This resource document provides general information about literacy portfolio assessment, guidelines on using the technique, and a format for getting started. The first part discusses testing and assessment in adult literacy and basic education, alternative assessment, and literacy portfolios. The second part contains a list of questions and steps to guide an instructor into portfolio assessment. Actual tools and procedures for helping a learner develop a literacy portfolio are provided. The tools are divided into three phases. Early assessment (intake or start-up activities) tools include the following: adult basic education learner information, goals list and literacy inventory, screening and placement interview, looking at one's own reading behavior, educational goals plan and progress record, and preattitudes of adult students. Ongoing assessment (in-class progress activities) tools are as follows: reading progress checklist; writing progress and process checklists; weekly self-assessment; writing conference record; spelling self-test; book list; learning log; daily log; form for recording; attendance and writings; monthly review; teacher's log; reading, personal, dialogue, and reading response journals; and listening progress. Looking back (end of the cycle, term, or program activities) tools include the following: reading and writing information sheets, questions for program evaluation, using literacy to make change, progress checklist, post-attitudes of adult students, and program evaluation by students. Contains 26 references. (YLB)

Portfolio Assessment

Introduction

Recently, the idea of using portfolios as an alternative assessment technique in literacy programs has been gaining some momentum in Canada. In an effort to understand how portfolios might be used, approximately 50 instructors working in community-based, institutional and workplace literacy programs were interviewed in their milieu. These instructors, who were from six very different regions of the country, voiced their opinions about learner assessment, program evaluation and the potential use of portfolios in literacy development.

The first thing instructors said was that they needed some general information about portfolio assessment, along with some specific guidelines on using the technique and a format on how to get started. That is the purpose of this resource document. It consists of two parts. The first part provides general information about testing, the alternative assessment movement and literacy portfolios. This is followed by a list of questions and steps to help guide an instructor into portfolio assessment as well as an example of some of the tools and procedures that might be included in a learner portfolio. In this document a portfolio is defined as a purposeful collection of a learner's work that tells a story of the efforts, progress or achievement in a given area.
Testing and Assessment in Adult Literacy and Basic Education

Anyone who has worked in the field of adult literacy and basic education comes to realize that assessment is critical. It tells us what and how well something has been learned. Historically, the use of standardized tests was, and continues to be, the most common instrument of assessment in educational settings including adult literacy. Briefly, a standardized test is a test administered under standard conditions so the scores reflect the skills being assessed and nothing else. Two types of standardized tests that have been frequently used in various kinds of literacy programs are the norm-referenced test and the criterion-referenced test. A norm-referenced test is a test in which a learner's score is compared to the scores of others who have taken the test. While a criterion-referenced test is a test in which a learner's score is compared to an absolute standard such as 80, 90, or 100 percent mastery of a domain of skill.

Although a subject of some controversy, standardized literacy testing still remains one of the most prevalent ways of obtaining information about the needs and characteristics of basic education students and about the quality and impact of programs.

Due to the ease of administration and scoring and the lack of viable alternatives, the use of standardized tests as a means of evaluating adult literacy and basic education is still popular today. For example, in this project survey when literacy instructors were asked what counted as progress in their programs, 58% reported that they used standardized tests, test scores or measures of competencies and reading level gains. However, certain problems have also arisen in using standardized tests. Some believe these tests can measure program effectiveness; others disagree. As well, many debates have focused on the inability of standardized tests to distinguish between various aspects of language and culture as well as their failure to reflect all learning that has occurred in and out of the classroom. But the most serious
impediment is the inconsistency in interpreting the test results.

As Venezky (1992) points out, standardized tests are inadequate for adults because they do not measure how new skills are used by adults. In fact they don't, and can't, measure all new skills acquired in basic education. These tests simply measure some of the cognitive skills such as reading comprehension and computation ability. Countless reports have also mentioned the difficulties that adult learners encounter when they undergo testing. They are bothered by feelings of anxiety, degradation, insecurity, uncertainty, and intimidation (Robishaw, 1992). They are often reminded of earlier school days when comparison of test results spelled embarrassment and loss of dignity.

As well, adult literacy students experience similar sensations when grade level equivalents are assigned to them. This process can be demeaning and is often misunderstood and misinterpreted by the student and instructor. With the rapid pace of change, McCullough (1993) suggests that grade levels are now irrelevant to life styles and coping skills. When the learning process becomes synonymous with the acquisition of the correct test answers, learning not only loses much of its appeal but also much of its significance. Many literacy educators are now asking why we can't integrate assessment with curriculum in a more meaningful way.

Alternative Assessment

The movement for alternative methods of assessment has evolved from the dissatisfaction of both instructors and learners with current evaluation procedures. All types of literacy stakeholders have expressed a desire for more meaningful appraisals and thus, a variety of new approaches has emerged. As Robishaw explains “alternative assessment is alternative because it provides choices that go beyond traditional or standardized measurement” (1992, p.59).

