This packet contains a textbook, an instructor's guide, and a student workbook for a course on conducting financial investigations to detect and solve crimes. The topics covered in the 11 chapters of the textbook and the ancillaries are the following: (1) why financial investigation?; (2) laws related to financial crimes; (3) evidence; (4) sources of information; (5) financial institutions as sources of information; (6) tracing the movement of money through a business; (7) tracing funds using the direct method of proof; (8) tracing funds using indirect methods of proof; (9) planning, conducting, and recording an interview; (10) investigative techniques; and (11) money laundering and forfeitures. The text also contains responses to end-of-chapter questions, a glossary, and two appendixes listing selected sources of information and American Bankers Association numbers of cities and states and Federal Reserve districts. The instructor's guide provides materials for each chapter, including preparation requirements, instructor notes and presentation outline, and an appendix containing exercise feedback sheets, case studies, role-play scenarios, chapter transparencies, and supplemental chapter information. The guide also includes a bank of tests and quizzes. The student workbook contains supporting and supplemental materials to the textbook content including: introductions to each of the chapters, individual and group skill exercises, information sheets, case studies, and worksheets. (KC)
FINANCIAL INVESTIGATIONS

A FINANCIAL APPROACH TO DETECTING AND RESOLVING CRIMES
FINANCIAL INVESTIGATIONS

A Financial Approach to Detecting and Resolving Crimes
Acknowledgements

The men and women of Internal Revenue Service Criminal Investigation are proud to present this course to the colleges, universities and students who have expressed an interest in learning more about financial investigations.

The purpose of this course is twofold: first, to encourage young men and women to consider law enforcement as an enriching career and second, to bring to the reader's attention the serious and sometimes evil crimes that are motivated by money and greed.

We would like to thank the Internal Revenue Service Special Agents who instructed the pilot courses at the colleges and universities. We would also like to thank the colleges and universities that allowed the Internal Revenue Service Criminal Investigation to offer this new course at their institutions.

A special note of thanks goes to the National Association of Certified Fraud Examiners, and their Chairman, Joseph T. Wells, for their contributions to the text.

The following Internal Revenue Service Criminal Investigation Employees were involved in the research, development, writing, editing and publishing of the text:

Don Vogel  Cathy Pledger
Robert Pledger  Rich Tucker
Bob Wilson  Richard Ruffin
John Imhoff  Mike Spang
Robert Diffenderfer  Arnie Sitzmann
Ross Sutton  Diane Svoboda
Elliott Lieb  Diane Evans
Ed Federico  Patricia Reid
Douglas Gastorf  Sue Roderick
Paul Whitmire  Dennis Madden
Bill O'Conner  Vince Williams

CHAPTER 1

Why Financial Investigation?

Early criminologists categorized criminal activity into two large groupings: crimes against people and crimes against property. Since the victims of crimes were either people (murder, robbery) or property (burglary, arson) it was natural to list criminal activity by victim. But today, criminal activities have evolved beyond merely “against people” and “against property.” Criminal activity can now be classified by motivation factors: passion or greed. This textbook deals with crimes related to the latter, crimes motivated by money.

With this new view of crime comes the need for a new approach to dealing with criminal activity—the financial investigative approach. Gone are the days when the headlines read “James Gang Robs Bank.” Today we are more likely to see a headline that reads “International Bank Implicated In Money Laundering Scheme.” A special type of investigator is needed to deal with these crimes. This investigator must be able to use the investigative techniques of the past in combination with a new set of techniques. These new techniques focus on financial dealings. Throughout this textbook, you will learn about the techniques used by the financial investigator. But first, you will be provided with an introduction to the financial investigative approach. This chapter begins with a review of some of the more sensational headlines of the time. It will become clear that a new approach to criminal investigation is needed. You will then be provided with a general overview of the financial investigative approach and we will look into the types of crime where the approach is applicable.
The knowledges and skills required of a financial investigator will be identified and then the chapter concludes with a look at Federal government agencies that employ financial investigators.

After studying Chapter 1, you should be able to:

- State why there is a need for a new investigative approach.
- Provide a general overview of the financial investigative process.
- Identify the skills required of a financial investigator.

Today, the overwhelming majority of crimes committed in America are motivated by money. Criminal activity is directed toward making money in a way fashioned not to get caught. Although this is not a revolutionary concept to the experienced law enforcement officer, the importance of this fact is commonly disregarded. In today’s law enforcement, a new investigative approach is emphasized along with a new type of investigator. This approach and this type of investigator are the focus of this chapter and this text.

**A New Investigative Approach**

It seems that we cannot pick up a newspaper, listen to a radio, or watch television without learning about some crime that has been alleged or committed. Crime is page-one news. It seems to be everywhere. Let’s recall some of the major headlines and sensational stories that appeared in the news in the late 1980s and early 1990s. For example:

- Ten-term Congressman Mario Biaggi was sentenced to eight years in prison and fined $242,000 for 15 felony convictions ranging from racketeering to obstruction of justice and bribery. Biaggi was involved in the Wedtech scandal. Wedtech paid millions of dollars in bribes to public officials to obtain no-bid federal contracts.

- Hotel queen Leona Helmsley was convicted of tax evasion and sentenced to four years in prison. It seems she and her hus-
band avoided paying more than $1.7 million in federal and state taxes from 1983 through 1985.

- Ivan Boesky was sentenced to three years in prison and paid $100 million in fines for insider trading.

- Michael Milken, king of the junk bond, was indicted on 98 counts involving racketeering, insider trading, and assorted securities fraud. He pleaded guilty to six counts and the government dropped all other charges. Milken was sentenced to 10 years in prison and agreed to pay $600 million in penalties.

- Operation Ill Wind, an investigation into Pentagon procurement fraud, impacted individuals as well as corporations. Among the casualties of the probe were Unisys Corporation and Melvyn Paisley. Unisys agreed to pay $190 million in fines for having bribed its way to hundreds of millions of dollars worth of defense contracts. Paisley, a former assistant secretary of the Navy, admitted he sold his influence for bribes and leaked secret government information to defense firms bidding on weapons contracts.

- The savings and loan scandal rocked America. The collapse of the Lincoln Savings and Loan Association alone will cost the American taxpayers $2.6 billion.

The list could go on and on! And what do all of the crimes described above have in common? Money! It seems like most of today's criminal activity either involves money or money is its main motivator. And many of the crimes depicted by today's headlines are crimes that cannot be solved solely by the use of traditional investigative techniques.

In the past, police relied on investigative tools such as crime scene analysis, physical evidence, fingerprint identification, eyewitness accounts, informants, and confessions of the offender to supply the understandable proof of the crime. These general investigative techniques work best in situations where a crime has been committed and then law enforcement tries to find the criminal. However, will these tools work when the criminal is known and authorities begin an investigation to prove the crime?
Infamous mobster Al Capone wasn’t easy to catch. But when IRS Special Agents, who are trained accountants, stepped in and charged him with tax evasion, this crime czar’s career came to an end. Proof that sometimes only the accountant can apprehend the criminal.

For example:

- Organized crime legends like Al Capone, Lucky Luciano, John Gotti, and Frank Balesstrieri operated for years with relative impunity. How does law enforcement prove criminal activity when informants are killed, eye witnesses threatened, and confessions are nonexistent?

- Money launderers, tax evaders, and crooked politicians are for the most part respected pillars of society. How does law enforcement investigate the criminal activities of people like former Vice-President Spiro Agnew and rock and roll legend Chuck Berry? These are people whose power rivals that of law enforcement itself.

To answer these questions, it is necessary to go beyond the mere inclusion of a few new tools in law enforcement’s investigative arsenal. A brand new approach is called for in light of the evolution of crime in America—a financial investigative approach. The growth of money-motivated crimes mandates the need for financial investigations. The future success of law enforcement is contingent upon its ability to conduct financial investigations in conjunction with general criminal investigations.

**What’s Involved in the Financial Investigative Approach?**

The major goal of a financial investigator is to identify and document specific events involving the movement of money during the course of a crime. Suppose an accountant is suspected of embezzling money from her employer. A financial investigator would determine what accounts she is taking the money from, when she took it, and where she is putting it. If the investigator is able to identify these events and link them together, he or she will have the basis of proof indicating the commission of a crime. If the events cannot be identified and linked together, the investigation may support the determination to discontinue further inquiry into the matter.

Financial investigations by their very nature are record intensive; specifically, records pointing to the movement of money,
Bank account information (checking and savings account records), motor vehicle registrations (title, place of purchase, and lien-holder records), and real estate files (records showing mortgages and deeds records) are documents or records commonly found in this type of investigation. However, records such as computer disks, utility bills, divorce decrees, and credit card carbons can play important roles in financial investigations. Any record that pertains to or shows the paper trail of events is important to a financial investigation.

**Crimes with a Financial Aspect**

Now that you have a general understanding of what's involved in the financial investigative approach, let's identify some criminal activities where the application of the approach would be appropriate. The list below identifies and describes some crimes that are financial in nature.

- **Fraud.** Fraud is a generic term embracing all the ways one person can falsely represent a fact to another in order to induce that person to surrender something of value. Former television evangelist and PTL leader, Jim Bakker, was convicted of defrauding followers by offering $1,000 "partnerships" that promised a
lifetime of lodging rights at his glitzy Heritage USA theme park in Fort Mill, South Carolina. Between 1984 and 1987, 153,000 partnerships were sold but only 258 rooms were available. It’s obvious that there were not enough rooms for the number of partners that signed up. In fact, a reservations supervisor testified that in any month during Bakker’s last year at the PTL, as many as 3,700 lifetime partners were denied accommodations at the theme park.

- **Tax evasion.** Tax evasion occurs when a person commits fraud in filing or paying taxes. Baseball legend Pete Rose was convicted of tax evasion. He failed to report $354,968 worth of income between 1984 and 1987.

- **Bribery.** Bribery occurs when money, goods, services, information, or anything else of value is offered with the intent to influence the actions, opinions, or decisions of the taker. You can be charged with bribery whether you offer the bribe or accept it. Jimmy Hoffa was convicted of bribing a juror who served at one of his trials.

- **Embezzlement.** Embezzlement occurs when a person who has been entrusted with money or property appropriates it for his or her own use and benefit. A former budget analyst with the U.S. Information Agency embezzled $16,234 from the agency by submitting bogus requests for cash advances which were supported by fake vendor receipts he created on an office computer. That budget analyst was in a position where he would be trusted with the agency’s money. Instead, he decided to take some of the money for himself.

- **Larceny.** Larceny occurs when one person wrongfully takes another person’s money or property with the intent to appropriate, convert, or steal it. If someone steals your car and then sells it, he or she has committed larceny.

- **Forgery.** Forgery occurs when a person passes a false or worthless instrument, such as a check or counterfeit security, with the intent to defraud or injure the recipient. An assistant bookkeeper with Real Estate Magazines, Inc. was convicted of stealing $54,000 from the company by cashing checks on which she forged the signature.
• **Counterfeiting.** Counterfeiting occurs when someone copies or imitates an item without having been authorized to do so and passes the copy off for the genuine or original item. We often hear of counterfeit money. But the next time you buy an item of designer clothing or pay for some prescription medication, make sure it’s the real thing!

• **Blackmail.** Blackmail is a demand for money or other considerations under threat to do bodily harm, to injure property, to accuse of crime, or to expose disgraceful defects. Suppose a politician has a skeleton in his closet and he’d rather keep it there. Someone else knows the politician’s secret and threatens to tell the world unless she receives $25,000. That’s blackmail.

• **Extortion.** Extortion occurs when one person illegally obtains property from another by actual or threatened force, fear, or violence, or under cover of official right. A Washington, DC tax auditor was convicted of extortion when it was revealed that he threatened to assess high taxes against a small Ethiopian-owned business unless the owner gave him some money.

• **Kickback.** A company is awarded a contract to build a dormitory on a college campus. One day the president of the college receives a $3,000 payment from the company. The president calls the company’s vice-president of finance, thanks him for the payment, and says he’s glad the two parties were able to work out a deal—the contract for a few $3,000 payments. This is an example of a kickback scheme. A kickback occurs when the person who sells an item pays back a portion of the purchase price to the buyer (or a public official).

• **Racketeering.** Charges of racketeering can cover a wide range of things, but the bottom line is that racketeering is running an illegal business for personal profit.

• **Insider trading.** Insider trading occurs when a person uses “inside” or advance information to trade in shares of publicly held corporations.

• **Money laundering.** Money laundering is the investment or transfer of money from racketeering, drug transactions, and other
illegal sources into legitimate channels so that its original source cannot be traced.

The crimes listed above are what we normally think of when we hear the term “financial crime.” But financial evidence is also used to build cases against persons suspected of kidnapping, espionage, murder, and arson, to name a few.

Financial Investigation Skills

As you see, a financial investigator can be involved in all sorts of criminal investigations. This investigator brings a unique set of skills to any investigation. The successful financial investigator draws on different aspects from many professions to blend information in ways, shapes, and forms never imagined by his or her predecessors. Financial investigators need to be part cop, part investigator, part accountant, part sociologist, part computer operator, and part attorney in order to combat and resolve the major crimes of today and detect the crimes of the future. The ability to understand the interdependence between financial events and criminal activity is the essence of a successful financial investigator. Accordingly, a financial investigator needs to:

- Know the statute(s) that define the crime(s) under investigation
- Understand concepts relating to the collection and admissibility of evidence
- Locate and interpret records that contain financial information
- Trace the movement of money through a financial institution
- Use accounting and auditing techniques
- Use methods of proof to link financial events together
- Conduct financial interviews, record their findings, and summarize them in report form
• Use investigative techniques such as surveillance and undercover operations

Each of the items listed above is a topic in this textbook. When you complete this text, you will have a good understanding of what's involved in conducting a financial investigation, and, perhaps along the way, you will pick up a few financial investigative skills.

Today's Financial Investigators

The emergence of law enforcement's involvement in financial investigations is reflected in the evolution of the Internal Revenue Service's Criminal Investigation Division. Created in 1919 to investigate fraud and dishonesty among IRS employees, this Division has grown to over 2,800 agents and is the acknowledged leader in the fields of tax fraud and money laundering investigation. The ability of the special agents to trace financial transactions has taken them a long way from tax returns and into the middle of every major financial investigation in America—the Savings and Loan Scandal, junk bond frauds, the Iran Contra Affair, spy trials, and drug and organized crime prosecutions.

Many other federal agencies also employ financial investigators. These agencies expand in size, function, and authority as laws are developed and policies to emphasize enforcement of various crimes are devised. In the 1930s, emphasis was on bootlegging and the emerging Mafia. In the 1950s, organized crime's involvement in political corruption was the issue. The 1980s targeted the "War on Drugs." The 1990s are faced with the Savings and Loan and Wall Street scandals. For this reason, the size and employment needs of the agencies fluctuate to respond to current issues. The following is a list of those federal agencies and their major investigative authority which most commonly employ full-time financial investigators or utilize financial techniques in its investigations.

• **U.S. Customs Service.** The Customs Service has come to mean many things to many people. To the international traveler, Customs is the men and women who examine personal luggage
and facilitate the entry of passengers upon their return to the United States. To the importer, Customs provides advice, and protection and control of merchandise shipped into the country. To the smuggler, Customs is the planes, vehicles, and vessels constantly monitoring the nation's perimeters to thwart attempts at illicit entries of merchandise, including narcotics and dangerous drugs. Within Customs, there is an increasing emphasis being placed on the investigation of schemes that defraud the U.S. Government of rightful revenue—the illicit transportation of currency, and export violations including the illegal shipment of arms and technologies.

- **U.S. Secret Service.** Along with their protection services, the Secret Service enforces the law against counterfeiting currency, coins, or securities of the United States. The agency also enforces the laws against fraud or forgery of government checks or bonds, and other securities and obligations of the United States. Other investigative responsibilities include credit and debit card fraud, computer fraud, and electronic fund transfer fraud.

- **U.S. Marshal Service.** The U.S. Marshal Service provides protection to the Federal courts, judges, jurors, and witnesses; apprehends Federal fugitives; executes court orders; manages and sells property seized from criminals; operates the Witness Security Program; and administers the National Asset Seizure and Forfeiture Program. Deputies assigned to the forfeiture program establish computer-assisted bookkeeping procedures and inventory control systems to account for receipt, storage, and disposition of seized assets.

- **Bureau of Alcohol, Tobacco, and Firearms.** The Bureau of Alcohol, Tobacco, and Firearms is an agency within the Treasury Department. The agency is made up of two sections: Compliance Operations and Law Enforcement. The Law Enforcement Section investigates tax evasion, operations carried on without a license or permit, and the illegal use of firearms, ammunition, and explosives.

- **Office of the Inspector General.** OIG agents investigate fraud, waste, and government abuses. The agency serves as the investigative watchdog for over fifty federal agencies. OIG agents.
by their very nature, are financially-orientated. Making sure that
government contracts, procurements, and payments are completed
as designed requires financial analysis, accounting and auditing
techniques, and the understanding of business principles.

- **Federal Bureau of Investigation.** The FBI has jurisdiction
over 200 types of cases including white-collar crime, organized
crime, foreign counter-intelligence, political corruption, civil
rights violations, terrorism, Federal drug violations, kidnapping,
bank robbery, and interstate criminal activity.

- **Internal Revenue Service.** The IRS is responsible for
encouraging and achieving the highest voluntary compliance with
tax laws and regulations. In addition to investigating violations of
federal tax laws, special agents with the Internal Revenue
Service’s Criminal Investigation Division investigate money laun-
dering offenses and conduct asset forfeiture investigations. On
many occasions, special agents lend their expertise to multi-
agency investigations.

- **Drug Enforcement Administration.** The DEA is the lead law
enforcement agency having the responsibility of combating drug
abuse. The agency enforces federal drug control laws and concen-
trates on high-level drug dealers, nationally and internationally.

- **Postal Inspection Service.** The United States Postal Service
enforces the laws and regulations governing the mail system
through its Inspection Service. The Inspection Service investig-
gates all alleged violations of individuals suspected of mail fraud
and mail theft. The Inspection Service is also involved in investiga-
tions concerning child pornography and the illegal transport of
controlled substances through the mail.

- **Nonfederal Agencies.** State and local law enforcement
agencies are beginning to approach criminal investigations from a
financial perspective. Designations such as “White Collar Crimes
Squad,” “Financial Crimes Unit,” and “Credit Card Fraud Team”
are starting to join the traditional detective’s classifications.
Additionally, on-the-job training of local and state officers
(including attorneys, investigators, and management officials) in
financial investigative techniques is already taking place.
Summary

Today, gambling organizations, drug cartels, and “mom and pop grocery stores” are at ease with the personal computer and its capabilities. Corporate fraud, insider trading violations, and the savings and loan scandals have been completed by the creation of phony shell companies, ghost employees, and non-existent nominees. Sophisticated money launderers, large scale robbery rings, and embezzlement and kickback operations maintain elaborate accounting records that often are the envy of CPAs. Big-time crime operates as a full-time business. To resolve today’s crimes and prepare for the challenges of tomorrow, law enforcement requires an understanding of financial information. Whether searching for leads in society’s back alleys or board room suites, financial information is going to be discovered during the course of a criminal investigation. Consequently, law enforcement agencies are seeking officers with proficiency in financial analysis.

A major challenge for financial investigators is to provide investigative findings which present evidence of complex crimes in simple and understandable terms which are comprehensible by a jury. Consider the world of international high finance with its shell corporations, universal letters of credit, offshore banks, electronic transfers between numbered Swiss bank accounts, and interlocking reciprocal trade arrangements. To a juror, this is almost unfathomable. It’s up to the prosecution team, of which an investigator is part, to dissect these complex ideas and translate them into simple thoughts that everyone can understand. It’s pretty easy to understand “he was caught smuggling a suitcase full of $100 bills out of the country.”

As you continue through this textbook, bear in mind that as law enforcement improves its techniques for detecting, combating, and resolving criminal activity, criminals will become more sophisticated and innovative in their endeavors. You can be sure that law enforcement practitioners will never work themselves out of a job.
CHAPTER 2

Laws Related to Financial Crimes

Chapter 1 provided a general overview of certain crimes that are normally thought of as financial in nature. In this chapter, we will identify some of the federal statutes, the formal written laws, that underlie particular financial crimes. Chapter 1 described embezzlement as the unlawful appropriation of money or property by a person who has been entrusted with those items. In Chapter 2, you'll see that there are several statutes related to embezzlement. As an investigator, you must be aware of what statute the accused is suspected of violating. Also, the commission of one crime could include the violation of several different statutes. For example, if someone is suspected of embezzlement from a bank, that person might also be suspected of tax evasion. Both of these violations are subjects of federal statutes.

You may be wondering why an investigator should be aware of the statutes that are related to a suspected criminal activity. After all, lawyers deal with things like statutes. So why does a financial investigator have to have knowledge of this area? Well, it's because statutes contain the elements of a crime—those parts of the crime that must be proven in order to gain a conviction. Once an investigator has identified the elements of a crime, he or she can focus evidence collection efforts on gathering relevant information to prove that the accused committed the crime in question.

After studying Chapter 2, you should be able to:

- Define or describe selected terms related to the field of law.
Terms and Concepts

Before we begin a discussion of specific laws of interest to a financial investigator, we should review some basic concepts related to law. First, we will answer the question “What is law?” Next, different categories of law will be identified. Finally, some concepts related to crime will be discussed.

What is Law?
If you were to ask 10 people to define “law,” you probably would get 10 different answers. Someone will see “law” as the police officer who hands out speeding tickets. Another person will see “law” as a judge sentencing a person to prison. And another will see “law” as a lawyer involved in a trial. As different as the 10 responses might be, they will all have one thing in common—a basic effort to place the affairs of society in order. And generally, that is what law is—a formal means of social control. It is intended to guide or direct human behavior toward ends that satisfy the common good. Laws embody moral principles and express the rights and obligations that members of society hold toward one another. They provide for individual protection and for the common well-being.

Categories of Law
In the legal world, there are many categories of law. There is common law, the system of law that originated in England and was the body of law carried by the earliest English settlers to the American colonies. There is case law, the practice of judges and
lawyers looking into decisions from past cases to determine the state of the law for the case they are currently handling. The financial investigator is most interested in substantive law and two other categories of law derived from it: criminal and civil law. Each of these categories is described below.

- **Substantive law.** Substantive law is the body of law that creates, discovers, and defines the rights and obligations of each person in society. Substantive law is composed of the statutes and ordinances enacted by federal, state, and local legislative bodies and any regulations proclaimed thereunder, in addition to each state and federal constitution. Case law is part of the body of substantive law in the United States. *Criminal and civil laws are derived from substantive law.*

- **Civil law.** Civil law is the body of law that deals with conflicts and differences between individuals. These private wrongdoings are often referred to as *torts.* Remedies are usually in the form of money damages or court-ordered actions to do, or refrain from doing, certain specific things.

- **Criminal law.** Criminal law is that branch of the law that deals with offenses of a public nature, that is, wrongs committed against the state. Such laws may be imposed by federal or state statutes and usually provide penalties, fines, and/or incarceration for their breach.

### Classifications of Crime

Crimes can be distinguished between those that are felonies and those that are misdemeanors. A *felony* is a serious crime punishable by incarceration for a period exceeding one year, a fine, and loss of certain civil rights (right to vote and to hold public office). *Misdemeanors* are crimes less serious than felonies and usually provide for incarceration periods of less than one year. Fines also may be imposed.

Crimes also can be classified as to those that are *mala in se* and those that are *mala prohibita.* Crimes that are *mala in se* are said to be evil or immoral in and of themselves. They are “offenses against human conscience.” Common crimes of this
type include felonies such as murder and rape. Crimes that are mala prohibita are offenses that are made criminal by statute but in and of themselves are not necessarily immoral. Mala prohibita crimes include most violations of government regulations, environmental laws, and even traffic offenses. Crimes that are mala in se often require proof of criminal intent, or, in legal terms, mens rea. Crimes that are mala prohibita don’t usually require proof of criminal intent.

An Introduction to Statutes and the Elements of a Crime

Suppose you’re an investigator for a federal agency and your boss asks you to investigate a case of alleged embezzlement. “Get right on it,” she says. Where do you begin? Well, before you put your investigative skills into action, you’ve got to determine what law(s) the suspect is allegedly violating. But you’re an investigator, not a lawyer. Why do you need to be familiar with the laws underlying a criminal violation? Because you need to be aware of the elements of the crime. The elements of a crime are those constituent parts that must be proven to sustain a conviction; that is, sufficient to make a prima facie case. With a criminal violation, a prima facie case is proven when evidence has been presented which proves, beyond a reasonable doubt, the elements of the crime. In Chapter 3, you’ll read about collecting evidence and its admissibility in court. For now, we will key in on two other skills required of an investigator: interpreting the law(s) that underlie a crime and identifying the elements of the crime. But before you can do these two things, you must be able to locate the law(s) that define a crime.

United States Code

In 1925, Congress authorized the preparation of the United States Code, a multi-volume publication of the text of statutes enacted by Congress. The first set came out in 1926 and consisted four volumes. As of 1988, the United States Code consists of 19 volumes of statutes and several supplementary texts. The United
Financial investigations have been the most effective method of "following the money" to halt tax evasion since the United States Congress enacted the Revenue Act of 1913. The above poster, from the World War II era, solicits the support of American taxpayers in combating tax evasion.

States Code is updated every six years with cumulative supplement volumes being issued during intervening years. You can usually find the United States Code in the reference section of any library.

The statutes are codified into 50 titles. Codification is the process of collecting and arranging laws by subject. For example, Title 2 is called "The Congress" and statutes relating to the election of senators and representatives, the organization of Congress, and the regulation of lobbying are found here. Titles may be further subdivided into parts, subchapters, and/or chapters.

Suppose you’re reading a legal document and you came across the phrase “he was convicted of violating 26 U.S.C. § 7201.” To find out what this person was convicted of, you need to be able to interpret what is meant by “26 U.S.C. § 7201.” It’s easy—U.S.C. stands for United States Code, 26 is the title number, and 7201 is the statute reference. You locate the volume of the United States Code that contains Title 26, turn to the statute referenced by the number 7201 and find the following:

§ 7201. Attempt to evade or defeat a tax or the payment thereof

Any person who willfully attempts in any manner to evade or defeat any tax imposed by this title or the payment thereof shall, in addition to other penalties provided by law, be guilty of a felony and, upon conviction thereof, shall be fined not more than $250,000 ($500,000 in the case of a corporation) or imprisoned not more than 5 years, or both, together with the costs of prosecution.

Upon reading the statute, you determine that the person previously referenced was convicted of tax evasion. But what did the investigator who worked on the case have to prove to show that the person committed tax evasion? In other words, what are the elements of the crime?

Elements of a Crime

Earlier, we stated that the elements of a crime are those constituent parts that must be proven to sustain a conviction. Well, to
gain a conviction for evasion of taxes, there are three elements that must proven beyond a reasonable doubt. These elements are:

- The suspect owes additional taxes
- The suspect attempted to evade the taxes
- The suspect willfully attempted to evade the taxes

It is important that the financial investigator be able to use the United States Code to locate statutes, however, with the complex way statutes are written, it is not always easy to sort out the elements of the crime. If in doubt, discuss the elements with the prosecuting attorney. An understanding of these elements will enable an investigator to focus his or her evidence collection efforts on pertinent information.

Since criminal statutes may be enacted by any level of government—federal, state, and local—it is important to remember that the elements of any particular crime may vary between the three different jurisdictions. Investigators must be knowledgeable about the statute used for criminal prosecution so that the appropriate evidence can be collected.

The remainder of the chapter deals with statutes that are of interest to the financial investigator. Selected statutes from the following four United States Code titles will be discussed:

- Title 15, Commerce and Trade
- Title 18, Crimes and Criminal Procedure
- Title 26, Internal Revenue Code
- Title 31, Money and Finance

**Federal Statutes: Title 18, Crimes and Criminal Procedure**

Title 18 contains federal criminal laws that range from the trivial—a statute barring the unauthorized use of the Smokey the Bear emblem, to the monumental—the criminal provisions of the Antitrust laws. Selected statutes, along with the elements of the
§ 201. Bribery of public officials and witnesses

(a) Whoever—

(1) directly or indirectly, corruptly gives, offers or promises anything of value to any public official... or offers or promises any public official... to give anything of value to any other person or entity, with intent —

(A) to influence any official act; or

(B) to influence such public official... to commit or aid in committing, or collude in, or allow... any fraud, or make opportunities for the commission of any fraud, on the United States; or

(C) to induce such public official... to do or omit to do any act in violation of the lawful duty of such official... shall be fined not more than three times the monetary equivalent of the thing of value, or imprisoned for not more than fifteen years, or both...

Bribery, Graft, and Conflicts of Interest

Bribes are given to influence the taker’s actions, opinions, or decisions. Title 18 U.S.C. § 201 makes it illegal for a public official or a witness to accept a bribe and for a person to offer a bribe to either of these parties. Section (b)(1), the part of the statute making it illegal to bribe a public official, is shown on the next page.

The elements of the crime of bribing a public official include the following:

- The suspect knowingly offered a bribe to a public official
- The bribe was intended to influence the public official’s performance of an official act or lawful duty
§ 287. False, fictitious, or fraudulent claims
Whoever makes or presents to any person or officer in the civil... service of the United States, or to any department or agency thereof, any claim upon or against the United States, or any department or agency thereof, knowing such claim to be false, fictitious, or fraudulent shall be fined not more than $250,000, or imprisoned not more than five years, or both.

§ 371. Conspiracy to commit offense or to defraud the United States
If two or more persons conspire either to commit any offense against the United States, or to defraud the United States, or any agency thereof in any manner or for any purpose, and one or more of such persons do any act to effect the object of the conspiracy, each shall be fined not more than $250,000 or imprisoned not more than 5 years, or both. If, however, the offense, the commission of which is the object of the conspiracy, is a misdemeanor only, the punishment for such conspiracy shall not exceed the maximum punishment provided for such misdemeanor.

Claims and Services in Matters Affecting Government
We must protect the funds and property of our government from fraudulent claims. Suppose someone is running a scheme where he or she files federal income tax returns for people who do not exist, and then pockets the refunds. This person is filing false claims against the Internal Revenue Service. Title 18 U.S.C. § 287 makes this illegal.

The elements of the crime include the following:

- The suspect made or presented a claim against the United States or any of its departments or agencies
- The suspect knew that the claim was false, fictitious, or fraudulent

Conspiracy
Sometimes, two or more people agree to join forces and carry out some illegal activity. Title 18 U.S.C. § 371 protects society from these mutual agreements. According to the statute, the illegal activity only has to be conspired to, it doesn’t actually need to be accomplished. However, at least one of the co-conspirators must have carried out one “overt act” in furtherance of the conspiracy. The overt act need not be criminal in itself. It may be as innocuous as making a phone call or writing a letter.

Conspiracy counts are favored by the prosecution because they provide certain evidentiary and pleading advantages. If a conspiracy is shown, the acts and statements of one co-conspirator may be admitted into evidence against all, and each co-conspirator may be convicted for the underlying substantive offense.

A corporation cannot conspire with one of its own employees to commit an offense since the employee and employer are legally viewed as one. A corporation may, however, conspire with other business entities or third parties in violation of this statute.

The elements of the crime include the following:

- The conspiracy was willfully formed
- The suspect willfully became a member of it

26
• At least one of the conspirators knowingly committed at least one overt act in furtherance of the conspiracy

**Counterfeiting and Forgery**

Title 18 U.S.C. § 471 deals with the issue of committing fraud by doing things such as forging checks and making counterfeit money.

The elements of the crime include the following:

• A scheme to defraud

• The suspect willfully used a fake, forged, altered, or counterfeit U.S. obligation or security

**Embezzlement and Theft**

Chapter 31 of Title 18 contains several statutes related to embezzlement and theft. While the financial investigator will be interested in each of the statutes, only two are listed in this text.

**Theft or Embezzlement From the Government**

Title 18 U.S.C. § 641 states that it is illegal to embezzle, steal, illegally appropriate, or knowingly convert anything of value from the United States government. It is also illegal to receive, conceal, and retain these items.

The elements of the crime include the following:

• Intent

• Property belonged to the United States

• The suspect knew that property belonged to the United States

**Theft or Embezzlement by Bank Employees**

Title 18 U.S.C. § 656 focuses on theft, embezzlement, and misapplication of funds by employees and officers of banks. As you can see from the two statutes concerning embezzlement and theft, the value of the embezzled or stolen item impacts the punishment. If the value is less than $100, the fine does not exceed $1,000 and
§ 656. Theft, embezzlement, or misapplication by bank officer or employee
Whoever, being an officer, director, agent, or employee of, or connected in any capacity with, any Federal Reserve bank, embezzles, abstracts, purloins, or willfully misapplies any of the moneys, funds, or credits of such bank... shall be fined not more than $1,000,000 or imprisoned not more than thirty years, or both; but if the amount embezzled, abstracted, purloined or misapplied, does not exceed $100, he shall be fined not more than $1,000 or imprisoned not more than one year, or both.

§ 872. Extortion by officers or employees of the United States
Whoever, being an officer or employee of the United States... under the color or pretense of office or employment commits or attempts an act of extortion, shall be fined not more than $250,000 or imprisoned not more than three years, or both; but if the amount extorted or demanded does not exceed $100, he shall be fined not more than $500 or imprisoned not more than one year, or both.

§ 873. Blackmail
Whoever, under threat of informing, or as a consideration for not informing, against any violation of any law of the United States, demands or receives any money or other valuable thing, shall be fined not more than $2,000 or imprisoned not more than one year, or both.

the prison time is less than one year. If the value is $100 or more, the fines and amount of prison time are much steeper.

The elements of the crime include the following:

- Intent
- The suspect is a bank employee or officer
- The suspect attempted to defraud the bank

Extortion and Threats
We have to protect ourselves from being forced to do things against our will. Chapter 41 of Title 18 contains statutes that prohibit the use of threats and force. Three of the statutes are listed below.

Extortion
Title 18 U.S.C. § 872 states that government employees and officers cannot use their employment status with the government to gain money or property through force or threats.

The elements of the crime include the following:

- Intent
- The suspect is an officer or employee of United States government
- The suspect used his or her employment with government as part of the extortion scheme
- Extortion is committed or attempted

Blackmail
Title 18 U.S.C. § 873 prohibits the use of blackmail to keep someone from informing of criminal violations. It also prohibits someone from blackmailing another by threatening to expose that person’s criminal activities.

The elements of the crime include the following:

- Intent
- The suspect made threats
§ 874. Kickbacks from public works employees

Whoever, by force, intimidation, or threat of procuring dismissal from employment, induces any person employed in the construction, prosecution, completion or repair of any public work financed in whole or in part by loans or grants from the United States, to give up any part of the compensation to which he is entitled under his contract of employment, shall be fined not more than $250,000 or imprisoned not more than five years, or both.

Kickbacks

Title 18 U.S.C. § 874 prevents a worker on a governmental project from being compelled by force, threat, intimidation, or dismissal to give up part of the compensation he or she received or was entitled to receive.

The elements of the crime include the following:

- Intent
- The suspect made threats
- Compensation for threats would be from loans or grants provided by the government
- Public work financed, at least partially, by the government

§ 1001. False statements of entries generally

Whoever, in any matter within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals or covers up by any trick, scheme, or device a material fact, or makes false, fictitious or fraudulent statements or representations, or makes or uses any false writing or document knowing the same to contain any false, fictitious or fraudulent statement or entry shall be fined not more than $250,000 or imprisoned not more than five years, or both.

Fraud and False Statements

Title 18 contains a number of related provisions which punish false or fraudulent statements, made either orally or in writing, to various federal agencies and departments. The principal statute is Title 18 U.S.C § 1001. It is most often used to prosecute false statements made to law enforcement or regulatory officials in the course of an official investigation, or on applications for federal employment, credit, visa, or passport applications, etc. This statute also pertains to violations relating to altered or false documents submitted to agencies of the federal government with the intent to defraud the United States.

A statement is "false" for the purposes of the statute if it was known to be untrue when made. A statement is "fraudulent" if it was known to be untrue and was made with the intent to deceive a government agency. The agency need not actually have been deceived, nor must the agency have in fact relied upon the false statement, for a violation to occur. The statement must have been "material," that is, capable of influencing the agency involved.

The elements of the crime include the following:

- Willfulness
- The suspect knew that the statement was false
- One or more of the following
§ 1341. Frauds and swindles

Whoever, having devised or intending to devise any scheme or artifice to defraud, or for obtaining money or property by means of false or fraudulent pretenses, representations, or promises, or to sell, dispose of, loan, exchange, alter, give away, distribute, supply, or furnish or procure for unlawful use any counterfeit or spurious coin, obligation, security, or other article, or anything represented to be or intimated or held out to be such counterfeit or spurious article, for the purpose of executing such scheme or artifice or attempting to do so, places in any post office or authorized depository for mail matter, any matter or thing whatever to be sent or delivered by the Postal Service, or takes or receives therefrom, any such matter or thing, or knowingly causes to be delivered by mail according to the direction thereon, or at the place at which it is directed to be delivered by the person to whom it is addressed, any such matter or thing, shall be fined not more than $250,000 or imprisoned not more than 5 years, or both. If the violation affects a financial institution, such person shall not be fined more than $1,000,000 or imprisoned more than 30 years, or both.

— falsification or concealment of a material fact
— false statement
— false writing or entry

• Matter within jurisdiction of any U.S. agency

Mail Fraud

Chapter 63 of Title 18 contains statutes relating to the commission of fraud.

Mail Fraud

The mail fraud statute, Title 18 U.S.C. § 1341, is one of the most common criminal fraud statutes used by the financial investigator. This statute prevents the U.S. Postal Service from being used to carry out any scheme to defraud. The mailing itself does not need to contain the false and fraudulent representations, as long as it is an “integral” part of the scheme. What is considered integral or incidental depends on the facts of each case; generally any mailing which helps advance the scheme in any significant way will be considered sufficient.

The elements of the crime include the following:

• Intent
• Scheme to defraud
• Use of mails to further scheme
§ 1343. Fraud by wire, radio, or television

Whoever, having devised or intending to devise any scheme or artifice to defraud, or for obtaining money or property, by means of wire, radio, television communication and interstate or foreign commerce, shall be fined not more than $250,000 or imprisoned not more than 5 years, or both. If the violation affects a financial institution, such person shall not be fined more than $1,000,000 or imprisoned more than 30 years, or both.

§ 1344. Bank Fraud

(a) Whoever, knowingly executes, or attempts to execute, a scheme or artifice —
(1) to defraud a financial institution;
(2) to obtain any of the moneys, funds, credits, assets, securities or other property owned by or under the control of a financial institution by means of false or fraudulent pretenses, representations, or promises, shall be fined not more than $1,000,000 or imprisoned not more than 30 years, or both.

Wire Fraud

Title 18 U.S.C. § 1343 prevents someone from using television and radio, or phone lines (computer modems included) to defraud the public.

The elements of the crime include the following:

- Intent
- Scheme to defraud
- Use of interstate communications to further scheme

Bank Fraud

A relatively new federal statute makes it a crime to defraud, or attempt to defraud, a federally chartered or insured bank. Previously, such offenses were prosecuted under the more generic fraud statutes, such as mail or wire fraud. As in the mail and wire fraud statutes, the term “defraud” includes any misrepresentations or other conduct intended to deceive others in order to obtain something of value. The prosecution must prove only an attempt to execute this scheme, and need not show actual loss, or that the victim institution was actually deceived, or that the defendant personally benefitted from this scheme. The important aspect is the attempt.

The elements of the crime include the following:

- Intent
- Scheme to defraud a financial institution

Racketeering

Chapter 95 of Title 18 contains statutes related to money laundering. By definition, money laundering is the process by which one conceals the existence, illegal source, or legal application of income and then disguises that income to make it appear legitimate. This is taking “dirty money” and washing it to make it appear “clean”. Through these laws, the mere moving of money known by an individual to be the proceeds from some illegal activity creates a substantive criminal offense separate from the illegal activity itself. For the financial investigator, these statutes
Money Laundering

Title 18 U.S.C. § 1956 makes it a federal crime to launder money known to be the proceeds of specified unlawful activities, as defined by federal statutes. Note that only part of the statute [(a)(1)] is displayed.

The elements of the crime include the following:

- The suspect must conduct or attempt to conduct a “financial transaction”
- The suspect must know that the property involved in the transaction represents the proceeds of some form of unlawful activity
- The transaction must involve property which, in fact, represents the proceeds of “specified unlawful activity”
- The suspect must engage in the transaction with either—
  - the intent of promoting the carrying on of the “specified unlawful activity,” or—
  - the intent to engage in conduct constituting tax evasion under Title 26 U.S.C. § 7201 or tax fraud under Title 26 U.S.C. § 7206, or
  - knowledge that the purpose of the transaction, in whole or in part, was either to conceal or disguise the nature, location, source, ownership, or control of the proceeds of “specified unlawful activity;” or to avoid a transaction reporting requirement under State or Federal law

Transactions Involving Criminally Derived Property

Title 18 U.S.C. § 1957 states that it is unlawful to take part in, or attempt to take part in, monetary transactions involving criminally derived property that is of a value greater than $10,000 and is derived from a specified unlawful activity.
§ 1957. Engaging in monetary transactions in property derived from specified unlawful activity
(a) Whoever, in any of the circumstances set forth in subsection (d), knowingly engages or attempts to evade in a monetary transaction in criminally derived property that is of a value greater than $10,000 and is derived from specified unlawful activity, shall be punished as provided in subsection (b).

(b)(1) Except as provided in paragraph (2), the punishment for an offense under this section is a fine under title 18, United States Code, or imprisonment for not more than ten years or both.

The elements of the crime include the following:

- The suspect must knowingly engage in a “monetary transaction.” A monetary transaction is any deposit, withdrawal, transfer, or exchange, in or affecting interstate or foreign commerce, of funds or a monetary instrument by, through, or to a financial institution. It excludes “any transaction necessary to preserve a person’s right to representation as guaranteed by the sixth amendment to the Constitution.”

- The value of funds or monetary instrument involved in the transaction or attempted transaction must exceed $10,000.

- The suspect must know that the funds or monetary instruments involved in the transaction or attempted transaction constitute “criminally derived property.”

- The property involved in the transaction must, in fact, constitute the proceeds of “specified unlawful activity.”

- The offense must take place in the United States, in the special maritime and territorial jurisdiction of the United States, or can take place outside the U.S. if the subject is a United States person—as defined in Title 18 U.S.C. § 3077, except for the class described in paragraph (2)(D) of that section.

Racketeer Influenced and Corrupt Organizations (RICO)

RICO is probably the most well known and controversial federal statute in use today. Title 18 U.S.C. § 1961 was originally enacted in 1970 to fight organized crime’s infiltration of legitimate business. Its powerful criminal and civil provisions have been used in a wide range of fraud cases. When applied in financial cases, the statute outlaws, in general, the investment of ill-gotten gains in another business enterprise, or the acquisition of an interest in an enterprise through certain specified unlawful activities. These unlawful activities include: illegal interstate gambling, trafficking in illegal substances, money laundering, prostitution, and other specific illegal activities delineated by Congress. Criminal penalties include stiff fines and jail terms, as well as forfeiture of all
illegal proceeds or interests acquired. Civil remedies include treble damages, attorney’s fees, dissolution of the offending enterprise, and other remedial measures.

RICO’s complexity is due, in part, to efforts to avoid constitutional problems which voided attempted “anti-racketeer” legislation in the 1930s. The “1930 provisions” were found to be unconstitutional because they punished the mere “status” of being a gangster, rather than any particular wrongful conduct. RICO avoids this impediment by basing its definition of “racketeering” and enhanced penalties on “patterns” of conduct defined in the statute. The most controversial aspect of RICO is its civil provisions. Civil actions may be brought by the government or any private party injured by a defendant’s business or property. Critics complain that private party suits have been used to reach “deep pocket” defendants, such as accounting firms who cannot be characterized as racketeers, and to coerce unwanted settlements from blameless defendants fearful of possible treble damage judgments. A treble damage judgment involves the payment of three times the amount of damages to the entity damaged by the defendant. Supporters contend that a plaintiff cannot recover unless he or she proves fraud or certain other identified criminal acts. Several bills to repeal or amend RICO, particularly these civil provisions, have been introduced in Congress in recent years.
Federal Statutes: Title 26, Internal Revenue Code

§ 7201. Attempt to evade or defeat a tax or the payment thereof
Any person who willfully attempts in any manner to evade or defeat any tax imposed by this title or the payment thereof shall, in addition to other penalties provided by law, be guilty of a felony and, upon conviction thereof, shall be fined not more than $250,000 ($500,000 in the case of a corporation) or imprisoned not more than 5 years, or both, together with the costs of prosecution.

§ 7203. Willful failure to file return, supply information, or pay tax
Any person required under this title to pay any estimated tax or tax, or required by this title or by regulations made under authority thereof to make a return, keep any records, or supply any information, who willfully fails to pay such estimated tax or tax, make such return, keep such records, or supply such information, at the time or times required by law or regulations, shall, in addition to other penalties provided by law, be guilty of a misdemeanor and, upon conviction thereof, shall be fined not more than $25,000 ($100,000 in the case of a corporation), or imprisoned not more than 1 year, or both, together with the costs of prosecution.

The Internal Revenue Code is the body of law which codifies all federal tax laws including income, estate, gift, excise, etc. taxes. Our focus is on Chapter 75: Crimes, Other Offenses, and Forfeitures.

Crimes, Other Offenses, And Forfeitures

The IRS is responsible for ensuring that we comply with tax laws and regulations. The statutes listed below deal with tax abuse and fraud.

Tax Evasion

Most individuals and corporations are required, by law, to pay taxes on earnings and other sources of income. Title 26 U.S.C. § 7201 states that it is illegal for any person to avoid paying taxes that they, or the corporation they represent, owe.

We covered the elements of this crime earlier; however, we shall revisit them here. The elements of the crime include the following:

- The suspect owes additional taxes
- The suspect attempted to evade the taxes
- The suspect willfully attempted to evade the taxes

Failing to File, Supply Information, or Pay Tax

Title 26 U.S.C. § 7203 basically states that if you are required to file a tax return, you must file it; if you are required to pay a tax, you must pay it; and if you are required to keep records or supply information concerning taxes, you must keep the records or supply the information.

If the suspect failed to file, the elements of the crime include the following:

- Duty to file
- Failure to file
- Willfulness
If the suspect failed to supply information, the elements of the crime include the following:

- Duty to supply information
- Failure to supply information
- Willfulness

If the suspect failed to pay taxes, the elements of the crime include the following:

- Duty to pay
- Failure to pay
- Willfulness

§ 7206. Fraud and false statement

Any person who—(1) Willfully makes and subscribes any return, statement, or other document, which contains or is verified by a written declaration that is made under penalties of perjury, and which he does not believe to be true and correct as to every material matter... shall be guilty of a felony and upon conviction, shall be fined not more than $250,000 ($500,000 in the case of a corporation) or imprisoned not more than 3 years, or both, together with the costs of prosecution.

Filing a False or Fraudulent Return

When you file your federal income tax form, you place your signature on it. In doing so, you state that the information presented on the form is accurate. Now, if you know that your return is not accurate, but you sign it anyway, you’re filing a fraudulent return in violation of Title 26 U.S.C. § 7206.

The elements of the crime include the following:

- The suspect made and subscribed under penalty of perjury
- The suspect knew that the statement was false or fraudulent
- Willfulness
Title 15 contains statutes related to the exchange, buying, or selling of goods, productions, and properties of any kind. There are three “acts” contained in Title 15 that are of particular interest to the financial investigator. They are discussed below.

**Securities Act of 1933**
The Securities Act of 1933 (Title 15 U.S.C. § 77 et seq) provides for registration of securities which are to be sold to the public and for complete information as to the issuer and stock offering. A **security** is a stock, bond, note, or other document that represents a share in a company or a debt owed by a company or government entity.

**Securities Exchange Act of 1934**
The Securities Exchange Act of 1934 (Title 15 U.S.C. § 78 et seq) governs the operation of stock exchanges and over-the-counter trading. It requires, among other things, publication of information concerning stocks which are listed on these exchanges.

Title 15 contains numerous statutes which prohibit false statements and other fraudulent activity in connection with security transactions. These laws contain civil and administrative remedies, enforced by the Securities and Exchange Commission (SEC), as well as criminal sanctions enforced by the Department of Justice. Whether a particular violation is prosecuted civilly or criminally depends in large measure on the degree of willfulness that can be proven.

**Electronic Funds Transfer Act**
An **electronic fund transfer** is a transaction with a financial institution by means of a computer, telephone, or electronic instrument. The Electronic Funds Transfer Act provides a basic framework establishing the rights, liabilities, and responsibilities of participants in electronic funds transfer systems. The act addresses the provision of individual consumer rights.
“Computer crime” is a new term in law enforcement, and the Electronic Funds Transfer Act is one of several statutes that relates to this type of crime. In a computer crime, the computer can be the instrument of a crime or the object of one. As an instrument, a computer may be used to steal funds from a bank account. As the object of a crime, the information contained in a computer may be stolen, altered, or destroyed. Most computer crimes are still prosecuted under traditional fraud, theft, and embezzlement statutes. Generally, the elements of a computer crime include the following:

- Unauthorized access (or exceeding one’s authority)
- An intent to defraud
- Obtaining anything of value
Federal Statutes: Title 31, Money and Finance

§ 5313. Reports on Domestic Coins and Currency Transactions
(a) When a domestic financial institution is involved in a transaction for the payment, receipt, or transfer of U.S. coins or currency (or other monetary instruments the Secretary of the Treasury prescribes), in an amount, denomination, or amount and denomination, or under circumstances the Secretary prescribes by regulation, the institution and any other participant in the transaction the Secretary may prescribe shall file a report on the transaction at the time and in the way the Secretary prescribes.

Title 31 contains statutes governing the money and finances of the United States government. The two statutes listed below relate to the movement of money through a financial institution.

Financial transactions in excess of $10,000 in currency must be reported on a Currency Transaction Report (CTR). Title 31 U.S.C. § 5313 requires that financial institutions file this report. If a person takes actions to falsely or fraudulently stop a financial institution from filing the report with the federal government, a violation of criminal law has occurred.

Title 31 U.S.C. § 5324 makes it illegal for an individual to attempt to “structure transactions” in such a way as to evade the reporting requirements of Title 31 U.S.C. § 5313. Such structuring would include:

- breaking deposits into amounts less than $10,000
- withdrawing currency in amounts less than $10,000
- utilizing various financial documents (cashiers checks, certified checks, money orders)
Summary

This chapter has detailed important federal statutes relating to financial investigations. The successful financial investigator is one who can sort out the elements of a crime from the legalese of a statute so that he or she is in a position to gather the evidence needed to prove a violation and sustain a conviction.
Questions and Exercises

Answer the following questions then check your responses with those provided at the back of the book.

1. What are the differences between civil law and criminal law?

2. What are the differences between felonies and misdemeanors?

3. What is the difference between a crime that is “mala prohibita” and one that is “mala in se?”

4. Descriptions of criminal activities are listed below. For each description, identify all federal statutes that may have been violated and the elements of the crime. Refer only to those statutes contained in Chapter 2.

   a. Jerry Wilson owns a clothing store in Chicago. He agreed to let a drug dealer buy thousands of dollars of clothes there, using $10, $20, and $50 bills that had been used to buy crack and cocaine on the streets.

   b. Troy Avery is a high-ranking civil servant employed by the U.S. Navy. He has ties with a sports agent. One of the contractors who works with Avery has a son who is sure to be the first player selected in the college football draft. Avery tells this contractor that he had better convince his son to sign with Avery’s sports agent friend or Avery will see to it that the contractor loses his job.
c. Jenny Lawrence cons unsuspecting victims into buying bogus vacation packages by placing adds offering inexpensive vacations in newspapers and listing an 800 number for potential victims to call.

d. David Stevens is employed by First National Bank and Trust. He is diverting money, via wire transfers, from the bank's general ledger account to a personal account at another bank.

e. Linda Carson is the president of a consulting firm that has fallen on hard times. But Linda has some dirt on a competitor and threatens to expose a kickback scheme that this person's company is involved in unless the competitor drops its pursuit of a contact that Linda's company is bidding on.

f. Susan Tompkins is required to pay estimated taxes four times a year. She has missed one payment and has no intention paying the other three.

5. Lance Gordon is a drug trafficker. Each week, he deposits his profits in several different banks and makes sure that each deposit is less than $10,000. What statute is he violating?
In Chapter 2, some of the federal statutes of interest to the financial investigator were identified. A corresponding list of the "elements of the crime" was provided for many of the statutes. These elements are of particular importance to the investigator because they direct the focus of the evidence gathering process. In this chapter we will discuss various concepts related to evidence. We will look at the differences between direct and circumstantial evidence. We will discuss various standards of proof and see how the standard of proof for a criminal case differs from the standards for a civil case. Selected "rules of evidence" also will be presented. The chapter begins with a discussion of the grand jury process, for it is here that initial evidence gathering efforts help determine whether a suspect in a criminal case goes to trial.

After studying Chapter 3, you should be able to:

- Describe the grand jury process.
- Describe the "investigative tools" used by the grand jury.
- Define evidence.
- Distinguish among the five standards of proof.
- Describe different classifications of evidence.
- Determine the admissibility of evidence by applying selected rules of evidence.
One of the major responsibilities of a financial investigator is to gather evidence. But there are many things the investigator must consider in his or her quest for evidence. Does the evidence bear directly upon a fact the prosecution wants to prove or must inferences be made to link the evidence to a fact? Is the person who supplied some relevant fact able to testify to that fact or are the communications between that person and the accused privileged? This chapter provides an introduction to many concepts surrounding the collection, strength, and admissibility of evidence. But before we get into a discussion of evidence, we will look at the grand jury process. It is here that the determination is made to charge someone with a violation of criminal law. The evidence an investigator collects plays a large role in determining whether there is sufficient cause to believe that the accused committed a crime.

---

**The Grand Jury**

The American system of justice is adversarial in nature. This means that both parties involved in the litigation (prosecution and accused) present evidence to a third party (judge or jury) for a determination of who is right or wrong (guilt or innocence). This differs dramatically from other systems of justice. For example, in an inquisitional system, defendants are presumed guilty and the evidence to convict them is extracted from their mouths.

One of the many legal concepts that the American colonists brought with them from England was that an individual accused of a high crime or major criminal violation should stand accountable to that accusation in front of his or her peers. Under our Constitution, a person cannot be indicted, receive a formal written complaint of criminal charges, without first having the facts and the reasons leading up to and contained within the indictment reviewed and approved by a jury of his or her peers—a grand jury.

At the federal level, a grand jury consists of 16 to 23 people chosen from the general population in a judicial district. The jurors investigate accusations against people and other entities. Upon a finding of probable cause, a grand jury returns an indictment which
requires the accused to stand trial for a criminal violation.

Normally a grand jury "sits," or deliberates, for a period of eighteen months to perform its function. Grand jury proceedings are held in secrecy, and as such, only the jurors, government attorney, witness, and stenographer are present while the jury is in session. When the jury is deliberating or voting, no one else is allowed in the jury room.

The role of the grand jury is that of fact finder. The jury meets to gather information and documents, and to listen to witness testimony concerning alleged criminal violations. After the information, documents and testimony have been gathered, the grand jury decides, by voting, whether or not to return a criminal indictment. It takes 12 jurors to return an indictment, no matter how large the jury.

**Tools of the Grand Jury**

To accomplish their fact finding, the grand jury has the power to call witnesses to provide testimony, to issue orders that require the production of records, and to impose legal sanctions to ensure compliance with its powers. The primary investigative tool of the grand jury is the *subpoena* which requires a witness to appear before the grand jury. A subpoena can also require a witness to produce records and documents. A subpoena details the testimony or records to be supplied and the place and time for the witness' appearance before the grand jury. Subpoenaed witnesses that fail to comply can be cited for contempt of court and those that are dishonest while providing testimony may face perjury charges. Witnesses may not have their attorneys present with them during the grand jury proceeding, however, witnesses can confer with their attorneys outside the grand jury proceedings before answering questions.

Another grand jury investigative tool is the *grant of immunity*. Immunity is granted to convince or compel a witness to provide testimony or produce documents. By guaranteeing that the witness will not be prosecuted, the grand jury can obtain important information otherwise unavailable. There are two types of immunity grants: transactional and use.
**Transactional Immunity**

Transactional immunity completely protects the witness from prosecution for any criminal offenses about which he or she testifies during the grand jury proceedings. If a witness states that she has laundered money for a drug dealer, she cannot be charged for the offense if she has been provided transactional immunity. This form of immunity is rarely used.

**Use Immunity**

Use immunity protects witnesses from the prosecution’s “use” of their testimony against them. Let’s look at that same witness who laundered drug money. If she is granted use immunity, she cannot be prosecuted for money laundering unless the prosecuting attorney can develop independent information and evidence from a completely separate source of the witness’ criminal wrongdoing.

Immunity can be given either formally or informally. **Formal immunity** is granted by the court. As part of a grand jury proceeding, the prosecuting attorney makes an application to a court (i.e. federal judge) requesting a grant of formal immunity for the witness. The court official reviews the application and bases his or her findings on:

- The importance of the information to the success of the investigation
- The availability of the information from other sources
- The culpability of the witness

If the court approves the application, a grant of formal immunity is issued to the witness.

**Informal immunity** is offered to grand jury witnesses by the prosecuting attorney via issuance of a “letter of immunity.” Such a letter assures witnesses that their grand jury testimony will not be used against them in any subsequent criminal legal proceeding.

Immunity is a powerful tool and the investigator and prosecuting attorney must use it wisely. They must weigh the evidence they will receive from a witness against that witness’ criminal wrong doings. The prosecutor will usually ask for a proffer. This is a statement from the witness which details his involvement
and cannot be used against him. It is used to determine if immu-
nity should be offered.

**Role of the Financial Investigator**

**in the Grand Jury Process**

Financial investigators routinely work with grand juries. They
serve subpoenas, gather information, take testimony from wit-
nesses, and report their investigative findings to the grand jury.
The cloak of secrecy applies to all information gathered by the
agent during the grand jury proceedings.

The financial investigator also assists the prosecution in the
investigative decision-making process. The investigator who has
talked to witnesses and analyzed the financial information can
advise the attorney on issues such as order of witness appearance,
questions to ask the witness, and even whom to offer immunity
grants.

A major advantage in conducting financial investigations
through the grand jury process is the ability for various law
enforcement agencies to work together. Allegations of criminal
violations often impact various statutes for which numerous agen-
cies hold investigative authority. Under the auspices of the grand
jury, multiple violations can be simultaneously investigated and
ultimately charged through a coordinated multi-agency effort.

One disadvantage to conducting an investigation through the
grand jury process is related to the secrecy requirements of the
grand jury. Grand jury information may not be used in non-grand
jury investigations unless a court order is obtained permitting the
release of the grand jury information. If a suspect is not indicted
by the grand jury, the grand jury’s investigative findings cannot be
used in other investigative activities (i.e. intelligence sharing or
other ongoing investigations) unless so authorized by a court
order.
What Is Evidence?

From the discussion on the grand jury proceeding, you can see that the financial investigator's role as a gatherer of evidence is a vital one. In its simplest terms, evidence is anything that can make a person believe that a fact or proposition is true or false. Both parties involved in a lawsuit can submit evidence to prove their points. In a criminal case, the prosecution must present evidence to prove the commission of a crime. They do so by gathering information, documents, and other items that prove the elements of a crime. The defense presents evidence to show that allegations are invalid.

Standards of Proof

Evidence is collected to establish proof. In the world of law enforcement, the concept of proof varies according to the situation. In a criminal case, evidence must establish proof of a crime "beyond a reasonable doubt." In most civil cases, evidence must be strong enough to incline a person to believe one side over the other. Discussions concerning five standards of proof follow.

Beyond a Reasonable Doubt

A defendant charged with a criminal violation is presumed innocent until proven guilty. In a criminal proceeding, the government bears the burden of proving that the accused is guilty of the charges—the accused does not have to prove his or her innocence. To receive a guilty verdict, the government must prove each and every element of a crime beyond a reasonable doubt.

The concept of beyond a reasonable doubt is something that many of us talk about and, perhaps, struggle with. We do not have to be sitting on a jury to give our personal opinions about a case. We can read about a case in the newspaper. Some, we can watch on television. So, when we get ready to give our personal verdicts of guilt or innocence, we must measure the evidence presented and determine if the prosecution has proven its case beyond a
reasonable doubt. And then we ask ourselves—"What is meant by ‘reasonable doubt?’"

**Reasonable doubt** is the degree of certainty that you have in accomplishing or transacting the more important concerns of your everyday life. For example, you are out for your nightly walk around the neighborhood and you stop at an intersection. At the same time, a car happens to pull up to a stop sign at the same intersection. You and the driver make eye contact and the driver waves at you to cross the street. You cross because you are convinced, beyond a reasonable doubt, that the car will not pull out and run over you.

We just described "reasonable doubt" in lay person’s terms. Let’s see how the court defines “reasonable doubt?” A recent court decision (U.S. v. Sunderland) defines the concept as follows:

*A reasonable doubt, is a doubt founded upon a consideration of all the evidence and must be based on reason. Beyond a reasonable doubt does not mean to moral certainty or beyond a mere possible doubt or an imaginary doubt. It is such a doubt as would deter a reasonably prudent man or woman from acting or deciding in the more important matters involved in his or her own affairs. Doubts which are not based upon a reasonable and careful consideration of all the evidence, what are purely imaginary, or borne of sympathy alone, should not be considered and should not influence your verdict. It is only necessary that you should have certainty with which you transact the more important concerns in life. If you have that certainty, then you are convinced beyond a reasonable doubt.*

A defendant may not be convicted upon mere suspicion or conjecture. A defendant should be acquitted if the evidence is equally consistent with innocence as with guilt.

**Preponderance of Evidence**
The degree of proof required in many civil matters is a *preponderance of evidence*. Let’s say you are sitting on a jury in a case...
involving a lawsuit where one person is suing the other. You listen to the evidence presented by the defendant and then you listen to the evidence presented by the plaintiff. When it comes time to deliberate, you find that you happen to believe the plaintiff. Both sides presented evidence but the evidence presented by the plaintiff made you believe that person. This is proof by preponderance of evidence—evidence that inclines an impartial mind to one side rather than the other. And with preponderance of evidence, it is not the quantity of evidence that matters, it's the quality. For example:

...when it is said that the burden rest upon either party to establish any particular fact or proposition by preponderance or greater weight of evidence, it is meant that the evidence offered and introduced in support thereof to entitle said party to a verdict, should, when fully and thoroughly considered, produce the stronger impression upon the mind and be more convincing when weighed against the evidence introduced in opposition thereto. Such preponderances are not always to be determined by the number of witnesses on the respective sides, although it may be thus determined all of the things being equal.²

**Clear and Convincing Evidence**

Another standard of proof used in certain civil cases where fraud may be involved is *clear and convincing evidence*. This type of proof is not proof beyond a reasonable doubt as required in a criminal case, but is stronger than a mere preponderance of evidence as normally required in a civil matter. For example:

A mere preponderance of the evidence, meaning merely the greater weight of the evidence, is not sufficient to prove fraud. This does not mean that you must be convinced of fraud beyond a reasonable doubt, because this is not a criminal case. However, an allegation of fraud does require a greater degree of proof than is required in most civil cases, and a mere preponderance of the evidence while enough to incline the mind of an impartial juror to one side of the issue
rather than the other, is not enough to prove fraud. Fraud must be established by evidence which is clear, cogent, and convincing.\(^3\)

**Probable Cause**

The three standards of proof just presented can be distinguished from **probable cause** which serves as the basis for arrest and search warrants. Probable cause is all the facts and circumstances within the knowledge of an investigator about a criminal activity that can be considered reasonable and trustworthy. For an arrest warrant to be issued, probable cause must be sufficient to cause a person of reasonable caution to believe that a crime has been committed and that the accused has committed it. To have a search warrant issued, probable cause must be sufficient to make a reasonable person believe that a crime has been or will be committed and that the evidence sought exists in the place to be searched. Probable cause requires more than mere suspicion or hunches but less than a preponderance of evidence.

**Suspicious Situation**

At the opposite end of the spectrum from “beyond a reasonable doubt” in the continuum of standards of proof is the **suspicious situation**. In *Terry v. Ohio*, 392 U.S. 1 (1968), the Supreme Court established case law stating that police may briefly detain and question a person for investigative purposes if there exists specific “articulable suspicions.” Such a valid detainment of a suspect may yield evidence to effect arrest or provide evidence in support of a crime.

**Classifications of Evidence**

Now that you are familiar with the standards of proof, let’s look at the types of evidence that can be presented. In legal terminology, evidence has various classifications. Evidence may be classified according to its proof results (direct or circumstantial) or accord-
ing to its source (real, documentary, or testimonial). The following paragraphs describe the different classifications of evidence. Evidence admitted through a process called "judicial notice" is also discussed.

**Direct Evidence**

A person under investigation is suspected of accepting a $5,000 bribe. Another person states that he was with the suspect on November 12, 1992 and saw the suspect accept the bribe. This person has provided **direct evidence** of the crime. Direct evidence is evidence to the precise point at issue. A person is suspected of accepting a bribe; another person says he saw the suspect accept a bribe. Nothing needs to be inferred or presumed.

**Circumstantial Evidence**

Now let’s look at the same suspect, only this time let’s look at some evidence that is not directly related to the point at issue. An investigator states that the suspect’s bank statement reveals that the suspect deposited $5,000 on November 12, 1992. Another person testifies that on November 12, 1992, she saw the suspect having breakfast with the person suspected of offering the bribe. When looked at individually, neither of these pieces of evidence prove that the suspect accepted a bribe. However, viewed together, you get the feeling that the suspect could have accepted the bribe at breakfast and then deposited it in his bank.

The evidence presented in the previous paragraph is **circumstantial evidence**. Circumstantial evidence is evidence relating to a series of facts other than those at issue that tend, by inference, to establish the fact at issue. Circumstantial evidence proves the existence of the fact indirectly and depends on the strength of the inferences raised by the evidence. The use of circumstantial evidence is recognized by the courts as a legitimate means of proof when it involves proving several material facts which, when considered in a relationship to each other, tend to establish the existence of the principle or ultimate fact.

Circumstantial evidence is the only type of evidence generally available to show certain elements of a crime, such as malice.
willfulness, intent, or legal concepts which exist only in the mind of the perpetrator of the deed. Accordingly, the proof of most financial violations is based upon circumstantial evidence.

Real Evidence

Real evidence is evidence that is tangible; it can be presented to the jury for inspection. Material objects such as knives, bullets, guns, and jewelry are examples of real evidence.

Documentary Evidence

Documentary evidence consists of writings and documents, such as judicial or official records, contracts, deeds, and the less formal writings such as letters, memorandums, books, and records of private persons and organizations. Documentary evidence is primarily circumstantial in nature and must be introduced by a witness who can testify to the existence and authenticity of the evidence.

Testimonial Evidence

Testimonial evidence is evidence given by word of mouth. Witnesses under oath and affirmation provide testimonial evidence. A witness is a person who can testify as to what he or she knows from having seen, heard, or otherwise observed.

Judicial Notice

Not everything presented during a trial must be proved. There are matters so well known to the court that it would be a waste of time to compel a party to offer evidence of their truth. For example, it is a well known fact that the formula for water is H₂O. There’s no reason for a lawyer to call a witness to the stand to attest to that fact. The judge can allow the court to accept certain facts as evidence through a legal process known as judicial notice. However, if there is evidence which reasonably puts a fact in dispute, judicial notice will not be taken.
Rules of Evidence

The investigator is the one who gathers evidence during the investigative process. For the investigator, evidence of financial crimes includes the following:

- Admissions and confessions freely given by the suspect
- Statements made by witnesses who either observed the criminal event or were victimized by it
- Physical things which relate to the criminal activity (i.e. books and records, currency, bank account information, etc.)
- Analysis completed by the investigator

But even the best of evidence, that which would result in overwhelming indications of guilt, will mean nothing and will be inadmissible at trial if the investigator ignores the rules and procedures regarding the admissibility of evidence at trial. These rules directly impact on the financial investigator during the investigative process.

At the federal level, the rules governing criminal procedures and evidence have been codified and represent the benchmark to follow when gathering information during the investigative process. The following rules are relevant to financial investigations:

- Rule 401, Relevancy and Competency
- Rule 501, Privileged Communications
- Rule 801, Hearsay
- Rule 901(a), Chain of Custody
- Rules 1001 and 1002, Best Evidence and Requirement of Original
Relevancy and Competency (Rule 401)
To be admissible, evidence must be relevant and competent. These terms are not synonymous. If a fact offered in evidence relates in some logical way to the principle fact it is considered to be relevant. The competency of evidence means that the fact offered into evidence is adequately sufficient, reliable, and relevant to the case and is presented by a qualified and capable witness.

Relevancy implies a traceable and significant connection. A fact may not bear directly on the principle fact but it is considered relevant if it constitutes one link in a chain of evidence or if it relates to facts that would constitute circumstantial evidence. Some evidentiary matters that are considered relevant and therefore admissible are:

- The motive for a crime
- The ability of the defendant to commit this specific crime
- The opportunity to commit the crime
- Threats or expressions of ill will by the suspect
- The means of committing the offense
- Physical evidence at the scene linking the accused to the crime
- The suspect’s conduct and comments at the time of arrest
- The attempt to conceal and/or destroy evidence
- Valid confessions

Evidence, even if logically relevant, may be excluded by the Court if that evidence is likely to inflame or confuse a jury, or consume too much time. For example, testimony as to the statistical probability of guilt of the defendant, while logically relevant when based on prior testimony, may be considered too prejudicial and unreliable to be accepted by the Court.

The issue of competency can relate to the witness presenting the evidence or the evidence itself. If a person is called to testify and does not understand the nature of the oath or is unable to narrate with understanding the facts that he or she is to testify to, that
witness' competency will be questioned. Examples of incompetent evidence include confessions involuntarily obtained or unsigned carbon copies of a document which are offered into evidence without any explanation for the failure to produce the original.

**Privileged Communications (Rule 501)**

This rule is based on the belief that it is necessary to maintain the confidentiality of certain communications. However, it covers only those communications that are a “unique product” of a protective relationship. The one to whom the information has been given cannot divulge that information without the consent of the other party. Some of the more prevalent claims to privileged relationships are:

- Attorney/Client
- Husband/Wife
- Clergyman/Penitent
- Physician/Patient
- Accountant/Client
- Law Enforcement Officer/Informant

**Attorney/Client**

The attorney/client privilege must be strictly adhered to. However, this privileged relationship does not make every communication between a client to his attorney confidential. It applies only to those communications meant to be confidential and made to the attorney in his or her capacity as an attorney. When it does apply, the privilege covers corporate as well as individual clients.

For the investigator, the attorney/client privilege does not apply when a suspect’s attorney is merely a conduit for handling funds or is involved in something like researching or recording the transfer of title to real estate (without consultation for legal advice). Similarly, if the attorney is acting as an accountant or tax return preparer, this privilege may not be applicable.
**Husband/Wife**

Communications between a husband and wife, privately made, are generally assumed to have been intended to be of a confidential nature, and therefore held to be privileged. These communications remain privileged even after a marriage terminates. However, if it is obvious from the circumstances or nature of a communication that no confidence was intended, there is no privilege. For example, communications between a husband and wife made in the presence of a friend are not privileged.

In addition to the confidential communication privilege, there exists an independent privilege—a testimonial privilege. A married person may refuse to testify against his or her spouse, at least when the latter is a defendant in a criminal prosecution.

**Clergyman/Penitent**

The privilege between clergyman and penitent has been recognized in the Federal courts, but this privilege has not been extended to financial matters, such as contributions made through a clergyman.

**Physician/Patient**

Many state courts recognize the physician/patient privilege, although Federal courts generally have not approved it.

**Accountant/Client**

The accountant/client communication privilege is *not recognized* under common or Federal law. Workpapers belonging to an accountant are not privileged and must be produced if required. Similarly, a suspect may be required to produce an accountant’s workpapers if they are in his or her possession.

An accountant employed by an attorney, or retained by a person at the attorney’s request to perform services essential to the attorney/client relationship, may be covered by the attorney/client privilege.

**Law Enforcement Officer/Informant**

T.’s privilege allows law enforcement agencies to withhold from disclosure the identity of persons who furnish information concerning violations of law. Unlike other privileges, it is the identity of the informant that is privileged, not the communication.
This privilege also differs from the others in that it can be waived only by the government, whereas the others are for the benefit of, and can be waived by, the accused individual. Where disclosure of an informant’s identity or the content of the communication is relevant to a fair trial, the court may order disclosure. If the government withholds the information, the court could dismiss the charges.

Conversations in the known presence of third parties do not fall within the purview of privileged communications. The protected communications are those that are, in fact, intended to be confidential. Exceptions are recognized for those situations where third parties are indispensable to the communication itself (i.e., legal secretary, stenographer, or transcriber).

**Hearsay (Rule 801)**

Hearsay is evidence that does not come from the personal knowledge of the declarant but from the repetition of what the declarant has heard others say. For example, an investigator says that the suspect’s business manager told him that checks written by the suspect were for personal expenses, not business expenses. This information would be considered hearsay and inadmissible in court. The information would be admissible if the business manager provided the testimony.

The major reason hearsay is inadmissible is the potential unreliability of the witness providing the hearsay. Witnesses must tell what they themselves know, not what they have heard from others. Testimony that merely repeats what another person said is not admitted as evidence because of the possibility of distortion or misunderstanding.

The justice system recognizes that there are occasions when exceptions to the hearsay rule must be made. From a financial investigative standpoint, exceptions to the hearsay rule include the following:

- Valid confession/tacit admission
- Prior statements
- Statement against interest
Valid Confession/Tacit Admission

A valid confession is a statement by the suspect acknowledging the facts and validity of those facts upon which a criminal conviction rests. Perhaps during an interview with the suspect, the suspect tells the investigator: “Yeah, I took the money. I got sick of my boss living the easy life off of all the hard work that I do so I forged his name to a couple of checks and tried to take off for South America.” A tacit admission is less than a full acknowledgment by the suspect but is a statement of facts relative to his or her criminal activity. An investigator can offer into evidence a valid confession or tacit admission only if it was legally obtained during the course of an investigation.

Prior Statements

If a defendant takes the stand in his or her own defense, the prosecution can introduce, during cross-examination, statements made by the defendant at prior trials or hearings. This is done to show inconsistencies with the defendant’s current testimony, or to reflect expressed or implied charges against the defendant relating to the current trial.

Statement Against Interest

A statement against interest is a prior acknowledgment of a material fact relevant to an issue now being litigated but this prior acknowledgment differs from what is now being claimed. For example, in a tax evasion prosecution, evidence in the form of a financial statement submitted for life insurance shows a defendant’s net worth to be higher than she now claims. This prior statement can be used as evidence against the defendant.
**Res Gestae Statement (Excited Utterance)**

A *res gestae statement* is a spontaneous comment made at a time of great emotional strain (i.e., at the time of arrest or at the scene of an accident). The theory to allow this exception to the hearsay rule is that it is very likely that a statement made at such a time is a truthful response. For example, during a raid of a bookmaking establishment, one of the persons in the establishment, upon seeing the raiding officers enter the room says: “Burn the betting slips!” Even though the speaker is never identified and is not available as a witness, an investigator who heard the statement may be permitted to testify about it to prove that betting slips existed.

**Dying Declarations**

Dying declarations, either orally or in writing, are presumed to be forthright and honest statements. Since the witness is unavailable, an exception to the hearsay rule is made and the person who heard the dying declaration can testify to its validity.

**Official Records Rule**

The official records rule allows for the introduction of books, records, reports, and compilations kept as a regular and routine duty by a public official. Custodians of those records, even though they did not make the record per se, may introduce and act as witnesses for this type of official record at trial.

**Shop Book Rule**

The shop book rule states that books of original entry kept in the regular course of business can be introduced in court by the person who has custody of the books even though this person may not be the person who made the original entries to the books. In this instance, the “custodian” must authenticate the records, testify that he or she is the custodian, that the entries are original (not copies), and finally, that the entries were made contemporaneously with the transactions transcribed therein. For example, in attempting to prove a sales transaction between the defendant and Company ABC, the prosecution would call as a witness an employee of Company ABC who would bring the business’s bookkeeping records to court. This employee, who is not the person who made the original entries into the books, would prove the
sales transaction by showing how the funds paid to Company ABC by the defendant were recorded in the business's bookkeeping system.

**Expert Testimony**

In cases where the subject matter is too difficult or too technical for jurors to understand without assistance, expert testimony is permitted.

**Chain of Custody (Rule 901(a))**

This rule requires that when evidence is obtained during the course of an investigation, it should be marked, identified, inventoried, and preserved to maintain its original condition and to establish a clear chain of custody until it is introduced at trial. This rule applies to documentary evidence and any other objects acquired by the investigator. The term “acquired” means that the evidence was obtained as a result of a subpoena, search warrant, voluntary submission, or discovery during the course of the financial investigation. If gaps in possession or custody occur, the evidence itself may be challenged at trial on the theory that the document or object introduced may not be the original or is not in its original condition, and therefore is of doubtful authenticity.

For a document to be considered admissible as evidence, it is necessary to prove that it is the same document that was secured by the investigator and that it is in the same condition as it was when it was secured. An investigator who obtains original documents should immediately identify them by some type of marking so that he or she can later testify that they are the documents that were obtained and that they are in the same condition as they were when first obtained. Markings include an investigator's initials and the date the information was obtained, and could be placed in the margin, in the corner, or in some other inconspicuous place on the front or back of each document secured. If circumstances dictate that such markings would render the document subject to attack on the grounds that it has been defaced or that the document is not in the same condition as when it was obtained, the investigator may place the document into an envelope and write a description or any other iden-
tifying information relating to the document on the face of the envelope.

**Best Evidence and Requirement of Original (Rules 1001 and 1002)**

The Best Evidence Rule applies only to documentary evidence. It states that the best proof of the contents of a document is the document itself. However, if an original has been destroyed or is in the hands of another party and it is not subject to legal process by search warrant or subpoena, an authenticated copy of that original may be substituted as evidence.

Facts about a document, other than its contents, are provable without its production. For example, the fact that a sales contract was made is a fact separate from the actual terms of the contract and may be proved by testimony alone.

Certain documents such as leases, contracts, or even letters, which are signed in more than one copy are all considered originals and any one of the copies may be produced as an original. Production consists of either making the written document available to the judge and counsel for the adversary, or having it read aloud in open court.

All evidence falling short of the standard for best evidence is classified as secondary evidence. Secondary evidence may be either the testimony of witnesses or a copy of the writing. Before secondary evidence can be admitted, there must be satisfactory evidence showing the present or former existence of an original document. It must be established that the original has been destroyed, lost, stolen or otherwise unavailable. Further, it must be established that the party offering the document into evidence attempted all reasonable means to obtain the original. In each case, the sufficiency of the search for the original is a matter to be determined by the court. If a document is offered as secondary evidence, it must be shown to be a correct copy of the original.

For federal purposes, secondary evidence may be either a copy of the document or testimony of witnesses relating to the contents of the document itself. For example, the testimony of an investigator as to the contents of a sales invoice that is unavailable would be secondary evidence. The investigator's testimony is
admissible even though the person who prepared the invoice is available to testify. The Best Evidence Rule will not be invoked to exclude oral testimony of one witness merely because another witness could give more conclusive testimony. However, in other jurisdictions, testimony will not be allowed to prove the contents of a document if there exists a secondary evidence to prove its contents. This is known as the majority rule.

If an original document is destroyed by the party attempting to prove its contents and who is offering it for evidence, secondary evidence will be admitted if the destruction was in the ordinary course of business or by mistake, or even intentionally, provided it was not done for any fraudulent purpose.

### Summary

The rules of evidence and procedure establish the legal framework within which the financial investigator works. A full confession of guilt by the suspect becomes worthless if it was illegally obtained and therefore inadmissible in court. The investigative process requires the gathering of information, documents, and testimony from witnesses, victims, and subjects involved in criminal activities. Though the legal statutes institute the benchmarks of right and wrong, and the elements and degrees of proof necessary for criminal conviction, it is the rules of evidence and criminal procedure that control both the investigative process and the resultant judicial proceeding.
Questions and Exercises

Answer the following questions then check your responses with those provided at the back of the book.

1. a. How many jurors usually “sit” on a federal grand jury?

   b. How many jurors does it take to return an indictment?

2. Differentiate between transactional immunity and use immunity.

3. What is evidence?

4. What is the relationship between evidence and proof?

5. Differentiate between the following standards of proof: “beyond a reasonable doubt” and “preponderance of evidence.”

6. You are investigating a mail fraud scheme. One of the elements of the crime is the use of mails to further the scheme. Provide an example of direct and circumstantial evidence that you could collect to prove this element of the crime.
7. What is judicial notice? Provide an example.

8. When an investigator gathers evidence, why is it important that he or she keep the terms “relevancy” and “competency” in mind?

9. Todd White is on trial in Federal court for drug trafficking and money laundering offenses. Read the following descriptions of proposed testimony and, based on the privileged communications rule, answer the following questions for each description: 1) Is the testimony admissible in court? and 2) Why or why not?

a. Todd White’s wife, Kay, says that before they were married, Todd told her that he made a lot of money selling drugs.
   1) 
   2) 

b. While they were married, Kay White saw Todd measuring white powder on a set of scales. She saw him put the white powder into bags.
   1) 
   2)
c. While they were married, Todd told Kay that the powder in the bags was cocaine. Kay was not involved in the distribution of drugs.

1)

2)

d. Todd's son, Joey, says his father asked him to sell some cocaine at school.

1)

2)

e. Leon Norton, Todd's accountant says that Todd told him that he had $25,000 in income from his auto repair business and $250,000 in income from an inheritance.

1)

2)
f. Kent Parks, Todd’s attorney, says that he handled a real estate closing for a house Todd bought. Todd paid $250,000 for the house.

10. Why is hearsay evidence inadmissible?

11. What is the shop book rule?

12. What do the terms “best evidence” and “secondary evidence” mean to an investigator?

Sources of Information

Chapter 3 focused on concepts related to the collection and admissibility of evidence. This chapter addresses where to look for information that may ultimately be used as evidence against, or, on the other hand, in support of a suspect. As a financial investigation begins, questions concerning a suspect’s finances are plentiful. Does the suspect own the home in which she lives or does she rent? If she owns the home, how much did she pay for it and how did she pay for it? If she rents, how much does she pay, and is she the one who pays or does some second party pay the rent? Does she have a criminal record? Does she own the car she drives? How did she pay for the trip to China she took last year? It all seems pretty simple—just ask her! Well, sometimes, if you have a cooperative suspect, it is that simple. But how cooperative would you be if you had the authorities investigating your actions—especially if you had something to hide?

This chapter begins with a discussion on selecting suspects to target for an investigation. The decision to target a suspect is not made lightly as both the suspect and the investigative team can be affected by a poor decision. The remainder of the chapter and a corresponding appendix (Appendix A) identify some of the many sources of information of interest to an investigator. For the investigator, the important thing to keep in mind is that most financial transactions, whether lawful or unlawful, are recorded and can be recreated if the investigator can piece together the correct "paper trail". The sources listed in this chapter and Appendix A provide a foundation for the initiation of that paper trail.
After studying Chapter 4, you should be able to:

- Discuss what factors influence the selection of a suspect to target in an investigation.
- Identify appropriate sources to obtain specific information.
- Analyze financial records for leads.

No matter how many computers, police cars, or Swat teams law enforcement may possess, not one criminal will be put behind bars unless the most precious of all commodities is available—information. Discovering, understanding, analyzing, and using information is one of the keys to successful law enforcement. When an investigator initiates an investigation, his or her knowledge of information sources is invaluable. This chapter and Appendix A provide you with many sources of information of interest to the financial investigator. These are selected sources and by no means should the listings provided be considered exhaustive. Remember, information is everywhere. The key is to focus on information that will resolve the allegation.

**Initial Considerations**

Before listing and describing various sources of information, we will explore some of the things that are considered when an investigation is initiated. What should be considered before targeting a suspect for investigation? How should an investigator deal with a suspect as a source of information? What happens when a suspect refuses to cooperate? Each of these issues will be addressed below.

**Selecting Who to Target for Investigation**

The role of a financial investigator is to gather evidence to support, or in the alternative, dispel allegations of financial criminal activity. Where to look and what to look for are two integral questions facing every investigator. In theory, neither question is difficult to answer — merely look everywhere for everything. But a
problem surfaces when reality is thrown into the equation. Investigators cannot spend their whole careers working on only one investigation. Resources (personnel, equipment, time, and money) are scarce—but law enforcement's challenges are limitless. Available resources must be used wisely. Those who determine which investigations to pursue must deal with questions like: "Are we willing to commit 100 percent of our investigative resources for an extended period of time to investigate a high-level suspect when the probability of a conviction is only 40 percent? Would we be better served by dividing our work force and investigating three mid-level suspects with a probability of 65 percent success? How about initiating 10 financial investigations of low-level suspects with a success probability of 95 percent?"

The use of resources is only one factor to consider in determining which investigations to pursue. Suspects targeted for investigation also must be selected wisely. Determining which suspects to target is not a simple matter. Targeting priorities are determined through the interaction of judicial interpretation of law and jury appeal. The decision to target an individual for criminal investigation is a momentous decision. Whether it is called opening a file, numbering a case, initiating an investigation, or information gathering, it is going to change a person's life. When an investigator knocks on the door of a neighbor or shows his or her badge to a banker to ask questions about the now designated suspect, a chain of events is put into motion that cannot be stopped. Arguably, the worst nonphysical event that can occur to an individual is to have the authorities accuse him or her of criminal activity. Possibly even worse is to have the accusation circulated among business associates, friends, and family.

When confronted with allegations or investigative findings, suspects, in addition to telling the truth or lying, have suffered heart attacks, emotional breakdowns, and committed suicide. In 1985, the United States Attorney's Office, the arm of the Federal Government that handles criminal prosecutions, declined to prosecute 27 percent of the suspects under investigation. In other words, in 1985 over one-fourth of the suspects investigated and subsequently recommended for criminal prosecution at the Federal level were in fact not prosecuted. Reputations, estab-
lished professions, future business and financial prospects, and social and family relationships turn on the decision to start an investigation. The moral of the story is that by whatever means possible, choose suspects carefully.

The Suspect as a Source of Information

Once a suspect is targeted, the investigator must work the investigation effectively. He or she must identify the essence of the allegations and facts surrounding the crime, and address them early on in the investigative process. For example, a bank embezzlement scheme would quickly take the investigator to the institution’s books and records. In an alleged tax evasion matter, the person who prepared the questionable return would be interviewed at the onset of the investigation.

