ABSTRACT

This report, the seventh in a regular biennial survey series, provides standardized comparative information on expenditures by colleges and universities for employee retirement and insurance benefits in 25 tables and 5 charts. The data, collected in 1990 from 634 institutions, reflect information supplied for either fiscal or calendar year 1989. They are displayed to show the following: distribution of employer retirement and insurance expenditures; types of expenditures; retirement and insurance expenditures by institutional category; retirement and insurance expenditures by region; retirement and insurance expenditures by institutional size; pension, life and health insurance expenditures; payroll deductions; payroll data. Study findings showed that the weighted average employer expenditure for retirement and insurance benefits was 21.1 percent of payroll or \$6,026 per employee per year; that as a percent of payroll, total employer retirement and insurance expenditures ranged from under 6 percent to 32 percent or more; and that public comprehensive universities and colleges II (Carnegie Classification) reported highest average expenditures. Includes notes on the survey and a copy of the survey questionnaire. (JB)

INTRODUCTION

This is the seventh report in the biennial survey series instituted by TIAA-CREF in 1977 to provide standardized comparative information on expenditures by colleges and universities for employee retirement and insurance benefits. With this information, institutions may assess their retirement and insurance plan costs in relation to those of other institutions that are similar in type (based on the 1987 Carnegie Classification of Higher Education), geographic region, or size. The data in this report, collected in 1990, reflect information supplied for either fiscal or calendar year 1989. Individual institutions can locate themselves on the 1989 scale of expenditures by following the procedures described in "Notes on the Survey."

The survey report offers two principal measurements of retirement and insurance expenditures for each included benefit category: (1) expenditures as a percentage of total gross payroll and (2) expenditures as dollars per employee per year. Gross payroll is used as the common base for determination of expenditure percentages because it is a readily available figure that is widely used in surveys of benefit costs and is easily definable among employers. The alternative of limiting the payroll data base to payroll of just those employees participating in the benefit plans would make general comparisons among institutions more difficult. And, not incidentally, it would be difficult or impossible for most institutions to supply payroll data separately for various subgroups of employees.

Because expenditures are reported as percentages of an institution's total gross payroll, the figures in the tables should not be interpreted as the average employer cost of a benefit plan on a per-participant basis. Similarly, expenditures as dollars per employee per year are based on an institution's total number of employees, including the full-time equivalent of part-time employees. This fact must be kept in mind in comparing expenditure levels among institu-

tions, some of which limit plan participation to a specific class (or classes) of employees.

No other survey in the field of higher education provides comparable benefits cost data. The 1990 survey reports only employee retirement and insurance benefits costs, including legally mandated expenditures (social security, etc.). Payments for time not worked are not included in the survey in order to focus on the basic pension and group insurance plans and because of the difficulty in collecting standardized data for this benefit category. Also, in order to focus on retirement and insurance benefits, the survey does not include the cost of education expenditures for employees and dependents. This item, not directly related to retirement and insurance, varies widely among institutions in its reporting, often depending on how they treat tuition remission and waivers (which do not reflect actual cash expenditures). In limiting the survey to retirement and insurance benefits, the report is comparable to surveys among business and industrial firms, such as the William M. Mercer, Incorporated's *Cost of Basic Employee Benefits*, that concentrate on the basic pension and group insurance plans.

This report would not be possible without the cooperation of the 634 institutions that provided the detailed figures requested. Their assistance was essential and is greatly appreciated. Thanks are also owed to many colleagues at TIAA-CREF who have given valuable support in the completion of this project, especially to Robert Fallar, who managed the technical elements of the survey and assisted in preparation of the final report.

CHRISTINA PROSCIA
*Employee Retirement and Insurance
Benefits Cost Survey*
October 1990

SUMMARY OF FINDINGS

1. For the 634 institutions participating in TIAA-CREF's survey of retirement and insurance benefits costs, the weighted average employer expenditure for retirement and insurance benefits was 21.1 percent of payroll or \$6,206 per employee per year.¹ The median retirement and insurance expenditure among the responding institutions was 19.1 percent of payroll, that is, half of the institutions reported benefit expenditures exceeding 19.1 percent of payroll, or \$4,635 per employee per year. The unweighted average retirement and insurance expenditure was 19.6 percent of payroll or \$4,947 per employee per year. (In the following discussion, the weighted average is given unless otherwise specified.)²

2. As a percent of payroll, total employer retirement and insurance expenditures reported by the 634 institutions ranged from under 6 percent to 32 percent or more. Over three-quarters of the institutions fell within the narrower range of 14.0 to 23.9 percent of payroll. As dollars per employee per year, benefit expenditures ranged from under \$1,250 to over \$7,500, with about 60 percent of the institutions reporting a dollar amount between \$3,000 and \$5,749 per employee.

3. By type of institution, public comprehensive universities and colleges II reported highest average expenditures for retirement and insurance benefits — 24.5 percent of payroll. The remaining institutions by type reported average expenditures ranging between 17.3 and 22.9 percent.

¹ Includes legally mandated expenditures, pension plan, life and health insurance, travel accident and long-term disability income insurance expenditures; excludes payments for benefits outside the pension and insurance area such as payments for time not worked and cash payments for tuition grants.

² See "Notes on the Survey" for a description of methods used in calculating averages.