In an effort to make assessment more responsive to the concerns of these stakeholders, many programs have developed alternative evaluation methods. While some of these competency-based tests are commercially available,
others are program-based or "home grown" and are quite numerous (Auerbach, 1992). Checklists that provide a record of the skills and competencies a learner has attained and true/false or multiple choice tests that allow programs to assess the knowledge developed while in the program are common examples of program-based assessment. Another type is the anecdotal evidence that serves as examples of success. Such evidence is often gleaned from discussions with other adults who interact with the literacy learners. A fourth example is the daily or weekly charts that list learner accomplishments or document significant literacy events that have taken place.

These new approaches are all based on several key principles. The most important one is that assessment should measure the learner's required and/or desired outcomes. In order to achieve this, it is fundamental that the assessment process be participatory. In other words, the learner must be a full partner in the early assessment, the ongoing assessment and the end of the program assessment.

This participatory approach establishes a direct relationship between the instructor and the learner. Together they plan the program, the pace, the type of assessment, all based on a collaborative effort, and always learner-centred. It is interesting to note that when literacy instructors in this survey were asked if their assessment procedures were learner-centred 68% reported that they were. Although learner-centred can mean a multitude of things, for the survey respondents it meant being self-directed, having choices, being able to self-evaluate, taking responsibility and placing the learner at the centre of the assessment procedure.

Methods and Means of Alternative Assessment

One example of this participatory approach that is well documented is the initial intake interview where students provide an inventory of information. This profile outlines previous experience both professional and academic, identifies aspirations and perceived needs, and explores literacy requirements. During
this interview the learner might describe what kinds of practices or strategies seem best suited to his/her learning style. Part of this exchange may also include an attitude assessment, where the student reveals how he/she feels about education or lifelong learning.

An important factor in determining alternative methods of assessment is being aware of what motivates an individual to enroll in an adult literacy and basic education program. Learners have stated that reasons for participation include educational advancement, self-improvement, family responsibilities, community involvement, and career advancement. Knowing which motivational factor has influenced the student is essential when choosing an appropriate method of evaluation.

Connected to this factor is the type of program and agency sought by the learner. This also affects which style of assessment is best suited to measure progress and results. One alternative means of gathering useful data about programs includes regular discussions or conferences with students who provide information about their individually prescribed programs. The learners express what they want to learn, how they want to learn it and how they want to track results. This form of assessment captures emotional, social and psychological factors associated with the learning process.

Appraisal of progress is another invaluable method. This qualitative mode of assessment reveals learner strengths and identifies areas which require extra work. A progress report, for example, provides an opportunity for the student and instructor to reassess the curriculum, assignments, and goals on an ongoing basis. It also provides feedback to both student and teacher regarding changes in comprehension levels, writing ability, problem-solving and so on. As Lytle (1988) points out, in this way, assessment becomes a process of informing.

In this survey, 56% of the instructors stated that they used mostly qualitative information such as journals and observations when assessing learners or trainees and that this information was collected on an ongoing basis. Ongoing was described in a range from
"after every lesson" to "formally every three months."

Retrospective interviews and summative evaluations, often in the form of reflective conversations, constitute yet another means of alternative assessment. Generally, this kind of assessment is carried out upon completion of a program. Learners are asked to identify and discuss the knowledge and skills they have acquired since they began in the program. This is usually in an informal, relaxed setting. Student self-evaluation and peer interviews are other tools used in a summative evaluation process.

The quest for alternative forms of assessment has already been met with some success in workplace literacy programs. Askov (1993) suggests that because each stakeholder in the workplace program has a different interest, different assessment methods are necessary for each client. For example, the learner-client goals may be assessed through a confidential conference; the union-client interested in a form of evaluation that focuses on the welfare and development of the worker, may use attitude assessments; and the management-client wanting to upgrade workers' skills to increase production and performance, may use curriculum-based assessments.

On this same point, based on the results of this project survey it would seem that many instructors in community-based, institutional and workplace literacy programs across Canada are already experimenting with various forms of alternative assessment procedures. Eighty-seven percent of the respondents stated that they have used at least one of the following procedures in their programs: oral interviews; collections of students' work; observation of classroom interactions; teacher progress reports; student reports; and the ability to use literacy skills outside the classroom.

In summing up the alternative assessment movement, one might say that it is rooted in the search for assessment approaches that reflect and can account for what is happening in learner-centred programs. These approaches are often multi-dimensional or multi-purpose and always participatory. As one respondent in the survey said, "alternative
assess, document and be accountable, while being true to beliefs about literacy development."

**Portfolio Assessment**

Portfolio assessment is another alternative to the more traditional methods of evaluation. The term “portfolio” is borrowed from the art world where it is used to describe the large leather valise which houses samples of an artist’s work. 

Very simply, a portfolio is a collection of works belonging to a student. The collection is a smorgasbord. In literacy education, it can include samples of work gathered over time, reading profiles, progress reports, teachers’ comments, drafts, self-evaluation notes, and so on. Portfolios also can include examples of literacy practices outside of school, such as copies of driver’s licences, copies of the title pages of books that parents read to the children, copies of letters written to friends and family, and examples of math, reading and writing done in church, community meetings or on the job (Fingeret, 1993).

In other words, a portfolio is an assembly of works reflecting student effort, progress and achievements, experiences, knowledge and skills acquired, which have been monitored over time. It is a dossier or collection of material which provides a synthesis of a student’s personal history and personal goals (Council of Regents for Colleges of Applied Arts and Technology, 1992, p. 15).