Most often, the best source of information in an investigation is the suspect. The suspect has the answers to every allegation and the documents to support or corroborate those answers. By asking the suspect, the investigator may gain access to documents that summarize the suspect’s personal income and expenditures. These documents could represent everything the investigator needs to complete the investigation. However, the response to that same question may vary depending on how the investigator asks it. There is a significant difference between asking (Would it be possible for me to take a look at your finance-related documents?) and commanding (I need to see those documents! Now!).

Law enforcement sometimes loses its objectivity when gathering information during the course of an investigation. It can get demanding and “badge heavy,” assuming the answer before a question is asked. Particularly significant investigations or sensational crimes create intense media attention and public pressure. Sometimes, the investigator is tempted to go beyond the role of fact finder and becomes judge, jury, and executioner. The key is to be professional. An investigator must conduct every investigation in a fair and impartial manner using, as opposed to abusing, the tools of authority. Cooperation from witnesses and the suspect can be obtained much easier and more quickly with a fair and professional approach.

A suspect who says, “Get out of here! I’m not giving you any-
thing. Talk to my attorney!” suggests another factor to consider when asking the suspect for investigative information. The United States Constitution, which establishes the ground rules for all levels of law enforcement, guarantees certain rights to the criminal, whether accused or convicted. The right to be secure in one’s home, the right against self-incrimination, and the right to counsel are three important constitutional guarantees that directly impact financial investigations and the request for information from the accused.

What happens if the suspect in a financial investigation is unknown or, if known, refuses to talk or provide records? Is the investigation over, the matter dropped for lack of information? No, the search for information turns to other sources. Unlike investigations into crimes of passion where the only people directly involved in the crime are the criminal and the victim, financial crimes create “eye witnesses to the crime” every time a financial transaction occurs. Knowing where to find these witnesses, and what information they possess, is a key step toward a successful financial investigation.

When conducting a financial investigation, there are three things an investigator should keep in mind. They are:

- **Anyone may be a source of financial information.** It’s possible that a suspect’s relatives, friends, acquaintances, and business associates possess relevant documents. For example, ex-spouses may have kept records of bank accounts or financial statements, friends are often given financial documents for safekeeping, and business associates frequently compile their own files regarding the “suspect’s” illegal activities.

- **Go to the source.** In Chapter 3, the “shop book rule” was described. This rule of evidence identifies the “custodian” of business records, that is, the individual who can introduce the records in court. A payroll clerk who works with and has knowledge of the information requested from a business may not be considered the legal custodian of those records. The legal custodian may be the company’s comptroller or some other financial officer. Only the proper custodian can legally provide the information to the investigator.
- Have authority. Due to variations in statutory authority relating to law enforcement's ability to acquire information, an investigator should know, and follow, the legal requirements for obtaining, and if needed, compelling, the production of financial records from a custodian.

The key to any investigation is to know where to look or whom to ask to obtain knowledge about, or information on, anything. Sources of financial information can be obtained from:

- Public records
- Business records
- Government records
- Financial institution records
- Informants

The remainder of this chapter deals with information from public, business, and government records. Financial institution records are discussed in the next chapter. Using an informant as a source of financial information is discussed in Chapter 10.

**Public Records**

Laws and regulations require that records of certain financial transactions be disclosed and subject to review by anyone who wishes to inquire. These records are known as public records and they contain a tremendous amount of valuable financial information. The records not only provide answers to questions such as "What property does the suspect own? Where is it located? and What did the suspect pay for it?" they can also be used to establish leads and corroborate or dispute the suspect's testimony.

Because of the wealth of information available from State, county, and municipal records, researching public records should be one of the first steps you take in an investigation. The secret, of course, is knowing where to look. The following pages list and describe various sources of public records.
Real Estate Records
Real estate records are normally maintained in the county where the real estate itself is located. Land ownership records such as deeds of ownership and title certificates are kept in the Register of Deeds or Land County Office. These records identify the current and previous owners of the real estate in question. Additionally, property tax records showing who pays the real estate taxes on a particular piece property are on file with the Tax Assessor’s Office in the county where the land is located.

Corporate Records
All corporations must file documents in the state in which the incorporation occurred. If the incorporation occurred in one state and the corporation conducts business in another, it normally will have to file documents as a “foreign corporation” in the state in which business is conducted. Information concerning corporations varies somewhat by jurisdiction, but usually the articles of incorporation, annual reports on franchise taxes, and in some cases, bylaws, are available. This information can be valuable in tracing corporate ownership. Corporation documents will reflect names of the incorporators, the registered agent in the state (normally the attorney who prepared the documents), and the initial board of directors and officers. In a limited number of cases, financial statements are filed. If a company is publicly held, its financial statements and records of significant events must be filed with the Securities and Exchange Commission.

Partnerships
A partnership is the association of two or more persons to carry on as co-owners of a business for profit. Partnership records may or may not be a matter of record in the state where the partnership was formed.

In the case of a general partnership, one in which the partners share in all profits and losses, there is normally no requirement to file agreements with licensing authorities. Limited partnerships, where a partner’s liability is limited to his or her investment, are normally filed in the state in which the limited
partnership is formed. This “Certificate of Limited Partnership.” will usually list the general partners, limited partners, capital contributions of the partners, agreements regarding the divisions of profit and loss, and the powers and duties of the various partners.

**Trusts**

A trust is a legal entity in which a certain person or entity, known as the trustee, holds and administers property on behalf of others (the beneficiaries). Trusts commonly are used as vehicles for land transactions and other assets. Registration of a trust is required by some states; however, the beneficiaries of the trust are not always named.

**Assumed Name Indexes**

When a person or business conducts business in a name other than their own (via a name, commercial name, etc.), they must register their “assumed or fictitious name.” An Assumed Name Certificate is filed in the county, city, or state where the business was organized. Although primarily used for legitimate purposes, the Assumed Name Certificate can be used to hide principals and the true nature of the business.

**Better Business Bureau**

The local Better Business Bureau maintains information concerning a business for one of the following reasons:

- The Bureau received a prior request for information
- The business has volunteered information
- A complaint has been lodged against the business

**Chamber of Commerce**

The role of a Chamber of Commerce is to promote the local area. It maintains information on commercial and industrial establishments within its vicinity as well as information on trade and
travel. Many Chambers of Commerce publish extensive lists of business firms within the area and this list often includes the names of officers of the companies.

**Uniform Commercial Code Filings (UCC)**

Filings under the UCC are made at the state and county level and contain information regarding chattel (non-real estate) mortgages. The UCC filings normally record loans made to individuals or businesses for the purchase of equipment, furniture, automobiles, and other types of personal property.

**Court Records**

Transcripts and legal decisions in criminal and civil law suits are maintained at the Clerk of Court office. There are separate offices for the Federal, State, and local court systems. Information relating to divorce decrees, bankruptcy petitions, judgments, insurance, and property settlements are types of public records filled with financial information.

**Other Public Records**

The following financial information is maintained as a matter of public record by State, county, and municipal government offices. However, since no nationwide uniformity exists for retrieval, no specific source is cited.

- Mortgages and releases
- Change of name
- Hunting and fishing licenses
- Fictitious names index
- Professional registrations
- Personal property tax returns
- Inheritance and gift tax returns
- Letters of administration
- Conditional sales contracts
- Drivers' licenses
- Building and other permits
- School and voter registration
- State income tax returns
- Real estate tax payment
- Wills
- Inventories of estates

**Business Records**

Business records are another source of financial information. Every business, large or small, legal or illegal, generates and maintains records. The array of records available to the investigator is as varied as the number of businesses in existence. Because of this, only two examples are presented in this chapter. Appendix A contains a number of other sources of business records.

**Records from the Purchase of Real Estate**

Let’s say you are investigating Andrew Sinclair and you want to find out about the house in which he lives. Does he rent or own? If he rents, who owns the house? Your investigative research starts with the public real estate records found at the Register of Deeds or Land County Office in the county where the house is located.
located. The records reveal that Mr. Sinclair owns the house and has an outstanding mortgage held by a lending company. The "warranty deed" indicates that the subject purchased the property for $120,000. The "Deed of Trust" (the mortgage document filed with the county recorder's office) reveals that an outstanding mortgage of $110,000 was obtained from ABC Mortgage Company.

You figure that Mr. Sinclair put the $110,000 mortgage loan toward the house and paid off the rest with a $10,000 downpayment. You contact ABC Mortgage Company and they confirm that the suspect has a $110,000 mortgage, but their information does not tell you exactly what Mr. Sinclair did with the $110,000. Mortgage loans are to be applied toward the house for which they are granted, but since you are investigating the guy because of some alleged shady business dealings, you decide to look further. You look to the business records surrounding the purchase of the house. Your investigation leads you to Mr. John Phillips, the real estate lawyer who handled the transaction.

Most real estate transactions are handled by a disinterested third party acting for both the seller and buyer. This third party is usually an escrow company or a real estate attorney. The mortgage company submits a cashier's check in the amount of the loan to the third party who ensures that all funds received are properly accounted for and that all disbursements are properly made in accordance with the sales contract.

A real estate sale may involve more than just a straight sale of the property. There are often additional fees to be paid: sales commissions to a real estate company, fees for appraisals, payoffs of existing mortgages, real estate taxes due, and the third party's service fee. Incoming monies received for the purchase may include the buyer's earnest money (money given by the buyer to the seller to bind the purchase agreement), downpayments, and the amount received from the mortgage company. After costs are allocated to the seller and buyer according to the sales contract, the third party collects and disburses any amounts due to the seller and buyer at the closing. Records of these financial transactions are business records and are retrievable by the investigator.

ABC Mortgage Company had made out the cashier's check for the mortgage loan to John Phillips, Esquire. Contact with Mr.
Phillips results in the acquisition of the document found on the next page. This document is the closing statement for the purchase of the house.

### Closing Statement

</tr>
</tbody>
</table>

Analysis of the closing statement reveals the following:

- The seller is to collect $120,000 for the house from the buyer. Of the $120,000, $10,300 is to be used to pay various fees ($800 to pay for the appraisal, $4,200 for real estate commissions, $300 for escrow fees, and $5,000 to pay outstanding real estate taxes).

- When all is said and done, the seller will leave the settlement with $109,700 ($120,000 minus $10,300).

- The buyer, Mr. Sinclair, must provide $120,300 at closing, $120,000 to pay for the house and $300 for his share of the escrow.

- Mr. Sinclair ends up having $220,000 at closing. He provided $50,000 in earnest money, $60,000 in an additional downpayment, and $110,000 from the mortgage company.

- The earnest money ($50,000) and additional downpayment ($60,000) are applied to the purchase price of the house ($120,000). This means that the buyer owes only $10,000 ($120,000 minus $110,000) toward the house.
• $10,000 of the loan supplied by ABC Mortgage ($110,000) will be used to cover the remaining $10,000 due to the seller. $300 will be used to pay the buyer’s share of the escrow. $99,700 [$100,000 minus ($10,000 + $300)] remains. This money is provided back to Mr. Sinclair who initially brought the $220,000 to the closing. He can use the money to eventually pay off the mortgage, invest in other properties, etc.

Through this analysis, you realize that what you had originally thought (that the $110,000 mortgage was applied to the purchase price with the remaining $10,000 covered by a downpayment) is far from true. What you discover instead, is that Mr. Sinclair applied for and received a $110,000 mortgage loan when he really needed only $10,000. This discovery leads to other questions: Where did Andrew Sinclair get $50,000 earnest money and $60,000 for a downpayment? Did he falsify his application for the mortgage loan?

Your investigation into Andrew Sinclair’s real estate deal may lead you to other business records pertaining to a real estate transaction. These records include:

• A sales contract
• Special instructions
• Photocopies of instruments used to make earnest money payments and downpayments
• Appraisals
• Receipts for currency received
• Existing mortgage loan payoff calculations (most often a statement from the existing mortgage company)
• A copy of new loan agreements, promissory notes, and related documents
• A copy of the instrument received from the new mortgage company who disbursed the new loan
• Copies of instruments received from buyer/seller at closing for amounts due
• Copies of all checks disbursed by the escrow company/real estate attorney at closing

• Correspondence with buyer and seller

• Broker's Worksheet, Buyer's Closing Statement, and Seller's Closing Statement

Records from the Purchase of a Vehicle
Similar to real estate information, both public and business records exist regarding motor vehicle transactions. State and/or county governments maintain comprehensive files listing vehicle ownership. The vehicle's identification number (VIN) can be cross-referenced to find the registered owner or vice versa. Finance companies or financial institutions that have an interest in the vehicle (lien holder) are recorded as a matter of public record.

The financial investigation into vehicle ownership should not stop after searching public records or lien holder information. Business records kept by automobile dealerships often provide detailed financial information and usually include:

• Various sales contracts/offers prepared by the salesman during negotiations

• The final sales contract or purchase agreement

• Loan documents if the customer obtained financing through the dealership's credit sources

• Carbons of receipts given to the customer for amounts received, usually denoting cash or check and the check number

• Photocopies of the checks or other instruments received in payment by the customer

• Appraisal of trade-ins prepared by the dealership service department

• Special instructions for registration of the vehicle
All requests for documents from an auto dealership should include the service department records. With the advent of computerized systems, the service department can usually provide a listing of all subsequent repairs and maintenance service performed on the vehicle at any authorized dealership. This can also be helpful in locating a subject who may have moved out of State.

**Government Records**

Information relating to financial transactions is maintained by numerous Federal, State, and local government agencies. From "information-gathering" activities like the FBI's National Crime Information Center (NCIC) to tax returns (IRS), records of financial transactions are compiled, stored, and retrievable from these sources of information. Several Federal intelligence networks are described below. Appendix A identifies other government sources and the information that they can provide.

**National Crime Information Center (NCIC)**

The National Crime Information Center is a repository of data relating to crime and criminals gathered by local, state, and Federal law enforcement agencies. The NCIC's computer equipment is located at FBI Headquarters in Washington, D.C. The present equipment is capable of accommodating nearly 2 million records on criminal activities. In a matter of seconds, stored information can be retrieved through equipment in the telecommunications network. Connecting terminals are located throughout the country in police departments, sheriff's offices, State Police facilities, and Federal law enforcement agencies. Dispatchers can respond quickly to requests. NCIC also furnishes computerized data in a matter of seconds to all agencies participating in the centralized State systems. The goal of NCIC is to serve as a national index to fifty statewide computer systems and heavily populated metropolitan area systems.
National Law Enforcement Telecommunications System (NLETS)

NLETS is a computerized communication network linking State and local enforcement agencies in all 50 States. It can provide information such as criminal history, driver's licenses, and vehicle registration.

El Paso Intelligence Center (EPIC)

EPIC is a multi-agency operation that collects, processes, and disseminates information on narcotics traffickers, gun smugglers, and alien smugglers in support of ongoing field investigations.

If a suspect is or has been engaged in any of the previously mentioned activities, it is possible that EPIC will have intelligence information on him or her. This information might include the name of the individual; and his or her known activities, significant events, associations among individuals or activities, aircraft or vessels used by the subject, observations of both foreign and domestic movements of the suspect, and his or her associates and their aircraft or vessels. EPIC also provides the name, agency, and telephone number of each investigator having expressed an interest in or having data regarding a subject. EPIC records often contain substantial financial information relative to the subject.

International Criminal Police Organization (Interpol)

Interpol is an international police agency with bureaus set up in member countries. In the United States, the National Central Bureau is under the direction and control of the Departments of Justice and Treasury.

The U.S. National Central Bureau can assist in such things as criminal history checks, license plate and driver's license checks, and the location of suspects, fugitives, and witnesses.

IRS National Computer Center

The National Computer Center is located in Martinsburg, West Virginia and it maintains the Master File, a tax record of all known taxpayers. The Master File is designed to accumulate all data pertaining to the tax liabilities of all taxpayers, regardless of
location. The Master File is separated into several categories. Two of the categories are the Business Master File and the Individual Master File.

**Summary**

Selecting a suspect to target for investigation is not a decision that should be taken lightly. The probability of a conviction must be considered as well as the availability of resources and jury appeal. Once an investigation begins, information must be collected. Without information—an investigator's most valuable resource—no criminal will ever be put behind bars. The source of information with the most knowledge is the suspect. Some are cooperative, others are not. But no matter what type of suspect an investigator comes across, he or she must develop other sources of information to verify or contradict what a suspect says. There are all sorts of information available to an investigator, and the good ones know how to focus on what they need and where to go to get it.
Questions and Exercises

Answer the following questions using the information contained in this chapter and Appendix A. Once you have completed the questions, check your responses with those provided at the back of the book.

1. Your suspect’s social security number is 421-00-0123. What lead does that provide?

2. You are investigating Base Ball, Inc. You wonder if any complaints have been lodged against the company. You know that Base Ball, Inc. does a lot of business with a ball glove manufacturing company in Raleigh, North Carolina. You do not know the name of the company in Raleigh, therefore, you want to get a list of companies in that geographic area.

   a. Who would you contact regarding possible complaints against Base Ball, Inc?

   b. Who would you contact for a list of businesses in the Raleigh, North Carolina area?

3. Your suspect admits to owning an American Express Card.

   a. Who can provide you with information concerning the suspect’s use of the credit card?
b. What leads might you obtain from analyzing a suspect’s credit card activity?

4. What factors come into play when selecting a suspect to target for investigation?

5. What is the best source of information concerning a suspect? Why?

6. Your suspect recently became a naturalized American citizen. What Federal agencies maintain information concerning aliens and naturalized citizens?

7. You are investigating a forgery case. What Federal agency maintains records pertaining to forgery?

8. During the course of your investigation, you come across property you think is stolen. What Federal agency maintains the National Stolen Property Index?
Endnotes

2 *Uniform Partnership Act*, Section 6
In Chapter 4, various sources of information were identified. Sources of public, business, and government records were provided. This chapter focuses on information that can be obtained from financial institutions. The chapter begins with a discussion of bank records. The term “bank records” refers to the records of banks, savings and loans, credit unions, and other similar types of institutions. These records are probably the single most important source of information available to the financial investigator. Banks handle two basic types of transactions: account and non-account. Account transactions involve actions such as depositing money to a savings account or withdrawing money from an account via a check. These actions directly affect the movement of money through a bank. Non-account transactions do not affect the flow of money through a bank. Receiving a bank loan is an example of a non-account transaction. All sorts of paperwork accompanies account transactions and most non-account transactions. An investigator must be aware of what records exist and must be able to interpret the information contained in the records.

Brokerage firms also maintain records involving financial transactions. Not only must an investigator be aware of what records exist, he or she must be familiar with the terminology of the securities and commodities markets. Banks and brokerage houses can provide a wealth of financial information, however, there are other financial institutions that maintain records related to financial transactions. This chapter concludes with a look at two of these sources: Western Union and casinos.
After studying Chapter 5, you should be able to:

- Describe terms related to banking and brokerage firms.
- State what records are available from banks and brokerage houses.
- Analyze bank and brokerage firm records.
- State what information is available from Western Union and casinos.

The financial investigator’s main objective is to track the movement of money. This chapter examines the movement of money to and through banks and brokerage houses. While many criminal investigators view this ordeal as a “paper chase”, financial investigators see financial institutions as road maps which lead directly to the perpetrator and resolution of the crime. These institutions are, in financial investigative terms, where the action is. After all, banks, brokerage houses, and other financial institutions were established to monitor the movement of money.

---

**Banks as a Source of Information**

Tracking the movement of money generated by criminal activity will normally involve tracing financial transactions to a bank and through its system. For the financial investigator, following the flow of transactions to and/or through a bank is comparable to any other asset tracing procedure. The investigator is looking for the ultimate source and disposition of funds, and one never knows what might turn up in the search—unknown witnesses, information, and documents; or, perhaps, new suspects.

The key to following the flow of money into and out of the banking system is an understanding of the inner workings of the system itself. From the tiniest rural community credit union to the international banking giants, they all take in, account for, pay out, and record the movement of money. The inner workings of the banking system can be divided into two types of transactions: account transactions and non-account transactions.
Account Transactions

Account transactions are financial events that directly affect the movement of money through a bank account. In this context, “directly affect” means deposits to, or withdrawals from, an account. Account transactions occur in checking, savings, and credit union accounts. Records of account transactions are maintained through the use of the following documents:

- Signature card
- Bank statements
- Deposit tickets/items
- Checks/withdrawal items
- Credit and debit memorandums

Signature Cards—Opening an Account

The first document prepared and maintained in a bank’s system of recordkeeping is the signature card. Every financial institution requires that a customer (individuals, trusts, business organizations, etc.) fill out a signature card when opening an account. It indicates who owns the account and may require that the account owner(s) supply his or her address, occupation, employer, date/place of birth, and social security number. When a business organization opens an account, corporate resolutions, and partnership and trust agreements, if applicable, often are included as part of the background information requested by the bank. This type of information is kept with the signature card.

For the investigator, the signature card provides valuable leads to other witnesses or unknown co-conspirators. Since the card contains the signature of the account owner(s), it can serve as a sample of the owner’s handwriting.

Bank Statements—Record of Transactions

Banks periodically reconcile the financial activity in each account. A record of this reconciliation is prepared and retained by the institution and a copy is sent to the account’s owner. Details of all financial activity affecting the account for the period in question are shown on a bank statement. A portion of Anthony
Benidect’s bank statement is shown on the next page. Mr. Benidect is a suspect in a drug trafficking investigation.

The financial investigator should retrieve all bank statements related to the time frame under investigative consideration, keeping in mind that some criminal activities are well underway prior to detection, therefore, bank statements must be retrieved for a period of time prior to the detection of criminal activity. Through bank statement analysis, the investigator will be able to reconstruct the financial transactions that occurred during the period of criminal activity, and identify sources of information or investigative leads to the movement of money. These sources or leads may include:

- Unusually high monthly balances in comparison to known sources of income
- Unusually large deposits, deposits in round numbers, or deposits in repeated amounts which are not attributable to legitimate sources of income
- The timing of deposits. This is particularly important when dates of illegal payments are known
- Checks written in unusually large amounts (in relation to the suspect’s known practices)
- A lack of account activity. This may indicate transactions in currency or the existence of other unknown bank accounts

</table>
Deposit Slips/Deposit Items

From the bank's point of view, the deposit function is the most important of all of the banking transactions. The majority of loans and investments made by the institution come from the depositors' dollars. When deposits cease, the institution ceases.

From the investigator's point of view, seeing a suspicious deposit on a bank statement does not in and of itself provide enough detail of the financial transaction. If a deposit appears to be suspicious, the investigator will want to examine the corresponding deposit slip. Upon reviewing Mr. Benidect's previously shown bank statement, the investigator wants to further examine the deposit made on April 2, 1992. That deposit slip is shown below and it reveals that the deposit was comprised of $4,500 in currency and a check for $2,250.

Upon reviewing the deposit slip, the investigator has to wonder where Anthony Benidect got $4,500 in cash and who wrote the check that was deposited. Bank statements and deposit slips do not speak for themselves; they need to be interpreted by "financial witnesses"—the currency, checks, and other items that comprise the deposit. By retrieving and examining the items of deposit, the investigator may find additional leads to follow.

The original documents involved in a deposit are not retained by the bank. Currency is returned to circulation, checks go back to the bank of origin, and deposits made via an electronic transfer
show up as mere bookkeeping entries. However, copies of each deposited item, except currency, are made. The bank organizes and maintains these copies on microfilm. By reviewing these records, the investigator may be able to locate other witnesses.

To successfully gather information from bank deposits, the investigator needs an understanding of the bank’s system of maintenance, organization, and retrieval of deposit information. An overview of the system is shown on the next page and discussed below.

**Transaction entry point**

A deposit enters the banking system through a transaction entry point. There are three different types of transaction entry points:

- **Teller.** A teller receives deposits directly from the customer, or through the mail or automatic teller machine (ATM).

- **Cash Services Department.** High volume deposit customers such as major retail establishments, grocery stores, or governmental units make their deposits to the bank via armored cars or delivery services. The Cash Services Department handles these types of deposits.

- **Other Internal Departments of the Bank.** Deposit transactions can occur through intra-account activities (transfer of funds from a savings account into the same customer’s checking account) or electronic transfers between financial institutions. Additionally, with the advent of direct deposit, businesses and companies can make deposit transactions into bank accounts from their own bookkeeping departments. Such services are handled by different departments inside the financial institution.

The transaction entry point is vital in the investigative process. It’s even more than vital because at the point of deposit two undeniable events occur: money is moved from somewhere by someone and a permanent record is made.
During the early stages of a financial investigation, books and records usually reveal nothing out of the ordinary and bank statements often seem inconclusive of any wrongdoing. The information collected by the investigator is sketchy and denials by the suspect are frequent:

"I don't even know that guy."

"My firm never did business with that company."
However, through deposit analysis, the investigator often finds:

- A photograph of the person who “didn’t even know the guy” depositing currency into the “guy's” savings account. Financial institutions have security cameras that record teller window transactions.

- Checks from “that firm” going into “that company's” checking account.

In certain investigations, the transaction entry point can be critical to the investigation's success. In a counterfeiting investigation, for example, intervention by law enforcement at the point of entry is crucial. The same holds true for situations involving buy money (narcotics cases) or marked bills (extortion or blackmail cases). Investigators, perpetrators, and the currency in question must meet simultaneously at the transaction point of entry, in order to successfully defeat the criminal act. The importance of this is highlighted by the fact that all currency, once inside the banking system, is treated alike. Once past the point of entry, it is extremely difficult, if not entirely impossible, to reconstruct the source of the currency. Accordingly, in these situations the financial institution should be requested to separate and segregate the currency in question before it enters any further into the banking system.

**The Proof Department**

From the transaction entry point, deposits go to the Proof Department. Here, checks are encrypted with the bank’s own numerical codes—**proof numbers**. Proof numbers establish the “location keys” for the bank’s retrieval and bookkeeping system. Magnetic ink character recognition (MICR) encoding also occurs in the Proof Department. An MICR number enables a check to be read by high speed computers during the processing and clearing procedure. A portion of the MICR number is placed on checks when they are initially printed. After a check is deposited, the remainder of the MICR number is placed on the check in the bank of deposit’s Proof Department. (The MICR number is discussed in greater detail later in this chapter.)
In addition to being encoded, the check is microfilmed. In the microfilming process, all checks shown on one deposit slip are microfilmed consecutively before proceeding to the next group of deposited items. The order of microfilming is generally determined by the transaction entry point. For example, all of Teller No. 1's transactions are microfilmed and then all of Teller No. 2's transactions are microfilmed, etc.

Currency is not microfilmed. Once it is inside the bank it is counted and, after the count has been verified, it goes its own separate way. Chapter 2 contains a discussion of Title 31 U.S.C. § 5313, that states financial institutions are required to file a report on currency transactions. One such report is the Department of the Treasury Form 4789, Currency Transaction Report (CTR), the first page of which is shown on the next page. When currency in excess of $10,000 is deposited, the CTR identifies the depositor by address, social security number, and date of birth, and the actual owner of the currency if he or she is someone other than the depositor. The CTR also records the total amount of the transaction, the types of bills involved in the transaction, and various other information.
Currency Transaction Report

1. Check applicable boxes if: a) transaction involves one report, b) exemption limit exceeded, c) suspicious transaction.

2. If more than one individual is involved, see instructions and check here.

3. Reason items 4-5 below are not fully completed (check applicable boxes):
   a) Arrived car service name
   b) Mail deposit/shipment
   c) Night deposit or ATM transaction
   d) Multiple transactions (see instructions)

4. Last name
5. First name
6. Middle initial
7. Social security number

8. Address (number, street, and apt or suite no.)
9. Occupation, profession, or business

10. City
11. State
12. Zip code
13. Country if not U.S.
14. Date of birth (see instructions)

15. Method used to verify identity:
   a) Describe identification
   b) Issued by
   c) Number

16. If the transaction was conducted on behalf of more than one person, see instructions and check here.

17. This person is: a) individual or b) organization
18. Individual’s last name or Organization’s Name
19. First name
20. Middle initial
21. Social security number

22. Method of identification:
   a) Describe identification
   b) Issued by
   c) Number

23. Address (number, street, and apt or suite no.)
24. Occupation, profession, or business

25. Date of birth (see instructions)

26. City
27. State
28. Zip code
29. Country if not U.S.
30. Date of birth (see instructions)

31. Savings □ □ Security □ □ CD/Money market □ □ Loan □ □ Other (specify)

53. Address where the transaction occurred (see instructions)
54. Name of financial institution
55. Employer identification number

BEST COPY AVAILABLE
Government regulations allow financial institutions to exempt certain customers from the CTR filing requirements. High volume cash businesses, payroll account holders, and other commercial companies that are routinely involved in transactions which exceed $10,000 may be exempt. However, the bank must maintain a record of these exempted customers.

When an investigator searches the bank’s proof tapes (microfilm), he or she must be particularly careful when tracing a currency deposit. For example, investigative findings indicate that a suspect received $18,000 in illegal payments on May 1, 1992. A review of the target’s bank statement for that period reveals that on May 1, the suspect deposited only $9,000. By using the bank’s proof tape system, the investigator finds a deposit slip and it shows a $9,000 currency deposit. (Note that the suspect kept the deposit under $10,000 so he or she would not have to file a CTR form.) The investigator has located half of the illegal payment, but where did the other $9,000 go? A continued search of the proof tape locates a similar $9,000 currency deposit to another account which, unknown to the investigator, is also owned to the target. Often, this type of extended search will uncover split currency deposits and/or multiple transactions.

From the Proof Department, deposited items take different routes through the bank of deposit’s system. The path that an item takes is dependent upon the bank of origin’s (bank upon which the item is drawn) relationship to the bank of deposit. Let’s look at the four paths an item of deposit may take by looking at four items deposited into Bank A. The four types of items and their paths are shown and described on the following pages.
• Transit items. The first of our four items deposited into Bank A is a transit item. Transit items are checks and other items (money orders and travelers’ checks) drawn on financial institutions other than the bank of deposit. In the case of a check, the bank of deposit ships the check back to the bank of origin. The bank of origin, in turn, normally sends the check back to the customer by including it in his or her bank statement. This happens after the bank of deposit sends the check to an intermediary bank that was established to assist in the clearing process.

Certain banks act as clearing houses for transit items. These banks, known as correspondent and clearing house banks, receive items from banks all over the country and process them back to the bank of origin located in their particular area. Major banks in metropolitan areas act as correspondent banks. Also, the Federal Reserve Bank is a clearing house bank.

Actually, there are 12 Federal Reserve Banks (and some have branch banks) located throughout the country. The role of each is to monitor the commercial and savings banks in its region to ensure that they follow Federal Reserve Board regulations. Each Federal Reserve Bank is a separate corporation, its stock owned by commercial banks that are members of the Federal Reserve System. The Federal Reserve System is made up of all nationally chartered banks and any State chartered bank that is accepted for membership.
Transit items are provided with proof numbers and microfilmed by each bank they pass through during their return trip to the bank of origin. This establishes a retrieval “audit trail” for each item.

- **Out clearings.** The second item deposited into Bank A is an out clearing item. An out clearing item is an item drawn on a bank in the same geographic area as the bank of deposit. These items are handled in the same way as transit items and, like transit items, they are given proof numbers and microfilmed by each bank they pass through on their return trip to the bank of origin.

- **On-us items.** The third item deposited into Bank A is an on-us item. An on-us item is a check drawn on the bank of deposit. Certain on-us items require special handling during the clearing process and are sent to a particular internal department for final processing. All on-us items eventually flow into the bookkeeping department.

- **Items from a bank’s internal departments.** The fourth item that Bank A deals with is an item from one of its internal deposits. This item might be a transfer between intrabank accounts, loan proceeds, a certificate of deposit, or an electronic transfer into an account.

**Checks/Withdrawal Items**

Funds normally are withdrawn from a bank account through the issuance of a check. Withdrawal slips and automatic teller machines are also used to withdraw funds. The face of a check contains information that is of interest to an investigator. It shows the bank of origin, date and amount of the check, name of the payee (the entity to whom the check was made payable), and the authorized signature of the owner of the account on which the check is drawn. The following information also appears on the face of a check:

- **American Banker’s Association (ABA) Transit Number and Federal Reserve Routing Code.** Have you ever noticed the number on the upper right side of a check that looks something like a fraction? It provides several pieces of information. The numerator
contains the ABA transit number; the denominator is the bank of origin’s check routing symbol.

An ABA transit number is a two-part code assigned to banks and savings institutions by the American Banker’s Association. The first part shows a two- or three-digit number that corresponds to the city, state, or territory where the bank of origin is located. (A complete list of these two- or three-digit numbers is found in Appendix B.) The second part of the ABA transit number identifies the bank itself. The ABA transit number on the check shown below tells an investigator that the bank is located in Washington, DC and that “099” is the code for the National Bank of the Nation.

The bank of origin’s check routing symbol is a three- or four-digit number that provides the following three pieces of information:

- The bank of origin’s Federal Reserve district (These districts are listed in Appendix B)
- The federal reserve facility through which the check is collected
- The funds availability assigned to the check. Funds availability is either immediate or deferred. If “0” is the last digit,
immediate availability is indicated. A digit of 1 through 9 indicates a deferred payment.

- **Pre-Qualifying Numbers.** The portion of the MICR number that comes printed on a check. The pre-qualifying number indicates bank of origin information (paying bank’s number and check routing symbol), customer account number, and the check’s number.

- **Post-Qualifying Number.** The portion of the MICR number entered by the bank of deposit’s Proof Department. It shows the dollar amount of the check.

When investigators request a copy of a check, they should ask for copies of both sides because the back side of a check also contains valuable information. For one thing, it will show who endorsed the check. If the check was issued to an individual, it should contain that person’s signature; if it was issued to a business organization, it will probably contain a stamped endorsement. The back of a check will also contain information related to the movement of money. Proof numbers from all of the banks that the check passed through will be available.

When a payee receives a check, he or she may either deposit it or cash it. If the check is deposited, it follows the clearing process previously discussed. Checks that are cashed are recognizable by teller stamps or “cashed” codes that are encoded or stamped on the face of the check itself. These codes can lead an investigator to the teller who cashed the check and who therefore needs to be interviewed about the specific transaction. A teller’s stamp or “cashed” code also can be a possible link between a specific teller and the suspect. Many times a suspect will go to the same teller and develop a relationship with that person. Conversations between these people may reveal leads to the crime. Whether knowingly or unknowingly, the teller may possess valuable information.

From an investigator’s standpoint, checks are of equal or greater importance than deposits. Checks establish a strong financial link that cannot be overcome by verbal denials. Checks may identify other bank accounts, credit cards, the purchase or location of major assets, and loan transactions which directly impact
on financial investigations. A $25 check for a utility hookup may identify a $250,000 hidden condo.

Checks can be organized to reveal patterns of financial activity through an investigative technique known as check spread analysis. To perform check spread analysis, the investigator lists a suspect’s checks by payee. A sample check spread analysis, using checks obtained from our suspect, Mr. Anthony Benidect, is shown below.

In the sample check analysis, the investigator listed all of Mr. Benidect’s checks payable to the Virginia Electric Company for one calendar year. From this list, the investigator is able to determine that Mr. Benidect paid his electric bill every month. The investigator then listed all checks payable to “Franklin Garden Apartments,” the complex where Mr. Benidect rents an apartment. The investigator finds that checks for rental payments are missing for the months of April and November. The investigator will want to find out how Mr. Benidect paid his rent for those months. The absence of a check may indicate a currency payment which can lead to possible undisclosed sources of illegal income.

Credit and Debit Memos—Special Transactions
Any transaction that affects an account but does not involve a
deposit ticket or check withdrawal requires special handling. A record of these “unusual transactions” is listed on the customer’s bank statement through memorandum entries. These entries are shown to report the movement of money that takes place without going through the normal transaction points of entry or withdrawals through checks. Credit memos or “CM” indicate an increase in the account funds, a flow of funds into the account. A debit memo or “DM” indicates a decrease in the account funds, a flow of funds out of the account.

Non-Account Transactions

Non-account transactions are financial transactions that occur at a financial institution but do not flow through an account. Examples of non-account transactions include loans; purchase or negotiation of cashier’s checks, money orders, travelers checks; and currency transactions such as exchanging currency for currency and cashing third-party checks. For investigative purposes, wire transfers, entries into a safe-deposit box, and the purchase or sale of securities are also considered non-account transactions.

Loans

Loan applications, loan repayment ledgers, and loan correspondence files are usually maintained by financial institutions. A loan application usually requires a financial statement completed by the individual requesting a loan. It represents a good “financial lead document” for the investigator. If an investigator is looking to identify a suspect’s assets and accounts, he or she should turn to any available loan applications, since the suspect, eager to
impress the bank with his or her solvency, will identify assets and other accounts more candidly on that document than in an investigative interview. Furthermore, loan applications most often contain a statement that the applicant is aware, by signing the document, that it is a federal crime to knowingly make false statements when applying for a loan.

The loan repayment schedule and correspondence files can be used by the investigator to detect:

- **Repayment methods.** Lump sum, accelerated, or unusual repayments can be traced through the bank's proof system.

- **Final disposition of loan proceeds.** The disposition may be within the bank (on-us items) or elsewhere. Either situation is traceable through the bank's recordkeeping system.

- **Loan collateral.** The security pledged for the loan, if any, may be an unknown asset.

- **Downpayment.** The loan proceeds may have been used to finance an asset, the downpayment for which came from illegal funds.

- **Credit checks and internal memoranda.** The investigations done by the credit department to determine the risk for the bank may lead the investigator to additional assets, loans, bank accounts, etc.

In any case, loan information leads to other people and other assets. For example, loan proceeds may have been deposited into hidden accounts or these accounts may have been used to repay a loan. Loan documents may have been co-signed by a previously unknown associate or the suspect may have taken a loan out for someone else. Loan repayments could be traced to previously unknown accounts or associates. Tracing the ultimate disposition of the loan proceeds and the ultimate source of the loan repayments is a vital technique for the trained investigator.

**Cashier's Checks, Certified Checks, Traveler's Checks, and Money Orders**

These financial instruments require special handling by a bank because they involve various departments inside the bank.
Cashier's checks are checks drawn by the bank on its own funds and are issued by an authorized officer of the bank. The bank employee will ask the customer to designate a remitter (person purchasing the check) and a payee in order to fill in these lines on the check. A certified check is a check where the bank guarantees that there are sufficient funds on deposit for that particular check. A money order is a negotiable instrument that serves as a substitute for a check. The money order is issued for a specific amount of payment and the customer fills in the name of the purchaser and payee. The bank employee imprints only the amount of payment. A traveler’s check is an internationally redeemable draft. It is purchased in various denominations, such as $20.00, $50.00, and $100.00, and is only valid with the holder’s own endorsement against his or her original signature.

Investigative analysis of the bank checks described above follow the “proof process” if they were deposited into or purchased by withdrawal from a known account. If these documents were purchased with currency or checks drawn on an unknown account, locating them is significantly more difficult. In most situations, retrieval requires a hand search of each bank check written, which is a very labor intensive process. In the alternative, interviewing bank employees in an attempt to pinpoint the transaction date and the amount may prove more successful. If the suspect goes to the same bank and uses the same bank officer or teller to complete his or her bank transactions, these people may be able to assist in narrowing the search for the retrieval of the bank checks at issue.

Currency Transactions—Currency Exchanges and the Cashing of Third-Party Checks

Documenting the movement of money involved in a pure currency exchange is difficult. Currency-for-currency exchange transactions generally leave no paper trail inside the bank system unless the amount exceeds the $10,000 and then a CTR must be filed. The best source of information is the testimonial recollections of bank personnel.

A third-party check is a check that the payee endorses to another party. It can be traced by the bank’s “proof system” if the third party is a legitimate entity. Financial institutions rou-
tinely require two forms of identification to cash a check, but if the check is made payable to a fictitious third party and is cashed using false identification, the proof system is unworkable. When this situation occurs, the only alternative is to contact the entity who originated the check.

**Wire Transfers—Electronic Transfers**

There is nothing mysterious about a wire transfer. Records detailing both ends of the transaction should be available either from the bank of origin or destination, or both. Out-of-the-country (off shore) wire transfers can create a retrieval problem depending on the country involved. Various "haven countries" are known to offer a legal and/or economic climate for laundering money or hiding illegally gotten profits. These are often located in the Caribbean and other areas, and restrict dissemination of this type of financial information. When money is moved by a wire transfer and neither the source of the funds nor the date of the transfer is known, retrieval of any identifying information is very difficult.

**Safe-Deposit Boxes**

Financial institutions rent or lease storage facilities in secured areas of the bank to its customers. The safe-deposit box rental agreement indicates the date the box was first rented and the identity of the renter, however, bank records will not reveal the contents of the box. An entry log maintained by the bank shows the date and times of visits to the box and also reports the identity of the visitor. This information may have significant investigatory importance. For example, records of entry into a safe-deposit box can corroborate testimony relating to the receipt of illegal currency or the proceeds from illegal activities.

**Bank Credit Cards**

Since many banks offer credit cards to their customers, charge slips and repayment information relating to these cards might be available. The financial investigator may find leads to purchases of jewelry, cars, furs, etc. through these records.
Questions about Bank Records

Before discussing other types of financial institutions as sources of information, the following two items concerning the retrieval of financial records should be addressed:

How easy is it for an investigator obtain to financial records from a financial institution?

As was stated in Chapter 4, the most knowledgeable source of financial information are the suspects targeted for investigation. Just as they have the answers to questions relating to guilt or innocence, they also have custody of financial records of importance to the investigator. Suspects are the customers of banks, the applicants for loans, and the purchasers of the securities. Therefore, they possess the original records relating to the money movement. By asking for these records, the investigator can gain access to this otherwise restricted information.

Financial institutions restrict access to records of money movement. The Bank Secrecy Act and the Right To Financial Privacy Provisions of Federal law restrict open dissemination of financial information to law enforcement. Accordingly, without the individual customer's permission, banks are forbidden to provide financial records to anyone, except when they are legally compelled to do so. Banks are also required to notify the customer of any request unless legally told not to. Such legal compulsion can take the form of subpoenas, summonses, or court orders.

While financial institutions cannot provide documents or access to information in the customer's account, except in accordance with the law, they can notify the Government of the existence of relevant information in those records. The law states, "nothing in this chapter shall preclude any financial institution, or any officer, employee, or agent of a financial institution from notifying a Government authority that such institution or officer, employee, or agent has information which may be relevant to a possible violation of any statute or regulation."

In other words, if a financial institution has information or a belief that information exists relating to a violation of a Federal statute or regulation, they can contact the Government (or agency charged with responsibility for compliance) and tell them that such information exists. It is up to the Federal agency to go
through the hoops to get the proper authority for dissemination of the records.

How long is a financial institution required to maintain customer records?
The Bank Secrecy Act requires financial institutions to keep certain records of customer transactions. United States Treasury Regulations implementing the Bank Secrecy Act provide, in part, that an original, microfilm, or other copy or reproduction of most checking account deposits and savings accounts records must be retained for 5 years. The records must include the following:

- Signature card
- Statements, ledger cards, or other records disclosing all deposits and withdrawals
- Copies of both sides of customer checks, bank draft money orders, and cashier’s checks drawn on the bank or issued and payable by it

In addition, banks must retain, for a 2-year period, all records necessary to:

- Reconstruct a customer’s checking account. These records must include copies of customers’ deposit tickets.
- Trace and supply a description of a check deposited to a customer’s checking account.

The requirements listed above apply only to checks and deposits in excess of $100. Most banks, however, find it cheaper to microfilm all such records including checks and deposits of less than $100 rather than sort their records. The Bank Secrecy Act also requires financial institutions to retain a record of any extension of credit over $5,000 as well as every transfer of more than $10,000 outside the United States.
Brokerage Firms as a Source of Information

To analyze stock accounts, an investigator must possess a knowledge of the different types of brokerage transactions and terminology related to the field. There are two basic types of brokerage markets: securities and commodities. The securities market involves buying and selling of stocks and bonds. The commodities market involves buying and selling of produced goods, such as grain, livestock, gold, or timber. Both markets operate under similar structures, but the terminologies may differ somewhat.

Fundamentals of Securities

People who own stock own part of the corporation issuing the stock. A person’s ownership is represented by the number of shares that he or she owns. The shares are a claim on the corporation’s assets and earnings. A bond is any interest bearing or discounted government or corporate security that obligates the issuer to pay the bondholder a specified sum of money, usually at specific intervals, and to repay the amount of the loan at maturity.

Stocks

When a corporation is formed, capital stock may be issued. Capital stock is stock that is authorized by the company’s charter and represents ownership of the corporation. Each stockholder is entitled to a stock certificate showing ownership of a specified number of shares of stock in the corporation. There are two principal classes of stock, common and preferred. Common stock are units of ownership that allow the owner to receive dividends on his or her holdings. A dividend is a distribution of earnings. Preferred stock is so called because of the preferences granted to its owners. One preference concerns dividends. If a corporation declares dividends, the preferred stockholders will receive their dividend before common stockholders. Preferred stock does not ordinarily carry voting rights. If a corporation is authorized to issue only one class of stock, it is common stock that is authorized. The number of shares authorized by a company’s charter can be changed by formal approval of the stockholders.

Shares issued and subsequently reacquired by the corporation
through purchase or donation are referred to as **treasury stock**. Treasury stock cannot be voted and it pays or accrues no dividends. The number of shares of stock that a corporation has outstanding will always equal the number of shares issued, less the number of shares of treasury stock.

If a stockholder desires to buy more stock, it is not necessary to obtain the permission of the corporation. The stockholder acquires it privately or by purchase in the open market. Conversely, if a stockholder desires to sell shares, he or she cannot demand that the corporation buy back the stock. Instead, the stockholder is free to seek a buyer for the stock either in the open market or by private sale.

After the sale terms have been agreed upon, the mechanics are simple. The seller signs his or her name on the back of the stock certificate and delivers it to the buyer or the buyer’s broker. A record of all outstanding stock certificates is kept by the corporation or by its duly appointed **transfer agent**, usually a commercial bank appointed by the corporation. The transfer agent records the names and addresses of the stockholders and the number of shares owned by each. After determining that an old stock certificate is in proper form for transfer, the transfer agent issues a new certificate to the new owner. Most companies have a **registrar** whose duty is to double check the actions of the transfer agent to prevent improper issue of stock or fraudulent transfer.

**Dividends**

A corporation may pay a dividend in cash, stock, or property. When **cash dividends** are paid, the company or its dividend disbursing agent (usually a bank), sends checks to all stockholders whose names appear on the books of the company. When cash dividends are distributed they are paid in terms of so much per share.

Some companies, in order to conserve cash, pay a dividend in their own stock. A **stock dividend** is usually stated as a percentage of the outstanding shares, up to a maximum of 25 percent.

When a corporation pays a **property dividend** it is usually in the form of stock of another corporation which has been acquired for investment or some other purpose.
Bonds

When a corporation or governmental unit wishes to borrow money for a period, usually for more than 5 years, it will sell a bond issue. Each bond is generally of $1,000 denomination and the certificate issued serves as evidence of a loan from the bondholder to the corporation or governmental unit. A bond pays a stated rate of interest and matures on a stated date. On that date, a fixed sum of money will be repaid to the bondholder. Bondholders do not have corporate ownership privileges as stockholders do.

There are several different types of bonds. Some are described below.

- **Corporate Bond.** A corporate bond is issued by private corporations such as railroads, public utilities, and industrial corporations. They are registered bonds, that is, they are bonds registered in the name of the holder on the books of the issuer or the issuer's registrar and can be transferred to another owner only when endorsed by the registered owner.

- **Municipal Bond.** A municipal bond is an obligation of a state, county, municipality or any agency thereof. By statute, all municipal bonds issued after July 1, 1983, are registered. The interest accrued on a municipal bond is free from Federal taxes.

- **U.S. Government Obligations:**

  **Treasury Bills.** T-Bills are short term securities with maturities of one year or less (13 weeks, 26 weeks, and 52 weeks). They do not pay a fixed rate of interest and they are issued, and subsequently traded, at a discount from face value. No certificate is issued; the purchase and payment are strictly accounting entries. T-Bills are issued in minimum denominations of $10,000 with $5,000 increments.

  **Treasury Notes.** T-Notes are intermediate securities with maturities from one to ten years and are issued in denominations ranging from $1,000 to $1 million, or more. They carry a fixed interest rate and are issued and traded at face value or at a percentage of their face value.
• **Treasury Bonds.** T-Bonds are long-term bonds with maturities of 10 years or longer (usually 25-40 years). They carry a fixed interest rate and are issued and traded as a percentage of their face value. Minimum denomination is $1,000.

Not only are there different types of bonds, there are also the following classifications:

• **Registered Bond.** The name of the owner of a registered bond appears on the bond certificate. The owner's name is also recorded on the proper corporate records (usually maintained by a registrar and/or transfer agent). Interest on the bond is paid by check directly to the registered holder. While a registered bond possesses limited negotiability, it has the advantage of protecting the owner in the event of its loss.

• **Coupon Bond.** A coupon bond has coupons attached to the bond certificate, one coupon for each interest payment due during the life of the bond. The interest is payable to whoever turns in the coupon, whether or not that person initially bought the bond. The holder of the coupons is the bond's legal owner, hence the term “bearer bond.”

• **Registered Coupon Bond.** With a registered coupon bond, the name of the owner appears on records maintained by a registrar and/or transfer agent. The interest coupons attached to the bond certificate do not contain the name of the owner and are payable to the bearer. Registered coupon bonds are registered for the principal only, not for interest.

**Organized Securities Exchanges**

Securities exchanges or stock exchanges neither buy nor sell securities themselves. An exchange functions as a central marketplace and provides facilities for executing orders. Member brokers representing buyers and sellers carry out these transactions.

The two major exchanges are the New York Stock Exchange (NYSE) and the American Stock Exchange (AMEX), both located in New York City. While there are approximately a dozen additional regional exchanges (Midwest, Pacific Coast, Philadelphia-
Baltimore-Washington, etc.), the NYSE and AMEX together handle more than 90 percent of the trading done through organized exchanges.

If a security is to be traded on an exchange, the issue must be approved for listing by that exchange. Securities traded on the NYSE or AMEX may also be listed and traded on a regional exchange, however, no security is listed on both the NYSE and AMEX.

**Over-the-Counter Market**
The over-the-counter securities market handles most of the securities transactions that take place in the United States. In fact, its operations are so extensive that the easiest way to describe it is to indicate what it does not do in securities transactions. The over-the-counter market does not handle the purchase or sale of securities that are listed on securities exchanges, but it handles everything else in the way of securities transactions. Thus, securities not listed on a securities exchange are “unlisted,” that is, traded over-the-counter.

Many different types of securities are traded over-the-counter. They include the following:

- Bank stocks
- Insurance company stocks
- U.S. Government securities
- Municipal bonds
- Open-end investment company shares (mutual funds)
- Most corporate bonds
- Stocks of a large number of industrial and utility corporations, including nearly all new issues
- Securities of many foreign corporations

The over-the-counter market is not located in any one central place. Rather, it consists of thousands of securities houses located in hundreds of different cities and towns all over the United States. These securities houses are called brokers or
dealers and are engaged in buying and selling securities usually for their own account.

Ownership of Securities
There are two principal ways securities are held, in the name of the account holder or in street name. In the first instance, the securities owned simply reflect the name of the customer who maintains the account. When securities are held in a street name, they are registered in the name of the broker.

Fundamentals of Commodities
Where the stock market is involved with the buying and selling of shares in corporations, the commodities market is generally involved with buying and selling commonly accepted quantities of marketable materials. Things sold on the commodities market include soy beans, wheat, corn, pork bellies, rice, gold, silver, and many more too numerous to mention. In the commodities market, the basic instrument of exchange is called the futures contract. A futures contract is a legally binding commitment to make delivery (sell) or take delivery (buy) of a given quantity and quality of a commodity at a contracted price and date. Virtually every type of marketable item is sold on the commodities market.

Organized Commodity Exchanges
In general, futures contracts are bought and sold on commodities exchanges. Commodities exchanges are similar to stock exchanges in that they function as central marketplaces and provide facilities for executing buy and sell orders. Two major commodities exchanges are the Chicago Board of Trade and the Chicago Mercantile Exchange. Other U.S. commodities exchanges are located in New York, Minneapolis, and Kansas City. The exchanges do not enter into the trading of contracts or establishment of contract prices.

Actual trading of futures contracts is done “on the floor” of the exchange by exchange members. There are specific rules governing the trading of futures. All contracts are standardized regarding size, date, and delivery terms. Basically, the price of the contract is the sole variable, and this is negotiated at the exchange. Buying or selling a futures contract does not mean that
an investor necessarily accepts or makes delivery of the actual commodity (although legally obligated to do so). The primary means of fulfilling one’s obligation under the contract is to enter into an offsetting contract. This legally cancels the outstanding obligation.

Available Documentation
A broker is an agent who handles the public’s orders to buy and sell securities and commodities, usually for a commission. A broker may be a corporation, partnership, or individual and is often a member of a stock exchange or a member of a stock exchange securities firm. A registered representative, also known as a securities salesperson, account executive, or just plain broker, personally places customers’ orders and maintains their accounts. While commonly referred to as a broker, a registered representative is usually an employee of a brokerage firm rather than a member.

The broker or brokerage firm can furnish virtually all source documents relating to securities and/or commodities account activity. The principal documents available are:

- **An application for an account.** This document is prepared by the customer when opening of an account. It includes personal data and some financial information such as bank reference, credit checks performed, etc.

- **Customer account cards.** This card is kept in the broker’s personal files for reference. The broker records all transactions conducted for the customer on this card. A sample card is shown on the next page.

- **Signature card.** A signature card shows who has authority to conduct transactions on the account.

- **Securities receipts.** These receipts are issued to a customer when he or she delivers securities to the broker for sale.

- **Cash receipts.** These receipts are issued to a customer when he or she delivers currency to the broker.

- **Confirmation slips.** Confirmation slips are issued to a customer to show the type of transaction (buy or sell) and the amount involved in the transaction.

- **Securities delivered receipt.** This receipt is signed by the customer when a securities purchase is actually delivered to the customer.

- **Brokerage account statement.** The brokerage account statement is usually issued on a monthly basis and provides information on all transactions conducted during the period. It lists all purchases and sales, the name of the security, the number of

---
units, the amount per unit, the total amount of the transaction, the account balance, payments received from the customer, disbursements to the customer (usually with the check number issued), and the customer's position (securities that are held by the brokerage firm for the customer). A sample statement is shown below.

When a subject purchases stock, he or she usually has the option of taking "delivery" of the certificates from the broker or leaving them in the broker's custody for possible future sale. A person active in trading usually keeps all stock with his or her broker. If the customer takes delivery of the certificates, the number of shares would be noted in the "sold or delivered" column, and the "date" column would show the date of delivery. The same holds true if a customer delivers stock certificates to the broker for sale, except the number of shares would be placed in the "bought or received" column.
Other Financial Institutions

Banks and brokerage firms are not the only financial institutions where financial transactions occur. Let’s take a look at two other types of financial institutions and see what information they can provide to the financial investigator.

**Western Union**
A financial transaction conducted with a Western Union money order creates the following three documents:

- The original application prepared by the purchaser or sender
- The original request for payment prepared by the recipient of the funds
- The bank draft drawn by Western Union payable to the person receiving the money

The canceled drafts, after clearing through banking channels, are united with the original telegram applications and sent to the St. Louis, Missouri office for storage under the jurisdiction of the money order auditor. These records (except for money orders over $1,000) are destroyed after three years.

**Casinos**
Casino operations maintain extensive financial information concerning the movement of money. Their records represent a blend of information—bank account statements, credit card and loan applications, and hotel/room service documentation. Since the casino industry is Government regulated, currency movements in excess of $10,000 (purchase of chips or redemption of winnings) must be reported to the U.S. Treasury Department via a Currency Transaction Report by Casinos, Form 8362. A sample Form 8362 is found on the next page.
Form 8362
Currency Transaction Report by Casinos

File a separate Form 8362 for each transaction. Please type or print.

Summary

This chapter describes the types of financial information available from banks, brokerage houses, casinos, and Western Union. The key is to know what information is available and how to interpret it. Seemingly insignificant details, such as charges for interest on a bank statement, have resulted in resolving major financial crimes. Securities held in a “street name” have lead to the discovery of information that has put criminals behind bars. High rollers at “the tables” have been defeated by financial documents revealing their activities. Tracing financial records to and through financial institutions is much more than a mere paper chase. Whether it is a check, a wire transfer, a deposit, a sale of a stock or bond, a purchase of a marketable security, the movement of money and the paper trail which it leaves behind is, for the financial investigator, “where the action is” and the road map of criminal activity.
Questions and Exercises

Answer the following questions then check your responses with those provided at the back of the book.

1. What information does the following check provide?

```
Allison Henderson
923 Prospect Lane
Rockville, Maryland 20851

Pay to the Order of: Hankinson's Automotive

Four hundred and seventy-five and 00/100 Dollars

National Bank of the Nation

June 8, 1992

Allison Henderson

0056109994 0849311218 0874 0000045000
```

2. Why is check spread analysis a useful investigative tool?

3. What information surrounding a safe-deposit box is useful in a financial investigation?

4. For a checking account, what records are banks required to retain for 5 years?
5. Why is it difficult to trace a currency-for-currency transaction?

6. What must an investigator do to gain access to a suspect's bank records?

7. What are "haven countries" and what role do they play in financial investigations?

8. Why is a loan application a good source of financial information?

9. What financial information is available from the following:
   a. Western Union
   b. A casino

10. Distinguish between the following:
    a. Securities and commodities
b. Stock and bond

c. Common stock and preferred stock

d. Transfer agent and registrar

e. Corporate bond and municipal bond

f. Treasury bill and treasury bond

g. Securities held in owner's name and securities held in street name

11. Analyze the following three bank statements and identify four things an investigator will want to follow up on.

Tracing the Movement of Money through a Business

Chapter 5 dealt with tracing the movement of money through financial institutions. In this chapter, you'll see how an investigator traces the movement of money through a business. This skill requires an understanding of business organizations and a working knowledge of the principles of accounting. The proprietorship, partnership, and corporation are the predominate forms of business organization found in the American economy. The composition and fundamentals of each will be addressed in this chapter.

Accounting is the language of business. It reports, classifies, and summarizes the effects of financial transactions upon a business. From the writing of a check for the purchase of raw materials, to the receipt of currency for the sale of a finished product, accounting maintains a record of all business financial events. Illegal events such as embezzlement, insider trading, tax evasion and money laundering can often be detected through the analysis of accounting records. Accordingly, a familiarity with business books and records, accounting systems and methods, financial reports, and auditing techniques becomes important to the financial investigator.

After studying Chapter 6, you should be able to:

- Describe the basic forms of business organization.
- Explain why a knowledge of accounting is important to the financial investigator.
- Define or describe basic accounting terms.
• Journalize transactions.
• Post journal entries to a general ledger.
• Prepare a balance sheet and an income statement.

The discussion in Chapter 5 focused on tracing the movement of money to and through financial institutions. The focus of this chapter is tracing the movement of money through the financial records maintained by a business. But before we get into that, a discussion on the different types of business organizations is necessary. It is important that the financial investigator be aware of the “form” of the business organization he or she is investigating. A business organization’s form can be manipulated to conceal true ownership or financial interest, or to hide illegal activities. Also, the type and complexity of a business’s accounting system can be affected by the business’s form of organization.

Types of Business Organizations

Consider the different types of businesses that make up today’s economy: fast food restaurants, gas stations, video stores, hospitals, construction companies, government agencies, etc. There are literally hundreds of thousands of businesses. Luckily, for both the accountant and the financial investigator, there are not hundreds of thousands of different types of recordkeeping and organization systems. Standards for recordkeeping have been established and our legal system recognizes the following three primary types of business organizations:

• Proprietorship
• Partnership
• Corporation

Proprietorship
Generally speaking, a proprietorship (also known as the single or sole proprietorship) is a business owned by one person who is
usually both the manager and the owner. Historically, proprietorships have been small scale or localized operations, however, there is no legal or theoretical limit to the scope, complexity, or size of this type of operation.

A proprietorship is the most common form of business operation and, as such, is the most frequent type of business the financial investigator will encounter. Anyone who enters into a business without designating an organizational type is considered a sole proprietor. There are no special legal requirements to be met in starting a proprietorship.

The sole proprietor has the advantage of making all decisions and collecting all profits, but he or she also shoulders all responsibilities and suffers all losses.

**Partnership**

In order to become successful, a business may require more resources than are available to a single person. Specific knowledge, skills, or management capabilities may be required that one person alone cannot supply. In these situations, and in many others, two or more people combine assets and skills and become joint owners in a single business—a partnership. A partner can be a person, another partnership, or a corporation and, like a proprietorship, there are no special legal requirements to be met in starting a partnership.

Partnerships have been in existence for a long time. The English common law of partnership, from which the American system is derived, began as Roman law. The Uniform Partnership Act (UPA) codified the majority of the common-law rules relating to partnership actions and is acknowledged as the controlling document for partnership activity. Section 6 of the UPA defines a partnership as "an association of two or more persons to carry on as co-owners of a business for profit." Because partners are co-owners, each:

- Has a right to share in the business profits (and losses)
- Has a voice in management affairs
- Is a co-owner of the partnership property
Since a partnership involves two or more persons, it requires more structure than a proprietorship. A partnership agreement is essential, although it is not a legal requirement. This agreement will prevent (hopefully) future misunderstandings. An agreement of this type, generally known as the Articles of Partnership (see page 129), contains all the terms pertinent to the formation, operation, and dissolution of the partnership, including:

- The names of the partners and the partnership
- The name, location, and type of business to be conducted
- The effective date of the agreement and the agreement’s expiration date, if any
- An agreement as to the value of the assets to be contributed to the partnership by each partner
- The duties and rights of each partner, and the manner in which each partner shares profits, losses, and responsibilities
- The salary to be paid to each partner and the provisions for terminating the partnership

Additional factors pertinent to a partnership include:

- **The fiduciary relationship between each partner.** Each partner must maintain the highest standards of trust, good faith and integrity when dealing with his or her partners or acting on behalf of the partnership.

- **Agency relationship.** According to law, each partner is an agent for all other partners. This means that in transactions with others, the partnership is liable for the actions of a partner.

- **Terminating the partnership.** Ending a partnership is composed of two steps: dissolution and winding up. Dissolution sets the procedure into motion by announcing the partnership’s intentions to close out business. Winding up is the actual settling, dividing, and terminating the partnership.
Articles of Partnership

THIS CONTRACT made and entered into on the fifth day of December, 1989, by and between Paul E. Blake and Richard T. Nelson, both of Billings, Montana.

WITNESSETH: That the said parties have this day formed a partnership for the purpose of engaging in and conducting a wholesale automotive supply business in the city of Billings under the following stipulations, which are a part of this contract:

FIRST: The said partnership is to continue for a term of ten years from January 1, 1990.

SECOND: The business is to be conducted under the firm name of Blake & Nelson at 159 West Gilbert Street, Billings, Montana 59101.

THIRD: The investments are as follows: Paul E. Blake, cash $60,000; Richard T. Nelson, cash $60,000. These invested assets are partnership property in which the equity of each partner is the same.

FOURTH: Each partner is to devote his entire time and attention to the business and to engage in no other business enterprise without the written consent of the other partner.

FIFTH: During the operation of this partnership, neither partner is to become surety or bondsman for anyone without the written consent of the other partner.

SIXTH: Each partner is to receive an annual salary as follows: Paul E. Blake, $27,200.00; Richard T. Nelson, $26,000.00. One twelfth of the annual salary is payable in cash on the last business day of each month. At the end of each annual fiscal period, the net income or the net loss shown by the income statement, after the salaries of the two partners have been allowed, is to be shared as follows: Paul E. Blake, 60 percent; Richard T. Nelson, 40 percent.

SEVENTH: Neither partner is to withdraw assets in excess of his salary, any part of the assets invested, or assets in anticipation of net income to be earned, without the written consent of the other partner.

EIGHTH: In case of the death or the legal disability of either partner, the other partner is to continue the operations of the business until the close of the annual fiscal period on the following December 31. At that time, the continuing partner is to be given an option to buy the interest of the deceased or incapacitated partner at not more than 10 percent above the value of the deceased or incapacitated partner's proprietary interest as shown by the balance of his capital account after the books are closed on December 31. It is agreed that this purchase price is to be paid one half in cash and the balance in four equal installments payable quarterly.

NINTH: At the conclusion of this contract, unless it is mutually agreed to continue the operation of the business under a new contract, the assets of the partnership, after the liabilities are paid, are to be divided in proportion to the net credit to each partner's capital account on that date.

IN WITNESS WHEREOF, the parties aforesaid have heretofore set their hands and affixed their seals on the day and year above written.

Paul E. Blake

Richard T. Nelson
(Seal)
Corporation

Corporations are quite different from proprietorships and partnerships for a number of reasons. Among them are:

- **Legal entity.** A corporation is a legal entity and may come into existence only by the sanction of a state.

- **An entity distinct from its owners.** A corporation is a legal entity in and of itself, separate and distinct from its owners. It’s owners are stockholders. Whereas partners and sole proprietors are personally responsible for their debts, stockholders are not personally responsible for a corporation’s debts.

- **Continuous existence.** A corporation has a continuous existence independent of the existences of its members. Partnerships and proprietorships have limited lives.

Because a corporation is a separate legal entity, it must seek approval to operate. Permission is granted by either State or Federal authorities after review of the requesting organization’s **Articles of Incorporation.**

A corporation’s Articles of Incorporation (see page 131) contains several pieces of information of interest to the financial investigator. Items of interest include the following:

- The name and purpose of the corporation and the location of the corporation’s main office

- The date of the incorporation, the name of the state where incorporated, and the names and addresses of the incorporators

- The amount and kinds of capital stock that are authorized for the corporation, and the number of shares into which the ownership may be divided

- The amount of capital with which the corporation will begin operations

The Articles of Incorporation are normally filed with the Secretary of State in the state where the corporation is being formed. After approval by the State or Federal authority, a certified copy of the document is sent to the corporate office. This cer-
Articles of Incorporation
of
SNOWMOBILE CORPORATION

FIRST: The name of the corporation is Snowmobile Corporation.

SECOND: The principal office of said corporation is located at 21014 Beckett Avenue, in the City of
Wilmington, County of New Castle, Delaware 19805.

THIRD: The nature of the business, or objects or purposes to be transacted, promoted, or carried on, is to engage in the business of selling snowmobiles and all business incidental to such sale.

FOURTH: The total number of shares of stock that the corporation shall have authority to issue is Two Thousand (2,000) and the par value of each of such share is One Hundred Dollars ($100.00), amounting in the aggregate to Two Hundred Thousand Dollars ($200,000).

FIFTH: The amount of capital with which the corporation will begin business is One Hundred Thousand Dollars ($100,000).

SIXTH: The names and places of residence of the incorporators are as follows:

Melvin C. Dahl 1336 Vine Place, Dover, Delaware 19901
David E. Gates 2547 Trimble Avenue, Wilmington, Delaware 19808
Gordon W. Rotz 139 Beechcrest Road, Newport, Delaware 19804

SEVENTH: The corporation is to have perpetual existence.

WE, THE UNDERSIGNED, being each of the incorporators hereinbefore named for the purpose of forming a corporation to do business both within and without the State of Delaware, under Chapter 65 of the Revised Code of Delaware, and the acts amendatory thereof and supplemental thereto, do make this certificate, hereby declaring and certifying that the facts herein stated are true and accordingly have hereunto set our hands and seals this fifth day of June, 1990.

In the presence of: Melvin Dahl
                             David Gates
                             Kenneth Rubin

State of Delaware ) ss.: Gordon Rotz
County of New Castle)

BE IT REMEMBERED, that on this fifth day of June, A.D. 1990, personally came before me, Mary D. Manning, a Notary Public for the State of Delaware, all of the parties to the foregoing certificate of incorporation, known to me personally to be such, and severally acknowledged the said certificate to be the act and deed of the signers respectively and that the facts therein stated are truly set forth.

GIVEN under my hand and seal of office the day and year aforesaid.

Mary Manning
Notary Public
A certified copy is known as the **Corporate Charter**.

After incorporation, a corporation may hold an organizational meeting where a Board of Directors and/or corporate officers are elected. Also, a set of bylaws may be adopted. The corporate bylaws regulate the actions and affairs of the corporation.

In Chapter 5, the securities market was discussed. It is through issuing securities that corporations obtain financing for their operation. Investors can either purchase stock (equity securities) or bonds (debt securities). An investor who purchases stock becomes an owner of the corporation, with each share of stock representing a valued interest. Even though stockholders are the owners of a corporation, they normally have no direct dominion over the management of the business. Stockholders exercise their power indirectly through the election of the Board of Directors. The duty of the Board of Directors is to determine corporate policy and oversee the carrying out of the policy by the corporate employees. Bondholders do not purchase an ownership interest in the corporation, they lend money to the corporation. The corporation promises to repay the bondholders what they have lent, plus interest.

All corporate security sales are reviewed by government authorities to protect the investing public from fraudulent offerings. Accordingly, corporations often provide detailed financial information to the reviewing authorities. These authorities, which include state incorporation departments and Federal agencies such as Securities and Exchange Commission, have valuable information to provide the financial investigator.

**A Comparison of Business Organizations**

A table that lists the advantages and disadvantages of the three basic types of business organizations is found on the next page.

**Business Organization Derivations**

There are derivations of the three forms of business organizations. Descriptions of some follow:

- **Limited Partnership.** A limited partnership permits partners to limit their risk of loss on their investment to the amount of their

|                      |                               |                               | Possibly limited personal incentive |

investment. Their risk is similar to the limited liability of a stockholder. A limited partnership agreement must be in writing and there must be at least one general partner who assumes unlimited liability. Limited partners may not participate in the management of the firm, although they may meet from time to time to vote on general policies of operation. This form of organization is popular in oil well drilling, cattle feeding, and real estate businesses.

- **Cooperative.** A cooperative is a corporation in which profits are distributed to shareholders not in proportion to the number of shares each owns, but in proportion to the amount of business each shareholder does with the cooperative. Unlike normal corporations which generally allow one vote per share, each member of a cooperative has only one vote.
- **Mutual Company.** A mutual company is a type of corporation that has no stockholders. It is common in the fields of life insurance and savings, and is owned by its customers (policyholders or depositors) who, depending on the provisions of the charter, may or may not have the right to vote for the directors. If any profits are distributed, they are paid out according to the size of the policy or the size of the deposit.

- **Shell Corporation.** A shell corporation is one that has no assets or liabilities. It simply has a charter to do business. The attraction of a shell corporation is confidentiality. An application to do business may take weeks to approve and the names of persons on the charter are subject to review; however, the names of subsequent stockholders and directors are not identified on public records.

- **Joint Stock Company.** A joint stock company is an unincorporated association that closely resembles a corporation, but for most purposes, it is treated like a partnership.

- **Joint Venture.** A joint venture, which is sometimes called a joint adventure or joint enterprise, is a partnership created for a limited purpose or duration.

- **Syndicate.** A syndicate, also known as an investment group, is a group of investors usually involved in a specific enterprise (i.e. financing a real estate development).

After identifying the type of business organization, the next step for the investigator is to analyze financial transactions affecting the organization itself. Through such analysis the movement of money, from both legal and illegal activities, can be systematically detected.

---

**What is Accounting?**

\[\text{ac' count-ing \(\text{\textbackslash e' kaunt-ij}\) n.} \] 1. The system of recording and summarizing business and financial transactions in books and analyzing, verifying, and reporting the results.\(^2\)
Archaeologists have traced accounting’s roots back more than 3,000 years. Clay and stone tablets which contain a recorded history of ancient financial transactions have been found in various locations around the world. During the reign of the Roman Empire, sophisticated accounting methods were developed to record military records and maintenance of other monetary data. Other cultures also used accounting methods and systems—Chinese dynasties preserved tax information, Middle Eastern cultures kept census records, and American Indians used an accounting system to identify the accumulation of possessions (by notches on sticks or the number of beads on a string).

Accounting evolved slowly until commerce achieved a degree of complexity which necessitated a more sophisticated system of recording financial transactions. Could IBM or Apple Computer keep a record of its customer warranties on clay and stone tablets? Could the Federal Government maintain its payroll records for its civil and military personnel by placing notches on sticks? Of course not! Ever since Europe’s Industrial Revolution established the foundation for the current climate of business and finance, the need for recording, summarizing, and verifying financial information has become paramount. Today, accounting establishes, in monetary terms, the framework for a business—a framework for evaluating the efficiency of a business’s operations, for recording a history of a business’s failures and accomplishments, and for projecting a business’s future.

The American Institute of Accountants defines accounting as “the art of recording, classifying, and summarizing, in a significant manner and in terms of money, transactions and events which are, in part at least, of a financial character and interpreting the results thereof.” Accordingly, the cornerstone of accounting is the classification of “pieces of paper” (invoices, sales receipts, payroll records, etc.) involving financial transactions. To the financial investigator, these “pieces of paper” represent valuable information about monetary events.

Since the function of accounting is to record and summarize the accumulation, spending, and/or transportation of money by an individual or organization, a financial investigator should be conversant in fundamental accounting principles and understand the
role of an accountant in the business organization. Since financial information is the key to unlocking the hidden answers to the riddles encountered in an investigation, accounting becomes, for the financial investigator, the key to reading the map of unknown events which leads to resolving a crime.

**Accounting Systems**

Businesses produce goods and provide services to be bought and sold. It makes sense that the exchange of goods and services can be observed and measured. Accounting is the language of business because it objectively measures and records the business exchanges that occur throughout society.

For accounting purposes, a **transaction** is the exchange of goods and services and begins with recording, in dollars and cents, what is received and what is paid out. All businesses use some system of accounting, from the sole proprietor who runs his or her business out of a checkbook to General Motors which employs hundreds of accountants to keep its books. Everyone who is faced with earning a living needs to keep track of what they earn. That is what accounting is about.

The ultimate objective of accounting is to show, in a summary form, the results of a business's transactions. In order to achieve this goal, two systems of accounting have been developed.

**Single-Entry Bookkeeping**

The single-entry bookkeeping system has been used for most of accounting's 3,000-year history. It is the simplest form of noting and recording a financial transaction. In this system, financial transactions from all source documents are chronologically recorded in one place, usually in columnar form. A checking account register, an example of which is shown on the next page, is a type of single-entry bookkeeping system.
Double-Entry Bookkeeping

For most businesses, recording single transactions in chronological order in a checkbook register is not a sufficient way to track their business affairs. Let’s say you are a business owner and you want to know how much you paid your employees in 1991. Your accountant would have to pull out the checkbook register related to 1991, find each transaction related to paying each employee, and total them. Wouldn’t it be easier to record all the payroll payments in one place rather than have them scattered throughout a checkbook register?

Since it is easier to look at the summary of a group of transactions, an accountant must have a means of compressing similar transactions. The device employed for this purpose is called an account. Typically, accounts are established to record the movement of cash into and out of the business, the payments of expenses, the purchase of assets, and the equity of the owner. A business may have many different types of accounts: payroll, sales, cash, office furniture, and insurance expenses to name just a few.

In a double-entry bookkeeping system, a single transaction always affects two or more accounts. Let’s say your business purchases a new desk and pays $200 cash for it. Two accounts are affected, cash and office furniture. You have increased the

</tr>
</tbody>
</table>

**Methods of Accounting**

Within the double-entry bookkeeping system there are two recognized methods or ways of recording transactions, cash and accrual.

**Cash Basis**

With this method, business receipts (revenue) are recorded when cash is received and business expenditures (expenses) are recorded when cash is paid out.

The pivotal words are “received” and “paid out”. In other words, only when the business has physically received the cash (i.e. currency, check), as opposed to a promise to pay, or has actually paid the expense—does the business record the transaction. For example, a business orders $500 worth of computer paper for delivery in December, however, it does not pay for the paper until January. When using a cash basis method of recording transactions, the $500 would be recorded as an expense when paid in
January. Professionals such as doctors and lawyers usually maintain their accounting records on a cash basis.

**Accrual Basis**

With this method, business revenues are recorded when *earned* (regardless of when collected) and expenses are recorded when *incurred* (regardless of when cash was disbursed). Let’s look at that same $500 purchase of computer paper described above. The $500 would be recorded as an expense when *incurred* (or committed for) in December if the accrual basis of accounting is used. Most businesses maintain their accounting records on an accrual basis.

**Hybrid Method**

A method of accounting that combines the features of both the cash and accrual methods is called the *hybrid method*. It is permissible to use the hybrid method when it is consistently applied and clearly reflects income. This method is most commonly used in small businesses where the “timing” between the incurring of expenses and the paying of expenses is usually of short duration and when “income” is reported on the cash basis. If there is no material distortion of the matching of business income and expenses, a hybrid method may be used.

**A Comparison of the Accounting Methods**

The table below provides a comparison of the three types of accounting.

</tbody>
</table>
The Fundamental Accounting Equation

Matching a business’s income and expenses is the important function of accounting. This matching concept is based on the principle that every item of value in a business is owned or claimed by someone. This concept may be expressed by the following equation:

\[ \text{Items of Value} = \text{Claims} \]

- **Items of Value.** The various things owned by a business are called assets. Examples of assets include cash, supplies, machinery, furniture, fixtures, land, and other tangible objects. Additionally, there are assets which are not tangible items. These types of assets include the right to collect money from others, patents, investments, and goodwill (the dollar value assigned to a business’s managerial skills and reputation). To be considered an asset, an item must meet the following two requirements:
  
  - It must be owned by the business
  - It must have monetary value

- **Claims.** There are two types of claims against assets:
  
  - Claims of the owner
  - Claims of the creditors

The claims of the owner are called Capital Account Equity or Owner's Net Worth. In a proprietorship, all owner equity belongs to the sole proprietor. In a partnership, the share of owner equity belonging to each partner is designated in the Articles of Partnership. In a corporation, the claims of the owner are called corporate net worth. Corporate net worth is divided into two separate accounts. One account is called the “Retained Earnings” or “Surplus Account,” and it records profits or losses. The second account is called “The Capital Stock Account,” and it represents shareholder investment.

The claims of the creditors are called liabilities. These claims may be made by suppliers, banks, mortgage holders, and bondholders.
The equation “Items of Value = Claims” can now be converted to the fundamental accounting equation shown below:

\[ \text{Assets} = \text{Liabilities} + \text{Owner's Equity} \]

\[ A = L + OE \]

You may also see the equation as:

\[ A = L + C \text{ (Capital)} \]

Although business transactions affect different components of the equation, the total assets must always equal the total claims (liabilities and owner's equity). Therefore, if the equation is to be maintained, it is impossible to change a single item without changing another. For example, when an asset is increased, a corresponding adjustment must be made in the equation or it will not balance; either another asset must be decreased, or a liability or owner’s equity account must be increased.

---

**Business Financial Statements**

Business owners, potential investors, and creditors need some type of summary or report that describes the financial condition of a business during a specific period of operation. Also, they need to know whether or not the business is making or losing money. Accounting records provide the information that creates these types of financial reports. One of the important functions of an accountant is to summarize transaction entries and prepare the financial reports for a business. These reports are called **Balance Sheets** and **Income Statements** and they represent the summary of financial activity entered into by a business during an identified period of time.

**Balance Sheet**

The Balance Sheet, often called the Statement of Financial Condition or Statement of Financial Position, depicts the assets, liabilities, and owner's equity of a business organization at a specific point in time. It is called a balance sheet because, upon its
In completion, it must be in balance. In other words, the total value of the business’s assets must equal the total value of the liabilities plus owner’s equity—a reference back to the fundamental accounting equation, \( A = L + OE \).

A balance sheet is prepared at the close of business of the last day of the accounting period. It identifies the business by name, sets out the fact that it is a balance sheet, and gives the date of the statement. The date assigned to a balance sheet does not cover a period of time, but rather represents a moment in time. One prepared on Tuesday the 12th will differ from one prepared on Monday the 11th and Wednesday the 13th. A balance sheet presents a picture of the business’s financial position, as if frozen for a split second, on the statement date.

Balance sheets are usually formatted in one of two ways. The account form lists liabilities and owner’s equity to the right of assets. The report form lists liabilities and owner’s equity below the assets. A balance sheet in account form is shown below; one in a report format is shown on the next page.

Each separate asset, liability, and owner's equity entry shown on the balance sheet represents an account. The balance sheet does not report the flow of funds into and out of the accounts during the accounting period. Only each account's ending balance as of the statement date is shown.

Look back at the two balance sheets shown above. Note that both classify and organize the individual accounts listed. Under the category “Current Assets,” you find the following accounts: cash, accounts receivable, inventory, and pre-paid expenses. The categories shown on the preceding balance sheets often appear on a balance sheet and do so in the order presented. Keep in mind that not all balance sheets require all of the categories listed, and some may require others not shown. A discussion of the different categories follows.

**Current Assets**

This class of assets includes cash and any other asset that could be converted to cash within one accounting cycle or balance sheet period (normally one year). Current assets should be listed according to their degree of liquidity (likelihood of being converted to cash). Examples of current assets include:

- **Cash**— The bills and coins in the business as well as the money on deposit in savings and checking accounts.

- **Notes Receivable**— A formal written promise by a debtor to pay a specified amount of money, usually with interest, at a definite time.

- **Accounts Receivable**— Claims against customers arising from the sale of merchandise or services on credit.

- **Allowance for Bad Debt**— An estimated amount of accounts receivable which will probably be uncollectible due to nonpayment by a customer. This account is normally shown as a reduction to current assets. The balance in this account is deducted from the original receivable balance in the asset account.

- **Merchandise Inventory**— Goods purchased or produced for the purpose of sale to customers.
• Pre-Paid Expenses— Expenses paid in advance, such as rent and insurance.

**Fixed Assets**

This class of assets, sometimes called *Property, Plant, and Equipment*, includes assets that are not intended for sale but are to be used by the business over several years. Examples of fixed assets include:

• **Furniture and Fixtures**— The furniture and fixtures owned by the business.

• **Allowance for Depreciation**— The total amount set aside for the decline in the useful value of the fixed assets due to wear and tear from usage and the passage of time. This account is normally shown as a reduction to fixed assets. The balance in this account is deducted from the original cost balance in the asset account.

• **Delivery Equipment**— The vehicles used to get the goods from the business to the customer.

• **Building**— The physical structure which houses the company.

**Current Liabilities**

This class of liabilities includes all debts of the business that will come due within one year of the balance sheet date. Examples of current liabilities include:

• **Notes Payable**— A promissory note given by the business to a bank, individual, or other business entity as evidence of a debt owed for the purchase of merchandise or some other asset.

• **Accounts Payable**— A short-term liability usually arising from the purchase of merchandise for credit. Unlike the note payable, no formal written promise to pay is issued.

• **Accrued Expenses Payable**— Expenses which are owed but not yet paid. A common example is salaries owed to the employees but not paid until the end of the pay period.
**Long-Term Liabilities**

This class of liabilities involves all debts with maturity dates more than one year after the balance sheet date. One account that you might find under this category is **mortgage payable**. This liability deals with debts secured by mortgages on specific assets of the business. Failure by the business to pay this obligation would give the creditor a legal right to force the sale of the pledged asset as a means of obtaining payment.

**Owner’s Equity**

Owner’s equity shows how much of a business has been “furnished” by its owner(s). There are two basic accounts for owner’s equity. These accounts are:

- **Paid-in Capital**— When the owners invest their assets (i.e. cash, property, etc.) into the business, they are contributing capital which increases the worth of the business.

- **Retained Earnings**— The accumulated profits and losses of a corporation.

**Income Statement**

The second accounting report that is important to a financial investigator or anyone else interested in the financial condition of a business organization is the Income Statement. The income statement, also called the Profit and Loss Statement, reports revenue and expenses incurred by a business for a designated period of time.

While the balance sheet reports the financial condition of a business at a given date, the income statement reports the business’s operating activities for the whole accounting period. The income statement matches the amounts received from selling the goods and/or services produced by the business (income) against all the costs and/or services (expenses) needed to operate the business. The result of this matching process is a financial statement of the business’s profit or loss for the period.

Like the balance sheet, there are two general formats for an income statement, single-step and multi-step.
**Single-Step Format**

In its simplest format, the single-step income statement presents the following three items:

- Revenue for the period
- Applicable expenses
- Net income or loss (revenue minus expenses)

The following shows a single-step income statement.

ABC Company  
Income Statement  
For the year ended December 31, 1991

<table>
<thead>
<tr>

</tr>
<tr>
<td>Total expenses</td>
<td>$4,032,000</td>
</tr>
<tr>
<td>Net Income</td>
<td>$180,000</td>
</tr>
</tbody>
</table>

Note the heading of the income statement. Like the balance sheet, it consists of the name of the company, the name of the financial statement, and the date. However, unlike the balance sheet, the income statement date is preceded by the term “for the year, period, or month ending.” The income statement reflects a business’s net income or loss for the entire period stated in the heading.

**Multi-Step Format**

Many income statement users maintain that there are a number of significant relationships between total revenue and net income which are not brought out in a single-step income statement. They contend, for example, that some intermediate subtotals such as gross profit, operating earnings, and earnings before tax are as
important as total revenue, total expenses, and net income. They prefer an income statement format which presents intermediate steps, the multi-step format.

The multi-step format is designed to be read in a stairstep manner. Each step down is a deduction of one or more expenses. Look at the sample income statement in multi-step format shown on the next page. The first step down deducts the cost of goods sold from the business’s sales revenue. This deduction results in the line entitled *gross profit*. This measurement is captioned “gross” because other expenses are yet to be deducted.

In the next step down, operating expenses (selling expenses and administrative expenses) are deducted from the gross profit figure. Then other expenses (i.e. taxes, interest, etc.) are also subtracted from the calculation to arrive at the final step down—net income. Net income is the bottom line in the matching process between business income and business expenses. If income remains after the deduction of expenses a net income (profit) is reported. Correspondingly, if the business expenses for the period exceed the business income, a net loss is reported.

Recording Financial Transactions

The effect of each individual financial transaction entered into by a business during the accounting period is eventually reflected on a business's balance sheet and income statement. Since a business may engage in hundreds or even thousands of transactions daily, an accounting procedure is needed to record and classify financial transactions in order to organize this type of financial information inside the business's bookkeeping system. Every check written, invoice paid, and sales receipt issued by a business represents a source document of accounting information. The financial information from the source documents is entered into the business's bookkeeping system through the establishment of accounts. As was stated earlier, accounts are established to record the movement of cash into and out of the business, the payments of expenses, the purchase of assets, and the equity of the owner.

Chart of Accounts
The number of accounts needed by a business will depend on its size, nature of operations, and the extent to which management wants detailed classification of information. To assist in tracking its accounts, a business will create a chart of accounts. A chart of accounts is a listing, in sequentially numbered order, of a business's established accounts. The chart of accounts for Ogle Insurance Company is found on the next page.

Bookkeeping Systems and Accounts
Single-entry bookkeeping only accounts for the cash coming into or cash going out of a business. It does not separate financial transactions into individual accounts or attempt to balance the effects of each transaction in the business's books and records.

In a double-entry system of accounting, financial transactions are recorded in a manner that balances the effect of each individual transaction in the business's books and records. Under the double-entry system, recording a financial transaction in the business's books affects two or more accounts.