4. By region, average retirement and insurance expenditures ranged between 18.1 percent of payroll in the Southwest and 23.7 percent in the Mid-Atlantic. Median expenditures for all institutions within a region were: New England — 19.5 percent, Mid-Atlantic — 20.1 percent, South — 18.3 percent, Midwest — 18.8 percent, Southwest — 19.2 percent, and West — 20.1 percent.

5. By size of institution (based on student enrollment), small institutions reported average retirement and insurance expenditures of 19.3 percent of payroll, medium institutions — 19.8 percent, and large institutions — 21.4 percent. Median expenditure as a percent of payroll was 18.1 percent for small, 18.9 percent for medium, and 20.4 percent for large institutions.

6. All but nine of the 634 respondents reported employer expenditures for one or more types of pension plans. For all institutions with pension expenditures, payments to public retirement systems averaged 5.2 percent of payroll; payments to insured pension plans averaged 4.7 percent of payroll.

7. For life insurance plans, 94 percent of respondents reported an expenditure; 100 percent of respondents reported health insurance expenditures. Average payments were 0.3 percent of payroll for life insurance, 6.1 percent for health insurance, and 4.9 percent for life and health insurance combined for institutions unable to report the figures separately.

8. Deductions from employees' pay for employee benefits averaged 10.5 percent of payroll, composed mainly of social security taxes (5.9 percent of payroll), required pension contributions (3.3 percent), and health care (1.5 percent).

To serve your information needs better, TIAA-CREF is now able to provide retirement and insurance benefits cost figures for selected groups of responding institutions. If there is a specific group with which you would like to compare your institution's retirement and insurance expenditures, please write to us with your request and a list of the institutions in the desired grouping. To maintain TIAA-CREF's guarantee of anonymity, you must include at least ten institutions in your request.

DISTRIBUTION OF EMPLOYER RETIREMENT AND INSURANCE EXPENDITURES

TIAA-CREF's survey collected data on retirement and insurance expenditures for fiscal or calendar year 1989. For the 634 colleges and universities responding, the distribution of retirement and insurance expenditures for individual institutions ranged from under 6 percent to more than 32

percent, and from under \$1,250 to over \$7,500 per employee per year (Table 1). The largest number of public institutions reported total retirement and insurance expenditures in the 22.0 to 23.9 percent range; for private institutions the largest number of institutions were in the 18.0 to 19.9 percent range. The general range of institutions' total retirement and insurance expenditures differed for public and private institutions. For example, 60 percent of public institutions reported retirement and insurance expenditures of 20 percent of payroll or more while only 36 percent of

private institutions had totals of 20 percent or more. Chart 1 gives the distribution curves for public and private institutions' retirement and insurance expenditures.

As dollars per employee per year (full-time employees plus full-time equivalent of part-time employees), the largest number of public institutions, 34 or 21 percent, reported total benefit expenditures in the \$7,500 and over range. The largest number of private institutions, 38 or 8 percent, reported expenditures in the \$4,250 to \$4,499 range. Looking at institutions' expenditures by \$1,000 increments, 12 percent of public and 24 percent of private institutions spent between \$3,000 and \$3,999 per employee; 21 percent of public and 27 percent of private spent \$4,000-\$4,999; 20 percent of public and 18 percent of private spent \$5,000-\$5,999; 15 percent of public and 7 percent of private spent \$6,000-\$6,999; and 27 percent of public and 8 percent of private spent \$7,000 and over.

Table 2 displays a breakdown of employer retirement and insurance expenditures at five successive levels. Ten percent of responding institutions spent more than 25.1 percent of payroll or more than \$7,511 per employee per year for benefits; comparable figures from the 1987 cost survey were 23.1 percent of payroll or \$5,949 per employee per year. In

the current survey, 50 percent of institutions spent more than 19.1 percent of payroll or more than \$4,635 per employee per year (17.9 percent of payroll or more than \$3,805 per employee per year in 1987); and 90 percent of institutions spent more than 14.7 percent of payroll or more than \$2,762 per employee per year (13.1 percent of payroll or more than \$2,403 per employee per year in 1987).

CHART 1
Distribution of Total Employer Retirement and Insurance Expenditures as Percent of Payroll for Public and Private Institutions

TYPES OF EXPENDITURES

Table 3 gives the number and percent of total institutions reporting each type of retirement and insurance benefit expenditure in our survey, as well as the average expenditure as percent of payroll and as dollars per employee per year for each benefit. Expenditures are shown under weighted and unweighted methods of calculating averages. The weighted average expenditure for all retirement and insurance benefits combined was 21.1 percent of payroll or \$6,206 per employee per year. The unweighted average expenditure for retirement and insurance benefits was 19.6 percent of payroll or \$4,947 per employee per year.

The weighted average is calculated from the total benefit expenditures of all reporting institutions for a given category divided by the total gross payroll or total number of employees for those institutions. The weighted average takes into account size of payroll or number of employees and thus incorporates a measure of educational expenditures commensurate with institutional size. The unweighted average reflects the percent of payroll or dollar figure calculated individually for each institution, summed and divided by the number of reporting institutions. The unweighted average gives equal weight to each institution's response regardless of the size of its payroll or the number of its employees.

