Test Bibliographies; Test Collection (Educational Testing Service)

The 224 tests described in this bibliography cover a broad range of age and grade levels. The scholastic aptitude tests, some of which are entrance examinations, assess subjects' academic potential and/or aspects of mental ability which are deemed important for success in school work. Cognitive ability tests are also included and these assess such factors as verbal and numerical skills, reasoning ability, and understanding of number processes and mathematical concepts. (A separate bibliography is available covering tests of reasoning, logical thinking, and problem-solving abilities.)

This document is one in a series of topical bibliographies from the Test Collection (TC) at Educational Testing Service (ETS) containing descriptions of more than 18,000 tests and other measurement devices prepared by commercial publishers, teachers, educational institutions, professional associations, departments of education, counselors, etc. Each description contains the following basic information: TC Accession Number (a six-digit identification number assigned by the Test Collection); the title of the instrument; personal or institutional author; year of publication or copyright; availability source; grade level for which test is suitable; age level for which test is suitable; and abstract. Other information, which is provided when known, includes subtests, number of test items, and time required to complete the test. Information on accessing the Test Collection via Internet concludes the document.

INTRODUCTION

Scope of Bibliography

The tests described in this bibliography cover a broad range of age and grade levels. The scholastic aptitude tests, some of which are entrance examinations, assess subjects' academic potential and/or aspects of mental ability which are deemed important for success in school work. Cognitive ability tests are also included and these assess such factors as verbal and numerical skills, reasoning ability, and understanding of number processes and mathematical concepts. A separate bibliography is available covering tests of reasoning, logical thinking, and problem-solving abilities.

Availability

Copies of the tests described on the following pages must be obtained directly from the publisher, as stated in the AV AVAILABILITY section of each test citation. Generally, the Test Collection does not have distribution rights for its holdings. However, in special instances, the Test Collection has been granted permission from individual authors to distribute their tests, which are primarily research instruments. The AV AVAILABILITY information for these instruments will be Tests in Microfiche, Test Collection, Educational Testing Service, Princeton, NJ 08541.

Guide to Citation Elements

The following is a guide to the various elements which may be present in a test citation:

AN - Six-digit identification number assigned by the Test Collection

TI - Name of the instrument

DT - Components within the overall test which assess particular skills or factors

AU - Personal or institutional author

YR - Year test was published or copyrighted

AV - Test publisher or distributor; the organization which sells or distributes the instrument

Copyright (c) 1992 by Educational Testing Service. All rights reserved.
GL - List of grades for which test is suitable
TG - List of ages for which test is suitable
AB - A description of the test and its purpose

AN ACCESSION NUMBER: TC017498 ETS 9108.
TI TITLE: Detroit Tests of Learning Aptitude - Adult.
DT SUBTESTS: Word Opposites; Story Sequences; Sentence Imitation; Reversed Letters; Mathematical Problems; Design Sequences; Basic Information; Quantitative Relations; Word Sequences; Design R-duction; Symbolic Relations; Form Assembly.
AU AUTHOR: Hammill-Donald-D; Bryant, Brian R.
YR YEAR: 91.
AV AVAILABILITY: Tro-ED; 8700 Shoal Creek Blvd., Austin, TX 78758-6897.
TG TARGET AUDIENCE: AGE 16-79.
NT NOTES: TIME: 150; approx.
AB ABSTRACT: Consists of 12 subtests used to measure different but interrelated mental abilities and general intelligence. In addition to an overall composite score formed by combining the standard scores of all 12 subtests, there are 3 other scores. The optimal level composite consists of the four highest standard scores and is the best estimate of an individual’s overall potential. The Domains Composites consists of three ability areas and provides contrasting composites for verbal and nonverbal in the linguistic domain, attention-enhanced and attention-reduced composite in the attentional domain, and a motor-enhanced and motor-reduced in the motor domain. The Theoretical Composite consists of subtests assigned to composites that represent major constructs within popular theories of general intelligence, such as Horn and Cattell’s fluid and crystallized intelligence. The test battery has four main uses: to inventory a person’s relative strengths and weaknesses, to help identify older adolescents and adults who deficient in mental ability, to aid in making judgments about an individual’s future performance, and to use as a research tool. Information is available about norming procedures, validity, and reliability.

AN ACCESSION NUMBER: TC017497 ETS 9108.
DT SUBTESTS: Articulation; Conceptual Matching; Design Reproduction; Digit Sequences; Draw-A-Person; Letter Sequence; Motor Directions; Object Sequences; Oral Directions; Picture Fragments; Picture Identification; Sentence Imitation; Symbolic Relations; Visual Discrimination; Word Opposites; Word Sequences.
AU AUTHOR: Hammill-Donald-D; Bryant, Brian R.
YR YEAR: 91.
AV AVAILABILITY: Pro-ED; 8700 Shoal Creek Blvd., Austin, TX 78758-6897.
NT NOTES: ITEMS: 100.
TIME: 45; approx.
AB ABSTRACT: Used to assess a variety of cognitive abilities in children aged 3 through 9. The items yield a total score of general mental abilities and six subscores: verbal, nonverbal, attention-enhanced, attention-reduced, motor-enhanced motor-reduced. There
are four main uses for this newly revised version: to assess children's relative strengths and weaknesses, to help identify older children deficient in general mental ability, to help reach an informed judgment about an child's future performance, and to use as a research tool to study intellectual functioning in young children. Information is available about norming procedures, validity, and reliability.

AN ACCESSION NUMBER: TC017494 ETS 9108.
DT SUBTESTS: Word Opposites; Design Sequences; Sentence Imitation; Reversed Letters; Story Construction; Design Reproduction; Basic Information; Symbolic Relations; Word Sequences; Story Sequences; Picture Fragments.
AU AUTHOR: Hammill-Donald-D.
YR YEAR: 91.
AV AVAILABILITY: Pro-ED; 8700 Shoal Creek Blvd., Austin, TX 78758-6897.
TG TARGET AUDIENCE: AGE 6-17.
NT NOTES:
AB ABSTRACT: A revision and restandardization of a test battery to assess different but interrelated mental abilities. Used to isolate individual strengths weaknesses and to identify students deficient in general or specific aptitudes. Changes from the second edition include retaining three of the original four domains, dropping old subtests and adding new ones, introducing theoretical composites related to hypothetical constructs found in current theories of intelligence and information processing, and including a optimal composite derived by adding the four largest standard scores achieved on the subtests. The standard scores can be combine to show 16 composite scores grouped into four sets: general mental ability composite, optimal level composite, domain composites, and theoretical composites. The time required to administer the battery varies 50 minutes to 2 hours. DTLA-3 has four main uses: to determine strengths and weaknesses among developed mental abilities, to identify those significantly below their peers in important abilities, to predict future performance, and to use in research studies on aptitude, intelligence, and cognitive behavior.

AN ACCESSION NUMBER: TC017209 ETS 9104.
TI TITLE: Woodcock-Johnson Psycho-Educational Battery, Revised - Tests of Achievement, Standard Battery and Supplemental Battery.
DT SUBTESTS: Standard:-Letter Word Identification; Passage Comprehension; Calculation; Applied Problems; Dictation; Writing Samples; Science; Social Studies; Humanities; Supplemental:-Word Attack; Reading Vocabulary; Quantitative Concepts; Proofing; Writing Fluency; Punctuation and Capitalization; Spelling; Usage; Handwriting.
YR YEAR: 90.
AV AVAILABILITY: DLM Teaching Resources; One DLM Park, Allen, TX
TG TARGET AUDIENCE: AGE 2-17, Adults, Older Adults.
NT NOTES:
TIME: 50; approx.
AB ABSTRACT: Woodcock-Johnson-Revised is a battery of standardized tests measuring cognitive abilities, scholastic aptitudes, and achievement. Cognitive and Achievement Batteries are each organized in standard and supplemental test books. The Standard Batteries provide in-depth testing when more information is desired. Covers age range from two through ninety. Common norms are provided for Cognitive and Achievement Batteries along with derived scores and profiles. With this revision, ten new tests have been added to the Cognitive Abilities Battery and four new tests to the Achievement Battery. The Achievement Battery now has alternate forms, A and B. The Achievement Standard Battery consists of 9 tests. The Supplemental Battery also has 9 tests. Both batteries can be used to assess four curricular areas: reading, mathematics, written language, and knowledge.

AN ACCESSION NUMBER: TC017208 ETS 9104.
DT SUBTESTS: Memory for Names; Memory for Sentences; Visual Matching; Incomplete Words; Visual Closure; Picture Vocabulary; Analysis-Synthesis; Visual-Auditory Learning; Memory for Words; Cross Out; Sound Blending; Picture Recognition; Oral Vocabulary; Concept Formation; Delayed Recall-Memory for Names; Delayed Recall-Visual Auditory Learning; Numbers Reversed; Sound Patterns; Spatial Relations; Listening Comprehension; Verbal Analogies.
YR YEAR: 90.
AV AVAILABILITY: DLM Teaching Resources; One DLM Park, Allen, TX 75002-1302.
TG TARGET AUDIENCE: AGE 2-17, Adults, Older Adults.
NT NOTES: See also Woodcock-Johnson Psycho-Educational Battery Revised - Tests of Achievement (TC 017209).
TIME: 40; approx.
AB ABSTRACT: Woodcock-Johnson-Revised is a battery of standardized tests measuring cognitive abilities, scholastic aptitudes, and achievement. Cognitive and Achievement Batteries are each organized in standard and supplemental test books. The Standard Batteries provide core information quickly. The Supplemental Batteries provide in-depth testing when more information is desired. Covers age range from two through ninety. Common norms are provided for Cognitive and Achievement Batteries along with derived scores and profiles. With this revision, ten new tests have been added to the Cognitive Abilities Battery and four new tests to the Achievement Battery. The Cognitive Ability Battery-Standard contains 7 tests, each measuring a different aspect of intellectual ability. Cognitive Ability Battery-Supplemental contains 14 additional measures. The seven
cognitive factor scores are long-term retrieval, short-term memory, processing speed, auditory processing, visual processing, comprehension-knowledge and fluid reasoning. The four scholastic aptitude clusters are reading aptitude, mathematics aptitude, written language aptitude, and knowledge aptitude. Two additional clusters may be obtained: oral language and oral language aptitude.

AN ACCESSION NUMBER: TC017054 ETS 9104.
DT SUBTESTS: Kinetic Imagery Task; Mental and Sequencing Transformations; Mental Rotation Task; Teddy Bear Task; Visual Auditory Sequential Memory (Simon); Seriation; Memory for Sentences Task.
AU AUTHOR: Gonska-Kalina; and-Others.
YR YEAR: 80.
AV AVAILABILITY: Irving Sigel; Research Department, Educational Testing Service, Princeton, NJ 08541.
TG TARGET AUDIENCE: AGE 0-8.
AB ABSTRACT: This manual describes a series of tasks designed to assess the cognitive ability and development of young children. The tasks and tests are used to measure mental imagery, anticipation of transformations, memory skills, mental rotations, visual-auditory sequential memory, ability to order stimuli serially according to one dimension. Some of the tasks require elaborate constructions with wood and electric lights. Descriptions of these are included. The Kinetic Imagery Task was adapted from Piaget and Inhelder's work. Each child is tested individually. Some tests require training prior to testing.

AN ACCESSION NUMBER: TC017009 ETS 9104.
TI TITLE: Perceived Competence Scale for Children.
DT SUBTESTS: Cognitive Competence; Social Competence; Physical Competence; General Self-Worth.
AU AUTHOR: Harter-Susan.
YR YEAR: 82.
AV AVAILABILITY: Child Development; v53 p87-97; 1982.
GL GRADE LEVEL: 3; 4; 5; 6; 7; 8; 9.
NT NOTES: ITEMS: 28.
AB ABSTRACT: A rating scale designed to measure the perceived competence of children in grades three through nine. Scale constitutes four subscales measuring cognitive competence in school, peer social relationships, physical competence in sports, and general self-worth. The four subscales allow researchers to determine the specific areas in which children feel competent or incompetent, rather than their overall perceived competence. Items consist of two alternative statements, and children decide which statement is "sort of true" or "really true" of them. This was done to limit the tendency for children to give socially desirable responses. A
similar format may be administered to the children's teachers for comparison of responses. Includes technical information on validity, item means and standard deviations, reliability, inter-correlations among subscales, and teacher ratings.

AB ABSTRACT: This language-free, motor reduced, and culture reduced measure of intellectual functioning which requires abstract/figural problem solving. It is useful in situations where pre- and post-measures are desirable. There are two equivalent forms, form A and form B. Each form contains items arranged in order of difficulty. These items contain one or more of the following characteristics: shape, position, direction, rotation, contiguity, shading, size, length, movement, and figured pattern. One or more of the following rules are used in each item: simple matching, analogies, addition, subtraction, alteration progressions, classification intersections and progressions. This instrument should be used in the intellectual appraisal of subjects whose test performance may be confounded by language and motor impairments arising from such conditions as aphasia, hearing impairments, lack of proficiency with spoken or written English, Cerebral Palsy, stroke, head trauma, and lack of familiarity with the culture of the United States. This is not a timed test.

AB ABSTRACT: This aptitude test provides a general index of overall cognitive functioning and predicts performance on achievement measures, namely The Diagnostic Achievement Battery-Second Edition (DAB-2) (TC016948) and the Diagnostic Achievement Test for Adolescents-Second Edition (DAT-2) (TC 014715). This tool provides a measure of general scholastic ability by assessing three content areas: verbal reasoning, nonverbal reasoning, and quantitative reasoning. This instrument can be used for determining strengths and
weaknesses, identifying persons who may need special assistance, conducting aptitude-achievement discrepancy analyses, and conducting research. It is designed for individual administration, but may also be administered to small groups.

AN ACCESSION NUMBER: TC016988 ETS 9104.

