These lessons were developed by teacher participants in the 1994 Fulbright-Hays Summer Seminars Abroad program in China. The 15 lessons include: (1) "Global Studies I" (Robert H. Berry); (2) "Dao Beijing" (Thomas G. Buckingham, Jr.); (3) "Letters to the Past: An Integrated Curriculum on China, Hong Kong, and Macau" (Glenn D. Diedrich); (4) "China: The Master Culture" (Patricia A. Flores); (5) "Mapping the Five Themes of Geography throughout China" (Sharon H. Goralewski); (6) "China Projects and Activities" (Patricia Hardy); (7) "China for Children: A Curriculum Project" (Nila R. Hurley); (8) "China: Yesterday, Today, and Tomorrow" (J. David Kilpatrick); (9) "Lesson Plan for Archeology Exercise" (Nancy LeMasurier); (10) "Teaching Chinese Mythology and Chinese Classical Poems" (Ann Lew); (11) "The Three Teachings of China: An Introduction to Buddhism, Taoism, and Confucianism" (Katherine A. Kunz); (12) "Literacy in China: Utilizing Primary Source Material in the Elementary School Library Media Center" (Marguerite Mackay); (13) "Moral Education in China" (Susan Rudin); (14) "China: Then and There--Here and Now" (George F. Sabato); and (15) "The Chinese Woman: Past and Present" (Jean Wollam). (EH)
1994 FULBRIGHT HAYS SEMINAR ABROAD PROGRAM

China: Tradition and Transformation
Curriculum Projects

Compiled by the National Committee on U.S.-China Relations on behalf of the United States Department of Education in fulfillment of Fulbright Hays requirements.

- Geography of China II ................................................................................................................... 27 - 28
- China Crossword Puzzle III ......................................................................................................... 29 - 33
- China Geography .......................................................................................................................... 34
This lesson is designed to provide students with the background to understand the importance of age structure on population growth within a culture. It is important that the student understand the different shaped pyramids which they will be creating and the impact that pyramids have on growth patterns.

**Objectives:**

1. The student will create a population pyramid for China, U.S., Singapore and Kenya.
2. The student will interpret and compare population pyramids of selected countries.
3. The student will map identified countries.

**Process:**

1. Display a population Pyramid on the overhead
   (a) Choose three from different continents.
   (1) Explain that a population pyramid shows the age and sex structure of a population. Examine the horizontal bars, which show the percentages (or numbers) of males and females in each group.

2. Have students interpret the chart. Which age group has the smallest population, the largest proportion of people? Which bar indicates the students in this classroom? Your parents, your teacher(60). Are there more people in your age group or in age group above yours/below yours.

3. Remember that a pyramid shows the history of a country's population growth. (ie.) In the U.S. from 1945-1965, people had larger families. These people are now between the age of 25-44 and are called "baby boomers". Identify this group on the Pyramid.
4. Show the pyramids of the other two countries you have chosen. (See World Bank Atlas, Population Reference Bureau Publications.)

2.

(a) Have the student describe the countries' population structure.
(b) How is this country's pyramid different from that of the U.S.
(c) Which age group in both countries are the largest?
(d) What proportion of the population is in this age group?
(e) Look at country #3. How is it different? How does it compare with country #2.

5. Why would the leaders of a country want to know the proportion of the population in different age groups?
(a) What difference does the age of the people within a country make to the leaders of that country?
(b) Is it important for the leaders or planners of a country to know the age of the population they are serving? Why?

6. Students will create a population pyramid for the countries previously mentioned. They will only use 4 age categories.

7. Pass out copies of a blank population pyramid outline. Remember Males on the left side and females on the right side. They are measured as a percentage of the population. For the U.S. 14% of females are age 0-19. Draw a line from the bottom of the box at 14% up to the next line (Do this along with the students on the overhead). Repeat this process for the Males. Continue the process for the other age groups.

8. Hand out copies of the pyramid data table plus another copy of the blank pyramid sheet.

(a) At this point the class can be organized into groups. I use four students to a group, one group for each country. China, U.S. Singapore, Kenya. The number of students in a group depends on the size of the class.

9. When the pyramids are completed each group will makes copies of their pyramid and share the information with the other three groups.
(a) Discuss the similarities and differences in the shapes of the pyramids and what it means.
(b) Have each group record their findings on the overhead.
This lesson will introduce the student to population trends. How many people inhabit the earth is an important factor in determining the impact population will have on the environment. Students need to be made aware of the population trends and its impact on the places where they will be living. Their future health, education, infrastructure and government will all be impacted. By introducing this graphing exercise students can begin the process of being aware of the population and its ramifications to our future.

Objectives:

1. The student will use library resources which can include electronic media materials.
2. Students will collect and record population data on
   a. The world
   b. China
   c. India
   d. U.S.
   e. Kenya
3. Students will construct a graph showing world population from 1750-2050.
4. Students will pinpoint on the graph where the selected countries fall for the present year.

Process:

1. Students will divide into five groups.
2. Groups will be assigned a designated country.
3. The groups will use standard reference or electronic reference materials to find the populations for the designated countries from 1750-2050.
4. Groups will share their information with a student designated master graph maker.
5. Each group will plot the gathered information to their graph and also share the information with the master graph maker.
6. The master graph maker will plot the master graph from the data provided by each of the groups. The master graph is to be plotted on a matrix on the overhead, or a computer.
7. When the master graph is completed each group will write a series of conclusions as to the impact of population on the designated country and the world community. Conclusions will be recorded to the newsprint board. The question should always be asked as to the impact on the students in 3 years, 10 years, 20 years.
Purpose:

This lesson is designed to provide students the opportunity to explore the environment of China (or any area) through the process of constructing graphs and interpreting pictures and maps in order to describe the impact environment has on a country and its people. Using these graphs, pictures, and maps students will draw conclusions about the country and its future problems. The student will be introduced the the process of identifying trends.

Objectives:

1. Students will research temperature and precipitation data in the library.
2. Students will record temperature and precipitation data on five locations in China.
3. Students will work in teams being responsible for 1 location in China.
4. Students will use data to construct a climate graph.
5. Students will interpret and speculate on the information depicted on the graph.
6. Students will access the potential impact on the people and the environment of China.
7. Students will research pictorial material for each of the five identified areas of China in the library using standard reference material or the electronic reference material. Personal photographs are always useful.

Procedure:

1. Students will divide into five data collecting/recording groups.
2. Each group will collect temperature/precipitation data on one location from January to December in China for the same year.
3. Recorded data will be in both °C-mm and O°f-mm.
4. Cities are:
   a. Beijing
   b. Singapore
   c. X’ian
   d. Guilin (or 1 western city)
   e. Hong Kong
5. Each group will identify the Latitude/Longitude and elevation of the city.
6. Each group will have a spokesperson who will be responsible for representing their group, disseminating and retrieving data on the other cities.
7. Using this shared data each group will construct a climate graph, their information is to be plotted on a master graph and a master map.
8. Students may construct the map and graph manually or they may use the
8. (cont.) computer in the classroom.
9. Each group will develop a series of conclusions based on the acquired data.
10. Using the acquired pictures, the students will decide if the conclusions are valid or invalid.
11. The conclusions will be recorded on the overhead or on the newsprint board and discussed.
12. If this exercise were to be expanded over a longer period of time then trends might emerge. This would lend itself to additional discussion and speculation.
Purpose:

To introduce the changing patterns of land use especially the conversion of farmland to other purposes; this is a major concern to many in China and the world community. Those people and countries that are about to loose ever increasing amounts of farmland point out that the present decline in arable land per capita to a whole list of reasons could threaten some countries ability to feed their population. If the patterns continue the implications send up warning signs for the future for all of us as members of the world community. We are now in a position to raise the all important question; What If?

Objective:

2. Students will convert Acres to hecares.
3. Students will construct a line graph showing crop land ares from 1961-94.
4. Students will work in 3 groups. Once the data is collected the information will be shared with each group. The fourth group will collect the group data and construct a composite or master graph.

Procedures:

1. Students will divide into four groups. Groups 1,2, and 3 will research in the library crop land area in China, U.S. Kenya from 1960-1994. Each group will exchange the information gathered.
2. Each group will supply the information with group four, who will develop a master line graph.
   Each group will develop a line graph showing crop land area for their respective country.
3. Each group will interpret the meaning of the graph and speculate on the future of these three countries and their ability to feed their countries.
4. These findings will be recorded on the board/overhead or newsprint board.
**Purpose:**

Have student teams research in the library the number of births per women in China, U.S., Singapore, Kenya. They will develop a bar graph for comparison purposes. Using the completed graph the teams will make projections as to how the births might impact each of the countries.

**Objective:**

1. This activity will involve students in group work situations.
   a. Students will divide into four groups.
2. Students will Research births per women using library reference materials.
   a. The countries to be researched are Chins, U.S. Singapore, Kenya.
   b. Each group will choose one of the above mentioned countries for their library search.
3. Students will construct bar graphs from the data collected.
   a. This data should span a 20 year period.
   b. The bar graphs may be constructed by hand or a computer may be used.
4. The student groups will exchange information (data) so the the information can be used to draw conclusions.
5. The student groups will compare and discuss their conclusions with the class and the information will be recorded on the overhead or board.

**Procedure:**

1. Students will divide into four groups each group being responsible for one of the countries previously mentioned.
2. Each group will go to the library and research the information; "The number of births per women".
3. Each group will exchange the information so that the group will have a bar developed including the four mentioned countries.
4. Each group will interpret the bar graph and draw conclusions relating to what this information means for future planners and government officials in each of the countries.
GLOBAL STUDIES NINE: AFRO-ASIA

Title: CHINA - PHYSICAL AND POLITICAL GEOGRAPHY

Teacher ___________ Period ___________ Due Date ___________ Mark / 45

Date handed in (late) _______ Reason for lateness _______________________

Sources of Information: ____________________________________________

Use the China outline map to accomplish the following tasks:

1. Trace ALL international boundaries in red, including those crossing bodies of water. (4 points)

2. Label the following political entities using capital letters:
   - People's Republic of China; Republic of China; two European colonies;
   - two nations occupying one peninsula; two archipelago nations to the east;
   - four Southeast Asian nations; six South Asian nations; China's giant
     northern neighbor; the "buffer state" between the two Asian giants. (20)

3. Trace all rivers, seacoasts, and lakes in blue (4 points)

4. Shade the entire map according to elevation, using the colors green, yellow, orange and brown (8 points)

5. Put the following physical features on the map: (1 point each)
   - Geographic Regions
     - Inner Mongolia
     - Manchuria
     - Korea
     - Shantung Peninsula
     - Taiwan (Formosa)
     - Hainan (Island)
     - Sinkiang (Hsinchiang)
     - Tibet
     - Turfan Depression
     - Changpai Range (Mts.)
   - Greater Khingan (Hsingan) Range
   - Altai Chin (Mts.)
   - Tien Shan (Mts.)
   - Himalayas
   - Takla Makan (Desert)
   - Gobi (Desert)
   - Tibetan Plateau
   - Dzungarian Gap
   - South China Highlands/Uplands
   - Chin Ling (Mts.)

6. Bodies of Water
   - Sea of Japan
   - Yellow Sea
   - Gulf of Chihli
   - East China Sea
   - South China Sea
   - Amur (& Argun) River
   - Sungari River
   - Liao River
   - Valu River
   - Ussuri River

7. What is loess? ____________________________________________ (1 point)

8. Why are the Yellow River and Sea so named? ____________________________ (1 point)

9. China lies between what two lines of latitude? ___° & ___° (2 points)
   Sketch them in or highlight them in black on the map (1 point each)

10. Use arrows and labels to indicate the directions of the following: (2 points)

---

BEST COPY AVAILABLE
On your own paper, describe the climates of the two major population regions of China (5 points each).

The Plain of North China
Southeastern China

Be sure to include information about the influences on climate of bodies of water, mountain ranges, arid areas, and continent land masses where appropriate.

(90 questions/points - 2 = 45 points)
The Imperial / Confucian Pattern

A Highly Centralized System of Political, Economic, and Social Organization
(The Hierarchy of Traditional Chinese Culture)

- The Mandate of Heaven
  - gives power to:
    - THE EMPEROR
      - Son of Heaven
      - and the DYNASTY
      - who exercise Authority & Responsibility
      - based on concept of FILIAL PIETY
      - (Respect for the father)

- SCHOLAR/GENTRY
  - (class of educated "literati")
  - interpret Confucian philosophy
  - serve as officials in the BUREAUCRACY
  - civil service / government officials

- Peasants
  - "Old One Hundred Names" (80-90% of population)
  - Elders: local unit of govt
  - Family: basic unit of society
  - Father: Emperor
  - Physically hard work: few benefits, low standard of living, poverty

- Merchants, Artisans, Scientists, Soldiers
  - (given little respect because they used neither their minds nor their hands)

Confucianism's Basic Principles
- JEN = Humanity: help others from inner goodness
- LI = Conscience: do the right thing without selfishness

Centralized - concentration of power with the Emperor and those directly responsible to Emperor

Hierarchy - ranking

DYNASTY - series of related rulers

FILIAL PIETY: IDEA
- Governing the basic "FIVE RELATIONSHIPS"
  - Emperor & Subject
  - Father and Son
  - Older Brother & Younger Brother
  - Husband & Wife
  - Teacher & Student

Best Copy Available
ELEMENTS OF CULTURE

How a group of people react to some or all of the following:

- CONFLICT
- ENVIRONMENT
- TECHNOLOGY
- MODES OF EXPRESSION
- SOCIAL ORGANIZATION
- VALUES & RELIGION
- POLITICAL INSTITUTIONS
- ECONOMIC STRUCTURE

RESULTS IN the distinctive CULTURE of that group

The existence & operation of these factors in a culture's past make up its History

as contributed to LRGS
MAJOR ELEMENTS OF CULTURE—DEFINITIONS

1. Environment = The total of all natural surroundings and influences that affect human beings.

2. Technology = The tools and techniques that people use to control and interact with their environment.

3. Social Organization = The manner in which individuals and groups "order" themselves within a culture. These relationships determine interactions among and between groups and individuals.

5. Economics = Ways of making a living. The use of resources in the production, distribution, and consumption of goods and services.

6. Religion = Systems of faith, belief(s), values that is reflective of what is important to the individuals and groups in a culture.

7. Modes of Expression/Communications = Transmission of verbal and written messages. The exchange of information, or emotions, through behavior, language, symbolism or artistic expression.

8. Conflict = Struggle between individuals or groups out of competition or opposing views/actions.
Title: Identifying Elements of Culture

Source: Cultural Elements Chart

Directions: The eight Elements of Culture which we have discussed in class are listed on the chart below. Next to each element is one example of that element in American culture. Complete the chart by listing two (or more) additional examples of each element.

Human Cultural Development

Stage 1
(1,000,000 BC?)

Technological Revolution
Hunting & Gathering

Characteristics
Nomadism
Nearby resources
Resources not changed much
Self-sufficiency
Spiritually oriented
Unity / Harmony
Families / Clans

Needs
Plants / animals for food / shelter
Favorable climate
Water Supply
Large area

Stage 2
(30-50,000 BC)

Agricultural Revolution
Farming & Herding

Characteristics
Sedentary
Domestication of plants & animals
Subsistence
Villages/Tribes
Short-distance trade
Extended Families
Use local resources

Needs
Fertile soil
Water supply for irrigation
Favorable growing seasons

Stage 3
(3-5,000 BC-1800 AD)

Legal & Urban Revolution
Law Codes & Cities

Characteristics
Surplus food
Job specialization
Writing, numbering & money systems
Trade & transport
Kingdoms / Empires
Rulers / Peasants
Hierarchical society

Needs
Surplus food supply nearby
Trade/defense location
Labor force

Stage 4
(1800-present AD)

Industrial Revolution
Factories & Machines

Characteristics
Variety of resources
Long distance trade
Materially productive
Complex technology
Social services
Structural & formal
Totalitarianism/Democracy

Needs
Transport/Communication
Mineral Resources
Abundant food
Skilled Workforce
CROSSWORD PUZZLE

PURPOSE:

To review terms already used in previous lessons. This is a computer generated cross work puzzle.

OBJECTIVE:

1. To provide the student with a vocabulary review of terms already introduced in previous lessons.

2. Students will use the clues provided to arrive at the appropriate term.
The following terms will be developed into several crossword puzzles.

1. Acid Rain
2. Agro-Management
3. Aquifer
4. Arable
5. Biosphere
6. Birth Rate
7. Carrying Capacity
8. Cash Crop
9. River Basin
10. Chlorofluorocarbons
11. Cholera
12. Cyclical
13. Death Rate
14. Deforestation
15. Delta
16. Demographics
17. Desertification
18. Dysentery
19. Ecosystem
20. Fallow
21. Greenhouse Effect
22. Gross Domestic Product
23. Gross National Product
24. Infant Mortality Rate
25. Infrastructure
26. Land Degradation
27. Life Expectancy
28. Monsoon
29. Oasis
30. Sahel
31. Salinization
32. Salinization
33. Silt
34. Slash & Burn
2. Cross Word Puzzle  (Continued)

35. Squatter Settlement
36. Subsistence Farming
37. Typhoid
38. Urbanization
39. Water Shed
40. Per Capita Income
41. Literacy Rate
42. Desalinization
43. Self sufficiency
44. Terracing
45. Leaching
46. Silting
47. Rural
48. Reforestation
49. Human Resources
50. Humus
GEOGRAPHIC CROSSWORD PUZZLE

ACROSS
1. Islands and sandbars made from sediments dropped from rivers flowing into a still body of water.
10. Control of agricultural areas, including soil and water.
12. A small, isolated plot of fertile land in the middle of barren or desert land. Usually has trees and water.
13. The number of births per 1000 population in any given year.
15. A contagious disease, high fever, headache, and diarrhea.
18. To leave land untilled or unsowed after plowing
19. Rain that has become polluted from falling through air pollutants.
21. An infection spread through unsanitary drinking water, sometimes fatal marked by severe diarrhea.
23. Most of what is produced is consumed by the farmer and his family, with little or nothing left.
25. The process by which semi-arid grassland becomes desert.
26. The transportation network, communications system, electricity, water supply of a nation.
27. A mixture of decaying organic matter and inorganic compounds in the topsoil.
28. The number of deaths to infants under one year of age in a given year per 1000.

DOWN
1. The number of deaths per 1000 population in a given year.
2. A situation where the births equal the deaths within a country.
3. Part of the earth, including air & water, that can support life.
4. Land that can be plowed or tilled easily.
5. A situation where a patch of forest and brush are cut and burned.
6. The loss of trees due to overcutting of forests.
7. The study of human populations, including size, composition, distribution and density.
8. The largest number of living things that can be supported in any given area.
9. A crop grown primarily for the purpose of selling for a profit.
10. Underground bed or rock, sand or gravel that holds and transmits water to wells and springs.
11. Sedimentary rock material whose particles are finer than grains of sand.
14. Section of the landscape where the farms are located.
17. A area that is drained by the major river and all its tributaries.
20. The community of plants and animals interacting with one another and the environment.
22. An epidemic disease characterized by severe diarrhea and abdominal pain. Bacterial infection from food and water.
24. A marshy inlet or outlet.
ACROSS

1. Islands and sandbars made from sediments dropped from rivers flowing into a still body of water. (DELTA)
10. Control of agricultural areas, including soil and water. (AGROMANAGEMENT)
12. A small, isolated plot of fertile land in the middle of barren or desert land. Usually has trees and water. (OASIS)
13. The number of births per 1000 population in any given year. (BIRTHRATE)
15. A contagious disease, high fever, headache, and diarrhea. (TYPHOID)
18. To leave land untilled or unsowed after plowing (FALLOW)
19. Rain that has become polluted from falling through air pollutants. (ACIDRAIN)
21. An infection spread through unsanitary drinking water, sometimes fatal marked by severe diarrhea. (CHOLERA)
23. Most of what is produced is consumed by the farmer and his family, with little or nothing left. (SUBSISTENCE)
25. The process by which semi-arid grassland becomes desert. (DESERTIFICATION)
26. The transportation network, communications system, electricity, water supply of a nation. (INFRASTRUCTURE)
27. A mixture of decaying organic matter and inorganic compounds in the topsoil. (HUMUS)
28. The number of deaths to infants under one year of age in a given year per/1000. (INFANTMORTALITY)

DOWN

1. The number of deaths per 1000 population in a given year. (DEATHRATE)
2. A situation where the births equal the deaths within a country. (ZPG)
3. Part of the earth, including air & water, that can support life. (BIOSPHERE)
4. Land that can be plowed or tilled easily. (ARABLE)
5. A situation where a patch of forest and brush are cut and burned. (SLASHANDBURN)
6. The loss of trees due to overcutting of forests. (DEFORESTATION)
7. The study of human populations, including size, composition, distribution and density. (DEMOGRAPHICS)
8. The largest number of living things that can be supported in any given area. (CARRYINGCAPACITY)
9. A crop grown primarily for the purpose of selling for a profit. (CASHCROP)
10. Underground bed or rock, sand or gravel that holds and transmits water to wells and springs. (AQUIFER)
11. Sedimentary rock material whose particles are finer than grains of sand. (SILT)
14. Section of the landscape where the farms are located. (RURAL)
16. A pattern of seasonal changing winds with rain that dominates life in South Asia. (MONSOON)
17. A area that is drained by the major river and all its tributaries. (RIVERBASIN)
20. The community of plants and animals interacting with one another and the environment. (ECOSYSTEMS)
22. An epidemic disease characterized by severe diarrhea and abdominal pain. Bacterial infection from food and water. (DYSENTERY)
24. A marshy inlet or outlet. (BAYOU)
ACROSS

4. Southernmost mountain range in Tibet some of world's highest mountains
5. Peninsula in Eastern Highlands with good deposits of coal
8. Very large desert in western China

DOWN

1. Large plateau in southwestern China
2. Major city in Hsi Chiang River Delta
3. Desert in Xinjiang-Mongolian Uplands, very cold in winter

A Fulbright Seminars Abroad Project

Thomas G. Buckingham, Jr.

Lee County Schools
Ft. Meyers, Florida
Forward

To truly begin to understand a foreign culture it takes months of studying the available materials, contact with people from that culture (communication), and that rare opportunity of going to a distant land and experiencing firsthand. This is what the Fulbright-Hays Seminars Abroad Program is all about. Consequently, when I started planning my project I wanted to bring the spirit of the Fulbright-Hays to the classroom, to design a unit that could be used to bring China to the student and make the student begin to think about the culture not only as a place of importance and interest, but a place where s/he would want to learn about first-hand.

Going abroad is the theme of this project and the goal of this project. Indeed, when J. William Fulbright first envisioned the study abroad program, it was on the belief that a rich, well-insulated American culture had little first-hand experiences of other cultures. The intent was by exposing scholars and educators to these peoples and countries that they would in turn relate to a hundredfold (thousand-fold) as many students and colleagues back home. The 1994 edition of the program to China was no exception as a mind-expanding, culturally-enriching springboard for educators to relate to thousands of students this distant culture. However, I must contend that the 1994 edition was exceptional in two crucial ways. First, it showed us a China in rapid change charging into the "Pacific Century". (I don't know how many times I heard Dr. Canning relate how something had changed from his visit just a couple of years back—whether it was a new construction or a new social custom, or the loss of one.) We saw the everyday reality of what the facts and figures are saying; the most populous nation has the fastest growing economy and a people committed to becoming a great nation again. While we explored the themes of socialism vs. capitalism, party rule vs. local democratic autonomy, education, human rights, etc., the overriding reality was that China was a nation on the move. And if I may speak for the rest, there was an energy, an electricity to China that spoke louder than words and stats and snapshots. Second, the participants in the group from escorts to hosts to educator were themselves exceptional. The Committee outdid themselves by choosing a group who were not only geographically, philosophically, and experientially diverse, but whose diverse interests and strong leadership abilities resulted in new adventures and discoveries that enriched us all. Given these two exceptionalities, we were indeed "the right people at the right place at the right time". The issue is now what to do about it, and this is why I have made the theme of my project and the goal of my project "going to China".

北海公園 Beihai Park
"Going to China" was exciting and fascinating to us all. So why not others? It is my contention that we, being the purveyors of culture, have a two-fold mission. First, and most obvious, is the goal of multicultural education and awareness that we bestow upon all our students. But as important as it is for the general population to know and appreciate the changes in our world, it is just as critical to have qualified people who are players in our new world of cultural interaction. To that end, the student needs the most basic contacts: people, language, and travel. Going to China... Doctors, lawyers, businessmen, engineers—name a student of any profession that would not be enriched by a trip abroad, especially to China. This is an area of great economic opportunities and almost limitless potential. I am elated to guide my students toward this potential, and I believe you will share my enthusiasm for your students to discover the excitement and opportunities for themselves.

Let's go to China. How? People need good reasons, ample encouragement, proper preparation, and an opportunity. The first two you give them as a part of your course with them; opportunities abound in our rich nation (we can even create them ourselves); so all we need is some preparation. To this end, the obvious preparation for any trip is to know some language. (I believe there were times throughout our trip when we all wished we knew more than we did.) The project "Arriving in Beijing" is but a meager start at that goal. "Arriving in Beijing" was designed to initiate the student (and educator) to actually going to China. In effect, it's a pretend trip, a practice run of a new generation for a future destination which is our future. Practically, it's more appealing to the student to go there (or have a game about going there) than saying they are "studying about China". Impractical?... Perhaps, with less than one-tenth of one percent of American students studying abroad, it may seem a long shot. And with only 150 baccalaureate degrees awarded by American colleges last year in Chinese it may seem nearly impossible. Yet considering both the pragmatic outcomes of such an investment and that every Chinese college student can read English, it would be an embarrassment not to try.
DAO BEIJING 到 北京

With its new market economy and its age-old traditions, China is a fascinating place to visit. Especially so is Beijing, China's capital. The mix of friendly people, exotic foods, and ancient monuments makes this city a traveler's delight. While in Beijing, one must learn enough to function (get around, eat, shop, etc.), so this game has been fashioned to aid the first-time foreign visitor with his or her Beijing adventure.

THE GAME: This trivia game should be suitable for small or large groups, ages 8 and up. It involves three different levels concerning the same basic material: BU HUI ZHONGGUOHUA, HUI YIDIAN ZHONGGUOHUA, and HUI NIAN YIDIAN. Each level is played with the same basic objective, rules, and functions.

OBJECTIVE: BY CORRECTLY ANSWERING QUESTIONS ABOUT BEIJING, THE PLAYER WILL COLLECT THE FIVE CHARACTERS NEEDED TO ENJOY HIS OR HER STAY IN BEIJING. (The five characters are "kan"—"see", "shuo"—"speak", "mai"—"buy", "chi"—"eat", "zou"—"go").

1看 2说 3买 4吃 5走

PLAY: Games can vary and be adapted to groups of differing size, age, and ability.

BASIC GAME: Players roll a die to determine category (as listed above). For example, a roll of 5 would be the "zou" category, a roll of 3 would be a "mai" category (6 can be made players choice or opponents choice—depending on how hard you want to make it). His opponents would then select the top card (question) from the "zou" stack and quiz him. Questions and responses are on the cards. Upon getting a correct response, he is given the card and proceeds to roll again. Player continues until he has missed the question.

Winner: When player has collected a card from all five categories he has completed the game; players can continue until everyone finishes his stay in Beijing. Thus, everyone can be a winner, but skill at the language and culture of the city make your touring smooth and enjoyable.

Group Game: Same as the basic game but with small groups as teams. Good team names might be colors, such as "Hong"—red, "Hei"—black, "Huang"—yellow, and "Lan"—blue. Scoring in this game is by presenting the won cards to the team captain or "guide".

红 黑 黄 蓝
DAO BEIJING 到北京

Variations: The game can be altered significantly by concentrating on one category (For example, eating. Many a tourist has eaten his way through Beijing!) or by varying the scoring methods. One scoring variation would simply be collecting an amount of cards to win (say 10) or by designating specific goals for your stay: 3 "mai", 2 "chi", etc. Other variations can be made through the different levels of presenting the questions.

不会中国话 BU HUI ZHONG GUOHUA (beginner) This is for first time speakers. It requires some introductory lessons in spoken Chinese. This version asks the questions in English about Chinese or in simple Chinese. (For example, what does "san kuai" mean?) Answers would be in English (3 dollars).

会说一点中国话 HUI YIDIAN ZHONG GUOHUA (intermediate) On the same card as "san kuai" would be the expression "3 dollars". Given the expression "3 dollars" this level student would be expected to respond with the proper Chinese "san kuai" or "san yuan".

会念一点 HUI NIAN YIDIAN (advanced) At this level, the player would be expected to read the characters off the front of the card in Chinese.

我要买东西

Combination: Students could be quizzed by characters and then a verbal response and then be expected to answer back the missing translation or appropriate Chinese. Scoring would be on points with 3 for written, 2 for English to Chinese, and 1 for Chinese to English. (For example, if they could not read as characters" 我要买东西 "they could choose to hear the Chinese "wo yao mai dongxi" for 1 point, or get the translation "I want to buy something" and give the Chinese response for 2 points.

Haowan!!!
Different modes and skill levels make this a repeat performance game directed at language and cultural exposure leading to mastery of some basic Chinese. So have fun! And let your students play it again and again until they have gone beyond the recognition stage to language use and even reading Chinese characters!

好玩！

我希望你们会说一点中国话。
DAO BEIJING 到北京: Implementation

The Game consists of flashcards arranged around specific topics, yet the topics and game cannot exist outside the teaching of the culture. As the language and culture are intertwined, so too the study of the language must have a cultural base. This can be accomplished by making this a part of a greater unit (first introducing different aspects of culture and history then spiraling to the game material) or by building the cultural unit around the topics of the game itself. Suggested level: Grade 4 to 8.

Appendage Approach: As an added unit to the study of Chinese culture, this game can be used effectively in introducing some language elements. Limiting the cards to one area (such as shuo) will give the class focus and make it easier for the teacher. The kan cards would be good for reviewing history through the many landmarks. The Sights With Stories In Old Beijing would prove a great addition to this lesson.

Using the cards: If you wait to use the cards as a game, they probably will do little good because the unfamiliarity of them will frustrate the student. Instead, try the shotgun approach by spreading the cards around the room and having students introduce their language facts. Another variation would be asking questions about the cards and then giving the student with the info to become the "expert" by answering.

Unit Approach: If using as a basis for a language unit or in coordination with a language text, similar approaches can be employed. Giving the famous places in Beijing, Beijing, China, etc. as research topics would give each a background to the use and alleviate some of the apprehension.

Cultural themes should dominate the presentation and permeate the unit. Suggested thematic approaches are as follows:

kan --- What do you see when you go to Beijing?
Answers will vary, but bicycles and Tiananmen will probably come up. While hitting the monuments and history is important (and could be covered with research projects, etc.), probably the most dominating feature of the Beijing landscape is people. There are several important points to remember about the people of Beijing: 1) There are so many, with over 12 million in the city and thousands more pouring in from the countryside daily to sell goods and find work.
2) They are very hospitable to foreigners, often going out of their way to make one feel at home. 3) They love to stop and speak English.
4) They are very proud of their culture and their city.
5) They are constantly building --- construction cranes dominate the skyline.

shuo --- What do you say in Beijing? Chinese people are very aware of the difficulties foreigners have with their language. They go out of their way to help the neophyte speaker and don't get offended at mispronunciations. Just saying a "ni hao" or "xiexie" will get you a big smile and some extra consideration.

mai-- Beijing is a shopper's paradise--- especially if you like to bargain. To do so, you need to know something about the numbers and money and strategies.
1) Numbers --- as seen on the sentence page, the numbers follow a straightforward pattern with standard place values. For example, if you want to say 367, you say 3 hundred (san bai) 6 tens (liu shi) and 7 (qi).
2) Money -- Chinese money, or Renminbi, is easy to decipher since it contains both Indo-Arabic numerals and Pinyin. However, the Chinese seem to have a spoken and written word for both dollars (yuan or kuai) and dimes (jiao or mao). 3.67 would be san yuan liu jiao qi fen or san kuai liu mao qi (fen). Saying the dimes and cents terms are optional as long as they are in order. 34.50 being sanshi (3 tens) si kuai wu.
3) Negotiations--- In the street markets, never take the first price. Going to one-third, even one-tenth of the asking price is not insulting. If in doubt, step back and watch a native.

chi--- Nothing beats eating in Beijing! Escaping from the foreign hotels, you will find food to fit your palate as well as you pocketbook. The trouble is ordering. Make sure to know the words for beef, pork, chicken, and fish. Asking for these may steer you away from other more exotic foods not typically enjoyed by Westerners. Unlike the other street vendors, though; it is customary to pay what they ask.

zou-- Getting around in Beijing is easy. There are subways, streetcars, buses, taxis, pedicabs, rental cars, bicycles, horsecarts... you name it. The streets are wide and the traffic is heavy with an unending variety of vehicle.
Suggested Resources*:

These have been suggested with the inexperienced Chinese learner (instructor) in mind. A native speaker is always the best teacher; however, they often need structure and methodology. The following would give structure and or follow-through to the learning process.

Primary Language Texts

**Basic Chinese Vocabulary, Hu and Lee** (Passport Books 1993, Lincolnwood, IL)
Level: Teacher and adult learners
A topically arranged vocabulary builder, it has a good-sized dictionary arranged in English and Pinyin Chinese with characters (simplified). An excellent reference, it is made user-friendly by cross-referencing the dictionary with the topic section.

**Chinese In Ten Minutes A Day, Workbook with stickers and cut-out flashcards.** Kristene Kershul with Wang Yin Zhen. (Lane Publishing Co., Menlo Park, CA, 1988)
Level: Grades 4-adult.
A great do-it-yourself book with a functional approach, this book is recommended despite its obvious errors in the language because beginners get an additional pronunciation guide along with the problematic (for English speakers) Pinyin. The bright, cheerful layout is appealing to elementary levels as well as to adults. A new edition has come out that cleans up many of its Pinyin errors, yet it desperately needs a cassette tape and a better attempt at a Pinyin pronunciation guide.

**Communicating In Chinese, Teacher’s Manual, Student Text For Pinyin, Reading and Writing Book, and Cassettes.** Cynthia Ning. (Far Eastern Publications 1994, Yale University). Level: Grades 6-college.
This definitive new beginning Chinese series should become an inspiration to foreign language teachers for the next generation. "(A)n interactive approach to beginning Chinese", this series does more than follow the ACTFL (American Council of Teachers of Foreign Language) guidelines of a functional-notional approach to language learning, it brings state-of-the-art language learning to the student by doing everything but taking them to China. It includes signs, local terms, photos of China and Taiwan, an all Pinyin speaking text, both simplified and traditional characters ---all organized around the theme of visiting and communicating in China. The beginning level is now available and an intermediate level is being published this year (1995).

**Easy Chinese Phrasebook & Dictionary, Wendy Tung** (Passport Books 1993, Lincolnwood, IL) Level: Grades 8-adult
Definitely a misnomer, but nonetheless an almost adequate (Its fatal flaw is that it doesn't cross reference all terms in the dictionary section) first dictionary that does better as a practical, functional phrasebook. This was a great travel companion in China because it does script so many of those traveling situations. You must know Pinyin to use!
A nifty little phrasebook that fits the pocket (4"x6") as well as pocketbook ($4.95). Several 1994 Fulbrighters reported success using its no-nonsense pronunciation system, and its functional organization makes it easy to find the right phrase.

This is the definitive small Chinese dictionary that everyone studying Chinese should have. Easily usable in both languages, it lists both simplified and traditional characters.

Primary Language Audio-Visual

Chinese Situational Dialogues, 10 one-hour VHS tapes with text.
Chen Ru and Pan Zhaoming (1991 Beijing University Press)
Level: Grades 6-adult (beginning through advanced level speakers)
These videos show Beijing University students speaking in context. It is incredibly thorough and complete, usable for the beginner as well as the more advanced student. Accompanying text is equally as thorough.

Speak, Read, and Think Essential Mandarin Chinese (SVBervision Systems).
15 one-hour audio cassettes with text.
(Heinle & Heinle Enterprises, Inc., Concord, MA.) Level: Individualized learning for ages 8 up.
These cassettes feature native speakers in a functional structure in a very well-devised progression. The only drawbacks to this Pimsleur System adaptation are the price (over $200) and the study guide (which contains most of the Pinyin, simplified characters, and traditional characters, yet seems uncoordinated with the verbal text).

Secondary Sources

An invaluable assortment of history, description, and stories arranged according to the historical relics of Beijing. This is a must to use with the Dao Beijing cards.
**Lady in the Picture, Chinese Folklore** (Chinese Literature Press, 1993, Beijing)
Level: Grades 4 & up.
This is a marvelous collection of Chinese folktales with recent translations from China. Names are in Pinyin.

**The Chinese Word For Horse, Animated Videotape and Book**
Level: Grade 1 & up.
This delightful film shows the Chinese characters coming to life in an action drama. Its brevity (14 minutes) makes it perfect for elementary, yet even hard-to-please American high school students find it enjoyable and productive.

**Iron & Silk, Semi-Documentary Feature Film** (Shirley Sun Productions)
Level: Grades 6 & up.
This movie is a semi-autobiographical account based on the book by Mark Salzman and starring the author in the main role. A delightful educational tool, it depicts the problems and rewards a student finds in China while teaching English and learning martial arts. Dialogues are both in English and Chinese (with subtitles). Great for culture, language and current history, this film is a great motivator for Chinese studies, going to China, and studying in general.

**A Great Wall, Made For PBS Educational Feature Film** (Shirley Sun Productions)
Level: high school & up
A lighthearted look at the cultural differences of two families--- one in Beijing and the other in California. When the Chinese -Americans go for a month long visit to the sister's family in Beijing, all find out just how different-- and alike-- life is for them in their respective cultures.
到北京：PINYIN PRONUNCIATION GUIDE

A guide to Pinyin

Make no mistake. Chinese are adamant about their written language, and their written language is the ages-old non-phonetic characters known as much for their beauty as their difficulty. Pinyin is merely a pronunciation guide for foreigners and children to learn to say the language. While Pinyin is the romanized pronunciation system used by the People's Republic of China (and is quite common in Beijing on street signs and landmarks), it nevertheless poses problems for the native English speaker. Thus, most Chinese language books and dictionaries produce a short guide to the "guide". The first problem is that many of the vowel and consonant sounds are unfamiliar as they are written (for example, the "ao" sound in Pinyin is "ow" in English). This is due partly because of the many differences in the sounds produced by the two languages and also by the fact that Pinyin was developed as a way to teach Russians Chinese. The second problem is the tonal structure of the language: even if you get the letters right, four different ways (or inflections) of saying the word are possible. On the following page are the letter sounds that are unlike English. By using the chart and the accompanying cassette, you can practice the sounds of Chinese. Below is a short lesson on Chinese tones as they sound individually. The problem then is to try to make the tones as they are given in real conversation. That's the purpose of the sentence page. Of course, it takes years of study to really speak the language well, yet a little time spent can allow one to sound good for these limited words and phrases. And that would be a great start for any student.

**Tonality:** Chinese is pronounced with inflections or tones which distinguish words from one another. This is necessary, for so many words sound alike. There are four tones with accompanying tonal marks which are placed above the vowel. Each tone is numbered 1-4. When there is no marking, it is said to be "neutral", or without tone.

1 2 3 4

Now listen to the tape as the native speaker pronounces the following words. Repeat this often so that you will be able to distinguish the tones.

1老师 2历史 3 历史 4是
teacher ten history to be

*Notice each tone designates a different character and meaning.*

**Letter Pronunciation:** Letters not listed in the following chart (like b, d, f, g, h, m, n, etc.) are pronounced like English letters (or extremely close). So don't worry about what you don't see. Chinese sounds: Many of the sounds in the chart are familiar but are spelled differently than you would normally expect (for example, ou for the long o sound, or the q for the ch sound). Others, however, are just different. z and c are very distinct and need to be practiced with the native speaker.

The exceptions: As in English, there are punctuation exceptions. The most notable are the e and i combinations with certain consonants. zi, ci, si have an uh sound and not the usual ee. The zi is given on the tape. Also ye sounds like yeah and not the expected yuh.
Listen to the accompanying tape and practice the tones. Afterwards, practice the following sounds so that you may have correct pronunciations.

Dao Beijing: The Flashcards

The following 12 pages are the ingredients of the flashcards.

First copy each page.

Then copy the back sides of the cards with one of the last two pages (cranes or characters---these are the "backs" of the cards.)

Next laminate.

Cut-out the cards and you're done.

Fulbright - Hayes
Seminar Abroad Program 1994

BEST COPY AVAILABLE
"Letters to the Past"

During the 1994 Fulbright-Hayes Seminar Abroad Program we saw, visited and experienced many amazing things throughout the People's Republic of China. This is an experience that will never be forgotten. My unit is designed to assist 6th-12th grade teachers on numerous topics that involve traditional and modern China. If you have any questions, comments or would like copies of future curriculum written of China just write or call.

While traveling through China I was reading *The Travels of Marco Polo*, attempting to imagine what he experienced in China so long ago. These activities are designed as letter written back in time to Marco Polo. The letters are designed to be used individually or as an entire unit. I base my cultural units on the 12 cultural characteristics; food, clothing, transportation, communication, arts, government, religion, economy, education, family, recreation and shelter. There is one letter and an activity for each of the 12 characteristics. In the second part of the unit are historical and geographic letters describing some interesting historical events, issues or places.
DR. LYMAN VAN SLYKES 10 TALKING POINTS

1. Expect contradiction and complexity.

2. China is a big country.
   - 1.2 Billion people
   - Compared to 237 million in the United States.
   - Many Chinese provinces are larger than entire European nations.
   - Rural to urban migration, 70-85 million people.

3. China is more than China.
   - "Greater China"
   - There are 30 million Chinese outside of China.
   - The Chinese Diaspora.

4. China is less than China.
   - Coastal areas are growing fast while the western rural areas are losing capital.

5. The three over's and the one connection.
   - Group over the individual.
   - Age over youth.
   - Male over female.
   - Quan xie.
6. The central government is weak.
   - No well developed organizations (i.e., Church)
   - "Law is the handmaiden of the State control, not a shield of individual rights."
   - The three lacks:
     1. No single powerful charismatic leader.
     2. The unifying ideology of communism is not as powerful in China today.
     3. The government lacks the ability to gain information and enforce laws.

7. Economic collidascopes.
   - On the eastern coast making money is the obsession, "Jumping into the Sea."
   - Rural industrialization and diversity.
   - Tremendous growth.

8. Will China become freer with economic growth?

9. Hong Kong and Taiwan have a great influence on China.
10. China is under great environmental stress.

- Population stress on environment.
- Rapid economic progress without concern for the environment.
- Use of coal, which is very soft with a high sulfur content.
- Water supply is down.
- Three Gorges Dam on the Yangtze River.
Dear Marco:

As you may remember from your journey across China it is a vast area with many interesting and different climates, topographical features and cultural groups. China has 9.6 million square kilometers. This is 1/5 of the entire world. From north to south you would travel 4,500 km. From east to west you would travel 5,200 km. In the west you find desert and in the east you find green agricultural land. There are five common geographical features in China:

1. Mountains
2. Plateaus
3. Plains
4. Basins
5. Deserts

China is covered with mountains. Thirty-three percent of all of China is covered with mountains. From your journal Marco, I see that you traveled over many of these mountains to get to Peking (Beijing). In China you find many mountain ranges such as the Himalaya’s, the Tiansha and the Hengduan. Each range is different and challenging in their own way.

China has four major plateaus:

1. The Qing-Zang Plateau is very large, it covers over 1/4 of China and is over 4,000 meters above sea level. The Qing-Zang Plateau is over 60 million years old and had been the Himalaya Sea before it became a plateau. The major rivers of China originate from this area. The Yangtze and the Yellow Rivers being the largest. The Tibetan people live in this region.

2. The Inner Mongolian Plateau is covered with grass and is home to the Mongolian people. This plateau is famous for the small horses that roam and are used by the Mongolians for hundreds of years.

3. The Yunguhi Plateau is the most beautiful and the most dangerous. This plateau has constant climatic change with no flat land. Most of the poor of China live in this region. China’s famous Yellow Flute Tree Waterfall, the largest in China, is located in this region.

4. The final major plateau is the Loose Plateau, which is the birthplace of the Han Chinese. The Han are the largest ethnic group in China today.

There are also four major basins in China:

1. The Sichuan Basin is known as the land of plenty because of the ability to grow crops in this area fairly easily. Over 100 million people live in this
region. The Dujiangyan Water Reservoir is used to prevent floods and to irrigate the farm lands. This reservoir is over 3,000 years old.

2. The Qaidam Basin is famous for the salt that is produced. In this basin you find a huge salt lake. Salt production is so big in this region that you could supply the world with salt for over 1,000 years!!!! In this basin the people have used salt to build roads and houses. There are over 42 billion tons of salt in the Qaidam Basin.

3. The Junggai Basin is covered with forests and agricultural land.

4. The final major basin is the Taruim Basin, known as the fireplace of China. It has the Gobi desert. The Taruim Basin is also famous for the recent oil finds which will help China in its drive toward modernization.

The desert regions are very large and dangerous. The Taklamagan or Gobi Desert is the largest and one of the most famous in the entire world. The Gobi is constantly expanding. The Gobi has swallowed Luobup Lake and many cities that were along the Silk Road. The Shapotou Desert is another expanding desert. Here the people have been somewhat successful in stopping the sand. Using grass planted as a checker board the people have been successful in stopping the expansion of sand further inland.

China’s climate is very unique throughout the country. The temperature ranges from 4 degrees - 53 degrees C. In the northern parts of China snow is common for half the year. While the southern parts of China are green all four seasons. If you travel from west to the east you will feel a definite difference in moisture. The west is a desert and the east is a rainy, monsoon climate.

China is a nation of rivers, with over 880. Let’s talk about the four most important and famous:

1. The Yangtze River is 6,300km long covering ten provinces traveling from the west to the east. It was and is used for shipping throughout China. One of the most beautiful and famous parts of the Yangtze is the Three Gorges section. This part of the river is very steep, soon it will have a very large dam built to stop flooding and provide hydroelectric power to China. This dam project will supply the energy of ten nuclear power plants. When the dam is complete it will cover many of China’s great archeological sites. We can only imagine the possible ecological and environmental damages this dam may cause.

2. The Yellow River is where the “cradle of Chinese nationality” was formed. It is made yellow from the sands and soil that are moved in the river. The river is almost impossible to control, it flows quickly and all along the river there are walls that make the river flow even faster. This causes greater erosion
and flooding.

3. The Pearl River is a river full of tributaries that support the agricultural areas of China. The Pearl River flows to Hong Kong and Guangzhou.

4. Finally, the Grand Canal, a man made canal that was built in 486 B.C. It is the longest and oldest canal in China. It was used to transport soldiers, food and grain. The Grand Canal is 1,794km long traveling 6 provinces and many cities, linking five water systems.

There are three major plains in China. The Northeast Plain is a good rice producing region. The North China Plain is where Beijing is located. And finally the Pearl River Plain is where a number of major cities are located. The plains are the most populated regions of China.

So as you can see, China is a large and diverse country filled with many different people in many different regions. It is truly amazing that any government can keep this diverse country under its control.

Sincerely,

Your Friend from the Future.
GEOGRAPHY WORKSHEET

Locate and label the following bodies of water:

- Yangtze River
- Yellow River
- Philippine Sea
- Pearl River
- Pacific Ocean
- Yellow Sea
- Sea of Japan
- South China Sea

Locate and label the following countries:

- China
- Mongolia
- Vietnam
- Japan
- Former Soviet Union
- Cambodia
- North Korea

- Harbin

LOCATE AND DRAW, THE GREAT WALL AND THE GRAND CANAL
Dear Marco:

When you were in China the population issues that are present today never existed. In the 20th Century China population growth and issues are a part of every decision made by the government and the people. China has 22% of the entire world’s population. In 1993, China had a population of 1.2 billion people with 15-18 million added each year. My own country, the United States, has 271 million.

Marco, historically China has had a population changes filled with peaks and valleys. As the dynasties changed the population would go down due to wars, starvation and other related issues. During the dynasty itself there would be a population increase. Historical events have played very important roles in this cyclical population cycles. For example:

1. Peak population growth occurred from 1952-1957.
2. A valley occurred from 1958-1961, (1960 was the lowest point) during the Great Leap Forward, starvation occurred because of poor political decisions of Chairman Mao Tse Tung.
3. Another peak population growth occurred from 1962-1972, because of the end of the Great Leap Forward.
4. Another valley occurred from 1973- Today because of family planning polices as a result of the one couple, one child policy.

The one couple, one child is a controversial policy throughout the world today Marco but, it is necessary for China and the rest of the world to curb population growth in order to assure food and resources for the future. There are two exceptions to this policy:

1. Minority groups (Non-Han Chinese) are allowed three children.
2. Rural families are allowed two children.

This policy will have a great effect on the future demographic trends in the very near future. These only children are called “Little Meatballs” or “Little Emperors” because they are often spoiled by their parents. This could have a tremendous effect on the future of China. The new middle class is also being increased as a result of the newly found disposable income of parents with only one child. These issues will change China forever!

The demographics of China effects all aspects of China’s government, environment, society and culture. A group of Baby Boomers were born during the last population growth in 1962-1973. Today in China 40% of
the population is below the age of 25 and 25% of China's population is below 15. This sets China up for a huge social revolution which could lead to a political and economic change never seen in any country before. Similar to the changes that occurred in my country, the US, in the 1960's and 1970's. America during this historical time period changed in ways that were unimaginable just a few years before. China is destined to change in ways that cannot be predicted.

China has a very unique distribution of their population between the urban centers and rural areas. Today, 3/4 of the people of China live in rural areas, while 1/4 live in urban areas. The goal of the Chinese government is to have 2/3 of the population in rural areas and the other 1/3 in urban areas. This will be very difficult to accomplish due to the desire of most Chinese to gain economic prosperity.

The demographic situation of China is changing due to the great migration of rural Chinese to urban areas. It is estimated that 100 million people are on the move. This is causing huge problems for the cities and the national government. In the United States in the 1920's there was a Great Migration of African Americans from the rural south to the urban north that changed my country forever.

Marco, whenever any decision is made in China population must be discussed. At every lecture and in every city I saw the effects of population on the people. I spent many hours in traffic jams and saw the migrants at the train station in Beijing. You would be amazed by the sheer number of Chinese throughout the world. We call this "Greater China." The Chinese culture can be found in almost any medium or large city in the world.

Talk to you soon,

Your Friend From the Future.
Beijing to Impose Huge Fees To Limit Migrants in the City

By PATRICK E. TYLER
Special to The New York Times

BEIJING, Sept. 14 — Reacting to a flood of workers moving into the capital, Beijing's municipal authorities have announced that they would begin imposing fees of up to $11,600 for the privilege of living in Beijing.

People from outside Beijing must pay for the right to live permanently in this capital of China from Nov. 1," the official New China News Agency said on Monday.

The fee structure would charge companies doing business in Beijing the equivalent of $11,600 for each worker hired to live in the city. "Or they may ask their employees to pay for themselves," the news agency said, adding that the payment for individuals would be $5,800, half the corporate rate but more than 10 times the annual income for the average Chinese.

The chief of the city's finance bureau, Sun Jiaqi, was quoted as saying the regulations were aimed at controlling the fast-rising migrant population, which has been blamed for a soaring crime rate and evasions of China's one-child family planning law.

The announcement caught the city's 11 million residents by surprise and seemed to raise a host of questions about enforcement and who might be exempted.

Many of the city's new flood of workers are engaged in the construction trades that are building highways, subway lines and office towers and hotels.

"This is back-breaking work," a Chinese white-collar worker said. "Beijingers are simply not willing to do many of those jobs, so who are they going to get to replace them?"

The New China News Agency report said the regulations had been approved by a session of the Beijing People's Congress, which ended on Monday. The proceeds from the new resident tax, should it actually materialize, "will be used to upgrade the city's public facilities."

But there was little in the initial reports to explain how the city government would enforce the regulations. The city's Communist Party elders left themselves plenty of maneuvering room to grant exemptions, since most of the construction work in the city is in the hands of government construction companies.

"The municipal government will work out rules to reduce or exempt the payment in line with relevant policies and circumstances," the report said.

It seemed possible that the announcement was intended as a warning to slow the influx of workers. In addition, city officials could be seeking to put pressure on local employers to look to the local labor market before importing cheaper labor from the countryside.
New York Times - Beijing To Impose Huge Fees To Limit Migrants In The City

1. Who wrote this article?
2. Why is the Beijing municipal authority fining the migrant workers?
3. How much is the fine?
4. When does the fine go into effect?
5. Who pays the fine?
6. What is the fee for individuals?
7. According to Sun Jiaqi what are two effects of this migration to the city?
8. Who does most of the construction work in Beijing?
9. For what will the money from the fines on migrants be used?
10. Will this stop the flow of migrants into Beijing? Why or Why not?
11. What would you do to help stop the flow of migrants into Beijing? (Give three possible solutions)
The Dragon Within

The flood of migrants to the cities is threatening China's system.

By Lena H. Sun

BEIJING A swelling underclass of low-wage workers and hordes of out-of-work peasants is growing so rapidly that China's leaders are struggling to prevent the resulting social disintegration from reversing the economic gains that have been achieved in the last 15 years. The flood of peasants moving to the cities in search of work has given China the largest urban influx in the world in modern times.

China's leaders fear a repeat of the chaos that engulfed the country at the end of the 19th century, when the Qing dynasty broke down, the country collapsed into civil war and a half-century of foreign domination. The economy, while slowing somewhat, is still growing at 9% a year. But the government has never faced such a wave of migrants, and it has never had to deal with such a complex set of issues.

The government has tried to control the influx by building new cities and industrial parks, and by providing housing and jobs. But the problem is getting bigger and bigger. The government has also tried to stop the flow of migrants by tightening restrictions on labor recruitment and immigration. But these efforts have not been very effective.

China's leaders are now facing a new dilemma. They want to keep the economy growing, but they also want to keep social stability. They are trying to balance these two goals, but they are having a hard time.

An equally volatile challenge confronting the government is the massive influx of rural Chinese to the cities—as many as 10 million by one estimate. Known colloquially as the "floating population," this migration is threatening the balance of China. Fifteen years ago, 80% of China's population lived off the land, and the rest didn't.

What has given rise to this huge army of migrant laborers is the disintegration of the Chinese society. A market system has developed, and many people are leaving the farms and going to the cities to find work. But the government has not been able to keep up with the demand for labor, and the result is a huge labor shortage. The government is trying to control the flow of migrants, but it is not succeeding.

Another challenge facing the government is the growing social unrest. The government has been trying to control the civil unrest, but it has not been successful. The government has also tried to control the influence of the communists, but it has not been successful.

But other Chinese and Western analysts doubt much could or something could be turned to be right. For the moment, China's rulers are banking on a combination of forces to hold the country together: the weight of the Communist Party bureaucracy, the influence of the Chinese bureaucracy, and the influence of the international community.

On the surface, China is a picture of prosperity and relative stability. Ordinary Chinese people are enjoying rising incomes and a higher standard of living than ever before. But there are also signs of unrest, and the government is trying to control it.

In Beijing, the capital, there is a great deal of activity. The government is trying to control the flow of migrants, but it is not succeeding. The government is also trying to control the influence of the communists, but it is not succeeding.

The government is trying to control the influence of the communists, but it is not succeeding. The government is also trying to control the influence of the international community.

CRITICAL THINKING

24. What do you predict will happen in China's future? Why?
The Makings of a Feeding Frenzy
China's population boom could mean worldwide hunger

By Lester Brown

Suddenly, China is losing the capacity to feed itself. What happens, the food supply of the whole world will be affected, causing the shadow of global scarcity on human history. The first time, China's population is growing by 14 million a year. Incomes are also climbing at a record rate, which means that the consumption of meat is increasing even faster than the population—placing ever greater demand all along the food chain.

When China's economic reforms were launched in 1978, only 7 percent of the grain was being used for animal feed. By 1990, that share had risen to some 20 percent, most of it to produce pork and poultry. Now, demand for beef and poultry is also climbing. More meat means more grain—two kilograma of additional grain for each kilogram of poultry, four for pork and seven for each kilogram of beef added to the feed. If the supply of grain does not expand with Chinese appetites, food prices will soar. Indeed, but the government stepped in to avoid panic buying by releasing reserves, grain prices in China's 35 major cities shot up by 41 percent during the first two months of this year.

At the same time as this demand is increasing, China's capacity to produce food is shrinking due to the massive conversion of crop land to nonfarm use.

In neighboring Japan, 77 percent of the grain consumed is imported—the result of prosperity and the heavy loss of crop land to industrial development since mid-century. Even the emperor now eats California rice. Similarly, South Korea imported 94 percent of its rice in 1961, but by 1984, that share had risen to some 20 percent. In those countries, half of the grain was being used for animal feed: By 1990, the share had risen to some 20 percent. Most of it to produce rice. In China, while the share had risen to some 20 percent, most of it to produce rice.
WASHINGTON POST WEEKLY- "THE MAKINGS OF A FEEDING FRENZY: CHINA'S POPULATION BOOM COULD MEAN WORLD WIDE HUNGER"

1. Who wrote this article?

2. What is the author's concern?

3. According to the author what is China's population growing by each year?

4. Why does a greater income for the people of China cause a problem for the world food supply?

5. What is the effect of the increased use of grain for animal feed?

6. How will China overwhelm the world grain markets?

7. Why didn't Japan's conversion to world grain markets cause a problem for the world food supply?

8. Why can't China just grow more food?

9. What five environmental trends will shape food production in China?

10. What the two major causes of soil erosion in China?

11. How much land in China is being effected by waterlogging and salting?

12. What causes salting?
13. What is the largest cause of air pollution and acid rain in China?

14. How would global warming effect China's grain crops?

15. How much is China's grain production going to fall from 1990-2030?

16. What will this decline in grain production do to China?

17. What does Professor Zhou Guangzao have to say about China industrialization?

18. Could any country in the world supply China with the necessary grain? Why or Why not?

19. Name four other countries or regions that will have food supply problems by 2030.

20. What is the bottom line about China's food supply, according to the author?

CRITICAL THINKING

21. Make a list of seven things that could be done to improve China's food supply problems.
Cost didn't matter in developing industry. Now the bill is coming due.

Farmland is vanishing so fast in China that the Government is worried about food shortages. In Gincun, a village in booming Guangdong Province, the pastoral quiet has been shattered by a new superhighway.

Farmland is vanishing so fast in China that the Government is worried about food shortages. In Gincun, a village in booming Guangdong Province, the pastoral quiet has been shattered by a new superhighway.

1. Who wrote this article?

2. What has this $1 billion dollar highway done to the farming village of Gincun?

3. What is Mr. Qin and the Chinese government's greatest concern about the loss of farm land?

4. What percent of the world's population is Chinese?

5. What percent of the world's arable (farm) land is in China?

6. What is the total farmland available in China?

7. What does Zhan Guigui say is the first priority of the Chinese government?

8. What was Guangzhou known as in colonial times?

9. Why do the farmers want to keep the farm land?

10. Why do the real-estate developers want the land?

11. What does Miss Xiao think about the new highway?
12. What is happening to Mr. Qin and his family as the cost of rent for his plot of land goes up?

Critical Thinking

13. If you were a farmer in Gincun how would you feel about the new highway? Why?

14. If you were a real-estate developer how would you feel about the new highway? Why?
Dear Marco:

Today's letter is going to discuss communication in China. I'll talk about the many different languages found in China as well as the invention of paper by Ts'ai Lun and the role of television in China today.

First the languages found in China. Many people in the United States think that everyone in China speaks the same language. There are 56 different nationalities and ethnic groups in China and nine language groups. These language groups often do not understand each other. This makes it very difficult to hold all of China together. The lack of a common language is one of the Chinese government's most difficult problems.

The nine languages are:
1. Mandarin Chinese- This is the official language of the Chinese government. It is the language spoken by China's largest ethnic group, the Han.
2. Tibetan- Tibet is an autonomous region of China with their own separate culture, language and beliefs. The Communist government of China and the people of Tibet do not agree on who should rule this region.
3. Turkic- The Turkic language is closely related to the languages of the Middle East. It is commonly spoken along the western edges of China.
4. Mongolian- Inside of the modern Chinese borders is the province of Inner Mongolia, a region inhabited by the ancestors of Genghis Kahn. The Mongols are a nomadic group that lives on a large plateau raising cattle.
5. Cantonese- In the southern part of the People's Republic of China, near the border with Hong Kong, the people speak Cantonese. This language is becoming the language of business in China.
6. Shanghainese- This language group is unique to the region around the city of Shanghai.
7. Korean- This is the language of the people of Korean decent that live in the People's Republic of China on the border with North Korea.
8. Fukienese- Fukienese is another language found on the eastern coast near Taiwan.
9. **Hakka**. Hakka is a language found in the southern part of Jiangxi Province. 

Marco as you can tell the language groupings are very complex and varied. This is very different from people's common idea of China being one large monolith.

Marco did you know that the Chinese were the people who invented modern paper! Ts'ai Lun was an official at the Chinese imperial court in 105 A.D. He gave Emperor Ho Ti samples of paper. This invention was to spread throughout China and finally the world. The Arabs took paper to Europe where it was to be commonly used by the 12th Century A.D. Paper is so important today that we must remember the contribution of Ts'ai Lun.

Marco one of the modern inventions that you never knew in the 11th Century A.D. was the television or TV. It was invented in my country, the United States in the 20th Century. A television produces sound and images of people, places and things that look real and move as they actually do in real life but inside of a box. It has had a tremendous influence on the world. People watch TV to learn about China and all the other countries of the world. Exploration can be done in your home.

In China the television is effecting the traditional Chinese culture and the Communist government's power over the people of China. In 1975 the Chinese people owned fewer than 1 million TV's. Each television was licenced and registered with the government. By 1993 there were over 263 million TV's with no ability to enforce the registration of televisions. The televisions with the help of satellite dishes pick up western TV shows, such as, soap operas, sports, advertising and other signs of capitalism.

From Hong Kong, Star TV is broadcasting music videos into the People's Republic of China. This has had begun to change the attitudes of China's youth, away from tradition and toward modernization. China is changing quickly to become part of the world community. The ideas of the group over the individual, age over youth and male over female are beginning to decay. China is changing and the Communist government and the rest of the world do not even fully understand what this change could bring to People's Republic of China and the world.

Well farewell and I look forward to writing my next "Letter to the Past."

Sincerely,
Ideas & Trends

A Repressed World Says, 'Beam Me Up'

By PHILIP SHENON

The skyline of Guangzhou, one of China's free-market boomtowns, is covered with a forest of satellite dishes that allow television viewers to enjoy the antics of Barrack and Oprah Winfrey, NFL football and Australian cricket. The scene is a striking contrast to the uncensored local television fare that flows from across the border to hubble. And while almost every one of those satellite dishes is illegal under an 11-month-old decree, the government seems unwilling to force the owners to take them down. Wang Lili, a shopkeeper, said that while his 15-year-old son does not understand a word of English, he still loves the American cartoons he showed China by Star TV, a pay-tv service. "Maybe the people would protest very loudly if the government took them down," Mr. Wang said. "Everybody loves television these days."

Hard to Stop

The China and almost everywhere else in the world, where freedom is not a given, authoritarian governments are coming to realize that their worst fears about the information revolution are being realized. First marched, video recorders marched, then telephone modems marched to the censorship walls. And now television satellite dish technology is threatening to bring the walls down. Governments are finding it nearly impossible to stop people from grabbing their freedoms - and more freedoms, more news, and more information - from the skies.

Not that they aren't trying. In March, South Arabia banned satellite dishes as "un-Islamic," ordering more than 100,000 dishes in one city to be removed, and a disposal company is now removing the dishes. Foreigners were allowed to continue to receive satellite transmissions in their homes and offices, but the dishes were banned from all hotels with less than a two-star quality rating, the only hotels that most Chinese can afford.

Star TV's figures suggest that Chinese viewership may actually have increased since the crackdown. An independent audit of satellite television by firms among Hong Kong advertisers using scanners last summer showed that the number of homes with television satellite systemshas increased at least one TV channel in Guangzhou rose from 136 percent to 24 percent, while in Beijing it rose from 8 percent to 13 percent.

Mr. Murdoch's other relationship with the Chinese leadership doubled for the fear he decided earlier this year to drop the BBC World Service news from the Star lineup beamed to China.

The Chinese Government has decided, and it doesn't know why, that this really can't shut down satellite television entirely, whatever the threats," said a Western diplomat in Beijing. "We're not talking about a few dissident dishes, the real problem is that it's being programmed outside China."

From China to Iran, it looks like satellite TV can't be canceled.

Nearly a year later, little has changed. A satellite dish can still be easily, if not so easily, installed in a home or office. Rather than dismantling their dishes, most dish owners are simply hiding them behind brick walls or under canvas tarps. To limit the threat, front neighbors have joined in communal satellite services, all of them drawing their programs from a single, well-hidden dish. In some cities of the more free-wheeling south, dish owners do not bother to hide them at all.

Star TV's figures suggest that Chinese viewership may actually have increased since the crackdown. An independent audit of satellite television by firms among Hong Kong advertisers using scanners last summer showed that the number of homes with television satellite systems has increased. In one channel in Guangzhou, the number of homes with television satellite systems has increased from 136 percent to 24 percent, while in Beijing it rose from 8 percent to 13 percent.

Mr. Murdoch's other relationship with the Chinese leadership doubled for the fear he decided earlier this year to drop the BBC World Service news from the Star lineup beamed to China.

The Chinese Government has decided, and it doesn't know why, that this really can't shut down satellite television entirely, whatever the threats," said a Western diplomat in Beijing. "We're not talking about a few dissident dishes, the real problem is that it's being programmed outside China."

From China to Iran, it looks like satellite TV can't be canceled.

7. Define censorship.
8. What did Saudi Arabia do about their satellite dishes? Why?
9. Why are satellite dishes banned in India?
10. Why does Indonesia like to use satellite dishes?
11. Why did the government of China begin a campaign against satellite dishes in October, 1993?
12. Who is Rupert Murdoch? Why is he important to China?
13. How many satellite dishes are in China?
14. What is the most popular TV program in Iran?
15. Imagine you are one of China's leaders, should satellite dishes be allowed in your country? If not how will you stop them from being used and if you think satellite dishes should be allowed why?
Ts'ai Lun, the inventor of paper, is a man whose name is probably unfamiliar to most readers. Considering the importance of his invention, the extent to which he has been ignored in the West is indeed surprising. There are major encyclopedias which do not have even brief articles on Ts'ai Lun, and his name is seldom mentioned in standard history textbooks. In view of the obvious importance of paper, this paucity of references to Ts'ai Lun may arouse suspicion that he is a purely apocryphal figure. Careful research, however, makes it absolutely clear that Ts'ai Lun was a real man, an official at the Chinese imperial court, who, in or about the year 105, presented Emperor Ho Ti with samples of paper. The Chinese account of Ts'ai Lun's invention (which appears in the official history of the Han dynasty) is entirely straightforward and believable, without the least hint of magic or legend about it. The Chinese have always credited Ts'ai Lun with the invention of paper, and his name is well known in China.