As Lytle (1989) suggests, each person’s literacy is by definition unique and dynamic. Agreement with this tenet leads to the realization that no one test could possibly satisfy the varied needs of students, and thus it became necessary to look for a way to respond to each person’s individuality. Paulson, Paulson & Meyer (1993) sum it up nicely when they write that portfolios are as varied as the students who create them. The most fundamental element of portfolios is that they are learner-centred. Portfolios are molded around the student. A true portfolio stresses the student’s participation and ownership.

Ownership leads to empowerment which in turn
translates into control of learning. Portfolios focus on a co-operative, shared approach to learning by insisting that the learner share in the partnership of his or her learning. Weinbaum (1992) notes that portfolios can be a vehicle for empowering students and refers to the inclusion of contractual agreements which the students author and honour. The teacher then becomes the facilitator. The key to a successful portfolio is the active involvement of the learner.

Portfolios provide insight into who the learner is. They gather valid information about what and how students learn. In short, portfolios are stories about the student, tales which provide learners with opportunities to assess what they have learned. Palmer-Wolf (1989) points out that traditional assessment has historically prevented the learner from accepting responsibility for his or her own evaluation, discouraged learners from contributing their full range of experiences and knowledge, diverted acceptance of the notion that several attempts are often required before objectives are obtained, and failed to underline the importance of effort and self-development.

In a word or two, Fingeret (1994) describes this method of assessment as a process in which a portfolio is created and assessed. Students examine a larger collection of materials and choose some for their portfolios according to a set of criteria. These are then assessed for progress by both the student and the instructor, who examine the process of learning as well as the products. In this way, students develop new insights into their learning, new skills and new attitudes about learning.

What are the Strengths of Using Literacy Portfolios?

The portfolio system of evaluation provides information to teachers, students, and educational organizations. These dossiers are like a continuum which charts individual growth and progress. Portfolios are individually adaptable, flexible and comprehensive.

The process of establishing a personal literacy portfolio helps learners in setting goals and
reviewing them. They also learn to consider possibilities and to make choices using critical thinking and problem-solving skills. These skills are evidenced, for example, when students examine what criteria should be established for inclusion, and when they re-draft their work several times as they overcome literacy hurdles. Arter and Spandel (1992) point out that the process of selecting work provides opportunities for students to analyze their work and to determine why specific items should be included.

Encouraging analysis of one’s work through self-reflection adds an important dimension to literacy instruction. This process of self-reflection can lead to recognition and acknowledgement of progress and improvement which results in superior performance and increased positive self-esteem. Increased confidence becomes a key motivator.

Also, attention is shifted away from grades. The focal point becomes improvement. Students can become more co-operative with one another and more independent as learners. Another strong point in favour of portfolios is that this type of assessment can help to establish minimum standards. Greater care is taken when evaluating papers and teachers have more opportunities to be perceived as a “coach”, or a “helper”.

Finally, a key value of portfolios is that they allow instruction and evaluation to be “woven together” (Paulson, Paulson & Meyer, 1993, p. 60). Perhaps the greatest benefit of using this form of assessment is the resulting increase in dialogue between student and teacher. With improved communication and consultation, opportunities for growth prevail.

What are the Limitations of Using Literacy Portfolios?

The use of literacy portfolios does have drawbacks. Sometimes the intent of portfolio use is not always the same as the outcome. In other words, portfolios can be misleading if not properly planned, designed, developed and interpreted (Arter & Spandel, 1992). For example, a portfolio may not always reflect what a student knows; conclusions may be too
subjective and the contents may not adequately represent the learner. There also exists a perception that portfolio assessment is not authentic, that it is seen as additional to real classroom instruction.

Inconsistencies and interpretation differences remain problematic. However, as suggested in the public school literature this may be symptomatic of inadequate training for teachers and administrators. As Smit, Kolonosky and Seltzer (1991) point out, inconsistent application of standards may also lead to confusion over what constitutes minor vs major errors in grammar, punctuation and the "mechanics" of writing. In a similar vein, differences in expectations between the instructor and the institution or funding agency may occur when grades, levels or test results are required.

Another difficulty lies in the responsibility and freedom inherent in using portfolios. Some students perform better when parameters are well defined. For example, some students prefer deadlines and length limits. In addition, some students have indicated that they have a hard time not knowing where they stand. Grades are often motivating for some students and portfolios can have a negative influence on motivation (McClelland, 1992).

Another significant problem is the time involved developing and implementing a portfolio system. Time is required to establish goals and selection criteria, develop procedures and practices, conferences with learners, record observations and so on. This is magnified when the teacher is a novice portfolio user. Students may also feel additionally burdened by the time required for the numerous rewrites. On the other hand, instructors may find it difficult to devise a scheme for translating portfolio content into achievement or in some cases a grade may be required.

In summary, literacy portfolios can be beneficial to many participants in the educational setting – the learner and his or her family, the instructor and the program coordinator. When choosing portfolio assessment as a method of evaluation an important consideration is its purpose. The function of the portfolio affects its design, content
and interpretation. As discussed in the next section, portfolios also require planning.