AB ABSTRACT: This battery of tests is designed to measure students' ability to learn or to succeed in a number of different areas. It comprises two levels that collectively measure the aptitudes of students in grades 7-12. Level 1 is designed primarily for students in grades 7-9, and Level 2 is designed primarily for students in grades 10-12. Each level contains 510 items. Both levels can also be used with adults who may or may not have completed twelve years of schooling. These tests assess eight important aptitudes: verbal reasoning, numerical reasoning, abstract reasoning, perceptual speed and accuracy, mechanical reasoning, space relations, spelling, and language usage. These tools can be used alone or in conjunction with the Career Interest Inventory, which is available separately and also comprises two levels. The Career Interest Inventory is a career-guidance tool designed to provide information about students' educational goals, interest in various school subjects, and activities, as well as various fields of work.

AB ABSTRACT: This test is designed to be an individual test for use in screening or estimating the cognitive ability of an individual, public school student, college student, mental patient, or mentally
handicapped person. It can be used when a quick index of general verbal intelligence is needed for tentative diagnosis, screening purposes, and confirmation of other test results. This instrument is specifically intended for use by teachers, principals, guidance counselors, special education and learning disability teachers, psychologists, psychometrists, social workers, and other professionals who often need to evaluate an individual's mental ability. Item classification systems are in the categories of general information, similarities and differences, vocabulary, comprehension, digit span, arithmetic, visual-motor, and auditory memory for sentences.

AB ABSTRACT: CTB Early Childhood System is a program to assist with screening, diagnosing, and instructional planning for young children. The components of the system are the Primary Test of Cognitive Skills, the Early School Assessment, and the Development Skills Checklist. Primary Test of Cognitive Skills (PTCS) is a group-administered ability test for kindergartners and first graders. Measures a child's level of intellectual functioning in verbal, spatial, memory and conceptual areas. Can be used for planning instructional programs. Useful in screening for learning disabilities and for evidence of developmental delay.

DT SUBTESTS: General Learning Ability or Intelligence; Verbal Aptitude; Numerical Aptitude; Spatial Aptitude; Form Perception; Clerical Perception; Motor Coordination; Finger Dexterity; Manual Dexterity; Eye Hand Foot Coordination; Color Discrimination.
YR YEAR: 88.
TG TARGET AUDIENCE: AGE 13-17, Adults.
NT NOTES:
TIME: 70.
ITEMS: 725.
AB ABSTRACT: The VAB was designed for use in high schools, vocational rehabilitation programs, and job training programs to assess aptitudes identified by the U.S. Department of Labor (D.O.L.). The VAB is made up of separate tests for each aptitude so the entire battery need not be administered when only a few subtests are needed for job placement. All are given when vocational guidance testing is needed. The VAB is for use by guidance, employment, and training counselors in all fields. All tests are paper-and-pencil except spatial relations and the coordination and dexterity subtests which
require manipulative responses. The clerical subtests require both. Uses grade 4 vocabulary. Tests are timed (3 to 5 minutes). Norms and validity information are available on various disadvantaged populations.

NT NOTES:
TIME: 60; approx.
ITEMS: 72.
AB ABSTRACT: Designed to measure those verbal, quantitative, and figural reasoning skills most closely associated with academic achievement. Test is based on the notion that to learn new things, students must be able to perceive accurately, to recognize and recall what has been perceived, to think logically, to understand relationships, to abstract from a set of particulars, and to apply generalizations to new and different contexts. Tests are considered to be measures of learned or developed abilities in the broadest sense. The purposes of the test include assessing students' ability to cope with school learning tasks, suggesting student placement for school learning functions, and evaluating their achievement in relation to their talents. Performance on the variety of tasks included in the tests reflects the interaction of genetic and environmental factors that influence the ability to deal with the abstract manipulation of verbal, numerical, and figural symbolic systems in our culture. Test provides for a total score, a verbal score, and a nonverbal score. The total score is the best overall
indicator of school-learning ability. Tests have 21 different types of items that fall into 5 clusters: verbal comprehension, verbal reasoning, pictorial reasoning, figural reasoning, and quantitative reasoning. The Otis-Lennon School Ability Tests were standardized with the Stanford Achievement Tests (TC 016441 - TC 016448) to allow for generation of achievement/ability comparisons when the two tests are administered together.

AB ABSTRACT: This test, with its companion instrument the Survey of Problem Solving Skills, evaluates the connection between problem solving strategies, learning processes and educational outcomes. The SEDS is designed to identify processes and strategies used to perform reading, writing, spelling, and mathematical tasks. The test administrator records results and rates student performance during the examination. A summary profile provides a synopsis of findings. Included are measures of reading comprehension, vocabulary, decoding; writing in terms of organization, alphabet production, language usage, overall productivity; spelling recognition and retrieval; mathematics operations, computation, concepts, application. These are criterion-referenced measures.

AB ABSTRACT: Group-administered test designed to resemble the content and format of typical college admissions tests. Consists of a verbal ability section and a mathematical ability section. Provides students with experience in answering items typical of general college admissions tests and scholastic aptitude tests which measure verbal and mathematical reasoning abilities. Can be used by guidance counselors and teachers of college-bound students to assist them in preparing for college admissions tests, to advise students of areas of strengths and weaknesses, and to help reduce test anxiety or pressure by providing a non-threatening practice situation. Was developed from extensive analysis of the Scholastic Aptitude Test (SAT), and items were written to parallel the content and style of the SAT.

AB ABSTRACT: Assesses individual's job-related knowledge, skills, and aptitudes for use in career exploration and job or training placement. It is a comprehensive, computerized screening instrument which gathers large quantities of information in short periods of time. Although it is meant to interface with other assessment programs, it can also stand alone. The subject's performance is measured against the Worker Qualifications Profile of the Dictionary of Occupational Titles. During the computer exercises, a large number of factors are measured in approximately 30 minutes. These factors include shape discrimination, problem solving, and academics. Subjects begin with a brief vision screening test and a hand-eye coordination component. Other components include a hardware exercise which assesses tool use, assembly skills, dexterity, manipulation, and ability to follow instructions; independent perceptual screening to measure tactile sensitivity and spatial aptitude; talking/persuasive screening related to language development; physical capacity and mobility to provide non-medical screening before training or job placement; and vocational interests.

TI TITLE: Business Skills Inventory, Form Seven.
AU INSTITUTIONAL AUTHOR: Kampmeier Group, Columbus, OH.
YR YEAR: 90.
AV AVAILABILITY: The Kampmeier Group; Management Consultants, 3360 Tremont Road, Columbus, OH 43221.
TG TARGET AUDIENCE: Adults.
AB ABSTRACT: Designed for use in hiring managers, sales staff, administrators, customer service and professional personnel. This instrument measures ability to learn, interpersonal skills
leadership, persuasiveness, decision-making, delegating, administrative skills, organizational skills and entrepreneurship. Completed by prospective employee and scored and interpreted by the publisher.

AN ACCESSION NUMBER: TC014898 ETS 8705.
TI TITLE: Cognitive Abilities Scale.
DT SUBTESTS: Language; Reading; Mathematics; Handwriting; Enabling Behaviors.
AU AUTHOR: Bradley-Johnson-Sharon.
YR YEAR: 87.
AV AVAILABILITY: Pro-Ed; 8700 Shoal Creek Blvd., Austin, TX 78758-6897.
TG TARGET AUDIENCE: AGE 2-3.
NT NOTES:
ITEMS: 88.
AB ABSTRACT: Designed to provide norm-referenced assessment of cognitive skills of children ages 2 and 3. Also meant to provide detailed, educationally useful information on performance in five areas related to later success in school. Also provides specific information for planning educational programs in the areas tested. Also useful for researchers who study the cognitive development of young children. The language subtest assesses the ability to understand and use oral language. The reading subtest assesses early reading skills including book handling ability, skills related to comprehension, naming letters and giving sounds for letters. The mathematics subtest covers seriation, knowledge of selected mathematical concepts, recognition of numbers, meaningful counting, matching numbers with quantities, and matching sets. The handwriting subtest measures skills directly related to manuscript writing. The enabling behaviors subtest assesses abilities important for efficient learning, including ability to remember auditory information, and the ability to initiate vocal and nonvocal behaviors. Also test allows for obtaining results for performance on nonverbal items.

AN ACCESSION NUMBER: TC014871 ETS 8705.
TI TITLE: Dental Hygiene Candidate Admission Test.
AU INSTITUTIONAL AUTHOR: Psychological Corporation, San Antonio, TX.
AV AVAILABILITY: The Psychological Corporation; 555 Academic Court, San Antonio, TX 78204-0952.
TG TARGET AUDIENCE: Adults.
NT NOTES:
TIME: 240; approx.
AB ABSTRACT: A multiple choice test designed to measure general academic ability and scientific knowledge for use by applicants seeking admission to dental hygiene programs. The extent to which
test results are used as admission criteria varies from school to school but, in general, test results are combined with other information such as school records, references, and the results of personal interviews.

TG TARGET AUDIENCE: AGE 2-17, Adults.
NT NOTES:
TIME: 15.
ITEMS: 125.
AB ABSTRACT: This measure of Spanish hearing vocabulary is a version of the Peabody Picture Vocabulary Test developed for use with Spanish speaking children and adolescents. It was standardized in Puerto Rico and Mexico. The manual is available in both Spanish and English. When it is used as an achievement test, it may be used to show student progress when Spanish is the language of instruction or when assessing proficiency in Spanish as a second language. It may be used as a screening test of scholastic aptitude when Spanish is the language of the home and community and when Spanish is the language of instruction. It is individually administered and does not require reading, verbal or written responses. Also said to be useful for screening at the kindergarten and first grade level for follow-up assessment, to determine language of instruction for bilingual children. The examinee points to one of a series of plates in response to an oral stimulus. Norms for Hispanic children and youth on the U.S. mainland will be developed if examiners volunteer to test a group of these students.

AN ACCESSION NUMBER: TC014793 ETS 8609.
TI TITLE: MAPS.
DT SUBTESTS: English; Mathematics; Reading; Written English Expression; Computation; Applied Arithmetic; Elementary Algebra; Intermediate Algebra; Test of Standard Written English; Scholastic Aptitude Test; Biology; Chemistry; English Composition; French Reading; German Reading; Mathematics Level I; Physics; Spanish Reading; Conventions of Written English; Critical Reasoning.
AU INSTITUTIONAL AUTHOR: Educational Testing Service, Princeton, NJ.
AV AVAILABILITY: Multiple Assessment Program and Services of the College Board; CN6725; Princeton, NJ 08541-6725.
GL GRADE LEVEL: Higher Education.
AB ABSTRACT: This series of tests is for use by colleges, for admissions, placement of students, remedial or developmental studies, exemption, guidance and counseling. Some of the tests are
drawn from the national Admissions Testing Program, including the Test of Standard Written English, Scholastic Aptitude Test and Achievement Tests. Some are self-scoring (English, Mathematics).

AN ACCESSION NUMBER: TC014769 ETS 8609.
TI TITLE: Matrix Analogies Test, Short Form.
DT SUBTESTS: Pattern Completion; Reasoning by Analogy; Serial Reasoning; Spatial Visualization.
AU AUTHOR: Naglieri-Jack-A.
YR YEAR: 85.
AV AVAILABILITY: The Psychological Corporation; 555 Academic Court, Austin, TX 78204-2498.
GL GRADE LEVEL: K; 1; 2; 3; 4; 5; 6; 7; 8; 9; 10; 11; 12.
NT NOTES: ITEMS: 34.
AB ABSTRACT: Designed to provide a measure of nonverbal reasoning that could be administered as a screening test in a group setting. Uses abstract designs of the standard progressive matrix type and brief directions. It was based on factors identified for the Raven's Progressive Matrices. Said to be especially useful for those with limited English skills, a handicap or other cause for lack of verbal ability. It is norm referenced and standardized on a national sample of children living in the United States. May be used in screening for learning problems in the case of an ability/achievement discrepancy. Some training in group testing is required for administration. Because of its nonverbal nature, the test is said to be culture reduced. It may be used with deaf and mentally retarded individuals as well. Percentile ranks, stanines and age equivalent scores can be computed.

AN ACCESSION NUMBER: TC014728 ETS 8609.
TI TITLE: SAGE Vocational Assessment System.
DT SUBTESTS: Vocational Interest Inventory; Cognitive and Conceptual Abilities; Vocational Aptitude Battery; Assessment of Attitudes; Temperament Factor Assessment.
AU INSTITUTIONAL AUTHOR: Pleasantville, NYTrain-Ease Corp.
YR YEAR: 85.
AV AVAILABILITY: PESCO; 21 Pauling St., Pleasantville, NY 10578.
TG TARGET AUDIENCE: Adults.
AB ABSTRACT: A system that matches the aptitudes, interests, educational levels, attitudes, and temperaments of people to jobs and training. May be used with handicapped populations and may be group or individually administered. The system consists of five units. The Vocational Interest Inventory assesses areas of interest related to the 12 interest areas of the Guide for Occupational Exploration. May be used with hearing impaired, visually impaired, or nonreaders. The Cognitive and Conceptual Abilities unit measures the three General Educational Development (GED) factors of reasoning, mathematics, and language. The Vocational Aptitude
Battery has been validated against the General Aptitudes Test Battery (GATB) and assesses 11 aptitudes by means of the following individual job-related tests: general, verbal, numerical, spatial, form perception, clerical perception, motor coordination, finger dexterity, manual dexterity, eye-hand-foot coordination, and color discrimination. The Assessment of Attitudes presents real-life situations in which the individual must evaluate on-the-job social situations, such as dealing with coworkers, supervisors, or employers. The Temperament Factor Assessment provides an objective measure of an individual's temperament.