Throughout this report, except where specifically indicated, the average benefit expenditures given are those calculated by the weighted average method.

Legally Mandated Expenditures. Employer expenditures for legally mandated programs averaged 6.6 percent of payroll or \$1,939 per employee per year for fiscal or calendar 1989. The major item in this category is the employer's share of social security (FICA) taxes, which averaged 5.9 percent of payroll or \$1,727 per employee in the 629 institutions reporting such payment. (For 1989, social security taxes were payable at the rate of 7.51 percent of covered wages up to the maximum wage of \$48,000.) Unemployment compensation costs (federal and state taxes, direct reimbursement) averaged 0.1 percent of payroll, and workers' compensation programs averaged 0.7 percent.

Pension Plan Expenditures. Employer expenditures for pension plans—public retirement systems, insured and non-insured plans, and unfunded payments—averaged 8.0 percent of payroll or \$2,356 per employee among the 625 institutions reporting payments to one or more types of plans.

Employer payments to public retirement systems averaged 5.2 percent of payroll, or \$1,588 per employee. These

payments include an employer's own contributions to a public retirement system and any state or local government contributions that are also made on behalf of the employer's staff for both current and prior service liabilities. Employer expenditures by both public and private institutions for insured pension plans, including TIAA-CREF plans, averaged 4.7 percent of payroll, or \$1,318 per employee. Public retirement systems generally cover all employees, while private institutions often limit eligibility under the retirement plan. This means lower tabulated expenditures, as a percent of total payroll and as dollars per employee (both full-time employees and full-time equivalents), for institutions whose pension plan expenditures are made only on behalf of limited groups of employees, eligible for and participating in a pension plan.

Other Benefit Plan Expenditures. Employer expenditures for other benefit plans—life insurance, health insurance, travel accident insurance and long-term disability—averaged 6.5 percent of payroll or \$1,917 per employee. Including institutions unable to separate their life and health insurance payments, 94 percent of respondents reported an expenditure for life insurance and 100 percent reported health insurance expenditures. For institutions reporting group life insurance and health insurance separately, payments averaged 0.3 percent of payroll or \$94 per employee per year for life insurance, and 6.1 percent of payroll or \$1,793 per employee for health insurance. Institutions combining life and health care reported expenditures averaging 4.9 percent of payroll or \$1,421 per employee. Health insurance expenditures can include one or more of the following: basic hospital-surgical-medical plans, self-insured plans, major medical insurance, dental and vision care, routine physical exams and payments to Health Maintenance Organizations.*

Long-term disability income insurance expenditures, reported by 479 institutions, average 0.3 percent of payroll or \$95 per employee. The reported average cost of travel accident insurance, less than 0.1 percent of payroll, was low compared with the cost of the benefit per covered employee, since coverage usually applies to a relatively small proportion of total employees.

*Of the 632 institutions indicating payments for health care plans, 168 institutions noted that their health coverage may include a dental care plan, 70 institutions—vision care coverage, and 114 institutions—routine physical exams.

RETIREMENT AND INSURANCE EXPENDITURES BY INSTITUTIONAL CATEGORY

Tables 4, 5, and 6 display employer retirement and insurance expenditures by institutional category and by control—public and private. Institutional categories are based on the 1987 Carnegie Classification of Higher Education prepared by the Carnegie Foundation for the Advancement of Teaching. Categories include: research universities I and II, doctorate-granting universities I and II, comprehensive universities and colleges I and II, liberal arts colleges I and II, and professional schools. Institutions are categorized on the basis of the level of degrees they award, the fields in which the degrees are conferred, and, in some categories, enrollment, federal research support, and selectivity of admissions criteria. (See page 45 for a description of the categories and the criteria for inclusion in each.)

Table 4 displays the range of retirement and insurance expenditures, the unweighted average expenditures, and median expenditures for each category. The table locates institutions (by category) on a scale from under 6.0 percent to 32.0 percent or more depending on each institution's reported total retirement and insurance expenditures as a percent of payroll. For example, doctorate-granting universities I (public and private combined) reported total retirement and insurance expenditures ranging between 12.0 percent and 25.9 percent; about a third of these institutions reported expenditures between 18.0 and 21.9 percent and 44 percent between 14.0 and 17.9 percent. For liberal arts colleges I, the overall range of total expenditures for retirement and insurance benefits was between 14.0 percent and 32.0 percent or more, with nearly a quarter of the institutions reporting expenditures of 20.0 to 21.9 percent and another 20 percent reporting expenditures of 18.0 to 19.9 percent.

Table 5 displays weighted average employer retirement and insurance expenditures by type of benefit for the nine institutional categories. The "All Benefits Combined" row at the bottom of the table provides a comparison across institutions by category. Looking at public and private institutions combined, comprehensive universities and colleges I reported the highest average expenditures for retirement and insurance benefits (22.1 percent) and liberal arts colleges II reported the lowest average expenditures (18.7 percent). Generally, the largest variation in reported benefit

expenditures was between public and private pension plan expenditures, with the publics exceeding the privates. This difference is partly attributable to the public plans' inclusion of nearly all employees while the private plans may limit participation to specified classes of employees.

