This project report describes how the Pima County Adult Education's Workplace Education Project provided workplace education at 11 Arizona worksites to 355 workers. The following activities are discussed: 27 class cycles were completed; the average class cycle was 11 weeks; pretests/posttests results indicated educational gains and gains in self-esteem; instructors combined the common components of the company-specific curricula by subject and developed a generic curriculum for each content area; during the second year, instructors updated the generic curricula and added curricula and job-specific matrices; all staff received one-to-one and small group training on an ongoing basis; and advisory committees were a useful tool for keeping classes relevant, participatory, and learner centered. The appendix contains the following: (1) generic curricula—English to Speakers of Other Languages (ESOL), reading skills, writing skills, math fundamentals, math S.P.C., algebra, communications skills, problem solving; (2) job-specific curriculum matrices (reading, writing, math, communication and listening skills, problem solving); (3) sample company-specific curriculum and lesson, pre- and postassessments, ESOL needs assessment, manager evaluation, and student course evaluation; and (4) articles. The final evaluation report notes that the project exceeded the proposed number of worksites and participants and project objectives in the area of curriculum. (YLB)

Pima County Adult Education's (PCAE) Workplace Education Project, funded under the National Workplace Literacy Program, provided workplace education classes at eleven worksites to 355 workers. The worksites included: Hughes Missile Systems Company, Power Convertibles, the University of Arizona (Facilities Management), Park Inn and Breakfast Club, El Rio Health Center, Community Psychology and Education Services (CPES), Concrete Design Inc., Tri-Tronics Inc., Burr-Brown Corporation, 3M, and Lambda Electronics.

COMPARISON OF ACCOMPLISHMENTS TO OBJECTIVES

The following information compares actual accomplishments to the objectives contained in the approved application.

Objective 1
A minimum of 275 adults with inadequate basic skills will be recruited and trained in workplace classes; at least 50% of whom will be representatives of minority groups.

Accomplishments
Three hundred and fifty-five (355) workers were recruited and trained in on-site workplace classes, 57% of whom were representatives of minority groups.

Objective 2
A minimum of eight worksite locations, including both large and small Tucson employers, will be served.

Accomplishments
Eleven worksites, including large and small employers, were served.

Objective 3
A minimum of 27 class cycles will be completed. A "class cycle" is a class held in a worksite location for an 8-10 week time period.

Accomplishments
Twenty-seven (27) class cycles were completed. The average class cycle was 11 weeks (20-80 hours of instruction). The class cycles ranged from 2 to 3 hour classes once a week for ten weeks (20 to 30 instructional hours) to classes twice a week for 10, 15, and 20 weeks (40 to 80 instructional hours).
Objective 4
All learners will be pre- and post-tested at the beginning and end of each cycle to measure enhancement of job-specific basic skills. Qualitative and quantitative tools will be developed to measure workplace outcomes such as improved productivity, increased attendance at work, increased employee readiness for promotions, increased self-esteem, decreased error rates, and reductions in waste, turnover, lost management time, and downtime.

Accomplishments
All learners were pre-tested and those that completed (282/79%) were post-tested. Educational gains as well as gains in self-esteem were obtained. It was difficult to obtain hard data on increased productivity and attendance at work because managers didn't always respond to these questions. Although we do not have hard data on increased productivity and attendance, managers who did respond to these questions felt that participating workers were either productive and had good attendance already or they had improved in these areas. We have developed a new evaluation tool to be filled out by managers that includes increased employee readiness for promotions, decreased error rates, and reductions in waste, turnover, lost management, and downtime. The problem of managers not filling out the forms as well as the difficulty in linking improved basic skills with many of these factors remains. We are contemplating having supervisors/managers come to a meeting and talking with them in a discussion format about these issues.

Objective 5
Advisory committees will be formed at worksites that include both workers and employers in order to meet both worker and employer literacy goals.

Accomplishment
Advisory committees were formed at worksites that included both workers and employers in order to meet both worker and employer literacy goals.

Objective 6
Information about the project and materials developed will be disseminated to the Curriculum Coordination Center and the ERIC Clearinghouse. The project will be presented at one or more national or statewide conferences. The accomplishment of these objectives will be evidenced by information included in project reports and in files maintained at the project's office and available for review.