Not a great deal is known about Ts'ai Lun's life. Chinese records do mention that he was a eunuch. It is also recorded that the emperor was greatly pleased by Ts'ai Lun's invention, and that as a result Ts'ai Lun was promoted, received an aristocratic title, and became wealthy. Later on, however, he became involved in palace intrigue, and this eventually led to his downfall. The Chinese records relate that upon his being disgraced, Ts'ai Lun took a bath, dressed in his finest robes, and drank poison.

The use of paper became widespread in China during the second century, and within a few centuries the Chinese were exporting paper to other parts of Asia. For a long time, they kept the technique of papermaking a secret. In 751, however, some Chinese papermakers were captured by the Arabs, and not long afterwards paper was being manufactured in both Samarkand and Baghdad. The art of papermaking gradually spread throughout the Arab world, and in the twelfth century the Europeans learned the art from the Arabs. The use of paper gradually spread, and after Gutenberg invented modern printing, paper replaced parchment as the principal writing material in the West.

Today, paper is so common that we take it for granted, and it is hard to envisage what the world was like without it. In China, before Ts'ai Lun, most books were made of bamboo. Obviously, such books were extremely heavy and clumsy. Some books were written on silk, but that was too expensive for general use. In the West, before paper was introduced, most books were written on parchment or vellum, which were made of specially processed sheepskin or calfskin. This material had replaced the papyrus favored by the Greeks, Romans, and Egyptians. Both parchment and papyrus, however, not only were scarce, but were also expensive to prepare.
That books and other written materials can today be produced so cheaply and in such large quantities is due in considerable part to the existence of paper. It is true that paper would not be as important as it is today were it not for the printing press; however, it is equally true that the printing press would not be nearly so important were it not for the existence of a cheap and plentiful material on which to print.

Which man, then, should be ranked higher: Ts'ai Lun or Gutenberg? Although I consider the two of almost equal importance, I have ranked Ts'ai Lun slightly higher for the following reasons: (1) Paper has many other applications besides its use as a writing material. In fact, it is an amazingly versatile material, and a large percentage of the paper currently produced is used for purposes other than printing. (2) Ts'ai Lun preceded Gutenberg, and it is altogether possible that Gutenberg would not have invented printing had paper not already existed. (3) If only one of the two had ever been invented, I suspect that more books would be produced by the combination of block printing (which was known long before Gutenberg) and paper than by the combination of movable type and parchment.

Is it appropriate to include both Gutenberg and Ts'ai Lun among the ten most influential people who ever lived? In order to realize the full importance of the inventions of paper and printing, it is necessary to consider the relative cultural development of China and the West. Prior to the second century, Chinese civilization was consistently less advanced than Western civilization. During the first millennium, Chinese accomplishments exceeded those of the West, and for a period of seven or eight centuries, Chinese civilization was by most standards the most advanced on earth. After the fifteenth century, however, Western Europe outstripped China. Various cultural explanations for these changes have been advanced, but most such theories seem to ignore what I believe is the simplest explanation.

It is true, of course, that agriculture and writing developed earlier in the Middle East than they did in China. That alone, however, would not explain why Chinese civilization so persistently lagged behind that of the West. The crucial factor, I believe, was that prior to Ts'ai Lun there was no convenient writing material available in China. In the Western world, papyrus was available, and although that material had its drawbacks, papyrus rolls were infinitely superior to books made of wood or bamboo. Lack of a suitable writing material was an overpowering obstacle to Chinese cultural progress. A Chinese scholar needed a wagon to carry around what we would consider a quite modest number of books. One can imagine the difficulty of trying to run a government administration on such a basis!

Ts'ai Lun's invention of paper, however, changed the situation entirely. With a suitable writing material available, Chinese civilization advanced rapidly, and within a few centuries, was able to catch up with the West. (Of course, political disunity in the West played a role, but that was far from being the whole story. In the fourth century, China was less united than the West, but nevertheless was developing rapidly in cultural matters.) During the succeeding centuries, while progress in the West was comparatively slow, the Chinese brought forth such major inventions as the compass, gunpowder, and block printing. Since paper was cheaper than parchment, and available in larger quantities, the tables were now turned.

After Western nations began using paper, they were able to hold their own vis-à-vis China, and even succeeded in narrowing the cultural gap. The writings of Marco Polo, however, confirm the fact that even in the thirteenth century, China was far more prosperous than Europe.

Why, then, did China eventually fall behind the West? Various complex cultural explanations have been offered, but perhaps a simple technological one will serve. In fifteenth-century Europe, a genius named Johann Gutenberg developed a technique for the mass production of books. Thereafter, European culture advanced rapidly. As China had no Gutenberg, the Chinese stayed with block printing, and their culture progressed relatively slowly.

If one accepts the foregoing analysis, one is forced to the
conclusion that Ts'ai Lun and Johann Gutenberg are two of the central figures in human history. Indeed, Ts'ai Lun stands out well above most other inventors for another reason. Most inventions are a product of their times, and would have come about even if the person who actually invented them had never lived. But such is clearly not the case with regard to paper. Europeans did not start to manufacture it until a thousand years after Ts'ai Lun, and then only because they had learned the process from the Arabs. For that matter, even after they had seen paper of Chinese manufacture, other Asian peoples were never able to discover how to manufacture it by themselves. Clearly, the invention of a method of manufacturing true paper was sufficiently difficult that it was not bound to occur in any moderately advanced culture, but rather required the explicit contribution of some very gifted individual. Ts'ai Lun was such an individual, and the method of paper making that he employed is (aside from mechanization, introduced about 1800 A.D.) basically the same technique that has been used ever since.

These are the reasons I think it appropriate to place both Gutenberg and Ts'ai Lun among the first ten persons in this book, with Ts'ai Lun ahead of Gutenberg.
Biography of Ts'ai Lun-The Inventor of Paper

1. Who was Ts'ai Lun?

2. Why is Ts'ai Lun unknown in the West?

3. Who did Ts'ai Lun present samples of paper too? When?

4. What happened to Ts'ai Lun as a result of his inventing paper?

5. How and why did Ts'ai Lun die?

6. When did paper become commonly used in China?

7. Who brought paper to the West? When?

8. Where did the Europeans learn to make paper?

9. What was used to make books in China before paper?

10. What was used to make books in Europe before paper?

11. Who used papyrus?

12. What three reasons does the author give for ranking Ts'ai Lun higher than Johann Gutenberg (The inventor of the printing press)?

13. Why does the author believe China was less developed than the West before the invention of paper?

14. Name the three inventions did the Chinese develop shortly after the invention of paper.

15. Using the diagrams on the last page describe the process of making paper in a paragraph.
Fulbright 1994/Diedrich (Religion)

Dear Marco;

Well I hope you have enjoyed my other letters. China and the world sure have changed since you were traveling. China has a deep connection to the philosophers of the past as well as a growth in the other major world religions.

The Pope is pleased as you would be by the growth of the Catholic Church in China. In Beijing (Peking), the capital of China, there is a very large Catholic Church. It is called the Xuan Wu Church, it was first built in what I would classify as a colonial style. After your adventures, an Italian sailor by the name of Christopher Columbus wanted to bring the Catholic religion to Asia as well as open the spice, silk and jewel trade in Asia. He sailed from Europe around the world and found the Americas. In the Americas the Catholic religion was forced onto the indigenous people and many of the churches in the Americas look very much like the Xuan Wu Church.

Another religion you are familiar with is Islam. China has a significant Muslim population known as the Wui. The history of the Wui can be traced back to the 7th Century AD. and the dynasty known as the Tang. At the end of the Silk Road a mosque was built. The city is known today as Xi'an. The mosque is very unique in that it appears to be a traditional Chinese pagoda or temple yet it has many characteristics of a traditional mosque such as the writing, holy rocks, a prayer hall facing toward Mecca, a copy of the Islamic holy book known as the Koran and the Wui people cover their heads out of respect for their god Allah.

Buddhism has also played an important role in the development of Chinese culture. I'm sure you had experienced this in your travels in China. Buddha was the founder of this philosophy, he lived in India. In Xi'an, the city at the end of the Silk Road is the Big White Goose Pagoda known in Chinese as the Da Yan Pagoda. A Chinese Buddhist monk by the name of Xuan Zang visited India to gather the sutras or sacred texts of Buddhism. When he gathered all the sutras he spent the rest of his life translating them into Chinese. This story is told in the famous book, *Journey to the West*.

A branch of Buddhism has grown in Tibet. Tibetan Buddhism is based on the concept of a Dalai Lama who is a living man who is considered to be a god. The Dalai Lama is the re-incarnation of a living god. In Beijing there is a Lama Temple with a huge Buddha.

During the 8th Century another form of Buddhism arose known as Zen Buddhism. It is a meditative form of Buddhism that allows for a
greater personal responsibility in religious life. Guanyin, known as Chinese Bodisattva of Compassion who was the rescuer of anyone threatened by murder, fire or a shipwreck. Representations of Guanyin are everywhere in China.

During your visit to China the ideals of Confucius were growing tremendous. The basic beliefs of Confucius are based on the moral personal responsibility for the people as well as the rulers. The Confucian Code has six basic tenants:
1. The ideals of Confucius are a philosophy of superior and inferior relationships.
2. Each person has a role to play in the world.
3. If everyone performs their role in society there will be order.
4. Personal self-esteem or "saving face" is the basis of obligation toward society and relationships.
5. People can achieve perfection through moral education.
6. The proper ruler remains in power only through being a moral servant of the people.

The two most important virtues are Jen and Li. Jen is the love and concern for others, similar to the Golden Rule in Christianity. Li deals with having the proper manners, following the rituals and customs and proper etiquette. These two virtues apply to the individual as well as the government. Personal obligation and responsibility are the fundamental beliefs of the Chinese. This personal obligation is the basis of a stable society.

Another philosophy that arose during the 10th Century was Taoism. It was very popular among common people. It is translated as "The Path" or "The Way." Lao Tzu was the old master of this religion. The basis of this philosophy is "action and inaction" known as Yin and Yang.

Yin is the place where there is no sunshine. Female, earth and dark.

Yang is the place where there is sunshine. Male, sky and light. Everything is in a constant state of creation and destruction, life is a cycle of events. You must accept this and attempt to keep it in balance.

Take care!

Your Friend From the Future!
Gautama Buddha, whose original name was Prince Siddhartha, was the founder of Buddhism, one of the world's great religions. Siddhartha was the son of a king ruling in Kapilavastu, a city in northeast India, near the borders of Nepal. Siddhartha himself (of the clan of Gautama and the tribe of Sakya) was purportedly born in 563 B.C., in Lumbini, within the present borders of Nepal. He was married at sixteen to a cousin of the same age. Brought up in the luxurious royal palace, Prince Siddhartha did not want for material comforts. Nevertheless, he was profoundly dissatisfied. He observed that most human beings were poor and continually suffered from want. Even those who were wealthy were frequently frustrated and unhappy, and all men were subject to disease and ultimately succumbed to death. Surely, Siddhartha thought, there must be more to life than transitory pleasures, which were all too soon obliterated by suffering and death.

When he was twenty-nine, just after the birth of his first son, Gautama decided that he must abandon the life he was living and devote himself wholeheartedly to the search for truth. He departed from the palace, leaving behind his wife, his infant son, and all his worldly possessions, and became a penniless wanderer. For a while he studied with some of the famed holy men of the day, but after mastering their teachings, he found their solutions to the problems of the human situation unsatisfactory. It was widely believed that extreme asceticism was the pathway to true wisdom. Gautama therefore attempted to become an ascetic, for several years engaging in extreme fasts and self-mortification. Eventually, however, he realized that tormenting his body only clouded his brain, without leading him any closer to true wisdom. He therefore resumed eating normally, and abandoned asceticism.

In solitude, he grappled with the problems of human existence. Finally, one evening, as he sat beneath a giant fig tree, all the pieces of the puzzle seemed to fall into place. Siddhartha spent the whole night in deep reflection, and when the morning came, he was convinced that he had found the solution and that he was now a Buddha, an "enlightened one."

At this time, he was thirty-five years old. For the remaining forty-five years of his life, he traveled throughout northern India, preaching his new philosophy to all who were willing to listen. By the time he died, in 483 B.C., he had made thousands of converts. Though his words had not been written down, his disciples had memorized many of his teachings, and they were passed to succeeding generations by word of mouth.

The principal teachings of the Buddha can be summarized in what Buddhists call the "Four Noble Truths": first, that human life is intrinsically unhappy; second, that the cause of this unhappiness is human selfishness and desire; third, that individual selfishness and desire can be brought to an end—the resulting state, when all desires and cravings have been
eliminated, is termed \textit{nirvana} (literally "blowing out" or "extinction"); fourth, that the method of escape from selfishness and desire is what is called the "Eightfold Path": right views, right thought, right speech, right action, right livelihood, right effort, right mindfulness, and right meditation. It might be added that Buddhism is open to all, regardless of race, and that (unlike Hinduism) it recognizes no distinctions of caste.

For some time after Gautama’s death the new religion spread slowly. In the third century a.c., the great Indian emperor Asoka became converted to Buddhism. His support brought about the rapid expansion of Buddhist influence and teachings in India and the spread of Buddhism to neighboring countries. Buddhism spread south into Ceylon, and eastward into Burma. From there it spread into all of southeast Asia, and down into Malaya, and into what is now Indonesia. Buddhism also spread north, directly into Tibet, and to the northwest, into Afghanistan and Central Asia. It spread into China, where it won a large following, and from there into Korea and Japan.

Within India itself, the new faith started to decline after about 500, and almost vanished after about 1200. In China and Japan, on the other hand, Buddhism remained a major religion. In Tibet and in southeast Asia, it has been the principal religion for many centuries.

Buddha’s teachings were not written down until several centuries after his death, and, understandably, his movement has split into various sects. The two principal divisions of Buddhism are the Theravada branch, dominant in southern Asia, and considered by most Western scholars as the one closer to the Buddha’s original teachings, and the Mahayana branch, dominant in Tibet, China, and northern Asia generally.

Buddha, as the founder of one of the world’s major religions, clearly deserved a place near the head of this list. Since there are only about 200 million Buddhists in the world, compared with over 500 million Moslems and about one billion Christians, it would seem evident that Buddha has influenced fewer people than either Muhammad or Jesus. However, the difference in numbers can be misleading. One reason that Buddhism died out in India is that Hinduism absorbed many of its ideas and principles. In China, too, large numbers of persons who do not call themselves Buddhists have been strongly influenced by Buddhist philosophy.

Buddhism, far more than Christianity or Islam, has a very strong pacifist element. The orientation toward nonviolence has played a significant role in the political history of Buddhist countries.
It has often been said that if Christ were to return to earth, he would be shocked at many of the things which have been done in his name, and horrified at the bloody fights between different sects of persons who call themselves his followers. Buddha, too, would doubtless be amazed at many of the doctrines that have been presented as Buddhist. But while there are many sects of Buddhism, and large differences between those sects, there is nothing in Buddhist history that remotely compares with the bloody religious wars that took place in Christian Europe. In this respect, at least, Buddha’s teachings seem to have had far greater influence on his followers than Christ’s teachings had on his.

Buddha and Confucius have had an approximately equal influence upon the world. Both lived at about the same time, and the number of their adherents has not been too different. I have chosen to place Buddha before Confucius for two reasons: first, the advent of Communism in China seems to have greatly diminished Confucian influence, and it appears likely that in the future Buddhism will be of greater importance than Confucianism; and second, the failure of Confucianism to spread widely outside of China indicates how closely the ideas of Confucius were grounded in pre-existing Chinese attitudes. Buddhist teachings, on the other hand, are in no sense a restatement of previous Indian philosophy, and Buddhism has spread far beyond the boundaries of India due to the originality of Gautama Buddha’s concept, and the wide appeal of his philosophy.

Buddha Biography

1. When did Buddha live?
2. What was Buddha's original name?
3. Where was Buddha born?
4. What did Prince Siddhartha observe as a teenager?
5. When did Prince Siddhartha decide to abandon his life as a prince? Why?
6. To what was he going to devote his life?
7. Define asceticism.
8. Why did Buddha abandon asceticism?
9. When did he become Buddha?
10. Where did Buddha preach?
11. What are the "Four Noble Truths."
12. What is "nirvana."
13. List the eight parts of the Eight fold Path.
14. Who was Asoka?

15. Why was Asoka important to Buddhism?

16. What is Theravada Buddhism?

17. What is Mahayana Buddhism?

18. According to the author what does Buddhism have that Christianity and Islam do not?

19. What two reasons did the author have for choosing Buddha before Confucius?
The great Chinese philosopher Confucius was the first man to develop a system of beliefs synthesizing the basic ideas of the Chinese people. His philosophy, based on personal morality and on the concept of a government that served its people and ruled by moral example, permeated Chinese life and culture for well over two thousand years, and has greatly influenced a substantial portion of the world's population.

Confucius was born about 551 B.C., in the small state of Lu, which is in the present province of Shantung, in northeastern China. His father died when he was quite young, and Confucius and his mother lived in poverty. As a young man, the future philosopher served as a minor government official, but after several years he resigned his post. He spent the next sixteen years teaching, attracting a considerable number of disciples to his philosophy. When he was about fifty years old, he was awarded a high position in the government of Lu; however, after about four years, enemies at court brought about his dismissal, and, indeed, his exile from the state. He spent the next thirteen years as...
an itinerant teacher, and then returned to his home state for the last five years of his life. He died in 479 B.C.

Confucius is often credited as the founder of a religion, but this description is inaccurate. He very rarely referred to the Deity, refused to discuss the afterlife, and avoided all forms of metaphysical speculation. He was basically a secular philosopher, interested in personal and political morality and conduct.

The two most important virtues, according to Confucius, are *jen* and *li*, and the superior man guides his conduct by them. *Jen* has sometimes been translated as "love," but it might better be defined as "benevolent concern for one's fellow men." *Li* describes a combination of manners, ritual, custom, etiquette, and propriety.

Ancestor worship, the basic Chinese religion even before Confucius, was reinforced by the strong emphasis that he placed on family loyalty and respect for one's parents. Confucius also taught that respect and obedience were owed by wives to their husbands and by subjects to their rulers. But the Chinese sage did not approve of tyranny. He believed that the state exists for the benefit of the people, not vice versa, and he repeatedly stressed that a ruler should govern primarily by moral example rather than by force. Another of his tenets was a slight variant of the Golden Rule: "What you do not want done to yourself, do not do to others."

Confucius's basic outlook was highly conservative. He believed that the Golden Age was in the past, and he urged both rulers and people to return to the good old moral standards. In fact, however, the Confucian ideal of government by moral example had not been the prevailing practice in earlier times, and Confucius was therefore a more innovative reformer than he claimed to be.

Confucius lived during the Chou dynasty, a period of great intellectual ferment in China. Contemporary rulers did not accept his program, but after his death his ideas spread widely throughout his country. However, with the advent of the Ch'in dynasty, in 221 B.C., Confucianism fell upon evil days. The first emperor of the Ch'in dynasty, Shih Huang Ti, was determined to eradicate Confucius's influence, and to make a clean break with the past. He ordered the suppression of Confucian teachings and the burning of all Confucian books. This attempt at suppression was unsuccessful, and when the Ch'in dynasty came to a close a few years later, Confucian scholars were again free to teach their doctrine. During the succeeding dynasty, the Han (206 B.C.-220 A.D.), Confucianism became established as the official Chinese state philosophy.

Starting with the Han dynasty, Chinese emperors gradually developed the practice of selecting government officials by means of civil service examinations. In the course of time these examinations came to be based to a large extent on a knowledge of the Confucian classics. Since entry into the government bureaucracy was the main route to financial success and social prestige in the Chinese empire, the civil service examinations were extremely competitive. Consequently, for generations a large number of the most intelligent and ambitious young men in China devoted many years to intensive study of the Confucian classics, and, for many centuries the entire civil administration of China was composed of persons whose basic outlook had been permeated by the Confucian philosophy. This system endured in China (with some interruptions) for roughly two thousand years, from about 100 B.C. to about 1900 A.D.

But Confucianism was not merely the official philosophy of
the Chinese administration. Confucian ideals were accepted by the majority of the Chinese people, and for over two thousand years deeply influenced their life and thought.

There are several reasons for Confucius's enormous appeal to the Chinese. First, his personal sincerity and integrity were beyond question. Second, he was a moderate and practical person, and did not demand of men what they could not achieve. If he asked them to be honorable, he did not expect them to be saintly. In this regard as in others, he reflected the practical temperament of the Chinese people. And this perhaps, was the key to the immense success that his ideas achieved in China. Confucius was not asking the Chinese to change their basic beliefs. Rather, he was restating, in a clear and impressive form, their basic traditional ideals. Perhaps no philosopher in history has been so closely in touch with the fundamental views of his countrymen as Confucius.

Confucianism, which stresses the obligations of individuals rather than their rights, may seem rather stodgy and unappealing by current Western standard. As a philosophy of government, though, it proved remarkably effective in practice. Judged on the basis of its ability to maintain internal peace and prosperity, China, for a period of two thousand years, was on the average the best-governed region on earth.

The ideals of Confucius, closely grounded as they are in Chinese culture, have not been widely influential outside East Asia. They have, however, had a major impact in Korea and Japan, both of which have been greatly influenced by Chinese culture.

At the present time, Confucianism is in very low estate in China. The Chinese Communists, in an effort to break completely with the past, have vigorously attacked Confucius and his doctrines, and it is possible that the period of Confucius's influence upon history has drawn to a close. In the past, however, Confucius's ideas proved remarkably deep-rooted within China, and we should not be surprised if fifty to a hundred years from now, some Chinese philosopher successfully synthesizes the ideas of Confucius and of Mao Tse-tung.
Confucius Worksheet

1. When did Confucius live?

2. According to the author what did Confucius do for the Chinese people?

3. List the two major philosophies presented by Confucius.

4. Where was Confucius born?

5. What did Confucius do prior to teaching?

6. Why is it wrong to state that Confucius founded a religion?

7. What are the two most important virtues of Confucius?

8. Define the two virtues above.

9. Why was ancestor worship reinforced under Confucian philosophy?

10. Explain why Confucius is considered to be highly conservative.

11. What happened to the ideals of Confucianism during the Ch'in Dynasty?

12. What did Shih Huang Ti do for Confucianism?

13. List the two reasons for Confucius' appeal to the Chinese people.
EXPLAIN WHAT EACH PROVERB TELLS US, IN COMPLETE SENTENCES. THEN LIST WHICH OF THE 12 CULTURAL CHARACTERISTICS THE PROVERB IS TALKING ABOUT IN THE BLANK PROVIDED. (FOOD, FAMILY, CLOTHING, EDUCATION, COMMUNICATION, TRANSPORTATION, ARTS, SHELTER, GOVERNMENT, RELIGION, ECONOMICS, OR RECREATION.)

1. ________________ "The Master said, To learn and at due times to repeat what one has learnt, is that not after all a pleasure?"

2. ________________ "Master Tseng said, Everyday I examine myself on these three points: in acting on behalf of others, have I always been loyal to their interests? In intercourse with my friends, have I always been true to my word? Have I failed to repeat the precepts that have been handed down to me?"

3. ________________ "The Master said, A young man's duty is to behave well to his parents at home and to his elders abroad, to be cautious in giving promises and punctual in keeping them, to have kindly feelings towards everyone, but seek the intimacy of the Good. If, when all that is done, he has energy to spare, then let him study the polite arts." (learn to recite Songs archery, etc.)

4. ________________ "The Master said, A gentleman who never goes on eating till he is sated (full of food), who does not demand comfort in his home, who is diligent in business and cautious in speech, who associates with those that posses the Way and thereby corrects his own faults - such a one may indeed be said to have taste for learning."

5. ________________ "The Master said, If out of the three hundred Songs I had to take one phrase to cover all my teaching, I would say, Let there be no evil in your thoughts."

6. ________________ "The Master said, He who learns but does not think is lost. He who thinks but does not learn is in great danger."
7. "The Master said, He who by reanimating (warming up) the Old can gain knowledge of the New is fit to be a teacher."

8. "The Master said, Only one who bursts with eagerness do I instruct; only one who bubbles with excitement, do I enlighten. If I hold up one corner and a man cannot come back to me with the other three, I do not continue the lesson."

9. "Tzu-lu asked about government. The Master said, Lead them; encourage them! Tzu-lu asked for a further maxim. The Master said, Untiringly."

10. "The Master said, In serving one's prince one should be Intent upon the task, Not bent upon the pay."
Of the many thousands of books which have been written in China, the one which has perhaps been the most frequently translated and read outside that country is a slender volume written over two thousand years ago and known as the Lao Tzu, or the Tao Te Ching. The Tao Te Ching (Classic of the Way and its Power) is the central text in which the philosophy of Taoism is expounded.

It is a subtle book, written in an extraordinary cryptic style and capable of many interpretations. The central idea concerns the Tao, which is usually translated “the Way” or “the Road.” But the concept is somewhat obscure, since the Tao Te Ching itself begins by saying: “The Tao which can be told is not the eternal Tao; the name which can be named is not the eternal name.” Nevertheless, we might say that Tao means roughly “Nature” or “the Natural Order.”

Taoism takes the view that the individual should not struggle against the Tao, but should submit to it and work with it. Actively seeking to gain or exercise power is not so much immoral as it is foolish and futile. The Tao cannot be defeated; one should instead try to live in conformity with it. (A Taoist might point out that water, which is infinitely soft, which flows without protest into the lowest places, and which responds to even the weakest force without resistance, is nevertheless indestructible, whereas the hardest rocks are worn away in time.)

For an individual human being, simplicity and naturalness are usually advisable. Violence should be avoided, as should all striving for money or prestige. One should not seek to reform the world, but rather to respect it. For governments, also, a somewhat inactive policy is usually the wisest course. There are too many statutes already. Passing more laws, or harshly enforcing the old ones, usually makes matters worse. High taxes, ambitious government programs, and making war are all contrary to the spirit of the Taoist philosophy.

According to Chinese tradition, the author of the Tao Te Ching was a man called Lao Tzu, who is said to have been an older contemporary of Confucius. But Confucius lived in the sixth century B.C., and both because of its style and its content, few modern scholars believe that the Tao Te Ching was written at such an early date. There is considerable dispute as to the book’s actual date of composition. (The Tao Te Ching itself never mentions a specific person, place, date, or historical event.) However, 320 B.C. is a good estimate—certainly within eighty years of the true date, and probably much closer.

This problem has led to a great deal of dispute concerning the dates—and even the existence—of Lao Tzu himself. Some authorities believe the tradition that Lao Tzu lived in the sixth century B.C., and have therefore concluded that he did not write the Tao Te Ching. Other scholars have suggested that he is merely a legendary figure. My viewpoint, accepted only by a minority of scholars, is that: (1) Lao Tzu was a real person, and the author of the Tao Te Ching; (2) He lived in the fourth century B.C.; and (3) The story that Lao Tzu was an older contemporary of Confucius is fictitious, and was fabricated by later Taoist philosophers in order to lend prestige to the man and his book.

It is worth noting that of the early Chinese writers neither Confucius (551-479 B.C.), nor Mo Ti (fifth century B.C.), nor
Mencius (371–289 B.C.) makes any mention of either Lao Tzu or the Tao Te Ching; however, Chuang Tzu, an important Taoist philosopher who flourished about 300 B.C., mentions Lao Tzu repeatedly.

Since even the existence of Lao Tzu is in dispute, we should be skeptical of biographical details. But there are respectable sources for the following statements: Lao Tzu was born and lived in northern China. For part of his life he was an historian or curator of official archives, most probably at Loyang, the capital of the Chou dynasty monarchs. Lao Tzu was not his original name, but is rather an honorific title meaning roughly “old master.” He was married and had a son named Tsung. Tsung later became a general in the state of Wei.

Although Taoism started as a basically secular philosophy, a religious movement eventually developed out of it. However, while Taoism as a philosophy continued to be based primarily on the ideas expressed in the Tao Te Ching, the Taoist religion soon became encrusted with an enormous number of superstitions, beliefs, and practices that have relatively little to do with the teachings of Lao Tzu.

Assuming that Lao Tzu actually was the author of the Tao Te Ching, his influence has been large indeed. The book is very short (less than six thousand characters in Chinese, and therefore small enough to fit on a single sheet of newspaper!), but it contains much food for thought. A whole series of Taoist philosophers have used the book as a starting point for their own ideas.

In the West, the Tao Te Ching has been far more popular than the writings of Confucius or of any Confucian philosopher. In fact, at least forty different English translations of the book have been published, a larger number than for any other book except the Bible.

In China itself, Confucianism has generally been the dominant philosophy, and where there is a clear conflict between the ideas of Lao Tzu and those of Confucius, most Chinese have followed the latter. Nevertheless, Lao Tzu has generally been highly respected by the Confucians. Furthermore, in many cases, Taoist ideas have simply been assimilated into Confucian philosophy, and have thereby influenced millions of persons who do not call themselves Taoists. Similarly, Taoism has had a marked influence on the Chinese development of Buddhist philosophy, and in particular on Zen Buddhism. Though few people today call themselves Taoists, there is no Chinese philosopher except Confucius who has had so widespread and enduring an impact on human thought as Lao Tzu.
Lao Tzu Biography

1. What book did Lao Tzu write?

2. What is the "Tao?"

3. What view does Taoism take in regards to the individual?

4. Why should a person submit to the Tao?

5. What two things are advisable for individual human beings?

6. What two things are to be avoided?

7. Who was the author of the "Tao Te Ching?"

8. What are the author's three beliefs about the existence of Lao Tzu? Why?

9. Where was Lao Tzu born?

10. What does the name Lao Tzu mean?

11. How many Chinese characters were used to write the "Tao Te Ching?"

12. What is the only book in the United States to have a greater publication in the United States?

13. Explain the difference between Taoism and Confucianism in the eyes of the Chinese.
The Chinese philosopher Mencius was the most important successor to Confucius. His teachings, as set forth in the Book of Mencius, were highly esteemed in China for many centuries. He was often referred to as "the Second Sage," that is, second in wisdom only to Confucius himself, whom he followed by about two hundred years.

Mencius was born about 371 B.C., in the small state of Tsou, in what is now the Shantung province of China. The era in which he was born, the last stage of the Chou dynasty, is referred to by the Chinese as "the Period of the Warring States," since China was politically disunited at that time. Mencius, though he had been reared in the Confucian tradition and was always a strong supporter of Confucian theories and ideals, eventually became respected as a scholar and philosopher in his own right.

Mencius spent much of his adult life travelling about China and offering his advice to various rulers. Several rulers listened respectfully to him, and for a while he was an official in the state of Ch'i; but by and large, he held no permanent, policy-making government position. In 312 B.C., when he was about fifty-nine years old, he returned to his home state of Tsou, where he remained until his death. The year of his death is uncertain, but was probably 289 B.C.
Mencius made disciples during his own lifetime, but his influence upon China derives mainly from the Book of Mencius, in which his principal teachings are set forth. Although the book may have been subjected to some editing by his disciples, there seems little doubt that it basically represents Mencius's own ideas.

The tone of the Book of Mencius is idealistic and optimistic, reflecting Mencius's firm conviction that human nature is basically good. In many ways, his political ideas are very much like those of Confucius; in particular, Mencius firmly believed that a king should rule primarily by moral example rather than by force. Mencius, however, was much more of a "people's man" than Confucius was. "Heaven sees as the people see; heaven hears as the people hear," is one of his best-known statements.

Mencius stressed that the most important component of any state is the people, rather than their ruler. It is a ruler's duty to promote the welfare of his people; in particular, he should provide them with moral guidance and with suitable conditions for their livelihood. Among the governmental policies he advocated were: free trade; light taxes; conservation of natural resources; a more equal sharing of the wealth than generally prevailed; and government provision for the welfare of aged and disadvantaged persons. Mencius believed that a king's authority derives from Heaven; but a king who ignores the welfare of the people will lose the "mandate of Heaven," and will, rightly, be overthrown. Since the last part of that sentence effectively overrules the first part, Mencius was in fact asserting (long before John Locke,) that the people have a right to revolt against unjust rulers. It was an idea that became generally accepted in China.

Now generally speaking, through most of history, the sort of policies that Mencius advocated have been more popular with subjects than with their rulers. It is therefore hardly surprising that Mencius's proposals were not adopted by the Chinese rulers of his own day. In the course of time, however, his views became increasingly popular with Confucian scholars and with the Chinese people. Mencius's reputation, which was already high, became even greater in China following the rise of neo-Confucianism in the eleventh and twelfth centuries.

In the West, of course, Mencius has had very little influence whatsoever. This is only partly due to the fact that he wrote in Chinese. The Tao Te Ching by Lao Tzu, which was written in China at roughly the same time as the Book of Mencius, has been translated into European languages many times simply because so many people find the ideas expressed in that book intriguing. But relatively few Westerners have found the Book of Mencius particularly original or incisive.

It may sound attractive for the government to concern itself with the welfare of the aged and the disadvantaged; it also sounds attractive to be in favor of low taxes. However, an American politician who announced that he was in favor of those two policies, without being a lot more specific, would be likely to be mistrusted by liberals and conservatives alike. Similarly, Mencius indicates on the one hand that he favors a more equitable sharing of the wealth, and on the other hand indicates his approval of free trade and low taxes, without ever really coming to grips with the possible conflicts between those policies. This may sound a bit unfair to Mencius, who after all was not running for Congress. There is something to be said for a philosopher who presents a set of worthy (though partly inconsistent) general principles, even if he does not specifically indicate how the conflicts between those principles are to be resolved. Nevertheless, in the long run, a philosopher such as Machiavelli, who expressed his priorities more clearly than Mencius did, had had more influence upon human thought.

But Mencius's writings have certainly influenced the Chinese. Though his importance to Confucianism is not nearly as great as St. Paul's importance to Christianity (for one thing, Mencius lacked Paul's unusual proselytizing ability), he was unquestionably an immensely influential writer. For roughly twenty-two centuries, his ideas were studied throughout a region that included over 20 percent of the world's population. Only a few philosophers anywhere have had so great an influence.
Mencius Biography

1. Why is Mencius referred to as the "Second Sage?"

2. When did Mencius live?

3. Where was Mencius born?

4. What is the Book of Mencius?

5. According to Mencius what is human nature?

6. Why is Mencius considered more of a "people's man" than Confucius?

7. What is the most important component of any state? Why?

8. What is the mandate of heaven?

9. How can a ruler lose his mandate?

10. Why has Mencius had little effect in the West?

11. Why has a philosopher like Machiavelli had greater influence on human thought than Mencius?
Mencius (Meng Zi) inherited the thought and tradition of Confucius (Kong Zi). Having completed his studies under the disciples of Zi Si (Confucius' grandson), he toured the country and sought to offer advice to various princes; however, since his persuasions were not taken seriously by them, he retired from public life with his disciple Wan Zhang to write a preface to the Odes and the Book of History, to elaborate the views of Confucius, and to compile The Works of Mencius in seven books.

Later generations honoured Mencius as the great sage after Confucius. Han Yu of the Tang dynasty said “Yao hands down to Shun, Shun hands down to Yu, Yu hands down to Tang, Tang hands down to Wen, Wu, and the Duke of Zhou, Wen, Wu, and the Duke of Zhou hand down to Kong Zi, and Kong Zi hands down to Meng Ke, on whose death, there is no further transmission.” Therefore Han Yu not only compared Mencius favourably to Confucius, but also thought that after him the transmission of the Traditional Way was interrupted.
Mencius then lived in a town next to the marketplace. Everyday, all he saw were merchants and hawkers doing business.

Very good pork here!

Confucius says, "Is anything better than learning and being able to constantly practise what is learnt?"

This time, Mencius' mother carefully chose to live near a school.

If we don't move again, I think you will only know how to slaughter pigs later...

Confucius says "Is anything better than learning and being able to constantly practise what is learnt?"

When Mencius was eight, his mother sent him to school.

Is anything more delightful than seeing a friend from afar?
The same thing again. It’s so boring!

What did you study today?

Study is so meaningless!

You quitting your study halfway is like me cutting these silken threads. In the end, it is useless!

Ah!

Mother, from now on, I will concentrate hard on my studies and not disappoint you...

From then on, Mencius did not dare to be slothful: instead, he put great effort into his studies...

When he grew up, he went to the State of Lu to continue his studies.

By then, Zi Si had already passed away and so he studied under Zi Si's disciples.
Here, one can observe sacrificial rites and ceremonies held in the temples.

One can also read the records of Confucius' words and deeds and the manuscripts from his own hand.

Therefore, since Mencius was enthusiastic in his studies and had the advantage of living in Confucius' hometown, a place rich in cultural atmosphere, he made great progress.

Although I cannot study directly under Confucius, yet through his disciples, I am still learning from Confucius.

Since the beginning of man, none is as great as Confucius.

And the person he must follow.

At that instance, Mencius understood the path he must take...
At that time, there was much fighting and many wars among the various princes. The strong exploited the weak and the big bullied the small.

Sufferings from the wars were so bad that “people exchanged their sons for meat and broke the bones of the dead for fire.”

These ambitious aggressors, concerned only about their own profit, initiate wars everywhere and fill the land with their dead. They are truly inviting the earth to eat the flesh of man!

Therefore, Mencius led his disciples to tour the states in order to persuade the various princes to realize the kingly way and to achieve the ideal of a benevolent government.

However, the princes at that time only desired immediate profit and would not accept or employ his ideas.

Like Confucius, he was not given any opportunity to put his philosophy into action.

Therefore, in his old age, he turned to teaching and education, writing books and establishing his doctrine.

He wrote a preface to the Shi and Shu (the Odes and the Book of History), he elaborated the views of Confucius, and he compiled The Works of Mencius into seven books, in which he recorded the current activities of his time, the various academic exchanges and discourses, and his debates with other schools.
The makings of a great man

To live in the spacious house of benevolence, to stand in the proper position of decorum, and to walk in the great path of righteousness; this is the Way of the great man.

When his ambition is fulfilled, he will lead others to follow his Way; if his ambition is disappointed, he will practise his Way alone.

Riches will not move his heart; poverty will not bend his discipline;

Power will not break his will.

Power and might does not make a great man; the truly great man is chaste, is immovable and is upright. He will continue to exercise discipline independent of his external circumstance.

Our troubles

The passage of Tai Jia in the Book of History says, "We may still escape the calamities sent by heaven...."

But we cannot escape the calamities caused by ourselves."

We bring upon ourselves happiness or calamity; and we must bear the consequences of our own sins.

We may still escape the calamities sent by heaven...
The way of peace

The way of peace is near, yet we seek it afar:

The Way.

Working toward peace is easy, yet we insist on making it difficult.

When men love their parents and honour their elders, the world will be at peace.

The way of peace is simple and near. Men just need to love one another and respect their elders, fulfilling human ethics.

Rules

When Yi taught archery, he made it a rule to ensure that his bow was drawn fully;

The learner of archery too must make it a rule to do the same.

When the master-workman teaches his skill, he uses a ruler and a pair of compasses;

The learner too must follow and use the same.

There are rules in everything, whether in a little skill or in a great learning; and both the teacher and the learner must proceed according to these rules.
The superior man teaches in five ways.

Sometimes he is like the seasonal rain that nourishes the trees and the grass.

Sometimes he helps to develop the talents of others.

Sometimes he explains and answers queries.

The superior man teaches in these five ways.

The superior man is not restricted to only one way of teaching; his teaching is different for different individuals with their own characters and abilities.

It would be better to have no books...

For example, its record of King Wu’s struggle against the tyrant Zhou...

It would be better to have no books than to believe everything that’s in them.

Even for the Book of Zhou the chapter on “The End of the War”, there are only two or three passages there that I believe!

The benevolent man has no foes. Therefore, the benevolent King Wu should have conquered the most cruel tyrant Zhou easily.

So how could it be true when the book records that pestles could be floated on the blood that was shed from the killing of men?

The benevolent man has no toes. Therefore, the benevolent King Wu should have conquered the most cruel tyrant Zhou...
The Sayings of Mencius

Life of Mencius

1. When was Mencius born?
2. Where did Mencius live?
3. Why did Mencius leave his first home? Second?
4. What did Confucius say about leaving?
5. When did Mencius go to school?
6. How did Mencius feel about school?
7. Why did Mencius move to Confucius' hometown?
8. What did Mencius attempt to do for the kings and princes of China?
9. What did Mencius write?

"The Makings of a Great Man"

10. Define the following words:
   - benevolence
   - decorum
   - righteousness
11. What is the way of a great man?
12. What does not make a great man?
13. What is a great man?

"Our Troubles"
14. What does the Book of History say about calamities?
15. What is a calamity?
16. What does this proverb mean?

"The Way of Peace"
17. According to Mencius what do we do to obtain peace?
18. What, according to Mencius, is the way to peace?

Rules
19. What is the meaning of this proverb?

"The Superior Man Teaches in Five Ways"
20. List and explain each of the five ways a superior man teaches.

"It Would Be Better To Have No Books"
21. Why would be better to have no books?
22. What example did Mencius use to prove his proverb?
Dear Marco;

This letter will discuss issues that surround the modern Chinese family. I'll discuss the one child policy, the role of women in China today, marriage traditions and Chinese weddings. Marco it is very important to remember that China has a population of 1.2-1.3 billion people and this has a tremendous effect on the Chinese family.

A wedding in China today is a combination of traditional Chinese and modern Western weddings. The Western influence is seen in the addition of a wedding reception, the style of dress and the idea of a wedding party. In China a wedding is official when the government papers are issued. The ceremony is just a show for relatives and friends. There are eight traditional steps to a wedding:

1. Note of age, making sure everyone is the proper age by checking birthdays. Today's marriage laws allow for urban marriages after 28 for women and higher ages for men.
2. The official visit, which is the time that the woman visits the man's home to get to know one another.
3. Then the engagement is set. The prospective bride sets the date for the engagement.
4. Following the engagement the date for the wedding is set.
5. Two days before the wedding the groom's family sends a gift to the bride.
6. The dowry is exchanged two days prior to the wedding. The dowry is a gift from the bride's family to the groom's. Today T.V.'s, washers, refrigerators and other appliances are popular dowry gifts.
7. The bride and groom meet on the wedding day.
8. The ceremony is performed. At the dinner there are 8, 16, or 32 different dishes for good luck.

After the marriage the family is allowed to have one child. The one child policy was put in place in the 1970's in an attempt to contain the huge population problems in China today. If you live in an urban area and you are not a minority, you are only allowed one child. If you live in a rural area you are allowed two children. Finally if you are a minority, non-Han Chinese, you can have three children. If you have more than you limit you are fined 1,000 Yuan or about $120 US Dollars. This fine is known as the fa kuan.

The role of women in Chinese society is changing drastically. As a double income becomes necessary to survive and have a comfortable life more Chinese women are entering the workplace. Equality is coming slow to China's women but it is happening. Women who do
go to work often are pushed into low paying jobs such as a teacher, factory worker or other low skill, low paying fields. There is a "glass ceiling" that exists. it is very difficult for many women to overcome this obstacle. Even if women work outside of the home they are still responsible for the traditional family duties that women in China have performed for thousands of years. Such as:

1. Women do all the cooking, cleaning and other housework.
2. Women are also responsible for caring for the children and elderly family members.

As you can see the life of a working mother is very difficult but the traditional roles are being broken down and women are gaining more respect everyday.

Well Marco its time to go. I'll write again soon.

Sincerely,

Your Friend From the Future.
Too Much Yang, Not Enough Yin

The Chinese philosophical tradition of Taoism is founded on the idea of balance — in nature and in human relations. Its two core principles are yang and yin, representing the dualities of light and dark, sky and earth, male and female. Taoist texts teach that both nature and society seek balance, and that imbalance with this natural arrangement can bring unhappy consequences.

Chinese society is rediscovering this today. As The Times's Philip Shenon reported last week, the balance between male and female has been skewed. Under government pressure to limit families to one child each, driven by tradition that favors boys, helped by ultrasounds and readily available abortions, Chinese families have been ordering with Mother Nature in an effort to make sure their one child is a boy. The result: a stark shortage of women of marriageable age, and a lot of lonely young men.

China is not the only populous country where this has happened; a similar phenomenon is occurring in India, according to United Nations figures.

Preferences against girls run deep in both societies. Boys have traditionally been seen as assets in agricultural families; their work in the fields was valued. Girls were regarded as a burden; they would only move away to live with their husbands' families, and had to be provided with dowries. At times in Chinese history, female infanticide was accepted practice.

Recent news reports from both countries have related that these prejudices die hard. In both India and China, poor families are known to feed their sons better than their daughters. Girls are less likely to survive childhood than boys. Now, with the relatively cheap new technology of ultrasound to help identify the sex of a fetus, families can use abortion to avoid girls altogether.

The unforeseen result, at least in China, is that suddenly young women are finding themselves valued in a society that once shunned them. They are being treated with new respect, and those of marriageable age can pick and choose from a large field of suitors. They have been rescued from destitution and oblivion by a highly impersonal and newly accepted principle in Chinese life: market forces.

1. On what is Taoism based?
2. What are the two core principles of Taoism?
3. What are three characteristics of Yang?
4. What are three characteristics of Yin?
5. What have Chinese parents been doing as a result of the government's one child policy?
6. What is the result of these choices?
7. Where else in the world is this occurring?
8. Why were boys favored over girls?
9. What has happened to many girls in rural China as a result of this policy?
10. What has this done to the role of women in China today?
China's Mania for Baby Boys Creates Surplus of Bachelors

By PHILIP SHEON

BEIJING, Aug. 15 — In the free markets of the new China, young men are coming to realize that there is something even more precious than a new car, an electronic pager or a Swiss-made watch.

And that rare commodity — an unmarried woman — is becoming harder and harder to find.

There are not nearly enough of them, a situation that is creating anguish for millions of Chinese men and has at last the potential of revolutionizing the status of women in this traditionally sexist society.

"What sort of women do I want?" said Xu Wenyuan, a lonely 30-year-old who agreed to dress up in a sky-blue satin suit and to warble a few bars of "Song for the Motherland" on a television matchmaking show in Beijing. "It doesn't matter.

If he hoped to prove his desperation in search of a wife, Mr. Xu succeeded in those two minutes in front of the cameras. "Women are so hard to find," he explained. "And I just want one."

For Mr. Xu and other Chinese men in search of love, the offerings of the Chinese State Statistical Bureau are downright heartbreaking. The 1990 census showed that of a total population of 1.2 billion, about 295 million Chinese over the age of 15 are single.

And of those, there are nearly three men for every two women.

A 3-to-2 ratio might seem bad enough to most men. But the numbers suggest that the situation becomes far, far bleaker for a Chinese man the longer he stays unmarried.

The Government's figures show that while the vast majority of Chinese men marry by the time they turn 30, eight million people in their 30's were still single in 1990. And in that age group, the men outnumber the women by nearly 10 to 1.

There is an ugly explanation for the relative scarcity of unmarried women: the desire among many Chinese couples for boys at almost any cost.

The preference for boys has meant that millions of Chinese girls have not survived to adulthood because of poor health, neglect and even murder at the hands of their parents.

China's strict rule of one child per family is intended to mean a defusion of population growth, but it also means a defusion of population power, for boys.

He said a new open-mindedness among Chinese parents had loosened some restrictions on single women, who have traditions that would forbid them to marry a husband. Custom here holds that a man should marry a woman at least several years younger, and that the bride should have less education.

A result is that even after the age of 30, some women, especially educated ones, have few prospects.

"There is a saying in the country-side that a man who marries a woman who is three years older has found a bar of gold — that he can benefit from her maturity," Mr. Guo said. "Now, I think many more men will act on this proverb."

There are several theories about why a badly tipped sex ratio would affect — and probably improve — the status of Chinese women.

A Western diplomat who has studied the situation said the Government might be forced to offer incentives, like educational benefits and tax breaks, to encourage couples to have girls.

Concern About Consequences

"If this Government made it not only acceptable but in some cases preferable to have an only daughter, you’d see a huge change in the way women are treated by the Chinese people," he said.

While China's leaders tend to welcome anything that will limit population growth in the world's most populous country, there is alarm about the implications of an age-old belief that men are far more bbold about agreeing to appear. And they are bold because they have been told to be.

During the show, viewers are invited to write in for a date, and the plight of China's single men becomes all the clearer when the marriageös begin to arrive in the studio the next day.

"Maybe a man who appears on the show will get 10 letters," Ms. Yang said. "But a woman will get over 50. Sometimes over 60. Sometimes sometimes more. Our record-holder is a 24-year-old woman who got more than 300 letters."

The quandary of the timely Chinese woman is evident in the hanging lists of the young men who gather on Saturday afternoons to pass the passing crowds along Wangfujing Street, the heart of Beijing's central shopping district.

Rows of these lonely hearts lean against the storefronts, hoping that some young woman will rescue their hearts. It rarely happens, they say with a shrug.

"Sometimes the girls are very stuck up, very choosy about whether they will consider a boy for a husband," said Wang Xiang, an engineer student who, at 22, wonders that he may never find a mate.

His friend Meng Yuchang, 23, was even more insoluble. "Without more women, maybe we will all become monks," he said, kicking the ice of a sidewalk vendor's fruit stand.

"This whole generation of Chinese men will become monks. Or maybe then the women will feel sorry for us."

1. Who wrote this article?
2. What is difficult for young Chinese men to find?
3. What is the ratio of men to women according to the 1990 Census?
4. What happens to this ratio if the men are over 30?
5. Why is this shortage of women according?
6. When was the one child policy imposed?
7. Why does China have a one child policy?
8. Why are women in China suddenly happy about the shortage of men?
9. What does scarcity equal?
10. What was the custom about choosing a bride in China?
11. List two concerns that the government has as a result of the shortage of women.
12. What is the world's second most populated nation?
13. What does the television show, "We Meet Tonight" attempt to do?
Fulbright 1994/Diedrich (Transportation)

Dear Marco:

Well here is a topic you are all to familiar with, transportation. When you traveled to China you walked, used horses and boats, today people use bicycles, cars and airplanes.

The most popular method of transportation is the bicycle. There are two reasons for this choice. First, with 1.2 billion people it is very unrealistic to have each own a car. The second reason is the low cost and easy access, a bicycle costs about 200-800 Yuan, or $24 - $100 US Dollars. The roads have special lanes for bicycles. All bicycles must be registered with the Chinese government similar to cars in the United States.

As China continues on a program of huge economic development which is creating a new middle class people want to buy cars. The government is encouraging this in order to keep up the huge economic growth. Fuel is very affordable, 2-2.5 Yuan or $.20-.25 cents in US Dollars. This is going to have tremendous environmental and social consequences. There are three types of license plates, they are:

1. Green- this signifies a privately owned vehicle.
2. White or "WJ"- this signifies a Chinese military vehicle.
3. Black/Blue- this signifies a joint-venture or a foreign vehicle.

Air travel is not common for the people of China because of economic and safety issues. China has many Russian built Tuplov 154's that are not the safest plane in the world. Although today the government is buying more aircraft from the United States and taking better care of the planes. When the Chinese have more money and feel better about the safety of the aircraft there will be growth in air travel in China.

Until next time, take care!

Your Friend From the Future.
TIANJIN, China, Sept. 15 — In the People's Republic it is being called the people's car, an affordable compact sedan for the masses in the world's largest untapped car market.

The car is the focus of an ambitious effort by leaders of China's Communist Party to double the nation's annual production to three million vehicles, half of them automobiles, by the end of the decade. Increasingly, the cars would go to individual consumers; in the past the emphasis had been on larger vehicles like mini-vans that could move groups of people.

American, Japanese and European auto makers are scrambling for the right to participate in a handful of joint-venture partnerships with China's state-owned auto combines to produce several versions of the family sedan.

But many Chinese and Western experts, drawing from what happened in the United States and other industrial nations, contend that a transportation system dominated by the automobile could become a huge mistake in China, which already suffers from traffic congestion, choking pollution and dwindling supplies of oil. A big increase in gasoline consumption in China, they say, could hasten the next worldwide energy crisis.

"The automobile cannot be extended to 1.2 billion Chinese, not even to 100 million or 200 million," said Vaclav Smil, a Canadian scientist who studies the challenges to China's growth in the next century.

"That is an insane route," he continued. "There is not a single Chinese city that does not suffer from gridlock already."

Still, according to an industrial policy announced in July, China seeks to develop its automotive sector into a "pillar industry" of the national economy "as soon as possi-
On the Road In China

China's new appetite for cars marks a sharp departure from the past: As recently as the early 1950's, paved roads were rare in China, and the country depended almost exclusively on railroads.

The specifications of new-car brochures at American youngsters do not change much from year to year. The first Ferrari was sold in China this year — to a Chinese developer who already owned black and white Mercedez.

The Chinese auto industry is just getting started, said Mr. JI, 60, said, "So there will be a big demand for passenger cars in the future."

The most successful joint ventures between Chinese auto makers and their Western partners will be allowed to dominate 70-80 percent of the domestic market with their competing small sedans. The Government described its goal as one of "mass production and fewer factories and a market structure with orderly competition among a small number of large-scale enterprises."

Under the new industrial policy, China will begin building its own large-scale enterprises in 1992 and 1993.

The few dozen short stretches of modern freeway built in the last decade are almost lost in a rural landscape where dirt paths and narrow road-to-market lanes still predominate.

"If China only worries about production, without any overall transportation planning, then China is headed for big trouble," said Guo-Long, a sociologist for 2000.

"The Chinese auto industry is just at the beginning stage of development," he said, "and there is no necessity to worry about some of the problems that will crop up in the future."

China's state planners under Premier Li Peng have set the stage for solving the country's rapid economic expansion over the next two decades. The other three are telecommunications, computers and petrochemicals.

Just as the automobile captured the American dream at the expense of mass transit, China's leaders are eager for the giant internal consumer market to move to the next stage of materialism. Sustained economic growth is an urgent political requirement for the leadership, whose legitimacy flows from the ability to deliver prosperity to the masses.

China plans to put mass transit. China's leaders are eager for the giant internal consumer market to move to the next stage of materialism. Sustained economic growth is an urgent political requirement for the leadership, whose legitimacy flows from the ability to deliver prosperity to the masses.

The Chinese families, car and the coming years will emerge from a generation that is piling the world's leading auto makers against one another to design and produce economy models that individual consumers can buy for under $5,000. While no detailed specifications have been issued, the car would be made in China but incorporate Western technology of the 1990's, with emphasis on safety standards, pollution control and fuel efficiency.

Foreign auto makers already in China will see that of the three American auto companies, General Motors has been pressing foreign auto companies to make more parts locally as a condition of participation.

Because of such intense competition, Western auto makers are keeping their plans confidential. But Chrysler's chief executive, Robert J. Eaton, accompanied Commerce Secretary Ronald H. Brown to China last month, and Chrysler has been working with Daimler-Benz for a contract, potentially worth up to $1.2 billion, to make minivans and engines in Hefei.

General Motors established a $100 million joint venture with the China National Heavy Industry Corporation in 1993 and began assembling kits of its 5-10-watt truck in Shenyang, though many Chinese customers found them too fancy and costly. At this summer's Ford Motor signed agreements worth $50 million to make auto parts in Shanghai.

But what all three American auto makers seek is a full-fledged partnership with the Chinese in the mainstream of the developing domestic automotive market.

The competition is still heating up. This month both Toyota and Mitsubishi filed corporate complaints to court China's state auto plant companies. Nissan's delegation is due in November.

"China offers the greatest potential market in the world and that's why everyone is coming," said Toshiaki Yasuda, who heads Nissan's effort to find a Chinese partner by next year.

At the state-owned Tianjin Automotive Industry Corporation in this northern city near Beijing, the general manager, Ji Xiuqin, says he thinks the Chinese subcompacts

all economic growth of 13 percent. With supply still unable to keep up with demand, China's leaders overcame arguments about traffic pollution and mass transit to endorse even greater automobile production.

The Chinese fascination with cars, recalling that of Americans, occurs while big cities choke on traffic. Air pollution grows worse and officials are raising alarms that China's precious base of arable farmland will shrink further under the press of any road building.

As for energy consumption, China became a net importer of oil last year after oil production in its major oilfields failed to keep up with demand. Discoveries in the South China Sea and Tarim Basin in western China have been slow to produce results.

"Forty percent of United States energy consumption goes into private cars, and the United States is importing half of its crude oil," Professor Smith, the Canadian scientist said. "If the Chinese try to model themselves on the United States, or Japan or South Korea, there is simply not enough crude oil on the planet for them to import and, of course, it will speed up the arrival of the third oil crisis."

To create a true automobile economy would require a huge investment in roads and highways in China, which today has about as many miles of road as existed in the United States at the end of the 19th century.

The few dozen short stretches of modern freeway built in the last decade are almost lost in a rural landscape where dirt paths and narrow road-to-market lanes still predominate.

"If China only worries about production, without any overall transportation planning, then China is headed for big trouble," said Guo-Long, a sociologist for 2000.

"The Chinese auto industry is just at the beginning stage of development," he said, "and there is no necessity to worry about some of the problems that will crop up in the future."

City’s Flush Looks Like Fever Now

By PATRICK E. TYLER
Special to The New York Times

BEIJING, Sept. 5 — “Get out of the way, bread box!”

“How do you expect people to get through?” yelled Wei Qinghai, 73, as he powered his pedal-driven cab through a busy intersection in central Beijing.

The offending “bread box” was one of the 50,000 tiny mini-van taxis that provide entry-level “free market” jobs for the city’s surplus laborers. The vehicle was blocking the bicycle lane, where the throng that included Mr. Wei’s chain-and-sprocket surrey, with its blue-and-white plastic canvas, was trying to make headway.

If capitals reflect national character, then the Chinese may be showing symptoms of nervous breakdown. Beijing is growing so fast that even Deng Xiaoping, the country’s 90-year-old paramount leader, has told friends he does not recognize it anymore. The estimated population is now more than 11 million.

Traffic snarls lie like surly dragons across the city’s freeways and ring roads these days, and the heat of summer gifts a furrowed and furtious look on people’s faces.

Blood pressure levels are up here, according to the latest medical surveys, because ordinary people — known in Mandarin as “old-huntied names” — are throwing themselves onto the free market with a vengeance and stopping only to eat greasy fast food from the new Japanese and American franchises.

Serious crime, especially murder and kidnapping, jumped 18 percent last year. Beijing residents were shaken this summer by a brutal murder case at the Academy of Film compound, where thieves apparently broke into the luxury apartments of two well-known television actors and cut the throats of the wives of both men and a child of one of them.

The stench from the public toilets has become so offensive in some neighborhoods that The Beijing Daily cried that their “bad condition is affecting the image of Chinese civilization.” The city has offered a big prize for the best designs of a better public toilet.

Meanwhile, on the streets, a huge subway construction program to add 180 underground rail miles has turned many already cramped arteries into construction sites. A gang of enterprising thieves has been stealing manhole covers, leaving axle-wrenching traps for any vehicle less sturdy than a battle tank.

New office towers and shopping centers are out-running the city’s capacity to provide them with electricity or to guarantee future water supplies. Prices for staple grains, eggs and vegetables — up 40 to 50 percent from a year ago — are also getting on peoples’ nerves.

The mood of Beijing residents in all this chaos is steamy, like the city’s dumpings, and that has made the summer weather seem even hotter.

“Beijing is growing so fast that even Deng Xiaoping, the country’s 90-year-old paramount leader, has told friends he does not recognize it anymore. The estimated population is now more than 11 million.”

Dear Marco;

This letter will discuss the traditional house for the Chinese who live in urban areas such as Beijing. The 1.2 billion population plays a critical role in how the Chinese live. One area of Beijing is called the Juan dong which are homes and communities that are over 200 years old. This community system of neighborhoods is known as danwei, which can also be translated into work units. The old communities are being torn down at a rapid pace to make room for the ever growing urban population. The high rise apartment is replacing the traditional danwei. Under the Chinese government you could be moved at anytime and anywhere.

In the rural areas, such as the areas around Xi'an, a house will have many rooms and numerous generations of one family will live in that house. As you enter the home from the street you find the kitchen in the hallway. It is far away from the living areas because the Chinese use coal for cooking and the smoke would get everywhere. Then you exit the kitchen to find an open court yard that usually has a small garden. When the Chinese see the way homes are arranged in the West it is difficult for them to ever think they could live in such a closed in shelter. The rooms are all around the court yard. The largest room in the house is the living/dining room. In this room one finds family pictures, the TV and other family memorabilia. This room is also used for eating when it is too cold outside. Remember the Chinese place great importance on the family and the needs of the group over the needs of the individual. This philosophy is shown in the arrangement of the house. The bedrooms are very small. Very little time is spent in the bedroom, all reading, TV, and other activities are done in the court yard or living room.

Take care of yourself Marco!

Your Friend From the Future.
Ancient Chinese Craft Reshaping Building Design and Sales in U.S.

By ASHLEY DUNN
Special to The New York Times

NEW YORK. Sept. 21 — After six months of tough negotiations with a group of Taiwanese investors, Barry Lewen, a real-estate broker, thought he was just days from completing the $14-million sale of a building at 366 Madison Avenue when he was unexpectedly told there was one last detail.

The investors insisted that before anything more was done, a Chinese mystic had to be flown from Taiwan to determine if the building's qi, or life force, was acceptable. "I thought they were joking," said Mr. Lewen, an executive managing director of The Galbreath Company, a Manhattan real-estate company.

A few days later, however, he anxiously watched as a practitioner of the ancient Chinese craft of feng shui paced the site for 30 minutes before giving his approval.

"I wasn't sure if he was a witch doctor or what," Mr. Lewen said. "I can tell you there were a lot of sweaty palms."

Long a tradition in the Far East, the millennia-old craft of feng shui (pronounced FUNG-shway) has begun to exert a subtle influence on the hard-edged world of real estate in America. Feng shui, which means "wind" and "water" in Chinese, is a blend of astrology, design and Eastern philosophy aimed at harmonizing the placement of man-made structures in nature.

Driven by the influx of investors from Hong Kong, Singapore, Taiwan

An Ancient Chinese Craft Shapes Modern Design

The first rule of real estate may one day read: Location, location, feng shui. With Far Eastern investment growing, developers are being called to pay attention to the craft of feng shui, which aims at harmonizing the placement of man-made structures with nature. Architects for the China Trust Bank in Flushing, Queens, listened and moved a two-foot-high water fountain into the cash machine vestibule, entrance to the north and sheathed the building in an earth-toned glass is still under discussion, but Mr. Cooper said that the advantage is so important to developers and designers. The former Gulf and Western Building on Columbus Circle, 40 Wall Street and the China Trust Bank in Flushing, Queens, are among projects in which developers called in feng shui experts to review sites.

In West Orange, N.J., the developers of the Eagle Ridge residential development toured their project with full-page advertisements in Chinese and English featuring a China-town feng shui master, Tin Sun, who declared: "If feng shui is unsalable!"

Even the $3.2 billion Riverside Square project on the Upper West Side could include some element of feng shui, in the guise of the entry of a group of Hong Kong investors as Donald J. Trump's new partners in developing the site. "It is just another element in which you can have the advantage over other commercial investors," Mr. Trump said. "Aesthetics are becoming a big part of our market and this is something we can't ignore."

Although the craft, known as geomancy in English, originated at a time when rural villages and crude structures, feng shui masters say, that analyzing the effect of modern structures, like elevator shafts, car traffic and air-conditioning ducts, follows the same principles.

In the basement of the Wing Fat Inn in Hong Kong, the office of Master Tin Sun and his daughter Master Pun Yin, a Hunter College graduate in film production who has worked with her father since she was a teenager, there is a practical tradition of feng shui that relies on analysis of the physical attributes of a site using the hoopen, or feng shui compass, and the astrology of the client to determine the most auspicious arrangement.

It is not advisable to have bridges in close proximity. They create tension and negative forces.

Pleasant Place, but How's the Feng Shui?

FENG SHUI

The ancient Chinese craft of feng shui (pronounced FUNG-shway) is the practice of arranging surroundings to promote prosperity and harmony. Here are basic guidelines from Tin Sun, a feng shui master, for assessing the feng shui of an urban apartment.

EXTERIOR

- A building should not have its front door facing a garbage truck or parking. Care and lights create negative forces that disturb the peace.
- There should not be any sharp objects or corners facing a doorway of a building or apartment. The corners are like arrows, shooting negative energy toward the building and its tenants.
- One should avoid facing glass buildings. The buildings would absorb the negative energies of their surroundings and reflect them back.
- If a building is on a hill, the back of the building should not be on the lower part of the slope. It would be like a chair without back support — the energy would roll down the hill.
- It is not advisable to have bridges in close proximity. They create tension and negative forces.

INTERIOR

- An apartment should not be next to or facing an elevator, especially if one hears the mechanics of it. The humming of the elevator machinery disturbs the flow of qi, or life force.
- When one enters an apartment, the stove should not be visible. It can turn happiness into sorrow because of its concentration of fire, which disturbs the peace of the space. This is a common cause of family problems.
- An apartment should not be next to or facing a garbage disposal chute, which draws away energy from the apartment. Moreover traffic sound the chutes also disrupts peace.

Method as a Silly Gimmick

For believers, feng shui can influence every aspect of their lives, from the selection of a grave to the orientation of their desk and bed. But even nonbelievers say that using feng shui has become a business necessity in some cases because the practice is so important to the Chinese.

Edward Yu, president of Fung Shui Properties, which is renovating the 12 million-square-foot office building at 40 Wall Street, said that even though he was an avowed nonbeliever, he still commissioned the construction of a $500,000 pool in the building's lobby on the advice of a feng shui master. "It's like killing two birds with one stone," he said. "Other people will see it as an alternative address. But for the Chinese, when they see it, they will know this is a well-planned building." Before embarking on a $250 million renovation of the Pershing International Tower and Hotel, formerly the Gulf and Western Building, on Columbus Circle, Scott Cooper, an executive managing director of the Gerberstein Company, decided to call in Master Sun for advice and hearing that many potential tenants were looking for feng shui. Whether architects will heed the master's advice to move the main method as a silly gimmick.

Chinese homes become castles of comfort

THE number of city residents who have metal security gates is not only an indicator of the threat of urban crime. Chinese people have much more possessions worth protecting than they ever used to own.

Individual private property holdings have increased rapidly since 1978 when the country adopted the policy of reform and opening to the outside world.

During the 1960s and 70s, Chinese households considered a radio set, sewing machine, wrist watches and a bicycle to be the four major items of private property. They were regarded as the four big belongings that a bridegroom should offer his new wife. By the mid-1980s, however, the four major possessions had gone up-market and high-tech. They included a TV set, a refrigerator, a tape recorder and an electric fan. The Chinese yearning to make his home a comfortable castle continues with the current acquisition of air-conditioners, video recorders, motorcycles, cars, stocks, insurance policies and, the ultimate status symbol, one's own car and apartment.

Latest official statistics say Chinese citizens possess more than 2,000 billion yuan ($230 billion) in financial assets. By the end of 1993, total savings by Chinese citizens amounted to 1,400 billion yuan ($162 billion). This indicates that individual savings are the major source of bank funds.

In addition, citizens also had 500 billion yuan in cash in hand, 400 billion yuan invested in stocks and securities and 4.5 million credit cards.

Chinese citizens possess more foreign currency than ever before. At the end of last April, their foreign exchange savings accounts surpassed $10 billion.

A survey of 180 million farm households in 1992 showed that on average, each family owned property worth 6,280 yuan ($713) and big farm tools, transport tools and industrial equipment worth 1,544 yuan ($189).

