Sequential Processing; Word Families

Based on the concept that the natural way of learning is by making mistakes in which immediate self-correction takes place, this booklet discusses how teachers can develop their own sequential spelling tests. The booklet discusses the five steps in giving a sequential spelling test (read the word aloud, students repeat the word, students attempt to spell the word, teacher shows the correct spelling of the word, and students correct the spelling of the word before going on to the next word). The booklet also discusses how to determine which word families to teach and offers sequencing patterns so that teachers can run through all the patterns of English spelling. (RS)

What is AVKO?

AVKO is a non-profit tax-exempt membership organization.

AVKO was founded in 1974.

AVKO is subsidized by donations and grants.

AVKO is open to membership to anyone interested in helping others learn to read and write.

AVKO is run by members from as far away as Alaska and Florida.

AVKO's daily operations are handled by volunteers.

AVKO plans to build and operate a model reading research center in a YEAR-AROUND camp setting that would economically and efficiently service the needs of dyslexics of all ages.

AVKO hopes to spread the concept that parent and spouse tutoring in spelling/reading skills can be successfully taught in adult community education classes and that members of a problem reader's support group can greatly assist the efforts of any volunteer tutor working in the literacy movement.

AVKO provides newsletters and economical opportunities to pursue individual research projects and to take part in large scale cooperative research projects that have immediate practical applications.

AVKO is attempting to accomplish these goals primarily through the profits generated by the inservices, workshops and the sales of materials developed for the special needs of students, parents, and adults.
How to Develop Your Own Sequential Spelling Tests

Those who have tried Sequential Spelling I, II, III, IV, V, VI, or VII, (McCabe, 1974, 1993) know that the method works. It's simple and it follows solid principles of learning.

However, there may be times in which the word family being presented has already been learned by your students. We feel that this isn't necessarily bad and that overlearning is right for many. However, for those teachers who wish to give maximum individualization and to provide maximum learning in the shortest time in a practical, we feel that you may wish to use the AVKO SEQUENTIAL SPELLING TECHNIQUE without using the AVKO spelling books.

First the Basic SEQUENTIAL Technique

This technique is based on the concept that the natural way of learning is by making mistakes in which immediate self-correction takes place. This is the way we learned to walk, talk, feed ourselves, ride a bike. Therefore, rather than having the teacher correct the test after it is given, we insist that each student correct each word as the test is given.

To make it easier for students to IMMEDIATELY apply (OR TRANSFER) what they learned from one word to the spelling of another, the words are presented in word family sequences, which has been referred to as "vertical word processing." For example:

- all
- tall
- stall
- install
- installment
- installation
Steps in Giving a Sequential Spelling Test

1. Give the word. Use the word in a sentence. Repeat the word. The very best way is to have the sentences on photo-copied or dittoed teacher-made (or student-made!) worksheets with blanks to fill in.

2. Have students repeat the word and/or sentence. With older students this step may be eliminated if it proves too much of a hassle.

3. Have students attempt the spelling. It is essential that each student at least makes an attempt.

   In order to LEARN FROM A MISTAKE, a mistake must be made. In order to learn to tolerate personal mistakes, mistakes must be made in an atmosphere that allows for mistakes.

4. Show the correct spelling by showing it on an overhead projector or by writing it on a chalkboard.

5. Call out the word and the letters. Each student repeats the word and the letters and corrects his/her own spelling. If a mistake has been made, the student is to erase the incorrect spelling before writing the word correctly.

THE STUDENTS MUST NEVER MAKE A CHECK MARK

No matter how many words a student may miss during the giving of the test, the paper should look exactly the same as that of a student who correctly spelled every word the first time.

PACE IS ESSENTIAL: The greatest music is boring if it is dragged out. Speed and liveliness of presentation is vital.
6. REPEAT STEPS 1-5 FOR EACH WORD.

1. Teacher gives word.
2. Students repeat word.
3. Students write word.
4. Teacher gives correct spelling.
5. Students correct own spelling before next word is given.

