African Americans; Evergreen Valley College CA

Project AFFIRM (African-American First Investment Return Module) was established at Evergreen Community College in fall 1989 as a comprehensive academic and support program to help African-American students achieve their college transfer or associate degree goals. AFFIRM courses combine career and economic prosperity components into life plan emphasizing higher educational goals and meeting real-world expectations. AFFIRM courses have the same content as traditional courses, but utilize non-traditional delivery and intervention strategies and are taught by culture-specific role model teachers. Supportive services include academic and personal counseling, tutoring, mentoring, economic literacy and self-esteem workshops, scholarships, and book and personal emergency loans. In fall 1992, 114 students were enrolled in six classes offered through Project AFFIRM: English Composition (English 1A); Fundamentals of Composition (English 104); Improvement of Writing (English 330); Fundamentals of Chemistry (Chemistry 15); College Study Techniques (Guidance 95); and Algebra I (Mathematics 12). In comparison to other African-American students taking the same courses, AFFIRM students tended to have a higher success rate (46% vs. 41%). AFFIRM students had a noticeably higher success rate (53%) than non-AFFIRM African-American students (15%) in English 104, but a lower success rate in English 1A (34% vs. 62%), Mathematics 12 (39% vs. 41%), and Guidance 95 (62% vs. 67%). Over seven semesters, the total success rate for AFFIRM students in English 330 was 47%, compared to other English 330 African-American students who had a success rate of 40%.

Mission

The mission of the Project AFFIRM Program is to address the educational crisis by providing academic and personal support that will significantly increase graduation and transfer rates of African-American students.

History

Project AFFIRM (African-American First Investment Return Module) was established in Fall of 1989 in an attempt to address the widespread educational crisis specifically pertaining to African-American students. It is a comprehensive academic and support program designed to assist African-American students in building their self-esteem and in preparing these students for college transfer and/or for graduating with an AA/AS degree. The program's philosophy is that the classroom experience is less rewarding to these students if they are not exposed to and/or involved in a variety of specialized learning strategies and supportive learning environments. It is also evident that all students, and particularly students who are academically underprepared, learn best in a supportive community. Therefore, integration and participation in supportive learning environments are pertinent to the learning and retention of all students, especially the underprepared.

The Program

Courses in the program combine career and economic prosperity components into a successful life survival plan of action and towards higher educational goals. Career and financial management training are combined with general education courses to enhance the students' knowledge of what is expected in the real world.

The program has served approximately 400 African-American students. With an increasing number of students participating in the project, it has grown into a comprehensive program.

Students enrolled in the program have culture-specific role model teachers for instruction. Courses have the same content as other campus courses taught in a traditional mode, but the AFFIRM courses utilize non-traditional delivery and intervention strategies. Program aides are in the classroom to provide extra assistance to the students.

In Fall 1992, Project AFFIRM offered six classes:

<table>

*minus African-American AFFIRM Students

Comment: African-American AFFIRM English 1A students were less successful at 34% than other African-Americans students in English 1A at 62%. The reason is unclear.

Key:
AFFIRM (F92) = African-American AFFIRM students in English 1A for Fall 1992
ENGL 1A Af.-Amer.* = English 1A African-Americans minus African-American AFFIRM students
All Other ENGL 1A * = All English 1A students minus African-American AFFIRM students
Comment: The AFFIRM African-American Algebra (MATH 12) students did about the same as other African-Americans students in MATH 12.

Key:

- AFFIRM (F92) = African-American AFFIRM students in Math 12 for Fall 1992
- MATH 12 Af.-Amer.* = All Math 12 African-Americans minus African-American AFFIRM students
- All Other MATH 12* = All Math 12 students minus African-American AFFIRM students
African-American AFFIRM students in Chemistry 15 had a success rate far below that of other Chemistry 15 students (31% to 62%). A low N of 13 does not give stable results; more research will be needed.

Fall 1992 was the first semester that Chemistry 15 was offered in the AFFIRM program. Although African-American AFFIRM students had a lower success rate than other Chemistry 15 students in Fall 1992, progress has been made by increasing enrollment of African-Americans in Chemistry 15 by over 200% from Spring 1992 to Fall 1992.

*minus African-American AFFIRM students

**Comment:**
African-American AFFIRM students in GUIDE 95 had a lower success rate at 62% than all other GUIDE 95 African-Americans (67%), and all other GUIDE 95 students at 70%.

**Key:**
- AFFIRM (F92) = African-American AFFIRM students in GUIDE 95 for Fall 1992
- GUIDE 95 Af.-Amer.* = All GUIDE 95 African-Americans minus African-American AFFIRM students
- All Other GUIDE 95* = All GUIDE 95 minus African-American AFFIRM students
The overall success rate of African-American AFFIRM students in six AFFIRM sections was 46% compared to 41% for African-Americans in non-AFFIRM comparison sections. These are encouraging results.

There was a notably higher success rate of African-American AFFIRM students in English 104 in Fall 1992 compared to other African-Americans in English 104 (53% to 15%).

In the case of English 1A, however, the other African-Americans outside of the AFFIRM program had a much higher 62% success rate. It would be worth trying to determine why they were so successful. Was it a selection factor, an intervention, or chance?

Note: Caution should be taken in interpreting the results because of the low numbers.

</table>

Over 7 semesters, the total success rate for African-American AFFIRM students in English 330 was 47% compared to other English 330 African-Americans at 40%.

In 5 of the 7 semesters, the African-American AFFIRM students in English 330 had a higher success rate than the other English 330 African-Americans. Most individual AFFIRM sections had small numbers of African-American AFFIRM, therefore, caution should be used in generalizing from data for a single semester's comparisons.