Journals

Financial information is taken from source documents and entered into the accounting system through a business's journals. Journals are called the Books of Original Entry and they maintain, in chronological order, the details of each financial transaction entered into by a business. In the double-entry system of bookkeeping, each transaction affects two or more accounts and, accordingly, two or more journal entries must be made to record the transaction, never just one.

The example below shows how a single transaction is recorded in a journal within a double-entry bookkeeping system. Three entries are needed to record the following transaction:

Company X sold $2,000 worth of merchandise to MLB Limited. The invoice shows that MLB Limited paid $500 cash and put the remaining $1,500 on account.

<table>
<thead>
<tr>

</tr>
<tr>
<td></td>
<td>Sales</td>
</tr>
<tr>
<td></td>
<td>Sold merchandise to MLB Limited.</td>
</tr>
</tbody>
</table>

* Account number - refer to chart of accounts

Note that a description of the transaction, and the actual increase and decrease in terms of money are recorded in the journal. The dollar value of the transaction is recorded in one of two columns in the journal. The column on the left is called the debit column and the column on the right is called the credit column.

The terms debit (Dr.) and credit (Cr.) represent accounting nomenclature for “making an entry on the left side or right side of an account,” and hold no other meanings or connotations. To “debit an account” means to make an entry on the left side or in the left column of an account. To “credit an account” means to make an entry on the right side or in the right column of an account. The accounting rules for recording the increases and decreases resulting from financial transactions are found on the next page.
Let's look back at the sample journal entries on page 151 to see if the rules above were properly applied. The $500 cash (an asset that increased) was debited to the “Cash” account and the $1,500 balance, also an asset that increased, was debited to the Accounts Receivable account. Sales, a revenue account, was increased by the credit of $2,000.

Why is it important that a financial investigator understand how information from source documents eventually finds its way into a business’s journals? Journals provide the financial link between the outside world’s source documents and the business world’s accounting records. Through analysis of journal entries, often a determination can be made as to whether or not the business has properly recorded the financial event as shown on the source document. This analysis can be completed by:

- Determining the accounts affected by the transaction
- Determining the affect in dollar terms of the transaction on each account
- Reviewing the recorded journal entry for the correct debit/credit entries relating to the financial transaction
Types of Journals

Special types of journals are devoted to particular kinds of business transactions. Examples of these different types of journals are the following:

- **Cash Receipts Journal.** Records the dates, sources, and amounts of money received into a business.

- **Cash Disbursements Journal.** Records the dates, amounts, and recipients of payments made by a business.

- **Sales Journal (Accounts Receivable Journal).** Lists sales invoices in date or numerical order for sales made on credit.

- **Purchases Journal (Accounts Payable Journal).** Records all acquisitions of merchandise or services purchased on credit by the business.

- **General Journal.** Reflects transactions not covered by specific purpose journals. It is also used to record adjustments to the books and records.

The following pages illustrate various types of journals and journal formats. Read each of the examples to see how various transactions are recorded. Refer to the chart of accounts on page 150 and the rules for recording increases and decreases to journals on page 152 as necessary.
Cash Receipts Journal Entries

1992 Financial Transactions
7-14 Received $250 from Redbay and Co. on account.
7-18 Sold $175 merchandise for cash to Reed Manufacturing.
7-22 Received a $300 payment from Bur, Inc. for cash sale.

The Ledger

Journalizing entries, recording each business transaction from a source document into the journals, continues throughout the accounting period. Because of this, financial information contained within the journals grows during the accounting period, particularly in businesses that engage in a high volume of transactions. It would be difficult for a business owner, accountant, or financial investigator to analyze a journal full of financial transactions entered in chronological order, particularly when he or she is searching for specific account information (i.e., “all the rent expense payments” or “all sales to a particular customer”). An accounting device called a ledger is used to summarize journal entries by specific accounts. The summary of account information contained in ledgers is used to prepare a business's balance sheet and income statement.

A ledger is established to accumulate all the transactions affecting a specific account during the accounting period. For example, all transactions affecting the “cash account,” a business's receipt of cash (debit) and pay outs of cash (credit) recorded in the journals, would be summarized in the ledger account entitled “cash”. At the end of the accounting period, the balance of the ledger account (the mathematical difference...
between the total debit entries and total credit entries) is used as the basis for balance sheet and income statement reports.

A popular format for a ledger is the "T-account." A ledger account in the T-format looks like the following:

<table>
<thead>
<tr>
<th>Date</th>
<th>Amount</th>
<th>Date</th>
<th>Amount</th>
<th>Balance</th>
</tr>
</thead>
<tbody>
<tr>
<td>1/4/92</td>
<td>900.00</td>
<td>1/3/92</td>
<td>394.00</td>
<td></td>
</tr>
<tr>
<td>1/7/92</td>
<td>1,435.00</td>
<td>1/8/92</td>
<td>13.95</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>1/13/92</td>
<td>52.43</td>
<td></td>
</tr>
</tbody>
</table>

In the T-account format, ledger entries to show increases and decreases in different types of accounts are made as follows:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Liabilities</th>
<th>Owner's Equity</th>
</tr>
</thead>
<tbody>
<tr>
<td>+</td>
<td>-</td>
<td>-</td>
</tr>
<tr>
<td>(Dr.)</td>
<td>(Cr.)</td>
<td>(Dr.)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Expenses</th>
<th>Revenue</th>
</tr>
</thead>
<tbody>
<tr>
<td>+</td>
<td>-</td>
</tr>
<tr>
<td>(Dr.)</td>
<td>(Cr.)</td>
</tr>
</tbody>
</table>

The T-account format is very convenient for illustrative purposes; however, in formal accounting records, more information is needed and the T-account is replaced by something similar to the following:

<table>
<thead>
<tr>
<th>Date</th>
<th>Explanation</th>
<th>Ref</th>
<th>Debit</th>
<th>Credit</th>
<th>Balance</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

165
The Date column shows the date of the transaction, which is not necessarily the same date that the entry is made into the account. The Explanation column is needed only for unusual items—often it is not used. The Ref (Reference) column is used to list the page number of the journal in which the transaction is recorded. This makes it possible to trace ledger transactions back to their source.

When financial information that has been entered into journals is transferred to and entered in the appropriate ledger account, it has gone through the process known as posting. Thus, transactions are journalized and then posted to a ledger. Note how the journal entries on the following page are posted to ledger accounts.

<table>
<thead>
<tr>

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
### Trial Balance

If the computation of account balances has been accurate, it follows that the total of the accounts with debit balances must be equal to the total of the accounts with credit balances. This proof is called a **trial balance**. A trial balance is a two-column listing of the names and balances of all accounts in the order in which they appear in the ledger. The debit balances are listed in the left column.

umn, the credit balances in the right. The trial balance is prepared prior to the creation of the balance sheet and income statement.

Keep in mind that the trial balance proves only one aspect of the ledgers, the equality of debits and credits. It does not prove that ledger entries are correct or accurate.

Analyzing Business Books and Records

Financial investigators rarely are asked to construct, or have a need to reconstruct, a full set of financial books and records. However, searching through or analyzing information in financial records is a common investigative technique. Analysis of these types of business records tie financial transactions to criminal activity. There exists a ruthless logic in accounting which overcomes deceit and deception.

Analyzing accounting records is known as auditing. Audit techniques are based on three action words—analyze, scrutinize, and compare. They are key terms in dissecting and tracing financial transactions. Investigators need to look beyond the written figures in books and records. They need to:

- **Analyze.** During analysis, the accounting books and records are broken into their component parts. For example, journals are analyzed by reviewing individual entries and seeing if they are compatible with the account to which they are charged.

- **Scrutinize.** Look for leads in unusual notations on documents, absence of a business purpose for a transaction, or lack of documentation for a transaction.

- **Compare.** Evaluate and compare the accounting source document to independent indicators available from sources outside the business. Analyze for inconsistencies and out-of-the-ordinary transactions.
Money Laundering Example

Let's look at two situations to see how a financial investigator might approach them. The first situation, which is described below, depicts an investigation into alleged money laundering.

Information indicates that Robert Ogle has started an insurance business to conceal his true business—that of a money launderer. Prior findings show that Ogle appears to have limited financial resources and little experience in the insurance industry. Also, investigative research reveals that Ogle has never before owned or operated a business, nor has he received any training in bookkeeping or accounting. When contacted, Ogle declined the opportunity to discuss the matter but provided his business's journals and ledger accounts to the investigator stating, "It is all there in black and white."

For the investigator's purposes, financial analysis of a money laundering allegation could be completed through the examination of every source document associated with each transaction entered into by Ogle and his insurance company. However, attempting to identify "suspect transactions" from this perspective is often a time consuming and labor intensive process. The process is made even more complex when the analysis includes a high volume of transactions over an extended period of time. What the investigator needs to facilitate his or her analysis is a "transactional road map," a written record of financial events entered into by a business—the journal.

The following page contains entries into the Ogle Insurance Company’s General Journal during January 1992. Upon scrutiny of the entries, several seem to merit further inquiry within the investigative context. These entries are:

- Entry (a)— The $10,000 investment by Ogle to start up the business.
- Entry (b)— The ability of R. Ogle Insurance Company, a new business, to secure a $95,000 mortgage with only a 5 percent ($5,000) down payment.
- Entry (c)— The sale of a $15,000 insurance policy.
• Entries (f) and (h)—The sale of a $13,000 insurance policy on credit.

• Entries (g) and (k)—The particular details of the $30,000 loan and subsequent repayment.

The journal entries provide information which narrows the scope of inquiry from eleven transactions to seven “suspect transactions.” However, the journal entries leave certain questions unanswered: Who are L. Able, T. Albert, and E. Drew?, who provided the $30,000 loan? and what is meant by the 1/31 journal description “equally divided?”

The answers to the questions can be found in the business’s ledger accounts. By analyzing ledger accounts, the investigator can determine the details, in terms of dollars, for every transaction during the accounting period for each specific account.

Ledger accounts offer additional investigative information relating to the movement of money. The posted journal transactions for the Ogle Insurance Company reveal:

- The business generated sales in the amount of $42,000 for the month. However, the business incurred zero expenses for the month. (Sales ledger)

- The identities of Thomas Albert and Edward Drew, two individuals who purchased insurance on credit, have been determined. (Accounts Receivable subsidiary ledgers 001 and 002, respectively)

- The providers of the $30,000 loan, Henry Brown and Dell Clark, have been identified (Notes Payable subsidiary ledgers 001 and 002, respectively)
The mailing address for Albert, Drew, Brown and Clark has been identified—P.O. Box 123, New York, New York.

Some specialized ledgers, called *subsidiary ledgers*, are mentioned in the discussion above. These ledgers are used by accountants to provide details about certain accounts. Business owners need to know not only the total amount of outstanding accounts receivables owed to the business, but also what each individual customer owes. The same holds true for the business's accounts payable, loans payable, and certain expense accounts. This internal control is maintained through the use of subsidiary ledgers where the particulars (name, address, credit limits, etc.) of the accounts are shown.

Based upon the financial analysis of Ogle Insurance Company's accounting books and records, various transactions appear to be suspect. Analysis of the source documents relating to these particular transactions will be the next investigative step. The following illustrates, in narrative form, the source documents pertaining to the Ogle Insurance Company financial transactions. The letters (a, b, etc.) that precede the descriptions can be traced back to ledger and journal entries.

a. On 1/1/92, a $10,000 certified check, made payable to "Cash" was deposited into the Ogle Insurance Company checking account.

b. On 1/6/92, Ogle Insurance Company completes a real estate purchase by buying an office building. The closing statement, loan application, mortgage note, and repayment agreement are maintained by the insurance company. The loan is extended to Ogle Insurance Company and a Mr. Thomas Albert, as an individual. The total cost of the transaction is $100,000 with 90% of this cost allocated to the building and 10% to the land.

c. On 1/7/92, Ogle purchases office furniture in the amount of $2,000. Ogle Insurance pays for the furniture via a check (#101). The store issues a receipt for the purchase.

d. On 1/9/92, Ogle purchases office equipment in the amount of $1,000. The purchase is made on credit. The terms of the repayment are $250 a month with the first month's payment due...
30 days after purchase. The store issues a receipt and a credit terms agreement to Ogle Insurance Company.

e. On 1/15/92, Ogle Insurance sells an insurance policy to Lyle Able in the amount of $15,000. Able pays for the policy in cash. Able is issued a receipt for his payment.

f. On 1/20/92, Ogle Insurance sells an insurance policy to Thomas Albert in the amount of $13,000. Albert promises to pay for the policy by making a $10,000 payment by 1/30/92 and $1,000 payments every 30 days after that. A credit agreement is issued to Thomas Albert.

g. On 1/20/92, two of Robert Ogle’s friends each loan the insurance company $15,000. Both Henry Brown and Dell Clark provide $15,000 in currency. The insurance company prepares a repayment agreement stating the terms of the repayment to be $2,500 within 30 days and the balance repaid within one year. Robert Ogle, Henry Brown, and Dell Clark agree to and sign the loan note. The $30,000 in cash is deposited into the business’s checking account.

h. On 1/24/92, Ogle Insurance sells an insurance policy to Edward Drew in the amount of $14,000. Edward Drew promises to pay for the policy within 30 days. A credit agreement is issued to Edward Drew by the insurance company.

i. On 1/29/92, Ogle Insurance check #102 is issued in the amount of $500 to the store where their office equipment was purchased in partial payment of the outstanding bill.

j. On 1/30/92, cash in the amount of $10,000 is received by the insurance company from Thomas Albert. This amount is applied to his outstanding account.

k. On 1/31/92, Ogle Insurance Company checks #103 and #104, both in the amount of $2,500, are mailed to Henry Brown and Dell Clark, respectively. These payments are made according to the agreed upon terms of repayment as outlined in (g) above.

As shown through the Ogle Insurance Company example, investigative analysis of the movement of money into and through
a business is accomplished through an understanding of the accounting principles of journal and ledger entries. With the Ogle Insurance Company investigation, journal entries were scrutinized to determine if any appeared suspicious or required further inquiry. Once specific entries were selected, the ledger postings related to them were analyzed. Finally, the documentation related to a transaction was examined.

Political Corruption Example
Now let's see how auditing investigative techniques are used in a case of alleged political corruption.

_The contractor, Woodruff Contracting Company, writes a check to a supplier, York Company, for “service”, in the amount of $10,000. The check was endorsed and deposited by the York Company. In reviewing Woodruff Contracting Company’s Cash Disbursements Journal, the investigator notices that other checks to York Company are usually in amounts less than $1,000._

Woodruff Contracting Company

<table>
<thead>

<tr>
<td>19</td>
</tr>
<tr>
<td>20</td>
</tr>
<tr>
<td>21</td>
</tr>
</tbody>
</table>
The investigator **scrutinized** the check and then went one step further and **compared** that check to other payments made to York Company. *Something was out of the ordinary.*

*Inspection of York Company's Cash Receipts Journal shows **NO** entry for the Woodruff Contracting Company payment during the month of March.*

A canceled check, made payable to cash and noted “Misc. Exp.,” was located. The check was dated March 17 and was prepared by the president of the York Company. The check was endorsed with a stamp and the notation “CC-1-59199” was written below the endorsement.

Pinkerton Bank
Misc. Exp.

Gregory A. York

176
The investigator analyzed the general ledger and then scrutinized canceled checks for possible leads. A $10,000 check, made payable to “Cash,” drawn on March 17, was located. It was signed by the president of York Company, endorsed with the company stamp, and the notation “CC-1-59199” appeared below the endorsement.

The notation “CC-1-59199” was placed on the York Company check by a financial institution. It indicates that the check was used to buy Cashier’s Check #1-59199. A copy of the Cashier’s Check was obtained from the financial institution. It was to be paid to Bache & Co.

American Security and Trust
Washington, DC 20001

Rmitter  G. York

Bache & Co.

Ten thousand dollars and 00

Cashier’s Check

Lois E. Smith
The investigator scrutinized the check, saw the Cashier’s Check notation, and again scrutinized the endorsement of that check.

An interview with a representative of Bache & Co. revealed how they recorded the receipt of the Cashier’s Check. The check was credited to a customer’s account. Bache & Co. records disclose that the customer is Thomas Foster, a city building inspector. Foster used the money to buy stock and he is having it held in a “street” name (Recall from Lesson 5 that stock held in “street” name is held in the name of the broker or brokerage firm, not in the name of the owner).

Through financial investigative techniques, the investigator traced the movement of money from a business’s books and records through two financial institutions to the resolution of a financial crime.

The investigator now has the documentary evidence to confront the president of York Company. Confronted by such evidence, the president admits his involvement as the “go-between” and confirms the political corruption scheme.

---

**Indicators of Fraud**

Fraud investigations usually are initiated when several small events, taken together, point to a possible pattern of deception. Within a business’s accounting system, there are often physical indicators that point to a pattern of deception. The following indicators may signify that financial fraud is taking place:

- Maintaining two sets of books and records
- Concealment of assets
- Destruction of books and records
- Large or frequent currency transactions
- Payments to fictitious companies or persons
- False or altered entries and documents
- False invoices or billings
- Purchase or sale of under or over-valued assets
- Use of nominees
- Large company loans to employees or other persons
- Frequent cashing of checks received
- Frequent use of cashier's checks
- Using photocopies of invoices or receipts instead of original documents
- Personal expenses paid with corporate funds
- Payee names on checks left blank and inserted at a later date
- Excessive billing discounts
- Excessive spoilage or defects
- Double payments on billings
- Unnecessary use of collection accounts
- An individual negotiating checks made payable to a corporation
- Second or third-party endorsements on corporate checks
- Excessive use of exchange checks or clearing accounts
Summary

For the financial investigator, analysis of a business’s journals and ledgers and an understanding of accounting procedures can assist in:

- Identifying the movement of money during a financial crime
- Identifying the sources and/or applications of funds made by an individual or business for a given period of time
- Determining participants in specific financial transactions
- Uncovering additional leads for further investigative analysis

The accounting principles and audit techniques described in this chapter should not be considered tools to be rigidly memorized and applied, but rather an inventory of perspectives which will broaden the base of knowledge for the investigator.
Questions and Exercises

Answer the following questions then check your responses with those provided at the back of the book.

1. How do the three major forms of business organizations compare when it comes to being responsible for debts? In other words, who is responsible for the debts of a proprietorship, a partnership, and a corporation?

2. Why are a corporation’s Articles of Incorporation and a partnership’s Articles of Partnership important to the financial investigator?

3. Describe the terms “liability,” “asset,” and “owner’s equity.”

4. The balance sheet you are reviewing has coffee stains on it. You can barely make out that the total amount of assets is $675,325 and the owner’s equity is $276,580. What is the total amount of liabilities reported?

5. The objective of accounting is to show in summary form the results of financial transactions on a business. How is this objective accomplished?

6. What does the phrase “the balance sheet represents a snapshot of a business’s condition” mean?
7. What does the following journal entry indicate?

Cash 10,000
Accounts Receivable 10,000

8. Make the appropriate ledger account entries (in T-account format) that would result from the journal transaction in question 7.

9. Based on the following information, prepare a balance sheet for Collier Company (statement date is 12/18/92).

- On 12/12/92, the company sold 25,000 shares of stock. Each share sold for $1 with the proceeds of the sale placed into the company checking account.
- On 12/14/92, the company purchased a machine for $12,000. It paid $6,000 and financed the balance with a bank note.
- On 12/15/92, the company bought production materials (inventory) for $40,000. It paid $15,000 and promised to pay the balance in 30 days.
- On 12/16/92, the company bought a second machine for $3,000 cash.
10. Journalize the entries (as they would appear in the general journal) for the transactions listed in question 9.

11. Make the appropriate ledger account entries (in T-account format) that would result from the journal transaction in question 9.

12. Based on the following information, prepare an income statement (in multi-step format) for Pratt, Inc. (period ending 12/31/92):

- Cost of goods sold $30,000
- Selling expenses $5,000
- Interest expense $10,000
- Administrative expenses $100,000
- Sales revenue $155,000
- Sales returns and allowances $5,000
13. Why is a knowledge of accounting important to the financial investigator?

CHAPTER 7

Tracing Funds Using the Direct Method of Proof

For the financial investigator, the proof of a financial crime is accomplished by documenting a suspect's receipt and/or disposition of the proceeds from an illegal activity. Proof, like evidence, can be either direct or circumstantial. In this chapter and the next, you will learn about methods of proof. Chapter 8 focuses on three methods of indirect (circumstantial) proof. This chapter deals with the specific item method, a direct method of proof. This method of proof is the simplest method of proving that a suspect has paid for something using illicit funds or received funds through an illegal means. The investigator looks for specific illegal transactions. Nothing is implied or inferred. A direct link is established between the suspect and a financial transaction.

The specific item method can be used to document the movement of money from either the point of payment or the point of receipt. An example of each is contained in this chapter. This chapter also describes several schemes a business or individual may use to cover illegal activities. Once a specific financial transaction is discovered, the investigator needs to review the information surrounding the transaction. This chapter contains a discussion on reviewing “suspect payments.” The chapter concludes with some thoughts on using the specific item method.

After studying Chapter 7, you should be able to:

- Explain the concept of “direct proof.”
- Describe various point-of-payment schemes.
Describe information surrounding “suspect payments” that cause an investigator to become suspicious.

The goal of a financial investigator is to trace the movement of money. In doing so, the investigator tries to prove that a suspect received or tendered illegal funds. The proof can be either direct or circumstantial. This chapter focuses on the specific item method of tracing funds, a direct method of proof.

What is the Specific Item Method?

The specific item method is the technique most commonly used by the financial investigator. It enables an investigator to offer proof of a suspect’s receipt and/or disposition of funds from an illegal activity. This proof, like evidence, can be categorized as either direct or circumstantial. The proof obtained via the specific item method is direct proof—proof precise to the point at issue. This direct proof is achieved when investigative findings identify specific financial transactions involving the suspect. Such findings show a direct link between financial transactions and the suspect. Direct proof reveals the suspect’s personal involvement and knowledge of the illegality of the financial activity under investigation. With the specific item method, the investigator tries to uncover a specific illegal or unusual financial transaction and then analyze the information obtained from the transaction to identify the parties involved. The specific item method is the preferred technique of proving financial criminal activity because it is the easiest to present at trial and the proof that results from its application is the most difficult for the suspect to refute.

There are two sides to every financial transaction: payment and receipt. The specific item method can be used to document the movement of money from either side of a transaction. Point-of-payment analysis begins at the transaction’s origin—the payor of the funds. Alternatively, point-of-receipt analysis begins with the receiver—the recipient of the funds. Usually, the choice of which type of analysis to use is contingent upon the
circumstances of the investigation. Normally, the investigator chooses the method which appears to be the easiest.

**Example of Point-of-Payment Analysis**

William Drawer, president of Leo, Inc., is suspected of purchasing illegal drugs. During an interview with him, he denies the allegation and contends that he is not financially able to purchase narcotics. The investigator reviews the books and records of Mr. Drawer’s business and compares the Cash Receipts Journal (the journal used to record the dates, sources, and amounts of money received into the business) to the bank statements. Everything balances. The investigator then interviews the company bookkeeper who states that all payments to Leo, Inc. are received in the mail. The bookkeeper further states that before Mr. Drawer sees the mail, the payments are extracted and deposited into the bank. Next, the investigator reviews Mr. Drawer’s personal finances. That review tends to support Mr. Drawer’s statement relating to his financial inability to purchase illegal drugs.

The investigator contacts Leo, Inc.’s customers and finds that their records balance to the receipts recorded in the Leo, Inc.’s Cash Receipts Journal. Next, the investigator reviews the expenses recorded in Leo, Inc.’s Cash Disbursements Journal (the journal used to record the dates, amounts, and recipients of payments made by the business). The investigator locates an entry for a $1,500 check made payable to Gemini Corporation. A review of Gemini Corporation’s books reveals that they have no record of receiving the $1,500 check.

The bookkeeper at Leo, Inc. locates the canceled check and provides it to the investigator. Analysis of the check shows that it was cashed at the bank where Mr. Drawer has his personal account and, through analysis of handwriting exemplars, a handwriting expert determines that Mr. Drawer, not the appropriate person from Gemini Corporation, endorsed the check. These specific items, the transaction recorded in Gemini Corporation’s Cash Disbursements Journal and the canceled check, provide the proof the investigator needs. The investigator now has a source of funds that Mr. Drawer could have used for the purchase of illegal drugs.
Example of Point-of-Receipt Analysis

Harold O'Brien is a witness in the case against AKP Paints. A review of his bank records reveals a $2,000 check made payable to AKP Paints. The check is notated “supplies” and the encoding on the bottom right corner confirms the amount paid as $2,000. Upon review of AKP Paints’s Cash Receipts Journal, the investigator discovers that the business recorded a $750 payment for supplies from Harold O'Brien. The bank statement balances to the entry made in the journal. However, there is a discrepancy of $1,250 between the amount of the check and the entry in the Cash Receipts Journal. It is this discrepancy, this specific item, that the financial investigator will want to trace.

The investigator reviews the back of the canceled check and sees a “For Deposit Only” stamp on it, indicating that the check was deposited into AKP Paint’s corporate account. Next, the investigator reviews the deposit slip used to deposit the check. It reveals a split deposit transaction. Only $750 was deposited into the account while the remaining $1,250 was returned in currency. Now, the investigator can question the suspect (the person who deposited the check) as to the disposition of the $1,250 in currency. When confronted with the proof, the suspect confesses to cashing the check and taking the currency for her own use.

Point-of-Payment Schemes

The specific item method often becomes difficult to use as an investigative technique when tracing the flow of funds from the point of receipt. For example, in instances where payments are received in cash or the movement of money is not reflected in a business’s books and records, tracing from the point of receipt is difficult. Luckily, the financial investigator has other options to use in these instances—methods of indirect proof. Those methods are discussed in Chapter 8. For now, we will concentrate on applying the method of direct proof, the specific item method, to resolving criminal financial activity from the point-of-payment approach.

Financial fraud, whether in the form of kickbacks, embezzlement, insider trading, or money laundering, is often discernible...
through investigative analysis using a point-of-payment approach. There are various “point-of-payment” schemes a business may use to cover its illegal activities. These schemes, and the investigative steps used to detect them, are discussed below.

**Fictitious Payable Schemes**

Within a business setting, fraudulent activity is often perfected through the establishment of fictitious accounts payable or fraudulent entries in the Accounts Payable journal. Through the creation of fictitious vendors and false billings, fraudulent financial transactions can occur. Detection of these transactions can best be accomplished by analyzing the following types of records:

**Accounting Books and Records**
- Cash Disbursement Journals
- Cash Receipts Journals
- Ledgers

**Sales Documentation**
- Purchase Orders
- Invoices
- Documentation showing receipt of goods ordered, etc.

**Bank Account Information**
- All records of payments: canceled checks, wire transfer receipts, receipts for purchases of cashier’s checks and money orders, and withdrawal slips
- Check Registers
- Account Statements

The most important of the above information, and often sufficient in and of itself, is the bank account information. When reviewing bank account information, the investigator should look for the following:
• **Payments by check and other types of account withdrawals made payable or charged to the account on which the illicit payments are suspected.** For example, if the investigator suspects that kickbacks were paid on sales to the Teaparty Corporation, the search would begin with checks made payable to “Teaparty Corporation” and continue with the analysis of those checks as they move through the bookkeeping system.

• **Payments by check for services rendered.** Be sure to look into transactions involving sales commissions and consulting fees. These types of services do not require the delivery of goods, and relatively little documentation, other than the check itself, is required as a record of payment.

• **Atypical charges for the business.** Look for out-of-the-ordinary charges relating to unusual/unnatural services that the business is not normally involved in. For example, a video production company would not normally be involved in business transactions with a plumbing supply company.

**Ghost Employee and Payroll Kickback Schemes**
Illicit funds may be generated and disguised as salary payments to fictitious or former employees. For example, payments to current employees, in the form of bonuses or expense reimbursements, can be returned to the payor or passed on to another individual. In instances where ghost employee or payroll schemes are suspected, the following records should be obtained by the investigator from the suspect company in order to trace the flow of funds:

• Payroll and employee lists (e.g., time and attendance records)

• Personnel files, employment applications, tax withholding forms, and social security numbers

• Payroll checks
Investigative attempts to identify the ghost employee or payroll kickback scheme can be completed through the following steps:

- **Compare personnel office employee records with the payroll records.** Discrepancies should be analyzed. Any employee who does not have taxes withheld from his or her paycheck or does not participate in the company’s health insurance program should be scrutinized.

- **Verify the employee’s claimed social security number.** A fictitious employee may be given a social security number which does not exist.

- **Look for inflated salaries and travel expenses.** An employee’s normal salary may also be inflated or, more commonly, his or her travel and expense reimbursements may be padded to generate illicit payments. Look for unusual disbursements from the accounts where such checks are deposited.

Once a suspicious paycheck has been identified, the flow of the check through the bank system can be traced by using the applicable bank statement and the bank’s proofing system.

**Overbilling Schemes**

Illicit funds may be added to legitimate payments for goods or services provided by actual suppliers, with the additional amounts being passed on by the supplier, or returned, usually via currency to the payor for distribution. The records required for tracing phony payables from both the original payor and any intermediaries (shell companies and/or straw/nominee individuals) are available to the investigator. Important indicators of overpayment schemes are:

- Notations on invoices or other billing documents that break out “extra” or special charges, particularly those which require no delivery of goods

- Discrepancies between the purchase order or invoice amount and the amount of payment
Unusually large amounts appearing on particular bills, or bills which break a consistent pattern as shown on the books and records

**Offbook and Currency Schemes**

Using the specific item method of tracing funds from the point of payment becomes more complex when those payments do not go through a business’s books and records or when they are made in currency. For example, customers of the suspect’s business may demand that their illegal payments be diverted to off-book accounts; therefore, they will not be reflected in the suspect business’s books and records. These types of transactions may be discovered through contact with the suspect business’s competitors or by analyzing unusual costs and expenses shown on the company books which are not associated with known sales or business activity.

In most industries, there is a fixed relationship between the cost of producing and selling a particular item and the revenues that the item generates. In other words, the amount of raw materials and labor used to produce a product or perform a service usually is fairly consistent. The same is normally true with respect to utility usage, transportation cost, etc. Therefore, a significant imbalance in these ratios indicates possible unrecorded transactions. For example, an investigator should be suspicious if a company’s records show that it ordered twice the amount of raw materials that it usually does but did not produce twice the amount of product.

Currency payments can be traced from the point of payment by matching the payor’s currency withdrawals to the recipient’s corresponding currency deposits, expenditures, or visits to a safe deposit box. Another strong indicator of currency payments is the purchase of a cashier’s check or a wire transfer made payable to the recipient at or shortly after cash withdrawals or disbursements by the payor. Unexplained or unusual currency disbursements or withdrawals, particularly from a business which does not normally deal in currency, may itself indicate illicit transactions.
Reviewing Suspect Payments

Tracing the flow of funds from the point of payment often involves reviewing the “suspect payments” themselves. In a transaction involving a canceled check, this would include:

- **Reviewing the endorsement on the check.** This endorsement may be a signature, but more commonly it is an endorsement stamp in the name of the business payee. The identity of the endorser frequently is the corrupt recipient.

- **Noting the location where the check was negotiated.** When the endorsement is not obvious, the identity of the bank at which the deposit was made becomes important. The depository bank’s stamp will appear on the back of the check as a part of the proofing system. Through the check’s routing symbols (ABA transit number and check routing symbol), the geographical location of the depository bank can be identified and the locale of the suspected recipient can be determined. This type of information can be used to determine the location of the recipient’s bank account if it becomes necessary to analyze his or her bank records.

- **Checks with a second endorsement.** A check payable to a business which is endorsed by that business and then endorsed a second time by a specific person, thereby allowing the check to be cashed or deposited into that person’s personal account, is typical of a fictitious payable scheme. Another example would be a check payable to a third party which is endorsed by that third party and then endorsed over to the issuer of the check.

- **Checks payable to a business which are cashed-out.** Normal business practice calls for checks to be deposited. Usually, a “For Deposit Only” stamp appears on the back of deposited checks. When checks are cashed-out at a bank instead of deposited into an account, suspicions should arise.

- **Checks which fall into unexplained patterns.** Unusual or unexplained patterns of check transactions can be an indicator of illegal activity. For example, the discovery of a pattern of checks, one per month, written to a particular customer, with each check’s
amount equaling 10% of the monthly sales made to that customer, can indicate a potential kickback situation.

If the examination of the checks themselves do not yield any clear and convincing patterns relating to the illegal movement of money from the point of payment, the next step would be to compare the record of payment to “backup documentation” in the business’s accounting system. Particular attention should be given to the following circumstances:

- **The absence of documentation to support a particular payment.** It is suspicious when no invoice is on file for payments to suppliers or no receipt exists to indicate that materials paid for were actually delivered and received.

- **Discrepancies between the payment information and the backup documentation.** For example, the amount of a check payable to a supplier is different from the invoice amount, or a check payable to a person or business is different from the person or business identified on the invoice itself.

- **Coincidences in the backup documentation.** Look for invoices from several suppliers which have different names but share the same business address. Also look for invoices from different companies that are signed by the same person.

- **Unnumbered or sequentially unusual invoices.** Unnumbered invoices are suspicious and a situation where invoices #101, #102, and #103 are dated 30 days apart is also suspicious.

- **Alterations or photocopies of backup documentation.** Photocopies of backup documentation may be made to conceal alterations to the originals.
Thoughts on Using the Specific Item Method

When using a specific item method to trace the flow of funds from the point of payment, it is important to remember that financial statements and accounting records are only representations of something that should exist in the real world. A financial statement for a business that reports cash of $5,000, means that somewhere that business should have $5,000 in cash. And, if a company claims an inventory of $10,000, that inventory should be observable. There always is an analytical relationship between representations in financial documents and the physical goods and assets.

When searching for fraud, the investigator should be inquisitive and challenge things that appear to be out of the ordinary or out of sequence. If sales are rising, the cost of outbound freight should be rising. If purchases are increasing, the cost of inbound freight should be increasing. Every business has analytical relationships that should exist. Therefore, examining financial statement data, including bank financial statement data, to see if it makes sense with respect to non-financial statement data is one of the best ways to detect fraud. Investigators who ask themselves if reported amounts are too small, too large, too early, too late, too often, and too rare or who look for things that are reported at odd times, by odd people, and using odd procedures are much more likely to detect fraud than those who view the financial statements without any hint of skepticism.

The embodiment of such skepticism is the specific item method of tracing the flow of funds. It provides financial proof of the receipt or disposition of illicit funds by the suspect under investigation.
Summary

In this chapter, you were introduced to the technique most commonly used by the financial investigator, the specific item method of tracing funds. The proof obtained by the application of this method is direct proof, proof precise to the point at issue. When investigative findings reveal specific financial transactions being paid by or received by the suspect, direct proof of a financial crime is achieved. Such findings reveal a specific link between the suspect and the transactions at issue.

The specific item method can be used to trace the movement of money from either its point of payment or its point of receipt. In instances when specific financial events can be identified with particular financial crimes (i.e., insider trading, kickback payments, embezzlement, etc.) the specific item method can be successfully employed as an analysis technique. This method also can be applied when financial transactions leave an audit trail, either in a business’s accounting records or a financial institution’s recordkeeping system.
Questions and Exercises

Answer the following questions and then check your responses with those provided at the back of the book.

1. The specific item method is known as a "direct method of tracing funds." What does this mean?

2. What type of information is most useful when dealing with a fictitious payable scheme?

3. When investigating a possible payroll kickback scheme, why would an investigator want to look into an employee’s travel expenses?

4. Describe, by example, an overbilling scheme.

5. Tracing currency payments via the specific item method is not an easy task. Identify two situations that may indicate currency payments in an illicit transaction.
6. What is unusual about the following information compiled from a suspect's Cash Disbursements Journal and bank statements?

<table>

7. Larry's Weight Club wrote a $3,500 check to Silver Ironworks, Inc. Silver Ironworks cashed the check. Why might an investigator become suspicious of this situation?

8. List three situations involving "backup documentation" that would cause an investigator to become suspicious.

**Endnotes**

2. *Fraud Examiner's Manual*. Section 111, pp. 17 and 18
In Chapter 7, the specific item method, a direct method of proof, was discussed. This chapter focuses on three indirect methods of proof: net worth analysis, the expenditures method, and the bank deposit method. Each of these methods can be used to show that a suspect's expenses exceed his or her known sources of income. However, none of them can prove where the extra income comes from. That is why the three methods are called "indirect methods of proof," for, like circumstantial evidence, inference is needed to establish the fact at issue. And just what is that fact? It's that somehow, the individual under investigation is receiving more income than he or she legitimately "earns."

With the specific item method, an investigator searches for a specific financial transaction to investigate. With the indirect methods of proof, an investigator gathers all sorts of financial information and then plugs the information into mathematical formulas. This chapter contains an example of a calculation for each indirect method of proof.

After studying Chapter 8, you should be able to:

- Differentiate between direct proof and indirect proof.
- Describe what types of information are gathered through the completion of a financial profile.
- State when it is appropriate to use an indirect method of proof.
• State the requirements of proof for each indirect method of proof.

• Write the formula for each indirect method of proof.

• Perform net worth analysis.

• Perform expenditures analysis.

• Perform bank deposit analysis.

It is not always possible to use the specific item method when tracing the flow of funds. For example, it is difficult to use the specific item method when cash payments are made or the movement of money is not reflected in a business's books and records. It's hard to find a specific item to investigate when transactions are not recorded in financial records. So, while it is not always possible to use the specific item method, the investigator need not worry—other methods are available, indirect methods of proof. Through indirect or circumstantial methods, the investigator can trace the proceeds from almost any type of illegal activity—from fraud and corruption to tax evasion or drug dealing—all from the point of receipt.

The indirect methods of tracing funds are based on a simple, and almost invariably true, principle—

Money, in any significant amount, will eventually show up, directly or indirectly, in the accounts, assets, or expenditures of the recipient.

The indirect methods of proof are most useful when the suspect is taking currency or other payments that cannot be directly traced. As an investigative tool, the indirect methods can corroborate testimony alleging hidden illicit payments. They not only provide the investigator with the evidence of a financial crime, but provide "leads" pointing to further investigative inquiry as well.

£0,0
The specific item method relies on a microscopic view of financial transactions through the review of books, records, or bank accounts of the recipient and payor of illegal funds. In contrast, the indirect methods of proof require a macroscopic view of the financial situation under investigation. Since the indirect methods of proof do not allow the investigator to directly trace transactions, he or she must prepare an overview of the suspect's financial condition—a financial profile. This is accomplished by uncovering what the suspect owes, owns, earns, and spends at a given point in time or over a given period of time. Also, it entails finding out the sources and applications of funds used to make purchases or pay expenses. The financial profile may uncover direct proof of illegal income or hidden assets, or circumstantially show that the suspect's expenditures exceed his or her known sources of funds.

A financial profile is completed via techniques used by the investigator during the investigative process. Of major importance to the completion of the financial profile is a thorough interview with the suspect. Other information can be gathered through third-party contacts and from public information sources. Financial transactions maintained within the records of financial institutions that the suspect deals with are important sources of information in the completion of the financial profile. Historically, illicit funds in any significant amount eventually pass through a suspect's account in his or her financial institution. Such movement creates a record that can lead to other accounts, assets, and information.

When developing a financial profile for use with any indirect method of proof, the analysis should mirror the suspect's method of accounting (cash or accrual). For example, if the suspect business's accounting system is on the accrual basis, the indirect proof analysis should be completed utilizing the accrual basis of accounting.

The table on the next page contains information concerning the development of a financial profile. The left side of the table lists typical assets, liabilities, sources of funds, and expenditures a suspect may own or have. The right side lists questions the financial investigator will want to pursue to complete a detailed financial profile.
The Financial Profile

### Typical assets
- Residence
- Real estate
- Bank accounts
- Stocks and bonds
- Automobiles
- Insurance
- Cash on hand

### Typical liabilities
- Mortgage(s)
- Other loans
- Lines of credit
- Credit cards
- Installment purchases
- Accounts payable
- Taxes and other bills
- Alimony and child support

### Typical sources of funds
- Salary
- Gifts
- Rental income
- Dividends
- Interest
- Sale of assets

### Typical expenditures
- Rent and mortgage
- Health costs
- Interest on loans
- Credit cards
- Car payments
- Travel

### For each significant asset, determine —
- When was it acquired and from whom?
- How much did it cost?
- How was it paid for (currency, check, cashier’s check, etc.)?
- What source of funds was used to acquire it?
- What documentation exists for the purchase and where is it?

### For each significant liability, determine —
- What was the original amount of the liability?
- What is the present balance due?
- When was the liability incurred?
- What was the purpose for the loan or debt?
- How were the proceeds used and where were they deposited?
- What security (collateral), if any, was given for the debt?
- What documentation exists for the transaction and where is it?
- Was the debt written off as a bad loan for tax purposes?
- Who was the creditor or lender?

### For each source of funds, determine —
- What was the total amount during a given period?
- What was the source?
- How was it paid for (currency, check, by other means)?
- When were the funds received?
- Where was it deposited?
- How was it spent?
- What documentation exists (i.e., W-2 or 1099 form) and where is it?

### For each major expenditure item, determine —
- What was the total amount spent?
- How was it paid for (currency, check, credit card, etc.)?
- Where were the funds obtained to pay the expense?
- What documentation (i.e., receipts, bills, etc.) exists and where is it?
- When was the payment made?
Net Worth Analysis

Any recipient of funds, honest citizen or suspect, has only four possible ways of disposing of that income:

- **Saving it.** An individual may place income in a financial institution or keep it in his or her possession.

- **Buying assets.** Individuals may expend their income on assets.

- **Paying off debts.** Individuals may use income to reduce their liabilities.

- **Spending it.** An individual may use his or her income to make personal or business expenditures.

Indirect methods of proof show the relationship between a suspect's receipt and subsequent disposition of funds. The results of the indirect methods of proof do not identify specific financial transactions entered into by the suspect (i.e., they cannot prove that illicit funds were used to pay the mortgage); however, they do reveal that the suspect was able to partake in financial transactions above and beyond his or her known sources of funds. Indirect methods of proof result in inferences— inferences that an unknown source of funds must be present and available to the suspect.

**Net worth analysis** begins with the completion of a suspect's financial profile. Through identification of the suspect's assets, liabilities, income, and expenses, a net worth statement (the difference between a person's assets and liabilities at a given point in time) can be determined. Once completed, changes in the suspect's net worth can be compared to his or her known income, and differences, if any, may be inferred as coming from unknown sources. *(Note: For the purposes of this textbook, payments received from legal sources will be labeled as known sources and payments determined to be received from illegal sources will be labeled as unknown sources.)*
The Net Worth Formula

The basic component in computing net worth is the establishment of a starting point—the base year. For investigative purposes, the base year is the year prior to the year that the alleged illegal activity began. For example, if the investigator believes that the suspect began embezzling money in 1991, 1990 becomes the base year, the point of reference for comparison to subsequent years’ net worth changes. Why does the investigator need to establish the suspect’s financial profile for 1990? Because in 1990, the suspect was living as he or she “normally” would—without income from the alleged embezzlement.

Once the investigator has developed financial profiles for the base year and each of the years of alleged illegal activity, the net worth analysis formula can be applied. The formula for computing funds from unknown sources using the net worth method is:

<table>
<thead>
<tr>
<th>Net Worth Analysis Formula</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assets</td>
</tr>
<tr>
<td>Minus: Liabilities</td>
</tr>
<tr>
<td>Equals</td>
</tr>
<tr>
<td>Net worth</td>
</tr>
<tr>
<td>Minus: Prior’s year’s net worth</td>
</tr>
<tr>
<td>Equals</td>
</tr>
<tr>
<td>Increase in net worth from previous year</td>
</tr>
<tr>
<td>Plus:</td>
</tr>
<tr>
<td>Known expenses*</td>
</tr>
<tr>
<td>Equals</td>
</tr>
<tr>
<td>Total net worth increase</td>
</tr>
<tr>
<td>Minus: Funds from known sources</td>
</tr>
<tr>
<td>Equals</td>
</tr>
<tr>
<td>Funds from unknown sources</td>
</tr>
</tbody>
</table>

* For net worth purposes, the payment of an expense represents the reduction of an asset. Therefore, these reductions must be accounted for and added back into the calculation.

Performing Net Worth Analysis

The suspect, Jim Dealer, is being investigated for some alleged illegal activity which occurred in 1991 and 1992. This means that the investigator must develop financial profiles for the years 1990, 1991, and 1992. The results of the profiles are described below and are calculated into the net worth computation on the next page.
(a) Mr. Dealer stated that as of 12/31/90 he had $1,000 cash-on-hand. He had no cash-on-hand at the end of 1991 and 1992. 
(Cash-on-hand is currency in possession of the suspect.)

(b) On 12/31/90, Dealer's bank account reflected a balance of
$1,500. On 12/31/91, it contained $4,750 and on 12/31/92, it contained $5,225. The account earned $250 in interest in 1991, 
$475 in 1992. Total deposits in 1991 were $22,160, with rede- 
posits of $660. Total deposits in 1992 were $19,585, with rede- 
posits of $100.

(c) As of 12/31/90, Dealer owned $1,000 worth of jewelry. In 
1991, he purchased jewelry worth $5,000, and in 1992, he 
bought $6,000 more.

(d) Sometime in 1990, Dealer purchased a boat costing $17,500. 
He still owned the boat as of 12/31/92.

(e) During 1992, Dealer purchased an $18,250 car. He paid cash.

(f) Dealer purchased a $150,000 residence on 1/1/91. He made a 
cash downpayment of $50,000 and financed the balance, interest 
free.

(g) As of 12/31/90, Dealer owed $275, interest free, to a finance 
company. He made no payments on this note during 1991 or 

(h) Dealer borrowed $3,000, interest free, from a loan company on 
6/30/91. Beginning 7/1/91, he made monthly payments of $100.

(i) Beginning 1/1/91, Dealer made monthly payments of $500 per 
month on his new residence. He made eleven similar payments in 

(j) Dealer paid $1,460 on his credit cards in 1991 and $3,000 on 
them in 1992.

(k) Dealer was able to document personal living expenses in 
addition to those listed in (a) through (j). In 1991, the expenses 
totaled $11,000, and in 1992, they were $10,000.

(l) Dealer earned $25,200 from his job in 1991 and $22,200 in 
**Net Worth Analysis**

</tbody>
</table>

| Net Worth (assets - liabilities) | $20,725 | $81,575 | $113,500 |
| Minus: Prior year's net worth   |         | 20,725  | 81,575   |
| **Equals: Increase in net worth** |         | $60,850 | $31,925  |
| Plus: Known expenses            |         |        |         |
| Credit card payments (j)        |         | $ 1,160 | $ 3,000 |
| Other personal living expenses (k) |        | 11,000  | 10,000  |
| **Equals: Total net worth increase** |         | $73,310 | $44,925 |
| Minus: Funds from known sources |         |        |         |
| Interest on bank account (b)   |         | $ 250  | $ 475   |
| Wages (l)                       |         | 25,200 | 22,200  |
| **Equals: Funds from unknown sources** |         | $47,860 | $22,250 |
A review of the previous table shows that between 1990 and 1992, Jim Dealer’s assets increased significantly. In 1991, he was able to purchase a $150,000 house (with a $50,000 downpayment) and $5,000 worth of jewelry. Also, his bank account increased by $3,750. All this from a man with an income of $25,450. Mr. Dealer’s assets increased again in 1992 and, in that same year, he was able to decrease his liabilities.

**Keys to Net Worth Analysis**

From the net worth analysis done on Jim Dealer, it seems pretty obvious that he has some other source(s) of funds that he is keeping quiet about. That is, if the information the investigator obtained while doing the financial profiles is complete and accurate. The key to a successful net worth analysis is reliable base year, or “opening net worth,” information. The starting point must include all assets and liabilities of the suspect as of that time. If assets or liabilities are uncovered at a later date, it will cast doubt on the entire analysis and require a complete recalculation.

An inverse relationship exists between one year and the next in a net worth analysis. For example, an understatement of the net worth in one year will result in an overstatement of the increase in the net worth for the subsequent year. Conversely, an overstatement of the net worth in a year results in an understatement of the increase in net worth for the subsequent year. Accordingly, the investigator should pay special attention to the following elements when completing a net worth analysis:

- **Determining Cash-on-Hand.** When developing a financial profile to use with net worth analysis, possibly the most important asset to establish is “cash-on-hand.” For net worth purposes, cash-on-hand represents currency in the possession of the suspect. This does not include currency in financial institutions or currency that is tied up in investments or other assets. Cash-on-hand is all the suspect’s currency — whether on the person, under a mattress, or buried in the backyard. The inability of the investigator to establish a firm and accurate amount of cash-on-hand can be fatal to the investigation. Suspects may try to inflate their cash-on-hand figure by saying that they have more cash-on-hand than
they really do. "I was able to buy that boat because I had $20,000 stuffed away in a cookie jar." This alleging a "cash hoard" is a common defense in a net worth case.

Cash-on-hand is almost always shown by circumstantial evidence. The best source for determining this figure is during the interview process with the suspect. Questions such as: "Did you ever have more than $100 in cash-on-hand?" or, "more than $500?" or, "more than $1,000?" may result in admissions that can be used to establish cash-on-hand at a particular time. The location and denomination of cash-on-hand may also be useful information to support or refute a suspect’s claims. Even without an interview or answers to the questions, an investigator can determine a suspect’s cash-on-hand. It can be determined through analysis of previously filed financial statements, loan and credit card applications, and other records relating to the suspect’s financial activity.

- **Cash in Banks.** Most likely, the suspect will have funds deposited in financial institutions. Since many account statements have cut-off dates other than the end of the net worth analysis period, they must be reconciled to determine the balances as of the end of the period. Unusual transactions (large deposits and/or withdrawals) that occur near the end of the analysis period must be traced to their ultimate source or disposition. Unusual financial transactions can affect the net worth analysis. For example, a large withdrawal of funds that was not used to purchase an asset, reduce a liability, make a personal expenditure, or pay a business expense, must be treated as an increase in cash on hand. Similarly, large deposits made early in the analysis year must be scrutinized and then allocated to the appropriate net worth year. A consistent treatment of transactions is vital to the validity of the net worth analysis.

- **Asset Valuation.** All assets should be valued at cost as opposed to fair market value. Subsequent appreciation or depreciation of assets is ignored for purposes of net worth analysis.

- **Known Expenses.** The amount of a suspect’s expenditures, his or her actual “cost of living,” can be difficult to document. The amount a person spends on items such as food, entertain-
ment, cleaning, clothing, health and beauty aids, and sundry items is difficult to obtain. Therefore, estimates, if used, should be low or eliminated entirely. Any doubts should be resolved in favor of the suspect. Assuming that the net worth will still show substantial unexplained funds, the result will be an even more convincing demonstration of the dependence on illegal sources.

A Court-Approved Method

Because net worth analysis provides circumstantial evidence, its validity as a method of proving criminal activity had to be approved by the courts. The landmark case, decided by the Supreme Court in 1954, that established net worth analysis as prima facia evidence of a crime was Holland v. United States, 348 U.S. 121, 75 S.St. 127. An overall description of a net worth method is also set forth in United States v. Sorrentino, 726 F.2d 876, 879, 880 (1st Cir. 1984) and is stated in part as follows (note that these cases relate to Federal income tax evasion, thus the references to terms relating to taxability):

"The government makes out a prima facia case under the net worth method of proof if it establishes the defendant's opening net worth (computed as assets at cost basis less liabilities) with reasonable certainty and then shows increases in his net worth for each year in question which, added to his non-deductible expenditures and excluding his known non-taxable receipts for the year, exceeded his reported taxable income by a substantial amount. The jury may infer that the defendant's excess increases represent unreported taxable income if the government either shows a likely source or negates all possible non-taxable sources; the jury may further infer willfulness from the fact of underreporting coupled with the evidence of conduct by the defendant tending to mislead or conceal."

The Court established the following three requirements that the investigator must meet in order to establish a prima facia net worth case:
- Establish a reliable opening net worth
- Investigate all relevant leads that might show the suspect’s innocence
- Establish a likely taxable source of income together with evidence indicating an increase in net worth

How do investigators establish a prima facia net worth case? Well, through the development of a financial profile, they can establish a reliable opening net worth. During this same process, investigators can develop relevant leads indicating potential non-taxable sources of net worth increase (gifts, inheritances, insurance settlements, etc.). Investigators also must either prove a likely source of taxable income for the suspect or negate all non-taxable sources of income. A “likely source of income” does not have to be from the suspect’s principal business activity. Sources of net worth increases could be from interest or dividend income, gambling winnings, or from transactions involving illegal activities (narcotics, embezzlement, kickbacks, or other fraudulent activity).

**Expenditures Method**

With the expenditures method, a comparison is made between the suspect’s known expenditures and known sources of funds during a given period of time. Any excess expenditures must be the result of income from unknown sources. The expenditures method also can be used to compute “cash-on-hand” for the base year of a net worth computation.

In theory, the expenditures method is closely related to net worth analysis. They are merely accounting variations of the same principle. Both of these indirect methods of proof look at a suspect’s source of funds, expenditures, assets, and liabilities. However, each method examines the items in a different way. Let’s take another look at our suspect, Jim Dealer. Through the completion of financial profiles for the years 1990, 1991, and 1992, an investigator was able to determine that Mr. Dealer’s
bank account held $1,500 in 1990, $4,750 in 1991, and $5,225 in 1992. Each of these figures is used in the net worth computation in the table on page 90. However, in the expenditures method, the investigator will look at only the net effect (the difference between the ending balance and beginning balance) of a transaction (increase of an asset or decrease in a liability). In Jim Dealer's case, the investigator will note a $3,250 increase in Dealer's bank account between 1990 and 1991, and a $475 increase between 1991 and 1992. With the expenditures method, only the year-to-year increases or decreases in the suspect's assets and liabilities are considered for analysis purposes. When the suspect's assets and liabilities remain unchanged during the period, they are not listed in the analysis.

The Expenditures Method Formula

The formula for computing funds from unknown sources using the expenditures method is as follows:

<table>
<thead>
<tr>
<th>Expenditures Method Formula</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total expenditures</td>
</tr>
<tr>
<td>Minus:</td>
</tr>
<tr>
<td>Known sources of funds</td>
</tr>
<tr>
<td>Equals</td>
</tr>
<tr>
<td>Funds from unknown sources</td>
</tr>
</tbody>
</table>

The two main factors in the above formula are expenditures and sources of funds. But the investigator also gathers information concerning assets and liabilities. So, how does this information fit into the formula?

As was stated previously, the expenditures method focuses on the net effect of a transaction. So, if an asset or liability is involved in a transaction, it will be classified as either an expenditure or a source of funds—depending on its net effect (increase or decrease). The table on the next page classifies the net effect of different types of transactions.
**Expenditures Method Transaction Treatment**

If during the period under analysis, the net effect of a transaction results in an increase or decrease for the period, this net effect is recorded as a(n):

<table>
<thead>
<tr>
<th>Expenditure (Application of Funds)</th>
<th>Source (Source of Funds)</th>
</tr>
</thead>
<tbody>
<tr>
<td>• When cash-on-hand increases</td>
<td>• When cash-on-hand decreases</td>
</tr>
<tr>
<td>• When bank accounts increase</td>
<td>• When bank accounts decrease</td>
</tr>
<tr>
<td>• When assets increase</td>
<td>• When assets decrease</td>
</tr>
<tr>
<td>• When liabilities decrease</td>
<td>• When liabilities increase</td>
</tr>
<tr>
<td>• When personal living expenses are made</td>
<td>• When loans, gifts, or inheritances are received</td>
</tr>
<tr>
<td>• When cash expenditures are made</td>
<td>• When assets are sold</td>
</tr>
<tr>
<td></td>
<td>• When salaries or business profits are earned</td>
</tr>
<tr>
<td></td>
<td>• When other sources of income are known</td>
</tr>
</tbody>
</table>

A sample expenditures computation is found on the next page. Note that, unlike the net worth analysis computation, there are no figures listed for the base year. And, unlike the net worth analysis, the dollar amounts shown reflect the differences between one year and the next, not an absolute amount.

<tr>
<td></td>
<td>$26,600</td>
<td>$31,700</td>
</tr>
</tbody>
</table>

The difference between the amount of the suspect’s expenditures and his or her known sources of funds is attributed to unknown sources.

The table on page 200 contains the net worth analysis of our suspect, Jim Dealer. The following example presents the same facts relating to the Jim Dealer financial investigation, only this time the expenditures method is used. The figures in the table reflect the financial profile information found on page 199.
### Expenditure Analysis

**Suspect – Jim Dealer**

<table>
<thead>
<tr>

<tr>
<td><strong>Total known sources of funds</strong></td>
<td><strong>$29,450</strong></td>
</tr>
</tbody>
</table>

**Equals: Funds from unknown sources**

<table>
<thead>
<tr>
<th></th>
<th>Year One</th>
<th>Year Two</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>$47,860</td>
<td>$22,250</td>
</tr>
</tbody>
</table>

In the Jim Dealer example, both the net worth and expenditures methods of tracing the flow of funds resulted in identical bottom line figures. In each case, $47,860 in funds from unknown sources was discovered in 1991 and $22,250 was discovered in 1992.

As with the net worth method, there is no statutory provision expressly authorizing the investigative use of the expenditures analysis for criminal purposes. Accordingly, court cases have established “case law” that sets forth the requirements of proof to establish a prima facia expenditures case. The elements of proof requirement for the expenditures method is identical to that of the net worth method of proof:
Establish a firm starting point
Establish a likely source of income
Investigate leads which tend to establish the subject’s innocence

**Bank Deposit Method**

Through bank deposit analysis, unknown sources of funds are located through analysis of bank records and other financial transactions entered into by the suspect. The bank deposit method is applied in situations where assets and liabilities are constant from year to year and indications of extravagant expenditures are nonexistent, but investigative findings reveal that the suspect’s known sources of income are being deposited into financial institutions.

**Bank Deposit Analysis Formula**
The formula for computing funds from unknown sources using the bank deposit method is:

<table>
<thead>
<tr>
<th>Bank Deposit Analysis Formula</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total deposits to all accounts</td>
</tr>
<tr>
<td>Minus: Transfers and redeposits</td>
</tr>
<tr>
<td>Equals: Net deposits to all accounts</td>
</tr>
<tr>
<td>Plus: Cash expenditures</td>
</tr>
<tr>
<td>Equals: Total receipts from all sources</td>
</tr>
<tr>
<td>Minus: Funds from known sources</td>
</tr>
<tr>
<td>Equals: Funds from unknown sources</td>
</tr>
</tbody>
</table>

The details of each component of the bank deposit formula are described on the following pages.

**Total Deposits to All Accounts**
The bank deposit method considers all deposits made by a suspect, no matter what type of financial institution (banks, savings
and loans, brokerage houses, credit unions, etc.) is involved. Also included in the “total deposits” element of the bank deposit formula is the amount of cash-on-hand the suspect accumulated during the period under investigation.

A key to establishing “total deposits” is to remember that only funds actually deposited into an account are included. If several checks are listed on a deposit slip and the suspect deducts an amount to be returned to him or her in cash (a split deposit), only the net amount of the deposit should be used in computing total deposits.

**Transfers and Redeposits**
The transfer of funds between a suspect’s bank accounts (i.e., taking money from a checking account and depositing it into a savings account), and funds that are withdrawn and then redeposited (i.e., a “non-sufficient funds” check) must be considered in the bank deposit formula. These represent duplicate items for analysis purposes and must be subtracted from total deposits to arrive at the net deposits to all accounts.

**Cash Expenditures**
Cash expenditures consist of the total outlay of funds made by the suspect during the period in question minus net bank disbursements. Cash expenditures are calculated by the following formula:

<table>
<thead>
<tr>
<th>Cash Expenditures Formula</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total Outlay of Funds</td>
</tr>
<tr>
<td>Minus:</td>
</tr>
<tr>
<td>Net bank disbursements</td>
</tr>
<tr>
<td>Equals</td>
</tr>
<tr>
<td>Cash expenditures</td>
</tr>
</tbody>
</table>

The suspect’s total outlay of funds for the period under analysis includes all payments in currency or by check. For analysis purposes, there is no need to determine which part was paid by currency and which part was paid by check. Total outlays could include purchases of capital assets or investments, loan repayments, known expenses, etc.

One of the elements in the formula shown above is “Net Bank Disbursements.” To determine this element, a separate calculation is needed. This calculation is made as follows:
Net Bank Disbursements Formula

<table>
<thead>
<tr>
<th>Formula</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Net deposits to all accounts</td>
<td>Plus: Beginning balances</td>
</tr>
<tr>
<td>Equals</td>
<td>Net bank funds available</td>
</tr>
<tr>
<td>Minus:</td>
<td>Ending balances</td>
</tr>
<tr>
<td>Equals</td>
<td>Net bank disbursements</td>
</tr>
</tbody>
</table>

Net bank disbursements represent the maximum amount (in dollar terms) that could have been paid by the suspect through financial institution check withdrawals.

Funds from Known Sources
Funds from known sources include, but are not limited to: salaries, business profits, gifts received, loans received, and inheritances. Funds from known sources are subtracted from total receipts to derive the funds from unknown sources.

Sample Bank Deposit Analysis
The findings below pertain to the movement of money for a suspect named Dan Street.

The information is used in the bank deposit computation found on the next page.

**Total outlays**

| Total outlays                      | $18,250 | $19,010 |
**Minus: Net bank disbursements**

| Total known sources                | $29,450 | $22,675 |

**Plus: Cash disbursements**

| Equals: Total receipts            | $77,310 | $44,925 |

**Minus: Cash from known sources**

| Cash-on-hand (a)                   | 1,000   | 0       |
| Bank account interest (b)          | 250     | 475     |
| Loans (h)                          | 3,000   | 0       |
| Wages (l)                          | 25,200  | 22,675  |

**Total known sources**

| Equals: Funds from unknown sources | $47,860 | $22,675 |
In the Jim Dealer example, all three indirect methods of proof resulted in identical bottom line figures. In each case, $47,860 in funds from unknown sources was discovered in 1991 and $22,250 was discovered in 1992.

Since there is no statutory authority for using the bank deposit method of proof, authority stems from case law. The evidentiary facts most often used and accepted by the courts, to establish a prima facia bank deposit case are:

- The suspect was engaged in a lucrative income-producing business or profession
- The suspect made periodic deposits of funds into accounts in his/her own name, over which he/she had exercised control
- A thorough analysis of deposits was made by the investigating agent in order to negate the likelihood that the deposit came from non-taxable sources
- Unidentified deposits have the inherent appearance of income

The principle defense in a bank deposit case is that the deposits themselves represent non-taxable sources (i.e. other people’s money, prior accumulated funds, redeposits of cash withdrawals, or transfers of funds between accounts). This type of defense can be overcome by a thorough analysis of the deposit and withdrawal activity in the accounts under investigation.
Use of Each Indirect Method of Proof

Since there are three methods of indirect proof, an investigator must be able to determine which method to apply to a given situation. The following section explains when each indirect method of proof is applicable.

Net Worth Analysis
Net worth analysis is often used when several of the suspect's assets and/or liabilities have changed during the period under investigation and one of the following conditions exists:

- The suspect maintains no books and records
- The suspect's books and records are not available
- The suspect's books and records are inadequate
- The suspect withholds his or her books and records

In addition to being used as a primary method of proving income in civil and criminal financial cases, net worth analysis can also be used to:

- Corroborate other methods of proving income
- Verify the accuracy of known or reported income

Expenditures Method
The expenditures method is used as a primary method of establishing funds from unknown sources when a specific item case cannot be made. One of the following conditions must exist:

- The suspect maintains no books and records
- The suspect's books and records are not available
- The suspect's books and records are inadequate
- The suspect withholds his or her books and records

In cases where the suspect has several assets and liabilities
whose cost basis remains the same throughout the period in which you are interested, the expenditures method may be preferred over net worth analysis because a more brief presentation can be made in the computation. Assets and liabilities which do not change during the period under investigation are omitted from the expenditures statement.

**Bank Deposit Method**

The bank deposit method is recommended as a primary method of proof when most of the subject's income is deposited and the subject's books and records are:

- Unavailable
- Withheld
- Incomplete

The use of the bank deposit method is not limited to the above circumstances. If the suspect's books and records appear to be complete and accurate, the methods can be used and there is no requirement to disprove the accuracy of the books and records in order to do so.

**Indirect Methods of Proof an Investigative Tool**

Besides being used to prove income, the indirect methods of proof can be used as an investigative tool. They can help evaluate information provided by informants and can be used to show that a suspect warrants investigation or prosecution. At trial, an indirect method of proof can be used to convince the jury that the suspect is guilty. The following scenario will be used to illustrate these usages.

An informant comes into an investigator's office and provides information concerning Billy Bob Smith. According to the informant, Billy Bob has embezzled money from the bank where he is employed. The informant does not know how much money has been taken, but alleges it is substantial.
An indirect method of proof can be used to evaluate the informant’s allegation. A net worth, expenditures, or bank deposit computation could substantiate the informant’s allegation and indicate Billy Bob Smith has funds in excess of his legitimate income. This analysis would show that an investigation is warranted.

While conducting the investigation, indirect methods of proof can be used as a measuring device. This investigative tool will indicate whether a substantial portion of the embezzled funds have been identified. For example, suppose the investigator uses the specific item method of proof and documents three acts of embezzlement by Billy Bob. In each case, Billy Bob took $5,000. However, the investigator’s indirect method of proof computation shows $75,000 of unknown income. The investigator has documented only 20% of the embezzlement through the use of the specific item method. The investigation should be pursued further. Now, if the indirect method of proof computation reflected $20,000 of unknown income instead of $75,000, the investigator may decide to stop the investigation and present his or her findings to the prosecutor since it appears the major portion of the embezzlement has been documented.

The approach described above also can be used to convince a supervisor to allocate resources necessary to an investigation or prosecutors to take a case to trial. While the specific item method may document three acts of embezzlement, an indirect method of proof may indicate $100,000 was received from the embezzlement. This may convince a prosecutor to indict a suspect. It also may convince a jury that on three occasions Billy Bob Smith did embezzle money from his employer.

Indirect methods of proof also are useful in money laundering and forfeiture investigations. They can provide the information the investigator needs to prove that an asset was purchased with money obtained through illegal activity. Money laundering and forfeiture investigations are discussed in Chapter 11.
Since the key to proving a financial crime often rests on a showing of the suspect’s disposition or receipt of illegal funds, the ability to follow the flow of funds and the movement of money is of utmost importance to a financial investigator.

The specific item method, the method of direct proof discussed in Chapter 7, relies on a microscopic view of the movement of money through a suspect’s books and records or into and out of the suspect’s bank accounts. In contrast, indirect methods require a macroscopic view of the financial situation. To prepare such an overview of the suspect’s financial condition requires that the investigator complete a “financial profile” or detailed financial statement of what the suspect owns, owes, earns, and spends during the particular time period under examination. The financial profile identifies the assets, liabilities, expenses, and expenditures of the suspect. Additionally, it details the identified sources and applications of the funds used to make the purchases and payments. Through the use of the financial profile, financial events can be identified which trace the movement of money by indirect means.

Net worth analysis is one indirect method of proof. This analysis is based on the theory that increases or decreases in a person’s or business’s net worth, during a specific period, results in the identification of unknown/illegally received funds. The net worth formula is shown below.

<table>
<thead>
<tr>
<th>Net Worth Analysis Formula</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assets</td>
</tr>
<tr>
<td>Equals</td>
</tr>
<tr>
<td>Minus: Prior year's net worth</td>
</tr>
<tr>
<td>Equals</td>
</tr>
<tr>
<td>Plus: Known expenses</td>
</tr>
<tr>
<td>Equals</td>
</tr>
<tr>
<td>Minus: Funds from known sources</td>
</tr>
<tr>
<td>Equals</td>
</tr>
</tbody>
</table>
Expenditures analysis is a second indirect method of tracing the flow of funds. In the expenditures method, a comparison is made between known expenditures and known sources of funds during a given period of time. This analysis concludes that any excess expenditures must result from unknown funds received by the suspect. The expenditures formula is:

**Expenditures Method Formula**

Total expenditures
Minus: Known sources of funds
Equals Funds from unknown sources

Bank deposit analysis is another method of tracing the receipt of unknown funds by indirect means. Through analysis of bank records and known sources of funds, a determination of funds received from unknown sources is derived. The bank deposit formula is shown below.

**Bank Deposit Analysis Formula**

Total deposits to all accounts
Minus: Transfers and redeposits
Equals Net deposits to all accounts
Plus: Cash expenditures
Equals Total receipts from all sources
Minus: Funds from known sources
Equals Funds from unknown sources
Questions and Exercises

Answer the following questions and then check your responses with those provided at the back of the book.

1. When is it appropriate to use an indirect method of proof?

2. The base year is a key factor in the net worth computation. Explain why.

3. In an expenditures analysis, what effect does understating the "known sources of funds" have on the computation?

4. Compare and contrast the net worth and expenditures methods of tracing the flow of funds.

5. What is meant by the statement, "the specific item method represents a microscopic view of the movement of money, whereas indirect methods represent a macroscopic view of financial activity?"

6. When using the expenditures method, you must determine if a transaction is an expenditure or source of funds. Review the following list of transactions and for those that are expenditures, place an "E" in the blank space that precedes the transaction; for those that are sources of funds, place an "S" in the blank.

2 6
a. Suspect has a bank account balance of $1,300 on January 1, 1991, and $1,600 on December 31, 1991.

b. Suspect’s mortgage decreased from $27,500 to $25,200 during the year.

c. Suspect’s beginning inventory was $52,000 and ending inventory was $38,000.

d. Suspect sold stock costing $5,000 for $8,000.

e. Suspect paid $13,250 for a new car.

f. Suspect embezzled $40,000 from his employer.

g. Suspect took out a $50,000 loan to purchase a boat.

h. Suspect donated $10,000 to the University of Higher Education.

7. Given the following scenario and facts, compute the subject’s funds from unknown sources using net worth analysis.

**Scenario**
Richard Ross operates a flower shop downtown. It is alleged that this business is a “front” for his bookmaking and loan sharking activities.

**Facts**
a. You find a financial statement signed by Ross and dated December 31, 1991. The statement indicates that Ross had $1,000 cash on hand.

b. Ross has a checking account which he opened on June 1, 1991. His balance as of December 31, 1991 was $4,000. During 1992, Ross made total cash deposits of $30,000 and withdrawals of $25,000. His balance as of December 31, 1992 was $9,000. During 1993, Ross made total cash deposits of $25,000 and withdrawals of $32,000. His balance as of December 31, 1993 was $2,000.

c. A search of your county real estate records shows that Ross purchased his present home in 1991 for $130,000 and that he obtained a $30,000 mortgage. Real estate taxes on the property
amounted to $1,500 for each of the years 1992 and 1993. Contact with the lending institution shows that Ross made monthly payments of $1,000 to the lending institution during the subject years. The mortgage balances are as follows:

- December 31, 1991  $98,000
- December 31, 1992  $96,500
- December 31, 1993  $94,500

Interest payments are as follows:

- 1992  $10,500
- 1993  $10,000

e. City records indicate that Ross applied for a building permit in 1992 for the construction of a swimming pool in his backyard. Contact with the pool construction company reveals that Ross paid $20,000 for the pool. He made a $10,000 cash downpayment and received an interest-free loan from the pool company for the remaining $10,000. The pool was completed in June, 1992. Ross made monthly payments of $500 to the pool company. The loan balance on December 31, 1992 was $7,000 and on December 31, 1993, the loan balance was $1,000.

f. An informant stated that since 1991, Ross had maintained a $1,500 a month apartment for his girlfriend, Becky Perry. The informant's information was verified as being accurate.

g. During your investigation, you find that on February 28, 1992, Ross purchased a diamond ring and necklace for $25,100 cash and on December 23, 1993, he paid $15,900 cash for a mink coat.

h. During an interview with Ms. Perry, she told you that in addition to the apartment, Ross provided her with a new car which he leased on January 1, 1992. Contact with the auto leasing company revealed that Ross made lease payments of $300 a month during 1992 and 1993.

i. Information obtained from a local boat company shows that Ross purchased a boat on June 4, 1993 for $24,000.
j. The county judgment index shows that Ross borrowed $5,000 from a local finance company in 1990. He has never made any repayments.

k. Records of the local travel agency disclosed that Ross took his girlfriend on a vacation to the Orient in 1993. It cost $12,000.

l. You interviewed Ross and he showed you the books and records for his flower shop which indicated that he had a net profit of $40,000 in 1992 and $45,000 in 1993.

Net Worth Analysis Computation
8. Given the scenario and facts listed for question 7, compute the subject’s funds from unknown sources using the expenditures method.

**Expenditures Method Computation**
9. Given the scenario and facts listed for question 7, compute the subject's funds from unknown sources using the bank deposit method.

Bank Deposit Method Computation

4 U.S. v. Gleckman (80 F 2d 394 (CA-8). 35-2 USTC 9645)
Planning, Conducting, and Recording an Interview

"Talk is cheap because supply exceeds demand."

The above statement may be true in many situations, but when it comes to an investigator trying to get answers out of a witness, the opposite will probably happen. One of the most important skills investigators can develop is the ability to get people to open up and talk to them. In this chapter, you will learn about the "art" of interviewing. Yes, it is an art because those who do it well are more successful than those who shrug interviewing off as just "asking questions and writing down answers."

An interview is more than just going to someone's house, knocking on the door, and then asking questions. It takes planning. If you come across in a threatening manner or can't adequately explain why you need to interview a witness, you'll never get any voluntary cooperation. If you ask complex questions or don't allow witnesses to tell their story in their own words, you're not going to get what it is you are after. And finally, if you cannot adequately convey to others what you found out during the interview, it may as well not have taken place. The "art" of interviewing consists of three phases—planning, conducting, and recording—all of which are discussed in this chapter.

After studying Chapter 9, you should be able to:

- State the purpose of a financial interview.
- List the objectives of a financial interview.
Describe the elements that must be considered when planning an interview.

Describe techniques used when conducting an interview.

Identify and describe methods used to record an interview.

"Just the facts." Remember Sergeant Joe Friday’s famous phrase from the television show Dragnet? For years, every week like clockwork, Joe had the uncanny ability to detect, investigate, and resolve criminal matters in 30 minutes or less.

Television makes it look easy. Unfortunately it isn’t. Detecting and investigating a financial crime can take weeks, months, and even years. So, while reality significantly differs from what happens on television, one thing remains the same—financial investigators, just like Joe Friday, search for facts by interviewing people.

Few skills are as important to the financial investigator as the ability to talk to people and successfully gather information from them. Yet, law enforcement officers are not empowered to force people to talk to them. These powers are granted only to courts, grand juries, and certain judicial and legislative bodies. Consequently, investigators face the double duty of convincing the interviewee (hereafter called the witness) to agree to be interviewed and then getting the witness to talk after getting inside the door.

What is an Interview?

Phone interviews. Employment interviews. Counseling interviews. Investigatory interviews. As you can see, there are many types of interviews. And though they all serve different purposes, they are founded on the same definition: an interview is a specialized form of oral, face-to-face communication between people that is entered into for a specific task-related purpose associated with a particular subject matter.¹

For the financial investigator, two aspects of this definition should be noted. The first one is that an interview is a face-to-face communication. Not only will investigators listen to what wit-
nesses say, they will be able to see what the witnesses do. The visual and non-verbal aspects of an interview are very important and should not be overlooked. Secondly, the interview has a specific task-related purpose. This task-related purpose is what makes an interview different from mere conversation. A conversation can take off in many directions; an interview must be focused on relevant content.

Introduction to the Financial Interview

Before we get into a general discussion of the interview process, we should look at some specifics of the financial interview. The purpose of a financial interview, its objectives, and the type of question to be asked during a financial interview are discussed below.

Purpose and Objectives

For the financial investigator, the interview is a tool used to determine what knowledge a witness has concerning an investigation. Knowledge in this context includes information about the allegation or crime in question, and any relevant records in a witness’s possession. The information and documents provided to the investigator form the basis of the witness’s testimony.

A financial interview is different from a financial interrogation. Financial interviews are conducted to obtain information and documentation from witnesses. Financial interrogations are conducted with suspects and hostile witnesses to elicit confessions or admissions of culpability. An investigator may plan on conducting an interview and have it turn into an interrogation. Conversely, interrogation can commence only to discover that the witness appears to be innocent, and with that, an interrogation turns into an interview.

The financial interview is not something that investigators undertake haphazardly. Prior to each interview, they must decide what they hope to accomplish by interviewing a particular witness. In other words, they must determine the interview’s objective(s).
The objectives of a financial interview are:

- To obtain information that establishes or refutes the allegation or crime under investigation
- To obtain leads for further development of the case
- To obtain all information and documents in the witness's possession relative to the financial investigation
- To obtain the cooperation of the witness for any subsequent legal proceeding
- To obtain background and personal information about the witness and motivation for involvement in the crime

**Type of Question Asked**

A financial interview is a special type of investigatory interview. During most investigations, people are interviewed to obtain their recollections of events. For example:

- "Can you describe the person who came into the bank?"
- "Do you remember if anyone was with him?"
- "What color was the car she purchased?"

Financial interviews go beyond recollection questions. Like the financial investigation itself, they are concerned with specific details of financial transactions and the movement of money. For example:

- "Why did you have this check cashed?"
- "You notarized two signatures on this document. One is the suspect's. Who is the other individual?"
- "How did she pay for the car?"
The Three Phases of an Interview

For any investigator, an interview is more than just asking a witness some questions. Who should be interviewed? What questions should be asked? In what order should the questions be asked? Where should the interview take place? How can the witness be put at ease so that he or she cooperates? What happens to the information collected? These are just some of the questions an investigator must ask before, during, and after the interview.

A good interview requires a lot of forethought, skillful execution, and an ability to convey what happened during the interview to others. The interview process is comprised of the following three phases:

- Planning
- Conducting
- Recording

Planning an Interview

Prior to planning any interview, the investigator is usually faced with one or more of the following conditions:

- A crime has been alleged or committed, but the facts relating to the situation have not yet been established
- A complainant or victim has been identified. This could be an individual, business, or governmental entity
- Records or documents reflecting financial transactions relating to the suspected criminal activity have surfaced
- Rumors, innuendo, or factual information pointing to a specific suspect have emerged

The investigator uses the interview to develop information about these existing conditions. The information collected will be used to support or dispel the allegations.
Selecting Witnesses

When an investigation begins, investigators must determine who they want to interview and in what order. Traditional criminal cases are generally investigated by first contacting the outer circle of honest, disinterested witnesses and then working inward to the co-conspirators and ultimately to the target. Law enforcement normally starts the interview process with the complaining witness and after exhausting his or her knowledge of the facts and reasons for suspicion, proceeds in a similar manner around the outer circle of witnesses.4

In a financial investigation this traditional sequence is often altered. Following the movement of money dictates talking to witnesses that have knowledge of financial transactions. Accordingly, the hierarchy of interviews is determined by the degree of knowledge or participation in financial activities created by the alleged criminal event or crime at issue. For example, in a political corruption investigation, documents showing the movement of money from the payer of the bribe to the taker of the bribe would be of paramount importance to the investigator. People with documents (bankers, money couriers, business associates) would be priority contacts. In an embezzlement or tax evasion investigation, the key interviews would be with custodians of accounting records and internal audit files, and tax return preparers. Even in a drug case, financial transactions decide the order of contacts for the investigator. The priority witnesses will have records reflecting the suspect’s use of proceeds from the drug trade. While each investigation offers a different set of interview options and priorities, the bottom line in a financial investigation is that every person who has documents pertaining to financial transactions, or knowledge about them, should be interviewed.

Types of Witnesses

One of the things an investigator must consider prior to contacting an individual for an interview is what type of witness will that person be. Will he or she be cooperative, hostile, or have no feelings one way or the other? Prospective witnesses can be categorized into three general types:5
Types of Witnesses

Neutral
This is an uninterested third party such as a custodian of public or financial records. This person has no interest in the outcome of the investigation and provides documents and/or unbiased information.

Friendly
A friendly witness is one who cooperates. Witnesses are friendly for a variety of reasons. Certain people naturally tell anybody everything. Others realize that they stand to benefit from providing information about the suspect to authorities. Also, many people seem to enjoy “playing detective” and get caught up in the excitement of being a part of an important investigation.

Reluctant or hostile
This is an uncooperative party who is typically a friend or associate of the suspect. This witness may also be hostile due to his or her own culpability in the criminal activity under investigation.

Neutral and friendly witnesses usually agree to interviews upon request. No more than proper identification and introduction by the investigator opens the door. Interviewing hostile witnesses often presents greater challenges. Most likely, these witnesses will not voluntarily submit to an interview. They refuse to provide information and documents.

Since law enforcement cannot, on its own, compel any witness to say or do anything, investigators need assistance from the legal system. With approval from a government attorney (i.e. city or district attorney, or U.S. Attorney) the investigator can be issued a document (i.e., summons, subpoena) which commands a witness to appear and submit to an interview. The investigator serves this document on the witness and, if the witness disregards the document, contempt charges and incarceration possibly could result. But even an investigative tool that can command appearance before the investigator does not override a witness's constitutional guarantees. So, while a hostile witness can be ordered to open the door and submit to an interview, he or she cannot be compelled to say anything incriminating.
Contacting the Suspect

In Chapter 4, we stated that the suspect was a valuable source of information. It follows then that deciding when to interview the suspect is an important decision. Should he or she be contacted at the start of the investigation or confronted upon its completion? Should the investigator contact the suspect at all? The decision is determined by the investigator and is different for each investigation. Interviewing the suspect during the early stages of the investigation makes good sense if it is feared that records in his or her possession may be destroyed or an alibi may be concocted. Often, catching the suspect off guard results in a more responsive interview filled with more answers and more documents. Also, early interviews have resulted in quick confessions and/or early indications of innocence.

On the other hand, delaying contact with the suspect may be advantageous if information and documents gathered from other witnesses can be used to refute the suspect’s alibis and lies. Additionally, confessions sometimes occur when the suspect is confronted face to face with the evidence of guilt.

In certain situations, the suspect may not be interviewed at all. He or she may be beyond the reach of law enforcement (i.e. out of the country) or may be represented by an attorney who refuses to allow his or her client to be interviewed on constitutional grounds.

Method of Questioning

While planning an interview, the investigator must determine the method of questioning to use. Questioning can be organized in a number of ways:

- **Chronological method.** The witness is questioned about the events in the order that they occurred from beginning to end. This is the usual organization of questioning.

- **Questioning according to documents.** In this type of interview format a particular document (financial statement, canceled check, tax return) is the focus. The witness may be the legal custodian of the record and have no other involvement in the investigation.
- Questioning according to transactions or events. The witness may have sold the subject a house or delivered a package for him or her. The questions in this situation would center on the event and radiate from there.

During the planning phase, the investigator should prepare a written outline that lists main topics to be covered in the interview. An outline allows the investigator to concentrate on important ideas and areas to be covered. However, writing down every specific question to be asked and in a specified order should be avoided as this has the tendency to make the investigator inflexible and tied to the next question. The investigator unwittingly becomes guided by what is written on the sheet of paper instead of what is being said by the witness. Also, the witness may catch a glimpse of the upcoming questions and prepare responses in advance. The following page contains a simplified example of an interview outline. The outline used for an actual interview would be more extensive.
Sample Interview Outline

Ray Austin Interview

Introduction: Identify Self

Toni Boise
Marc Fresno

Conducting an Interview

Once an investigator is finished with the planning phase, he or she is ready to conduct the interview. The interview itself is composed of three distinct parts:
Introduction

The introduction is critical as it sets the tone for the whole interview. It serves the following two purposes:

- Allows the investigator to identify himself or herself to the witness
- Allows the investigator to state the purpose of the contact

The following shows right and wrong ways for an investigator to introduce himself or herself:

Wrong

“Mr. Smith, my name is John Jones and this is Mary Adams. We’re with the government. We’re investigating Jim Dealer and we need to talk to you.”

Right

“Mr. Smith, my name is John Jones. I am a Special Agent with the Internal Revenue Service’s Criminal Investigation Division. This is Special Agent Mary Adams from the Drug Enforcement Administration. We are currently conducting an investigation involving alleged violations of money laundering laws by Jim Dealer. May we speak to you for a few moments?”

The objective of the introduction is to put witnesses at ease and to get them to agree to answer questions. However, once the investigator identifies himself or herself, the next question normally is asked by the witness.

Witness: “Why are you contacting me?”

Investigator: “We would like to ask some questions about your financial dealings with Jim Dealer and his associates.”
Since the investigator's goal is to put the witness in a frame-of-mind to answer questions, he or she must supply a reason which leads the witness to perceive that he or she will benefit from cooperating with the investigator. If the witness believes that the investigator represents a threat, voluntary cooperation is generally lost. The next page shows some right and wrong ways to gain the cooperation of a hesitant witness.

During the introduction, the investigator should ask general, almost generic questions such as name, address, telephone number, and date of birth. Since many witnesses are apprehensive, the investigator needs to be patient and avoid rushing into important questions. Through reassuring the witness that his or her cooperation will not cause any undue hardships, inconveniences, or embarrassment, a rapport can be established that will assist both the witness and the investigator during the interview process. When the introduction has been completed and the witness is ready to talk, the investigator moves on to the second part of the actual interview—the body.
Right and Wrong Ways to Gain the Cooperation of a Witness

Wrong
Witness: “Why should I talk to you? I don’t want to get involved.”

Investigator: “You should have thought of that sooner—it’s too late now. We can talk here or we can talk downtown. It’s your choice.”

Right
Witness: “Why should I talk to you? I don’t want to get involved.”

Investigator: “You certainly are not required to talk to me. I am just seeking some information on a serious matter which may or may not result in legal action. By speaking informally with me now, it may save you the trouble of having to testify later, depending on the information you have. Is that o.k.?”

or

Witness: “I don’t want to answer any questions at this time without first talking to my lawyer.”

Investigator: “You certainly don’t have to talk to me, with or without your lawyer. Let’s do it this way. Let me ask you a few questions and if you don’t want to answer them, just say so. I’m not trying to get you into trouble. I’m just trying to do my job and get some answers. Is that o.k.?”

The Body
The body of the interview is the fact finding part of the interview process. Questions are asked and answers are provided. The structure of the interview is determined by the method of questioning (chronological, by document, or by transaction or event) which should have been pre-determined and outlined by the investigator.

In this stage of the interview, witnesses should be allowed to tell their story in their own words. Recognizing that a witness’s story will usually be disjointed and rambling, the investigator must be prepared to put order to the material—find the details,
focus for clarity, and ensure the accuracy. For the investigator, conducting an interview is much more than just asking questions and writing down answers. This process requires concentration and active participation by the investigator if his or her objectives are going to be achieved.