Tables 4 and 5 provide a comparison of unweighted average and median expenditures (Table 4) with weighted averages (Table 5) for all retirement and insurance benefits combined. The unweighted averages give equal weight to each institution's response regardless of the size of its payroll or the number of its employees. The weighted averages take into account size of payroll or number of employees and thus incorporate a measure of educational expenditures commensurate with institutional size. In past surveys, the weighted averages have generally exceeded unweighted averages, a reflection of the fact that previous reports presented only three institutional categories (as opposed to nine in the current survey) with a necessarily greater diversity of institutional size within each category. Because the Carnegie Classifications are more narrowly focused and in some cases incorporate an element of size within the category, there is generally less difference between the two methods of calculation in the current survey report.

Table 6 gives a breakdown of employer retirement and insurance expenditures as dollars per employee per year for institutional categories. For all benefits combined, highest expenditures per employee were reported by public research universities I (\$6,966) and lowest by private liberal arts colleges II (\$3,750). The distribution of dollar expenditures per employee per year varies somewhat from expenditures as a percentage of payroll. Such variations may reflect different relative payroll levels among the institutional categories as well as the fact that amounts reported for each benefit category are not expenditures per plan participant but for all institutional employees, including the full-time equivalent of part-time employees, many of whom may not be eligible for some of the programs. Chart 2 illustrates by institutional category the dollars per employee per year reported for legally mandated expenditures, pension plan expenditures, and other benefit plan expenditures.

CHART 2

Average Employer Expenditures as Dollars per Employee per Year for Legally Mandated, Pension Plan, and Other Benefit Plan Expenditures by Institutional Category

Legally Mandated Expenditures	Doctorate	\$1,907
	Comprehensive	\$2,009
	Liberal Arts	\$1,878
	Professional	\$2,304
Pension Plan Expenditures	Doctorate	\$2,459
	Comprehensive	\$2,476
	Liberal Arts	\$1,406
	Professional	\$1,506
Other Benefit Plan Expenditures	Doctorate	\$2,029
	Comprehensive	\$1,709
	Liberal Arts	\$1,375
	Professional	\$1,622

RETIREMENT AND INSURANCE EXPENDITURES BY REGION

Tables 7, 8, 9, and 10 present employer retirement and insurance expenditure data grouped by geographic region: New England, Mid-Atlantic, South, Midwest, Southwest, and West.*

Table 7 gives the distribution of employer retirement and insurance expenditures as a percent of payroll for each region along with the unweighted average and median expenditures. Looking at the median figures for public and private combined, institutions in the West and Mid-Atlantic reported the highest median expenditures (20.1 percent) followed by New England (19.5 percent) and the Southwest (19.2 percent). The median expenditure was 18.8 percent for the Midwest and 18.3 percent for the South. In all regions except for the Southwest, public institutions had a higher median figure than did private, with public institutions in New England highest (25.1 percent of payroll) and private institutions in the South lowest (17.4 percent).

Table 8 provides data on regional variations in employer retirement and insurance expenditures by institutional category. For research and doctorate-granting universities combined, average expenditures for retirement and insurance benefits ranged between 17.6 percent (Southwest) and 23.2 percent (Mid-Atlantic). For comprehensive universities and colleges, expenditures ranged between a low of 19.3 percent (Southwest) and a high of 23.9 percent (West). Liberal arts colleges reported expenditures ranging from 18.7 percent

(South) to 22.0 percent (Southwest), and professional schools a range of 18.0 percent (Mid-Atlantic) to 23.9 percent (West).

Table 9 displays regional variations in average employer benefit expenditures as a percent of payroll by type of benefit. For all benefits combined, public institutions in the Mid-Atlantic region had the highest average expenditures (25.1 percent) followed by public institutions in the Midwest (22.8 percent). Lowest average expenditures were reported by private institutions in the South (17.5 percent). In all regions except the Southwest, public institutions reported higher average combined benefit expenditures than did private institutions.

Employer benefit expenditures as dollars per employee per year for each region are displayed in Table 10. Average dollar expenditures per employee were \$7,160 in the West; \$6,835 in the Mid-Atlantic; \$6,284 in New England; \$6,273 in the Midwest; \$5,085 in the South; and \$4,827 in the Southwest. (The average dollar figure for all institutions is \$6,206.) Dollars per employee per year for insured pension plans varied from a low of \$841 in the South to a high of \$1,821 in New England. For public employee pension plans, the spread was from a low of \$1,143 in the Southwest to a high of \$1,865 in the South. Chart 3 illustrates the number of dollars per employee per year by region for the three expenditure categories.

*See "Notes on the Survey" for a list of states included in each region.

	Mid-Atlantic	\$2,239
	South	\$1,255
	Midwest	\$2,004
	Southwest	\$701
	West	\$2,631

RETIREMENT AND INSURANCE EXPENDITURES BY INSTITUTIONAL SIZE

Tables 11 through 14 provide a measure of how employer retirement and insurance expenditures differ among institutions of varying size, based on student enrollment in the fall of 1988 as reported by the National Center for Education Statistics. Three degrees of size are compared: small — 500 up to 999 students; medium — 1,000 to 5,000 students; and large — over 5,000 students. (Institutions with enrollments under 500 are not included in the survey.)

Table 11 presents the distribution by size of institution of total employer retirement and insurance benefit expenditures as a percent of payroll. The median expenditures were 18.1 percent for small institutions, 18.9 percent for medium size, and 20.4 percent for large institutions. (The median expenditure for all institutions was 19.1 percent.)