Developing a Literacy Portfolio

As previously mentioned, when literacy instructors were asked what information they needed in order to get started using portfolios, the overwhelming response was a set of guidelines and a sample or format for developing a portfolio. In the following section of this resource two important steps are described in developing a literacy portfolio. The first step is called “Getting Started”. This step is actually a self-reflection guide. Since portfolio assessment reflects a particular approach to literacy work, it is important for an instructor to find a comfort level with this alternative method. In other words, the first step is the process for determining how an instructor fits into the approach. The second step is called “Using Portfolio Assessment at Different Stages of a Program”. This is more the mechanics of the method. Three phases of assessment that can be useful when developing a portfolio are described with accompanying tools and procedures.

Getting Started

One approach to getting started with portfolio assessment is through a reflection and decision-making process on beliefs about literacy and how beliefs affect an instructor's work with students. This exercise is important and will greatly help the practitioner in understanding the many dimensions of literacy portfolio development. Fingeret (1993) suggests that there are four major periods or areas of reflection and decision-making. These periods occur before, during, and after implementation and are discussed below in a checklist question format. Taking the time now to work through these questions will increase instructor effectiveness when starting a literacy portfolio with a learner. The reader will note that in STAGE 1 if portfolio assessment is not consistent with your approach to instruction and assessment then there may not be any need to continue reading the resource.
Stage 1

Decide whether portfolio assessment is consistent with your approach to instruction and assessment.

Clarify your beliefs about literacy and their relationship to how you work with students.

- What do you believe are the purposes of literacy education and literacy development?
- How committed are you to helping students move into increasing positions of power in relation to their own learning?
- How will you know when adults are learning?

Clarify the purposes of assessment and the relationship between assessment and instruction.

- In your opinion are instruction and assessment philosophically consistent?
- What are your views on whole language, learner-centred and participatory approaches to instruction?
- How will portfolio assessment help in examining both individual and group development of literacy practices?

Stage 2

Plan portfolio assessment.

Decide the areas in which you are going to implement portfolio assessment, and the types of materials you and the learners will collect.

- Will you focus only on writing or math?
- Will you focus only on the literacy practices in learners' daily lives?
- What is the range of things that can be collected in the file folders that will help you examine progress or the initial skill sets?

Decide on a schedule for developing portfolios.

- Will you introduce portfolio assessment at the beginning of the term or instruction?
- How will you integrate assessment activities like journal writing and
maintaining teacher observation notes into the instructional process?

- Will student materials be selected for the portfolio at the end of the semester or throughout the term?

Decide on criteria for choosing samples of materials to put into the portfolio.

- How will you help learners develop criteria for choosing materials?
- How do the criteria relate to the curriculum?
- How do the criteria relate to the learners' goals?

Develop a process for moving materials into the portfolio.

- Will learners reflect on their work individually or in teams to apply their criteria and develop their portfolios?
- Will learners write an overview explaining their choices for choosing the portfolio contents or a note accompanying each piece?
- Will you suggest an individual instructor-learner conference to assess the portfolio?

Develop criteria and a process for assessing portfolios.

- Will earlier lists of goals or contracts be used in assessing the portfolio?
- How do the criteria examine specific achievements, general progress and process?
- What role will the learners' reflections and your reflections play in the assessment?

Stage 3

Implement Portfolio Assessment

Introduce the concept to your learners at the beginning of instruction.

- How will you introduce the idea into the orientation session for learners?
- How will you explain to the learners why you are asking them to try this new assessment procedure?
- What specific things and general things about portfolio assessment will you mention?
Create the file folders.
- Will the file folders contain drafts as well as finished products of work?
- Will the file folders contain evidence of new literacy practices?
- Will the file folders contain reflections on the process of reading and writing or other literacy developments?

Develop criteria for moving materials from the file folders to the portfolio.
- If learners are going to develop portfolios that reflect their “best work”, what does “best” mean to them?
- How do learners translate “best” into criteria for choosing pieces from their file folders?
- Have you allowed enough time for learners to choose their portfolio pieces and to reflect on their work?

Assess the portfolio.
- How will the criteria for assessment be negotiated between you and the learner?
- How do the criteria relate to the curriculum and to the learners’ goals?
- Will you write a narrative evaluation about progress or process?

Stage 4
Evaluate the process and revise it for future use.
- What kind of experience has this been for you?
- To what extent were your goals for assessment met through this process?
- How will you involve the learners in evaluating the process?
- What recommendations will you make for changing the process the next time?
- To what extent were other players such as program coordinators or administrators able to use the assessment information?
literacy in their daily lives, such as at work, at home or in the community. Also during the early assessment phase some gauge of literacy proficiency is measured. This information is often used in the development of a learning plan or contract. The reader will find the following tools in the sample portfolio:

- Adult Basic Education Learner Information
- Goals List and Literacy Inventory
- Screening and Placement Interview
- Looking at Your Own Reading Behaviour
- Educational Goals Plan and Progress Record
- Pre-attitudes of Adult Students

Ongoing Assessment

Progress assessments are designed to show changes in the ways learners are using literacy. The various tools and procedures illustrated in this second assessment phase seek information on how learners use literacy to explore and express ideas, solve problems, or effect changes in their lives. Progress assessments are often used in formative evaluations to provide learners and instructors information that can help improve program services and literacy classes. The types of tools which can be found in the sample portfolio include:

- Reading Progress Checklist
- Writing Progress Checklist
- Writing Process Checklist
- Weekly Self-Assessment
- Writing Conference Record
- Spelling Self-Test
- Book List
- Learning Log
- Daily Log
- Form for Recording Attendance and Writings
- Monthly Review
- Teacher's Log: Observations and Reflections
- Reading Journals
- Personal Journals
- Dialogue Journals
- Reading Response Journals
- Listening Progress
Using Portfolio Assessment at Different Stages of a Program

In this second step, the reader will find some actual tools and procedures for helping a learner develop a literacy portfolio. These tools could be considered as a possible format for a portfolio. Many of the examples presented here are ways of encouraging learner participation in evaluating the contents of a portfolio as well as instructor aids for documenting learner progress. At the same time some of these tools can serve as the actual contents for the learners' portfolio. The examples chosen for this resource were those most frequently rated as being useful by instructors during the project interviews.

Key to successful use of portfolio assessment with adults is the active involvement of the learner through each step of the process – from determining portfolio contents through deciding procedures for evaluating these collections. Since many of the tools presented here have been taken from a wide range of programs, it is important to see the examples with the potential for modification within your own context. Please copy, adapt or modify any of the materials if they are useful. Acknowledgement of the countless people and programs who shared their approaches to portfolio assessment can be found in the back of the resource document.

Practitioners who have been using this alternative assessment technique have found it helpful to view assessment in three phases – Early Assessment (intake or start up activities), Ongoing Assessment (in class progress activities), and Looking Back (end of the cycle, term or program activities). The following sample format of a portfolio is also organized in three assessment phases.

**Early Assessment**

Intake assessments are designed to elicit information regarding learners' needs, goals and prior educational backgrounds, including previous experience with both schooling and the world of work. Intake increasingly includes information on how, where and why learners are using...
Looking Back

Performance reviews or summative evaluations are carried out during the end of a program or term and include information about how learners are making changes in their lives. They also provide evidence of program success and show where a learner may need additional development or support. In this third phase of assessment, tools that could be used in a sample portfolio are:

- Reading Information Sheet
- Writing Information Sheet
- Questions for Program Evaluation
- Using Literacy to Make Change
- Progress Checklist
- Post-attitudes of Adult Students
- Program Evaluation by Students

Writing Sample

Write as much as you can and take as long as you need to. You don't have to fill up the page, but you can if you want to. Don't worry about spelling or handwriting. Just write what you want to say. You can write about anything you want to. If you can't think of a topic here are some examples.

1. A note telling your child's teacher that he or she is sick and cannot come to school.
2. Phone message for your wife/husband/friend.
3. A post card to a friend while you are on a trip.
4. A letter to your landlord complaining about something.
5. A typical work memo.
Choose a reading passage

Reading sample title

What was this passage about?

Was this easy or difficult for you to read?

If a second selection is made, ask the same questions

Is there anything you did while you were reading to help you in trying to understand this passage?

+ Goals List
+ and Literacy Inventory

**Education:**

- Check only if you are interested in these educational goals.

1. ☐ Attend a job training program (what kind?)

2. ☐ Attend classes to learn something new
   (crafts, self-improvement)

3. ☐ Pass a work-related test (what type of test?)

4. ☐ Study for a grade 12 certificate

5. ☐ Other: __________________________
   __________________________
   __________________________
   __________________________

*Can you think of any other goals you have that aren't on this list?

☐ __________________________
   __________________________
   __________________________
   __________________________

Of all the goals we've talked about, what are 2 or 3 that are the most important to you right now?

1. __________________________
   __________________________
   __________________________

2. __________________________
   __________________________
   __________________________

3. __________________________
   __________________________
   __________________________
Screening & Placement

Interview

Name: ___________________________ Interviewer: ___________________________

Date: m/d/y _______________________

1. What is your most important reason for wanting to learn to read and write better?

________________________________________________________________________

2. What are some things that you want to do that being able to read and write better will help you to do?

________________________________________________________________________

________________________________________________________________________

3. Do you have any children or grandchildren in your life? If so, are they of school age? What are their ages and grades in school?

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

4. Do you have a job now? If so, what kind of work do you do? If not, what kinds of jobs have you had? Do you need to use reading and writing at work?

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

5. Do you do any reading on your own now? Do you read at home, in stores, at work, on the street? If so, what kinds of things do you read? (Examples: TV schedule, mail, newspapers, children's books, labels, street signs...)

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________
6. Do you do any writing on your own now? If so, what kinds of things do you write? (Examples: your name, forms, shopping lists, cheques or money orders, letters and notes...)

7. Tell me something about your school years; where did you grow up? Did you go to school there? What was it like for you? What grade did you finish?

   a. (For non-native speakers of English and immigrants) What is your first language? When did you come to Canada? Did you have the chance to go to school in your native country? If so, how many years? Do you read and write your first language?

8. Have you ever been to classes for adult education before? If so, where and when? What was it like for you?

9. Have you ever used a computer before? How do you feel about learning something about using computers?
10. Some adults really want to come to class and improve their reading and writing, but find that things get in their way. Some of the things that come up are: problems with transportation, childcare, having to take care of other people in their families when they are sick or need them, getting sick a lot, having problems with drugs or drinking, too much going on at home, working long hours... What kinds of things do you think might make it hard for you to come to study and get to class?