AN ACCESSION NUMBER: TC014712 ETS 8609.
DT SUBTESTS: Verbal Classification; Sentence Completion; Verbal Analogies; Quantitative Relations; Number Series; Equation Building; Figure Classification; Figure Analogies; Figure Analysis.

AB ABSTRACT: One of three test batteries that comprise the Basic Skills Assessment Program, a comprehensive, standardized testing program designed to assess student achievement and abilities. The Cognitive Abilities Test (CogAT) was developed to assess the development of cognitive abilities related to verbal, quantitative, and nonverbal reasoning and problem solving. In levels 1 and 2, there are six subtests that are (1) based on content that children in the appropriate age group are likely to have experienced; (2) require students to use familiar content in a new way; (3) yield reliable assessments of cognitive development for children at different stages of development; (4) emphasize cognitive skills related to school tasks students are expected to master; and (5) are of interest to students with various backgrounds. At levels 1 and 2, CogAT is a power test, not a speed test. The test administrator reads each item to the students, allowing them enough time to try each item. In levels A-H, there are three subtests each for the verbal, quantitative, and nonverbal sections. Each of the three subtests in each section uses only one type of symbol: verbal, quantitative, or geometric. CogAT measures developed abilities, not innate abilities. The cognitive skills measured reflect cognitive strategies and general cognitive control processes developed.
experientially which allow the individual to learn new tasks or solve problems when instruction is absent or incomplete. The Iowa Tests of Basic Skills, the Cognitive Abilities Test, and the Tests of Achievement and Proficiency were normed concurrently.
GL GRADE LEVEL: 7; 8; 9; 10; 11; 12.
TG TARGET AUDIENCE: Adults.
NT NOTES:
  TIME: 45; approx.
AB ABSTRACT: Consists of two major parts: an interest survey called The Ohio Career Interest Survey and an abilities survey called The Career Ability Survey. The Ohio Career Interest Survey has 12 scales: accommodating/entertaining, humanitarian/caretaking, plant/animal/caretaking, mechanical, business detail, sales, numerical, communications/promotion, science/technology, artistic expression, educational/social, and medical. The ability survey consists of two subtests: verbal reasoning (verbal analogies) and nonverbal reasoning (number series and concept relationships). The interest scales were developed by The Ohio State Department of Education and consist of 132 items. The ability scale has 40 items.

TI TITLE: Southern California Ordinal Scales of Development: Scale of Cognition.
AU INSTITUTIONAL AUTHOR: California State Department of Education.
YR YEAR: 77.
AV AVAILABILITY: Foreworks; Box 82289, Portland, OR 97282.
TG TARGET AUDIENCE: AGE 2-12.
NT NOTES:
AB ABSTRACT: Developed by the Diagnostic School for Neurologically Handicapped Children, Southern California, State Department of Education as a complete Piagetian system that combines classroom and clinical assessment. The series consists of six cross-referenced Piagetian developmental scales. Each scale assesses all levels of development from sensorimotor through formal operations. Useful for comparative assessments, ability grouping, research, and individualized education program (IEP) development. Designed especially for use with multiply handicapped, developmentally delayed, and learning disordered persons, but may be used with all other children. Scales are considered to be culture-free and non-sexist. Administration of the scale consists of informal observation of the child within the environment. This scale relies on Piaget's model of intellectual development to determine child's level of cognitive functioning and to assess quality of sensory and information processing at that level. Areas assessed are development of means, object, concept, and imitation.

AN ACCESSION NUMBER: TC014459 ETS 8605.
TI TITLE: Schaie-Thurstone Adult Mental Abilities Test, Forms A and OA.
DT SUBTESTS: Recognition Vocabulary; Figure Rotation; Letter Series; Number Addition; Word Fluency; Object Rotation (Form OA); Word Series (Form OA).

TG: Adults, Older Adults.
NT: TIME: 30; approx.
AB: A research and assessment tool for measuring mental abilities of adults. Represents an extension of the seminal work of L.L. and T.G. Thurstone on measurement of primary mental abilities. There are two forms: Form A for adults and Form OA for older adults. Form A is essentially the Thurstone Primary Mental Abilities Test Form 11-17 with new adult norms. Form OA has two additional scales designed specifically for use with persons over age 55 and has new norms for older adults. STAMAT has so far been used primarily for research purposes to investigate patterns of stability and decline in intellectual processes. May have use in counseling returning adult students, assessing skills necessary for independent living, counseling adults for second careers, making diagnostic judgments about individual competence in disability examinations.

AB ABSTRACT: This test is a Spanish translation of the SOI Learning Abilities Test (TC 009 264) based on Guilford's multifactor model of intelligence. Twenty-six subjects assess cognitive abilities or factors of intelligence in children and adults to provide a profile of separate learning abilities. Other forms of the SOI-LA, consisting of combinations of these 26 subtests, focus on abilities in specific learning areas such as reading and math, or screening for the gifted and vocational aptitude. All may be group or individually administered. The subtests concern mental processes (cognition, memory, evaluation, convergent production, divergent production) combined with a content area (figural, symbolic, semantic or behavioral) and a product (units, classes, relations, systems, transformations, implications), e.g., Cognition of Figural Units which measures visual closure. All SOI materials are available to anyone interested in their use.
TI TITLE: SOI Learning Abilities Test: Developmental Vision Form.
DT SUBTESTS: Cognition of Figural Units; Cognition of Semantic Units; Memory of Symbolic Systems-Visual; Memory of Symbolic Units-Visual; Convergent Production of Figural Units; Divergent Production of Semantic Units; Evaluation of Figural Units; Convergent Production of Symbolic Transformations; Cognition of Figural Transformations.

AB ABSTRACT: A battery of norm-referenced, standardized tests in basic curriculum areas for grades K-12. Designed to survey students' general academic achievement. Contents of tests are based on learner objectives most commonly taught in the United States. Two forms are available, forms P and Q. An optional test to include with the achievement battery is the Educational Ability Series (EAS) which provides an estimate of general learning ability for students in grades K-12. The EAS assesses those factors most closely associated with overall academic performance, such as verbal, numerical, and reasoning abilities. Test administrators may decide to do out-of-level testing with the Survey of Basic Skills for special groups of students, such as Chapter I, special education, gifted or high-achieving students. Levels 34 through 37 are multilevel tests designed for use from the spring of grade 4 through high school. The reference materials, social studies, and science subtests are optional.

AB ABSTRACT: Subset of the Structure of Intellect (SOI) Learning Abilities Test, Form A. Uses those subtests that relate to arithmetic, mathematics, and science. Abilities assessed are considered prerequisites to cognitive skills required for school achievement in mathematics. Especially recommended for students in upper elementary grades who are having difficulty with arithmetic or mathematical concepts. The SOI is a series of test forms designed
to assess a wide range of cognitive abilities or factors of intelligence and is based on Guilford's multifactor model of intelligence. There is a total of 26 separate abilities assessed by the SOI comprehensive form. The arithmetic-math form assesses 12 of these.

AB ABSTRACT: A revision and restandardization of a test battery to assess specific abilities. Used to isolate individual strengths and weaknesses and to identify students deficient in general or specific aptitudes. Useful for diagnosing learning disabilities. Subtests should be administered in same order they were used when tests were standardized. Time required to administer entire battery varies from 50 minutes to 2 hours. Subtests are also used to formulate nine composite scores in four domains: linguistic, attention, cognitive, and motor. DTLA-2 has three main uses: determine strengths and weaknesses among intellectual abilities, identify children and adolescents significantly below their peers in aptitude, and use in research studies investigating aptitude, intelligence, and cognitive behavior. There are also three special use composites for testing blind, deaf, or physically impaired persons.

AB ABSTRACT: Consists of 17 subtests used to indicate the nature of a child’s learning potential for literacy. Used as a screening and diagnostic tool for early recognition of educationally at-risk
children. Can be used to indicate the particular learning pattern of a child and to identify specific types of learning patterns. May be used to identify specific written language difficulties, slow learners, culturally handicapped children, neurologically damaged children, language disordered children, specific auditory difficulties, specific visual difficulties, or specific graphic difficulties. The 17 subtests are organized on two levels. Level 1 is used as a screening test for children who have been in school approximately six months. Level 2 is for use with children over age of seven years. Some of the tests can be group administered; others must be given individually. Total administration time for level 1 is 45 minutes and for level 2, approximately 60 minutes. It is best to give the test over a period of several days.

TI TITLE: PSB-Health Occupations Aptitude Examination.
DT SUBTESTS: Academic Aptitude; Spelling; Reading Comprehension; Information in the Natural Sciences; Vocational Adjustment.
AU INSTITUTIONAL AUTHOR: Psychological Services Bureau, St. Thomas, Pa.
YR YEAR: 83.
AV AVAILABILITY: Psychological Services Bureau; P.O. Box 4; St. Thomas, PA 17252.
GL GRADE LEVEL: 10; 11; 12; Higher Education.
NT NOTES:
TIME: 120.
ITEMS: 385.
AB ABSTRACT: A battery of tests designed to measure abilities, skills,
knowledge and attitudes important for the successful performance of students in the allied health education programs. Predictive of readiness for instruction. Also useful for placement, counseling and curriculum planning. Measures verbal, quantitative and nonverbal ability, spelling, reading comprehension, knowledge of biology, chemistry, physics, pharmacology, anatomy, physiology, health and safety, and personal qualities indicative of adjustment.
AN ACCESSION NUMBER: TC013255 ETS 8405.
TI TITLE: Gifted and Talented Scale.
DT SUBTESTS: Numerical Reasoning; Vocabulary; Synonyms–Antonyms; Similarities; Analogies.
AU INSTITUTIONAL AUTHOR: Dallas Educational Services, Richardson, TX.
YR YEAR: 83.
AV AVAILABILITY: Dallas Educational Services; P.O. Box 831254; Richardson, TX 75083-1254.
GL GRADE LEVEL: 4; 5; 6.
NT NOTES:
ITEMS: 50.
AB ABSTRACT: Designed to identify children with special skills in grades 4, 5, and 6. Limited to identifying those children with talent only in those areas necessary for success in gifted and talented school programs in the classroom environment. A group test and essentially a power test rather than a timed test. The items in all five subtests are designed to measure abstract concepts.

AN ACCESSION NUMBER: TC012123 ETS 8410.
TI TITLE: SRA Nonverbal Form.
AU AUTHOR: McMurry; Robert-N; King-Joseph-E.
YR YEAR: 73.
TG TARGET AUDIENCE: ADULTS.
NT NOTES:
TIME: 10.
ITEMS: 60.
AB ABSTRACT: Designed to measure general learning ability. Uses pictorial items. Does not require reading ability. Used in industry with claims processors, office personnel and route salespersons. Suitable for use with persons having difficulty in reading or understanding English. For placement of workers in entry level positions. Most useful for persons with less than 12 years of education.

AN ACCESSION NUMBER: TC011972 ETS 8410.
TI TITLE: Law School Admission Test.
AU INSTITUTIONAL AUTHOR: Law School Admission Services, Newtown, Pa.
YR YEAR: 82.
AV AVAILABILITY: Law School Admission Services; Box 2000; Newtown, PA 18940.
GL GRADE LEVEL: Higher Education.
NT NOTES:
TIME: 245.
ITEMS: 110.
AB ABSTRACT: A standardized test designed to assist law schools in making decisions about the academic ability of their applicants. Assists in the prediction of performance during the first school
year. Measures the ability to read with understanding and insight, understand relationships and draw conclusions, reason effectively, understand, analyze, use, and criticize arguments. A writing sample is forwarded to each law school the candidate designates. Updated and revised regularly. Currently undergoing extensive revision.

AN ACCESSION NUMBER: TC011944 ETS 8410.
TI TITLE: Prueba de Admision para Estudios Graduados.
DT SUBTESTS: Verbal Ability; Quantitative Ability; English as a Second Language; Writing.
AU INSTITUTIONAL AUTHOR: Educational Testing Service, Princeton, N.J.
YR YEAR: 80.
AV AVAILABILITY: Educational Testing Service; PABG Program, G.P.O.
Box 1271, San Juan, P.R. 00936.
GL GRADE LEVEL: Higher Education.
NT NOTES:
TIME: 225.
ITEMS: 205.
AB ABSTRACT: An aptitude test designed and constructed to measure academic ability at the graduate level for use in making decisions about the admission of applicants to graduate schools in Puerto Rico. Includes a measure of English as a second language.

AN ACCESSION NUMBER: TC011943 ETS 8410.
TI TITLE: Graduate Management Admission Test.
DT SUBTESTS: Verbal; Quantitative.
AU INSTITUTIONAL AUTHOR: Graduate Management Admission Council, Princeton, N.J.
YR YEAR: 82.
GL GRADE LEVEL: Higher Education.
NT NOTES:
TIME: 180.
AB ABSTRACT: Designed to provide counselors and admissions officers with a predictor of academic performance in the first year of graduate management school. Measures general verbal and mathematical abilities, including reading comprehension, writing ability and questions requiring analysis of situations, basic math skills, understanding of math concepts, quantitative reasoning and interpretation of data in charts and graphs etc. Tests are updated periodically. Editions are available in large print and Braille editions and via cassette. Tests are updated regularly.
AN ACCESSION NUMBER: TC011871-TC011877 ETS 8410.
DT SUBTESTS: Verbal; Non-Verbal.
AU AUTHOR: Kuhlmann-F; Anderson-Rose-G.
YR YEAR: 82.
AV AVAILABILITY: Scholastic Testing Service; 480 Meyer Road, Bensenville, IL 60106.
GL GRADE LEVEL: (K-12 for entire battery).
NT NOTES:
  TIME: 75; approx.
  ITEMS: 130.
AB ABSTRACT: Designed to provide a measure of an individual's academic potential through assessing those cognitive skills related to the learning process. Uses eight subtests, four of which employ item types primarily nonverbal in nature and which are based more upon an understanding of numbers and figures rather than upon vocabulary and reading skills. The other four subtests are more dependent upon verbal skills. The verbal cognitive skills quotient (CSQ) may be used as an estimate of potential in such areas as reading, language arts, social studies and other areas heavily dependent on verbal skills. The nonverbal CSQ provides a measure for predicting achievement in such areas as mathematics, art, and physical sciences.

