Project EXCEL is a federally-funded workplace literacy program involving hotel enterprises in the San Francisco (California) Bay area. Its focus is on identification and instruction of literacy skills essential to job success for limited-English-proficient (LEP) workers. Training is intended to enable employees to understand written work orders, enhance communication with supervisors and co-workers, and encourage greater involvement through team building and critical thinking. This training module is designed for hotel stewarding department workers in one participating hotel. An introductory section gives an overview of the curriculum and offers suggestions for classroom presentation. The curriculum consists of six instructional units on these topics: making and responding to requests (two units); asking for clarification; describing where things are (two units); and reporting problems. Each unit contains exercises in listening, speaking, reading, and writing skills. Four paper-and-pencil quizzes on place-settings and holloware are appended. WORKPLACE EDUCATION

Project EXCEL is a workplace education partnership with hotel enterprises in the San Francisco Bay Area. Its focus is on the identification and instruction of literacy skills essential to on-the-job success for limited-English-proficient (LEP) workers. Lessons are developed based on the specific needs at each hotel with emphasis on workplace communication and the American working culture.
PARTNERSHIP

Educational Provider: CRDC

Funded by the U.S. Department of Education, Project EXCEL is a training program administered by the Career Resources Development Center (CRDC) in partnership with hotels. As the designated partner, CRDC is the fiscal agent responsible for program compliance and funding regulations as required by the federal government.

CRDC develops customized curricula for participating hotels, provides classroom instruction and coordinates the program.

CRDC is a non-profit, community-based employment training agency located in San Francisco and Oakland. Since 1966 CRDC has trained over 3,500 ethnic minority members and women and successfully placed them in jobs in the service industries and the clerical field. We have extended our services to train and educate hotel workers. The agency has been working with local business partners to implement successful workplace literacy strategies since 1991.

Hotel Partners

Business involvement is essential to the success of the training. Following are some examples of in-kind contributions which reflect commitment from hotel partners.

- Providing full or partial release time for workers to attend classes.

- Providing facilities for classroom instruction.

- Assisting in curriculum design through consultations with our instructors and curriculum writers.

- Recruiting interested workers for classroom training.
GOALS OF THE TRAINING

The goals of the training are to enable workers to gain and retain employment, increase their productivity on the job and advance in their careers.

These goals will be accomplished by raising the literacy and basic skills level of the workforce. The results are worth the effort. The program enables employees to understand written work orders so they may perform tasks independently, enhances employees' ability to comprehend and communicate with supervisors and co-workers, and encourages greater worker involvement through team building and critical thinking activities.

PROGRAM DESIGN

Training modules last 8 to 10 weeks, with a recommended 3 hours of training a week. Each training module will be customized according to the needs of the particular department. Participating departments include Housekeeping, Laundry, Stewarding, Food and Beverage, and others to be determined by the specific needs of hotel partners. Training modules may also include more general topics such as Health and Safety, English for Customer Service, Career Advancement and Work Ethics.

SETTING UP WORKPLACE TRAINING AT YOUR HOTEL

Below is a 5-step summary of the implementation of Project EXCEL:

1. Identify needs at the workplace (1 week)

Our experienced staff and curriculum developers conduct interviews with:

- Managers
- Supervisors
- Workers
- Union Representatives
to identify those areas where your employees would most benefit from instruction and training.

**2 Analyze job tasks and communication skills (1 week)**

Curriculum developers and instructors observe and participate in actual tasks at the worksite to get an insider's view of the demands of the job.

Our staff also gathers written material used at the workplace in order to specialize the course design for your unique company procedures.

**3 Design a curriculum specific to the workplace (1-2 weeks)**

After conducting the extensive task analyses, curriculum developers examine the results. Based on their findings, they design and develop material for the course. Your employees will have textbooks and workbooks developed especially for them, using your hotel's policies and the needs identified by your own staff as a basis for instruction.

**4 Set up training room (1 day)**

With your help, EXCEL instructors will find and arrange for a training facility easily accessible to students.

**5 Conduct classes (8-10 weeks)**

EXCEL instructors will come to your hotel 2-3 days a week to equip your employees with the English they need to successfully communicate at their workplace.

**TO SIGN UP**

We would be pleased to talk more with you about our program and to set up workplace literacy training at your work site. Please call Project EXCEL's Program Coordinator, at 415/775-8880, extension 22.
As a leader in the hospitality industry, ITT Sheraton has stressed the fact that quality service rests on a foundation of effective communication. Improved English proficiency allows the systematic delivery of the type of service designed to meet guests' needs and exceed their expectation. In the process the hotel has experienced the additional benefits of creating an environment where safety procedures are better understood, teamwork has improved and workers feel themselves to be secure, accepted, important members of the team.