Accomplishments
Staff of Pima County Adult Education’s Workplace Education Project presented at local, state, and national conferences. Linda Hellman, Project Manager co-presented at the Project Directors' Start-Up Meeting in Washington, D.C. in April, 1993 on If I Knew Then What I Know Now. Jane Brown, Lead Teacher, and Elaine Dow, ESOL Specialist, co-presented a workshop entitled Teambuilding Activities for Workplace Education at COABE (Commission on Adult Basic Education) in New Orleans, Louisiana in June, 1993. Elaine presented at TESOL (Teachers of English to Speakers of Other Languages) in Atlanta, Georgia, in April,
1993 on *TQM in ESL*. Jane, Elaine, and Brad Hollis, another Workplace Education Project staff member, presented a teambuilding workshop entitled *Teaming with Ideas* at the Arizona Adult Education Conference in Phoenix, Arizona, in October, 1992. Linda, Jane, and Elaine presented at the University of Arizona’s Spring Conference in Tucson, Arizona, in March, 1993 on the Workplace Education Project and workplace literacy in general.

Two articles were published about the Workplace Education Project during this grant cycle. "Literacy Program Receives Federal Honors" was published in the *Arizona Daily Star* on April 12, 1993. "A Partnership in Learning" was published in the Bureau of Business Practice’s *Employee Relations Bulletin* in July, 1992. The Workplace Education Project was also mentioned as a provider in the BCEL Brief *Basic Skills in the Hotel & Food Service Industries*. Copies of these articles are included in the Appendix of this Final Report.

The Workplace Education Project had a number of people visiting the program during the grant cycle. Marian Banfield from the U.S. Department of Education came recently. Others included: Kathy Lane from El Camino Community College in Torrance, California; Dr. Mary McGroarty from Northern Arizona University in Flagstaff, Arizona; and Bill Morrison from Cochise College in Douglas, Arizona.

The Project Manager and other staff members have disseminated information and materials in response to numerous requests from adult education providers, workplace education providers, and researchers. Materials that were developed in this grant cycle were disseminated at the Project Directors’ Start-Up Meeting for the 1993-1994 grants in April, 1993 and at the Project Directors’ Close-Out Meeting for this grant cycle in September, 1993. Through the numerous presentations, PCAE staff members have given out many handouts about various topics in workplace education. Aside from presentations, the Workplace Education Project has sent information and materials developed in the Project to Cochise College, Douglas, Arizona; the National Clearinghouse on Literacy Education in Washington, DC; Rush Medical Center in Chicago, Illinois, Casper College in Casper, Wyoming; the Southport Institute for Policy Analysis in Washington, D.C.; the Educational Services Program in Tallahassee, Florida, Magma Copper Company in San Manuel, Arizona, and Columbia University, in New York City. Additionally, the Project Manager has spoken on the telephone to other providers and people requesting information about the Workplace Education Project. This Final Report and Appendix will be sent to the Curriculum Coordination Center and the ERIC Clearinghouse.

**CURRICULUM**

All curricula used in workplace education classes were developed by the staff of the Workplace Education Project. The curricula linked the goals of both the participating workers and the individual companies, making the instruction learner-centered and participatory.
During the 1991-1992 grant cycle, the instructors combined the common components of the company-specific curricula up until that point together by subject (reading, writing, math, and ESOL) and developed a generic curriculum for each content area. These curricula were used by instructors in the Workplace Education Project to customize from, rather than reinvent the wheel each time we began a class at a new company. Through dissemination, these curricula benefitted other workplace education providers as well as our own instructors. The instructors in the basic skills area also developed job-specific matrixes that linked competencies to jobs.

During this grant cycle (1992-1993), the instructors updated the already existing generic curricula and revised them when appropriate. They also added a Communication and Listening Curriculum, a Problem-Solving Curriculum, and Job-Specific Matrixes for both areas. Company-specific curricula were also developed for each individual site. Generic curricula and job-specific matrixes are included in the Appendix of this Final Report.

STAFF DEVELOPMENT

All staff involved in the Workplace Education Project received one-to-one and small group training with the Project Manager and Lead Teacher on an on-going basis. Topics covered included task analysis, assessment, curriculum writing, lesson planning, evaluation, and student support services. Teachers also met regularly to share ideas, lessons, etc. The Project Manager conducted on-going observations of classes at every workplace. Pima County Adult Education also has an extensive in-service staff development program and staff working in this Project benefitted from both PCAE's program and the specific training offered through the Workplace Education Project.