________________________________________________________________________________________________________________________________________________________

________________________________________________________________________________________________________________________________________________________

________________________________________________________________________________________________________________________________________________________

________________________________________________________________________________________________________________________________________________________

________________________________________________________________________________________________________________________________________________________

________________________________________________________________________________________________________________________________________________________

________________________________________________________________________________________________________________________________________________________

________________________________________________________________________________________________________________________________________________________

a. What do you think you could do to make it easier for yourself to study and get to all of the classes?

________________________________________________________________________________________________________________________________________________________

________________________________________________________________________________________________________________________________________________________

________________________________________________________________________________________________________________________________________________________

________________________________________________________________________________________________________________________________________________________

________________________________________________________________________________________________________________________________________________________

________________________________________________________________________________________________________________________________________________________

________________________________________________________________________________________________________________________________________________________

b. What can we do to make it easier for you to study and come to all of the classes? Examples: help figure out a bus route, find information on childcare providers, fill out forms...
Looking at Your Own Reading Behaviour

1. Do you understand most of what you read in class in reading groups?

2. Do you participate in discussions and ask questions about what you read in class if you don’t understand?

3. Do you try to predict what’s coming when you read by looking at the title, pictures, or thinking about what you already know about the subject you’re reading about?

4. Do you ever figure out a word you’re not sure of by reading the words around it and guessing what word would make sense?

5. When you read something, do you ever think about how it connects to your own life or to things you know?

6. Do you ask yourself questions about what you read?

7. Do you read outside of class? (If so, what kinds of things, how often and when?)

8. What are your biggest problems as a reader?

9. What are your strengths when it comes to reading?

Student: ____________________________ Teacher: ____________________________
Pre-attitudes of Adult Students

Name: ____________________________ Date: m/d/y __________________

1. How sure do you feel about being able to succeed in this program at this time?
   ○ very sure ○ unsure
   ○ sure ○ don't know
   ○ not so sure

2. How do you feel about taking the literacy training?
   ○ very good ○ not so good
   ○ good ○ bad
   ○ ok

3. How do you feel about attending class?
   ○ very good ○ not so good
   ○ good ○ bad
   ○ ok

4. Have you ever used a computer?
   ○ yes ○ no

5. How do you feel about reading books for learning?
   ○ very good ○ not so good
   ○ good ○ bad
   ○ ok

6. How do you learn best? By working
   ○ alone ○ in a small group
   ○ with one other person ○ in a class
   ○ some of each

7. How do your fellow workers feel about your taking this training?
   ○ very good ○ not so good
   ○ good ○ bad
   ○ ok

8. How do your family members feel about your taking this program?
   ○ very good ○ not so good
   ○ good ○ bad
   ○ ok

9. What do you want to get out of this training?
   Mark all that apply.
   ○ learn to read better
   ○ learn to write better
   ○ keep my job
   ○ be a better worker
   ○ get a better job
   ○ please my family

34
10. Check which of the following things will be hard for you.

☐ reading  ☐ using the computer
☐ writing  ☐ attending class
☐ math  ☐ remembering what I learned

11. Check which of the following things will be most helpful to you.

☐ reading  ☐ using the computer
☐ writing  ☐ attending class
☐ math  ☐ remembering what I learned

12. How do you usually feel about yourself?

☐ very good  ☐ not so good
☐ good  ☐ bad
☐ ok

13. What are your chances of getting a better job in the next few years?

☐ very good  ☐ not so good
☐ good  ☐ bad
☐ ok

   - a) Begin a sentence
   - b) Name people, places and special things
   - c) Capitalize the major words in a title

2. Uses commas to separate items in a list

3. Uses "_____" around the words people say out loud

4. Goes down to a new line and indents when beginning a new paragraph

5. Uses an apostrophe to show possession

6. Uses an apostrophe to make a contraction

7. Uses verbs in the correct tense

---

**Note any other skills writer has developed:**
Checklist

Check off each item on the list after you do it.

1. ☐ After you write your first draft, read it over to yourself.
2. ☐ Make any changes you think are needed.
3. ☐ Read your piece to someone else so they can help you revise.
4. ☐ Make any changes you think are needed to make your piece clearer.
5. Read the piece over again yourself, this time to look for things you need to edit.
   ☐ Is your story in the order that you want it to be?
   ☐ Do you have complete sentences?
   ☐ Do you have capital letters where you need them?
   ☐ Do you have the punctuation you need? (.) (?) (!)