The time-honored questioning devices of who, what, where, when, why, and how allow investigators to push witnesses for details. Investigators should continue the questions until they are convinced that a witness’s knowledge of a topic is exhausted. Details, details, details! Whether recollections or records, it is the detail provided by the witness that lays the foundation for a successful financial investigation. The following exchange between an investigator and a witness illustrates how to pursue the detail in a line of questioning.
Investigator: “How was the kickback payment made?”

Witness: “At a meeting.”

Investigator: “Where did this meeting take place?”

Witness: “In Mr. X’s office.”

Investigator: “How many people were there?”

Witness: “There were three of us.”

Investigator: “Who were they?”

Witness: “Mr. X, Bill Baker, and me.”

Investigator: “How was the kickback divided?”

Witness: “Mr X split it into three piles.”

Investigator: “How much did each of you get?”

Witness: “I don’t know. Mr. X didn’t count the money. He just estimated the size of each pile.”

Investigator: “Did you all get the same size piles?”

Witness: “Yes. I counted it at my office. I had just a little over $100,000.”

Investigator: “Would you say that Mr. X received about $100,000 also?”

Witness: “That would seem about right.”

A witness’s opinion of events often clouds the facts. Although there is nothing wrong with requesting an opinion from a witness, the investigator, through proper questioning, needs to separate
the facts (what was said) from the opinions (what was talked about). The goal is a verbatim recollection from the witness. For example:

Wrong
“What did you and Jim Dealer talk about?”

Right
“What did Jim Dealer say to you?
What did you say to him?”

As was stated earlier, an investigator must actively participate in the interview process. It’s not as simple as ask a question, write down a response. The investigator must constantly analyze responses, and continually check for inconsistencies, inaccuracies, and incompleteness. For example:

Investigator: “How long did your meeting with Mr. Grey last?”

Witness: “It lasted all day.”

Investigator: “What did Mr. Grey say?”

Witness: “Not much.”

An all day meeting with not much said should raise a red flag in the investigator’s mind. This line of questioning needs to be pursued.

During an interview, investigators have a multitude of tasks to handle simultaneously. From listening to a response and recording it, to formulating the next question, they have a lot to do. There are some general “do’s and don’ts” that investigators should consider when performing an interview. They are found on the next page.
Interview Do's and Don'ts

- Do interviews as a team. One investigator listens and controls the questioning while the second records the responses.

- Do interview witnesses individually. Attempting to interview two witnesses in the same room at the same time results in one of two things—one witness influences the other's responses or one witness becomes mute thereby allowing the second witness to answer all the questions. Always separate witnesses and conduct their interviews simultaneously.

- Do control the interview. Don't let, for example, an attorney who is present disrupt the interview. Before beginning the interview, advise each participant of their role in the process. This should help eliminate any control problems.

- Do provide the witness with an out. If a witness has previously denied knowledge, or has supplied false information, there is often reluctance to admit it. The investigator should provide this witness an “out”. It normally will be taken. For example:

  “Mr. Smith, I know when we talked before you denied knowing Mr. Dealer. You probably forgot about meeting him. Can we start over?”

- Don’t ask compound/complex or negatively phrased questions, (i.e. “you didn’t see the money, did you?”). Questions should be simple, to the point, and positively phrased.

- Don’t make threats and avoid threatening remarks. Threats rarely work, so overbearing tactics should be avoided. The “good cop/bad cop” interview technique looks good on television but is usually inappropriate in financial investigations.

As was discussed in Chapter 3, in our legal system, documents cannot speak for themselves, either figuratively or literally. A witness must identify, explain, and introduce every financial document to give it meaning in any legal proceeding or court action. So what does interviewing have to do with the introduction of documents into a legal proceeding. Plenty! Successful inter-
viewing creates cooperative witnesses who breathe life into financial records involving the movement of money.

Technical areas such as accounting procedures or business specialties should be covered in detail during the body of an interview. The investigator should ask questions concerning the document's entries, meanings, and purposes. The investigator should also determine the identity of the document's custodian and solicit the authenticity of the document. Investigators should not be afraid to ask questions and should keep that old saying, “There is no such thing as a stupid question” in mind. Any question can lead to a surprising answer.

The investigator's job during the interview process is not complete until he or she has exhausted the witness's knowledge on the important topics relative to the ongoing investigation. Successful interviews obtain information and financial leads, as opposed to solving the case. If enough interviews are conducted and enough information is uncovered, the case will solve itself.

The Close

After the witness has provided information, the investigator should review the key points gathered during the body of the interview. This process of summing up the important facts serves the following two purposes:

- It allows the investigator to clarify the facts
- It provides an opportunity for the investigator and witness to agree with the investigator's summation

Once the summation has been agreed on, the investigator should ask the following three questions:

- "Is there anything that I have forgotten to ask?"
  Probably the number one reason investigators fail to get the answers they seek is that they simply fail to ask the question. Using this "catch-all" question allows the witness the opportunity to play detective.
• “Is there anyone else you think I should speak with?”
  This question is designed to find more leads. If the witness is hesitant, it's ok to say that his or her name will not be revealed to the person(s) suggested.

• “Is there anything else that you would like to say?”
  This should be the investigator's last question. It gives the witness one final chance to say anything that he or she wishes.

Exit gracefully, even after encounters with hostile witnesses. Soothe the apprehensive witness by mentioning that all the information that he or she provided will be held in confidence and/or for official purposes only. If the witness was cooperative, thank him or her for the cooperation; if nothing was said, express regrets and leave the door open for future contacts.

**Recording an Interview**

Investigators conduct interviews to obtain information and documents in an attempt to resolve financial crimes. It is also necessary to prepare a permanent record of each interview for future reference and use. Often in a financial investigation, persons interviewed become trial witnesses. The record of the financial interview as prepared by the investigator can be used to refresh the witness's memory and assist the witness in the identification process relative to a financial document.

The complexity and investigative importance of an interview determines the best method to record it. In situations where no information is secured, a limited report or record of interview is acceptable. However, in situations where "case critical questions" are answered, or denials are made by an important witness, a more formal record becomes necessary. The only constraint in the recordation process is the requirement for **accuracy and completeness** by the investigator preparing the written summary.

When an investigator plays the role of an interviewer, he or she must be accurate, fair and just. The prosecuting attorney relies on the investigator's written notes taken during an interview. The investigator's portrayal of the interview process should accurately and completely reflect the witness's testimony.
Informal Notes

The “informal notes” taken by investigators during the course of the interview, in conjunction with their recollections, provide the basis for the written record. Informal notes should contain sufficient detail to permit investigators to refresh their memories as to what transpired during the interview. Any method of recording the details is sufficient if it shows the date, time, place, persons present, and what occurred. The following is an example of the informal notes taken by Special Agent John Jones during an interview with Richard Smith. Special Agents Jones and Adams interviewed Smith concerning a financial transaction (the purchase of a car) he had with the suspect, Jim Dealer.

Example of Informal Notes

Re: Jim Dealer

John Jones, IRS
Mary Adams, DEA
July 25, 1991
10am - 10:47am

Talked w/Richard Smith
123 A. Street

Dealer called Smith about truck
Smith advertised. Dealer came to see truck about
½ hour after call. Test drove truck around block
then paid $25,000 in cash, in $100 bills, for truck.

1990 truck, serial # 1173945

Memorandum

A second way to record interviews is to “formalize” the investigator’s informal notes into a “memorandum of interview”. A memorandum should be prepared when details of an interview are too numerous to be fully and properly related through informal notes. It should state what occurred during the interview and show the
date, time, place, and persons present. If the person interviewed was advised of his or her constitutional rights during the interview, this fact should also be noted in the memorandum. The final typed memorandum should be prepared as soon as possible, and promptly signed and dated by the investigators present during the interview. The actual date of preparation should be shown at the bottom of the memorandum. If it becomes necessary to correct or supplement a memorandum after it has been finalized, the supplemental memorandum should clearly state the date and reason for such action, and the previous memorandum should be attached.

Handwritten notes made during an interview and used as the basis for a more detailed memorandum may be subject to inspection by a court and should be retained in the case file. Investigators should confine memorandums to the facts developed in the interviews and should avoid opinions, conclusions, and other extraneous matters.

When deciding whether or not to use a memorandum as a means of recording interview notes, an investigator should consider the following advantages and disadvantages:

<table>
<thead>
<tr>
<th>Advantages and Disadvantages of the Memorandum</th>
<th>Disadvantages</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Advantages</strong></td>
<td></td>
</tr>
<tr>
<td>Informal</td>
<td>Does not contain the exact words of the interviewee</td>
</tr>
<tr>
<td>Contains all pertinent testimony obtained in the interview</td>
<td>Since information was not mechanically recorded, there is a chance for some information to be forgotten</td>
</tr>
<tr>
<td>Memorandums can be prepared by topic and therefore are easy to follow</td>
<td></td>
</tr>
<tr>
<td>Does not require an oath or affirmation</td>
<td></td>
</tr>
</tbody>
</table>

An example of a memorandum appears on the following page.
Example of Memorandum of Interview

In re: James Dealer
115 South Street
Miami, Florida

Present: Richard Smith, Witness
Special Agent, Mary Adams
Special Agent, John Jones

Place: Office of Richard Smith
117 Elm Street
North Miami, Florida

Date: July 25, 1991

Time: 10:00 a.m. to 10:47 a.m.

1. S/A Adams and I made a field call to a travel agency located at 117 Elm Street, the known employer of Richard Smith. Records obtained from State vehicle registration files reveal that Smith transferred the title of a truck (serial number 1173945) to Dealer in May, 1990.

2. After proper introduction and identification (by displaying our credentials and badges), I asked Mr. Smith if he would answer a few questions about the sale of his truck. Mr. Smith agreed and when asked, stated the following:

   a. He advertised his truck for sale in a newspaper at $25,000.

   b. Dealer responded to the ad and bought the truck by paying $25,000 in currency, composed of one hundred dollar bills.

   c. The sale was completed on May 29, 1990, when the currency was exchanged for the truck and registration paperwork.

3. Mr. Smith further stated that he would agree to reducing the information to a written affidavit and swear to its accuracy.

4. I suggested that we meet again tomorrow at his home to prepare the affidavit. Mr. Smith agreed.

5. This interview concluded at 10:47 a.m. when we left Mr. Smith's office.

I (prepared/dictated) this memorandum on July 26, 1991, after refreshing my memory from notes made during and immediately after the interview with Richard Smith.

Special Agent

I certify that this memorandum has recorded in it a summary of all pertinent matters discussed with Richard Smith on July 25, 1991.

Witness
**Question and Answer Statement**

A question and answer statement is a complete transcript of the questions, answers, and statements made by each participant during an interview. It may be prepared from a stenographer’s notes or from a mechanical recording device. The source used to prepare the transcript should be preserved and associated with the case file as it may be needed in court to establish what was said.

A question and answer statement should contain:

- When and where the testimony was obtained
- The name and address of the person giving the testimony
- The matter the testimony relates to, including the purpose of the interview
- The name and title of the investigator asking questions and the name and title of the person giving answers
- The names and titles of all persons present during the testimony and the reason for each person being present, if not obvious
- The consent of the person being interviewed to use a tape recorder if a mechanical recording is being made
- Information given to the person being interviewed concerning his or her rights to counsel and against self-incrimination, if appropriate
- Administration of an oath if given
- Questions and answers establishing that the statement was made freely and voluntarily, without duress, and that no promises or commitments were made by the investigators
- Signatures of the investigators who conducted the interview and the person being interviewed
- Signature and the certification of the person transcribing the statement, showing the source of the original information used
- Information that the person being interviewed was given the opportunity to examine the statement, correct any errors, and sign it
The following is a format that can be used for question and answer statements.

**Question and Answer Statement Format**

Testimony of (name, address) given at (location including address) at (time) on (date) about (subject of investigation and their address).

Present at this interview are (names and titles of all persons present).

Questions were asked by (name and title of person asking the questions) and answers given by (person being interviewed).

This interview is being recorded, as agreed upon, by means of (method of recording).

1. **Q.** You were requested to appear at (location) to answer questions concerning (subject matter). (If appropriate, advise the person being interviewed of his or her rights to counsel, etc.)

2. **Q.** Please stand and raise your right hand. Do you solemnly swear that the answers you are about to give to the questions asked will be the truth, so help you God?

3. **Q.** Did you sell a truck that you owned to Mr. Jim Dealer?
   **A.** (answer)

4. **Q.** How much did he pay you for the truck?
   **A.** (answer)

- **Note:** The interview is brought to a close with the following questions.

120. **Q.** Have I, or has any other investigator or officer, threatened or intimidated you in any manner?
   **A.** (answer)

121. **Q.** Have I, or any other investigator or officer, offered you any rewards, promises or immunity, in return for this statement?
   **A.** (answer)

122. **Q.** Have you given this statement freely and voluntarily?
   **A.** (answer)

123. **Q.** Is there anything further you care to add for the record?
   **A.** (answer)

After this statement has been transcribed, you will be given an opportunity to read it, correct any errors, and sign it.

- **Note:** When transcribing the statement include the following:

I have carefully read the foregoing statement consisting of page 1 to last page number, inclusive, which is a correct transcript of my answers to questions asked me on (date of statement) at (location where statement was given, relative to (subject of investigation and their address)). I hereby certify that the foregoing answers are true and correct, that I have made the corrections shown, have placed my initials opposite each correction, and that I have initialed each page of the statement.

   (signature of person giving statement)

Subscribed and sworn to before me at (time), on (date) at (present location).

   (signature and title of investigator)

   (signature and title of witness investigator)

I name of person transcribing statement), do hereby certify that I took the foregoing statement of (person giving statement) from (method of recording) and personally transcribed it and have initialed each page.

   (signature and title of transcriber)
Normally people will review and sign a question and answer statement after it has been put in its final form. Sometimes, for various reasons, the person may change his or her position and refuse to sign the statement. When an investigator is faced with such a refusal, he or she should request that the statement be read and verified for correctness. In such situations, the following can be inserted at the end of the statement:

_This statement was read by (name) on (date) who stated that it was true and correct, but refused to be placed under oath or to sign it._

Just as there are advantages and disadvantages to using a memorandum as a recording device, so there are for the use of a question and answer statement.

### Advantages and Disadvantages of the Question and Answer Statement

<table>
<thead>
<tr>
<th>Advantages</th>
<th>Disadvantages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reflects both questions and answers</td>
<td>Usually contains unnecessary material</td>
</tr>
<tr>
<td>Questions are generally asked in a logical sequence</td>
<td>Is often very long and involved</td>
</tr>
<tr>
<td>Is difficult to dispute with claims of misunderstanding</td>
<td>It is unedited; therefore, it picks up incorrect grammar, etc</td>
</tr>
<tr>
<td>Is preferred when the issues are complicated</td>
<td>Tape recorder will pick up outside noises which can disrupt recording</td>
</tr>
<tr>
<td>Is useful when the person testifying under oath is illiterate or below average intelligence</td>
<td>Unable to make voice distinction</td>
</tr>
<tr>
<td>Can be used to challenge or discredit a witness</td>
<td>Mechanical failure (if tape recorder used)</td>
</tr>
<tr>
<td></td>
<td>Can be viewed as intimidating by deponent; therefore, witnesses are often not willing to participate</td>

</table>
Affidavit

An affidavit is a written declaration of facts made voluntarily and confirmed by oath or affirmation. The text of an affidavit may be prepared extemporaneously or composed by agreement between the affiant, the person making the statement, and the investigator. An affidavit can be either typed or handwritten, and prepared either by the affiant or investigator. There are certain advantages to allowing the affiant to compose and write an affidavit. These advantages are:

- The affidavit will be in the affiant’s own words
- The affidavit will be more credible because it is in the affiant’s own handwriting. It would be difficult for the affiant to later deny the affidavit was his or hers

One advantage to having the investigator prepare the affidavit is that the investigator will ensure that only relevant information will be covered and that the information will appear in an orderly fashion. In cases where the affiant is unable to either read or write, a witness other than the affiant or the investigator must read the affidavit to the affiant before he or she signs it. The affidavit must also be signed by both the investigator and witness.

No particular form of affidavit is required by common law. It is customary that affidavits have a caption or title, the judicial district in which given, the signature of the affiant, and the jurat. A jurat is the certification on an affidavit declaring when, where, and before whom it was sworn.

The affidavit is one of the most commonly used forms of recording testimony. It can be used during trial to impeach a witness, refresh memory, or it can be introduced as evidence. An affidavit should not contain hearsay or information about which the witness has no direct knowledge. If the person being interviewed was advised of his or her constitutional rights, this should be included in the affidavit.

A sample affidavit is found on the next page.
United States of America, Southern District of Florida

I, Richard L. Smith, state that:

I reside at 123 A Street, Miami, Florida. I am currently employed as a travel agent at Miami Travel, located at 117 Elm Street, Miami, Florida. On May 28, 1990, I placed a newspaper advertisement in the Miami Herald classified ads offering my 1989 truck for sale. I listed the asking price as $25,000. On May 29, I received a phone call from a man who said that he read the ad and would like to see my truck. He stated that he would like to look at it that afternoon. I gave him my address and he came over about 30 minutes later. I gave him the keys and we took a ride around the block. He said that he would buy the truck for $25,000. He opened the trunk of the car he was driving and pulled out a briefcase. We went into my house where he took $25,000 in one hundred dollar bills from the briefcase to pay for the truck. I was surprised at being paid in currency, but the man stated that he wanted the truck today and knew that it would take time for a check to clear the bank, so he brought cash. I gave him the ownership papers for the truck. I said thanks for buying the truck and gave him my business card requesting that he give me a call if he needed any travel planning. He gave me his business card and said he was in the import-export business. Jim went to his car and made a telephone call and a couple of minutes later two guys arrived and one drove Jim's car while Jim drove the truck away. I have not seen or heard from Jim since that day. On today's date, I gave Special Agent John Jones a copy of the truck registration, serial number 1173945, that I sold to Jim Dealer on May 29, 1990, and the business card I received from Jim Dealer on that same date. I have received a receipt for both of these items from Special Agent Jones.

I have read the foregoing statement consisting of 1 page(s), and have signed it. I fully understand this statement and it is true, accurate, and complete to the best of my knowledge and belief.

I made this statement freely and voluntarily without any threats or rewards, or promises of reward having been made to me in return for it.

(Signature of affiant)

Subscribed and sworn to me before this 29th day of July, 1991, at Miami, Florida.

(Signature)

(Signature of witness, if any)
The affidavit, like the memorandum and the question and answer statement, has advantages and disadvantages to its use. Prior to using an affidavit, the items listed below should be considered.

### Advantages and Disadvantages of an Affidavit

### Sworn Statement

A sworn statement is, in a general sense, a declaration of matters of fact. It may be prepared in any form and should be signed and dated by the person preparing it. A sworn statement has the same judicial bearing as an affidavit. The investigator taking the statement administers an oath prior to the witness signing the statement. The following is an example of an oath that can be administered:
Do you (name of person giving statement) solemnly swear that everything contained in this statement is true and correct.

Mechanical Recordings
A mechanical recording device may be used to record statements when a stenographer is not readily available—if all parties to the conversation consent. A recording device also may be used in conjunction with a stenographer, when necessary, again provided that all parties consent. When mechanical recording devices are used, the following guidelines are suggested:

- Identify, on tape, the individuals engaged in the conversation, any other persons present, and the time, date, and location.
- Immediately after the original has been made, make a copy of the tape for use in transcribing the conversation. If the recording was made during an undercover operation, seal and store the original after a transcribed copy has been made.
- Keep a written record of the tape's custodians and storage arrangements from the time it was recorded to the time it is submitted as evidence.
- When tape recordings are going to be used in taking a confession, advise the suspect of his or her rights and have the suspect state at the start of the tape recording that he or she is aware that a recording is being made.
- Off the record discussions between the investigator and the suspect should not be permitted during a recorded interview and should be kept to a minimum during a recorded interview with anyone else.

Form Letter
A form letter can be used to request information of a similar nature from several third parties. An example of a form letter is found on the next page.
Ms. Michelle Tallmadge
1111 B Street
Glynn, GA 31520

Dear Ms. Tallmadge,

This office is conducting an investigation concerning Rosemary Westbury for the years 1989, 1990, and 1991. Ms. Westbury is a corporate officer of Massey TB, Inc. She is also the trustee for Massey TB Trust. We have reviewed the bank records of Massey TB, Inc., and Massey TB Trust. We found several checks made payable to you. Please answer the questions below which relate to the checks we found. We have included copies of the checks for your review.

Should you have any questions, please call investigator Dennis S. Paul at the telephone number listed above.
1. Did you receive checks number 1521, 1571, 1681, 1952, 1991?

2. Did you endorse these checks?

3. Please explain why these checks were deposited into Massey TB Trust's bank account.

4. We would like to talk to you about these checks. Please call us, or provide your daytime telephone number so we can schedule an appointment.

Sincerely,

Dennis S. Paul
Grand Jury Transcript
A complete grand jury transcript will contain the questions, answers, and statements made by each participant before the grand jury. This transcript can be used as basis for a charge of perjury if the witness gives false information before the grand jury.

The Art of Interviewing

Through practice, an investigator can improve his or her interview skills. But, equally important is practicing the art of critical self-analysis when dealing with others. This starts by stripping away the prejudices and other self-imposed barriers to impartiality that surface when communicating with people. It continues by learning to converse in different styles of language. Interviewing a college graduate and a fifth grade drop-out require different communication skills. How something is said is just as important as what is said. Everyone communicates through speech patterns and non-spoken behavior patterns. Witnesses sense the presence of the investigator’s questions, not only with their ears, but by watching his or her gestures, making or avoiding eye contact, and feeling the stress in the room.

The interview process should flow naturally. The investigator should enter into the interview with general questions in mind. After the first question is asked, the investigator assumes a new role—the listener. Contingent upon what is heard the investigator leads the interview toward the next question and then listens. This asking and listening process, controlled by the investigator, continues until the objectives of the interview have been achieved.

A successful interviewer has empathy for others. No one likes the thought of appearing foolish. Many witnesses are actually victims of fraudulent actions committed against them by the subject of the investigation and are embarrassed about being victimized. For example, businesses victimized by insiders are often reluctant to let the public know that they were vulnerable to fraud. A business may have more than money at stake. It becomes a matter of confidence and prestige in the public or industry’s eye. An
investigator who can become sensitive to a witness’s situation quickly improves his or her interviewing techniques.

Summary

The goal of an investigator is to conduct each interview in such a manner as to gather all available information and documents pertaining to the investigation and then make a permanent record of each witness’s testimony for further reference.

The planning phase of the interview process is the foundation of an interview. Poor planning will have the same effect on an interview as a weak foundation has on a building. Proper planning enhances the probability of a successful interview. A successful interview can create a cooperative witness who can breathe life into financial records. It could also provide additional leads for the investigator to solve the case.

Once the investigator has decided on who, when, where, and how to interview the witness, the investigator should prepare a topical outline of the questions to be asked. Just as planning is the foundation of the interview process, the opening of an interview sets its tone. The body of the interview is the fact finding part of the process. The closing summarizes the key facts and provides an opportunity for the witness and the investigator to agree with the summation.

The medium used to record an interview should be reflective of the significance of the witness and the information and records provided by the witness.

Interviewing is a skill that can be developed and improved upon through practice. Few skills are as important to the financial investigator as the ability to talk to people and successfully gather information from them.
Questions and Exercises

Answer the following questions and then check your responses with those provided on pages at the back of the book.

1. How does an interview differ from an interrogation?

2. How do questions asked in a financial interview differ from those asked in other types of investigative interviews?

3. What are some things an investigator should consider when planning financial interviews during the course of an investigation?

4. Identify and describe the three methods of questioning that can be used in a financial interview.
5. Why is the introduction critical to a successful interview?

6. How can an investigator gain the cooperation of a hesitant witness?

7. Explain the following statement:
The interview process is more than just asking questions and writing down responses.

8. What is wrong with the following question?
He didn't have anyone with him when he came into the bank did he, but if he did, do you remember if the person was male or female and can you give a description of the person?
9. What is the last question an investigator should ask during an interview?

10. You are preparing to record an interview and you can’t decide which method of recordation to use. You are torn between the memorandum and the question and answer statement. Describe the pros and cons of each.

11. What advantages are there to having a witness compose and write his or her own affidavit?

CHAPTER 10

Investigative Techniques

In the previous chapter, we discussed how to plan and conduct a financial interview. The financial interview, if properly done, is a very valuable tool for the investigator. In this chapter, we will explore some other investigative techniques. We will begin with a discussion of the search warrant for financial records: what it is, how it differs from a “general” search warrant, and how one is issued to an investigator. We will then explore the undercover operation, surveillance, the use of informants, recovering information from trash, gathering information from a suspect’s mail, and retrieving evidence from a computer. We will look at how document examiners apply forensic science techniques to aid in investigations. The chapter concludes with an examination of a tool called “link analysis.”

After studying Chapter 10, you should be able to:

• State the importance of obtaining a valid search warrant.

• Describe the terms “probable cause” and “curtilage.”

• State the purpose of an affidavit.

• List and describe the types of information required in an affidavit for a search warrant for financial information.

• List the objectives of undercover operations.

• List the objectives of surveillance.

• Describe the different types of surveillance.

• Describe how informants contribute to an investigation.
• State why recovering evidence from a suspect’s trash, reading the covers of a suspect’s mail, and retrieving evidence from a computer are valuable investigative techniques.

• List and describe the types of analyses a document examiner can perform.

• Use link analysis to show relationships in an investigation.

Persons involved in criminal activities do not flaunt their indiscretions in the faces of law enforcement officers. They try to hide what they are doing. And some of the webs criminals weave are very complex. Because of this, investigators rely on certain investigative techniques to help them gather information concerning criminal activities. These techniques are discussed in this chapter.

The Search Warrant

Special Agent Wilson Taggart is working on a narcotics investigation where Tim Anthony is the prime suspect. Taggart receives an anonymous letter indicating that David Anthony, Tim’s father, recently paid cash for a new $23,000 car. Wondering if Tim provided his father with the money, Taggart decides to visit David Anthony. Taggart goes to Mr. Anthony’s house, identifies himself, and says he’d like to ask a few questions about Tim. Mr. Anthony lets him in. Taggart asks if it is alright for him to take a look around and, even though Mr. Anthony says no, Taggart acts as if he doesn’t hear. Taggart opens a briefcase that is sitting on a desk and finds that it contains $100,000. He asks Mr. Anthony where he got the money but Mr. Anthony just shrugs his shoulders. Then Taggart spies a checking account statement that indicates Mr. Anthony had a balance of $1,494 less than a month ago. Taggart wants to know if Mr. Anthony has other accounts, but, again, Mr. Anthony just shrugs his shoulders. “How did you get $23,000 to pay for a new car?” Taggart asks. “None of your business,” Mr. Anthony replies. “Now, get out of here.” When he leaves, Taggart takes
the briefcase full of money and the checking account statement with him.

The scenario presented above is fictitious, but suppose it really happened. Will Special Agent Taggart be able to use what he collected as evidence against Tim Anthony?

The answer is no. Taggart obtained the evidence without a valid search warrant. Mr. Anthony was under the assumption that Special Agent Taggart wanted to ask him a few questions about his son. When he invited Special Agent Taggart in, he had no reason to believe that the agent was going to search the house. The Fourth Amendment to the U.S. Constitution protects citizens against actions such as Special Agent Taggart’s. The amendment provides that the people have the right to be “...secure in their persons, houses, papers, and effects, against unreasonable searches and seizures...” If evidence is obtained by an unreasonable search and seizure, or in violation of the privileges guaranteed by the Fourth Amendment, the evidence will be excluded from trial. Investigators need to be aware of the importance of obtaining a valid search warrant. Otherwise, critical evidence will be ruled inadmissible.

What is a Search Warrant?
A search warrant is a written order issued by a judge or magistrate. It describes the place to be searched as well as the things to be seized. Search warrants are usually issued for the search of a premise, person, or vehicle. Generally, search warrants are issued based on evidence gathered by the investigator during the conduct of the investigation. This evidence must establish that a crime has been or will be committed.

A specialized form of search warrant is a search warrant for financial records. This specialized warrant directs a law enforcement officer to search for financial documents or records. If Company XYZ is a suspect in a kickback investigation, the investigators probably will not be interested in searching and seizing office equipment and personnel files. However, they will be interested in obtaining the company’s journals, ledgers, and other financial records. That’s what a search warrant for financial records will allow them to do.
A search warrant is usually prepared by the prosecuting attorney before it is submitted to a judge or magistrate. Search warrants are usually required to be executed during daytime hours on a given day and are executable within a 72 hour period. At the completion of the search, a detailed inventory of the items seized is prepared. A copy of the search warrant and the inventory are to be left at the place searched or with the person searched. The investigator will then return the warrant and the inventory to the judge or magistrate who authorized the warrant.

**Probable Cause**

A judge or magistrate will issue a search warrant only after a finding of probable cause. Probable cause is all the facts and circumstances within the knowledge of the investigator about a criminal activity that can be considered reasonable and trustworthy.

When developing probable cause, an investigator must keep the following two principles in mind:

- Probable cause must be current
- Probable cause must be reasonable and trustworthy to a degree sufficient to ensure that a reasonable person will believe that a crime has been or will be committed and that the evidence sought exists in the place to be searched

Probable cause may vary from investigation to investigation but only in matters of degree. It must be present and it must be sufficient to enable an impartial judicial officer to issue the warrant.

**The Affidavit**

Judges or magistrates issue search warrants and do so only after a finding of probable cause. To convince a judge or magistrate that probable cause exists, an investigator prepares a sworn statement called an affidavit. In affidavits, investigators summarize their expertise and the information gathered during their investigations. The investigator who prepares an affidavit is called the affiant.

An affidavit for a search warrant should contain certain types of information. Affidavits for “general” search warrants and
search warrants for financial records should contain the following types of information:

- Affiant’s experience
- Detailed account of the criminal activity
- Description of place(s) to be searched
- Financial evidence
- Items to be seized

An affidavit for a search warrant for financial records requires an additional type of information: conclusions based on the affiant’s expertise.

The following paragraphs describe the types of information to be included in a search warrant for financial records. An example of a statement reflecting the type of information is also provided.

**Affiant’s experience**
The affidavit should contain a sufficient amount of detail concerning the affiant’s experience, training, and investigative background.

I am a Special Agent with the IRS, Criminal Investigation Division, and have been so employed since March, 1977. I have conducted or assisted in over forty investigations of alleged criminal violations of IRS laws: of the distribution of drugs and controlled substances; and of money laundering. For the past 2½ years, I have held the position of Intelligence Analyst. I have been in charge of the Division’s High Level Drug Leaders Project, Project Narcotics Currency, and Project White Collar Currency. All of these projects analyze information relative to the flow of drug proceeds throughout the State of Wisconsin.

**Account of criminal activity**
The affiant must detail the illegal activity that has been uncovered during the investigation.

In January 1992, four FBI informants who have previously provided reliable information reported that Tom Trio was selling cocaine in the Milwaukee area. Two of the informants stated that Trio was selling cocaine out of his residence. One
informant reported that a friend of his had seen several trash bags of currency in Trio’s house.

Description of place(s) to be searched
The affiant must show that the defendant exercises dominion and control over the location(s) to be searched. To do this, the affiant can cite information contained in documentation such as telephone and utility records. The affiant can also point to surveillance findings as well as information secured through interviews from third parties.

The Milwaukee City Phone Directory lists Tom Trio’s address as 102 North West Street, Milwaukee, Wisconsin.

Financial evidence
The affidavit should document major asset purchases and expenditures made by the defendant. It should describe any acts of deceit or fraudulent schemes uncovered, such as the use of aliases or the existence of any money laundering activities. Tax information, if available, should be presented as financial evidence. Generally, a court order is needed before tax returns can be released to non-IRS law enforcement personnel because of confidentiality laws. However, tax returns can be obtained from non-IRS sources such as an ex-spouse, bookkeeper, accountant or return preparer, or loan documents.

Federal income tax records reveal that Tom Trio has reported a total income of $54,000 during the past two years.

Items to be searched/seized
An itemized list of specific property (documents and evidence) to be searched for and seized must be attached to the affidavit.

Search the residence located at 102 North West Street, Milwaukee, Wisconsin and the 1990 Mercedes with VIN number G1AB2323 for:

U.S. currency
Cocaine
Books, records, receipts, notes, ledgers, and other papers relating to the transportation, ordering, sale, and distribution of cocaine
Conclusions based on the affiant’s expertise

As previously indicated, what distinguishes the affidavit for a search warrant for financial records from the affidavit for a “general” search warrant is the reliance on the affiant’s expertise to establish that records and other evidence will be at specific locations.

Based upon my training and experience, and my participation in other investigations involving the distribution of cocaine, I know that:

1. Drug traffickers must maintain, on hand, large amounts of U.S. currency to maintain and finance their ongoing narcotics business

2. Drug traffickers maintain books, records, receipts, notes, ledgers, and other papers relating to the transportation, ordering, sale, and distribution of controlled substances

A sample affidavit for a search warrant for financial records is shown on pages 270 through 272. Page 273 contains the search warrant issued as a result of the affidavit.
AFFIDAVIT

STATE OF WISCONSIN

MILWAUKEE COUNTY

John Smith, being first duly sworn on oath, here deposes and says:

1. I am a Special Agent with the IRS, Criminal Investigation Division, and have been so employed since March, 1977. I have conducted or assisted in over forty investigations of alleged criminal violations of IRS laws: of the distribution of drugs and controlled substances: and of money laundering. For the past 2 1/2 years, I have held the position of Intelligence Analyst. I have been in charge of the Division’s High Level Drug Leaders Project. Project Narcotics Currency. and Project White Collar Currency. All of these projects analyze information relative to the flow of drug proceeds throughout the State of Wisconsin.

2. I have attended and instructed in-service training seminars which concentrated on currency reporting statutes (Title 31, U.S.C.). money laundering statutes (Title 18. U.S.C. §§ 1956, 1957) and drug statues (Title 21. U.S.C. §§ 848, 851, 881). I have conducted net worth and expenditure investigations and I have planned, drafted and executed both financial and traditional search warrants. I have been qualified in the U.S. District Court as an expert in financial and money laundering investigations.

3. As part of my duties, I am involved in the investigation of Tom Trio for cocaine trafficking in violation of Title 21 of the United States Code. Special agents from the Federal Bureau of Investigation and the Drug Enforcement Administration and officers from the City of Milwaukee Police Department have participated in this investigation. The information in this affidavit comes from my own personal investigation and observation, or from the information provided to me by personnel of these other agencies.

4. In January 1992, four FBI informants who have previously provided reliable information stated that Tom Trio was selling cocaine in the Milwaukee area. Two of the informants stated that Trio was selling cocaine out of his residence. One informant reported that a friend of his had seen several trash bags of currency in Trio’s house.

5. The Milwaukee City Phone Directory lists Tom Trio’s address as 102 North West Street. Milwaukee, Wisconsin.

6. Real Estate records at the County Courthouse in Milwaukee, Wisconsin show that on August 12, 1991. Tom Trio purchased the residence at 102 North West Street from John Jakes for $64,000. No mortgage documents have been located for the property.

7. In an interview with John Jakes, he stated that Trio attempted to pay cash at the time of settlement. Jakes refused to accept payment in cash and Trio subsequently provided him with eight $8,000 cashier’s checks.

8. Tom Trio is employed by Penders and Associates, Inc. This is his only place of employment.
9. Local income tax records reveal that Tom Trio has reported a total income of $54,000 during the past two years.

10. On February 6, 1992, I collected and went through the trash left for garbage collection at 102 North West Street. The garbage included bills addressed to Tom Trio of that address, M & I Bank envelopes, 12 money wrappers marked for $2,000 each, and the title to a 1990 Mercedes with VIN number G1AB2323. The garbage also contained freezer paper cut into small squares. Special Agent Thomas Gore of the Drug Enforcement Administration told me that such paper is commonly used to wrap 1 ounce quantities of cocaine. The garbage also included three large plastic garbage bags that contained fiber glass cartons. Special Agent Gore told me that cartons of that size and type commonly contain kilograms of cocaine. The inside of the packages had powdery residue which Special Agent Gore tested for the presence of cocaine. The test was positive.

11. Documentation from the dealership where Tom Trio bought the 1990 Mercedes shows that he paid $27,000 in cash for the car.

12. Between February 16 and February 24, 1992, one of the previously mentioned informants purchased cocaine from Tom Trio three times. Each buy was a controlled buy. All three buys took place at Trio’s house. Each time, the substance purchased was tested for the presence of cocaine. Each time, the substance tested positive.

13. Based upon my training and experience, and my participation in other investigations involving the distribution of cocaine, I know that:
   a. drug traffickers must maintain, on hand, large amounts of U.S. currency to maintain and finance their ongoing narcotics business;
   b. drug traffickers maintain books, records, receipts, notes, ledgers, and other papers relating to the transportation, ordering, sale, and distribution of controlled substances;
   c. the aforementioned books, records, receipts, notes, ledgers, etc., are commonly maintained where drug traffickers have ready access to them, i.e., homes, offices, automobiles;
   d. it is common for drug traffickers to hide contraband, proceeds from drug sales, and records of drug transactions in secure locations for ready access;
   e. cocaine traffickers usually keep paraphernalia for packaging, cutting, weighing, and distributing cocaine;
   f. the courts have recognized that unexplained wealth is probative evidence of crimes motivated by greed, particularly trafficking in controlled substances.

14. Based on the information contained herein, and my experience and training, I have probable cause to believe that Tom Trio is involved in cocaine trafficking in violation of Title 21 U.S.C. § 881 (B). The locations to be searched and property to be seized are included on the attachment to this affidavit.

John Smith
Special Agent
Attachment

Search the residence located at 102 North West Street, Milwaukee, Wisconsin and the 1990 Mercedes with VIN number G1AB2323 for:

- U.S. currency
- Cocaine
- Drug paraphernalia for packaging, cutting, weighing, and distributing cocaine, including, but not limited to, scales, freezer paper, and spoons
- Books, records, receipts, notes, ledgers, and other papers relating to the transportation, ordering, sale, and distribution of cocaine
- Books, records, receipts, bank statements and records, money drafts, letters of credit, passbooks, bank checks, and other items evidencing the obtaining, secreting, transfer, and concealment of assets and the obtaining, secreting, transfer, concealment, and expenditure of money
- Income tax returns
UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF WISCONSIN
AT LAW AND IN ADMIRALTY

UNITED STATES OF AMERICA,

Plaintiff.

vs.

Warrant No. 1

Thomas Trio

TO: ANY DEPUTY UNITED STATES MARSHAL OR OTHER FEDERAL OFFICER

An affidavit has been made before me by Special Agent John Smith of the United States Internal Revenue Service that he has reason to believe that Tom Trio of 102 North West Street, Milwaukee, Wisconsin is involved in cocaine trafficking in violation of Title 21 U.S.C. § 881 (B). Special Agent Smith’s affidavit further states that he has reason to believe that evidence needed to support such a claim is located at the residence of 102 North West Street. I am satisfied that there are sufficient facts and circumstances to support the probable cause standard to believe that the items listed on the attachment to this warrant are currently located at 102 North West Street in Milwaukee, Wisconsin, and that grounds exist for the issuance of this seizure warrant as stated in the supporting Affidavit.

YOU ARE HEREBY COMMANDED to proceed to 102 North West Street to seize the items listed or described on the attachment to this warrant within a period of three days, serving this warrant and seizing this property during daytime hours 8:00 a.m. to 5:00 p.m., leaving a copy of this warrant, preparing a written inventory of all the property seized, and promptly returning this warrant and bringing the inventory before this court as required by law within ten days after seizure.

Dated at Milwaukee, Wisconsin, this 2 day of March, 1992.

Alice Miller
United States Magistrate

**Undercover Operations**

Operation ABSCAM was an investigation into corruption among U.S. government officials. Over the course of a year and a half, FBI undercover agents approached public officials thought to be involved in political corruption and told them that oil-rich Arab sheiks would offer money in exchange for political favors. The agents met with the public figures and paid out considerable sums in cash. Several public officials were indicted and convicted.

In August 1989, 46 traders from the Chicago Mercantile Exchange and the Chicago Board of Trade were indicted on charges ranging from defrauding customers to tax evasion to racketeering. The charges were the result of a two-year undercover operation that put wired FBI undercover agents in the trading pits at the two exchanges.

In March 1991, law enforcement agents raided three University of Virginia fraternity houses and arrested 12 students for selling drugs to undercover agents. The raids came after more than six months of investigation by federal and state officials. The investigation involved undercover purchases of designer drugs, LSD, cocaine, and marijuana.

**What is an Undercover Operation?**

The undercover operation is something we hear about all the time. In an *undercover operation*, law enforcement officers or private individuals assume an identity other than their own for the purpose of gathering information relating to criminal violations.

Undercover operations require the highest degree of skill and planning to be successful. Used in a timely manner and with great care, the undercover operation can bring results to investigations that cannot be achieved in any other way. Used in the wrong way or handled poorly, these operations can lead to death, injury, serious financial liability, and agency embarrassment.

An undercover operation is frequently the only investigative technique that can be used effectively against well-organized criminal groups or sophisticated criminal activities. Through the use of disguise and deceit, information is gathered directly from those involved in the criminal offense. Take, for example, the undercover activities of Joe Pistone. Pistone was an undercover
agent who infiltrated the Bonnano and Columbo crime families, posing for five years (1976-1981) as jewel thief Donnie Brasco. Pistone was instrumental in gaining more than 100 federal convictions against organized crime members.²

Undercover activities can last a long or short period of time. As was just indicated, Joe Pistone was undercover for five years. The length of the undercover operation is contingent on the amount of information necessary to develop a picture of the alleged criminal activity. Situations involving organized crime figures and sophisticated financial crime networks dictate lengthy undercover operations.

At the other extreme are short-term undercover operations called stings. The previously described drug raid at the University of Virginia is an example of a sting operation.

**Objectives of Undercover Operations**

Undercover operations are accepted by the courts as a legitimate function of public and private law enforcement personnel, provided that the undercover operation is conducted in those situations where sufficient probable cause exists to believe that a crime has been or is being committed. Entrapment issues make it essential to establish that the suspect has a pre-disposition or prior intent to commit the crime. The only factor the government provides is the opportunity for the suspect to commit the offense.

The courts will not allow covert operations to be conducted as law enforcement “fishing expeditions.” Undercover operations should be based on a written plan that details time frames and specific objectives. Specific objectives of an undercover operation may include:³

- Observing and attending planning sessions for future violations
- Identifying unknown violators and developing information related to violations currently in process
- Purchasing contraband (i.e., drugs, firearms, counterfeit currency)
- Identifying the fruits of a crime (illegal proceeds and profits)
• Developing information related to past crimes or criminal activities
• Locating contraband or weapons
• Locating violation sites
• Identifying co-conspirators and/or key witnesses
• Obtaining probable cause for search and arrest warrants
• Checking the reliability of informants
• Corroborating a witness' statements and testimony
• Gathering information and documents relative to the criminal investigation
• Obtaining information and leads to purchases and expenditures

Surveillance

Jonathan J. Pollard was a civilian analyst for the U.S. Naval Intelligence Center in Suitland, Maryland. In November 1985, Pollard’s supervisor, Jerry Agee, began suspecting that Pollard was taking classified documents from his workplace and providing them to a foreign government. Agee shared his suspicions with a senior naval intelligence officer. The Naval Investigative Service and the FBI agreed to investigate. As the investigation progressed, the agents determined that Pollard was providing classified information to a foreign government. They just did not know which one.

Eventually the investigators discovered that Pollard was providing the classified information to Israel. How did they determine this? They placed a round-the-clock surveillance on Pollard.

On November 21, 1985, Pollard and his wife decided to make a run for it even though they knew that were going to be followed. Pollard felt sure he could shake the surveillance as he and his
wife drove in circles around Washington, DC. Several unmarked FBI cars were involved in the surveillance—one car would pick up the tail then drop it when another car became involved. Would the Pollards lead them to the foreign government involved in the espionage ring? Yes. The Pollards revealed the government they were providing classified information to when they pulled up to the Israeli embassy.

What is Surveillance?

Surveillance is the secretive and continuous observation of persons, places and things to obtain information concerning the identity and activity of individuals suspected of violating criminal laws. Like undercover operations, surveillance provides a means to obtain information and evidence which probably would not be available by any other means. It is a technique that requires experience, teamwork, and knowledge of the “thing” to be surveilled.

Private citizens who form neighborhood watch groups use surveillance to gather information. So do private companies that employ security cameras. Countries use intelligence agencies to set up surveillance operations that are a matter of national security. Even criminals perform surveillance on their suspects before committing crimes.

Objectives of Surveillance

The objectives of a surveillance are to:

- Obtain evidence of a crime
- Obtain probable cause for search and arrest warrants
- Identify co-conspirators and associates of the suspects
- Apprehend violators during the commission of a crime
- Develop investigative leads
- Provide protection and corroboration for undercover officers
- Locate persons and things
- Gather intelligence
Types of Surveillance

Various types of surveillance activities are utilized by law enforcement. They can be classified as follows:

- Stationary
- Moving
- Electronic

Stationary

Stationary surveillance is where neither the suspect or the agent maintaining the surveillance are mobile. Sitting in an unmarked car and watching someone's home or office is an example of stationary surveillance. A common term for stationary surveillance is **stakeout**. The surveillance on Jonathan Pollard began as a stakeout. But when Pollard and his wife decided to make a run for it, the surveillance requirements changed. A moving surveillance was needed.

Moving

A moving surveillance is one where the suspect does not remain in one position. Following a suspect in an automobile is an example of a moving surveillance. Following a suspect on foot or in a boat, or watching a car from an airplane also would be considered moving surveillances.

The risk of detection is higher in a moving surveillance than it is in a stakeout. Also, a moving surveillance consumes significantly more manpower. In the instance of following an automobile, a minimum of three cars with radio contact would be necessary. In most investigative situations, surveillance techniques mandate that it is better to lose the suspect than compromise the surveillance.

Electronic

The FBI agents who went undercover as traders in the pits at the Chicago Mercantile Exchange and the Chicago Board of Trade secretly tape recorded hundreds of incriminating conversations.

To make sure they would not lose touch with the Pollards during a moving surveillance, the FBI planted an electronic tracking device inside the bumper of the Pollard's car.
In each of the incidents above, electronic devices were used to assist law enforcement officers in obtaining evidence against their suspects. Used in a secretive manner, electronic surveillance can be of tremendous assistance to an investigation, but it must be used with care. Some devices available for use may require court orders.

In the trading pit incident, at least one of the people involved in the taped conversations knew the conversations were being recorded. This is called consensual monitoring. At the federal level, such monitorings are Constitutional and statutorily permissible; however, this investigative technique is subject to careful regulation in order to avoid any abuse or any unwarranted invasion of privacy. At the state level, some states have made consensual monitoring illegal. Therefore, it is important for an investigator to know the legal precedents in the state where an investigation occurs.

Today’s sophisticated electronic monitoring devices can be concealed in virtually anything. Briefcases, light fixtures, and jogging suits can be used to conceal microphones and tape recording devices. Pen registers (telephone number recording devices) can be activated by the change in voltage and used to record the numbers dialed on outgoing calls. Other electronic devices can make a record of the incoming telephone calls to a suspect’s number.

Informants

Larry Bullock was an Illinois State Representative who dreamed of becoming Chicago’s first black mayor. His district encompassed McCormick Place Exposition Hall, a place that would play an active role in the 1992 World’s Fair if Chicago was selected as the host city.

By law, a certain percentage of all public construction projects had to be awarded to minority business enterprises (MBE). Eugene Blackmon was an MBE general contractor and he was experiencing difficulty in getting his money from another general contractor to pay his sub-contractors. Blackmon approached Bullock to enlist his aid in securing his money. Bullock said he
could help - for a price! Bullock also promised Blackmon that he would play a prominent role in the awarding of the World’s Fair contracts.

Blackmon did not have the money to pay Bullock. But he was desperate to get his money, so one Friday afternoon he went to the Office of the U.S. Attorney and told them about his encounter with Bullock. The government and Blackmon reached an agreement where Blackmon would become an informant and would meet with Bullock to discuss fixing contracts and other matters in political corruption. In return, the government would give Blackmon money to “pay” Bullock so that his contract money would be released.

Over the next few weeks, Blackmon had a series of meetings with Bullock and paid him thousands of dollars of FBI money. Blackmon wore a concealed recording device to the first meeting but something went wrong with the equipment and, instead of recorded conversations, all the FBI got was a mess of spaghetti tape because the tape had come off the spool. At all subsequent meetings, Blackmon wore a recording device and had a transmitting device concealed in his briefcase.

Toward the end of the investigation, Bullock and his attorney were invited to the U.S. Attorney’s Office and were treated to selected portions of the recorded conversations. The government offered Bullock the opportunity to cooperate with them in investigating political corruption. Bullock refuses, choosing rather to go to trial. After a long trial, during which Blackmon spent a week on the stand testifying, Bullock was found guilty of a multitude of offenses. He was sentenced to six years in prison.

What is an Informant?

In the case described above, it is important to note that the role of the informant was crucial in carrying out the investigation. An informant is a person who has specific knowledge of a criminal event and provides that information to a law enforcement officer.

The development of an informant to provide confidential information is a legitimate function of investigators. If properly developed, informants can greatly enhance an investigation.

Many criminal cases have originated from informant information.
tion. Others have been successfully completed only because an informant supplied information that would have otherwise been unknown. Take, for example, the case against Al Capone. Capone was one of the United States’ most notorious gangsters. You’d think that when he eventually went to prison he would have gone for murder or racketeering. No, Al Capone was brought down by a mild-mannered tax investigator from the IRS. This investigator was able to build a case against Capone when one of Capone’s associates told IRS agents where they could seize books reflecting Capone’s income.  

Perhaps the most common reason informants supply information is because they themselves are involved in the criminal offense and by furnishing information on the suspect they can diffuse suspicion from their own activities. Particularly when looking at jail time, individuals are willing to become informants in order to get a reduced sentence based on their cooperation.

Many informants are motivated by revenge. They sense that they’ve been wronged or taken advantage of by the suspect and want to get even. For example, in the case of drug dealing, an informant may furnish information on the suspect because the suspect is a “business” competitor. Other informants feel a social responsibility to provide law enforcement their knowledge of any criminal wrongdoing. It is critical that the investigator be able to determine why the informant is cooperating and to use that information to properly assess how the informant and information provided should be handled.

Informants can be used in surveillances, consensual monitorings, and as participants in undercover operations. Control is a key element in dealing with an informant. Informants should take directions from the investigator, not the other way around. Without control, not only is the investigation in jeopardy, but the investigator could be at risk. If informants are willing to violate a basic tenet of our culture and inform on someone close to them, consider how quickly they would be willing to blackmail agents if they can discover some wrongdoing.

Informants can be powerful tools in a financial investigation. However, all informant information should be corroborated through independent verification to ensure it’s accuracy.
Evidence Recovered from Trash

An informant tells an investigator that Billy Greenwood is dealing drugs. The investigator watches Greenwood’s home and observes a number of cars making brief nighttime stops at the house. Based on the informant’s information and the surveillance, the investigator asks the garbage collector for the plastic garbage bags in front of Greenwood’s house. While sifting through the garbage, the police uncover drug-related paraphernalia, straws containing cocaine residue, and phone bills listing calls to people with drug records. Based on this evidence, the investigators obtain a warrant to search the house and find cocaine and hashish. They arrest Greenwood. Can the evidence the investigators collected from the trash be used against Greenwood at trial?

Yes. In May 1988, the Supreme Court ruled that police may freely rummage through ordinary household trash left at a curbside without obtaining a search warrant.” This decision evolved from the incident described above.

Investigators often find that picking up a suspect’s garbage is a useful tool for identifying leads. People often dispose of important documents and information pertaining to their criminal activities when they throw out their trash. Once the trash leaves the suspect’s possession, they no longer have a reasonable expectation of privacy in the contents of their trash. However, the investigator must be careful not to violate the suspect’s curtilage. Curtilage usually, but not always, refers to the area inside the boundary of a person’s residence or business location, which has been marked off by any number of man-made or naturally occurring devices. These boundary lines include fences, sidewalks, tree lines, and rows of shrubbery. Inside this area, a person has a reasonable expectation of privacy based on the Fourth Amendment to the Constitution.
Reading Mail Covers

Since letters, packages, and other documents travel through the U.S. and other mail delivery services, a person cannot attach a reasonable expectation of privacy to the outside of the mail itself. Therefore, an investigator, in conjunction with the U.S. Postal Service, can make a record of the outside of any mail. Return addresses and postmark information can provide an excellent source of financial leads (i.e. names of banks, credit card companies, etc).

Forensic Science

Timothy Wilson Spencer was suspected of murdering a number of women in Richmond and Arlington, Virginia. Police had reason to suspect Spencer but had no confession, no witnesses, and a limited amount of physical evidence. Then it was found that Spencer's DNA perfectly matched that from semen found at three of the murder scenes. The likelihood that someone else could have produced all three matching patterns was 1 in 135 million. Subsequently, Spencer was found guilty on four counts of murder and sentenced to death.

Genetic fingerprinting played a crucial role in the case against Spencer. Genetic fingerprinting is a technique used in forensic science. Forensic science is the application of scientific techniques to legal matters, in particular to investigations of criminal activities. The forensic sciences have been utilized in the investigation of violent crimes for centuries. Traditional techniques such as fingerprint identification, ballistics classifications, and drug, blood, and urine analyses have served the purposes of law enforcement successfully in the past.

Not all criminal cases evolve around forensic evidence like fingerprint identification and ballistics classification. Sometimes evidence comes from the forensic analysis of documents involved in the crime. Take, for example, the Lindbergh kidnapping case. On March 1, 1932, 20-month old Charles A. Lindbergh, Jr. was
kidnapped. A ransom note left at the scene of the crime read:

Have fifty thousand dollars ready, 25,000 in twenty-dollar bills 15,000 in ten-dollar bills, and 10,000 in five-dollar bills. In 4-5 days we will inform you where to deliver the money. We warn you for making anything public or for notify the police. The child is in gut care. Indication for all letter are signature and three holes.

On May 12, 1932 the child’s body was found in some woods a few miles from the Lindbergh mansion. It wasn’t until September, 1935 that a person was charged with the kidnapping and murder of the Lindbergh baby. On January 2, 1935 Bruno Richard Hauptmann went to trial. Since the ransom note was a key piece of evidence, the prosecution needed to show that Hauptmann wrote the note. They obtained other samples of his handwriting and compared them to the ransom note. Handwriting experts took the stand and stated that Hauptmann’s handwriting and that of the ransom note were one and the same. This crucial testimony helped convict Hauptmann.

What is a Questioned Document?

Since the end product of financial investigation is documentary evidence, scientific examination of documents by a qualified expert can be an important aspect of the investigation. Besides verifying a person’s handwriting, a document examiner can analyze checks, kidnapping and hold-up notes, hate letters, wills, contracts, birth/death/marriage certificates, passports or any other document to determine if they have been forged, erased, or changed in any way.

Document examiners are called into an investigation when a questioned document is involved. A questioned document is a document that has been questioned in whole or in part with respect to its authenticity, origin, or contents. For example, a suspect denies that she signed a check used to make a bribe payment. Or Cousin Jane accuses Cousin Larry of altering Uncle Charlie’s will so that Larry receives the bulk of Charlie’s estate.
Types of Forensic Analyses

Document examiners can perform many types of analyses on a document. The following types of forensic analyses are discussed in this section:

- Handwriting analysis
- Typewriter analysis
- Alteration analysis
- Ink analysis
- Paper analysis
- Document restoration

Handwriting Analysis

Over the years, an individual’s brain, arms, and fingers create a pattern of handwriting. Everyone’s handwriting possesses “normal” or “natural” variations. But the basic pattern does not change. When analyzing handwriting, the document examiner has the suspect submit an exemplar, a sample to be used in comparison to the questioned document. The document examiner determines the range of variation in a person’s handwriting from the exemplar and compares that handwriting to the questioned document. The document examiner can determine if the writing on the questioned document falls within the individual’s “normal” or “natural” range.

Typewriting Analysis

Every typewriter is unique. Each one types differently from every other one because typewriters develop individual characteristics during the manufacturing process and through use. Examiners attempt to determine a document’s type style and escapement (pica, elite, or proportional) to establish the make and model of the typewriter that created it. Also, the examiner attempts to find horizontal and vertical misalignment of characters, which if significant, is considered to be an identifying characteristic. Examiners also search for any typeface defects or damaged letters.
Alteration Analysis

Document examiners can determine if a document has been altered. They look for additions (inserts between lines, addition of a word, sentence, or paragraph to a document) and deletions (erasures or obliterations). Utilizing infrared and ultraviolet viewing techniques and photography, alterations unseen by the naked eye become apparent. By looking through a microscope, a document examiner can determine if information was erased by determining if paper fibers were disturbed due to abrasive action.

Sophisticated chemical deletions such as white-out obliterations or ink over-writes can be examined through infrared reflectants.

Interlineation, the addition of a word, sentence or an entire paragraph to a document can be detected because it is nearly impossible to perfectly realign paper in a typewriter once a document has been removed. The examiner can detect the misalignment of the added information by the use of typewriting test plates.

Ink Analysis

The ink on a questioned document can be examined through the use of scientific techniques. One ink can be differentiated from another by microscopy, infrared reflectants, transmission, fluorescence, and thin layer spectro-chromatography. Inks are identified and dated by their chemical properties. Even pencil writing can be dated within 50 years based on carbon methods.

Paper Analysis

Paper can be identified by characteristics such as dimensions, texture, thickness, color and opacity. Higher grades of paper have watermarks that identify both the brand of paper and its manufacturer. Some papers are coded by the manufacturer to show the year of make.

Document Restoration

It is possible to restore a document that has been torn, mutilated, or even burned. Through scientific processing, some documents that have been partially destroyed can be pieced together and used for investigative purposes.

In this age of desktop publishing, a new type of forgery has
come about - desktop forgery. With a scanner, computer, and laser printer, desktop forgers can re-create almost anything: checks, invoices, etc. While some of the forensic analysis techniques described above can be applied to desktop forgery, new techniques will evolve.

Evidence Recovered from Computers

Recent law enforcement reports suggest that - just as legitimate business managers have found computers indispensable in conducting business - organized criminals, drug dealers, and even child pornographers increasingly depend on computer transactions. "The computer is a powerful tool in today's business society, providing access to many services and programs. Computers also can provide evidence of criminal activity. A computer could contain a drug dealer's database, the daily operations of a prostitution ring, or a pornographer's mailing list. Physical evidence including handwritten notes, printouts, manuals, sales invoices, photographs, and fingerprints may also be found in the area of the computer.

Link Analysis

Link analysis is a technique for evaluating, integrating, and presenting complex information by taking bits of information collected from various sources and putting them together to show patterns and meanings. It provides a graphic picture of associations and relationships among various of persons and organizations. Link analysis is ideally suited for showing the associations among identifiers such as:

- Telephone numbers
- Vehicle license plates
- Aircraft/boat/vehicle registration numbers
- Property ownership
- Financial transactions

For the investigator, link analysis converts written information into a graphic summary called an association matrix. The association matrix is converted into a link diagram which graphically depicts relationships among people, organizations, and activities. Look at how an association simplifies the following relationships:

Smith is the vice president of the ABC Corporation and President of DEF Corporation, a subsidiary of ABC. DEF is a general partner in two limited partnerships. Jones and Green are limited partners in the first partnership, Brown and Black are limited partners in the second partnership. Black is also a general partner in a third partnership. Smith may have an interest in the first partnership.
Link networking can also be used to identify the direction and frequency of telephone traffic between suspect parties. The numbers inside the small circles indicate the number of calls made to particular telephone numbers.

Link networking offers the investigator the ability to simplify and synthesize the relationships and suspected relationships of people in organizations involved in a criminal activity. This technique can be used to present material during the investigative process or at any legal proceedings that may occur subsequent to the investigation.
An investigator’s success or failure is often determined by the investigative techniques used. “Proving a financial crime” requires evidence of guilt beyond a reasonable doubt. This often can be achieved only through the use of specialized techniques. With the continuing growth and sophistication of financial crimes, knowing what investigative means are available and how to apply them is the trademark of a successful financial investigator.
Questions and Exercises

Answer the following questions then check your responses with those provided at the back of the book.

1. Why is it important that an investigator obtain a search warrant prior to searching a suspect’s residence or place of business?

2. What is probable cause and how does an investigator show that probable cause exists?

3. What six types of information should be included in an affidavit for a search warrant for financial information? After you have listed the six, place an * beside the type of information that is not required in an affidavit for a “general” search warrant.

a.

b.

c.

d.

*
4. You are developing an affidavit for a search warrant for financial information. You are trying to obtain a warrant to search John Winkler's residence at 34 Tremont Avenue. Winkler is an accounting clerk suspected of embezzling money from the company he works for. In your affidavit, you include the following statement:

While going through the trash left for garbage collection at 34 Tremont Avenue, I found an electric and phone bill addressed to John Winkler of that address. I also found a bill from Haggler's Electronic Store indicating that Winkler recently bought $2,435 worth of stereo and video recording equipment.

How does the statement support your quest for a search warrant?

5. During the execution of a search warrant, a typewritten contract between the suspect, Toni Tuesday, and Frank Friday is seized. Mr. Friday claims that the contract is a fake, that it is not the contract his office created. What could a document examiner contribute to the investigation?
6. The University of Muckraker's basketball team is under investigation for its suspected involvement with professional gamblers in a point-shaving scandal. You have been tasked with going undercover as one of the team's tutors. What do you suppose are some of the objectives of this undercover operation?

7. During your undercover activities at the University of Muckraker, you discover the following:

- Sam Roundball and Terry Rebound are the starting forwards for the basketball team. They are also roommates and live in a fraternity house off campus.

- Roundball's uncle, Joe Bench, served time in prison. Bench shared a cell with Jack Dice. Dice was convicted of running an illegal gambling operation.

- Dice is a season ticket holder for University of Muckraker basketball games. Dice's son, Kurt, attends the university. Kurt Dice lives in the same fraternity house as Sam Roundball and Terry Rebound.

- Jack and Kurt Dice often attend University of Muckraker basketball games together.

Develop an association matrix that depicts the relationships described above.

8. How might an informant contribute to your investigation of the University of Muckraker's basketball team?

Money Laundering and Forfeitures

Way back in Chapter 1, we described money laundering as “the investment or transfer of money from racketeering, drug transactions, and other illegal sources into legitimate channels so that its original source cannot be traced.” This chapter identifies methods used to launder funds and techniques for detecting laundering schemes. Additionally, the specific laws used in prosecuting money laundering crimes are detailed. The evidentiary requirements for successfully imposing forfeitures are also discussed in this chapter. Forfeiture actions are a means to take the profit out of criminal activity. The knowledge and expertise of the financial investigator is particularly suited to dealing with the crime of money laundering.

After studying Chapter 11, you should be able to:

- Distinguish between the two types of transaction systems.
- Describe three methods of moving money from the cash transaction system to the business transaction system.
- Identify methods used to move money into and out of the United States.
- Identify characteristics of businesses used as money laundering fronts.
- Identify and interpret money laundering and forfeiture statutes.
- Distinguish between civil and criminal forfeitures.
The illicit drug business is reportedly making $300 billion a year in the underground economy. This is more than the Gross National Product of the Netherlands. Traditional drug interdiction methods haven’t been effective—-the emphasis has now switched to hitting drug dealers where it really hurts: in the wallet.

- Describe the factors that assist an investigator in establishing probable cause for a forfeiture proceeding.

In 1989, it was reported that “the international trade in illicit drugs may now be worth $300 billion a year. Most of that cash must be laundered before it can be spent or invested. In the past, narco-cops have spent most of their time, resources, and energy trying to seize illicit drugs and arrest drug traffickers, many of whom were minor miscreants. Now the attention has switched to tracing flows of dirty money, arresting launderers, and confiscating the assets of traffickers.”

Even though the preceding quote focuses on drug trafficking and money laundering, it pretty much sums up what this textbook is all about. In Chapter 1, you read that an overwhelming majority of crimes committed in America today are motivated by money and that many of these crimes cannot be solved solely by the use of traditional investigative techniques. In fact, not only are new investigative techniques required, a whole new approach to investigation is needed - a financial approach. The quote above confirms all of this. Investigations are now being geared to the financial aspect of the crime.

This chapter deals with the crime of money laundering. The term “money laundering” typically invokes the thought of money being transported to a foreign country and, through some vague method, being “cleaned up.” This clean cash is then somehow secretly transported back to the United States for use by narcotics traffickers. The truth is, money laundering can occur on any street corner or in any bank; may not involve currency; and does not exclusively relate to narcotics trafficking. The growth of this crime poses a major challenge to law enforcement because money laundering takes place in the majority of financial crimes committed in America.

In a report issued by the Presidential Commission on Organized Crime, money laundering was defined as “the process by which one conceals the existence, illegal source, or illegal application of income and then disguises that income to make it appear legitimate.” The financial criminal has a need to manipulate the proceeds generated from a crime so that he or she can use them for personal benefit. Both the embezzling bank teller and
the top echelon narcotics trafficker need to be able to spend their illegal gains. And they want to achieve their goal without being detected by law enforcement. They must launder their money.

Transaction Systems

Everyone conducts financial transactions. Activities such as buying groceries, paying bills, carrying on a business, and conducting an illegal activity all involve financial transactions. These transactions are conducted either by a cash system or by what can be referred to as a business system. The cash transaction system is a method of conducting all financial transactions exclusively through the use of currency. The business transaction system is a method of conducting transactions that generates a trail of financial records (i.e., checks, receipts, invoices, deeds, etc.). The resultant records summarize the financial activity by reflecting specific sources, destinations, participants, and dates.

For the financial criminal there are advantages and disadvantages to both systems. The table on the next page lists the advantages and disadvantages of both transaction systems.

If it was feasible to remain entirely within one system, particularly the cash system, criminals would be afforded strong protection from law enforcement's detection and scrutiny. However, motivations exist for financial criminals to carry out some of their activities in both systems, and virtually all move from one system to the other. From an investigative viewpoint, the movement between systems is often where the criminal is most vulnerable.

Use Of A Legitimate Business
Legitimate businesses are often used to move money from the cash system into the business transaction system. The proceeds from an illegal activity can be laundered through a legitimate business by one or more of the following means:

• Overstatement of legitimate revenue
• Overstatement of legitimate expenses
• Deposits of currency

Let’s look at how Stage One Records and Videos moves money between the cash and business transaction systems. We’ll also introduce some investigative strategies that can be used to detect money laundering.

Stage One Records and Videos is located in a small metropolitan shopping mall. The bulk of its business activity is the sale of records, tapes, and compact discs. A smaller portion of business revenue is generated from the rental of video tapes. The owner, Greg November, a local narcotics dealer, works part-time in the store and has four full-time employees who are not aware of his drug activity. November’s wife, who is aware of the illegal activity, maintains the business’s books and records. Customers are encouraged to pay cash for purchases, and when they do, they receive a 15% discount.

Overstatement of Legitimate Revenue
With this method of money laundering, illegal proceeds are added into the sales records of a legitimate business. Greg November employs this scheme at Stage One by doing the following three things:

• **Falsifying invoices.** November has his staff compute the 15% cash discount on purchases at the check-out line but has
them show the full price on the sales invoice—"for bookkeeping purposes." For 1992, total legitimate cash sales as recorded on invoices amounted to $300,000. The 15% cash discount reduced actual cash receipts by $45,000, for net cash receipts of $255,000. Now November can deposit $45,000 of drug proceeds into the business's bank account to replace the discount reduction.

- **Generating phony invoices.** November generated phony sales invoices and video rental invoices totaling $65,000 and $32,000, respectively. The creation of fictitious sales involves a little more risk because it requires completely fabricating all elements of a sale rather than just modifying part of a normal sale. But apparently for November it's worth the risk. Now he can deposit an additional $97,000 in narcotics proceeds.

- **Inflating the cost of goods sold.** In 1992, the actual cost of goods sold was $260,000. November inflated this amount by $28,000 by copying, and then altering, purchase invoices.

The income statement on the next page shows the affect of November's money laundering activities on his business. The results of the activities described above can be seen in the Gross Income figure.

</table>

Overstatement of reported revenue does have one significant disadvantage; because the additional income is openly reported, the amount is taxable. Unless financial criminals want to pay a large portion of their laundered proceeds in taxes, they need to find some way to reduce their increased tax liability. They resolve this problem by overstating their legitimate business expenses.

**Overstatement of Legitimate Expenses**

Overstating business expenses compliments overstating revenues. Because inflated expenses, like real expenses, are tax deductible, the additional tax liability caused by inflated revenues can be
reduced or eliminated. The possibilities of overstating expenses are limited only by one's imagination. Amounts can be "paid" for supplies or goods never received, fictitious consultants can be "paid" fees, nonexistent employees can be "paid" on a regular basis, and depreciation can be claimed on inflated or nonexistent assets.

By reviewing the income statement on page 301, you can see that Greg November inflated his legitimate business expenses in 1992 by $62,000. He added two of his narcotics distributors to his payroll ledger and increased his yearly salary expenses by $48,000. By withholding taxes and issuing year-end wage statements, he has provided his distributors with an apparent legitimate source of income. Throughout the year, he overpaid suppliers by $4,000 and then deposited their refund checks to the business's bank account as additional revenue from sales. The original amount paid the supplier is recorded as an expense and the canceled check is used as substantiation of the expense.

A consultant's fee of $10,000 is shown as an expense. This could be completely fictitious—maybe November paid the $10,000 to a narcotics confederate in his illegal activity or maybe he used the money to purchase a personal asset.

Greg November manipulated his business's financial activities by overstating both revenues and expenses. Not all money launderers use both methods together. Some use just one or the other. A narcotics dealer who wishes to generate a substantial amount of income to support a lavish lifestyle, may only overstate revenues. On the other hand, a money laundering front that hopes to evade taxes, would inflate only expenses.

**Deposits of Cash**

The third means for a legitimate business to launder money is to deposit cash proceeds generated from an illegal activity directly into business bank accounts without disguising the deposits as normal business receipts. This method cannot withstand the scrutiny of an investigator because any cash that goes into a business must come from somewhere; if not from revenues, then from loans, sales of business assets, or investments from the owners.

The deposits of cash method is used mainly to take advantage of the business's bank accounts to transfer illegal proceeds to the
business transaction system. Checks can then be written on business accounts for personal living expenses, and purchase of personal assets, etc., thereby avoiding the arousal of suspicion that large amounts of currency would generate.

**Indicators of Money Laundering Fronts**

As you can see from our example involving Stage One Records and Video, the use of legitimate enterprises as fronts to conceal and commingle illicit dollars in a money laundering operation involves compromising accounting procedures. The illegal dollars are rarely physically mixed with the legitimate business receipts, rather, the accounting records are falsified to attribute more income or more expenses to the enterprise (and indirectly to the owners) than was actually earned or incurred.

Ideally, a money laundering store front operation would be one that:

- Deals primarily in currency
- Has relatively fixed costs
- Is exempt from bank currency reporting requirements

Historically, taverns, restaurants, movie theaters, and massage parlors have been used as “front operations” in money laundering schemes. These types of business operations provide a ready location for illicit sales and clandestine meetings. Depending on the sophistication and managerial talents of the persons involved, almost any business activity can be used for money laundering. However, businesses that are highly competitive or require substantial technical skills, are less likely to attract direct criminal involvement. The rationale for this is that it is difficult to run both a demanding business and a demanding criminal organization at the same time.

Independent indicators can be used to develop financial leads when money laundering is suspected. For example, if Stage One Records and Video had an inventory of 400 videotapes and the rental fee was $2 a day, then the monthly gross revenue should not exceed $24,000 ($400 x 2 x 30). If the store reports gross receipts of $35,000 per month, the investigator should deduce that $11,000 was coming from elsewhere. While small variations
do not constitute adequate proof of fraud, large scale fraud is extremely hard to hide from this type of analysis.

The validity of certain types of expenses can be determined through the use of independent indicators. For example, the reported purchase of gasoline (a business expense) in amounts that are enough to keep a delivery service truck running for 24 hours a day all year long would obviously be suspect. The existence of fictitious employees may be independently verified by non-payroll sources of information (timecards, union records, unemployment compensation payments, and tax withholding records). Investigative findings revealing that certain sales never took place, employees on the payroll never existed, or reported inventory items are false, would provide strong indications of a money laundering operation. For the financial investigator, detection of money laundering is heavily dependent upon the quality of documentation. By using independent indicators to test the validity of reported revenue and expenses, the extent of the variation from true business-related activities can be determined.

**Buy/Sell Transaction**

Besides using legitimate businesses as a way of moving money into the business transaction system, the manipulated buy/sell transaction can accomplish the same thing. Real estate or other types of personal property transactions can be manipulated to hide the flow of illegal proceeds and provide an apparent source of legitimate income to the financial criminal. Suppose you’re buying a house that has a fair market value of $2 million. You and the seller agree that you will pay $1 million dollars for the house and pay the balance paid off the books (i.e. in currency, drugs). In this instance, the transfer from the cash transaction system to the business transaction system has been accomplished and money laundering has occurred. In principle, this type of money laundering can be used in any buy/sell transaction. Through independent appraisals or comparative sales data, the “real value” of a transaction can be discovered.
Off Shore Havens
Countries in various parts of the world have legal and/or economic climates exactly right for laundering of “dirty money.” Historically, places such as the Cayman Islands, the Bahamas, Switzerland, Panama and the Netherland Antilles have been associated with hidden bank accounts, fictitious corporations, and money laundering. Even though there have been successful prosecutions, little is known about the actual operation of “laundering factories” in these “off shore” havens. Narcotics traffickers and other financial criminals frequently use financial institutions, legitimate businesses and/or front operations to move the proceeds of their illegal activity out of the country. Often, there is virtually no way to obtain documentation of these transactions once they leave the United States. Accordingly, in a money laundering investigation, it is incumbent upon the investigator to follow the flow of funds as they cross the border. The graphic on the next page highlights the common methods of moving cash into and out of the country during a money laundering operation. Each of these methods is discussed below.

Methods of Moving Money Out of the United States

- **Physical Transportation.** Illegally obtained currency is physically transported from the United States to an off shore haven in a briefcase, luggage, on a person, etc.

- **Wire Transfer.** Illegal proceeds are deposited into bank accounts in the United States in increments below $10,000, thus avoiding the filing of a Currency Transaction Report. After deposit, wire transfers are sent from the domestic bank to a bank account in an off-shore country.

- **Cashier’s Check.** Currency is deposited into bank accounts (as described above) and cashier’s checks are purchased. The cashier’s checks are either mailed or physically transported off shore. Additionally, cashier’s checks can be directly purchased in increments less than $10,000.
- **Attorneys, Accountants, and Money Managers.** Currency is given to a party such as an attorney, accountant, or money manager who deposits the currency into his or her trust account. A trust account is a bank account maintained by and under the custody and control of this party which is used for funds relating to the client's financial and/or business interests. The other party then transfers (i.e., wires, purchases cashier's checks, etc.) the funds offshore.

For money laundering purposes, the term "financial institution" goes beyond banks and brokerage houses. **Individuals can be financial institutions.** A person who is in the business of receiving money or negotiating for the movement of funds, is considered a financial institution. Accordingly, attorneys, accountants, money managers, and even couriers who assist in the movement of money can be considered financial institutions. As a financial institution, when currency is moved in increments of over $10,000 by an individual, he or she must file the required...
forms (Currency Transaction Reports, and Currency and Monetary Instrument Reports) to report the flow of funds.

- **Brokerage Accounts.** Currency, cashier’s checks or fictitious business or personal checks are deposited into brokerage accounts. The subsequent withdrawals are mailed or physically transported off shore.

- **Wire Services.** Wire services (Western Union, American Express, etc.) are often used to domestically transfer funds, but can be used to move money off shore.

  Western Union and other “wire service” transfers are no longer just point to point forwarding of funds. A “deposit” can be accessed by the receiving party at any domestic or foreign office of the wire service. Additionally, the sender is not required to produce identification and, by the use of passwords and/or false identification, the receiver can conceal his/her true identity. For example:

  A local drug dealer, Perry Webster, needs to forward $30,000 to a supplier, Martin Sapata, in Phoenix, Arizona. Webster goes to a Western Union office, provides a fictitious name, and requests a $7,500 wire transfer to “Eddy Tucker” who will use the password “Ironwood” as an identifier. Webster goes to three other Western Union offices and repeats the procedure using different fictitious names and passwords at each office. Sapata then goes to the four different Western Union offices in Phoenix, provides the fictitious name and appropriate identifying password for each transfer and receives four drafts of $7,500 each.

  Wire transfers can be difficult to trace, or even identify, and are available internationally.

**Methods of Moving Money into the United States**

- **Fictitious Loans.** Fictitious corporations can set up bank accounts in a foreign country. Checks are then mailed back to the United States as loans from these fictitious companies. Cashier’s checks or wire transfers can also be used.

- **Fictitious Foreign Investors.** A legitimate business is formed in the United States, but fictitious “foreign investors” are used to provide capital to the enterprise. Business transaction
system payments (cashier’s checks, wire transfers, and business checks from fictitious companies or individuals) flow back into the country.

- **Finder’s Fees.** Finder’s fees or payments for services rendered are generated. These false transactions may be for locating investors for foreign businesses, negotiating real estate purchases, etc.

- **Corporate Salaries.** Corporate “salaries” are paid from fictitious off shore companies by way of corporate checks, wire transfers, or cashier’s checks.

- **Cashier’s Checks and Wire Transfers.** Cashier’s checks and wire transfers are obtained from foreign banks and sent into the country.

- **Physical Transportation.** Physical transportation of large amounts of currency back into the United States with the appropriate Currency and Monetary Instrument Report (CMIR) being filed at the border. This isolates the incoming currency from the illegal activity that originally generated the currency.

Combinations of any of the before-mentioned methods, both going out and coming into the country, are often used in complex money laundering operations. For example, once the proceeds are in a bank account in the Cayman Islands, an electronic transfer can be made to a bank account held under a fictitious name in Panama by the Panamanian company that controls the Cayman account. From there a “loan” is made to a shell corporation in the Bahamas, which in turn “invests” in a real estate venture in the United States controlled by the financial criminal who in fact generated the illegal proceeds. Investigative problems arise when money laundering goes off shore, beyond the jurisdiction and resources of law enforcement. The key to detecting and resolving money laundering operations is documenting the flow of money prior to its leaving the United States.

Laundered funds may be left in a foreign country to be used by the criminal for foreign investments, trips abroad, or the purchase of assets. A secondary effect of international money laundering occurs when the funds are repatriated. They often come
back in the form of “tax-free” sources of income. Loans, gifts and investments used to capitalize or start-up a business are nontaxable receipts and represent a nontaxable source of income to the alleged money launderer.

The investigator’s most valuable asset in a money laundering investigation is information. Information is developed through informants or by the utilization of undercover and surveillance operations. Of particular importance is information concerning the movement of money through financial institutions. Once currency that is generated from an illegal activity enters the banking system, it loses its identity and becomes inseparable from other funds inside the bank. The transaction entry point (i.e. the teller window), is where currency moves into the business transaction system. It is here that the Currency Transaction Reports (Form 4789) are generated when more than $10,000 in currency is deposited, withdrawn, or exchanged. The information provided by these reports is used to detect money laundering activities. Similarly, Currency and Monetary Instrument Reports (Form 4790) are required to be filed with the U.S. Customs Service when more than $10,000 in currency or monetary instruments crosses an international border. The failure to file either of these reports is a criminal violation of the money laundering laws. Additionally, structuring transactions in such a way as to avoid the $10,000 benchmark for either the CTR or the CMIR, can be a prosecutable offense.

Money Laundering Statutes

Crimes involving money laundering made for big headlines in the 1980s and continue to do so in the 1990s. Over the years, federal statutes have been developed for use against those who launder money and/or those who assist them. Although the four money laundering statutes were listed and described in Chapter 2, it is appropriate that we revisit them here.
Title 18 U.S.C. § 1956. Laundering of Monetary Instruments

Title 18 U.S.C. § 1956 states that it is illegal to:

- Conduct or attempt to conduct a financial transaction if you know that the proceeds used in the transaction are from an illegal activity
- Take part in a transaction that is designed to conceal or disguise, in any manner, the proceeds of an illegal activity
- Transport, transmit, transfer, (or attempt to) money into or out of the United States with the intent to promote a specified unlawful activity or knowing that the money represents the proceeds of an unlawful activity
- Avoid a transaction reporting requirement or conduct a financial transaction involving property that law enforcement represents to be the proceeds of an unlawful activity

§ 1956. Laundering of monetary instruments

(a)(1) Whoever, knowing that the property involved in a financial transaction represents the proceeds of some form of unlawful activity, conducts or attempts to conduct such a financial transaction which in fact involves the proceeds of specified unlawful activity—

(A)(i) with the intent to promote the carrying on of specified unlawful activity; or

(ii) with the intent to engage in conduct constituting a violation of section 7201 or 7206 of the Internal Revenue Code of 1986; or

(B) knowing that the transaction is designed in whole or in part—

(i) to conceal or disguise the nature, the location, the sources, the ownership, or the control of the proceeds of specified unlawful activity; or

(ii) to avoid a transaction reporting requirement under State or Federal law, ...

shall be sentenced to a fine of not more than $500,000 or twice the
value of the property involved in the transaction, whichever is greater, or imprisonment for not more than twenty years or, both.

(2) Whoever transports, transmits, or transfers, or attempts to transport, transmit, or transfer a monetary instrument or funds from a place in the United States to or through a place outside the United States or to a place in the United States from or through a place outside the United States —

(A) with the intent to promote the carrying on of specified unlawful activity; or

(B) knowing that the monetary instrument or funds involved in the transportation represent the proceeds of some form of unlawful activity and knowing that such transportation is designed in whole or in part—

(i) to conceal or disguise the nature, the location, the source, the ownership, or the control of the proceeds of specified unlawful activity; or

(ii) to avoid a transaction reporting requirement under State or Federal law...

shall be sentenced to a fine of $500,000 or twice the value of the monetary instrument or funds involved in the transportation, whichever is greater, or imprisonment for not more than twenty years, or both...

(3) Whoever, with the intent —

(A) to promote the carrying on of specified unlawful activity;

(B) to conceal or disguise the nature, location, source, ownership, or control of property believed to be the proceeds of specified unlawful activity; or

(C) to avoid a transaction reporting requirement under State or Federal law, conducts or attempts to conduct a financial transaction involving property represented by a law enforcement officer to be the proceeds of specified unlawful activity, or property used to conduct or facilitate specified unlawful activity, shall be fined under this title or imprisoned for not more than 20 years, or both.
Title 18 U.S.C. § 1957. Engaging in Monetary Transactions in Property Derived from Specified Unlawful Activity

Title 18 U.S.C. § 1957 states that it is unlawful to take part in, or attempt to take part in, monetary transactions involving criminally derived property that is of a value greater than $10,000 and is derived from a specified unlawful activity.

§ 1957. Engaging in monetary transactions in property derived from specified unlawful activity

(a) Whoever, in any of the circumstances set forth in subsection (d), knowingly engages or attempts to engage in a monetary transaction in criminally derived property that is of a value greater than $10,000 and is derived from specified unlawful activity, shall be punished as provided in subsection (b).

(b)(1) Except as provided in paragraph (2), the punishment for an offense under this section is a fine under title 18, United States Code, or imprisonment for not more than ten years or both.

Title 31 U.S.C. § 5313. Reports on Domestic Coins and Currency Transactions

Financial transactions in excess of $10,000 must be reported on a Currency Transaction Report (CTR). Title 31 U.S.C. § 5313 requires that financial institutions file this report. If a person takes actions to falsely or fraudulently stop a financial institution from filing the report with the federal government, a violation of criminal law has occurred.

§ 5313. Reports on Domestic Coins and Currency Transactions

(a) When a domestic financial institution is involved in a transaction for the payment, receipt, or transfer of United States coins or currency (or other monetary instruments the Secretary of the Treasury prescribes), in an amount, denomination, or amount and denomination, or under circumstances the Secretary prescribes by regulation, the institution and any other participant in the transaction the Secretary may prescribe shall file a report on the transac-
tion at the time and in the way the Secretary prescribes. A participant acting for another person shall make the report as the agent or bailee of the person and identify the person for whom the transaction is being made...

(c)(1) A person (except a domestic financial institution designated under subsection (b) of this section) required to file a report under this section shall file the report —

(A) with the institution involved in the transaction if the institution was designated;

(B) in the way the Secretary prescribes when the institution was not designated; or

(C) with the Secretary.

(2) The Secretary shall prescribe —

(A) the filing procedure for a domestic financial institution designated under subsection (b) of this section; and

(B) the way the institution shall submit reports filed with it.

Title 31 U.S.C. § 5324. Structuring Transactions to Evade Reporting Requirement Prohibited

Title 31 U.S.C. § 5324 makes it unlawful to structure a single cache of currency over $10,000 into increments of $10,000 or less and conduct multiple transactions for the purpose of evading the CTR reporting requirements. The multiple transactions take forms such as depositing money:

- Several times at the same bank branch on the same day
- At different branches of the same bank on the same day
- At different banks on the same day
- At the same bank on different days
- At different banks on different days

Note that if the structuring occurs at the same bank on the same business day, then the bank must file a CTR if the bank has
knowledge of the multiple transactions aggregating more than $10,000. If the bank files a CTR, then the launderer may still be guilty of an attempt.

§ 5324. Structuring transactions to evade reporting requirement prohibited
No person shall for the purpose of evading the reporting requirements of section 5313(a) with respect to such transaction —

(1) cause or attempt to cause a domestic financial institution to fail to file a report required under section 5313(a);

(2) cause or attempt to cause a domestic financial institution to file a report required under section 5313(a) that contains a material omission or misstatement of fact; or

(3) structure or assist in structuring, or attempt to structure or assist in structuring, any transaction with one or more domestic financial institutions.

Asset Forfeitures

The money criminals make from their financial crimes is often put toward their personal benefit. They buy cars, boats, property, clothing, etc. Fortunately for law enforcement, new and stronger laws provide the means to divest criminals of their illegal gains. This means is commonly referred to as "forfeiture." A forfeiture is a legal proceeding that the Government initiates against the proceeds of an illegal activity. The term "proceeds" is a flexible term that appears in many areas of the law and in virtually every context, the term means "whatever is received when an object is sold, exchanged, or otherwise disposed of." It does not necessarily mean just money. Each time proceeds are disposed of and exchanged for other property, the newly-acquired property becomes proceeds. In a sense, proceeds is a status that attaches to any property substituted for what was originally exchanged.
Criminal and Civil Forfeitures

In Chapter 2, you read that law can be divided into many categories. Two of these categories are criminal and civil law. Well, just like law, forfeitures can be either criminal or civil in nature. The government brings suit against the property or owner of the property and, if successful, gains right, title, and interest thereof. To initiate a forfeiture action, the government needs to show that "probable cause" exists. In this instance, probable cause is a belief that the property in question was either used illegally or represents the proceeds from unlawful activity. This probable cause standard is identical to the standard discussed in Chapter 9 for the issuance of search warrants.