In addition, the staff of the Workplace Education Project attended several conferences on workplace literacy, adult education, and ESOL including COABE (Commission on Adult Basic Education) in New Orleans, Louisiana, TESOL (Teachers of English to Speakers of Other Languages) in Atlanta, Georgia, AZ-TESOL in Yuma, Arizona, and the Arizona Adult Education Conference in Phoenix, Arizona. In addition, the Project Manager and the Lead Teacher are members of the local chapter of ASTD (American Society of Training and Development). They attend a monthly meeting in which one training area is demonstrated.

ADVISORY COMMITTEES

Advisory Committees were formed which included representatives from the training or human resource department of the company, managers, students, instructors, and the Project Manager. The groups met a minimum of once a cycle to discuss how the class/es were going, any problems or concerns, suggestions for improvement, ideas for future classes, etc. The advisory committees were a very useful tool for keeping the classes relevant, participatory, and learner-centered. Aside from the Advisory Committees, we conducted on-site planning meetings and task analyses at every worksite, which incorporated workers' input.
EVALUATION

The Workplace Education Project utilized Nancy Siefer as our outside evaluator. Her expertise in workplace literacy has been invaluable in guiding the Project and helping it become an exemplary program. Nancy's primary focus was quality. PCAE's Workplace Education Project worked with Nancy from the initial stages to the end of the grant cycle. Not only was the program evaluated on an on-going basis, but also each class, instructor, and student were evaluated. The four levels of evaluation which follow list who or what were evaluated in each level and by whom.

ADDITIONAL INFORMATION

Linda Hellman, Project Manager of the Workplace Education Project, was the recipient of ASTD's Old Pueblo Chapter's 1992 Human Resource Development Award. Her program was cited for assisting numerous workers in basic skills and her commitment to adult education. Jane Brown, Lead Teacher, Susana Mincks, Associate Director of PCAE, and Linda Hellman presented at an ASTD monthly meeting followed by a three-hour institute on Designer Learning: Tailoring Your Training to Meet the Learning Styles of Your Audience. The presentation was very highly received. Brad Hollis, the instructor at Hughes Missile Systems Company, presented the workshop Signs of Reading Difficulty for Hughes technical trainers to aid them in diagnosis and referral of poor readers.

In addition to our federal grant, the Workplace Education Project provided Skills Enhancement Classes to Arizona Department of Economic Security (DES) workers. This is an innovative project because it involves a partnership between two governmental agencies. In 1992-1993, PCAE trained 123 DES employees, 96 in reading and writing and 27 in math/problem solving through a special grant.
OUTCOMES

The following pages give statistics on the number and characteristics of project participants who did and did not complete the program as well as the measurable learning gains. In this report, we have identified "completers" as the workers who completed two-thirds or more of the classroom time offered in each cycle.

Our statistics indicate that 282 participants (79%) out of 355 participants served completed project activities and 73 participants (21%) did not. Many of our "non-completers" were laid off while they were enrolled in workplace education classes. Since our goal was to train 275 workers, we are pleased that more workers than were targeted in the grant completed the programs at their worksites.

PCAE instructors pre-tested every participant at every location when he/she entered the workplace education class. The instructors post-tested at the end of each cycle, which ranged from 10-20 weeks in length. A total of 123 workers tested higher in basic skills and another 168 improved their communication skills. The 123 number was derived from workers that participated in the reading, writing, math, ABE, and problem-solving classes. The 168 number was derived from workers that attended the English to speakers of other languages (ESOL) classes and workers that took a class in communications. Two hundred and seventy completers and 21 non-completers had learning gains documented by pre-/post-test results or determined by teachers, supervisors, or workers themselves. All 282 completers and 21 non-completers documented increases in self-esteem.

In ESOL, PCAE used teacher-designed pre- and post-assessments which the instructors developed according to the requirements of each workplace. The tests were scored on a holistic scale of 0-6:

0 - pre-beginning
1 and 2 - beginning
3 and 4 - intermediate
5 and 6 - advanced

The test components included speaking, listening, reading, and writing. Students were scored on individual components and also received an average overall score. For example, a student might begin the class with an average overall score of 1.3 and post-test at 2.7. A sample ESOL pre- and post-test is included in the Appendix of this Final Report.