Write the words you want to check the spelling of here:

_________________________________________________________________

_________________________________________________________________

_________________________________________________________________

_________________________________________________________________

6. ☐ Read the piece to someone else and use an Editing Checklist.
7. ☐ You may want to share the piece with others.
8. ☐ Make a final copy.
Weekly Self-assessment

Outside Class
1. This week I spoke English to ____________________________
   ____________________________
2. This week I listened to ____________________________
   ____________________________ speak English.
3. This week I read ____________________________
   ____________________________ in English.
4. This week I wrote ____________________________
   ____________________________ in English.
Writing Conference Record

Writer's Name: ____________________________

Title: ____________________________

Skills Worked On: ____________________________

Writing Conference Record

What: a form to keep track of what happens with an individual learner during informal writing conferences

Why: to maintain a cumulative, working record of skills worked on by each learner

How: teacher writes brief notes after writing conference or other significant interaction with learner during writing time; form is stapled to learner's writing folders

When: each time teacher or tutor works with learner individually on particular writing skills; cumulative records become part of learner's assessment portfolios
Spelling Self-test

Book List

Name: ___________________________ Date: m/d/y

**Booklist**

**What:** form for learners to keep track of books they read in and out of class; part of assessment portfolio

**Why:** to show learners concrete evidence of accomplishment in reading; to help teachers identify interests of readers to help make recommendations for other books

**How:** learner is encouraged to keep list in folder and add each title as s/he finishes book

**When:** ongoing

Remember: Think of what you have learned in and out of class.
Teacher's Log:
Observations & Reflections

Learner/Date m/d/y

1. Student interactions

2. Emergence of new skills

3. Changes in self-concept

4. Changes in the affective domain

5. Progress with verbal language

6. Progress toward becoming an active learner

7. Major milestones
Reading Journals

Use

1. To get learners to generalize strategies and concepts to reading materials
2. To increase reading comprehension
3. To expose students to a variety of writing styles
4. To give purpose to reading

Activities

1. Summarizations

2. Predictions

3. Answering prompts

4. Comparing and contrasting books

5. Listing new vocabulary

6. Diary—Response from teacher

7. Literary techniques listed

8. Personal viewpoints

9. Description of projects

10. Drawings
Points to Remember

1. *Personal journals should be private.*
2. *They can be shared with others if the student agrees.*
3. *They should be used as the need arises.*
4. *Students can use ideas from the personal journal for writing projects.*
...simple yet powerful tools for developing learners' confidence and literacy skills; a great way for teachers and learners to get to know each other. Dialogue journals are, as their name implies, a conversation on paper between two people.

The dialogue journals are a good place to start to think about what you’ve learned during your time at the program. Read through your journal before you answer these questions.

1. What do you notice when you read through your journal?

2. What changes do you notice (in what you worked on, what you wrote, how you wrote or anything else)?

Now, take a step back from the journals and think more generally about the class and what you’ve learned.

3. Were there things you wanted to achieve and didn’t? If that happened, why do you think it happened?

4. What have you learned? This might be learning goals that you met or things you learned that weren’t even originally goals.

5. Do you notice any changes in yourself, in how you feel or how you act, in and out of class?
Reading Response

Journals

What is it? A journal in which you write the ideas you have as you read a book.

How do you write a response?

Think about the book you are reading.

Try to connect these ideas to your own life experience.

As you think, reflect and question, listen to yourself, and then write these ideas down.

Write honestly – If you don’t understand the chapter that you are reading about, write that kind of a response.

As you write, try to discover YOUR OWN IDEAS.

Try starting out with ONE of these.

1. I began to think to...
2. I know the feeling...
3. I love the way...
4. I can’t believe...
5. I can’t really understand...
6. I realized...
7. I wonder why...
8. I noticed...
9. I was surprised...
10. I think...
11. If I were...
12. I’m not sure...
13. I agree with...
14. I disagree with...

How long should the response be?

You decide that – as many or as few sentences as you need to respond. We will share our journal entries with each other. Other students may be interested in reading the same book too.
1. Is the vocabulary new?
2. Is it difficult for you to guess the meaning of some of the new words?
3. How many times do you feel you need to listen to a new passage/conversation?
4. After listening to the passage, can you briefly paraphrase it?
5. Did the speaker go too fast for you to keep up with his/her pace?
6. Were the speakers just informing, or were they also giving opinions (implicitly)?
7. Could you follow the conversation in a successful way?
8. Were you able to understand most of the words?
9. How did you do it?
   a. guessing the meaning of unknown words?
   b. guessing the meaning of words you didn't hear?
   c. predicting according to the interpretation of the picture?
   d. other?
10. How was the speed of the conversation?
    Slow
    Medium
    Medium-Fast
    Fast

Phase 3 – Looking Back

Writing Information Sheet

1. Why did you choose this sample for your portfolio?

2. Why did you decide to write this in the first place?

3. What kinds of things did you do to write this the way you did? Try to describe all the steps you took to create it.

4. What do you think about the way it came out? Why? Did you do anything special with it?

5. Have you made progress? How do you know?

6. What would you like to work on next?
Questions for
Program Evaluation

1. Are the classes meeting your needs?

_________________________________________________________________________

_________________________________________________________________________

2. Are the levels good?

_________________________________________________________________________

_________________________________________________________________________

3. Are there other classes you would like in the program? What classes?

_________________________________________________________________________

_________________________________________________________________________

4. Are the class times good for you?  □ Yes  □ No
   Do you know people who would like classes in the morning?
   □ Yes  □ No
   Do you know people who would like classes at night?
   □ Yes  □ No

5. Sometimes students stop coming to classes? Why?

_________________________________________________________________________

_________________________________________________________________________

6. What can everyone (students and teachers) do to help students continue classes?

_________________________________________________________________________

_________________________________________________________________________

_________________________________________________________________________

7. In addition to classes we have child care, field trips, and some special projects. What other things would you like to see in the program?