Table 12 displays average retirement and insurance expenditures by size and institutional category. Leaving aside two categories with only one respondent each, highest average expenditures were reported by public professional schools in the small category (30.2 percent). The table permits institutions to compare their own retirement and insurance

expenditures with a highly focused group of similar institutions based on institutional category, control, and size.

By type of benefit and size of institution (Table 13), small public institutions reported the highest average expenditures as percent of payroll for all benefits combined (27.7 percent for the four institutions in the category) followed by large public institutions (21.9 percent) and medium size public institutions (21.1 percent). Average expenditures by size for private institutions were 19.2 percent for small, 19.5 percent for medium and 19.0 percent for large institutions.

Table 14 shows variations in reported average employer benefit expenditures as dollars per employee per year by size of institution. As in the preceding table, small public institutions reported the highest average dollar expenditure per employee, \$7,987, followed by large public institutions, \$6,717. Dollars per employee per year for all large institutions averaged \$6,430; for all medium size institutions, \$5,037; and for all small institutions, \$4,962. Chart 4 illustrates the reported expenditures by size of institution for the three types of expenditures.

CHART 4

Average Employer Expenditures as Dollars per Employee per Year for Legally Mandated, Pension Plan, and Other Benefit Plan Expenditures by Size

PENSION, LIFE AND HEALTH EXPENDITURES

Pension Expenditures. Payments to pension plans, along with social security, are generally an employer's major expenditure for employees' retirement and insurance benefits. Table 15, A-C, presents data on employer pension expenditures for institutions having pension plans — insured, noninsured, and public. Data in the table include number reporting and average pension expenditures as a percent of payroll for a given category and a distribution of total employer pension expenditures as percent of payroll.

All but nine of the 634 institutions participating in the survey reported payments to one or more pension plans. Pension payments ranged between 0.0 percent and over 10 percent of payroll. Of the 625 institutions, nine percent reported pension expenditures of 10.0 percent of payroll and over; these were primarily public research and doctorate-granting universities and public comprehensive universities and colleges.

For all plans combined, public institutions reported higher average total expenditures for pensions than did private institutions. By institutional category, public comprehensive universities and colleges reported the highest average pension expenditures (10.3 percent of payroll) followed by public research and doctorate-granting universities (8.5 percent).^{*} By region, public institutions in the Mid-Atlantic reported the highest average pension expenditures (9.5 percent), followed by public institutions in the Midwest (9.4 percent). By size, highest average pension expenditures were reported by large public institutions (8.7 percent) followed by medium public (8.4 percent) and small public (6.9 percent) institutions.

For insured pension plans, private institutions generally reported higher average expenditures than did public institutions. In many public institutions, an insured plan is an

alternative or supplement to a public retirement system, so that total pension expenditures may be divided between the two plans.

Life and Health Expenditures. Health care costs generally constitute an institution's third largest retirement and insurance cost, following payments to pension plans and social security. Health insurance expenditures can include one or more of the following: basic hospital-surgical-medical plans, self-insured plans, major medical insurance, dental care, vision care, routine physical exams, and payments to Health Maintenance Organizations. Combined expenditures for life and health care plans are given for those institutions unable to provide the figures separately. Table 16, A-C, shows employer expenditures for life and health insurance.

For life insurance, average expenditures were 0.3 percent and for health insurance, 6.1 percent of payroll. The average expenditure reported by institutions combining life and health insurance payments was 4.9 percent. Of the total 634 survey respondents, 94 percent reported life insurance expenditures and 100 percent reported health insurance expenditures.

For health insurance, average expenditures by institutional category (public and private combined) ranged between 5.2 percent and 6.3 percent. By region, health insurance expenditures averaged between 2.1 percent in the Southwest and 7.8 percent in the West. By size of institution, the averages for health insurance were 5.4 percent at small institutions, 5.5 percent at medium, and 6.2 percent at large institutions.

^{*}Employer contributions to public retirement systems may vary considerably, owing in part to widely different current and prior service cost assumptions and the extent, if any, of amortization of unfunded liabilities.

PAYROLL DEDUCTIONS

All institutions responding to the survey reported some type of deduction from employees' pay toward the cost of benefits (Tables 17-20). After social security (628 institutions), the largest number of institutions reported deductions for required pension contributions (531 institutions), followed by deductions for health care (525) and for life insurance (311). As percent of payroll, largest deductions were reported for social security (5.9 percent) and required pension contributions (3.3 percent). For all institutions and for all benefits combined, average deductions were 10.5 percent of payroll or \$3,044 per employee per year. Table 17 summarizes employee payroll deductions for all institutions. Tables 18-20 give payroll deduction data by institutional category, region, and size. Chart 5 illustrates average employee payroll deductions as dollars per employee per year by type of benefit.

By institutional category (Table 18), highest average employee payroll deductions were reported by public liberal arts colleges (13.5 percent for the seven institutions in this category), followed by public professional schools (12.7 percent) and private comprehensive universities and colleges and private liberal arts colleges (11.1 percent each). Lowest average payroll deductions were reported by public comprehensive universities and colleges (9.3 percent). Average total deductions as dollars per employee per year were: \$3,217, professional schools; \$3,139, research and doctorate-granting universities; \$2,789, comprehensive universities and colleges; and \$2,614, liberal arts colleges. The average deduction per employee for all institutions was \$3,044.