In Tianjin's rural outskirts, one-tenth of the farm households possess big farm or transport equipment such as a truck and tractor.

**Private property**

A survey by the Tianjin municipal government last year found that on average, each urban household owned 12,600 yuan ($1,448) worth of private property. This comprised nearly 8,000 yuan in material goods and 5,000 yuan in savings accounts. Excluding the Special Economic Zones, Tianjin ranks fourth behind Shanghai, Guangzhou and Beijing in the income of its urban residents.

Gao Yan of Tianjin, recently spent 20,000 yuan ($2,220) on decorating the house allotted by his work unit. He recalled that in the 1970s, he and his wife earned less than 100 yuan ($11) per month and they only possessed a radio set, a bicycle and several pieces of furniture.

The family's current income is in excess of 3,000 yuan ($348) every month. They now have a host of electricals and a motorcycle. Besides, the family also has savings in bank accounts and stocks.

The rise in personal ownership has created an insurance market for household property. At the end of last year, half of all households had property insurance cover.

Professor Li Lianjin, who has long been studying the private economy in China, attributed the rapid increase in the Chinese people's private property to the government's policies of encouraging the people to prosper and of respecting and safeguarding private property.

In the 20 years before 1978, the Chinese Government limited ownership to the whole people and restricted the private economy. After the launch of reforms in the late 70s, the private economy resumed its legal position. The household contract responsibility system was popularized throughout rural areas. Provisions concerning the safeguarding of individual property were included in the Constitution in 1988.

The laws and regulations promulgated in its wake also stipulated that citizens should enjoy complete rights of owning, utilizing, profiting from and disposing of their legal private property. Although the publicly-owned sector still dominates the country's economy, the private economy has made enormous strides in recent years.

By last September, there were 210,000 registered privately-owned enterprises with total registered funds of more than 40 billion yuan ($4.6 billion).

Nowadays, signs of the private economy are visible everywhere. Among the 140,000 shops and markets throughout Beijing, some 80 per cent are managed by individuals. About 80 per cent of the meat, eggs, fowl, fish, vegetables and fruits consumed daily are supplied by privately-owned enterprises or individual peddlers.

**Chances**

As Chinese people have accumulated personal property through hard work over the last 12 years or so, they have also created chances for their own development. Their concept of values has also changed dramatically. Those who have prospered through hard work win respect from all sectors of society.

To date, 5,400 owners of private firms have been elected as deputies to the People's Congresses above county level. A further 8,500 have been elected members of committees at various levels of the Chinese People's Political Consultative Conference (CPPCC), a consultancy body to the National People's Congress.

Professor Li holds that more freedom in the economy and the increasing of private property ownership has given the Chinese people more room and better conditions for fulfilling their individual potential. Meanwhile, the expansion of personal investment also shows confidence in the future of the country.

Professor Li also pointed out that although the income and private property of the 1.2 billion Chinese population have increased in general, some 80 million still live at subsistence level.

Therefore, the government has encouraged those better-off people to help the poor and has taken various measures to avoid any widening of the gap between the rich and the poor so as to maintain social stability and development.

Wang Hui, vice-president of the Chinese Society of Sociology, predicted that with the establishment of a socialist market economy, the country's economy will continue to grow quickly and the Chinese people's private property will further increase by large margins. Since the government will rely more and more on economic and legal means and relinquish administrative means for running the country, it will pay more attention to the people's interests while making policies.

15. What has the government encouraged the better-off people to do for the poor? Why?
Fulbright 1994/Diedrich (Economy)

Dear Marco;

Well I've really enjoyed writing these letters about modern China. I hope that they are helping you understand all that has changed and is happening in the People's Republic of China. This letter will discuss the economy of China today. Economics is the study of trade, money and the interactions of people and their choices.

In the United States our basic unit of trade in the US Dollar. China uses the Yuan. The average person in the United States makes about $22,000. In the People's Republic of China the average income is 9,600 Yuan or $12,000 US Dollars.

Change in China's economy is the biggest issue. In 1978 Deng Xiaoping, the leader of China set in motion a series of economic reforms that led to what is known as the socialist market economy(1992). The controlled economic polices from 1949-1978 led China to be a backward, semi-colonial nation. So in December, 1978 the Four Modernization's were put in place to bring China up to world economic standards. The Four Modernization's are:

1. Industry
2. Agriculture
3. Defense

In urban areas this reform is known as the contract system of responsibility. This became common in 1987. This contract placed more emphasis on production, quality control, profits and benefits than ever before. There is a movement to combine state and private business in order to keep control over the businesses while giving individuals the freedom to have growth and use capitalist policies. There are four types of combined businesses. They are:

1. Collective ownership- Here a business is owned by a group of individuals that are Chinese.
2. Private ownership- Here a business is owned by one person who is Chinese.
3. Sino-foreign Joint-ventures- Here a business is owned by a Chinese company and a foreign company. The foreign company brings the capital while the Chinese company provides the infrastructure, market and labor.
4. Exclusive Foreign Ownership- This is when a company is owned completely by a foreign company.

With the urban area reforms, companies such as Kentucky Fried Chicken, MacDonalds, Coke, Pepsi, Pizza Hut, Hard Rock Cafe and
many other international companies that are becoming very popular in China.

Rural reforms were based on the household contract system which is an agreement with the government to produce a certain amount of a product and then the surplus, or extra, can be sold for personal profit. Since the beginning of the household contract system there has been a 50% increase in production of agricultural products.

Price reforms were the next necessary step in improving China's economy. Before 1978 97% of all pricing was controlled by the government. Since 1978 there has been a gradual reduction of price control. Now only 25% of products are sold at the "recommended price" and 45% of products are sold at their true market price. Price reform is creating a new middle class that is growing each day.

The final reform was a movement toward global expansion and investment in China. During the 1980's the Chinese government developed Special Economic Zones in the Guangdong and Fujian provinces in order to encourage foreign investment in China. There are special incentives to bring companies into these zones. Since the 1980's these zones have been expanded.

So Marco, a communist country is attempting to set up a capitalist economy. It is difficult because the normal developmental pattern of nations has shown that with limited economic freedom the people will want political freedom. This is a huge question in China's future; will economic freedom lead to political freedom? What will this do for the stability of China?

Well take care!

Your Friend From the Future.
Shanghai Cab Driver Activity

This activity is designed to show how a family in China has to budget their money in order to survive. This is based on a true story. You are a cab driver in Shanghai. Your work schedule is a twenty hour day from 6 AM-2AM every other day. The cab you drive is shared with one other driver who drives on opposite days. The cab is owned by a local hotel. You and your partner must pay the hotel 10,000 yuan a month. You are 44 years old, with an unemployed wife and a 13 year old son. You have been a taxi driver for 24 years. On an average month you bring home, after paying the hotel, 1,750 yuan a month. Now create a monthly budget for you and your family. You must buy the items in bold print!! On your own paper write down what you bought, how much it cost and subtract it from your total income of 1,750 yuan. Here are the things you may purchase:

Food
You must buy 20 bottles of something to drink.
You must buy 10 pounds of meat or fish.
You must buy 25 pounds of vegetables.
You must buy 1 bottle of soy sauce.
You must buy 40 pounds of rice.

Watermelon 5 yuan
Cabbage 5 yuan
Ginger 3 yuan
Garlic 3 yuan
Garden veggies 8 yuan
Onions 3 yuan
Soy sauce 10 yuan
Rice 20lbs 35 yuan

1 pound of tea 16 yuan
Soda -2 bottles 8 yuan

1 pound of beef 18 yuan
1 pound of pork 18 yuan
one fish 10 yuan
peanut oil for wok 10 yuan
1 pound of chicken 18 yuan

House Expenses
You must pay all these.
Rent 350 yuan
Electricity  30 yuan

cost for fuel  30 yuan

Taxi cab expenses
You must pay all of these.
Gas for month, 2.5 yuan per gallon, you need 40 gallons.
General car maintenance, 20 yuan.

Personal expenses
Soap  3 yuan
deodorant  3 yuan
toothpaste  3 yuan

Other expenses, these are optional
Night out for dinner 35 yuan
School supplies  5 yuan
Donations to temple  5 yuan
Movie  8 yuan per person
Book  12 yuan per book
China Daily - China Stock Listing, June 27 - July 1, 1994

1. How many stocks are on the Shenzhen Securities Exchange, A Shares? ______ 
   B Shares? ______

2. How many stocks are on the Shanghai Securities Exchange, A Shares? ______ 
   B Shares? ______

3. Look in your local newspaper's business section, how many stocks are on the: 
   New York Stock Exchange: ______
   American Stock Exchange: ______
   NASDAQ: ______
   You can estimate this by counting the number of stocks in a column and then multiplying the number of columns on the page.

4. What is the main difference in the U.S. Exchanges and China's? What does that tell you?

5. On the China Stock Listing, which A Share had the greatest loss?

6. On the China Stock Listing which A Share had the greatest gain?

7. On the China Stock Listing which B Share had the greatest loss?

8. On the China Stock Listing which B Share had the greatest gain?

9. In what currency are the A Shares on the China Stock Listing?

10. In what two currencies are the B Shares on the China Stock Listing?

11. What was the high and the low price for the following A Shares:
    - China Bicycles
    - Chinwan Wharf
    - Dongfang Hotel
    - Monkey King
    - Wuhan Store
    - Dragon Head
    - No. 1 Food Store
    - Dazhong Taxi

**BEST COPY AVAILABLE**
Dear Marco:

This letter discusses a relatively new science called archeology. Archeology is the study of material remains of earlier people. Chinese archeology became very popular in the early 19th Century and into the 20th Century. I'll divide Chinese archeological finds into six periods.

The earliest artifacts with writing were found in China are called "dragon bones," bones with inscriptions. The inscriptions are in an ancient pictograph script. Each bone described early Chinese rituals. These "dragon bones" date back to 1200-1050 BC and were first found in the 19th Century AD.

The Neolithic Period (ca. 5000-2000 BC) is defined by the man made tools found before the development of metal. The Ban Po Archeological Site found just outside of the city of Xi'an is one of the most complete Neolithic sites found in the world. It was first excavated in 1953 AD. At this site 10,000 artifacts were found. The most interesting where the red clay vessels with painted designs made of black and burgundy. Other artifacts found were weapons; bow and arrow, 2 clay balls with a string that can be thrown for hunting, nets and fish hooks.

Many of the Ban Po artifacts have similar paintings as the early people of my region in North America, as well as Minoan paintings from the island of Crete in Europe. It raises the question of spontaneous civilizations theory. This theory states that all early civilizations would develop independently with similar characteristics. Another theory is based on the idea that there was contact between these civilizations and a transfer of ideas, art and other parts of culture.

The third period I'd like to discuss Marco, is known as the Bronze Age (1700-1050 BC). The Chinese today call this period the Shang Dynasty. This dynasty was shown to exist in the 1930's with the discovery of Anyang in the northern part of the Henan Province. From 1300-1050 BC Anyang was the capital of the Shang Dynasty. The remains of a bronze and pottery workshop. The most important and useful find was the remains of the ancient palace. From these remains archeologists were able to determine that they performed human sacrifices, created jade and bronze vessels. Ancestor worship was also an important part of this early culture.

The next period in Chinese archeology is also part of the Bronze Age known as the Western Zhou Dynasty from 1050 BC-771 AD. This
group lived in the Wei River valley which is a tributary near Xi'an with many artifacts similar to the Shang Dynasty. Their government was ruled by a group of feudal lords, similar to the feudal lords of the Middle Ages in Europe. The most important artifacts carried long inscriptions about government, religion and other important issues.

The Late Bronze Age is known as the Eastern Zhou Dynasty (770-221 AD). This archeological period had a huge bronze casting industry. It was in high demand from the local lords. The increase in demand was met by the lost wax casting, developed from 550-430 BC. Iron smelting of agricultural tools also began at this time. There was also contact with the nomads of Central Asia showing the beginning of contact with the West. Jade work also improved during this archeological period.

The final archeological period I'd like to discuss the terra-cotta warriors in Xi'an. There are about 6,000 life-size individual terra-cotta warriors and 40 chariots made of bronze and wood. These terra-cotta warriors were put under the ground by Emperor Qin Shi Huang Di as part of his grave site. In 1973 AD this site was found by peasants digging a well.

When I walked into this archeological site I was overwhelmed by the magnitude and uniqueness of each warrior. China has a long history and the Chinese are aware of this history because of places like this. My first impressions of this site were: "So many faces standing guard over time; uncovered, unearthed for the world to see. Power, wealth, duty, history. It surrounds you and lifts you, so strong, so special. Majesty, beauty and splendor of a nations history.

So many faces of broken warriors awaiting resurrection and reconstruction. The footprints on the historical dust moving toward the rebirth of a warrior by an archeologist. The past meets the present, linked together for centuries. The warrior known today only by a number; T22."

Each warrior has unique features. The warriors are facing east ready for battle. The tomb faces the river with the base at the foot of a mountain. The Emperor can rest his head on the mountain and put his feet in the river for comfortable rest through the ages.

The warriors were created on an assembly line, so the Chinese invented the mass construction of an object. Many people believe it was Henry Ford in the United States and his automobiles.

Marco, the people of China, in your time and in the 20th Century have such a deep understanding of their history. No country I have ever visited in the world can match the depth and experience of China.
YICHANG, China — Digging deep into the scarlet earth along the banks of the Yangtze River, China’s archeologists are in a race against time to save the relics of nearly 8,000 years of Chinese history that will otherwise be trapped forever beneath a lake created by the world’s largest dam.

The project, the biggest archeological expedition ever conducted in China, is expected to bring together thousands of archeologists who will try to excavate more than 300 square miles of the river bank before it is covered by the new superdam’s reservoir.

The dimensions of the archeological effort are matched only by those of the dam itself. The Three Gorges Dam, named for the rock formations along the Yangtze that are among the most cherished natural wonders in China, is expected to provide electricity equal to 10 nuclear power plants, and it should forever end the threat of flooding in densely populated areas downstream.

But beyond a price tag of at least $20 billion, the dam will exact a terrible cost, including the forced relocation of more than one million Chinese whose homes will be washed out by the river, and the destruction of areas of the Yangtze river bank considered a cradle of Chinese civilization. Even the Three Gorges themselves will be destroyed as a result of the dam.

“Feel the pressure,” said Yao Ying Qin, director of the national archeological museum in Yichang. “It is like my shoulders have been weighed down from all the pressure.”

Mr. Yao is overseeing the effort to save the relics along the Yangtze, a project that will be carried out in stages into the early part of the next century. The archeologists struggling to stay ahead of the construction teams that are building the dam. Construction began last year and is expected to last until 2011.

“If I fail to do good work on the preservation of these relics, we will have dishonored our ancestors,” he said somberly.

Chinese archeologists say the only comparable project of modern times was carried out in Egypt, when the Nile was dammed at Aswan, flooding out river banks that held the tombs of thousands of years of Egyptian civilization.

With the help of an international campaign led by the United Nations, the Egyptians transported the 3,000-year-old stone temples built by Ramses II at Abu Simbel to a new home in the north before they could be buried by a lake that formed behind the dam.

Yao Ying Qin, director of the archeological museum in Yichang, China, holding a cooking pot last month that he described as being about 7,000 years old. The pot was among treasures of Chinese antiquity that were excavated from an area that is to be inundated for the Three Gorges Dam on the Yangtze River.

The Chinese think that they will need an international effort at least as large to save their relics.

The initial budget for the project is nearly $180 million. Government archeologists say they hope that the United Nations and foreign researchers will join them in carrying out the excavations — and paying for them.

Archeologists working from the museum at Yichang, the riverside city in central China where the dam construction teams are based, began intensive work along the river several years ago. They say the discoveries so far have cemented the theory that the Yangtze is as much the birthplace of Chinese culture as the Yellow River basin, long assumed to be the sole cradle of Chinese civilization.

“What we have already discovered along the Yangtze provides a written historical record of China,” said Mr. Yao, the museum director, leading visitors to a room in the museum where he displays the recent discoveries from Zhongbaodao, a village near Yichang.

In 200 ancient tombs and other sites in the area around Zhongbaodao, archeologists have uncovered thousands of items of pottery, porcelain and stone ware dating back nearly 7,000 years and possibly beyond.

The stone objects included polished tools and axes. A kiln dating back 3,000 years to the Shang Dynasty was unearthed. At almost every site, the archeologists found jade, often elaborately carved, that had been used for rings, bracelets and necklaces.

“Do you see the workmanship, the artistry?” Mr. Yao asked, cradling a fragile reddish-gray pot intricately designed with a pattern of feather-like swirls. “This dates from 5,000 years ago. As you can see, our ancestors were very skillful artisans.”

The archeologists began their work at Zhongbaodao because it was among the sites scheduled to be destroyed as a result of the construction work on the dam. “I think that after careful work, we have excavated all of the important sites there,” Mr. Yao said of Zhongbaodao. “We have removed everything that is valuable.”

The question being asked quietly among China’s archeologists — who are Government employees and cannot question the Government’s policies without risk to their jobs — is whether they will have the time, the people and the money to perform equally thorough excavations across the hundreds of square miles of river bank that remain unexplored.

There seems to be no way to stop the dam, despite protests from environmentalists, human rights groups and foreign governments. Beijing has staked national prestige on the project, which was first proposed in the 1920’s by Sun Yat-sen and was later championed by Mao Zedong.

Several big archeological sites have already been earmarked for preservation, including a number of stone temples that will have to be taken apart and then reassembled in new homes. Archeologists are particularly eager to preserve an intricate carved four-story stone temple built in Sichuan Province during the Ming Dynasty to honor a legendary general, Khang Fei.

But saving just one temple will cost millions of dollars, and there are several other endangered stone monuments nearby that are considered nearly as valuable.

“We want the whole world to help us save these treasures because these artifacts do not belong just to China, said Mr. Yao, who is polishing his fund-raising pitch for foreign donors. “They belong to the world.”

20. List two problems that need to be solved to make the project work.
China Moves Forward On Huge, Disputed Dam

By PATRICK E. TYLER

BEIJING, Dec. 23 — After decades of engineering studies and political contest, China has started construction on the Three Gorges Dam, the largest hydroelectric project in the world, which is to become the starting focus of China's development.

Although excavation began last month, project engineers acknowledge that uncertainties still abound over the mammoth undertaking, which will become the largest single draw on China's capital budget for more than a decade. The dam is scheduled to be completed in 2009.

Earlier this year, the New China News Agency, in a dispatch from Yichang, said a huge mass of 10 million cubic feet in size and perched less than 40 miles upstream from the dam, could come crashing down with catastrophic consequences for nearby towns. Earthquakes in the region would be "likely to cause the Huangla Stone to fall into the river," the official news agency said. "A news conference this morning in Beijing will raise the money by raising international bonds, but the interest on those bonds has not been set.

"Construction of the Three Gorges Dam is not only of strategic importance to China's development," Mr. Gao said. "It is an opportunity for the international financial, industrial and business sectors."

The message of the news conference was a call to large banks, American and European firms in the power-generation business to consider being part of the Three Gorges project with the huge bonds, transmissions and other heavy machinery it will require. And new developers are being created, all of whom will have to be willing to share their technology and bring their own funding for the project.

In a ceremony that seemed hastily organized and in which foreign news organizations were not invited, Premier Li Peng gave a news conference marking the start of the project in the city of Yichang in central China that month in January last year. Mr. Li appeared to have reservations.

"Some scientific assessments of the project still need to be translated continuously," he told local party leaders. "We acknowledge that the large-scale resettlement effort would be difficult." And addressed project engineers, Mr. Li said that "we should take all aspects of the design "will be perfectly safe."

Mr. Li, who serves as head of the Cabinet and is considered the country's political leader, also said that the project would be "a massive undertaking" and that the initiative "is an important stepping stone for the development of China's economy."

Many Chinese believe that Mr. Li and his policies will be more vulnerable to criticism after Mr. Deng's death.

The huge Three Gorges Dam is being built at Yichang.
Teacher's Notes-Chinese Proverb Art Project

Assign each student a proverb with the Chinese Characters and English translation. Then distribute a large white sheet of paper or a plain paper kite for the student to draw what image they see from the proverb in color with the Chinese Characters and English translation in red. On the back have the student describe the proverb in their own words.

These proverbs were taken out of a book written by Ruthanne Lam McCunn titled, Chinese Proverbs.
A good bee never takes pollen from a fallen flower.

Do not wait until you're thirsty to dig a well.

Water can both sustain and sink a ship.

Water can drip through stone.
If the horse dies, then you have to walk.

Flowers look different to different eyes.

Better to do without books than to believe everything they say.

One fool cannot stand on two boats.
An avaricious person is like a snake trying to swallow an elephant.

Beware the person with a Buddha's mouth and a snake's heart.

It does not matter if the cat is black or white so long as it catches rats.

The eyes are wide but the stomach is narrow.
A good friend shields you from the storm.

You cannot satisfy hunger by drawing a cake.

Ants can move even a mighty mountain.

Tigers and deer do not walk together.
Dear Marco:

Today's letter will discuss Chinese painting, Neolithic jade art, cloisonné and kites. China has many other types of art that could take a lifetime to study. Therefore I'll limit my discussion to the above four areas.

There are four categories of painting:
1. landscapes
2. human figures
3. animals
4. buildings.

The 13th Century was the most important time for Chinese painting, especially landscapes, figures, birds and flowers. Painting was an acceptable leisure activity for the scholar-officials. Monochrome, or one color art became very popular. Chinese artists favored three aspects of monochrome art:
1. The linear qualities, line were used for designing paintings.
2. The artist would use different shades of the same color to clarify patterns.
3. The supplies that the artist used were natural and created great variety in Chinese painting. (Animal hair brushes, pine-soot with glue for the paint and silk or rice paper surfaces.

Today Chinese art follows the traditions of 13th Century artists with unique variations. Minority groups also have added more color to Chinese painting.

The Neolithic jades were created during 5000-2000 BC., it is one of the oldest artistic activities. Jade is polished stone. There are two types of stone used:
1. Nephite- this was the most commonly used in the Neolithic period. It is made of copper and magnesium.
2. Jadeite- this is a green gem quality stone that is mainly imported to China from Myanmar (Burma). The color is caused by impurities in the stone. You must use stone to carve this stone. Making it very difficult to carve and shape these two stones. Yet all over China you find carved stone. It plays an important part in Chinese culture.

When in China we visited a cloisonné factory in Beijing. Cloisonné is an art in which copper wires are formed into shapes and secured to vases or walls then the shaped areas are filled with color and baked. Then the art piece is polished. The vases and screens are famous throughout the world.
The final art that I'll discuss in this letter is the art of kite making and flying. Kites have played an important role in the development of Chinese history. Today most kites are made of paper or silk. The kites are then painted as certain animals or images such as butterflies, dragons or birds. This is a very popular hobby in modern China.

Talk to you soon,

Your Friend From the Future.

[54x273]a
[54x290]I LA! cl 1 'LILA;
[80x85]By PATRICK E. TYLER
[102x74]BEIJING, Jan. 6
[102x136]Lu Fel, a rounder former drummer and oper
[116x68]sumer who mustered out of the army
[123x68]and into China's rock music scene a
[131x67]few years ago, sighed recently and
[138x67]said what most young people in the
country already know, "Rock-and-
roll in China is sort of lost now."
[159x74]Puffing on his Chinese cigarette at
[166x77]a Western hotel restaurant, Mr. Lu,
[174x67]who manages a rock band named
[181x67]Stones, added: "Everything in China
[188x67]is sort of lost now, without an an-
[195x67]chor. The music we do is for other
[202x67]people to explain because we don't
[209x67]already know what it means."

His lament is the lament of what
seems an ever smaller circle of
young Chinese who remain devoted
to the rock music culture that was
spawned in the 1980's by China's
ups. to the outside world and by
the loosening of Communist Party
controls over the country's social
life.

The heady days when China's dis-

turbance became rock music thrum-

banged in 1989, when the death of
Tiananmen Square demonstrations. Now, he says, "Sometimes I can play, sometimes I can't play."

For the Rockers Now, China Is a Hard Place

Continued From Page HI

carefully controlled by Public Secu-

sity forces, with many events can-
celled at the last minute on the whim

of any police official who decides

they might disturb political tranquill-

ity.

Mr. Cui's latest album, "Eggs

Under the Red Flag," is another cry

from the anchorless youth of China

for direction.

"Money is fluttering in the wind,"

the title song says. "We have no

ideals."

Mr. Cui acknowledges the politi-

cal overtones of his music.

"I think politics is a very im-
portant part of any kind of art," he

said. "But lyrics from the song take ref-

uge in illusion and direction:"

The time is now
But who knows what we should do?
The red flag is waving
It has no clear direction
Revolution is ongoing
The old men are still in power.

Asked for an interpretation, Mr. Cui
said the song was about hope.

"I don't want to say something

very clear," he said in the interview.

"Because we don't understand a lot of

things yet."

Lamenting the decline of political

lyrics in Chinese rock music, Mr. Cui

added: "Nothing in My Name"

changed my life. But today, there

aren't so many musicians and many

Chinese young people just enjoy the

rock-and-roll that is coming from the

West at the moment. There aren't

many Chinese productions."

As the rock culture drifts, there

has been a surge of a more tolerated,

indeed more encouraged, musical

genre as performed by the Canton-

esque balladeers of Hong Kong and the

karaoke kings of Tokyo. They are

seeking markets that appeal to

youthful sentimentalism, the oppo-

site of rock's anger.

There is even a Hard Rock Cafe in

Beijing now. Its opening featured a

performance by the rock legend B. B. King, but China's young rock-

ers were mostly excluded from the

extravagant crowd of businessmen

and journalists who received special

invitations to promote the event.

"I was one of the one's outside that
day," Mr. Lu said. "I couldn't get in."

Last fall, the Ministry of Culture

staged an officially sanctioned pop

music extravaganza. The culture re-

porter of the semiofficial China Day-

ly dismissed the event under a head-

line that said, "More a Breeze Than a

Gust." In something of an emascula-

tion, the reporter observed, "During the

150-minute-long show, no hysterics

broke out."

8. Can Cui Jian have a regular concert schedule? Why or Why not?

9. What is the title of Cui Jian's latest album?

10. What is the theme of this album?

11. Explain, in your own words, the meaning of the lyrics of Cui Jian song?

12. Who performed at the Hard Rock Cafe's opening?
Silken Badges Bearing Mysterious Messages

By RITA REIF

Throughout history, visual symbols have been used the world over to designate status. In China, symbols in the form of insignia took on special significance at the beginning of the Ming dynasty. Around the year 1390, the emperor formalized the use of insignia with an imperial edict: court officials were ordered to display their civil or military rank by distinctive badges affixed to their robes. The decree remained in force for more than 500 years.

The wealth of silk-embroidered squares produced were embellished with brilliantly colored images of birds and animals, each imbued with political and social meaning. By 1911, at the end of the Ching dynasty, such insignia became obsolete. But Western tourists and scholars began collecting them as souvenirs and historical documents.

One of the finest such collections formed on this continent can be seen in "At the Dragon Court: Chinese Embroidered Mandarin Squares From the Schuyler V. R. Cammann Collection," an exhibition at the China Institute on the Upper East Side of Manhattan, through Dec. 22.

The 50 examples of badges for the elite on display, made between the 17th and the 20th centuries, were selected from the 100 pieces acquired by Cammann, a lifelong student of Asian art who was a professor of East Asian studies at the University of Pennsylvania from 1948 to 1982. He purchased these things mostly in China," said Jeffrey T. LaRiche, a friend of Cammann's, who is an associate director of the United States Holocaust Memorial Museum in Washington and was a student of Cammann's in the 1940s. Upon Cammann's death in 1991, his collection was donated to Yale University, his alma mater.

After Schuyler Van Rensselaer Cammann graduated from Yale in 1935, he went abroad, as part of the Yale-in-China program, to teach for two years in Chongsha, the capital of Hunan Province in central China. He extended his stay for an additional year to travel, mostly on foot, through the southern provinces. And in Chengdu in Sichuan Province, he was introduced to badges of rank by an American woman who was collecting them and needed help deciphering the symbols.

Cammann soon realized that these kinds of badges were probably inspired by the design of imperial robes, on which were represented many of the same elements: clouds, water and rocks. Phoebus, peacocks, birds, cranes and quails were often depicted flying above rocks and choppy seas to symbolize literary achievements, which made them appropriate motifs for identifying civil officials, who were all scholars. And wild beasts and mythological animals, including leopards, tigers, panthers and a horned dragon headed beast called a qilin, were shown to signify courage, making them an ideal insignia for the military.

The puns and riddles in this embroidery proved far more complex. To be fully understood required the deep knowledge of the Chinese language that Cammann possessed. Of the 17 languages he was fluent in, many were Asian.

"Chinese has so few syllables," said John R. Field, the show's guest curator, who is a research associate at the Brooklyn Museum. "For example, the pronunciation of the words hong fu, for red bats -- the same as the pronunciation for the words abundant and good fortune, one of many instances of how puns recur over and over in Chinese. That's why you see red bats everywhere, even on plates and teapots in Chinatown."

From his first trip to the Far East, Cammann was intensely curious about the meanings of the symbols in Chinese art. He immersed himself in the customs and history of China, visiting 15 provinces to broaden his knowledge. By the time he returned to New York, he had decided to devote his career to Asian culture and art.

During World War II, Cammann returned to China as a lieutenant in the United States Navy; it was during this period that he acquired most of his imperial badges. For the rest of his life, he studied Chinese culture and the way it was influenced by the peoples of the neighboring lands of India, China and Tibet.

In 1944, writing in The Harvard Journal of Asiatic Studies, Cammann described the development of the mandarin square. He pointed out that while the use of this insignia had been officially decreed during the Ming dynasty, the much larger plaque that Mongol courtiers almost a century earlier had sported on their robes were embellished with animals and flowers, which had hinged at their rank.

The Ming badges measuring at most 14 inches square, were the boldest and most expressive. At a time, under the Qing rulers in the late 19th century, these were reduced to nine inches square and were less dramatic in their coloring and images. A lingzhi design, one of the most important, some woven rather than embroidered by hand. As and as those who wore them moved up the ladder in their careers, some would merely change the image of the bird or beast or change the shape of their badge rather than replace the entire square.

This practice produced some unexpected and even surreal combinations. A mandarin duck that was added to a late-19th-century badge seems overwhelmed by the fruits surrounding it, as if the pomegranates, cherries and peaches must compete with it.
New York Times: "Silken Badges Bearing Mysterious Messages"

1. Who wrote this article?

2. In what dynasty did the insignia or badge become a symbol of rank?

3. How long was this a tradition?

4. When did the insignia become obsolete?

5. Who is Schuyler V.R. Cammann?

6. Who has the Cammann collection today?

7. From where did Mr. Cammann graduate?

8. Why was Mr. Cammann in China?

9. List eight elements in most badges.

10. What would your insignia have on it if you were a great literary mind or civic official?

11. What would your insignia have on it if you were courageous or a military official?

12. How many languages was Mr. Cammann able to speak?

13. What did Mr. Cammann do during World War II?
14. How big is a Ming badge?

15. How big is a Qing badge?

*On the paper provided (14 inch square) draw your own insignia using the symbols of a career you plan to follow. Use the animals and elements with modern representations of your future career.*
RICE CULTIVATION ACTIVITY

Place the attached headings with the proper picture to create the order in which rice is cultivated. Then take notes on the 12 cultural characteristics on the sheet of paper provided. When you have completed your notes write a one page paper, rough and revised telling a story of your life as a Chinese rice farmer and the process of cultivation.

Teacher Note: These wood blocks were taken from an 1808 edition of Peiwenzhai gengzhitu that are reprinted in John King Fairbank's book, China: A New History.
The rice seedlings have sprouted and now stand crowded in the seedbed. They must be gathered in bundles for transplanting in the paddy fields, where they will be fertilized with night soil and have room to grow.

Illustrations from an 1808 edition of Peiwenzhai gengzhishu show the principal steps in rice cultivation. The first step is the preparation of the seedbed. Here, in South China, the farmer and his water buffalo are ploughing such an area. A long-gowned scholar watches from the dike nearby, and a small boy brings food and drink on his shoulder-pole.

Plentiful water is a requirement for the growth of the rice crop. Here we see two inventions for lifting water from the nearby pond over the dikes and into the paddies. On the left three men leaning their arms on a crossbar press the paddles. On the left three men leaning their arms on a crossbar press their feet the treadles which operate a square-pallet chain pump. The square-pallets fill with pond water and lift it on an endless circulating chain. In the foreground the lone worker with his simpler water-moving contraption has protected the dike with a bamboo mat. On hillsides, banked terraces capture the rainfall.

In harvest time the paddies must be dry. The chain pump can be used for draining. The careful planting in rows simplifies the reaping. Men use sickles to cut the long stalks heavy with rice. Boys join in the gathering and binding that follow. Across the pond a woman and child watch the action.

Transplanting rice seedlings by hand in orderly rows in the flooded fields is a backbreaking task. The farmers have to stoop and wade backward in water ankle-deep under a hot sun. Millions of farmers in China, Japan, and elsewhere in Asia still grow rice in this way.

The final step in rice cultivation is storage of the baskets full of winnowed rice. The men are bringing in the heavy baskets and emptying them into a storage room. The side walls can be raised as needed by adding planks. Note the dou under the roof. In the distance, men are drinking tea and chatting. A water buffalo nuzzles her calf, and a woman just beyond pats her child.

The farmstead has an earthen threshing floor almost as hard as concrete. On this the stalks of rice (or other grains) are laid out and beaten with flails, as shown here. This process separates the rice grains, which, however, retain their husks. At hand on the floor are a wooden pitchfork to pick up the straw, a wooden spade to collect the rice, and a U-shaped basket. A boy serves tea. The chickens the artist has inserted in the foreground would not have been welcome.

The procedure nears completion. Here the winnowing function of the U-shaped basket becomes clear. On a breezy day the farmers fill the basket-trays with the rice grains and toss them high overhead. The husks, or chaff, blow away in the wind while the grains, being heavier, drop to the bamboo mat below. The women in the middle distance look on admiringly from a finished basketful. The box by the basket is a dou, a unit of dry measure for grain.

Mao Tse-tung led the Communist party to power in China, and for the next twenty-seven years presided over the most remarkable and far-reaching transformation in the history of that vast nation.

Mao Tse-tung was born in 1893, in the village of Shaoshan, in Hunan Province, China. His father was a peasant who had become fairly wealthy. In 1911, when Mao was an eighteen-year-old student, a revolution broke out against the decaying Ch'ing dynasty, which had ruled China since the seventeenth century. Within a few months the imperial government was overthrown and China declared a republic. Unfortunately, the leaders of the revolution were unable to establish a stable, unified government in China; and the revolution inaugurated a long period of instability and civil war, one which lasted, in fact, until 1919.

As a young man, Mao became steadily more leftist in his political ideas, and by 1920, he was a confirmed Marxist. In 1921, he was one of the twelve original founders of the Communist party of China. However, his climb to the top of the party leadership was rather slow, and it was not until 1935 that he became the leader of the party.

Meanwhile, the Communist party of China was engaged in a long, slow, and quite unsteady path to power. The party suffered major setbacks in 1927 and in 1934, but managed to survive them. After 1935, under Mao's leadership, the party's strength steadily increased. By 1947, it was ready for all-out war against the Nationalist government headed by Chiang Kai-shek. In 1949, their forces were victorious, and the Communists gained complete control of the Chinese mainland.

The China that Mao, as head of the party, now came to govern had been torn apart by war for the better part of thirty-eight years. China was a poverty-stricken, underdeveloped country, whose teeming, tradition-bound millions were mainly illiterate peasants. Mao himself was fifty-six years old, and it appeared that the bulk of his career was behind him.

In fact, however, the period of Mao's greatest influence was just beginning, and by the time of his death, in 1976, Mao's policies had completely transformed China. One aspect of this transformation was a general modernization of the country. Specifically, there was a rapid industrialization, an enormous increase in public education, and great improvements in public health. These changes, though obviously very important, are of a sort that occurred in quite a few other countries during the same period, and they alone would not be sufficient to justify Mao's high place on this list.

A second accomplishment of the Communist government in China was the transformation of the economic system of the country from capitalism to socialism. Politically, of course, a ruthlessly totalitarian system was installed. Furthermore, by
making use of ceaseless government propaganda, Mao succeeded in engineering not merely a political and economic revolution, but a social one as well. Over the past quarter-century, there has been a considerable shift of loyalties in China away from the family and toward the nation as a whole. This shift is particularly striking since, historically, family loyalties have always been particularly strong among the Chinese people. Furthermore, the Chinese government has waged a strong propaganda campaign against the ideas of Confucius, and it appears to have met with a very considerable measure of success.

Of course, it was not Mao Tse-tung alone who determined the policies of the Communist government. He never exercised the sort of one-man control that Stalin did in the Soviet Union. Nevertheless, it is clear that Mao Tse-tung was by far the most important figure in the Chinese government from 1949 until his death in 1976.

One project for which he seems to bear chief responsibility was the "Great Leap Forward" of the late 1950s. Many observers think that that project, which included an emphasis on small-scale, labor-intensive production methods, which could be carried out on the rural communes, was a failure. (In any event, it was eventually abandoned.) Another project which Mao supported, over the opposition of various other Chinese leaders, was the "Great Proletarian Cultural Revolution" of the late 1960s. This was a major upheaval—in some senses almost a civil war—between Mao and his supporters on the one hand, and the entrenched Communist party bureaucracy on the other.

It is interesting to note that Mao was already in his mid-sixties when the "Great Leap Forward" began, was well past seventy when the Cultural Revolution was instituted, and was almost eighty when the rapprochement with the United States commenced.

Mao had originally believed that the industrial workers of the cities would provide the strongest base of support for the Communist party, an idea which was in accordance with Marx's own thinking. However, about 1955 Mao came to the conclusion that, at least in China, the Party's main support would come from the peasantry. He acted accordingly, and during the long power struggle with the Nationalists Mao's power base was always in the countryside. This idea was carried over during his years as head of state. For example, whereas Stalin, in Russia, usually stressed industrial development, Mao Tse-tung generally paid more attention to agricultural and rural development. Nevertheless, China's industrial production increased dramatically under Mao's leadership.

It is always a bit difficult to assess the long-term importance of a contemporary political figure. To estimate where Mao should appear on this list, it may be useful to compare him with some other outstanding leaders. Mao Tse-tung has been ranked somewhat above George Washington because the internal changes for which Mao was responsible seem to be more fundamental than those made by Washington. Mao also looks comfortably ahead of such men as Napoleon, Hitler, and Alexander...
Another obvious comparison is between Mao and Lenin. Mao ruled for a far longer time than Lenin did, and over a far more populous country. (In fact, taking into account the length of his time in power, Mao ruled over far more persons than did any other man in history!) But Lenin preceded and strongly influenced Mao, and by establishing Communism in Russia, he did much to prepare the way for the subsequent establishment of Communism in China.

The man whose accomplishments most closely parallel those of Mao is Shih Huang Ti. Both were Chinese, and both were the architects of a revolutionary set of changes in their country. Shih Huang Ti has been ranked ahead of Mao because we know that the former's influence on China endured for some twenty-two centuries. Though the changes wrought by Mao may be even more significant in the long run, we cannot yet be certain how long his influence will endure.

Genghis Khan, the great Mongol conqueror, was born about 1162. His father, a petty Mongol chieftain, named the boy Temujin, after a defeated rival chieftain. When Temujin was nine, his father was killed by members of a rival tribe, and for some years the surviving members of the family lived in constant danger and privation. This was an inauspicious beginning, but Temujin's situation was to become a lot worse before it got better. When he was a young man, he was captured in a raid by a rival tribe. To prevent his escaping, a wooden collar was placed around his neck. From this extremity of helplessness, as an illiterate prisoner in a primitive, barren country, Temujin rose to become the most powerful man in the world.
TWENTIETH-CENTURY FIGURES--MAO TSE-TUNG

1. What years did Mao Tse-tung live?

2. In what year was the revolution that overthrew the Ch'ing Dynasty?

3. What organization did Mac Tse-tung help found in 1921?

4. What group was headed by Chiang Kai-shek?

5. What was China like when Mao Tse-tung started to govern it?

6. List three examples of the modernization of the nation.

7. What economic system did the Chinese communist government abandon? What economic system did they adopt?

8. What type of political system was installed by the Communist government?

9. How did Mao Tse-tung succeed in engineering [bringing about] a social revolution?

10. Historically, what was the Chinese people loyal to? Where did these loyalties shift to over the past quarter of a century?

11. In the 1960s, what project did Mao Tse-tung support over the opposition of other Chinese leaders?

12. Which group did Mao Tse-tung originally believe would provide the Chinese Communist Party with the greatest support?

13. Which group did Mao Tse-tung conclude would give the greatest support to the Communist Party?

14. What type of development did Mao Tse-tung stress instead of industrial development?

15. Why does the author of the article rank Mao Tse-tung above George Washington?
TEACHERS NOTE ON DESERTIFICATION COMPARISONS: THE DUST BOWL, AFRICAN SAHARA AND THE CHINESE SHAPOTOU DESERT

All three continents, North America, Africa and Asia are dealing with the environmental effects of a spreading desert. These activities could easily be added to a US History, Science or other courses to show the global comparisons of desertification. Then have the students make a stamp encouraging programs to reduce desertification in any or all three continents. I've included sample stamps from China and an article about Africa with questions to add to whatever resources you may have on the Dust Bowl in the United States.
B—S. F. 1994-4 Afforest the Desert

It is a great global environmental problem that the land has been becoming the desert. China is one of the countries which have large area of desert and are seriously damaged by desert. Since the founding of new China, our government has paid great attention to conquering the desert and world-famous achievements have been made after tens of years of hard struggle by large numbers of sand-controlling workers.

In order to have the whole society work together to protect the green plant in the desert, improve the biological environment and promote the national economic development, the Ministry of Posts and Telecommunications of the People's Republic of China issued on April 21, 1994 a set of four special stamps—1994 Afforest the Deserts. Size 40×27 mm. Printed in Offset.

(4-1) T 胡杨故林 15分
(4-2) T 沙洲梭梭 20分
(4-3) T 沙漠绿洲 40分
(4-4) T 沙漠景观 50分

B—S. F. 1994-4 沙漠绿化

土地沙漠化是全世界最大的一个环境问题。我国是沙漠面积大，沙漠化危害严重的国家之一。建国以来，我国政府对该工作非常重视，广大治沙工作者经过几年的努力奋斗，取得了令人瞩目的成就。

为使全社会共同努力，保护沙漠中的绿色植物，改善生态环境，促进国民经济发展，中华人民共和国邮电部于1994年4月21日发行1994-4“沙漠绿化”特种邮票1套，共4枚。规格40×27毫米。胶印版印制。
Nations Are Mobilizing To Halt Deserts’ Spread

By DAVID E. PITT
Special to The New York Times

UNITED NATIONS, Dec. 10 — Africa’s recurrent cycle of drought and famine is driving an international effort to halt the accelerating spread of deserts, a complex environmental phenomenon that is destroying agriculturally productive regions in drylands around the world.

The process, known as desertification, left indelible memories in the United States beginning in the 1930’s, when a combination of overplanting, excessive grazing, drought and windstorms transformed millions of acres of prairie into the environmental disaster area known as the Dust Bowl. But the global dimensions of the current problem are more daunting.

Studies by the United Nations Environment Program estimate that worldwide, an area equivalent to North and South America — about 8 billion acres of grazing land, irrigated zones and rain-sustained cropland — is in jeopardy. If current trends continue, these and other surveys show, the livelihoods of 1.2 billion of the world’s 5.5 billion people could be threatened by the end of the century.

Treaty Is Proposed

Alarmed by such data, diplomats are to open a crucial round of negotiations at the United Nations next month on a proposed treaty “to combat drought and/or desertification, particularly in Africa.”

Scientists say the process typically begins with normal but notoriously unpredictable cycles of rainfall and drought, but accelerates because of human activity, mainly poor management and conservation practices by herdsmen, farmers, woodcutters and others who live off the land. It involves regions that are arid or semi-arid, but nonetheless useful for grazing and cultivating certain kinds of hardy crops.

“All regions of the world suffer from desertification and drought,” Canada’s Ambassador for Environment and Sustainable Development, Arthur Campeau, told the General Assembly last month. “But the African nations are the most vulnerable and the least able to combat these problems without concerted national action.”

Although many details remain to be negotiated, the broad aim of the treaty is to draw the wealthy industrialized nations into a cooperative aid effort, while encouraging people on the local level to adopt environmentally sustainable agricultural practices, preferably based on traditional methods. Experts from the United Nations Food and Agriculture Organization also argue that desertification is a problem not simply of environment, but of poverty and underdevelopment, and should be addressed as part of an integrated attack.

“Drought and desertification are fundamental, elusive problems in the process of sustainable development in Africa today,” said an envoy from the Organization of African Unity, R. Omotayo Otaniyan.

Diplomats have set next June as their deadline for completion of the treaty, a working draft of which was circulated last month.

The dispute — which grew increasing contentious during negotiating sessions in July in Nairobi and in September in Geneva — exposed a deep political rift within the United Nations negotiating bloc of 129 nations, whose members are usually more successful in presenting a united front.

“The negotiations on a convention on desertification are at a difficult stage,” Germany’s Environment Minister, Klaus Töpfer said last month.

The idea of a treaty, long pressed by African nations, gathered momentum after it was recommended to the General Assembly by more than 150 governments at the so-called Earth Summit in Brazil last year. Since then, it has taken on added importance because of fears that Western aid to Africa, especially the sub-Saharan nations, has begun to slow.

NEW YORK TIMES: "NATIONS ARE MOBILIZING TO HALT DESERT'S SPREAD"

1. Who wrote this article?

2. What does the UN. want to do in Africa?

3. What is the name of this process?

4. What does the Dust Bowl in the 1930's have to do with Africa today?

5. What caused the desertification in the United States during the 1930's?

6. How many acres of land are in danger?

7. How many people could be unemployed if this trend continues?

8. What is the first step in stopping this from happening?

9. What is the broad aim of the treaty?
Thursday, July 21, 1994

General Situation
A trough of low pressure formed over the northern part of the South China Sea yesterday and gave rise to widespread showers. Locally, thundery showers brought more than 20mm of rain to the eastern part of Hong Kong. Unsettled weather associated with this trough of low pressure will affect the coast of Guangdong over the next few days. Over the western Pacific, Yunya weakened into a tropical depression yesterday afternoon. At 11pm, it was centred about 700km south of Okinawa and was forecast to move east at about 13kph.

Today's Forecast
Unsettled with showers that may be heavy at times. Temperatures will range from 26 to 29 degrees. Moderate south to south-easterly winds.

Macau Forecast
Cloudy with showers thundery at times. Temperatures will range from 25 to 29 degrees. Moderate southeasterly winds.

20. Name the city closest to the equator.
NOVA VIDEO: "CAN CHINA KICK THE HABIT?"

This video is produced by NOVA and can be found in most video stores or ordered from NOVA. It does an excellent job showing the health effects of smoking in China, the business of selling cigarettes in China and the history of such business. It is a good jump off point for discussion. Below are questions about the film, in order, as a note guide for your students.

1. How has China changed since the time of the Celestial Empire?

2. What are two diseases of poverty?

3. Why are the Chinese living longer today?

4. How many children will smoke in China?

5. How many will die as a result of the habit?

6. Who can make cigarettes in China? Why?

7. Why do people choose to smoke in China?

8. Why are third world countries having problems stopping such health hazards as smoking?

9. How many of the lung cancer deaths are a result of smoking?

10. In what two ways do Chinese doctors suggest in order to stop smoking?

11. Why is it easier to study health issues in China that the United States?

12. Why is this ability to study health issues in China changing?
13. What are diseases of the affluent?

14. Why is it difficult to convince people to stop smoking in China?

15. Why do young people smoke in China?

16. From whom are the young Chinese learning to smoke?

17. Why are Western cigarettes so appealing to young Chinese?

18. Who first brought cigarettes to China? When?

19. How many cigarettes are annually produced in China?

20. What two American cigarette companies are most popular in China?

21. With no direct advertising allowed for cigarettes, how do the Chinese and American cigarette companies get the word out?

22. How do companies get around direct advertising on T.V. in China?

23. Why is Hong Kong important to the cigarette companies in Asia?

24. Why are young people the target of tobacco companies?

25. Which U.S. company was the first into China?

26. Why is it important for foreign tobacco companies to have joint-ventures in China?

27. Why is Southeast Asia a major market?

28. Is this new market in Asia good or bad for U.S. companies? Why or Why not?
29. How are U.S. health officials helping Chinese health officials in controlling the ill effects of smoking in China?

30. When did China pass its first tobacco law?

31. What are the restrictions of the first Chinese tobacco law?

32. If you stop smoking can you avoid cancer?

CRITICAL THINKING

33. In your opinion, is the quality of life in Asia or, the making of money here in the United States the most important issue in this debate over exporting cigarettes to Asia? Defend your opinion in a five sentence paragraph.
Wood block Activity-Teacher Notes

These wood block pictures were taken from the late Qing edition of the Qinding shujing tushmo (1905) reprinted in John King Fairbank's book, China: A New History. These wood blocks would be good to use if you are putting China into a historical context or as an overview of the 12 cultural characteristics, food, clothing, shelter, government, economy, education, family, arts, recreation, religion, communication and transportation of Chinese culture.

This activity is designed to be a cooperative project. The students should study a picture without the captions and the notes on the 12 cultural characteristics sheet provided. You could then have the students report to the class on what they had found or write a one page paper as if they were in the scene shown.

12 CULTURAL CHARACTERISTICS

1. FOOD
2. CLOTHING
3. SHELTER
4. COMMUNICATION
5. FAMILY
6. TRANSPORTATION
7. GOVERNMENT
8. RELIGION
9. ARTS
10. ECONOMY
11. EDUCATION
12. RECREATION
31. A military workshop. Bows are being strung, arrows tested, swords sharpened, and metal spearheads added to long poles. Soldiers’ plumed hats and shields are completed at the back.

32. A hunting scene. The hunters have their horses, dogs, and beaters. A horseman aims his spear at a speeding fox as a nearby deer escapes. A blundering gunman misses a rabbit and kills a dog. Birds are the targets of arrows.
19. A butcher’s yard. The pig on the platform is about to have its throat cut and its blood caught in the pan. On the fire at the left the skin is scalded and the bristles removed. After the butchering, a portion of the meat is being given to the poor.

30. A village market. On the busy street, fish, ducks, grain, and other produce are for sale. A shopkeeper at the right is weighing something delicate, probably medicine.
17. Walling a compound. Unlike the city wall, this wall is built entirely of bricks with a pitched roof of tiles. Two men with trowels are plastering the bricks for elegant effect.

18. An architectural decorator's workshop. In the foreground men grind anors for the skilled painters who are decorating the girder and smaller beam.
Chinese Cartoon Activity

1. Why are cartoon important?

2. What is sarcasm?

3. Why is China well suited for cartoons?

4. Why are some Chinese cartoons not considered funny?

5. When did cartoons become popular in China? Europe? The United States?

6. Why are cartoons thriving in China today?

7. To what is humor related?

8. To what two things are cartoons related?

9. What happens to cartoons under socialism?
Preface

Cartoons are an art of humor which depict a certain meaning with images and captions. Although many cartoons are humorous, the development of this art form has been closely associated with serious political and social matters. Today, in China, the prosperity of cartoons is being influenced and controlled by politics. The captions which support the drawings use the language of daily life, however, the skill with which it is employed can create the most subtle and suggestive meanings. When the meaning contains disparagement the humor becomes sarcasm. Sarcasm and humor are often used together to convey the cartoonist's opinion on current political and social issues, as well as those which are just for entertainment purposes.

Humor as an art is the product of language and cultural development. China, with its long history, has developed a sophisticated language which is well suited for use in cartoons. Despite the humor of the Chinese people, it is true, as some foreign critics say, that Chinese cartoons lack humor. The reason is that China has had a long feudal and semi-feudal period, under which the people did not have freedom to create works of humor and sarcasm. It was not until the beginning of the 20th century, that the art of cartoons became popular, two or three hundred years later than it did in Europe and North America. As they became more popular they tended to reflect the heavy suppression that China suffered under for nearly a century, the works produced by Chinese artists mainly depicted resistance to oppression. They were likened to a javelin or dagger, a tool for battle. They were caustic and profound in hatred but lacked humor. Very few cartoons reflected the fun of life or a comfortable and stable society. This is a characteristic of the cartoons from many suppressed nations.

In the past decade, however, the cartoon art of China has been thriving under more flexible and tolerant conditions brought on by a more stable and economically prosperous society. Humorous cartoons have appeared in large numbers and some very witty cartoonists have come to the fore, however, techniques can be further developed to bring out more of the originality in composition and characteristics inherent to Chinese culture.

Humor is related to culture, and the appreciation of it differs according to one's cultural background. Cartoons are also related to the social system and social conditions of a country. Under socialism, works of low taste are generally discouraged and often not accepted for publication. This collection reflects a humor which is acceptable to China under the present social conditions. Although cartoons stress humor, any form of art cannot be divorced from real life. Consciousness or unconsciousness, cartoons inevitably reflect human sentiments and thoughts in the context of social activities. Therefore the contents of cartoons may be profound or shallow, depending on the awareness, education and intention of the artist. Some cartoons only present humorous phenomena, while some evoke deep afterthoughts. Even those purely humorous subjects can be of different artistic level—some good at finding peculiar objects, and some only copying obvious subjects.

This collection only represents works published in the past decade. Cartoons are spiritual food for human civilization. The influence and role of them in society is being given more and more attention, however, more skilled cartoonists are needed and more experiences should be accumulated in China. This art form will inevitably flourish and more cartoons published in collection form will play a positive role in developing this field. Cartoonists will learn from each other, they will be able to gain from international exchanges and through this promote the appreciation of the origin and role of cartoons in Chinese culture.

by Lin Shiwei

THE unusual summer heat this year is more keenly felt by those Beijing youngsters who are sweltering under the pressure of a college entrance examination due in a week's time.

Their only consolation is perhaps the knowledge that for every 13 who sit for the exam, 10 will find a place in colleges or universities across the country.

These include four-academic-year colleges and two- or three-academic-year vocational institutes.

"I hope my son will be one of the 10," said Ma Zhengrong, a shop-assistant, who was excited at the news.

Ma's son, who failed last year's exam, has been working hard this year with his parents' encouragement. He is applying to do a liberal arts course.

Statistics from the Beijing Municipal Admission Office (BMCA) showed that more than 26,700 students in Beijing will sit for this year's college entrance exam and 20,600 will be enrolled.

"Students do not have to squeeze into colleges this year like thousands of people passing through a single-plank bridge," Wu Fengchen, vice-director of BMCA said.

So it is no wonder that many college students are saying that today's high school students have it easy, unlike the situation in past years. In 1977, when the State annual college entrance examination was resumed after it had been suspended for nearly 10 years because of the "cultural revolution," the rate was 16.44 to 1. In 1980, it was 8.9 to 1 and in 1990, 2.46 to 1.

Last year, the chances of getting into college were even better — 1.7 to 1.

However, educators have reminded students to pay attention to the delicate changes and difficulties they face.

According to Wu, the admission rate for liberal arts majors is 1 to 1.7, higher than that for science majors which is 1 to 1.16.

In the past two years, many students who want to study liberal arts have tried to squeeze into schools or departments offering such programmes as foreign trade and economy, travel and foreign languages.

Meanwhile, medical science, electronics, computer science and biochemistry are among the most popular science programmes among college applicants.

As a result, the chances of getting into these popular programmes are lower and the competition more fierce.

Competition will be tough for most high school graduates in Beijing who want to enter local universities.

Even some ordinary schools in Beijing are asking for higher scores for enrolment than such well-known universities as Zhejiang University in Hangzhou, Zhejiang Province.

"A lower rate does not mean that our higher education has developed by leaps and bounds," Wu said. "However, it represents a major policy shift in the overall education system."

In the past, too much emphasis was placed on developing higher education. But today, vocational and professional training at the secondary school level is stressed.
China Daily-"Students Sweat Over Exams and Future"

From Peking To Canton

What's really cooking in China

As more Americans discover the exotic delights of the People's Republic of China and as business contacts between China and the U.S. multiply, there is growing curiosity about the state of Chinese cuisine and the quality of restaurants—what will be offered and how it will taste. To find out, TIME Food Critic Mimi Sheraton spent three weeks tasting a variety of foods in eight cities: Shanghai, Suzhou, Hangzhou, Nanjing, Peking, Xi'an, Chengdu and Canton. Her report:

Chí guó le méi you? That is Chinese for “Have you eaten yet?” and it is a standard greeting in a country where food is considered a subject worthy of the attention of poets and philosophers. For Americans traveling in China, the counterpart seems to be “How is the food?” It is virtually the first question tourists ask when they meet and one that evokes responses ranging from “wonderful” to “terrible.” Based on meals and street snacks sampled on a gastronomic long march through China, this visitor can report that all the answers are true. There is indeed wonderful food, as well as some that is terrible, with much more that is merely mediocre. For every delectable experience, like a dinner of impeccable Peking duck with its glissarily crisp skin folded into delicate crépes, there were several depressing meals of bland, gristy meat and canned vegetables swimming in grease, ineptly served in drab and dirty dining rooms.

What the traveler gets depends on many elements, but perhaps the most important are 1) knowing what is available and 2) being willing to spend considerable effort and money to locate the best. In short, one has to care a lot about food. It is possible to wander into a people's restaurant, order dishes seen on other tables and have a delicious meal for about $5 a person, but the odds are much against such a happy outcome. A more likely experience would be to spend $375 on a banquet for eight at a gleaming, modern hotel and have an exquisitely presented but virtually tasteless meal for which the delicate petals of a rose are meagely carved from the Chinese equivalent of Spam.

To avoid disappointment a visitor should have realistic expectations about the restaurants in China today, most of which are below standards set in Hong Kong, Taipei and New York. Despite the country's ancient traditions of cuisine, most chefs now are out of practice when it comes to fine and careful cooking, and few dining-room staffs know how to serve in anything like first-class style. War, revolution, poverty and a Maoist regime that considered embellishment a manifestation of bourgeois decadence have taken their toll.

"We lost the thread of our culinary tradition," says Hu Yulu, the retired chef and now adviser to Shanghai's Jinjiang Hotel. "Our cooking began to decline in the '50s, and we won't even talk about the '60s and '70s, when our most talented chefs left the country," he added. "We have to teach young cooks how traditional Chinese food should taste." agreed Zhang Songqi, secretary-general of the Shanghai International Culture Association, an organization that arranges tours for individuals and small groups interested in special subjects such as art, education or food.

The masters involved in training new chefs take their cue from the admiration of Yuan Mei, the 18th-century poet who is considered the Fril-Savarin of China: "Into no department of life should indifference be allowed to creep—into none less than cookery." Instructors are trying to instill Yuan's philosophy in students at vocational schools and more advanced professional cooking schools in China. Novices first learn the intricacies of chopping and slicing, practicing on potatoes or turnips, before they graduate to basic cooking techniques and finally master the classic floral garnishes formed of fruits, vegetables, meat and eggs. As a new generation takes over in the kitchen, the general quality and authenticity of the food promises to improve. But for now, some of the best and most rarefied eating is to be found in hotels and restaurants where older chefs hold sway.

In the quest for good food in China, the most useful quality may be a spirit of adventure. Nowhere is an unprejudiced palate better rewarded. Many foods considered delicacies by the Chinese cause Westerners to shudder. Among such exotica are snake, sea slug, turtle, bird’s nests formed of swallows’ saliva, dried jellyfish and webs of duck feet. The fish-paste dish which poor and then wealthy, some of the world’s most carefully orchestrated seasonings as well as much of the drama of Chinese food. Snakes cut in thin slivers and cooked in a soup suggests the most delicate chicken and, along with earthy black mushrooms, lend a savory body to the broth. Though a bit startling to the eye, thick, dark, firm, gelatinous sea slugs are delicious at Furong in Chengdu, where they are cooked in a velvety, dark sauce that is mellow with wine and fragrant with star anise. This is a sauce that would make even paper towels palatable. Much the same can be said for the rich black-bean-and-garlic sauce that envelopes chewy webs of duck feet, and the winy marinade that adds piquancy to cool, translucent slivers of jellyfish that may be nested on pungent pickled vegetables, all usually included in the more lavish cold-appetizer t.}

street snacks sold day and night in markets like those off Dongda Street in Xi'an. Here one can choose between the round, steamed, pleated dumplings known as jiaozi (or, in the larger size, baozi) that are filled with pork and aromatic hot broth, or the juicy, half-dried, half-steamed, pork-stuffed crescents called guotie. Breakfast purchased on Shanghai street corners can be the big snowy puffs of yeast buns filled with sweet red-bean paste. All day long there are noodle made of rice, wheat or mung beans, served hot, cold, with gravy or in soup, garnished with wisps of coriander and onions or more substantial bits of pork. (Travelers who want to enjoy the delights of food at unhygienic street stands as well as in the inexpensive, lively people's restaurants should carry their own chopsticks and spoons and an airline-size bottle of vodka, which is handy for cleaning bowls, dishes and cups.)

Such colorful eating brings a bonus in human contacts. Waiters and waitresses are especially solicitous, offering to show foreign guests exactly how to convey a jiaozi from plate to mouth with chopsticks so that the dumpling remains intact with no loss of broth. The Westerner who can master the technique may be rewarded with a free meal, plus a tour of the kitchen, where workers grinningly pose for pictures and shyly call, "Hello," the one English word they seem to know.

In Xi'an, this visitor found a spirit of instant camaraderie at Tongshengxiang, a restaurant featuring dishes that are Mongolian-Muslim, the geographic and religious origins of much of this city's population. What pleased the local diners so heartily was a hastily acquired skill at crumbling bits of half-baked yeast buns into a bowl that was then taken to the kitchen where it was brought to a frothy boil along with mutton, beef, noodles, vegetables, coriander and scallions. Puffed up like tiny spaetzle, the bread dumplings fleshed out a satisfying soup that was made fiery, sharp and aro-
mantic with additions of chili and sesame oils, and vin., amber-colored aged vinegar.
Many ganbei, or toasts, drunk with the strong-smelling mao-tai whisky, cloverly sweet orange soda or cool, refreshing Chinese beer were raised.

Food has its operatic side in China, and anyone who savors local color will be repeatedly drawn to the street food markets, like Canton's Qingping, an enormous, dazzling maze where private enterprise is allowed to thrive. Here, more than in the sparsely stocked indoor government markets, are stacks of jade green cabbages, gigantic leeks, silvery winter melons, woody mushrooms, mounds of gnarled ginger roots, pomegranates and persimmons, displayed alongside skeins of noodles, fish swimming in vats of running water, and live geese and ducks, sitting sleepily in place with their feet tied together. Also live in crates and on sale as food are expensive cranes and monkeys, as well as snakes writhing in shallow pools. (The Westerner need not fear that such animals will appear without notice on his plate. All are expensive and are prepared in specialty restaurants or at banquets.

Amid the jumble of stalls, dense with the flow of human traffic and clattering with the din of vendors hawking wares, shoppers poke animals for tenderness and watch closely as purchases are weighed in hand-held balance scales, and mothers quiet crying children with cuts of sugarcane or towering lollipops of golden caramelized sugar billed into flamboyant dragons.

An air of plenty also prevails in the bakeries selling moon cakes, a delicacy favored during the autumn harvest-moon festival. Shoppers line up for these heavy round pastries, embossed with good-luck symbols and filled with candied fruits or spiced meats, much like mincemeat.

Yet despite this apparent abundance, there are persistent shortages of fresh vegetables, fish and high-quality meat, more marked in some cities than in others. In Shanghai, for example, shoppers with families to feed will go to market at 4:30 or 5 in the morning; by noon in Peking, vegetable stalls are often out of everything except onions and cabbages.

Small wonder, then, that the best quality of such basic staples as tea, rice and oil is not used in ordinary restaurants. An overabundance of oil is a complaint most Westerners make about the food. But to the Chinese, oil is a sign of opulence, and so it is often poured generously. Yet quantity seems less a problem than quality. In the cheapest restaurants oil generally had a harsh, acrid flavor, a result of either poor processing or having been reused. The practice is not uncommon in American Chinese restaurants. Those who are sensitive to MSG (monosodium glutamate) have an even more difficult time, for that flavor enhancer is virtually ubiquitous. The only solution would be to order Western food in advance in the dining rooms of tourist hotels.

China's system of restaurant organization seems to cater to foreigners and to take great pains to please them. Restaurants are generally laid out on two or three levels. The street level offers the simplest food at the lowest prices, as well as poor sanitary conditions that usually include cupboards near all tables. The second floor is slightly cleaner, has a larger menu and somewhat higher prices, though it is primarily frequented by Chinese. Most foreigners are shown to the top floor for pre-ordered meals at the highest prices and in what the Chinese consider the most attractive surroundings. That may mean a genuinely handsome setting or a seedy, badly lighted room in need of fresh paint and curtains. Hotels have similarly layered facilities. (Hotels also have the cleanest public bathrooms, a feature that tourists come to cherish early on.)

Many American visitors are insulted when they are directed to the private rooms or segregated sections of dining rooms; they feel an attempt is being made to separate foreigners from locals. Yet there appears to be genuinely hospitable planning behind the division. In addition to being cleaner, tourist sections provide menus with English translations. Nevertheless, foreigners who insist on being seated on the lower floors will be.

Any Chinese dish, by the way, is likely to be better than a Western-style choice, judging by the sorry fare offered at places...
Food

Clockwise: script for "flavoring"; cooks train at Shanghai's Jinjiang Hotel; mosaic of appetizers, Peking

such as the Golden Flower Hotel in Xi'an, the Jinjiang Guest House in Chengdu and the somewhat macabre copy of the Parisian Maxim's in Peking. Even Chinese breakfasts of rice porridge, pickles, pork and dumplings surpass their Western counterparts, although there were excellent room-service breakfasts at the Jinling Hotel in Nanjing and the luxurious White Swan Hotel in Canton.

As for beverages, tap water cannot be used, even for ice or brushing teeth, but most hotels supply unlimited quantities of boiled water, hot and cold. With food, the best choices are bottled mineral waters and the excellent, clean-tasting Chinese beer, both preferable to the flowery local wines. And jasmine or chrysanthemum teas are more pleasant than the ordinary rough green and black teas.

The future for restaurant hopping in China looks bright, since there has been much improvement during the past five years in food, service and cleanliness. Most progressive of all are the joint-venture operations that are cooperative efforts between the Chinese government and a foreign corporation that sets up procedures, provides management personnel and trains the local staff.

Few Western visitors in China choose restaurants for themselves. Most are in tour groups; the arrangement may or may not lead to good food, depending on the knowledge and diligence of the travel agency and the price of the tour. It is best to tell the agency of any special restaurants one wants to visit so that arrangements can be made. In addition, individuals or small groups can go off to restaurants on their own, although because of the language barrier it is best to have the hotel or tour guide engage a taxi and call the restaurant. Even so, reservations may not be honored unless a deposit or, at times, the full price of the meal has been paid in advance.

Fortunately, there is a greater choice of food in China than there has been for several generations. If such progress continues, Americans in China may feel almost too much at home as menus begin to offer choices from columns A and B and meals wind up with fortune cookies.

