dr. John Vanko - Superintendent of District #303
10. Dr. Fran Kostel - Principal in District #303, St. Charles High School
11. Maggie Brewner - Vocational Director in District #303
12. Dr. Richard Wiggall - Superintendent of District #U-46
13. Mrs. Jan Lockery - Curriculum Dir. in District #U-46
14. Mrs. Barbara Bonner - District #U-46 Vocational Director and Northern Kane Regional Director
15. Renata Mattheus - Principal in District #U-46, Larkin High School
16. Ronnie Kordick - Applied Arts Divisional Chair, District #U-46, Larkin High School
17. Jean Bowen - Guidance Divisional Chair, District #U-46, Larkin High School
18. Judy Jobe - Dean of Student Support Services at ECC
19. Russ Fahrner - Admissions Advisor/Career Fest Director at ECC
20. Carole Akemmann - Director of Public Information at ECC
22. Ed Kelly - President of the Elgin Chamber of Commerce
**PROBLEMS**

1. Did not achieve progress desired for articulation to 4-year institutions
2. Difficult to enroll students with equal prerequisites, even within the districts. A system that is uniform will be a major goal
3. District #303 - St. Charles is very slow in developing enrollments, even though they are committed. Will work with different personnel, and the advisory council will attempt to assist.
4. Plans must be developed for enrollments larger than anticipated or larger than facilities will accommodate
5. Coordination between different areas, different sites, and different subject matter deans who represent different areas of Tech Prep sometimes difficult. An orientation meeting for FY'93 students and their parents will include above personnel as one attempt to remediate the communication problem

**CONCLUSIONS AND RECOMMENDATIONS**

Registering students, issuing textbooks and supplies, billing, grading procedures, transcript releases, tours, and communication problems grow with each new district and present new challenges that will be met. Considerable in-service with faculty, and between different levels of faculty, will be necessary in FY'93.

Students are extremely positive about the program which contributes to the success.
- Utilization of advisory personnel and involving parents during FY'93 is perceived to be a worthwhile goal.
- Extreme praise has been voiced by recipients of our printed materials, both locally, and nationally
- Major emphasis will be devoted to in-service and curricula development
- Work experience following the senior year component will be a priority
- Continuous efforts at integrating curricula and teaching will also be an ongoing priority
- Greater involvement by site principals will be a major thrust
- As noted by the increase in enrollment and the visible support from business and industry, the program is perceived as very successful and a much needed initiative in communities where vocational education is in various modes of difficulty

STUDENT ENTRANCE REQUIREMENTS

Prior to Senior Year the Student Will:

1. Develop a plan to complete course requirements for Tech Prep.
2. Demonstrate a sincere interest in completing the program by continuing to:
   a. Maintain excellent attendance.
   b. Demonstrate a positive attitude in school.
   c. Complete all prerequisites for your chosen program.
   d. Keep parents informed.
3. Complete an ECC application for admission.
4. Provide data to ECC, i.e., social security number, address, phone.
5. Sign a form to release grades to school registrar and parents.
6. Plan to travel to ECC for 2 hours of classes daily.

Recommended Electives
- 713 INTRODUCTION TO MACHINE TECHNOLOGY
- 717 INTRODUCTION TO WELDING
- 709 INTRODUCTION TO ELECTRICITY
- 729 INTRODUCTION TO PLASTICS
- 641 KEYBOARDING
- 644 WORD PROCESSING

ELGIN COMMUNITY COLLEGE PROGRAMS

Associate of Applied Science Degree Program

**Fall Semester**
- DFT 101 Basic Technical Drawing Skills
- CAD 105 Introduction to Computer Graphics

**Credit Hours**
- 4 hrs.
- 3 hrs.

**Spring Semester**
- DFT 102 Descriptive Geometry
- CAD 111 Computer Graphics 3-D Modeling

**TOTAL CREDITS**
- 14 hrs.

**STUDENT ENTRANCE REQUIREMENTS**

Prior to Senior Year the Student Will:

1. Develop a plan to complete course requirements for Tech Prep.
2. Demonstrate a sincere interest in completing the program by continuing to:
   a. Maintain excellent attendance.
   b. Demonstrate a positive attitude in school.
   c. Complete all prerequisites for your chosen program.
   d. Keep parents informed.
3. Complete an ECC application for admission.
4. Provide data to ECC, i.e., social security number, address, phone.
5. Sign a form to release grades to school registrar and parents.
6. Plan to travel to ECC for 2 hours of classes daily.

### HIGH SCHOOL PROGRAM

This Program Emphasizes

- English - Applied Communications
- Average to Above Average Reading & Language Skills
- Math (A.A.S. Degree Preparation)
- Algebra 1
- Algebra 2
- Geometry
- Science
  - 2 years lab science

### Required Program Electives

- 713: Introduction to Machine Technology
- 714: Machine Tool I
- 715: Machine Tool II
- 151: Applied Communication
- 452: Physics

### Recommended Electives

- 704: Introduction to Drafting
- 717: Introduction to Welding
- 709: Introduction to Electricity
- 720: Introduction to Plastics
- 641: Keyboarding
- 644: Word Processing

### ELGIN COMMUNITY COLLEGE PROGRAMS

#### Associate of Applied Science Degree Program

#### Fall Semester

- MTO 103: Fundamental Lathe Technology
- MTO 104: Milling & Grinding Technology

#### Spring Semester

- CAM 101: Introduction to Computer Aided Programs
- CAM 220: Computer Aided Manufacturing I

#### TOTAL CREDITS

- 12 hrs.

### STUDENT ENTRANCE REQUIREMENTS

Prior to Senior Year the Student Will:

1. Develop a plan to complete course requirements for Tech Prep.
2. Demonstrate a sincere interest in completing the program by continuing to:
   a. Maintain excellent attendance.
   b. Demonstrate a positive attitude in school.
   c. Complete all prerequisites for your chosen program.
   d. Keep parents informed.
3. Complete an ECC application for admission.
4. Provide data to ECC, i.e., social security number, address, phone.
5. Sign a form to release grades to school registrar and parents.
6. Plan to travel to ECC for 2 hours of classes daily.
