FOREWORD

The Bibliography of Learning and Teaching Resources to Support Cultural Diversity has been created as a result of ongoing collaboration between Alberta Education and Alberta Community Development on the topic of multiculturalism. This bibliography is an attempt to identify some of the best resources which are available to schools and to make these resources known to teachers and principals. Other activities are being planned as a follow-up to this endeavour to assist school personnel to support cultural diversity.

Note: The titles of the learning resources identified in this document were provided by the writers. These titles have not been evaluated by Alberta Education and their listing is not to be construed as an explicit or implicit departmental approval for use. These titles are provided as a service only to assist local jurisdictions to identify potentially useful learning resources. The responsibility to evaluate these resources prior to selection rests with the local jurisdiction.

INTRODUCTION

In a culturally and racially diverse province such as Alberta, the school has a vital role to play in fostering positive intergroup relations. Understanding, respect and acceptance among groups can and must be taught; they do not arise from mere contact. Indeed, much evidence exists to show that contact without understanding and respect often leads to hostility and open conflict.

This annotated bibliography lists resources which will facilitate the teaching/learning process in a province that is becoming more diverse. The entries have been carefully selected and evaluated by the writers to ensure good curriculum fit, practicality, easy availability and balance across grades and divisions. A positive orientation toward ethnocultural heterogeneity was important as well, since cultural and racial diversity must be presented as the strength it is, rather than as a "problem" to be overcome. The negatives associated with cultural diversity also need to be addressed and dealt with rather than ignored or denied. Accordingly, the last section of this bibliography contains entries that deal with issues relating to prejudice, racism and human rights.

Ethnocentrism (more commonly referred to as racism) and human rights abuses are both facts of life in culturally mixed societies. Schools are not exempt from incidents in which people are made to suffer because of their culture, skin colour, language or religion. Teachers and principals are often reluctant to deal with ethnocentric incidents for a number of reasons: they may not know what to do; they may fear making a situation worse by imposing sanctions on the perpetrators; they may not recognize the seriousness of the incident or its emotional or psychological impact on the victim. Very often the victim is blamed: he or she is perceived as too sensitive, or as "looking for trouble". These valid concerns are addressed by many of the resources included in the sections on Human Rights and Racism. Educators should deal with racist incidents in exactly the same way they would any other anti-social behaviour. Calls and meetings with parents, mediation between conflicting groups or individuals, firm warnings, and suspensions would do much to reduce if not eliminate ethnocentric incidents in the classroom and on the playground. Most important, however, is a willingness on the part of staffs to recognize that racism may indeed exist in their schools, that the students and/or parents who complain about prejudice may have valid concerns, and that these issues must be dealt with openly and honestly. The school atmosphere must be clearly intolerant of any form of racist behaviour. It must celebrate and enhance cultural diversity. This bibliography is intended to help principals and teachers accomplish this goal.

The entries that follow represent only a small part of the thousands of excellent resources which are available and which have been published since 1985. This is a carefully selected collection of approximately 500 exemplary print and audio-visual resources. Although the collection is necessarily limited, it will provide a firm base on which to build programs and library collections.

The material has been organized into a number of sections: "Teacher References," "Bibliographies and Catalogues" of multicultural resources, resources grouped geographically, "Human Rights," "Racism," "Additional Material" and "Agencies." Therefore, a teacher looking for books of Black and Chinese verse would look first under "West Indian Resources" and find "No Hickory, No Dickory, No Dock: A Collection of Caribbean Nursery Rhymes" by John Agar and Grace Nicols, and then look under "Chinese Resources" and discover "Chinese Mother Goose Rhymes" edited by Robert Wyndham.

The section entitled "Bibliographies and Catalogues" was included because there is an enormous amount of material available from publishing houses, the National Film Board and other sources. Annotations are included in the bibliographies and catalogues listed. Teachers can write or call the producing organizations directly for copies of their publications. Numerous agencies in Alberta offer services to immigrants and various ethnocultural groups. Many provide resources—print, audio-visual and human—that assist educators in enhancing cross-cultural
understanding and acceptance. A number of these agencies, though certainly not all, are included in this bibliography.

The bulk of this publication consists of student resources that were selected by the writers on the basis of quality, availability, curriculum fit, how well they promoted the goals of acceptance and understanding, and consistency with the objectives of Alberta Education, the Alberta Multiculturalism Commission, and the Multiculturalism Advisory Council. They were not, however, formally reviewed or approved by Alberta Education. It is recommended that local board policies regarding classroom use of learning resources be reviewed prior to use.

Each student entry follows the same organizational structure:

Grade Level Author. Title. Place of publication: publisher, date of publication.
ISBN No. hard or soft cover.
Summary of content (annotation)
Curriculum area(s)

Prices are seldom included because they change so quickly. Users of this bibliography are advised to contact any bookstore or publisher to obtain the current prices.