—By Isabel Sheraton

Where the Good Food is

SHANGHAI. Jinjiang Hotel. eleventh floor, north building. A handsome setting for Peking duck and Sichuan specialties.

Old Town Restaurant (Lao Fandian). This clean but worn upstairs dining room serves eight-jewel stuffed duck and authentic Shanghai fare.

Friendship Restaurant. Cantonese food such as sucking pig and steamed fish with scallions, in modern dining rooms.

Longhua Temple Restaurant, in the southwest corner of the city. Ingenious vegetarian versions of classic dishes.

SUZhou. Songhelou. Chef Zhan Qinbiao is famous for fried squirrel's hind legs and other delicately garnished local dishes.

PEKING. Fangshan. Banquets in the dining room of the Imperial Court. Order cold appetizers and dessert savories.

Fengseyuan. Clean though drab setting for silver-thread bread rolls, flower prawns, sautéed duck liver.

Jinfeng Baozi Shop. A mass restaurant for inexpensive dumpling snacks.

XI'AN. Tongshengxiang Restaurant, across from the Bell Tower Hotel. Serving Muslim appetizers and soups.

Qingyaizai on Dongda Street. Mongolian hot pot.

Jaozi Restaurant. Thirty kinds of thimble-size dumplings make up the 15-course dinner in festive rooms.

CHENGDU. Mingshan. A café for Sichuan dishes. Sweet longevity noodles make a delicious dessert signifying long life.

Furong. Excellent Sichuan food in orderly but shabby rooms. Try rabbit with orange, carp with scallions, squab-egg soup.

Chengdu Restaurant (not the hotel). A casual spot for such Sichuan food as tea-smoked goose and chicken with peanuts.

CANTON. Beiyuan. A graceful old restaurant for dim sum or fine Cantonese dishes such as roast pigeon and snakehead fish on broccoli.

Guangzhou Restaurant (not the hotel). A modern Cantonese favorite. Try "drunken" crab in clay pot, grass carp.
By PATRICK E. TYLER

SPECIAL TO THE NEW YORK TIMES

BEIJING, Nov. 21 — "How much do you charge for delivery?" a customer asked, leaning on the handlebars of a bicycle in front of a truck-sized heap of cabbage on the side of the street in western Beijing.

"Charge for delivery?" Wang Zhengping fired back in a mocking tone that turned a few heads in the Horse Tail Gully vegetable market.

"Did you just crawl out of a cave or something? It's free!"

The great cabbage migration has begun, and it's a buyer's market.

"People will always buy cabbage," Mr. Wang said. "That's the food you get through the winter on." Ms. Lan said.

"The s^rther north you go, the greater the demand, but Beijingers just peel away the outside leaves and plop it in boiling water," said Wang Yanhong, a young woman who works for an American company in Beijing. She defended it as a relic of past privation. And to the young, it seems downright un-fasionable.

But with winter at hand, mountains of cabbages march on Beijing.

"It used to be that people would get in long lines and really stock up on the stuff — 400 to 500 pounds," Ms. Lan said. "It used to be slavishly following the habits of an earlier era."

"In the past few years people haven't bought so much cabbage," Ms. Hu said. "Now, though, they're worried about the prices going up on vegetables, so they're buying more."

"It's not that all young people don't like cabbage as much as the older generation does," said Hu Bei, another shopper in western Beijing. But it's also that lots of young people are too busy to eat, especially the ones who are earning high salaries or working for foreign enterprises.

"You can fry it, you can make it into dumplings, you can put it into soup," said Wang Yasheng, a young man who works for an American company in Beijing. But the cabbage business is a relic of past privation and to the young, it seems downright unfashionable.

"In the cabbage business, a competing heap could come around the corner at any moment," he said.

"You can fry it, you can make it into dumplings, you can put it into soup," said Wang Yasheng, a young man who works for an American company in Beijing. But the cabbage business is a relic of past privation and to the young, it seems downright unfashionable.

"In the cabbage business, a competing heap could come around the corner at any moment," he said.

14. Name something that you must eat today at home that when you make your own food buying decisions you will never eat.
Talking the Talk: A Guide to the Various Types of Tea

From a single evergreen plant (Camellia sinensis or Thea sinensis) come the thousands of teas consumed around the world. Where the tea is grown and how it is gathered and processed determine the type. Some of the variables are whether the tea is made from long leaves or short, early leaf buds or later pluckings; whether the leaves are whole, broken or rolled, and most important, whether they are allowed to ferment, which is a tea term for oxidation. The finest teas have leaves that are fresh and consistent in size.

Because tea leaves readily pick up foreign aromas and fade in contact with light, they should be sold and stored in containers that are airtight and opaque. Shops that keep their teas in glass canisters are as bad as those that display coffee in open burpap bags. A proper container will keep tea fresh for months. But it should never be stored in the refrigerator or freezer because moisture can damage it.

BLACK TEAS
These dark, tannic teas are made by allowing the fresh green leaves to wither and darken. This fermentation process takes about a day, after which the leaves are dried by warm air. Black teas include winy Keemun and smoky Lapsang souchong from China, Ceylon teas from Sri Lanka, and India, Assam and Darjeeling, the exquisitely delicate tea grown in the Himalayan foothills.

And so many of the terms can befuddle. Take “first flush,” an often misunderstood term associated with Darjeeling. It refers just to the first sprouting of new leaves, not to the best quality. First-flush Darjeeling is a spring tea, the Beaujolais nouveau of tea, gentler than second flush, which comes in June. Some connoisseurs prefer the deep coppery complexity of autumnal Darjeelings. Fussy drinkers may also look for single-estate Darjeelings — in tea the term is garden — with names like Castleton and Bloomfield.

Another confusing name is Orange pekoe, which has nothing to do with the taste of the tea. Pekoe (properly pronounced PECK-oh) is a Chinese term referring to young leaf buds. In the 17th century, Dutch tea traders made it sound fancy by adding a noble name, Orange. Orange pekoes, which can range from flowery to full-bodied, usually come from Sri Lanka.

Black teas are the classic English teas, strong enough to stand up to the addition of lemon, milk or sugar. Blends like English breakfast are made from black teas.

GREEN TEAS
All Japanese and many Chinese teas are green teas, prized for their aroma and finesse. They are processed by lightly drying the leaves. Some are whole-leaf, while others, including Chinese gunpowder, are made from leaves rolled into little balls, hence the name. Japanese matcha is powdered green tea.

Green teas should be sipped plain, without the addition of sweeteners, lemon or milk. One exception is Moroccan mint tea, made by pouring sweetened green tea over lightly crushed fresh mint leaves.

OOLONG TEAS
These are elegant whole-leaf Chinese teas that are partly withered and oxidized, something of a cross between green and black tea. Most that are exported are called Formosa, and are from Taiwan.

FANNINGS
These are the small leaf particles sifted out of better teas. Fannings and broken leaves are used in better tea bags.

TEA DUST
Cheap tea bags are filled with tea dust, left after the fannings are moved. Worse still are floor s, a term tea snobs delight in applying to bad tea.

HERBAL TEAS
Verbena, chamomile, lemongrass, peppermint and linden are some of the more popular herbal teas, or infusions, preferred by the French. Various herbal blends are also available on the rapidly growing American market. Herbal teas are often believed to have curative properties, and for that reason are stocked in some health-food stores.

Pepsico plans to make Cheetos in China. But the snacks won’t taste like cheese, which is not a mainstay in the Chinese diet.

The Snack-Food Frontier

Chinese to Get a Taste Of Cheese-Less Cheetos

By Glenn Collins

At last, Cheetos, the snack, has come to China, the country. The catch? They don’t taste like Cheetos.

The maker of Cheetos, Pepsico, announced a $1 million joint venture yesterday to produce the little crispy-tasting cheese puffs in Guangdong province, where the per-capita income is among the highest in China. It marks the first time a major snack-food brand will be produced in China for Chinese tastes, Pepsico said.

But these Cheetos don’t taste like cheese, which is hardly a mainstay of the Chinese diet. “We are offering two flavors, Savory American Cream and Zesty Japanese Steak,” Jeffrey Goh, general manager of Pepsico Foods International, said in a telephone interview from the city of Guangzhou.

In focus groups for more than 1,000 people in Guangzhou, Shanghai and Beijing, the cheese-ish taste of American Cheetos did not, as they say, tee.

Pepsico had to try more than 600 flavors, ranging from Roasted Cuttlefish to Sweet Carmel, before settling on Savory American Cream (“a buttered popcorn flavor,” Mr. Goh said) and Zesty Japanese Steak (“a teriyaki-type taste”).

But is a Cheeto a Cheeto if it doesn’t taste like cheese? “It’s still crispy, it has a Cheeto shape and it’s fun to eat, so it’s a Cheeto,” Mr. Goh said.

Among those who tried the first run of Chinese Cheetos yesterday were the United States Secretary of Commerce, Ronald H. Brown, and a group of American executives visiting Guangzhou as part of a trade mission to China. Mr. Brown’s reaction was not reported by the foreign news media assembled to cover the tour.

The estimated market for Western snack foods in Guangdong province is $40 million to $70 million, Mr. Goh said. The province, with 70 million consumers, represents a market that is one-third the size of the United States population. If the snack foods are a success, the line will expand to Hong Kong and the rest of China.

“With the Chinese economy gaining momentum and work hours increasing, between-meal snacking is rising as rapidly as disposable income,” Mr. Goh said. The introduction of Cheetos will be backed by television and print advertising and promoted on Chester Cheetah, the brand’s feline brand symbol, riding a Harley-Davidson motorcycle. The packages will carry the Cheeto logo in English along with the Chinese characters “qi duo” (pronounced CHEE dwaugh).

“Luckily,” Mr. Goh said, “the translation is ‘new surprise,’ instead of some phrase that might offend people.”

5. What two flavors will be offered?

6. How many flavors did Pepsico have to try in China before they decided on the two that they are now going to market?

7. Who was one of the first to try the new Cheetos?

8. What is the estimated market for Western snack foods?

9. Where will they expand if the Cheetos are a success in Guangdong Province?

10. How will the Cheetos be advertised?

11. What does "qi duo" mean in English?
WHAT'S DOING IN

Hong Kong

BY LENORE MAGIDA

Hong Kong's culture may be one of the world's most unique and variegated, but the British colonial style and traditional treasures are everywhere. To see it at its best, consider Hong Kong Island in the main area of the New Territories. The colony has three major sectors: Hong Kong Island, the Kowloon Peninsula, and the New Territories, which include New Territories, Kowloon, and a number of outlying islands. 

Hong Kong is a very compact city, and the city is accessible by the Mass Transit Railway. The city has a population of more than 7 million people, and the city is responsible for tourism.

Events

The earliest traditional festival of the season is the Southern Chinese New Year Festival, through Jan. 3 to Feb. 19. Central Park, the main area of the New Territories. The city has three major sectors: Hong Kong Island, the Kowloon Peninsula, and the New Territories, which include New Territories, Kowloon, and a number of outlying islands.

The Excelsior, a Gloucester Year’s decorations am en the tip of the Chinese mainland, and the New Territories, which include New Territories, Kowloon, and a number of outlying islands. The Excelsior, a Gloucester Year’s decorations am en the tip of the Chinese mainland, and the New Territories, which include New Territories, Kowloon, and a number of outlying islands.

The Early Daylight Festival, which is nestled between the New Territories and the Kowloon Peninsula, is a major tourist attraction. The festival is held from Jan. 31 to Feb. 19. Central Park, the main area of the New Territories. The city has three major sectors: Hong Kong Island, the Kowloon Peninsula, and the New Territories, which include New Territories, Kowloon, and a number of outlying islands.

Where to Stay

Hong Kong has a vast number of hotels, many of them excellent, virtually all of them more expensive than in even the recent past. The Excelsior, a Gloucester Year’s decorations am en the tip of the Chinese mainland, and the New Territories, which include New Territories, Kowloon, and a number of outlying islands.

A brief guide to Macau

Fast Facts

**Location**
Macau is situated on the southern coast of China, on the western bank of the Pearl River estuary, facing Hong Kong Island in the south. It consists of Macau Peninsula and seven islands.

**Area and Population**
Macau covers a peninsular area of some 6.7 km² and is connected to Taipa Island by a mile-long bridge. Taipa is 4 km² in extent and is linked to Coloane Island by a causeway. The total area is 17.4 km².

The population of Macau is about 60,000. About 95 per cent are Chinese, 9 per cent are Portuguese and other Europeans, and 2 per cent are from other places.

**Government**
Macau is a special administrative region of the People's Republic of China.

**Currency**
The currency is the Macau Pataca (MOP), which is equivalent to the Chinese Yuan (CNY).

**Language**
Portuguese is an official language, along with Chinese, under Portuguese administration. It is also an official administrative language. Mandarin is widely used in administration. It is also an official administrative language. The Chinese language is widely used in administration. The language is also an official administrative language.

**Festivals**
The Chinese New Year, also known as the Year of the Dragon, is one of the most important festivals in Macau. It is celebrated with a variety of activities, including dragon and lion dances, fireworks, and parades.

**Tour agencies**

18. What must all visitors have to enter or to leave Macau?

19. How much is a visa for an individual?

20. Do citizens of the United States need a visa?

21. Name five other countries that do need a visa to enter Macau.

22. How many taxis are in Macau?
This is an activity designed to share a little known part of Chinese and Cuban history. The entire reading is a primary source taken from The Cuba Commission Report: A Hidden History of the Chinese in Cuba. This report was written to explore reports of abuse by the Spanish in Cuba following the end of slavery. This is a testimony of the Chinese "coolies" who were interviewed by the Commission. After you read this document you should write a newspaper article describing this historical period. (Remember: Who, What, When, Where and Why)

Given the immense scale of migration history, The Cuba Commission Report, which deals specifically with the condition of Chinese workers in Cuba, may appear to be only a modest item in migration history. Yet it is an invaluable one, for its substance arose from face-to-face encounters of questioner and respondent occurring under extremely difficult conditions. Rather than being solely history, it is also in its own way oral history-and an unusually early specimen of oral history.

The commission that collected the information for the Report was created by imperial decree for purely political reasons, but the Report itself was prepared by representatives of a country that lacked the capability of protecting its citizens abroad, either militarily or politically. Hence the Report also dramatizes the awful fate of those who, through no fault of their own, had in effect become men without a country; since they were totally unprotected by their homeland while abroad, the migrants were fair game for all who were their hosts. The frustration and rage of such victims, once understood, may also help us grasp the powerful nationalism of people who, bereft of the protection of their homeland, feel doomed to become helpless pawns in the modern world.- Sidney Mintz
Fulbright 1994/Diedrich Page #2

The History

In 1846 Pedro Zulueta, a Spanish merchant who fell into serious difficulties with English officials because of his involvement with the contraband trade in African slaves, proposed to bring 1,000 Chinese laborers to Cuba from a southern province of the Celestial Empire. (China) His proposition was accepted by Creole (European-Africa Mix) authorities, and Madrid agreed to the terms of the contract for this new labor force. The Chinese agreed to the following parts of the contract:

- Work in Cuba.
- To work at whatever orders were given by who owns the contract.
- Follow local laws.
- Accept the wages given.
- 12 hour work day.
- An 8 year contract.

This began the migration of Chinese to Cuba. The first Chinese arrived in Cuba thanks to the Philippine intermediaries, who had been in contact with two English companies. In 1858, a movement against the shipment of Chinese workers to Cuba was initiated in Canton (Guangzhou). Macao, a colony founded in 1577, was the oldest European settlement in the Far East. Macao was a dying colony until it was opened by the Spanish as a center for sending Chinese to Cuba.

WHY DID THE CHINESE GO TO CUBA?

Life in China at this time was very difficult in the 1850's here are many examples of why the Chinese were leaving:

- Too little land available to farm in China.
- The farmer needed money so they grew silkworm mulberry, cotton and tea. So they had no food being grown.
- Many Chinese were losing their jobs due to the lack of land.
- Secret Societies, organizations that fought against the government were growing. They formed their own armies and began to take away from the poor peasants.
- The Taiping Rebellion of 1848, a fight between the government and the rebels led to instability in the region. The cost of this
conflict made the farmers even poorer from greed, armed bands stealing from the poor and more taxes being imposed. **All these reasons made it easier to convince the Chinese to leave for Cuba.**

**THE PRIMARY SOURCE**

"All investigations of Chinese were conducted verbally and in person by ourselves. It appears that of the Chinese labourers who have proceeded to Cuba, 8 or 9 of every 10 have been conveyed there against their will. The entire number who sailed for that island from the 27th year of Taokwang to the 3rd moon of the 13th year of T'ungchih, is, according to the statement prepared by the British Consul General, Havana, 142,422."

"When the contracts are being translated much is passed over, it seems better to avoid immediate death (in China) to sign and embark (leave to Cuba). When being inspected by the Portuguese official I declared that, as my parents were living I did not wish to proceed abroad (to Cuba), and I was assured by the official that, if on arrival in Cuba I was dissatisfied, the cost of passages back would supplied to me."

"Of the more than 140,000 Chinese who sailed for Cuba, more than 16,000 died during the voyages. We were confined in the hold below; some were even shut up in bamboo cages, or chained to iron posts, and a few were indiscriminately selected and flogged as a means of intimidating all others; whilst we cannot estimate the deaths that, in all, took place, from sickness, blows, hunger, thirst or from suicide by leaping into the sea. Three months had passed away, but we had not arrived; as there was no water issued it had to be bought, and for a single cup a dollar was paid. The stench below from the crowd of men was most offensive. Many died from the effects of the close confinement."

"On landing, four or five foreigners on horseback, armed with whips, led us like a herd of cattle to the barracoon (market) to be sold. Chinese are treated like pigs and dogs, all their movements being watched. Most Chinese, 90% are disposed (sold) of to sugar plantations. They all think only of the profit to be gained and are indifferent as to our lives. We were fed worse than dogs. The overseers are more cruel than tigers and wolves. They have no pity in their hearts."
"The contracts signed at Macao were for a term of eight years, but here we find there is no limit to our labors. The black overseers constantly beat us. I myself have already on four occasions been flogged, and afterwards placed in foot-irons. I had to work night and day, was fed on only potatoes and plantains and was limited to a few instants of sleep. Our monthly wages were but $3 dollars, and as even a grass hut for two would cost $10 dollars, it was no in our power to obey. We explained this to our employers son, who became very wrathful (angry), struck us indiscriminately, and together with certain Negroes, seizing knives killed one of our number."

"The entire year we are not permitted to wash our clothes. If, when at leisure, we do so, and are seen by the Negroes, we are chained and beaten. The people here declare that the killing of a Chinese is no more than the killing of a dog. The bodies are placed in a shallow hole, that in the course of time the bones are turned up by the spade, and piled up in little heaps, dissolve under the sun and rain; as the charred bones of oxen are required for the refining of sugar, the mixture of those of men would produce an even purer whiteness."

As one reads this report it is amazing how for labor resources the mistreatment of the Chinese is accepted and replaced the African slaves. This is a lost and important part of Cuban, Spanish and Chinese history.
For LAURENCE YEP, San Francisco’s Chinatown is “not so much a place as a state of mind ... and of heart.” His 1976 Newbery Honor Book Dragonwings and 1977 Boston Globe-Horn Book Award-winning Child of the Owl were set there—and it is through a Chinese Boys’ Club there that he first heard tales similar to those he collected in his 1989 Boston Globe-Horn Book Honor Award Book The Rainbow People.

Laurence Yep was born in San Francisco in 1948. His father owned a little corner grocery where his son “wheeled piles of boxes into the store on a creaky hand truck” and did other chores. He has described his own childhood in his autobiography, The Lost Garden (Julian Messner), and that of his mother in his 1991 novel, The Star Fisher (Morrow).

At 18, when he began writing, he was paid a penny a word by a science fiction magazine, which published his first short story. He attended Marquette University, graduated from the University of California at Santa Cruz, and received his doctorate in English from the State University of New York at Buffalo, where he wrote his dissertation on William Faulkner’s early novels. Mr. Yep now lives in San Francisco.

Laurence Yep’s Chinese American background is central to the spirit of many of his novels. About the relationship of this background to his writing, he comments: “Having been raised in a Black ghetto and having commuted to a bilingual school in Chinatown, I did not confront White American culture until high school. Approaching that culture as something of a stranger, I have been fascinated by all its aspects—from its great novels to its children’s literature, comic art, and science fiction—specifically pursuing the figure of the ‘stranger’ both in my studies and my writing.”

All of Mr. Yep’s books have dealt with the outsider—from the aliens of his first novel, Sweetwater, to alienated heroes such as the Chinese American aviator in Dragonwings. For this second novel, he received the 1976 International Reading Association’s Children’s Book Award, which is presented to a beginning author “who shows unusual promise in the children’s book field.”

Sometimes his heroes have defied tradition, as in The Serpent’s Children; and at other times they have tried to find their connection to it, as in Child of the Owl and his Newbery Honor Book Dragon’s Gate.

In recent years, Laurence Yep has explored the rich mythology of China and has finished a fantasy series based on Chinese dragons. In 1989, he retold a number of Chinese American folktales in The Rainbow People and has retold additional ones for its 1991 companion volume, Tongues of Jade.

"Fantasy and reality both play vital parts in our lives, for we may grasp with the mind and heart what we may not always grasp with the hand. It would be a tragic mistake to insist upon a realistic viewpoint to the exclusion of fantasy. Like the poet, we too must have rainbow wings of which we must be aware."—Laurence Yep, in The Horn Book, 4/78
CHARACTERS:

QUESTIONS
1. How many possible names can a Tang man have? List the five possible names.

2. Why do they have so many possible names?

3. Who is the Dragon King?

4. How did Windrider know the dragon was the Imperial Dragon?

5. On the separate paper provided, draw and color the Dragon King on the beach.

6. What gift did Uncle give Moon Shadow? Why was it so special?
DRAGONWINGS-CHAPTER #4, "TESTS" (P. 49-76)

VOCABULARY

embodiment
dirigibles
moronic

CHARACTERS

Red Rabbit
Mr. Alger
Melon Head
Leopard Head
Bloody Hands
Lead Hand

QUESTIONS

1. According to Moon Shadow what was difficult about learning Demonic (English)?

2. Why are the Old Ones important to Moon Shadow and his father?

3. Why was Moon Shadow's grandfather killed?

4. Explain the difference between the Gregorian Calendar and the Lunar or Chinese Calendar?

5. What is the "Devil's Kitchen?"
Fulbright 1994/Diedrich (English)

Name: ______________________
Date: ______________________
Class: ______________________

Dragonwings Chapter #5 "Windrider's Claws" p. 79-94

Vocabulary
abacus
moderation
repulsive
patriotic
apologetically

Characters
Whiskey Devil
The Justices
The Sleepers
Tiger General/Water Fairy

Questions
1. What did the Company do to keep Black Dog and White Deer?

2. Describe opium use among the Tang.

3. What does opium smell like?

4. Who forced the Tang to use opium in the Middle Kingdom?

5. In a paragraph, on the back, summarize the story of opium use that Black Dog shared with Moon Shadow.
6. What did Black Dog do to Moon Shadow? Why?

7. What are the three virtues of the Stranger?

8. What is a hatchet?

9. What happened to Black Dog and Windrider in their fight?

10. Why did Windrider and Moon Shadow have to leave the Tang community?

11. Where were they going to work and live?

12. What gift did White Deer give Moon Shadow and his father? Lefty? Hand Clap?

13. What gift did Uncle give Moon Shadow and his father?

14. What were they to do with Uncle's gift?
DRAGONWINGS CHAPTER 6 "THE DEMONESS P. 95-112

VOCABULARY
- disinfectant
- gingham
- stereopticon
- magic lantern show

CHARACTERS
- Ms. Whitlaw
- Robin

QUESTIONS
1. Describe Polk Street.

2. Describe Moon Shadow's new home.

3. What did Moon Shadow expect the demoness, Ms. Whitlaw to look like?

4. What did she really look like?
5. What gift did Moon Shadow and his father give Ms. Whitlaw?

6. What is the custom on New Year's Day to do for the Stove King?

7. What was Moon Shadow given to eat and drink? What was his reaction to these foods?

8. What picture did Robin show Moon Shadow?

9. How does the stereopticon work?

10. Describe the stained glass window in Ms. Whitlaw's house?

11. What did St George do to the dragons?

12. What did Ms. Whitlaw play on the piano?

13. What were Ms. Whitlaw's dragons like? What did Moon Shadow want to tell her about dragons?
DRAGONWINGS CHAPTER 7 "EDUCATION'S" P. 113-133.

VOCABULARY
- boarder
- dime novels

CHARACTERS
- E. Nesbit

QUESTIONS
1. Describe what Moon Shadow did each day.

2. What did Moon Shadow's father allow Moon Shadow to do for 1/2 hour each day?

3. What did Moon Shadow do with that time? Why?

4. Describe jasmine tea.

5. What did the boy from the tenement house next door do to Moon Shadow?

6. What happened to Windrider at Mr. Algier's building?

7. Describe why Moon Shadow was afraid of Robin? How did Robin feel about this fear?
1. Who did the letter writing for the Wright Brother's?

2. Why were Orville's letters so impersonal?

3. What did Moon Shadow, Robin, Windrider and Ms. Whitlaw have for lunch?

4. Describe the sunset at the beach that day.

5. Why did Windrider release his glider?

6. How often did Moon Shadow visit the Tang town?

7. Why did Moon Shadow go to the Tang town?

8. What advice did Grandmother give Windrider?

9. What was Moon Shadow cooking when Robin came over? What did Robin think about this meal?

10. What happened after Moon Shadow hit and knocked down Jack?

11. In a paragraph on the back of this paper tell the story of the "Spring Maid."

12
Fulbright 1994/Diedrich (English)

Dragonwings - Chapter 9 "The Dragon Wakes" p. 148-174

Vocabulary

tea money

Characters

Old Deerfoot

Questions

1. Why would Windrider have to go back to the Middle Kingdom to get mother?

2. How much money did Moon Shadow and Windrider have to save in order to get mother?

3. What are two traditions of the Tang New Year?

4. In a paragraph on the back describe the traditions that surround the Stove King.

5. What is the Feast of Pure Brightness?

6. Where did all Tang people want to be buried?

7. When did the earthquake hit?

8. In a paragraph on the back describe the earthquake.

9. Why did Miss Whitlaw's house survive the earthquake?

10. In a paragraph describe the street after the earthquake?

11. Why did Miss Whitlaw want Windrider to release the thief?

12. Why was the fire known as the "Ham and Eggs Fire?"
20 Years After Quake, City Is Rebuilt

By PATRICK E. TYLER
Special To The New York Times

TANGSHAN, China, Jan. 25 — Here at the site of the deadliest earthquake in the last two and a half centuries, a group of workers, including a Communist Party member, expressed nothing but sympathy for the quake victims of Kobe, Japan.

But more than concern, Mr. He and others in this industrial city 105 miles southeast of Beijing spoke of the scale of the disaster only because a Tangshan coal miner, Li Yuli, drove a red ambulance for six hours along dirt roads to reach Beijing. His face muddied and clothes tattered, he rolled right up to the imposing gates of Zhongshan University, where China's leaders live, to give his report.

It took days to mobilize the army and start relief operations. The Tangshan residents dug with their hands, stacking tens of thousands of bodies along the alleys and roads choked by debris that the trucks could not always get through to remove the dead.

Airplanes flew over the city spewing disinfectant to stop the spread of disease. China's leaders forbade foreign relief workers from traveling to areas designated a disaster zone.

He Shuyun stood before the ruins of a library at the Tangshan Institute of Technology, one of the seven memorials to the 1976 earthquake that devastated the Chinese city and killed at least 242,000 people.

"We know what it's like," Mr. He said, standing amid the preserved ruins of a library on the campus of the Tangshan Institute of Technology. The building is one of seven memorials to the mammoth quake, which killed 242,000 people and injured 160,000 when it struck at 3:42 A.M. on July 28, 1976.

China has borne the brunt of some of the worst earthquakes on record, at a cost of $500 million in the century alone. The Tangshan quake is believed to be the world's third-most destructive in 2,000 years. Nearly a generation later, many older city residents still cannot bear to talk about it.

The quake measured 7.8 on the Richter scale. For 20 seconds, the landscape heaved repeatedly, pummeling the city of just over one million with earthsplitting blasts and causing all but a handful of buildings to collapse among the sprawling residents. All communication was cut off.

People crawled from the rubble dusted in darkness. A light stripped the face of devastation and death in the last two and a half centuries. Since a quake struck Tangshan nearly 19 years ago, they have

"It was so big and so many people died that the streets and alleys were all piled up with corpses. People didn't even think to cry," recalled Mr. Lu.

It took 12 hours for the central authorities in Beijing to discover that Tangshan, which was at the quake's epicenter, had been completely leveled.

In 1976, the people of this city had little time to mourn the dead, whose bodies were dumped in mass graves. The central Government called on 100,000 workers to rebuild the city. Some residents did not get new housing until 1983.

The central Government called on China's provinces to send planners and engineers to Tangshan. The city of Shanghai took responsibility for one neighborhood, and Sichuan, Hubei and Shandong provinces took responsibility for others.

"Basically, a whole new city was planned on top of the ruins," said Zhao Shushan, the municipal secretary. The Chinese Communist Party apparatus mobilized volunteer construction brigades, and factories contributed construction materials. Tangshan residents did the rest.

Tangshan's rebirth has coincided with China's opening to the outside world, after the death of Mao only weeks after the earthquake and the rise of Deng Xiaoping a year later as China's paramount leader.

In Chinese history, disasters are said to foreshadow the end of dynasties or the deaths of great leaders. Many Chinese saw the Tangshan earthquake as an omen of Mao's passing, just as some Chinese today say the Kobe quake may presage the death of Mr. Deng, who is 90 and in declining health.

Today, Tangshan is again a prosperous industrial city. The population has grown to 1.55 million, and economic output has increased sixfold since 1976. The city now ranks third among China's 460 urban centers in the total value of its industrial and agricultural production.

Foreign companies have signed contracts to invest more than $1 billion in the city's 550 joint ventures. Though Tangshan preserves its earthquake memorials, municipal leaders now prefer, as they do throughout China, to steer any conversation to the topic of foreign investment and how to attract more of it.

Yet the scars remain, some less visible than others. A mental hospital still shelters those who broke under the strain. A hospital for para- patients cares for people who were maimed or crushed.

On a recent sunny afternoon at the Institute of Technology, an elderly man with a scrawny beard shuffled along the walkway. He was asked if he remembered the events of that day.

"Oh, I remember," he said. Asked to share his recollections, he just smiled, then shuffled away silently.

Who wrote this article?

Who is He Shuyun?

How many were killed in this earthquake?

How many people were injured in this earthquake?

At what time and on what date did this earthquake occur?

How many people have died in earthquakes this century?

What did the earthquake measure on the Richter scale?

Who was Lu Shushan?

How did the government in Beijing find out about the true damage about the Tangshan earthquake?

What was "Resist the Earthquake and Rescue Ourselves?"

How long did it take the Chinese to rebuild this city?

Who is Deng Xiaoping?

How did the people of China see the Tangshan earthquake as an omen?

What is the population of Tangshan today?
Vocabulary

looters

Questions

1. Why did Lefty warn Windrider and Moon Shadow to be aware of the Demon soldiers?

2. Why did the Company building remain standing?

3. Where is Oakland?

4. Why were they blasting houses with cannon fire?

5. In a paragraph describe the dinner at Uncle's tent?

6. Why had Uncle been in the mountains?

7. What did Miss Whitlaw do when the Demon soldiers told Moon Shadow and the other Tang men leave?

8. What is the Presideo?

9. What was Uncle's plan to be able to move back into Tang town?

10. Why did Miss Whitlaw have to move?

11. What gift did Robin give Moon Shadow?

12. What gift did Moon Shadow give Robin?

13. What did Windrider decide to do?
1. Where did Moon Shadow and Windrider move?

2. In a paragraph describe the Esperanza farm?

3. How did Grandmother feel about Windrider following his dream?

4. How did Moon Shadow's mother feel about Windrider's following his dream?

5. What did the letter from mother to Moon Shadow discuss?

6. Why was winter Moon Shadow's favorite season?

7. What was Moon Shadow's mountain of gold?

8. What was "Dragonwings?"

9. When were they ready to fly Dragonwings?

10. Describe Dragonwings.

11. Why did Black Dog visit Moon Shadow?

12. What did Black Dog do to Moon Shadow and Windrider?
Dragonwings - Chapter 12 "Dragonwings" p. 225-245

1. Why did Uncle and the Company come to help Windrider?

2. Describe in a paragraph on the back Windrider's flight?

3. What happened when Windrider attempted to land Dragonwings?

4. What happened to Windrider?

5. Why did Windrider not want to build another Dragonwings?

6. What did Uncle admit to Windrider?

7. What did Uncle do for Windrider? Why?

8. What happened to Black Dog?

9. What eventually happened to Moon Shadow?

Afterword

10. When did Chinese flier Fung Joe Guey fly?

11. How long was his flight?

12. Who was E. Nesbit?

13. What was Laurence Yep's purpose for writing Dragonwings?
**Double-Six Magic Square**

At the Shaanxi Museum in Xi'an, China there is a display that describes the importance of spirits in setting up a home. During the Yuan Dynasty (1271-1368 AD) a stone had 36 numbers carved in it in order to ward off evil spirits. This stone would be buried or placed on the cornerstone of a house.

Instructions: Make 12 calculations from the numbers below, you must have 6 numbers in each calculation. You may go vertically, horizontally, or diagonally to find the 12 calculations. Please show all your work.

PREFACE

This curriculum is designed to address the goals of the Gifted and Talented Program of Hamilton Township Public Schools, but can be utilized at any grade level with minor adaptations.

My personal goal is that the students involved in this study will develop an enthusiasm for the country of China, its culture, and most importantly, its people. The twenty-first century is in their hands, and global interdependence will be a reality. Cross-cultural awareness and understanding are tools of the future.

I wish to thank THE FULBRIGHT FOUNDATION and the NATIONAL COMMITTEE ON U.S.-CHINA RELATIONS for memories that will last a lifetime. I also thank the State Education Commission, People's Republic of China; their kindness and patience, assistance and guidance, were unsurpassed.

PATRICIA A. FLORES
Gifted and Talented Program
Hamilton Township Public Schools
90 Park Avenue
Trenton, NJ 08690

TOTAL IMMERSION

The Fulbright Foundation opened the door
To China, Enlightenment, and much more.
Most impressive was the food,
Hardly ever cause to brood.

Except over breakfast, those disgusting globs
Tried, but failed, to reduce us to sobs.

Twenty eight courses
In a Tang Dynasty dinner.
Don't come to China
Thinking you'll return home thinner.

Each dainty item,
More distinctive than the next,
All conceal vast calories,
Our waistlines will be wrecks.

Beijing duck, and Duck's Foot Stew,
Unusual dishes, to name a few...
Pig's ear, century old eggs,
Beef tendons and jellyfish legs.

Tripe, the stomach lining of a cow,
Snout, the nose tip of a cow.
Sausage and other delicacies,
May cause some to shudder and swoon.

But I, in great wisdom,
Soaking total immersion,
Doon the cuisine supra,
There is no other version.

by Patricia Flores
November 9, 1994
# TABLE OF CONTENTS

**CHINA: THE MASTER CULTURE** . . . Pages 1 - 5.
Introductory Activities.

**THE CHINESE OPERA** . . . Pages 6 - 10.
Define and teach Bloom's Taxonomy using fascinating, factual material about the Chinese/Beijing Opera.

**EVERYTHING YOU EVER WANTED TO KNOW ABOUT TANGRAMS** . . . Pages 11 - 16. Tangram puzzles for the student to solve, with solutions provided. Objective and Procedure page provides detailed plan for teaching.

**CREATIVE PROBLEM SOLVING** . . . Pages 20 - 23.
The five steps of CPS are presented along with a plan for creating an invention to be entered in SITE Contest (Student Inventions through Education).

**CREATIVE THINKING SKILLS** . . . Pages 27 - 30.
Four varied activities designed to teach vocabulary, use of resource materials, brainstorming and classifying.

**CREATIVITY** . . . Pages 31 - 35.
Deals with Figural and Verbal Fluency, Flexibility, Originality and Elaboration, which are the components of creativity.

**BIBLIOGRAPHY** . . . Final page.
List of source material.
These are introductory pages, grouped together to generate overall interest in China today.

Page One

OBJECTIVES
1. To encourage students to take an interest in what is happening around the globe, and to place their focus on China for the purpose of this study.

MATERIALS
Newspapers, magazines, notes written while viewing television.

PROCEDURE
Students will expand their interests through a conscious effort of cross-culture awareness. Students will compile a news file of articles pertaining to China.

Page Two

OBJECTIVES
1. To cause the students to be aware of items in their homes that are labeled 'Made in China.'

2. To have students be aware of the many countries from which the United States imports products.

MATERIALS
One or two items 'Made in China' per student to use in discussion, and for the Memory Game. Teacher may have to supplement items to display twenty.

PROCEDURE
Students will comb through their homes searching for import items; making two lists, one for China, the second for other countries they discover on their Scavenger Hunt.

Page Three

OBJECTIVES
To introduce a study of China by seeking to learn how much the students already know, or think they know about China.

PROCEDURE
While brainstorming, students will indicate in code beside each response, K = Know, or T = Think you know.
OBJECTIVES

1. To stimulate the students to think in divergent and
creative ways by brainstorming ALL THE USES FOR CHOP STICKS.

2. To understand that articles used by a culture are
called artifacts, and that artifacts reveal much about
life and values of the culture.

3. To learn to look at a foreign object and analyze its
usefulness, rather than viewing it as something merely
'different.'

4. Students will develop Originality and Elaboration by
writing a one page story using ideas generated through the
brainstorm.

MATERIALS

Chop Sticks, preferably enough for each student. Handling
the object to brainstorm aids in the flow of ideas.

A simple food to practice using chop sticks at the end of
the brainstorm. Suggested is pop corn as the irregular shape
of the kernels makes handling an easier task.

PROCEDURE

Teacher generates discussion of artifacts in general.
Focus on chop sticks can be: 1. What kind of technology
was necessary to make this? Machine or hand-made?
2. Do all people in the culture use it? 3. Does it tell
anything about what is important to the user?

(Artifacts from another culture can only
begin to help us appreciate that country's culture.)
China Revamps Forces With Eye to Sea Claims

Potential Oil Riches Sharpen Disputes

By PATRICK E. TYLER
Special to The New York Times

BEIJING, Jan. 1 — China's military leaders are refurbishing their large and antiquated military to enforce claims of sovereignty over the South China Sea and its resources, Chinese and Western experts say.

In this effort, Chinese military leaders have nurtured specific industries to develop advanced weapons technology and are tailoring their naval and air forces for the region, the experts say, even as the country's overall level of military production is declining.

Continued on Page 6, Column 1
LET'S GO ON A SCAVENGER HUNT!

Search through your homes for import items labeled MADE IN CHINA. Make a list of all the things you find, and ask your parents if you may bring one or two items to share with the class. Make a second list of products from other countries, and name the country.

MEMORY GAME: Select 20 items from the artifact collection, place them on a desk to observe for two minutes. Cover the artifacts and students will list the items from memory. After verifying the responses, discuss MNEMONICS to discover ways of improving one's memory, through grouping (classifying), word rhyming, or by association.
LET’S BRAINSTORM!

IN THE OUTLINE MAP OF CHINA BELOW,
LIST ALL THE THINGS YOU KNOW, OR
THINK YOU KNOW ABOUT CHINA.

Use this code to differentiate:

K = Know
T = Think you know
DIVERGENT THINKING

BRAINSTORM all the uses for Chop Sticks that you can think of.

FLUENCY: Count how many ideas you have. _______

FLEXIBILITY: Group your ideas into categories. _______

ORIGINALITY: Select one idea that is the most unusual. _______

ELABORATION: On the blank sheet accompanying this lesson, write a story from the chop stick's point of view. Use the original idea you chose. This is called PERSONIFICATION, giving your chop sticks human characteristics.
PERSONIFICATION
THE CHINESE OPERA: KNOWLEDGE . . . COMPREHENSION . . . APPLICATION
ANALYSIS . . . . SYNTHESIS . . . EVALUATION

Pages 6 and 7; 8, 9, and 10.

OBJECTIVES

1. To provide knowledge about China’s most popular art form.

2. To enrich the students’ sense of global awareness through a new and previously untapped source of information.

3. To compare and contrast Chinese Opera with other forms of theater world-wide.

4. To have students understand that people are the same the world around, in that they have the same interests, desires and dreams for success.

5. To provide a vehicle for introducing and teaching the six levels of Bloom’s Taxonomy.

6. To prepare students for an instructional, hands-on theater workshop to be held in March.

PROCEDURE

1. To provide knowledge about the Chinese Opera. (Knowledge)

2. Review, retell, reword. (Comprehension)

3. Using the facts, write an imaginary interview with a student of the opera. (Application)

4. Select another form of world theater to research, then compare/contrast this with the Chinese Opera. (Analysis)

5. Create stage make-up for a new character, and develop a scenario to introduce your persona. (Synthesis)

6. As a group, debate and judge which form of world theater you feel would be your first choice and tell why. (Evaluation)

7. Acting, Costuming and Make-up will be presented by professional actors/educators from McCarter Theatre Outreach Program, Princeton, N.J. A variety of exercises, improvisations, creative drama activities and character work will spark the students’ creativity and imagination. Part of the focus will be toward Chinese Opera.
THE WONDERFUL WORLD OF THEATER:
CHINESE OPERA

While watching a traditional Chinese Opera production our imaginations are brought heavily into play, for there is no stage scenery, and stage properties are few and simple. A table and chair can represent anything from actual furniture to a fortress. Black flags indicate a high wind, flags with waves on them suggest water; an actor carrying an oar is imagined to be in a boat, and one who carries a horse-whip is supposed to be riding a horse. These actions are further elaborated with pantomime movement.

When the audience is to imagine a change of scene the actors walk around in a circle. This may happen many times, because the plays (operas) are very long.

Yes, Chinese opera is different from Western opera, but there is no difference as striking as the painted faces seen on the Chinese stage. The fantastic styles of face make-up are a study in themselves. The characters have their faces painted in elaborate patterns to denote personality. Audiences, through their familiarity with the art, can tell the good and bad characters apart—they know that red faces belong to heroes and white faces indicate a deceitful person. Warriors have elaborate face markings while clowns are easy to distinguish with a white blob of paint in the center of their faces. The faces of gods are painted in brilliant gold, and the animal spirits have faces painted to resemble the animal in question. Even the young hero and heroine rely on liberal quantities of mauve and red powder to give them the flush of youth.

Costuming is magnificent, and each color has a definite meaning. For instance, a yellow robe indicates a member of the imperial family; purple means an official; brown is worn by the elderly, black by those of lower class. Pastel colors are for the young, and a general in full armor has triangular flags fluttering from his shoulders.

No detail is without significance: the manner in which a character strokes his beard denotes his rank in society, every step, even the merest movement of the eyebrows, is strictly choreographed and must be learned by rote.
Today, the best known and loved entertainment in China is the Beijing Opera, for it presents dazzling displays of martial arts, pantomime, acrobatics, dance, poetry, literature, instrumental music and song, plus exotic, brilliantly colored, heavily embroidered costumes, and the all-important, elaborate facial makeup.

Not so many years ago boys and men portrayed female characters on stage, but today's opera students include girls as well as boys. However, the student is typecast at a very early stage and assigned to a particular type of role, even a specific role, for life.

Every sizable Chinese city has a training institute where regional opera is taught, as well as 'national' Beijing opera. National (Beijing) opera has the advantage of being enriched by elements from the entire country, where the regional opera retains its local characteristics and language dialect. Students receive a general education alongside their specialist training. Today when students graduate they are absorbed into the local professional opera company. However, they are also equipped to live productive lives beyond the confines of the theater.

This is a far cry from the past, when under the old system of training the student was apprenticed at age six or seven. In exchange for board, lodging and tuition, the master had seven years free service from the student. There was no attempt at general education, few performers ever learned to read and write.

Beijing opera, the most important drama in China, has a history of more than one hundred and fifty years, although its origin goes back thousands of years to religious rituals presented to please the gods. Today, as China is opening its door wider to the outside world, Beijing opera has become more and more popular with people all over the globe. The most beloved story character is Monkey King, in Journey to the West, as he brings havoc to the heavens with his antics while searching for the secret to immortality.
ACTIVITY PAGE BASED ON THE SIX LEVELS OF BLOOM'S TAXONOMY

KNOWLEDGE: Recalling basic facts.
List three important pieces of information from the article.
1. ________________________________
2. ________________________________
3. ________________________________

COMPREHENSION: Understanding.
In your own words, retell the history of the Chinese opera.

APPLICATION: Using the facts to find solutions.
Interview an imaginary student of the Beijing opera training institute. Based on the information presented here, what might this boy or girl tell you of his/her life?

ANALYSIS: Take apart, examine.
Select another form of world theater to learn about, then compare and contrast this with Chinese opera. Examples: Japanese Kabuki, ancient Greek or Roman tragedies, Shakespearean drama, or modern theater as we know it today. There are many other possibilities, these are merely a few to stimulate your thinking. Use a separate sheet of paper for your analysis.

SYNTHESIS: Create something new.
Invent a new character for the Chinese opera. Design his/her face make-up, and develop a scenario that will give us a sense of feeling for this stage persona. Use the following sheet to compose this assignment.

EVALUATION: Judge the value of ideas or products.
Debate within our group the many and varied components of world theater, (based on your research in the ANALYSIS section) and determine which would become your most favored form of entertainment. Using the space allotted on the following page, make a recommendation and defend your choice.
SYNTHESIS: On a disposable sheet of paper develop your new character. When you have the face just as you want it, transfer the drawing onto the oval. Next write your descriptive scenario.

EVALUATION: ____________________________
______________________________
______________________________
______________________________
EVERYTHING YOU EVER WANTED TO KNOW ABOUT TANGRAMS
Pages 11 through 16.

OBJECTIVES

1. To provide information, (albeit speculative) about a favorite pastime of the Chinese.

2. To present a tangram pattern and a variety of puzzles for the student to solve.

3. To involve the student in creative synthesis by developing his/her original puzzles.

4. To highlight relationships of the seven geometric shapes through application and analysis.

5. To allow for individual differences in ability by providing puzzle solutions on pages 14, 15 and 16.

PROCEDURE

1. Introduce tangrams through the narrative, page 11.

2. Demonstrate usage by superimposing the pieces to show that: two small triangles = the rhomboid, also the medium triangle, and the square; that two small triangles and medium triangle = the large triangle; that two small triangles and rhomboid = the large triangle, that two large triangles = double-sized triangle, and that all 5 remaining pieces will = the same as double triangle. This information is essential to the student so he/she will realize the interchangeability of each piece.

3. Using the puzzles presented, (on cover page, and pages 11, 12 and 13) help students unlock the key to solving them by suggesting they attempt to isolate individual tangram pieces in their minds. It is easiest to determine the position of the two large triangles first.

4. Finally students will be able to create their own shapes. It is more successful if the teacher assigns a specific form, such as alphabet letters, birds, things in the future. (rockets, robots)

5. Evaluation will take place as students work through each other’s puzzles.
TANGRAMS

SOME CHINESE CHARACTERS

The title page of a Chinese tangram book
EVERYTHING YOU EVER WANTED TO KNOW ABOUT TANGRAMS

Tangrams have long been considered to be an ancient Chinese puzzle, but its origin is lost to history. One legend has it that a man named Tan dropped a tile on the floor where it broke into seven pieces. Putting the pieces back together proved more difficult than it had first seemed. He saw various forms take shape as he worked at fitting the seven pieces back into the square. Tan’s imagination led him to create figures of animals, people, buildings and abstract forms.

Word of Tan’s game spread and it became a favorite pastime of the Chinese. Over the years it gained popularity in Asia and Europe. It is said that Napoleon spent many hours with these puzzles during his time at Elba. Yankee sea captains brought books of tangram puzzles back from Canton and Shanghai, and Edgar Allan Poe was said to have been a great fan of the puzzlers.

It was during the first half of the nineteenth century that the tangram became known in Western countries, and books about it started to appear. The earliest Chinese book of tangrams is dated 1813, which has over 300 shapes of objects and simple Chinese characters for the enthusiast to reproduce. Included here are a few for the student to practice and develop his/her technique for solving the puzzles. Once you have mastered the existing patterns you can go on to create your own shapes. This will become the ultimate challenge. You may then exchange puzzles with your classmates.

MARCO POLO AND THE WONDERS OF CHINA  
A SILKEN TAPESTRY  Pages 17, 18, and 19.

OBJECTIVES

1. To give students some background information as obtained through reading The Travels of Marco Polo.

2. To provide students with knowledge of the amazing inventions of the ancient Chinese people, and highlight how necessity brought about a natural progression of these inventions.

PROCEDURE

1. Read and discuss the written information. Name several modern inventions, trace their origins.

CREATIVE PROBLEM SOLVING  Pages 20, 21, 22, and 23.

OBJECTIVES

1. To introduce the five steps of the Creative Problem Solving process, and present a problem for students to systematically work through to reach a solution and plan of action.

2. To alert students to the problems of our global community, and trigger thinking in terms of alleviating misery and environmental degradation.

3. To cause student awareness of the fact that there is more than one solution to any problem, and that by establishing a set of criteria one can sort through and come up with one 'best' solution.

4. To encourage student to provide a Plan of Action 'invention' suitable for entry in the district/state inventions contest. (SITE)

PROCEDURE

1. Follow the guidance given in the four work-sheets provided for working through the CPS problem to its final Plan of Action.

2. To bring Plan of Action into being via a tangible, hands-on product which can be entered in the SITE contest. (Student Inventions Through Education)
MARCO POLO AND THE WONDERS OF CHINA

A SILKEN TAPESTRY

Old China, China of the splendor and opulence of the Tang, Sung and Ming Dynasties . . . Old China, then known as Cathay, was documented by Marco Polo in his journeys over the Silk Route. In his journal were tales so incredible they were thought to be fantasy for many years, until another Italian adventurer traveled Polo's footsteps and confirmed it all to be true.

Old China, a silken tapestry, has woven into it the soft glow of perfect pearls and the brilliance of court garments embroidered with gold and silver threads, and embossed with precious jewels. Offered for the palate of the privileged; magnificent foods, so rare and exotic they are beyond the mind's comprehension, served on porcelain plates so dainty and delicate they rival the food itself. There were banquets that went on continuously for two and three days, serving up to 10,000 people at a time, and entertainment by actors, jugglers, acrobats, dancing ladies, music, the likes of which can never be duplicated.

During the early years of China's long history, the people used an understanding of science to create many inventions that made their work easier and their lives more enjoyable. All important is the invention of paper, which they could then use for writing and drawing. This led to a refinement of early writing, pictures that were originally scratched in mud with sticks, or carved on bamboo, clay pots and bones.

Necessity being the mother of invention, the Chinese next developed paint brushes and discovered how to make ink by collecting the soot of burning pine wood. They mixed it with tree sap to make a paste, added water and stirred it well. Chinese characters were standardized and calligraphy, the art of brush painting, was born. Next, in natural progression, came block printing, which was developed more than 1,000 years ago. While the Vikings were setting sail to North America, the Chinese were busy inventing moveable type that allowed them to easily print books and the first paper money known in the world. Europe discovered printing 400 years later.
For their pleasure the Chinese knew how to make kites and fly them in the wind. Using paper and bamboo sticks, they made them into shapes of colorful birds, butterflies, fish, and dragons, which they flew at festivals. The Chinese also invented gunpowder, and used it to make firecrackers and rockets that burst into shapes of many colors to celebrate at their festivals.

The Chinese also knew how to make wood and metal drums, gongs, and bells of many sizes and shapes. They hollowed out wood and made a stringed instrument called a lute. They cut short bamboo tubes and made a wind instrument called a sheng. They played all these instruments at their festivals.
Chinese potters discovered a formula for making fine porcelain, which they kept a secret from the rest of the world for hundreds of years. They mixed and ground white clay with sand and powdered rock, washed the mixture several times and made a thick, smooth paste. Then they shaped the paste into vases, bowls, dishes and jars, and painted them. The pieces were then fired (baked) in very hot ovens (kilns) for several days to harden them. This porcelain, called "China," became known all over the world because of its thinness and beauty of design and color.

In the food department, the next time you twirl spaghetti around your fork, remember that Marco Polo took the recipe back to Italy where it caught on in a big way. Also, the Chinese were drinking tea for thousands of years before the rest of the world discovered how delicious it was. But there is one thing I must tell you, and that is that the Fortune Cookie as we know it was NOT discovered in China, but born in a Chinese restaurant in San Francisco as a vehicle for dispensing the many Chinese proverbs which we all love and enjoy.

Other Chinese inventions include: a wheelbarrow, and other types of wheeled carriages to help carry their heavy loads; the potter's wheel to help shape their pottery; magnet stones, which we call "lodestones", as their guide to find direction; an abacus for working out even the most complex mathematical problems; a method of waterproofing by coating material in tallow which prevented rain from soaking through; and the Chinese could build ships which would stay afloat even if water leaked into the hull. They did this by creating several rows of wooden walls inside the ship from side to side. Wherever water leaked in, the walls would prevent it from flowing into the rest of the ship.

Today the brilliance of China's past, the blending and melding of its many hues and colors, have dimmed into an impoverished, frayed shadow of what once was. New China, tattered, a mere figment of its past, is working round-the-clock to reclaim its rightful position among nations on a global perspective.

There is no doubt in this writer's mind that this will occur, for China is predicted to become the major power of the 21st century, and the Pacific Rim as we perceive it will become the throne of commerce and finance.

Continue now to the following pages and work your way through the CREATIVE PROBLEM SOLVING process as presented.
CREATIVE PROBLEM SOLVING

The Mess: It is the year 2020. The world is over-populated, hunger abounds, pollution is rampant, and you and your colleagues have been given the task of finding some solutions to the plight of the planet. An international symposium will be held in Beijing, and you are preparing to depart for China to participate in the meetings.

As a member of the team sent to appraise the situation and offer suggestions, you have been interviewing the people of New Jersey for ideas and possible new inventions that could help make life easier for all of us. Keeping in mind environmentally sound practices, you need to develop one solution that can become a building block toward alleviating the world’s problems.

Work through the five steps of CPS (Creative Problem Solving) and arrive at a plan of action. Next show how that plan will function.

FACT FINDING: Using the Mess, list all the facts. How do you think you can find the real problem?

FACTS

CONSERVATION

PROBLEM FINDING: Look over the facts that you just listed. Some are more important than others. Decide which three are more important, then write them on the lines below.
Look over the three facts you listed, and decide which is the one most important fact. Circle it. Now you can begin to work on the real problem.

The best way to deal with the real problem is to put your most important fact in the form of a question. This helps you think of answers. For example, you can ask:

In what ways might (IWWM)

Now you're ready to move right along to the next step.

IDEA FINDING: You are going to BRAINSTORM for ideas that answer your problem question. Remember a few short rules:

1. Call out your answers.
2. Keep a record of answers.
3. Do not judge the answers of others.
4. Brainstorm for 5 or 10 minutes. The longer you think the more creative your responses will become.

LIST OF IDEAS
RANK IDEAS: Go over your list of brainstormed ideas and select the ones you think are very good. Through evaluation, narrow down to the three BEST ideas and list them.

Next you need a way to judge the BEST idea that answers the problem question. You need to select criteria that will help you do this. (CRITERIA is a new word meaning guidelines or standards to help guide or make a decision.) Time, effort, care and neatness are examples of criteria which teachers use to judge students’ work.

So we will decide upon criteria that will help choose the BEST idea. Some common criteria are: time, cost, ease of doing. You will need a total of four. Think of criteria and list on the chart below. Using 1, 2, 3, 4, and 5, rate each idea with each criterion in the chart below. One is the poorest, or weakest idea, while a five indicates the best. When you are finished add each column, the highest number indicates the best idea! It is really easy to do.

<table>
<thead>
<tr>

Totals__
PLAN OF ACTION: You have just ranked your ideas and found the best one. That idea with the highest score is your SOLUTION. Your last step is deciding how you can best present your solution through a plan of action. Using the 5 w's will be helpful. And don't forget to use 'how.'

The ways to present your solution are limited only by your imagination. To get your thinking started, some ways you can develop your plan of action are:

1. Write a newspaper article.
2. Design a game.
3. Make puppets and write a script.
4. Draw posters and/or make charts.
5. Write a rap and perform with classmates.
6. Write a short play or skit.
7. Develop an informative survey.
8. Take a series of photographs.
10. Combine several of the above.
11. Use none of the above.
12. BE CREATIVE. Good luck!

My plan of action will be
UNLOCK THE MYSTERY: ... CREATIVITY THINKING SKILLS

Pages 24, 25, and 26.

OBJECTIVES

1. To introduce students to Chinese writing by illustrating their ancient pictograms, then tracing the sophisticated progression into modern times.

2. To inform students of the differences in Korean writing and explain how their alphabet came into being.

3. To provide students with an opportunity to write (copy) some Chinese characters and gain appreciation for calligraphy as an art form.

4. Using the book The Chinese Word for Horse, the student will, after writing (brush painting) some Chinese characters, then use those characters to develop a story... as did the author, John Lewis.

PROCEDURE

1. Read the story, The Chinese Word for Horse, observe the progression of language development.

2. Provide water colors and brush, students may copy vocabulary words from the story. After sufficient practice student will receive a scroll shape of paper to paint four characters of his/her choice. Scroll will be bound with colored paper strips at each end, small dowel and yarn attached for hanging.

3. Student allowed to work with a partner to develop new words by combining the characters given in the story.

4. Student and partner will create a story using their new Chinese characters.
In ancient times, when the Chinese people first began to record information, they used only pictures. Later they wrote characters that resembled the pictures. Today the Chinese language has more than 50,000 characters. In order to read and write well, people need to know about 5,000 of them.

We have read THE CHINESE WORD FOR HORSE and two other stories in the book of the same title, written by John Lewis and illustrated by Peter Rigby. It is fascinating to trace word development made by combining the pictorial representation of two or more characters to create new words. Some examples are given here.
It is interesting to note that up until 1450 Koreans used the Chinese written language. While they had their own spoken language, their books were all in Chinese characters, and only the very rich could learn to read because it took so much time and effort. Also it was very difficult, often impossible, to express Korean ideas using Chinese characters. For these reasons, King Sejong called his court scholars to discuss designing a true Korean alphabet that would make studying and learning easier. The writing system was called HANGUL, and is so basic and simple it can be mastered in a day. There are only 10 vowels and 14 consonants to learn, compared to the 26 letters of our English alphabet, and the 5,000 plus used by the Chinese.

Naturally the Koreans do not have a need for the same sounds as in English, so some of our letters are not represented. In order for you to compare Korean with the Chinese system, I have included their alphabet.

Naturally the Koreans do not have a need for the same sounds as in English, so some of our letters are not represented. In order for you to compare Korean with the Chinese system, I have included their alphabet.
Continue on for a few additional Chinese language word combinations.

Using your imagination, create some symbols that could represent words. Next combine symbols as the Chinese did to create other word meanings. Label.
CREATIVE THINKING SKILLS: Pages 27, 28, 29, and 30.

VERBAL FLEXIBILITY: CLASSIFY Page 27

OBJECTIVES
1. To introduce the concept of Provinces as they differ from States.
2. To have students analyze the names of the provinces and identify ways in which they can be classified.

PROCEDURE
1. Using the two examples provided, students will complete the first two boxes.

PRINT OUT: VOCABULARY Page 28

OBJECTIVES
1. To teach vocabulary words about China.
2. To present a challenging learning activity.

PROCEDURE
1. To review words for meaning, relate to cross-word puzzle without clues.
2. Request students write lightly in pencil so words can be more easily moved around.

CATEGORIES GAME Page 29

OBJECTIVES
1. To develop Fluency and Flexibility of thinking, having students think globally, main focus on Asia.

PROCEDURE
1. Working in pairs, students will fill in the boxes with appropriate responses.
2. Tally points at end of time limit, share responses.

COUNTRY/CAPITAL MATCH-UP Page 30

OBJECTIVES
1. To introduce a World Almanac and have students use it for reference to match countries and capitals.
2. To make students aware that some countries have changed their names, and the reasons for the change.

PROCEDURE
1. Locate the "Nations of the World" section in the almanac, guide students through one country so they will know where to look to find the capital.
VERBAL FLEXIBILITY

How many different ways can you **CLASSIFY** these Chinese provinces?

Example: Provinces (states) having eight or more letters.
         Provinces having three or more syllables.

CREATIVITY: Pages 31, 32, 33, 34 and 35.

This final section deals with Figural and Verbal Fluency, Flexibility, Originality and Elaboration, which are the components of CREATIVITY.

PICTURE THIS Page 31

OBJECTIVES
1. Students will draw upon their creative skills to develop the 'idea starter' into a picture about China.

PROCEDURE
1. Discuss China's landscapes, cities, parks and temples, and relate to slides. What impressions remain the most vivid?

INDEPENDENT STUDY Page 32

OBJECTIVES
1. The student will identify and then select areas of China that hold the greatest personal interest.
2. The student will classify information into categories, and demonstrate this skill in the travel brochure.

PROCEDURE
1. Provide library time for research using books, encyclopedias, atlases and World Almanac.
2. Using the yellow pages of the telephone book, assign each student a different Travel Agency to contact, to request folders/posters about China.
3. Upon completion of teacher guided research, student will be provided with the necessary art paper and markers, and assignment will become a homework (independent) project.

ELABORATION Page 33

OBJECTIVES
1. To force students to use their creative powers by generating figural fluency on a specific topic.
2. To stress and encourage elaboration, adding details, as an integral part of creativity.

PROCEDURE
1. Brief review of the four components of creativity, and how they apply to the assignment. (Fluency, Flexibility, Originality and Elaboration.)

PICTURE POSTCARD Page 34

OBJECTIVES
1. To aid student in further refining his/her concepts of temples, palaces, villages, and beauty of China in general.

MATERIALS
1. All the post cards and picture books brought home from China. Also brochures and other information gathered for the travel/poster assignment.

FLUENCY, FLEXIBILITY, ORIGINALITY, ELABORATION Page 35

OBJECTIVE
1. In summation, use this as a culminating activity. Students' poems should reflect the previous assignments.
Picture This:

ELABORATION:
Use the line designs below to create a picture about CHINA.
Remember what you have learned.

Hint: Think of the slides.
INDEPENDENT STUDY

CREATE A TRAVEL POSTER AND TRAVEL BROCHURE.
Pretend that you work for a tour company. It is your job to
design a travel poster and accompanying travel brochure that will
attract tourists to join your tour of China. Use research information
and include the outstanding attractions of the country. Arrange your
poster creatively!
The space below is for planning and sketching. Use art paper for
your finished product.

Originality Elaboration
ELABORATION: Adding details.

Turn each box into a drawing about China.
HINT: Remember the slide program.
CREATE A PICTURE POST CARD

Pretend that you and your family are traveling around China. You have just visited The Great Wall. Send a picture post card to a friend back home, describing the experience in words on the message part, then draw a picture of your impressions.

Draw your picture here

Write your message

Write the address
VERBAL FLUENCY

CREATE . . . CREATIVE . . . CREATIVITY . . . CREATIVENESS . . .

Use your creative powers to write a poem about CHINA in the space below. Remember the four components of creativity: FLUENCY, FLEXIBILITY, ORIGINALITY and ELABORATION.
Beijing Bicycle Brigade

Early in the morning, as Beijing awakes,
The bicycle brigade slowly pulls up its stakes.
Moving into position on sidewalk and street,
Hungry people soon arrive, for everyone must eat.

Cleverly constructed, a flat bed, over the rear wheel.
Serves as a kitchen, where food is cooked with zeal.
Can also be a bakery for rolling dough and frying treats
In fact, looking closely, you’ll see all kinds of eats!

For it doubles as a restaurant, people sit on mini-stools.
And slurp big bowls of steaming soup,
Chop sticks their only tools.

Dumplings, noodles, won ton and tea,
How they manage it all on a bicycle is well beyond me!

From our bus window we see the most amazing sights.
Boxes piled up to the sky,
Trash and garbage stacked so high.
Even refrigerators go by,
On bicycles! Yes, I wouldn’t lie.

Life in Beijing could not exist
If the amazing bicycle didn’t persist.
It is my single most indelible impression
Of a country known mostly for human oppression.

by Patricia Flores
September 4, 1994
LOTUS BUDS

If these shoes could talk, what might they say?
Would they tell of happy times,
Or lament each passing day?
Soft and pink, dainty and small,
Yet weeping and sighing
Mar their young maiden's call.

As a child of seven
Her feet had been bound
To insure that a suitable husband be found.

That child can no longer run and play,
Flying kites on a windy day.
Now with lotus bud stubs,
She must stumble along
Foot-crippling, mind-binding, hopeless endurance.

She became expendable
When there was nothing left to give.
Slowly times are changing,
It's the 20th century, you know
So after one thousand years,
Bound feet were the first to go!

by Pa·ricia Flores

Mapping the Five Themes of Geography throughout China

SHARON H. GORALEWSKI
Oxford Middle School
1400 Lakeville Road
Oxford, Michigan 48306
(810) 628-4831
MAPPING THE FIVE THEMES OF GEOGRAPHY
THROUGHOUT CHINA

Introduction: The purpose of this unit is to introduce the People's Republic of China to students through the use of the five fundamental themes of geography. It will also reinforce the understanding of the five themes for the student.

Grade Level: Middle School

Time Needed: Approximately two weeks

Key Ideas: Location Place
Human-Environment Interaction
Movement
Region

Skills: Map Reading
Categorization
Classification
Cooperation
Interpreting data

Materials: Copies of the unit worksheets
World maps, especially laminated desk maps
Maps of China
World atlases
Pictures from books and magazines of life in China
Poster of "The Five Themes of Geography"
Colored pencils

Background: The Five Themes of Geography

Location
The position of a particular place or the relationship of one place to another.

Place
The special physical or human features which distinguishes it from other places.

Human-Environment Interaction
The relationship between humans and the environment.

Region
Areas which are defined by unifying characteristics, either physical or human.

Movement
The mobility of people, goods, and ideas.
INTRODUCTORY ACTIVITY

Purpose: This introductory lesson will review the five themes of geography with the students as well as acquaint them with the map of China.

Objectives: The students will answer questions based on the five themes of geography about places on the map of China.

The students will learn the five themes of geography.

Time Needed: One class period

Materials: Large map of China
Student atlases or desk maps with China on them
Poster of "The Five Themes of Geography"

Procedure: Introduce students to the large map of China.
Have students find China on their desk maps or in the atlases. Review the five themes of geography with them using the poster. Call students, either singly or in pairs, up to the large map of China. Using a pointer, randomly point to various places in and around China. Have students at their desks find these places on their maps as well. Ask each student one of the following questions. After they have answered it, have them tell to which theme the answer relates.

Answer the following questions about the place to which I am pointing on the map of China:

* Is it land or water? (location)
* Where is it? (location)
* Tell something that you know about the place. (place)
* Tell something that you know about the people. (place)
* How is the place connected with other places? (movement)
* Of what region is it a part? (region)
* How does the environment influence the people? (human-environment interaction)
* How do people affect the environment? (human-environment interaction)

Vary the questions to suit the ability of the student answering so that all can feel successful. Discuss the various answers with the students.
Every point on the Earth has a specific location that is determined by an imaginary grid of lines denoting latitude and longitude. Parallels of latitude measure distances north and south of the line called the Equator. Meridians of longitude measure distances east and west of the line called the Prime Meridian. Geographers use latitude and longitude to pinpoint a place's absolute, or exact location.