Several types of assessments were used in the basic skills areas, both standardized and teacher-made. For the math classes, the instructors either developed their own tests or used ones that were taken from the textbooks used in the class. In reading, the instructor created a reading assessment utilizing company material. The cloze approach was used on a passage taken from the employee handbook. Different selections were used for the pre- and post-tests.

In the writing classes, a student writing sample was taken. The writing samples were scored holistically. The Workplace Education Project's Holistic Scoring Guidelines are included in the Appendix of this Final Report. We also tested students using the Language Mechanics
and Language Expression portions of the TABE (Tests of Adult Basic Education), Level A, Forms 5 & 6. Although the TABE uses grade levels to document results, we provided students and employers the results in a percentage format.

For communication skills classes, students were given a teacher-made pre- and post-assessment which focused on active listening; passive, assertive, and aggressive communication styles; and communication strategies. Students were also given two assessments, the SELF inventory and True Colors, to determine individual communication styles. These were not pre/post-assessment assessments.

In problem-solving classes, the pre-assessment tool was the Cornell Critical Thinking Test, Level X; the Level Z was used for the post-assessment. This assessment measured participants' abilities in logical, deductive and inductive reasoning, identifications of assumptions and predictions, and creative-thinking skills. A teacher-made assessment was also used to measure participants' understanding of flow charts, Ishikawa diagrams, check sheets and Pareto charts. Each student received an individual item analysis which pinpointed areas of strength and weakness.

After each class at every worksite, the Project Manager sent a letter to the company summarizing what happened during the class cycle, including a compilation of the evaluation results from both the class participants and the managers and the results of the pre/post-test scores. When the employers received the results of the pre- and post-test scores, the workers' names were not used and the results were reported in composite form. Students' learning gains from pre- to post-test are one indicator of how successful the classes have been and are a valuable marketing tool for continuing the program in the future.

10.3 Circle Graph
10.4 Line Graph

11.0 PROBABILITY

12.0 MATHEMATICAL FORMULAS
12.1 Ration
12.2 Proportion
12.3 Area
   a. Computing the area of a square
   b. Computing the area of a rectangle
   c. Computing the area of a parallelogram
   d. Computing the area of a triangle
   e. Computing the area of a circle
12.4 Perimeter
   a. Computing the area of a square
   b. Computing the area of a rectangle
   c. Computing the area of a triangle
   d. Circumference of a circle
12.5 Volume
   a. Computing the volume of a cube
   b. Computing the volume of a rectangle
   c. Computing the volume of a container
   d. Computing the volume of a cylinder
1.0 DATA COLLECTION
1.1 Types of Data
   a. Variable Data
   b. Attribute Data
1.2 Tally Charts and Check Sheets

2.0 MATH SKILLS FOR S.P.C.
2.1 Using A Calculator
2.2 Finding The Mean
2.3 Finding The Median
2.4 Finding The Range
2.5 Rounding
2.6 Finding Percent

3.0 GRAPHING SKILLS FOR S.P.C.
3.1 Principles of Graphing
   a. Reading Axes
   b. Plotting Points
   c. Interpolation
   d. Control Limits
3.2 Variable Control Chart
3.3 Attribute Control Chart
3.4 Other Chart Types

4.0 S.P.C. PROBLEM SOLVING
4.1 In Control And Out Of Control
4.2 Interpreting Control Chart Patterns
4.3 Histograms
4.4 Pareto Analysis
   a. Benefits
   b. Procedure

5.0 APPLICATION

Specific applications of these principles will depend upon the idiosyncratic programs and materials of each company.
1.0 ALGEBRAIC LANGUAGE
  1.1 Using Letters for Numbers
  1.2 Showing Operations in Equations
    a. Adding
    b. Subtracting
    c. Multiplying
    d. Dividing
  1.3 Exponents
    a. What are Exponents?
    b. Using Exponents
  1.4 Square Roots
    a. What are Square Roots?