AN ACCESSION NUMBER: TC011789 ETS 8410.
TI TITLE: Allied Health Professions Admission Test.
DT SUBTESTS: Verbal Ability; Quantitative Ability; Biology; Chemistry; Reading Comprehension.
AU INSTITUTIONAL AUTHOR: Psychological Corp., San Antonio, TX.
AV AVAILABILITY: The Psychological Corporation; 555 Academic Court, San Antonio, TX 78204-2498.
TG TARGET AUDIENCE: Adults.
NT NOTES:
  TIME: 240.
AB ABSTRACT: Designed as an entrance exam for applicants seeking admission to baccalaureate and post-baccalaureate programs in allied health schools. Measures general academic ability and scientific knowledge. Not distributed to individuals, given only at specified testing centers. Instrument under constant revision; thus, the number of items and the time vary from (3-1/2 to 4 hours). Restricted.

AN ACCESSION NUMBER: TC011779 ETS 8512.
TI TITLE: Scholastic Level Exam. Revised 1981.
AU AUTHOR: Wonderlic-Charles-F.
YR YEAR: 81.
AV AVAILABILITY: E. F. Wonderlic and Associates; P.O. Box N7, Northfield, IL 60093.
GL GRADE LEVEL: 11; 12; Higher Education.
NT NOTES:
TIME: 12.
ITEMS: 50.
AB ABSTRACT: Reformat of Wonderlic Personnel Test. Designed for use in student admissions at technical schools and counseling at colleges and universities. Scholastic Level Exam name and format was selected to differentiate test use between school and employer. Normative information is identical to Wonderlic Personnel Test. Provides an I.Q. score.

AN ACCESSION NUMBER: TC011764 ETS 8304.
TI TITLE: Hay Aptitude Test Battery.
DT SUBTESTS: Warm-Up; Hay Number Perception Test; Hay Name Finding Test; Hay Number Series Completions.
AU AUTHOR: Hay-Edward-N.
YR YEAR: 77.
AV AVAILABILITY: E.F. Wonderlic and Associates; P.O. Box 7; Northfield, IL 60093.
TG TARGET AUDIENCE: Adults.
NT NOTES:
TIME: 13.
ITEMS: 286.
AB ABSTRACT: Designed for use in selecting job applicants for positions requiring numerical ability and precision in working with names and numbers. Includes an unscored practice test. Originally developed to use in selecting applicants for clerical positions. Has also proven valid for plant jobs and operating positions.

AN ACCESSION NUMBER: TC015526-TC011530 ETS 8410.
TI TITLE: Test of Cognitive Skills, Level 5.
DT SUBTESTS: Sequences; Analogies; Memory; Verbal Reasoning.
AU INSTITUTIONAL AUTHOR: CTB/Macmillan/McGraw-Hill, Monterey, Calif.
YR YEAR: 81.
GL GRADE LEVEL: 2-12.
NT NOTES:
TIME: 53; approx.
ITEMS: 80.
AB ABSTRACT: Series of ability tests designed to assess academic aptitude of students. Not intended to measure all aspects of mental ability nor do tests include only those aptitudes and skills that are functions of formal school training. Emphasis is placed on abilities of a relatively abstract nature that are important to success in an educational program. Such abilities include understanding verbal and nonverbal concepts and comprehending relationships among ideas presented in a variety of forms. Test is a major revision of, and successor to, the Short Form Test of Academic Aptitude (SFTAA).
AN ACCESSION NUMBER: TC011507 ETS 8410.
TI TITLE: Comprehensive Testing Program II, Levels 3, 4 and 5.
DT SUBTESTS: Verbal Aptitude; Quantitative Aptitude; Mathematics Concepts; Mathematics Computation; Vocabulary; Reading Mechanics of Writing; English Expression; Algebra; Geometry; General Mathematics.
AU INSTITUTIONAL AUTHOR: Educational Testing Service, Princeton, N.J.
YR YEAR: 82.
AV AVAILABILITY: Educational Records Bureau; Box 619; Princeton, NJ 08541.
GL GRADE LEVEL: 4; 5; 6; 7; 8; 9; 10; 11; 12.
NT NOTES:
TIME: 300.
ITEMS: 440.
AB ABSTRACT: Levels 3, 4 and 5 consist of an achievement and an aptitude test. The aptitude test is designed to predict academic performance and has a verbal and quantitative section. An accompanying achievement battery covers: reading, mathematics concepts and computation (levels 3 and 4), Algebra (levels 4 and 5), geometry and general mathematics (level 5), vocabulary, mechanics of writing and English expression. Provides norms for use with independent schools and suburban schools as well as national norms.

AN ACCESSION NUMBER: TC011505 ETS 8410.
DT SUBTESTS: Reading; Language; Mathematics.
AU AUTHOR: Cole-Nancy-S; And Others.
YR YEAR: 77.
AV AVAILABILITY: Riverside Publishing Company; 8420 Bryn Mawr Ave., Chicago, IL 60631.
GL GRADE LEVEL: 9-12.
NT NOTES:
TIME: 130; approx.
ITEMS: 125.
AB ABSTRACT: Design to measure students' proficiency in reading, language arts, and mathematics. All items are based on objectives commonly used at these grade levels. The achievement editions are available in Forms A and B. The achievement and abilities edition combines form A of the achievement edition with a 95-item verbal and quantitative abilities test. The abilities portion can be administered in approximately 60 minutes. The abilities portion consists of a verbal part comprised of two subtests, verbal classification and verbal analogies, and a quantitative part, comprised of two subtests, quantitative relations and number series. Also at levels 15-18, a class period edition is available. This is an achievement test designed to be administered in a single class period. One form of the test is available at each grade level.
AN ACCESSION NUMBER: TC011494 ETS 8410.
TI TITLE: Educational Development Series.
DT SUBTESTS: Interests; Non-Verbal; Verbal; Reading; English; Mathematics.
AU INSTITUTIONAL AUTHOR: Scholastic Testing Service, Inc., Bensenville, IL.
YR YEAR: 77.
AV AVAILABILITY: Scholastic Testing Service; 480 Meyer Road, Bensenville, IL 60106.
GL GRADE LEVEL: K-12.
NT NOTES:
  TIME: 250; approx.
  ITEMS: 258.
AB ABSTRACT: A battery of ability and achievement tests as well as reports of school and career plans and school interests. Designed to measure a student's curriculum likes and dislikes, systematically, for year-to-year comparisons; 2) to compare a student's interests with his actual achievement for possible corroboration; 3) to compare a student's achievement scores with the results of a test of ability that requires no reading; and 4) to compare a student's achievement in mathematics, English and reading, and to determine whether there is a corroboration between school interests and achievement. Some tests are timed; others not; some are administered orally, others not. The authors advise administering the battery in three different sessions. The authors feel that this battery provides a single, coherent report and permits the teacher to evaluate each student from the broadest possible perspective, while providing convenient comparisons between students. Series covers grades 2 through 12. Comes in Forms R and T.

AN ACCESSION NUMBER: TC011466 ETS 8410.
TI TITLE: The Blind Learning Aptitude Test.
AU AUTHOR: Newland-T-Ernest.
YR YEAR: 71.
AV AVAILABILITY: University of Illinois Press; 54 E. Gregory Drive, Box 5081; Station A, Champaign, IL 61820.
TG TARGET AUDIENCE: AGE 6-20.
NT NOTES:
  TIME: 45; approx.
  ITEMS: 61.
AB ABSTRACT: Test of learning potential designed specifically to meet the needs of blind children. Is a tactile discrimination test involving dots and lines similar to those used in Braille characters but not requiring the fine tactile discrimination needed for Braille reading.
AN ACCESSION NUMBER: TC011437 ETS 8502.
TI TITLE: Differential Aptitude Tests. Forms V and W.
DT SUBTESTS: Verbal Reasoning; Numerical Ability; Abstract Reasoning; Clerical Speed and Accuracy; Mechanical Reasoning; Space Relations; Spelling; Language Usage.
AU AUTHOR: Bennett-George-K; And Others.
YR YEAR: 82.
AV AVAILABILITY: The Psychological Corporation; 555 Academic Court, San Antonio, TX 78204-2498.
GL GRADE LEVEL: 8; 9; 10; 11; 12.
NT NOTES:
TIME: 171.
ITEMS: 605.
AB ABSTRACT: Integrated battery of aptitude tests designed for educational and vocational guidance in junior and senior high schools. Yields nine scores including an index of scholastic ability.

AN ACCESSION NUMBER: TC011282 ETS 8410.
TI TITLE: Nonverbal Test of Cognitive Skills.
DT SUBTESTS: Paper Folding; Cube Building; Figure Identification; Figure Completion; Figure Discrimination; Figure Drawing; Figure Memory; Picture Completion I; Picture Completion II; Color Patterns; Knox Cubes; Dominoes; Tapping; Figure Association.
AU AUTHOR: Johnson-G-Orville; Boyd-Herbert-F.
YR YEAR: 81.
AV AVAILABILITY: The Psychological Corporation; 555 Academic Court, San Antonio, TX 78204-2498.
GL GRADE LEVEL: K; 1; 2; 3; 4; 5; 6; 7.
NT NOTES:
TIME: 30; approx.
ITEMS: 126.
AB ABSTRACT: Individually administered test of cognitive skills which are essential to academic learning, have little or no dependence upon specific social and school-learned skills and knowledge, but will predict the degree to which a child will profit from instruction in those skills. Intended to test those skills essential to academic learning and performance: memory, association, recognition, discrimination, space and spatial relationships, conceptual thinking, reasoning, perception, and ability to recognize and to deal with quantities.

AN ACCESSION NUMBER: TC011153 ETS 8410.
TI TITLE: National Engineering Aptitude Search.
DT SUBTESTS: Mathematics; Science Reading; Mechanical Reasoning; Personal Interest Inventory; Biographical Profile.
AU INSTITUTIONAL AUTHOR: American Coll. Testing Program, Iowa City, Iowa.
YR YEAR: 81.
AV AVAILABILITY: JETS-Inc.; 1420 King St. #405, Alexandria, VA 22314-2715.
GL GRADE LEVEL: 9; 10; 11; 12.
NT NOTES:
   TIME: 135.
AB ABSTRACT: Designed to determine the aptitudes and qualifications of students interested in entering engineering programs on the college level. Does not predict whether the student will be a successful engineer.

AN ACCESSION NUMBER: TC011135 ETS 8410.
TI TITLE: Kaufman Infant and Preschool Scale.
DT SUBTESTS: General Reasoning; Storage; Verbal Communication.
AU AUTHOR: Kaufman; H.
YR YEAR: 79.
AV AVAILABILITY: Stoelting Co.; 620 Wheat Lane, Wood Dale, IL 60191.
TG TARGET AUDIENCE: AGE 0-4.
NT NOTES:
   TIME: 30.
   ITEMS: 20.
AB ABSTRACT: Designed to measure early high level cognition in general reasoning, storage, verbal communication. Indicates need for intervention and suggests activities. Can be used with the mentally retarded persons of all ages whose mental age using KIPS does not exceed 48 months.

AN ACCESSION NUMBER: TC011093 ETS 8512.
AU AUTHOR: Boehm-Ann-E; Slater-Barbara-R.
YR YEAR: 81.
AV AVAILABILITY: Teachers College Press; P.O. Box 2032, Colchester, VT 05449.
TG TARGET AUDIENCE: AGE 2-5.
NT NOTES:
   TIME: 25; approx.
   ITEMS: 98.
AB ABSTRACT: Administered to each child individually by teachers, aides, school psychologists, or learning disability specialists to provide a profile of prekindergarten or kindergarten children's skill competencies for purposes of curriculum planning. Five broad categories of skills are included: orientation towards one's environment, discrimination of similarities and differences, comprehension and concept formation, coordination, and immediate and delayed memory.

AN ACCESSION NUMBER: TC010940 ETS 8304.
TI TITLE: Word and Number Assessment Inventory.
DT SUBTESTS: Words; Numbers.
AU AUTHOR: Johansson-Jean-C; Johansson-Charles-B.
YR YEAR: 76.
AV AVAILABILITY: National Computer Systems; Professional Assessment Services, P.O. Box 1416; Minneapolis, MN 55440.

NT NOTES:
  TIME: 60; approx.
  ITEMS: 80.
AB ABSTRACT: Measures examinee’s verbal and mathematical skills and helps match skills to appropriate career areas. Provides career information relevant to scores and offers suggestions for skill improvement.

AN ACCESSION NUMBER: TC010777 ETS 8410.
TI TITLE: Learning Potential Assessment Device.
DT SUBTESTS: Organization of Data; Plateaux Test; LPAD Variations I; Representational Stencil Design Test.
AU AUTHOR: Feuerstein-Reuven; Rand-Yaacov; Hoffman-Mildred-B.
YR YEAR: 79.
TG TARGET AUDIENCE: AGE 12-17.
NT NOTES:
  ITEMS: 49.
AB ABSTRACT: Battery of non-verbal tests designed to measure intellectual potential of handicapped and disadvantaged adolescents. Examinee is given training to master series of tasks concerning elementary cognitive principles. Tests the individual in the process of learning.