IMPORTANT: Do NOT give the words to the students to study. When students study words for a test and then miss them, they have only learned that they are dumb! Students don't feel dumb if they miss a word they weren't given for study -- but if they get one right that they know they didn't know the day before -- Wow! They know they have to have some "smarts" after all.

Determining which word families to teach

1. Using any controlled word list, test your students' ability to spell the ending sounds of words (rimes*) by giving them the initial letters (onsets). For example:

   pain  The first letter in pain is p. Spell pain, as in: Correcting papers is a pain in the neck.

   sail  The first letter in sail is s. Spell sail, as in to sail a boat on a lake.

   chair The first two letters in chair are ch. Spell chair as in to sit in your chair.

2. After you have found three word families (rimes) that need to be mastered, make out your list of words that belong to each word family. If you happen to be using any of AVKO's diagnostic tests, you will know on which page in AVKO's Patterns of English Spelling that you can find all of the words already listed for you. If you use other diagnostic tests all you have to do is use the index of The Patterns of English Spelling to locate the page on which you can find all the words in the family you have selected.

* Rimes in the latest academic jargon refer to ending spelling patterns that rhyme. We prefer the older jargon: word families.
When you look at all the words listed on that page in *The Patterns of English Spelling*, you may elect to skip some of them. This book was written as a reference tool for teachers at all levels. Hence, little pre-censoring was done. If you don't have the book, you can construct your own by simple trial and error. Just try adding letters (onsets) in front of the ending (rime) and keep the real words that you want to use.

Let's suppose that you used the *Dolch* list instead of the *AVKO Suggested Order of Diagnosis and Remediation of "SIMPLE" Words* (#614), and let's further suppose that you wanted to work with the LONG A sound so you picked the words *rain, chair,* and *cake* which enough of your students couldn't spell to make it worth your while developing a special sequence.

Because not all words have -s, -ed, -ing endings and because some have -y, -ly, -er, -est endings, etc., there will always be blanks to slip in the irregular demons (repeatedly!) as in the example above.

Notice that on Day 1 we only had only base words from the -ain family (rime).

On Day 2 we gave a "review" of the first day by using all the words except *Spain* in the -s form. Note, that each base word generally is reviewed three times: -s, -ed, and -ing forms. The number of times the family sound is reviewed is approximately forty times for even a rather small family or about four times for each word in the family.
On Day 5 we begin a new family, the -air family. Note: There are still a few -ain words left as mastery review. On Day 6 we begin another new family. Often what happens is that the three families being worked on are in three different stages of learning: Introductory, temporarily learned, and the almost-mastered stages.

On the next page are blanks that you can reproduce ad infinitum to provide yourself with sequencing patterns. If you would rather not do your own sequencing, you can always try AVKO’s. Write to the AVKO Foundation Spelling Division, 3084 W. Willard Road, Clio, Mich. 48420-7801 for a free spelling catalog.

5. _______      _______      _______      _______      _______
6. _______      _______      _______      _______      _______
7. _______      _______      _______      _______      _______
8. _______      _______      _______      _______      _______
9. _______      _______      _______      _______      _______
10. _______     _______      _______      _______      _______

Note: Tests can be varied in length from five to twenty-five words according to your students' needs, enthusiasm, and time available.

For variety, you may elect to mix up the endings so that the students will have to be alert and not just automatically add the -s or the -ed or the -ing as the case may be. For example, one day might have: rain / trains/ strained/ etc., and the next day might be: rains / train / straining / etc.
An Overview of the Services Provided by the AVKO Foundation

- Inservices, Workshops, Training Sessions for:
  Classroom teachers, Parents, Homeschoolers, Community Adult Literacy Volunteers, Supervisors, Reading Consultants, Curriculum Consultants, Special Education Consultants
- Educational and Instructional Materials. Write for a FREE catalog.
- FREE DAILY Tutoring at the AVKO Reading Clinic.
- Bernice Webb Memorial Library.

AVKO is a non-profit tax-exempt 501 (c)3 membership organization, founded in 1974, subsidized by donations and occasional grants, open to membership to anyone interested in helping others learn to read, and staffed by volunteers.