_________________________________________________________________________

## Progress Checklist

### Changes in reading
- predicting
- using prior knowledge
- skimming, previewing
- using context
- guessing
- sound/letter/word identification
- awareness of strategies
- ability to relate reading to personal experience
- critical reading
- other

### Changes in oral language use
- comprehension
- ability to ask for clarification
- clarity of pronunciation
- immediacy of response
- length of utterances
- taking the initiative
- taking risks
- ability to express opinions
- ability to question/challenge
- other

### Metacognitive changes
- awareness of progress/goals
- awareness of reading/writing processes
- ability to monitor and choose strategies
- ability to ask for assistance
- ability to make choices about language use
- other

### Changes in uses of literacy
- functional uses in specific contexts
  - consumer choice
  - employment
  - housing
  - banking/money
  - health care
- using literacy for personal expression
- using literacy in family interactions
- using literacy for learning
- using literacy for advocacy
- increased independence in literacy use
- using literacy to understand social context
- using literacy to question and challenge
- other
Post-attitudes of Adult Students

Name: ___________________________ Date: m/d/y

1. How did you feel about taking this program training?
   - [ ] very good
   - [ ] not so good
   - [ ] good
   - [ ] bad
   - [ ] ok

2. How did you feel about attending class?
   - [ ] very good
   - [ ] not so good
   - [ ] good
   - [ ] bad
   - [ ] ok

3. How did you feel about using the computer for learning?
   - [ ] very good
   - [ ] not so good
   - [ ] good
   - [ ] bad
   - [ ] ok

4. How did you feel about reading books for learning?
   - [ ] very good
   - [ ] not so good
   - [ ] good
   - [ ] bad
   - [ ] ok

5. How did you learn best? by working:
   - [ ] alone
   - [ ] in a class
   - [ ] with one other person
   - [ ] some of each
   - [ ] in a small group

6. How did your fellow workers feel about your taking this training?
   - [ ] very good
   - [ ] not so good
   - [ ] good
   - [ ] bad
   - [ ] ok

7. How did your family members feel about your taking this training?
   - [ ] very good
   - [ ] not so good
   - [ ] good
   - [ ] bad
   - [ ] ok

8. What did you get out of this training? Check all that apply.
   - [ ] ability to pass the exam
   - [ ] learned to read better
   - [ ] learned to write better
   - [ ] more sure of keeping my job
   - [ ] will be a better worker
   - [ ] will get a better job
   - [ ] pleased my family

9. Check which of the following things were hard for you. Check all that apply.
   - [ ] reading
   - [ ] writing
   - [ ] math
   - [ ] using the computer
   - [ ] attending class
   - [ ] remembering what I learned
Post-attitudes of Adult Students

10. Check which of the following things were most helpful to you. Check all that apply.
   - reading
   - writing
   - math
   - using the computer
   - attending class
   - remembering what I learned

11. How do you usually feel about yourself?
   - very good
   - not so good
   - good
   - bad
   - ok

12. What are your chances of getting a better job in the next few years?
   - very good
   - not so good
   - good
   - bad
   - ok

13. Do you have any other suggestions or comments that you would like to give about this training?
Program Evaluation
by Students

Class ____________________________ Time ____________________________
Teacher ____________________________

1. How long have you been coming to the program?
   _______ years _________ months

2. We want to know how the program has helped you. Check all the things you learned in this program. Do not check the things you learned in another place.

   Math
   Did you have a math class here?
   □ yes □ no
   Did the program help you learn to manage your money?
   □ yes □ no
   Did the program help you learn to fill out your income tax forms?
   □ yes □ no
   Did the program help you learn to estimate store bills?
   □ yes □ no
   Did the program help you learn to enjoy doing math?
   □ yes □ no
   Did the program help you learn to use a calculator?
   □ yes □ no

   Reading
   Did the program help you to understand what you read?
   □ yes □ no
   Did the program help you to read and understand a newspaper?
   □ yes □ no
   Did the program help you to enjoy reading?
   □ yes □ no

   Conversation
   Did the program help you to communicate in English?
   □ yes □ no
   Did the program help you to understand what you hear on the radio or TV?
   □ yes □ no

   Jobs
   Do you have a job?
   □ yes □ no
   Did your classes help you to get a job?
   □ yes □ no
   Did your classes help you to get a better job or a promotion?
   □ yes □ no
Program Evaluation
by Students

Family
Do you have children?
☐ yes ☐ no
Did your classes help you to help your children with homework?
☐ yes ☐ no
Did your classes help you to read to your children?
☐ yes ☐ no

Community
Did the program help you to help other people in your family or community?
☐ yes ☐ no
Did the program help you to make friends in school or outside?
☐ yes ☐ no
Did your classes help you to get a driver's licence?
☐ yes ☐ no
Did the program help you to get a library card?
☐ yes ☐ no

Other
Did the program help you to feel more confident in yourself?
☐ yes ☐ no
Did you learn to use a computer here?
☐ yes ☐ no

3. What did you like best about the program?

4. What is not good about the program? How can we make the program better?

5. Do you have anything else to tell us?