Criminal forfeitures are imposed by Court order at the conclusion of a criminal trial or as a part of a guilty plea agreement. To impose a criminal forfeiture, the government must prove beyond a reasonable doubt that the property to be forfeited was either the proceeds of some illegal activity or was significantly connected to the illegal activity.

In a civil forfeiture proceeding, the government need only show that probable cause exists and that the property to be forfeited was involved in some illegal activity. No criminal conviction is necessary and it is up to the individual with an interest in the property to prove, through a preponderance of the evidence, that the government's contentions are incorrect. Should the claimant fail to present any evidence, the property is forfeited to the government. Because of this burden on the claimant rather than the government, in a civil forfeiture action the "discovery process" can be used to obtain information pertaining to the movement of money. The claimant may be deposed and the disclosure of his/her financial records compelled. Additionally, perjury and contempt sanctions are available for use by the government against untruthful or recalcitrant witnesses. These legal possibilities place the claimant in an awkward legal posture when criminal charges against him or her are pending. Asserting a Fifth Amendment Constitutional right against self-incrimination, may result in an adverse civil determination (forfeiture), while answering questions may have incriminating consequences in the criminal proceedings.
In Rem versus In Personam

The history of civil forfeiture goes back to Medieval England when in rem proceedings could be instituted against any property which had been involved in some type of wrongdoing. An in rem proceeding refers to a legal proceeding directed solely against property. The legal findings determine the proper ownership of the property in question. The defendant in an in rem proceeding is the object or property itself, and since in rem proceedings are limited to the determination of ownership, they do not impose personal obligations. In rem proceedings are totally independent of any criminal action against the owner.

Medieval England also had a form of criminal forfeiture. If an individual was convicted of a crime, the felon’s property was forfeited to the king as a form of fine. The proceedings to establish the forfeiture action were in personam, against the felon, and success depended upon proving that the felon was criminally guilty. In 1790, the first Congress of the United States prohibited these “criminal” forfeitures and criminal forfeitures were unheard of in the United States for another 180 years. It wasn’t until 1970 when Congress enacted the Racketeer Influenced and Corruption Organization Act (RICO) that the concept was resurrected.

Facilitation Versus Proceeds

Forfeiture laws distinguish between property which represents “proceeds” and property which “facilitates” a violation. To “facilitate” means to have a significant connection to. Federal law provides for the forfeiture of conveyances that facilitate the sale, receipt, possession, or concealment of illegal activity. Whether property can be seized and forfeited for facilitating an offense is determined by whether a significant connection exists to the prohibited activity. For example, an airplane used to move narcotics from Columbia to Chicago is closely connected to the illegal activity and could be seized and forfeited.
Federal Forfeiture Statutes

The key question in a forfeiture action, for both the investigator and the court, is not the good faith or guilty knowledge of the owner, but the use of the property in question and whether that use requires forfeiture under the statute. For instance, was the monetary instrument acquired in a financial transaction designed to conceal the ownership of proceeds of specific unlawful activity? Or, is a deposit in a financial institution traceable to coin or currency used in a transaction designed to evade or defeat the CTR filing requirements?

The following Federal statutes relate to forfeiture procedures:

- Title 18 U.S.C. § 981. Civil Forfeiture
- Title 18 U.S.C. § 982. Criminal Forfeiture
- Title 21 U.S.C. § 881. Forfeitures

Title 18 U.S.C. § 981. Civil Forfeiture

Title 18 U.S.C. § 981 states that the following property is subject to forfeiture:

- Property obtained, directly or indirectly, through violation of Title 18 U.S.C. § 1956 or § 1957
- Any property which represents the proceeds from the sale or distribution of a controlled substance
- Any coin, currency, or interest in property traceable to a transaction or attempted transaction in violation of Title 31 U.S.C. § 5313 or § 5324

§ 981. Civil Forfeiture

(a)(1) ... the following property is subject to forfeiture to the United States:

(A) Any property, real or personal, involved in a transaction or attempted transaction in violation of section 5313(a) or 5324 of...
Title 31, or of section 1956 or 1967 of this title, or any property traceable to such property.

(B) Any property within the jurisdiction of the United States, which represents the proceeds of an offense against the foreign national involving a manufacturer. "sale or distribution of a controlled substance..."

(C) Any coin and currency... or any interest in any other property, including any deposit in a financial institution, traceable to such coin or currency involved in a transaction or attempted transaction in violation of Sections 5313(a) or 5324 of Title 31 may be seized and forfeited to the United States government...

Title 18 U.S.C. § 982. Criminal Forfeiture
Title 18 U.S.C. § 982 states that a person convicted of money laundering is required to forfeit any property which resulted from the illegal activity.

§ 982. Criminal Forfeiture
(a) The Court, in imposing sentence on a person convicted of an offense under Section 1956 or 1957 (money laundering violations) of this title shall order that the person forfeit to the United States any property, real or personal, which represents the gross receipts the person obtained directly or indirectly, as a result of such offense, or which is traceable to such gross receipts.

Title 21 U.S.C. § 881. Forfeitures
Title 21 U.S.C. § 881 (see page 320) identifies items that are subject to forfeiture to the United States government. The items listed are associated with the manufacture and distribution of controlled substances.

Statutory Authority Versus Constitutional Standards
The authority granted by the language of a statute or the written opinions in a case law finding does not end the discussion on for-
feiture proceedings. All case law and statutory authorizations must comply with Constitutional standards. A statute or legal opinion cannot authorize conduct which comes into conflict with protected Constitutional rights. Therefore, any seizure and/or subsequent forfeiture action must be in agreement with the reasonableness requirement of the Constitution’s Fourth and Fifth Amendments.

For Constitutional purposes, a search results from an investigator’s intrusion into an individual’s “reasonable expectation of privacy” and a seizure occurs when an investigator’s conduct “interferes with a person’s ownership of property.” The law has consistently preferred that a warrant be obtained prior to any search procedure. This legal preference for a warrant is not as great in seizure and subsequent forfeiture actions. The basis for this difference is that a seizure, the first step in a forfeiture action, when based upon probable cause is considered reasonable action under the Fourth Amendment. However, evidence obtained in violation of either Fourth Amendment or Fifth Amendment guarantees is not admissible in court. The seizure of property in “plain view” is presumed reasonable, assuming that the investigator can establish probable cause to associate the property with criminal activity.

The government’s right to seize the proceeds of an illegal activity even though it interferes with the owner’s Constitutional right of ownership was enacted by statute and upheld by the Supreme Court. The Supreme Court first enunciated this legal position, known as The Doctrine of Relation, in U. S. v. Stowell, 133 U.S. (1890). In that decision, the Court indicated that when a statute provides for civil forfeiture, the forfeiture takes place at the moment the property is used or illegally generated, unless another statute provides otherwise. At that moment, all rights and legal title to the property vest in the government and any subsequent transfer is of no effect. In the eyes of the law, the subsequent judicial proceedings merely confirm a forfeiture that has, in theory, already taken place. Because the government’s right to proceeds relates back to the time they are generated, it is legally entitled to all the gain thereafter accruing from the proceeds of the illegal activity.
§ 881. Forfeitures

(a) Subject property

The following shall be subject to forfeiture to the United States and no property right shall exist in them:

(1) All controlled substances which have been manufactured, distributed, dispensed, or acquired in violation of this subchapter.

(2) All raw materials, products, and equipment of any kind which are used, or intended for use, in manufacturing, compounding, processing, delivering, importing, or exporting any controlled substance in violation of this subchapter.

(3) All property which is used, or intended for use, as a container for property described in paragraph (1) or (2).

(4) All conveyances, including aircraft, vehicles, or vessels, which are used, or are intended for use, to transport, or in any manner to facilitate the transportation, sale, receipt, possession, or concealment of property described in paragraph (1) or (2), except that —

(A) no conveyance used by any person as a common carrier in the transaction of business as a common carrier shall be forfeited under the provisions of this section unless it shall appear that the owner or other person in charge of such conveyance was a consenting party or privy to a violation of this subchapter or subchapter II of this chapter; and

(B) no conveyance shall be forfeited under the provisions of this section by reason of any act or omission established by the owner thereof to have been committed or omitted by any person other than such owner while such conveyance was unlawfully in the possession of a person other than the owner in violation of the criminal laws of the United States, or of any State.

(5) All books, records, and research, including formulas, microfilm, tapes, and data which are used, or intended for use, in violation of this subchapter.

(6) All moneys, negotiable instruments, securities, or other things of value furnished or intended to be furnished by any person in exchange for a controlled substance in violation of this subchapter.
all proceeds traceable to such an exchange, and all moneys, negotiable instruments, and securities used or intended to be used to facilitate any violation of this subchapter, except that no property shall be forfeited under this paragraph, to the extent of the interest of an owner, by reason of any act or omission established by that owner to have been committed or omitted without the knowledge or consent of that owner.

(7) All real property, including any right, title, and interest in the whole of any lot of tract of land and any appurtenances or improvements, which is used, or intended to be used, in any manner or part, to commit, or to facilitate the commission of, a violation of this title punishable by more than one year’s imprisonment, except that no property shall be forfeited under this paragraph, to the extent of an interest of an owner, by reason of any act or omission established by that owner to have been committed or omitted without the knowledge or consent of that owner.

(8) All controlled substances which have been possessed in violation of this subchapter.

Factors That Establish Probable Cause

The paper trail of financial events is the investigator’s starting point in a forfeiture investigation. The investigator must be prepared to use techniques such as subpoenas, surveillance, and interviewing to secure financial records relative to the movement of money. The majority of forfeiture actions do not require complex document analysis. The basis for this in large part is due to the standard of proof (probable cause) necessary to start the forfeiture action and the judiciary’s willingness to accept the fact that illegal activities generate illegal income. It follows then that the key to a forfeiture investigation is discovering factors that establish probable cause. The following are examples of court recognized situations that can be used by the financial investigator to establish probable cause in a forfeiture investigation.
• **Close proximity.** In situations where targeted forfeitable proceeds are found in close proximity to narcotics, probable cause can be established to support the forfeiture action. For example, in *The United States v. $33,000 United States Currency*, probable cause for forfeiture was satisfied by the following evidence:

—Claimant’s guilty plea to conspiracy to distribute marijuana and to evade taxes

—The seizure of $33,000 located in a brown paper bag in claimant’s home

—The presence of drugs on the premises

—The claimant’s lack of legitimate employment

Close proximity does not necessarily require direct physical proximity to the narcotics/contraband. In *The United States v. Brock*, the government sought forfeiture of jewelry valued at $120,000 which was found in a bag in the claimant’s attic. Despite the absence of any direct evidence connecting the jewelry with the claimant’s narcotics activity, the Court of Appeals concluded probable cause was present and sufficient to support the forfeiture action. The court felt that—

> The circumstances were sufficient to warrant a conclusion that there was no other way that Brock could have acquired the jewelry other than... as proceeds of the alleged narcotics violation. The jewelry was found secreted in the same house as the narcotics and paraphernalia for distribution of narcotics. In addition, a large quantity of cash and a loaded revolver, further suggestive of ongoing narcotics activity, were seized at the house. These circumstances fairly lead to an inference that the jewelry was the proceeds of narcotics activity... circumstantial evidence and inferences therefrom are good grounds for a finding of probable cause in a forfeiture proceeding...

• **Means of support.** In situations where there appear to be obvious discrepancies between the claimant’s lifestyle and his or her apparent means of support, probable cause for a forfeiture...
action can be established. In particular, substantial currency expenditures, without apparent legitimate employment, has proven to be extremely probative (supplying evidence or proof).

- **Pre-trial statements.** Statements made to associates or to undercover agents during the investigative stages of a criminal prosecution can result in probable cause to establish a forfeiture action. For example, in *The United States v. A Single-Family Residence*, testimony from several co-conspirators established that the trafficker had told them narcotics proceeds had been used to buy the property.

- **Narcotics records.** Records of narcotics sales can provide the basis for probable cause in a forfeiture investigation. By reporting the "profits earned," investigators can show the illegal proceeds generated from drug dealing. During the investigative process, the claimant's effort to conceal or commingle his or her illegal funds with legitimate sources of income and/or his or her evasive testimony can be important factors in the establishment of probable cause.

---

**Summary**

Money laundering is the process by which one conceals the existence, illegal source, or illegal application of income and then disguises that income to make it appear legitimate. There are two basic transaction systems money launderers work with: the cash transaction system and the business transaction system. The goal of the money launderer is to move from the cash transaction system to the business transaction system. The goal of the investigator is to spot this movement and halt the laundering operation.

There are three basic methods available to launder money: through legitimate businesses, buy/sell transactions, and offshore havens. Legitimate businesses launder money by overstating legitimate revenue and expenses, or by depositing currency into business accounts. Buy/sell transactions are manipulated financial transactions that use an apparent legitimate purchase or sale of an
Asset forfeiture continues to hold great potential for attacking large-scale financial crimes. By using the benefits of civil discovery and the lower burden of proof, law enforcement has an opportunity to strike at the profits generated by financial crimes. Existing case law demonstrates that forfeitures can be accomplished through modes of proof that are relatively straightforward when tracing the flow of funds from illegal activity. Even beyond that, indirect methods of tracing the movement of money may offer new means for reaching the proceeds of illegal activity and bankrupting complex financial criminal enterprises thereby putting them out of business.

Questions and Exercises

Answer the following questions and then check your responses with those provided at the back of the book.

1. What is the difference between the cash transaction system and the business transaction system?

2. List three characteristics of a business used for money laundering.

3. What affect does overstating its legitimate revenue have on a business? How is this affect counteracted?
4. Suppose you were going to purchase a $20,000 car from a friend. Explain how you could use a buy/sell transaction to launder money.

5. List three methods used to move U.S. currency into and three methods used to move currency out of the United States.

6. What is meant by “structuring” financial transactions? Identify three ways a criminal can structure transactions.

7. What are the “proceeds” of a crime?

8. Describe the burden of proof as it relates to civil and criminal forfeitures.

9. Explain what is meant by the following statement:

   The car he owned “facilitated” his ability to sell narcotics; therefore, it is subject to forfeiture.

10. In Chapter 8, you read about the methods of indirect proof. What role would these methods play in establishing probable cause for forfeiture of assets?
Endnotes

4 U.S. v. Stowell. 133 U.S. (1890)

7 U.S. v. A Single Family Residence. 803 F 2d 625 (11th Cir. 1986)
Responses to End-of-Chapter Questions

Chapter 2

1 Civil law deals with private conflicts and differences between individuals, whereas criminal law deals with public wrongs against the state. Remedies for violations of civil law are usually in the form of money damages or court-ordered actions to do, or refrain from doing, certain specific things. Remedies for violations of criminal law include fines, penalties, and/or incarceration.

2 A felony is a more serious crime than a misdemeanor. Felonies are punishable by incarceration of more than one year, a fine, and loss of certain civil rights. Misdemeanors are punishable by fines and/or incarceration of less than one year.

3 An offense that is "mala prohibita" is an offense made criminal by statute, whereas an offense that is "mala in se" is an offense that is evil in and of itself.

4 a. Jerry Wilson has conspired with a drug dealer to allow his clothing store to be used to launder drug money. The statutes violated and their corresponding elements are as follows:

1) Title 18 U.S.C. § 371. Conspiracy to commit offense or to defraud the United States

• The conspiracy was willfully formed

• The suspect willfully became a member of the conspiracy

• At least one of the conspirators knowingly committed at least one overt act in furtherance of the conspiracy
2) Title 18 U.S.C. § 1956. Laundering of monetary instruments

- The suspect must conduct or attempt to conduct a “financial transaction”

- The suspect must know that the property involved in the transaction represents the proceeds of some form of unlawful activity

- The transaction must involve property which, in fact, represents the proceeds of “specified unlawful activity”

- The suspect must engage in the transaction with either —
  - the intent of promoting the carrying on of the “specified unlawful activity,” or
  - the intent to engage in conduct constituting tax evasion under Title 26 U.S.C. § 7201 or tax fraud under Title 26 U.S.C. § 7206, or
  - knowledge that the purpose of the transaction, in whole or in part, was either to conceal or disguise the nature, location, source, ownership, or control of the proceeds of “specified unlawful activity;” or to avoid a transaction reporting requirement under State or Federal law

b. Troy Avery is using his position with the Navy to threaten another employee into doing something. Avery is committing extortion in violation of Title 18 U.S.C. § 872, extortion by officers or employees of the United States. Elements of the crime include the following:

- Intent

- The suspect is an officer or employee of United States government

- The suspect used his or her employment with government as part of the extortion scheme

- Extortion is committed or attempted

c. Since Jenny is using an 800 number to further her scheme to defraud, she is committing wire fraud in violation of Title 18
U.S.C. § 1343, fraud by wire, radio, or television. Elements of the crime include the following:

- Intent
- Scheme to defraud
- Use of interstate communications to further scheme

d. David Stevens is a bank employee who is using his position with the bank to commit embezzlement and bank fraud. The statutes violated and their corresponding elements are as follows:

1) Title 18 U.S.C. § 656. Theft, embezzlement, or misapplication by bank officer or employee

- Intent
- The suspect is a bank employee or officer
- The suspect attempted to defraud the bank

2) Title 18 U.S.C. § 1344. Bank fraud

- Intent
- Scheme to defraud a financial institution

e. Linda Carson is threatening to use the fact that her competitor is involved in a criminal activity to get that person to do something against his or her will. Linda is committing blackmail in violation of Title 18 U.S.C. § 873. Elements of the crime include the following:

- Intent
- The suspect made threats

f. Susan Tompkins is in violation of Title 26 U.S.C. § 7203, Willful failure to file return, supply information, or pay tax. Elements of the crime include the following:

- Duty to pay
- Failure to pay
- Willfulness
5 Lance Gordon is intentionally structuring his financial transactions so that the financial institutions he is dealing with do not file Currency Transaction Reports. The money involved happens to be from an illegal activity, therefore, Lance is in violation of Title 31 U.S.C. 5324, Structuring transactions to evade reporting requirement prohibited.

Chapter 3

1 a. 16 to 23 people “sit” on a federal grand jury.

b. It takes 12 jurors to return an indictment.

2 If a witness is granted transactional immunity, he or she cannot be prosecuted for any criminal offenses about which he or she testifies during grand jury proceedings. The witness could admit to murder and drug trafficking, and not be prosecuted for them.

If a witness is granted use immunity, the testimony that the witness provides cannot be used in prosecutions against the witness. For example, a witness testifies that she forged checks in order to get cash to buy drugs. If that witness is brought up on drug charges, that testimony cannot be used against her.

Transactional immunity is rarely used. If immunity is offered, it is more likely to be use immunity.

3 Evidence is anything that can make a person believe that a fact or proposition is true or false.

4 Proof is the result of evidence.

5 In criminal cases, the standard of proof is “beyond a reasonable doubt;” in most civil cases the standard is “preponderance of evidence.” “Beyond a reasonable doubt" is a greater degree of proof than is “preponderance of evidence.” To reach a conviction in a criminal case, each juror must have no doubt that, based on the evidence presented, the accused committed the crime. Verdicts in civil cases where the preponderance of evidence is the standard of proof, are reached by the jurors weighing the evidence presented and deciding who they believe, the plaintiff or the defendant.
6 Use of mails to further scheme—Direct evidence could be an item of mail received by a victim of the fraud that was sent by the suspect to perpetuate the fraud. Circumstantial evidence could be testimony from a postal employee who assisted the suspect in matters related to the mailing.

7 Judicial notice is when a judge allows a known fact to be admitted as evidence. Examples of judicial notice include: George Washington was our first president; May 2, 1993 falls on a Saturday; and a financial depression occurred in America in 1931.

8 According to Rule 401, evidence must be relevant and competent. A fact presented as evidence must, in some logical way, relate to proving the case. If you are trying to prove that the suspect committed bank fraud, you’re not going to submit as evidence testimony stating that the suspect washed his car every Sunday morning. It’s not relevant. And you’ve got to make sure that the relevant evidence is provided by a competent person. Testimony provided by a former spouse with an ax to grind may not come off as very convincing.

9 a. Kay White can, if she chooses to (she has testimonial privilege), provide the testimony because it is not a confidential communication since it occurred before she and Todd were married.

b. Again, Kay can, if she chooses, provide the testimony. In this instance she’d testify to something she saw, not something that was said.

c. This testimony is covered by the confidential communication privilege. Kay can provide it only if Todd consents to the testimony.

d. Joey can provide the testimony since there is no parent/child communications privilege.

e. Leon Norton can provide the testimony since the Federal courts do not recognize an accountant/client communications privilege.
f. Kent Parks can provide the testimony since it deals with an event rather than a communication.

10 Hearsay evidence is inadmissible because when one person repeats what another has said, there is room for distortion and misunderstanding.

11 The shop book rule allows that a person who currently is the “custodian” of a business’s books can introduce the books and provide testimony about them even though that person did not make the original entries.

12 The terms “best evidence” and “secondary evidence” apply to documentary evidence. If evidence concerning a document is needed, the “best evidence” is the document itself. If the original has been destroyed or is not attainable even through the use of a search warrant or subpoena, an authenticated copy of the document can be used. “Secondary evidence” is used when an original of the document in question is unavailable. A witness can testify to the contents of the document or a copy of the document.

Chapter 4

1 According to the table in Appendix A, a social security number that begins with the numbers “421,” is issued in the state of Alabama.

2 a. To discover if any complaints have been lodged against Base Ball, Inc., you should contact the Better Business Bureau that serves the area where the company is located.

b. To obtain a list of businesses in the Raleigh, North Carolina area, you should contact the Chamber of Commerce that serves the area.

3 a. If you want information concerning a suspect’s use of his or her American Express Card, you can contact the American Express Company in New York City.

b. By analyzing a suspect’s credit card activity you can find
out all sorts of things. Has the suspect made any major purchases using the credit card? If the suspect used the card on a trip, you can track where the suspect went as well as what the suspect purchased. Did the suspect use the credit card to get a cash advance? How does the suspect pay off what he or she owes on the credit card? These are just some of the things that an investigator can discover about a suspect when analyzing the suspect's credit card activity.

4 The following factors come into play when selecting a suspect to target for investigation:

- Available law enforcement resources
- Probability of obtaining a conviction
- Jury appeal
- Judicial interpretations of the law

5 The best source of information concerning a suspect is the suspect. Suspects know what really happened and can easily provide, if they choose, information and documents to assist the investigator.

6 The Immigration and Naturalization Service and the U.S. District Court maintain information concerning aliens and naturalized citizens.

7 The U.S. Secret Service maintains records pertaining to forgery.

8 The FBI maintains the National Stolen Property Index.

**Chapter 5**

1 The check provides the following information:

- Owner of the account is Allison Henderson. She lives in Rockville, Maryland, at 923 Prospect Lane.
- The payee is Hankinson's Automotive. Apparently, Allison took her car in for a tune up and paid for it on June 8, 1992.
• Allison's checking account number is 084931121.

• The first part of the ABA transit number, "68," tells us that the Capital Bank and Trust is located in Virginia.

• The second part of the ABA transit number tells us that the code for the Capital Bank and Trust is "999."

• The number "561" is the check routing symbol. The "5" means that the Capital Bank and Trust is located in the fifth Federal Reserve district (Richmond). The "6" corresponds to the federal reserve facility that collected the check and the "1" indicates a deferred payment.

2 Check spread analysis is a useful investigative tool because it reveals a suspect's pattern of financial activity. A break in the pattern is cause for further investigation, for example, if a usual monthly payment (mortgage, rent, phone, electric, etc.) is absent, the investigator will want to see how the suspect made the payment.

3. A safe-deposit box rental agreement and entry log are available. The rental agreement will show who rented the box and on what date. The entry log shows the date and times of visits to the box and who made them. Bank records do not reveal the contents of the box.

4 Banks are required to retain the following records for 5 years:
   • The signature card filled out when the account was opened
   • Bank statements disclosing all deposits and withdrawals
   • Copies of both sides of customer checks

5 It is difficult to trace currency-for-currency transactions because they seldom leave a paper trail inside the bank unless the transaction is in excess of $10,000. Transactions of $10,000 or more must be recorded on a Currency Transaction Report.

6 An investigator can ask suspects for their bank records or for permission to get them from the bank. If a suspect is uncooperative, it becomes a bit more difficult for the investigator
because the Bank Secrecy Act and the Right To Financial Privacy Provisions of Federal law cause banks to restrict access to a customer's records. However, banks can be legally compelled to provide records.

7 A haven country is a country that offers a legal and/or economic climate for laundering money or hiding illegally gotten profits. It is difficult for an investigator to gain access to information concerning money sent to a haven country via a wire transfer.

8 A loan application is good source of financial information because a suspect, wanting to get the loan approved, will identify assets and other accounts to impress the person who reviews to application.

9 The documentation surrounding a Western Union money order will identify who purchased the money order, who received it, and the money order's worth.

A casino can provide bank statements, loan applications, credit card applications, and other financial information. Casinos are also required to file reports on currency transactions in excess of $10,000.

10 a. Securities are stocks and bonds whereas commodities are produced goods, such as grain, livestock, gold, or timber.

b. A stock represents ownership in a corporation, that is a claim against the corporations assets and earnings. A bond is issued when a corporation or governmental unit wishes to borrow money for some period. Stockholders can sell their shares of stock at any time, and receive a profit or loss based on the relationship of the purchase price to the selling price. Bondholders can collect on their investment only at a specified time.

c. Common stock are units of ownership that allow owners to receive dividends on their holdings and vote on matters affecting the corporation in which they own stock. If a stockholder owns preferred stock, he or she will be paid dividends before common stockholders, however, preferred stock does not ordi-
narily carry voting rights. If a corporation is authorized to issue only one class of stock, it is common stock that is authorized.

d. Transfer agents keep a record of a corporation’s outstanding stock certificates. A transfer agent is usually a commercial bank appointed by the corporation. A registrar double checks the actions of the transfer agent to prevent improper issue of stock or fraudulent transfer.

e. A corporate bond is a registered bond issued by a private corporation. A municipal bond is an obligation of a state, county, municipality or any agency thereof. All municipal bonds issued after July 1, 1983, are registered. The interest on a municipal bond is free from Federal taxes.

f. Treasury bills are short term securities with maturities of one year or less. They do not pay a fixed rate of interest and are issued and subsequently traded at a discount from face value. Treasury bills are issued in minimum denominations of $10,000, with $5,000 increments. Treasury bonds are long-term bonds with maturities of 10 years or longer. They carry a fixed interest rate and are issued and traded as a percentage of their face value. Their minimum denomination is $1,000.

g. Securities held in the name of the account holder simply reflect the name of the customer who maintains the account. Securities held in a street name are registered in the name of the owner's broker.

11 An investigator will probably want to pursue the following:

b. Check 187, written for $5,000. Both checks 183 and 184 are significantly higher than the next highest payment ($745).

c. The $5,000 deposit on June 10. All other deposits to the account are the same amount and deposited at the same time in each month.

d. No check was written in the amount of $745 in July. Mr. Davids has plenty of money to make the payment. Maybe he forgot. Maybe he paid in cash.
12 Both of the deposit slips show that currency was deposited. The total amount deposited equals $13,500. Had all of the currency been deposited into one account, the bank would have had to file a Currency Transaction Report (CTR). Since the deposits are into two different accounts owned by the same person, it looks like that person may have split the deposit to avoid having to have a CTR filed.

13 The brokerage account statement reveals that Nancy Garrity bought, sold, and received stock during July 1992. She made a $256.25 profit on her Lakewood, Inc. stock. Unless other account statements are available for analysis, an investigator cannot determine if Nancy’s brokerage activities for July 1992 are unusual.

Chapter 6

1 In a proprietorship, the owner of the business is responsible for all debts incurred. In a partnership, the partners are personally responsible for the business’s debts. Since a corporation is a legal entity in and of itself, it is responsible for its debts, not its owners (stockholders).

2 A corporation’s Articles of Incorporation and a partnership’s Articles of Partnership are important to the financial investigator because of the information they provide. Each of these documents provides personal and financial information relating to those involved in the start up of the business.

3 A liability is a claim on an asset by a creditor. An asset is something of value owned by a business and the owner’s equity is the amount of capital furnished by a business’s owner(s).

4 Based on the equation \( A = L + OE \), and given that assets equals $675,325 and owner’s equity is $276,580, it follows that liabilities equals $398,745.

5 Accounting is able to show, in summary form, the results of a business’s financial transactions through financial records such as journals, ledgers, balances sheets, and income statements.
6 A balance sheet represents a business's condition at the moment the document is prepared. One prepared on Monday will differ from one prepared on Tuesday, etc. This is because Monday's transactions that affect balance sheet accounts will differ from Tuesday's transactions, and so on.

7 The following journal entry:

\[
\begin{array}{cc}
\text{Cash} & 10,000 \\
\text{Accounts Receivable} & 10,000 \\
\end{array}
\]

describes a financial transaction. An asset, cash, has increased by $10,000. Another asset, accounts receivable, has decreased accordingly. The journal entry indicates that $10,000 that was owed to a business through the extension of credit (accounts receivable) has been paid in cash.

8

\[
\begin{array}{l}
\text{Cash} \\
10,000 \\
\hline
\text{Accounts Receivable} \\
10,000 \\
\end{array}
\]

A financial investigator can use accounting skills to evaluate the appropriateness of journal and ledger entries. By knowing how transactions are to be recorded and summarized, the financial investigator is better able to trace the impact of a transaction on a business.

Chapter 7

1 With the specific item method, the investigator tries to find a direct link between a suspect and a specific financial transaction involving the payment or receipt of illegal funds. Once discovered, this direct link is very difficult for the suspect to deny.

2 Bank account information is the type of information most useful in a fictitious payable scheme.

3 An investigator will want to look into an employee’s travel expenses because travel expense reimbursements may be padded to generate illicit funds.
4 The following is an example of an overbilling scheme:

Company A buys a service from Company B for $2,500. Instead of writing Company B a check for $2,500, Company A writes a check for $3,500. Company B returns the extra $1,000, in cash, to Company A.

5 Illicit payments via currency are indicated by:

   • Unexplained or unusual currency disbursements or withdrawals, particularly from a business which does not normally deal in currency
   
   • Matching the payor's currency withdrawals to the recipient's corresponding currency deposits, expenditures, or visits to a safe deposit box
   
   • The purchase of a cashier's check or a wire transfer made payable to the recipient at or shortly after cash withdrawals or disbursements by the payor

6 Each month, two checks are written to Lopez Electronics. In each instance, the second check is 10% of the first. This may indicate some type of kickback scheme.

7 Checks written to a business are usually deposited into an account at a financial institution. An investigator should become suspicious if too many checks are cashed out instead of being deposited.

8 Situations involving backup documentation that should make an investigator suspicious include the following:

   • The absence of documentation to support a particular payment
   
   • Discrepancies between the payment information and the backup documentation
   
   • Coincidences in the backup documentation
   
   • Unnumbered or sequentially unusual invoices
   
   • Alterations or photocopies of backup documentation
Chapter 8

1 Indirect methods of proof are most useful when the suspect is taking currency or other payments that cannot be directly traced.

2 The base year becomes the point of comparison for subsequent years' net worth changes. If the base year findings come into question once the net worth analysis is complete, the entire analysis is in doubt and must be recalculated.

3 Looking at the expenditures method formula, it becomes clear that if the "known sources of funds" is understated, the "funds from unknown sources" will be overstated. For example, if "total expenditures" equals $50,000 and "known sources of funds" is $45,000, then "funds from unknown sources" equals $5,000. But if "total expenditures" equals $50,000 and "known sources of funds" is underestimated at $43,000, then "funds from unknown sources" becomes overstated at $7,000.

4 Both the net worth and expenditures methods look at a suspect's sources of funds, expenditures, assets, and liabilities. However, in the net worth method, the absolute amount of an item is considered whereas the expenditures method considers the net effect, not the absolute. For example, data shows that in the base year the suspect owned $500 worth of jewelry and in Year 1, she owned $1,000 worth. In the net worth analysis, the amount of jewelry owned in Year 1 would be listed as $1,000—the absolute amount owned. In the expenditures method, Year 1 would show $500 worth of jewelry—the difference between Year 1 and the base year. With the expenditures method, only the year-to-year increase and decreases in a suspect's assets and liabilities are considered.

5 With the specific item method, an investigator is looking for a specific financial transaction to link to a suspect. This link is a direct one—one to the point at issue—and cannot easily be denied by the suspect. The indirect methods, on the other hand, imply that a suspect's expenses exceed his or her known sources of income (funds). They cannot prove where the additional monies came from.

**E** b. Suspect's mortgage decreased from $27,500 to $25,200 during the year.

**S** c. Suspect's beginning inventory was $52,000 and ending inventory was $38,000.

**S** d. Suspect sold stock costing $5,000 for $8,000.

**E** e. Suspect paid $13,250 for a new car.

**S** f. Suspect embezzled $40,000 from his employer.

**S** g. Suspect took out a $50,000 loan to purchase a boat.

**E** h. Suspect donated $10,000 to the University of Higher Education.

Chapter 9

1 A financial interview is conducted to obtain information and documentation from a witness. A financial interrogation is conducted for a different purpose. Its purpose is to elicit confessions or admissions of culpability from suspects or hostile witnesses.

2 Many investigative interviews focus on the recollection of witnesses. Questions such as “Do you remember seeing any suspicious cars in the neighborhood? or What color jacket was he wearing? are asked. Financial interviews go beyond recollection questions and deal with the specific details of financial transactions and the movement of money.

3 When planning interviews, an investigator should consider the following:
   - Who should I interview?
   - In what order should I interview the witnesses?
   - What type of witness is this person going to be?
   - Should I contact the suspect?
   - When should I contact the suspect?
   - What method of questioning should I use?

4 There are three general methods of questioning an investigator can use during a financial interview:
   - The chronological method
   - Questioning according to documents
   - Questioning according to transactions or events

   With the chronological method of questioning, a witness is questioned about the events in the order that they occurred, from beginning to end. With questioning according to documents, a particular document (financial statement, canceled check, tax return) is the focus of the interview. When questioning according to transaction or event, questions focus on a particular situation.
5 The introduction is critical as it sets the tone for the whole interview. Its primary objective is to put the witness at ease and get him or her to agree to answer questions.

6 To get hesitant witnesses to agree to cooperate, and investigator must avoid coming across as a threat. He or she should try to lead witnesses to believe that they will benefit from cooperating with the investigator.

7 An investigator must actively participate in the interview process. He or she must constantly analyze responses, and continually check for inconsistencies, inaccuracies, and incompleteness. Also, investigators must attend to what witnesses do during an interview. The visual and non-verbal aspects of an interview are very important.

8 The sentence is negatively phrased, and so long and complex that no one is going to understand it. Investigators should avoid asking complex and negatively phrased questions. All questions should be simple, to the point, and positively phrased.

9 The final question an investigator should ask is: “Is there anything else that you would like to say?” It gives the witness one final chance to say anything that he or she wishes.

10 The major advantage of the question and answer statement is that it contains all of the questions asked and answers provided during an interview. Of course, this could be viewed as a disadvantage also. The statement will be long, unedited, and could contain unnecessary material. On the other hand, the memorandum is more informal and it contains all pertinent testimony obtained during the interview. However, the testimony is recorded as the investigator recalls after refreshing his or her memory through informal notes. The memorandum does not contain the exact words of the witness. Both the memorandum and question and answer statement are good methods for recording an interview. The choice the investigator makes should be based on the complexity and investigative importance of the interview.
By allowing the affiant to create the affidavit, the investigator ensures that the affidavit will be in the affiant’s own words and the credibility of the affidavit will increase because it is in the affiant’s own handwriting. It would be difficult for the affiant to later deny the affidavit was his or hers.

Chapter 10

1 If an investigator seizes evidence from a suspect’s home or office without first obtaining a search warrant, the evidence collected could be ruled inadmissible.

2 Probable cause means that, based on the facts presented and the experience of the investigator, a reasonable person would think that the evidence sought exists in the place to be searched. Probable cause is shown via an affidavit.

3 a. Affiant’s experience
   b. Detailed account of criminal activity
   c. Description of place(s) to be searched
   d. Financial evidence
   e. Items to be seized
   f. Conclusions based on the affiant’s expertise*

4 The statement supports two types of information that must be in an affidavit. The statement—While going through the trash left for garbage collection at 34 Tremont Avenue, I found an electric and phone bill addressed to John Winkler of that address—shows that the suspect exercises dominion and control over 34 Tremont Avenue, the place you want to search. The second statement—I also found a bill from Haggler’s Electronic Store indicating that Winkler recently bought $2,435 worth of stereo and video recording equipment—is financial evidence of a major expenditure and asset purchase.
5 A document examiner could perform handwriting analysis to determine the authenticity of the signatures on the contract, could determine whose typewriter was used to create the contract, and could analyze the paper to see if it’s the same type of paper used in the creation of contracts in Mr. Friday’s office.

6 Undercover operation objectives could include:

- Identifying persons on the basketball team and outside the team who may be involved in the point-shaving activities
- Obtaining probable cause for search and arrest warrants
- Gathering information and documents relative to the investigation
- Obtaining information and leads to purchases and expenditures made by members of the basketball team
An informant could tell you many things including which basketball players are involved in point shaving, who on the outside directs the players to shave points, what past games were involved, what future games might be involved, and how the players are paid off.
Chapter 11

1 With the cash transaction system, all financial transactions are conducted exclusively through the use of currency. In the business transaction system, financial transactions are conducted using methods that generate a trail of financial records.

2 The three characteristics of a business used as a money laundering front are:
   - Deals primarily in currency
   - Has relatively fixed costs
   - Is exempt from bank currency reporting requirements

3 By overstating its revenue, a business increases its taxable income. They reduce their tax liability by overstating their business expenses.

4 You and your friend could agree that you purchase the car for some amount less than $20,000 and then pay the remainder of the balance off the books.

5 The six methods used to transport currency out of the United States are: physical transportation; wire transfer; cashier’s check; attorneys, accountants, and money managers; brokerage accounts; and wire services.
   The six methods used to transport currency into the United States are: fictitious loans, fictitious foreign investors, finder’s fees, corporate salaries, cashier’s checks and wire transfers, and physical transportation.

6 Structuring means taking an amount of money in excess of $10,000, breaking it into increments of $10,000 or less, and then conducting multiple transactions for the purpose of evading the CTR reporting requirements. There are many ways money launderers can structure transactions. They can deposit money:
   - Several times a day at the same bank branch
   - At different branches of the same bank on the same day
   - At different banks on the same day
• At the same bank on different days
• At different banks on different days

7 The proceeds of a crime are “whatever is received when an object is sold, exchanged, or otherwise disposed of.” Money is not the only proceed that may result from a crime. Goods and services are also considered proceeds.

8 A major difference between the two types of forfeitures has to do with the burden of proof required and who that burden rests with. In a criminal forfeiture, the burden of proof is “beyond a reasonable doubt” and it rests with the government. In a civil forfeiture, the burden of proof is a “preponderance of evidence” and it rests with the claimant.

9 The car described assisted the criminal in performing a crime. It is subject to forfeiture.

10 The methods of indirect proof can be used to show that a suspect “lives beyond his or her means,” and although they cannot pinpoint from where the suspect is receiving his or her additional funds, the methods of indirect proof can be used to strengthen the means of support or close proximity factors in establishing probable cause for forfeiture.
This glossary contains terms presented in the text as well as terms which may be brought out in discussion.

**Account**
An accounting device used in recording the day-to-day changes in revenue, expense, asset, liability, and owner's equity items.

**Account, nominal.** Temporary account for an item appearing on an income statement and closed to a balance sheet account at the end of an accounting period.

**Account, real.** Account for an item appearing on a balance sheet.

**Accounting**
The system of recording and summarizing business and financial transactions in books and analyzing, verifying, and reporting the results.

**Accounting, cost.** The process of collecting material, labor, and overhead costs and attaching them to products.

**Accounting Period**
The period of time over which the transactions of a business are recorded and at the end of which a financial statement is prepared.

**Account Payable**
An obligation to pay an amount to a creditor.

**Account Receivable**
An amount that is owed to the business, usually by one of its customers, as a result of the ordinary extension of credit.

**Account Transactions**
Financial events that directly affect the movement of money through a bank account.

**Accrual Basis of Accounting**
Recording business revenues when they are earned, regardless of when they are collected.
and recording expenses when they are incurred, regardless of when cash was disbursed.

**Accrued Expenses**
Expenses incurred but not yet paid for.

**Accrued Income**
Income earned but not yet received.

**Adjusting Entry**
Recording the correction of an error, accruals, writeoffs, provisions for bad debts or depreciation, etc., expressed in the form of a simple journal entry.

**Affiant**
The person who prepares an affidavit.

**Affidavit**
A handwritten or typed declaration or statement of facts made voluntarily and confirmed by the oath or affirmation of the party making it before an officer having authority to administer such oath.

**Alien Corporation**
Corporation of another nationality operating in the United States.

**Amortize**
To write off a portion or all of the cost of an intangible asset.

**Appraise**
Cash or value established by systematic procedures that include physical examination, pricing, and often engineering estimates.

**Asset**
Property or resources owned by a business or individual.

**Asset, current. An asset which is either currently in the form of cash or is expected to be converted into cash within a short period, usually one year.**

**Asset, fixed. Tangible property of relatively long life that generally is used in the production of goods and services.**

**Association Matrix**
The graphic summary that results from link analysis.

**Audit**
A critical review of a business's accounting records.

**Bad Debts**
Accounts that are considered to be uncollectible.

**Balance, Beginning**
The amount in an account at the start of the accounting period.

**Balance, New**
The amount in an account at the end of the accounting period.
period, it is the difference between the beginning balance plus increases and minus decreases.

**Balance Sheet**
A financial statement that reports the assets, liabilities, and equities of a company as of a specified time.

*Balance Sheet, consolidated.*
Aggregate accounts for the various categories of assets and liabilities of a corporate family (more than one corporation).

**Bank Deposit Method**
An indirect method of proving unknown sources of funds through an analysis of bank records and other financial transactions entered into by a suspect.

**Bank Reconciliation**
A comparison of the customer's records with the records of the bank, listing differences to bring balances into agreement.

**Bank Statement**
A document rendered by the bank to the depositor, usually monthly, which reflects deposits and checks which have cleared the bank.

**Blackmail**
A demand for money or other considerations under threat to do bodily harm, to injure property, to accuse of crime, or to expose disgraceful defects.

**Bond**
Any interest bearing or discounted government or corporate security that obligates the issuer to pay the bondholder a specified sum of money, usually at specific intervals, and to repay the amount of the loan at maturity.

*Bond, corporate.* A bond issued by a private corporation.

*Bond, coupon.* A bond that has coupons attached to the bond certificate, one coupon for each interest payment due during the life of the bond. The interest is payable to whoever turns in the coupon, whether or not that person initially bought the bond.

*Bond, municipal.* A bond issued by a state, county, municipality, or any agency thereof.

*Bond, registered.* A bond where the name of the owner appears on the bond certificate. Interest on the bond is paid by check directly to the registered holder.

*Bond, registered coupon.* A bond where the name of the owner appears on records maintained by a registrar and/or transfer agent. The interest
coupons attached to the bond certificate do not contain the name of the owner and are payable to the bearer.
Registered coupon bonds are registered for the principal only, not for interest.

**Bribery**
When money, goods, services, information, or anything else of value is offered with the intent to influence the actions, opinions, or decisions of the taker.

**Bylaws**
The rules adopted by the stockholders setting forth the general method by which the corporate functions are to be carried on subject to the corporate charter.

**Case Law**
The practice of judges and lawyers looking into decisions from past cases to determine the state of law for the case they are currently handling.

**Cash Basis of Accounting**
Recording business revenues when cash is received and business expenses when cash is paid.

**Cash Flow**
The cash flow calculation attempts to measure the actual cash receipts and cash expenses of a firm.

**Cashier's Check**
A check drawn by a bank on its own funds and issued by an authorized officer of the bank.

**Certified Check**
A check where the bank guarantees that there are sufficient funds on deposit for that particular check.

**Chart of Accounts**
A listing, in sequentially numbered order, of a business's accounts.

**Civil Law**
That body of law that deals with conflicts and differences between individuals.

**Closed Corporation**
Corporation owned by a few stockholders, not available for investment by public.

**Codification**
The process of collecting and arranging laws by subject.

**Collateral**
Something of value pledged as security for a loan.

**Common Law**
The system of law that originated in England and was the body of law carried by the earliest English settlers to the American colonies.
Contingency
A possible future event or condition arising from causes unknown or at present undeterminable.

Contra Account
One of two or more accounts which partially or wholly offset each other. On financial statements, they may either be merged or appear together. For example, an account receivable from and payable to the same individual.

Cooperative
A corporation in which profits are distributed to shareholders in proportion to the amount of business each shareholder does with the company.

Counterfeiting
Copying or imitating an item without having been authorized to do so and passing the copy off for the genuine or original item.

Corporation
An artificial being or business entity created under state or federal law which is legally separate from the persons who own it. Ownership is in the form of stock and the liability of the owners is limited to the amount of their investment in the company.

CR
Abbreviation of credit.

Credit Entry
An entry on the right-hand side of a T-account.

Creditor
One who lends money.

Criminal Law
That branch of law that deals with offenses of a public nature, that is, wrongs committed against the state.

Cartilage
The area inside the boundary of a person's residence or business location which has been marked off by man-made or naturally-occurring devices.

Debit Entry
An entry on the left-hand side of a T-account.

Debt
Current and non-current liabilities.

Defalcation
The embezzlement of money.

Depreciation
The expiration of an asset's "quality of usefulness."

Discount
Amount by which the face value of a financial instrument exceeds the sales price.
Dividend
Portion of a company’s profits distributed to stockholders.

Dividend, cash. Dividend paid in the form of cash.

Dividend, property. Dividend paid in the form of stock from another corporation.

Dividend, stock. Dividend paid in the form of shares of stock in the issuing corporation.

Domestic Corporation
A corporation doing business in the state from which it received its charter.

Double-Entry Accounting
The type of accounting in which the two aspects of each financial event are recorded.

DR
Abbreviation of debit.

Draft
An order in writing directing the payment of money by one party (the drawee) to another party (the payee). A bank check is an example of a draft.

Electronics Fund Transfer
A transaction with a financial institution by means of a computer, telephone, or electronic instrument.

Elements of a Crime
Those constituent parts of a crime that must be proven to sustain a conviction.

Embezzlement
When one entrusted with money or property appropriates it for his or her own use and benefit.

Entry, Closing
An entry reducing one account to zero and offset by an entry increasing another account by the same amount. It is one step in transferring the balance of an account to another account.

Equity, Owner’s
Claims against assets by the owner(s).

Evidence
Anything that can make a person believe that a fact or proposition is true or false.

Evidence, circumstantial.
Evidence relating to a series of facts other than those at issue that tend, by inference, to establish the fact at issue.

Evidence, direct. Evidence precise to the point at issue.

Evidence, documentary.
Evidence in the form of writings and documents.
Evidence, real. Evidence that is tangible.

Evidence, testimonial. Evidence given by word of mouth.

Exemplar
Non-testimonial identification evidence from a defendant, such as a blood or handwriting sample.

Expenditure
Payment for acquiring an asset or service.

Expenditures Method
An indirect method of determining unknown sources of funds by comparison of all known expenditures with all known receipts during a particular period of time.

Expense
Goods or services consumed in operating a business.

Expense, accrued. A liability account arising from expenses that are incurred prior to the related expenditure, for example, accrued wages.

Expense, prepaid. An expense recognized after a relevant expenditure, for example, future benefits.

Extortion
Illegally obtaining property from another by actual or threatened force, fear, or violence, or under cover of official right.

Felony
A serious crime punishable by incarceration for a period exceeding one year, a fine, and the loss of certain civil rights.

Financial Condition
The results conveyed by presenting the assets, liabilities, and capital of an enterprise in the form of a balance sheet. Sometimes called financial position.

Financial Interviewing
The systematic questioning of persons who have knowledge of events, those involved, and evidence surrounding a case under investigation.

Fiscal Year
An accounting period of twelve successive calendar months.

Foreign Corporation
A corporation with a charter from another state. A California corporation doing business in Nevada is a foreign corporation in Nevada.

Forensic Science
The application of scientific techniques to legal matters.
**Forgery**
Passing a false or worthless instrument, such as a check or counterfeit security, with the intent to defraud or injure the recipient.

**Forfeiture**
A legal proceeding that the Government initiates against the proceeds of an illegal activity.

**Fraud**
Falsely representing a fact to another in order to induce that person to surrender something of value.

**General Partner**
A partner personally liable for partnership debts.

**Goodwill**
An intangible asset representing the difference between the purchase price and the value of the tangible assets purchased.

**Grand Jury**
A jury who hears evidence obtained by the prosecution and then decides whether or not a trial ought to occur.

**Guarantor**
One who promises to make good if another fails to pay or otherwise perform an assigned or contractual task.

**Hearsay**
Evidence that does not come from the personal knowledge of the declarant but from the repetition of what the declarant has heard others say.

**Hybrid Method**
Method of accounting which is a combination of the cash and accrual methods.

**Immunity**
An investigative tool used by the grand jury that allows a witness to provide testimony or documents without fear of prosecution.

**Income Statement**
A financial statement showing revenues earned by a business, the expenses incurred in conducting business, and the resulting net income or net loss.

**Income, Net**
Excess of total revenues over total expenses in a given period.

**Indictment**
A formal written complaint of criminal charges.

**Indirect Methods**
Ways of proving unknown or illegal sources of funds which rely upon circumstantial evidence.
Informant
A person who has specific knowledge of a criminal event and provides that information to a law enforcement officer.

Insider Trading
Using “inside” or advance information to trade in shares of publicly held corporations.

Intangible Asset
Any nonphysical asset, such as goodwill or a patent, which has no physical existence. Its value is dependent on the rights that possession confers upon the owner.

Interest
Charge for the use of money.

Interrogation
Questioning of suspects and/or uncooperative witnesses for the purpose of obtaining testimony and evidence or proof of significant omissions.

Interview
A specialized form of face-to-face communication between people that is entered into for a specific task-related purpose associated with a particular subject matter.

Inventory
Goods being held for sale, and material and partly finished products, which upon completion, will be sold.

Investment Banker
A person or company in the business of marketing bonds and stocks for a corporation desiring to raise money.

Invoice
Bill for goods delivered or services rendered.

Journal
A book of original entry in which transactions are initially recorded before being posted to a ledger.

Judicial Notice
When a court recognizes the existence and truth of certain facts.

Kickback
When a person who sells an item pays back a portion of the purchase price to the buyer or public official.

Lapping
The substitution of checks for cash received. A term used in embezzlement schemes.

Larceny
Wrongfully taking another person’s money or property with the intent to appropriate, convert, or steal it.
**Law**
A formal means of social control intended to guide or direct human behavior toward ends that satisfy the common good.

**Ledger**
An accounting device used to summarize journal entries by specific accounts.

**Lessee**
The person or company possessing and using a leased item.

**Lessor**
The person or company holding legal title to a leased item.

**Letter of Credit**
A document issued by a bank authorizing designated banks to make payments on demand to a specified individual up to a stated total amount.

**Liability**
A debt owed.

*Liability, current.* Obligation that becomes due within a short time, usually one year.

*Liability, long-term.* Obligation with maturity dates more than one year after the balance sheet date.

**Line of Credit**
A commitment by a bank to a borrower to lend money at a stated interest rate for a stated period.

**Link Analysis**
A technique for evaluating, integrating, and presenting complex information collected from various sources and putting them together to show patterns and meanings.

**Liquidity**
Ability to meet current obligations.

**Loss, Net**
Excess of total expenses over total revenue in a given period.

**Mala In Se**
Crimes that are said to be evil or immoral in and of themselves.

**Mala Prohibita**
Offenses that are made criminal by statute but in and of themselves are not necessarily immoral.

**Maturity of Loan**
The due date of a loan.

**Memorandum**
A written record of a interview embodying something that an investigator desires to fix in memory.

**Mens Rea**
A legal term meaning proof of criminal intent.
Misdemeanor
Crimes less serious than felonies that are punishable by incarceration for a period of less than one year and/or a fine.

Money Laundering
The process by which one conceals the existence, illegal source, or legal application of income and then disguises that income to make it appear legitimate.

Money Order
A negotiable instrument that serves as a substitute for a check.

Mutual Company
Type of corporation that has no stockholders, but is owned by its customers.

Net Worth
The excess of asset value over creditor claims; Assets - Liabilities = Net Worth (Equity).

Net Worth Method
An indirect method of proving unknown sources of funds by comparing net worth at the beginning and end of specified period of time.

Note
A written promise to repay a loan.

Note Receivable
A debt that is evidenced by a note or other written acknowledgment.

Open Corporation
A corporation whose stock is available for investment by the public.

Partner
One of the owners of an unincorporated business.

Par Value
A specified amount printed on the face of a stock certificate.

Partnership
A company created when two or more individuals agree to do business together.

Percentage Method
An indirect method of proving unknown sources of funds by using percentages or ratios considered typical of a business under investigation.

Physical Inventory, Taking of
Counting all merchandise on hand, usually at the end of an accounting period.

Posting
Transfer of an entry from a journal to a ledger account.

Probable Cause
All the facts and circumstances within the knowledge of an
investigator about a criminal activity that can be considered reasonable and trustworthy.

**Proceeds**
Whatever is received when an object is sold, exchanged, or otherwise disposed of.

**Profit and Loss Account**
A temporary account where revenue and expense accounts are transferred at the end of an accounting period.

**Profit, Gross**
Sales minus cost of goods sold.

**Proof**
The establishment of a fact by evidence.

**Proprietor**
The owner of an unincorporated business.

**Proprietorship**
A business owned by one person who is usually both the manager and the owner.

**Prospectus**
A summary of a corporation registration statement designed to inform a prospective purchaser of securities. It must contain a fairly extensive disclosure statement of essential facts pertinent to the security.

**Question and Answer Statement**
A complete transcript of the questions, answers, and statements made by each participant during an interview.

**Questioned Document**
A document that has been questioned in whole or in part in respect to its authenticity, identity, or origin.

**Racketeering**
Running an illegal business for personal profit.

**Reasonable Doubt**
The degree of certainty a person has in accomplishing or transacting the more important concerns in everyday life.

**Registration Statement**
A statement describing, in detail, the financial condition of a corporation, its business, and the reasons it proposes to offer an issue of stocks or bonds to the public.

**Revenue**
An increase in owner's equity arising from operations.

**Search Warrant**
A written order by a judge or magistrate, it describes the place to be searched as well as the items to be seized.
Security
A stock, bond, note, or other document that represents a share in a company or a debt owed by a company or government entity.

Shell Corporation
A corporation that has no assets or liabilities, simply a charter to do business.

Single-Entry Accounting
A system of accounting that makes no effort to balance accounts.

Silent Partner
A partner not liable for debts of the partnership beyond the amount of his or her investment in the partnership and who does not participate in management. Also known as a limited partner.

Stakeout
A common term for stationary surveillance.

Sting
A short-term undercover operation.

Stock
Ownership of a corporation represented by shares that are a claim on the corporation's assets and earnings.

Stock, capital. Stock that is authorized by a company's charter.

Stock, common. Units of ownership in a company that allow the owner to receive dividends on his or her holdings.

Stock, issued. The number of shares of stock actually sold or distributed by a corporation.

Stock, outstanding. Issued stock less treasury stock.

Stock, preferred. The class of stock entitled to preferential treatment with regard to dividends or with regard to the distribution of assets in the event of liquidation.

Stock, treasury. Shares of stock issued and subsequently reacquired by the corporation.

Stock Certificate
A document evidencing ownership in a corporation.

Stockholders
An owner of an incorporated business with the ownership being evidenced by stock certificates.

Stock Split
An exchange of the shares outstanding for two or more times their number.
**Subpoena**
A document that requires a witness to appear before a grand jury or requires the witness to produce records and documents for the grand jury.

**Substantive Law**
The body of law that creates, discovers, and defines the rights and obligations of each person in society.

**Surplus, Capital**
An increase in owner's equity not generated through the company's earnings.

**Surveillance**
The secretive and continuous observation of persons, places, and things to obtain information concerning the identity and activity of individuals suspected of violating criminal laws.

**T-Account**
An accounting device used for recording increases and decreases on either side of vertical line, with account title on the top.

**Tax Evasion**
Committing fraud in filing or paying taxes.

**Torts**
A term used in civil law, it refers to the private wrongdoings between individuals.

**Transaction**
The exchange of goods and services.

**Treasury Bill**
A short-term security offered by the U.S. Government with maturities of 13 weeks, 36 weeks, and 52 weeks.

**Treasury Bond**
A long-term security offered by the U.S. Government with maturities of 10 years or longer.

**Treasury Note**
An intermediate-term security offered by the U.S. Government with maturities from one to ten years.

**Trial Balance**
A list of the account balances arranged in "balance sheet order" by debits and credits with adjustment columns for entries. Used as a basis summary for financial statements.

**Undercover Operation**
An investigative tool where law enforcement officers or private individuals assume an identity other than their own for the purpose of gathering information relating to criminal violations.
**Underwriter**
A person or firm guaranteeing and usually participating in the marketing of securities to the public. The guarantee states the dollar amount the underwriter guarantees that the corporation will receive from the sale.

**Underwriting Syndicate**
A group of underwriters formed for the purpose of guaranteeing the successful sale of a particular issue of securities.

**Unit and Volume Method**
An indirect method of proving unknown or illegal sources of funds by applying price or profit figures to the known quantity of business.

**United States Code**
A multi-volume publication of the text of statutes enacted by Congress.

**Voucher System**
A control system within a company for cash payment.

**Worksheet**
An accounting device used to organize accounting data.
Appendix A

This appendix contains a listing of selected sources of business information and government records available to the financial investigator.

**Business Records**

**Abstract and Title Company Records**
- Maps and tract books.
- Escrow index of purchasers and sellers of real estate (primary source of information)
- Escrow files (number obtained from index)
- Escrow file containing escrow instructions, agreements, and settlements
- Abstracts and title policies
- Special purpose newspapers published for use by attorneys, real estate brokers, insurance companies, and financial institutions. These newspapers contain complete reports on transfers of properties, locations of properties transferred, amounts of mortgages, and releases of mortgages.

**Agriculture Records**
- County veterinarians
- Commission merchants
- Insurance companies (insure shipments)
- Transportation companies
- Storage companies
- County and state fair boards
- County farm agents
- State cattle control boards (some states maintain records of all cattle brought in and taken out of state)

**Automobile Manufacturer and Agency Record**
- Franchise agreements
- Financial statements of dealers
- New car sales and deliveries (used car purchases, trade-ins, and sales)
- Service department (mileage, order, and delivery signature to indicate presence in area)

**Bonding Company Records**
- Investigative and other records on persons and firms bonded
- Financial statements and date
- Address of person on bond

**Specialized Commercial Credit Organizations**
- United Beverage Bureau
- National Fuel Credit Association
- Jewelers Board of Trade
- Lumbermen's Credit Association
- Produce Reporter Company
- Packer Produce Mercantile Agency
- Paper and Allied Trade Mercantile Agency
- Lyon Furniture Mercantile Agency
- American Monument Association

**Credit Reporting Agencies**
The Fair Credit Reporting Act of 1971 restricts the availability of information from credit reporting agencies to government investigative agencies. Credit reports may only be furnished:

— In response to the order of a court having the jurisdiction to issue such an order;

— Upon written request of the consumer; or

— To a person who has a legitimate business need for the information in regard to a business transaction involving the consumer, including but not limited to credit, insurance, and employment purposes.

There is no specific exception provided in the act that will allow law enforcement agencies to obtain credit reports for investigative purposes. The act provides criminal penalties for obtaining information under false pretenses and for unauthorized disclosures by officers or employees of consumer reporting agencies.

The identifying information which is available under the act is limited to a consumer's name, address, former addresses, place(s) of employment, and former place(s) of employment.

If identifying information is needed for investigative purposes the following credit
reporting agencies can be checked:

- Local credit rating and collection agencies
- Local office of National Association of Retail Credit Men
- Insurance applicants
- American Service Bureau
- Hooper Holmes Agency
- Retail Credit Company
- Mortgage Loans
- Loan exchange (clearing house loan information)
- Retailer's Commercial Agency (performs credit investigations for credit cards, banking, and mortgages)
- Transportation
- TRINC (furnishes statistics on the trucking industry).
- Motor Carrier Directory (lists motor carriers with revenues totaling $50,000 or more).

- Manufacturers
- The "Census File of Manufacturers" contains a census of manufacturing plants in the United States.
- Marketing Services
- Dun and Bradstreet, Inc.
- Market Service Bureau
- Middle Market Director (business guide of firms with a net worth between $500.00 and $1,000,000)
- Million Dollar Directory (business guide firms with a net worth of $1,000,000 or more)
- Metal Working Directory (marketing director of metal working plants in the United States)
- Vendor Account Services (used by retail stores in processing accounts payable, buying, and merchandise control)
- International
- International Credit Reports (a division of Dun and Bradstreet which furnishes credit reports on overseas credit)
- International Market Guides (Middle and South America only)
- Continental Europe (lists European businesses in 39 countries)
- Guide to Key British Enterprises (lists prominent firms throughout the United Kingdom)
Synopsis of Dun– Mexico
Synopsis of Dun– Brazil
Reference book– Argentina
Bradstreet Register
International Mercantile Claims Division

Department Store Records
• Charge accounts
• Credit files

Detective Agency Records
• Investigative files

—Civil
—Criminal
—Commercial
—Industrial
• Character checks
• Fraud and blackmail investigations
• Divorce evidence
• Missing persons search
• Security patrols and guards
• Undercover agents
• Shadow work
• Lie detector tests
• Personnel screening and fingerprinting
• Service checking
• Restaurants

• Public transportation
• Stores

Distributors’ Records
• Wholesale toiletry (cash rebates are paid by toiletry manufacturers). Details of available contracts which pay rebates to wholesale toiletry distributors are contained in publications issued by the Toiletry Merchandisers Association, Inc., 230 Park Avenue, New York, N.Y. 10017, and the Druggist Service Council, Inc., 1290 Avenue of the Americas, New York, N.Y. 10019

• Gambling equipment
• Wire service
• Factory, farm, home, office equipment, etc.

Drug Store Records
• Prescription records (name, address, date, and physician issuing prescription)

Fraternal, Veterans, Labor, Social, and Political Organization Records
• Membership and attendance records

• Dues, contributions, and payments
• Locations and history of members
Hospital Records
- Entry and release dates
- Payments made

Hotel Records
- Identity of guest
- Payments made by guest
- Credit record
- Forwarding address
- Reservations for travel (transportation companies and other hotels)
- Telephone calls made to and from room
- Freight shipments and luggage (in and out)

Insurance Company Records (Life, accident, fire, burglary, automobile, and annuity policies)
- Applications (background and financial information, insurance carried with other companies)
- Fur and jewelry floaters (appraised value and description)
- Customers’ ledger cards
- Policy and mortgage loan accounts
- Dividend payment records
- Cash value and other net worth data
- Correspondence files
- Payment records on termination, losses, or refunds on cancellations
- Payments to doctors, lawyers, appraisers, and photographers hired directly by the insurance company to act for the company or as an independent expert

Laundry and Dry Cleaning Records
- Marks and tags (marks are sometimes invisible and are brought out by use of ultraviolet rays)
- Files of laundry marks

—Local or State police departments
—National Institute of Dry Cleaning, Inc., Washington, D.C.

Lenders Exchange or Consumer Loan Exchange
An organization known as the Consumer Loan Exchange or Lenders Exchange exists in all of the large cities in the United States, as well as in some of the smaller cities. It is a nonprofit organization supported by and for its members. Most the lending institutions are members of the exchange. It can supply information concerning open and closed loan accounts with member companies, and is a good source of general back-
ground information. These organizations are not listed in directories or telephone books. Their location in a city may be obtained through local lending agencies.

**National Charge Plan Records**

National agencies, such as American Express, Diners Club, and Carte Blanche, which provide credit cards for use in charging travel, entertainment, goods and services, can determine whether an individual or business has an account from their central index files. If details of the account are needed, information requests should indicate whether only copies of the monthly statements or copies of both the statements and charge slips are desired, name, social security number, the time period to be covered, the subject’s address, and the name and address of the subject’s employer or business. Requests should be directed to:

American Express Company,
770 Broadway, New York, N.Y. 10003, and Diners Club/Carte Blanche, Adjustment Department, 180 Inverness Drive West, Englewood, CO 80111.

**Newspaper Records (from a newspaper’s morgue)**

- Relatives, associates, and friends
- Previous places of employment (employee or company publications)
- Police and FBI files
- Schools (yearbooks, school papers, etc.)
- License bureaus (drivers, chauffeurs, taxis, etc.)
- Military departments
- Fraternal organizations
- Church groups
- Race tracks
- Nightclub or sidewalk photographers and photography studios

**Public Utility Company Records**

- Present and previous address of subscriber
- Payments made for service and “major” purchases

**Publications**

- *Who’s Who in America* and various States
- Tax services
- City directories
- *Billboard* (amusements, coin-machines, burlesque, drive-ins, fairs, state, radio, TV, magic,
music machines, circuses, rinks, vending machines, movies, letter lists, and obituaries)

- **Variety** (literature, radio, TV, music, state, movies, obituaries, etc.)

- **American Racing Manual** (published by Triangle Publications, Inc., 10 Lake Drive, P.O. Box 7015, Highstown, New Jersey 08520). Records showing amounts paid to owners of winning horses by each race track in the United States, Canada, and Mexico

- Professional, trade, and agriculture directories and magazines

- **Moody’s Investors Service Inc.**

- **Standard and Poor’s Corporation**

**Real Estate Agency or Savings and Loan Association Records**

- Property transactions

- Financial statements

- Payments made and received (settlement sheets)

- Credit files

- Loan applications. These do not contain quite the same information as loan applications given to a bank. A savings and loan association depends primarily upon real estate security rather than upon other assets and liabilities of a borrower.

**Telephone Company Records**

- Local directories, library of “out of city” directories

- Message unit detail sheets (in some areas) which list numbers called by a particular telephone

- Investigative reports on telephones used for illegal purposes

- Payments for service

- Toll calls. Because of the existence of more than one long distance carrier, toll records of a local phone company may be an incomplete listing of such calls. There may be a second telephone bill from another company, such as GT&E or MCI.

**Transportation Company Records**

- Passenger lists, reservations

- Destinations

- Fares paid

- Freight carrier-shippers, destinations, and storage points

- Departure and arrival times

**Government Records**

**State Police (Central Records Section)**

- Criminal cases

- Criminal intelligence
• Inflammable liquid installations
• Firearms registrations
• Investigations conducted for other departments
• Traffic arrests and motor vehicle accident investigations
• Noncriminal and criminal fingerprint records
• "Rogues gallery"
• Investigation of aviation rules and non-carrier civilian aircraft accidents
• Police training school files

City Police
• Criminal identification
  —Records of arrests, accidents, and general information
  —Alphabetical indexes of every complainant or suspect
  —"Aided" cards (citizen assistance)
—Gun permits or applications and registrations
—Lost or stolen articles
—Pawn shop files
—Towed or repossessed autos
—Ambulance files
—Business information files
—"Scofflaw files" (consistent violator of minor offense—primarily traffic)

• Other divisions
  —Criminal division files
  —Forgery squad (check squad)
  —Juvenile division
  —Morals or vice squad files
  —Narcotics bureau
  —Organized crime division
  —Police force personal history files
  —Public relations office (press file)
  —Traffic division files

Small Town Police
• Criminal index cards
• Criminal arrest cards
• Accident reports
• Complaint forms
• Offense reports

County Police (Sheriff)
• Criminal records
  —Crimes involving bodily violence
  —Crimes involving theft
  —Crimes involving worthless checks
—Personal history sheets on people connected with the crimes
—Juvenile division records
—County business owners
  • Traffic records
—Name, address, license plate number, driver’s license number, arrest number, date and place of birth, sex, color, age, occupation, height, weight, complexion, color of hair, eyes, marks, and facts of arrest

National Sheriffs Association Directory
  • List of State institutions and their superintendents
  • State and Federal enforcement agencies and territorial jurisdictions
  • Associate members of National Sheriffs Association
  • County sheriffs
  • Address of National Auto Theft Bureau

Other State and Local Law Enforcement and Quasi-Law Enforcement Organizations
  • Specialized police organizations
  • Public, semi-public, and private organizations
  • The industrial security officer
  • International Association of Chiefs of Police
  • The monthly police administration review list of police publications

State and Local Court Records
Typically, there are three levels of courts within the State system. There is a Trial Court, where most litigation begins, an Appellate Court, which is the first level of appeal, and Court of Final Appeal. Sometimes you will find a court below the Trial Court which works much like the magistrate does in the Federal system.

Most litigation, such as divorce or breach of contract, takes place in the State and local system. Documents submitted to the court in connection with a divorce are particularly helpful in financial investigations. It is not unusual for detailed asset and liability information to be present in a divorce file.

Probate records describing estates and distribution of estates are also found in the State and local court system. These may be particularly helpful in negating nontaxable sources of cash.

Anytime a person is involved in a civil action, whether it be
for breach of contract or some type of negligence action, a wealth of background information on the individual is usually provided to the opposing party through the court. A record of this information will be kept in the case files of the court and is available to an investigator.

Federal Government Records

Bureau of Alcohol, Tobacco, and Firearms (ATF)
- Distillers, brewers, and persons or firms who manufacture or handle alcohol, as a sideline or main product
- Inventory or retail liquor dealers and names of suppliers as well as amounts of liquor purchased by brand
- Names and records of known bootleggers
- Names of subjects of investigations by ATF
- Processors, manufacturers, and wholesalers of tobacco products
- List of all Federal firearms license holders, including manufacturers, importers, and dealers
- List of all Federal explosives license holders, including manufacturers, importers, and dealers
- For weapons manufactured or imported after 1986, capability of tracing any firearm from manufacturer or importer to retailer

Bureau of the Public Debt
- U.S. savings bonds purchased and redeemed
- Requests for information must be addressed to:
  Bureau of the Public Debt
  Division of Transactions and Rulings
  200 Third Street
  Parkersburg, West Virginia
  26101

Federal Aviation Agency (FAA)
This agency maintains records which reflect the chain of ownership of all civil aircraft in the United States. These records include documents relative to their manufacture and sale (sales contracts, bills of sale, mortgages, liens, transfers, inspections, and modifications). They also maintain licensing and medical information on pilots.

Federal Aviation Administration
Civil Aviation Security Division
AAC-90, P.O. Box 25082
Oklahoma City, Oklahoma
73125
**Department of Agriculture**
- Licensed meat packers and food canners
- Inspections made under Pure Food and Drug Act
- Transactions with individuals and businesses (subsidies and adjustments)

**Department of Defense**
The Department of Defense maintains data concerning pay, dependents, allotment accounts, deposits, withholding statements (Forms W-2), and any other financial information relative to military personnel. This information is available at one of the following offices, depending upon the branch of the Armed Forces to which the individual was or is presently attached:

- United States Army Finance Center
  Indianapolis, Indiana 46249
  Request must include the complete name and Army serial number

- Air Force Finance Center
  RPTP
  Denver, Colorado 80279
  Director, Bureau of Supplies and Accounts
  National Stolen Property Index (stolen government property, including military property)

- Navy Bureau of Supplies and Accounts
  Department of the Navy
  13th and Euclid Streets
  Cleveland, Ohio 44115

**Department of the State**
- Import and export licenses
- Foreign information
- Passport records (date and place of birth required). Recent data may be obtained from the local district court.

**Drug Enforcement Administration (DEA)**
- Licensed handlers of narcotics
- Criminal records of users, pushers, and suppliers of narcotics

**Federal Bureau of Investigation (FBI)**
- Criminal records and fingerprints
- Anonymous Letter Index
- National Stolen Property Index (stolen government property, including military property)
- Nonrestricted information pertaining to criminal offenses and subversive activities

**U.S. Customs Service**
- Record of importers and exporters
- Record of custom house brokers
• Record of custom house truckers (cartage licenses)
• List of suspects
• Records of persons who transport or cause to be transported currency of more than $10,000, or certain monetary instruments at one time into or out of the United States

**U.S. Secret Service**
• Records pertaining to counterfeit, forgery, and United States’ security violation cases
• Records pertaining to anonymous letters and background files on persons who write “crank” letters
• Secret Service’s central files in Washington, D.C., contain an estimated 100,000 handwriting specimens of known forgers. An electronic information retrieval system facilitates comparison of questioned handwriting with the specimens on file for identification purposes.

**U.S. Postal Service**
• Mail watch or cover
• Current or forwarding addresses of subjects and third parties
• Photostats of postal money orders. Requests for such records must be addressed to:

Money Order Division
Postal Data Center
P.O. Box 14965
St. Louis, Missouri 63182

• Addresses of post office box holders. These requests should be made only when efforts to obtain the information from other sources are unsuccessful. Information can be obtained from the Inspector-in-Charge or Postal Inspector. Check with the local post office to learn the identity of the inspector who can furnish the information.

**Immigration and Naturalization Service (INS)**
• Records of all immigrants and aliens
• Deportation proceedings
• Passenger manifests and declarations (ship, date, and point of entry required)
• Naturalization records (names of witnesses to naturalization proceedings and people who know the suspect)
• Lists of passengers and crews on vessels from foreign ports
• Financial statements of aliens and persons sponsoring their entry

**Interstate Commerce Commission (ICC)**
The ICC has information con-
cerning individuals who are or have been officers of transportation firms engaged in interstate commerce. This information includes the officer’s employment and financial affiliations.

In addition to the record information available from the ICC, most safety inspectors of the ICC are good sources of “reference” information because they have personal knowledge of supervisory employees of the various carriers in their region.

**IRS National Computer Center**
The National Computer Center is located in Martinsburg, West Virginia and it maintains the Master File, a tax record of all known taxpayers. The Master File is designed to accumulate all data pertaining to the tax liabilities of all taxpayers, regardless of location. The Master File is separated into several categories. Two of the categories are the Business Master File and the Individual Master File.

**Securities and Exchange Commission (SEC)**
- Records of corporate registrants of securities offered for public sale, which usually show:
  - A description of the registrant’s properties and business
  - A description of the significant provisions of the security to be offered for sale and its relationship to the registrant’s other capital securities
  - Information as to the management of the registrant
  - Certified financial statements of the registrants

- Securities and Exchange Commission News Digest (a daily publication giving a brief summary of financial proposals files and the actions taken by the SEC)
- The SEC Bulletin is issued quarterly and contains information of official actions with respect to the preceding month. It also contains a supplement which lists the names of individuals reported as being wanted on charges of violations of the law in connection with securities transactions. It is available upon request at any of the SEC regional or branch offices in the following cities:
  - Atlanta, GA
  - Miami, FL
  - Boston, MA
  - New York, NY
  - Chicago, IL
  - Philadelphia, PA
  - Cleveland, OH
  - Salt Lake City, UT
Denver, CO
San Francisco, CA
Detroit, MI
Seattle, WA
Fort Worth, TX
St. Louis, MO
Los Angeles, CA
Washington, D.C.

- The SEC’s Securities Violations Section maintains comprehensive files on individuals and firms who have been reported to the Commission as having violated Federal or State securities laws. The information pertains to official actions taken against such persons, including denials, refusals, suspensions, and revocations of registrations; injunctions, fraud orders, stop order, cease and desist orders; and arrests, indictments, convictions, sentences, and other official actions.

**Social Security Administration**
The Social Security Administration, headquartered in Baltimore, is responsible for the issuance of social security numbers. Records on social security paid by an individual or business are not available for review by the public.

If a social security number is known, it might lead to helpful information regarding the location in which the card was issued. Since many people apply for a social security number at a young age, this in turn can lead to locating the place of birth of an individual. There are nine digits in the social security number. With the exception of the 700 series, the first three digits reflect the state of issue. The last six digits are individual identifiers. The table on the next page contains a listing of the states of issue of the first three digits.

</tbody>
</table>
Veterans Administration (VA)
- Records of loans, tuition payments, insurance payments, and nonrestrictive medical data related to disability pensions are available at regional offices. This information including photostats, may be obtained by writing the appropriate regional office. All requests should include a statement covering the need and intended use of the information. The veteran should be identified clearly and, if available, the following information should be furnished:
  —VA claim number
  —Date of birth
  —Branch of service
  —Dates of enlistment and discharge

Federal Reserve Bank (FRB)
- Records of issue of United States Treasury Bonds

United States Coast Guard
- Records of persons serving on United States ships in any capacity
- Records of vessels equipped with permanently installed motors
- Records of vessels over 16 feet long equipped with detachable motors

Treasurer of the United States
Checks paid by the U.S. Treasury are processed through the Office of the Treasurer of the United States. Photostats of the canceled checks may be obtained by initiating a request through the U.S. government agency which authorized the check.

National Crime Information Center (NCIC)
The National Crime Information Center is a repository of data relating to crime and criminals gathered by local, State, and Federal law enforcement agencies. The NCIC’s computer equipment is located at FBI Headquarters in Washington, D.C. The present equipment is capable of accommodating nearly 2 million records on criminal activities. In a matter of seconds, stored information can be retrieved through equipment in the telecommunications network. Connecting terminals are located throughout the country in police departments, sheriff’s offices, State police facilities, and Federal law enforcement agencies. Dispatchers can respond quickly to requests. NCIC, as well as operating statewide systems, furnishes computerized data in a matter of seconds to
all agencies participating in the centralized State systems. The goal of NCIC is to serve as a national index to fifty statewide computer systems and heavily populated metropolitan area systems.

NCIC Headquarters might be compared to a large automated “file cabinet” with each file having its own label or classification. Such a cabinet of data contains information concerning:

- Stolen, missing, or recovered guns
- Stolen articles
- Wanted persons
- Stolen/wanted vehicles
- Stolen license plates
- Stolen/wanted boats
- Stolen/embezzled/missing securities

**National Law Enforcement Telecommunications System (NLETS)**

NLETS is a computerized communication network linking State and local enforcement agencies in all 50 States. It can provide information such as criminal history, driver’s licenses, and vehicle registration.

**El Paso Intelligence Center (EPIC)**

EPIC is a multi-agency operation that collects, processes, and disseminates information on narcotics traffickers, gun smugglers, and alien smugglers in support of ongoing field investigations.

If a suspect is or has been engaged in any of the previously mentioned activities, it is possible that EPIC will have intelligence information on him or her. This information might include the name of the individual, his or her known activities, significant events, associations among individuals or activities, aircraft or vessels used by the subject, observations of both foreign and domestic movements of the subject, and his or her associates and their aircraft or vessels. EPIC also provides the name, agency, and telephone number of each investigator having expressed an interest in or having data regarding a subject. EPIC records often contain substantial financial information relative to the subject.

**International Criminal Police Organization (Interpol)**

Interpol is an international police agency with bureaus set up in member countries. In the
United States, the National Central Bureau is under the direction and control of the Departments of Justice and Treasury.

The National Central Bureau can assist in such things as criminal history checks, license plate and driver's license checks, and the location of suspects, fugitives, and witnesses.

The Federal Courts

This system is basically a three step process. The first step is the U.S. District Court; the second, the U.S. Court of Appeals; and the third, the U.S. Supreme Court. Since most court records are similar, we will only deal with the U.S. District Court in this appendix.

• U.S. District Courts

There are U.S. District Courts in every State (the larger States have several) and in the District of Columbia, Guam, Puerto Rico, the Canal Zone, and the Virgin Islands.

The U.S. District Court has exclusive jurisdiction in bankruptcy, maritime and admiralty, patents, copyright penalties, fines under Federal law, and proceedings against consul and vice consuls of foreign states. In addition, it has jurisdiction when the United States or a national bank is a party, and in cases where the law specifically states that the U.S. District Court has original jurisdiction.

The U.S. District Courts have concurrent jurisdictions with State courts on "Federal questions" when the dispute arises under the Constitution, laws, or treaties of the United States; disputes between citizens of different States; one U.S. citizen and one citizen of a foreign state; or a citizen and a foreign state.

The U.S. District Court has broad criminal jurisdiction over all offenses against the laws of the United States. When both Federal and State laws are violated by one committing a crime, the offender is subject to prosecution in both the Federal and State courts for the separate crimes.

The files of the clerk's office of a U.S. District Court are not as complex as those of a State court of original jurisdiction. For the investigator, the most important records in the custody of a clerk of a U.S. District Court are the case records. These records consist of the files (case papers), the minutes, and the dockets.

—The files consist of pleadings, processes, and written
orders and judgments of the court, and such other papers as pertain directly to the case.

—The minutes record, in summary form, of what happened during the proceedings. In some courts, the minutes are an integral part of the file.

—The docket sheet on each case is a chronological summary, not only of what takes place in court, but also of the papers in the file. The docket sheet can be very valuable to an investigator who is looking for only one item in a huge file. In most U.S. District Courts there are separate sets of dockets for bankruptcy, and civil and criminal cases. Some clerks have found it to their advantage to keep a set of miscellaneous dockets, and most clerks keep the docket sheets for closed cases in a separate area.

The clerk of a district court will have a record of banking institutions that have been designated as depositories for money of estates in bankruptcy.

The United States District Courts have jurisdiction to naturalize aliens and maintain copies of the certificates of naturalization as well as a name index of the individuals naturalized. If an alien elects to change his or her name at naturalization, both the old and new name appears in the index. In addition, a copy of the subject’s Application to File Petition for Naturalization appears in the court records. This form (N-400) contains considerable information about the alien being naturalized.

• Other Federal Courts

—Court of Claims— The U.S. Government permits certain claims to be brought against itself in the U.S. Court of Claims.

—U.S. Customs Court— When certain merchandise is imported into the United States, customs duties have to be paid to the U.S. Government. Customs collectors at various ports in the United States classify merchandise and appraise it. When an importer complains on the rate, or that the merchandise was improperly excluded, the U.S. Customs Court is the court to which the case must be brought. Appeals
from the U.S. Customs Courts are taken to the Court of Customs and Patent Appeals. This court also reviews certain decisions of the Patent Office and the U.S. Tariff Commission.
Appendix B

This appendix contains information regarding the American Bankers Association prefix numbers of cities and states and a listing of Federal Reserve Districts.

Federal Reserve Districts
1 - Boston
2 - New York
3 - Philadelphia
4 - Cleveland
5 - Richmond
6 - Atlanta
7 - Chicago
8 - St. Louis
9 - Minneapolis
10 - Kansas City
11 - Dallas
12 - San Francisco
American Bankers Association Prefix Numbers

THE NUMERICAL SYSTEM
of The American Bankers Association
Index to Prefix Numbers of Cities and States

Numbers 1 to 49 inclusive are Prefixes for Cities
Numbers 50 to 99 inclusive are Prefixes for States
Prefix Numbers 50 to 58 are Eastern States
Prefix Number 59 is Hawaii
Prefix Numbers 60 to 69 are Southeastern States
Prefix Numbers 70 to 79 are Central States
Prefix Numbers 80 to 88 are Southwestern States
Prefix Number 89 is Alaska

FINANCIAL INVESTIGATIONS

A Financial Approach to Detecting and Resolving Crimes

INSTRUCTOR'S GUIDE
Acknowledgements

The men and women of Internal Revenue Service Criminal Investigation are proud to present this course to the colleges, universities and students who have expressed an interest in learning more about financial investigations.

The purpose of this course is twofold: first, to encourage young men and women to consider law enforcement as an enriching career and second, to bring to the reader's attention the serious and sometimes evil crimes that are motivated by money and greed.

We would like to thank the Internal Revenue Service Special Agents who instructed the pilot courses at the colleges and universities. We would also like to thank the colleges and universities that allowed Internal Revenue Service Criminal Investigation to offer this new course at their institutions.

USING THE INSTRUCTOR GUIDE

WHAT IS THE INSTRUCTOR GUIDE

The instructor guide is a set of instructional materials including student activities, content outline and training aids to be used by you, the instructor, in implementing the course, "Financial Investigations."

The guide is to be used with the course textbook, "Financial Investigations...A Financial Approach to Detecting and Resolving Crimes." There is an instructor guide for each corresponding chapter in the textbook.

HOW THE INSTRUCTOR GUIDE WILL HELP YOU

Each guide provides a resource of "instructional tools." This resource will enable you to design class sessions to meet the specific needs of your students. At the same time, it provides suggestions which will help you work within the parameters of your instructional setting. It may not be feasible to use or implement all the aids and activities listed.

WHAT THE INSTRUCTOR GUIDE CONTAINS

Each chapter instructor guide contains:

- PREPARATION REQUIREMENTS
- INSTRUCTOR NOTES AND PRESENTATION OUTLINE
- APPENDIX
  - Exercise Feedback Sheets
  - Case Studies
  - Role Play Scenarios
  - Chapter Transparencies (printed form)
  - Supplemental Chapter Information
CHAPTER 1: WHY FINANCIAL INVESTIGATION?

LENGTH: 1 Hour

OBJECTIVES:

- State why there is a need for a financial investigative approach.
- Provide a general overview of the financial investigative approach.
- Identify skills required of a financial investigator.

INSTRUCTIONAL METHODS/AIDS:

<table>
<thead>
<tr>
<th>Icons</th>
<th>Illustrations representing the methods and aids used during the instruction. A shaded box indicates method/aid used with the chapter instruction.</th>
</tr>
</thead>
</table>

List of transparencies used during the chapter instruction. Transparencies are numbered for easy reference.

Chapter Reference

The time estimate should be used as a "gauge" in determining how much emphasis should be placed on the chapter instruction. The estimate is based on a total course length of 36 semester hours.
### List of supporting activities in student workbook

- **STUDENT WORKBOOK:** Chapter 1 - Workbook Contents
  - Course Goals
  - Student Questionnaire
  - Personal Net Worth Analysis Exercise - Part I
  - Categories of Crimes Exercise
  - Federal (U.S.) Agencies

- **INSTRUCTIONAL EQUIPMENT:** Overhead Projector

- **INSTRUCTOR REFERENCES:** Financial Investigations...a Financial Approach to Detecting and Resolving Crimes

### Instructor Notes and Presentation Outline

**Instructor Notes**
- Cues for when and how to use training aids, directions for administering activities, or reminders of important content. Icons represent some of the instructional cues.

**Presentation**
- Outline of content to be addressed in the course.

#### I. COURSE ORIENTATION

A. Course Syllabus

Prepare a course syllabus prior to the first class session.

A sample is included in the Appendix, page A1-2. It can be used as a format guide.

Distribute the course syllabus. Discuss the administrative requirements such as class location, testing, grading, attendance, instructor availability and course schedule.
Additional instructional materials provided with the instructor guides include:

- Student Workbook (Separate Notebook)
- Tests/Quizzes

**STUDENT WORKBOOK**

Each student attending the course should have a copy of the Student Workbook. The workbook contains supporting chapter information, case studies and exercises for the instruction. The material is organized by chapter. The instructor guide for the chapter makes reference to when and how to use the workbook. Again, it may not be feasible to use all the information provided. It will be up to you to select what best meets your students' needs.