  1.5 Using Parentheses
  1.6 Order of Operations
  1.7 Formulas
    a. Reading Formulas
    b. Applying Formulas
  1.8 Applications
    a. F to C Formula
    b. Find Area in English Units
    c. Find Area in Metric Units
    d. Apply Simple Interest Formula
    e. Apply Compound Interest Formula
    f. Change English to Metric Units
    g. Change Metric to English Units
    h. Find Circumference & Perimeter in English Units
    i. Find Circumference & Perimeter in Metric Units

2.0 SIGNED NUMBERS
  2.1 Number Line
  2.2 Ordering Signed Numbers
  2.3 Add Signed Numbers
  2.4 Subtract Signed Numbers
  2.5 Multiply Signed Numbers
  2.6 Divide Signed Numbers
  2.7 Applications
    a. Reading a Digital Scale with Signed Numbers
    b. Reading an Analog Scale with Signed Numbers
    c. Finding the Mean with Signed Numbers
    d. Finding the Median with Signed Numbers
    e. Finding the Range with Signed Numbers
3.0  SOLVING EQUATIONS WITH 1 UNKNOWN  
3.1  What is an equation?  
3.2  Solve by Subtraction  
3.3  Solve by Addition  
3.4  Solve by Division  
3.5  Solve by Multiplication  
3.6  Solve Fractional Equation  
3.7  Solve by 2 Steps  
3.8  Solve by Collecting Terms  
   a. Collecting Terms on 1 Side  
   b. Collecting Terms on Both Sides  
3.9  Solve Equations with Parentheses  
3.10 Applications  
   a. Assigning Variables to Real Problems  
   b. Setting Up an Equation for Real Problems  
   c. Rate of Work Problems  
   d. Mixture Problems with Chemicals  

4.0  RATIO AND PROPORTION  
4.1  What is Ratio?  
4.2  Setting Up and Reducing Ratio  
4.3  What is Proportion?  
4.4  Setting Up a Proportion  
4.5  Solving a Proportion Problem  
4.6  Applications  
   a. Mixing Paint

3.3 Techniques for Handling Negative Behaviors

3.31 Broken Record: Calm repetition--saying what you want over and over again--will eventually get through.

3.32 Fogging: Teaches acceptance of manipulative criticism by calmly acknowledging to your critic that there may be some truth in what is said, and allows you to remain your own judge of what you do.

3.33 Negative Assertion: A skill that teaches acceptance of your errors and faults (without having to apologize) by strongly and sympathetically agreeing with hostile or constructive criticism of your negative qualities.

3.34 Negative Inquiry: A method of desensitizing you to criticism from people you care about so you can listen to what they tell you, extinguishing repetitive and manipulative criticism from these people and reduce the use of right-and-wrong structure.

3.35 Limit-Setting: Involves teaching another person how you expect to be treated (this includes teaching others how to give you negative feedback while defusing their anger and resentment)--the method is to disagree with the comment and make a self-affirmative statement.

POWER CONVERTIBLES
ESOL 10-Week Curriculum

Two classes per week lasting two hours each, for a total of 40 hours of instruction.

Week 1a  Pretest, needs assessment
1b  Tools used on the job

2a  Proper use and maintenance of tools
2b  Describing which tool to use when

3a  Describing processes in general
3b  Describing specific work process and asking questions for clarification

4a  Teaching someone else the job process
4b  Anticipating and solving problems on the job

5a  Safety equipment, reason for, consequences for failure to use
5b  Describing proper use of safety equipment informing new workers of need

6a  Identifying hazards at work and working around them safely
6b  Reporting accidents and seeking attention

7a  Following directions around the worksite
7b  Finding things within own area

8a  Understanding company rules and regulations
8b  Demystifying the company handbook

9a  Understanding benefits
9b  Performance review, understanding the criteria

10a  Dealing with criticism, fair and unfair
10b  Post test
Lesson Objectives: Demystifying the company handbook

Procedure:

1. Pass out translated version of one section of company handbook: PTO (Personal Time Off). Items not in order.

2. Working in pairs, participants look at each item in turn, ask and answer questions of each other to insure understanding. When they understand, they look up.

3. Participants, in pairs, form a question which is answered by the item.

4. After understanding is reached on all items, pass out original handbook section on PTO.

5. Participants match "easy" version to real handbook.
   a. vocabulary
   b. passive voice

6. Repeat with other sections of the handbook.
1. At Power Convertibles, what is the first job in the assembly process?

2. Pin attach is after ____________ and before ________________.

3. The only job that everybody does is ____________.

4. Duenh’s job is ____________________.

5. What’s your job?

6. What does PTO mean?

7. What is the difference between PTO and vacation?

8. What is the best thing to do if you have a flat tire on the way to work?

9. What does tardy mean?

10. What do you want to learn in the next ten weeks of this class?
1. At Power Convertibles, what is the last job in the assembly process?