Tom Passantino  
Director of Training  
Sheraton Palace Hotel, San Francisco

For years I've been whooping and hollering that a small business can train people in job skills, but we can't go back and give them a high school education. This program is great, because the only thing that will work is training in the workplace.

Gwen Kozian

Ace Mailing Inc., San Francisco

The program has been a great help in improving communication between English-speaking managers and Hispanic employees. Clear, precise communication is so important. There are so many things going on at once, so many jobs that are intertwined. Employers need to come up with ways to make sure everyone understands what is happening, whether the employees speak Spanish, Chinese or any other language.

Barbara Radcliffe  
Human Resources Director  
Just Desserts Inc., San Francisco

All over the City, hotel employees are polishing up their English -- at work -- in language classes specifically geared to their work-a-day needs. The program, created by the Career Resources Development Center, has won kudos from hotel executives, union officials and employees -- Japanese chefs, Chinese maids and Hispanic laundry workers.

TEACHING GUIDE

The purpose of this teaching guide is to explain how the activities were taught in the classroom, and to give additional ways to use the activities.

Course Background

These materials were developed for a 36-hour course, taught over twelve weeks, for stewards at the San Francisco Hilton. The task analysis performed by CRDC indicated that the main need of the workers was to improve their ability to communicate orally on the job. The primary aims of the course, then, were to introduce and practice basic oral language functions to use on the job, and to teach job-specific vocabulary (nouns and verbs). Any reading and writing activities in the text were used to reinforce the structures or vocabulary that were taught orally.

The basic format for the first four units was as follows:
- introduce a certain number of vocabulary items (in this case, banquet items)
- practice pronouncing those items
- introduce a language function or structures
- practice using the language structures using the vocabulary items
(In Unit 5 no new vocabulary items are taught, only specific language structures.)

For this type of course it is essential that the actual items themselves, size permitting, be used in the classroom.

Because the language functions taught are used in all sorts of situations, it can be easy for the teacher to reinforce the structures through non-workplace contexts (home, social situations).

EXERCISE TYPES

The activities involving language functions can all be done in a variety of formats--teacher/choral response, teacher/individual response, pair work. Some students may have little educational experience, so they will need time to fully understand how to do certain activities, such as the matching exercises.

Unit 1

A and B: Students can also ask and answer the questions with each other, either in front of the class or in pairs.
For B, you can hold up an item and have the students, individually or chorally, give the name of the item. Or, you can select a student to perform the teacher's role.

You will notice that the same activities are suggested for all four banquet-vocabulary sections. While this may seem a bit repetitive, it is important for all the students, especially the low-level ones, to be able to use the two phrases "What is this called?" and "How do you say this in English?" without hesitation as they may need these phrases on the job to talk with someone who can't speak their native language. Working in a stewarding department means carrying out instructions quickly, and the workers need to be able to use these two phrases instinctively in the event that they forget the name of an item.

C: Perform the dialogue by yourself, or, even better, with another native speaker or student, and have the students read along. Then, pair up the students and have them practice as you walk amongst them and listen.

For additional listening practice you can perform dialogues using other items and then ask the students what you were asking for.

D and E: Students with low writing skills will need extra help with this. If you can't spend time with them one-on-one, you can pair them up with a more advanced student who can help them write out the dialogues. After they have finished, you can have students read their dialogues in front of the class, or they can trade dialogues with other pairs and read each others'.

A SUMMATIVE ACTIVITY FOR ASSESSMENT AND REINFORCEMENT

Spread out the items on a table. Have student A ask student B for an item. Student B gets up and gets the item for A. In this activity, A's speaking ability and B's listening ability can be assessed.

Unit 2

Same as Unit 1.

A SUMMATIVE ACTIVITY FOR ASSESSMENT AND REINFORCEMENT

Take the realia out of the room and put it on a table or some other flat surface. Remove some of the items, and write down what you remove. Have student A ask student B for an item (their choice). Student B must go out of the room to get
the item, which may or may not be there; so, he/she must decide whether to use an affirmative or negative response.

If you can't use realia, then you can write the names of the items on small pieces of paper and put them outside the room.

**Unit 3**

**A + B:** Same as the first two units.

**C, D, E, F and G:** These sections use exercises in quantifiers to 1) help get the students to clearly pronounce plural endings, and 2) get to them to recognize when they need to clarify given information (when someone says "some" they need to ask exactly how many of something they need to bring). Thus, with the exception of E, all of the work is oral/aural.

**C:** You can ask the students what you asked for, and how many, to see how well they heard the plural ending in "glasses", and the articles.

**D:** You will use both singular and plural items to see if students can use the right quantifier.

**E:** Have students repeat the sentences individually and chorally.

**F:** You can introduce orally the clarifying phrases shown in section H, by indicating that you don't understand what they're saying, or you're not clear how many they are asking for. So, in G, you can intentionally muddle your voice so that the students will be forced to use clarifying phrases.