In the case of teacher resources, the following format is used:

Grade Level (if applicable) Author or title. Place of publication: publisher, date of publication.
ISBN No. (if available) Price (if available) Address (if applicable) and/or phone number (if available)
Summary of content and evaluation of usefulness.

Users of the bibliography will note a rather heavy leaning toward the humanities with a special emphasis on language and literature. This is due partly to our particular specializations and partly to the fact that culture is naturally and inextricably linked to such fields as literature, language, art, drama, music, sociology, anthropology, geography, history, religion and psychology. Furthermore, although a strong tendency exists to associate multiculturalism—or, more accurately, interculturalism—with social studies, in fact literature can be a far more powerful tool for enhancing crosscultural understanding, acceptance and empathy. Through good literature, the reader can enter into the heart and mind of the protagonists, identify with and support their struggles and come to an understanding of the interconnections and linkages that make us all human.

This is not to say that intercultural concepts cannot be fostered in the realms of mathematics and science. Learning to count in different languages; the origin of the concept of zero; different number systems; approaches to scientific learning that do not follow the “standard” scientific method; the contributions of such little-known scientists as Fallopius, Malpighi, Galvani, Morgagni, and Realdo Colombo; holistic approaches to health such as those followed by traditional aboriginal societies—all of these, and more, can and should be included in the mathematics and science curricula. Time, and our own lack of solid expertise, precluded the inclusion of an adequate number of resources in these fields.

Despite its limitations, this bibliography will facilitate the teaching/learning process and provide teachers and students with a foundation on which to build bridges of understanding and acceptance.

This is a fascinating exploration of 39 games from 28 countries. Many of the games suggest creative activities that would fit into different elements of the school curriculum. The games chosen are described simply and are easy to replicate. There is, however, some concern that the simplification may provide a stereotyped image of Third World countries.

The SPEDS manual consists of a number of units, set forth as lesson plans, dealing with attitudes towards self and others, being Canadian, and being members of the world community. The approach is integrated and can be used year-round or in an intensive six- to eight-week period. SPEDS concepts have also been pulled together into language arts/social studies units for Grades 1-6.

Some members of this group are available to provide workshops on the multicultural aspects of storytelling or to tell stories in a multicultural context.

The authors have compiled a treasury of practical, useful information and ideas for teachers in every classroom, but especially for schools with a wide variety of ethnocultural minorities. This well-illustrated book includes excellent information and instructional strategies that facilitate the injection of multicultural concepts into all areas of study. This edition addresses changes over the past years and deals with topics such as promoting self-esteem, developing a feeling of connectedness and discovering linguistic diversity. The text often has an American focus but most of it is relevant or adaptable to the Canadian classroom.

This monograph examines the relationship between culture and learning, and discusses how culture conflicts can hinder the educational process for many students. It reviews examples of culturally sensitive instructional programs and approaches, and describes the considerations that teachers, school administrators and educational policy makers need to take into account as they attempt to meet the needs of a culturally diverse student population. It suggests that some cultural groups continue to suffer from high dropout rates, low achievement and limited economic success due in part to the school system's inability to meet the educational needs of these students. The report contains valuable information that enables teachers and administrators to begin talking about culturally sensitive instruction. It is suggested that this document would be useful as a basis for a professional development day.

It presents a personal case study that should serve as a starting point for further discussion. The film portrays the arrival of an immigrant mother and her young son from Afghanistan. The mother tells the story of their flight from Afghanistan and their first year in Edmonton. She discusses her frustrations and worries about their uncertain future. The viewer sees her as she applies for jobs, shops for groceries and does the banking. In spite of the many obstacles she encounters, she remains positive and strong.

White Mist is both an exciting adventure story and an eloquent statement about environmental pollution, the forced eviction of the Great Lakes Indians, and racial intolerance. When a mysterious Indian chief summons May Appelby and Lee Pokagon back in time to a thriving nineteenth century logging town, they react differently to their unexpected adventure. Lee, sure of his Indian ancestry, easily adapts to life with the Potawotomi Indians who live outside the town. May, taunted by her white classmates, eventually joins Lee in the Indian village. Together they learn the reasons for their time travel and the message they must bring back to the future if they can get back.

Only 10 percent of Jewish children survived the Nazi onslaught. Dwork's powerful book gives new meaning to this numbing statistic. The book describes daily life through the eyes of the children and relies heavily on quotations from diaries, letters and interviews gathered during Dwork's extensive research. Dwork also provides documented evidence of the existence of a network of independent resistance groups who were dedicated to the rescue of Jewish children and reveals that the actions of these groups were ignored when the war ended. The reason, according to Dwork, is that the majority of these resistance workers were women and after the war, just as before and during it, heroism was measured by men.