Additional handout materials that you may wish to give your students may be incorporated into the student workbook, as well as the exercise feedback sheets used during the instruction.

**TESTS/QUIZZES**

A "bank" of written test/quiz items is provided for your use in preparing chapter quizzes, a mid-term and final examination. The items are identified by chapter, thus allowing you to customize examinations based on the content covered and time constraints. The items feature a variety of formats and are based on the chapter objectives.

A printed copy of the test/quiz item bank is included in the Test Section of this notebook.
CHAPTER 1: WHY FINANCIAL INVESTIGATION?

LENGTH: 1 Hour

OBJECTIVES:

- State why there is a need for a financial investigative approach.
- Provide a general overview of the financial investigative approach.
- Identify skills required of a financial investigator.

Financial Investigations...A Financial Approach to Detecting and Resolving Crimes
I. COURSE ORIENTATION

A. Course Syllabus

Prepare a course syllabus prior to the first class session.

A sample is included in the Appendix, page A1-2. It can be used as a format guide.

Distribute the course syllabus. Discus the administrative requirements such as class location, testing, grading, attendance, instructor availability and course schedule.

B. Course Goals

1. Course Goals

Refer students to the Student Workbook, page 1-2, for a summary of the goals discussed.
C. Textbook/Workbook Orientation

Inform the students that the textbook is used as the basis of the course content. The Student Workbook contains additional information and exercises to supplement the material in the textbook. Orient the students to how the textbook and workbook are organized.

Refer to the Student Questionnaire in the Student Workbook, page 1-3. Have the students remove the questionnaire, complete the information requested, and turn in as requested by you. Use this information as a guide in determining the level of complexity needed during each chapter topic discussion. Refer to the information also when grouping students for exercise activities. Recommend that a combination of accounting and criminal justice majors are placed in each work group.

D. Student Questionnaire
Refer students to the Student Workbook, page 1-4. Have the students read the background information pertaining to the exercise or present the information orally to the class. Allow students time in class to complete the remainder of the exercise or assign the exercise as an out-of-class activity that must be completed prior to the next class session. Clarify any information.

II. INTRODUCTION

A. Attention Getter/Motivator

Example: This chapter focuses on the question—Why financial investigation? When bank robber, Willy Sutton, was asked the question, "Mr. Sutton, why do you rob banks?," his response was "Because that’s where the money is." Simply put and to the point. Financial crimes are on the increase; money is becoming an increasingly strong criminal motivator.

Refer to the objectives listed on page 2 of the textbook.

B. Objectives

1. State why there is a need for a financial investigative approach.

2. Provide a general overview of the financial investigative approach.

3. Identify skills required of a financial investigator.
III. INTRODUCTION TO THE FINANCIAL INVESTIGATIVE APPROACH

A. Comparison of Traditional Versus Financial Crimes

1. Old crime classification system (against persons or property)

   Examples: Murder, robbery, burglary, arson

2. New crime classification system (by passion versus greed)

B. Goal of Financial Investigations

1. Identify and document specific events involving the movement of money. Involves a paper trail of events.

2. Relationship of events

3. Records - the trial

Discuss examples of financial crimes in the news today as listed in the textbook on pages 2 through 4.
C. Financial Investigation Process

Inform students that each phase of the process will be addressed in this course.

1. Identify statute violated and the elements of the crime

2. Find evidence to prove elements (using various sources)

3. Trace and document financial transactions to preserve records as evidence

4. Convince the jury of findings
IV. TYPES AND EXAMPLES OF FINANCIAL CRIMES

5. Types of Financial Crimes

Refer to each crime on the transparency as discussed. Give the definition and refer to the examples in the textbook on pages 5 through 8. Solicit information from students on additional examples of the crimes mentioned. Use daily newspaper articles as a source of information on financial crimes.

A. Fraud - Falsely representing a fact to get another person to surrender something of value.

B. Tax Evasion - Fraud committed in conjunction with filing or paying taxes.

C. Bribery - Something of value is used to influence the action of others.

D. Embezzlement - Person who has money entrusted to him/her appropriates it for his/her own use.

E. Larceny - Person wrongfully takes another's money or property with the intent of stealing.

F. Forgery - Person passes a false or worthless instrument with the intent to defraud or injure the recipient.
Inform students that Chapter 11 addresses additional information on money laundering.

G. Counterfeiting - Person copies or imitates an item without having authority to do so.

H. Blackmail - Person demands money or other consideration under threat to do injury to another.

I. Extortion - Person illegally obtains property from another by threat or force.

J. Kickback - Person who sells an item pays back a portion of purchase price to the buyer.

K. Racketeering - Running an illegal business for personal profit.

L. Inside Trading - Person uses inside or advance information to trade in shares of publicly held corporations.

M. Money Laundering - Investment or transfer of money from racketeering, drug transactions, or other illegal sources into legitimate channels.
Organize students into work groups. The number in the group will depend upon class size.

Refer students to the Student Workbook, page 1-10, for Categories of Crime Exercise. Have students read through the exercise directions. Clarify any questions before beginning exercise. Additional instructor exercise information is contained in the Appendix, page A1-4.

N. Group Exercise: Categories of Crimes
OPTIONAL: Use a guest speaker from the Federal Law Enforcement field to discuss current opportunities available.

V. OVERVIEW OF FINANCIAL INVESTIGATION FIELD

A. Skills and Knowledge Required of Financial Investigators

1. Know statute(s) that define the crime

2. Know where to look for evidence and the admissibility of the evidence

3. Be able to trace the movement of money through financial institutions

4. Be able to use accounting and auditing techniques

5. Be able to use methods of proof to link financial events together

6. Be able to conduct financial interviews, record their findings, and summarize results

7. Use investigative techniques
7. Agencies Employing Financial Investigators

Refer students to the Student Workbook, page 1-11, for a diagram of the Federal Agencies.

1. U.S. Customs
2. U.S. Secret Service
3. U.S. Marshal Service
4. Drug Enforcement Administration
5. Office of the Inspector General
6. Federal Bureau of Investigation
7. Internal Revenue Service
8. Bureau of Alcohol, Tobacco, and Firearms
9. Postal Inspection Service
10. Nonfederal Agencies
VI. SUMMARY

Summarize objectives addressed in this chapter.

A. Restate the Objectives

1. State why there is a need for a financial investigative approach.

2. Provide a general overview of the financial investigative approach.

3. Identify skills required of a financial investigator.

B. Provide Tie-In to Next Chapter

Example: To resolve today’s financial crimes requires a special kind of investigator--one who understands the financial crime committed; how money moves as a result of the crime, and how to get and preserve the evidence needed to convince the jury that the crime has been committed. The next chapter, "Laws Related to Financial Crimes," will address the issue of laws pertaining to financial crimes.
APPENDIX

Chapter 1: Why Financial Investigation?
This course introduces you to current perspectives dominant in the field of financial investigations. We will discuss the concepts of law and evidence; sources of information; accounting; methods of tracing funds; banking and financial record keeping; and interviewing as they apply to detecting and resolving financial crimes. Primary emphasis will be placed on theoretical principles and applications of financial investigative techniques.

Required Text: *Financial Investigations...A Financial Approach to Detecting and Resolving Crimes*

Grading: All quizzes (usually unannounced) and examinations will feature the true/false, multiple choice, and/or short answer formats.

The relative weight of each testing component (as designated by instructor) is as follows:

<table>
<thead>
<tr>
<th>Component</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quizzes</td>
<td>(percentage)</td>
</tr>
<tr>
<td>Mid-term Examination</td>
<td>(percentage)</td>
</tr>
<tr>
<td>Final Examination</td>
<td>(percentage)</td>
</tr>
</tbody>
</table>

Mid-term and final examinations will be administered during class. The final examination is comprehensive.

University policy on academic dishonesty shall be adhered to. A statement of this policy can be obtained from (office location).

No extra credit will be given.

Attendance: Students are expected to attend and participate in discussions. Excessive absence from class will result in failure of this course.

Methods of Instruction: Lecture, discussion, case studies and practice exercises.

CATEGORIES OF CRIME EXERCISE
ADDITIONAL INFORMATION

Directions to Instructor:

- **Purpose.** The purpose of this exercise is to broaden the students' awareness of the types of financial crimes being committed today.

- **Procedures.** Organize students into work groups. Have available for students newspaper clippings of crimes that have been committed. You may wish to bring to class old newspapers for the groups to search through. The school library or local newspaper publisher may be a good source. The number of articles distributed to each group is dependent upon the session time constraints and the availability of articles. OPTION: If no newspapers are available, synopsis of several articles that appeared in *The Washington Post* addressing financial crimes are included on the next pages.

| Article I   | Gambling       |
| Article II  | Fraud          |
| Article III | Embezzlement   |
| Article IV  | Money Laundering |
| Article V   | Kickback       |
| Article VI  | Drug Trafficking |

- **Feedback.** Exercise responses will vary depending upon articles selected. OPTIONAL: If time permits, have groups share their articles with the class.
Six members of an alleged professional gambling ring were indicted yesterday by a Prince George County's grand jury on charges that they illegally operated Las Vegas-style casino nights for four charities.

The head of the group according to the 23-count indictment, was Benjy Jay Sorman, 34, a former New York businessman who ran a public relations firm with his wife and also was part owner of a chain of stores that sell furs and leather goods.

Sorman, his wife, Marla Sorman, 34; Andrew Gordon Zettler, 33; Iris Sharon Zettler, 35; Delores Marie Morgal, 45; and Laura Leigh Priola, 27, all were charged with conspiring to commit misappropriation by fiduciary and conspiring to violate state and county gambling laws. All but Marla Sorman and Iris Zettler also face various charges of illegal gambling and illegally operating a casino.

The four charities--The Nevey Shalom Jewish Congregation of Bel Air, Inc.; the Bowie Volunteer Fire Department and Rescue Squad, Inc.; the Bowie Boys and Girls Club, Inc.; and Channels for the Elderly Blind, Inc.--had combined gross proceeds of more than $700,000 between July 1988 and March 31, 1989, according to reports they filed with county government.

Deputy State's Attorney Robert C. Bonsib has said that people running the casinos for charities generally underreported how much money was raised to both the sponsoring charity and to the county government--in some cases by as much as $8,000 per event. He declined to comment specifically about the group allegedly led by Sorman.

Deputy State's Attorney Robert C. Bonsib has said that people running the casinos for charities generally underreported how much money was raised to both the sponsoring charity and to the county government--in some cases by as much as $8,000 per event. He declined to comment specifically about the group allegedly led by Sorman.

The Zettlers left the United States for Israel in early June, shortly after the investigation into the county's casino night operations was made public with a series of raids of casinos and the homes of alleged operators in May. Their attorney, B.J. Hanes, said yesterday that they are still in Israel but will "vigorously defend their interests at the appropriate time."

The Sormans will enter pleas of not guilty to the charges next week, said their attorney, Fred R. Joseph. "My clients, directly and indirectly, raised a lot of money for charities in the Maryland suburbs," Joseph said. "We certainly expect their support in fighting these charges."

Joseph, who also represents Warren Jay Wright, 31, who pleaded guilty on Monday to two charges stemming from the casino-night investigation, yesterday repeated his concerns that prosecutors are "selectively enforcing" the state and county gambling laws.

"It is interesting to note that tonight throughout the county there will be Las Vegas nights going on without any harassment or claim on criminality," Joseph said. "This selective enforcement may result in a dismissal of all charges."

But Bonsib, the deputy state's attorney heading the investigation, said the new grand jury, which will be empaneled Monday, will continue to look into casino operations.

"Our focus right now is on all of the games that are being run by outside folks or [those] who are illegally paying workers," Bonsib said. "They know who they are. It's just a question of us getting around to them."

The individuals indicted yesterday on the most serious charges could face more than 20 years in prison if convicted.

Reprinted by permission: The Washington Post
A Fairfax County couple who allegedly sold bogus vacation packages to people looking for cut-rate deals were arrested by FBI agents at their Reston home yesterday and charged with federal wire fraud.

The couple, who worked in offices throughout the Washington area, has taken more than $60,000 from customers for vacations they never intended to provide, since October 1990, according to a federal affidavit.

At least 99 people from 21 states and the District of Columbia have complained to local consumer agencies about the alleged scam, which lured customers with newspaper ads for seductively cheap airfare and lodging packages for Cancun, Mexico, the Caribbean and elsewhere, the affidavit said.

Embarrassed victims included a group of eight friends in Iowa, who spent $4,000 in a bid to vacation together in Cancun. and a Rockville professional who paid $1,200 cash to take eight members of his family on an inexpensive Caribbean cruise.

Two newlyweds from Falls Church, who had struggled for months to get time off together lost $850 they had saved for a honeymoon cruise in December.

"It sounded really nice," said Michelle Davidson, 23, whose honeymoon is on hold indefinitely. "I really don't think we'll get the money back because there are so many people, so many complaints."

Federal agents charged Michael C. Barson, 42, and his wife, Seleta H. Barson, 33, yesterday with one count each of wire fraud. The Barsons were arraigned in federal Magistrate's Court in Alexandria and released on $60,000 bond, said Frank Scafidi, an FBI spokesman.

Under the terms of their release, the Barsons must live at their home in Reston, surrender their passports and wear special electronic monitoring devices. They also have been prohibited from discussing travel or going near travel agencies. A preliminary hearing is scheduled for Monday.

If convicted, each would face up to five years in jail, and a $1,000 fine. According to an affidavit filed in federal District Court in Alexandria, the Barsons roamed the Washington suburbs, doing business from Bethesda, Vienna and their Reston home. They depended on a network of mailing addresses and offices they used for a short time.

"These people just said all they need to do business is a phone," Scafidi said. "Why they chose [to do business] here is anybody's guess."

The Barsons used at least 16 different company names, such as Sea Breeze Enterprises and Fantasy Vacations, and a variety of colorful aliases, including "Skip Town" and "Al Coholic," according to the affidavit. Consumer officials in Fairfax and Montgomery counties say the Barsons' operation became quite well known to them in recent months.

FBI investigators and consumer affairs officials said the alleged scam worked like this:

The Barsons usually began by placing ads in several newspapers, including The Washington Post, offering inexpensive cruises, gambling outings in the Bahamas and trips to Mexico. One offer, for instance, was for a five-day trip to Cancun for $449, including round-trip airfare and a five-star hotel--for two people.

When someone responded to a phone number in the ad, often a toll-free 800 number, the Barsons or their employees would describe the packages or reassure skeptical callers, authorities said. In the end, callers were told they could get the packages below market rate for advanced payment in cash, money orders or cashier's check.

After paying, the callers did receive a package from the Barsons, but it generally included a travel-oriented videotape, some brochures and a voucher for the trip they wanted, court records said. Airline tickets were never included. When customers went to cash in their vouchers, they found they had to go to another company that would not respond. Or they faced some other restriction.

"To our knowledge, nobody [ever went on a vacation]. It was impossible," said Nellie Miller, an investigator for the Montgomery County office of consumer affairs, which recently asked the Barsons to give $23,000 in refunds. "It was just like a huge nothing."

Reprinted by permission: The Washington Post
A Maryland lawyer who has been a fugitive since November 1988 was charged yesterday in federal court here with stealing $3.3 million from the Department of Housing and Urban Development by failing to hand over proceeds from HUD foreclosure sales that he managed.

Earl L. Martin, 44, whose last known address was in Damestown, was charged in an 88-count indictment with theft of government property, making false statements and failing to pay about $625,000 in income tax for 1987 and 1988.

The indictment said that Martin signed a contract with HUD in 1986 to act as closing agent for the sales of federally insured properties HUD had acquired through foreclosure. Instead of sending HUD the proceeds from the sale of about 65 properties, the indictment said, Martin kept the money and manufactured a phony wire transfer showing that he had sent the funds to HUD.

Martin disappeared in late 1988 owing thousands of dollars to dozens of creditors, including employees of his string of local courier companies.

The fraud he is alleged to have committed is similar to one by Marilyn L. Harrell, also known as Robin Hud. She was a Prince George County's escrow agent for HUD who was accused of stealing $5.5 million from the agency by failing to turn over proceeds from HUD foreclosure sales.

In the District alone, an investigation of real-estate fraud in HUD-related programs has resulted in more than 60 convictions and more than $6 million in fines, restitution and forfeitures, said U.S. Attorney Jay B. Stephens in a statement issued with yesterday’s indictment.

Stephens called Martin’s alleged fraud a "massive" scheme that was "an affront not only to the law profession but to everyone who pays taxes to support housing opportunities for low income Americans."

"Essentially, he just took the money and ran," Stephens added. An arrest warrant was issued for Martin yesterday, along with the indictment, and Stephens said that federal law enforcement authorities had "a number of leads" on his whereabouts.

Martin acted as a closing agent and handled escrow accounts on 30 separate transactions, some involving more than one property, from June 1987 to April 1988, the indictment said. All the properties except one were in the District, with most located in working-class neighborhoods in Northeast and Southeast Washington.

Martin had been under investigation by HUD since 1988, and in 1989 HUD put him on a list of escrow agents banned from doing business with the agency.

The case against him represents a third category of fraud that has afflicted HUD since the mid-1980s, Stephens said.

In the first, real-estate speculators, using front men, would get HUD to insure loans on properties for which they had obtained inflated assessments. When the loan went into default, the speculators would pocket the extra cash from the loan and leave HUD with a property worth far less on the open market than its assessed value.

In the second type of fraud, real-estate speculators would conspire to enter low bids at courthouse auctions of properties obtained by HUD through foreclosure. The speculators would take turns submitting the low bid, Stephens said, or would pay each other kickbacks in exchange for not bidding on a property.

"The victims there were either estates or older people," Stephens said. "Not only did they lose their property, they didn't get a fair market value for it."

Each of the 30 counts of theft of government property in the indictment against Martin is punishable by 10 years in prison and a $250,000 fine. The false statement and tax evasion counts carry a five-year prison term and a $250,000 fine.

A federal jury yesterday convicted the former co-owner of an exclusive Georgetown clothing shop, Linea Pitti, of money laundering for the Rayful Edmond III drug gang, the first time a District retailer has been convicted of helping a drug dealer hide profits.

The 12-member jury took 3 1/2 days to conclude that Charles L. Wynn, 35, of Northwest Washington, had knowingly allowed his shop to be used for money laundering by letting Edmond and one of his key lieutenants buy thousands of dollars of clothes there, using $10, $20 and $50 bills that had been used to buy crack and cocaine on the street.

Wynn's case was not the first time a retailer in the Washington area had been charged under a 1988 law that makes it illegal for legitimate business owners to knowingly help drug dealers hide profits. But it is the first time prosecutors in this area won a conviction under the statute, said U.S. Attorney Jay B. Stephens.

"This is a very significant verdict, and it sends an important message that we take very seriously those who are laundering money from drug sales, and that we view them as responsible for facilitating drug dealing," Stephens said.

Wynn's attorney, Greg Spencer of the federal public defender's office, could not be reached for comment. Wynn was ordered jailed immediately after the verdict was announced by U.S. District Judge George H. Revercomb.

The jury convicted Wynn of conspiracy and of laundering more than $190,000 in drug profits brought into the store by Edmond and one of his lieutenants, Tony Lewis. It acquitted him of obstructing justice and of 29 other counts of money laundering. Prosecutors had charged Wynn and the store with laundering more than $460,000 for Edmond and his gang members.

The store's parent company, C&I Inc., pleaded guilty last month to laundering, the first time a corporation has done so in the District. It faces up to $1.5 million in fines.

The case against Wynn was a coda to Edmond's much-publicized 1989 drug conspiracy trial. Edmond, Lewis and 15 associates were convicted of drug distribution and related charges. Edmond and Lewis are now serving life sentences.

In Wynn's case, a jury heard 11 days of testimony that once again detailed the flamboyant lifestyle of Edmond, who once ran the District's largest cocaine sales network. According to government testimony, Edmond and Lewis routinely spend $4,000 to $5,000 in a single afternoon at Linea Pitti, in Georgetown Park Mall.

BALTIMORE. May 3--A federal jury convicted a former U.S. Naval Academy official today of accepting thousands of dollars in air conditioners and other household goods from an Annapolis builder seeking contracts at the academy.

James E. Weston, 47, the academy's public works officer from 1985 to 1989, was found guilty of conspiracy, accepting $34,000 in illegal gratuities and obstructing justice by hiding subpoenaed documents from FBI agents.

Weston, now retired from the Navy and living in Henderson, Nev., remained free on bond pending sentencing.

Defense attorney William M. Ferris said Weston intends to appeal the conviction.

Weston acknowledged accepting the items from Annapolis contractor Carroll M. Dunton, but said he paid for them with cash, leaving no paper trail. Ferris said Dunton demanded cash because he "liked to play the ponies."

Prosecutor Jane F. Barrett told the jury that Weston constantly had his "hand out" for favors from contractors and used his influence as a naval captain and public works chief to force subordinates at the academy to buy Amway products pushed by Weston and his wife, Mary.

Barrett and another prosecutor, Richard Kay, said in the 13-day trial that Weston received air conditioners, lawn mowers, water treatment systems, cash and other gifts from Dunton, who in turn was awarded more than $2 million in construction work, much of it above Navy cost estimates.

In a key contract, Dunton was awarded $961,333 to install new heating and ventilating systems in Rickover Hall, a large classroom building, even though his bid was 55 percent over the government estimate.

Before the Rickover award, according to testimony, Dunton gave Weston two lawn mowers, a washer-dryer and several air conditioners valued at more than $4,700 and said "all is forgiven" if Dunton got the contract. A few days later, he won the contract.

Dunton employees testified that Weston was known as "Captain Crook" and "Loader" for his habit of filling the fuel tank of his recreational vehicle at the gasoline pumps at Dunton's business without paying.

Dunton, 65, and a former Weston subordinate at the academy, Eugene E. Hook, 67, of La Vale, Md., have pleaded guilty in the case and testified against Weston.

Ferris told the jurors the case hinged on whether they believed Weston or Dunton and Hook. He questioned the credibility of Dunton and Hook, noting both testified after negotiating plea agreements with the government, under which they could receive lighter sentences in exchange for testimony against Weston.

Neither Dunton nor Hook has been sentenced.

CHARLOTTESVILLE, March 22--
The unprecedented seizure of three University of Virginia fraternity houses was a warning to campus drug traffickers that they will be treated as severely as street dealers, federal and local authorities said today.

As hundreds of students gawked Thursday night, nearly 50 federal and local drug agents burst into three of the cavernous houses on the university's hilly fraternity row.

The 8:30 p.m. raids on a Thursday night--known for fraternity parties--came after more than six months of investigation by federal and state officials, which involved student informants and undercover purchases of designer drugs, LSD, cocaine and marijuana.

The raid, and the indictments of 12 students, including two from Northern Virginia, on drug distribution charges, was meant to send a message, officials said.

"There are no havens, there are no safe places to conduct drug trafficking," said E. Montgomery Tucker, U.S. Attorney for the western district of Virginia. Tucker said the raid arose from a local drug task force and was not part of a larger investigation of universities.

The value of the three houses taken, their contents and the drugs seized came to more than $1 million, according to federal officials who held a news conference today to display their haul: 12 partially filled sandwich bags of marijuana, three bags of hallucinogenic mushrooms, two sets of scales and a complete marijuana growing system that was allegedly rigged up in a closet at the Phi Epsilon house. The display, set up in Charlottesville police headquarters, also included 24 pipes and 18 water pipes, one of them made from a wine bottle and another customized with the Tau Kappa Epsilon logo.

Officials said they believe this is the first time property has been seized by the federal government in a campus community.

The students charged face maximum penalties ranging from 10 to 130 years in jail and fines of $500,000 to $6.5 million, depending on the number and nature of counts they face.

Officials at the 172-year-old university founded by Thomas Jefferson worried that the incident would tarnish the school's reputation as one of the nation's elite public universities. In the admissions office, which has a record number of applicants for next year's freshman class, officials fretted today that fewer would want to attend, according to one admissions officer.

Long a sought-after destination for Virginia high school students, UVA draws nearly one-third of its students from Northern Virginia and another third from out of state.

"UVA is a well-known, prestigious school, and by doing this, they make a point about drug use in the larger society," said Trisha Wendt, 20, a second-year student from Richmond.

"There are other schools with similar problems," said Steve Lobbin, 21, of Columbia. "It should be done all over the place."

"This is ridiculous," said a third-year member of Tau Kappa Epsilon, one of the three houses raided.

The Delta Upsilon house was also raided. Members at all three refused to comment to a reporter.

Students on fraternity row and elsewhere said they felt unfairly singled out.
Although UVA has a reputation for hard partying, "if anything, it's a drinking school, not a drug school," said third-year student John Donlon, of Sundbury, Mass., a member of Phi Lambda Phi. He and his fraternity brothers said their neighbors at Phi Epsilon had been just sitting around watching television when the police broke in.

The three fraternity houses, which are owned by fraternity alumni groups, now become federal property unless the owners can prove in court that they were not at fault in the drug trafficking.

A federal grand jury in Roanoke indicted six students, including Northern Virginians Eric Heller, 22, of McLean and Bryan Schwaab, 21, of Fairfax Station, while the remaining four were indicted in state court. Two other students are still under investigation but have not been indicted, police said.

The students were charged with up to four counts a piece of selling LSD, cocaine, hallucinogenic mushrooms or marijuana. Three students were picked up during the raid and five more turned themselves in or were picked up today. Charlottesville police said.

UVA President John Casteen III said the students also may face disciplinary action at the school.

"Drug-related activities like those alleged last night offend the university community and threaten our students' well-being," Casteen said.

Nearly one-third of UVA's 11,500 undergraduates live in 53 off-campus fraternity and sorority houses, which are not under direct university control.

The nearly 60 residents who were not involved with the probe will be allowed to stay in their rooms, provided they sign occupancy agreements with the U.S. Marshal who now controls the buildings.

"We don’t want to boot kids out of their rooms," said Assistant U.S. Attorney Ken Sorenson, but, "I asked the brothers to use their discretion. . .Remember what caused this in the first place."

According to affidavits filed in federal courts, most of the undercover drug purchases were small. But agents described widespread and open marijuana smoking, including groups of 10 or more people.

Three students indicted on federal charges were arrested during the raid: Matt Evans, 19, of Virginia Beach; Ernest Prior, 19, of Goochland, Va.; and Peter Shaffer, whose age and home town were not released. Two more turned themselves in today. Mark E. Croy, 22, of Pearisburg, Va.; and David Freelund, 21, of Glen Cove, NY.

Three students indicted on state charges were arrested or turned themselves in today: Steve Marvin, 23, of Charlottesville; Patrick Hanrahan, 21, of New City, NY; and James A. Carter of Newport News. Three students facing federal charges are still at large. They are James Graham, 21, of Richmond, who also is wanted on state charges, and Heller and Schwaab. Police officials have not released the names of the last locally indicted student.

INSTRUCTOR REFERENCES:
Financial Investigations...A Financial Approach to Detecting and Resolving Crimes
Federal and State Code Books
I. INTRODUCTION

A. Attention Getter/Motivator

Example: "Before finding something, you have to know what you are looking for." This expression applies to a financial investigator. Knowing what law has potentially been violated is the first step in knowing what to look for to prove guilt or innocence. This chapter addresses some of the basic laws pertaining to financial crimes.

B. Objectives

1. Define or describe selected terms related to the field of law.

2. Identify the statute related to a particular crime.

3. List the elements of a particular crime.
II. BASIC LAW TERMS AND CONCEPTS

A. Definition and Function of Law

1. Definition - Formal means of social control

Use definition in textbook on page 14.

2. Function - Establishes benchmark for behavior in society (negatives - "Thou Shall Nots") versus generation acclimation (positives - process of society's "elders" transmitting society's values to the young)
B. Categories of Law

3. Categories of Law

1. Common Law - English origin of American law

2. Case Law - Past interpretations yield current law

3. Substantive Law - Combination of case law, statutes and administrative rules
   a. Civil - Torts between private parties
   b. Criminal - Crimes of public nature against the state and community

Diagram the relationship between the types of substantive law.
C. Crime Classification

4. Classification of Crime

Refer to each item on transparency as discussed.

1. Misdemeanor versus felony
   a. Felony - Serious crime; punishable by over one year's incarceration
   b. Misdemeanor - Less serious crime; punishable by less than one year's incarceration

2. Mala In Se versus Mala Prohibita
   a. Mala in se - Evil in itself (usually requires criminal intent - mens rea)
      Example: Murder, rape
   b. Mala prohibita - Evil because it's against the rules (statutes) but in and of itself is not immoral
      Example: Government regulation violations, traffic offenses, environmental law violations
5. Appeal Process

Refer to the diagram in the Student Workbook on page 2-2 outlining the circuits in the U.S. Appellate Court System.

Refer students to page 2-3 in the Student Workbook. Explain to the students that this exercise will help them understand how to read and interpret case law. Have students read the directions.

D. Court Appeal Process

1. U.S. District Court

2. U.S. Court of Appeals
   (intermediate federal appellate court - divided into circuits)

3. U.S. Supreme Court

E. Individual Exercise: Koller Court Case

Distribute exercise feedback sheet located in the Appendix, page A2-2.
III. INTRODUCTION TO STATUTES AND ELEMENTS OF A CRIME

A. Statutes and the Federal and State Code Books

1. Definition of Statutes
   a. Laws enacted by Congress
   b. State and Federal level
   c. Recorded in code books

OPTIONAL: Show copies of Federal and State Code books (if available).

Refer to the Student Workbook, page 2-9, for procedures on how to look up information in the code books.

B. Definition of Elements

7. Elements of a Crime

Use definition in textbook on page 16.
Use the question and answer technique to help students identify the elements of the crime from the statutes. Use the tax evasion statute as the example.

8. Tax Evasion Statute

Q & A

Use the question and answer technique to help students identify the elements of the crime from the statutes. Use the tax evasion statute as the example.

Example: Questioning Procedures

Q. What does this law forbid?
A. Tax Evasion. *Discuss term evasion.*

Q. Is a successful "evasion" all that is forbidden?
A. No, also an attempt. *Discuss meaning of attempt.*

Q. Who is forbidden to "attempt tax evasion"?
A. Any person. *Discuss corporation as "person." Discuss how corporation can act through one or more persons.*

Q. What does "willfully" mean?
A. Not by accident or negligence, but on purpose. *Discuss how you can prove another's state of mind.*
Use the following pattern when presenting the statutes on textbook pages 18 through 33.

1. Give description of criminal offense.

2. Show statute on transparency.

3. Discuss elements of the crime. Suggest highlighting on transparency.

A transparency is available for each statute addressed in the textbook. Discuss as many as you feel necessary to ensure student understanding within the allowable session timeframe.

IV. FEDERAL STATUTES ASSOCIATED WITH FINANCIAL CRIMES AND THEIR APPLICABLE CRIMINAL ELEMENTS

A. Title 18: Crimes and Criminal Procedures

1. Bribery, graft, and conflicts of interest

2. Crimes and services in matters affecting Government

3. Conspiracy

9. Bribery Statute

10. Claims and Services in Matters Affecting Government Statute

11. Conspiracy Statute
<table>

19. Wire Fraud Statute

20. Money Laundering Statute

21. Transactions Involving Criminally Derived Property Statute

8. Mail fraud

9. Racketeering

10. Racketeer influenced and corrupt organizations

22. Failing to File, Supply Information or Pay Tax Statute

23. Filing a False or Fraudulent Return Statute

B. Title 26: Internal Revenue Code

1. Tax evasion

2. Failing to file, supply information, or pay tax

3. Filing a false or fraudulent return
C. Title 15: Commerce and Trade

1. Securities Act of 1933
2. Securities Exchange Act of 1933
4. Electronic Funds Transfer Act

D. Title 31: Money and Finance

1. Financial transactions in Excess of $10,000
2. Structure transactions

24. Reports on Domestic Coins and Currency Transactions
Statute

25. Structuring Transactions to Evade Reporting Requirement
Prohibited Statute
Refer to the exercise in the Student Workbook on page 2-13. Explain to the students that this exercise will help them practice how to read and interpret a statute.

Distribute exercise feedback sheet located in the Appendix, page A2-3. Discuss feedback.

OPTION: This exercise may be given as an out-of-class assignment.

Q & A

Have students complete questions individually or work in teams.

E. Individual Exercise: Statute Construction

F. Textbook Review Questions (pages 35 and 36)
V. SUMMARY

Summarize the objectives addressed in this chapter.

A. Restate the Objectives

1. Define or describe selected terms related to the field of law.

2. Identify the statute related to a particular crime.

3. List the elements of a particular crime.

B. Tie-In to the Next Chapter

Example: Knowing what to look for is an important beginning step for the financial investigator. In the next chapter, "Evidence," we will learn what types of evidence the investigator must gather to prove or disprove a criminal allegation.
APPENDIX

Chapter 2: Laws Relating to Financial Crimes
KOLLER COURT CASE
EXERCISE FEEDBACK

1. What was Koller convicted of?

   Drug Trafficking and Money Laundering

2. What federal judge presided over Koller's trial?

   Evans

3. What appellate judge wrote the decision?

   Fairchild

4. What legal issues did Koller appeal?

   - Government acted in outrageous manner during a reverse sting operation.
   - There wasn't sufficient evidence to prove money laundering.

5. What was the court's ruling?

   Affirmed
STATUTE CONSTRUCTION
EXERCISE FEEDBACK

STATUTE:

Whoever, knowingly and with intent to defraud the United States, or any agency thereof, possesses any false, altered, forged, or counterfeited writing or document for the purpose of enabling another to obtain from the United States, or from any agency, officer, or agent thereof, any sum of money, shall be fined not more than $10,000 or imprisoned not more than five years, or both.

Elements of the crime:

- Intent to defraud
- Suspect knowingly used false documentation to get money
CHAPTER 3: EVIDENCE

LENGTH: 3 Hours

OBJECTIVES:

- Describe the grand jury process.
- Describe the investigative tools used by the grand jury.
- Define evidence.
- Distinguish among the five standards of proof.
- Describe different classifications of evidence.
- Determine the admissibility of evidence by applying selected rules of evidence.

Chapter 3 - Workbook Contents
Identifying Evidence Exercise
Admissibility of Evidence Exercise

INSTRUCTIONAL EQUIPMENT:
Overhead projector

INSTRUCTOR REFERENCES:
Financial Investigations...A Financial Approach to Detecting and Resolving Crimes
I. INTRODUCTION

A. Attention Getter/Motivator

Example: The Perry Mason trial scenes from television often used the phrase, "Your Honor, we will show the relevancy, the motive and opportunity in committing this (crime), and it will be clear...." Getting a feel for what needs to be collected regarding criminal evidence to prove or disprove an allegation in a court of law is the next step in learning about the financial investigative process.

B. Objectives

1. Describe the grand jury process.

2. Describe the investigative tools used by the grand jury.

3. Define evidence.

4. Distinguish among the five standards of proof.

5. Describe different classifications of evidence.

6. Determine the admissibility of evidence by applying selected rules of evidence.
OPTIONAL: Use a U.S. Attorney or Law School professor as a guest speaker.

II. GRAND JURY PROCESS

A. Function of the Grand Jury

1. Grand Jury Function

2. Grand Jury Background Information

B. Tools of the Grand Jury

3. Grand Jury Tools

4. Subpoena

Inform the students that the use of a subpoena in financial investigations is discussed more in Chapter 10.

5. Immunity

Refer to the textbook on pages 39 and 40 for a discussion of the key points on immunity.

1. Subpoena - Requires witness to appear to provide testimony

2. Immunity
   a. Granted to convince witness to provide testimony
   b. Formal and informal
6. Role of the Financial Investigator

7. Evidence

Use the definition stated in the textbook on page 42.

III. DEFINITION AND FUNCTION OF EVIDENCE

A. Definition - Anything that bears on the truth on the matter

B. Function - Used to prove elements of the crime
IV. IDENTIFYING STANDARDS OF PROOF

8. Burden of Proof

Refer to each item on the transparency as discussed.

Explain to the students that the standards of proof equal what is commonly referred to as the "burden of proof."

A. Beyond Reasonable Doubt

Refer to the definition in the textbook on page 42.

1. Definition
   a. Degree of certainty that a person has in accomplishing or transacting the more important concerns of your life
   b. Must be proven in criminal cases

Use the example in the textbook on page 43.

2. Example: Crossing the street

B. Preponderance of Evidence

Refer to the definition in the textbook on page 43.

1. Definition
   a. Evidence which inclines an impartial mind to one side rather than the other
   b. Used in civil case trials
Use the example in the textbook on page 44.

2. Example: Lawsuit
   "Scale of Justice" analogy

Use the chalkboard to illustrate scale showing the weight of justice being tipped to one side.

Refer to page 44 in the textbook.

C. Clear and Convincing Evidence - not as strong as beyond reasonable doubt but more than a mere preponderance

D. Probable Cause

1. Definition - All the facts and circumstances within the knowledge of investigator about criminal activity that is considered reasonable and trustworthy

2. Use - Basis for arrest and search warrant
   a. Arrest - Sufficient to cause a reasonable person to believe John Doe committed a particular crime
   b. Search Warrant - Sufficient to cause a reasonable person to believe that evidence/contraband/fruit of crime exists at a particular place
E. Suspicious Situation - Detainment for the purpose of questioning person permissible for investigative purposes if there exists "suspicion"

V. CLASSIFICATIONS OF EVIDENCE

9. Types of Evidence

Refer to each item on the transparency as discussed.

Refer to page 46 in the textbook.

A. Direct

1. Definition - Goes to precise point of issue

2. Example: "I was with Joe when Joe and Bob discussed bribe and Bob gave Joe the bribe money."

Refer to page 46 in the textbook.

B. Circumstantial

1. Definition - Establishes related facts which create inferences about the point at issue
2. Example:
   a. "I saw Joe and Bob"
   b. "Bob told my answering machine that Joe is bought and paid for."
   c. Bob cashed a $5,000 business check
   d. Joe made a $4,500 cash deposit

C. Real Evidence

1. Evidence that is tangible; it can be presented to the jury for inspection
2. Examples: Gun, money, canceled check, car

D. Documentary

1. Writings--Must be introduced by a witness who can testify to existence and authenticity
2. Examples: Letters, contracts, "drug notes"

E. Testimonial

1. Testimony by witness under oath about what witness saw, heard, smelled, tasted and knows
Refer to page 47 in the textbook.

Have students work together in teams. Refer students to the Student Workbook, page 3-2, for Identifying Evidence Exercise. Have the students read the exercise. Clarify any questions before beginning. Exercise may be given as an out-of-class assignment which students would work through individually.

Upon completion of exercise, distribute exercise feedback sheets. See Appendix, page A3-2. Discuss exercise.

OPTIONAL: Chapter 10 includes a section on recovering evidence from trash along with an activity entitled "Trash Exercise." This information may be addressed at this point in the course if desired.

F. Judicial Notice

1. Well known fact

2. Example: "Saturday was September 19."

G. Group Exercise: Identifying Evidence
VI. RULES OF EVIDENCE AND THEIR APPLICATIONS

A. Purpose - Rules must be followed so evidence discovered during the investigation is admissible in a court of law.

B. Relevancy and Competency (Rule 401)

1. Definitions
   a. Relevant - Bears on question
   b. Competent - Credible, reliant, competent and presented by qualified witness
Refer to items in the textbook on page 49.

2. Facts considered relevant
   a. Crime motive
   b. Defendant's ability to commit crime
   c. Opportunity to commit crime
   d. Threats by suspect
   e. Means by which to commit offense
   f. Physical evidence at crime scene linking suspect to crime
   g. Suspect's comments and conduct at arrest
   h. Attempt to conceal or destroy evidence
   i. Valid confession

C. Privileged Communications (Rule 501)

1. Definition - One who has information cannot divulge information without consent of third party
Discuss how each of these relationships can claim privileged communications. Refer to the textbook pages 50 through 52.

The Appendix, page A3-3, contains a newspaper article pertaining to the attorney-client privileged communication relationship.

2. Parties Claiming Privileged Relationship
   a. Attorney
   b. Husband/Wife
   c. Clergyman/Penitent
   d. Physician/Patient
   e. Accountant/Client
   f. Law Enforcement Officer/Informant

D. Hearsay (Rule 801)

1. Definition -
   a. Does not come from personal knowledge of the declarant but from what you have heard about declarant from others
   b. What someone (A) overheard another person (B) tell a third person (C) OR What someone (A) is told by another person (B) about a third person (C)

Diagram relationship of parties involved in Hearsay situation.
13. Exceptions to Hearsay Rule

Refer to each item on the transparency as discussed. Discuss how each is an exception to the hearsay rule. Information on exceptions is located on pages 52 and 53 in the textbook.

The Appendix, page A3-4, contains a newspaper article elaborating on "expert testimony."

14. Chain of Custody

Refer to textbook page 55.

2. Exceptions
   a. Valid Confessions/Tacit Admission
   b. Prior Statements
   c. Res gestae Statement/Excited Utterance
   d. Dying Declaration
   e. Official Record Rule
   f. Shop Book Rule - Custodian of Records
   g. Expert Testimony

E. Chain of Custody (Rule 901 (a))

1. Definition - Marked, identified and handled correctly to maintain original condition

2. Requirement
   a. Acquisition by Investigator
   b. Handled by Investigator
15. Best Evidence and Requirement of Original

Refer to textbook page 56.

1. Best Evidence - Actual document

2. Secondary Evidence - Testimony of witnesses or a copy of the writing

3. Majority Rules

G. Group Exercise: Admissibility of Evidence

Have students work together in teams. Refer students to Student Workbook, page 3-3, for Admissibility of Evidence Exercise. Have the students read the exercise. Clarify any questions before beginning.

Exercise may be given as an out-of-class assignment which students would work through individually.

Upon completion of exercise, distribute exercise feedback sheets. See Appendix, page A3-5. Discuss exercise.
Q&A

Have students complete questions individually or work in teams.

VII. SUMMARY

Summarize the objectives addressed in this chapter.

A. Restate Chapter Objectives

1. Describe the grand jury process.
2. Describe the investigative tools used by the grand jury.
3. Define evidence.
4. Distinguish among the five standards of proof.
5. Describe different classifications of evidence.
6. Determine the admissibility of evidence by applying selected rules of evidence.
B. Tie-In to Next Chapter

Example: In this chapter, we learned what evidence is and how evidence can be used in a court of law. Once this is known, the investigator is ready to collect the evidence needed. The next chapter, "Sources of Information" addresses where the investigator can look for the evidence needed.
APPENDIX

Chapter 3: Evidence
The following is a list of possible evidence that could be collected and how it could be used to prove Jones purchased the vehicle.

1. *Copy of dealer jacket and its contents.* This could be used to show that an automobile was in fact purchased and the VIN number will establish that this is the vehicle in question.

2. *All receipts for funds received by the dealership in reference to this vehicle.* The receipts will show from whom they were received.

3. *Vehicle registration request.* This will establish in whose name the vehicle is registered.

4. *Invoices.* The invoices will show who originally ordered or negotiated the deal.

5. *Conduct an interview with any salesperson or management personnel who may have knowledge of the deal.* These individuals may be able to reveal the identities of people who actually negotiated the deal. Jones may have negotiated this deal and requested that the vehicle be placed in his girlfriend’s name.
APPENDIX

Chapter 3: Evidence
The following is a list of possible evidence that could be collected and how it could be used to prove Jones purchased the vehicle.

1. *Copy of dealer jacket and its contents.* This could be used to show that an automobile was in fact purchased and the VIN number will establish that this is the vehicle in question.

2. *All receipts for funds received by the dealership in reference to this vehicle.* The receipts will show from whom they were received.

3. *Vehicle registration request.* This will establish in whose name the vehicle is registered.

4. *Invoices.* The invoices will show who originally ordered or negotiated the deal.

5. *Conduct an interview with any salesperson or management personnel who may have knowledge of the deal.* These individuals may be able to reveal the identities of people who actually negotiated the deal. Jones may have negotiated this deal and requested that the vehicle be placed in his girlfriend's name.
In United States v. Leventhal, 961 F.2d 936 (11th Cir. 1992), the government appealed a district court order enforcing only part of an I.R.S. summons. The summons was issued to an attorney requesting information omitted from two Form 8300s. The attorney filed the Forms 8300 indicating the amount of the fee he had received, but failed to complete parts I and II of the Form, which request identifying information such as the type of transaction involved, names and social security numbers. The attorney argued that the information was protected under the attorney client privilege and that the constraints of the State Bar prohibited him from compliance. The district court issued an order to produce some but not all the information. The court did enforce that portion of the summons requesting the names of the individuals involved in the transaction, but not the individuals involved in the transaction, but not the social security numbers or the description of the transaction. The district court also inserted language in its order noting that the attorney acted properly in refusing to comply.

On appeal the Eleventh Circuit vacated the order and remanded the matter to the district court for enforcement. The Circuit found that the attorney failed to carry his burden of proof that the summons should not be enforced, in particular that the requested information violated the attorney client privilege. The Eleventh Circuit followed the rationale articulated in the decision of United States v. Goldberger & Dubin, P.C., 935 F.2d 501 (2d Cir. 1991). Thus, the court noted that fee information does not implicate the attorney client privilege. Moreover, the last link exception did not apply since the clients involved were already under indictment and their identities were already known to the prosecutors.
Do experts really know?

Court weighs trial testimony

By Aaron Epstein
Knight-Ridder Newspapers

WASHINGTON — For years, juries have been accused of often awarding personal injury damages based on invalid scientific testimony — commonly known as "junk science."

And in increasing numbers of cases, federal appeals courts have responded by dismissing claims of injured people on grounds that their experts were unreliable.

On Tuesday, the Supreme Court agreed to resolve the potentially far-reaching question of just how reliable scientific evidence must be before a jury is allowed to hear it.

The court's answer, expected in the spring, could affect thousands of cases in which scientific evidence is necessary to prove an element of an injured person's claim.

The justices will consider one of more than 2,000 lawsuits alleging that birth defects were caused by Bendectin, an anti-nausea drug prescribed for pregnant women to prevent morning sickness.

More than 33 million women in 21 countries used Bendectin between 1957 and 1983, when a flood of suits led Merrell Dow Pharmaceutical to withdraw the drug from the market. The company has cited studies that found a lack of scientific evidence linking Bendectin to birth defects.

In the case to be reviewed by the Supreme Court, two lower courts barred the testimony of experts hired by the parents of two San Diego children born with birth defects.

"The experts had re-examined data from earlier studies and concluded that Bendectin had caused the defects in the limbs of the children, Jason Daubert, now 19, and Eric Schuller, now 11.

Judge Alex Kosinski, writing for the U.S. Court of Appeals in California, concluded that the experts' opinions were too unreliable to be submitted to a jury. These analyses were unpublished, not subjected to the normal peer-review process, and generated solely for use in litigation." Kosinski said.

In appealing to the Supreme Court, lawyers for the injured children assailed the appeals court's "bizarre publish-or-perish edict for expert testimony" as "bad law and bad science."

The lawyers said it was "a blatant abuse of judicial power" to require that expert opinions be reviewed by scientists and published in journals before they can be presented at trial.

One of the children's lawyers, Barry Nace, said "the restrictive approach is confined to the federal system. We bring the same cases into the state courts and have no problem getting to the jury."

Richard Willard, who attacked "junk science" when he was a Justice Department official in the Reagan administration, said federal courts are increasingly recognizing that "juries are not in the best position to separate bogus theories from those that have legitimate scientific support."
What was the main reason for the appeal in this case by Kramer?

Kramer felt that his 4th Amendment rights were violated when the police collected evidence used in the case against him for drug trafficking. He felt the police violated his rights by trespassing when they collected evidence from the trash put by the roadside in front of his house. He motioned to suppress the records claiming the pickup was unlawful.

What was the final ruling by the court in regards to the admissibility of the evidence?

Court denied post-trial motion. It was stated that the 4th amendment protects at least three possible interests of individuals--(1) the right of peace and quiet, (2) the right of not being subject to public scrutiny and (3) the person's interest in public esteem. The alleged trespassing did not infringe on any of these three points.
CHAPTER 4: SOURCES OF INFORMATION

LENGTH: 3 Hours

OBJECTIVES:
- Discuss what factors influence the selection of a suspect to target in an investigation.
- Identify appropriate sources to obtain specific information.
- Analyze financial records for leads.

INSTRUCTIONAL METHODS/AIDS:

Financial Investigations...A Financial Approach to Detecting and Resolving Crimes
Use transition statement from previous chapter.

I. INTRODUCTION

A. Attention Getter/Motivator

Example: When performing an investigation, every investigator is faced with these two questions--

• Where should I look for information?
• What should I be looking for?

It is important that the financial investigator knows where to go to get the information needed to proceed with the investigation. Information is the key to a successful financial investigation.

B. Objectives

1. Discuss what factors influence the selection of a suspect to target in an investigation.

2. Identify appropriate sources to obtain specific information.

3. Analyze financial records for leads.
II. PROCESS OF INITIATING A FINANCIAL INVESTIGATION

3. Initiating the Investigation

Refer to items as discussed.

A. Targeting a Suspect

1. Resource considerations
   a. Time devoted to investigation versus probability of success
   b. Low-level versus high-level suspects

2. Emotional considerations
   a. Impact of accusation on suspect
   b. Likelihood of successful prosecution

B. Contacting Suspect

1. Identify essence of allegations and facts surrounding case.
2. Approach suspect with professionalism.
   a. Ask for information instead of demanding it.
      
      Example: Would it be possible for me to look at your financial documents?
   b. Consider rights of suspect for privacy.
      
      Example: Constitution protects the rights of individuals - suspects do not have to provide information.

C. Other Considerations in the Investigation

2. Go to the Source--Legal custodian of the records can provide investigator with information.

3. Have Authority--Follow legal requirements for obtaining information based on statutory authority.
III. OVERVIEW OF THE SOURCES OF INFORMATION

4. Sources of Information

Inform students that this chapter addresses the first three items on the transparency. Chapter 5 addresses information available through financial institutions and Chapter 10 covers information on informants.

A. Public Records

1. Use of public records
   a. Establish leads

   **Example:** Records often provide information on the location of witnesses or identify property that the suspect owns.

   b. Corroborate or dispute the testimony of the suspect or other witness
5. Public Records

Refer to each item on the list as discussed. A summary of the types of information available through public records is included in the Student Workbook on pages 4-2 and 4-3.

Refer to the textbook on page 71 for other sources of information.

2. Types of public records
   a. Real Estate
   b. Partnership
   c. Trusts
   d. Assumed Name Indexes
   e. Better Business Bureau
   f. Chamber of Commerce
   g. Uniform Commercial Code Filings (UCC)
   h. Court Records
   i. Other records
6. Business Records

Work through the example in the textbook on pages 72 through 76 on how real estate records can be used to help during an investigation.

7. Closing Statement

Use the transparency to explain the analysis of the figures from the real estate transaction.

Discuss the list of information items located in the textbook on page 75 that can be obtained from real estate transactions.
8. Application for Certificate of Title and Registration

Indicate that Vehicle Identification Number and lienholder information is on form.

9. Certificate of Record Copy

Indicate that the form summarizes all vehicle ownership information. Stress that each state may have a different format for providing this information.

Discuss information items listed in the textbook on page 76 that are available through automobile dealerships.

Refer to Appendix A in the textbook page 369. Have students review sources listed.

Encourage students to share any ideas on other sources of information that may be available.

2. Vehicle purchase example
   a. Vehicle Ownership and Lien information
   b. Automobile dealership information

3. Other business records
Have students work together in teams. Refer students to the Student Workbook, page 4-4, for the George Chapman Embezzlement Case. Explain to the students that this exercise will help them see the process of how sources of information can be used to answer questions. Have the students read the exercise. Clarify any questions before beginning.

Exercise may be given as an out-of-class assignment which students would work through individually.

Upon completion of exercise, distribute exercise feedback sheets. See Appendix, page A4-2. Discuss exercise.

C. Government Records

1. Use of government records
   a. Available at local, state and federal government level
   b. Must follow agencies procedures for obtaining information
### 10. Government Records

Refer to each item as discussed.

Discuss each agency’s function and location as provided on pages 77 and 78 in the textbook.

Refer students to Appendix A in the textbook for other government agencies.

<table>

Have students work together in teams. Refer students to the Student Workbook, page 4-15, for Mary and John Crook Investigation Exercise - Part I. Explain to the students that this exercise is a case that will be continued in other chapters (Chapters 6, 7, and 10). Have the students read the exercise. Clarify any questions before beginning.

Exercise may be given as an out-of-class assignment which students would work through individually.

Upon completion of exercise, distribute exercise feedback sheets. See Appendix, page A4-6. Discuss exercise.

Q & A

Have students complete questions individually or work in teams.

D. Group Exercise: John and Mary Crook Investigation - Part I

E. Textbook Review Questions (pages 80 and 81)
IV. SUMMARY

Summarize the objectives addressed in this chapter.

A. Restate Objectives

1. Discuss what factors influence the selection of a suspect to target in an investigation.

2. Identify appropriate sources to obtain specific information.

3. Analyze financial records for leads.

B. Tie-in to Next Chapter

Example: An essential part of financial investigation is understanding what information is available and where to find it in public, business, and government records. In the next chapter, "Financial Institutions as Sources of Information," we will continue to explore another source of information available to the financial investigator--financial institution records.
PART I - GEORGE CHAPMAN INTERVIEW

What information needs to be verified from the interview?

The main item that needs to be verified is--

Was, in fact, the money from the sale of the old residence used to purchase the cottage and boat?

Knowing this piece of information will determine whether or not the suspect lied.
<table>
<thead>
<tr>

</tbody>
</table>
PART III - EVALUATE FINDINGS

Step 1: Determine Proceeds from Sale of Old Residence

Sale Price of Old Residence $73,000
Less Balance of Mortgage:
   Original Mortgage $41,100
   Less approximately one quarter paid 10,100*
   Balance of old Mortgage (31,000)
Proceeds from Sale $42,000

* A 30-year mortgage, such as this, calls for mostly interest payments in the early years, and mostly principal payments in the later years. Your best estimate is that the first 10 years of the 30, Chapman probably paid about one-fourth of the principal.

Step 2: Determine Cost of New Residence

Cost of Lot for New Home $30,900
Plus: Building Contract Price 149,000
Cost of New Residence $179,900

Step 3: Determine Cash Invested in New Residence

Cost of New Residence $179,900
Less: Amount of New Mortgage 122,000
Cash Invested in New Residence $57,900
Step 4: Summarize Findings

Analysis: Since Chapman's sale of his old residence generated $42,000 and he paid $58,000 cash to purchase the lot and build his new residence, none of the $42,000 from the sale of the old residence was left over for the speedboat and cottage. In fact, since he spent ($58,000 less $42,000) $16,000 more than the cash proceeds from the sale of his old residence, plus the $42,000 for the boat and cottage, and "stole" $30,000 from the Widow Jones, you know one thing and strongly suspect a second thing.

Fact - You know Chapman lied about where the money for the cottage and the powerboat came from, because he put all the "sale proceeds" towards buying the lot and building his new house on it.

Theory - You strongly suspect there are more victims "out there" besides the Widow Jones, because Chapman spent:

Cottage Down Payment $12,500
Powerboat Purchase 29,500
Cash down on new house 57,900

Total expenditures $99,900

Chapman only had the following money available that you have been able to find so far:

Proceeds from sale of old house $42,000
Theft from Widow Jones 30,000

Total funds available $72,000

Thus, somewhere there is another victim waiting to be found because:

Chapman's expenditures $99,900
Less: Chapman's funds available 72,000

Total expenditures above the known funds available $27,900
List some of the things the financial investigator might do to begin this investigation.

Note: Student responses may vary. The following list provides some suggested ideas. Students may provide more.

- Contact suspects for interview
- Contact local police department - Determine if suspects have any criminal records
- Go to local courthouse - Check real estate records for property ownership
- Contact Telephone Company - Check to see if calls made provide any leads
- Contact responsible investigative drug enforcement units - See if they have any information on suspects
- Garbage pickup services - Check for any leads
- Interview jewelry store personnel - Any leads about suspects and their customer account
- Go to Division of Motor Vehicles - Check vehicle ownership and lien information
CHAPTER 5:  FINANCIAL INSTITUTIONS AS SOURCES OF INFORMATION

LENGTH:  5 Hours

OBJECTIVES:
- Describe terms related to banking and brokerage firms.
- State what records are available from banks and brokerage houses.
- Analyze bank and brokerage firm records.
- State what information is available from Western Union and casinos.

INSTRUCTIONAL AIDS/METHODS:

Textbook: Financial Investigations...A Financial Approach to Detecting and Resolving Crimes
I. INTRODUCTION

Use a transition statement from previous chapter instruction.

A. Attention Getter/Motivator

Example: Chapman, the drug dealer, admitted he bought a cottage and boat. How? He said he bought it with proceeds from sale of House A. We trace the acquisition and disposition of the property by financial papers. We prove he lied!

B. Objectives

Refer to the objectives listed on page 84 in the textbook.

1. Describe terms related to banking and brokerage firms.

2. State what records are available from banks and brokerage houses.

3. Analyze bank and brokerage firm records.

4. State what information is available from Western Union and casinos.
II. INTRODUCTION TO BANKING

A. Importance of Bank Records

1. Definition of bank records

2. How investigator uses bank records

B. Types of Bank Transactions

1. Account

2. Non-account

NOTE: This transparency is used again in Section IV - A.

Give brief overview of items listed.

Use bank record terminology on page 83 in the textbook.
III. INVESTIGATING BANK ACCOUNT TRANSACTIONS

A. Opening an Account

1. Documents involved (Signature Card)
   a. Every account has one
   b. Different forms for each type of account

2. Information available to the Investigator
   a. Account owner's address, occupation, employer, date/place of birth, and social security number
   b. Leads to other witnesses or unknown co-conspirators

Example: Suspect may be using Mother's maiden name as alias.

   c. Sample of owner's handwriting
B. Recording Account Transactions

1. Documents involved (Bank Statement)
   a. Computers reconcile accounts daily
   b. Statement shows view of all transactions - "Gold Mine for Investigator"
   c. Get all statements during criminal activity period

2. Information available to investigator
   a. Indications of high balances/large deposits/large checks in relation to income
   b. Timing of deposits - related to illegal acts like bribes, kickbacks
   c. Indications of unusually large deposits/round numbers/ repetitive deposits that don’t correlate to legitimate income
Instructor Notes

Presentation

d. Absences of "normal activity"

Example: Cash deposits made the day before checks written for mortgage/utilities may indicate suspect has other account or suspect deals mostly in currency.

Q&A

Have students locate items on the sample bank statement that might need further investigation. Use transparency #5 during discussion.

Q. What bank statement item(s) would you follow up on?

A. $6,750 Deposit
   Round number
   Need to trace source

C. Depositing Funds to an Account

   1. Documents involved
      (Deposit Tickets and Bank Microfilm).

      a. Deposit tickets provide source of deposit information.

      b. Actual deposit items are not kept by bank but are copied on microfilm.
6. Source and Disposition of Deposits

7. Deposit Ticket

c. Microfilm can be used as evidence in investigation. "Shop Book Rule" allows custodian of bank record to testify as to the meaning of records.

d. Must trace flow of deposit money in both directions - source and disposition.

2. Information available to investigator (Deposit Tickets and other Deposit Items)

   a. Source of cash or check provides leads to witnesses

   b. Photograph of person making deposit
Instructor Notes

Refer to sample deposit ticket while discussing Benidect deposit.

Presentation

Example: Benidect Deposit
(Additional Scenario Information)
Benidect is a union official with a take-home salary of $1,645.97 every two weeks. Where did Benidect get the $4,500 cash and $2,250 check? Reviewing the bank microfilm provided these leads: (1) $2,250 in traveler's checks were purchased by Corporation A and cashed by Benidect. (2) A cashier's check to Benidect purchased by owner of Brown Building with a business check. (3) Payroll check from Corporation B to "Joe Blow" endorsed over to Benidect and deposited by Benidect.

Q & A
Have students develop ideas on following the leads presented in the example.

HOW TO HANDLE LEADS?

SCENARIO POINT: It appears Benidect could be extorting money from businesses to ensure "no strikes."
8. Bank Operations

NOTE: This transparency is used again with next item - 4. Collection.

Refer to each item on the diagram as discussed.

OPTIONAL: Use guest lecturer from bank to present the bank operation system.

3. Deposit system

(Customer - Presents Deposit Items)

a. Videotaping of transactions - evidence (Tape availability is limited to 30-90 days because tapes are commonly reused.)

b. Handwriting - evidence

c. Testimony of teller - evidence (Transaction Entry Points)

d. Teller, cash service department, intra-account transactions or electronic transfers between financial institutions are entry points.

e. Difficult to trace currency once in system. Banks hopefully separate currency in question before depositing. (Proof Department)

f. Proof process critical to retrieving documents (sources of information, leads, evidence)
9. Proof Numbers

Proof numbers (way documents are located and linked to each other)

10. MICR Encoding

Magnetic Ink Character Recognition (MICR) Encoding (High-speed computer processing)

Micro-filming

(1) Related items are filmed in sequence of receipt (deposit ticket, cash-in slip, checks both sides).

(2) Filmed by teller (teller #1 transactions, teller #2 etc.). Note: Older system's filming may not be sequential.

(3) Everything except currency is micro-filmed.
11. Currency Transaction Report

Show report form on transparency OR

Refer to sample form in text on page 93.

(4) Currency transactions over $10,000 must have Currency Transaction Report on file. Exception: Businesses which normally have heavy currency deposits.

Example: Grocery store with $100,000 per weekend
Q&A

8. Bank Operations

NOTE: This transparency was used in the discussion of the previous item - 3. Deposit Systems.

Use transparency to explain bank collection process. Start with items shown on right and work towards the left of the transparency.

4. Collection

Q. How does the bank get the money that is now credited to the account to which it was deposited?

A. Depends upon "Bank of Deposits" relationship to "Bank of Origins"

a. Routing items to get paid

Example Scenario: I deposit a $100 check from Bill Steckel. My account is credited for $100. My bank doesn't have the $100. My bank has to collect the $100 from Bill's Bank. Then Bill's bank subtracts the $100 from Bill's account and sends Bill the "canceled check" with the statement.

b. Bookkeeping department

Example: I transfer $100 from checking to savings. Only requires internal "transfer" (INTERNAL)

Example: I deposit a $100 check from Bill. Both of us have our accounts at the same bank (ON-US)

c. Clearinghouse bank

Example: I deposit a $100 traveler's check from Bill. He
D. Withdrawing Funds from an Account

1. Information on a check
   a. Every check has at least one lead - called "Check Magic."
      
      Example: $25 check led to a $250,000 condominium.
   b. Checks are Prima Facie evidence.
12. Check Front

Refer to items on check as discussed.

Appendix B of the textbook (pages 389 and 390) lists ABA numbers.

(FRONT OF CHECK)

c. ABA transit items

1st # bank of origin's city, state or territory

2nd # bank's identification

d. Check routing symbol

3 or 4 digits to identify Federal Reserve District and collection facility

Last digit of zero means funds paid immediately - other digits mean deferred

e. Magnetic Ink Character Recognition (MICR)

Preprinted items
Post printed items

FINANCIAL INVESTIGATIONS
13. Check Back
Refer to items on the check as discussed.

14. Cashed Codes

15. Check Analysis

a. Use different sorts.
   By payee, by date, by amount
   By date, by amount
   By writer, by payee, by date, by amount

b. Look for patterns and breaks in patterns.
Instructor Guide

Instructor Notes

Presentation

c. Document unusual payees, unusual amounts, patterns of dates, payees, amounts.
d. Do check analysis on computer to "massage" information.

Example: Benidect Check Analysis

What amount pattern do you see in the checks to Virginia Power? Peaks during Jan-Mar and July-Sept - normal. What is peculiar about the rent checks? Need to determine how rent was paid - cash, cashier's check, traveler's check, someone else paid, undisclosed 2nd account.

Q&A

Have students analyze information from checks to answer questions.

E. Dealing with Special Transactions

1. Types of Transactions

Credit memo
Debit memo
16. Credit and Debit Memo

Refer to items as discussed.

2. Transactions Involved

**Examples:** Debit Memo

a. Automatic loan payment, e.g., vehicle, mortgage or life insurance payment

b. Transfer between checking and savings

c. Cost of check printing

**Examples:** Credit Memo

d. Interest earned on savings or checking account

e. Automatic payroll deposit

IV. INVESTIGATING BANK NON-ACCOUNT TRANSACTIONS

A. Definition and Types
B. Loans

1. Documents involved
   a. Loan applications and personal financial statements - “financial picture”
   b. Loan repayment ledgers - loan details and payments made
   c. Loan correspondence - letters, memorandums, possible mortgage or corporate information

2. Information available to investigator

   (Loan Application/Personal Financial Statement)

   a. Leads to other assets

---

As each item is discussed, list it on the board.

17. Loan Application

Refer to the Sample Loan Application form in the Student Workbook on page 5-6.
Instructor Notes

Presentation

(Loan Repayment Ledger)

b. Loan repayment method

(1) Unusual repayments

Question: Payment not coming from suspect's account. Where is it coming from?

(2) Payments appear above person's ability to pay

Question: Does suspect have undisclosed assets or is third party making payments?

(3) Consistent late payments

Question: Is suspect in collusion with bank? Special arrangements?

(4) Lump sum or odd amount

Question: Where did money come from?

c. Downpayment

Question: Where did it come from?
d. Disposition of loan proceeds

(1) No record of loan proceeds going into suspect's account

Questions - Was loan downpayment for undisclosed assets? Does suspect have other accounts?

(2) Tracing disposition produces leads to money wire transfers out of country and possible bank checks

(Loan Correspondence)

e. Credit checks and internal memorandum produce leads to other assets, loans, bank accounts

C. Bank Checks (Cashier's Checks, Certified Checks, Traveler's Checks, and Money Orders)

1. Documents involved

a. Cashier's Check - drawn by bank on own funds with remitter and payee
### 19. Source and Disposition of Bank Checks

#### Presentation

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>b.</td>
<td>Certified Check - bank guarantees there is sufficient funds on deposit</td>
</tr>
<tr>
<td>c.</td>
<td>Money Order - negotiable instrument issued for specific amount (substitute for a check)</td>
</tr>
<tr>
<td>d.</td>
<td>Traveler's Check - internationally redeemable check purchased in various denominations</td>
</tr>
</tbody>
</table>

#### 2. Information available to investigator

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>a.</td>
<td>If deposited into or withdrawn from known account, bank &quot;proof system&quot; can be used to trace leads. <strong>Example:</strong> Bank check purchased with account check. Check can be located on microfilm and it will tell who purchased, and endorsement will tell where money went.</td>
</tr>
<tr>
<td>b.</td>
<td>If unknown account used, then interview bank personnel for leads.</td>
</tr>
</tbody>
</table>
Instructor Notes

Presentation

c. Trace source of funds used to purchase the checks and the ultimate disposition of checks.

D. Currency Transactions

1. Limited documentation. Amount exceeds $10,000, then must file Currency Transaction Report (CTR).

Example: Money laundering is accomplished because of this investigative limitation.

2. Information available to investigator
   a. Bank employee testimony
   b. Search of teller tape and proof film by date - If date of cash transaction is known, gather several transactions before and after transaction you are interested in.
E. Wire Transfers

1. Documents involved
   a. Bank records of bank of origin and bank of destination available
   b. Memo entry on statement

2. Information available
   a. Records identify the sender, amount, date, and recipient (leads).

F. Safe-Deposit Boxes

1. Documents involved
   a. Rental agreement
   b. Entry log

2. Information available
   (Agreement)
   a. Indicates date first rented and identity of renter

20. Lease of Safe-Deposit Box

Sample form shown in Student Workbook on page 5-7.
b. Indicates date and times of visits, and reports visitor identity. May be used to corroborate testimony relating to receipt of illegal currency or the proceeds from illegal activities.

Example: A major narcotic sale by suspect may relate to same date as visit to safe-deposit box.

G. Bank Credit Card

1. Documents involved
   a. Charge slips
   b. Repayment information

2. Information Available to the Investigator

   Leads to purchases of jewelry, cars, furs

H. Obtaining Financial Records from a Bank

1. Procedures
   a. Consider obtaining records from suspect.
Refer to the Student Workbook, pages 5-4 and 5-5, for a listing of bank records available.

b. Banks cannot provide access to an account unless legally compelled to do so. Based on the Bank Secrecy Act and the Right to Financial Privacy Provisions of Federal law. Legal compulsion is in the form of subpoenas, summonses, or court orders.

c. Banks can inform Government of relevant information in account.

d. Retrieval of records is costly and time consuming. Investigator must properly select documents needed.

2. Maintenance of records

a. 5 years - Checking/Savings Account Records including: signature card, statements, ledger cards or deposit/withdrawal records, copies of both sides of customer checks, bank draft money orders and cashier's checks
Refer students to the Student Workbook, page 5-8, for Bank Reconciliation Exercise. Explain to the students that this exercise will help them see the relationship of several of the bank documents. Have the students read the exercise. Clarify any questions before beginning. A summary of some of the bank document information discussed is included in the Student Workbook on pages 5-2 and 5-3. Exercise may be given as an out-of-class assignment.

b. 2 years - All records necessary to reconstruct a customer’s checking account and trace and supply a description of checks for over $100 deposited into an account

c. Any extension of $5,000 must be kept

d. Any transfer of $10,000 out of U.S. must be kept

I. Individual Exercise: Bank Reconciliation

Upon completion of exercise, distribute exercise feedback sheets. See Appendix, page A5-2. Discuss exercise.
IV. BROKERAGE FIRMS

OPTIONAL: Use guest lecturer from Brokerage firm.

A. Functions
1. Securities Market - buying and selling stocks and bonds
2. Commodities Market - buying and selling produced goods

B. Overview of Securities

21. Securities
Discuss terminology associated with each type security listed.

1. Stocks
2. Dividends
3. Bonds
   - Corporate bonds
   - Municipal bonds
   - Treasury Bills
   - Treasury Notes
   - Treasury Bonds
5. Registered Bonds
6. Coupon Bond
7. Registered Coupon
Discuss the function of organizations.

8. Exchanges/Market
   Organized securities exchanges
   Over-the-counter market

C. Overview of Commodities

22. Commodities

Discuss term.

2. Organized commodity exchanges

D. Documentation and Information Available to an Investigator

23. Brokerage Account Application

1. Account application
   a. Prepared when opening account
   b. Includes personal data, bank references, credit checks performed

24. Customer Account Card

2. Customer account cards -- Record of customer's account activity

3. Signature card -- Shows who has authority to conduct transactions on the account
Instructor Notes

Presentation

4. Securities receipts --
   Proof of delivery of securities for sale to broker

5. Cash receipts --
   Proof that customer delivered currency to broker

6. Confirmation slips --
   Shows customer the type of transaction and the amount involved in transaction.

7. Securities delivered receipt --
   Proof that securities received by customer

8. Brokerage account statement
   a. Brokerage firm can provide source documents
   b. Information as to purchases and sales, the name of the security, the number of units, the amount per unit, the total amount of transaction, the account balance, payments received from the customer, disbursements to the customer and the customer's position.

Point out items on sample statement as discussed.
VI. OTHER FINANCIAL INSTITUTIONS

A. Western Union - Available Information and Documentation

1. Application prepared by sender

2. Request for payment prepared by recipient of the funds

3. Bank draft drawn by Western Union payable to the person receiving the money

4. Canceled drafts and original telegram applications are stored for three years and then destroyed, except those over $1,000.

B. Casinos - Available Information

1. Bank account statements, credit card and loan applications, hotel/room service documentation

2. Currency Transaction Report by Casinos, Form 8362

Inform students that some of the same information is available on a check.

Refer to Sample Form in the textbook on page 116.
Have students complete questions individually or work in teams.

**VII. SUMMARY**

Summarize the objectives addressed in this chapter.

A. During this class you have learned how to --

1. Describe terms related to banking and brokerage firms.

2. State what records are available from banks and brokerage houses.

3. Analyze bank and brokerage firm records.

4. State what information is available from Western Union and casinos.

B. Tie-in to Next Chapter

Example: In the case of Paul, the drug dealer, tracing the movement of funds through a financial institution is the way to prove the suspect lied. How this is accomplished is by using the techniques discussed in this chapter when reviewing the financial paperwork. In the next chapter, we will explore how financial investigators trace the movement of...
APPENDIX

Chapter 5: Financial Institutions As Sources Of Information
PART 1
BANK RECONCILIATION WORKSHEET

January 1993

STEP 1
Place a checkmark (✓) beside each check in the checkbook register that appears on the bank statement. Those checks NOT marked off, list below as outstanding checks.

<table>
<thead>
<tr>
<th>Check No.</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>3559</td>
<td>10.00</td>

</tbody>
</table>

TOTAL 64878

STEP 2

Enter the Checkbook Balance 1744.47
Add Unrecorded Deposits from Bank Statement (+) 24.95
Subtotal 1769.42
Deduct Account Fees (-) 12.00
ADJUSTED CHECKBOOK BALANCE - Line A 1757.42

STEP 3

Enter the Bank Statement Balance 2406.20
Add Unrecorded Deposits from Checkbook (+) 0.00
Subtotal 2406.20
Deduct Outstanding Checks from Step 1. (-) 648.78
ADJUSTED BANK STATEMENT BALANCE - Line B 1757.42

The account is reconciled when Line A and Line B are in balance.
PART 2

Upon reviewing the monthly bank statement provided for 12/24/92 through 1/25/93, what might alert the financial investigator to possible financial wrongdoing?

A deposit on 1/3/93 for $2,000.00 and a cash deposit on 1/18/93 for $500 are not tied to monthly income. Both deposits are in round numbers. Where did the deposits come from?

Balance seems high for known income. Mr. Wright's income from the two jobs is the only known family income.

What other bank documents might be helpful to the financial investigator in proceeding with the investigation?

Deposit Items - Trace where money came from for deposits.

Canceled Checks - Canceled checks could provide leads as to how money is being spent. The canceled checks could provide some of the same information as seen in the check register. From reviewing the register information, several items would merit closer scrutiny.

- Suspect's monthly expenses seem higher than his monthly income (mortgage, car payment, food, utilities). Where is the extra money coming from to support the family?

- Why were two power company bills paid? Does the suspect have additional real property besides residence?

Previous Bank Statements - Has there been a deposit trend?
CHAPTER 6: TRACING THE MOVEMENT OF MONEY THROUGH A BUSINESS

LENGTH: 6 Hours

OBJECTIVES:

- Describe the basic forms of business organization.
- Explain why a knowledge of accounting is important to the financial investigator.
- Define or describe basic accounting terms.
- Journalize transactions.
- Post journal entries to a general ledger.
- Prepare a balance sheet and an income statement.

INSTRUCTIONAL METHODS/AIDS:

Start-Up Business Exercise
Mary and John Crook Exercise - Part II
Basic Accounting Principles Booklet

INSTRUCTIONAL EQUIPMENT:

Overhead projector

INSTRUCTOR REFERENCES:

Textbook - Financial Investigations...A Financial Approach to Detecting and Resolving Crimes
I. INTRODUCTION

A. Attention Getter/Motivator

Example: Criminals often unknowingly leave a "trail" of evidence (i.e., fingerprints, blood, etc.), thus making it easier for the investigator to "catch" the criminal. On the same hand, financial criminals, by using the pieces of paper that reflect the movement of money through a business, produce a "paper trail" for the financial investigator to pursue for evidence. Knowledge of how money flows through a business provides the investigator with the ability to follow the paper trail to answer questions.

B. Objectives

1. Describe the basic forms of business organization.

2. Explain why a knowledge of accounting is important to the financial investigator.

3. Define or describe basic accounting terms.

4. Journalize transactions.
II. TYPES OF BUSINESS ORGANIZATIONS

A. Description of Proprietorship, Partnership, and Corporation

1. Proprietorship

2. Partnership
   a. Requirements
   b. Agreement

3. Corporation

Use textbook description on page 126.

Use textbook description on page 127.

Refer to the sample Articles of Partnership in textbook on page 129.

Use textbook description on page 130.

Refer to the sample Articles of Incorporation in textbook on page 131.
Refer to Chart in textbook on page 133. Use the information as a summary of items discussed in the previous section.

B. Comparison of Three Types of Business Organizations

1. Advantages
2. Disadvantages

Use textbook descriptions on pages 132 through 134.

C. Other Business Organizations

1. Limited partnership
2. Cooperative
3. Mutual company
4. Shell corporation
The following sections in this instructor guide address some basic principles of accounting. Based on the students' backgrounds, present as much detail as necessary to ensure a general understanding of the accounting process.

Recommend that the material be presented in any of the following combination of ways:

1. Assign booklet as an out-of-class self-study.
2. Discuss in class key points from booklet and textbook.
3. Use accounting personnel as guest lecturer.

Time required to complete this portion of the instruction will depend upon the method and amount of detail required to ensure students' understanding.

Suggest that the examples given in the booklet be used to illustrate the key points presented in the guide. Additional examples from other basic accounting textbooks may be helpful if additional examples are needed.

Emphasize to the students that the financial investigator does not need to be an accountant, but must understand the relationship among the components of the accounting process.
III. GENERAL DESCRIPTION OF ACCOUNTING SYSTEMS

A. Definition of Accounting

1. Recording transactions
2. Summarizing transactions
3. Interpreting data

B. Characteristics of Accounting Systems

1. Designed to track the flow of transactions
2. Transactions equal exchanges
C. Types of Accounting Systems

1. Single-entry -- Chronological recording of all transactions in one place
   
   Example: Checkbook Register

2. Double-entry -- Each transaction affects two or more accounts resulting in multiple entries to recordkeeping system.

D. Methods of Accounting

1. Cash basis
2. Accrual basis
3. Hybrid method
IV. THE ACCOUNTING EQUATION

A. Elements of Accounting

1. Assets
2. Liabilities
3. Owner's equity

B. Components of the Equation

1. Items of value (assets)
2. Claims (liabilities + owner's equity)
9. Accounting Equation (2)

Explain variation to the equation on page 5 of the booklet.

Use booklet examples on page 7 to illustrate principles.

Work through examples on chalkboard

or use transparency worksheet.

10. Equation Worksheet (1) (Optional)

1. Principle

Each transaction ultimately affects other accounting within the equation.

2. Principle

Both sides of the accounting equation must be equal at the conclusion of each transaction.
D. Income/Expenses and the Accounting Equation

11. Income and Expenses

12. Profit and Loss

Use booklet definitions on page 8.

13. Accounting Equation (3)

Use booklet example on page 9.

Work through the example on

Or use transparency worksheet.

14. Equation Worksheet (2)
(Optional)
V. THE ACCOUNTING CYCLE

15. Accounting Cycle

Give a brief overview of the process using the information summarized on pages 12 through 14 in the booklet. Explain that each item is discussed in greater detail in the next two sections.

A. Overview of Cycle

1. Documenting business transactions

B. Overview of Cycle Events and Documentation

2. Journalizing transactions

3. Posting journal entries to ledger

4. Preparing trial balance

5. Preparing financial statements
Two illustrative problems are included in the accounting booklet —

(1) Karen White's T-Shirt Shop
(2) Larry Olsen's Law Practice

Either one can be used to discuss Section VI and VII topics. For instructional purposes, the Karen White example is referred to in this guide. Reference is also made to examples of documents included in the textbook.

A. Source Documents

1. Purpose - serves as proof of business transaction.

2. Origin - Outside organization or within organization. Some source documents sent to other businesses or individuals.

Examples: Cash receipts, credit slips, vendor checks, employee checks, invoices, property transfer documents, etc.
B. Accounts

1. Use: grouping of all like transactions.

2. Chart of accounts
   a. Purpose - Organize accounts for easy reference.
   b. Numbering system

3. T-Account format
   a. Debit
   b. Credit

Use booklet explanation on page 20.

Refer to examples:
Textbook - page 150
Booklet - page 16.

Use example and terminology in booklet on page 17.

17. T-Account

Work through the example on
18. Accounting Equation

Work through example in booklet on page 18 and 19.

Work through example in booklet on pages 20 and 21.

19. Blank Journal Form (Optional)

Work through the example in booklet on pages 23 and 24.
Use the blank form on transparency #19, chalkboard or flipchart while working through example.

FINANCIAL INVESTIGATIONS

Chapter 6. Tracing the Movement of Money Through a Business
20. Types of Specialized Journals

Stress that these are examples. Each business may customize their own.

D. Specialized Journal

1. Use and format
   a. Designed to accommodate "like transactions" of a business.

      Example: Most companies need a journal to show how much CASH is received by company.

   b. Provides business with a more efficient way of locating all like transactions.

   c. Some small businesses do not use specialized journals. Use of specialized journals still requires use of General Journal.

   d. Number of specialized journals used by each business varies. Most common ones discussed in this instruction.
Review two examples of specialized journals:
Booklet - pages 26-29
Textbook - pages 153-156.

2. Types
   - Sales journal
   - Purchase journal
   - Cash receipt journal
   - Cash disbursement journal

Refer to the two examples on page 154 in textbook to show the differences between the column format versus the linear format.
E. Ledger

1. Use and format
   a. Used to summarize journal entries by accounts
   b. Each account is recorded on an account card. All account cards together make up ledger.
   c. Account cards contain information from the T-Account format -- account title/number, debit and credit information.

2. Procedures for posting to the ledger

21. Blank Ledger Account Card

Refer to the sample Ledger booklet on page 30.

Work through example in booklet on pages 31 and 32. Use the blank form on the transparency, chalkboard or flipchart.
Refer to the sample subsidiary ledger in the booklet on page 33.

3. Subsidiary ledgers
   
a. Designed to provide specifics about a particular account.

   Example: Business owners need to know the amount that each customer owes in addition to the total amount due from all customers (accounts receivable).

b. Format left up to business -- usually includes particulars like name, address, credit limits, amounts, etc.

c. Number of specialized ledgers needed is left up to businesses' needs. Usually they are designed for Accounts Receivable, Accounts Payable, Loans Payable and some Expense Accounts.
VII. SUMMARIZING FINANCIAL TRANSACTIONS (BUSINESS STATEMENTS)

A. Trial Balance

1. Use and format
   a. Used for the purpose of seeing if all account debits and credits balance.
   b. Two column format with debit and credit information by account.
   c. Usually done on a monthly basis.
   d. Used for preparation of Balance Sheet and Income Statements.
   e. Adjustments made to accounts require that a new trial balance be performed prior to preparing financial documents.

2. Preparation procedures

Refer to sample Trial Balance:
Booklet - page 36
Textbook - page 159.

22. Trial Balance

Work through the example in the booklet on pages 35 and 36.
Have students work together in teams. Group students so that students who have an accounting background are placed in different teams.

Refer students to the Student Workbook, page 6-2, for Start-Up Business Exercise. Explain to the students that this exercise will help them see the relationship of the accounting events and documentation. Have the students read the exercise. Clarify any questions before beginning.

Exercise may be given as an out-of-class assignment which students would work through individually.

Upon completion of exercise, distribute exercise feedback sheets. See Appendix, page A6-2. Discuss exercise.
VIII. ANALYZING BUSINESS BOOKS AND RECORDS

A. Auditing Techniques

1. Analyze
2. Scrutinize
3. Compare

B. Process

29. Auditing Process

Emphasize that the techniques presented here suggest a way to approach the investigative process.

1. Identify unusual or suspicious item(s)

Example: Informant says Joe Blow is bribing a building inspector. If payments by check to the building inspector are posted to the purchases account or miscellaneous expenses account, the evidence is found.
Refer to list of indicators in the textbook on pages 172 and 173.

Q&A

OPTIONAL: Bring to class any newspaper articles from local area which might illustrate the types of items mentioned. Have students share any incidence that they may know of which illustrate the fraud indicators.
Three examples are presented for discussion. Based upon class time available, any one or all may be used as a focal point in discussing auditing techniques.

Q&A

OPTION: Divide class into three groups. Assign one example to each group. Allow students time to discuss example. Have each group present example to class.

Refer to pages 161 through 168 in the textbook.

Refer to pages 168-172.

Widget, Inc. Fact Sheet - Student Workbook - page 6-16. (Refer to Appendix, page A6-13, for Feedback Sheet)

OPTION: Widget Business Example may be used as an out-of-class assignment for everyone.

D. Examples of Financial Investigation of Business Records

1. Money Laundering example

2. Political Corruption example

3. Widget Business example
Have students work together in teams. Refer students to workbook - page 6-18 for Mary and John Crook Exercise. Explain to the students that this exercise is a continuation of the investigation started in Chapter 4. Have the students read the exercise. Clarify any questions before beginning.

Exercise may be given as an out-of-class assignment which students would work through individually.

Upon completion of exercise, distribute exercise feedback sheets. See Appendix, page A6-15. Discuss exercise.

Q&A

Have students complete questions individually or work in teams.

E. Group Exercise: Mary and John Crook Investigation - Part II

F. Textbook Review Questions (Pages 175 through 178)
IX. SUMMARY

Summarize the objectives addressed in this chapter.

A. Restate Objectives

1. Describe the basic forms of business organization.

2. Explain why a knowledge of accounting is important to the financial investigator.

3. Define or describe basic accounting terms.

4. Journalize transactions.

5. Post journal entries to a general ledger.

6. Prepare a balance sheet and an income statement.

B. Tie-In to Next Chapter

Example: Knowing how business documents "tie together" and how they are used to measure financial dealings helps the financial investigator in spotting items that need further investigation. The next two chapters, "Tracing Funds Using the Direct Method of Proof" and "Tracing Funds Using Indirect Methods of Proof" deal with methods used to prove that the items discovered can, in fact, be used as evidence of the crime.

</table>
Mar. 1 John Reed operated a photographic business in his home on a part-time basis. He decided to move to rented quarters as of March 1 and to devote full time to the business, which was to be known as Reed Photographic Studio. The following assets were invested in the enterprise: cash, $2,500; accounts receivable, $650; supplies, $800; and photographic equipment, $9,500. There were no liabilities transferred to the business.

**Analysis:** The four asset accounts, Cash, Accounts Receivable, Supplies and Photographic Equipment increase and are debited for $2,500, $650, $800 and $9,500 respectively. The owner's equity in these assets is equal to the sum of the assets or $13,450; hence John Reed, Capital is credited for that amount.
Mar. 1  Paid $1,500 on a lease rental contract, the payment representing three months' rent of quarters for the studio.

_Analysis:_ The asset acquired in exchange for the cash payment is the use of the property for three months. The asset Prepaid Rent increases and is debited for $1,500; the asset Cash decreases and is credited for $1,500. (When rent for a single month is prepaid at the beginning of a month, it is customarily debited to the rent expense account at the time of payment, thus avoiding the necessity of transferring the amount from Prepaid Rent to Rent Expense at the close of the fiscal period.)

Mar. 4  Purchased additional photographic equipment on account from Carson Equipment Co. for $2,500 debt owed them.

_Analysis:_ The asset Photographic Equipment increases and is therefore debited for $2,500. The liability Accounts Payable increases and is credited for $2,500.

Mar. 5  Received $575 from customers in payment of their accounts.