To know the absolute location of a place is only part of the story. It is also important to know how that place is related to other places. In other words, one must know that place's relative location. Relative location deals with the interaction that occurs between and among places. It refers to the many ways, by land, by water, even by technology, that places are connected.

Purpose: Using the theme of location, students will become familiar with the country of China and with the various cities and landforms of this country.

Objectives: The students will locate the country of China as well as its main cities and landforms using both absolute and relative location.

The students will give map coordinates for various places in China.

Time Needed: Two class periods

Materials: Worksheet, one copy per student
Maps of China or atlases
Blank maps of China for students to complete
Colored pencils

Procedure: Using the map of China and the atlas, the students will complete the worksheet on absolute and relative location concerning China.

Students will correctly label cities and landforms on a blank map of China.

ANSWERS TO WORKSHEET

1. 53 N
2. James Bay or Hudson Bay
3. 20 N
4. Hawaii
5. 134 E
6. 70 E
7. Beijing
8. 40 N, 116 E
9. Urumqi
10. 34 N, 109 E
11. Mt. Everest
12. Russia
13. Yellow
14. Laos, Burma, Nepal, Vietnam, India or Bhutan (need 3)
15. Pacific
16. Japan
17. east
18. Asia
19. Shanghai
LOCATION

PEOPLE'S REPUBLIC OF CHINA

Using a map of China, your geography book or an atlas, answer the following questions by filling in the blanks.

**Absolute Location**

1. Give the latitude of China's northernmost border.

2. Name a large bay in North America with the same latitude.

3. Give the latitude of China's southernmost border.

4. Name a U.S. state that has the same same latitude.

5. Give the longitude of China's easternmost border.

6. Give the longitude of China's westernmost border.

7. Name the capital city of China.

8. Give the coordinates of the capital of China.

9. What city is located at 43 N, 87 E?

10. Give the coordinates of the city of Xi'an.

11. What famous mountain is found at 28 N, 87 E?

**Relative Location**

12. What country lies to the north of China?

13. Name the sea that borders China on the northeast.

14. Name three countries that border China on the south.

15. Name the ocean that borders China to the east.

16. What island nation lies to the northeast of China?

17. What direction is Taiwan from China?

18. To what continent does China belong?

19. What city is located at the mouth of the Yangtze River?
MAP OF CHINA

CITIES

Using your atlas or geography book, place a dot on the outline map of China at the location each of the following cities. Label them.

Beijing
Shanghai
Xi'an
Urumqi
Tianjin
Nanjing
Canton
Kunming

BORDERS

Around the border of China, label which countries touch it.

Using a blue pencil trace the boundaries of China that are touched by water.

Label the water bodies.

LANDFORMS

Draw small brown triangles for the Himalaya Mountains. Make a key to explain this symbol.

Using a blue pencil, trace the course of the Yellow and the Yangtze Rivers. Label them. Add this to your key.

Using the yellow pencil, lightly color the area of the Gobi desert. Add this to your key.

Using the green pencil, lightly color the area of the Manchurian and North China Plains. Add this to your key.
All places have distinctive characteristics that give them meaning and character and distinguish them from other places on Earth. Geographers describe places by their physical and human characteristics. Physical characteristics include such elements as landforms, bodies of water, climate, soils, natural vegetation, and animal life. Human characteristics of the landscape can be noted in architecture, patterns of livelihood, land use and ownership, town planning, and in communication and transportation networks. Languages, as well as political ideologies, also help shape the character of a place. Studied together, the physical and human characteristics of places provide clues to help students understand the nature of places on the Earth.

**Purpose:** Using the theme of place, the students will become better acquainted with the various features of the country of China.

**Objectives:** The students will identify various characteristics of China when given a description of that place.

The students will be able to tell whether a characteristic of a place is a human or a physical one.

**Time Needed:** One class period

**Materials:** Laminated desk maps of China or atlases

A clue cut from the chain of characteristics for each pair of students.

**Procedure:** The students will work in pairs to complete the "chain" describing characteristics of the country of China. As each place is identified, the teacher (or a helper) will list it on the board. Once the chain is completed, the students will discuss whether each answer is a human characteristic or a physical one. This will also be written on the board. Students will use maps and atlases to help them with their answers.
Who has the third largest country in the world? (The teacher will start the chain with this one.)

I have China. Who has the tallest mountains in the world which are in China?

I have the Himalayas. Who has the symbols found on the Chinese flag?

I have yellow stars on red. Who has the population of China?

I have 1,094,700,000. Who has the capital of China?

I have Beijing. Who has the main political party of China?

I have Communist. Who has the monetary unit of China?

I have a yuan. Who has the size in square miles of China?

I have 3,718,782. Who has the highest point in China?

I have Mt. Everest. Who has the climate in which most of China is found?

I have the temperate zone. Who has the main agricultural product from the south of China?

I have rice. Who has the northern desert of China?

I have the Gobi. Who has the river that has Shanghai at its mouth?

I have the Yangtze or Chang River. Who has one of the greatest of China's manmade structures? It can be seen from outer space.

I have the Great Wall. Who has name of the great winds that bring heavy rains to China's southern region?

I have the monsoons.
CHAIN OF CHARACTERISTICS OF CHINA

(ANSWERS)

China - human characteristic
Himalayas - natural characteristic
yellow stars on red - human
1,094,700,000 (people) - human
Beijing - human
Communist - human
yuan - human
3,718,782 (square miles) - natural
Mt. Everest - natural
temperate zone - natural
rice - natural
Gobi - natural
Yangtze or Chang River - natural
Great Wall - human
monsoons - natural
The environment means different things to different people, depending on their cultural backgrounds and technological resources. In studying human-environment interactions, geographers look at all of the effects, both positive and negative, that occur when people interact with their surroundings. Sometimes a human act, such as damming a river to prevent flooding or to provide irrigation, requires consideration of the potential consequences. The construction of the Hoover Dam on the Colorado River, for example, changed the natural landscape, but it also created a reservoir that helps provide water and electric power for the arid Southwest. Studying the consequences of human-environment interactions helps people plan and manage the environment responsibly.

Purpose: Through the theme of human-environment interaction, students will come to understand how humans affect their environment as well as how the environment affects human lifestyles.

Objectives: The students will list ways that people affect their environment. They will explore ways to improve the environment by changing human behavior.

The students will read about and map the site of the proposed Three Gorges Dam in China. They will draw this area on a map.

The students will list the positive and negative affects on the area if the dam is not built and also what will happen if it is built.

Time Needed: Two class periods

Materials: Articles on the Three Gorges Dam.
Maps of China and atlases
Blank maps

Procedure: Have students list ways that people affect their environment every day (for example, driving cars, using water, disposing of garbage, smoking cigarettes). Have students discuss which activities are more harmful or more helpful to the environment. Discuss the findings and have students suggest ways that people can change their behavior and improve their environment.

Have students read the articles on the Three Gorges Dam project. On a blank map of China, instruct the students to draw the rivers involved. Have them plot any nearby cities. Then they should draw in the dam and reservoir site. On the worksheets have them list what would happen if the dam is not built. Then have them list the affects of the dam project. Relate this to this theme.
THE THREE GORGES DAM
THE THREE GORGES DAM

A. List what will continue to happen if the Three Gorges Dam is not completed.

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

B. List what will be the affect of the Three Gorges Dam when it is completed.

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

C. What adaptations will the people of this area need to make once the dam is completed?

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
"The Yangtze's Gorges"
Kristof, Nicholas D.
New York Times, 14+ (Sec. 5) Oct. 10, '93
The Three Gorges, which extend 120 miles along the middle reaches of the Yangtze River in central China, attract many tourists, but some fear that a huge dam that is just beginning construction will flood the area and destroy the scenery. The writer describes a river trip aboard the cruise boat Yangtze Paradise.

"River of Memory"
Pan, Lynn
Travel Holiday, 176:56-67+ Feb. '93
China's majestic Yangtze River rises from glaciers in Qinghai and rolls 3,960 miles eastward, emptying into the East China Sea at the city of Shanghai. No other river in the world combines such beauty and danger. Swelled by melting snows and monsoon rains, the river has unleashed killer floods that have cost perhaps 500,000 lives in this century. At the same time, it is a sublime, almost mystical force that painters and poets have celebrated for 20 centuries. The most vivid section of the Yangtze is the 126 mile span through the fabled Three Gorges. China's rulers have launched a controversial plan to create a huge dam at the largest of the gorges, aimed at controlling the floods and creating the world's largest hydroelectric system. The writer describes a cruise he took down the Yangtze River and offers information on booking such cruises.

"Dam Right - or Wrong?" (Three Gorges Project)
Evans, Eleanor Ridge
Travel Holiday, 176:65 Feb. '93
China plans to harness the Yangtze River with the Three Gorges Dam. The dam, which will take almost 20 years to complete, will be 1.3 miles long and 610 feet high and will raise the water level 360 feet, creating a reservoir 360 miles long and enough power to run the world's largest hydroelectric plant. The dam is designed to boost the economy, provide environmental-friendly energy, control the Yangtze's floods, and make the river easier to navigate. Critics charge, however, that the dam will sit on an active fault line that could trigger an earthquake.
"The Long River"
Shaplen, Robert
The New Yorker, 64:38-40+ Aug. 8 '88
The writer describes a trip to China that he and his wife took last fall to visit places where they once lived and to explore by boat the Three Gorges area of the Long River - known as the Yangtze to Westerners - between Chongqing and Yichang. Three Gorges has been tentatively chosen as the site of a new dam that, if constructed, will be the largest in the world. It would create abundant sources of hydroelectric energy, would upgrade methods of flood control, and would simplify navigation, particularly around Chongqing. It would also cause ecological and environmental problems. The dam would diminish the grandeur of the gorges and submerge several historic towns and archaeologic sites. The Chinese government hopes to have the dam completed by the year 2000.
A basic unit of geographic study is the region, an area on the Earth's surface that is defined by certain unifying characteristics. The unifying characteristics may be physical or human or cultural. In addition to studying the unifying characteristics of a region, geographers study how a region changes over time. Using the theme of regions, geographers divide the world into manageable units for study.

**Purpose:** This lesson on regions will help the students to better understand the various climates found in China. When this information is combined with the landform regions, the students will better understand what life is like in China.

**Objectives:** The students will complete two maps, one showing the three main climate regions of China, and the second showing the main landform regions as well as rivers. The students will compare the two maps and choose one region about which to write, describing what life is like in this region and telling why that is so.

**Time Needed:** Two to three days.

**Materials:** Atlases showing climate regions and landforms. Blank maps of China Colored pencils

**Procedure:** After discussing the theme of regions, the students will make two maps, one showing climate regions and the other showing landform regions. Once the maps are completed, the students will compare the two and choose a region about which to write. They need to describe the chosen region explain why this is indeed a region.

The three main climate regions are:
* The monsoon district in the southeast
* The arid northwest
* The cold, alpine north

The main landform regions include:
* The Manchurian Plain
* The North China Plain
* The Gobi Desert
* The Takla Makan Desert
* The Plateau of Tibet
* The Yunnan Plateau
* The Himalayas

The main rivers include:
* The Yangtze or Chang River
* The Yellow or Huang River
THREE MAIN CLIMATE REGIONS

KEY

372
People interact with other people, places, and things almost every day of their lives. They travel from one place to another; they communicate with each other; and they rely upon products, information, and ideas that come from beyond their immediate environment.

Students should be able to recognize where resources are located, who needs them, and how they are transported over the Earth’s surface. The theme of movement helps students understand how they themselves are connected with, and dependent upon, other regions, cultures, and peoples in the world.

**Purpose:**
Using the theme of movement, the student will better understand how the world is interconnected.

**Objectives:**
The students will complete a map worksheet which shows how one item, a bicycle, can be a product of the movement of goods around the world.

The students will list as many items as possible, found both at home and in the classroom, that were made in China.

**Time Needed:**
One class period

**Materials:**
Worksheets, one per student

**Procedure:**
Discuss the theme of movement with the students. Then have them complete the worksheet on "Bikes and World Trade". Discuss how important the bicycle is to movement in China.

Next have students list as many things as possible that they can find that have a label saying, "Made in China". Have them theorize what things might be made in the U.S.A. and sent to China.
Bikes and World Trade

Bicycles are a very popular mode of transportation in China. Did you know that people from across the world work to create some types of bicycles? Parts from many different countries are sometimes shipped to a factory where they are assembled into a bicycle.

What types of transportation are used to send products from place to place?

Bicycle parts are produced in many different countries. If you have a bicycle, parts of it may have been manufactured in the country or countries listed below.

- brakes - Japan
- grips - United States
- crank and chain - Japan
- frame - England, Italy, France, Japan, Taiwan or United States
- handlebar - Japan
- tires and rim - Taiwan
- seat - Italy or United States

On the picture below, draw lines from the bicycle parts listed above to the country or countries where it may have been made.
Look around your home and your classroom. Inspect labels and tags. How many things can you find that are made in China? List them below.

CHINA
PROJECTS AND ACTIVITIES

Patricia A. Hardy
Castleberry High School
Fort Worth, Texas
Dragons

Compared to Western dragons, Eastern dragons are quite small. Their bodies are long, and they have two horns for ears. They have no wings, and their soft breath is said to form clouds. They do not roar; instead they make the sounds of beating gongs and jingling bells. Chinese dragons dine on sparrows. They live wherever there is water. They are kind and wise friends of human beings.
IN THIS PACKET YOU WILL FIND SEVERAL ACTIVITIES OR MINI-LESSONS ON CHINA. THESE ARE USED IN WORLD GEOGRAPHY, WORLD HISTORY OR GENERAL SOCIAL STUDIES. THERE ARE ACTIVITIES APPROPRIATE FOR GRADE LEVEL 6-12.
TIMELINE PROJECT

One way to obtain a proper perspective on a time period in history is to create a timeline. I like for my students to take the basic timeline dates and then enhance the timeline with the use of a technique called mind-mapping. Mind-mapping calls for the students to extend the timeline by decorating with slogans, symbols and drawings which relate to the events.

The use of unlined typing paper, placed end to end and connected with clear tape is a simple format. This timeline will fold easily and seems to be the simplest procedure. By no means is this the only way to do the timeline. Some very creative designs have resulted once the basic concept is grasped.

The project will be graded on creativity, originality, accuracy and neatness. The use of color is a key component in mind-mapping.
CHINA: TWENTIETH CENTURY TIMELINE

The following are some of the key dates of the 20th Century for China.
Please create a timeline which would include all of the dates and elaborate on each decade with the mind-map technique.

Please use one sheet of typing paper to demonstrate one decade. Place them end to end and connect with clear tape.

Your very first page will be a cover page thus will need to have the title and be decorated in a Chinese motif. On your last page, 1990-2000, you will be free to make an educated guess about the future of China. On the back of the last page please put your name and period.

The project will be graded on creativity, originality, accuracy, and neatness. The use of color is a key component in mind-mapping.

Some color notations for China:
red-good luck and is sued as a holiday and wedding color
blue-is the color for little girls
black-is the color for little boys
white-means mourning

ABC'S BOOK OF CHINA

The ABC BOOK OF CHINA is a fun, interactive way to study China. Give each student in the class a letter of the alphabet and a set of instructions. Using the given dimensions, ask the student to draw on the paper their assigned letter in block form with a word beginning with this letter. For example, P is for panda or X is for Xian. The student needs to write the pronunciation of the word, give the definition, and at the bottom of the page, illustrate the word. After each student has completed their page, compile a book using poster board, cut to book size. Assign students to create or design a book cover, produce a cover page, copyright, and a credit page.
Box 4.3 The Three Gorges Controversy

In April 1992, the National People's Congress approved construction of the Three Gorges hydroelectric project on the Chang Jiang (Yangtze) River as part of China's 10-year development program. Approval brought the nation one step closer to realizing a project that has been debated for decades and remains deeply controversial both inside and outside China.

As planned, Three Gorges will be the world's largest and most complex hydroelectric dam. Its capacity, 17 million kilowatts, would top that of the largest dam currently operating by 40 percent. Its projected annual power generation of 84 billion kilowatt-hours is equivalent to a coal mine capacity of 40 to 50 million tons per year. The project will supply power to the central China grid of Hubei, Hunan, Henan, and Jiangxi, and to the eastern China grid of Shanghai, Zhejiang, Jiangsu, and Anhui. It will take 18 to 18 years to build and cost (in 1990 prices) an estimated RMB 57 billion ($10.57 billion). Once completed, the dam would be 185 meters high and store 39.3 billion cubic meters of water.

The principal advantage of the project is that added power generation is desperately needed to keep pace with China's economic growth. It is estimated that China's power output must rise by 8 percent annually to keep pace with a 6 percent annual increase in gross national product. In practical terms, that means the nation's total 1990 power capacity of 130 million megawatts must grow to 580 million by the year 2015. Chinese environmental officials note that the dam would relieve the danger of flooding in the chronically flood-prone middle and lower reaches of the Chang Jiang River valley. In addition, because generating electricity equal to the dam's projected annual output requires burning about 40 million tons of coal, the dam would substantially reduce emissions of sulfur dioxide and carbon dioxide.

Shipping coal by rail from the main production bases in Shanxi, Shaanxi, west Inner Mongolia, and Ningxia to Hebei and Henan is obstructed by natural features such as mountain passes. The option of building power plants in coal-producing areas is limited by scarce water resources near the main coal-production areas. Thus by lowering demand for coal, the dam would ease pressure on an overburdened rail transport network.

Outside China, the chief focus of opposition to the dam is the International Three Gorges Coalition headed by Green China, a group of Chinese students based in the United States. Other members include the Overseas Chinese Ecological Society, Friends of the Earth, and the Canadian group Probe International. There is considerable opposition within China as well, evidenced by the fact that about one third of the 1992 National People's Congress either voted against authorizing Three Gorges or abstained.

Much of the criticism targets the project's social impact. Chinese officials estimate that the reservoir will partially or completely inundate 2 cities, 11 counties, 140 towns, 326 townships, and 1,351 villages. About 23,800 hectares of cultivated land will be subsumed. According to estimates, more than 1.1 million people would have to be resettled, an expensive proposition accounting for about one third of the project's $10 billion cost. Many critics believe the resettlement would fail, in light of its scale and the poor record of most other resettlement efforts. The government would construct new towns and urban areas, reclaim wasteland for cash crops, and house the resettlers on nearby hillsides.

Concern has also been expressed about the project's ecological impact. The Yangtze dolphin, with a population of about 200 and one of the world's most endangered species, would be further threatened, along with the Chinese sturgeon and many other fish species. The dam and reservoir would destroy some of China's finest scenery and an important source of tourism revenue.

Critics have other complaints. The quality of St. Paul's municipal and industrial wastewater could deteriorate as the dam reduced river flow, disturbing the water supply to numerous downstream lakes and destroying the wetland habitat of numerous endangered species such as the Siberian crane. Furthermore, opponents maintain, silt trapped behind the dam would deprive downstream regions and the river's estuary of vital nutrients. Silt buildup behind the dam might also impede power generation.

Prioritize the pros and cons of this issue. Place the #1 next to what you think is the most significant pro and the most significant con. Prioritize each column by numbering.

Divide the class into groups and have them research the following dams and create a similar chart of pros and cons:

1. Aswan Dam-Egypt
2. Attaturk Dam-Turkey
3. Hoover Dam-U.S.A.
4. Kainji Dam-Nigeria
THE CHINESE LANGUAGE

The most widely spoken language in the world is Mandarin Chinese, the language of over 885 million people. It is the official language of China and the language of China’s Han majority. The language does not use an alphabet of letters to write words. Symbols, called characters, are used in place of letters. Words are represented by one or more characters. There are no separate letters or sounds in the Chinese language. Many words have only one character. The language is difficult to read and write. In their first few years of school Chinese children are expected to memorize thousands of characters. In recent years the government has attempted to make the language easier. This new language is called Pinyin. The government uses it to communicate news reports to other countries.

Chinese Place Names

On your own paper, translate the following Chinese place names:

Example: Beijing = Northern Capital

1. Yunnan = ______________________
2. Hainan = ______________________
3. Huang He = ____________________
4. Shanghai = ____________________
5. Tian Shan = ____________________
6. Nanjing = _____________________
7. Chongqing = ___________________
8. Tianxin = _____________________
9. Xian = ________________________
10. Taipei = ______________________
11. Taiwan = _____________________
12. Why would Taipei not be spelled Taibei? _____________________
USE THE CHARACTERS LISTED ABOVE TO MAKE UP YOUR COMBINATIONS.

Shandong

Jiangxi

Hunan

Hebei

Shanghai

Shanxi

Guangdong

Guangxi

Huangho
POLITICAL CARTOONS

An old Chinese proverb, a picture is worth a thousand words! Political cartoons are an excellent way to introduce a unit or a concept. They also work nicely as prompts for writing or discussion. I often use the interpretation of cartoons as a part of tests.

CHINA FOR CHILDREN

A

CURRICULUM PROJECT

submitted for

1994 FULBRIGHT SEMINARS ABROAD PROGRAM
CHINA: TRADITION AND TRANSFORMATION

NILA R. HURLEY
LAFAYETTE, CALIFORNIA
DECEMBER, 1994
INTRODUCTION

As an immigrant to the U.S., I have been fascinated with the study of different cultures and different ways that multi-cultural children learn and integrate in our society.

For the past six years, at the elementary school to which I am assigned, I have been the project director for a specially funded in-service program which I called "Global Awareness". Its primary goal is to improve awareness of other cultures among elementary school students. This interest in teaching about global awareness and my experiences in the Fulbright Seminars Abroad Program, led to the genesis of my "China for Children" project.

The main goal of "China for Children" is to give the elementary teacher a seven day lesson plan to increase students' understanding of China, the most populous country in the world. I feel that this is an important and relevant project because of the increasing ethnic diversity of U.S. public schools-and because of the role that the Pacific Rim will play in our emerging and diverse population.

During my time in China on the Fulbright seminar, I sought out materials and visual aids that would bring to life China's rich cultural history for students. These items help form a catalyst for class lectures and discussions. After returning from China, I divided the items I had collected into two kits or boxes: "China for Children, Box 1" and "China for Children, Box 2".

Included in Box 1 are books selected from the bibliography, as well as maps, pamphlets, videos, slides and tapes to be used in teaching the seven lessons.

In box 2 are artifacts such as bound shoes, miniature reproductions of Terracotta Warriors, a Chinese flag and currency, as well as Chinese herbs and spices. As children are visual learners, I included in this box as many items as possible to make the lessons come to life. Also in Box 2 are a traditional woman's dress, bicycle bells, chopsticks, josh sticks and incense. And to round out the collection there are Chinese comics, toys and a Mc Donald's menu from Beijing!
Day 1 starts with teaching children the location and geography of China.

Day 2 is a comparison of the population and geography of China and the United States. Most students here have a hard time comprehending the immensity of China's population problem.

Day 3 and Day 4 give overviews of China's history. Marco Polo's voyage will be discussed and the story of bound shoes will be introduced. Hopefully, there will be animated discussions about Chinese traditions and customs, and also about the transformations taking place at all levels of Chinese life.

Day 5 will deal with the educational system in China.

Day 6 will be devoted to reading and discussing selected sections from a variety of materials from the bibliography.

Day 7 will deal with Chinese immigration to California with special emphasis on the "sojourner" nature of that immigration. Also emphasized will be the hardships faced by these immigrants.

It is my hope that because of my project, many more students will learn about the mysteries, joy, hope and problems that you find in China today. In particular, I hope that through learning about Chinese history and culture immigrant children will cherish their own traditions, rejoice in their differences and appreciate our American tradition of diversity.

Nila R. Hurley

CHINA FOR CHILDREN
DAY I. GEOGRAPHY

I. Briefly explain what knowledge, attitudes, or skills the students are to gain from the lesson.

1. Students will know the location of China on a globe.
2. Students will gain understanding of area, land forms, rivers, resources and languages of China.

II. List the materials that will be used during the lesson.

1. World Map and Globe
2. Slides: Beijing, Guilin, Shanghai

III. Describe the activities involved in the lesson.

1. The teacher will familiarize the students with the location of China using maps, globes and atlases.
2. Show the video-"Modern China".

IV. Estimate the time needed for the lesson.

1. A single hour-long lesson.

V. Explain how a teacher is to determine whether the purpose described in # 1 has been accomplished.

1. Students will be able to locate China and its main cities on a globe.
2. Students will write a paragraph about their impressions of China, including their opinion as to which slide impressed them the most and why.
3. They must also respond to the question whether or not they would like to visit China someday and why?
I. Briefly explain what knowledge, attitudes, or skills the students are to gain from the lesson.

1. The students will be able to compare and contrast the geography and population of the U.S. and China.
2. Students will gain an understanding of world population so that comparisons between that of China and the U.S.A. will be facilitated.

II. List the materials that will be used during the lesson.

1. Maps, globes, and atlases.
2. Prepared lesson notes teaching "What is 5 billion?", also, what is the connection between population and environmental concerns?

III. Describe the activities involved in the lesson.

1. Teacher compares the size of the U.S.A. and China and discusses the population of both countries.
2. Teacher leads the class in a discussion on "How much is a billion".
   a.) A stack of U.S. currency one inch high will contain 233 bills. If you had a million dollars in thousand dollar bills, how high would the stack be?(4.29 inches high). If you had a billion dollars in thousand dollar bills, how high would the stack be?(357 feet or almost the length of a football field).
   b.)Using "Monopoly" money have the students stack the money in inch high stacks. Have them figure out how many inches there are in 357 feet.
   c.)Talk with the students about how old they would be if they were a million seconds old.(11.6 days). Then discuss how old they would be if they were a billion seconds old(31.7 years).
   d.)Discuss how many words there are in the Encyclopedia Britannica (about 44 million words). Then go on to discuss how many complete sets of encyclopedias you would need to get 5 billion words-(over 110 full sets).

IV. Estimate the amount of time needed for this lesson.
1. A single hour-long lesson.

V. Explain how a teacher is to determine whether the purpose described in # 1 has been accomplished.

1. Have the students write a paragraph discussing the world population and the need to conserve the world's resources.
CHINA FOR CHILDREN
DAY III & IV

I. Briefly explain what knowledge, attitudes, abilities or skills the students are to gain from the lesson.

1. Students will have an overview of the history of China.
2. Students will know about Xian and the terracotta warriors.
3. Students will gain appreciation of China's ancient history and the voyage of Marco Polo.

II. List the materials that will be used during the lesson.

1. Outline of the history of China
2. Slides of Xian
3. Terracotta Warriors
4. Bound Shoes
5. Book—Wild Swans
6. Book—The World's Greatest Explorer—Marco Polo
7. Book—Marco Polo and the Medieval Explorers
8. Book—Xian—Ancient Capital

III. Describe the activities involved in the lesson

1. The teacher gives a brief overview of Chinese history.
2. Show slides and lead class in a discussion of Xian.
3. Share with the class the book Xian—Ancient Capital.
4. Show the students pictures of the terracotta warriors and describe the excavations there.
5. Share with the class the bound shoes, and read excerpts from the book Wild Swans, by Jung Cheng, pages 24 and 25.
6. Share and discuss with the class the following books:
   a.) Marco Polo and the Medieval Explorers, by Rebecca Stepoff
   b.) The World's Great Explorers—Marco Polo, by Zachary Kent

IV. Estimate the amount of time required for the lesson.

1. Two one-hour lessons

V. Explain how a teacher is to determine whether the purposes described in # I have been accomplished.
1. Have the students write a paragraph on what impressed them the most about China's ancient history.
2. Help students re-create clay models of the terra cotta warriors. The models to be no more than eight inches high. Then show what the actual size of most of them was.
3. On a world map, have students trace the route of Marco Polo's travels.
CHILDREN OF CHINA
DAY V & VI

I. Briefly explain what knowledge, attitudes, abilities or skills the students are to gain from the lesson.

1. Students will gain understanding of education and its close relationship to the dynamics of Chinese society.
2. Children will get a brief overview of the Chinese school system.
3. Children will read and appreciate books written by Chinese authors.

II. List the materials that will be used during the lesson.

1. Handouts that outline or give an overview of Education in China, showing the various levels.
2. Show video tapes made on location at Chinese schools and colleges during the 1994 Fulbright Seminars Abroad program.

III. Describe the activities involved in the lesson.

1. Teacher gives brief overview of education in China and of the Chinese educational system.
2. Teacher tells students about the Fulbright summer seminar in China and shares photos and videos made during the trip.
3. Teacher divides class in teams of two students each and gives a book to each team for reading and discussions.

IV. Estimate the amount of time required for the lesson.

1. Two one-hour lessons.

V. Explain how a teacher is to determine whether the purposes described in # I have been accomplished.

1. Students will be required to write a paragraph about how a United States public school class might be different from such a school in China.
2. Students will be required to present oral reports on books assigned for the lesson. They will be encouraged to present illustrations or dioramas as part of the reports.
SOJOURNERS TO AMERICA
DAY VII

I. Briefly explain what knowledge, attitudes, abilities or skills the students are expected to gain from the lesson.

1. Students will gain understanding of the reasons why the Chinese came to California as sojourners rather than as immigrants.
2. Students will feel the impact of prejudice and of the hardships faced by the Chinese sojourners.
3. Students will compare and contrast the Chinese expectations and the realities of life in California.

II. List the materials that will be used during the lesson.

1. Wall map of the world
2. Portions of the following books will be read in class and assigned for individual reading:
   An Illustrated History of China
   Bitter Melon
3. Copies of maps to illustrate the journey of the sojourners and the principal areas of China from which they came.

III. Describe the activities involved in the lesson.

1. The teacher gives a background of Chinese immigration and the reasons why they came as sojourners rather than as immigrants.
2. The teacher guides the class in making timelines of events that led to the immigration.
3. Students practice locating the various provinces of China.
4. Students will write advertisements encouraging Chinese to come to California.
5. Discuss why location of certain provinces was crucial to immigration.
6. Discuss the conditions of the ocean crossing as they might have been, and have the class write a list of grievances and suggestions for improvements that the captain of the ship could have made.
7. On a world map, draw the route the Chinese laborers took in coming to California.
IV. Estimate the amount of time required for the lesson.

1. Two-one hour lessons.

V. Explain how a teacher is to determine whether the purpose described in # I above has been accomplished.

1. Have the students write a paragraph on why the Chinese came to California as sojourners rather than as immigrants.
2. Show the cover of the book *Bitter Melon*. Have the students pretend that they are the grandchildren of the man. Ask students to write about what they think he would say about his immigration to California!

VI. Time Line: Sojourners to America

The Fulbright-Hayes Summer Seminars Abroad Program
China: Tradition and Transformation
Summer of 1994
J. David Kilpatrick

project:

This is a hardcopy explanation of the computer-disc Macintosh slide-show program upon which my project is found. The slide-show is designed for students in grades sixth through eighth and for slow to moderate learners in grades up to twelfth.

purpose:

The purpose of this slide-show presentation is to give the student an overview of China, geographically, socially, culturally, economically, and politically. It is designed as an orientation-motivational presentation to provoke further interest in and investigation of China by the student.

title:

CHINA: YESTERDAY, TODAY, and TOMORROW

format:

Macintosh ClarisWorks 3.0 computer disc “slide-show”.

objectives:

1. To provide students with general background information necessary for an understanding of China both historically and at the present, as well as to provide students with some thought provoking ideas as to where China may be heading in the future.

2. To stimulate student interest in and understanding of China by providing pictorial imagery as well as text.
3. To present a brief history of China.
4. To present a geographical overview of China.
5. To introduce students to some of the ethnic minorities of China.
6. To introduce students to a few of the famous landmarks, monuments, and historical sites in China.
6. To acquaint the student with a brief discussion of the modern government of China.
7. To introduce the concepts of modernization, economic reform, and "socialism with a market focus".

behavioral goals:
1. Students will learn to analyze and interpret data, text, and pictures.
2. Students will become aware that there are many Chinas: Mythical China, historical China, Modern China, Realistic China, and the China of the future.
3. Students will be able to formulate concepts and images about China not only from pictures and sounds, but also from reading sections of texts and drawing conclusions about what they have read.
4. Students will master new vocabulary gleaned from reading the narrative text.
IMPORTANT!

TO GET YOUR COMPUTER TO OPEN THIS PROGRAM, YOU MAY HAVE TO TELL IT TO ACCESS 4,000 K OF MEMORY.

TO DO SO:

1. SELECT (HIGHLIGHT) THE CLARISWORKS ICON

2. PRESS THE "APPLE- " KEY, THEN THE "T" KEY WHILE HOLDING DOWN THE "APPLE- " KEY.

3. CHANGE THE PREFERRED MEMORY SETTING TO 4,000.

THE PROGRAM SHOULD THEN OPEN!
INSTRUCTIONS

BELOW ARE LISTED, STEP-BY-STEP, INSTRUCTIONS FOR USING THE APPLE MACINTOSH COMPUTER-DISC CLARISWORKS 3.0 SLIDE-SHOW PRESENTATION:

1. Turn on the computer.

2. Insert the floppy disc.

3. When the disc icon appears, double-click on it.

4. When the "Program" icon appears, double-click on it.*

5. The first page of the slide-show is an instruction page.** Read it carefully and completely, and follow instructions.

*Be patient, it takes a fairly long time to open.

** See the next page for a hard copy of the first page of the program's instructions.
To run this Slide-show:

1. Put arrow on view at top of screen.

2. Click and drag down to "slide-show".

3. Release, then click on start.

INSTRUCTIONS

IN SLIDE-SHOW, PRESS THE SPACE BAR TO ADVANCE

In slide-show, press Q TO QUIT, press the left arrow to go back. then click on DONE, then click on FILE at top and drag down to QUIT and release.
CHINA: YESTERDAY, TODAY, AND TOMORROW

8. Modern China  
   a. Economic Reform  
   b. Democratization  
   c. Human Rights
China, or the People’s Republic of China as it is officially known today, occupies the eastern half of the continent of Eurasia. It is bordered on the north by the Mongolian People’s Republic and Russia, on the West by Russia, Afghanistan, Pakistan, on the south by India, Nepal, Bhutan, Burma, Laos, and , and on the east by Macao, Hong Kong, the South China Sea, the Taiwan Straits, the East China Sea, the Yellow Sea, North and South Korea, and the Sea of Japan.

China is shown above as the large yellow area and occupies 9.6 million square kilometers, or 3,691,502 sq. m. China is the third largest nation on earth with regard to land area and the first largest in population with 1.2 billion people.

Topographically, the country is divided into mountain regions, high plateaus, basin regions, hilly areas and plains. The terrain ranges from the arid desert regions of the Gobi to the lofty heights of the Himalayas to
the fertile regions of the Yellow and the Yangtze River valleys. Ninety percent of China's population lives in the eastern region of the country.

Winter climates vary in China from extreme cold in the north to spring-like days in cool evenings in the south.

Summer throughout China is hot and humid, especially in the southern and eastern coastal areas. The heat and humidity are felt in South China from March through November.
It is difficult to generalize about western China because of the wide disparities in both local conditions and elevation. In the eastern southern mountain ranges, there can be quick and dramatic changes in temperatures.

The following is a list of median temperatures by season and area:

<table>
<thead>
<tr>

Rainfall varies from 25 inches per year in North China (the summer months accounting for about 70%) to nearly 80 inches in the Pearl River area near Hong Kong. Much of western China is semi-arid or arid.
THE TEMPLE OF HEAVEN

ONCE A YEAR THE EMPEROR MADE SACRIFICES AT THE TEMPLE OF HEAVEN FOR GOOD HARVESTS. IT IS LOCATED IN TIANTAN PARK IN BEIJING, CHINA
China's recorded history dates back at least 4,000 years and evidence of human life goes back much farther; perhaps half a million years ago. Sometime during the fourth or third centuries, smaller Chinese tribes began to merge into bigger tribes, and finally into small states. By the time of the Warring States period (481-221 BC), the number of competing states for supremacy had been reduced to seven. The strongest of them was called Q'in.

The Q'in Dynasty (221-206 BC) united the empire in 221 BC. Although the dynasty was in power only a short period of time, they standardized transportation, measurements, weights, coins, and the Chinese system of writing.

The next dynasty was called Han. During their period of power, contact with other cultures increased as caravans began to travel on the Silk Road bringing horses and gold to China in exchange for silk. A new power appeared in the imperial court: the palace eunuchs, castrated males from the lower classes. Originally hired to look after the emperors' wives and concubines, they became important advisors, engaging in palace intrigues and power struggles until 1911, when rule by dynasty ended.

The Han Dynasty fell in 220 AD, and there followed nearly 400 years
restoration. Unfortunately, after the second Ming emperor, China, pursuing an isolationist policy, failed to acknowledge and halt the persistent European advance into Asia and China. Ignoring the Western advances into China, the Ming court focused on belligerent threats from northern nomads, and from Japanese pirates and expeditionary armies, consequently China was forced to undergo a long period of foreign domination and exploitation. The Great Wall was reinforced at the expense of the peasantry, and the eunuch paralyzed the imperial court with intrigue. As a result, the Ming Dynasty was overthrown late in the seventeenth century.

At first, invited from Manchuria to oust rebels out of Beijing following the Ming collapse, the Manchus went on to establish the Q'ing Dynasty (1644-1911). By the middle of the eighteenth century, the territory ruled by the Q'ing Dynasty covered over 4.4 million sq. miles.

From the first, the Q'ing followed isolationist policies. By the middle of the nineteenth century, Britain began to smuggle more opium into China because she was jealous of China's monopoly of the tea trade and refusal to import many foreign products. Increasingly short of cash, the Q'ing finally ceased opium imports. The First Opium War (1839-42) was Britain's response. Together with the Second Opium
of war and social division. After a time, a new central government under the Sui Dynasty (581-618) united the country again. The Sui Dynasty was overthrown in an army revolt and replaced by 300 years of the T'ang Dynasty (618-907) which was itself eventually toppled in a long, protracted army rebellion.

Chinese civilization reached its highest point under the Song Dynasty (969-1279) with many impressive developments in agriculture, a refined monetary system using paper money, and extensive trade extending to Africa and the Middle East.

Confucianism became the political and ethical philosophy it is today, and civil servants replaced nobility and land owners as society's elite.

Before long, however, trouble arose in the north where the Mongols under the leadership of Genghis Khan conquered China by 1279. Genghis' grandson, Kublai, made Beijing his capital. The Mongols' rule of China lasted less than a century mainly because they never adjusted to Chinese culture.

In the late 1300's the Ming Dynasty (1368-1644) expelled the Mongols and ruled China until the middle of the seventeenth century presiding over a period of social, economic and governmental
war that followed in 1856-60, the two wars forced many concessions from China including the opening of more ports to foreign trade and the exclusion of foreigners from Chinese jurisdiction. By the end of the Second Opium War, British and French troops were in Beijing, and Russian, Japanese and German troops were soon to follow. By 1900, division of China was being threatened by foreign colonial powers.

**THE BOXER REBELLION**

The Q’ing Dynasty, from Manchuria, was increasingly unpopular with the Han Chinese as merely another foreign power. The so-called Boxer Rebellion (the name comes from Spirit Boxers known as the Righteous and Harmonious Fists) which was a reaction to the continual foreign humiliation and subjugation of China sought to forcibly expel all foreigners--including the Manchu rulers--from China. Foreign troops defeated the Boxers in 1900, strengthening outside domination of China.

Weakened, the Q’ing Dynasty was overthrown in a negotiated abdication in 1911 by a movement led by Dr. Sun Yatsen, working from exile to free China from foreign control, and to replace the dynastic system with democracy. But no other stable political order
followed the G'ing Dynasty's fall. Warlords and feudal military rulers exploited the power vacuum.

THE REPUBLIC

A new left-wing intellectual movement emerged in China, culminating in a large student movement on May 4, 1919. The "May Fourth Movement" was a response to the Versailles Peace Treaty which granted the former German territories in China to Japan, not back to China. Immediate effects of the movement were minimal, but it is regarded as a decisive turning point in modern Chinese history. Demands for complete national sovereignty increased significantly thereafter, and although the British sailed their gunboats up the Yangtze River one last time in 1927, new political forces--and strengthened Chinese nationalism--had emerged.

In 1921, the Communist Party in China was officially founded in Shanghai. The party's growth was fast, as was that of the Guomindang, or the National People's Party--the Nationalists--led by Dr. Sun Yatsen.

The Nationalists and Communists mutually endured a brief coalition,
but by 1928, Chiang Kaishek, now head of the Nationalist forces, succeeded in controlling all of China, having earlier broken off relations with the Communists, who retreated into the southern mountains. There, under Mao Zedong, they developed a strategy that replaced the Soviet doctrine of urban proletariat revolution with that of a peasant revolution focused on land reform.

Although Chiang Kaishek had significantly strengthened Chinese sovereignty, corruption in the government and increased Japanese threats thwarted any land reform, a neglect strategically seized upon by the Communists. Chiang responded in the early 1930's with military campaigns against the Communists, who sought escape on the famous Long March northward. Walking 6,000 miles, only 10 percent of the over 100,000 people who began the march survived.

Chiang's campaign against the Communists was diverted by Japanese advances in the north. Provoking a confrontation at the Marco Polo Bridge at Wan'ping near Beijing in 1937, the Japanese entered into war with China which proved to be the opening round of World War II. Within days, Beijing fell to Japan, followed by Shanghai, Nanjing, and lastly Canton.

With Japan's surrender in 1945, the Communists and Nationalists
reverted to their mutual dislike, and a four-year civil war between them ended only when the Nationalists and nearly two million refugees retreated to Taiwan.

THE PEOPLE'S REPUBLIC OF CHINA

Mao Zedong (Mao T'se Tung) proclaimed the People's Republic of China in 1949. The nation's problems were immense, the peasants' quality of life dismal. Agrarian land reform redistributed land to the peasants in the early 1950's. Social reforms were extensive, though not always for the better, and industries were nationalized.

Initially, the economy improved. Encouraged, Mao introduced the "Great Leap Forward" in 1958, intending to put China on equal footing with economically advanced countries. Peasant cooperatives were to be the primary means for achieving this aim. But the "leap" was a disaster, with widespread and repeated crop failures, poorly conceived public works projects, and natural disasters leading to the death of perhaps twenty million people by famine.
THE GREAT PROLETARIAN CULTURAL REVOLUTION

In 1966, student discontent turned into massive protests. Mao exploited these protests, initiating the "Great Proletarian Cultural Revolution" to unsettle his opponents. Party cadres provoked a mass movement of the Red Guards, forcing the country once again into chaos, at times close to civil war. Intellectuals, artists and politicians, including top party leadership, fell victim to the terror of the Red Guards. Schools closed, artistic life stagnated, international relations evaporated. At the same time, Mao elevated himself in a personality cult unprecedented anywhere else in the world. Every young Chinese carried his "little red book" and memorized his sayings and dogma.

When the cultural revolution finally came to an end in the early 1970's, premiere Zhou Enlai quietly took over the reins of government, mediating between the moderate and radical factions. In 1973, he resuscitated political victims of the Cultural Revolution, including Deng Xiaoping who became his deputy, and other pragmatists. Zhou Enlai also made great efforts to overcome China's international isolation: after China became a member of the United Nations in 1971.
Nations in 1971, President Richard Nixon visited the country in 1972.

THE GANG OF FOUR

The year 1976 was pivotal. Zhou Enlai died in January, leaving the moderate pragmatists in a precarious standing. Deng Xiaoping was removed from power by radicals known as the “Gang of Four”, which included Mao Zedong’s wife. However, when Mao died in September, the radicals were arrested and Deng restored to power.

The pragmatists initiated new policies that opened up the economy and dispersed some political power. Limited liberalization of political and artistic activity followed. Deng Xiaoping retired in 1987, replaced by Zhao Ziyang as secretary general, and Li Peng as premier. China continued its return to the international order when Soviet leader Mikhail Gorbachev met with Deng Xiaoping in May of 1989 in Beijing, the first summit between China and the Soviet Union since 1959.
Ninety percent of China’s population lives on only about twenty percent of the land. They live primarily east of a line from where Laos, Burma and China meet to the northernmost tip of the province of Heilongjiang, and surrounded by a relatively unpopulated area is the province of Sichuan with a population of one hundred million inhabitants. Only below the famous rapids, where the Yangtze River enters the lowlands, does the wide and incredibly densely populated part of the country begin; here are the cities of Wuhan, Nanjing, Shanghai, all with a population over the one million mark. Here, too, is the great plain which reaches beyond Beijing, and in which not one square mile of land has remained uncultivated. The vast “empty areas” in the north and west are hardly habitable. They include the largest deserts of Asia, the Gobi and Taklamakan; there is also Tibet, the highland most hostile to
human life, where permanent settlements are only possible in the valleys, which themselves are 11,800 ft. above sea level. Finally there are the desert-like steppes of southern Mongolia and Xinjiang.

Around 6.7 percent of the population of China are not Han Chinese, but members of national minorities--this amounts to more than 66 million people.
MINORITIES

The following is a list of China’s fifty-six national minorities; of course, 93.3 % are Han Chinese:

Mongolia
Hui
Tibet
Uygur
Miao
Yi
Zhuang
Bouyel
Korean
Manchu
Dong
Yao
Bai
Tujia
Hani
Kazaki
Dai
Li
BEIJING IS A CITY OF BICYCLES

THE GATE OF HEAVENLY PEACE IS LOCATED AT THE NORTH END OF TIAN’ANMEN SQUARE AND LEADS INTO THE FORBIDDEN CITY.
Beijing has been the principal capital of China for most of the past 700 years, but its political significance has never been as great as it is today. It is the seat of the strongest central government in China's history. From here the leadership sets in motion the political and economic programs that dominate the people's lives throughout the country. The official newspaper, People's Daily, publicizes events in the capital and, through its editorials, instructs the far-flung political hierarchy.

The overall plan for Beijing's future development, adopted in 1983 envisions updating the old city while maintaining its traditional style. With rapid industrial development and expansion throughout the city, Beijing presents in microcosm the transformations China is currently undergoing. A new superhighway connecting Beijing to adjacent seaports has been designed to handle traffic traveling twice as fast as on any surface transportation now available in China. Despite its size and activity, Beijing has retained a distinctive historical character, although it is steadily losing the
isolated parochial flavor it had maintained until only a few years ago.

The population of Beijing is about 9.3 million, but nearly half live outside the urban center in the several thousand square miles of rural area that have been annexed to the municipality. The built-up area, only about 2 percent of the municipality, has more than doubled in population since 1949 to about 3.8 million. It has spilled outside of the old city and sprawls across the plain complexes, educational institutions, industrial plants, and farming communes. Within the inner city, tall buildings are rapidly rising above the old rooftops, encroaching on and dominating the squat, gray dwellings huddled inside drab walls that for centuries lined the narrow alleyways and streets. Those built in the 50's and 60's were monotonously squarish; more sophisticated, international designs have recently arrived in Beijing, bringing glass-sheathed high-rises, outdoor elevators, and revolving restaurants. The pace of construction in Beijing is swift both above and below ground. The 40-foot walls that
used to surround Beijing were long ago demolished to make way for circumferential highway and subway systems. Other excavations reflect an unconcealed interest in civil defense that has resulted in the building of an underground city of shelters.

THE FORBIDDEN CITY

At the heart of Beijing, is the incredibly beautiful and mysterious Imperial Palace complex known as the “forbidden city.” It is where the emperor sat on the Dragon Throne and ruled the Middle Kingdom and was considered the center of the world by the Chinese. The life of the emperors as Sons of Heaven was strictly regulated. The emperor was the measure of all things in the cosmic trinity of heaven, human beings and earth. He was supposed to be the intermediary between heaven (yang, male, light) and earth (yin, female, dark) and thus incorporate the Mandate of Heaven on earth. He was responsible for peace, prosperity and orderly life on earth.
Every time the emperor moved from one part of the palace to another, it was a major expedition. Pu Yi, the last Emperor of China, whose life Bertolucci has depicted in the film “The Last Emperor”, describes a walk in the garden in his autobiography: “... at the head marched a eunuch, a herald whose function was like that of a car horn. He walked 20 to 30 yards in front of the others, constantly hissing ‘chi, chi’ to shoo away any other people in the vicinity. He was followed by two of the higher eunuchs walking like crabs on both sides of the path. Behind them came the main group of the procession, the Dowager Empress and me.”
THE GREAT WALL OF CHINA

Wan Li Chang Cheng, what the Chinese call their Great Wall, was begun in the first century by China's first Emperor Q'in Shih Huang Ti. Under the leadership of his general, Meng Tian, an army of 300,000 forced laborers is said to have worked on the building of the wall; probably the figure was even higher.

The construction visible today, most of which was built in the fifteenth century, is some 3,946 miles long, on average 26 ft. high, and 21 ft. broad at the base. The upper part is wide enough to allow five or six soldiers to ride side by side along it. It is the only man-made object visible from outer space.
THE GREAT WALL OF CHINA

The best restored section is located just north of Beijing at Badaling
THE TERRA COTTA WARRIORS AND HORSES

BURIED WITH CHINA'S FIRST EMPEROR TO GUARD HIS TOMB IN THE AFTERLIFE, THEY ARE LOCATED TODAY IN A MUSEUM NEAR XI'AN, CHINA
XI'AN, which means Western Peace, is located in the Weiho valley of Shaanxi Province. The city was the capital of the Chinese Empire until the Ming dynasty moved the capital to Beijing.

China's first emperor, Shi Huang Di, has his burial mound nearby where he had buried 8,000 terra cotta warriors and horses to guard his tomb in the afterlife. In 1974, peasants digging a well discovered the clay figures, life-size and no two alike, which promptly became the archaeological sensation of the modern day. They are on display in the "Terra-cotta Warriors and Bronze Chariot" museum just outside XI'AN near a warm springs resort.
THE BEAUTIFUL RIVER LI

NO TRIP TO SOUTH CHINA, ESPECIALLY TO GUILIN, WOULD
BE COMPLETE WITHOUT A CRUISE DOWN THE LOVELY, ENCHANTED
RIVER LI. IT IS THE IMAGE OF CHINA TO MANY PEOPLE.
Guilin's (Kueilin) beautiful scenery earns it the reputation of being the number one scenic city in China. Its name—through an ancient maxim that Chinese school children learn—has become synonymous with natural beauty: "Guilin's mountains and rivers are the finest under heaven." Situated in a small basin in the northeastern corner of the Guangxi Zhuang Autonomous Region, the city is surrounded by and interspersed with numerous steep-sided hills that form the extraordinarily exotic terrain long renowned by poets and painters. The karst mountain landscape has been created by the erosion of the limestone surface, forming steep isolated hills, caverns, and underground channels termed karst. Water seeping through the rock formations and cracks into the numerous caves in and near Guilin continues to form stalactites and stalagmites that rival the beauty of the hills on the surface. Guilin sits on the banks of the enchanted river Li and no trip to
Guilin would be complete without a cruise down the magical river.
THE BUND

THE BUND IS THE MOST WESTERNIZED SECTION OF SHANGHAI, CHINA
Shanghai, once a bastion of Western capitalism as well as the birthplace of the Chinese Communist Party, is today China’s largest city, her most important port, and her premier center of trade and industry. Originlly a fishing village, the city was built atop mudflats along the winding Huangpu River a few miles south of the estuary of the Yangtze. Today the more than 13 million people in the metropolitan area of more than 2,000 square miles--about half of them living in a congested urban core of 54 square miles--comprise the largest metropolis on the Asian mainland and one of the largest in the world.

Shanghai is China’s most Westernized city in appearance with its downtown section along the
Bund--the wide and bustling boulevard along the west bank of the Huangpu--presenting an impressive skyline of tall buildings built to house the banks, clubs, hotels, and offices of a bygone day. The facade is limited, however, and to the west, north, and south stretch miles of typical Chinese urban development--low crowded buildings, small shops, and busy markets. Along much of the waterfront and in outlying areas are sizable industrial districts, in part consisting of pre-1949 factories but now augmented by more recently built installations. Much of this newer development is surrounded by workers apartment buildings.
This section will be covered by reading an excerpt from the JOURNAL David Kilpatrick kept during his Fulbright-Hayes visit to China the summer of 1994. The entire July 4, 1994 entry is reproduced here. It is intended as a capsule sample of life in China; one day in China and one man's impressions of what he saw and felt that day:

THE BIG WILD GOOSE PAGODA
Friday, July 4, 1994, Beijing, China

Dear Journal, what a way to celebrate Independence Day! Mr. Jefferson would have been proud! I’ll bet that not many Americans celebrated the fourth of July as uniquely as I did today!

The events of this long, splendid and auspicious day began after a big Chinese breakfast because I got to the hotel restaurant late and the Western breakfast table had already filled up, but I managed to get coffee which was all I really wanted from it anyway. We began slowly, and somewhat boring after awhile, with a tedious bus ride to Tian’anmen Square. It was slow because the traffic was the heaviest I may have ever seen even in Cairo, Paris, and New York. But it was the latest in the morning that we had ever set off from the
hotel. I would hate to know I had to drive through the undulating, pulsing, relentless sea of bicycles in this huge city! I thought driving in Cairo, Egypt was bad, but traffic in this city must be the most harrowing on earth.

We finally arrived and made our way to Mao's mausoleum on the south end of the square. Queued nicely as we westerners like to do, we began winding around the square toward the entrance of the huge edifice built in Chinese Nationalist style. The blocks of white marble statues that flank the entrance and the exit are remarkably like statues I saw in the old Soviet Union--huge, heroic, oppressed, workers struggling forward. Finally we entered the mausoleum. Mao Zedong's corpse is lying there under a Chinese Communist flag inside a crystal coffin, like Lenin in Moscow, for all the world to pass by and pay homage. He looked as though he had
just died. Marching around his coffin in single file reminded me of attending funerals in Blount County filing past the casket to view the deceased one last time as the choir sang another verse of "I'll Meet You in the Morning." It almost seemed like someone should strike up "When They Ring Those Golden Bells" as we marched by Mao. It wasn't, however, as impressive to me as seeing Lenin in Moscow partly, I'm sure, because I had seen Lenin, and partly because it is bigger and brighter inside Mao's Memorial Hall. One enters Mao's mausoleum into a brightly lighted, cavernous hall with a colorful woolen embroidery of a landscape of China entitled "Our Motherland" on the back wall, and a gigantic, white, seated statue of Mao in front of it, surrounded with green plants. The visitor then passes along a bright red carpet into the Memorial Hall where Mao's body reposes, and finally passes out of the mausoleum through a kind of museum and
gift shop. In Moscow, Lenin’s tomb, although considerably smaller, is much more solemn, darker, stately, serious, and eerie; nothing but black marble inside.

We then visited the souvenir stands for awhile and finally went back around the mausoleum to the vast, open expanse of Tian’anmen Square. Thousands of people were milling about on the huge square; the largest in the world. We, by prearrangement, met in one hour around the flag pole at the north end near the underpass leading underneath the multi-lane street to the Gate of Heavenly Peace.

It is impossible to stand in Tian’anmen Square and not recall the tragic turn of events that occurred there in 1989 when military tanks were called into the square to break up a pro-democracy demonstration. There wasn’t a trace of dissent
or rebellion in Tian'anmen Square today. I even saw a young fellow wearing a red, white, and blue T-shirt that had a “Lady Liberty” stenciled on it looking very much like the statue the students built on the square in '89 before the government officials ordered the crack-down.

Our group then proceeded to Sun Yat Sin Park (Zhoungshan Park) adjacent to the Forbidden City. It is a lovely, serene park with beautiful fountains, carp pools, pavilions, covered walks, shrubs, trees, and lush flowers. Weary Beijingers can escape the hectic pace of life out on Tian'anmen Square inside the quiet solitude of this enchanting park. I was captivated by an adorable, little Chinese girl in frilly, pink voile with her hair up in pig-tails, chasing butterflies. Kids are the same everywhere!
Inside the park is a lovely restaurant set in a flower garden with an ornamental pool and fountain surrounded by willow trees and plants. The restaurant looks like a tea house and we enjoyed a delicious lunch, if you can call a meal with at least twenty sumptuous courses lunch, inside. As the Fulbright group came out of the restaurant, an amusement park adjacent to the restaurant was playing a strangely familiar tune for Communist China. It took me awhile to identify the melody since it was so unlikely that it would be playing there. Finally it hit me, it was the Southern ditty, “Dixie.” Never in a million years would I have expected to hear “Dixie” in a park near the Forbidden City in Communist Beijing, China. How small the world really is becoming!

By then the heat was oppressive, and it was time for our tour of the Forbidden City. Beijing can get so hot and humid
in the summer that it saps every ounce of one’s energy and depletes even the most enthusiastic tourist’s ardor for sightseeing. After a virtual banquet, it was all we could do to move, much less walk in that inferno across ancient granite paving stones intensifying the heat through a palace complex completely devoid of trees. It should also be noted that thirst develops rapidly after the spicy, salty, Chinese food we are consuming in copious quantities.

Our hosts, sensing the gravity of the situation, bought several cases of frozen bottles of spring water for us to take with us through the Imperial Palace complex. That water saved the day!

There is no way to adequately describe the Forbidden City. It is on a monumental scale far larger than I had ever
dreamed. The imperial palace is at once beautiful, awesome, amazing and incredible. One grand hall after another greets the eye as the visitor walks from south to north through the palace complex. From the Meridian Gate to the Hall of Supreme Harmony, to the Hall of Middle Harmony, to the Temple of Tranquility, to the Temple of Longevity, to the Hall of Earthly Purity, on and on the magnificent buildings stretch from one end of the Forbidden City to the other. There is one spectacularly ornate "palace" after another for the eyes to feast upon, but there is also a monotonous sameness to it all. Versailles in France, Petrodvorets and the Hermitage in Russia, Windsor Castle in England, and Charlottenburg Sloss in Germany all pale by comparison. A field of yellow tiles dazzles the visitor's vision in every direction covering temples, halls, and shrines. The palace scenery, looking more like the creation of a set designer for the stage of a Grand
Opera, is complemented by pavilions of astounding beauty all around the horizon along the crest of the handsome hill that towers above the imperial complex just outside the wall to the north.

The Tourist is provided with a map and a portable cassette tape player containing a tour-guide tape in English in the commanding voice of Trevor Howard to lead him through the sixteen numbered and marked stations inside the Forbidden City. The tour ends at station number sixteen inside the Imperial Residence area and gardens before returning the tape player and exiting the Forbidden City through the gate of Military Genius. The entire Forbidden City is spell-binding! It is a veritable cornucopia of colors, shapes, and textures; a banquet for the senses!
The Forbidden City came to be known as such because it was forbidden, or off-limits, to “foreign devils”, which all foreigners were called at one time, unless they were specifically invited in by the emperor, and to all males, except the emperor himself and emasculated males known as eunuchs, after dark. Thus an aura and a mystique grew up around the palace complex.

Only the emperor could live under yellow, and a sea of glazed yellow tiles roof all the buildings. The ridges of the roofs, swooping and swerving upward in provocative Chinese curves at the eaves, sport fierce dragons, demons, and ferocious animals. Royalty, whether Oriental or Oxidental, always carried privileges. While they lived lives of fabulous luxury and unimaginable greed, whether in Versailles, Petrodvorets, Charlottenburg, or in the Forbidden City, their
subjects often suffered unspeakable privations and even starvation. The callousness of "let them eat cake" uttered about the starving French peasants by a member of the royal Bourbon family was but a mere flicker compared to the flaming disregard Chinese imperial rule had for its people. Little wonder the peasants became fed up after awhile and overthrew their autocratic oppressors!

Pursuing a tight schedule as we do every day, the bus then took us to Zhongce Beijing Beer Brewery and distribution factory. This jaunt was at the request of the youngest member of our Fulbright group who lives in Milwaukee and is quite an aficionado of beer brewing. At first I had my reservations about visiting a brewery when we could be doing countless other marvelous things in exotic Beijing, but it turned out to be, if nothing else, great fun! We had been
invited by the United States Embassy to a fourth-of-July-cookout at the embassy, but none of us wanted to spend a day in China inside an American compound associating only with Americans, so we politely said “thanks” but “no thanks.” We were greeted at the brewery by Mr. Zhou Yuanli, the Director of Bottling and Shipping, and Mr. Chen Xurong, the Manager of the Marketing Division. Then, as we have been everywhere we have gone, Mr. Yuanli gave us the grand tour and the royal treatment including all the free “samples” we wanted to consume afterwards in the board room. They also gave us T-shirts of the plant, and since they have a cafeteria with a chef of some renown, they invited us to stay for dinner.

We were treated to virtually another banquet! It was one of our best meals yet, and we have had some sumptuous ones. The delectable climax was a fish so beautifully presented with
the head and tail up, surrounded by sculpted vegetables intricately carved into elaborate flowers, browned just to a turn, that we were reluctant to eat it. But, oh, when we did, it was divine! It was butterflied, batter fried, and almost sanctified it was so mouth-watering delicious!

By the time the meal was over, we had consumed so much additional beer with the meal and drank so many Independence Day toasts with special choice beer selected for the dining room by the chef, we were ready to begin drinking to Mao, Communism, and anything else proposed as a toast. We started, sadly for anyone within ear-shot, singing patriotic songs--"God Bless America", "America the Beautiful", "Battle Hymn of the Republic", "Dixie", "The Eyes of Texas are Upon You", "Oh, Suzannah", "On, Wisconsin", "Yea, Alabama" (although a near solo), "A Hundred Bottles
of Beer on the Wall”, etc.---and ended the “banquet” with “The Star Spangled Banner”! Another first, I’m absolutely convinced, for that restaurant, and maybe for China! The waiters, waitresses, chef from the kitchen, workers in the main dinning hall, and everyone within hearing distance came in and to the door to see and hear the spectacle, and were justly amazed, amused, and befuddled. But they appeared to be having as good a time as we, so we just kept right on making fools of ourselves. Actually, I should say, despite my earlier flights of rhetorical hyperbole, that we all remained very responsible, circumspect educators with each aware of his limit and when to say “no”. We merely imbibed enough to become jovial and uninhibited. And, after all, none of us were driving.

It was a stellar conclusion to a wonderful day! Again, I
think Mr. Jefferson would have been proud! We were celebrating his brain-child on the other side of the globe.

It has been a most enjoyable and unique way to celebrate the 4th of July. I wonder how my family and friends are celebrating, but, of course, it isn’t yet the 4th in Alabama. It has been a remarkable day that I will long remember. I will especially remember seeing the old, Chinese woman sitting on the floor in front of the Hall of Supreme Harmony inside the Forbidden City today who had bound feet. Her little, “three-inch golden lilies” looked torturously symbolic of a china that is, fortunately, fading into the mist of a bygone day. Of course, every civilization has perverted and distorted nature in order to achieve a perceived beauty. The Choctaws flattened their children’s heads, certain African tribes stretched their lips around wooden bowls, Western European and American
women bound their waists with corsets and dangled ornaments from their ears, etc., all to achieve what men thought was erotic and alluring. Of course, it is all a way of controlling and dominating women. Bound feet was supposed to produce an erotic awaying effect when Chinese women walked. However, to the modern world, the practice of binding feet seems excessively cruel and degrading especially when the results are seen in an old woman crippled by the practice. Today modern Chinese women, like women over much of the world, have come a long way. Chinese women even keep their own names when they marry and work in all the occupations along-side men. The Communists have done some good in that area, but inequalities still exist. However, women's groups and human rights organizations all over China are laboring to make improvements to propel China forward.
I am privy to the very birth-pangs of an emerging new and dynamic China; one that is thrilling and, I think, maybe even a little threatening in its potential and in its very dynamism. Threatening, that is, only in the sense that China may become an economic force to be reckoned with in the future and if the United States remains lethargic, sluggish, and unresponsive to changing economic forces in the world, we could find our economic roles reversing.

China had a flourishing civilization, a veritable golden age, while Western Europe was still burning its bread cakes in earthen ovens, only to later be submitted to the degradation of foreign domination and exploitation, internal civil conflict, and finally egalitarian Communism. Now China is moving on, learning from her past, preserving the good, discarding the bad, and appears to be the unstoppable force moving inexorably
toward the future, confident in what she wants and determined to get it. She wants a piece of the pie, the economic pie of world prosperity and materialism—the good life for her people! And who can blame her? She has seen much of the rest of the world grow fat off the extorted and usurped bounty of her land. Why can't her own people benefit from China's plentiful resources, genius, and manpower.

Now days, you hear no one talking of Communism or even of central economic planning. It is now apparent to most people in China that that approach just hasn't worked. The catchphrase of the day is, "socialism with a market focus." Of course, in actuality, that is really what America has, and most of the Western civilized world to varying degrees. We have long had a "mixed" economy with government providing what the private sector can not or will not provide. China
could very well emerge in the twenty-first century as a leading economic power; she certainly has the potential, and it seems, the will. It is blatantly obvious that she has the desire.

I have talked privately and off the record to many young people who told me that, although they had helped to organize the '89 Tian'anmen Square demonstration and had participated in it, that they learned many valuable lessons from its failure. One told me candidly that it was a good thing that it failed for he said that it had been taken over by a faction who were no friend to the original goals of the organizers and who were merely power-hungry opportunists. He, and others, are now of the opinion that a slow, gradual change is probably best. I was told time and again that as the old leadership dies, younger more reform-minded men will lead China in the direction they desire. It was stressed to me that,
in a nation of 1.2 billion people, many of whom are living on the brink of poverty and starvation and only the slightest upheaval could trigger an explosion, it is foolhardy and dangerous to try to change things radically and abruptly. As in most countries, the masses of the populace, uneducated and ill-informed, are volatile and unpredictable. Political chaos could be the catalyst for economic and social turmoil that could be catastrophic. Therefore they are now trying to change things from the bottom up, slowly, and with a measure of stability. Thus, they are holding on to much of the old jargon, but giving it new meaning. In some cases they have simply redefined Communism and Socialism. They do not want the rampant, dog-eat-dog, unfettered capitalism that they have often seen throughout modern history and still see in some places around the world today. But they definitely want to move toward a market-oriented economy. Of course, that is
exactly what we in the United States decided around the turn of the century and began moving in the other direction. As far as democracy is concerned, they believe that with economic reform, movement toward democracy will be the inevitable result. But, alas, I am afraid that may not be an absolute given. On that point, I am just not as sanguine as they.

To the casual observer in Beijing, however, it seems as though there is already as much freedom of movement, conscious, action, and expression as in America. Beijingers talk candidly about their problems, leaders, form of government, and just about anything else that is broached to them. Churches, mosques, temples, and shrines are open and people are totally free to worship in them. Our group observed in Beijing what would be a shocking degree of sexual liberation to many Americans with both straight and gay couples openly
demonstrative toward one another along the streets; even transvestites in gaudy, garish garb flaunting themselves unashamed in public. We heard speakers openly criticizing public policy, and lecturers in the universities speaking frankly about the mistakes of the Cultural Revolution and other Maoist policies. So, then, where is the Communist totalitarianism? There is much less tolerance and freedom of expression in many places in America. But I was reminded by several people, some of whom were the Chinese themselves, that any freedom they enjoy, and today a wide latitude exists, is precarious and subject to the capricious whims of the leadership. At any time an oppressive iron fist could come slamming down and wipe out everything. Then, I would stop a moment to think and pay homage to Thomas Jefferson and the concept of constitutionalism in American political history. Our civil rights and protections are enshrined and
guaranteed forever in the Constitution of the United States, as long as we protect and preserve the constitution, and although leaders may come and go, our basic civil liberties remain intact. In that area, China still has a long way to go.