AN ACCESSION NUMBER: TC010737 ETS 8304.
TI TITLE: Washington Pre-College Test.
AU INSTITUTIONAL AUTHOR: Washington Pre-College Testing Program, Seattle, WA.
YR YEAR: 79.
AV AVAILABILITY: Washington Pre-College Testing Program; 1400 N.E. Campus Parkway, Seattle, WA 98105.
GL GRADE LEVEL: 11; 12.
NT NOTES:
  ITEMS: 352.
AB ABSTRACT: Designed to assist college bound students and their guidance counselors to determine areas of interest and ability. WPC yields two composite scores - verbal and quantitative and requires approximately 140 minutes to complete. The Vocational Interest Inventory (VII) is a 112 item questionnaire that has been part of the WPC Test since 1970. It is untimed. Tests are updated periodically. See ERIC document ED 185 074 for other information.
AN ACCESSION NUMBER: TC009267 ETS 8512.
TI TITLE: SOI Screening Form for Gifted.
AU AUTHOR: Meeker-Mary; Meeker-Robert.
YR YEAR: 75.
AV AVAILABILITY: SOI Systems; 45755 Goodpasture Rd., Vida, OR 97488.
GL GRADE LEVEL: 1; 2; 3; 4; 5; 6.
NT NOTES:
   TIME: 30; approx.
AB ABSTRACT: Designed to identify those students who should be tested further for gifted qualification.

AN ACCESSION NUMBER: TC009266 ETS 8512.
TI TITLE: SOI Learning Abilities Test: Reading Readiness.
AU AUTHOR: Meeker-Mary; Meeker-Robert.
YR YEAR: 75.
AV AVAILABILITY: SOI Systems; 45755 Goodpasture Rd., Vida, OR 97488.
TG TARGET AUDIENCE: AGE 2-5.
NT NOTES:
AB ABSTRACT: Designed to measure level of student’s reading readiness. May be used to derive a reading readiness training program. Any student who gets all items correct should be administered SOI Basic test to establish upper limits.

AN ACCESSION NUMBER: TC009265 ETS 8410.
DT SUBTESTS: Memory; Divergent Production; Evaluation; Cognition; Convergent Production.
AU AUTHOR: Meeker-Mary; And Others.
YR YEAR: 75.
AV AVAILABILITY: SOI Systems; 45755 Goodpasture Rd., Vida, OR 97488.
GL GRADE LEVEL: K; 1.
NT NOTES:
AB ABSTRACT: Basal level of achievement drawn from regular version of SOI Learning Abilities Test. Designed for young children and those with special needs such as mentally gifted children and learning handicapped children. Students who pass all items on any subtest or do extremely well on test in general should be tested on regular revision of SOI-LA where there are two higher levels of difficulty.

AN ACCESSION NUMBER: TC009264 ETS 8410.
TI TITLE: SOI Learning Abilities Test.
DT SUBTESTS: Memory; Divergent Production; Evaluation; Cognition; Convergent Production.
AU AUTHOR: Meeker-Mary; Meeker-Robert.
YR YEAR: 75.
AV AVAILABILITY: SOI Systems; 45755 Goodpasture Rd., Vida, OR 97488.
GL GRADE LEVEL: 1; 2; 3; 4; 5; 6; 7; 8; 9; 10; 11.
NT NOTES:
ABSTRACT: Designed to assess specific learning abilities which research has shown to form foundational cluster for a student's learning reading and arithmetic. Three levels of difficulty are: beginning level, intermediate level and advanced level. All students should begin at first level to establish a basal level of performance and to ensure student understands what is to be done for each subtest. Subtests are based on Guilford's Structure of Intellect (SI) factors.

AN ACCESSION NUMBER: TC009063 ETS 8410.
TI TITLE: Tests of Basic Experiences, Second Edition: Level L.

NT NOTES: TIME: 80; approx.
AB ABSTRACT: Comprehensive system for assessment of cognitive and sensorimotor abilities, and adaptive behavior of children ages five to eleven years of age. Parent Interview Materials and Student Assessment Materials are two major components. Each component is available as a separate package. Parent Interview is conducted in the home with the principal caretaker of the child, usually the mother. May be conducted in English or Spanish and requires one hour to complete. The measures used in the interview include the Adaptive Behavior Inventory for Children (TC011756); Sociocultural Scales; and Health History Inventories. Student Assessment Materials include Physical Dexterity Tasks; Bender Visual Motor Gestalt Test (TC001319); Weight by Height; Visual Acuity; Auditory Acuity; and WISC-R (TC007461). The system is racially and culturally nondiscriminatory and thus fulfills the requirements of the Education for All Handicapped Children Act. Normative data are available for Black, Hispanic, and White Children.

AN ACCESSION NUMBER: TC008950 ETS 8512.
TI TITLE: Instruments for Measuring Cognitive Abilities at the Intermediate Grade Level.
AU AUTHOR: Harris-Margaret-L; Harris-Chester-W.
YR YEAR: 74.
GL GRADE LEVEL: 4; 5; 6.
AB ABSTRACT: A series of instruments to measure cognitive abilities in the areas of verbal ability, induction, numerical ability, word fluency, memory, perceptual speed, simple visualization, spatial ability, evaluation, and seeing relationships. Many instruments are adaptations of Guilford's work. Related material in ERIC Document ED 107 470. Test instruments and manual are intended to accompany authors; 1973 monograph "A Structure of Concept Attainment Abilities."
ABSTRACT: The Kit of Factor Referenced Cognitive Tests consists of seventy-two cognitive tests intended as markers for twenty-three aptitude factors to which they are referenced. The factors assessed are Flexibility of Closure, Speed of Closure, Verbal Closure, Associational Fluency, Expressional Fluency, Figural Fluency, Ideational Fluency, Word Fluency, Induction, Integrative Processes, Associative Memory, Memory Span, Visual Memory, Number, Perceptual Speed, General Reasoning, Logical Reasoning, Spatial Orientation, Spatial Scanning, Verbal Comprehension, Visualization, Figural Flexibility, and Flexibility of Use. The kit is designed for research purposes. One of four instruments designed to measure flexibility of use, the mental set necessary to think of different uses for objects. Subject is asked to think of up to six different uses for four common objects. Score is based on number of changes of use, not on total number of responses.
flexibility of use, the mental set necessary to think of different uses for objects. Subject is asked to combine three or more items from a list of seven into groups and to provide a reason for each grouping.

AB ABSTRACT: The Kit of Factor Referenced Cognitive Tests consists of seventy two cognitive tests intended as markers for twenty three aptitude factors to which they are referenced. The factors assessed
are Flexibility of Closure, Speed of Closure, Verbal Closure, 
Associational Fluency, Expressional Fluency, Figural Fluency, 
Ideational Fluency, Word Fluency, Induction, Integrative Processes, 
Associative Memory, Memory Span, Visual Memory, Number, Perceptual 
Speed, General Reasoning, Logical Reasoning, Spatial Orientation, 
Spatial Scanning, Verbal Comprehension, Visualization, Figural 
Flexibility, and Flexibility of Use. The kit is designed for 
research purposes. One of three instruments designed to measure 
figural flexibility, the ability to change set in order to generate 
new and different solutions to figural problems. Subject is asked to 
arrange a certain number of specified capital letters in different 
positions or orientations on matrices of dots.

AN ACCESSION NUMBER: TC008255 ETS 8304.

ABSTRACT: The Kit of Factor Referenced Cognitive Tests consists of seventy-two cognitive tests intended as markers for twenty-three aptitude factors to which they are referenced. The factors assessed are Flexibility of Closure, Speed of Closure, Verbal Closure, Associational Fluency, Expressional Fluency, Figural Fluency, Ideational Fluency, Word Fluency, Induction, Integrative Processes, Associative Memory, Memory Span, Visual Memory, Number, Perceptual Speed, General Reasoning, Logical Reasoning, Spatial Orientation, Spatial Scanning, Verbal Comprehension, Visualization, Figural Flexibility, and Flexibility of Use. The kit is designed for research purposes. One of three tests to measure spatial scanning, the speed in exploring visually a wide or complicated spatial field. Suggested by one of the AAF Printed Classification Tests. Examinee must plan routes between given points so that no roadblocks need to be crossed. Task is to find shortest available route as quickly as possible.

AB ABSTRACT: The Kit of Factor Referenced Cognitive Tests consists of seventy two cognitive tests intended as markers for twenty three aptitude factors to which they are referenced. The factors assessed are Flexibility of Closure, Speed of Closure, Verbal Closure, Associational Fluency, Expressional Fluency, Figural Fluency, Ideational Fluency, Word Fluency, Induction, Integrative Processes, Associative Memory, Memory Span, Visual Memory, Number, Perceptual Speed, General Reasoning, Logical Reasoning, Spatial Orientation, Spatial Scanning, Verbal Comprehension, Visualization, Figural Flexibility, and Flexibility of Use. The kit is designed for research purposes. One of three tests to measure spatial scanning, the speed in exploring visually a wide or complicated spatial field. This test was suggested by one of the AAF Printed Classification Tests. Each item consists of a network of lines having many intersecting and intermeshed wires with several sets of terminals. Task is to trace lines and determine for which one of 5 pairs of terminals there is a complete circuit through a circle at the top. Comprehension of the pattern by scanning rather than simple visual pursuit of lines is encouraged.

AB ABSTRACT: The Kit of Factor Referenced Cognitive Tests consists of seventy two cognitive tests intended as markers for twenty three aptitude factors to which they are referenced. The factors assessed are Flexibility of Closure, Speed of Closure, Verbal Closure, Associational Fluency, Expressional Fluency, Figural Fluency, Ideational Fluency, Word Fluency, Induction, Integrative Process, Associative Memory, Memory Span, Visual Memory, Number, Perceptual Speed, General Reasoning, Logical Reasoning, Spatial Orientation, Spatial Scanning, Verbal Comprehension, Visualization, Figural Flexibility, and Flexibility of Use. The kit is designed for research purposes. A speed test alternating ten items of subtracting
2-digit numbers from 2-digit numbers and ten items of multiplying 2-digit numbers by single-digit numbers. One of a series of four instruments designed to measure number faculty, the ability to perform basic arithmetic operations with speed and accuracy. This factor is not a major component in mathematical reasoning or higher mathematical skills.

ABSTRACT: The Kit of Factor Referenced Cognitive Tests consists of seventy two cognitive tests intended as markers for twenty three aptitude factors to which they are referenced. The factors assessed are Flexibility of Closure, Speed of Closure, Verbal Closure, Associational Fluency, Expressional Fluency, Figural Fluency, Ideational Fluency, Word Fluency, Induction, Integrative Process, Associative Memory, Memory Span, Visual Memory, Number, Perceptual Speed, General Reasoning, Logical Reasoning, Spatial Orientation, Spatial Scanning, Verbal Comprehension, Visualization, Figural Flexibility, and Flexibility of Use. The kit is designed for research purposes. Instrument was suggested by Thurstone's Marks. One of three tests to identify types of reasoning abilities involved in forming and testing hypotheses that will fit a set of data.
The Kit of Factor Referenced Cognitive Tests consists of seventy two cognitive tests intended as markers for twenty three aptitude factors to which they are referenced. The factors assessed are Flexibility of Closure, Speed of Closure, Verbal Closure, Associational Fluency, Expressional Fluency, Figural Fluency, Ideational Fluency, Word Fluency, Induction, Integrative Process, Associative Memory, Memory Span, Visual Memory, Number, Perceptual Speed, General Reasoning, Logical Reasoning, Spatial Orientation, Spatial Scanning, Verbal Comprehension, Visualization, Figural Flexibility, and Flexibility of Use. The kit is designed for research purposes. Instrument is similar to Thurstone's First and Last Letters. Subject is asked to write as many words as possible beginning with one given letter and ending with another. One of three instruments which measure word fluency, the facility to produce words that fit one or more structural, phonetic or orthographic restrictions that are not relevant to the meaning of the words.
AN ACCESSION NUMBER: TC008211 ETS 8304.
AU AUTHOR: Ekstrom-Ruth-B; And Others.

ITEMS: 36.
AB ABSTRACT: The Kit of Factor Referenced Cognitive Tests consists of seventy two cognitive tests intended as markers for twenty three aptitude factors to which they are referenced. The factors assessed are Flexibility of Closure, Speed of Closure, Verbal Closure, Associational Fluency, Expressional Fluency, Figural Fluency, Ideational Fluency, Word Fluency, Induction, Integrative Process, Associative Memory, Memory Span, Visual Memory, Number, Perceptual Speed, General Reasoning, Logical Reasoning, Spatial Orientation, Spatial Scanning, Verbal Comprehension, Visualization, Figural Flexibility, and Flexibility of Use. The kit is designed for research purposes. One of three tests to measure verbal closure, the ability to solve problems requiring the identification of visually presented words when some of the letters are missing. Subject is asked to provide one or more letters to complete common words.

AN ACCESSION NUMBER: TC008197 ETS 8304.

AB ABSTRACT: The Kit of Factor Referenced Cognitive Tests consists of seventy two cognitive tests intended as markers for twenty three aptitude factors to which they are referenced. The factors assessed are Flexibility of Closure, Speed of Closure, Verbal Closure, Associational Fluency, Expressional Fluency, Figural Fluency,
Ideational Fluency, Word Fluency, Induction, Integrative Process, Associative Memory, Memory Span, Visual Memory, Number, Perceptual Speed, General Reasoning, Logical Reasoning, Spatial Orientation, Spatial Scanning, Verbal Comprehension, Visualization, Figural Flexibility, and Flexibility of Use. The kit is designed for research purposes. Hidden Figures Test is an adaptation of the Gottschaldt Figures type test. One of three tests to measure flexibility of closure. May be used to study field independence. Instrument has some variance on factors of Spatial Orientation and Visualization. Flexibility of closure is the ability to retain a given visual configuration in mind so as to disembed it from other well defined perceptual material.
AN ACCESSION NUMBER: TC007912 ETS 8410.
TI TITLE: Allied Health Aptitude Test.
DT SUBTESTS: Verbal Ability; Numerical Ability; Arithmetic Processes; Science; Reading Skill; Scholastic Aptitude Total.
AU INSTITUTIONAL AUTHOR: Psychological Corp., San Antonio, TX.
AV AVAILABILITY: The Psychological Corporation; 555 Academic Court, San Antonio, TX 78204-2498.
TG TARGET AUDIENCE: Adults.
NT NOTES: TIME: 240.
AB ABSTRACT: Designed as an exam for those seeking admission to various allied health programs such as inhalation therapy, medical record administration, respiratory therapy, laboratory assistants, radiologic technologists, surgical nursing technologists, medical record technologists. This exam differed from the Allied Health Entrance Examination (TC007913) in the length of the program. The AHAT program is typically a one year or two year program. Not distributed to individuals, given only at specified testing centers. Instrument under constant revision, thus, the number of items and time vary (from 3-1/2 to 4 hours). Restricted.