_Analysis:_ The asset Cash increases and is debited for $575; the asset Accounts Receivable decreases and is credited for $575.

Mar. 6  Paid $80 for a newspaper advertisement.

_Analysis:_ Expense accounts are subdivisions of capital. Increases in expenses are decreases in capital; hence an expense account is debited for $80. The asset Cash was decreased by the transaction; therefore, that account is credited for $80. (Miscellaneous Expense is debited because total expenditures for advertising during a fiscal period are expected to be relatively minor.)

Mar. 10 Paid $500 to Carson Equipment Co. to apply on the $2,500 debt owed them.

_Analysis:_ This payment decreases the liability Accounts Payable, so that account is debited for $500. It also decreases the asset Cash, which is credited for $500.

Mar. 13 Paid receptionist $275 for two weeks' salary.

_Analysis:_ Similar to transaction of March 6.
Mar. 16  Received $1,280 from sales for the first half of March.

*Analysis:* Cash increases and is debited for $1,280. The revenue account Sales, which is a subdivision of capital, increases and is credited for $1,280.

Mar. 20  Paid $650 for supplies.

*Analysis:* The asset Supplies increases and is debited for $650; the asset Cash decreases and is credited for $650.

Mar. 27  Paid receptionist $275 for two weeks' salary.

*Analysis:* Similar to transaction of March 6.

Mar. 31  Paid $39 for telephone bill for the month.

*Analysis:* Similar to transaction of March 6.

Mar. 31  Paid $85 for electric bill for the month.

*Analysis:* Similar to transaction of March 6.

Mar. 31  Received $1,470 from sales for the second half of March.

*Analysis:* Similar to transaction of March 16.

Mar. 31  Sales on account totaled $975 for the month.

*Analysis:* The asset Accounts Receivable increases and is debited for $975. The revenue account Sales increases and is credited for $975. (Note that the revenue is earned even though no cash is received; the claim against the customers is as much an asset as cash. As customers pay their accounts later, Cash will be debited and Accounts Receivable will be credited.)

Mar. 31  Reed withdrew $1,000 for his personal use.

*Analysis:* The transaction resulted in a decrease in the amount of capital invested in the business and is recorded by a $1,000 debit to John Reed, Drawing; the decrease in business cash is recorded by $1,000 credit to Cash.
PART I - B: LEDGER ENTRIES:

After all of the entries for the month have been posted, the ledger will appear as shown here. Each account should be numbered in accordance with Chart of Accounts.

In practice, each account would appear on a separate page in the ledger.

Entries must be traced from the journal to the ledgers.

PART II - A: TRIAL BALANCE:

Each account card in ledger is balanced. The totals from all accounts are recorded to see if balance results.

Errors usually due to one of the following:

- One of the columns of the trial balance incorrectly added.
- The amount of an account balance was incorrectly recorded on the trial balance.

**FINANCIAL INVESTIGATIONS**

Start Up Business Exercise

A6-12 Chapter 6: Tracing the Movement of Money Through a Business
ITEM A: INCOME STATEMENT

GEORGE'S WIDGETS, INC.
Income Statement - 199X

**Revenue:**

1. Widget Sales Receipts $2,000,000.00
   - Less: Defective Widgets Returned -100,000.00 $1,900,000.00
2. Rebates from Widget Purchases 50,000.00
3. Interest Received 50,000.00
   - Gross Receipts $2,000,000.00

**Cost of Goods Sold:**

- Widget Inventory @ 01/01/9X $100,000.00
- Plus: Widget Purchases 900,000.00
- Shipping, storage, etc. 100,000.00
- Sub-total: Goods Available for sale 1,100,000.00
- Less: Widget Inventory @ 12/31/9X -100,000.00
- Less: Cost of Goods Sold -1,000,000.00
- Equals: Gross Profit $1,000,000.00

**Operating Expenses:**

- Sales salaries/commissions $300,000.00
- Travel expenses 240,000.00
- Rent expense 180,000.00
- Administrative salaries 100,000.00
- Office expenses 60,000.00
- Telephone & postage expenses 20,000.00
- Insurance expense 10,000.00
- Income tax expense 36,000.00
- Less: Total Operating Expenses -946,000.00

**Net Profit from Operation**

$54,000.00
ITEM B: NET INCOME - $54,000.00 (Profit)

ITEM C: ITEMS FOR FURTHER INVESTIGATION

<table>
<thead>
<tr>
<th>ITEM</th>
<th>REASON</th>
</tr>
</thead>
<tbody>
<tr>
<td>Defective Widgets Returned are 5% of Sales and $1 of each $9 for Widget purchases</td>
<td>Appears much too high.</td>
</tr>
<tr>
<td>Rebates - 11% are returned by purchasers as defective. Why is company still purchasing?</td>
<td>Is someone receiving bigger rebate or kickback?</td>
</tr>
</tbody>
</table>
| Interest Income - From what? | Why would a wholesale operation have interest income equal to 2.5% of Gross Receipts?  
Note - Possible legitimate reasons:  
- Company finances customers big purchase of widgets  
- Could be the business sold its real estate to individual and he rents back the real estate for 3 1/2 times the interest-only payments that is being made on purchase price (see Rent Expenses = $180,000). |
| Beginning and Ending Inventory | Appears to be "plugged" (Same figures both times) |
| Shipping, Storage, etc. | Should be for "freight in," not on items sold. Items sold should be either billed to purchasers, or used to "net" gross receipts (as are defects), or be a separate shipping expense in operating expenses. |
| Expenses | The first five listed amount to $880,000 or 88% of the $1 mill gross profit. Each should be examined to determine the following:  
• Paid to whom  
• Paid for what  
• Contracts  
• Proof of payment  
• Proof of vendor's receipt of payment  
• Proof of services received |
MARY AND JOHN CROOK - PART II
EXERCISE FEEDBACK SHEET

What items on income statement would lead the financial investigator to believe the Crooks are laundering money through their business?

- Sales Revenue and Net Income over the three years show a constant increase.
- Expenses appear somewhat constant and are not increasing in corresponding ratios.

(Pattern should alert the investigator to further investigate the situation.)

What steps might the investigator take to analyze the available information?

Expense accounts should be scrutinized, as well as sales revenue accounts for erroneous entries.
CHAPTER 7: TRACING FUNDS USING THE DIRECT METHOD OF PROOF

LENGTH: 2-3 Hours

OBJECTIVES:
- Explain the concept of "direct proof."
- Describe various point-of-payment schemes.
- Describe information surrounding "suspect payments" that cause an investigator to become suspicious.

INSTRUCTIONAL METHODS/AIDS:

INSTRUCTOR REFERENCES:
Financial Investigations...A Financial Approach to Detecting and Resolving Crimes
I. INTRODUCTION

A. Attention Getter/Motivator

Example: When an individual is suspected of committing a crime, it is the job of the financial investigator to find proof to back up the allegation. From previous chapters, we know that a variety of sources of information are available to help the investigator. This chapter and the next focus on how to use the sources of information to find the proof needed.

B. Objectives

1. Explain the concept of "direct proof."

2. Describe various point-of-payment schemes.

3. Describe information surrounding "suspect payments" that cause an investigator to become suspicious.
Refer to page 179 of the textbook while introducing the concept of proof and the methods involved.

II. OVERVIEW OF THE METHODS OF PROOF

A. Definition of Proof

B. Methods of Proof

1. Categories
   a. Direct
   b. Indirect

2. Types
   a. Specific item
   b. Net worth
   c. Expenditure
   d. Bank deposit
III. DESCRIPTION OF SPECIFIC ITEM METHOD

A. Definition and Use

1. To prove suspect's receipt and/or disposition of funds

2. Look for a specific illegal transaction to show suspect paid for something using illicit funds or received funds through illegal means

3. Nothing implied or inferred

4. Ways of analyzing cases using the Specific Item Method

a. Point-of-payment analysis - Begins at transaction's origin - payor of funds

b. Point of receipt analysis - Begins with receiver of funds - recipient of funds
Refer students to the example in the textbook on page 181.

5. Point-of-Payment Analysis Example

Walk through the process used by the investigator in the case example. Each step in the process is outlined on the transparency. Emphasize process.

Refer students to the example in the textbook on page 182.

6. Analysis of Point-of-Receipt Example

Walk through the process used by the investigator in the case example. Each step in the process is outlined on the transparency. Emphasize process.

Example: Indirect methods are often used with cases involving cash transactions or money not reflected in business books.
IV. POINT-OF-PAYMENT SCHEMES

7. Point-of-Payment Schemes

Introduce items on transparency. Each scheme is discussed separately.

Discuss items as described in textbook on page 184. A summary of these suspicious items are listed in the Student Workbook on pages 7-11 and 7-12.

A. Fictitious Payable Schemes

1. Suspicious items
   a. Fictitious vendors and false billings in Accounts Payable Ledger
   b. Payment by check/other withdrawals made payable to account on which illicit payments are suspected
   c. Payments by check for services rendered
   d. Atypical charges for the business.
Q & A

Refer to the Double Trouble Case Study materials located in the Appendix, page A7-2. Follow the instructions provided in the appendix. If desired, have students read the case study prior to the class session so students will be prepared to discuss example.

Refer to the National Insurance Case Study in the Appendix, page A7-10, and in the Student Workbook on page 7-10. Explain how this case study is another example of a “fictitious payable” scheme.

Discuss items as described in the textbook on page 185. A summary of these suspicious items are listed in the Student Workbook on pages 7-11 and 7-12.

2. Examples:
   a. Double Trouble case study
   b. National Insurance case study

B. Ghost Employee and Payroll Kickback Schemes

1. Suspicious items
   a. Employees who do not have taxes withheld
   b. Employees who do not enroll in health insurance programs
   c. Unusual reimbursements to employees
Example: (Typical Scenario for this type scheme)

Scenario: Informant provides a "tip" that ABC Construction Company has been paying kickbacks to someone at XYZ Corporation, who has a contract with ABC Construction Company.

A review of ABC Construction Company personnel records indicate that there are bi-weekly paychecks being paid for two employees who have no taxes withheld, no medical or life insurance fees deducted, and no pension plan fees withheld.

Further investigation provides no formal job applications on file for individuals.

Investigation results indicate that XYZ Corporation's Union business manager was cashing the payroll checks. The ghost employees were created to provide a kickback of funds from the contractor so that the contractor was ensured the right number of workers available to do the job.
Discuss items as described in textbook on pages 185 and 186. A summary of these suspicious items are listed in the Student Workbook on pages 7-11 and 7-12.

C. Overbilling Schemes

1. Suspicious items
   a. Invoice notation of "extra or special" charges
   b. Discrepancies between the purchase order/invoice amount and the amount of payment
   c. Unusually large amounts on bill or bills which break pattern

2. Example: Scheme often occurs due to weaknesses in the payor's accounting system. Often this occurs as a result of such practices as "batch billing" -- sending out payment requests monthly in groups rather than by individual invoices for items. There is less of a chance of each item being validated by the receiver.
D. Offbook and Currency Schemes

Refer to items as discussed in textbook on page 186.

1. Uncovering offbook schemes
   a. Compare business expenses with others in same type of business
   b. Analyze unusual costs and expenses
   c. Perform financial analysis--inconsistencies in amount of raw materials needed to produce goods and the amount of actual goods produced

2. Uncovering currency schemes
   a. Match currency withdrawals from Business A to currency receipts/deposits of Business B.
   b. Compare expenditures in cash to safe deposit box entries.
   c. Check for cash draws, wire transfers, or cashier’s checks.
Instructor Notes

Items are described in textbook on pages 187 and 188. A summary of these items is included in the Student Workbook on pages 7-11 and 7-12.

8. Check Endorsement/Routing

Point out that example 1 on the transparency shows a business endorsement using a stamp. Emphasize that the check which is endorsed FOR DEPOSIT ONLY should be credited to that account. Example 2 is a handwritten endorsement by an individual for deposit into the business account. Note that a machine endorsement usually refers to cash register type imprinting that looks similar to the stamped endorsement.

Presentation

V. REVIEWING SUSPECT PAYMENTS

A. Reviewing Canceled Checks

1. Endorsement

a. Business or personal

b. Stamp, machine or third party

d. Watch for currency transactions in businesses that do not have internal controls or in businesses that don't normally deal in cash.
Point out bank stamp information on the back of the canceled checks shown on transparency #8.

9. Check - 2nd Endorsement

2. Location of bank where check negotiated
   a. Depository Bank's Stamp
   b. Routing Symbol

3. Second Endorsements
   a. Name of individual who made endorsement

   **Example:** On the sample canceled check (transparency #9), John Doe signed over the funds to Rich's Camera Shop. The words "pay to the order of" indicated assignment.

   b. Third party endorsement

   **Example:** On the sample canceled check (transparency #10), John Doe is the 1st party, Harry Jones is the 2nd party, and Rich's Camera Shop is the 3rd party.
8. Check Endorsement/Routing

This transparency was previously used in Section V-A above.

Refer to Transparency #8 - Example 2. Explain that this check could possibly be cashed because the endorsement did not indicate for deposit only.

4. Payable to a business but "cashed out"
   a. Name of individual who cashed check
   b. Split deposits

5. Unexplained patterns
   a. Time interval
      Example: Check written the same time every month to same customer may suggest some form of kickback
   b. Dependent on other activity interval
      Example: Checks written to company if trucks are on time

Items are described in the textbook on page 188. Use examples from the textbook.

B. Business "Back-up" Documentation

1. Absence of support documentation

2. Discrepancies between payment and backup documentation

3. Coincidences in backup documentation
Refer students to the Student Workbook, pages 7-11 and 7-12, for a summary of suspicious items to be aware of in dealing with each type of point-of-payment schemes and suspect payments.

Have students work together in teams. Refer students to the Student Workbook, page 7-13, for Mary and John Crook Investigation Exercise. Explain to the students that this exercise is a continuation of the investigation started in Chapters 4 and 6. Have the students read the exercise. Clarify any questions before beginning.

Exercise may be given as an out-of-class assignment which students would work through individually.

Upon completion of exercise, distribute exercise feedback sheets. See Appendix, page A7-11. Discuss exercise.

4. Unnumbered or sequentially unusual invoices

5. Alterations or photocopies of backup documentation

C. Advice for Investigator

1. Be inquisitive

2. Challenge unusual or out-of-the ordinary items

D. Group Exercise: Mary and John Crook Investigation - Part III

FINANCIAL INVESTIGATIONS

7.15 Chapter 7: Tracing Funds Using the Direct Method of Proof
Q&A

Have students complete questions individually or work in teams.

E. Textbook Review Questions (pages 191 and 192)
VI. SUMMARY

Summarize objectives addressed in this chapter.

A. Restate objectives

1. Explain the concept of direct proof.

2. Describe various point-of-payment schemes.

3. Describe information surrounding "suspect payments" that cause an investigator to become suspicious.

B. Tie-In to Next Chapter

Example: In this chapter, we discussed how an investigator can use a direct method of proof, the specific item method, to prove a suspect's receipt and/or disposition of funds from an illegal activity. In the next chapter, "Tracing Funds Using Indirect Methods of Proof," additional methods of proof are discussed. These methods have to do with an investigator's use of indirect means of proving the suspect's financial wrongdoing.
APPENDIX

Chapter 7: Tracing Funds Using the Direct Method of Proof
DOUBLE TROUBLE CASE STUDY

Directions to Instructor:

1. Refer to the newspaper article in the Student Workbook on page 7-3 and ask for ideas about how the fraud may have been discovered. Remember, there are no wrong answers.

2. Refer to the bank money order, the post office box rental receipt and the postal money order receipt in the Student Workbook on pages 7-4, 7-5, and 7-6. Ask for ideas from students as to unusual or suspicious items. Tell the class the case began with the bank money order. The post office box rent receipt and postal money order receipt were among hundreds of items of evidence that were seized at the perpetrators' residence pursuant to a search warrant.

3. Discuss what broke the case and give a synopsis of the investigative procedure followed and case conclusion. A synopsis of the case is written down for the students on pages 7-7 through 7-9.
Pair charged with fraud

State Journal staff

A husband and wife were charged in Dane County Circuit Court on Wednesday with defrauding their employers — Cisco Union and Clark Technical College — of more than $22,000 over three years.

CATC physical plan director Will Chaffey, 39, and Lisa Chaffey, 35, both of 123 Berry Ave., were each charged with two counts of parties to the crime of theft by fraud stemming from thefts that occurred between 1989 and 1992.

According to a criminal complaint, the two were in positions at each school to approve bogus invoices for equipment or services and have the schools pay the money to five personal bank accounts under various aliases and companies.

Lisa Chaffey issued about $14,239 in fraudulent invoices while she worked for Cisco Union between January 1989 and January 1992, according to the complaint. A maintenance supervisor said the university did not receive any of the items charged on numerous invoices issued by her.

Police said Will Chaffey authorized about $7,795 in false billings while at CATC in the summer of 1991. An accounting supervisor with CATC said the school did not receive any of the items ordered by him.

Each faces a maximum of 20 years in prison and $20,000 in fines if convicted of the crimes. A preliminary hearing is set for Aug. 5.
DOUBLE TROUBLE
EVIDENCE

MATCH THE AMOUNT IN WORDS WITH THE AMOUNT IN NUMBERS

PAY ONLY $543.00

Notice To Customers: Purchase of an Indemnity Bond for
twice the amount of this check will be required before this

DOUBLE TROUBLE
CASE SYNOPSIS

CASE INITIATION:

On April 2, 1992, the Internal Audit staff at the University of Wisconsin was provided a $543 invoice from "Fairmont Company" for cleaning supplies. The invoice had been paid. The referral to Internal Audit resulted from a spot-check by an "Accounts Payable" supervisor who discovered that the merchandise had not been received by the University.

An auditor attempted to contact the "Fairmont Company" at the telephone number on the invoice. After several contacts during which no one at the "Fairmont" telephone number was able to assist the auditor with any information, the Internal Audit Staff "froze" any further payments to the "Fairmont Company."

On April 15, 1992, Internal Audit received from Accounts Payable the $543 Bank Money Order payable to the Cisco Union. The Money Order was received on 4/13/92 by the Accounts Payable section with a hand written note explaining that the "Fairmont Company" was refunding $543 due to a clerical error that led to a double billing of the University by Fairmont. The Internal Audit Staff began a systematic search for any other "Fairmont" invoices paid by the University, and referred the supposed double billing fraud to the University Police Financial Crimes Unit.

PROCESS OF INVESTIGATION BY INVESTIGATOR:

1. The case detective called the "Fairmont Company" telephone number. After a brief period of "verbal gymnastics," the detective learned that the telephone number was not "Fairmont Company" but an answering service (Quick Network) paid to answer as "Fairmont Company" and to take and deliver messages.

2. The owner of Quick Network gave the detective the name and address of the person who paid for the "Fairmont Company" answering service.

   Jayne Fairmont
   P.O. Box 331
   Glen Park, Illinois

3. A postal office employee at the downtown Glen Park, Illinois, Post Office confirmed that P.O. Box 331 was rented by a person who identified herself as Jayne Fairmont on 02/14/89.
4. A postal inspector obtained physical descriptions of the female who signed the Answer Network service contract and the female who rented Post Office Box 331. The descriptions were essentially identical. The postal clerk who dealt with Jayne Fairmont recalled she had been driving an older, white Oldsmobile with Wisconsin license plates when she rented the P.O. Box in February of 1989. The postal clerk checked her rental records and advised that the same female again renewed the rental of P.O. Box 331 on 2/15/91 and was driving a new, red mini-van with Wisconsin license plates.

5. A Glen Park Police detective examined the past three years' telephone directories and City Directories for both Glen Park and Evanston, Illinois. The detective advised there were no listings for telephone service or any physical locations in those directories for either the "Fairmont Company" or "Jayne Fairmont." The detective learned there had been no utilities subscribed to by either "Fairmont Company" or "Jayne Fairmont" during the same three years.

6. The University's Internal Audit staff advised the university police detectives that the review of the file of Fairmont Company invoices disclosed that all of those invoices had been "approved for payment - merchandise received" by Lisa Chaffey during the period from March of 1989 through January of 1992, when Mrs. Chaffey resigned.

7. The university detective faxed a copy of Mrs. Chaffey's ID card photo to the Glen Park detective. Both the owner of the "Quick Network" and the postal clerk identified the photo of Mrs. Chaffey as the person each had dealt with as "Jayne Fairmont."

8. The university detective obtained and examined the trash from the Chaffey's residence and found, among other items, "Jackson Chemicals" invoices. Those invoices were for cleaning supplies that were supposedly sold to Clark Area Technical College (CATC) by "Jackson Chemicals," P.O. Box 331, Glen Park, IL. A discrete contact with the Accounts Payable supervisor at CATC disclosed that all of the paid invoices from "Jackson Chemicals" were approved for payment by the school's Physical Plant Director, Will Chaffey.

9. Wisconsin Department of Transportation records disclosed that the Chaffeys traded-in their 1986 Oldsmobile on a $22,000 Pontiac mini-van in September of 1990. The mini-van was observed in the Chaffey's driveway by the university police detective who noted that it was red in color.
CASE CONCLUSION:

Based on the information that was learned, the university detective obtained and executed, with city police, a search warrant for financial records and documents related to the "Fairmont Company" and "Jackson Chemicals" frauds perpetrated by Mr. and Mrs. Chaffey. The entire contents of two filing cabinets located at the Chaffey residence were seized during the execution of the warrant. Since one cabinet was labeled "Fairmont" and the other "Jackson," the cabinets were also seized. The University Police detective stated later that the Chaffeys were "compulsive record-keepers," who kept at least one copy of every piece of paper (also called evidence) that they created in their schemes. The detective also said that he had never worked a "paper case" before, but now is looking forward to working "lots more."
NATIONAL INSURANCE CASE STUDY

The following newspaper article is an example of financial fraud involving a fictitious payable scheme.

STATE/METRO

Wisconsin State Journal, Friday, August 20, 1991

Executive charged in fraud

State Journal staff

A mail fraud charged was filed Thursday in U.S. District Court against a former National Insurance Company vice president who allegedly set up a fictitious firm that billed the insurance company for more than $430,000 in orders the company never placed.

Michael Findlay, 41, Mount Haven, who was an assistant vice president and senior corporate officer at the Sun Prairie-based company, allegedly set up a fictitious company called S.S. Consulting and used it to bill National Insurance for business forms it never ordered or received.

According to a complaint, Findlay allegedly used his position at National Insurance to approve billing statements from S.S. Consulting by filling out a cash disbursement form. That caused National’s Insurance’s accounting department to mail checks in payment of the fictitious statements to a post office box in Middleton belonging to Findlay’s fictitious firm, the complaint states.

In all, Findlay collected $436,335 from National Insurance between March 2, 1987 and May 1, 1991, according to the complaint.

At National Insurance, Findlay was responsible for several areas of administration, including mail and supply, printing, furniture acquisition, fleet acquisition and maintaining the Sun Prairie building and other branches, the complaint states.

Findlay was fired on May 6. The case was investigated by the Sun Prairie Police Department and the U.S. Postal Service Inspection Unit.

Findlay is scheduled to appear in federal court Sept. 17.
Directions to the Instructor:

This exercise would work well if conducted in stages. Suggest that each team discuss each part of the exercise and then share their ideas with the group before moving to the next part.

Student feedback may vary from what is listed here. Encourage students to come up with their own ideas for the investigation and how they would approach the case.

PART I: SURVEILLANCE

From the observations, what information might be important to the investigator?

- Restaurant "traffic" does not appear heavy even though the business supposedly is doing well.
- People are entering restaurant but do not appear to be using services.

PART II: INTERVIEW

- There are four employees. 
  Do the employee records verify this?
- Customer traffic is light - particularly on Monday, Tuesday and Wednesday.
  How much is recorded from customer sales for these days?
- Mary Crook keeps the business records.
  No one else sees the books. Do all business records match?
- John Crook has frequent visitors
  Why are they there?
PART III: BUSINESS RECORDS

A review of the Cash Receipts Journal (CRJ) shows--

- Customer sales - Total receipts seem to be constant even though business is slow.

*Do the entries in the (CRJ) correlate with daily cash register receipts, ledger entries and bank deposit information?*

A review of the Cash Disbursement Journal (CDJ) shows--

- Unusual miscellaneous expense to J. Reynolds Marketing Company.

*Is this a legitimate expense or is it an overstatement of an expense by the business? Is there a customer invoice available? What was the service rendered? How was the receipt of the check handled for R. Reynolds?*

- Salary expenses seem somewhat high.

*Why are six payroll checks disbursed? Who are the checks made out to? What do the employee records indicate for this time frame?*

PART IV: BANK RECORDS

A review of the bank statement shows--

- Deposits made on Mar. 7th and Mar. 24th do not correlate with journal entries. *What does the deposit slip show?*

- The J. Reynolds check was cashed. *What should the canceled check to J. Reynolds show?*

- The business account shows time cash withdrawals totaling $1500. *Where did the cash go? Are there corresponding deposits into the Crooks personal accounts on the same dates?*
CHAPTER 8: TRACING FUNDS USING INDIRECT METHODS OF PROOF

LENGTH: 3 Hours

OBJECTIVES:

- Differentiate between direct proof and indirect proof.
- Describe what types of information are gathered through the completion of a financial profile.
- State when it is appropriate to use an indirect method of proof.
- State the requirements of proof for each indirect method of proof.
- Write the formula for each indirect method of proof.
- Perform net worth analysis.
- Perform expenditures analysis.
- Perform bank deposit analysis.

INSTRUCTOR REFERENCES:
Financial Investigations...A Financial Approach to Detecting and Resolving Crimes
I. INTRODUCTION

A. Attention Getter/Motivator

Example: In the last chapter, we saw how our suspects, Mary and John Crook, did participate in an actual illegal business transaction; the proof was in their business and banking records/books. It isn't always possible to find specific items of wrongdoing. If this is the case, the investigator has to turn to other means of proving criminal wrongdoing by using indirect methods.

B. Objectives

1. Differentiate between direct proof and indirect proof.

2. Describe what types of information are gathered through the completion of a financial profile.

3. State when it is appropriate to use an indirect method of proof.

4. State the requirements of proof for each indirect method of proof.

5. Write the formula for each indirect method of proof.

6. Perform net worth analysis.
II. OVERVIEW OF THE INDIRECT METHODS OF PROOF

A. Comparison of Direct versus Indirect Methods

1. Direct Method: definition and use
   a. Method used to show the receipt and/or disposition of funds through illegal means
   b. Investigator locates actual business transaction that shows illegal disposition or receipt
   c. Microscopic view of financial transactions by looking into books and records
2. Methods of Proof

Refer to the three indirect methods listed on the transparency.

B. Types of Indirect Methods

1. Net worth

2. Expenditures
3. Basic Principle

Refer to information on page 194 in the textbook. Emphasize to the students that this principle applies no matter what method of proof is being used.

III. DESCRIPTION OF THE FINANCIAL PROFILE

A. Objective: to describe the financial condition of the suspect—what the suspect owes, owns, earns and spends at a given point in time or over a given period of time.

B. Means of Accomplishment

1. Interview suspect

2. Review of public records
### Instructor Notes

</tr>
<tr>
<td>d. Neighbors/friends/enemies</td>
</tr>
</tbody>
</table>

### 4. The Financial Profile

Refer students to the Financial Profile chart on page 196. Explain what the information on the chart represents and how it can be used as a guide for the investigator during the investigation.
5. Disposition of Income

Discuss the four ways shown on the transparency. Stress to the students that these ways are applicable whether using a direct or any of the indirect methods.

D. Disposition of Funds

1. Save it
2. Buy assets
3. Pay off debts
4. Spend it
V. PERFORMING NET WORTH ANALYSIS

A. Definition

6. Net Worth Method

Use the terminology and explanation on page 197 of the textbook.

7. Net Worth Analysis Formula

Inform students that a worksheet on the procedures for performing a Net Worth Analysis is available for their use in the Student Workbook on page 8-2.

C. Example: Jim Dealer

8. Net Worth Analysis - Jim Dealer

Summarize the results of the analysis as outlined on page 201 in the textbook.
D. Keys to Net Worth Analysis

9. Keys to Net Worth Analysis

Discussion items located in textbook on pages 201 and 202.

Emphasize the importance of this item in the investigation.

1. Cash on hand

a. Currency in possession of suspect

b. Most important and most difficult asset to establish

c. Establish through interview process with suspect

d. Ways of disproving a "Cash Hoard"

Examples:
- Prior financial statements
- Low earnings in prior periods
- Bankruptcy in prior year
- Borrowing money
- Installment purchases
- Welfare or applications
- Credibility of subject's story
Discussion items located in textbook on page 202.

2. Cash in banks
   a. Accounts must be reconciled to determine balances at end of specific period.
   b. Unusual transactions must be traced to source.

Discussion items located in textbook on page 202.

3. Asset valuation
   a. Assets valued at cost as opposed to fair market value.
   b. Appreciation or depreciation is ignored.

Discussion items located in textbook on pages 202 and 203.

4. Known expenses
   a. Difficult to document
   b. Estimates should be low

E. Net Worth Method - Elements of Proof

10. Net Worth Method - Elements of Proof

Discussion items located in textbook on page 204.
Refer students to the Student Workbook, page 8-6, for Personal Net Worth Exercise. Explain to the students that this exercise is a "fun exercise" designed to help students understand assets and liabilities and how they are used to determine an individual's net worth. This is a continuation of the exercise started in Chapter 1. Have the students read the exercise. Clarify any questions before beginning.

Exercise may be given as an out-of-class assignment.

Exercise feedback information is included in Appendix, page A8-2. Discuss exercise.
VI. EXPENDITURES METHOD

A. Definition

11. Expenditures Method

B. Formula/Procedures

12. Expenditures Analysis
Formula

Inform students that a worksheet on the procedures for performing an Expenditures Analysis is available for their use in the Student Workbook on page 8-7.

C. Examples:
1. Jim Dealer

13. Expenditures Analysis - Jim Dealer

Summarize the results of the analysis as outlined on page 208 in the textbook.

Q&A

2. John - The Lottery Winner

Follow the instructions for the activity, John - The Lottery Winner. Directions are included in the Appendix, page A8-7.
D. Expenditures Method - Elements of Proof

14. Expenditures Method - Elements of Proof

Discussion items are located in the textbook on page 209.

VII. BANK DEPOSIT METHOD ANALYSIS

A. Definition

B. Formula/Procedures

15. Bank Deposit Method

16. Bank Deposit Analysis Formula

Inform students that a procedure/worksheet on performing a Bank Deposit Analysis is available for their use in the Student Workbook on page 8-9.
17. Bank Deposit Analysis - Jim Dealer

Summarize the results of the analysis as outlined on page 214 in the textbook.

OPTIONAL ACTIVITY: Discuss the Dan Street example shown in textbook on pages 211 and 212.

18. Bank Deposit Method - Elements of Proof

Discussion items are located in the textbook on page 214.

Q&A

OPTIONAL ACTIVITY: Use this exercise as a review of the three indirect methods of proof. Follow the instructions in the Appendix, page A8-12.
IX. SELECTING THE APPROPRIATE INDIRECT METHOD

A. Criteria

Discussion of the criteria is listed in textbook on pages 215 and 216. Use the summary of the criteria as shown on transparency #19 as discussion points. The information is also included in the Student Workbook on page 8-12.

B. Other Considerations

1. Indirect Methods used as investigative tools

Examples:
- Show suspect warrants an investigation.
- Convince jury suspect is guilty.

2. Indirect Methods used in conjunction with Direct Method

Example: Investigator uses specific item method to document a percentage of the financial fraud that has been committed and uses an indirect method to show the extent of the financial crime.

Use the Billy Bob Smith example in textbook on page 216 to illustrate this concept.

Continue with the Billy Bob embezzlement example on page 217 in the textbook to illustrate this concept.
Q & A

Have students work together in teams. Refer students to Student Workbook, page 8-13, for Mary and John Crook Exercise. Explain to the students that this exercise is a continuation of the investigation started in Chapter 4, 6, and 7. Have the students read the exercise. Clarify any questions before beginning.

Exercise may be given as an out-of-class assignment which students would work through individually.

Upon completion of exercise, distribute exercise feedback sheets. See the Appendix, page A8-20. Discuss exercise.

D. Textbook Review Questions (pages 220 through 225)
X. SUMMARY

Summarize objectives addressed in this chapter.

A. Restate Objectives

1. Differentiate between direct proof and indirect proof.

2. Describe what types of information are gathered through the completion of a financial profile.

3. State when it is appropriate to use an indirect method of proof.

4. State the requirements of proof for each indirect method of proof.

5. Write the formula for each indirect method of proof.

6. Perform net worth analysis.

7. Perform expenditure analysis.

8. Perform bank deposit analysis.

B. Tie-in to Next Chapter

Example: In order to use any of the methods discussed for proving a suspect’s innocence or guilt, an investigator must question the suspect for the information needed. The next chapter, "Planning, Conducting, and Recording an Interview" focuses on the skills required of the investigator.
APPENDIX

Chapter 8: Tracing Funds Using Indirect Methods of Proof
PERSONAL NET WORTH
EXERCISE FEEDBACK

- This exercise is designed to show how the net worth analysis method is accomplished. Responses will vary with each individual.

- Copies of the worksheets and lists used by the students in making their computations are provided on the following pages.

- Column I of WORKSHEET A should have been completed during Chapter I. LIST A and LIST B should have been completed on a daily basis with the daily total shown. The rest of WORKSHEET A and WORKSHEET B should be completed at this time.

NOTE: Remind students that personal expenditures should include such items as food, clothing, gas, entertainment, etc. Income should include such things as wages, interest income, spending money from home, etc.

**FINANCIAL INVESTIGATIONS**

**Personal Net Worth Exercise**

A8-6 Chapter 8 Tracing funds Using Indirect Methods of Proof
Directions to Instructor:

- **Purpose.** This is an example of how transactions can be classified as expenditures (applications) or sources of funds. This determination is an important step in using the Expenditures Method.

- **Relay the events in the scenario to the students.** A flipchart or chalkboard could be used to write down figures as discussed. Query students to help analyze the events and determine the effect that results from the transaction.

- **Out-of-class activity (OPTIONAL).** Instructor may distribute example for students to read prior to class or as part of a self-study.
JOHN - THE LOTTERY WINNER
HANDOUT

BACKGROUND: Consider John. John has just graduated from high school. John does not have a job, a car, a bank account or any debts at all. John lives at home (rent free) and has no money (cash) in his pocket.

EVENTS:

Jan. 1 While walking, John finds a lottery ticket. It appears to be a legitimate lottery ticket and accordingly, he takes it to the lottery store. John finds out that he has just won $100,000. John takes his winnings in cash - 100,000 one-dollar bills. John places the cash in his pocket.

What has occurred?

John has entered into a "flow of funds" that can be analyzed. John has become the recipient of $100,000; the source is from lottery winnings. However, John also now has $100,000 in cash. We can, through analysis, account for the change in John’s financial position prior to January 1. In other words, we have investigative evidence to document the $100,000 received by John.

<table>
<thead>
<tr>
<th>Source</th>
<th>Lottery winnings</th>
<th>$100,000</th>
</tr>
</thead>
<tbody>
<tr>
<td>Application</td>
<td>Cash on hand - increase</td>
<td>$100,000</td>
</tr>
</tbody>
</table>

Jan. 2 John recuperates from all the excitement of winning!

Jan. 3 John decides that he always wanted a car and a boat; accordingly, he purchases one of each - both costing $50,000 each.

How did John pay for these items?

He took cash out of his pocket and paid for them.

What was the source of funds used by John to pay for the car and the boat?

The source was his cash on hand. He decreased his cash holdings to buy the car and boat. In other words, a decrease in cash on hand represents a source of funds for further expenditures.

<table>
<thead>
<tr>
<th>Source</th>
<th>Cash on hand - decrease</th>
<th>$100,000</th>
</tr>
</thead>
<tbody>
<tr>
<td>Application</td>
<td>Car purchase</td>
<td>$50,000</td>
</tr>
<tr>
<td></td>
<td>Boat purchase</td>
<td>$50,000</td>
</tr>
</tbody>
</table>
Through this type of analysis we have determined that the car and boat were purchased from known sources available to John.

Jan. 4

John decides he wants to go into business for himself. He always wanted to be a rock and roll star. He decides to buy an electric piano that will make him a one man band. He finds one that he likes for $75,000. He decides to keep his car but returns the boat and gets his $50,000 back (in cash). At this point in time, John has sold an asset (boat) and increased his cash on hand in order to prepare to make another expenditure. Accordingly, the sale of an asset, or in this instance, the exchange of assets (boat for cash) represents a source of funds to John.

What does this analysis indicate?

<table>
<thead>
<tr>
<th>Source</th>
<th>Application</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sale of boat</td>
<td>Cash on hand - increase</td>
<td>$50,000</td>
</tr>
</tbody>
</table>

We can fully document the flow of funds reflecting John's purchase of a car ($50,000) and cash on hand increase ($50,000) - the original lottery winnings of $100,000.

Jan. 5

John determines that he needs another $25,000 to buy his piano. Not wanting to sell his car, he decides to take out a loan for $25,000. With the loan proceeds and by decreasing his cash on hand, he buys the piano.

What does this analysis indicate?

<table>
<thead>
<tr>
<th>Source</th>
<th>Application</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Loan proceeds</td>
<td>Piano purchase</td>
<td>$75,000</td>
</tr>
<tr>
<td>Cash on hand - decrease</td>
<td></td>
<td>$50,000</td>
</tr>
</tbody>
</table>

Now John has a car, a piano, and no cash. Since January 1st, John has expended $125,000 and we can document or account for the sources of all the applications of funds (lottery = $100,000 and loan proceeds = $25,000)

Jan. 6

John plays his first concert and receives $10,000 as income. The concert promotor pays John $5,000 in cash and promises to pay the other $5,000 in 30 days.
What has occurred with respect to the flow of funds?

<table>
<thead>
<tr>
<th>Source</th>
<th>Application</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Income</td>
<td>Cash on hand increase</td>
<td>$5,000</td>
</tr>
<tr>
<td></td>
<td>Account receivable - increase</td>
<td>$5,000</td>
</tr>
</tbody>
</table>

Even though John has in hand only $5,000, the total $10,000 is considered as a source of funds for analysis purposes.

Jan. 7

John decides he needs to buy a trailer for his piano. John talks to the concert promotor who also sells piano trailers. The promotor agrees to sell a trailer to John for $5,000. However, instead of paying cash, they both agree to forgo or forgive the $5,000 promised to be paid to John in the future. John exchanges his accounts receivable for the trailer.

<table>
<thead>
<tr>
<th>Source</th>
<th>Application</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accounts receivable - decrease</td>
<td>Trailer purchase</td>
<td>$5,000</td>
</tr>
</tbody>
</table>

At the time of receipt, if we fail to show the full amount of income ($10,000) as a source and correspondingly fail to establish the account receivable as an expenditure, our analysis becomes invalid.

<table>
<thead>
<tr>
<th>Source</th>
<th>Application</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lottery</td>
<td>Piano</td>
<td>$75,000</td>
</tr>
<tr>
<td>Loan</td>
<td>Car</td>
<td>$50,000</td>
</tr>
<tr>
<td>Income</td>
<td>Cash on Hand - Increase</td>
<td>$5,000</td>
</tr>
<tr>
<td></td>
<td>Trailer</td>
<td>$5,000</td>
</tr>
</tbody>
</table>

Following this INCORRECT PATH reveals an unidentified expenditure of $5,000.

Jan. 8

John decides that rock and roll is not his life. Accordingly, he sells his piano for $75,000 and receives cash. He sells his car for $50,000 and receives cash and his trailer for $5,000 and receives cash. He sells his piano for $75,000, car for $50,000, and trailer for $5,000, receiving cash for each transaction.
What has happened?

**Source**
Sale of piano $75,000
Sale of car $50,000
Sale of trailer $5,000
$130,000

**Application**
Cash on hand - increase $130,000

At this point, John has added $130,000 to his already $5,000 cash on hand and we can document the source of each dollar (lottery/loan/income).

Jan. 9  
John decides to take a trip to Paris, France, on the Concorde - five times in one day. The cost is $10,000 which he pays for in cash. This decision to take the trip was made after considering other types of personal expenditures (i.e. buying clothes, groceries, furniture, stereo, dining out, or paying his parent's bills, etc.)

What has occurred?

**Source**  
Cash on hand - decrease $10,000

**Application**  
Personal expenditure (trip) $10,000

Jan. 10  
Still feeling a little dizzy, John rests from his trip!

Jan. 11  
John decides to take the $100,000 cash he has left and buy 100,000 lottery tickets (each costing $1.00).

What has occurred?

**Source**  
Cash on hand - decrease $100,000

**Application**  
Lottery ticket purchases $100,000

John learns that one of his tickets is a $100,000 winner! On the way to the lottery store to collect his winnings, John inadvertently drops the ticket. John is unable to find the ticket. John has lost it all.

Jan. 12  
John makes application to attend the local university!
JIM DEALER CARD ACTIVITY

Directions to Instructor:

(Before Class)

Prepare a set of index cards for the activity. Make a card for each item (A through L) listed in the Jim Dealer scenario on page 199 of the textbook. Include the item name, description from textbook and the names of the three indirect methods. NOTE: Item B, Bank Information, is split into three different areas of concern--bank balances, bank deposits, and interest income. A separate card should be prepared for each of these categories.

A sample of how the index card should look is provided here.

<table>
<thead>
<tr>
<th>JIM DEALER ACTIVITY CARD</th>
</tr>
</thead>
<tbody>
<tr>
<td>ITEM A: CASH-ON-HAND</td>
</tr>
<tr>
<td>Dealer stated he had $1,000 on 12/31/90 from an old boat he sold on 12/30/90. Dealer stated he had no cash-on-hand at 12/31/91.</td>
</tr>
<tr>
<td>NET WORTH IMPACT:</td>
</tr>
<tr>
<td>EXPENDITURES IMPACT:</td>
</tr>
<tr>
<td>BANK DEPOSIT IMPACT:</td>
</tr>
</tbody>
</table>
(During Class)

1. State the purpose of the activity. The purpose of this exercise is to show how the same effect is achieved using any of the three indirect methods. The student must arrive at the conclusion that all methods show how "unknown sources of funds" are derived.

2. Distribute cards to students. Students may work in teams.

3. Have students complete cards. If necessary, have them refer to Jim Dealer examples in the textbook.

4. Each team or individual is to present their findings to the class. Sample impact statements are provided. Assist students during the process.

5. Summarize activity. Use the chalkboard to illustrate the effect as shown below. Each had a different starting point, but all resulted with same type of information.

<table>
<thead>
<tr>
<th>Method</th>
<th>Effect</th>
</tr>
</thead>
<tbody>
<tr>
<td>Net Worth</td>
<td>Total Net Worth Increases</td>

</tr>
<tr>
<td></td>
<td>Funds from Unknown Sources</td>
</tr>
</tbody>
</table>
## ITEM A: Cash-on-Hand

<table>
<thead>
<tr>
<th></th>
<th>Base Year</th>
<th>Year 1</th>
<th>Year 2</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Net Worth Impact</strong></td>
<td>$1,000</td>
<td>0</td>
<td>0</td>
</tr>
<tr>
<td><strong>Expenditures Impact</strong></td>
<td>$1,000</td>
<td>$1,000</td>
<td>No effect</td>
</tr>
<tr>
<td><strong>Bank Deposit Impact</strong></td>
<td>Source for $1,000 of funds &quot;applied&quot; or &quot;expended&quot; during year #1</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

## ITEM B-1: Bank Information - Bank Balance

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Net Worth Impact</strong></td>
<td>Dealer's asset &quot;Cash in Bank&quot; went up by $3,250 during Year 1 and $475 in Year 2.</td>
</tr>
<tr>
<td><strong>Expenditures Impact</strong></td>
<td>The increases in &quot;Cash in Bank&quot; are expenditures (also called &quot;applications of funds&quot;) of $3,250 in Year 1 and $475 in Year 2.</td>
</tr>
<tr>
<td><strong>Bank Deposit Impact</strong></td>
<td>The increases in &quot;cash in bank&quot; flow through the computation. Since the funds remained on deposit at year's end, the funds were not disbursed by the bank. Thus, these funds were not part of &quot;net bank disbursements.&quot; These increased ending bank balances thus decreased net bank disbursements and, in applying the formula, increased cash disbursements.</td>
</tr>
</tbody>
</table>
ITEM B-2: Bank Information - Bank Deposits

<table>
<thead>
<tr>
<th>Net Worth Impact</th>
<th>None</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>(Only ending balances, reconciled for outstanding checks and deposits-in-transit have impact on net worth method.)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Expenditures Impact</th>
<th>None</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>(Only increases and decreases in the ending balances of the asset &quot;cash in bank&quot; can be sources or application of funds and in the amount of the change in balance.)</td>
</tr>
</tbody>
</table>

ITEM B-3: Bank Information - Interest Income

<table>
<thead>
<tr>
<th>Net Worth Impact</th>
<th>The interest received is funds from a known source, which is subtracted from &quot;total net worth increase&quot; in the final step to arrive at funds from unknown source.</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Expenditures Impact</th>
<th>Same as net worth - The interest is a &quot;known source&quot; of funds and is subtracted from &quot;total expenditures&quot; to arrive at funds from unknown sources.</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Bank Deposit Impact</th>
<th>Same. Subtracted from &quot;total receipts&quot; to arrive at funds from unknown sources.</th>
</tr>
</thead>
</table>

ITEM C: Jewelry

<table>
<thead>
<tr>
<th>Net Worth Impact</th>
<th>Base Year</th>
<th>Year 1</th>
<th>Year 2</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>$1,000</td>
<td>$6,000</td>
<td>$12,000</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Expenditures Impact</th>
<th>The increases in the asset &quot;jewelry&quot; were obtained by applications of funds (or &quot;expenditures&quot;) in 1991 of $5,000 and in 1992 of $6,000.</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Bank Deposit Impact</th>
<th>The jewelry purchases are added to Dealer's other &quot;Outlays of Funds.&quot; The effect is an increase of $5,000 to &quot;outlays&quot; in 1991 and $6,000 in 1992.</th>
</tr>
</thead>
</table>

Instructor-led Question: Where would an investigator find lead(s) to this information? Jeweler
ITEM D: Boat Purchase

<table>
<thead>
<tr>
<th>Net Worth Impact</th>
<th>Base Year</th>
<th>Year 1</th>
<th>Year 2</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>$17,500</td>
<td>$17,500</td>
<td>$17,500</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Expenditures Impact</th>
<th>None during 1991 or 1992. But you may want to look for &quot;Boat Club&quot; dues, boat insurance, operating expenses, etc.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bank Deposit Impact</td>
<td>Same as above at &quot;expenditures&quot;</td>
</tr>
</tbody>
</table>

Note: The net impact of the boat is 0 for all methods, since the asset didn’t change and was not a source or application of funds in 1991 or 1992.

Instructor-led Question: Where would an investigator find lead(s) to this information? Boat Dealer, Surveillance, Department of Transportation

ITEM E: Car Purchase

<table>
<thead>
<tr>
<th>Net Worth Impact</th>
<th>Base Year</th>
<th>Year 1</th>
<th>Year 2</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>0</td>
<td>0</td>
<td>$18,250</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Expenditures Impact</th>
<th>The 1992 increase in the asset &quot;auto&quot; was obtained by the $18,250 application of funds in order to purchase the auto.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bank Deposit Impact</td>
<td>The auto purchase is added to dealer's outlays of funds.</td>
</tr>
</tbody>
</table>

ITEM F: House/Mortgage Information

<table>
<thead>
<tr>
<th>Net Worth Impact</th>
<th>Base Year</th>
<th>Year 1</th>
<th>Year 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Asset - House</td>
<td>0</td>
<td>$150,000</td>
<td>$150,000</td>
</tr>
<tr>
<td>Liability - Mortgage</td>
<td>0</td>
<td>$100,000</td>
<td>$100,000</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Expenditures Impact</th>
<th>The &quot;net effect&quot; of the house purchase is entirely made up of the $50,000 down payment ($150,000 cost, less $100,000 mortgage). The $50,000 down payment is an expenditure during Year 1: 1991.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bank Deposit Impact</td>
<td>Same as above. The down payment is added to dealer's other &quot;outlays.&quot;</td>
</tr>
</tbody>
</table>

Instructor-led Question: Where would an investigator find lead(s) to this information? Registrar of Deeds, trash, mail cover, County Treasurer
ITEM G: Interest Free Loan

<table>
<thead>
<tr>
<th>Net Worth Impact</th>
<th>Base Year</th>
<th>Year 1</th>
<th>Year 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Liability - Loan</td>
<td>$275</td>
<td>$275</td>
<td>$275</td>
</tr>
</tbody>
</table>

| Expenditures Impact | |
|---------------------| None - No payments, so neither a source or application of funds in 1991 or 1992. |

| Bank Deposit Impact | Not received in 1991 or 1992, so not a "source" nor a "deposit" to be considered. No payments made (interest or principal), so not an "application" either. |

Instructor-led

Question: Where would an investigator find lead(s) to this information (Interview, financial statement)?

Note: Although there is no real impact, this is included in Net Worth method to show "complete investigation."

ITEM H: Loan Information

<table>
<thead>
<tr>
<th>Net Worth Impact</th>
<th>Base Year</th>
<th>Year 1</th>
<th>Year 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Liability - Loan</td>
<td>No effect</td>
<td>$2,400</td>
<td>$1,200</td>
</tr>
</tbody>
</table>

| Expenditures Impact | In 1991, the loan is a source of funds of $3,000 and an application of funds (or expenditure) of $600. Interestingly enough, the $2400 "net source" ($3000 less $600) is the same as the 12/31/91 balance of the liability. |

| Bank Deposit Impact | In 1991, the $3000 is a "known source of funds" and the $600 in repayments on the loan is an "outlay." In 1992, the $1200 ($100/month times 12) is an "outlay." The liability balance (N/W) of $1200 at 12/31/92 is an unrelated coincidence. |
ITEM I: Mortgage Payments

<table>
<thead>
<tr>
<th>Net Worth Impact</th>
<th>Base Year</th>
<th>Year 1</th>
<th>Year 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Liability - Mortgage</td>
<td>No effect</td>
<td>$100,000</td>
<td>$94,000</td>
</tr>
<tr>
<td>Less: Payments</td>
<td>No effect</td>
<td>-6,000</td>
<td>-6,000</td>
</tr>
<tr>
<td>Mortgage Balance @ end of 1991 and 1992</td>
<td></td>
<td>$ 94,000</td>
<td>$88,000</td>
</tr>
</tbody>
</table>

Expenditures Impact: The $6000 of loan re-payments are $6,000 "applications of funds" (or expenditures) in both 1991 and 1992.

Bank Deposit Impact: Same effect as above. The $6,000 in mortgage payments are added to dealer's other "outlays" in both 1991 and 1992.

ITEM J: Credit Cards

<table>
<thead>
<tr>
<th>Net Worth Impact</th>
<th>Neither an asset nor liability. Requires balance be paid when billed. Included as &quot;known expenses.&quot;</th>
</tr>
</thead>
</table>

Expenditures Impact: The $1,460 paid in 1991 and the $3,000 paid in 1992 are "applications of funds" in each year.

Bank Deposit Impact: As above the $1,460 and $3,000 are added to dealer's "outlays" in the respective years.

ITEM K: Personal Living Expenses

<table>
<thead>
<tr>
<th>Net Worth Impact</th>
<th>The personal living expenses are called &quot;known expenses&quot; and are added to &quot;increase in net worth.&quot;</th>
</tr>
</thead>
<tbody>
<tr>
<td>Expenditures Impact</td>
<td>The personal living expenses are called &quot;expenditures&quot; and are added to other expenditures for &quot;total expenditures.&quot;</td>
</tr>
<tr>
<td>Bank Deposit Impact</td>
<td>The personal living expenses are called &quot;outlays&quot; and added to other &quot;outlays&quot; to get &quot;total outlays.&quot;</td>
</tr>
</tbody>
</table>

Instructor-led Question: Where would an investigator find lead(s) to this information? Trash, checks, surveillance
ITEM L: Wages

| Net Worth Impact | The "legitimate income" is a known source of funds that is subtracted from everything spent (or saved, etc.) to arrive at the subject's income from illegal activities called "unknown sources" unless you have a witness or two to testify as to the specifics of the source. |
| Expenditures Impact | Same as above. |
| Bank Deposit Impact | Same as above. |
MARY AND JOHN CROOK INVESTIGATION
EXERCISE FEEDBACK

The results of the bank deposit analysis are as follows. The students may use the single-step or multi-step format to make their computation.

**Single-Step Format**

**STEP 1**  CALCULATE NET DEPOSITS TO ALL ACCOUNTS

<table>
<thead>
<tr>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total Deposits to All Accounts</td>
</tr>
<tr>
<td>Minus: Transfer and Redeposits</td>
</tr>
<tr>
<td>Equals: Net Deposits to All Accounts</td>
</tr>
</tbody>
</table>

**STEP 2**  CALCULATE NET BANK DISBURSEMENTS

<table>
<thead>
<tr>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Net Deposits to All Accounts (STEP 1)</td>
</tr>
<tr>
<td>Plus: Beginning Balances</td>
</tr>
<tr>
<td>Equals: Net Bank Funds Available</td>
</tr>
<tr>
<td>Minus: Ending Balances</td>
</tr>
<tr>
<td>Equals: Net Bank Disbursements</td>
</tr>
</tbody>
</table>
**STEP 3**

**CALCULATE CASH EXPENDITURES**

Examples of total outlay of funds:

- Purchases of capital assets or investments, loan repayments, known expenses

<table>
<thead>
<tr>
<th>Outlays</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vacation</td>
<td>$15,000</td>
</tr>
<tr>
<td>Real Estate Taxes</td>
<td>1,200</td>
</tr>

CHAPTER 9: PLANNING, CONDUCTING, AND RECORDING AN INTERVIEW

LENGTH: 5 Hours

OBJECTIVES:

- State the purpose of a financial interview.
- List the objectives of a financial interview.
- Describe the elements that must be considered when planning an interview.
- Describe techniques used when conducting an interview.
- Identify and describe methods used to record an interview.

Overhead projector
Videotape recorder and camera (optional)

INSTRUCTOR REFERENCES:
Financial Investigations...A Financial Approach to Detecting and Resolving Crimes
I. INTRODUCTION

Use a transition statement from the previous chapter.

Example: Getting the information you need during an investigation is not always easy. One of the most important skills required of a financial investigator is the ability to get information from people. This chapter addresses the techniques of conducting financial interviews.

Refer to the objectives on pages 227 and 228 in the textbook.

A. Attention Getter/Motivator

B. Objectives

1. State the purpose of a financial interview.

2. List the objectives of a financial interview.

3. Describe the elements that must be considered when planning an interview.

4. Describe techniques used when conducting an interview.

5. Identify and describe methods used to record an interview.
II. INTRODUCTION TO THE FINANCIAL INTERVIEW

A. Purpose/Objectives of Interview

1. Definition

2. Purpose

2. Purpose of Financial Interviews

Refer to the purpose statement on page 261 of the textbook.

3. Objectives - To obtain:

a. Information that establishes or refutes the allegation or crime under investigation

b. Leads for further development of the case

c. All information and documents in the witness's possession relative to the financial investigation
4. Types of Interview Questions

Refer to the examples in the textbook on page 230.

d. The cooperation of the witness for any subsequent legal proceeding

e. Background and personal information about the witness and motivation for involvement in the crime

B. Types of Interview Questions

Examples: General recollection

Examples: Specific detail

C. Phases of an Interview

1. Planning

2. Conducting

3. Recording

652
Instructor Notes

Inform students that Interview Planning Aids are available in the Student Workbook beginning on page 9-2.

Discuss items listed in textbook on page 231.

Use examples in textbook on page 232 to clarify this information.

Explain categories and how each affects the interview process. Refer to category types mentioned on page 233 in the textbook.

Presentation

III. PLANNING AN INTERVIEW

A. Condition(s) Facing Investigator at the Beginning of the Investigation

B. Selecting Witnesses

1. Who: People having knowledge or possession of documents pertaining to financial transactions

2. Order: Degree of knowledge or participation

C. Types of Witnesses

1. Neutral

2. Friendly

3. Reluctant or hostile
D. Contacting the Suspect

1. Reasons for interviewing during early stages
   
a. Fear that records may be destroyed
   
b. Catching suspect off guard results in more responsive interviews
   
c. May result in quick confessions or early indications of innocence

2. Reasons for delaying interviews
   
a. Needed documentation collected from other witnesses can be used to refute suspect’s testimony
   
b. Confessions sometimes occur when suspect confronted with evidence of guilt
Discuss information and examples in textbook on pages 234 and 235. Emphasize chronological is the most common.

Refer students to sample interview outline on page 236 in the textbook. Emphasize that the items listed are only key points to be addressed. A more comprehensive outline/ worksheet is contained in the Student Workbook on page 9-4.

3. Reasons for NOT contacting suspect--
   a. Beyond reach of law enforcement
   b. Represented by attorney who refuses to allow client to be interviewed on constitutional grounds

E. Method of Questioning
   a. Chronological method
   b. Questioning according to documents
   c. Questioning according to transactions or events

F. Preparing Outline (Do not list every question)
IV. CONDUCTING AN INTERVIEW

A. Parts of the Interview

B. Introduction Techniques

1. Purpose
   a. Identify self
   b. Purpose of contact

2. Right and wrong techniques

C. Body Techniques

1. Purpose/method
   a. Fact-finding purpose
   b. Structure depends upon questioning method used

2. Techniques for employing "who, what, where, when, and why" questions

Model the right and wrong techniques to the students using the examples in the textbook on pages 237 through 239.

Model the appropriate techniques to the students using the examples in the textbook on pages 241 and 242. Have a student role play as the witness.

Refer back to page 234 for questioning methods.
D. Closing Techniques

1. Purpose
   a. Clarify facts
   b. Summation

Discuss closing questions presented in the textbook on pages 244 and 245.

2. Closing questions
V. RECORDING THE INTERVIEW

A. Informal Notes

1. **Purpose** - Can serve as written record

2. **Content** - Date, time, place, persons present and what occurred

An example of informal notes is located in textbook on page 246.

B. Memorandum

1. **When used** - Details too numerous to be recorded informally

2. **Advantages/disadvantages**

An example of a memorandum is located on page 248 in textbook.

Refer to the textbook on page 247 for advantages and disadvantages.
An example of the Question and Answer Statement format is located on page 250 in the textbook.

Discuss items listed in textbook on page 249.

Refer to the textbook on page 251 for advantages and disadvantages.

Sample Affidavit is located on page 253 in textbook.

Refer to textbook on page 254 for advantages and disadvantages.

Refer to page 255 in the textbook for an example of the oath that must be administered with the sworn statement.

C. Question and Answer Statement

1. When used - When complete transcript of questions, answers and statements made by each participant are needed.

2. Content required

3. Advantages/disadvantages

D. Affidavit

1. When used - When declaration of facts made voluntarily and confirmed by oath is needed.

2. Advantages/disadvantages

E. Sworn Statement - Statement by witness under oath

659
Refer to guidelines listed in the textbook on page 255.

A sample form letter is located on page 256 in the textbook.

Inform the students that in the Student Workbook there is a collection of interview aids (page 9-2), some of which have just been discussed, to help them with the interviewing process.

F. Mechanical Recording

1. When used - When a stenographer is not available to record all details

2. Guidelines for use

G. Form Letter - Used when requesting information from third parties

H. Grand Jury Transcript - Contains all questions, answers and statements made by each participant before grand jury.
Two role-playing practice exercises have been provided in the Appendix.

Role Play #1 - Sherman Hunter Case, page A9-2.

Either one or both of these exercises can be used to practice interviewing skills. These exercises have been set up as student-directed activities. Four individuals are needed to complete each role-play exercise. Divide the class into groups accordingly. Follow the instructions provided in the Appendix.

OPTIONAL: If equipment available, videotaping of the role playing may be done to provide students with feedback.
Instructor Notes

Materials needed to conduct the role playing exercise are included in the Appendix, page A9-33. Refer students to page 9-16 in the Student Workbook for a synopsis of this exercise.

Distribute role play guides. Follow directions in the Appendix.

OPTIONAL: Guest special agents can be used to role play the parts of witnesses in this exercise.

Q&A

Have students complete questions individually or work in teams.

Presentation

J. Role Play: Special Agent Interview

K. Textbook Review Questions (pages 259 through 261)
VI. SUMMARY

Summarize the objectives addressed in this chapter.

A. Restate Objectives

1. State the purpose of a financial interview.

2. List the objectives of a financial interview.

3. Describe the elements that must be considered when planning an interview.

4. Describe techniques used when conducting an interview.

5. Identify and describe methods used to record an interview.

B. Tie In to Next Chapter

Example: Knowing how to get information from witnesses is key to conducting a successful investigation. But the interview alone is not the only technique the investigator must be skilled at using. Some of the other techniques used by an investigator are discussed in the next chapter, "Investigative Techniques."
ROLE PLAY #1
SHERMAN HUNTER CASE

Notes to the Instructor:

- Inform students that the role-playing exercise is a third-party interview. A person who has knowledge related to the case under investigation—not the individual under investigation—is being interviewed.

- Organize students into groups of four. Have individuals in each group assume the following roles:
  - Case Agent Interviewer
  - Interviewer Assistant/Recorder
  - Interviewee (Person being interviewed) - Kelly Host (Auto Dealer)
  - Interview Administrator/Evaluator

- Distribute copies of the role playing guides for each individual in the group. The students will be conducting this practice exercise essentially on their own.

- ROOM SPACE - You may wish to arrange for several different locations where these interviews can be conducted.

- VIDEOTAPING - If feasible, videotaping of the exercise would be beneficial. Arrangements would have to be made for equipment and the operation of the equipment.

Role Player Guides:

1-1 Interviewer - Case Special Agent
1-2 Interviewer Assistant/Recorder
1-3 Interviewee - Kelly Host-Auto Dealer
   Sales Invoice, 2 Receipts, and 2 Deposit Slips - Sherman Hunter.
   Sales Invoice, 2 Receipts, and 2 Deposit Slips - Sandy Jumper.
1-4 Interview Administrator/Evaluator
Situation

You are assigned as the investigator doing an investigation of Sherman Hunter, 624 Vandy Street, Indianola, Iowa. A check with the Department of Motor Vehicles indicates Hunter purchased a 1991 Nissan 300ZX from Mid-Valley Motors, 1625 Clermont, Indianola, Iowa in 1991.

You are required to conduct an interview with a responsible official of Mid-Valley Motors concerning the purchase by Hunter. The purpose of the interview is to obtain documentation and information regarding personal expenditures by Hunter.

Directions:

- Plan the interview with the assistant interviewer.
- Conduct the interview
Role Player Guide #1-2
Interviewer Assistant/Recorder

Sherman Hunter Case

Situation

You are assigned as an assistant to the investigator doing an investigation of Sherman Hunter. (See Role Player Guide #1-1, Sherman Hunter Case.)

You are required to assist the chief special agent in an interview with a responsible official of Mid-Valley Motors concerning the purchase by Hunter. The purpose of the interview is to obtain documentation and information regarding personal expenditures by Hunter.

Directions:

- Plan the interview with the interviewer.
- Record the interview results. Choose the format most appropriate for this type of investigation. The Student Workbook contains materials that will be helpful.
Role Player Guide #1-3
Interviewee - Kelly Host (Auto Dealer)

Situation
You are the sales manager of Mid-Valley Motors, 1625 Clermont Street, Indianola, Iowa. You will be interviewed by a student seeking information and documents relative to the purchase of two vehicles. Your name is Kelly Host.

Demeanor
You will deal with the agent in a cooperative manner. However, you will not volunteer any information. You will provide copies of any documents requested by the student (only if requested).

Facts You Need To Know
1. Mid-Valley Motors is a Nissan dealership.
2. You sold a 300ZX to Sherman Hunter on 4/6/91.
3. Hunter's trade-in was a 1987 Pontiac Grand Am Iowa Lic. # PRQ777.
4. The balance of the purchase price was paid for with a check from the Central Credit Union. The check was made out to Hunter and Mid-Valley Motors.
5. Relative to the 4/6/91 sale to Hunter, you have the following documents: sales invoice, two receipts, and two deposit slips. You should review these documents prior to being interviewed.
6. If the student asks about any other transactions with Hunter, you will become very nervous. The reason for the nervousness is you heard the IRS requires businesses to file some kind of form if they receive more than $10,000 in cash during a transaction. You have never filed one of these forms with the IRS even though you heard the penalty would be large if you got caught. In June 1991, Hunter paid you over $30,000 in cash for a 300ZX you sold to Sandy Jumper.
7. Relative to the 6/20/91 sale to Sandy Jumper, you have the following documents: sales invoice, two receipts, and two deposit slips. You should review these documents prior to being interviewed.
8. You do not know what the relationship between Jumper and Hunter is. However, Jumper is a very attractive woman and Hunter was very attentive to her desires.

NOTES: DO NOT ALLOW INTERVIEWER TO SEE DOCUMENTS BEFORE INTERVIEW.

Notes to the Instructor:

- Inform students that the role-playing exercise is a third-party interview. A person who has knowledge related to the case under investigation—not the individual under investigation—is being interviewed.

- Organize students into groups of four. Have individuals in each group assume the following roles:
  - Special Agent Interviewer
  - Interviewer Assistant/Recorder
  - Interviewee (Person being interviewed) - Terry Groom (Contractor)
  - Interview Administrator/Evaluator

- Distribute copies of the role playing guides for each individual in the group. The students will be conducting this practice exercise essentially on their own.

- ROOM SPACE - You may wish to arrange for several different locations where these interviews can be conducted.

- VIDEOTAPING - If feasible, videotaping of the exercise would be beneficial. Arrangements would have to be made for equipment and the operation of the equipment.

Role Player Guides:

2-1 Interviewer - Case Special Agent

2-2 Interviewer Assistant/Recorder

2-3 Interviewee - Terry Groom Contractor

Instructor Guide

Role Player Guide #2-1
Interviewer - Case Special Agent

William Groom Case

Situation

This case originated with information from an agent doing a corporate audit of the tax returns of Rancher, Inc., a general contractor. The agent discovered payments from Rancher Inc., owned by Terry Groom, to Danville Drywall Co., owned by William Groom. Terry Groom told the agent that William, who is his brother, did all his drywall business. The agent attempted to verify some of the payments to Danville Drywall and found William Groom very evasive. The agent ordered a transcript and found that William had not filed returns for 1990 and 1991.

The agent evaluating the information discovered that Rancher, Inc. was only one of several contractors from which William Groom subcontracted drywall work. Prior years' returns reveal that Danville Drywall is a sole proprietorship owned by William Groom and that he reported substantial amounts of income in those years.

You have been assigned as the special agent to the case. William Groom has already been contacted and refused to talk to you after being advised of his rights. Terry Groom was contacted for the purpose of obtaining documentation of the payments to Danville Drywall. Terry Groom was very uncooperative; therefore, Groom was issued a summons for his records and testimony. You are to interview him at Terry Groom's place of business, Rancher, Inc.

Directions:

- Plan the interview with the assistant interviewer
- Conduct the interview
Role Player Guide #2-2
Interviewer Assistant/Recorder

William Groom Case

Situation

You are assigned as an assistant in the investigation of William Groom. (See Role Player Guide #2-1, William Groom Case)

The purpose of the interview is to obtain documentation and information regarding payments made to Danville Drywall Company.

Directions:

- Plan the interview with the interviewer.
- Record the interview results. Choose the format most appropriate for this type of investigation. The Student Workbook contains materials that will be helpful.
Role Player Guide #2-3
Interviewee - Terry Groom (Contractor)

Situation

You are to play the owner of a general contracting firm, Rancher, Inc., in Danville, Iowa. Your name is Terry Groom.

An IRS Special Agent will interview you to determine the income you paid to Danville Drywall Company. This company is your brother's business. The interview is being conducted at your office on the due date of a summons issued to you. You originally refused to talk to the agent who then issued the summons. You have decided to comply with the summons.

Demeanor

You are allowing the agent to interview you only because he/she issued a summons requiring your testimony. You are resentful and uncooperative although you will provide the agent with requested documents.

Facts You Need To Know

1. In June 1989, you were audited by the Internal Revenue Service and the Revenue Agent proposed several minor increases to your taxable income. You consider yourself an honest taxpayer and feel the Revenue Agent was unreasonable when he proposed the adjustments.

2. Your brother, William Groom, is a drywall contractor. You build five "speculation" houses each year and subcontract the drywall work to your brother (doing business as Danville Drywall Company).

3. During the IRS audit the Revenue Agent questioned you about Danville Drywall Company, and you told the agent this was your brother's business.

4. You paid Danville Drywall Company with one check at the completion of each job. You also maintain a ledger sheet for each subcontractor. The check and the amount of each check is posted to this ledger sheet.

5. You will provide the Special Agent with photocopies of the following (if requested):
   a. 1990 Statement of payments to Danville Drywall Company
   b. Five canceled checks - 1990
   c. 1991 Statement of payments to Danville Drywall Company
   d. Five canceled checks - 1991
6. You know that your brother subcontracts for other contractors in the area as well. Sorters Building Co. is the only one you remember. You have discussed the IRS contact with your brother but do not know why the IRS is investigating him.

7. Rancher, Inc. does not provide any material, tools or labor to Danville Drywall Company.

SPECIAL AGENT INTERVIEW
ROLE PLAY

Notes to Instructor:

• Purpose. The purpose of this role play is to allow students to perform the task of conducting a financial interview.

• Goal. Students are to act as the financial investigator and are to obtain documentation and testimony from the witness.

• Guest Field Special Agents/Actors/Role Players. To assist in the exercise, seek the assistance of special agents in IRS. Their role is to play the part of the suspected criminal. The number of agents needed to perform the exercise will depend upon the class size. The more agents/actors/role players available, less time will be required to complete role plays.

• Teams. Divide the students into teams of two. Team members are to act as the financial investigators responsible for conducting the interview with the suspect.

• Structure. Distribute role playing guides to students and field agents/actors/role players. Establish role play timeframes. If time permits, conduct interviews twice. The first time instruct the suspect role players to use whatever means appropriate to spoil the interview. The second time instruct them to cooperate and provide all information but only when asked the appropriate information. At the conclusion of the exercise (if time permits), demonstrate the correct interview techniques.

• Out-of-Class Assignment (OPTIONAL). At the conclusion of the interviews, direct the students to record the results of the interview and to bring them to the next class session. This can be used as a graded exercise (quiz). Do not inform students this is a requirement before interviewing.

Role Player Guides:

1. Task Force Special Agent (Student Participant)

2. Small - Criminal Suspect (Guest Special Agent/Actor/Role Player)
Scenario:

You are assigned as Special Agent with a Federal Task Force. You are working with the task force investigators assigned to investigate the theft of government funds from a military installation. A contractor (XYZ Company) has contacted the military and advised them that they have not received payment on a bill in the amount of $285,000. The military has provided the task force with a canceled check in the amount of $285,000. The contractor uses a "for deposit only" stamp containing the contractor's name. The canceled check has a hand-written endorsement containing the name of a corporate officer (Clark). You interview Clark, who denies having any knowledge of the check. A handwriting analysis indicates that the corporate officer did not endorse the check. The address on the check is a P.O. Box that has no apparent relationship to the corporation. The documents in the possession of the military appear to have been processed according to established procedures, except that the voucher used to prepare the check is missing. There are only two individuals (Smith and Jones) at the military installation that handle the processing of contractor requests for payment. Smith and Jones are civilians. Smith received an honorable discharge and is a former member of Bravo unit, an elite unit at the military installation. Jones has never been in the military. A supervisor (Baxter) approves all vouchers for payment after Smith or Jones prepares the payment voucher. As part of the investigation, you run across an application for the Post Office Box rental. You decide to interview an individual named Small, whose name was on the application.

Directions:

Conduct the financial interview with your other team member. You are to obtain information as evidence to use in the case investigation. Attached is a copy of the Post Office Box rental form.

A9 35 Chapter 9 Planning, Conducting, and Recording an Interview
Scenario: Background

- Small served two years in the military. He was in Bravo Unit—the same unit that Smith, the person involved with the checks in question, was in.

- Small served one year in the county jail for a drug conviction. White was also convicted on the same charge.

- Small is unemployed and lives with his girlfriend (Williams' maiden name was White). His girlfriend's home was recently purchased for $200,000 and paid for with cash. He stated he has no idea where Williams got the money. Deed is in Williams' name.

- Small drives a new car which was purchased for $60,000 cash. The car belongs to his mother, who is retired and living on Social Security.

- Small states he supports himself with proceeds from an inheritance he received when his father passed away.

- Small banks at a local bank and pays all his bills by check. If asked, he will turn over all his financial records since he maintains all his financial affairs on a portable computer.

- Small maintains a safe deposit box at the same bank, but it only contains legal papers. Actually, the safe deposit box contains $900,000.

- Small will deny knowing anyone connected to the conspiracy—except for Smith.

- Small lives at 1st Street in Chicago, IL, and this is where the interview takes place.

- Small deposited the check in question to the business checking account held in the name of XYZ Corporation at a local bank.

- Investigators (students) find out Small's name and address from the P.O. Box application.

- Investigators (students) have not interviewed Smith.
Demeanor:

Do not volunteer information about the safe deposit box unless questioned.

Exercise will be conducted two times:

1st time - Do not give up any information. Use whatever means available and appropriate to spoil the interview.

2nd time - Provide all information but only when asked the right questions. (Lead the students in the right path, if needed.)

FINANCIAL INVESTIGATIONS

A9-40 Chapter 9: Planning, Conducting, and Recording an Interview
CHAPTER 10: INVESTIGATIVE TECHNIQUES

INVESTIGATIVE TECHNIQUES

LENGTH: 4 Hours

OBJECTIVES:

- State the importance of obtaining a valid search warrant.
- Describe the terms "probable cause" and "curtilage."
- State the purpose of an affidavit.
- List and describe the types of information required in an affidavit for a search warrant for financial information.
- List the objectives of undercover operations.
- List the objectives of surveillance.
- Describe the different types of surveillance.
- Describe how informants contribute to an investigation.
- State why recovering evidence from a suspect's trash, reading the covers of a suspect's mail, and retrieving evidence from a computer are valuable investigative techniques.
- List and describe the types of analyses a document examiner can perform.
- Use link analysis to show relationships in an investigation.

INSTRUCTOR REFERENCES:

Financial Investigations...A Financial Approach to Detecting and Resolving Crimes
I. INTRODUCTION

A. Attention Getter/Motivator

Example: In the case of John and Mary Crook, as is in most investigations, more than one technique was used to help solve the crime. This chapter focuses on some of the "tricks of the trade" that can be used by financial investigators.

B. Objectives

1. State the importance of obtaining a valid search warrant.

2. Describe the terms "probable cause" and "curtilage."

3. State the purpose of an affidavit.

4. List and describe the types of information required in an affidavit for a search warrant for financial information.

5. List the objectives of undercover operations.

6. List the objectives of surveillance.

7. Describe how informants contribute to an investigation.

Refer to the objectives on pages 263 and 264 in the textbook.
8. State why recovering evidence from a suspect's trash, reading the covers of a suspect's mail, and retrieving evidence from a computer are valuable investigative techniques.

9. List and describe the types of analyses a document examiner can perform.

10. Use link analysis to show relationships in an investigation.

II. SEARCH WARRANT

A. Purpose

1. Search Warrant

Use the definition listed in the textbook on page 265.

2. Sample Search Warrant

The sample of the Search Warrant is located in the textbook on page 273.
Emphasize to the students that, whenever in doubt, you should always get a search warrant.

B. Financial Search Warrant Application

1. For financial documents only

2. Prepared by prosecuting attorney before being submitted to judge

3. Executed during time period granted by judge

C. When Issued

1. Probable Cause - Facts/circumstances within knowledge of investigator that are considered reasonable and trustworthy

2. Requirements for Probable Cause
   a. Must be current
   b. Must be reasonable/trustworthy to extent that reasonable person believes crime has been committed and that evidence sought exists in place to be searched
III. AFFIDAVIT AND THE FINANCIAL INVESTIGATOR

Refer to the sample affidavit in the textbook on pages 270 and 271.

A. Purpose

1. To convince judge or magistrate that probable cause exists.

2. To summarize the investigator’s expertise and the information gathered during the investigation.

B. Types of Information Needed by Affiant

1. Affiant’s experience

2. Details of criminal activity

3. Descriptions of places to be searched

4. Financial evidence

5. Items to be seized

6. Conclusions based on affiant’s experience
IV. UNDERCOVER TECHNIQUES

A. Definition

3. Undercover Operation

Use the definition outlined in the textbook on page 274.

B. Uses

1. Long-term--Against well-organized criminal groups or sophisticated criminal activities

2. Short-term--Sting operations

C. Objectives

4. Objectives of Undercover Operations

5. Objectives of Undercover Operations (continued)

Refer to each objective as discussed. Objectives are listed in the textbook on pages 275 and 276.
OPTION: Use a guest speaker knowledgeable in the area of surveillance techniques. Have the speaker address the topics outlined in Section V.

V. SURVEILLANCE

A. Definition

6. Surveillance

Refer to the definition in the textbook on page 277.

B. Objectives

7. Objectives of Surveillance

Refer to each objective as discussed. Objectives are listed on page 277 in the textbook.

C. Types of Surveillance

8. Types of Surveillance

Refer to explanation in textbook on page 278.

1. Stationary (or Stakeout)

Examples: Sitting in unmarked cars or watching residence—Jonathan Pollard Case

2. Moving

Examples: Following suspect in vehicle, on foot or in a boat or watching a vehicle from an airplane
Instructor Guide

Presentation

9. Informant

Refer to definition in the textbook on page 281.

Emphasize to students to be careful when dealing with informants. Determine what their motives are (revenge, money, etc.). Inform them that a lie detector test may be administered if necessary.

VI. INFORMANTS

A. Definition

B. Source--people involved in other criminal offenses

C. When Used

Examples: Surveillance, consensual monitorings, and as participants in undercover operations.

Electronic

a. Consensual monitoring--one person involved in taped conversations knows conversation is taped.

b. Must know state regulations pertaining to consensual monitoring.

Examples: Tape recordings, tracking devices

FINANCIAL INVESTIGATIONS 10.10 Chapter 10: Investigative Techniques
VII. EVIDENCE RECOVERED FROM TRASH

A. Provide Leads and Gather Evidence

1. If it has left possession of suspect (curbside), no search warrant needed.

2. Cannot violate suspect's curtilage when retrieving trash.

B. Individual or Team Exercise: Trash

OPTION: This exercise could be conducted as part of the discussion on evidence introduced in Chapter 3.

VIII. READING MAIL COVERS

A. Use as Evidence--Based upon fact that a person cannot attach privacy to the outside of mail

B. What to look for

Examples: Names of banks, credit card companies, etc.
OPTION: Use a Forensic Specialist as a guest speaker. Provide the speaker with the topics discussed in Section IX.

IX. FORENSIC SCIENCE

A. Role in Investigation

B. Types

13. Types of Forensic Science

Discuss each item listed. Items listed in textbook on pages 285 through 287.

1. Handwriting analysis
2. Typewriter analysis
3. Alteration analysis
4. Ink analysis
5. Paper analysis
6. Document restoration
X. EVIDENCE RECOVERED FROM COMPUTERS

A. Use as Evidence--Business transactions performed on computer.

B. What to Look For

Examples: Physical evidence: handwritten notes, printouts, manuals, sales invoices, photographs, and fingerprints found in computer area. Other evidence: drug dealer's database, daily operations of prostitute ring, or pornographer’s mailing list.

XI. PERFORMING A LINK ANALYSIS

A. Definition/Purpose

B. Association Matrix

Refer to examples on pages 288 and 289 in the textbook.
Have students work together in teams. Refer students to the Student Workbook, page 10-3, for Mary and John Crook Exercise. Explain to the students that this exercise is a continuation of the investigation started in Chapter 4, 6, 7, and 8. Have the students read the exercise. Clarify any questions before beginning.

Exercise may be given as an out-of-class assignment.

Upon completion of exercise, distribute exercise feedback sheets. See Appendix, page A10-3. Discuss exercise.

Have students complete questions individually or work in teams.

C. Group Exercise: Mary and John Crook Investigation - Part V

D. Textbook Review Questions (pages 291 through 293)
XII. SUMMARY

Summarize the objectives addressed in this chapter.

A. Restate the Objectives

1. State the importance of obtaining a valid search warrant.

2. Describe the terms "probable cause" and "curtilage."

3. State the purpose of an affidavit.

4. List and describe the types of information required in an affidavit for a search warrant for financial information.

5. List the objectives of undercover operations.

6. List the objectives of surveillance.

7. Describe the different types of surveillance.

8. Describe how informants contribute to an investigation.

9. State why recovering evidence from a suspect's trash, reading the covers of a suspect's mail, and retrieving evidence from a computer are valuable investigative techniques.
10. List and describe the types of analyses a document examiner can perform.

11. Use link analysis to show relationships in an investigation.

B. Tie In to Next Chapter

**Example:** The investigator has to always be aware of all the investigative techniques available to him/her in order to "catch" the financial criminal. One technique used by financial criminals is to "hide illegal money" by means of a legitimate source. The next chapter, "Money Laundering and Forfeitures" discusses this criminal technique and what the investigator needs to be aware of.
APPENDIX

Chapter 10: Investigative Techniques
TRASH EXERCISE

Directions to Instructor:

- Purpose. Exercise is conducted to show how leads are obtained from trash. Emphasize trash is used mainly to come up with questions to pursue in the investigation.

- Procedures.

  1. Prepare items. Use actual trash items (approximately 15 items). Be sure all items have been sanitized before use. Have students wear rubber gloves. Items can be placed in brown bags. Include items that are distractors.

     **Evidence Builders**
     - Bank statements
     - Match book covers w/inscriptions
     - Deposit slips
     - Maps
     - Notes
     - Cashier checks
     - Credit card slips
     - Insurance policy information
     - Bills (Invoices)
     - Torn phone book pages
     - Western Union receipts
     - DMV information
     - Telephone bills

     **Distractors**
     - Kitty litter
     - Wadded tissue
     - Newspaper
     - Junk mail

  2. Divide students into teams of two. Inform students of health concerns. Have them shift through trash. Set out evidence tags for them to mark items found. Explain procedures for marking items.

  3. Give Feedback. Have each team discuss what they found to the class and how it can be used in the investigation.
The association matrix should show the pattern illustrated below.

The investigator would be able to use the information to find out more about the associates of the Crooks. For instance, suppose upon investigating it was discovered that Frank Jones, Jessica Brown, and Harry Black were frequent drug customers of the Crooks. Robert Sights was a stockbroker for the Crooks. All could be leads to more information.
CHAPTER 11: MONEY LAUNDERING AND FORFEITURES

LENGTH: 1 Hour

OBJECTIVES:

- Distinguish between the two types of transaction systems.
- Describe three methods of moving money from the cash transaction system to the business transaction system.
- Identify methods used to move money into and out of the United States.
- Identify characteristics of businesses used as money laundering fronts.
- Identify and interpret money laundering and forfeiture statutes.
- Distinguish between civil and criminal forfeitures.
- Describe the factors that assist an investigator in establishing probable cause for a forfeiture proceeding.

FINANCIAL INVESTIGATIONS 11723 Chapter 11: Money Laundering and Forfeitures
Chapter 11 - List of Transparencies

1. Transaction Systems
2. Methods of Laundering Funds
3. Laundering Funds Through Legitimate Business
4. Laundering Funds Through Buy/Sell Transactions
5. Laundering Funds Through Off Shore Havens
6. Asset Forfeitures
7. Categories of Forfeitures
8. Factors Establishing Probable Cause in Forfeitures Investigations

INSTRUCTIONAL EQUIPMENT: Overhead Projector

INSTRUCTOR REFERENCES: Financial Investigations...A Financial Approach to Detecting and Resolving Crimes
I. INTRODUCTION

A. Attention Getter/Motivator

Example: Financial crimes are on the increase. With this comes an increase in cash flow for the criminal! What the criminal does with his/her money in the form of money "laundering" is part of what the investigator must find out. In addition, what the criminal obtains in the form of assets with his/her illegal money and what happens to these assets are all part of what the financial investigator becomes involved with.

B. Objectives

1. Distinguish between the two types of transaction systems.

2. Describe three methods of moving money from the cash transaction system to the business transaction system.

3. Identify methods used to move money into and out of the United States.

4. Identify characteristics of businesses used as money laundering fronts.

5. Identify and interpret money laundering and forfeiture statutes.
II. TRANSACTION SYSTEMS

1. Transaction Systems

A. Cash Transaction System

1. Purpose - Method of conducting all financial transactions exclusively through the use of currency

2. Advantages/disadvantages

Refer to the advantages/disadvantages listed in the textbook on page 298.

B. Business Transaction System

1. Purpose - Method of conducting transactions that generates a trail of financial records (i.e., checks, receipts, invoices, deeds, etc.)

2. Advantages/disadvantages

Refer to the advantages/disadvantages listed in the textbook on page 298.

6. Distinguish between civil and criminal forfeitures.

7. Describe the factors that assist an investigator in establishing probable cause for a forfeiture proceeding.
III. METHODS OF LAUNDERING FUNDS

2. Methods of Laundering Funds

3. Laundering Funds Through a Legitimate Business

Refer to each method as discussed.

Use the examples presented for the Stage One Records and Videos Business on pages 299 and 300 to clarify how overstating revenue can be accomplished.

Refer to the sample income statement for Stage One Records and Videos Business on page 301 to illustrate how overstating of expenses can be accomplished.

1. Overstatement of legitimate revenue
   a. Falsifying invoices
   b. Generating phony invoices
   c. Inflating the cost of goods sold

2. Overstatement of legitimate expenses
4. Laundering funds through Buy/Sell Transactions

3. Deposits of currency
   a. Deposits made directly in legitimate business account
   b. Method is used mainly to transfer illegal proceeds to business transaction system
   c. Method leaves person open to scrutiny of investigator

4. Indicators of money laundering fronts
   a. Deals mainly in cash
   b. Has relatively fixed costs
   c. Is exempt from bank currency reporting requirements

B. Buy/Sell Transactions - Using real estate or other personal property transactions to hide the flow of money
5. Laundering funds through Off Shore Havens

Refer to each method listed on the transparency as discussed.

Refer to the examples in the textbook on pages 305 through 307 used to illustrate each of these methods listed.

1. Methods of moving money out of the United States
   a. Physical transportation
   b. Wire transfer
   c. Cashier's check
   d. Attorneys, accountants, and money managers
   e. Brokerage accounts
   f. Wire services

2. Methods of moving money into the United States
   a. Fictitious loans
   b. Fictitious foreign investors
   c. Finder's fees
   d. Corporate salaries
   e. Cashier's checks and wire transfers
   f. Physical transportation
IV. MONEY LAUNDERING STATUTES AND THEIR APPLICATION

A. Title 18 U.S.C. § 1956, Laundering of Monetary Instruments

B. Title 18 U.S.C. § 1957, Engaging in Monetary Transactions in Property Derived from Specified Unlawful Activity

C. Title 31 U.S.C. § 5313, Reports on Domestic Coins and Currency Transactions

D. Title 31 U.S.C. § 5324, Structuring Transactions to Evade Reporting Requirement Prohibited

OPTIONAL: Use a U.S. Attorney who specializes in Asset Forfeiture Law as a guest lecturer.