2. What’s the difference between *quality* and *quantity*?

3. Jose’s job is ____________________________.

4. Where does the product go after you work with it?

5. What’s the best thing to do when you wake up on a work day with a headache and a bad cold?

6. What’s a fancy name for *evaluation*?

7. What is the one job that everybody does at Power Convertibles?

8. Where’s the encap room?

9. If you think there is a mistake in your paycheck, what do you do?

10. What’s an example of a special religious holiday?

Effort has helped more than 1,000 Tucson workers

By L.A. Mitchell
The Arizona Daily Star

Four years ago, Pima County, armed with a $72,000 grant, set out to revolutionize workplace literacy programs.

Today the Workplace Education Project, coordinator Linda Hellman and its instructors have helped more than 1,000 employees at 33 Tucson companies learn everything from algebra to effective listening.

The federally funded Workplace Education Project has received kudos from the U.S. Department of Education as one of the top workplace programs nationwide.

Hellman's program is one of a handful that have received four grants from the National Workplace Literacy Program in Washington, D.C. Few workplace education programs have received more than one.

The program, administered through the Pima County Adult Education agency, provides free or low-cost training programs to local companies. Although the program aggressively promotes literacy, instructors will help companies upgrade a variety of workplace skills.

"I see it as an incredibly valuable gift to the community," said Melissa Webborn, human resources director for Tri-Tronics Inc. in Tucson. "It's extremely needed."

Hellman attributes the program's success to a national problem: Companies, she said, have few low-cost, quality alternatives to upgrade the skills of their employees.

For companies that have the funds to revamp a topic that employees may have mastered years ago but need a refresher course in.

And in a changing workplace, some employers don't know where to start when a group of employees needs additional training to adapt to new technologies.

"You need a higher level of skills today to get things done," Hellman explained.

American reading abilities

Reading remains an emphasis in workplace programs that obtain federal funding. According to the U.S. Department of Education, one of every five American workers reads below the eighth-grade level, and one of every seven reads below the fourth-grade level.

Unlike other university or community college programs, Tucson's workplace education project has no catalog of classes, and instruction is based on what each company needs.

Whenever possible, instructors model classes after what the employee is required to do in the workplace.

"What's great about our program is that it's tied to what people need in their jobs," Hellman said.

At Tri-Tronics, where Tri-Tronics' Welborn.

"We'd like to break into the small-business community more," she said. "You don't have to be a Hughes or a Burr-Brown to use our services."

In addition to English, reading, writing and math classes, Hellman's team also offers problem solving, GED preparation, communication, conflict resolution, test-taking and job-hunting classes.

Several times, the workplace education project group has worked with businesses that are trying to fix a specific problem or "brush up" on a particular topic. Hughes, Burr-Brown and AlliedSignal Controls and Accessories, for example, all have asked for classes that would enable employees to review fractions, decimals and other math fundamentals.

Although all classes are offered on-site and many companies allow employees to attend class on work time, there's still a stigma attached to skills classes that must be overcome, she said.

"Not remedial" classes

Hellman said traditionally "workplace literacy" meant classes for entry-level or hourly employees. But both hourly employees, salaried workers and managers have attended skills classes, she said.

"We can upgrade the skills of all employees," Hellman said. "They're not remedial (classes). For some, it's new material, for others it's review."

Participants, some with advanced academic degrees, are assessed before and after a class and all results are confidential, she said.

Each workplace education program funded by the National Workplace Literacy Program must also obtain community partners. Tucson's are the Arizona Consortium for Education and Training, the Southern Arizona Inkeepers' Association and the Tucson Metropolitan Chamber of Commerce.

Although some of Southern Arizona's largest companies have come to depend on the program, Hellman isn't sure of the fate of the workplace education project. The government awards funding for 18 month periods on a yearly basis, and Hellman must apply again for next year's funding in June.

Some companies make non-monetary donations to the programs and others who offer multiple classes make cash contributions. But the program couldn't survive on those contributions alone, because classes are offered to companies at a cost or for free.

Many local companies say on-site classes would be too costly without the workplace project.

"I don't think we'd be able to offer these classes (without this program)," said Ellen Grieser, manufacturing skills training manager for Burr-Brown Corp. "It's what we need for a reasonable cost."

Burr-Brown also likes classes tailored to its employees. Hellman team visited the company seven times before designing a curriculum.

Classes spend as much time on lesson as the employees need.

"They're very flexible," Grieser said. "If people are getting hung up on fractions, they just take it time."