It is, nevertheless, a joy and a thrill to be here to see what is stirring and going on in this awakening land. The best symbol I have seen so far of the new, dynamic, forward-looking China breaking the chains of its austere, anti-materialist past is the Beijing Hard Rock Cafe. It is the newest and largest Hard Rock Cafe in the world, and does a packed business just about every night. On the gigantic domed ceiling inside, there is a mural of Chairman Mao with his outstretched arms around the Beetles on one side and Elvis Presley on the other. If one wonders what the noise is when entering the cafe, it is Mao turning over in his glass coffin. Upper-middle-class,
yuppie Chinese like the Western food and music, but they adore the status it gives them to be seen there. Just what will eventually emerge from all the flux and movement in China today is anybody’s guess. But I am convinced that the twenty-first century, economically at least, is going to belong in large part to China and the Asian Pacific Rim, and I hope the Chinese leadership is wise enough to know that their full potential can be achieved only under a form of government that respects and honors human worth and dignity and allows the individual a high degree of mastery of his own destiny.

Surprisingly, some Americans view China’s dynamism with fear and trepidation. But it seems to me that, if we are wise ourselves and develop the correct posture with regard to China, we too can benefit from economic prosperity in that huge land of 1.2 billion potential consumers. Of course, if
we are foolish, backward, and unimaginative in our grasp of world politics and global economic forces in the future, we can relinquish our economic lead entirely to our competitors. I think the choice is ours. Asia knows where it is going. We had better figure out where we want to go and how to get there without getting in the way of the emerging Asian economic power-houses.

Well, goodnight Mr. Jefferson, and thank you for my magnificent country! On this anniversary of your great document, the birth certificate of the United States, I am reminded how fortunate we in America have been as I sit here writing in my Journal at the close of a memorable day in this beautiful land of China whose great people, alas, have not yet been as blessed as we in America with so wise and prescient a visionary as you. In the waning hours of this Independence
Day spent far from the land I hold so dear, words you spoke
and lived by come flooding over me . . .

One should expect a little rough sailing now and then
on the boisterous sea of liberty . . .

Let the people be supplied with sound school-teachers
and free newspapers, and the nation's rule can be en-
trusted to them . . .

I have sworn eternal hostility on the altar of eternity
against any form of tyranny over the mind of man . . .

If there be any among us who would wish to destroy
this Union or to change its republican form, let them
stand undisturbed as monuments to the safety with
which error of opinion may be tolerated when freedom
is left free to combat it . . .

. . . and I am overwhelmed with gratitude for the noble ideas
and ideals you gave America. We are fortunate indeed that
she was once lucky enough to call you a native son.

Good night America! May you have two-hundred-eighteen
more glorious years! Perhaps in the next two centuries,
Jefferson's inspiring words will come to full fruition not only
in America, but in China, Russia, the Middle East,
Africa, the Balkan Peninsula, Haiti, Cuba, and throughout
all the world.

What a wonderful day in old, and new, Beijing, China!

Lesson Plan for Archeology Exercise

Nancy L. LeMasurier
Lamar High School
Arlington, Texas
Lesson Plan for Archeology Exercise

The following daily lesson plan may be used in a variety of classrooms and for a variety of age groups. The following specific lesson plan is for a world history class and for ESL classes in the high school. It is easily modified for younger age groups and for economics, sociology, and U.S. history classes.

Depending on the size of the class and the number of artifacts available to the teacher, the exercise will take one or two days. I give one day for the students to do the exercise and begin their reports and one day for completion of reports and for the teacher follow up.
Lesson Plan for Archeology Exercise: Teacher Plan

I. Objectives

To motivate students to learn another culture through direct contact with cultural artifacts
To teach careful observation in analysis
To teach vocabulary of materials used in production
To teach students the complexity of culture
To give students practice in working as a team in problem solving
To give students more practice in organizing paragraphs
To give students more confidence in speaking orally before a class

II. Materials: Artifacts of a culture or a variety of cultures
American artifacts of previous decades can be used for American history classes
Examples: money, jewelry, clothes, games, utensils, art objects, weapons
To find materials ask students to bring objects from home, ask fellow teachers, or use a cultural trunk collected by a school.

III. Execution of Plan:

Divide students into groups of 2 or 3 depending on class size
Give 1 to 3 objects to each group depending on number of artifacts available
Give each group a set of directions. Tell them to use all senses feel, smell, look to study the artifacts.
Give them a time limit for answering the questions, writing the paragraph, and for reporting to the class. Twenty minutes is usually sufficient for the analysis.
IV. Follow up by the teacher:

Students are graded on serious of attempt to study the artifact, on the paragraph they write, and on their oral presentation.

Students are not downgraded for honest interpretations that are inaccurate. A part of this learning experience is to understand that even experts can make mistakes when interpreting foreign cultures.

After students have reported their findings, show the artifacts that they have made errors on and give the correct interpretations. Show students why they made the error. It may have been by making assumptions from their own culture, or may have been not observing well enough, or lack of knowledge.

Example: Students often report people on money as rulers of the country. This is because the people of American money are past presidents. Foreign currency often uses mythical persons, historical heroes, or artists.

Example: Money of foreign cultures often has hidden pictures in white blank spots to make it difficult to counterfeit. Students do not hold the money up to a light to see them. Lack of careful observation misses an important clue to the culture.

Teach the materials they fail to recognize. Teach the origins of these materials and the complexity of technology needed to produce them. Discuss how the ability to recognize materials can help place the geographical and cultural origins of an artifact.

Discuss the various ways the artifact of a foreign country could have come to the United States. This can lead to discussions of air routes, shipping lanes, multicultural exchanges, conflicts and the movements of refugees.
Archeology Exercise

You are an archeologist in the year 3,000 A.D. You have just uncovered some artifacts from a dig in Arlington, TX. Using the artifacts only as a source of information tell all you can about the people who made them.

1. From what materials is the object made? What skills were needed to make and use this material?

2. What was the object used for?

3. What tools or technology was needed to make this artifact?

4. Can you date the artifact? How did you decide on the date?

5. What values does the artifact show?

6. What social institution used the artifact?

7. What other information would you infer from the artifact?

8. Would you expect to find this artifact in Arlington? If not, how do you think it got here?

9. Do you consider this item one of utility or luxury?

10. What have you personally learned from this exercise as an archeologist?

When you have completed your analysis, write a paragraph on your findings. Report the findings orally to the class.
TEACHING CHINESE MYTHOLOGY
AND CHINESE CLASSICAL POEMS

Curriculum Project for the
National Committee on United States-China Relations
and the
Fulbright-Hays Summer Seminars Abroad Program

Ann Lew
Summer 1994

International Studies Academy
San Francisco, California
CHINESE MYTHOLOGY

Objectives:

1. To acquaint students with creation stories in Chinese mythology, and compare and contrast them to creation stories of other cultures.
2. To acquaint students with other types of Chinese mythology.
3. To promote understanding of mythology as a reflection of history and culture.
4. To promote understanding of themes in Chinese mythology.
5. To enhance understanding of mythology by writing about a phenomenon that is unexplainable in today's world.

Lesson Plans:

1. Introduce students to Chinese creation stories alongside those from other cultures and examine the similarities and differences among them.
2. Introduce students to the idea that before the advent of science, primitive people devised myths to explain natural phenomena.
3. Discuss with students the four categories of Chinese mythology and how they are similar to, or different from, the myths that they already know.
4. Assign the vocabulary, in context, taken from the stories. Have students learn the spelling, definitions of the words.
5. Assign the reading of the stories.
6. Have students discuss and write about the questions posed at the end of the stories.
7. Assign a creative writing exercise where each student writes an original myth that explains a phenomenon that is unexplainable in today's world, such as "Why teenagers' trousers are baggy or tight," or "Why we have bells in school." Brainstorm, prewrite, draft, edit, using the writing process.

Background:

Chinese mythology can be categorized into four general groups:¹

1. Man's battle to survive the forces of nature, and his celebration of that battle.
2. Man's indomitable spirit in the face of his adverse destiny
3. The spirit to struggle against unjust rulers
4. In praise of creation and the origin of life

¹ From Stories from Chinese Mythology, Translated and edited from Yuan Ke's Newly Edited Mythical Stories and Translation of a Hundred Selected Myths by Ke Wen-li and Hou Mei-xue, Nankai University Press
Creation Stories

Pan Gu, Creator of the Universe

Vocabulary lesson:

1. He found himself in impenetrable darkness.
2. He wielded the axe with a vengeance.
3. He cleaved and chipped away with preternatural might and unremitting effort.
4. He felt a great urge for a comfortable respite.
5. His upper and lower extremities and his physique were transformed into the ends of the universe.
6. His blood was metamorphosed into rivers and streams.
7. His hair and beard into multitudinous stars that dotted the sky.

Nu Wa, Creator of Human Beings

Vocabulary lesson:

1. The whole universe was desolate and lonely.
2. The surroundings were overgrown with luxuriant grass and shrubs.
3. Nu Wa sauntered on and on.
4. She was gratified with her production.
5. The little creatures gambolled, danced, and cheered.
6. She thought of an ingenious way of creating human beings.
7. She pulled a dry rattan from a cliff and dipped it into the pond.
8. There sprang up many living human beings where the sludge from the rattan splashed.
9. She was contemplating another problem.
10. Human beings are mortal.

Discussion and writing questions for the origin stories:

Compare these creation stories with creation stories from other cultures. What differences do you see? What similarities?
How are Pan Gu and Nu Wa anthropomorphic? How is the gender of each god significant?
How might the primitive man feel toward Pan Gu? Is he distant and forbidding or humanlike and approachable?
How might the primitive man feel toward Nu Wa?
What does each god or goddess create? Describe the process of creation in each case.
Illustrate Pan Gu's creation of the universe.
Illustrate Nu Wa's creation of human beings.
1. PAN GU, CREATOR OF THE UNIVERSE

Long, long ago, when heaven and earth were still united, the face of nature, a chaotic mass in the pervading gloom, was in the shape of a huge egg.

A giant in stature and strength, Pan Gu, forefather of the human race, was born in the midst of the egg wherein he grew up and slumbered soundly for eighteen thousand years.

One day, he awoke suddenly. When he opened his eyes, he found himself in an impenetrable darkness which made him feel quite smothered.

Exasperated at the annoying situation, he snatched a broad axe from somewhere and wielded it with a vengeance in the darkness. Out of the blue came an ear-splitting explosion; the colossal "egg" had cracked, the light and clear part of which rose to become heaven while the heavy and cloudy substance fell to become earth.

Where heaven was still linked with earth, Pan...
Gu, chisel in his left hand and broad axe in his right, cleaved and chipped away with preternatural might and unrelenting effort. By and by, heaven and earth finally came apart and the state of chaos ceased to exist.

After heaven and earth were separated, Pan Gu, for fear of their possible reunion, stood in between with his head against the heavens and his feet on the earth. He changed his form many a time each and every day as heaven and earth changed.

Each day, just as the heavens went up a zhang higher and the earth became a zhang thicker, so Pan Gu grew taller. Another eighteen thousand years later, the heavens were to become extremely high, the earth was to become immensely thick and Pan Gu phenomenally tall.

What in heaven's name was the height of Pan Gu? He was speculated to be ninety thousand it in height. Like a never ending column, this heaven-kissing colossus stood erect between heaven and earth, leaving the two no chance of meeting again.

There stood Pan Gu in loneliness, engaging himself in such laborious work. After no one knows how many ages had elapsed and heaven and earth solidified, Pan Gu decided there was no longer a need to worry about their reunion. Completely fatigued and exhausted, he felt a great urge for a comfortable respite and, like other mortals, dropped dead at last.

When he was breathing his last, a dramatic change came over his whole body. His breath became the winds and clouds and his voice, roaring thunder; his left eye was turned into the sun and his right one into the moon; his upper and lower extremities and his physique were transformed into the ends of the universe and the five famous mountains; his blood was metamorphosed into rivers and streams; his tendons and veins into roads across the land; his flesh into the fields; his hair and beard into multitudinous stars that dotted the sky; the skin and the fine hair on his body into grass and trees; his teeth and bones into metallic minerals and rocks; his semen and marrow into pearls and jade; even his very perspiration was transmogrified into rain and dew that moistened all in the universe. By the sacrifice of his whole body, Pan Gu, the earliest ancestor of human beings lent beauty and splendour to the newly-born world.

1. A Chinese unit of length = \(3 \frac{1}{3}\) metres.
2. A Chinese unit of length = $\frac{1}{2}$ kilometre.

3. The Five Mountains were said to be the sacred abodes of mountain gods and were deified and worshipped by emperors and kings of past successive, feudal dynasties. They now refer to, Taishan Mountain (泰山) in Shandong Province, Hengshan Mountain (衡山) in Hunan Province, Huashan Mountain (华山) in Shanxi Province, Hengshan Mountain (衡山) in Shandong Province, and Songshan Mountain (嵩山) in Henan Province.

2. NU WA, CREATOR OF HUMAN BEINGS

At one time, this myth tells us, the sun, the moon and the stars in the heavens, and mountains, rivers, trees, and grass on earth existed. There were even birds, beasts, insects and fish. But there were no human beings at all, which in a sense rendered the whole universe somewhat desolate and lonely.

In time there appeared a goddess known as Nu Wa. She was said to be able to change her form seventy times a day. One day, Nu Wa was strolling on the vast plains. At the sight of the surroundings overgrown with luxuriant grass and shrubs, a sense of utter loneliness overcame her. She felt that something needed to be added to the universe to make it thrive and prosper.

What was to be added, then?

Nu Wa sauntered on and on. She felt a little bit tired as she knelt down beside a pond. Her face and figure were mirrored in the water; she smiled and was...
smiled back to; she pretended to be angry and her reflection did likewise. At this moment she had a bright idea; since there were already beings of all descriptions on earth except for ones like herself, why not create some beings in her image to live in the world?

So thinking, she dug a handful of clay from the brink of the pond and mixed it with water. She rolled the clay into a ball in her hand and moulded the first ball into a little thing like a baby.

Nulla put it on the ground. Curiously, the little creature had no sooner touched the ground than it came to life and shouted, "Mama!"

Then it started jumping and cheering, expressing its great joy in life.

Seeing the clever, beautiful little being she had created and hearing herself called "Mama!", Nulla was all smiles.

She gave her dear child a name "Human Being".

Small as the baby was, its appearance and manner, because it was created by the goddess, bore some resemblance to her. Altogether different either from flying birds in the air or from crawling beasts of the fields, it looked as if it possessed an extraordinary courage to preside over the universe.

Nulla was much gratified with her production. She therefore went on with her work, creating many more little human beings that could walk and speak. These little creatures gambolled, danced and cheered around her, giving her great comfort and enlivening her spirits a great deal. From then on, Nulla no longer felt solitary and lonely.

She worked and worked until nightfall. As the night settled in, she slept briefly with her head pillowcd on a cliff. She hurried to resume her work the next day when dawn was beginning to break.

Nulla had been bent on producing more such agile little beings to spread over the land. But the land was so vast that although she had been working for a long time, she could not fulfill her aspiration before she had exhausted herself.

At last she thought up an ingenious way of creating human beings. She pulled a dry rattan from a cliff and dipped it into the pond stirring it into the sludge from the rattan. Lifting the rattan she shook it and, lo and behold, there sprang up many living human beings where the sludge from the rattan splashed. These little creatures, jumping and dancing, calling "Ma-
ma, Mama" from here and from there, were exactly like the ones Nil Wa had previously moulded with tawny clay.

Her method was certainly simple and easy. She merely shook the rattan and many human beings would appear. Before long, the land was covered with the human race.

Man began to live on the earth, yet Nil Wa did not cease working. She was contemplating another problem, human beings are mortal, must I create another group after their death? That would be too troublesome. How, then, can I make them continue to exist year after year, century after century?

Later she found a solution to the problem, these little beings were to be divided into men and women; let each man match with a woman so that together they would create future generations and shoulder the responsibility of bringing up their own children. Thus the human race has continued from generation to generation and the population has been growing ever since.
The Foolish Old Man Who Removed the Mountain
(A myth that illustrates man's battle to survive the forces of nature)

Vocabulary lesson:

1. We have two mountains **obstructing** the way.
2. His sons and grandsons responded **unanimously**.
3. The widow had a **posthumous** son who was only seven years old.
4. The Wise Old Man of Hequ **accosted** them **derisively**.
5. The Old Man found no argument to **refute** such **logic**.

Questions for discussion and writing:

1. In this story, there is one man called "Foolish Old Man" and another one called "Wise Old Man." Discuss the significance of these names in the context of the story.
2. At the end of the story, why do the gods do what the Foolish Old Man wants to do?

Jingwei Trying to Fill Up the Sea with Twigs and Pebbles
(A myth that illustrates man's indomitable spirit in the face of his adverse destiny)

Vocabulary lesson:

1. A mountain of a wave **capsized** her boat.
2. All he could do was to **reconcile** himself to his loss and **lament** her death.
3. Nuwa **detested** the sea that so cruelly deprived her of her young life.

Questions for discussion and writing:

1. What is suggested by Nuwa's soul turning into a bird?
2. What advantage is there for her soul having turned into a bird, than say, a rabbit?
3. What does this story show about primitive man's acceptance or non-acceptance of the inevitable?

Gun Stole Productive Soil to Dam Up Floods
(A myth that illustrates the spirit to struggle against unjust rulers)

Vocabulary lesson:

1. On the **submerged** land, people could find no place to live.
2. Birds and beasts driven out of their **habitats** were **contending** with human beings.
3. Emperor Yao **anguished** to see his people suffering.
4. God the Supreme not only turned a deaf ear to his **admonition** but **reprimanded** him as well.
5. Gun resolved to find a way to **subdue** the flood.
6. The treasure was tightly guarded by very brave **deities**.
7. Flood water receded and in its place was a vast stretch of green undulating land.
8. Happy smiles passed over their emaciated faces.
9. It carried a candle in its mouth in lieu of sunshine to illuminate the darkness.
10. After three years, his corpse had still not putrefied.
11. The dissected corpse of Gun turned into a yellow dragon and jumped into the abyss.

Questions for discussion and writing:

1. There are elements in this story that have parallels in stories of other cultures. Name at least two.
2. This is a myth that illustrates the spirit of struggle against unjust rulers. Tell who the unjust ruler is and what the nature of the struggle is.
3. What is the outcome of the struggle as suggested by the dragon at the end?
17. THE FOOLISH OLD MAN WHO REMOVED THE MOUNTAINS

Concerning the Kua Fu tribe there is not only a story about Kua Fu's chasing the sun, but also one in which his people helped a Foolish Old Man remove two great mountains standing beyond his doorsteps.

The Foolish Old Man who lived north of the mountains was nearly ninety years of age. His house faced two great peaks, Taihang and Wangwu, which caused a great deal of inconvenience to the family's comings and goings. For this reason he called every member of the family together, old and young alike, to discuss the matter. "We have two hateful mountains here obstructing the way. What shall we do? How about trying to remove them elsewhere?" he asked his family.

"Hear! hear!" his sons and grandsons responded unanimously. But hearing this, his wife showed some little doubt and said to him, "Forget it, my old man. A person as old as you are can't remove even a little hill like Kua Fu, not to mention the two great mountains, Taihang and Wangwu. Even if you could remove them, where do you think you can dump the earth and rocks?"

"His children and grandchildren said, "Let's carry them to the Bohai Sea and dump them there, that settles it."

So settled, they began the project. Some of them dug while others scooped. Then in groups they carried the earth and stone toward the Bohai Sea.

Their neighbour, Jing Cheung's widow had a posthumous son who was only seven or eight years old and had just begun to grow permanent teeth. When he saw his neighbours working so energetically, he came dancing over to offer his help.

Because it took half a year for them to make a round trip from the mountains to the Bohai Sea, the party usually had to change cotton-padded coats for thin-lined garments halfway.

An old fogey known as the Wise Old Man of Hêgu accosted them derisively, "Take a rest, old chap," he said to the Foolish Old Man. "You have to admit that you are an aged ailing man like a candle before a draft. What on earth can you do with these
two huge mountains?"

The Foolish Old Man replied in a huff, "Keep it to yourself. I can see that you are no wiser than the widow and her child. It's obvious that when I die, my sons will carry on; when they die, there will be my grandsons, and then their sons and grandsons, and so on to infinity. High as they are, the mountains cannot grow any higher and with every bit we dig, they will be that much lower. Why can't we clear them away?"

The Wise Old Man was rendered speechless and found no argument to refute such logic.

What the Foolish Old Man said happened to be overheard by a superman who stood at the end of clouds with a snake in his hand. For fear that the two mountains should in time be razed to the ground if they went on digging so doggedly, he hurried off to report it to God the Supreme. On hearing the report, God the Supreme was equally surprised and had the same misgivings. He had no alternative but to send the two sons of the giant Kua E, who was in fact Kua Fu, to carry the mountains away on their backs. One of the mountains was put to the east of Shuo¹ and the other was placed at the north of Yong². The two mountains which were formerly a pair are now separate from each other, one in the south, the other in the north.

1. In the present Shuxian county, Shaanxi Province.
2. In the north of Shaanxi Province and the northwest of Gansu Province.
10. JINGWEI TRYING TO FILL UP THE SEA WITH TWIGS AND PEBBLES

Yan Di, this god of the sun, had a favorite daughter by the name of Ntiwa. One day, she steered a small boat to the east sea for sport. Unfortunately, a terrible storm came on of a sudden and a mountain of a wave capsized her boat. Ntiwa was drowned in the sea and was never to return. Although Yan Di deeply regretted the loss of his daughter he had no way to restore her with medicine. All he could do was to reconcile himself to his loss and lament her death all alone.

Ntiwa’s soul turned into a bird called Jingwel. With a florid head, a white beak and red claws, Jingwel somewhat resembled an owl and lived in the Fajiu Mountain in the north. Because Ntiwa detested the sea that so cruelly deprived her of her young life, she often carried a pebble or a twig in her beak from the height of the Fajiu Mountain to the great east sea. Hovering over the roaring waves, she cast the pebble or twig into the sea in an attempt to fill it up.

The Sea rolled and roared, showing his snow-white teeth. Mockingly he said,

“Forget it, little bird! Even if you can labour as you have for a million years, you can never expect to fill me up!”

In the air Jingwel replied to the Sea, “I will fill you up even if I have to work for ten million years or for a million million years, till the doom of the universe or Judgment Day, if necessary.”

“Why do you hate me so deeply?”

“Because you have robbed me of my young life and will very likely rob more young innocent people of their lives.”

“Then, do as you like, please yourself you silly bird!” the Sea thundered with laughter.

Jingwel shrieked mournfully in the air,

“Yes, I will! I will work non-stop forever! I will in time fill you up and turn you into a stretch of land. Sooner or later you’ll see, you hateful Sea.”

She was flying away from the sea as she cried. Back to the Fajiu Mountain, she carried as before twigs or pebbles in her bill and threw them into the sea. She went back and forth and never stopped to take a rest. To this very day she still carries on the same job.

From Stories from Chinese Mythology, Translated and edited from Yuan Ke’s Newly Edited Mythical Stories and Translation of a Hundred Selected Myths by Ke Wen-li and Hou Meixue, Nankai University Press.
Yao was an unfortunate emperor indeed. Following the drought came a flood, which lasted for at least twenty-two years. The dreadful scene of disaster prevailed throughout China. On the submerged land, people could find no place to live and, young and old alike, drifted on the flood waters. Some managed to climb on to mountains to find shelter in caves; some floundered in the flood waters until they caught onto a tree top where they perched like birds. All the crops were laid waste. Birds and beasts driven out of their habitats were contending with human beings for a dry place to live. So in addition to hunger and cold, people had to fight off these wild animals. Theirs was indeed a hard life.

Emperor Yao anguished to see his people suffering from the flood, but he could think of no way to relieve their distress.

How did the flood occur? It was said that people on earth had committed blunders that had kindled the anger of God the Supreme, so he let the flood befall them to serve as a warning. It was Gong Gong, the water god, who was ordered to perform the duty. This Gong Gong, who was granted the title of Water God was a descendant of the Gong Gong who knocked his head against the Dazhou Mountain in the Nu Wa era. The present Gong Gong was only too glad to take advantage of the situation to display his ability; that was why the flood continued for so many years and prolonged the sufferings of the people.

All the gods in the heavens remained indifferent to the disaster except one god called Gun, who felt sincere compassion for the human race.

Gun used to be a white horse; whose father was Luo Ming, whose father was Huang Di, God the Supreme. So this Gun was a grandson of Huang Di, who ruled the universe. As a consequence he was naturally a powerfully great god in heaven.

The great god Gun was very much dissatisfied with the tyrannical measures his grandfather took against the human world. He had been trying to rescue the people from the flood so that they could restore their life of peace and happiness. More than once he...
pleaded with his grandfather for permission to pardon the people and call back the flood to heaven, but the stubborn God the Supreme not only turned a deaf ear to his admonition but reprimanded him as well.

His appeal and admonition being of no avail, the great god Gun resolved to find a way to subdue the flood and rid the people of their sufferings. But how, since the flood reigned all over China? Although he had divine power and tried hard, he found no solution to the problem, so he was quite depressed.

One day, Gun was in a gloomy mood when an owl and a tortoise happened to come over to him and asked him why he was unhappy. Unable to conceal the fact, he had to explain the reason.

"It's no difficult job to check the flood," said the owl and tortoise in one voice.

"How?" Gun asked anxiously.

"Do you know there is a treasure called 'Productive Soil' in the celestial court?"

"Yes, I've heard of it, but I don't know what it is for."

"'Productive Soil' can multiply endlessly. If you get a small lump of it and cast it onto the earth, it will immediately grow into an enormous bank of earth. Do you have to worry that you can't stem the flood with such a treasure?"

"Well, do you know where it is hidden?"

"It is a priceless treasure possessed by God the Supreme. How can we know where it is hidden. By the way, do you mean to say that you want to steal it?"

"Yes," Gun answered. "I've made up my mind to do so."

"Don't you fear your grandfather's severe punishment?"

"I'll accept the consequences," said Gun with a calm but sad smile.

Needless to say, the productive soil, regarded as the most valuable treasure by God the Supreme, was most secretly hidden and of course tightly guarded by very brave deities. However, the great god Gun, who had set his heart on rescuing the people from their misery, managed to think of a way and spirited it away.

With the soil, Gun lost no time in descending to earth to dam up the flood for the people. As miraculous as expected, just a very small amount of the soil soon heaped up into huge banks that stopped the
flood. Besides, the flood waters were absorbed by the soil.

Gradually the flood waters receded and in its place was a vast stretch of green undulating land. People came out from the caves in the mountains and down from the tops of trees. Happy smiles passed over their emaciated faces again. Filled with joy and gratitude to the great god Gun, they were prepared to re-establish their homes on the land.

The theft of the productive soil was eventually discovered by God the Supreme. He hated having such a thing happen in the kingdom of gods; he hated his thieving disobedient grandson even more. His anger flamed up and without hesitation he dispatched Zhu Rong, the god of fire, down to the earth. Zhu Rong killed Gun in the Yushan Mountain and snatched away the remaining productive soil. Consequently the flood started again and people's hope was dashed to pieces. Left once again in cold and hunger, people lamented the death of the great god Gun and their own misfortunes in particular.

The place where Gun was slain was called the Yushan Mountain, situated at the North Pole where sunlight does not reach. To the south of the mountain was Yanmen Gate where there was a divine dragon called Zhu Long (Illuminating Dragon). Human-faced and dragon-bodied, its total length was nearly a thousand feet. Since the time of Pan Gu, the Creator, it had guarded the gate carrying a candle in its mouth in lieu of sunshine to illuminate the darkness. The nether world that people talked about, was perhaps somewhere in the neighbourhood of the Yushan Mountain. We can easily imagine the misery and desolation of the place where Gun laid down his life for the people.

As Gun had not fulfilled his aspiration to bring floods under control, his spirit refused to leave his body after he was killed. After three years his corpse had still not putrefied. What was more, within his belly he bred a new life, that is, his son Yu. He kept the little new life alive and grown with his own blood in hopes that his son would carry on his unfulfilled mission. Yu grew and underwent changes in his father's belly and within three years he possessed all kinds of divine powers, even superior to those of his father.

God the Supreme was greatly alarmed when it came to his knowledge that Gun's corpse had not decayed in three years' time. So, for fear that Gun
should one day turn into a roving spirit and stir up trouble again, God the Supreme sent a god down to earth who was to dissect Gun's body with a double-edged sword. The god went to Yushan Mountain to carry out his mission as instructed.

He was cutting Gun's belly with his sword when suddenly out sprang a horned dragon, which pranced and soared into the sky. This dragon of course was Yu, son of Gun. After the dragon Yu ascended to heaven, the dissected corpse of Gun turned into a yellow dragon and jumped into the abyss near the Yushan Mountain.

This yellow dragon was of a very ordinary sort without divine powers, for all his powers had been passed to the son. After Gun went into the abyss, he was never heard of again and all memory of him was lost. He lived a quiet life in seclusion and the sole purpose of his life was to see with his own eyes that his son would carry on his cause and rescue the people from floods.

1. That is, Yu the Great or Da Yu.
CHINESE CLASSICAL POEMS

Goals:

1. To promote an appreciation of Chinese poetry
2. To promote an understanding of Chinese poetry as it relates to Chinese culture and history.
3. To foster an understanding of poetry as a means of expressing universal themes.
4. To encourage students to write poetry imitating classical Chinese styles.

Process - Jigsaw:

1. Students get into groups of five. Each group reads one poem, discusses it, and becomes an expert on it, using the accompanying questions as a guide.
2. The group splits up and each person joins another group of five, each of whom has read one other poem.
3. Each person explains to the others in the new group the poem he/she has read.
4. Each student will then have an in-depth knowledge of one poem and some knowledge of the other poems.
5. Each student writes an informal response to two of the poems.
6. Each student writes a formal essay about the poems as they relate to Chinese culture and history in particular or to universal themes.
7. Each student writes an original poem imitating some aspect of classical Chinese poetry and illustrates it.

------------------------

The Peasants' Lot

1. What is the theme of the poem?
2. What images are used?
3. Is a question being asked? What is the answer to that question?
4. The omniscient narrator is commenting on the peasant's lot. Do you think the peasant is aware of his own lot? Why or why not?

To A Friend

1. Who is the speaker? To whom is he speaking?
2. What is the mood, tone of the poem? How do you know?
3. Why is the speaker asking about the plum blossoms? What might they symbolize?
4. What are the important images in this poem?

The Boy Leaving Home

1. Why is the poem titled "The Boy Leaving Home" when it is mainly about the mother?
2. What is the mood, tone of this poem? What words provide the mood?
3. Paraphrase the last two lines.
4. Why does the poem end with a question? Is there an answer to the question?
5. Where do you think the boy is going?
Departure

1. Who are the "they" in this poem? Who is leaving?
2. What is the mood of this poem? What words indicate the mood?
3. Why do they have their backs to the light?
4. What images are effective in this poem?

On Returning to Live in the Country

1. Who is the speaker?
2. What comments does he make about his daily activities?
3. How does he describe the vegetation in his surrounding?
4. Explain the last line of the poem. Why does the speaker mention integrity, and how is it connected to the rest of the poem?

Writing a Formal Essay:

1. Write an essay in which you discuss the features of these poem that make them particularly Chinese. Explain by referring to aspects of Chinese culture and history.
2. Write an essay in which you discuss the universal features of these poems. Explain by making references to poems from other cultures.

Writing an Original Poem:

Write a poem of your own about a particular experience of departure, friendship, or work, creating a mood through imagery.

Brainstorm ideas first by jotting down
   A. what the experience was and where it took place.
   B. sensory images -- what you saw, heard, smelled, felt, touched.
   C. memorable words -- what someone said.
   D. how or why you remember this experience so vividly.

Combine the above elements into a poem that captures the moment.

Illustrate this poem.
The Peasants' Lot
Li Shen (772-846)

Hoeing the grass under the noonday sun,
His sweat drips on the ground beneath.
Who knows that on the dining plate
Every single grain means hardship.
To a Friend

Wang Wei (701-761)

You have just arrived from my hometown,
And should know what is happening there;
When you came, had the winter plum tree
Before my latticed window blossomed yet?

杂 诗

唐·王 维

君自故乡来，
应知故乡事。
来日绮窗前，
寒梅著花未？

诗意：您是家乡来的，应当知道家乡的事情。你
来的那天，花窗前的寒梅开花了没有？
The Boy Leaving Home
Meng Jiao (751-814)

The thread in the loving mother’s hand;
Garments for the boy leaving home.
She knits them closely before he leaves,
Fearing he might be late returning;
Who knows if the heart of this young sprout
Can ever repay the spring’s warm sunshine?
Departure

Huang Jingren (1749-1783)

At departure they have no words for each other;
They only stand with backs to the light deep in thought;
She does not raise her head for a long time,
But her silk blouse is wet with tears.

别 意
清·黄景仁
别无相赠言，
沉吟背灯立。
半晌不抬头，
罗衣泪沾湿。

诗意: 分别的时候，没有互相勉励和祝愿什么，
而是背着灯站立，沉思不说话。半天低着头，泪水
把绸衣都浸湿了。
On Returning to Live in the Country
Tao Yuanming (376-427)

I have planted beans below the southern hill;  
The weeds abound, the young bean shoots are few.
Early I rise in the morning to tend my rows,  
When I return with my hoe I am wearing the moonlight.

The path is narrow, the flowers and grass are tall,  
And my clothes are drenched in the dews of nightfall.  
Wet clothes are nothing to worry about,  
Only let not my integrity be abandoned ever.

MEI
The Three Teachings of China: An Introduction to Buddhism, Taoism, and Confucianism

Subject Areas:
World History
Asian Studies
Philosophy

Grades:
Middle school or early Secondary

Submitted by:
Katherine A. Kunz
East High School
Anchorage, Alaska

Summer 1994
LESSON PLAN OVERVIEW

RATIONALE: Eastern philosophy and religion offers an interesting contrast to that with which most Americans are familiar. Few secondary students have been exposed to ideas beyond the Judeo-Christian, or Western, outlook. The Three Teachings of China — Buddhism, Confucianism and Taoism — have endured almost 25 centuries and make them among the oldest existing belief systems today. Their longevity and the vast number of people world wide who adhere to them attest to their importance to any high school curriculum.

OBJECTIVES:
1. COMPREHENSION: Students will be able to understand the historical roots and beliefs of Buddhism, Confucianism and Taoism.

2. SKILLS: Students will improve listening, note taking and writing skills, as well as drawing inferences, comparing and contrasting different belief systems.

3. VALUES: Students will appreciate that another way of viewing the world exists in contrast to a Western/European one.

PROCEDURE: The curriculum is divided into three parts:
*Buddhism
*Confucianism
*Taoism
Each part has a brief introduction or background information, one or two parts to the lesson, and questions to further class discussion. This may be used alone or in addition to the information provided by the textbook.

MATERIALS: Reproductions can be made of
1. "Overview of Hinduism,"
2. "Notes on Buddhism"
3. "Miracle of the Bamboo Shoots" from Hsiao Ching
4. "The How of Pooh" from the Tao of Pooh
5. Toothpicks and a small bowl of vinegar
6. Paintings or statues of Buddha (optional)

RECOMMENDED TIME: Approximately 5 class periods.

EVALUATION: See end of unit for ideas
I. Overview of Hinduism

Students should have a basic understanding of Hinduism, for this is the root of Buddhism, China’s major religious group. Brief notes on Hinduism may introduce unit.

Caste System: Strict social stratification based on birth.

```
Brahmin: Priests

Kshatriyas: Rulers & Warriors

Vaisyas: Farmers, Merchants, Artisans

Sudras: Unskilled Laborers, Servants

Untouchables or Pariahs: Slaves
```

Reincarnation: Belief that the soul passes from one body to another in a continuous cycle of death and rebirth. Hindus believe that if one performs the duties (dharma) of one’s class, s/he will be reincarnated to a higher level in the caste system; if one fails to fulfill one’s obligations, s/he will be born in a lower class.

Example: A member of the Kshatriya class must be willing to fight, kill or be killed in order to be reborn a Brahmin; a girl must obey her father, then husband and eventually her sons.

*Use the article from the Anchorage Daily News (1/12/93) “Boy, 5, thought to be holy lama” to capture students interest in the concept of reincarnation

Moksha: The ultimate goal of Hinduism is to rise through the caste system. Only a priest (brahmin) can reach a state of perfect understanding, called moksha. The soul will then merge with the all-powerful and unifying spirit, Brahman.
II. Guided Writing Activity

This activity is a combination of listening and note taking skills. Students should receive a copy of outline "NOTES: BUDDHISM." While the teacher explains the introduction, students should fill in the blanks.

Answers for top part of handout:
- Siddhartha Guatama
- brahmin
- Sudras
- wisdom
- reincarnation
- enlightened
- Buddha

Together, look over Siddhartha's four questions. Students should close their eyes and listen for the answers as you read the following story.

"The Four Passing Sights"

Siddhartha Guatama is considered the founder of the religion of Buddhism. This legend explains how he challenged the ideas of the priestly class and became one of history's most famous figures, Buddha.

Siddhartha was born in 563 B.C. near the foothills of the Himalayas. Born to the Kshatriya class, he lived a life of luxury in his family's palace where his every desire was granted. As a Hindu, he only needed to fulfill his dharma as a warrior to be reincarnated into the highest class, the brahmin.

Siddhartha’s father had had a terrible dream which a fortune teller interpreted. He was afraid that Siddhartha might deny his role in life as a wealthy warrior and fail to fulfill his duty as a warrior. This was his destiny in life. Instead, his dream warned him that Siddhartha would choose to become a homeless monk who wandered the countryside. Denying one’s dharma would result in a rebirth in a lower class.

The father, being so afraid for his son, tried to shelter Siddhartha from the world. He was forbidden to leave the palace walls, and servants pampered him so he never knew pain, suffering or death.

As Siddhartha grew older, however, his curiosity could no longer be contained. He decided to sneak beyond the palace walls to see the countryside. As he was driving his chariot, he came along a SICK MAN by the side of the road. Siddhartha asked himself, "WHAT IS PAIN?" (Students may open their eyes and answer the question)

Siddhartha was terribly upset for he had never seen a sick man, nor pain!
The next day, Siddhartha again ventured into the countryside. He marveled at all the peasants toiling in the fields. After a while, he noticed an OLD AND FEEBLE MAN beside the road. Siddhartha was shocked, and asked the question, "WHAT IS SUFFERING?" (Students may open their eyes and answer the question)

Siddhartha went into the countryside for a third day. Posing another question to himself, "WHAT IS DEATH?", he then noticed a dead man along the road. (Students may open their eyes and answer the third question).

Having seen these three awful sightings, Siddhartha's peace of mind was robbed. He was upset at his father for having tried to shelter him from the real world. He left the palace, giving up his wealth and title, and wandered the countryside in search of wisdom. For six years, he lived a life of harsh discipline and suffering. He ate only a grain of rice each day. Despite these deprivations, however, Siddhartha realized that he gained pain, not wisdom.

One day, while sitting under a tree, Siddhartha was approached by a man in a yellow robe. After a lengthy conversation, Siddhartha felt that the truth became clear to him. From then on, Siddhartha was called Buddha, "the Enlightened One." (Students may open their eyes and answer the last question).

Answers to four questions:
1. Pain is a sick man.
2. Suffering is a sick and feeble man.
3. Death is a dead man.
4. Answers may vary and include: Siddhartha realized that life is full of pain, suffering and death, and one's role in society cannot hide this reality. Perhaps the three men sighted on the road represent the unavoidable stages in every person's life.

Finish note taking while leading discussion on each of the Noble Truths. Students may be able to guess what the next logical truth is, and often have firm beliefs on whether the statements apply to their lives today.

Answers to the Four Noble Truths:
1. First Noble Truth: Everything in life is suffering and sorrow.
2. Second Noble Truth: The cause of suffering is self-centered craving and wanting things that cannot last.
3. Third Noble Truth: The way to end all pain is to end all desires.
4. Fourth Noble Truth: One may overcome desire and attain enlightenment by following the eight fold path.
Answers to the Eight Fold Path (fill in the “steps”)

1. Righteous and generous living
2. Renounce material pleasures
3. Control emotions
4. Meditate selflessly
5. Respect all living things
6. Acquire knowledge
7. Cultivate goodness
8. Speak truthfully

Upon mastering each step, one escapes the cycle of rebirth and is released from pain and suffering. Nirvana, the release from pain and suffering, is the goal of Buddhism.

III. Evaluation: Students should choose one of the following questions to answer:

A. Describe the fundamental differences between Hindu and Buddhist beliefs.
B. If you were to follow the Eight Fold Path, how would your life have to change? What would be the hardest for you? Easiest? Why?
C. From your experiences, do you agree with the Four Noble Truths? Are there any universal truths? What might they be?
D. Learn more about Buddhism. What qualities should one seek? How has the religion changed over the centuries?
Directions: Listen to the introduction on Buddhism and fill in the missing words.

Siddhartha ____________ challenged the ideas of the ____________ priests in 530 B.C. He claimed that even people born in the lowest class, such as the ____________, could gain enough ____________ in one lifetime to escape the life cycle of death and rebirth called ____________.

I will now read you a short story about how Siddhartha answered three questions in order to become "__________". From that time on, he was called ____________, which means the "enlightened one."

Please close your eyes as I read and watch the story unfold. Keep your pen poised and ready to respond when I tell you to open your eyes after each question.

1. WHAT IS PAIN?

2. WHAT IS SUFFERING?

3. WHAT IS DEATH?

4. WHAT DO YOU THINK SIDDHARTHA REALIZED WHILE SITTING UNDER THE TREE? WHO DO YOU THINK THE MAN IN THE ROBE WAS?

Eventually, Buddha taught others about his beliefs. These were called the Four ____________ Truths.

First Noble Truth: ____________________________________________

Second Noble Truth: __________________________________________

Third Noble Truth: ____________________________________________

Fourth Noble Truth: __________________________________________
To follow the Eight Fold Path, one must attain the correct attitude; this may take a lifetime to achieve.

When the steps of the Eight Fold Path have been incorporated into one's life, then one is released from pain and suffering and has achieved the ultimate goal of Buddhism.

This state of mind is called ________________.
VICTORVILLE, Calif. — Simon Heh may look like an ordinary 5-year-old, but Tibetan Buddhist monks believe that he is the reincarnated spirit of a high-ranking holy lama who died nearly 50 years ago.

Simon was discovered last year when he met Geshe Lobsang Tsepel, a monk who operates a Tibetan center 140 miles away in San Diego. “I know you,” the boy told the religious leader. Tsepel, 62, dismissed it as mistaken identity until Simon persisted, saying, “You have been my best friend.”

Tsepel then dreamed about a teacher he once had, a high-ranking lama named Lobsang Phakpa who died in China in the early 1950s. Troubled by whether this boy of Chinese and Tibetan ancestry could be Phakpa reincarnate, Tsepel spoke with Simon’s family and learned that they had questions of their own about the youngster.

The boy’s grandmother, Dolma Lhakyi, told Tsepel that Simon began making accurate predictions last March — like not to trust a certain person or to avoid a certain activity lest something bad happen.

Tsepel wrote to holy leaders at his old monastery in India, but not wanting to sway their opinion, he said he thought Simon could be the reincarnation of one of five former monks. Tibetan Buddhism is one of many denominations within the Buddhist religion. All Buddhists believe in reincarnation, but Tibetan Buddhists are fervent in their faith that important holy leaders return to this world as babies.

The leaders wrote back with their ruling that Simon was a monk who once had been named Lobsang Phakpa. That marked the end of Simon Heh, little boy, and the creation of Sanggyal Dorjee, boy lama.

In Tibetan, Sanggyal (pronounced song-hey) means “Buddha” and Dorjee means “strong.”

Tibetan Buddhist monasteries in India are filled with hundreds of young lamas, including many regarded as reincarnated monks — called Rinpoches or Tulkus — prompting skeptics to suggest that signs were misread or politics entered into decisions about their destiny.

What sets Sanggyal apart is that Tibetan Buddhists rarely declare reincarnated spirits in children so far from their monastic homes. Sanggyal may be the first boy lama found in the United States, said Lance Nelson of San Diego State University and the University of San Diego, an expert in Eastern religions.
I. Background

During the Chou dynasty (1027 to 221 B.C.), China endured a series of bloody wars among the various states. The warring noble families were uncontrollable as they fought for their own territory. The Chou emperors were almost powerless, and scholars and philosophers from around the Middle Kingdom attempted to find solutions to the chaos.

Confucius, or K'ung Fu-tsu, was born about 12 years after Siddhartha Guatama. He came from an intellectual family where he was trained in music, moral character and history. His concern centered around the loss of faith in the Son of Heaven, the emperor. He believed that people must accept their place in the world for peace and harmony to return.

Confucius established five basic relationships.

| RULER | SUBJECT | FATHER | SON | HUSBAND | WIFE | OLDER BROTHER | YOUNGER BROTHER | FRIEND | FRIEND |

Women's lives were organized around the "three obediences": father, then husband, and eventually son. Confucian teachings clearly dictate that women are inferior to men. Pan Ch'ao, China's most famous woman scholar, supported this view in a book called Lessons for Women. She writes of the Four Virtues which are:

* Womanly virtue: know your place, be modest, always be last
* Womanly words: do not speak too much or in coarse language
* Womanly bearing: always appear attractive to your husband
* Womanly work: do household chores neatly and quickly

Confucius stressed social harmony with a strict set of values, including honor towards the family and community, loyalty, respect, sincerity and courtesy. Children must practice filial piety and give unquestioning respect for elders.
II. "Miracle of the Bamboo Shoots" from the *Hsiao Ching*.

Give students a copy of the verse and questions, or read aloud.

Meng Tsung, who lived in the Ch'in dynasty, lost his father when young. His mother was very ill, and one winter's day she longed to taste a soup made of bamboo shoots, but Meng could not procure any. At last, he went in to the bamboo grove, and clasping the bamboos with his hands, wept bitterly. His filial love moved nature, and the ground slowly opened, sending forth several shoots, which he gathered and carried home. He made a soup of them, which his mother tasted, and immediately recovered from her malady.

Questions:
1. Which of Confucius' basic relationship is being described?
2. Which fundamental Confucian values are stressed?
3. What is it that "moved nature"?
4. How might a Buddhist react to Meng Tsung's plight?

III. Moral Education in the elementary school

Chinese schools place a great deal of importance to moral education. In fact, in addition to academic success and physical requirements, morals determine the educational program for every child. Lesson plans and posters are two methods of communicating values to youngsters.

This is a partial list of values taught to elementary school children.

- Patriotism
- Respect for parents and teachers
- Love and consideration for others
- Courtesy and orderly behavior
- Honesty and sincerity
- Responsibility and love of labor
- Respect for the environment and public property
- Good reading material
- Smoking, drinking, gambling prohibited

Questions:
1. Which values reinforce classic Confucian ideas of morality?
2. Which values are stressed in American schools? How are they taught?
TAOISM

I. Background Information

If Confucius saw that the solution to China's problems lay in creating a rigid society based on social order, obedience and strict codes of conduct, Lao - Tse believed social harmony would only return to China if natural order were followed. Confucists relied on behavioral lessons which must be taught; Lao-tse said that truth could only be felt.

Lao Tzu was born in 575 B.C. during the Chou Dynasty. He was one of many scholars who sought peace during this period of 'warring states." Living simply and in harmony with nature is the way to peace. This is the core of Taoism, "the way" to truth. Whereas Confucists demand hard work and discipline, a Taoist creed is "Those who strive for nothing cannot be disappointed."

II. Tao Te Ching

The Tao Te Ching, or "The Book of the Way and Virtue", is an anthology of Taoist tenets from the fourth century B.C.

TWELVE

The five colors blind the eye.  
The five tones deafen the ear.  
The five flavors dull the taste.  
Racing and hunting madden the mind.  
Precious things lead one astray.

Therefore the sage is guided by what he feels and not by what he sees.  
He lets go of that and chooses this.

Taoism is an introspective philosophy which tries to shut out the world altogether. Simplicity and thought are the guiding forces.

III. The Tao of Pooh, by Benjamin Hoff

The Tao of Pooh explains Taoism in the style and simplicity of one of the most simple characters, Winnie the Pooh. Without permission from Penguin Books, however, I cannot reprint the passage I read to my students. The book should be easily attained, though; I read pages 1-6, "The How of Pooh." This introduction illustrates the differences between the Three Teachings of China, Buddhism, Confucianism and Taoism with an analogy to a famous painting, "The Vinegar Tasters."
Introduce the reading by giving students a toothpick dipped in vinegar. Ask them to taste it and describe the flavor. In the painting "The Vinegar Tasters," vinegar is a metaphor for life. Confucius, Buddha and Lao-tse each react differently to the vinegar: Confucius sees life as sour, Buddha views life as bitter; while Lao-tse considers the vinegar and life sweet for as long as that is its Inner Nature, all is well with the world.

After reading the selection from the Tao of Pooh, have students go back and use the information to create a chart contrasting the three beliefs.

<table>
<thead>
<tr>
<th>CONFUCIANISM</th>
<th>BUDDHISM</th>
<th>TAOISM</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

-12-
1. Create a list of quotes or statements from each of the lessons. Students should be able to identify which of the Three Teachings they represent.

2. Students may choose one of the Three Teachings to investigate further. This may be accomplished through research, or visiting a local Buddhist or Taoist temple.

3. Make a visual representation, such as a poster, of Buddhism, Taoism, or Confucianism.

4. Students may write an essay describing their own philosophy. How would the "vinegar" taste? Have students use the Three Teachings to compare and contrast their own opinions about the world.
LITERACY IN CHINA:
UTILIZING PRIMARY SOURCE MATERIAL
IN THE ELEMENTARY SCHOOL
LIBRARY MEDIA CENTER
by
Marguerite Mackay
Library Media Specialist
Evelyn M. Williams Elementary School
St. Croix
United States Virgin Islands
Fulbright-Hays Summer Seminar
1994
LITERACY IN CHINA: UTILIZING PRIMARY SOURCE MATERIAL IN THE ELEMENTARY SCHOOL LIBRARY MEDIA CENTER

OBJECTIVES:

To increase student knowledge and understanding of China as a developing nation with a large population.

To increase student awareness of illiteracy as an obstacle to China's development.

To increase student ability to understand primary source material in a variety of media.

To challenge students to understand their role in becoming literate citizens of the United States Virgin Islands.

STRATEGIES:

SESSION ONE

WHAT DOES THAT SIGN SAY?

Motivation: Teacher Notes: Activate student's prior knowledge of China and the Chinese language. Lead students to understand the importance of the written word to understanding daily transactions. Ask questions like: How do you know what is on the page if you can't read the language? How do you feel about not being able to read? List things you do in everyday life that depend on reading or writing.

Activity 1: Each group of students will observe laminated sheets of print material written in Chinese. The material includes a page from a Chinese newspaper, shopping receipt, business card, greeting card, advertisement, a page from a children's reader, McDonald's tray mat, etc. Groups will be asked to decide what they have before them; what do you suppose it says, etc.
VIDEOTAPE

Motivation:  
Teacher Notes: Locate China on a globe. Define literacy as the ability to read and write a language.

Activity 2:  
Introduce the videotape, "Literacy in China: Problem and Promise," by referring to the reasons we think reading is important. The video will illustrate some of the literacy problems in China and why the Chinese want to overcome illiteracy.

READING ABOUT CHINA

Motivation:  
Teacher Notes: The intent is to engage students in independent work outside of school. A double-entry journal is a type of reading log. Students draw a line down the middle of one page of a notebook. As they read a passage from their library book, on the left side of the notebook page, they are to jot interesting or important words, phrases, sentences, ideas, points, details, and the like. It can be a quote or a summary. The important thing is that it be the interesting or important, main ideas or main events from the passage. Then, on the right side of the notebook page, they write their own comments about the material on the left side. It can be questions, reactions, or expressions of confusion. It can relate to other reading or from their own experience. It can be about their feelings, thoughts, or ideas. Anything is acceptable.

Activity 3:  
Students will select two books from the China bibliography of books in the school library. Students will respond to the book by writing a double-entry in their journals.
SESSION TWO

CATEGORIZATION

Motivation: Teacher Notes: Utilize the whole class to go over the exercise. This is the first of three pre-reading activities for the students.

Activity 4: Students will group like words to unlock new vocabulary.

PROBABLE SENTENCES

Motivation: Teacher Notes: Read the phrases together. Define words in each phrase (someone from the class should know it). If necessary, use dictionary to check definitions. Utilize working with a partner to facilitate this activity. All sentences are acceptable.

Activity 5: Students will make up sentences using vocabulary from the newspaper article before they see the article.

ANTICIPATION GUIDE

Motivation: Teacher Notes: This is the last of the pre-reading activities. Students are to go right into reading the newspaper article after the anticipation guide is completed.

Activity 6: Students will work in pairs to answer the true/false statements.
NEWSPAPER ARTICLE

Motivation: *Teacher Notes:* Depending on the ability of the students, the teacher may read the article aloud to the class. After reading the article, students are directed to once again meet with their partner to correct or edit the anticipation guide to make the statements read correctly. Go over the guide at that time with the whole class.

Activity 7: Students will read the CHINA DAILY article, "Ending Illiteracy Among Rural Women."

PROBLEM SOLVING IN ACTION

Motivation: *Teacher Notes:* Look for paragraphs in the newspaper text that directly answer the questions. Have students re-read those parts. Remind students to keep up with their reading of books about China and writing in their journals.

Activity 8: Students and teacher discuss the questions on the handout.

SESSION THREE

LITERACY PUZZLE

Motivation: *Teacher Notes:* Divide pieces of the puzzle among the class and have students put the pieces together making a class puzzle. Call attention to the idea that all of these factors are interrelated. Discuss why each piece of the puzzle is a factor of illiteracy.

Activity 9: Students will complete a class puzzle, following the pattern of their individual puzzles.
FILM

Motivation: Teacher Notes: Relate what we have already learned about women in rural China. Do you think women in the United States are treated the same as women in China?

Activity 10: Students will view the film, "Small Happiness: Women in a Chinese Village." Students take notes on the film. Follow the viewing guide that accompanies the film.

SESSION FOUR

WEBBING

Motivation: Teacher Notes: Possible key points are: China is a large, diverse country. China is a developing country. China has a literacy problem. Rural China has more illiterate people than urban areas. Rural women have obstacles to becoming literate. China is doing something about illiteracy. Illiteracy is tied to social problems of unemployment, homelessness, abuse violence, etc. The U.S. and the U.S.V.I. also have illiterates in the population. Stay in school and become literate.

Activity 11: Using a web as a graphic organizer, summarize key points the students learned from the unit.
GAME OF DESTINY

Motivation:  
*Teacher Notes:* Engage prediction skills as you set up the game.  
Talk about the following:  
1. In traditional Chinese society, which jobs needed literacy?  
2. How does the selection of items to choose reflect the desires of the parents for their children?  
3. What jobs today, if we were to play the game, would not need a certain degree of literacy?

Activity 12:  
On a baby’s first birthday, the parents lay out writing brushes, an abacus, scissors, ruler, scale, and other things. Whatever the baby grabs or likes to hold tells what the baby might become when he or she grows up. The brushes would mean a teacher, an abacus would mean a store manager, the scissors would mean a craft person, the ruler would mean a carpenter. Play the game without revealing the meaning behind the symbols. Add a toy car, baseball cap or other modern items. Invite several students to come up and choose. After several have been selected, discuss the symbolism.

EVALUATION:

Through discussion and sharing students show their increased knowledge about China.

Through activities students demonstrate their increased ability to use primary source material when studying a topic.

Student assessment of their awareness of the problems of illiteracy in China is evaluated with another activity sheet.
**EVALUATION**

**Motivation:** Teacher Notes: Students, working in groups, will make Chinese wall posters following the directions. Have on hand red and black markers and white or red paper cut in wall poster sizes (6" x 6"; 6" x 8"; 6" x 36" streamers). Display the finished wall posters.

**Activity 13:** Students will write and construct Chinese wall posters.

**MATERIALS:**

Realia brought back from China trip to include printed materials, maps, books, newspaper articles, abacus, four treasures, etc.

Slides from China trip which were converted into a videotape with sound and narration titled, "Literacy in China: Problem and Promise."

I used the Cable in the Classroom Assignment Discovery program that is copyright clear through 1995.

School library bibliography of China related books to include fiction and non-fiction, print and non-print media.

Student handouts/activity sheets: Probable Sentences and Problem Solving; Categorization; Anticipation Guide; Literacy Puzzle; Webbing; Viewing Guide; Evaluation.
BACKGROUND NOTES:

I went to China to look at literacy. As an educator I know that without basic reading and writing, access to a larger society is limited. As a citizen of the United States I know literacy is necessary to participate in democracy. Literacy is a gauge of civil society.

New China is quick to admit that literacy is a challenge. The immense size of their population on the one hand and the vastness of the country together with the diversity of the people create enormous challenges.

The lessons in this unit are an attempt to engage upper elementary students in the scope of the problem. Students will interact with primary source material that I brought back from China. They will draw conclusions about literacy in China and specifically the challenges rural women face in overcoming generations of illiteracy.

Students will be asked to make inferences about literacy in their own community from their own perspective. Literacy is a serious challenge to the United States today. The roots of illiteracy are historically different in the two countries. The solutions to the issues will be different in different locations.

My interest is not to single China out for criticism so much as to use the China literacy problem as a mirror for my students to recognize the difficulties both the United States and China share around this issue.

Student activity sheets are included. The activity number corresponds to the activity in the strategies.
Activity 2:

**VIDEOTAPE**

Text of videotape titled, "Literacy in China: Problem and Promise"

START

#1 Literacy in China: Problem and Promise
#2 (Scenic view)
#3 First some facts. China is a very big country.
#4 China has the largest population in the world -- over one billion people.
#5 China is a developing country.
#6 It is changing rapidly in technology, in science, and in better social conditions.
#7 As one of the oldest civilizations on earth, China is still very much a traditional society.
#8 China is a rural-based society. The majority of the people live and work in the countryside.
#9 And China is a socialist society with central control under the Chinese Communist Party.
#10 As a great civilization, the Chinese dominated their part of the world for thousands of years.
#11 Now as a developing nation, the Chinese are committed to being full economic participants in the world.
#12 Economic goals are tied to educational goals for New China.
#13 Literacy is a goal the government has targeted for attention.
#14 In traditional Chinese society only males were educated. Learned Chinese studied the sayings of Confucius. Well educated Chinese wrote poetry and songs.
#15 The long educational tradition in China is both a treasure and a deterrent to achieving literacy in New China.
#16 Before the Communist Revolution in 1949, 80% of the population did not read or write. In rural areas it was as bad as 95%.
#17 After the Revolution, the Communist leader, who's name was Mao Zedong, sent millions of teacher volunteers into the countryside to teach basic reading and writing.
The 1990 census ranks China at 15% illiteracy. While this is a dramatic improvement, much remains to be achieved. Most of the 180 million illiterate people in China live in rural areas.

Today, six year compulsory schooling has been achieved. The goal for the new century is to require students to complete nine years of school.

Chinese is the language in the schools.

It is the oldest language in the world still in use. Chinese is spoken by more people than any other language.

Chinese writing goes back more than 3,000 years to a time when major events were recorded on animal bone and shells.

Chinese is written with "characters" that represent word meanings rather than sounds. As a rule, a single character stands for each word.

Minimal literacy is 3000 characters. With that you can read store signs. 6000 characters are needed to read the newspaper.

Children must memorize thousands of characters. They practice making the strokes of each character over and over until perfect.

Songs and rhymes help students remember the characters.

Written Chinese is uniform throughout the country but spoken Chinese varies from region to region. Often the Chinese spoken in one part of the country is not understood by people living in another area.

The difficulty of mastering Chinese has contributed to China's high rate of illiteracy.

To help more people learn to read and write, the government developed a three-part program of language reform in the 1950's.

First, the government established a national language, called "Putonghua," which is now used throughout China.

A second language reform was the adoption of a simplified method of writing that reduced the number of strokes needed to form characters. Characters became easier to read and write.

A third language reform was the creation of a new writing system that uses the alphabet. Called "pinyin," it is used to learn the national language in regions where other dialects are spoken.

The Chinese have ambitious goals to increase the number of scientists by the turn of the century. They have a national goal to eliminate illiteracy by 2020.

More schools and universities, better training for teachers, and improved schools will be needed. Education is seen as the key to China becoming a leader in the modern world.
Local communities play an increasing role in supporting education. Town enterprises and the school itself are asked to finance education. Schools are charging student fees for activities and books.

The government has established an adult education system in part-time schools, evening schools, and on-the-job literacy training. Television is widely used as a teaching tool.

Illiteracy is related to social problems of unemployment, hunger, homelessness, and human rights.

China will solve its problems in uniquely Chinese ways. They will not necessarily copy Western ways. They will adapt and create for themselves.

Signs of increasing literacy are everywhere in New China. Printed material abounds, from wall boards to booksellers.

Bookstores provide a wide selection of printed materials.

All ages can find something of interest. Even popular American titles are translated into Chinese. Here is a copy of "I Reach for the Stars" by Christa McAuliffe.

Bicycle pulled book trucks sell paperbacks to children. Bookstalls lend copies of books. For a small fee you can read on the spot or take home and return.

China has a national system of libraries. Large modern libraries like this one are found at universities.

China's publishing industry is controlled by the central government. Only authorized titles are sold at this bookstore in the capital city of Beijing.

But common today are underground ways to sell books. Many titles are pornography while others are written by people who criticize the government. These publications are getting harder to stop as the demands of the market support such books.

In this era of modernization, China's leaders have linked literacy with national growth and development.

Education in any country is charged with the mission of preparing young people for success in the future.

Literacy in China is a problem and a promise that if achieved, China will truly become a world leader.

THE END Written and Produced by Marguerite Mackay
Activity 3:

CHINA BIBLIOGRAPHY

Books at E.M.W.S. Library

Directions:

Select two books from the bibliography to read for this part of the unit. Two "E" books count as one book. Utilize the CD-ROM disc, "National Geographic Society's Picture Atlas of the World" or the "Grolier's Encyclopedia" to research a China topic of your choice. Use of a-v will count as one of the books.

Respond to the books by writing a double-entry in your journal. Be sure to include title and author for your books. Remember to think about what you are reading and write in your journal your response to what you have read. Tell me what it makes you think about. Look for customs or ideas that are part of Chinese culture.
**Activity 4:**

**CATEGORIZATION**

This exercise will help you understand related meanings of new vocabulary. For each vocabulary item, decide which of the three words next to it does not belong. Cross out that word. Then in the space provided, describe how the other three words are related or why they belong together.

Activity 5:

PROBABLE SENTENCES

Before we read this article on literacy in China let's activate what we already know about China and why we are looking into this right now. To help you sharpen your thinking I have listed several words related to literacy that you will encounter in the newspaper article. Work with a partner and create a good, probable sentence or two about literacy in rural China and the problems surrounding it. We will share these with the full class in 3 minutes.

ENDING ILLITERACY AMONG RURAL WOMEN

- serious social problem
- complete emancipation
- deeply-rooted idea
- random sampling
- campaign
- vicious cycle
- per capita income
- according to statistics
- traditional farming techniques
- shackled by poor education

***********

Activity 8:

PROBLEM-SOLVING IN ACTION

1. What is the problem China is trying to solve?

2. How are they going about solving it?

3. What don't we know about the work being done?

4. What else do you think could be done?

5. How does this problem relate to problems you know about here in the V.I.?
Activity 6: ANTICIPATION GUIDE

"Ending Illiteracy Among Rural Women"

Before reading the article work with a partner and decide if you think the statements are true or false. Indicate your decisions on the blanks on the left. After reading the article go over each statement and edit it to make it correct. Write your revisions on the sheet. (T=true; F=false)

1. _______ Rural women in China are all illiterate.

2. _______ According to statistics from the 1990 National Census, 90 percent of China's 180 million illiterate people live in rural areas.

3. _______ With advances in rural economy and with more schools, young women have greater educational opportunities than older women.

4. _______ Illiterate women in rural areas mostly work in farming.

5. _______ As the country has industrialized, large numbers of male workers have left farming and gone into other occupations.

6. _______ The more developed a region's economy is, the higher the illiteracy rate is.

7. _______ Poor areas are not self-sufficient; they depend on wealthy districts for support and handouts.

8. _______ In rural China, people have the deeply rooted belief that men are superior to women.

9. _______ Most rural women have little desire to improve their education; they are happy with their lives just the way they are.

10._______ To be literate is to take a giant step up from poverty.

Ending illiteracy among rural women

by Zhang Xia

DESPITE China's huge gains in economic and social development, women in the countryside have been unable to do much more than look on from the sidelines.

Their handicap: one in three rural women aged 15 and above is unable to read or write.

"This is a serious social problem which is hindering rural women's complete emancipation and society's progress," said Lai Li, a researcher with the Central Institute for Educational Research.

According to statistics from the 1990 National Census, 70 percent of China's 180 million illiterate people are women. Among all illiterates, 90 percent are rural residents.

To have a clearer idea of the situation of illiterate rural women, Lai's institute conducted a random sampling from May 1992 to early 1993 among rural illiterate people aged from 15 to 40.

The sampling confirmed the census results. Illiteracy rates for females were much higher than for males in seven of the 10 sampled provinces. In the other three, the two rates were about the same.

Among the sampled illiterate women, 64 percent were between the ages of 30 and 40. The illiteracy rate of women within this age group was 38 percent.

Between the ages of 15 and 19, however, the illiteracy rate was only 10.4 percent.

This reflects the fact that, with advances in the rural economy and with more schools, young women have greater educational opportunities than their older generations had.

The high illiteracy rate of rural women results from many years of weak economic development in the countryside. But this is a vicious circle, since the low education of women has, in turn, hampered the progress of the rural economy, Lai said.

The more developed a region's economy is, the lower the illiteracy rate is.

An investigation conducted in 302 towns in 1992 showed that in places where the per capita income exceeded 1,500 yuan ($172), 97.6 percent of the school-age girls could attend school.

First, with the readjustment of the rural industrial structure, large numbers of male workers have switched from farming to other occupations.

Second, because agriculture still largely relies on traditional farming techniques, there is little pressure to develop a highly-educated labour force.

Finally, rural women are unable to pull themselves out of their predicament by themselves. Shackled by their poor education, they have few chances to leave their land and seek other occupations.

The high illiteracy rate of rural women is one of the most serious social problems facing China today. Measures should also be adopted to prevent rural girls from dropping out of school, blocking the source of the emerging problem, said Lai.

CHINA DAILY July 4, 1994
Activity 9: LITERACY PUZZLE

Unemployment

Economic conditions & Financial problems

Health Problems

Low status of women and girls

Activity 10:

VIEWING GUIDE

Think about the following questions as you view the film, "Small Happiness: Women in a Chinese Village."

- How were marital engagements traditionally made in rural China?
- Why is the Chinese government concerned about population growth?
- Why do villagers in rural China prefer boy children to girl children?