**H:** Do the same as in the previous units. At this point, you should do some pronunciation practice with the number pairs 13/30, 14/40, 15/50, etc., because they will need to distinguish between these pairs in the pair work and the summative activities.

**I:** Make sure to model the pair work activity before setting them off on their own. Make sure that they don't read each other's lists.

**A SUMMATIVE ACTIVITY FOR ASSESSMENT AND REINFORCEMENT**

You have two pages of banquet items, differing only in the number (13/30, etc.) Cut the items into small strips. Take the strips of one page and give one each to
the students. Take the strips of the other page and put them on a table outside of
the room. Student A will ask student B for the item and the quantity. Student B
must make sure of the quantity (and perhaps ask for repetition), and find the
appropriate strip on the table. If the quantity of the item is smaller than the
quantity asked for by student A, student B must explain so (using the
expressions from unit 2).

Unit 4

A + B: Use the banquet items from units 1 and 2. If you can't get the realia, then
use any items in the room. These drills will give the students further practice in
pronouncing plural items.

C: This activity only provides practice with three of the prepositions introduced
at the beginning of the unit. However, it can also serve as vocabulary
reinforcement, as well as practice using and responding to the question "Where
does ******** go?"; students can ask each other in pairs using the correct responses
of the matching exercise.

D + E: This last group of items is big; the only way to bring them into the
classroom is to arrange the items on a "queen mary" (large mobile shelving) and
then wheel the queen mary into the room. (You can have the students do this for
you.)
This arrangement, while sounding cumbersome, actually works to great
advantage for this unit, because you can practice using the target prepositions
with the items on the queen mary, after doing the vocabulary practice.

F: This is a new type of exercise, introduced in this unit because the students are
least familiar with this group of banquet items. Also, it prepares the students for
a similar exercise that is used in the next unit.

A SUMMATIVE ACTIVITY FOR ASSESSMENT AND
REINFORCEMENT

Arrange banquet items from the first two units on a table. Have student A ask
student B to put an item somewhere in relation to another item.

Unit 5

The purpose of this unit is to get the students familiar with the cleaners and how
they should be used, and to continue practicing describing locations. The first
three sections can be used as beginning vocabulary practice and to draw out the students' knowledge of the cleaners.

A: If you have access to an overhead projector (OHP), make a transparency of the diagram and use it on the OHP. You will then use the transparency to practice locations later on in the unit.

B: After the students fill out the list, they can talk about the cleaners they use in small groups, or as whole class.

C: Any discrepancies that occur between pairs of workers can serve as not only a class discussion, but also as a nice segue to activity D.

D: Answers "m" and "n" in the activity can serve as a means to teach the meaning of the prefix "de-".

A SUMMATIVE ACTIVITY FOR ASSESSMENT AND REINFORCEMENT

If possible, you can take the students down to the actual shelving and quiz them on locations of cleaners there. Otherwise, you can use the transparency to quiz them orally or in writing.

Unit 6

A, B + C: Students can answer the questions on paper individually and then share answers with another student, a small group, or with the whole class. Make a list on the board of the pertinent vocabulary items they come up with, and have the students copy it.

D: Try to get as many defective items as can be carried into the room: broken/chipped/cracked/spotted/dirty/tarnished china/glassware/silver. Otherwise, this is the same type of activity as in the beginning of units 1, 2, and 3.

E + F: This will help fill in the gaps of the students' knowledge about describing defective items.

G: The format can be the same as activities A, B, and C. Note that of the situations have no "solution"; for example, if a dinner plate is chipped, they may just have to throw it away.

H + I: You can easily supplement these activities with examples from other life situations--i.e., health problems, money problems, etc.
A SUMMATIVE ACTIVITY FOR ASSESSMENT AND REINFORCEMENT

The same as activity I, except that you give the student A a slip of paper with the name of an item. The student must then remember a problem associated with the item. Student B will be the supervisor and must come up with an appropriate solution for that problem.

QUIZZES

These pencil and paper quizzes are designed to supplement the oral assessment tools you use for each unit. It's a good idea do some "practice quizzes" with the students so that they can become familiar with the format.

The quizzes for the first three units are exactly the same in format. The first page has pictures of the items. The students are supposed to match the number of the picture with the name of the item.

The second page is to test listening. Place three or four of the items at a place where all the students can clearly see them. Put a small piece of paper with the number 1, 2, 3, or 4 on or above each item. Then, you call out the name of an item. The students will write the appropriate number on the blank. You can either repeat each item once, or repeat a whole row of items a second time.

The quiz format changes slightly in unit 4. You make statements about the location of one banquet item in relation to another that is either true or false. The students then check "yes" if the statement is true or "no" if the statement is false.