By region (Table 19), payroll deductions ranged from a low of 7.8 percent (public institutions in the West) to a high of 14.8 percent (public institutions in the Southwest). Payroll deductions for required pension contributions ranged

between 2.2 percent for private Southwest institutions and 5.2 percent for public institutions in New England. In viewing employee payroll deductions, it is important to keep in mind the relative levels of cost sharing they reflect between the employer and employee as well as the combined total spending levels for employee benefits.

By size (Table 20), average employee payroll deductions ranged between 9.6 percent for the four small public institutions to 12.7 percent for medium public institutions. As dollars per employee per year, average deductions ranged from \$2,772 at small public institutions to \$3,101 at large public colleges and universities.

Tables 21-23 summarize data on employee payroll deductions for pensions and life and health insurance. Considering all institutions, 84 percent of survey respondents reported employee deductions for pensions, averaging 3.3 percent of payroll for those institutions. Excluding institutional categories with a small number of respondents, required deductions for pensions ranged between 2.9 and 4.4 percent of payroll. For life or health insurance or both, 86 percent of respondents reported employee deductions averaging 1.8 percent of payroll, with a range from 1.0 to 1.9 percent of payroll (also excluding two small categories).

By region and size, highest average employee deductions as a percent of payroll were reported for pensions by public institutions in New England (5.2 percent) and by public medium-sized institutions (4.6 percent). Lowest average employee deductions for pensions were 2.2 percent—private Southwest institutions, and 2.5 percent—small public institutions. For life and/or health insurance, employee deductions as a percent of payroll ranged between 0.5 percent and 4.1 percent by region and between 1.4 percent and 1.8 percent by size.

PAYROLL DATA

Total gross payroll in 1989 for all reporting institutions combined was \$30.4 billion (Table 24). Average payroll amount per employee in 1989 was \$29,345. Highest average payroll dollars per employee were reported by the following categories: private professional schools and public research and doctorate-granting universities; public institutions in the

West and public institutions in New England; and large public and small public institutions. Lowest average payroll dollars per employee per year were reported by public liberal arts colleges, private institutions in the West, and medium public institutions.

(a) WEIGHTED AVERAGE TOTAL GROSS PAYROLLS OF REPORTING INSTITUTIONS
DIVIDED BY TOTAL NUMBER OF EMPLOYEES

(b) BASED ON 1987 CARNEGIE CLASSIFICATION OF HIGHER EDUCATION: SEE P.45
FOR A DESCRIPTION OF CATEGORIES

NOTES ON THE SURVEY

Data contained in this report were obtained through a TIAA-CREF survey questionnaire covering employee retirement and insurance expenditures for fiscal or calendar year 1989. The survey universe includes all institutions in the United States meeting the following criteria, based on information supplied by the National Center for Education Statistics: provision of at least four years of higher education, degree granting, private-nonprofit or public, student enrollments of 500 or more. Institutions with two or more campuses or branches were treated as a system and asked to complete a single questionnaire for all institutional components (unless the institution specified a preference for individual responses).

Institutions were classified by type, based on the 1987 Carnegie classification, which includes all colleges and universities in the United States listed in the 1985-86 *Higher Education General Information Survey of Institutional Characteristics*. The Carnegie classification groups institutions into categories on the basis of the level of degree offered—ranging from prebaccalaureate to the doctorate—and the comprehensiveness of their missions.

The categories are as follows:

Research universities I: These institutions offer a full range of baccalaureate programs, are committed to graduate education through the doctorate degree, and give high priority to research. They receive annually at least \$33.5 million in federal support for research and development¹ and award at least 50 Ph.D. degrees each year.²

Research universities II: These institutions offer a full range of baccalaureate programs, are committed to graduate education through the doctorate degree, and give high priority to research. They receive annually between \$12.5 million and \$33.5 million in federal support for research and development¹ and award at least 50 Ph.D. degrees each year.²

Doctorate-granting universities I: In addition to offering a full range of baccalaureate programs, the mission of these institutions includes a commitment to graduate education through the doctorate degree. They award at least 40 Ph.D. degrees annually in five or more academic disciplines.²

Doctorate-granting universities II: In addition to offering a full range of baccalaureate programs, the mission of these institutions includes a commitment to graduate education through the doctorate degree. They award annually 20

or more Ph.D. degrees in at least one discipline or 10 or more Ph.D. degrees in three or more disciplines.²

Comprehensive universities and colleges I: These institutions offer baccalaureate programs and, with few exceptions, graduate education through the master's degree. More than half of their baccalaureate degrees are awarded in two or more occupational or professional disciplines, such as engineering or business administration.³ All of the institutions in this group enroll at least 2,500 full-time students.⁴

Comprehensive universities and colleges II: These institutions award more than half of their baccalaureate degrees in two or more occupational or professional disciplines, such as engineering or business administration, and many also offer graduate education through the master's degree.³ All of the colleges and universities in this group enroll between 1,500 and 2,500 full-time students.⁴

Liberal arts colleges I: These highly selective institutions⁵ are primarily undergraduate colleges that award more than half of their baccalaureate degrees in arts and science fields.³

Liberal arts colleges II: These institutions are primarily undergraduate colleges that are less selective⁵ and award more than half their degrees in liberal arts fields.³ This category also includes a group of colleges that award less than half of their degrees in liberal arts fields but, with fewer than 1,500 students, are too small to be considered comprehensive.