Callaway Gardens, a resort in Pine Mountain, Georgia, worked with West Georgia Tech to assess the need for a general basic skills program for its employees who come from surrounding rural communities. As a result, an on-site program has been set up that serves employees of Callaway Gardens and the general public. Callaway Gardens provides the facilities, and West Georgia Tech the instructor and materials.

During the first three years (1988-89 through 1990-91) of its National Workplace Literacy Program, the DOE awarded some $41 million in grants to 149 business-education partnerships. As detailed in its publication, Workplace Literacy: Reshaping the American Workforce (see References), about 8 percent of the grants were awarded to the hotel and hospitality industry. The current (FY93) level of funding for the Program is about $19 million.

The Governor's Council for Literacy has been encouraging hotels and other businesses around the state to set up workplace literacy programs. The examples cited here are only a sampling of those that have been established or are underway: The Kaanapali Beach Hotel works with the Maui Hui Malama Literacy Program in Wailuku. Volunteers from the hotel staff and surrounding community are trained to be tutors for hotel employees desiring tutorial help. Rock Resorts and the international Longshoremen's and Warehousemen's Union in 1990 set up a basic skills program for workers on the island of Lanai. Participants are either making the transition from agricultural to tourist industry jobs or trying to qualify for better jobs in the pineapple industry. The Coco Palms Hotel in Kauai operates a job-linked basic skills program on company premises in which employees tutor fellow employees, using a curriculum which includes vocabulary and concepts encountered on the job. The Hilton Hawaiian Village Hotel in Honolulu has established workplace literacy and ESL Programs. (See also #14 below.)

The Waikiki Lifelong Learning Center (WLIC) Project is an expansion of Project SUCCESS, which began in 1988 with seven ITT Sheraton Hotels for the purpose of providing their housekeeping, food service, and other entry-level staff with ESL instruction, high school diploma preparation, and basic skills. The new Center, begun in 1992 with funding from the National Workplace Literacy Program of the U.S. Department of Education, has five business partners: the original group of ITT Sheraton Hotels in Hawaii, Aston Hotels and Resorts, HTH Corporation, Otaka Inc., and Tropic Art Design. It is administered by the Department of Curriculum and Instruction at the University of Hawaii's College of Education. The five business partners in WLIC constitute a total of 19 Waikiki hotels. The Center offers free workplace literacy instruction to all employees of the participating businesses to enhance their on-the-job skills and promotion opportunities, prepare them for U.S. citizenship and driver's license tests, and
A PARTNERSHIP IN LEARNING

You've read how some companies, large and small, are tackling their workforce literacy problems. Now let's take a look at how those who are delivering the services view their role.

WORKPLACE EDUCATION PROJECT: Providing Skills for Life

The Workplace Education Project (Tucson, AZ) got off the ground in 1988 after receiving a $72,000 grant from the National Workplace Literacy Program (NWLP). It was one of 37 projects in the country to receive funding from the newly developed program, which is administered by the U.S. Department of Education. The money has allowed this Arizona program to work with several partners to develop training programs for businesses around the Tucson area. The $72,000 is the initial round of funding, and since that time the Project has been funded twice by NWLP.

The Workplace Education Project, part of the Pima County Adult Education program, brings together business partners who need help training employees. The business partners, who pay matching funds, include the Arizona Consortium for Education and Training, a group of manufacturing companies, hospitals and educational institutions, the Southern Arizona Innkeepers Association, a consortium of hotels and resort corporations, and the Tucson Metropolitan Chamber of Commerce, the latest partner. "This partner is our vehicle into the small-business community, so we can meet their needs," says Project Coordinator Linda Hellman.

"We work with them to develop training programs. We perform task analyses and find out what their workers need in skills training," she says. All classes for WEP's various partners are held on site. In most cases, employees are given release time to attend the courses, which are scheduled to accommodate working hours. Subjects vary, depending on the individual company's needs, but Hellman says the goal is to link learning to the job. "We try to be job related as much as possible and to become part of the workplace setting."

While providing job-linked learning is the primary goal, "we also try to make classes relevant to employees' lives outside of work." She points to problem-solving skills or working with numbers as examples of skills that transfer from the classroom to employees' jobs and to their lives. "We like to do things in class that will help workers beyond the job—such as improving their writing skills or furthering their general education. If employees tell us their company might have layoffs, we'll go into résumé writing if that's what workers want. We are very responsive to their needs."