AN ACCESSION NUMBER: TC007897 ETS 8512.
TI TITLE: Comprehensive Ability Battery.
DT SUBTESTS: Verbal Ability; Numerical Ability; Spatial Ability; Perceptual Completion; Clerical Speed and Accuracy; Reasoning; Hidden Shapes; Rote Memory; Mechanical Ability; Meaningful Memory; Memory Span; Spelling; Auditory Ability; Esthetic Judgment; Organizing Ideas; Production of Ideas; Verbal Fluency; Originality; Tracking; and Drawing.
AU AUTHOR: Hakstian-A-Ralph; Cattell-Raymond-B.
YR YEAR: 75.
AV AVAILABILITY: Institute for Personality and Ability Testing; P.O. Box 138; 1602 Coronado Drive, Champaign, IL 61820.
GL GRADE LEVEL: 9; 10; 11; 12.
AB ABSTRACT: Designed to measure primary ability factors important in industrial settings, and career and vocational counseling. Battery consists of twenty tests in four test booklets. Each test measures a single ability and may be used individually or in combination. Timed tests require approximately 5 to 7 minutes each.

AN ACCESSION NUMBER: TC007687 ETS 8410.
TI TITLE: Schematic Concept Formation Task.
AU AUTHOR: Evans-Selby-H.
YR YEAR: 73.
TG TARGET AUDIENCE: Age 6-65.
AB ABSTRACT: Designed to measure aptitude for spontaneous
classification of stimuli on the basis of similarity, this nonverbal cognitive aptitude measure may be useful in predicting a person's learning ability or academic potential independently of his cultural background or educational level. The items consist of computer generated graph-like and language-like patterns.

AN ACCESSION NUMBER: TC006818 ETS 8410.
AU AUTHOR: Burgemeister-Bessie-B.
YR YEAR: 72.
AV AVAILABILITY: The Psychological Corporation; 555 Academic Court, San Antonio, TX 78204-2498.
TG TARGET AUDIENCE: AGE 3-10.
NT NOTES:
TIME: 20; approx.
ITEMS: 92.
AB ABSTRACT: Designed to yield estimate of general reasoning ability of children aged 3-5 through 9-11. Child takes level indicated for his chronological age. From 51 to 65 items are actually presented depending upon level administered. Requires no verbal response and a minimal motor response. CMMS is suitable for use with brain damaged children, as well as those with mental retardation, visual handicaps, speech impairment, or hearing loss. Instrument does not depend on reading or language skills, making it suitable for non-English speakers. Spanish directions are included in manual.

AN ACCESSION NUMBER: TC006503 ETS 8410.
TI TITLE: Preliminary Scholastic Aptitude Test/National Merit Scholarship Qualifying Test.
DT SUBTESTS: Verbal; Quantitative.
AU INSTITUTIONAL AUTHOR: Educational Testing Service, Princeton, NJ.
YR YEAR: 82.
AV AVAILABILITY: PSAT/NMSQT Program; Educational Testing Service, P.O. Box 24700, Oakland, CA 94623-1700.
GL GRADE LEVEL: 11.
NT NOTES:
TIME: 100.
AB ABSTRACT: Designed to measure verbal and mathematical reasoning abilities. Can be used by school counselors for educational planning and to estimate student performance on the Scholastic Aptitude Test required by many colleges for admission. Used as the qualifying tests for students who wish to participate in nationwide scholarship competitions. Special editions are available in large type and braille. Tests are updated regularly.
AN ACCESSION NUMBER: TC006404 ETS 8410.
TI TITLE: Optometry College Admission Test.
DT SUBTESTS: Verbal Ability; Quantitative Ability; Biology; Chemistry; Physics; Study And Reading.
AU INSTITUTIONAL AUTHOR: Psychological Corp., San Antonio, TX.
AV AVAILABILITY: The Psychological Corporation; 555 Academic Court, San Antonio, TX 78204-2498.
TG TARGET AUDIENCE: Adults.
NT NOTES: TIME: 240.
AB ABSTRACT: Designed as an entrance exam for those seeking admission to colleges of optometry. Measures both general academic ability and scientific knowledge. Administered by The Psychological Corporation for the Association of Schools and Colleges of Optometry. Restricted distribution; tests given only at designated test centers throughout the U.S. and Canada. Instrument is under constant revision; thus, the number of items and time (3-1/2 to 4 hours) varies.

AN ACCESSION NUMBER: TC005932 ETS 8304.
TI TITLE: Guilford-Zimmerman Aptitude Survey: Spatial Visualization.
AU AUTHOR: Guilford-J-P; Zimmerman-Wayne-S.
AV AVAILABILITY: Consulting Psychologists Press; 3803 East Bayshore Road, Palo Alto, CA 94303.
TG TARGET AUDIENCE: AGE 14-17, Adults.
NT NOTES: TIME: 10.
AB ABSTRACT: One part of the seven part Guilford-Zimmerman Aptitude Survey; the parts may be used singly, or in a combined form. This part measures the factor known as cognition of figural transformations, the ability to manipulate ideas in a visual manner. This ability is used by many types of engineers, architects, and draftsmen.

AN ACCESSION NUMBER: TC005931 ETS 8304.
TI TITLE: Guilford-Zimmerman Aptitude Survey: Spatial Orientation.
AU AUTHOR: Guilford-J-P; Zimmerman-Wayne-S.
AV AVAILABILITY: Consulting Psychologists Press; 3803 East Bayshore Road, Palo Alto, CA 94303.
TG TARGET AUDIENCE: AGE 14-17, Adults.
NT NOTES: TIME: 10.
AB ABSTRACT: One part of the seven part Guilford-Zimmerman Aptitude Survey. The parts may be used singly, or in a combined form. This part measures the factor known as cognition of figural systems, the ability to perceive spatial arrangements. This ability is used in the operation of machines when there is a choice of direction of movement in response to given signals.
AN ACCESSION NUMBER: TC005930 ETS 8304.
TI TITLE: Guilford-Zimmerman Aptitude Survey: Perceptual Speed.
AU AUTHOR: Guilford-J-P; Zimmerman-Wayne-S.
AV AVAILABILITY: Consulting Psychologists Press; 3803 East Bayshore Road, Palo Alto, CA 94303.
TG TARGET AUDIENCE: AGE 14-17, Adults.
NT NOTES:
TIME: 5.
AB ABSTRACT: One of seven parts in the Guilford-Zimmerman Aptitude Survey. The parts may be given separately, i.e. singly, or in a combined form. This part measures the ability to compare visual details quickly and accurately and to judge whether they are identical or not. This ability is known as evaluation of figural units. Many clerical positions, as well as inspectors or machine operators, depend upon this type of aptitude.

AN ACCESSION NUMBER: TC005929 ETS 8304.
AU AUTHOR: Guilford-J-P; Zimmerman-Wayne-S.
AV AVAILABILITY: Consulting Psychologists Press; 3803 East Bayshore Road, Palo Alto, CA 94303.
TG TARGET AUDIENCE: AGE 10-17, Adults.
NT NOTES:
TIME: 8.
AB ABSTRACT: One part of seven parts in the Guilford-Zimmerman Aptitude Survey. The parts may be used separately or in a combined form. This part measures numerical facility, an aptitude used for tasks involving work with numbers—accounting, making change, and many other types of clerical work. Problems include addition, subtraction, and multiplication in multiple-choice items.

AN ACCESSION NUMBER: TC005928 ETS 8304.
AU AUTHOR: Guilford-J-P; Zimmerman-Wayne-S.
AV AVAILABILITY: Consulting Psychologists Press; 3803 East Bayshore Road, Palo Alto, CA 94303.
TG TARGET AUDIENCE: AGE 14-17, Adults.
NT NOTES:
TIME: 35.
AB ABSTRACT: One of seven parts of the Guilford-Zimmerman Aptitude Survey; the parts may be given separately, or in a combined form. This part measures the factor known as cognition of semantic systems, which is used in a variety of problem-solving tasks. The authors have reduced the amount of numerical computation to a minimum.
AN ACCESSION NUMBER: TC005927 ETS 8304.
AU AUTHOR: Guilford-J-P; Zimmerman-Wayne-S.
AV AVAILABILITY: Consulting Psychologists Press; 3803 East Bayshore Road, Palo Alto, CA 94303.
TG TARGET AUDIENCE: AGE 14-17, Adults.
NT NOTES: For other sections of the Survey, see the Survey's General Reasoning (TC 005 928); Numerical Operations (TC 005 929); Perceptual Speed (TC 005 930); Spatial Orientation (TC 005 931); Spatial Visualization (TC 005 932).
TIME: 25.
ITEMS: 72.
AB ABSTRACT: Measures the factor known as cognition of semantic units, or verbal comprehension; and is one of seven parts in the Guilford-Zimmerman Aptitude Survey. The parts may be used separately or in a combined form.

AN ACCESSION NUMBER: TC005156 ETS 8512.
TI TITLE: Cutrona Child Study Profile of Psycho-Educational Abilities.
DT SUBTESTS: General Behavior; Gross Motor Development; Fine Motor Development; Body Image and Awareness; Tactile Kinesthetic Development; Visual Motor Perception; Auditory Perceptions; Time Orientation; Non Verbal Conceptualization; Numerical Conceptualization.
AU AUTHOR: Cutrona-Michael-P.
YR YEAR: 70.
AV AVAILABILITY: Michael P. Cutrona; 1298 Victory Blvd., Staten Island, NY 10301.
GL GRADE LEVEL: K; 1; 2; 3.
NT NOTES:
ITEMS: 98.
AB ABSTRACT: Screening device used to provide a psychoeducational profile of the child. Used as part of complete child study diagnostic evaluation, in planning pre-school and primary grade educational programs, and for special education programs. According to the author, the instrument indicates general behavioral trends and the child's adequacy of ability or competency in psychoeducational areas.

AN ACCESSION NUMBER: TC004716 ETS 8410.
TI TITLE: SRA Verbal Form.
AU AUTHOR: Thurstone-Thelma-Gwinn; Thurstone-L-L.
YR YEAR: 56.
TG TARGET AUDIENCE: AGE 13-64.
NT NOTES:
TIME: 15.
ITEMS: 84.
AB ABSTRACT: Designed to measure general ability of students in junior high school through college, as well as adults from unskilled
laborers to executives. SRA Verbal is a shorter version of Thurstone Test of Mental Alertness (TC002081). A linguistic, quantitative, and total score may be derived. Personnel managers and educational counselors may use this instrument to determine individual's ability to learn, solve problems, foresee and plan, and think creatively. Forms A and B are available. Job tasks tested include ability to learn, comprehend, solve problems, follow instructions, and adjust effectively to changing situations.

AN ACCESSION NUMBER: TC004245 ETS 8410.
TI TITLE: Vane Kindergarten Test.
DT SUBTESTS: Perceptual Motor; Man; Vocabulary.
AU AUTHOR: Vane-Julia-R.
YR YEAR: 68.
AV AVAILABILITY: Clinical Psychology Publishing Co.; 4 Conant Square, Brandon, VT 05733-0315.
GL GRADE LEVEL: K.
AB ABSTRACT: Developed to evaluate intellectual and academic potential and behavior adjustment of young children. Most effective when administered any time after first three weeks of the kindergarten year. May be used with pre-kindergarten age children in special programs.

AN ACCESSION NUMBER: TC004135 ETS 8512.
TI TITLE: Hiskey Nebraska Test of Learning Aptitude.
DT SUBTESTS: Bead Patterns; Memory for Colors; Picture Identification; Picture Association; Paper Folding Patterns; Visual Attention Span; Block Patterns; Completion of Drawings; Memory for Digits; Puzzle Blocks; Picture Analogies; Spatial Reasoning.
YR YEAR: 66.
AV AVAILABILITY: The Hiskey Nebraska Test; 5640 Baldwin, Lincoln, NE 68507.
TG TARGET AUDIENCE: AGE 2-17, Adults.
NT NOTES: TIME: 60; approx.
AB ABSTRACT: Designed to evaluate learning potentials of children with hearing, speech or language handicaps. Separate norms for deaf and hearing subjects, ages 2.5 to 18.5 years. All responses are non-verbal. This is a revision and restandardization of the Nebraska Test of Learning Aptitude for Young Deaf Children. The full test is not currently available pending an additional restandardization.

AN ACCESSION NUMBER: TC003700 ETS 8410.
TI TITLE: Graduate Record Examinations: General Test.
DT SUBTESTS: Verbal; Quantitative; Analytical Ability.
AU INSTITUTIONAL AUTHOR: Educational Testing Service, Princeton, N.J.
YR YEAR: 82.
AV AVAILABILITY: Educational Testing Service; CN 6000, Princeton,
ABSTRACT: Designed to measure broadly defined verbal, quantitative, and analytical skills and to predict graduate school success. Includes analogies, antonyms, sentence completions, reading comprehension, arithmetic, algebra, geometry, quantitative comparison, data interpretation and analytical and logical reasoning. At any given time, several varying editions are in active use. The number of questions as well as the questions themselves vary from edition to edition. It is also available in braille (1972 Nemeth code), in a large print edition, and on cassettes. Used for selection of applicants for graduate school, selection of fellowship applicants, and for guidance and counseling. As of October, 1982 the title will be changed to Graduate Record Examinations: General Test.