Listen for the following vocabulary words as you view the film:

- feudal
- descendants
- oppression

Take notes here:
Activity 11:

WEBBING

Directions:
Web the main ideas you learned from the unit on Literacy in China.
Activity 13: EVALUATION

The Chinese often write slogans on large paper and paste them outdoors on city walls or in prominent places for citizens to read. Wall posters educate about specific ideas the whole community needs to know.

Traditionally the paper is white with red or black ink for the letters. Wall posters show no illustrations or pictures, just words.

In small groups, compose literacy awareness slogans, chants or key ideas about literacy. Suggestions are "Literacy Means a Better Job" or "Lifetime Literacy Starts in School."

Make several wall posters for display in the library. Consider how you would explain literacy and the importance of being literate to the students in this school.
Moral Education in China

Susan Rudin
Staff Developer,
District 21, Brooklyn, NY
Fulbright 1994
Learning Activity 1: MORAL EDUCATION IN CHINA

Level: Upper elementary through middle school

Time: 2-4 class periods

Objectives: Students will be able to:

- identify the moral principles that are important to the Chinese people.

- explain the ways in which appropriate moral behavior is transmitted in the home, the school and the community.

- evaluate the extent to which the Chinese moral principles are applicable to people of other countries and cultures.

Teacher Background: Moral education is an important and mandated subject in primary schools in China. On our site visits to schools, we witnessed photo galleries displaying pictures of Chinese philosophers and world-renowned figures such as Albert Einstein and Charles Darwin. Photos of national heroes such as Mao Zedong adorned buses and schools. A statue of a local moral leader, Zhao Shi Yan, was in the school garden at the prestigious middle school attached to Beijing Normal University. Posters proclaiming the United Nations "Year of the Family-1994" along with student-made suggestions on ways to help at home adorned school walls. Teenagers who did good deeds were considered role models for younger students and civic responsibility was rewarded at the school level.

Procedure: Day 1

1. Invite youngsters to share some rules for good behavior in the classroom and/or the community. Record on chalkboard or chart paper. Elicit from youngsters the reasons for their responses.

2. Introduce the lesson by explaining to youngsters that in China, standards for proper behavior, or Moral Education, is a subject in the primary school.

3. Distribute Activity Sheet 1A, Rules for Daily Behavior. Have youngsters study the rules and complete the exercise. Have youngsters share their responses with a small group before discussing and/or graphing the class results.

4. Have students explain their answers to the following questions:

   - What moral principles are important to the Chinese people?
-What principles apply to the home?..the school?..the community?..the nation?

-How do the principles compare to the ones that we listed? Which are similar? Which are very different?

-What predictions can you make about Chinese culture and lifestyle after studying these rules?

Procedure: Day 2

1. Make a word web using the word "leader" in the center. Have students suggest qualities of leaders, actions of leaders, and names of leaders in school and in society.

2. Introduce the lesson by explaining that in China, moral leaders are role models for Chinese youngsters. Often, these moral leaders are ordinary people who do good deeds for others.

3. Distribute Activity Sheet 1B, Moral Leaders. Have youngsters read the biographies individually or with a partner and be prepared to answer the purpose-setting question:

-Why are Zhao Shi Yan and Lei Feng considered moral leaders?

4. Discuss the following questions with the class:

-What moral qualities did Zhao possess?
-How did he demonstrate love of country?
-Do you feel that a school should be named in his honor? Explain.
-Why is Lei Feng a moral leader?
-Should ordinary people such as Lei Feng be held in such high esteem? Explain.
-How would you compare American leaders and role models to Zhao and Lei Feng? How do you account for our different kind of role models?
-If you had to name a role model who is most like these Chinese models who would it be? Explain.
-As China becomes more of a global economy, do you expect the role models to change? Why or why not?

4. Have youngsters work individually or in pairs to complete the moral leader cards. These cards can be laminated and placed in a photo gallery similar to the photo galleries of moral leaders in Chinese schools. Share information about the leaders with students in another class.
Procedure: Day 3

1. Show class a flag, pictures of George Washington, Abraham Lincoln, the Statue of Liberty, etc. Ask youngsters:

   -What do all of these objects have in common? Elicit from youngsters the ways in which we feel pride in our country.

2. Introduce the lesson by explaining that in China, visits to important historical places is one way of instilling patriotism.

3. Distribute Activity Sheet 1C, Patriotic Places. Have youngsters work in pairs to study the worksheet and complete the exercise.

4. Have pairs of students share their choice of a patriotic place.

5. Ask students to explain their answers to the following questions:

   -Why do classes visit Mao's burial site at Tiananmen Square?

   -What moral principles did Mao value? To what extent are his principles valued today? Explain.

   -How would you compare your choice of a patriotic site to Tiananmen Square?

6. Extend the lesson by having youngsters work in groups to research additional places of historic interest in China. This can be put into a travel brochure of patriotic places.

Procedure: Day 4

1. Show students a variety of stamps. Have students note the subject of stamps. What people are remembered with postage stamps?

2. Introduce the lesson by explaining that nations remember or commemorate important people through stamps.

3. Distribute Activity Sheet 1D, Commemorative Stamps. Have students study the worksheet and explain their answers to the following questions:

   -Why were these figures honored?

   -There is a famous quotation, "The pen is mightier than the sword." To what extent is this true of these moral leaders? What moral leaders today exemplify the quote?

4. Have students design their own commemorative stamp album.
Activity Sheet 1A

Directions: Read the following Rules for Daily Behavior which highlight the qualities that a Chinese person with good moral character possesses. After studying this list, complete the exercise that follows.

RULES FOR DAILY BEHAVIOR

1. Show respect to others. Respect their personalities, religions and customs.

2. Respect your teachers and be united with your fellow pupils.

3. Show kindness and concern to others. Always act with modesty and courtesy.

4. Respect your elders. Respect the guidance and teachings of your parents. Show concern by doing household chores and physical labor. Respect both sets of grandparents and talk to them politely.

5. Have a great love of your country.

6. Help in class. Be attentive in class and do your homework conscientiously. Study hard and make progress every day.

7. Follow the discipline of the school. Come to class on time and take care of school property. Be neat in your personal appearance and hygiene. Love physical labor and keep an active exercise routine.

8. Use all the opportunities that the school provides.

9. Avoid breaking the laws. Do not get involved in illegal activities. Do not tell lies and be prepared to correct your mistakes.

10. Observe the standards for a successful person to follow. Do this with the help of your parents and society.

Exercise: Which of the moral standards listed above are most important to you? Rate the three most important standards. Give the reason for your choice.

<table>
<thead>
<tr>

Activity Sheet 1B

Directions: Read the following short biographies of Chinese moral leaders. Then choose a moral leader who you feel is worthy of respect today. The person can be famous or an ordinary person. Make a card with a picture and short biography that explains the reasons for your choice.

Moral Leaders

Zhao Shi Yan
Zhao was a graduate of the Middle School that is part of Beijing Normal School. He was a leader of the Communist Party in the 1920s. He was a leader in the Shanghai uprising. Zhao studied with Chou En-Lai, a Communist leader, in France.

Lei Feng
During his short life of 22 years, this orphan believed in serving others in the army and in the community. He gave his seat to the elderly, cleaned trains and filled water bottles for others. He died in an accident while doing his job.

Exercise: Create your own hero card in the space below. Be sure to explain why this person is a moral leader.

Name of Moral Leader: ____________________________

Short Biography:_________________________________
Activity Sheet 1C

Directions: One way that youngsters in China learn about love of country is through visits to famous places where they can find out about famous people and events. At Tiananmen Square in Beijing, one can visit the burial site of Mao Zedong, the leader of the Communist Party and leader of the "new" China from 1949 until his death in 1976 at the age of 82. Read the sayings and poem by Mao. Then describe a site that you would take visitors to that demonstrates love of your country.

Poem

Patriotic Places

In the parks and in the Palace grounds
I saw the early northern spring.
I saw the white plum blossoms flower,
while the ice still held solid in the north sea.

Sayings from the "Little Red Book"

- The State is China and everyone should work for the State.

- The land should not be owned by individual peasants but should belong collectively to all.

- The strength of China is people, and the people should all work together to increase their strength.

- From each according to his ability, to each according to his work.

- He who works more shall receive more and he who does not work shall not eat.

Source: China, by Gary Birchall, pp. 38 and 60.

Why do you think a visit to Mao's tomb is included in Chinese moral education?

Exercise: Use this space or a separate piece of paper to draw a picture of a special place that makes you feel pride in your country. Explain the reasons for your choice.
Activity Sheet 1D

Directions: Moral leaders in China are often honored by stamps which commemorate their achievement. Examine these four stamps which honor writers and thinkers who used their pens to demonstrate love of country during the second Sino-Japanese War (1936-1945) and in 1911 when dynastic rule (rule by an emperor) ended in China.

**COMMEMORATIVE STAMPS**

(4-1) 20 fen Patriotic and Democratic Figure — Chen Qiyou
(4-2) 20 fen Patriotic and Democratic Figure — Chen Shutong
(4-3) 50 fen Patriotic and Democratic Figure — Ma Xulun
(4-4) 50 fen Patriotic and Democratic Figure — Xu Deheng

Exercise: Choose one person who has shown love of country or a desire to make positive change through writing. Make a stamp in his/her honor. Examples include Gandhi, Martin Luther King, Henry David Thoreau, Rachel Carson.
Learning Activity 2: MORAL EDUCATION THROUGH CHINESE LITERATURE

Level: Upper elementary through middle school

Time: 4-8 or more class periods

Objectives: Students will be able to:

- list the values or moral principles that are emphasized in Chinese literature.

- appreciate the power of literature as a tool for transmitting the values of a culture.

- evaluate the extent to which there are a common core of values that all people share.

Teacher Background: Throughout history, literature has been a powerful tool in transmitting the values of a culture. Folk tales, poems, myths and plays have been transmitted orally through many generations. In these stories, one can find the moral principles or values that a group holds dear.

In China, many festivals have myths that are associated with the special day. Similarly, the use of shadow puppet theater has long been used as both entertainment and instruction. Mao Zedong used the opera and the puppet theater to bring his messages to the villages. Folk tales had messages that reflect the rules of daily behavior. The principles of Confucian thinking such as filial piety are also an important part of Chinese literature.

Current educational research reflects the view that moral values can be taught using literature as a vehicle. Through both fiction and non-fiction, youngsters can identify with characters whose behavior demonstrates commitment to such core values as responsibility, honesty, and respect for others.

Procedure: Day 1

1. Have students discuss the meaning of the proverb, "Money doesn't grow on trees." List some of the ways youngsters can earn money for things that they need and/or want.

2. Introduce the lesson by eliciting the moral principles that are suggested by the proverb and the list that the students made. Distribute copies of the folk tale, The True Money Tree (Activity Sheet 2A) to the class. Set purpose for reading by asking the following question:

   - What is Long Life's secret money tree?
3. Have youngsters work in pairs or small groups to discuss the values or moral principles that are highlighted in this folk tale by asking the following questions:

- How would you compare Good Life and Long Life?
- What values did Long Life consider important? How important are these values today?
- Why did Good Life tell his mother that he, too, now owned the true money tree?
- How meaningful is this folk tale for people of all cultures?

4. Review the Rules for Daily Behavior (Activity Sheet 1A) and note the moral principles that are transmitted in this folk tale (e.g., frugality, love of labor, kindness to others, etc.)

5. Extend the lesson by having youngsters complete Activity Sheet 2B, My Own Money Tree. Create a bulletin board by constructing a class money tree using the hands as leaves.

Procedure: Day 2

1. Activate prior knowledge by asking students:

- What stories are associated with holidays that we celebrate?
- How do these stories help us feel a sense of pride in our nation or heritage?

2. Introduce the lesson by explaining that the Chinese Autumn Harvest Moon Festival has many legends. Distribute copies of Activity Sheet 2C, The Moon Lady, Sheung Ngao. Read aloud to class or have partners read it to each other. Students should read to answer this purpose-setting question:

- Why is Sheung Ngao remembered on the day of the Moon Festival?

3. Student volunteers might retell the story or act it out after discussing these questions:

- What moral principles are valued in this folk tale?
- Why did Sheung Ngao drink the king's magic medicine? Do you think she did the right thing? Explain.
- Why do you think this folk tale has survived for hundreds of years?

4. Have students complete the character comparison on Activity Sheet 2D, Comparing Moral Principles. Students might
design scrolls which are traditionally hung on this celebration.

Procedure: Day 3:

1. Have children share anecdotes in which they were asked to do the wrong thing. Encourage students to explain what they did and how they felt. Feelings can be written in a concept web.

2. Introduce the lesson by explaining that in China, the teachings of Confucius, an ancient scholar, have shaped moral principles for many centuries. Distribute copies of Activity Sheet 2E, Confucius the Wise. Set purpose for reading by asking the following question:
   -What guidelines did Confucius feel were important for proper behavior?

3. After small groups have shared their responses have the students explain their answers to the following questions:
   -What rules did Confucius give the Chinese people to follow?
   -What is each person's responsibility when he/she is told to do something wrong?
   -Are things always clearly right or wrong? Explain.
   -Is Confucius' advice still meaningful? Explain.

4. Extend the lesson by having students find recent news articles that can be viewed right by some persons and wrong by others. Have students write an editorial stating why they believe the actions were right or wrong.

5. Have students make awards to people who have done the right thing in a difficult situation, or people who have learned from their mistakes. A sample award is on Activity Sheet 2F, Awarding Proper Behavior.

Procedure: Day 4:

1. Ask students to describe acts of kindness to others.

2. Introduce the lesson by explaining that shadow puppet theater is used in China to both entertain and instruct. Have students role play Three Precious Pearls on Activity Sheet 2G. After reading, discuss the following questions:
   -What is the message of this play? What moral principles are emphasized? How effectively are messages told in play form? Are the lessons taught Chinese or universal?

3. Have students make shadow puppets. One is done for you.
In years gone by, there lived an old Chinese man by the name of Li. He had two sons, Long Life and Good Life. Long Life's mother had died when he was a young boy and Li had been lonely without a wife in the house. So he married again, and when she gave him a son they named him Good Life, for life in his house was good. But alas! The new wife did not like Long Life, so she made him do all the hard work in the house and in the fields and garden. But Long Life was an obedient son and did not complain. He did all that had to be done while his stepmother and brother looked on.

When he was seventeen years old, his father died, and his life with his stepmother was made even harder than it had been before. Although he did all the work in the house and fields, he was scolded all the time. No matter how much he tried to please his stepmother, she was always finding fault with him. She was always thinking of ways to get rid of him.

So one day she said, "You are old enough to be on your own now. We should divide the land your father left. Your brother is still young, and he can stay with me. We should each live in our own home, then there will be no quarrel between us."

Long Life agreed to this and left the division of property to his stepmother. She took the house and the best fields around it for herself and her son. To Long Life she gave a barren piece of land on a hill far from the village.

Long Life did not complain. He built himself a little hut and began clearing the land and plowing and planting on it. He cut some firewood and little by little he grew enough food to support himself nicely.

With Long Life gone from the house and land where he had done all the work, there was no one to do it. Good Life and his mother were lazy and careless, so they became poorer and poorer. One day the mother said to her son, "Look, we have a fine house and good land, and your brother lives in a hut on a piece of barren and hilly land, but he is getting richer and we are becoming poor. Tell him if he got something from his father we don't know about, he must give us at least half of it."
Good Life came to his brother in his little hut and said, “Brother, did our father give you some treasure we don’t know about? We have fine land and you have a rocky, barren piece—how is it that you are doing so well and we so poorly? You have plenty of everything and we have nothing. Did our father leave something you are hiding from us? We want our share of it.”

“Brother, you are right. Our wise father left me a wonderful treasure—a money tree. It has two trunks and there are five branches on each trunk. All my food and clothing depend on that wonderful tree. From that tree I will always get enough money to live in good health and pleasure...it—”

Good Life broke in, “Where is that tree? Where are you hiding it?”

“I am not hiding it. It is with me all the time on my little piece of land, in my garden, and I am always working at it. It gives me food, drink, and clothes, and anything else I need, and if you—”

Before he could finish his words, Good Life rushed out and ran to his home. “Mother. Mother,” he cried. “You were right. My father left a money tree that will give us money for all we need, but Long Life took it. He told me it will give money for food, clothes and everything else we need.”

“I knew we were cheated,” she cried. “Run to Long Life’s orchard and dig up that money tree and plant it in our garden. It should be here.”

Good Life did not need any coaxing. He found a spade and ran to Long Life’s garden. He searched for a long time and found a tree with two trunks and ten branches. He worked hard digging it up. Then he dragged it to his mother’s garden and there he dug a deep hole and planted the tree, watering it well. Day after day he watered the tree and shook it hard—but no money fell from it.

Then Good Life went back to his brother in anger and cried, “I took a tree with two trunks and ten branches from your garden and planted it in our garden, watered it and took care of it, but no money falls from it. Did you tell me the truth?”

“Dear brother, I told you the truth—but you did not wait to hear the end of what I had to say. My money tree can never be stolen. It is my two arms and hands. The arms are the trunks and the fingers are the branches. Use them for planting trees and crops and to do all other work. Then money will come from them, and that will get you everything you need. My arms and hands are my fortune and I call them my money tree. You have a money tree, too. Put it to work as I do, and you will have all the money you need to buy whatever you want.”

Good Life went home to his Mother. On the way he had been thinking of his brother’s words. “Mother,” he said, “now I have the true money tree and...” He put his hands to work and soon he and his mother reaped money from that tree for food and everything else, just like his brother did.
Activity Sheet 2B

**Directions:**
In the space below, trace your hand or hands. Then write in each of the fingers ways in which you have responsibilities and/or can use your hands to do productive things. Your class or group might want to place these handprints on a class or group "Money Tree."

**MY OWN MONEY TREE**

clean my room
set the table
make my bed
care for my pet
take out trash
The Moon Lady, Sheung Ngao

Many, many years ago, there was a powerful king who was an evil person. This king had a beautiful wife whose name was Sheung Ngao.

The king heard about a magic medicine which would keep him young forever. He wanted it and sent many people to look for the magic medicine that would keep him young.

The king sent a few hundred people in large boats and told them to sail far out into the sea. He said, "Do not come back until you have found the magic medicine that will keep me young."

The people found the magic medicine that would keep one young. Sheung Ngao knew that the king was not a good person. She did not want him to live forever, so she stole the magic medicine and she swallowed it herself.

As soon as she had taken the medicine, Sheung Ngao went up into heaven. She lives on the moon to this very day.

The people were very, very happy that Sheung Ngao was able to save them from being ruled by the evil king forever. Therefore, every year on the fifteenth day of the eighth month, the people remember her with the Moon Festival celebration.
Activity Sheet 2D

Directions: After reading the folk tale, The Moon Lady, Sheung Ngao, complete the chart that follows.

Comparing Moral Principles

Give an example from the folk tale which demonstrates how by deed or action, the main characters demonstrated their moral principles.

<table>
<thead>
<tr>
<th>Value</th>
<th>King</th>
<th>Sheng Ngao</th>

<td></td>
</tr>
</tbody>
</table>

At the Harvest Moon Festival, Sheung Ngao is remembered. Write a message to her that might be left in a mooncake, a food that is traditionally eaten. Try to keep your message short.
CONFUCIUS THE WISE
Adapted from the Hsiao King

Perhaps you have heard of the wise counselor Confucius, who lived many centuries ago in China. He gave advice to all who came to him with difficult problems. In China, children are taught at an early age to respect and obey their parents and grandparents. Older people are highly respected.

One day a young man came to Confucius with a very difficult question. He said, "Master, I know I should listen to my parents and be obedient to their wishes to avoid troubles in my life, but I would like to ask you, should I obey every command of my parents? What if they tell me to do something I know to be wrong?"

"Ah," said Confucius. "Let me tell you the story of the great king who lived long ago in a far off kingdom. Because he was very rich and powerful, he thought he could do anything he wished. So he began to break the promises he had made through treaties with the neighboring kingdoms. He raised taxes and jailed many of his people. Fortunately, he had seven wise ministers who were brave enough to come to him and warn him that if he continued to do wrong things he would lose his kingdom. He thought a long time about what they had said, and then he decided to heed their advice and, as a result, he kept his throne."

"Then there was a prince whose father gave him a great castle with rich lands surrounding it. But he was lazy as a crocodile lying in the sun. He began to spend his money, throwing it around like a farmer's wife feeding her chickens. He would have lost it all, except one day five of his friends came to him to tell him that he must stop before he lost everything. He was angry at first, but then he changed his ways and saved his castle and lands."

"Finally, there was once a governor of a great land who ruled his country wisely and well, but unknown to anyone else, he had bad habits of alcohol and gambling. Three of his officers came to him and told him that soon everyone would know of his bad habits and that unless he changed, he would be quickly out of office. Although it was very hard at first, the governor forced himself to give up his bad habits, and he was able to serve his country for many years."

"Now, each of these rulers had a difficult lesson to learn from those who were under their orders. In the same way, a father or leader must listen and change his ways when he is doing something wrong. It is the right, indeed, it is the duty of each one of us to say 'no' when we are told to do something wrong. The child must say to his parent, 'I cannot permit you to bring shame upon yourself and upon me by obeying your command to do what is wrong.'"

Confucius thus gave to the Chinese people a rule to follow. When you are told to do something wrong, you must not do it, out of respect to yourself and to those who might suffer by your wrongdoing.
Activity Sheet 2F

Awarding Proper Behavior

Directions: Prepare a medal or certificate to someone who has demonstrated that he or she has done the right thing in a difficult situation. Then explain the reasons for your choice.
THREE PRECIOUS PEARLS

CHARACTERS: Old Stone Cutter Shi Wa Golden Dragon
Phoenix Unicorn Wise Old Man

SCENE I: Stone Cutter's Cottage

STONE CUTTER: Woe is me! What shall I do? I've interviewed 1,000 boys and none of them can pass the test to be my apprentice. Who will learn my skills? What shall I do?
(Sees Shi Wa) Oh! Here comes another one. I suppose he will be unwilling to do my task just like the others.

SHI WA: Master, I have come to be your apprentice.

STONE CUTTER: You must first do a task for me. When you have finished it I'll take you as my apprentice.

SHI WA: I'll do it without fail.

STONE CUTTER: When it is raining, or windy or the weather is too hot, I can barely cut my stones up here on this mountain. I need a magic pearl that can keep off the rain, a magic pearl that can shelter me from the wind, and a magic pearl that can keep the hot weather under control. If you can find these three precious magic pearls, I'll take you as my apprentice.

SHI WA: Master, could you tell me where to find the pearls?

STONE CUTTER: (Laughing) So you do not give up like the others. Go south for 1,000 li where there is a vast stretch of pine trees. In the pine trees is a man who knows everything. You can ask him.

SHI WA: Will I have any problems?

STONE CUTTER: Yes, you will. It is a long journey to the pine forest. You will need to climb the mountain, cross the sea and go through a wall of fire. Aren't you afraid?

SHI WA: So long as I can find these precious pearls, I am afraid of nothing.

SCENE II: A great roaring river.

SHI WA: La, La, La, how will I cross this great roaring river?

(A golden dragon appears out of the water.)
SHI WA: Golden Dragon, could you carry me across the river? I am going to see the wise old man.

GOLDEN DRAGON: If you want to see the wise old man, you will encounter some difficulties. I'll carry you across the river.

(Golden Dragon carries Shi Wa across)

SHI WA: Thank you for your help.

GOLDEN DRAGON: Don't mention it, but please do me a favor. If you meet the wise old man, will you ask him when I will be able to call the wind and rain in the sky?

SHI WA: Certainly, I'll ask him for you.

SCENE III: A towering mountain with no slopes.

SHI WA: La, la, la. How shall I climb over this mountain?

(A big phoenix flies toward him from the mountain top.)

SHI WA: Phoenix, could you carry me across the mountain? I am going to see the wise old man.

PHOENIX: If you want to see the wise old man you will encounter some awkwardness. I will carry you across the mountain.

(Shi Wa climbs on the back of the phoenix and they fly over the mountain.)

SHI WA: Phoenix, thank you for your help.

PHOENIX: Not at all, but I would like you to ask the wise old man a question for me. When will I be able to mount the clouds and ride the mist?

SHI WA: All right. I will ask your question.

SCENE IV: A sea of fire.

SHI WA: La, la, la, how can I plunge into a sea of flames?

(A unicorn comes out of the flames.)

SHI WA: Unicorn, could you carry me over the sea of flames? I am going to see the wise old man.
UNICORN: If you wish to see the wise old man, you will encounter some difficulties. I will carry you through the flames.

(Shi Wa mounts the unicorn and they rush through the flames.)

SHI WA: Thank you for your help.

UNICORN: Not at all, but I would like you to ask the wise old man a question for me. Why can I only rush into the sea of flames but cannot walk on the road?

SHI WA: Of course, I'll ask your question.

SCENE V: Shi Wa walks into a pine forest.

SHI WA: My feet are blistered. My shoes have holes. I think I have walked for days but I am finally in the pine forest! What a beautiful place. I hope I can find the wise old man.

(Shi Wa looks around and up and down. He sees nothing and lies down to sleep awhile. He wakes up and sees an old man coming toward him)

SHI WA: (Respectfully) Excuse me, is there an old wise man here? Do you know where I can find him?

WISE OLD MAN: (Laughing) I am the only old man here. What can I do for you?

SHI WA: I have some very difficult questions to ask you.

WISE OLD MAN: Wait! You can only ask three questions. One more question is too many. You should think over what three questions you want to ask.

SHI WA: What should I do? I have four questions. One for the golden dragon, one for the phoenix, one for the unicorn and one of my own. If I do not ask mine, I will not be the stone cutter's apprentice. But I promised my friends, the dragon, the phoenix, and the unicorn. I must ask their questions.

SCENE VI: Back at the sea of flames. The unicorn is waiting.

SHI WA: The wise old man said that there is something caught in your right sole. If it is removed, you can walk on the road and you will feel no pain.

UNICORN: You are right! Here is a stone in my foot. Isn't it beautiful? You are such a good child. Let me give you this stone as a souvenir.
SCENE VII: The mountains with no slopes. The phoenix is waiting.

SHI WA: The wise old man said that there is a crippling sore on your tail. If you open it, you can mount the clouds and ride the mist.

PHOENIX: You are right! Here is a stone that was lodged in my tail. Look at the shimmer of this yellow stone. You are such a good child. Let me give you this stone as a souvenir.

SCENE VIII: The roaring river. The golden dragon is waiting.

SHI WA: The wise old man said that there is a bone caught in your throat. If you cough it out, then you can summon the wind and the rain in the sky.

GOLDEN DRAGON: (cough, cough!) You are right. Look at this shiny white stone the bone turned into. You are such a good child. Let me give you this stone as a souvenir.

SCENE IX: Back at the stone cutters.

SHI WA: Old Master, I did not find the three precious pearls, so I cannot become your assistant. Please accept these three stones instead. Good-bye.

(Turns to leave)

STONE CUTTER: Don’t leave yet. What can you see in these three stones? The first holds a white pearl. Look at the water recede, it moves the rain away when I hold it up.

SHI WA: And the second stone holds a yellow pearl. Look! It stops the wind from blowing.

STONE CUTTER: The third stone holds a red pearl. When I put it near the fire, the flames go out.

SHI WA: Oh Master, did I indeed find the three precious pearls?

STONE CUTTER: That you did my boy. You thought of others first. You were not afraid of hardships. Only in this way can you master skills and become a worthy person. You are the very apprentice I want!

</table>

One U.S. dollar is equal to 8 yuan.

To find out what you are ordering costs in dollars do the following math.

Price in yuan/8 = Price in dollars

Example: Milk costs 2.0 yuan. So, it costs 2.0/8 = $ .25

How much does a milk shake cost in yuan? ____/8 = $ _______

Now make up your order for McDonald's.

Total................. yuan/8 = $ ____________

How do these prices compare to prices in America?

How expensive is a Big Mac to an average Chinese worker who earns about 458 yuan a month? (Hint: 458/8 = $ ______ per month)
COMPARING THE GEOGRAPHY OF CHINA AND THE UNITED STATES

1. Refer to Map 1. Compare the area of China and the United States.

   China = ______________ sq. mi.
   U.S.A. = ______________ sq. mi.

   _______ is larger by ______________ sq. mi.

2. Refer to Map 2 which shows elevations of the areas of both countries.

   How are they generally similar?

   Which has more plains?

   Which has more mountains?

   How will the difference effect life in the countries?

3. Refer to Map 3 which shows precipitation patterns.

   Describe the similarities.

4. Refer to Map 4 which shows population patterns.

   Where do most of the people live in each country?

5. What effect do elevation and precipitation have on population patterns? (Refer to maps 2-4.)
6. Refer to Map 6 which shows the physical features of China.
   Name five types of landforms found in China.

   Name two landforms the Great Wall separates.

   China has no natural rivers running north and south.
   What is the man-made waterway that connects north and south China?

7. Refer to Map 7 which shows the agricultural regions of China.
   What are the two dominant crops shown on this map.
   Name some other significant crops.
   Trace the thick black line dividing north and south China.
   What is your hypothesis as to why ...
       more _______ is grown in the north?
       more _______ is grown in the south?

8. Refer to maps 6 and 7. What is the relationship between landform and the types of crops grown?
Select readings from BACKGROUND TO THE USA by Richard Musman represent "source material" from which Chinese students form their views of America.

It is interesting to look at how others see us. The following articles present a view of various aspects of America. Let's examine the vision of America as presented to Chinese students.

Check the article your group is reading.

- "How Americans Eat and Drink"
- "Two Kinds of Football"
- "Growing Up--At Home And At School"
- "We Have The Biggest"
- "American Women"
- "San Francisco"
- "Sun Belt"
- "National Parks"

Read your article as a group. Answer the following questions. Prepare to share a summary of the article and your insights with the class.

Briefly summarize the article. (What are the main points? What did the Chinese find interesting about American life? What did they view a little differently than the way we would see it? What catches their attention that we might take for granted?)

If you were writing a response to this article what would you want to clarify? (Are there things with which you disagree? Is there something that is over stereotyped? Is there some more information you would like presented?)

How does looking from the "outside--in" help us to better see ourselves?
BACKGROUND TO THE USA

This book is sold in Chinese bookstores to students wanting to learn about America. It plays a role in shaping the "Chinese View" of America.

The American Way of Life
Coca-Cola is the best-selling soft (non-alcoholic) drink in the world. 155 million “Cokes” are sold every day, from the equator to the Arctic. But whereas outside the USA Coke tends to be a young person’s drink, inside the USA anybody of any age or income can drink it without embarrassment on any occasion.

Coke is not the only “cola” drink. Pepsi Cola is a well-known rival and has its devotees, for it is not as sweet as Coke. Cola drinks contain caffeine from the kola nut and are the only soft drinks which are stimulating as well as refreshing.

There are excellent wines produced in California which are praised by European connoisseurs, but some Americans prefer stronger stuff. Well-off Americans consume a lot of alcohol in the form of cocktails — mixtures based on spirits like whisky, gin and vodka.

Hamburgers and hot dogs are perhaps the best known American foods. Hot dogs — sausages between bread rolls — can be bought in snack bars and from hot dog stands on street corners. And from San Francisco to New York, in cheap or medium-priced restaurants,

---

1 The entrance to this modern store in Chicago is by escalator from the street
hamburgers\(^1\), will be on all the menus, in company with steaks, fried chicken and seafood. They come with French fries and crisp green salad. In most cases it is certainly good value for money. For dessert you will be offered apple pie, cheese cake, chocolate layer cake, ice cream and ice cream sundaes. No ice cream in the world is more delicious than American ice cream.

The American passion for speed has now hit the food business. Many restaurants, in particular the great chain restaurant company, Macdonalds, specialize in “fast food,” food which is served at the counter ready “to go,” or “to take out.”\(^2\) The food, cooked and hot, is packed into cardboard and plastic containers, and hot drinks go into plastic cups with tight-fitting lids. There are also drive-in fast-food restaurants, where the customer does not even have to leave his or her car. They first stop at a board where the menu is displayed, give an order through a microphone and then drive another twenty yards, where a girl hands them the meal, ready cooked and packed. People who prefer to eat at a table in the restaurant also receive their food in cardboard or plastic containers, and the knives, forks and spoons are plastic, too. When they have finished, customers throw everything except the tray into a trash can.

In most cities, large and small, you can eat Mexican or Italian food. And even small towns have a coffee shop serving simple meals, drinks of all kinds — and excellent, freshly-made coffee. You sit at the counter, or are served at a table. Service in restaurants and coffee shops is efficient and friendly. Waiters and waitresses often introduce themselves: “Hi! I’m Don (or Debbie). What can I get you folks?” This friendliness is natural and not entirely influenced by the hope of a high tip. In any case, people usually tip 15% of the check.\(^4\) One of the pleasantest things about waiters and waitresses is that they refill your coffee cup several times for no extra charge.

Many American families pride themselves on their cooking, and have deep freezers, where they store food they grow in their gardens or buy in the supermarket. Supermarkets are large self-service stores selling every kind of food — fresh, canned, or frozen. So, like the fast-food restaurant, their produce is less expensive and easier to market. There have been supermarkets in the USA since the 1930s, and they have now spread through a large part of the world.

\(^{1}\) always made of beef; also called “beefburger”
\(^{2}\) take away
\(^{3}\) rubbish bin
\(^{4}\) bill, \(^{5}\) tinned
A Vocabulary

1. If you do something, see something, drink something stimulating, what effect does it have on you?
2. What happens to someone who consumes too much alcohol?
3. A connoisseur knows, or claims to know... Complete the sentence.
4. Are French fries animal, vegetable or mineral? What are they?
5. What does chain of restaurants mean? What is the ordinary meaning of "chain"?
6. Distinguish between a tip in a restaurant and the "tip" of a finger.
7. Distinguish between no extra charge and a "cavalry charge."

B Questions on "How Americans Eat and Drink"

1. Which of the following are soft drinks: gin, orangeade, wine, beer, cola, lime juice?
2. Why are cola drinks different from any other soft drinks?
3. The girl at the counter asks: "To go?" What does she mean?
4. Where is the menu displayed in a drive-in restaurant?
5. Where, in a fast-food restaurant, do you throw away your leftovers, your knives and forks, etc.?
6. Do you tip waiters and waitresses in your country, and if so, how much?
7. What pleasant custom do the Americans have in their coffee shops and restaurants?

C Function

Giving an order
Convert the following into a dialogue:

You go to the counter and ask what they have. The girl tells you to look at the menu on the wall behind you. You order a hamburger and French fries. The girl asks you whether it's "to go," and you answer, no, to eat in the restaurant. She asks you if you want any-
thing else and you reply that you would like a cup of coffee and a chocolate ice cream, but that you'll come back for them when you've finished your hamburger. She says "O.K." You then ask if you can pay for everything now, and she replies that you can, but that you must come back and get the coffee and ice cream from her personally.

D Are you in favor of "fast food" because it gives people more leisure? Or do you think the whole system of fast food makes people not only lazy, but also unappreciative of good food? Write a 200-word composition on the subject.

Unit 27 Getting Around in the USA

Americans travel by air in much the same way as Europeans and the Japanese travel by train. There are, in fact, not many railroad stations left in the USA, although the track is still being used, since most of America's freight is still carried by train. As for passengers, there is a vast network of airlines and airports in easy reach of almost every American town. Airports, now the travel centers of the USA, are comfortable, hospitable places, with coffee shops and bars and spotlessly clean restrooms.

Flying in America is less expensive than in many countries, because the Federal Government subsidizes air fares. Yet the different airlines are not state-owned and compete with one another for passengers. United, which does not go outside the USA except to Canada or Mexico, is the largest commercial airline in the western world. The airline network is completed by other big companies—Eastern, Western, National, American, Delta, and many smaller lines. Every airline has the same little ritual. At every stop the chief steward or stewardess thanks the alighting passengers warmly for their patronage, and hopes that they will fly with the same airline again.

Meanwhile, the National Railroad Corporation, known as Amtrak (American Travel Track) is trying hard to win back passengers from
The National Park Service of the USA controls more than 77 million acres of land, divided up into 320 park sites of extraordinary variety, the latest covering huge areas of wilderness in Alaska. There are urban or city parks, there are ancient buildings and historic sites, seashore parks, national rivers, and more and more recreation areas where priority is given to the amusement of the public. Finally there are the National Parks themselves, which are visited by millions, but where the priority is conservation. In a country of free enterprise, where business interests are so powerful, these parks play an essential role. It was the conservationists who saved the remaining giant redwood trees and created the National Redwood Park, on the far side of the Golden Gate Bridge which spans the entrance to San Francisco Bay. The lumberjacks were so furious that they marched into the city to protest, shouting "No more parks!" But the environmentalists and conservationists have always been allowed to have their say in the "Land of the Free," and their influence has been greater than in most countries.

The first national park, founded in 1872, was Yellowstone, in the State of Wyoming. Yellowstone has everything which appeals to the romantic, geysers which shoot jets of boiling water 200 feet up into the air, a deep canyon where a rushing river pours over mighty waterfalls. There are snowy mountain peaks, tree-fringed lakes and vast forests, as well as broad water meadows, across which the Yellowstone River glides gently on its way to the canyon. On these meadows bison, elk, moose and deer come to graze in the evening.

American national parks represent one of the finest examples of nature conservation in the world. All the parks are kept as "natural" as possible. In the Far West, lumbermen devastated whole forests. But no tree-felling is allowed in the parks. When a tree falls, it is left to rot and enrich the soil, and so encourage young trees to grow. Even natural forest fires, those not started by man, are allowed, in many parks, to burn themselves out.

Animals learned years ago that man was not their enemy in the national parks. Many of them became so tame that they were a nuisance, and sometimes even a danger. Bears, in particular, lined the roads and begged for food. They were so comical that people stopped to feed them, thus breaking one of the strictest rules of the

1 something to which attention is given before anything else
2 men who cut down trees to sell them
America's National Parks

parks. This was not nature conservation! Cookies¹ and candy² are not part of a bear's normal diet! There were also some unfortunate accidents, for even the fairly mild black bear cannot tell where the cookie ends and the hand begins. In Yellowstone, the bears have been taken miles away into the wilderness, but in a few other parks they are still a nuisance.

The national parks are run by the National Park Ranger Service. The Rangers are men and women with special qualities, for they are not only conservationists. They also have to look after the visitors. They act as guides, and must be ready to answer quite learned questions on the plants, animals and geology of the parks. In addition they are trained policemen and policewomen qualified to use guns, though they keep these weapons out of sight in their cars, not wishing to spoil their friendly image with the public.

Rangers must be ready to deal with emergencies of all kinds. They frequently have to rescue inexperienced climbers stuck half way up a mountain rock face. Then there are some backpackers, who in midsummer walk with their packs on their backs to the bottom of the Grand Canyon without enough water, regardless of the warning that the temperature is many degrees higher on the floor of the canyon, one mile down, than it is on the rim.

The national parks make few concessions to tourists. Visitors are warned of the dangers, but they are expected to look after themselves and be self-reliant. There is no cable car to the floor of the Grand Canyon, and no motor road. The only way of getting to the bottom is to follow a rough track down the precipices on a mule or on foot. The shortest trail is seven miles long.

In the mountains and forests of the northwestern States there is one animal that is especially to be feared, the brown, or grizzly, bear. It is the largest and most ferocious carnivore (flesh eater) in the world and will attack humans on sight. Grizzlies are now rare, but there are more than 250 of them in Yellowstone. There are warnings everywhere, about leaving food uncovered in tents at night, about what to do if you suddenly meet a grizzly on a lonely trail. The grizzly is a protected animal, and if the Rangers have to shoot one, they use tranquillizing darts instead of bullets whenever possible. There are about 100 grizzly incidents a year, a few of which are fatal. Not many when one considers that 2½ million people visit Yellowstone each year.

¹ sweet biscuits ² sweets
One of the biggest problems for the conservationists is preserving the parks from the footsteps of the countless millions of visitors. Until recently, campers would line up along the valley floor for places in the campsites at Yosemite, which is about 375 miles east of San Francisco. Now they must make their reservations months ahead. There are one or two hotels in the bigger parks, and also groups of log cabins. Outside the park boundaries there is a growing rash of motels. But the wilderness in the heart of every park is untouched.

A Vocabulary

Show that you understand the following words by using them in sentences of your own:

tree-fringed conservation geology rot carnivores priority self-reliant make concessions to

B Questions on “America’s National Parks”

1. What is the purpose of the recreation areas?
2. What did the lumberjacks do when they were told that they would no longer be able to cut down the redwoods?
America's National Parks

What has priority in the national parks?
The forests in the national parks often look very untidy. Why?
The parks make few concessions to tourists. Give examples to show that this is true.
Why is the grizzly bear so dangerous?
Why don’t the Rangers exterminate it?
Why isn’t it necessary for campers to line up for campsites in Yosemite any more?

C Grammar

In the piece below, each construction is to be found in the text. Insert a suitable verb, adjective or noun in the gaps, being careful to use the right past tense.

Dan Murphy ... to take a photo of a bison. He ... to find one in a meadow near the road, and he did. He ... his car to have a look. Then he got out of his car and ... the bison to take a photo. Dan knew that visitors (not) ... to go near the animals, because they are wild. There was a large dead tree that ... to rot. He ... behind the tree to have another look. The bison was asleep. He had to find ... to wake it up, because he ... to take a picture of it standing up. He ... to throw things at it. He ... to wake it up, but the bison went on sleeping. Dan ... to feel annoyed. “How could the animal ... to stand up?” There was only one ... to make it stand up. He went straight up to the bison and gave it a kick. Dan did not ... the bison to stand up so suddenly. He ... to jump away, but he dropped his camera and ... to pick it up. The bison killed Dan.

D Function

Criticism
Make up a dialogue between two Rangers, Pete and Mike, who are discussing the death of Dan. Pete tells Mike what happened. Mike gives his comments:
  stupid blame fault deserve not blame
  disobey instructions
Enjoying the Great Outdoors

Few countries have such a varied and tempting “Outdoors” as the USA. There is every kind of climate except tropical: Arctic in Alaska, Mediterranean in southern California, temperate in the northwest and northeast, subtropical in Florida, desert in Arizona and New Mexico. Death Valley, California, has the most consistently high summer temperature in the world. It sometimes persists at 132°F.

As for the landscape, it is enormously varied and spectacular. In the west there are the Rocky Mountains and the Sierra Nevada, with their snow-capped peaks, and in the east the wild, forest-covered Appalachians, whose highest summit is nearly 7,000 feet. There is an abundance of waterfalls, gentle rivers, lakes that are small and intimate or vast like the Great Lakes. Lake Superior is the largest freshwater lake in the world and the waves which break on its shores are like the waves of the sea. In winter and in spring, campers are tempted by the clear skies and dazzling multi-colored rocks of Arizona, Colorado and New Mexico. Even the bleak splendor of Death Valley attracts many winter visitors.

Everything worth seeing in the USA is accessible to campers,
American football, not to be confused with the football called soccer, is the American national sport. It developed from the British game of rugby and, although it is played in no other country in the world (except Canada), it excites tremendous enthusiasm. Intercollegiate games (games between universities) are great social occasions. More than 100 thousand mothers and fathers, brothers and sisters, students and football fans from the general public, crowd into the huge, luxurious stadiums. During a recent college final in the Rose Bowl at Pasadena, California, there were severe earthquake tremors, but nobody noticed!

Then there is the razzamatazz — the splendidly-trained brass bands, the teams of pretty girls twirling batons and dressed in fancy costumes who march like well-drilled soldiers during the half-time show, the cheerleaders urging the fans to shout encouragement or applaud good play.

The method of scoring in American football is the same as in rugby. Players try to carry the ball over the opponents' line, and then to earn more points by kicking the ball between the upright goal posts above the bar. But that is where the likeness between the two games ends.
Two Kinds of Football

American football has a reputation for being a brutal and dangerous game. This reputation is not really deserved. The players hurl themselves at each other fiercely, but today their uniforms and helmets (fitted with visors to protect their faces) are so skilfully padded that there are few serious injuries. By comparison, the rugby player is almost naked, having only a thin jersey and a pair of shorts to protect him from his opponents' boots and tackling.¹

The football coach is a very important member of the college staff — more important than the professors, some say! The coach picks promising football players from the high schools,² and recommends that they be given scholarships. This is the only way some boys from poor families with no intellectual background can get to college. Quite a few of these students go on to become professional football players. The names of professional football clubs are as well known to Americans as professional soccer clubs are to Europeans and South Americans.

The Americans are addicted to crazes. When they take something up, they do so wholeheartedly, and often the rest of the world follows their lead. Jogging is an example of this. The Americans now have another craze, a game which most other countries call "football," but which they call soccer. Soccer is spreading like wildfire through all the States and gaining in popularity on baseball. It is being run by big business and TV advertisers, who are doing everything they can to sell it to the public. They are employing famous fashion designers to design novel uniforms for the players. They have introduced a musical background to the games, and there is a big screen in the stadium which explains to spectators what is happening. Most important, they have hired, at enormous expense, famous coaches and players from Europe and South America. They have also changed some of the rules, including the offside rules to make the game more exciting.

Soccer games can now draw crowds of over 70 thousand in cities where baseball attracts a mere 20 thousand spectators. The soccer stadiums are much more luxurious than the vast majority of European and South American league grounds. There is a seat for everyone and a parking lot³ for 25 thousand cars. Soccer is being brilliantly promoted, like any other promising American product.

¹ bringing your opponent to the ground, to stop him carrying the ball towards your goal   ² secondary schools  ³ car-park
A Vocabulary

1. What is a social occasion?
2. Name one or two costumes that could be called fancy. Otherwise, define the word.
3. Find another word or phrase for hurl themselves.
4. How does a visor protect an American football player's face?
5. What do you get if you win a scholarship?
6. How would you define the word craze?
7. Say in more simple language, spreading like wildfire.
8. What is the British English for a parking lot?

B Questions on "Two Kinds of Football"

1. In what way is American football different from most other games in the world?
2. In what ways are rugby and American football alike?
3. In what ways do rugby players and American football players look different?
4. Why has American football become much less dangerous in recent years?
5. How can some students from poor homes manage to get to a university?
6. How does big business "sell" soccer to the public?
7. Some American spectators do not know much about soccer. How do they learn what is going on?

C Grammar

There are seven past participles and three present participles in the text which are used as adjectives. Make a list of them and then put them into brief sentences. Put the verb in parentheses at the end of the sentence.

Example: He is an interesting man. (to interest)
She is worried. (to worry)
Unit 17 The Sun Belt

Americans have a craze for the sun, a belief that the sun will cure chronic illnesses, and that where there is sunshine there will be a job — or, if not a job, at least a warm, pleasant place to be unemployed. There will be low electricity bills, and no need to spend much on clothes! There will be the simple luxury of being able to sit on the porch the whole year round in an open-necked shirt or a swimsuit.

The most desirable place in the American sun is the coastline of southern California, for here the climate is Mediterranean. It is rarely too hot and rarely too cold. This being so, the price of apartments and rents, and land for building homes, is beyond the means of the average sun-seeker.

So the sun-seekers moved east across the mountains into the harsh, burning desert, where there is no shade from the sun's heat, which in summer frequently tops 130 degrees Fahrenheit.

The desert in the far south of California, however, is rapidly being converted into a vast suburb that has no city center. Its development has not been planned. Shacks and mobile homes are scattered over many square miles of rock-strewn desert.

The sun-seekers have now moved eastwards again, and about half a million people have colonized large areas of the Sonora Desert in Arizona, destroying much of its lonely beauty with an ugly sprawl of unplanned buildings. The Arizonans have mixed feelings about this invasion. The newcomers have brought money and employment to the little cities of Tucson and Phoenix, but they have ruined the environment. More serious, they are rapidly using up the water which lies under the desert near Tucson. Arizona is consuming its water twice as fast as it is replenishing it. There are settlements in the desert where only the roads have been built, and which will remain empty through lack of water.

The neighboring state of New Mexico is now waiting with dread for the flood of sun-worshippers. New Mexico is proud of its wild mountains and deserts and its two romantic rivers, the Rio Grande and the Rio Pecos. A former governor of the State wrote: "We can no longer afford the luxury of developers who care greatly for the profits of land use but little for the land itself."

To many New Mexicans, California's greatest city, Los Angeles, is the perfect example of what a city should not be. There are more automobiles per head of population in Los Angeles than in any other

1 a prefabricated home transported to a site on a truck and then connected to electricity, water, etc. There are sites outside every city.
American city. Until unleaded gasoline was introduced car fumes were a danger to health and the Los Angeles smog was as famous as London's fog used to be.

Recently, the Albuquerque Journal of New Mexico printed this warning: IN CALIFORNIA THEY INVENTED LOS ANGELES. IT DOESN'T WORK! SO THEY ARE SENDING IT HERE.

Florida is perhaps the most popular state in the Sun Belt. In fact, it calls itself "The Sunshine State." It has a subtropical climate and...
The Sun Belt

is ideal for a winter vacation. From November to March northerners and easterners come in their tens of thousands to lie on the warm, sandy beaches of Miami, Palm Beach and the other resorts along the coast. But Florida is also full of retired people. They have for years been coming to spend their last days in the subtropical sun. Many of them are poor and live in tiny houses or apartments. But they do not have to worry about the dreaded winter cold. They do not have to buy warm clothes. They can live reasonably contented on their pensions.

More and more houses in the Sun Belt use solar energy for their heating. So far, the heat from the sun can only be used in a passive role, that is to say, it can be stored and used for heating the house and the washing water — but it cannot yet be turned into energy for cooking or for lighting. However, experiments are going on in southern Arizona, and scientists hope that before too long it will be possible to feed energy from the sun directly into the national electricity grid. One day America’s sunshine may become one of her greatest assets.

A Vocabulary

1. What is a chronic illness?
2. In what way is the desert harsh?
3. What is the purpose of a mobile home?
4. Why is a sprawl usually ugly?
5. What happens when something is consumed twice as fast as it is replenished?
6. How would you describe, very simply, what solar energy is?
7. Explain the meaning of assets.

B Questions on "The Sun Belt"

1. Why do Americans have this craze for the sun?
2. If you look down from the air on the deserts of southern California, what will you now see?
3. Where do the people who live in the Sonora Desert get their water from?
4. What do the lines about Los Angeles in the *Albuquerque Journal* mean?
5. Explain, too, what the former governor of New Mexico meant in his comment.
6. Why is Florida so suitable for retired old people living on a low income?
7. Why would solar energy help these old people even more?

C. Grammar

Fill in the gaps with a preposition of time, e.g. since, on, for, in.

Jill: I'm sorry you're not well.
Jack: I'm afraid it's chronic.
Jill: How long have you been sick?
Jack: ...last summer ...five months.
Jill: When did you last see the doctor?
Jack: ...May ...May 2nd.

D. Make this passage into a dialogue.

Mr. and Mrs. Leporelli told their Canadian visitor, George Busby, that they loved living in Miami, Florida. George asked them why, and Mrs. Leporelli replied that they did not have to bother about heating or warm clothes. George was surprised that they did not object to the smallness of their house or the cracks in the walls. Mr. Leporelli said that didn't matter. George asked them whether they found it cheaper living in Florida. Mrs. Leporelli replied that it was much cheaper in Florida than in New York. Besides, Mr. Leporelli explained, being now over 60 they got all kinds of help from the Government, including Medicare (free hospital treatment, doctors, drugs, etc.).

E. Would you like to be one of those who go to the desert in search of the sun? If so, would you like having other people around you, or would you try and avoid them? Would you consider the environment? Give your views in a class discussion.
Women played a vital part in the conquest and settlement of the West. They often endured hardship and danger with courage and fortitude. They acted as a steadying force in the Western cow towns which were not as romantic as Western movies make out. Liquor, gambling, the dancing girls in the local saloon were about the only entertainment available in the crude little townships. Wives frequently lost their husbands and sons in drunken brawls, family feuds, in fights with Indians or cattle rustlers.¹

American women at work — landing of the Pilgrim Fathers at Cape Cod, 1620

Western states were the first to give women the vote. Between 1869 and the outbreak of World War I, seventeen states west of the Mississippi gave women the right to vote in state elections for Governors and Representatives. It was not until 1920 that the Federal Government, under pressure by suffragettes (women insisting on their right to vote), followed the states’ lead and permitted women to take part in national elections for Congressmen and the President.

Women have made great strides since then in achieving political equality. Recently, American feminists have been working hard to achieve social and economic equality as well as political. Their belief is that, as there is nothing that women cannot do just as well as men, they should be shown the same respect and have the same social rights and the same pay as their male counterparts. Anything less is discrimination and sexism.

Few American girls agree with the extreme feminists who deride marriage and romantic love, but more and more of them are prepared to live with a man ‘outside marriage, often with the intention of buying a home and marrying only when, between them, they have

¹ cattle thieves
American women on the march in New York, 1970s

saved enough money. Young couples today share both the household chores and care of the baby.

The older generations, especially those that live in the city suburbs, are bewildered and disturbed by this trend. It is all against the great American tradition of the "home" as the symbol of the unified family.

The American woman makes the most of her free time. She helps with political campaigns. She sits on committees. She goes to classes of all kinds, from health foods to English literature, from environmental studies to karate. She swims, plays tennis, and she takes an active interest in her children's education. In most of these activities her companions are other housewives from her neighborhood.

The American Women's Liberation Movement has been influential enough to help elect women to several State Governorships, the mayoralities of large cities like Chicago, and the US Congress, as well as to insist upon women in the President's Cabinet. But no woman has been elected either to the Presidency or Vice Presidency. Indeed, they have not even been nominated by either major political party, despite the examples of women abroad reaching the highest offices in Britain, India and Norway where they have been elected Prime Ministers.

There are women executives of some important industries and businesses. In fact there are women in most jobs which were formerly reserved for men. There are women lawyers, doctors, architects, as well as women bus drivers, but the ordinary working woman still earns less than a man gets for doing the same job — although there is a law which makes this illegal. American girls tend to marry young, which means that 60% of the women in work are married.
American Women

This also helps to explain why so many young married couples have such a high standard of living.

American women seem to have more self-confidence than women from most other countries. For years they have felt no inferiority whatsoever to the male sex. Therefore visitors to the USA rarely meet militant feminists.

A. Questions on “American Women”

1. How was it that women in the Far West became so tough and dependable?
2. Explain how cattle rustlers earned their living.
3. How many states west of the Mississippi can you name?
4. Many American housewives believe in educating themselves. How do they set about it?
5. In what ways have American women achieved equality with men, and yet why do they still have good reason to complain?
6. Which attitudes of American feminine liberationists do you consider “extreme”?

B. Grammar

1. With which of the following words could you use these adverbs:
   a. very and fairly
   b. almost and absolutely?
   perfect impossible tired big unique exhausted full
   angry improbable unlikely new old romantic imperfect
   heavy beautiful pretty
2. With which of the following adjectives could you use:
   a. terribly completely astonishingly
   wonderful nice clever great bad poor strong-minded
   outstanding perfect available old brave hot satisfied
   enjoyable

C. List those jobs you feel women do better than men; those jobs men do better than women; those both do equally well:
When will it come again? Will it ever come? These are the big question marks hanging over the city of San Francisco, for San Francisco lies on a fault, or crack, in the Earth's surface which stretches right down the Pacific coast of America and has already produced one devastating earthquake. In 1906 a mighty tremor flattened the whole of downtown San Francisco, cutting the gas pipes and starting a fire which destroyed all that remained of the wooden buildings. When it was all over, more than 600 people lay dead among the burnt-out ruins, crushed or burned to death.

The San Franciscans courageously rebuilt their city and turned it into one of the most desirable places in the whole of the USA. Experts say that another quake is inevitable, and that it may be more disastrous than the quake of 1906. Yet since the devastation of 1906, the population has grown to over 700 thousand with the highest proportion of Americans of Oriental ancestry in the continental United States.

One part of the city, the hill overlooking the sea and the harbor entrance, survived the earthquake. It is crowned by the beautiful Golden Gate Park. The ancient cable cars, built more than a century ago, wind their way up the hills and through the greenery of the park.
ago by a Scottish born American, still climb, packed with tourists, up and down the steep streets with their gaily-painted 19th-century houses, a reminder of the days when the San Franciscans made fortunes out of the gold miners of the '49 Gold Rush.

After World War II, many San Franciscans left the old city houses and moved to the suburbs, not because they were afraid of earthquakes, but because there was a trend for living in the suburbs. Many of the old painted houses were taken over by poor people or hippies who failed to keep them in good condition. The paint peeled off the wooden facades. The bright colors faded. They began to lose their charm. Now the trend for suburban living is being reversed. Well-off people are buying and restoring many of these historic houses and are moving back into the city.

Fear of an earthquake does not seem to worry San Franciscans too much, though they are sensitive to the shaking or trembling of the buildings in which they live and work. Heavy trucks going by sometimes produce a false alarm. But most people are fatalistic. If it comes, it comes! The tall modern buildings are constructed of brick and concrete, which means that in a severe earthquake many more people would be crushed than in 1906. One of the latest skyscrapers, the Pyramid, has been built on stilts and this, it is claimed, makes it earthquake-proof.

In the 1930s, long before the Europeans had constructed suspension bridges on such a huge scale, the Americans spanned the Golden Gate, the entrance to San Francisco harbor, with a mighty suspension bridge. It was in those days by far the largest suspension bridge in the world, and is still one of the most beautiful. They also joined San Francisco to Oakland, across the Bay, by building a bridge 4½ miles long. The two parts of this bridge meet on a small island, through which a connecting tunnel has been bored. San Francisco's bridges are a fine example of the adventurous and self-confident expertise of American engineers, an example of the Frontier Spirit which still lives on in many Americans.

San Francisco has a mild climate, spoiled only by the summer sea fogs which creep over the city in the afternoon, causing unsuspecting tourists to shiver in their cotton shirts and dresses. It is no longer quite the American's dream city. It has lost some of its sparkle. The

1 young drop-outs from society who prefer an unconventional life style
2 bright colours
famous waterfront with its Italian seafood restaurants has surrendered to property tycoons, who have replaced the intimate little eating places with expensive modern restaurants and motels. But many people still regard San Francisco as a paradise, and it still heads the list of most tourists' itineraries.

A Vocabulary

1. What sort of fault affects San Francisco?
2. What did the ground do during the earthquake to cause a mighty tremor?
3. What is a false alarm?
4. What is the difference between San Francisco cable cars and street cars?
5. What are your feelings if you are fatalistic?
6. What do you make if you bore through something?
7. What distinguishes a tycoon from an ordinary businessman?

B Questions on "San Francisco"

1. What caused most of the deaths in the San Francisco earthquake?
2. How did the San Franciscans show their courage and their determination?
3. What sort of population does San Francisco have?
4. How did the early inhabitants of San Francisco grow rich?
5. Did the San Franciscans start moving from the center of the city through fear of another earthquake?
6. The city lies on a peninsula. What did the San Franciscans do to make themselves less isolated, or cut off?
7. What makes San Francisco less attractive than it used to be?

C Grammar

Turn the following sentences into the same tense in the passive.

1. A mighty tremor flattened the whole of downtown San Francisco. It cut the gas pipes and started a raging fire. It destroyed the wooden houses.
Teenage Americans are friendly and uninhibited with visitors. There seems to be no generation gap. This is, in part, due to the way they have been brought up at school and in the home. Discipline, so important in the schools and homes of some countries, is given much less emphasis than self-discipline in American schools and homes. Americans of all ages tend to question orders, if they are doubtful about them. It is not in their nature to obey blindly, and if there is a crisis and there is no one to tell them what to do, they use their own initiative.

Americans are encouraged to be independent at school. It is a tradition dating back to the 18th century when American pioneers pushed the frontier further and further west, upheld by their courage, their initiative and their faith in God. Young Americans are expected to discuss and even argue in the home.

Education has a very honored place in American society and, with some exceptions among the wealthy, parents of every kind of background and of all income groups send their children to the local high school. It is an article of faith in the American Dream that a good education will enable a child to achieve a higher standard of living than his or her parents. High schools are public schools in the proper sense of the word (not to be confused with English “public schools,” which are private, elitist and very expensive).

1 honored
2 belonging to a very small and privileged section of the community
Growing up—at Home and at School

American high schools, junior and senior, have a good reputation. They take their responsibilities very seriously — and not only in the classroom. They have guidance counselors to whom children can go privately if they have any special problems, especially about their caregivers. Parents are encouraged to share in the school life of their children. In some lower grade classes they actually go into the class during a lesson and help the teachers with plays and class reading, and most schools have highly successful Parent-Teacher Associations. Teachers and parents get together and discuss their children’s problems. John has made no progress at all during the last term, because, the teacher suspects, he is in love with a girl in the same class who has rejected him, whereas Gail seems to be just plain lazy. The parents claim that she has no self-confidence and this makes her appear bored! Between them, parents, and teacher work out a plan of action.

There are some schools in the ghetto districts of big cities where the classroom can be a nightmare, both for the teachers and for the majority of pupils who want to learn. The worst of these schools have been nicknamed “blackboard jungles.” In order to overcome these acute problems, “busing,” in which mainly black and Hispanic children are taken by bus to white schools and whites taken to black and Hispanic schools, is employed. Many blacks and Hispanics claim busing has been successful; many whites deny that it has. In many States, compulsory busing has been halted because of white resistance. Where it can not be halted, a number of white parents are removing their children from school and sending them to private schools, even if the educational standards are low. There are only a few really good private schools in the USA. It is against the spirit of American democracy to have special schools for the privileged few. White opponents of busing maintain that their white children in predominantly black schools suffer from racial prejudice, just as black minorities suffer in predominantly white schools. Arguments between advocates and opponents of busing often generate more heat than light, but the general impression is that relations at “mixed” schools are steadily improving and there are many lasting friendships formed between whites and black and Hispanic children.

Choosing and preparing for a career are of extreme importance to American teenagers. There are now special high schools which train boys and girls for jobs — secretaries, mechanics, computer specialists,
Growing up—at Home and at School

Accountants. Businessmen take an interest in such schools and encourage the teaching of salesmanship and business techniques. The fear of young people today is to grow up and find no job waiting for them, so they need no encouragement to work hard at school.

According to the media, especially TV, American teenagers are crazy about pop music, carry transistors around with them everywhere, and spend most evenings in a discotheque. Of course, many do. The same media also suggest that young Americans are very emotional about pop idols and about their own love affairs, and like to analyze their feelings and discuss them with one another. Americans are not usually inhibited and do not mind discussing their emotions.

Young people mature early in the USA. It is not always easy to tell a girl of fourteen from a girl of eighteen. Girls of ten have dates with boys. Some states allow teenagers as young as fourteen to drive provided they have completed a driver’s education course at school and have passed the usual driver’s test. Parents buy the car, but the children are expected to run it. So they often earn the money by taking an evening job after school or in the vacations.

It is impossible to generalize about young Americans. There are those who are frivolous and promiscuous, or who alienate the affections of their parents. But there are also those about whom one hears little, those who live in well-integrated homes, and who take their responsibilities as US and world citizens very seriously.

A Vocabulary

1. If you want to put *emphasis* on a word when talking, what do you do?
2. Who would be the *elitists* in a society?
3. What do *counselors* try and give to students who go to see them?
4. How would you feel if your boy/girlfriend *rejected* you?
5. What does an *accountant* deal with every working day of his life?
6. If, or when, you are *emotional*, how do you behave?
7. Explain the phrase *pocket money*.

1. radio, TV, newspapers, magazines
B Questions on "Growing up at Home and at School"

1. What character traits do some American parents consider essential in the bringing up of their children?
2. What sort of relationship do the average American parents have with their children's schools?
3. Some parents play an active part in the school life of their children. How?
4. What is the purpose of busing?
5. Why do some parents object to busing?
6. The media do not always give a very flattering picture of American youth. What sort of picture do they often give?
7. How do American teenagers often get the money to run their own cars?
8. How do American and British "public" schools differ?

C Grammar

1. Link the phrases in the left-hand column with suitable nouns, and phrases in the right-hand column by choosing the most suitable preposition in the center column. If you feel that more than one phrase in the right-hand column is suitable, put your alternatives in parentheses after your main choice.

<table>
<thead>
<tr>
<th>He has a plan</th>
<th>There is a friendship</th>
<th>They are crazy.</th>
<th>We're doubtful</th>
<th>We're satisfied</th>
<th>They are opponents</th>
<th>He has no interest</th>
<th>He's in love</th>
<th>She has faith</th>
<th>The school has a high standard</th>
<th>There is a controversy</th>
</tr>
</thead>
<tbody>
<tr>

<td>our children's school</td>
<td>action</td>
</tr>
</tbody>
</table>

2. Make up your own sentences this time, using as "link preposition":

by for without at on
Amusement Resort — Disney World, Orlando, Florida.
Fleet of cabs (taxis) — Yellow Cabs, New York City.
Airline Fleet (non-Communist) — United Airlines.
Medical Center — Chicago.
Fountain — at Fountain Hills, Arizona: the fountain rises to 560 feet.

The Busiest
Airport — O'Hare Airport, Chicago: 2,000 takeoffs and landings a day, 44 million passengers a year.

The Most Expensive
Hotel — Astroworld, Houston, Texas: suite on ninth floor costs $2,500 a day.
We Have the Biggest!

The Top-Selling Soft Drink

Coca Cola (Headquarters, Atlanta, Georgia) — 165 million Cokes are drunk every day in 130 different countries.

Americans are also proud of their natural wonders. They have the largest, the tallest and the oldest trees in the world. The most massive tree is one of the Californian "big trees," a Sequoia called "General Sherman." It is the largest living thing on earth, and has enough timber in it to make 5 billion matches. The Americans also have the mightiest canyon on earth, the Grand Canyon, which is a mile deep, and they share with Canada the world's greatest freshwater lake, Lake Superior, and the world's mightiest waterfall, Niagara. And they themselves have become one of the mightiest nations the world has ever known. It is not surprising that the Americans "think big."

A Vocabulary

1. What do you say when you boast about your car or your house?
2. What happens to something when you spin it?
3. How does sewage reach sewage works, and where does it come from?
4. What part does water play in a hydroelectric dam?
5. Why is a suite in a hotel more expensive than a room?

B Questions on "We Have the Biggest!"

1. Where is the Peachtree Plaza Hotel, and in what State is the city?
2. In what region of the USA is Pontchartrain Bridge?
3. How many couples with cars could the owner of Biltmore House invite, assuming that he had six cars of his own?
4. What goes on inside the Superdome in New Orleans?
5. If you spent your honeymoon in the suite on the ninth floor of the Astroworld Hotel, Houston, and you stayed there a week, what is the least amount you would have to pay when you left?
We Have the Biggest!

C Grammar

Substitute one of the phrases below for the phrase in italics in the following sentences:

Who else how else what else when else where else
why else somewhere else someone/somebody else
anything else nothing else nobody/no one else

1 For what other reason would he not want to boast?
2 At what other hotel could she have stayed?
3 In what other way can I make you realize how tall it is?
4 I begged her to do her gambling in some other place.
5 What other man would stay in the Peachtree Plaza Hotel?
6 At what other time do you think you'll be able to play at the Superdome?
7 Only you can drive me to the airport. There's no other person here.
8 There's not another thing we can do.
9 Can you think of any other thing we could do?
10 No, that's the only thing we can do.
11 Can you think of another person we could try?