Some classes teach the basics to get employees up to a level where they can go on to learn the skills required for their jobs or for job advancement. "We are currently teaching a reading and writing course for one company that draws from different departments, but we apply the lessons to their job situations. We get them into the writing activities they need, such as writing incident reports, memos, claim and adjustment letters, or performance appraisals. We put them into a context that has immediate value."

Class structure is nontraditional. "It's a very flexible program," she says. "We can work with individuals at their own levels. But people also work in groups, depending on their rate of learning." Employees take part in what Hellman calls cooperative learning activities. "We have them work in groups to enhance their team-building skills, which companies really want these days."

Hellman works very closely with each company to establish goals, and then fine-tunes or makes changes as classes move along. "This is a participatory program. We try to have workers involved in all aspects of the program. Advisory committees help us achieve this goal. We get a lot of input from the workers initially, but we've found that our first interviews don't always reveal all their needs," says Hellman. "Sometimes we're five weeks into a class before employees reveal additional problems they may have been reluctant to tell us about at the start. For instance, after a few weeks in a class we were running for a college's custodial workers, one problem came up. They had trouble getting college students out of the rest rooms so that they could clean up. That's not something you would necessarily discover in a task analysis. So we built scenarios to teach them how to deal with this situation." Such a problem-specific approach is a big benefit to workers.

Hellman stresses that classes are not just for entry-level or hourly workers. "We have supervisors and managers attend some classes with their employees." She says this is a positive development, since companies that are shifting to Total Quality Management want all employees to upgrade their skills. "We don't advertise our classes as remedial or basic," she adds. "This is an opportunity for everyone."
From May, 1992 through October, 1993, I evaluated the Workplace Education Project during five formal site visits and numerous telephone conversations. From the project's inception, site visit observations were incorporated into ongoing activities, and the project director's quarterly and final report reflect the recommendations made during those site visits. After each site visit, I met with the project director, Linda Hellman, and project staff to discuss my observations and suggestions. Linda met with project staff and partners in subsequent meetings to ensure the timely integration of the formative evaluation results.

I met with Linda and her staff five times during the grant period: June, 1992; October, 1992; January, 1993; June, 1993; and October, 1993. Although some of the site visits had a particular focus, e.g., advisory boards or curriculum, Linda usually arranged an itinerary for me that included observations of classes, meetings with company personnel and students, and tours of specific companies. Three of the visits also included participation in staff meetings. Following each site visit, Linda, appropriate project staff, and I reviewed my observations and made suggestions for improving project quality and effectiveness. Notes from each of these meetings are on file in my office. In December, 1993, I reviewed Linda's draft of the final report.

As indicated in the director's final report, the project has met and even exceeded the number of participants and worksites originally proposed. The
project has served a variety of small companies such as Concrete Design as well as international companies such as Hughes. In each company, project staff have designed and taught courses customized to each company's needs. Even more, project staff have attempted to individualize course instruction and materials to each student/worker's needs. They have been able to do this because of the strong collaboration among company personnel, project staff, and students. Potential problems or concerns were addressed immediately either in the classroom or within the active advisory boards at each worksite. The project and participating companies met the challenge to involve minority workers; as stated in the final report, more than half of the workers who participated in the classes were from minority groups (57%).

The project has also exceeded original project objectives in the area of curriculum. The staff have generated not only specific company materials, but they have also designed generic workplace curricula that they and other workplace education sites can build upon. Assessment tools have been refined and made available to other projects and worksites. In fact, one of the characteristics of this project has been its enthusiasm to share ideas and disseminate materials to as wide an audience as possible.

The Workplace Education Project has been a pleasure to monitor. Its excellent director has continually enjoyed strong working relationships not only with her staff but with personnel from each company as well as with students at each site. Common problems such as scheduling classes or release time are dealt with immediately and openly. Project staff continue to be equally gifted in the area of curriculum development as well as teaching. Evaluations of the instructors and courses are consistently high. Advisory board meetings are well
attended and at the initiation of one company, all of the participating companies decided to meet as a group to discuss the value and direction of current and future programs. Every participating company sent a representative and the group continues to meet as a "super" advisory board for the project. The project is continuing its exploration of ways to increase manager/supervisor feedback and to increase the numbers of workers who complete the courses. The Workplace Education Project represents an outstanding investment of tax dollars.