Professional schools and other specialized institutions: These institutions offer degrees ranging from the bachelor's to the doctorate. At least 50 percent of the degrees awarded by these institutions² are in a single specialized field.

¹ The years used in calculating average federal support for research and development were 1983, 1984, and 1985.

² The academic year for determining the number of degrees awarded by institutions was 1983-84.

³ The liberal arts disciplines include area studies, biological science, the fine arts, foreign languages, letters, mathematics, physical sciences, psychology, the social sciences, and interdisciplinary studies. Occupational/preprofessional disciplines include agriculture, the natural sciences, architecture, and environmental design, business and management, communications, computer and information science, education, engineering, the health professions, home economics, law, library science, public affairs, and theology.

⁴ The years used for calculating average student enrollment were 1982, 1983, and 1984.

⁵ An index developed by Alexander W. Astin at the University of California at Los Angeles is used to determine the selectivity of liberal arts colleges.

Specialized institutions include: theological seminaries, Bible colleges, and other institutions offering degrees in religion; medical schools and medical centers; other separate health profession schools; schools of law; schools of engineering and technology; schools of business and management; schools of art, music, and design; teachers colleges; and corporate colleges and universities.

To provide comparative data on a geographic basis, institutions were grouped by region: New England, Mid-Atlantic, South, Midwest, Southwest, and West. The regions, based on classifications supplied by the National Data Service for Higher Education, include the following states:

<u>New England</u>	<u>Mid-Atlantic</u>	<u>South</u>
Connecticut	Delaware	Alabama
Maine	District of Columbia	Florida
Massachusetts	Maryland	Georgia
New Hampshire	New Jersey	Kentucky
Rhode Island	New York	Louisiana
Vermont	Pennsylvania	Mississippi
		North Carolina
		South Carolina
		Tennessee
		Virginia
		West Virginia
<u>Midwest</u>	<u>Southwest</u>	<u>West</u>
Illinois	Arkansas	Alaska
Indiana	New Mexico	Arizona
Iowa	Oklahoma	California
Kansas	Texas	Colorado
Michigan		Hawaii
Minnesota		Idaho
Missouri		Montana
Nebraska		Nevada
North Dakota		Oregon
Ohio		Utah
South Dakota		Washington
Wisconsin		Wyoming

The survey data also provide a measure of how employer retirement and insurance expenditures differ among institutions of varying size, based on total student enrollment in the fall of 1988, as reported by the National Center for Education Statistics. Three degrees of size are compared: small — 500 to 1,000 students; medium — 1,000 to 5,000 students; and large — over 5,000 students. (Institutions with enrollments under 500 are not included in the survey.)

In January, 1990, 1,274 questionnaires were mailed to individual campuses and systems. As of the May 25 cutoff

date, 634 questionnaires had been returned, a 50 percent response rate. Table 25 shows by control the survey response according to category, region, and size. The rate of response was highest for public research and doctorate-granting institutions, private institutions in the Midwest, and small public institutions.

The calculation of average expenditures for each benefit category reflects only the actual responses for that category. In the tables, the printed base counts shown in parentheses for each entry indicate the number of institutions that responded for a particular item. Totals for each benefit section (e.g., Legally Mandated Expenditures, Pension Plan Expenditures) include all institutions that responded to one or more items within that section.

The report provides average expenditures as percent of total gross payroll and as dollars per employee per year calculated under two methods. The weighted average is calculated from the total benefit expenditures of all reporting institutions for a given category divided by the total gross payroll or total number of employees for all such institutions. The weighted average takes into account size of payroll or number of employees and thus incorporates a measure of educational expenditures commensurate with institutional size. The unweighted average reflects the percent of payroll or dollar figure calculated individually for each institution, summed and divided by the number of reporting institutions. The unweighted average gives equal weight to each institution's response regardless of the size of its payroll or the number of its employees. The total number of employees in the calculation is determined as an average for the fiscal or calendar year in question. The figure is calculated by adding the reported full-time employees and the full-time equivalent of part-time employees at the beginning of the year to the comparable figure reported for the end of the year and dividing by two.

An institution may specifically compare its own retirement and insurance benefit expenditures with those reported in this study by filling out the questionnaire (printed at the end of this booklet) and by dividing each item to be compared by (1) total gross payroll and/or by (2) the average number of full-time equivalent employees (full-time employees plus the full-time equivalent of part-time employees) during the fiscal or calendar year 1989. The average employee figure for the year (denominator) is calculated as described in the preceding paragraph.

This survey, the seventh in a biennial series, covers expenditures for retirement and insurance benefits for the fiscal or calendar year ending in 1989. The survey collects and publishes up-to-date payroll-related data on the amounts paid by colleges and universities for these benefits. No other survey provides this kind of data for higher education.