D Function

Great praise and strong criticism
What is your opinion on:

- television
- gambling
- skyscrapers
- sewage plants
- atomic plants
- your doctor
- your boyfriend/girlfriend
- amusement resorts

Adjectives you could use for praise:

- marvelous
- terrific
- exciting
- exceptional
- wonderful
- extremely efficient
- absolutely essential
- tremendous

Adjectives you could use for criticism:

- awful
- dreadful
- terrible
- appalling
- ghastly
- foul
- hideous
- revolting
- unattractive
- complete waste of time

E Write a letter about a person you have met who boasts about his country. You are irritated, but also rather amused.

The Hollywood Bowl in Los Angeles, a huge outdoor amphitheatre where 250,000 people go to hear music each summer.
Imagine living back in Ancient China and being someone who has a new discovery. How would you get the word out? That is the challenge of the team project you are about to begin.

For this dramatic activity we will have all things as they were in Ancient China except you will imagine one difference. That will be to pretend that they had television on all their farms as well as in their villages and cities. So being, you and your fellow team members are to create a presentation for the "Amazing Discovery Show" being presented on our very own KCHN Television Network.

The two main goals of your team are to present:

A. What the invention or discovery is and
B. Tell how it will advance civilization.

Your team presentation is to include the following:

1. A map showing the civilization and its location.
2. A timeline noting the place in time.
3. Backdrops and props.
4. A model of the invention or discovery.
5. Costumes
6. A dramatic presentation is to be given which can be done in one of the following formats.
   a. T.V. News report or interview
   b. T.V. Commercial
   c. Skit recreating life in the time period.
7. Music should be included. This can range from providing background music to including a song or rap at some in your presentation.
Organize your group by assigning team members to the following roles:

- **EMPEROR:** The group leader and organizer.
- **CIVIL SERVANT:** Keeps team records.
- **GENERAL:** Maintains order and discipline.
- **PHILOSOPHER:** Maintains the team spirit.
- **FARMERS/CRAFTSMEN/MERCHANTS:** Workers on the team.

**Team Responsibility Check List**

Log in who will be responsible for completing each of the following tasks. It will be that more than one person is working on one duty in some cases.

<table>

LIST OF SUGGESTED INVENTIONS AND DISCOVERIES

Use the following list to guide you to a team decision on the invention or discovery that will be the subject of your presentation.

The following are not listed in any order of significance.

Irrigation
Rice
Writing
Pottery
Metal (Gold, Bronze and Iron)
Jewelry/Fashion
Architecture
Silk/Weaving
Domesticated Animals
Salt Mining
Measuring and Calculating
Laws
Cities
Silk Road/Trade
Ships
Theater/Acrobatics
Musical Instruments
Astronomy
Money
Martial Arts
Gun Powder
Compass
Earth Quake Detector
Herbal Medicine
Civil Service
Philosophy
Religion
Fishing Reel
Matches
Rudder
Acupuncture
Horoscope
Lacquer Ware
Print Books
Chariot
Paper

Note: You are not limited to this list. Check with your teacher if you have an invention or discovery that is not listed above. Also, you may do a few things together that are related. For example, you could do herbal medicine and acupuncture together.

Topic Selected _______________________________ Teacher Approval _____
First Civilisation in China

Civilisation in China began near the Yellow River. Here, the Shang kings ruled for about 500 years, until a war-like people called the Chou conquered them in 1057BC.

The first farmers of northern China grew millet and kept cattle and pigs. They probably lived in pit houses dug out of the ground.

Writing

Some of the characters carved on the bone.

The earliest form of Chinese writing is found cut into animal bones. These were used for taking messages which were thought to come from the gods.

A Chou noble drives away from the king’s palace in his war chariot. The chariot had no seat, just a platform to stand on.

Recently the Chinese opened the tombs of the Shang kings near Anyang. They found the skeletons of horses and charioteers with their chariots.

The Shang king thought his ancestors were gods. He offered them meat and wine in bronze vessels like this one. Many Chinese still honour their ancestors today.

Jade ornaments like this animal were sewn to the dead person’s clothes. Objects like this ornamental dagger were put in the graves of nobles and rich people.
Great Civilisation in the East

Until 221 BC, China was divided into several rival states. Then, the king of a state called Ch'in defeated them all and became the First Emperor of all China. "Shih Huang Ti", as he was called, was the first of a family line of emperors (a dynasty) called the Ch'in emperors.

Later, a new dynasty of emperors—the Han emperors—ruled China. During their time, General Chang Chien was sent to the West to find allies. As a result of his travels, a new trade route, called the Silk Road, was opened up.

Key dates

551/479BC The great thinker Confucius.
483/221BC Period of the warring states.
221BC China unified under Shih Huang Ti, the first emperor. Great Wall built. Beginning of Ch'in Dynasty. Standard bronze coins introduced.
206BC/AD220 Han Dynasty.

*These dates are approximate

When the people of China were counted in AD2, there were about 60 million. Most were peasants who grew rice, their most important crop, on specially built terraces.

How we know

We can learn a great deal about life at the time of the Han emperors from the pottery models placed in tombs. This is a simple one-storey peasant's cottage a peasant might live in.

The great lords had huge tombs built for themselves for a comfortable life-after-death. This princess's body was covered with jade, which was thought to preserve it.

The emperor was the supreme lord. He controlled the salt wells, which were vital to people far from the sea. Bamboo tubes were drilled down 400 metres into the brine.

General Chang Chien brought back a new breed of horses from the West. The big, strong horses were very useful against the small ponies ridden by the barbarians.

In troubled times, even a farm needed towers to watch for barbarians or soldiers. A rich lord had models of servants and soldiers in his tomb to impress the gods.
The Great Wall

The Great Wall of China was built by Shih Huang Ti when he became emperor. He joined together short sections of wall put up by earlier warlords to keep raiding tribes out of their lands. The wall still stands and is 2,710km long.

Beacons on the watch towers signal the approach of an enemy.

The Chinese made and sold fine silk. They kept silk worms (caterpillars of the silk moth), which spin cocoons of fine silk thread. They dyed and wove this silk into cloth.

Patterns of plants and animals were woven into the silk. This lion pattern may have been borrowed from Persia, which shows ideas as well as goods were taken along the Silk Road.

Money

Silk was so valuable it could be used for payment. Bronze coins in strange shapes were also used. Later, round coins with square holes became the standard money.
Silk and Spice Traders

In AD589 a new dynasty (family line) of emperors, called the Sui, began to rule China. They brought peace to the country after a time of long and difficult wars between rival Chinese groups. Civil servants helped the Emperor to rule. They had to take exams before they were given jobs in government. In the countryside, the nobles, who owned most of the land, gradually became more powerful.

A trading city in China

Chinese inventions
The Chinese were the inventors of several things that were unknown to the rest of the world at this time.

They discovered how to make porcelain, a very hard, fine type of china. At this time, the Chinese were using compasses to find their way across land and sea. This one is made of lacquered wood. By the 10th century they were using wooden blocks to print books. This is probably the oldest printed page in the world.

Buddhism had spread from India in the first century AD and was very popular. But many people still believed in the teachings of Confucius and the Taoist religion. At times Buddhists were persecuted.

Some merchants travelled by sea to Africa and the Middle East.

Gunpowder was first used for fireworks. By the 13th century the Chinese were also using it for bombs and other weapons.
Chinese craftsmen were very skilful. At the time, the T'ang family were emperors (AD618/906) they made especially fine pottery figures of animals and servants. These were placed in tombs.

In AD1279 the Mongols, led by the great Kubilai Khan, overran China, which they then ruled for nearly 100 years.

Silk, porcelain (fine china) and carved jade were taken to the west and traded for silver and gold. Many cities grew rich because of this trade.

Many foreign merchants, especially Arabs, came to China to trade. Later, a few adventurous Europeans arrived. Two of the European merchants who visited China were the brothers, Niccolo and Maffeo Polo, from Venice. On their second visit they took Maffeo's young son, Marco. Here they are meeting Kubilai Khan, the Mongol emperor of China.

Marco Polo travelled around Kubilai Khan's empire for nearly 17 years. When he returned home, he wrote a book about his travels. This is the first age of his book.
Between 1644 and 1912, China was ruled by the Ch'ing (also called the Manchu) Emperors. One of the greatest was Ch'ien Lung (1736-95), shown here. The Ch'ing emperors fought many wars to protect their frontiers, win more territory and put down rebellions. At first they were successful but the wars were very expensive and later emperors found it more and more difficult to pay for them. The country slowly became weaker.

The Chinese population was growing quickly but farming methods were still very old-fashioned. It was difficult to grow enough food for everyone.

The Chinese Government did not like foreigners and allowed them to trade only in certain areas. The British were keen to extend these areas and in 1839 they went to war. The British won the war in 1842. They forced the Chinese to sign a treaty which gave them Hong Kong and allowed them to trade in certain other ports.

Some Chinese decided to strengthen China by adopting certain Western ideas and inventions, such as railways, and steamships. But many still hated foreign ideas.

People who hated foreigners formed a secret society called the "Boxers". In 1900 they started attacking all the foreigners they could find in China. Here they are storming a foreign embassy.

This is the Empress Tzu Hsi. From 1862 to 1908 she ruled China, first for her son, then for her nephew. She often plotted with those who hated foreigners.

In 1911 there was a revolution and the last Ch'ing Emperor was expelled from China. This is Sun Yat-sen the first President of China.
THE HISTORY OF CHINA

READINGS FROM THE USBORNE BOOK OF WORLD HISTORY

"A picture is worth a thousand words." Ancient Chinese Proverb

Study both the pictures and words to bring the story of the China of long ago into the theater of your mind.

CHINA 1500 B.C. to 500 B.C. Read page 62.

1. Find the Yellow River on the map on page 62. Trace it with your finger. That is where civilization began in China. Tell why you think people settled along the river.

2. Study the farm scene on page 62. List some of the first things raised by ancient Chinese farmers.

3. Study the ancient Chinese writing. How do you think it may be similar to modern Chinese writing.

4. Sketch and label some artifacts that were found that indicate the wealth developed in the Shang dynasty.

CHINA 500 B.C. to A.D. 220 Read pages 74-77.

5. Shi Huang Ti is known as the First Emperor. He united the many states of China into one country called Ch'in. How do you think China gets its name?

Actually the Chinese today call their country Zhong Guo, or "Middle Kingdom." Of what do you think they believe they are at the center?
6. The Han Emperors ruled after the Ch'in. Describe the role the Silk Road played in opening up trade with the west.

7. Study and sketch the clay figures found in the Han emperor tombs. Label them.

What do they tell us about the Han?

8. Emperor Shi Huang Ti is responsible for building the Great Wall of China. It was 2710 km. long. It is the only man made object that can be seen from the moon. Why was such an amazing wall built?

Sketch it.

9. Study their coins shown on page 75. How are they different from ours?

10. Describe how the following inventions and innovations of the Chinese improved life.

   Civil service:
   Paper:
   Compass:

11. Kung Fu Tse is known to us as Confucius. What are some of his teachings about...

   the role of the emperor:
   the peoples relationship to the emperor:
19. The Chinese did not like foreigners. The war against the British in 1842 was lost. As a result the British got control of the trading colony today known as __________, which is due to return to China’s control in 1996.

20. In 1911 Sun Yat-sen led a revolution that overthrew the last Ch’ing Emperor. He became the first __________ of China.

Note: In 1949 Mao Zedong led the Communists to power by defeating the Nationalists in a bloody revolution. Today the Communists rule The People’s Republic of __________.
12. Study the city scene on page 77. List some things you see that are similar to the following list of our life.

- Taxi cab
- School
- Grocery store

13. Imagine you are a trader in the "trading city" scene. I come up to you. You try to sell me something. What is special about your Chinese good? Convince me to buy it.

14. Buddhism is a popular religion in China today. How did it get to China?

15. Kublai Khan is the great Mongol ruler who conquered China leading to a 100 year period of Mongol. It was during that time an Italian merchant named Marco Polo came to China. After seventeen years in China he returned to Europe. Why do you think his book made people want to travel to China?

16. The palace of the emperor was known as the "Forbidden City." Why did it have that name?

17. Describe traditional Chinese medicine. It is still practiced in the same way both in China and even the United States!

18. Portuguese and Spanish traders introduced a new crop to China. That crop, in the corn family, is called ______.
THE CHINESE WOMAN: PAST AND PRESENT

FULBRIGHT SUMMER SEMINAR

1994

BY JEAN WOLLAM

WOMEN IN CHINESE HISTORY

"A WOMAN IS NOT THE MOON; SHE NEEDN'T DEPEND ON THE LIGHT OF OTHERS TO SHINE."
Bai Fengxi

OBJECTIVES:

1. To provide traditional and modern examples of the roles of Chinese women.

2. To provide examples of Chinese women who have achieved in a variety of fields and who can serve as role models for women and men.

3. To identify some of the personal characteristics of women that lead to personal success and contributions to society.
THE BANPO SITE

handout

The following information was obtained from a guidebook entitled Banpo Site--A well-preserved Site of a Neolithic Village. This was purchased on site after a tour of this archaeological dig in Xian.

Define:

1. Matriarchal:

2. Patriarchal:

3. Matrilineal:

4. Neolithic:

I Discovery and Excavation

The Banpo Site was found in the spring of 1953. Archaeologists were interested in it because of its unique cultural characteristics. Archaeologists were not disappointed over the five excavations from 1954 to 1957 which resulted in the discovery of the remains of more than 40 houses, over 200 graves, and nearly 10,000 tools and utensils.

I Research and Discussion

Facing the remains of this prehistorical village, different people are for different opinions. Most of the archaeologists agree that this is the ruins of a matriarchal clan commune village in Neolithic Age. The conclusion is made on the following bases: (1) Judging from the quantity as well as the quality and type of the farming tools found at the site, agriculture at that time was in the stage of the development of hoe farming. And generally speaking, hoe farming is just the basic and decisive factor on which matriarchal clan society was based; (2) Women mainly did farming labour during this period of time, so they played an important role in economy; (3) Marital formation suited to this farming economy is the antithesis family. And the pedigree was only reckoned according to the mother's side. We can see it clearly from the tombs (see page 38), and also from the structure and arrangement of the houses. However, a few archaeologists do not think so. They have the opposite opinion that the time in which Banpo people lived belongs to the patriarchal clan society. In fact, this controversy does not harm in any way the deepening study and research on Banpo site. On the contrary, it helps the research.
The painting, carefully drawn on the bases of archeological materials, vividly reflects scenes of productive labour under the matriarchy. On the left part of the picture, some members of the clan are chopping trees with their stone axes, others are carrying the chopped wood away. In the distance, people are burning the hazels to clear the land on which primitive farming will begin. Further away, smoke is curling upward from kitchen chimneys in Banpo village, while Zhongnan Mountains dimly standing in the background. At the near sight, several clan heads are at discussion. And on the right a healthy looking girl, with a pointed-bottomed bottle in hand, is just heading home with unhurried steps from fetching water in Chan River.
Generally speaking, matriarchy is believed to be established on such economic bases. Women invented farming and were engaged in it at first. Banpo people were just living at this stage. The picture above shows a jar for millet in which is stored the hope for next spring—seeds. The discovery of seeds is evidence enough to prove that China is one of the countries in the world where farming first developed. The picture on the left shows a jar for vegetable seeds. We draw special attention to it because it was in this little jar that we found the origin of the vegetations which once nourished our ancestors.
The size and the arrangement of the houses also tell us much about the organizational structure of the society at that time. The big house at the centre was the public place for activities of the whole clan, and the small houses around it were the dwelling places for members of the clan. Each house might belong to an antithetical family that was made up of a mother, her young children, and her husband from another clan. Such unstable antithetical family with no economic links between wife and husband was characteristic of the matriarchal clan society. In such a marriage system, women occupy an important place in the family while men were quite subordinate.

A picture of the reconstruction of Banpo site.
BANPO SITE
Discussion Questions

1. What support do Chinese anthropologists and archaeologists give for the Banpo community being matriarchal?

2. What support do others give for the community being patriarchal?

3. Research briefly the following Native American tribes and discuss whether they are considered matriarchal, matrilineal, or patriarchal:
   a. Iroquois
   b. Navajo
   c. Hopi

4. For interested students: Have students interview an anthropologist at a local college or university. Are there any matriarchal cultures in existence in the world today?

5. Why would it be important to recognize that matriarchal cultures have existed?
TRADITIONAL ROLES OF CHINESE WOMEN

HANDOUT

IDEAL WOMANHOOD

The well-known Chinese classic Admonition to Women, written by Pan Ch'ao about 100 A.D., discussed humility, reverence, and submission as proper characteristics of women. In addition, "tenderness and fraility were desirable traits." This book, which was widely read throughout China for thousands of years, offered this advice to young women: "A wife should be in a passive position for her husband. To argue with him was improper; she should quietly discuss and rationalize with him, even if he were wrong." Another widely known statement, attributed to Confucius, was "The woman with no talent is the one who has merit."

The characteristics of jealousy, conniving, cunning, and gossip were attributed to women. Women were considered the cause of disorder and confusion in the home and society if they were not carefully controlled and trained. This poem illustrated the negative characteristics attributed to women:

A woman with a long tongue
Is like a stepping stone to disorder
Disorder does not come down from heaven;
It is produced by the woman.

Book of Poetry, Ode X
Translated by James Legge

SECLUSION AND SEGREGATION

At the age of seven, boys and girls were separated. They were not allowed to play, sit, or eat together. At age ten young girls were secluded in the women's quarters and not allowed to leave the house. When a young woman's reputation was being investigated as a prospective bride/daughter-in-law, the highest praise that could be offered from neighbors being questioned was "We do not know, we have not seen her." This indicated that the young woman had been properly separated from society since a child.

The tradition of binding young girls' feet at age seven or eight also served to physically incapacitate and isolate them. Often these girls/women could not walk without the aid of others or of canes. If they could walk unaided, they hobbled slowly and painfully wherever they went. Several traditional rhymes emphasize this practice as a means of keeping women
"Why must the foot be bound?  
To prevent barbarous running around."

Another example:
"Bound feet, bound feet  
Past the gate can't retreat"

Intellectually, women were also isolated at this time. Only specific domestic chores such as cooking, cleaning, sewing, embroidery were considered appropriate for girls. Young women were not highly educated or allowed to participate in the prestigious government examinations. This limitation on intellectual development is poignantly illustrated in this ninth century poem by the woman poet Yu Hsuan-Chi:

On a visit to Ch'ung Chen Taoist Temple  
I See in the South Hall the List of Successful Candidates in the Imperial Examinations

Cloud capped peaks fill the eyes  
In the Spring sunshine.  
Their names are written in beautiful characters  
And posted in order of merit.  
How I hate this silk dress  
That conceals a poet.  
I lift my head and read their names  
In powerless envy.

Women Poets of China  
Kenneth Rexroth and Ling Chung

MARRIAGE

Females were a liability in the traditional Chinese family mainly because of marriage practices. A dowry had to be provided by the girl's family before she could marry. As soon as she was married she would live in the household of her husband, often rarely or never seeing her own family again. As a married woman she would fulfill her responsibilities not only to her husband, but also to her husband's parents. She was expected to wait on her in-laws every
morning, feeding them and helping them to bath and dress and also helping them in the evening. Thus, female children were viewed as parasites. They consumed goods but did not contribute to the welfare of their own families. Women had little opportunity to bring status to their own family—the family line/name was carried through the male, women did not have rights of inheritance, powerful and lucrative government jobs could be held only by men, and females were not allowed to participate in any significant religious rituals.

Because the birth of females had such a negative economic impact upon a family, infanticide was often practised. During the Sung, Ming, and Ching dynasties, killing of female babies was common. Girl babies were drowned, stabbed, dumped in outhouses or simply abandoned. At other times young female children were sold into prostitution or sold during times of famine so other members of the family could obtain food.

REMARIEIJAGE

Beginning in the Sung, Ming, Ching dynasties, widows were forbidden to remarry (or at least discouraged from doing so.) The sexually abstinent widow brought fame to her family. Some women committed suicide to preserve their chastity and glorify the family name. Other wives, to show their fidelity to their late husbands, disfigured themselves so they would be unattractive to men. In the Ming Dynasty, for example, 8,688 suicides to preserve chastity, and 27,141 cases of disfigurement by distraught widows were recorded! (Chinese Women: Past and Present, by Esther Lee Yao). Disfigurement included amputation of arms, ears, noses, scarring of the face. The Ming Dynasty, in fact, encouraged these practices by exempting families of dead widows from governmental service and even establishing government recognition for chaste widows.

DIVORCE

Women were not allowed to divorce their husbands. However, there were seven reasons why husbands could divorce their wives:

1. Disobedience to parents-in-law
2. Barrenness
3. Adultery
4. Jealousy
5. Incurable disease
6. Excessive talking
7. Thievery
HISTORICAL AND LITERARY CHINESE WOMEN HANDOUT

Match the following women with their accomplishments.

A. QIUJIN
B. LI QINGZHA

HISTORICAL AND LITERARY CHINESE WOMEN

_____ : Mythological goddess associated with motherhood, childbirth, mercy and kindness.

_____ (100 A.D.): One of the most notable scholars of all China who wrote *Admonitions to Women*, a guidebook for the conduct of women which was followed for thousands of years. She also believed that women should be educated as well as men.

_____ (133-192 A.D.): Famous Chinese poet; one of her most well known works is *Sorrow and Resentment*.

_____ (lived during Eastern Jin Dynasty 317-420 AD): A famous calligrapher, she wrote a famous treatise called *Chart of Brush Position*. She developed a new school of calligraphy, some tenets of which are followed today.

_____ (5th Century A.D.): Often called the Joan of Arc of China, this woman took her father’s place in war and fought successfully for twelve years.

_____ (768-831 A.D.): Celebrated Chinese poet. She also made her own writing paper, known for its fine pale quality.

_____ (d. 868 AD): One of the most well known Tang Dynasty poets.

_____ (about 1,000 A.D.): Considered one of the most famous of Chinese poets. Her poetry during the first part of her life described the delights of nature and the boudoir. Her later poetry concentrated on her rootlessness and loneliness after a change of fortunes.

_____ : Her poems, *Heartbreak Collection*, collected in 1182 express her sorrow and frustration of being a Chinese woman living under a feudal system.

_____ (1400 B.C.). The first woman to appear in China’s written history, she was the wife of Shang ruler, Wuding. She commanded military expeditions, owned land and practised divination. Many Shang Dynasty bronzes bear her name.

_____ (1600): This woman led a small army into battle against rebels in the southwestern provinces of China. She led an army of 3,000 called the White Sticks. The Ming Emperor made her Commander-in-Chief of all his armies after she had put down various rebellions.

_____ (1651-1667): Known for her powerful influence over her grandson, Kang Xi, one of the most outstanding Manchu rulers. She emphasized propriety and education for her son and grandson in preparing them to rule.

_____ (1838-1908): Called the Dragon Empress, she rose from being the daughter of a minor official to being the de facto ruler of China for more than fifty years.
A twentieth century feminist, this woman was selected by the Communist Party's Second National Congress in 1922 to be the first Director of its Women's Department. She worked tirelessly to improve the conditions of Chinese working women.

A revolutionary and feminist, this woman poet and journalist founded and wrote for the *Chinese Women's Journal* in Shanghai. Her essays and poetry decried the status of women in China and such practices as footbinding and arranged marriages. She was arrested, tortured, and beheaded by the Ching government in 1907.

One of China's foremost writers, her books include *Shanghai Spring 1930*, and *The Sun Shines Over the Sanggan River*. She was the winner of the Stalin Prize for Literature.

(died 1981): This woman worked hard to improve the education and condition of women throughout China. She was Vice-Chairman of the People's Republic, and in 1951 received the Stalin Peace Prize. She was married to Sun Yat-Sen and was given the name, Quiet Protester.

(1930's): She wrote about rural conditions in northeast China before and after the Japanese occupation. She was especially concerned about the fate of Chinese women and was one of the first to describe the living conditions of rural Chinese women.

She was one of only thirty-five to fifty women to have completed the Long March. Having worked tirelessly for China and women's rights, she has often been sent on missions to carry on foreign affairs for the Chinese government. She was also married to Zhou Enlai for over fifty years.

One of the most cultivated writers of the 1950's, she wrote about the influence of the revolution on women.

Publishing in the 1970's, Zhang Jie's most famous work is *Love Should Not Be Forgotten*. Her work explores the need for human relationships and love, themes that were neglected during the revolutionary period.

The first Chinese woman judge and President of the Shanghai Law School.
Historical and Literary Chinese Women

Annotated Teacher Key:

GUAN YIN: Mythological goddess associated with motherhood, childbirth, mercy and kindness.

BAN ZHAO (100 A.D.): One of the most notable scholars of all China who wrote *Admonitions to Women*, a guidebook for the conduct of women which was followed for thousands of years. She also believed that women should be educated as well as men.

CAI WENJI (133-192 A.D.): Famous Chinese poet; one of her most well known works is *Sorrow and Resentment*.

MADAM WEI (lived during Eastern Jin Dynasty 317-420 AD): A famous calligrapher, she wrote a famous treatise called *Chart of Brush Position*. She developed a new school of calligraphy, some tenets of which are followed today.

HUA MULAN (5TH CENTURY A.D.): Often called the Joan of Arc of China, this woman took her father's place in war and fought successfully for twelve years.

XUE TAO (768-831 A.D.): Celebrated Chinese poet. She also made her own writing paper, known for its fine pale quality.

YU XUANJI (d. 868 AD): One of the most well known Tang Dynasty poets.

LI QINGZHA (about 1,000 A.D.): Considered one of the most famous of Chinese poets. Her poetry during the first part of her life described the delights of nature and the boudoir. Her later poetry concentrated on her rootlessness and loneliness after a change of fortunes.

ZHU SHUZHEN: Her poems, *Heartbreak Collection*, collected in 1182 express her sorrow and frustration of being a Chinese woman living under a feudal system.

FUHAO (1400 B.C.). The first woman to appear in China's written history, she was the wife of Shang ruler, Wuding. She commanded military expeditions, owned land and practised divination. Many Shang Dynasty bronzes bear her name.

QIN LIANGYU (1600): This woman led a small army into battle against rebels in the southwestern provinces of China. She led an army of 3,000 called the White Sticks. The Ming Emperor made her Commander-in-Chief of all his armies after she had put down various rebellions.

XIAO ZHUANG (1651-1667): Known for her powerful influence over her grandson, Kang Xi, one of the most outstanding Manchu rulers. She emphasized propriety and education for her son and grandson in preparing them to rule.
CI XI (1838-1908): Called the Dragon Empress, she rose from being the daughter of a minor official to being the defacto ruler of China for more than fifty years.

XIANG JINYOU: A twentieth century feminist, this woman was selected by the Communist Party's Second National Congress in 1922 to be the first Director of its Women's Department. She worked tirelessly to improve the conditions to Chinese working women.

QIUJIN: A revolutionary and feminist, this woman poet and journalist founded and wrote for the Chinese Women's Journal in Shanghai. Her essays and poetry decried the status of women in China and such practices as footbinding and arranged marriages. She was arrested, tortured, and beheaded by the Ching government in 1907.

DING LING: One of China's foremost writers, her books include Shanghai Spring 1930, and The Sun Shines Over the Sanggan River. She was the winner of the Stalin Prize for Literature.

SONG QINLING (died 1981): This woman worked hard to improve the education and condition of women throughout China. She was Vice-Chairman of the People's Republic, and in 1951 received the Stalin Peace Prize. She was married to Sun Yat-Sen and was given the name, Quiet Protester.

XIAO HONG (1930's): She wrote about rural conditions in northeast China before and after the Japanese occupation. She was especially concerned about the fate of Chinese women and was one of the first to describe the living conditions of rural Chinese women.

DENG YINGZHAO: She was one of only thirty-five to fifty women to have completed the Long March. Having worked tirelessly for China and women's rights, she has often been sent on missions to carry on foreign affairs for the Chinese government. She was also married to Zhou Enlai for over fifty years.

ZONG PU: One of the most cultivated writers of the 1950's, she wrote about the influence of the revolution on women.

ZHANG JIE: Publishing in the 1970's, Zhang Jie's most famous work is Love Should Not Be Forgotten. Her work explores the need for human relationships and love, themes that were neglected during the revolutionary period.

JING YOUXIA: The first Chinese woman judge and President of the Shanghai Law School.
ACTIVITY: FAMOUS CHINESE WOMEN FAIR

Each student chooses an eminent Chinese woman to study and research, particularly through reading biography and autobiography. During Fair Day each student dresses as and takes on the persona of that person. Several variations of activities can occur: Students introduce themselves to others informally, comment upon significant events, people, obstacles and accomplishments in their lives; or students present short five to ten minute presentations with hand outs and visuals on the person they studied.

Students may also choose to do a series of activities based upon Bloom's taxonomy as applied to the investigation of successful persons. This assignment is based upon an article in Gifted Child Today, "A People Fair" by Nancy B. Cutforth, November/December, 1984:

• KNOWLEDGE
  Build a chronological time line of your person's life

• COMPREHENSION
  Restate the philosophical beliefs of your person in oral discussion.

• APPLICATION
  Design a T-shirt or other article of clothing which represents your person.

• ANALYSIS
  Compare/contrast the sociological factors prevailing at the time of your person's life with the present.

• SYNTHESIS
  Describe the characteristics of heroes of the time when your person lived.

• EVALUATION
  List the characteristics of your person. Indicate which characteristics were helpful and which were hindrances.

ACTIVITY: TRADITIONAL ROLES OF CHINESE WOMEN AND ACHIEVEMENT OF INDIVIDUAL CHINESE WOMEN

After students have read the handout on "Roles of Traditional Chinese Women" and completed the exercises on Historical Chinese Women and Chinese Women Fair, initiate a discussion of the following paradox: How does one reconcile the restricted role of Chinese women with the outstanding accomplishments of some individual Chinese women. How did women transcend these narrow roles?
A DAUGHTER OF HAN:
THE AUTOBIOGRAPHY OF A CHINESE WORKING
WOMAN
A Study Guide

"To see a sparrow walk is a sign of good fortune. But they always hopped for me."
Ning Lao T'ai-t'ai

OBJECTIVES:

1. To become familiar with a typical Chinese working woman's life, including beliefs, attitudes and values.

2. To become aware of the limited roles of Chinese women of the nineteenth century: widow, concubine, wife.

3. To become aware of the cultural attitudes and practices that impede the progress and fulfillment of women.

4. To identify the personal characteristics that enable people to survive difficult circumstances.
SUMMARY: In the 1930's Ida Pruitt, an English woman staying in Peking, made friends with an older Chinese working woman. For two years, three times a week, Ning Lao T'ai-t'ai told her richly detailed life's story to Mrs. Pruitt. Lao Ning was married at thirteen, became poverty-stricken in her twenties with the death of her mother and the opium addiction of her husband. With two young daughters to rear, Lao Ning worked as a beggar, a seamstress, a nanny, a factory worker. She worked for Muslim, Chinese, and missionary families; she knew the rich and the poor, the devious and the humble. Her story is one of spirit, grit, and edurance in an incredibly difficult world.

ACTIVITY: DISCUSSION AND ANALYSIS OF THE NARRATIVE

1. What do these quotations reflect about the traditional female role in nineteenth century China?

"How could such a person, living behind walls, know how to manage poverty?"

"In the old days in P'Englai the daughters of the family were allowed to follow their parents to the grave." (p.77)

"Matchmakers were not asked 'Is she beautiful' but 'How small are her feet?'" (p.22)

"The foreign woman had a school for girls and urged my mother to send me to school... My father became enraged at the very idea." (p.24)

"The girl with the full head of hair is not as free as the one with a bare head." (p. 29)

"Respectable women did not walk in the streets of P'Englai." (p. 47)

"Parents loved them so much that they would never find mothers-in-law for them" (speaking of twin girls, p. 206)

2. What was Lao Ning's marriage like? What was the quality of her relationship with her husband? What was her sister's marriage like?

3. Describe Lao Ning's life from 1887-1888 after her mother dies.
4. Lao Ning describes the plight of widows at various times in her narrative; Comment on the position of widows in Chinese society after reviewing *the remarriage of a widow* p. 178-179, *marriage of a virgin to a dead man* p. 183, *the widow's p'ai-lo* p. 183, *the widow of General Sung Ch'ing* p. 100:

5. Lao Ning worked in several wealthy homes with concubines. Comment on the position of concubines in Chinese society after reviewing the *Third and the Fourth Mistresses* p. 107-109, *concubine of the P'Englai official* p. 116, *the concubine who commits suicide* p. 182:

6. What is the significance of the male child in Chinese society? Cite examples throughout the book that illustrate the status of men in traditional Chinese society:

7. Make a time line for Lao Ning's life (this can also be done in groups, with each group taking a different stage in her life). Include the most significant events: birth, childhood experiences, marriage, children, jobs, significant people, tragedies, joys. What would you have liked about her life? What would you have disliked?

8. What are the personal characteristics of Lao Ning that you admire and that helped her survive in such a difficult environment? What are some of her personal characteristics that may have been self-destructive?

9. What was Lao Ning's personal philosophy of life?

   Do you agree or disagree with the following comments:

   "Life is like a game of chess. The pawns laid out must be followed. Destiny cannot be forced."

   "Only fortune that comes of itself will come. There is no use to seek for it."

10. If you were going to select key scenes from Lao Ning's life to be filmed—which are the more memorable ones you would want to include? Why are these events so important or emotionally moving to you?

11. List the traditional practices/attitudes toward women described in a *Daughter of Han* that no longer exist in modern China:
ACTIVITY: ORAL HISTORY

Students read the publication, *Instant Oral History* by William Zimmerman and then interview a Chinese American woman or a Chinese woman student at a local university.

ACTIVITY: RECORDED ORAL HISTORIES

Students listen to the recording *Women Unbound*, a cassette from Pacifica Radio which interviews Chinese women on the changing role of women in the People's Republic of China.
CONTEMPORARY CHINESE WOMEN
"Women hold up half the sky"

OBJECTIVES

1. To become aware of the strides Chinese women have made toward equality since the founding of the People's Republic of China.

2. To become aware of the similarities (education, employment, family) of Chinese and American women.

3. To consider possible strategies to enhance the status of women worldwide.
The Reform Movement of 1898 advocated the banning of foot binding and the establishment of schools for women.

The 1911 Revolution fostered a feminist movement that supported equal rights for men and women and encouraged women to participate in political life.

The People's Republic of China, founded in 1949, proclaimed that Chinese women were equal with men in all aspects of political, economic, cultural and social and family life.

- **Land Reform:** Before the People's Republic of China, women had no right to own land. After 1949, women obtained the right to own land for the first time.

- **Voting:** The Electoral Law of the People's Republic, enacted in 1953, guarantees women the same voting rights as men.

- **Work:** Women after 1949 were encouraged to work outside the home to provide themselves with an independent source of income.

- **Education:** After 1949 the Chinese government institute illiteracy campaigns to increase the literacy rate for all Chinese, including women.

- **Marriage Law of 1950:** This law abolished the feudal system of arranged marriages, concubinage and established equality in marriage law between men and women, emphasized monogamy, sexual equality and the protection of the rights of children.

- **Prostitution Ban:** Beginning in 1949, the government began a national campaign to outlaw the rampant sexual exploitation of women. The government also instituted a policy of education for former prostitutes.

- **Protection of the Rights and Interests of Women:** This comprehensive law, promulgated in 1992, further supports the legal equality and protection of Chinese women. Among the 54 articles included in this law, 75 percent list in detail “the consequences and legal responsibilities for infringements, thus providing an operational legal basis for enforcement of the law.”

"The Situation of Chinese Women"  
Beijing Review, June 6-12, 1994
CONTEMPORARY CHINESE WOMEN QUIZ

1. Chinese women make up what part of the world's female population? a) one-tenth b) one-fourth c) one-third d) one-half (Beijing Review, June 6-12, 1995).

EDUCATION

2. In 1992 the school attendance rate for girls from 7 to 11 years old has risen to a) 60 percent b) 70 percent c) 87 percent d) 96 percent (Beijing Review, June 6,12, 1994).

3. What percentage of the dropouts in public education in 1990 (ages 6 to 14) were girls? a) 40 percent b) 50 percent c) 73 percent d) 83 percent (Beijing Review, February 28-March 6, 1994).

4. According to this survey, of young women under forty approximately a) 25 percent b) 45 percent c) 60 percent d) 75 percent had an education equivalent to or higher than that of junior middle school. This figure is 50 percent higher than that for their mothers' generation (Chinese Education and Society, 1993, p. 9).

5. In 1992 women teachers at all levels of education made up a) 30-45 percent b) 40-50 percent c) 60-70 percent d) 75-80 percent of teachers nationwide (Beijing Review, June 6-12, 1994).

6. At Beijing University, the most distinguished university of China, about a) 15 percent b) 25 percent c) 33 percent or d) 44 percent of the 3,000 academics are women (Beijing Review, June 6-12, 1994).

POLITICS AND GOVERNMENT

7. In 1993, when the Eighth National People's Congress convened, a) 10 percent b) 21 percent c) 34 percent or d) 42 percent of the deputies were women (Beijing Review, June 6 12, 1994).

8. By 1993, the number of women who were members of standing (permanent) committees was a) 2 percent b) 12 percent c) 15 percent d) 23 percent (Beijing Review, June 6-12, 1994).

9. As of 1993, how many women mayors or deputy mayors are there in 517 cities? a) 75 b) 100 c) 200 d) 300 (Beijing Review, June 6-12, 1994).
EMPLOYMENT

10. The employment rate of Chinese women between the ages of 20 and 45 years of age has reached a) 50 percent b) 60 percent c) 75 percent d) 90 percent (Beijing Review, February 28-March 6, 1994).

11. The income a woman makes in the cities is a) 50 percent b) 62 percent c) 78 percent d) 90 percent that of a man's income (Beijing Review, February 28-March 6, 1994).

12. In the areas of agriculture, forestry, animal husbandry, fisheries and water conservancy, Chinese women account for more than a) 25 percent b) 50 percent c) 70 percent d) or 80 percent of all the workers (Beijing Review, June 6-12, 1994).

13. In the area of scientific research and comprehensive technological services, women in China make up a) 15 percent b) 25 percent c) 35 percent d) 50 percent of those employed (Beijing Review, June 6-12, 1994).

14. Among engineering college graduates, women accounted for a) 2 percent b) 12 percent c) 27 percent d) 52 percent (Beijing Review, June 6-12, 1994).

15. In the Chinese Academy of Medical Sciences, women make up over a) 18 percent b) 26 percent c) 35 percent d) 40 percent of scientists with senior professional titles (Beijing Review, June 6-12, 1994).

16. Of the over 40,000 people surveyed a) less than half b) half c) more than half said that "women hold up half the sky", i.e., assumed a role equal to that of men (Chinese Education and Society, 1993, p. 13).

17. In this survey, what percentage indicated that there were still inequities among men and women with regard to employment: a) 10 percent b) 33 percent c) 45 percent d) 60 percent (Chinese Education and Society, 1993, p. 14).

MARRIAGE, FAMILY AND HEALTH

18. In China today, approximately a) 50 percent b) 60 percent c) 70 percent or d) 80 percent of women under 40 had decided their own marriage (Chinese Education and Society, 1993, p. 11).

19. In urban areas, over 85 percent of women have maternity leave lasting a) six weeks b) two months c) three months d) six months (Beijing Review, June 6-12, 1994).

20. Currently the mortality rate for pregnant and lying-in women is about a) 1500 per hundred thousand b) 1000 per hundred thousand c) 500 per hundred thousand or d) 95 per hundred thousand (Beijing Review, June 6-12, 1994).

21. Currently the infant mortality rate is a) 200 per thousand b) 100 per thousand c) 50 per thousand or d) 30 per thousand (Beijing Review, June 6-12, 1994).
22. What percentage reported that females who give birth to a girl are still looked down upon: approximately a) one fourth b) one third c) one half d) three fourths (Chinese Education and Society, 1993, p. 14).

23. In the majority of Chinese families the a) wife b) husband c) husband and wife together decide(s) the family budget (Chinese Education and Society, 1993, p. 11).

24. In the majority of Chinese families the a) wife b) husband c) husband and wife together decide(s) what choice of further schooling or vocation for the children (Chinese Education and Society, 1993, p. 11).

25. The average life expectancy of the Chinese woman is a) 37 years b) 45 years c) 58 years d) 72 years (Beijing Review, June 6-12, 1994).

20. d
21. d
22. b
23. c
24. c
25. d
Discussion:

First, I included information on Chinese women based upon Chinese sources and research. The information provided by these articles and the Chinese government seems relatively candid and honest. Secondly, I think that students should be asked about comparative statistics for American women. The teacher could supply the following information, or a research project could be assigned students, who would find the resources for these statistics themselves. These statistics on American women support that American and Chinese women share many things in common. Neither Chinese nor American women have complete equality in their respective countries:

American Women: Women in the United States earn about 72 cents for each dollar a man earns (if the woman is college educated); 65% of all minimum-wage earners are women. The majority of women remain in traditional female jobs, "pink collar" sector--low paying administrative or clerical service jobs.

Drop out rates can be high for minority populations, approaching 50 percent in urban settings. Research supports that both male and female educators teach boys and girls differently. They interact with boys more often than with girls, giving boys at least four times more praise and direct instruction. Seventy percent of physics, chemistry and computer science students are male and only 15% of engineering degrees are obtained by women. Women earn half as many doctorates as men. On the college campus 98% of the engineering faculty is male while men make up 75% of the professors in business, fine arts and social science. Women represent only 39% of medical school enrollment.
China Daily commentary

Women's status

The white paper "The Situation of Chinese Women" released by the government outlines the tremendous changes of the status of Chinese women in the last 45 years since the birth of the People's Republic.

The misery of Chinese women in the thousands of years of feudalistic society can hardly be comprehensible to an outsider without a due all-round knowledge of China's past. However, only against the background of their wretched lot in these times can one appreciate the great significance of the changes the successful Chinese revolution, and China's reform and opening in the past decade in particular, has brought to women.

Though the most inhumane practice of "foot-binding" was outlawed after the 1911 Revolution led by the great patriot Sun Yat-sen, the bondage of women in various respects had undergone but small changes until 1949.

As one of the goals of the liberation, the people's government of New China took immediate measures to pursue the emancipation of women.

Before liberation, peasant women had to toil in the fields all year round. Otherwise, except for a very small number of the educated, few women engaged in any work other than house-keeping. After liberation, with the spread of education, more and more women began to seek a career of their own. Today, as shown in the white paper, women account for 44 per cent of the total number of China's workforce, while the world average is only 34.5 per cent.

Women entered administrative areas, once the solemn preserve of men. In 1994, 16 women hold the posts of ministers or vice-ministers under the State Council and 18 hold the posts of provincial governors or deputy-governors. In 517 cities, there are now more than 300 female mayors and vice-mayors.

Women's record in athletics is especially spectacular. Of the 775 world championships won by the Chinese in the years after liberation, 460, or 59 per cent, were by women athletes. And women brought home three-fourths of the gold medals China won at the 1992 Olympics.

Thus, emancipated Chinese women have proved their equality to men in many fields.

With the deepening of China's reform and opening to the rest of the world, women are playing an increasingly important role in all walks of life.

However, because of historical reasons, there is still a long way to go before Chinese women can truly enjoy equal rights in all respects as men. Cases of discrimination against women still occur now and then. The whole society, women's organizations in particular, are sparing no effort to combat these phenomena so that the relevant legislation provides protection for women as they are meant to.

To further promote the cause of equality for women, Beijing will host the Fourth World Conference on Women in 1995. And it is doing the best it can to make the conference a success.

China should use the opportunity to better acquaint the world with the improved status of Chinese women and the problems they still face. The release of the white paper by the government is one step to this end.

Meanwhile, through hosting this international gathering, Chinese women will discuss with their foreign sisters the issues confronting women of the world and together contribute to the global advancement of women. With great interest and concern we watch the preparations proceeding and wish all success to this significant conference in Beijing.
CHINESE WOMEN AND THE FAMILY
HANDOUT

Summary of a lecture presented by Dr. Lijuan Pang, Professor of Early Childhood Education, Beijing Normal University, Friday, July 1:

Chinese Working Women

Almost all women work outside the home. This is one of the most important issues facing Chinese women today. Chinese women work 1) for economic reasons. They help pay expenses for food, housing. Although expenses in China are lower, wages are also lower, so both men and women must work. 400-500 Yuan per month is a salary for an average worker. 2) Chinese women also work for equal status in the family and society. This was very important previously but is becoming less so now. In interviews with women who work only in the home, they have said they are lonely if they stay home, and they don't have money or equal status.

A few women are saying that women should go back to working only in the home. This may be said by wealthier women.

Women typically work as teachers, office workers, salespeople, factory workers, or in restaurant or hotel work. China has a same job/same salary policy. However, now many people do not want to hire working units with females, so some women to not have the opportunity to make equal salaries.

The male/female faculty ratio at Beijing University is about half and half. However, in some science areas there are more men. At the level of assistant professor, the university has about one half males and one half females. However, at the higher rank of full professor there are many more men. Beijing Normal University has a process called exceptional promotion whereby younger staff members (45 years old or younger) are promoted more quickly to higher levels. The first time exceptional promotion was used all males were promoted. In 1994, of seven positions open, six were given to men and one to a woman. One explanation given is that men can spend more time on research, while women are often raising families. More females receive exceptional promotion to the level of associate professor. Today ability and achievement are much more important in deciding promotion. For the position of professor one must have two books and at least ten research papers published. Beijing Normal University has one female vice president. One of the benefits of promotion is living conditions. Individuals under 30 have only a one bedroom apartment, while an associate professor can have a two bedroom apartment.

Chinese Women and the Family

The person who is mainly responsible for housework, buying and preparing food is the woman. Men may purchase food, but they will seldom prepare food. According to Dr. Pang, men talk, play with children, play chess or watch television while women wash clothes, cook, or clean. However, in southeast China, particularly Shanghai, men have a tradition of helping women in the house. In northeastern China a strong tradition exists that males cannot help females with these tasks. Professional men are more likely to help women.

According to Dr. Pang, Chinese women have two weaknesses. First, they lack confidence
and secondly after they are married and have children, they lose interest in their own careers and in improving themselves, mainly because they have so little time. In Chinese tradition, a twenty-year old woman is described as a flower, a thirty-year old as a melon (because she is tired and exhausted) and a forty-five year old as in a second season to be beautiful.

Although a 20-year old can legally marry, many people do not. The average age of marriage is 23-25 years old, and many professionals wait until they are older than 25. Even ten years ago parents decided marriage partners in rural areas. This is no longer true in urban areas. Almost all women marry, because they receive too much pressure from parents if they don't. The problem of teenage pregnancy is almost nonexistent in China. Although some university students live together in secret, this is not common. When individuals marry, they usually have a small civil ceremony and invite a few family members and friends afterwards for some special foods. Spending a lot of money on a marriage celebration is discouraged. The exchange of rings is becoming a popular custom.

Many professional women hire babysitters from the rural areas through the Women's Federation. These babysitters live in the home with the family. Today, it is no longer true that when a woman marries she loses her family.

**Chinese Women's Education**

According to official Chinese policy, men and women have equal rights and opportunities in the pursuit of education. Both men and women can compete equally in the national examinations. This equality is particularly true in the cities, but less true in rural areas. In rural areas, if the family can support only one, they will support the male in obtaining an education. China requires nine years of compulsory education. There is no charge for attending except for books and supplies. However, often in rural areas fathers don't want girls to attend school. Fathers do not have the money even for books and supplies, and the labor of young women is needed both in the house and in the fields. Also, tradition has dictated that girls go to another family, so fathers have not typically spent time and money on girls. It is not unusual for girls 10 years old to have studied only three or four years. Young women can write a letter of protest to the government or a local women's federation. However, most mothers discourage daughters from doing this so as not to get fathers in trouble.

The universities have approximately an equal number of men and women in most disciplines; however, because there are so many more men in sciences, the actual statistic is one third women to two thirds men registered in universities throughout China. Dr. Pang believes that young girls in elementary school have self confidence, but by high school they lose this confidence in their ability. Young women select history, language or social science to study, while young men select physics, and other sciences.

Chinese People's University has a women's studies major. Formal educational system is for people between 18 and about 26 (for starting a degree). The Chinese system does not allow women to go back to school in their forties. Only people younger than 45 can study for the Ph.D.
SHANGHAI MUNICIPAL WOMEN'S FEDERATION
HANDOUT

The following information was obtained from a brochure handed out during a presentation on July 21 at the Shanghai Women's Federation:

Shanghai Municipal Women's Federation founded in August, 1950, is a mass organization of women from all walks of life in Shanghai. It has always been a bridge linking the Party and Government with the broad masses of women. The municipal women's congress is to be convened every five years when SWF leaders are elected by the representatives from over 5,000,000 women adults. Now there are 100 executive members, of whom 15 are members of the standing committee. The executive committee is composed of women from all walks of life, including workers, peasants, intellectuals, women cadres, professors and well-known patriotic personalities.

Shanghai Women's Federation is divided into various departments, Publicity and Information Dept., Liaison Dept., Children's Department, Personnel Dept., Tertiary Industries Dept., Urban and Suburban Work Dept., Research and Investigation Dept. We have women organizations at all levels of districts, counties, neighborhood, communities, townships even at villagers' committees in the rural areas and residents' committees in the city, where we have women work committees in the fields of party and government organization, science, technology, education, culture, publishing, health, YWCA, minority nationalities and all Democratic Parties as well. Various women unions are group members of the Shanghai Municipal Women's Federation such as Women Engineers Union, Women Journalists' Union, Women Doctors' Union, Women Lawyers' Union, Women Judges' Union, Women Scientists' Union, Women Architects' Union, Women Entrepreneurs' Union. The basic work principle of SWF aims at representing and protecting the legitimate rights and interests of women, improving the equality of the sex and developing the cause of women and children:

The tasks of SMWF at the present are as follows:

- To unite women from all walks of life to improve their social status through their active participation in reform and modernization construction.

- To encourage women to "learn science, technology, and knowledge", provide good conditions and environment to women cadres and others.

- To promote the education among women in "self respect, self care, self confidence, and self improvement" in order to improve the quality of women masses so that they can compete in the society successfully.

- To protect women's legitimate rights and interests in all spheres of life: political, economic, cultural, social, including family life, as well as helping and educating children for the healthy growth.

- To cite "March the 8th Red Banner Pace-setting" every two years to encourage women from all walks of life to make greater contributions to building Shanghai into a prosperous city.

- To cite "Prize for Heroine", encouraging women to gain greater achievements in
invention, scientific achievement, offering good suggestions and making effort in the campaign of promoting production and increasing income, saving materials and energy.

- To cite "Prize for Role Models," who are good at learning knowledge and technology and make great achievements in the rural areas.

- To set examples of role models through the medium of newspaper, the broadcasting station and TV station, trying to let the people realize the role and status of women.

- To educate women to correctly handle love, marriage and family problems according to social ideology and ethics, to play an important role in the activities of harmonious "Five-Good" families in order to build over 4,258,400 families in Shanghai into warm, colorful and thrifty families.

- To hold the Shanghai Family Culture Festival every two years, to combine various activities with scientific, healthy, and sporting education to improve the quality of family life.

- To help mothers give a scientific and better idea for educating their children to meet the needs of the country, to establish Shanghai Children's Coordination Committee, mobilizing the whole society to protect and take good care of children in the fields of family education, daily necessities, culture, art and other aspects, to set up Shanghai Children's Foundation, collecting funds from the society to improve the educational facilities, to do a better job for the well-being of children.

SWF endeavors to build the Children's Camping Centers at She Shan, Liu He and Dong Ping, 200 children activities centers, 2800 schools for parents in which some programs are taught over radio.

Under the guidance of SWF, there are various units working for the benefits of women and children, i.e. the Children's Scientific Education Center, the Municipal Kindergarten, the Music Kindergarten and Shanghai-Hongkong Nursery, that are famous in the city for their high qualities of education, advanced equipments and good environments. Two periodicals, "For the Children" and "Modern Life" are regarded as two of the best magazines in Shanghai. SWF runs Women Cadres' School and the Women Education Center as the basis to improve the cultural level of women cadres and masses. The Women Activity Center with the floor space of more than 7,000 square metres and nine-story-building is a cultural entertainment center for women in which they can have good communication with each other through various training classes, shopping center, restaurants, ball room, fitness hall and beauty salon, etc. SWF also runs a Women's Credit Bank and Women's Travel Service Agency. With the help of SWF, Shanghai Women Studies Association and Shanghai Research Association of Marriage and Family have been established, which are the centers of women's studies and seminars on women's issues without overseas women to be held occasionally.

SWF strengthens the close like with compatriots from Hongkong, Macao and Taiwan and takes good care of family members of those who have gone to Taiwan and women from different nationalities as well as with women from different circles of intellectuals, industry and commerce and religions. In 1985 "Women and Children Committee of Shanghai-HongKong Economic Development Association" was set up by the combined efforts of SWF and Hong Kong well-known women, which helps women who are very active in the development of welfare and care for women and children to establish kindergarten and nurseries. SWF has also wide contacts with professional foreign ladies, wives of foreign experts and female staff from
different Consultants in Shanghai.

SWF develops friendly exchanges and contacts with women all over the world. From 1979 to 1993, SWF has received about 500 women delegations from over 150 countries and regions while we also sent Shanghai Women Good Will Delegations abroad, thus promoting the mutual understanding and friendship between women of Shanghai and women of various countries and regions.

In reform, SWF will make greater efforts to defend the specific interests of women masses in order to build her into a mass organization of unity, greater attraction and vitality.
Poll finds protection of women's rights still weak at foreign-funded enterprises

Union urges more women to close ranks

by Zhang Xla

WOMEN workers often suffer from appalling work conditions despite their increasingly vital role in foreign-funded enterprises, according to a report released last month by the All China Federation of Trade Unions (ACFTU).

The report, which concentrates on foreign-funded enterprises, cites an increase in sexual discrimination in the workplace and labour disputes.

A poll conducted by ACFTU in 1991 and 1992 among 914 foreign-funded enterprises showed that women accounted for 50.4 per cent of the total 160,000 employees.

In Qingdao, Shandong Province, local statistics released in April showed that women accounted for 60 per cent of employees at the city's 3,000 foreign-funded enterprises.

Many foreign firms did not sign labour contracts with their employees and some factories, especially clothing and shoe manufacturers, hired and fired women workers at will.

Even where labour contracts were signed, some employers still failed to meet the State labour rules.

And workers' rights and interests were rarely given a second thought.

A survey of 733 women workers in Guangdong Province showed that 52.87 per cent worked without labour contracts, and 23.5 per cent held contracts that had no legal effect.

Some overseas investors only employed unmarried girls between 18 and 25 years old, who they dismissed once they got married or became pregnant.

Despite the State regulation that women workers should be paid their wages and some subsidies during maternity leave, many enterprises simply chose to ignore the rules.

Equal pay for equal work was not a philosophy all employers were ready to subscribe to. At some enterprises, women still got less money than their male counterparts doing the same job.

Meanwhile, many women were often forced to work overtime without getting additional pay.

In a toy factory in Guangzhou, capital of Guangdong Province, workers, most of them women, had to work 15 hours a day. Even then, they were not allowed to take Sunday off or enjoy any annual holiday leave.

The report said that some overseas-funded enterprises, especially small manufacturing factories, paid little attention to safety conditions.

Last November, 54 women workers were burnt to death in a fire at a Shenzhen toy factory run by a Hong Kong businessman. Investigative reports after the disaster found that all exits were closed during work hours to "prevent theft."

Another fire that broke out a month later in a Fujian factory run by a Taiwan businessman killed 59 women workers.

Besides, the health of women workers is often threatened by noise pollution and poisonous gas. A survey of 168 Hainan-based factories with heavy pollution found that less than 10 per cent of the firms gave their employees, mostly young women, regular health check-ups.

In some foreign-funded enterprises, some women workers were forced to stand in heavy rain or under the scorching sun as punishment.

As some foreign-funded firms do not have trade unions, women are without channels to voice their complaints. And for the sake of money, many would rather swallow their pride and endure the polluted environment or corporal punishment.

"Women employees in foreign-funded enterprises, like those in State companies, are also the master of the State. Their political rights, economic interests and personal dignity should not be infringed upon," the ACFTU report stressed.

Many women workers in foreign-funded enterprises are migrants from the countryside. Their lack of education gives them little knowledge about law and many do not know how to protect themselves.

Women workers' organisations, therefore, are badly needed to safeguard their rights and interests, said the report.

According to the State Trade Union Law, all foreign-funded enterprises should establish trade unions.

Those with more than 30 employees should establish commissions of women workers.

Where trade unions have formed they have proved effective in protecting women workers' legal rights and resolving labour disputes.

Trade unions should be seen in a positive light by employers. They are conducive to enterprise prosperity because they help to build a more harmonious relationship between employers and management.

The union commissions can co-ordinate with local labour departments and supervise the implementation of regulations to ensure that female employees are protected.

Trade unions should also organize women workers to study employment law to strengthen their bargaining position within the workplace, said the report.

By the end of last year, trade unions in foreign-funded enterprises numbered 8,286, with a membership of 1.3 million.

A recent decree by the State Council demands that by the end of the year, trade unions should be set up in all foreign-funded enterprises in China.
**Women workers first victims of hard times**

China's women workers are the first to be fired as unprofitable state companies streamline their operations and are the last to be hired for new jobs, according to the China Daily. Factory managers discriminate against women by axing them before men and do not want to employ childless women in case they want maternity leave in the future, said Sun Chunlan, head of the Women's Federation in northern Liaoning province.

China's welfare system is financed by employers and workers who are fired are left destitute. They have no salary, medical care or schooling for their children. Wang Zhaohai, a textiles worker, was fired when her state employer slipped deeply into the red. She was given no severance pay or unemployment benefits, and her family has been left to survive on US$12 (HK$93.6) a month.

The average salary is about US$96 per couple per month. Ms Sun's federation, which is a non-governmental organization, has set up a small microcredit fund to lend money to women who have been fired. It has already loaned out 30,000 yuan (US$4,680) to 300 women, who have been able to set up small businesses.

Many women just wait for their former corporations to point them in the direction of a new job but the corporations, trapped in debt, cannot afford to help them. The late Communist Party chairman Mao Zedong broke with tradition in the 1950s and encouraged Chinese women to go out and work in factories as equals with men. Mao said "women hold up half the sky" and promoted equal pay for equal work. United Press International

**Editor's note:** It is hard to see how any intelligent couple that is no longer in love can accept the idea of getting divorced. In fact, most couples would get divorced immediately — if only they had the spirit to do so.

First of all, marriage is the result of love. It means happiness, respect, consideration and a warm family. There is no reason for a couple who are not in love to continue living together, especially when the other partner would feel betrayed if the marriage were being kept up for appearances.

That is why the idea of divorce is becoming more and more socially acceptable and the divorce rate is rising. In the US, 40% of married couples with children get divorced; these same people in China, however, fail to pay attention to this new trend. It is not fashionable for children to see their parents quarrel or become separated. The reasons for divorce as a way out of a bad marriage are obvious. For example, a bad marriage is a way out of a bad marriage. The best solution is divorce. United Press International
Museum tells story of women's empowerment

by Chen Ya

K

U Shulan, 72, never expected her paper cuts would someday be collected as art treasures by a museum.

After all, she was just trying to kill some free time.

Ku began wielding her scissors roughly 20 years ago after she retired from practising traditional Chinese medicine in a remote village in Northwest China's Shanxi Province. She practically wallpapered her home from practising traditional Chinese medicine, roughly 20 years ago after she retired by a museum.

With her colleagues at the university, Li was the chief founder of the museum.

To make it more accessible to the public and the international community, Li visited three women's museums in the United States, Denmark and Germany.

"All the museums pay great attention to women's creations, placing them within historical and cultural contexts. That approach inspired me a lot," she said of her trips.

Li explains that each of China's 56 nationalities has its own distinctive history and culture, so there is a wealth of material to be collected and displayed. She feels the task is a pressing one.

"Some of the precious folk art created by these ethnic groups, especially by some minorities, is in imminent danger," she says, "so we must do our utmost to preserve them for our later generations."

In the last three years, the museum collected more than 1,000 articles relating to women, including cases from 10 ethnic groups, handicrafts and fabrics, and exhibits relating to the biological process of giving birth.

"Our museum has saved more than 20 such pieces for further study," she says proudly. This means keeping with the museum's short-term purpose: to save as much as possible of what relates to women's cultural contributions or to particular historical periods.

Display in the museum are several pieces of black, blue and white eread woven women by the women of Yao, a minority in the Guangxi Zhuang Autonomous Region. The Yao women have woven them into vivid pictures which tell the history of their people.

But as the market economy reaches the remote Yao villages, more and more women prefer buying cloth to weaving it themselves. So this combination of cloth art and history is disappearing. "All we can do is store these once-numerous rarities," says Li.

Since the museum has no direct state funding, only one full-time worker and less than 10 part-time staff members, it is virtually impossible to collect all the important articles from across the country.

"Despite our handicaps, we're very lucky to have the assistance of women's federations at all levels," says "They help us a lot. We let the local federations know what we need, and they pay them for what we obtain for us."

Museum personnel also collect or buy whatever they come across that they consider worthwhile.

"But what we are doing is only beginning," says Li. "Our museum is far from its ideal shape, as far as I'm concerned."

Li has her own ambitious agenda for the museum, which she regards as her child. At present she and her colleagues are gathering objects of playing women's roles at varying historical periods.

"Our museum will focus on women's movements after the Opium War (1840) until the present; women of ethnic minorities; women's culture as told through characters, handicrafts and folk arts created by women; relations between Chinese women and their sisters around the world; and women's literature including books, papers, magazines and video tapes on Chinese women."

"I'm well aware that the museum's vision is far beyond the means of our present staff and limited resources. But we're committed to laying the foundation for a comprehensive collection," Li says. "This is a project that will take generations. But we are resolved to make it succeed."

"The story of women in China is serves to be told, and the mission of our museum is to tell it."

DISCUSSION OR RESEARCH QUESTIONS ON CONTEMPORARY CHINESE WOMEN

1. Students take quiz on Contemporary Chinese women and read handouts: "China Daily Commentary Women's Status" (June 3, 1994), "Chinese Women and the Family," and "Shanghai Municipal Women's Federation." After the various readings and discussions in class analyze in what ways Chinese and American women are similar and share similar concerns and problems. Identify ways in which Chinese and American women have significantly different concerns or problems.

2. In China thousands of women's organizations work to identify problems and make suggestions for solving these problems that affect women. These organizations work to safeguard women's rights and improve the status of women. The largest of these is the All-China Women's Federation which is made up of women from different ethnic groups and all walks of life. In addition, many local organizations and women's federations work to help women improve their condition in society. Research and discuss four women's organizations--include at least one example of a national organization and one example of a local organization--that work to improve the status and help solve the problems of American women.

3. Read the following newspaper articles on Chinese women clipped from Chinese newspapers during the summer of 1994: "Women Workers First Victims of Hard Times," "Divorce is the Best Solution," "Union Urges More Women to Close Ranks," and "Museum Tells Story of Women's Empowerment." Ask students to spend several weeks clipping from local or national newspapers articles dealing with women and women's issues. Compare and contrast the issues and problems of women that are making national/local headlines in China and the United States. In one week the local paper in Salt Lake City had articles on the gender gap in wages for county workers, the Utah legislature's drafting of bills to help lessen domestic violence (mainly against women), the gender gap in the ownership and use of personal computers, and the lack of women representatives in the state legislature.
THE STATUS OF WOMEN
FINAL ACTIVITY

After students have read the various articles and participated in the activities presented in this unit, they will conclude their study of Chinese women by completing a problem solving activity. The focus of much of the discussion in this unit has been the ways Chinese and American women are similar as well as different. Most experts in women's studies agree that the status of women around the world (including the United States) is less than that of men. The following activity has students divide into study and problem solving groups of four people. After doing additional research and following the problem solving process, each team will present their solution.

THE SIX STEP PROBLEM SOLVING PROCESS

This activity is based upon the curriculum model of Future Problem Solving developed by Paul Torrance at the University of Georgia. The six steps in problem solving are:

1. Brainstorming problems. (Students will use their handouts provided in this unit and other independent research they have done.)
2. Stating the problem for creative attack (I have provided the basic problem)
4. Developing criteria for evaluating solutions.
5. Evaluating solutions and selecting the best solution.
6. Presenting or selling the best solution.

In what ways can China and the United States improve the condition and status of women:

STEP ONE: BRAINSTORMING POSSIBLE PROBLEMS

Begin this section after you have read the problem statement and discussed it with your team members. Brainstorm as many problems or difficulties as you can regarding this situation. List only your 20 best ideas and number each. (For example, students might point out problems in education, employment, family life, etc.)

The guidelines for brainstorming:

1. Be fluid--as many ideas as possible
2. Be flexible--think of as many different kinds of problems as possible.
3. Defer judgment--you will be evaluating the ideas later.
4. Piggyback--combine ideas and concepts.
STEP TWO: STATING THE PROBLEM

In what ways can China and the United States improve the condition and status of women:

STEP THREE: ALTERNATIVE SOLUTIONS

Brainstorm as many possible solutions as you can to the problem as you have defined it. Record only 20 of your team's solutions below. Number your solutions:

PART FOUR: CRITERIA FOR EVALUATING SOLUTIONS

You will have brainstormed more solutions than you need. You must now select your best alternative and make it better. List from three to five criteria that you think are the most important for judging your solution.

A good criterion has the three following characteristics:

- Single dimension: for example, which solution is the most practical (one idea)
- Measure of degree: for example, which solution would be least costly? (avoid statements that can be answered yes or no)
- Desirable direction: for example, which solution would have the fewest adverse side effects?

1.
2.
3.
3.
5.

STEP FIVE: EVALUATING ALTERNATIVE SOLUTIONS

List below ten of your best alternative solutions and evaluate them according to your criteria. Rate each alternative on each criterion on a scale of 1 (poorest) to 10 (best):

STEP SIX: BEST SOLUTION IMPLEMENTATION

What is your best solution? How can you make it better?

Two things should be considered:
1. Identification of those who will be affected most by the solution (part of the plan should include a way to "sell" them on the solution), and

2. Identification and explanation of the major actions necessary to implement the solution.

Ask the following questions:

1. **Who** will be affected?
2. **When** will the solution be implemented?
3. **For how long** will the solution be in effect?
4. **How** will the solution be implemented?
5. **Who** will implement?
6. **What problems** might develop that must be overcome?
7. **How** will we know if we've solved the problem?
8. **What resources**, if any, will we need?
9. **Where** will the solution be in effect?

Each group presents its solution to the rest of the class.
The Status of Women

Teacher key:

The two articles, "China Actively Prepares for World Women's Conference" and "The Situation of Chinese Women" listed in the bibliography offer suggestions for improving the status of women:

- Provide legal services to women.
- Increase women's participation in political decision making.
- Strengthen women's education.
- Promote women's participation in economic development and expand the realm of employment for women.
- Offer community services and child-care facilities to women.
- Increase knowledge of health care practices, including family planning.
- Develop links with women's organizations and individuals around the world.
- Take part in international cooperative projects concerning women.
- Use mass media and research institutions effectively to safeguard the rights and interests of women.
- Launch campaigns for female self-improvement.
- Punish acts of discrimination, persecution, and violence against women.