AN ACCESSION NUMBER: TC003035 ETS 8410.
TI TITLE: Academic Aptitude Tests (Non-Verbal Intelligence).
DT SUBTESTS: Spatial Relations; Comprehension of Physical Relations; Graphic Relations.
AU AUTHOR: Kobal-Andrew; And Others.
YR YEAR: 57.
AV AVAILABILITY: Psychometric Affiliates; P.O. Box 807, Murfreesboro, TN 37133.
NT NOTES:
   TIME: 26; approx.
   ITEMS: 58.
AB ABSTRACT: Designed to evaluate that aspect of intelligence related to aptitude for abstract academic work required in mathematical, engineering, designing and other physical sciences.

AN ACCESSION NUMBER: TC002503 ETS 8410.
TI TITLE: Group Diagnostic Reading Aptitude and Achievement Tests, Intermediate Form.
DT SUBTESTS: Paragraph Understanding; Speed; Word Discrimination; Arithmetic Computation; Spelling; Letter Memory; Form Memory; Discrimination and Orientation; Copying Text; Crossing Out Letters; Vocabulary.
AU AUTHOR: Monroe-Marion; Sherman-Eva-Edith.
YR YEAR: 66.
AV AVAILABILITY: CH Nevins Printing Co.; 311 Bryn Mawr Island, Bayshore Gardens, Bradenton, FL 33505.
GL GRADE LEVEL: 3; 4; 5; 6; 7; 8; 9.
NT NOTES:
ITEMS: 390.
AB ABSTRACT: Designed to measure achievement and aptitude of students in grades three through nine. Yields educational, word discrimination and aptitude data percentile scores.

AN ACCESSION NUMBER: TC002219 ETS 8410.
TI TITLE: Academic Aptitude Tests (Verbal Intelligence).
DT SUBTESTS: General Information; Academic And General Science; Mental Alertness; Comprehension; Mental Alertness; Judgment; Mental Alertness; Arithmetic Reasoning; Comprehension Of Relations; Logical Selection; Comprehension Of Relations; Analogies; Comprehension Of Relations; Classification.
AU AUTHOR: Kobal-Andrew; And Others.
YR YEAR: 43.
AV AVAILABILITY: Psychometric Affiliates; Box 807, Murfreesboro, TN 37133.
TG TARGET AUDIENCE: AGE 12-64.
NT NOTES:
TIME: 40.
ITEMS: 140.
AB ABSTRACT: To measure those mental aptitudes which are considered, according to the authors, to be the essential basics for academic and professional work, such as law, medicine, teaching, etc. May be used in secondary schools, colleges, and industry, though the emphasis is upon secondary school and first year college.

AN ACCESSION NUMBER: TC002215 ETS 8206.
TI TITLE: One Minute Per-Flu-Dex Tests.
DT SUBTESTS: Symbol Substitution; Number Perception; Letter Perception; Arithmetical; Word Completion; Manual Speed; Aiming Accuracy.
AU AUTHOR: Holmes-F-J.
YR YEAR: 55.
AV AVAILABILITY: Psychometric Affiliates; P.O. Box 807; Murfreesboro, TN 37133.
TG TARGET AUDIENCE: AGE 14-17, Adults.
NT NOTES:
TIME: 7.
ITEMS: 473.
AB ABSTRACT: A group, quickly administered, timed battery of tests that measure a variety of employment skills: ability to observe differences in words, numbers, and symbols, to do arithmetic computation, to form words and to utilize physical movements that require speed and accuracy. Each subtest is timed for 1 minute. The author suggests complementing this instrument with standard intelligence or other personnel tests. May be used with high school and college students and with adult populations. Answers require computation, performance, or brief written response.
AN ACCESSION NUMBER: TC002183 ETS 8410.
TI TITLE: Veterinary Aptitude Test.
DT SUBTESTS: Reading Comprehension; Quantitative Ability; Biology; Chemistry; Study Reading.
AU INSTITUTIONAL AUTHOR: Psychological Corp., San Antonio, TX.
AV AVAILABILITY: The Psychological Corporation; 555 Academic Court, San Antonio, TX 78204-0952.
TG TARGET AUDIENCE: Adults.
NT NOTES:
TIME: 240.
AB ABSTRACT: Group administered entrance exam. Measures the scholastic aptitude and achievement of those candidates seeking admission to a college of veterinary medicine. Instrument revised as needed. Restricted distribution. Test given only at specifically designated testing centers throughout the U.S. Under constant revision; thus, the number of items and time varies (from 3-1/2 to 4 hours).

AN ACCESSION NUMBER: TC002081 ETS 8410.
TI TITLE: Thurstone Test of Mental Alertness.
DT SUBTESTS: Linguistic; Quantitative; Total.
AU AUTHOR: Thurstone-T-G; Thurstone-L-L.
YR YEAR: 52.
GL GRADE LEVEL: 9; 10; 11; 12.
TG TARGET AUDIENCE: Adults.
NT NOTES:
TIME: 20.
ITEMS: 126.
AB ABSTRACT: Measures general mental ability. Aids in determining if an applicant has the capacity for learning the requirements of one job, if a person's ability to understand meets the requirements of one job better than another, and if a present employee can change easily to another job and learn it quickly. Recommended for use in selection, placement, and evaluation. Was also found to be predictive of scholastic success for high school students.

AN ACCESSION NUMBER: TC002078 ETS 8410.
TI TITLE: Miller Analogies Test.
AU AUTHOR: Miller-W-S.
YR YEAR: 81.
AV AVAILABILITY: The Psychological Corporation; 555 Academic Court, San Antonio, TX 78204-2498.
GL GRADE LEVEL: Higher Education.
NT NOTES:
TIME: 50.
ITEMS: 100.
AB ABSTRACT: Designed to measure scholastic aptitude at graduate
school level. May be used in business and government for selection of high level personnel. Analogy items are used to assess knowledge in vocabulary, literature, social sciences, chemistry, biology, physics, mathematics and general information. May be administered to groups or individuals. Instrument is restricted for distribution only to authorized personnel. Test is not administered in New York State.

AN ACCESSION NUMBER: TC002049 ETS 8512.
TI TITLE: Subsumed Abilities Test - A Measure of Learning Efficiency.
DT SUBTESTS: Demonstrated Abilities Score (DAS); Potential Abilities Score (PAS).
AU AUTHOR: Sanders-Joseph-R.
YR YEAR: 63.
AV AVAILABILITY: Martin M. Bruce, Publishers; 50 Larchmont Road, Box 248, Larchmont, NY 10538.
TG TARGET AUDIENCE: AGE 10-17, Adults.
NT NOTES:
TIME: 30; approx.
ITEMS: 30.
AB ABSTRACT: Designed to determine ability and willingness to learn or use previously learned visual symbol system. Measures ability to learn and use skills important in most learning processes. Valuable in academic, rehabilitation, and business assessment and selection. Success requires three hierarchical perceptual skills: recognition, abstraction, and conceptualization.

AN ACCESSION NUMBER: TC001841 ETS 8304.
TI TITLE: STS High School Placement Test.
DT SUBTESTS: Verbal; Quantitative; Reading; Mathematics; Language.
AU INSTITUTIONAL AUTHOR: Scholastic Testing Service, Bensenville, IL.
YR YEAR: 63.
AV AVAILABILITY: Scholastic Testing Service; 480 Meyer Rd., Bensenville, IL 60106.
GL GRADE LEVEL: 8; 9.
NT NOTES:
TIME: 150.
ITEMS: 298.
AB ABSTRACT: A testing program designed to aid in the selection and/or placement of high school students. May be used as a proficiency test or as part of a placement program. Comes in two forms: The Closed form (new each year) measures those ability and skills basic to the high school curriculum. The Open form is a reprint of the recent Closed form. Optional tests—Mechanical Aptitude, Science, and Catholic Religion—are also available and take about 20 minutes each. Includes both cognitive skills (verbal and quantitative) and Achievement in reading, math and language arts.
AN ACCESSION NUMBER: TC001557 ETS 8410.
TI TITLE: SRA Pictorial Reasoning Test.
AU AUTHOR: McMurry-Robert-N; Arnold-Phyllis-D.
YR YEAR: 66.
GL GRADE LEVEL: 9; 10; 11; 12.
TG TARGET AUDIENCE: AGE 14-64.
NT NOTES:
   TIME: 15.
   ITEMS: 80.
AB ABSTRACT: Designed as a test of general ability to measure learning potential of individuals from diverse backgrounds with reading difficulties. Instrument is culturally fair and predictive of job success. Most useful as a screening test for entry level jobs. Directions have been written at a sixth grade reading level to facilitate understanding.

AN ACCESSION NUMBER: TC001519 ETS 8410.
TI TITLE: Experimental Comparative Prediction Battery.
DT SUBTESTS: Following Directions; Paper Folding Test; Year 2000; Induction; Spatial Rotation Test; Paper Folding Test; Artificial Language; Sentence Completion; Similar Figures; Arithmetic Speed Test; Interest Index.
AU INSTITUTIONAL AUTHOR: Educational Testing Service, Princeton, N.J.
YR YEAR: 64.
GL GRADE LEVEL: 9; 10; 11; 12; Higher Education.
NT NOTES:
   TIME: 165.
   ITEMS: 675.
AB ABSTRACT: Battery measures six aptitudes including induction integration, visualization, meaningful memory, number facility and spatial orientation. Book A1 has 125 items and is suitable for high school students; Book A2 with 115 items is suitable for college students. Books B and C may be used at either level. Book B has 243 items and book C has 192 items. Because no available statistical data apply to tests in their present form, the batteries are considered experimental and should not be used in making educational decisions.

AN ACCESSION NUMBER: TC001003 ETS 8410.
DT SUBTESTS: Verbal; Quantitative.
AU INSTITUTIONAL AUTHOR: The College Board, New York, N.Y.
YR YEAR: 82.
AV AVAILABILITY: College Board Admissions Testing Program; Princeton,
ABSTRACT: A multiple choice test designed to assist colleges and universities in evaluating applications for admission. Measures verbal and mathematical reasoning abilities. Administered at testing centers nationwide. Registration is made through ETS. Updated and revised regularly.

ABSTRACT: A multiple choice test designed to assist colleges and universities in evaluating applications for admission. Measures verbal and mathematical reasoning abilities. Administered at testing centers nationwide. Braille and large print editions are available. Updated and revised regularly.

AN ACCESSION NUMBER: TC000886 ETS 8410.
TI TITLE: Secondary School Admission Test.
DT SUBTESTS: Verbal; Quantitative; Reading Comprehension.
YR YEAR: 81.
GL GRADE LEVEL: 5; 6; 7; 8; 9; 10.
ABSTRACT: Designed for use as a uniform measure of scholastic ability for students applying for admission to grades 6-11. Administered at testing centers. Registration for the test is through ETS, which administers it for the Secondary School Admissions Test Board, Inc. Test is updated periodically.
AN ACCESSION NUMBER: TC917003 ETS 8807.
TI TITLE: Psychometric Entrance Examination of the Universities in Israel.
DT SUBTESTS: General Knowledge; Forms; Reasoning; Mathematical Comprehension; English; Hebrew.
YR YEAR: 87.
AV AVAILABILITY: National Institute for Testing and Evaluation; P.O. Box 26015; Jerusalem, Israel 91260.
TG TARGET AUDIENCE: AGE 16-17, Adults.
AB ABSTRACT: Designed for use in selection of candidates for higher education in Israel. Required for entrance for all universities and pre-academic programs as well as some nursing, technical, and engineering schools. Anyone over age 16 may take the exam. Results are valid for three years. Six examination dates are available each year. It is given in Hebrew, Arabic, English, French, Spanish and Russian. The test covers general knowledge of arts, history; the social and exact sciences; spatial logic and graphic relationships; logical reasoning; mathematical reasoning; English as a second or foreign language (most academic reading material is in English); Hebrew. Special arrangements must be made to take the exam outside of Israel.

AN ACCESSION NUMBER: TC904001 ETS 8512.
TI TITLE: Test de Habilidades Mentales Primarias.
DT SUBTESTS: Comprension Verbal; Comprension Espacial; Raciocinio; Manejo de Numeros; Fluidez Verbal.
AU AUTHOR: Thurstone-L-L; Thurstone-T-G.
YR YEAR: 63.
AV AVAILABILITY: Manual Moderno; Av Sonora 206; Col. Hipodromo, 06100; Mexico D.F., Mexico.
GL GRADE LEVEL: 4; 5; 6.
NT NOTES:

AB ABSTRACT: Measures scholastic aptitude and abstract reasoning ability in verbal, quantitative and nonverbal situation. Evolved from experience with Canadian Lorge-Thorndike Intelligence Tests and Canadian Cognitive Abilities Test, Form 1. Was normed jointly with the Canadian Tests of Basic Skills (grades 3-8). Based on theories of cognitive development and research on children's and adult's thinking which shows there are three major types of symbols involved in abstract reasoning: verbal symbols, quantitative or numerical symbols, and spatial or geometrical symbols. A revised version is available.