Data derived from the employee benefits cost survey is tabulated using categories established by the Carnegie Classification of Higher Education. The Carnegie Classification is a widely recognized system which categorizes institutions on the basis of the level of degree offered and the scope and complexity of an institution's research and education program. The Carnegie Classification system permits colleges and universities to compare their own benefits expenditures with those of closely matched institutions.

Your participation in the survey is greatly appreciated. If someone other than yourself could better complete the questionnaire we would appreciate your redirecting it. A response from each institution is vitally important to ensuring an accurate picture of current costs for retirement and insurance benefits.

Each participating college and university will receive a copy of the published report.

EMPLOYEE RETIREMENT AND INSURANCE BENEFITS COST SURVEY

Instructions for completing the survey are given on the back page of the questionnaire.

Please give actual data or best estimate.

Retirement and Insurance Benefits

TOTAL FOR FISCAL OR CALENDAR YEAR ENDING IN 1989 (OMIT CENTS)

A. Total Gross Payroll \$ 107 | | | | | | | | | | | | | | | | | | | | | |

B. Expenditures for Legally-Mandated Programs (employer's share only)

- 1. Social Security (FICA tax) 17 | | | | | | | | | | | | | | | | | | | | | |
- 2. Unemployment Compensation 26 | | | | | | | | | | | | | | | | | | | | | |
- 3. Workers' Compensation 35 | | | | | | | | | | | | | | | | | | | | | |

Legally-Mandated Total \$ 44 | | | | | | | | | | | | | | | | | | | | | |

C. Pension Plan Expenditures (employer's share only)

- 1. Payments to public retirement systems (institutional contributions and any payments by state or local government on behalf of the institution) 53 | | | | | | | | | | | | | | | | | | | | | |
- 2. Payments (premiums) to insured pension plans (including TIAA-CREF and other insured retirement plans) 62 | | | | | | | | | | | | | | | | | | | | | |
- 3. Payments to private noninsured self-administered or trustee pension plans 208 | | | | | | | | | | | | | | | | | | | | | |
- 4. Supplementary or other payments under unfunded pension programs 17 | | | | | | | | | | | | | | | | | | | | | |

Pension Plan Total \$ 26 | | | | | | | | | | | | | | | | | | | | | |

D. Other Benefit Plan Expenditures (employer's share only)

- 1. Life insurance plans 35 | | | | | | | | | | | | | | | | | | | | | |
- 2. Health care plans 44 | | | | | | | | | | | | | | | | | | | | | |
- Check the following if included in your health care plan:
 Dental Care Vision Care Routine physical exams
- 3. Life and health care plans combined (for institutions unable to provide these figures separately) 53 | | | | | | | | | | | | | | | | | | | | | |
- 4. Travel accident insurance 62 | | | | | | | | | | | | | | | | | | | | | |

INSTRUCTIONS

1990

Expenditures for Fiscal or Calendar Year Ending in 1989

A. Total Gross Payroll. Include all wages and salaries paid in the fiscal or calendar year ending in 1989 to all hourly and salaried employees in all employee categories, full-time and part-time, excluding student employees.

B. Expenditures for Legally-Mandated Programs. Include all employer-paid Social Security taxes and employer payments (insured, self-insured, or direct payments) for Unemployment Compensation and Workers' Compensation.

C. Pension Plan Expenditures. Institutions whose employees are covered under public retirement system(s) (state or local) should include both institutional contributions to a public system and any payments made by the state or local government on behalf of the institution's employees. In some instances it may be necessary to estimate contributions to a public retirement system by multiplying the payroll of covered employees by an average percentage contribution rate, a figure that can be supplied by the retirement system.

Do not include *extra* contributions for tax-sheltered annuities under salary-reduction agreements.

D. Other Benefit Plan Expenditures. Report net payments for the insurance coverages in this section after deducting any dividends or credits returned to the employer by the insurer, or expected to be returned based on experience during the reporting year.

Include under group life insurance any premiums for accidental death and dismemberment insurance (AD&D) coverage.

THIS SURVEY IS CONFIDENTIAL

Identity of individual institutions will not be disclosed. Data furnished will be published only in the form of totals for groups of institutions. Only persons handling the research will see your report.

Health care plans include insured or prepaid basic hospital-surgical-medical, major medical, comprehensive, payments to Health Maintenance Organizations, dental plans, vision-care plans, and self-insured health care plans.

Enter *combined* life and health expenditures only if you are unable to list these two expenditure categories separately.

Payments for long-term disability income insurance should include both insured and self-insured plans, but not the cost of disability benefits provided as part of a pension plan, as under many public retirement systems.

E. Employee Payroll Deductions. For the items in this section, report deductions from employee pay, that is, the employee's own payments towards the listed benefit items.

For employee pension contributions, include only regular employee contributions (whether paid by deduction or under salary reduction agreements). *Do not include voluntary extra contributions.*

For life, health, and disability plan deductions, please include both regular and optional contributions made by employees.

F. Number of 1989 Employees. Report the number of full-time employees and the number of part-time employees (excluding student employees) at the beginning and end of the fiscal or calendar year ending in 1989.

Approximate or Incomplete Data. If you are unable to give exact data, please give estimates. If you are unable to break down the data items as requested in the questionnaire, note next to the entered item that it includes expenditures in another category.

Institutions Covered. If your data include other branches or campuses than indicated on the mailing label, please attach a list of these institutions.