AN ACCESSION NUMBER: TC830383 ETS 8512.
TI TITLE: Canadian Cognitive Abilities Test, Primary Battery, Levels 1 and 2, Form 3.
DT SUBTESTS: Relational Concepts; Multimental; Quantitative Concepts; Oral Vocabulary.
AU AUTHOR: Thorndike-Robert-L; Hagen-Elizabeth.
YR YEAR: 81.
AV AVAILABILITY: Nelson Canada Ltd.; 1120 Birchmount Road, Scarborough, Ontario M1K 5G4; Canada.
GL GRADE LEVEL: K; 1; 2; 3.
NT NOTES:
TIME: 60; approx.
AB ABSTRACT: Part of an integrated test series to assess the development of cognitive abilities related to verbal, quantitative, and nonverbal reasoning and problem solving skills important in learning activities. Organized in two levels: Level 1 for kindergarten and grade 1, and level 2 for grades 2 and 3. It is a power test rather than a speed test. Scores reflect the extent to which children have developed the following skills and competencies: comprehending oral English; following directions; short-term memory; possessing effective strategies for scanning pictorial and figural stimuli to obtain either general or specific information; possessing general information and verbal concepts; comparing stimuli and detecting similarities and differences in relative size, position, quantity, shape and time; classifying, categorizing, or ordering familiar objects; using quantitative and spatial relationships and concepts. Level 1 has 84 items; level 2 has 98 items. A revised version is available.
AN ACCESSION NUMBER: TC810625 ETS 8802.
TI TITLE: MD5 Mental Ability Test.
AU AUTHOR: Davey-D-Mackenzie.
YR YEAR: 72.
AV AVAILABILITY: The Test Agency; Cournerswood House, North Dean, High Wycombe, Bucks HP14 4NW, England.
TG TARGET AUDIENCE: Adults.
NT NOTES:
  TIME: 15.
  ITEMS: 57.
AB ABSTRACT: Test of mental ability that can be used over a wide range of educational and ability levels. Useful for staff selection and placement at managerial and supervisory levels. Provides input for counseling and guidance work especially in the occupational context. Quick and easy to use. Requires both verbal/vocabulary and arithmetical skills so individuals' results will relate to their educational levels. Time concern is with the abilities to deduce relationships and to apply the rules governing them.

AN ACCESSION NUMBER: TC810547 ETS 8512.
TI TITLE: Educational Abilities Scale.
DT SUBTESTS: Clerical Aptitude; Mechanical Comprehension; Symbolic Reasoning; Spatial Reasoning; Science Reasoning.
AU AUTHOR: Stillman-Andy; Whetton-Chris.
YR YEAR: 82.
GL GRADE LEVEL: 7; 8; 9.
NT NOTES:
  TIME: 150; approx.
AB ABSTRACT: Used in Great Britain in the middle years of secondary school education to aid in the selection of courses of study and to provide information across a wide range of abilities. Used in conjunction with achievement test results and knowledge of individual students, EAS can give insight into students' skills and potential and provide information to assist with course selection in England's final two years of compulsory schooling. One new feature of the EAS is the answer-until-correct method in four out of the five scales. This uses a latent-image printing technique and requires students to perseverve with each question until they obtain the correct answer. The EAS is a measure of ability and not of attainment or academic achievement. The entire battery should be administered in two sessions with a break between sessions. Is a group-administered test.
AN ACCESSION NUMBER: TC810061 ETS 8512.
TI TITLE: Picture Test 1.
AU AUTHOR: Stuart-Joan-E.
YR YEAR: 71.
AV AVAILABILITY: NFER--Nelson Publishing Company; Darville House, 2
Oxford Road East, Windsor, Berks SL4 1DF, England.
TG TARGET AUDIENCE: AGE 7-8.
NT NOTES:
TIME: 45.
ITEMS: 60.
AB ABSTRACT: This Picture Test was formerly titled Picture
Intelligence Test 1. It was developed in England for children 7 and
8 years of age. It is used as an intelligence test and the scores
are similar to intelligence quotients in their numerical
distribution, but they differ in that they are not arrived at
through consideration of mental age. Each child is assessed by
comparing him with a representative sample of children of exactly
the same age.

AN ACCESSION NUMBER: TC810057 ETS 8512.
TI TITLE: Non-Verbal Test BD.
DT SUBTESTS: Cypher; Similarities; Analogies; Series.
AU AUTHOR: Pidgeon-D-A.
YR YEAR: 65.
AV AVAILABILITY: NFER--Nelson Publishing Company; Darville House, 2
Oxford Road East, Windsor, Berks SL4 1DF, England.
TG TARGET AUDIENCE: AGE 8-11.
NT NOTES:
TIME: 40.
ITEMS: 100.
AB ABSTRACT: This instrument is the revised edition of the Non-Verbal
Test 5, 1953. It has been designed to measure the non-verbal
ability of children in the age range 8-11. There are practice items
before each of the sub-tests so that all children will be familiar
with the type of item in the test and poor readers will not be
handicapped. In each of the four area subtests, cypher,
similarities, analogies, and series, the student is shown a series
of pictures and must choose the answer from another set of pictures.
In the age range, there was a significant difference between boys
and girls and it is recommended that the sexes be considered
separately.

AN ACCESSION NUMBER: TC810055 ETS 8512.
TI TITLE: Non-Verbal Test DH.
AU AUTHOR: Calvert-B.
YR YEAR: 58.
AV AVAILABILITY: NFER--Nelson Publishing Company; Darville House, 2
Oxford Road East, Windsor, Berks SL4 1DF, England.
ABSTRACT: This test is used to assess non-verbal skills in children, ages 10-15. The material was prepared at the National Foundation for Education Research (NFER) and was originally constructed in 1951 when it was called Non-Verbal Test 3. The instrument was intended for children about 11 years of age, but has been found to give satisfactory results with children up to the age of 15 years. A shortened version can be given to younger children, 64 items administered in 35 minutes. The items are drawings in squares with one piece missing. The student is to select from the 5 answers which piece would give the best fit.

AN ACCESSION NUMBER: TC810028 ETS 8512.
TI TITLE: Progressive Matrices, Coloured.
AU AUTHOR: Raven-J-C.
YR YEAR: 65.
AV AVAILABILITY: The Psychological Corporation; 555 Academic Court, San Antonio, TX 78204-2498.
TG TARGET AUDIENCE: AGE 5-11.
NT NOTES:
ITEMS: 36.
AB ABSTRACT: A non-verbal test designed to assess mental ability via problems concerning colored abstract figures and designs. Also useful with mentally handicapped adults. Individual or small group administration is necessary. Norms are available for several English groups purported to be culture fair.
ABSTRACT: A test of non-verbal reasoning ability, designed to account for the strong positive relationship between all measures of cognitive functioning. It is based on perceptual analogies presented in the form of two-dimensional matrices. This tool provides a measure of deductive ability or fluid intelligence which is relatively independent of specific learning acquired in a particular cultural or educational context. It is considered useful for testing where a language handicap or educational disadvantage is present. It has been used to identify potential academic talent in children from disadvantaged or ethnic minority background. This instrument can also be used for psychological assessment in clinical and educational contexts, for research, and for personnel selection.

AB ABSTRACT: Group test to assess general reasoning ability of students between the ages of 10 and 15 years. Based on a revision of ACER Intermediate Tests A and D. Developed to provide a more up-to-date measure to assess general ability at the upper primary and lower secondary levels. Based on the traditional model for
group general ability or intelligence type tests. Items assess verbal and numerical reasoning abilities. Intended for use mainly in educational and vocational counseling, but may also be used in research or evaluation studies and for selection and screening purposes for particular programs or to screen for further assessment or treatment. Should not be used as the sole basis for making important decisions about an individual student.

AN ACCESSION NUMBER: TC800222 ETS 8512.
TI TITLE: ACER Higher Test WL-WQ.
DT SUBTESTS: Linguistic; Quantitative.
YR YEAR: 82.
AV AVAILABILITY: Australian Council for Educational Research; Frederick St.; Hawthorn E 2; Victoria, Australia 3122.
TG TARGET AUDIENCE: AGE 13-17, Adults.
NT NOTES: See also ACER Higher Test ML-MQ (Second Edition) (TC 800198).
TIME: 60; approx.
ITEMS: 72.
AB ABSTRACT: Designed to measure general intellectual ability for use in vocational guidance of adolescents and adults. The linguistic section consists of items such as analogies, classifications, proverbs, and logical reasoning. The quantitative section consists of items concerning number series, number matrices, and arithmetical reasoning questions. Form W was produced as a parallel form of Form M (TC 800198).

AN ACCESSION NUMBER: TC800204 ETS 8512.
TI TITLE: ACER Advanced Test B40.

AB ABSTRACT: A test of general ability which assesses verbal and arithmetical reasoning.

AN ACCESSION NUMBER: TC800198 ETS 8512.
TI TITLE: ACER Higher Test ML-MQ (Second Edition) and Test PL-PQ.
DT SUBTESTS: Linguistic; Quantitative.
YR YEAR: 82.
AV AVAILABILITY: Australian Council for Educational Research; P.O. Box 210; Hawthorn, Victoria, Australia 3122.
TG TARGET AUDIENCE: AGE 15-17, Adults.
NT NOTES:
  TIME: 35.
  ITEMS: 68.
AB ABSTRACT: Parallel forms of a group test designed to measure general intellectual ability. Intended for use with secondary level students, young people who have left school, and with adults. Tests are intended to measure intelligence as demonstrated by the ability to see relationships and to solve problems. Items are restricted to verbal and number questions since test is primarily intended as a measure of general scholastic ability in predicting school achievement and in vocational counseling and other areas where ability to think clearly with words and numbers is necessary. May also be used for selection of occupations which involve reasoning ability. Tests are inappropriate for use with individuals whose cultural or linguistic backgrounds are such as to be considered disadvantaged in taking this test. Although separate scores are available for two subtests, they should be regarded as substantially measures of the same general ability.

AN ACCESSION NUMBER: TC800197 ETS 8512.
TI TITLE: ACER Intermediate Test G.
AU AUTHOR: de-Lemos; Marion-M.
YR YEAR: 80.

NT NOTES:
  TIME: 30.
  ITEMS: 76.
AB ABSTRACT: Group test designed to assess general reasoning ability of students between the ages of 10 and 15 years. Based on a revision of the ACER Intermediate Tests A and D. Test is based on the traditional model of group general ability or intelligence tests and comprises items assessing verbal and numerical reasoning abilities. Tests are intended primarily for use in educational and vocational guidance but may also be used in other appropriate situations such as selection and screening of students for various programs or in research or evaluation studies. Should not be used as the sole basis for making important decisions about an individual student.
ETS TEST COLLECTION VIA INTERNET

The ERIC Clearinghouse on Assessment and Evaluation has mounted on its gopher site a database to help locate tests. This database can be used by accessing the gopher at the address: GOPHER.CUA.EDU. The ERIC/ETS Test Collection is located under: Special Resources/ERIC Clearinghouse on Assessment and Evaluation/Te Locator/.

To search the database, enter keywords from the title or descriptors. For example, if you would like to search for tests on oral language proficiency, you could type in all three words, or oral and proficiency. You may get slightly different results, but you will have information on a lot of tests to look at. If you know the title of the test, the best way to search is to use the main words in the title, not necessarily all of the words in the title. If you are looking for the Wechsler Intelligence Scale for Children-Revised, the most efficient way to search is with the words Wechsler, intelligence, and children.

INTRODUCTION TO THE ETS TEST COLLECTION

The Educational Testing Service (ETS) Test Collection database contains records on over 9,500 tests and research instruments. These records describe the instruments and provide availability information. The Test Collection encompasses virtually all fields from vocational interest inventories for adults to instruments that measure shyness or predict recidivism in released criminal offenders, to assessment of managerial style, as well as education-related achievement and aptitude tests. The test descriptions are indexed with ERIC Thesaurus terms for subject accessibility.

This is a joint project of ETS and ERIC_AE. ETS Library and Reference Services Division prepares the descriptions. ERIC_AE maintains the database and hosts the Search System. ERIC_AE has also begun to put ETS prepared test descriptions into the ERIC Resources in Education database. About 15 descriptions are added each month.

COPYRIGHT

COPYRIGHT (C) EDUCATIONAL TESTING SERVICE

You may download individual and small groups of test descriptions and you may point to this service from any Gopher Site.

WHAT KIND OF TEST ARE DESCRIBED?

The Test Collection database collects a variety of instruments: achievement tests, aptitude tests, personality measures, attitude measures, career/vocational interest measures, occupational tests such as nursing or sales skills inventories. Many research instruments are collected as well as tests from commercial publishers.

WHAT INFORMATION IS AVAILABLE ABOUT THE TESTS?

The title, author, publication date and source appear in the record. An abstract describing the instrument, intended population, and uses accompanies the record. Subject terms give the age and grade level information as well as ERIC Thesaurus terms that describe the test.
DOES THE TEST COLLECTION DATABASE REVIEW THE TESTS?

No, other reference guides such as Mental Measurements Yearbooks, Tests: A Comprehensive Reference for Assessments in Psychology, Education, and Business, and Test Critiques distributed by Pro-Ed fill that role. You can search the tables of contents for the MMY and Test Critiques through the ERIC_AE Gopher Site.

ARE ALL THE TESTS IN THE DATABASE CURRENTLY IN PRINT?

No, some of the items are out of print. We suggest contacting the publisher for permission to use out-of-print materials. Phone numbers can be located using another menu option on the ERIC_AE Gopher Site.

WHERE CAN I SEE THE ACTUAL TEST INSTRUMENTS?

Availability information is provided in the records. Many colleges and universities have test collections in their libraries. Talk to your local librarian for more information.

WHAT IS TESTS IN MICROFICHE?

Tests in Microfiche is a subcollection of unpublished research instruments that are available for purchase in microfiche from the ETS Test Collection. The collection includes instruments appropriate for diverse populations (infants, learning disabled, adults, etc.) Each set spans a wide range of topics such as job satisfaction and attitudes towards school. More than 800 tests are available.

DOES THE TEST COLLECTION PROVIDE REFERENCE SERVICES?

No, the descriptive information in the database should help answer most questions people may have. And the publisher of the particular test is the most competent source of information. You can, however, route general inquiries to ERIC_AE@CUA.EDU.