5. Asset Forfeitures

6. Asset Forfeitures

V. TYPES OF ASSET FORFEITURES

A. Definition of Asset Forfeitures - A legal proceeding initiated by the government against the proceeds of an illegal activity.
B. Categories of Forfeitures

7. Categories of Forfeitures

1. Criminal and civil forfeitures

2. In Rem Versus In Personam
   a. In Rem - Against property
   b. In Personam - Against person

3. Facilitation versus Proceeds
   a. Facilitates - Significant connection to violation
      Example: Airplane used to move narcotics
   b. Proceeds - Illegal funds used to purchase assets
      Example: Drug money used to buy car

VI. FEDERAL FORFEITURE STATUTES AND THEIR APPLICATION

A. Title 18 U.S.C. § 981, Civil Forfeiture

Refer to the statute in the textbook on page 317.
Refer to the statute in the textbook on page 318.

VII. FACTORS THAT ESTABLISH PROBABLE CAUSE

8. Factors Establishing Probable Cause in Forfeitures Investigations
Refer to each item on transparency as discussed.

Refer to the example in the textbook on page 322.

Refer to the example in the textbook on page 323.

A. Close Proximity

B. Means of Support

C. Pre-trial Statement

D. Narcotics Records
Q&A

M:1

Have students complete questions individually or work in teams.

VIII. SUMMARY

A. Restate Objectives

1. Distinguish between the two types of transaction systems.

2. Describe three methods of moving money from the cash transaction system to the business transaction system.

3. Identify methods used to move money into and out of the United States.

4. Identify characteristics of businesses used as money laundering fronts.

5. Identify and interpret money laundering and forfeiture statutes.

6. Distinguish between civil and criminal forfeitures.

7. Describe the factors that assist an investigator in establishing probable cause for a forfeiture proceeding.
# TEST AND QUIZ ITEM BANK

## What the Test/Quiz Item Bank Contains
- The bank includes items available for use in preparing chapter quizzes, a mid-term and final examination.
- These items were prepared by instructors who previously taught the course.
- The items used for the chapter quizzes may also be used in preparing the course examinations.
- *The items do not cover all the content addressed in the course. Additional items need to be prepared for your use and added to the bank.*

## How to Locate Test/Quiz Items in the Bank
- The test/quiz items are identified and grouped by chapters.
- Printed copies of the items are available on the following pages.
- A separate file on the computer disk is included for each chapter. The PC-based computer files are done in Wordperfect software.

## Test/Quiz Item Format
- The items are presented in a variety of formats: multiple choice, fill-in the blank, short answer, and true-false.
- Often, you will see the same question appear in a different format.

## Test/Quiz Item Responses
- Each item is included with the correct response.
- The correct response is shown as follows:
  - Multiple Choice (marked with *)
  - Fill-in blank/Short answer (phrase in parentheses)
  - True/False (underlined)
CHAPTER 1

1. For purposes of this class, we have classified all crimes as falling into two groups. The categories are--

   a. crimes against God/crimes against man.
   b. crimes against society/crimes against an individual.
   * c. crimes of passion/crimes of greed.
   d. crimes against property/crimes against people.

2. Today the majority of crimes are motivated by money.
   True or False

3. Today the majority of crimes are motivated by passion.
   True or False

4. In our society, the majority of all criminal activities are motivated by passion.
   True or False

5. To successfully complete a financial investigation, the investigator must be able to (know) what the suspect is doing or has done; must find a way to (document) what is being or was done, and must be able to (convince) the jury. (3 points)

6. The goal of the Financial Investigation/Investigator is to identify and document specific events related to the movement of money during a crime.
   True or False

7. The Treasury Department, the Department of Justice, the Department of Health & Human Services and the Department of Defense are examples of agencies that are part of the Executive Branch of the Federal Government. For 2 points, the other two branches of the Federal Government are the (Judicial) Branch (the courts) and the (Legislative) Branch (the Congress).
8. The Treasury Department, the Department of Justice, the Department of Health & Human Services and the Department of Defense are examples of agencies that are part of this branch of the Federal government.

   a. Judicial Branch
   b. Executive Branch
   * c. Procedural Branch
   d. Legislative Branch

9. Even though every investigation is unique, each investigation should be approached in a systematic manner. This "systematic manner" is called--

   a. the scientific method.
   b. financial analysis.
   c. accounting and bookkeeping procedures.
   * d. the investigative process.

10. Even though every investigation is unique, each investigation should be approached in a systematic manner. This "systematic manner" is the (investigative process).

11. By definition, what is a financial investigation?

   (A financial investigation centers around the financial aspects of a crime. The investigator attempts to resolve the crime by following the flow of illegal funds.)

12. The techniques used by financial investigators radiate from activities or events involving the movement of people.

   True or False
CHAPTER 2

1. What establishes the benchmark for society's behavior?
   a. Ideas
   * b. Laws
   c. Crimes
   d. All the above

2. ______________(Laws)________________ establish the benchmark for society's behavior.

3. "Generational Acclimation" involves elders ingraining societal characteristics on the young through--
   a. parenting techniques (role modeling/teaching, etc.).
   b. organized educational efforts (school, on-the-job training).
   c. ongoing review/critique of young by society leaders.
   * d. all the above.

4. Laws are intended to guide or direct human behavior toward ends that satisfy the common good.
   True or False

5. The basis for the American legal system is rooted in English Common Law.
   True or False

6. The basis for the American legal system is rooted in __________(English Common Law)________.

7. Explain the legal concept - "common law."
   (Common law is that form of law upon which the American judicial system is based. It originated in England prior to the American Revolution. It was derived from uses and customs.)
8. In the United States, "substantive law" is composed of--
   a. case law.
   b. statutes enacted by legislative bodies.
   c. administrative laws.
   * d. all the above.
   e. none of the above.

9. Procedural law involves the manner in which substantive laws are--
   a. passed or enacted.
   b. administered.
   c. enforced.
   d. "b" and "c."
   * e. all the above.

10. Procedural law involves the manner in which substantive laws are passed or enacted, administered and enforced.
    True or False

11. Criminal law is that body of law that provides remedies for violations of private rights.
    True or False

12. Criminal law is that body of law that provides remedies for violations committed against the state.
    True or False

13. A crime that is classified as "mala prohibita" is considered to be evil or immoral in and of itself.
    True or False

14. Only criminal statutes, as opposed to civil statutes, are derived from substantive law.
    True or False
15. Civil law is that body of law that provides remedies for violations of private rights.

True or False

16. (Civil Law) _______ is that body of law that provides remedies for violations of private rights.

17. A crime that is classified as "mala in se" is considered to be evil or immoral in and of itself.

True or False

18. A crime that is classified as "(mala in se) _______" is considered to be evil or immoral in and of itself.

19. One of the most common criminal fraud statutes used by the financial investigator is (mail fraud) _______.

20. The most common criminal fraud statute used by the financial investigator is--

   a. tax evasion.
   b. RICO.
   c. perjury.
   * d. mail fraud.

21. Within the context of this course, "embezzlement" implies--

   a. a fraudulent activity.
   b. a breach of trust.
   c. misappropriation of something of value.
   d. "a" and "c."
   * e. all the above.
Questions 22 and 23 tied together

22. "Whoever, having devised or intending to devise any scheme or artifice to defraud, or for obtaining money or property.....by means of wire, radio, television communication and interstate or foreign commerce.....shall be fined not more than $250,000 or imprisoned not more than 5 years, or both. If the violation affects a financial institution, such person shall not be fined more than $1,000,000 or imprisoned more than 30 years, or both."

The statute quoted is--

a. tax evasion
b. conspiracy
c. misappropriation of trust
* d. wire fraud

23. List the elements of the offense in the statute quoted in Question 22. HINT: There are 3 elements. (3 points)

1. (Intent)
2. (Defraud)
3. (Wire)

Questions 24 and 25 tied together

24. "If two or more persons knowingly join together to commit any fraudulent offense against the United States, or any agency thereunder, in any manner or for any purpose, and one or more of such persons do any act to affect the object of the offense, each shall be guilty of a felony...."

What type of violation does this statute refer to?

(conspiracy)

25. What are the four (4) elements of the crime quoted in Question 24?

1. (Two or more persons join together)
2. (Fraudulent act against U.S. or its agencies)
3. (Act is committed.)
4. (Knowledge)
Questions 26 and 27 tied together

26. "Any person who willfully attempts in any manner to evade or defeat any tax imposed by this title shall be guilty of a felony. What type of violation does this criminal statute refer to?

(tax evasion)

27. List the "elements of the crime" for the statute quoted in Question 26. (Hint: There are three (3) elements.)

1. (Willfulness)
2. (Attempt to evade or defeat)
3. (Tax due -imposed)
1. The American system of justice is adversarial in nature.
   True or False

2. Describe the "grand jury system."
   (Both parties in a legal issue present evidence to an impartial third party for a determination of who is right or wrong and who is guilty or innocent.)

3. Under our system of justice, a defendant charged with criminal violation--
   a. has the right to be advised by counsel.
   b. is innocent until proven guilty.
   c. must testify at trial.
   * d. "a" and "b."
   e. all the above.

4. Evidence is ________________ that bears truth on the _________________.
   (2 points)

5. In a criminal trial, the Government must prove its case--
   a. by clear and convincing evidence.
   b. to a precise (i.e., mathematical) certainty.
   c. by the preponderance of the evidence.
   * d. beyond a reasonable doubt.

6. In a criminal trial, the Government must prove its case ________________.

7. "Beyond a reasonable doubt" is a legal concept which is defined by statute at the federal level and through mirroring legislation at the state level.
   True or False
8. Name four (4) standards of proof.

   1. (Beyond a reasonable doubt)
   2. (Suspicious situation)
   3. (Clear and convincing evidence)
   4. (Preponderance of evidence)

9. To obtain an indictment, the grand jury must find (probable cause) ________ to believe the suspect committed a (crime) ________. (2 points)

10. Evidence is distinguished from proof by the fact that proof is the result or effect of evidence.

    True or False

11. At trial, the competency of evidence is determined by the jury.

    True or False

12. Evidence which proves the existence of the principle fact without any inference is--

    a. demand evidence.
    b. material evidence.
    c. circumstantial evidence.
    * d. direct evidence.
    e. "a" and "b."

13. Evidence which proves the existence of the principle fact without any inference is (direct evidence) ________.

14. "Chain of custody" relates to--

    a. the acquisition of evidence by the investigator.
    b. the handling of the evidence by the investigator.
    c. the admissibility of evidence at the trial.
    d. "a" and "b."
    * e. all the above.
15. "Hearsay" is that which does not come from the personal knowledge of the witness, but from what the witness has "heard" others "say."

True or False

16. (Hearsay) ________ is that which does not come from the personal knowledge of the witness, but from what the witness has "heard" others "say."

17. What is hearsay evidence?

(Evidence which does not come from personal knowledge of the witness but is a repetition of what the person heard.)

18. When the Grand Jury returns an indictment, at least (12) jurors must vote to do so.

19. A subpoena Duces Tecum requires the witness to appear, to ______ and to bring the _______. (2 points)

20. During our discussion of Grand Jury "tools," we spoke of several types of "Immunity." (4 points)

a. (Informal) _______ Immunity is granted to witnesses by letter from the prosecutor.

b. (Formal) _______ Immunity is granted to witnesses by the court.

c. (Use) _______ Immunity protects the witnesses from the prosecution’s "use" of their testimony against them.

d. (Transactional) _______ Immunity completely protects the witness from prosecution for any criminal offenses about which the witness testifies truthfully.
21. During our discussion of Grand Jury "tools," we spoke of several types of "Immunity." (4 points)
   a. "Informal Immunity" is granted to witnesses by letter from the prosecutor.
      True or False
   b. "Formal Immunity" is granted to witnesses by the court.
      True or False
   c. "Use Immunity" protects the witnesses from the prosecution's "use" of their testimony against them.
      True or False
   d. "Transactional Immunity" completely protects the witness from prosecution for any criminal offenses about which the witness testifies truthfully.
      True or False

22. The "Shop Book" Rule allows for introduction into evidence of books of original entry kept in the regular course of business by the person who has custody.
    True or False

23. The [ ] (Shop Book) Rule allows for introduction into evidence of books of original entry kept in the regular course of business by the person who has custody.

24. A police officer may stop a citizen and inquire into that person's identity, business, or purpose in the area, and may even conduct a "pat down" for weapons, as long as the officer is able to articulate the factors which lead the officer to believe he is confronting a "suspicious situation."
    True or False

25. A police officer may stop a citizen and inquire into that person's identity, business, or purpose in the area, and may even conduct a "pat down" for weapons, as long as the officer is able to articulate the factors which lead the officer to believe he is confronting a [ ] (suspicious situation).
26. A police officer may stop a citizen and inquire into that person's identity, business, or purpose in the area, and may even conduct a "pat down" for weapons, as long as the officer is able to articulate the factors which lead the officer to believe he is confronting a "suspicious situation."

True or False

27. Evidence relating to a series of facts, other than those precisely at issue, which tends to establish the point at issue by inference is--

a. direct evidence.
b. factual indirect evidence.
c. circumstantial evidence.
d. tangible documentary evidence.

28. Evidence relating to a series of facts, other than those precisely at issue, which tends to establish the point at issue by inference is (circumstantial evidence).

29. During a criminal trial, the Government (prosecution) must prove each and every one of the elements of the offense alleged, beyond a reasonable doubt.

True or False

30. During a criminal trial, the Government (prosecution) must prove a preponderance of the elements of the offense alleged.

True or False

31. During a criminal trial, the Government (prosecution) must prove each and every one of the (elements) of the offense alleged, beyond a reasonable doubt.
32. Through the introduction of evidence, the prosecutor at a criminal trial--
   a. asserts judicial notice.
   b. influences the grand jury proceeding.
   c. tries to create reasonable doubt.
   * d. sustains the burden of proof.
   e. none of the above.

33. The investigator's role in a Grand Jury investigation may include--
   a. executing search and/or arrest warrants.
   b. preparing witnesses and/or Government attorneys to appear before the Grand Jury.
   c. assisting the government attorney in determining if a witness should be granted immunity.
   d. analyzing records and presenting summary testimony (hearsay evidence) to the Grand Jury.
   * e. all the above.

34. The Attorney/Client privilege always protects attorneys from having to divulge identities of clients, information about fees received from clients, and similar information.

   True or False

35. The law enforcement officer/informant privilege protects the informant's identity from disclosure unless the officer or the prosecutor chooses to waive the privilege.

   True or False

36. The law enforcement officer/informant privilege protects the informant's identity from disclosure unless the officer or the prosecutor chooses to ______ (waive the privilege) ______.

37. Hearsay is generally not admissible as evidence because of the possibility of distortion or misunderstanding.

   True or False
38. Hearsay is generally ______ (inadmissible) _______ as evidence because of the possibility of distortion or misunderstanding.

39. The rules of evidence and procedure--
   a. control the investigative process.
   b. control the judicial proceeding.
   c. control neither "a" nor "b."
   * d control both "a" and "b."

40. John Crook is on trial for federal drug trafficking and money laundering offenses. Answer the following questions relating to Crook's trial and the issue of "privileged communications." (3 points)
   a. John's wife, Mary Crook, says that while they were married she saw John packaging cocaine. The judge will allow this testimony.
      True or False

   b. Mary Crook says that before they were married, John told her that he was a "big drug dealer." The judge will allow this testimony.
      True or False

   c. John's accountant is Harry Jones. Mr. Jones prepared numerous financial records for John. The judge will allow Mr. Jones to testify to the preparation of these records.
      True or False
1. The key to detecting and resolving crime is ___(information)______________.

2. The "Public Records" rule allows the introduction of books, records, reports and compilations kept as a regular and routine duty by a public official.  
  True or False

3. The ___(Public Records)________ rule allows the introduction of books, records, reports and compilations kept as a regular and routine duty by a public official.

4. The best source of information about the suspect's behavior, and motives etc., is the ___(suspect)_________.

5. You have been assigned an investigation of a large corporation. Name at least three (3) sources that you could contact in order to obtain information on the corporation (besides the corporation itself).

   (1) (Securities and Exchange Commission - Public held companies)
   (2) (State Government Offices)
   (3) (County or Municipal Government Offices)
CHAPTER 5

1. Every bank (S&L, Credit Union) requires that a signature card be completed for every account.

   True  or  False

2. Every bank (S&L, Credit Union) requires that a (signature card) be completed for every account.

3. The completed signature card may be useful to the investigator as--
   a. evidence of ownership of the account.
   b. an exemplar of the account-owner's signature.
   c. a lead to other witnesses, principals and/or co-conspirators.
   * d. all the above.

4. The sequential proof numbers that appear on the back of deposit tickets and deposit items can be used as evidence that link the deposit ticket to the deposit items.

5. The sequential "proof numbers" that appear on the back of the deposit tickets and deposit items can be used as evidence that link the deposit ticket to the deposit items.

   True  or  False

6. The sequential number placed on deposit tickets and items which make up the deposit (the deposit items) are placed on the items in the bank's--
   a. loan department.
   * b. proof department.
   c. collection department.
   d. safe deposit department.

7. Bank tellers are often a productive source of information, leads or evidence because tellers know their (customers).
8. Bank tellers are often a productive source of information, leads, or evidence because tellers know their customers.  

   True or False

9. During our review of the bank records related to "Benidect’s" deposit of $6,750.00, we found evidence that--

   * a. the deposit included an unusually large amount of currency, in relation to "Benidect’s" other deposits.
   b. the check deposited by "Benidect" with the currency was the same amount as "Benidect’s" apparent bi-weekly take home pay.
   c. the entire $6,750.00 deposit consisted of currency, and the serial numbers all matched serial numbers used in the undercover cocaine purchases.
   d. only "a" and "b."
   e. all the above ("a," "b," and "c").

10. Although interesting to know about, bank records are not a particularly valuable source of information, leads or evidence.  

   True or False

11. Example(s) of "Account Transactions" we discussed in class are--

   a. deposits.
   b. withdrawals.
   c. purchases of cashier's checks.
   * d. "a" and "b."

12. Example(s) of "Non-Account Transactions" we discussed are--

   a. deposits.
   * b. purchases of cashier's checks.
   c. withdrawals.
   d. "a" and "b."
13. For investigative purposes, "Non-Account Transactions" include--
   a. cashier's, certified, and traveler's check.
   b. currency exchanges.
   c. bank credit cards.
   d. safe deposit entry records.
   * e. all the above.

14. Tracing the movement of money generated by a criminal activity will normally involve
    tracing financial transactions through the ___ (banking system) ___.

15. Tracing the movement of money generated by a criminal activity will normally involve
    tracing financial transactions through the banking system.

    True or False

16. The banking system maintains a record of "account transactions" through the use of bank
    statements.

    True or False

17. The banking system maintains a record of "account transactions" through the use of--

    * a. bank statements.
    b. loan applications.
    c. safety deposit box entry logs.
    d. "b" and "c."
    e. all the above.
18. A "deposit" enters the banking system through a transaction entry point.

True or False

19. A "deposit" enters the banking system through--

a. the proof department.
b. a transit item.
c. a transaction entry point.
d. all the above.
e. none of the above.

20. A written order to a financial institution to pay out a specified amount of funds on deposit is known as a ____________________________.

21. A written order to a financial institution to pay a specified amount of funds on deposit is known as--

a. a deposit ticket.
b. a loan schedule.
c. a check.
d. "a" and "c."

22. Checks negotiated between two people establish a financial link that cannot be overcome by verbal denials.

True or False

23. Debit and credit memos are used to record bank account transactions that do not involve deposit tickets or checks.

True or False

24. On a bank statement, credit memorandum and debit memorandum can indicate--

a. transfers between accounts.
b. electronic deposits and withdrawals.
c. interest earned and interest paid.
d. all the above.
e. none of the above.
25. A "wire transfer" may be--

   a. an electronic transfer between financial institutions.
   b. an electronic transfer between different accounts.
   * c. "a" and "b."

26. What is a "wire transfer"?

   (Electronic transfer of funds between financial institutions or between accounts.)

27. Explain the purpose of the Form 4789, Currency Transaction Report. (Explanation should include: who is responsible for filing; what type of information is shown on the form, and how it is used by the investigator).

   (Financial institutions responsible for filing; identifies the depositor by address, social security number, and date of birth and the actual owner of the currency, and the types of bills involved in the transaction; aids investigator in looking for suspicious financial transactions.)

28. The custodian of corporate ownership records is--

   a. the Secretary of State and the IRS.
   b. the corporate secretary and treasurer.
   * c. the transfer agent and registrar.
   d. all of the above.

29. Explain the difference between corporate bonds and corporate stock.

   (Stocks represent a certificate of ownership in the corporation. Bonds are a claim against the assets of the corporation.)

30. A bond is a form of security that represents a (loan) to a corporation, municipality, state or federal government.

31. A form of security that represents a loan to a corporation, municipality, state or federal government is a--

   a. common stock.
   * b. bond.
   c. financial statement.
   d. "a" and "b."
32. A form of security that represents ownership interest in a corporation, is a
   (common stock)

33. A form of security that represents ownership interest in a corporation, is a--
   a. common stock.
   b. bond.
   c. financial statement.
   d. "a" and "b."

34. The "Custodian of Records" for a bank (etc.) is the correct witness to introduce the
   bank’s records into evidence, under what Rule of Evidence?
   a. Police officer/informant privilege
   b. Secondary Evidence Rule
   c. Shop Book Rule
   d. Probable cause

35. The minimum records that a bank (S&L, Credit Union, etc.) maintains relating to safe
   deposit boxes are--
   a. lease/rental agreement.
   b. financial statement.
   c. record (or log) of entries.
   d. "a" and "c."

36. A bank’s safe deposit (log of entries) that reflects your defendant
   entered her safe deposit box on every date that your witness said cash bribe payments
   were made, could be compelling evidence that corroborates your witness testimony.

37. A bank’s safe deposit log of entries that reflects your defendant entered her safe deposit
   box on every date that your witness said cash bribe payments were made, could be
   compelling evidence that corroborates your witness testimony.

   True  or  False

38. A bank’s safe deposit log of entries that reflects that the subject of your investigation
   entered his safe deposit box on every date that your witness testified to buying cocaine,
   within 30 minutes before the cocaine transaction, could be useful in establishing probable
   cause to obtain a (search warrant) for that safe deposit box.
39. A bank’s safe deposit log of entries that reflects that the subject of your investigation entered his safe deposit box on every date that your witness testified to buying cocaine, within 30 minutes before the cocaine transaction, could be useful in establishing probable cause to obtain a search warrant for that safe deposit box.

True or False

40. Savings Bonds, Treasury Bills, Treasury Notes and Treasury Bonds are forms of securities which represent money loaned to the Federal Government, for different periods of time.

True or False

41. Stock certificates may be registered in either the name of the owner or in the name of the broker with whom the owner maintains an account.

True or False

42. Stock certificates that are registered in the name of the broker or the brokerage house, rather than in the name of the owner, are said to be held in "(street name)".

43. Stock certificates that are registered in the name of the brokerage house, rather than in the name of the owner, are said to be held--

a. in an alias name.

* b. in "street name."

c. by a nominee.

d. in "flagrante delicto."
On the copy of this canceled check; circle and identify by letter the following: (1 point each)

A. The machine-printed number that tells you the amount the check was written for and actually paid.
   (00300000 - check front)

B. The identifying number of the bank the check was deposited to.
   (1-71 - check back)
Questions 46, 47, 48, and 49 (1 point each):

On the copy of the canceled check displayed above, circle and identify by letter the following items:

a. "Teller stamp"  
   (HENOV - Check front)

b. Proof Number  
   (82803 - Check back)

c. Machine printed notation for "check cashed"  
   (Paid by Drawee Institute -- Check Back)

Questions 52, 53 and 54:
Circle the three items on these "bank statements" that you, as an astute investigator, will want to follow up on.

1. (8/06 $2,000 Check)
2. (8/10 $5,000 Deposit)
3. (7/04 $5,000 Check)
CHAPTER 6

1. In accountant terms, exchanges of goods and services are called sales.
   
   True or False

2. In accounting terms, financial transactions affecting a business are first recorded as _____ (journal entries) _____.

3. In accounting terms, financial transactions affecting a business are first recorded--
   a. on the income statement.
   b. in ledger accounts.
   c. on the balance sheets.
   d. as journal entries.

4. While reviewing the Balance Sheet of "Goobers Are Us, Inc", you discover that your partner had placed his jelly donut on your copy, obliterating the liabilities section. Your review discloses the corporation reported assets of $2 million and owners equity (net worth) of $1.6 million. What is the total reported by the corporation of its liabilities? (1 point)

   Show the variation of the "Basic Accounting Equation" you used to derive your answer. (1 point)

   HINT! The words "liabilities, assets and net worth" will be helpful.

   \[
   \text{Assets} - \text{Owners Equity} = \text{Liabilities} \\
   ($2 \text{ Million} - $1.6 \text{ Million} = $0.4 \text{ Million})
   \]

5. The two types of "Financial Statements" were discussed in class-- (1 point each)

   a. The _____ (balance sheet) _____ is a statement of the financial position of the entity at a specific point in time ("snapshot").

   b. The _____ (income statement) _____ is a statement of performance of the entity for a specific period of time ("video").

6. What is the book of original entry used by businesses in recording the financial
transactions of the business?

(Journals)

7. What method of accounting records business revenues when earned and business expenses when incurred?

(Accrual)

8. Write down the accounting equation.

(Assets = Liabilities + Owner’s Equity)

9. The claims that are made by business creditors upon business assets are called--

a. net worth.

b. capital.

* c. liabilities.

d. retained earnings.

10. Depreciation is an accounting concept designed to--

a. measure the value of debits and credits posted to the balance sheet.

* b. expend the cost of an asset over its anticipated useful life.

c. account for the increase in the value of an asset, expressed in dollars that are decreasing in value.

d. only “a” and “b” above.

11. A partnership purchased a computer for $10,000 to be used solely for business purposes. The partnership paid $5,000 (via check) and promised that the balance would be paid in 90 days. (6 points)

Make the appropriate Journal entries to record the transaction.

<table>
<thead>
<tr>
<th>Item</th>
<th>Debit</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Equipment</td>
<td>($10,000)</td>
<td></td>
</tr>
<tr>
<td>Cash</td>
<td></td>
<td>($5,000)</td>
</tr>
<tr>
<td>Accounts Payable</td>
<td></td>
<td>($5,000)</td>
</tr>
</tbody>
</table>
12. In one sentence (two maximum), what does the following journal entry indicate? (5 points)

<table>
<thead>
<tr>
<th>Debit</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash</td>
<td>Accounts Receivable</td>
</tr>
<tr>
<td>10,000</td>
<td>10,000</td>
</tr>
</tbody>
</table>

(A $10,000 payment was "received on account." Cannot tell whether it was by check or cash.)

13. A ledger is established to accumulate all the transactions affecting a specific account during the accounting cycle.

14. A journal is established to accumulate all the transactions affecting a specific account during the accounting cycle.

True or False

15. Make the appropriate debit and credit entries to these "T-Accounts" and prepare the balance sheet for the UWP Company based only upon the following financial information: (20 points)

a. On 11-1-92, the corporation sold 25,000 shares of stock. Each share sold for $1.00 with the cash from the sale being placed into a business checking account.

<table>
<thead>
<tr>
<th>Cash</th>
<th>Paid-in Capital</th>
</tr>
</thead>

17. The officers of ABC Company, described in Question #16, are under investigation for financial misconduct. Based upon income statement information, where should the investigator start his/her search, and how should he/she proceed?

a. In the balance sheets
b. Examine the Administrative Expense Ledger Account and related general ledger entries.
c. Examine personalities of company officers
d. Examine the Inventory and Cost of Goods Sold accounts

18. When a business reports a loss on its income statement, in accounting terms, how can it generate funds to continue in business (i.e. cover the loss)?

a. Securing more capital
b. Selling assets
c. Incurring liabilities
* d. All the above
e. None of the above

19. A balance sheet reports the assets, liabilities and capital of a business. Three (3) ways financial fraud can take place through the manipulation of balance sheet accounts include concealment of assets, (under-valuation of assets) and fraudulent liabilities.

20. A balance sheet reports the assets, liabilities and capital of a business. Three (3) ways financial fraud can take place through the manipulation of balance sheet accounts include concealment of assets, under-valuation of assets and fraudulent liabilities.

    True or False

21. The corporation is the most common form of business organization.

    True or False
22. Name four (4) things found in the "Articles of Partnership."

a. (Names of the partners and the partnership)

b. (Name, location, and type of business to be conducted)

c. (Effective date of the agreement and the agreement’s expiration date)

d. (Salary to be paid to each partner and the provisions for terminating the partnership)

23. The sole proprietorship form of business operation holds what advantage(s) when compared to other forms of business organizations?

a. Ease of transfer of ownership

b. Limited liability

c. Perpetual life

d. "a" and "c"

e. None of the above

(The system of recording and summarizing business and financial transactions in books and analyzing, verifying, and reporting the results.)
1. What is meant by the term "Direct Method of Proof"?

(Method used to prove suspect has paid for something using illicit funds or received funds through an illegal means. Investigator looks for a specific illegal transaction. Nothing is implied or inferred.)

2. Give a short scenario in which a Direct Method of Proof could be used.

(Student responses will vary.)

(Situation: Suspect has set up a fictitious payable scheme. Suspect has established individuals who are not actually employees of the company and has set up means to receive their payroll checks. Investigator could review company accounting and personnel records to uncover specific false documentation to prove scheme.)
1. What is the "net worth method of proof" and when is it appropriate to use in a financial investigation?

(Unknown sources of funds located by analyzing increases in net worth. Assets - liabilities = Net Worth)

(Used when suspect -
  • maintains no books and records
  • books and records unavailable
  • books and records inadequate
  • withholds books and records)

2. Give a short scenario in which an Indirect Method of Proof would be utilized.

(Responses will vary.)

(Situation: Suspect appears to be spending extravagant amounts of money on gifts and other personal items. By using the Expenditures Method (an indirect method), the investigator can determine if the expenditures are resulting from "unknown income."
1. **What is an Interview? Define.**

   (A specialized form of oral, face-to-face communication between people that is entered into for a specific task-related purpose associated with a particular subject matter.)

2. **Give three of the five objectives of an interview given in the textbook.**

   a. (To obtain information that establishes or refutes the allegation or crime under investigation)
   
   b. (To obtain leads for further development of the case)
   
   c. (To obtain information and documents in the witness’s possession)
   
   d. (To obtain the cooperation of the witness for any subsequent legal proceeding)
   
   e. (To obtain background and personal information about the witness and his/her motivation for involvement in the crime)

3. **What are the three phases of the interview process?**

   a. (Planning)
   
   b. (Conducting)
   
   c. (Recording)

4. **What are three methods in which an interview may be recorded?**

   a. (Memorandum of Interview)
   
   b. (Question and Answer Statement)
   
   c. (Affidavit)
1. Surveillance includes which of the following types--
   a. stationary.
   b. moving.
   c. electronic.
   d. "a" and "b."
   e. all the above.

2. What is the intent or purpose of a surveillance? Give three (3) types of surveillance.
   (Surveillance provides a means to obtain information and evidence which probably would not be available by any other means.)
   a. (Stationary)
   b. (Moving)
   c. (Electronic)

3. List one common motive that many informants have for providing information.
   (Revenge)
   (Social responsibility)
   (To reduce their own sentence)

4. Most law enforcement agencies routinely advise informants that they are not to commit any crimes while they are obtaining information.
   True or False

5. A "mail cover" allows the postmaster to open and inspect a suspect's mail
   True or False

6. In legal terms "curtilage" refers to the area inside a suspect's home.
   True or False
7. At least one person must consent to tape recording a telephone conversation in the absence of a court order.

True or False

8. An affidavit for a financial search warrant normally requires the affiant/agent to make a conclusion based on his experience and training.

True or False

9. Which of the following are tests that can normally be done by a crime lab with respect to financial records--
   a. ink analysis.
   b. alteration analysis.
   c. handwriting analysis.
   d. "a" and "b."
   e. all the above.

 *  

10. The standard of proof for obtaining a search warrant is--
    a. beyond a reasonable doubt.
    b. preponderance of the evidence.
    c. clear and convincing evidence.
    d. probable cause.
    e. all the above.

*
CHAPTER 11

1. By definition, what is money laundering? Why is it the focus of so much attention by today's financial investigator?

(The process of concealing the existence, illegal source, or legal application of income and then disguising that income to make it appear legitimate.)

(In order for criminals to spend their illegal gains, they have to "launder" the money.)
COURSE GOALS

- Identify what constitutes a financial crime
- Determine where to find financial information
- Introduce techniques to analyze financial information
- Apply these techniques to investigate situations
CRIME CLASSIFICATION SYSTEM

Old System
Against persons or property

New System
By passion versus greed

FINANCIAL INVESTIGATIONS
Chapter 1: Why Financial Investigation?
GOAL OF FINANCIAL INVESTIGATIONS

Identify and document specific events related to the movement of money during a crime
FINANCIAL INVESTIGATION PROCESS

1. Identify statute(s) violated and the elements of the crime
2. Find evidence to prove the elements
3. Trace and document financial transactions to preserve records as evidence
4. Convince jury of findings
TYPES OF FINANCIAL CRIMES

- Fraud
- Tax evasion
- Bribery
- Embezzlement
- Larceny
- Forgery
- Counterfeiting
- Blackmail
- Extortion
- Kickback
- Racketeering
- Inside trading
- Money laundering
SKILLS AND KNOWLEDGE REQUIRED OF FINANCIAL INVESTIGATORS

- Know statute(s) that define crime
- Know where to look for evidence and admissibility of the evidence
- Trace the movement of money through financial institutions
- Use accounting and auditing techniques
- Use methods of proof to link financial events together
- Conduct financial interviews, record their findings, and summarize results
- Use investigative techniques
AGENCIES EMPLOYING FINANCIAL INVESTIGATORS

- U.S. Customs Service
- U.S. Secret Service
- U.S. Marshal Service
- Drug Enforcement Agency
- Office of Inspector General
- Federal Bureau of Investigation
- Internal Revenue Service
- Postal Inspector Service
- Bureau of Alcohol, Tobacco, and Firearms
- Non-Federal Agencies
LAW

Formal means of social control
FUNCTION OF LAW

Establishes benchmark for behavior in society ("Thou shall not’s")
CATEGORIES OF LAW

- Common law
- Case law
- Substantive law

Civil - Torts between private parties
Criminal - Crimes of public nature
CLASSIFICATION OF CRIME

- Felony
- Mala in se
- Mala prohibita
- Misdemeanor

Chapter 2: Laws Related to Financial Crimes
APPEAL PROCESS

District court → Appellate courts → Supreme court

Chapter 2: Laws Related to Financial Crimes
STATUTES

- Laws enacted by Congress
- State and Federal level
- Recorded in code books
ELEMENTS OF A CRIME

Parts that must be proven to show and sustain a conviction

Chapter 2: Laws Related to Financial Crimes
TAX EVASION STATUTE

§ 7201. Attempt to evade or defeat a tax or the payment thereof

Any person who willfully attempts in any manner to evade or defeat any tax imposed by this title or the payment thereof shall, in addition to other penalties provided by law, be guilty of a felony and, upon conviction thereof, shall be fined not more than $250,000 ($500,000 in the case of a corporation) or imprisoned not more than 5 years, or both, together with the costs of prosecution.
§ 201. Bribery of public officials and witnesses

(b) Whoever -

(1) directly or indirectly, corruptly gives, offers or promises anything of value to any public official. . . or offers or promises any public official. . . to give anything of value to any other person or entity, with intent -

(A) to influence any official act; or

(B) to influence such public official. . . to commit or aid in committing, or collude in, or allow, any fraud, or make opportunity for the commission of any fraud, on the United States; or

(C) to induce such public official. . . to do or omit to do any act in violation of the lawful duty or such official . . .

shall be fined not more than three times the monetary equivalent of the thing of value, or imprisoned for not more than fifteen years, or both.
§ 287. False, fictitious, or fraudulent claims

Whoever makes or presents to any person or officer in the civil . . . service of the United States, or to any department or agency thereof, any claim upon or against the United States, or any department or agency thereof, knowing such claim to be false, fictitious, or fraudulent shall be fined not more than $250,000, or imprisoned not more than five years, or both.
§ 371. Conspiracy to commit offense or to defraud the United States

If two or more persons conspire either to commit any offense against the United States, or to defraud the United States, or any agency thereof in any manner or for any purpose, and one or more of such persons do any act to effect the object of the conspiracy, each shall be fined not more than $250,000 or imprisoned not more than 5 years, or both.

If, however, the offense, the commission of which is the object of the conspiracy, is a misdemeanor only, the punishment for such conspiracy shall not exceed the maximum punishment provided for such misdemeanor.
§ 471. Obligations or securities of the United States

Whoever, with intent to defraud, falsely makes, forges, counterfeits, or alters any obligation or other security of the United States, shall be fined not more than $250,000 or imprisoned not more than fifteen years, or both.
THEFT OR EMBEZZLEMENT FROM GOVERNMENT STATUTE

§ 641. Public money, property or records

Whoever embezzles, steals, purloins, or knowingly converts to his use or the use of another, or without authority sells, conveys or disposes of any record, voucher, money, or thing of value of the United States or any department or agency thereof, or any property made or being made under contract for the United States or any department or agency thereof; or

Whoever receives, conceals, or retains the same with the intent to convert it to his use or gain, knowing it to have been embezzled, stolen, purloined or converted-

Shall be fined not more than $250,000 or imprisoned not more than ten years, or both; but if the value of such property does not exceed the sum of $100, he shall be fined not more than $1,000 or imprisoned not more than one year, or both.

The word "value" means face, par, or market value, or cost price, either wholesale or retail, whichever is greater.
§ 656. Theft, embezzlement, or misapplication by bank officer or employee

Whoever, being an officer, director, agent, or employee of, or connected in any capacity with any Federal Reserve bank . . . embezzles, abstracts, purloins, or willfully misapplies any of the moneys, funds, or credits of such bank . . . shall be fined not more than $1,000,000 or imprisoned not more than thirty years, or both; but if the amount embezzled, abstracted, purloined or misapplied, does not exceed $100, he shall be fined not more than $1,000 or imprisoned not more than one year, or both.
§ 872. Extortion by officers or employees of the United States

Whoever, being an officer or employee of the United States . . . under the color or pretense of office or employment commits or attempts an act of extortion, shall be fined not more than $250,000 or imprisoned not more than three years, or both; but if the amount extorted or demanded does not exceed $100, he shall be fined not more than $500 or imprisoned not more than one year, or both.
§ 873. Blackmail

Whoever, under threat of informing, or as a consideration for not informing, against any violation of any law of the United States, demands or receives any money or other valuable thing, shall be fined not more than $2,000 or imprisoned not more than one year, or both.
KICKBACK STATUTE

§ 874. Kickbacks from public works employees

Whoever, by force, intimidation, or threat of procuring dismissal from employment . . . induces any person employed in the construction, prosecution, completion or repair of any public work financed in whole or in part by loans or grants from the United States, to give up any part of the compensation to which he is entitled under his contract of employment, shall be fined not more than $250,000 or imprisoned not more than five years, or both.
FALSE STATEMENT STATUTE

§ 1001. False statements of entries generally

Whoever, in any matter within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals or covers up by any trick, scheme, or device a material fact, or makes false, fictitious or fraudulent statements or representations, or makes or uses any false writing or document knowing the same to contain any false, fictitious or fraudulent statement or entry shall be fined not more than $250,000 or imprisoned not more than five years, or both.
§ 1343. Fraud by wire, radio, or television

Whoever, having devised or intending to devise any scheme or artifice to defraud, or for obtaining money or property, . . . by means of wire, radio, television communication and interstate or foreign commerce, . . . shall be fined not more than $250,000 or imprisoned not more than 5 years, or both. If the violation affects a financial institution, such person shall not be fined more than $1,000,000 or imprisoned more than 30 years, or both.
§ 1956. Laundering of monetary instruments

(a)(1) Whoever, knowing that the property involved in a financial transaction represents the proceeds of some form of unlawful activity, conducts or attempts to conduct such a financial transaction which in fact involves the proceeds of specified unlawful activity -

(A) (i) with the intent to promote the carrying on of specified unlawful activity; or

(ii) with the intent to engage in conduct constituting a violation of section 7201 or 7206 of the Internal Revenue Code of 1986; or

(B) knowing that the transaction is designed in whole or in part -

(i) to conceal or disguise the nature, the location, the sources, the ownership, or the control of the proceeds of specified unlawful activity; or

(ii) to avoid a transaction reporting requirement under State or Federal law, . . .

shall be sentenced to a fine of not more than $500,000 or twice the value of the property involved in the transaction, whichever is greater, or imprisonment for not more than twenty years or, both.
TRANSACTIONS INVOLVING CRIMINALLY DERIVED PROPERTY STATUTE

§ 1957. Engaging in monetary transactions in property derived from specified unlawful activity

(a) Whoever, in any of the circumstances set forth in subsection (d), knowingly engages or attempts to engage in a monetary transaction in criminally derived property that is of a value greater than $10,000 and is derived from specified unlawful activity, shall be punished as provided in subsection (b).

(b)(1) Except as provided in paragraph (2), the punishment for an offense under this section is a fine under title 18, United States Code, or imprisonment for not more than ten years or both.
FAILING TO FILE, SUPPLY INFORMATION, OR PAY TAX STATUTE

§ 7203. Willful failure to file return, supply information, or pay tax

Any person required under this title to pay any estimated tax or tax, or required by this title or by regulations made under authority thereof to make a return, keep any records, or supply any information, who willfully fails to pay such estimated tax or tax, make such return, keep such records, or supply such information, at the time or times required by law or regulations, shall, in addition to other penalties provided by law, be guilty of a misdemeanor and, upon conviction thereof, shall be fined not more than $25,000 ($100,000 in the case of a corporation), or imprisoned not more than 1 year, or both, together with the costs of prosecution...
FILING A FALSE OR FRAUDULENT RETURN STATUTE

§ 7206. Fraud and false statement

Any person who -

(1) Willfully makes and subscribes any return, statement, or other document, which contains or is verified by a written declaration that is made under penalties or perjury, and which he does not believe to be true and correct as to every material matter. . . shall be guilty of a felony and upon conviction, shall be fined not more than $250,000 ($500,000 in the case of a corporation) or imprisoned not more than 3 years, or both, together with the costs of prosecution.
§ 5313. Reports on Domestic Coins and Currency Transactions

(a) When a domestic financial institution is involved in a transaction for the payment, receipt, or transfer of U.S. coins or currency (or other monetary instruments the Secretary of the Treasury prescribes), in an amount, denomination, or amount and denomination, or under circumstances the Secretary prescribes by regulation, the institution and any other participant in the transaction the Secretary may prescribe shall file a report on the transaction at the time and in the way the Secretary prescribes. . .
§ 5324. Structuring Transactions to Evade Reporting Requirement Prohibited

No person shall for the purpose of evading the report requirements of section 5313(a) with respect to such transaction -

(1) cause or attempt to cause a domestic financial institution to fail to file a report required under section 5313(a);
(2) cause or attempt to cause a domestic financial institution to file a report required under section 5313(a) that contains a material omission or misstatement of fact; or
(3) structure or assist in structuring, or attempt to structure or assist in structuring, any transaction with one or more domestic financial institutions.
GRAND JURY FUNCTION

Review and approval of indictments
GRAND JURY
BACKGROUND INFORMATION

16 To 23 voters of district

"Sit" for 18 months
- Investigate
- Find probable cause

Anything that bears on probable cause is admissible

Need 12 "yea" votes for indictment

Role of fact-finder

Evidence
GRAND JURY TOOLS

- Subpoena
- Immunity
SUBPOENA

Requires witness to appear and provide testimony

"Subpoena ducus tecum" - bring records
IMMUNITY

Granted to convince witness to provide testimony

Informal
Prosecutor "grants" by letter

Formal
Judge orders
GRAND JURY FUNCTION

- Investigate Federal Crimes
- Indict
EVIDENCE

Information

FACTS

Documents

OBJECTS

Testimony

- Anything that bears on the truth of the matter
- Used to prove elements of the crime
BURDEN OF PROOF

- Beyond reasonable doubt
- Clear and convincing
- Preponderance of evidence
- Probable cause
- Suspicious situation
TYPES OF EVIDENCE

- Direct
- Circumstancial
- Real
- Documentary
- Testimonial
- Judicial
RELEVANCY AND COMPETENCY

RULE 401

- Relevant
  Traceable and significant connection

- Competency
  Presented by a qualified and capable witness
PRIVILEGED COMMUNICATION

**Rule 501**

- Based on the confidentiality of certain communications
- Covers communications of a protective relationship
- Cannot divulge information without consent of other party
HEARSAY

Rule 801

Does not come from personal knowledge of declarant but from the repetition of what a person has heard from others
EXCEPTIONS TO HEARSAY RULE

- Confessions
- Prior statements
- Statements against interest
- Res gestae statement (excited utterance)
- Dying declaration
- Official records rule
- Shop book rule
CHAIN OF CUSTODY

RULE 901 (A)

Evidence obtained must be marked, identified, inventoried and preserved to maintain original condition until introduced at trial.
BEST EVIDENCE AND REQUIREMENT OF ORIGINAL

RULES 1001 & 1002

- Best proof of contents of document is the document itself
- Authenticated copy may be substituted for original if --
  - Original has been destroyed
  - In possession of another party not subject to legal process by search warrant or subpoena
QUESTIONS FACING INVESTIGATOR

- Where to look
- What to look for
Information is the Key to Successful Financial Investigations
INITIATING THE INVESTIGATION

- Targeting the suspect for investigation
- Suspect as source of information
SOURCES OF INFORMATION

- Public records
- Business records
- Government records
- Financial Institution records
- Informants
PUBLIC RECORDS

- Real estate
- Corporate
- Partnership
- Trusts
- Assumed name indexes
- Better Business Bureau
- Chamber of Commerce
- Uniform Commercial Code Filing (UCC)
- Court records
BUSINESS RECORDS

- Real estate purchases
- Vehicle purchases

You authorize the credit union to obtain and/or furnish information concerning your credit affairs to any association, firm, corporation or personnel office. When you accept or endorse a check advanced to you under this Plan, you agree to the terms and also acknowledge receipt of (1) information regarding billing errors or inquiries, (2) the LOANLINER Credit Agreement and Truth in Lending Disclosures. You agree to make payments of the amount and at the time shown on the voucher accompanying the check if security and/or a change in terms is noted on the voucher. Your endorsement constitutes acceptance of the terms of the security agreement and/or the change in terms. If the advance is secured by shares and/or deposits, you pledge the shares and/or deposits shown on the voucher.

You further understand that when applicable, a Personal Identification Number (PIN) may be issued. This PIN, when validated will allow you the co-applicant and any authorized users to access your credit union's CREDIT CARD/ATM accounts through participating Automated Teller Machines (ATM) networks, subject to the terms and disclosures of the acknowledgement of receipt and agreement to the terms of the CREDIT CARD/ATM Access Card Disclosures.

You promise that everything you have stated in this application is correct to the best of your knowledge and that the above information is a complete listing of all your debts and obligations. You authorize the credit union to check your employment and credit history and to obtain credit reports in connection with this application for credit and for any update renewal or extension of the credit received. If you request the credit union will tell you the name and address of any credit bureau from which it received a credit report on you. You understand that it is a federal crime to willfully and deliberately provide incomplete or incorrect information on loan applications made to federal credit unions insured by the NCUA.

Lease of
Safe Deposit Box
By Two or More Persons

Box No  
Rental $key No  
Date  

(Due annually in advance)
the lessor, in consideration of rental at the above annual rate, the receipt of one annual installment of which is hereby acknowledged, by these presents, leases unto the undersigned lessees its safe deposit box bearing the above number, and the space necessary for its reception, situated in its Safe Deposit Vault in its Banking House at  , from the date hereof to renewal in subsequent terms of one year each, upon the same general terms, conditions and agreements, as are herein contained, and in the event that a renewal lease in writing shall not be executed and delivered, then this instrument shall of itself operate as and be held to be renewal or successive renewals hereof, subject to the right of cancellation as herein provided.

21. If the lessor do not wish access to be given in accordance with the provisions of paragraph 20 above and wish to require the presence of two or more lessees, whenever access is given to the safe deposit box, special instructions in writing relative thereto must be given to the lessor. Unless such special instructions are given at the time of execution of this agreement, it shall be presumed that paragraph 20 has been approved and shall be applicable. Whenever special instructions are given requiring the presence of more than one lessee at the time of access and one of said lessees shall die, his personal representative shall thereafter act in his place and stead, unless the special instructions provide otherwise.

The National Bank,
Lessee

For Safe Deposit Department

We have read the above contract, the meaning of which is clear to me. The provisions of paragraph 9 limiting the value of property in the safe deposit box are satisfactory to us and we do not desire to place a greater maximum valuation on said property.

  - Uses both Cash and Accrual (mixed)
ELEMENTS OF ACCOUNTING

Assets--
Anything owned by business

Liabilities--
Anything business owes

Owner's equity--
Value of whatever owner(s) invested in business
ACCOUNTING EQUATION (1)

\[ \text{Assets} = \text{Liabilities} + \text{Owner's Equity} \]
ACCOUNTING EQUATION (2)

Assets minus Liabilities = Owner's Equity
EQUATION WORKSHEET (1)

\[ A = L + OE \]

\begin{align*}
A &= \text{Assets} \\
L &= \text{Liabilities} \\
OE &= \text{Owner's Equity}
\end{align*}
Income--
Proceeds from sale of goods or services

Expenses--
Payments made in connection with producing income
Profit
Income > Expenses

Loss
Expenses > Income
ACCOUNTING EQUATION (3)

Assets = Liabilities + Owner's Equity + Net Income/Loss
EQUATION WORKSHEET (2)

\[ L + OE + (I - E) = A \]
ACCOUNTING CYCLE

1. Documenting business transactions
2. Journalizing transactions
3. Posting journal entries to ledgers
4. Preparing trial balance
5. Preparing financial statements

AUDITING PROCESS

- Identify unusual or suspicious item(s)
- Identify unusual or suspicious change(s)
- Analyze each account
PROOF

Documenting a suspect's receipt and/or disposition of funds
METHODS OF PROOF

Direct

Specific item

Indirect

■ Net worth

■ Expenditures

■ Bank deposit
SPECIFIC ITEM METHOD

Identifying direct proof of illegal financial transactions by suspect

CUSTOMER'S RECEIPT
DO NOT SEND THIS RECEIPT FOR PAYMENT
KEEP IT FOR YOUR RECORDS

Financial transaction

Point of payment

Point of receipt
POINT-OF-PAYMENT ANALYSIS
EXAMPLE

REASON FOR INVESTIGATION: Purchase of illegal drugs

<table>
<thead>
<tr>
<th>PROCESS FOLLOWED</th>
<th>RESULTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Interviewed suspect-- Confronted suspect concerning allegation</td>
<td>Suspect denied allegation Suspect said he doesn’t have money for drugs</td>
</tr>
<tr>
<td>2. Reviewed Leo, Inc. business records-- Compared CRJ to bank statements</td>
<td>Everything balanced</td>
</tr>
<tr>
<td>3. Reviewed suspect’s personal finances-- Bank account records</td>
<td>No money available to buy drugs</td>
</tr>
<tr>
<td>4. Contacted Leo, Inc. business customers-- Compared company receipts to what was in Leo’s CRJ</td>
<td>Matched</td>
</tr>
<tr>
<td>5. Reviewed Leo, Inc. business records (second time)-- Reviewed expenses in CDJ</td>
<td>Found suspicious check to Gemini Corp. for $1500</td>
</tr>
<tr>
<td>6. Reviewed Gemini Corp. records-- Reviewed CRJ</td>
<td>No receipt of check for $1500 from Leo, Inc.</td>
</tr>
<tr>
<td>7. Reviewed Leo Inc. business records (third time)-- Located canceled check to Gemini Corp. and had handwriting analyzed</td>
<td>Handwriting was not someone from Gemini Corp. but Mr. Drawer’s signature</td>
</tr>
</tbody>
</table>

SPECIFIC ITEMS OF PROOF: 1. False payable to Gemini Corp. recorded in Leo, Inc. CDJ 2. Canceled check endorsed by Mr. Drawer
**POINT-OF-RECEIPT ANALYSIS EXAMPLE**

**REASON FOR INVESTIGATION:** Embezzlement of funds

<table>
<thead>
<tr>
<th>PROCESS FOLLOWED</th>
<th>RESULTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Searched bank records of AKP customer for all cancelled checks written to AKP Paint Company</td>
<td>Located canceled check made payable to AKP for full $2,000 for supplies</td>
</tr>
<tr>
<td>2. Reviewed AKP Paint business records-- Compared CRJ to bank statements</td>
<td>$750 payment recorded for supplies from customer</td>
</tr>
<tr>
<td></td>
<td>AKP Paint CRJ and bank statements both entered a $750 payment from customer</td>
</tr>
<tr>
<td></td>
<td>Discrepancy still noted:</td>
</tr>
<tr>
<td></td>
<td>$2,000 Customer check</td>
</tr>
<tr>
<td></td>
<td>$750 AKP record notations</td>
</tr>
<tr>
<td></td>
<td>$1,250 Discrepancy</td>
</tr>
<tr>
<td>3. Reviewed customer canceled check</td>
<td>Back of check indicated - For Deposit Only into AKP corporate account</td>
</tr>
<tr>
<td>4. Reviewed deposit slip</td>
<td>Split deposit</td>
</tr>
<tr>
<td></td>
<td>$ 750 Account deposit</td>
</tr>
<tr>
<td></td>
<td>$1,250 &quot;Cash back&quot;</td>
</tr>
<tr>
<td>5. Confronted suspect (individual who deposited check)</td>
<td>Confessed to taking funds</td>
</tr>
</tbody>
</table>

**SPECIFIC ITEMS OF PROOF:**

1. The canceled check and payment records of payor
2. The CRJ of payee and deposit slip
POINT-OF-PAYMENT SCHEMES

- Fictitious payables
- Ghost employee and payroll kickback
- Overbilling
- Offbook and currency

**FINANCIAL INVESTIGATIONS**

Chapter 8. Tracing Funds Using Indirect Methods
Keys to Net Worth Analysis

- Cash-on-hand
- Cash in banks
- Asset valuation
- Known expenses
NET WORTH METHOD - ELEMENTS OF PROOF

- Establish reliable opening net worth
- Investigate leads showing suspect's innocence
- Establish likely taxable source of income with evidence of net worth increase
EXPENDITURES METHOD

Comparison between known expenditures and known sources of funds

Expenditures  Sources of funds
EXPENDITURES ANALYSIS FORMULA

Total expenditures
Minus: *Known sources of funds*
Equals *Funds from unknown sources*
## EXPENDITURES ANALYSIS - JIM DEALER

</tbody>
</table>
EXPENDITURES METHOD - ELEMENTS OF PROOF

- Establish firm starting point
- Establish likely source of income
- Investigate leads showing suspect's innocence
BANK DEPOSIT METHOD

Unknown sources of funds located through analysis of bank records.
BANK DEPOSIT ANALYSIS FORMULA

Total Deposits to All Accounts
Minus: Transfers and Redeposits
Equals Net Deposits to All Accounts
Plus: Cash Expenditures *
Equals Total Receipts From All Sources
Minus: Funds From Known Sources
Equals Funds From Unknown Sources

**(1)**

Net Deposits to All Accounts
Plus: Beginning Balances
Equals Net Bank Funds Available
Minus: Ending Balances
Equals Net Bank Disbursements

**(2)**

Total Outlay of Funds
Minus: Net Bank Disbursements
Equals Cash Expenditures
# BANK DEPOSIT ANALYSIS - JIM DEALER

## BANK DEPOSIT ANALYSIS

### SUSPECT - JIM DEALER

<table>
<thead>
<tr>
<th></th>
<th>1991</th>
<th>1992</th>

INTERVIEW

Face-to-face oral communication between people for a specific task-related purpose
PURPOSE OF FINANCIAL INTERVIEWS

Tool used to determine the knowledge of witnesses concerning the investigation
OBJECTIVES OF FINANCIAL INTERVIEWS

To obtain:

- Data that establishes or refutes allegations
- Leads
- Financial documents
- Witness cooperation
- Witness background and personal data
- Motivation for crime
TYPES OF INTERVIEW QUESTIONS

- General recollection
  
  Can you describe the person who came into the bank?

- Specific detail
  
  How did she pay for the car?
PHASES OF THE INTERVIEW

1. Planning
2. Conducting
3. Recording

- Closing
SEARCH WARRANT

Written order issued by Judge describing place to be searched and things to be seized
UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF WISCONSIN
AT LAW AND IN ADMIRALTY

UNITED STATES OF AMERICA,

Warrant No. 1

vs.

SEARCH WARRANT
(21 U.S.C. § 881 (B))

Thomas Trio

TO: ANY DEPUTY UNITED STATES MARSHAL OR OTHER FEDERAL OFFICER

An affidavit has been made before me by Special Agent John Smith of the United States Internal Revenue Service that he has reason to believe that Tom Trio of 102 North West Street, Milwaukee, Wisconsin is involved in cocaine trafficking in violation of Title 21 U.S.C. § 881 (B). Special Agent Smith's affidavit further states that he has reason to believe that evidence needed to support such a claim is located at the residence of 102 North West Street. I am satisfied that there are sufficient facts and circumstances to support the probable cause standard to believe that the items listed on the attachment to this warrant are currently located at 102 North West Street in Milwaukee, Wisconsin, and that grounds exist for the issuance of this seizure warrant as stated in the supporting affidavit.

YOU ARE HEREBY COMMANDED to proceed to 102 North West Street to seize the items listed or described on the attachment to this warrant within a period of three days, serving this warrant and seizing this property during daytime hours 8:00 a.m. to 5:00 p.m., leaving a copy of this warrant, preparing a written inventory of all the property seized, and promptly returning this warrant and bringing the inventory before this court as required by law within ten days after seizure.

Dated at Milwaukee, Wisconsin, this ____ day of March, 1992.

ALICE MILLER
United States Magistrate
UNDERCOVER OPERATION

Individuals assume an identity other than their own to gather information relating to criminal violations.
OBJECTIVES OF UNDERCOVER OPERATIONS

- Observe and attend planning sessions for future violations
- Identify unknown violators and develop information related to current violations
- Purchase contraband
- Identify fruits of a crime
- Develop information related to past crime
- Locate contraband or weapons
OBJECTIVES OF UNDERCOVER OPERATIONS (continued)

- Locate violation sites
- Identify co-conspirators and/or key witnesses
- Obtain probable cause for search and arrest warrants
- Check the reliability of informants
- Corroborate witness's statements
- Gather information on criminal investigations
- Obtain information on purchases/expenditures
SURVEILLANCE

Secretive observation of persons, places and things to obtain information on individuals suspected of violating criminal laws.
OBJECTIVES OF SURVEILLANCE

- Obtain crime evidence
- Obtain probable cause for search and arrest warrants
- Identify suspect's associates/co-conspirators
- Apprehend violators during the commission of crime
- Develop investigative leads
- Provide protection and corroboration for undercover officers
- Locate persons and things
- Gather intelligence
TYPES OF SURVEILLANCE

- Stationary
- Moving
- Electronic
INFORMANT

A person who provides information on criminal activity to law enforcement
TRASH

Used to identify leads and gather evidence
MAIL COVERS

Provide leads--

- Addresses
- Postmark
FORENSIC SCIENCE

Application of scientific techniques to legal matters
TYPES OF FORENSIC SCIENCE

- Handwriting analysis
- Typewriter analysis
- Alteration analysis
- Ink analysis
- Paper analysis
- Document restoration
COMPUTERS

Provide evidence--

- Data bases
- Mailing lists
- Printouts
LINK ANALYSIS

Putting information together to show patterns and meanings
TRANSACTION SYSTEMS

- Cash

- Business

FINANCIAL INVESTIGATIONS

Chapter 11: Money Laundering and Forfeitures
METHODS OF LAUNDERING FUNDS

- Legitimate businesses
- Buy/sell transactions
- Off-shore havens
LAUNDERING FUNDS THROUGH LEGITIMATE BUSINESS

- Overstatement of legitimate revenue
- Overstatement of legitimate expenses
- Deposits of currency
LAUNDERING FUNDS THROUGH BUY/SELL TRANSACTIONS

Real estate or other personal property transactions to hide the flow of money
LAUNDERING FUNDS THROUGH OFF-SHORE HAVENS

- Moving money out of U.S.
  - Physical transportation
  - Wire transfer
  - Cashier's check
  - Attorneys, accountants, and money managers
  - Brokerage accounts
  - Wire services

- Moving money into the U.S.
  - Fictitious loans
  - Fictitious foreign investors
  - Finders' fees
  - Corporate salaries
  - Cashier's checks and wire transfers
  - Physical transportation
ASSET FORFEITURES

A legal proceeding initiated by the government against the proceeds of an illegal activity.

FINANCIAL INVESTIGATIONS

A Financial Approach to Detecting and Resolving Crimes

STUDENT WORKBOOK
Acknowledgements

The men and women of Internal Revenue Service Criminal Investigation are proud to present this course to the colleges, universities and students who have expressed an interest in learning more about financial investigations.

The purpose of this course is twofold: first, to encourage young men and women to consider law enforcement as an enriching career and second, to bring to the reader's attention the serious and sometimes evil crimes that are motivated by money and greed.

We would like to thank the Internal Revenue Service Special Agents who instructed the pilot courses at the colleges and universities. We would also like to thank the colleges and universities that allowed Internal Revenue Service Criminal Investigation to offer this new course at their institutions.

INTRODUCTION

Welcome to the world of "Financial Investigations!"

You will be using this workbook as part of your course materials for the Financial Investigations Course. The workbook is designed for use with the textbook, "Financial Investigations...a Financial Approach to Detecting and Resolving Crimes." There are workbook pages for each corresponding chapter in the textbook.

HOW THE WORKBOOK WILL HELP YOU

Each chapter in the workbook provides a variety of "learning tools." These tools will assist you in meeting the course objectives. Additionally, the workbook will provide you with another resource on financial investigations which you may wish to use at a later date.

Your instructor will be guiding you through the activities and information presented in the workbook. Some of the workbook activities will require you to work with other students in the class. For other activities, your instructor may ask you to complete the activity outside of class.

Your instructor may be distributing additional material for you to incorporate into the workbook. For your convenience, you may wish to include your chapter notes at the end of each chapter section.

WHAT THE WORKBOOK CONTAINS

The workbook contains supporting and supplemental materials to the textbook content. The materials include:

- AN INTRODUCTION TO THE CHAPTER
- INDIVIDUAL OR GROUP SKILL EXERCISES
- INFORMATION SHEETS
- CASE STUDIES
- WORKSHEETS
Chapter 1

WHY FINANCIAL INVESTIGATION?

Student Workbook
CHAPTER SUMMARY

The field of financial investigations is changing. As a result, a new set of investigative skills is required to keep up with the changing times.

This chapter provides a general overview of the financial investigative field and an awareness of the skills required of a financial investigator.

CHAPTER OBJECTIVES

- State why there is a need for a financial investigative approach.
- Provide a general overview of the financial investigative approach.
- Identify skills required of a financial investigator.

CHAPTER WORKBOOK CONTENTS

- Course Goals
- Student Questionnaire
- Personal Net Worth Analysis Exercise
- Categories of Crime Exercise
- Federal (U.S.) Agencies
This course is designed to introduce and apply financial investigative techniques to the detection and resolution of criminal activity. It is based upon the financial investigative approach. This approach identifies and documents the movement of money during the course of a financial crime.

The goal of this course is to show how a financial investigation identifies and links together financial events to serve as a basis of proof indicating whether or not a crime has been committed. This is accomplished by:

- **IDENTIFYING WHAT CONSTITUTES A FINANCIAL CRIME.**
- **DETERMINING WHERE TO FIND FINANCIAL INFORMATION.**
- **INTRODUCING TECHNIQUES TO ANALYZE FINANCIAL INFORMATION.**
- **APPLYING THESE TECHNIQUES TO INVESTIGATIVE SITUATIONS.**

WHAT DO YOU HOPE TO GET FROM THE COURSE?
PERSONAL NET WORTH
ANALYSIS - PART 1

BACKGROUND:

As part of this course, you will be learning about net worth or what is known as an individual’s or company’s financial status. In other words, what does a person or company own, how much do they owe and what is the difference between the two? This information is important to the financial investigator, who tries to see if drastic changes occur in a person’s or company’s financial status. You will be learning more about this in Chapter 8.

To help you understand net worth and what affects net worth, you will be computing your own personal net worth. In this exercise, you will see what you are worth today. Then, on a daily basis throughout the course, you will be required to keep a log of information on what you spend daily and what you earn daily. This information will be used in Chapter 8 as part of a continuation of this exercise.
DIRECTIONS:

STEP 1. Locate WORKSHEET A on the next page. Complete Column I of the worksheet to determine your base net worth (what you are worth now). To the best of your abilities, determine all that you own (assets) and all that you owe (liabilities). Some common items are listed. Blank spaces have been provided for items not listed. Compute your base net worth by subtracting your total liabilities from your total assets.

STEP 2. On a daily basis, record on LIST A the total amount of what you spend each day. A space has been provided for the date and total figure for the day. Likewise, on a daily basis, record on LIST B the total amount of what you make each day. Write in the date and total figure for the day.

Daily Expenses: Include such items as food, clothing, gas, entertainment, etc.

Daily Income: Includes such things as wages, interest income, spending money from home, etc.

Note: The rest of WORKSHEET A (Column II), completed LISTS A and B and WORKSHEET B will be completed during an exercise in Chapter 8.

CATEGORIES OF CRIME EXERCISE

DIRECTIONS:

Working together in your group, review newspaper article(s) or synopsis of article(s) on criminal activities. Determine the following concerning the article(s) described:

- Type of crime committed
  - Article 1
  - Article 2
  - Article 3

- Criminal motivation (passion or greed)
  - Article 1
  - Article 2
  - Article 3

Your instructor may ask your group to share the article information with the class.
Chapter 2

LAWS RELATED TO FINANCIAL CRIMES

Student Workbook
CHAPTER INTRODUCTION

CHAPTER SUMMARY

In order to investigate the financial crimes being committed, the investigator must know about the laws that govern these crimes and how laws will affect financial investigations.

This chapter focuses on the laws pertaining to financial crimes and the associated elements of the crimes.

CHAPTER OBJECTIVES

- Define or describe selected terms related to the field of law.
- Identify the statute related to a particular crime.
- List the elements of a particular crime.

CHAPTER WORKBOOK CONTENTS

- U.S. Court of Appeals Organization
- Koller Court Case Exercise
- How to Use Code Books
- Statute Construction Exercise
## U.S. Court of Appeals Organization

### Circuits of the U.S. Court of Appeals

DIRECTIONS:

On the following pages is an excerpt from an actual court case. Read the case and answer the following questions pertaining to the case.

1. What was Koller convicted of?

2. What federal judge presided over Koller's trial?

3. What appellate judge wrote the decision?

4. What legal issues did Koller appeal?

6. What was the court's ruling?
In the
United States Court of Appeals
For the Seventh Circuit

No. 90-3787
UNITED STATES OF AMERICA,

Plaintiff-Appellee,

v.

JOSEPH R. KOLLER,

Defendant-Appellant.

Appeal from the United States District Court
for the Eastern District of Wisconsin.
No. 980 CR 20—Terence T. Evans, Judge.

ARGUED SEPTEMBER 20, 1991—DECIDED MARCH 3, 1992

Before BAUER, Chief Circuit Judge, RIPPLE, Circuit Judge, and FAIRCHILD, Senior Circuit Judge.

FAIRCHILD, Senior Circuit Judge. A jury found Joseph Koller guilty of conspiring to distribute cocaine, distributing cocaine, possessing in excess of 500 grams of cocaine with the intent to distribute, money laundering, and possession of an interstate firearm as a convicted felon. Judge Evans, Eastern District of Wisconsin, sentenced him to 20 years on each of five counts and 27 years on each of three counts, all to be served concurrently. Koller appeals.

Shia Ben-Hur testified that he had sold cocaine to Koller on twenty-one occasions in 1987 and 1988. Koller resold some of this cocaine to Arlyn Ackley who sold it to an undercover agent on four occasions. Those sales formed the basis for Counts TWO through FIVE of the indictment charging violations of 21 U.S.C. § 841(a)(1). Ben-Hur was arrested for an unrelated cocaine sale in September 1988. Ben-Hur agreed to cooperate with the government in its investigation of several suspected drug traffickers, including Koller. Ben-Hur

On this appeal Koller challenges various aspects of his conviction and sentence. Each argument will be addressed separately and any fact particularly relevant to that argument will be set out in the discussion.

I. MONEY LAUNDERING

Koller challenges the sufficiency of the evidence to support the money laundering conviction on count SEVEN. In April, 1988, Koller’s girl friend, Jane Vossekuij, was taken into state custody for violation of her probation, because she had not paid her restitution obligation. She was told that her probation would be revoked unless she paid. Jane called Koller and asked him if he would pay it. He agreed and indicated that he would get some of the money from outstanding drug debts. After gathering the money, Koller went to the probation office and attempted to pay Jane’s restitution obligation with over $2000 in cash. The probation officer, Ms. Ware, would not accept that amount of cash and told Koller that he needed to get a money order. Koller then took the cash to the nearby Security Bank and purchased a money order. He told the teller that he needed the money in order to get his girl friend out of jail. There was no evidence that he was asked his name or that he made any misrepresentation to the bank. Koller returned to the probation office with the money order and used it to pay Jane’s restitution obligation. Ms. Ware wrote out a receipt for the payment to “Gerald Koller.” Although Ms. Ware did not testify specifically that he told her his name was Gerald, she testified that she asked him how to spell his name or that she asked him how to spell “Gerald” and that he spelled it. She was unsure whether she confirmed the spelling of his last name. On cross examination she said that was the only time he told her his name. A rational juror could infer from her testimony and the name on the receipt that Koller told her his first name was “Gerald” and could also infer that in doing so it was his design to conceal and disguise his identity as the owner of the money order and the funds it represented.

to conceal or disguise the nature, the location, the source, the ownership, or the control of those proceeds.

There was a conflict in the evidence as to the source of the funds represented by the money order. Jane Vossekuil testified that Koller told her he was going to use the proceeds of his drug dealing, and there was evidence of such dealings. On the other hand, Ms. Vossekuil, Koller and others testified that he had borrowed the funds. Koller seems to argue that this was insufficient support for a verdict that the money originated from drug dealing, although he also seems to concede that the jury could disbelieve his witnesses. We think the jury could properly resolve this conflict against Koller.

Koller also argues that his payment of Ms. Vossekuil's obligation was not an offense because in a "classic" money laundering case the transaction is designed to hide the tainted money by converting it into something valuable which will provide a benefit for the money launderer. Here Koller obtained only Ms. Vossekuil's gratitude or perhaps her contractual obligation to repay the money.

It is true that one court has, in overturning money laundering convictions, considered whether the transaction could be described as a typical money laundering transaction, rejecting the argument that "the money laundering statute should be interpreted to broadly encompass all transactions, however ordinary on their face, which involve the proceeds of lawful activity." United States v. Sanders, 928 F.2d 940, 946 (10th Cir. 1991) (quoted in United States v. Jackson, 935 F.2d 832, 941 (7th Cir. 1991). Sanders can readily be distinguished, and in Jackson, this court affirmed the conviction. We do not think the argument can be successful here. Even if Koller was making an outright gift to Ms. Vossekuil, a "transaction" is defined in this statute as including a gift. 18 U.S.C. § 1956(b)(3) (1988).

There are two transactions in this case, the purchase of the money order and the transfer of the money order to the probation officer in payment of Ms. Vossekuil's obligation. Because it is so clear that the purchase of the money order involved no concealment, we have considered, though not argued by Koller, whether that fact would prevent conviction for the second transaction.

In order to convict, the second transaction (where there was evidence of a design to conceal) must be a "financial transaction" as defined in 18 U.S.C. § 1956(c)(4). The part of the definition relevant here is as follows: "a transaction involving the use of a financial institution which is engaged in, or the activities of which affect, interstate or foreign commerce in any way or degree." 18 U.S.C. § 1956(c)(4)(B) (1988). The government did introduce evidence of the activity of Security Bank, the issuer of the money order, in and affecting interstate commerce. In the case before us, there is no evidence that the purchase and use of a money order, and in that sense a "use" of the bank which issued it, was any part of the design to conceal or disguise anything about the funds. Had Koller used cash, as he originally attempted, and concealed his ownership, there would have been no proof of a "financial transaction" and therefore no offense under §
1956(a)(1). Such a transaction would have been a "financial transaction" only if the transaction "in any way or degree affects interstate or foreign commerce." 18 U.S.C. § 1956(c)(4)(A). There was no evidence that it did. The statute does not, however, literally require that the use of the financial institution with the interstate commerce nexus be a part of, contribute to, or facilitate the designed to conceal, and since the purpose of the interstate commerce nexus is to provide a predicate for federal legislative jurisdiction, we think that the use of the financial institution involved in the transaction may be incidental, as it was here, and need not be shown to have been a part of, contributed to, or facilitated the design to conceal.

III. OUTRAGEOUS CONDUCT

The 500 gram transaction charged in count SIX increased the possible penalty upon conviction. Koller argues that the "government's outrageous involvement in creating the offense for punishment purposes only" violated his due process rights. Appellant's Brief at 35. Koller impliedly argues that the government created the offense in order to convict him of possession of a larger amount of cocaine and, thus, received a longer sentence.4

For governmental conduct to constitute outrageous conduct which violates the due process clause, the conduct must be shocking to the universal concept of justice. United States v. Miller, 891 F.2d 1265, 1267 (7th cir. 1989). In this case, the government supplied cocaine to Ben-Hur, the defendant's supplier, for a transaction in an amount greater than any of the defendant's previous transactions with Ben-Hur. Ben-Hur suggested the transaction to Koller at the direction of the government. Koller had been buying cocaine from Ben-Hur for years and was clearly predisposed to commit the offense. The governmental conduct involved no more than a conventional sting operation and could not be characterized as shocking to the universal concept of justice.

The determination of what conduct is shocking to the universal concept of justice is essentially a judgment about whether the government has violated the community's moral standard. Miller, 891 F.2d at 1271 (Easterbrook, JI, concurring). "There is doubt as to the validity of the outrageous governmental conduct doctrine... In any event we have never reversed a conviction on this ground." United States v. White, No. 90-3073, slip op. at 8 (7th Cir. Dec. 6, 1991) (citations omitted); See also, Hampton v. United States, 425 U.S. 484 490, 96 S. Ct. 1646, 1650, 48 L. Ed. 2d 113 (1976) (remedy of criminal defendant for acts of government agents lies solely in entrapment defense). Because the governmental conduct here clearly does not meet the standard for outrageous conduct, we need not decide whether this defense continues to have any vitality in this circuit.
IV. CONCLUSION

The convictions and sentences are AFFIRMED.

NOTES:

1 He also had a motive for concealing ownership of funds which could raise a question as to their source. Koller’s state parole agent testified that Koller reported to him bimonthly as to his activities. At each such meeting, Koller was required to sign a statement declaring that the report was a true account of his activities and that he understood that providing false information could constitute sufficient cause for revocation of his parole.

4 We note that Koller does refer to this defense as “entrapment,” but there was clear proof of predisposition.
The United States Code (U.S.C.) is a series of books used for recording federal statutes enacted by Congress. It consists of fifty separate numbered titles. Each title covers a specific subject matter.

Examples:  Title 11  Bankruptcy Statutes
           Title 26  Tax Statutes

Two versions of the U.S. Code are published in annotated form. Most law libraries carry the annotated versions.

Locating statutes can be accomplished by using any of these sources:

- Using the "citation" to the statute.
- Using the general and subject indexes.
- Using the popular name index.
Using the Citation

The reference to any primary law source, including federal statutes, is termed citation. The citation tells you where the law is located. Citations to federal statutes contain the title of the U.S. Code where the statute is found and the section number.

Example: Citation for the Civil Rights Act of 1964

42 U.S.C.A. § 2000 a-h

Finding the statute using the citation:

Locate U.S.C. book volumes for Title 42. (Note - Titles may contain more than one volume)

Look for volume containing section 2000.

Using the Subject or General Subject Index

Each specific title has a subject index in the last volume for the title. There is also a general index for all of the titles in the entire code.

<table>
<thead>
<tr>
<th>IF YOU:</th>
<th>THEN USE THE:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Know what title the statute is in</td>
<td>Subject index for the title</td>
</tr>
<tr>
<td>Do not know the title of the statute</td>
<td>General index for the entire code</td>
</tr>
</tbody>
</table>

Example: If you are looking up statutory information on the use of federal education funds and you don't know that Title 20 addresses these statutes, you would then use the general index for the entire code.
Using the Popular Name Index

Oftentimes you hear a federal statute referred to by its popular name—for example the Civil Rights Act. You can find the statute by using the Popular Name index which accompanies the United States Code. The index gives you the correct citation number which you can then use to look up the statute.

**Example:** Civil Rights Act in Popular Name Index.

State Statutes

Each state has its own set of statutes. Many of the principles that apply to researching federal statutes can be used when dealing with state statutes. However, there are some differences in how the statutes are organized. Some of the variations used by states to organize statutes include: "Chapter," "Penal Code," or "Penal Law" versus "Title." It's important to find out how your state's laws are organized prior to doing research. Many states use indexes similar to the U.S.C.

Helpful Hints When Reading Statutes

Trying to understand what a statute is actually saying is not easy because of the way it is written. Below are some guidelines used by the courts for reading and understanding statutes.

- Read the statute at least three times. Then read it again.
- Pay close attention to "and" and "or."
- Assume all words and punctuation in the statute have meaning.
- Interpret a statute so that it is consistent with all other related statutes, if possible.
- Interpret criminal statutes strictly.
DIRECTIONS:

This exercise is designed to help you identify the elements of a federal statute. The statute listed is fictitious. Reading the statute, determine the important elements of the crime that would need to be proven in a court of law.

STATUTE

_Whoever, knowingly and with intent to defraud the United States, or any agency thereof, possesses any false, altered, forged, or counterfeited writing or document for the purpose of enabling another to obtain from the United States, or from any agency, officer, or agent thereof, any sum of money, shall be fined not more than $10,000 or imprisoned not more than five years, or both._

List the elements of this statute.
Chapter 3

EVIDENCE

Student Workbook
CHAPTER SUMMARY

A successful investigation depends on the financial investigator knowing what evidence to gather and how to preserve the evidence so that it can be used in a court of law. An investigator must be aware of this early on in the investigative process.

This chapter focuses on what evidence is, the different types of evidence, and whether or not the evidence is admissible in a court of law.

CHAPTER OBJECTIVES

- Describe the grand jury process.
- Describe the investigative tools used by the grand jury.
- Define evidence.
- Distinguish among the five standards of proof.
- Describe different classifications of evidence.
- Determine the admissibility of evidence by applying selected rules of evidence.

CHAPTER WORKBOOK CONTENTS

Identifying Evidence Exercise
Admissibility of Evidence Exercise
IDENTIFYING EVIDENCE EXERCISE

SCENARIO:

It has been alleged that Allen Jones is a notorious narcotics trafficker. It has also been alleged that Jones provides support to several young female friends. As part of this support, Jones allegedly purchased a 1992 Cadillac in the name of Helen Bates.

Through previous investigative steps, you have been able to determine that the vehicle in question was purchased from CARS R US. You have also been able to determine that Ralph Smith was the salesman.

You, as the investigator, are to visit the car dealership and obtain the necessary evidence to show Jones purchased this vehicle.

DIRECTIONS:

What evidence would you obtain and how could it be used to prove Jones purchased the vehicle?

UNITED STATES of America, Plaintiff-Appellee.

v.

John A. KRAMER, Defendant-Appellant.

No. 82-2024

United States Court of Appeals.
Seventh Circuit.

Argued Feb. 11, 1983
Decided July 5, 1983.
Rehearing Denied Aug. 5, 1983.
Certiorari Denied Nov. 7, 1983.
See 104 S.Ct. 397

Defendant was convicted in the United States District Court of the Eastern District of Wisconsin.
UNITED STATES v. KRAMER
Cite as 711 F.2d 789 (1983)

James A. Walrath, Shellow, Shellow & Glynn, Milwaukee, Wis., for defendant-appellant.

Before CUMMINGS, Chief Judge, and CUDAHY and POSNER, Circuit Judges.

CUMMINGS, Chief Judge.

This appeal from a criminal conviction involves a number of issues, the most interesting of which is whether the warrantless search of people's garbage, put outside their homes for collection, violates any interest protected by the Fourth Amendment.

Defendant was indicted for two counts of drug trafficking (21 U.S.C. §§ 841(a)(1) and 846) and two counts of tax evasion (26 U.S.C. § 7201). The indictment charged that defendant had conspired with unidentified persons to distribute large quantities of marijuana and amphetamines during the years of 1977 and 1978, that on one occasion in 1977 defendant had distributed some 1,000 pounds of marijuana, and that defendant had willfully attempted to avoid paying income taxes owed for the years of 1977 and 1978. All four counts were tried together before a jury. Pursuant to Rule 29(a) of the Federal Rules of Criminal Procedure, the trial judge acquitted defendant of the tax counts at the close of the government's case, and the jury convicted defendant on both drug counts. The judge denied defendant's post-trial motions, sentenced him to 5 years in prison with a two-year special parole term, and he has appealed. For the reasons that follow, we affirm.

I. Legality of Seizure of Drug Sales Records

Among the evidence received at trial were records of marijuana sales by defendant. The records were found among garbage defendant had put by the roadside in front of his house to be collected by a private garbage removal service. The garbage was in plastic trash bags inside plastic garbage containers with plastic tops (Tr. 247-249). Without a warrant to do so, local police investigators picked up the trash bags, transported them to a police station, and searched through their contents on the station floor. Prior to trial, defendant moved to suppress these records, claiming that the garbage pickup—the police made three of them—were unlawful under the Fourth Amendment. The judge denied the motion without an evidentiary hearing to determine whether the trash bags were on defendant's property when the police removed them, reasoning that since defendant had not shown (1) that what was in the trash bags "was not really garbage" and (2) "that he had not abandoned the garbage in question" (App. 32-33), defendant's Fourth Amendment rights had not been violated.

We agree with the trial judge that the special protection the Fourth Amendment accords people in their "persons, houses, papers, and effects" does not extend to their discarded garbage. United States v. Terry, 702 F.2d 299 (2d Cir. 1983), certiorari denied. — U.S. —, 103 S.Ct. 2095, 77 L.Ed.2d 304; United States v. Shelby, 573 F.2d 971, 973 (7th Cir. 1978), certiorari denied. 439 U.S. 841, 99 S.Ct. 132, 58 L.Ed.2d 139. Of course people sometimes do not want others to see things—e.g., magazines, financial

FINANCIAL INVESTIGATIONS

3 5

Chapter 3 Evidence

963
records, correspondence, doctor bills—that they sometimes throw away. But people can easily prevent this by destroying what they want to keep secret before they discard it, or by not discarding it. Defendant could have burned or shredded his drug records before he discarded them or kept them hidden somewhere inside his house. The law requires that people travelling in public take care to keep hidden things in their possession they do not want others to see. United States v. Lee, 274 U.S. 599, 47 S.Ct. 746, 71 L.Ed. 1202 (1927), and not to say things they do not want others to overhear. Hoffa v. United States, 385 U.S. 293, 87 S.Ct. 408, 17 L.Ed.2d 374 (1966), and that people who want to keep secret numbers they dial on the telephone not make their phone calls at home. Smith v. Maryland, 442 U.S. 735, 99 S.Ct. 2577, 61 L.Ed.2d. 220 (1979). There is nothing unfair about requiring that people not discard things they want to keep secret, or destroy them before they do.

Because of an added feature of this case we do not agree with the trial judge that the inquiry ends there. Defendant alleges that the police trespassed on his land to reach the trash bags. It appears that Judge Warren made no finding where the trash bags were when the police seized them. Defendant’s pre-trial motion to suppress the drug sales records was denied without an evidentiary hearing even though defendant alleged in an affidavit in support of that motion that the trash bags were removed form his property. One of the policemen who picked up the garbage bags testified at trial that the bags were located just beyond the perimeter of defendant’s property and judging from his ruling on defendant’s motion for a new trial, Judge Warren may have credited that testimony as undisputed:

Any doubts as to the correctness of that [suppression] ruling were dispelled during the offer of proof made by defendant at trial concerning the physical layout of the area from which this garbage was seized. Therefore, the Court rejects defendant’s seizure argument.

(Government App.5.) However, the Government as much as concedes in its brief that this testimony was not undisputed by admitting that in defendant’s pretrial affidavit he claimed "that the garbage was taken from an area inside his [perimeter]fence" (Br.13.) Therefore, we must assume that the garbage was on defendant’s property when the police removed it.

[2] Though one might suppose from the language of the Fourth Amendment that it does to protect people against searches of their lands, the Supreme Court has interpreted it to protect all reasonable, legitimate expectations of privacy. United States v. Knotts, —U.S.—, 103 S.Ct. 1081, 75 L.Ed.2d 55 (1983); Rakes v. Illinois, 439 U.S. 128, 143, 99 S.Ct. 421, 430, 58 L.Ed.2d 387 (1987); Katz v. United States, 389 U.S. 347, 88 S.Ct. 507, 19 L.Ed.2d 576 (1976), and there is no reason, in theory at least, why homeowners cannot have reasonable, legitimate expectations of privacy in their adjacent lands. United States v. Swart, 679 F.2d 698 (7th Cir.1982); United States ex re. Saiken v. Vensingher, 546 F.2d 1292 (7th Cir.1976), certiorari denied, 431 U.S. 930, 97 S.Ct. 2633, 53 L.Ed.2d 245 (1977). Defendant may have had a privacy expectation in the land on which he claims the police trespassed and if he did, then, assuming the trespass invaded that privacy, and evidence recovered from the trash bags should have been suppressed—the police acted on behalf of the state when they conducted the search, and evidence a state obtains in violation of a person’s Fourth Amendment rights may not be admitted against that person in a federal criminal trial. Elkins v. United States, 364 U.S. 206, 80 S.Ct. 1437, 4L.Ed.2d 1669 (1960), overruling the often criticized "silver platter" doctrine established in Weeks
It does not follow, moreover, that because any expectation of privacy defendant may have had in his garbage was unreasonable; it was constitutionally permissible for the police to trespass on his land to seize his garbage. Defendant’s expectation regarding his garbage and his expectation regarding his land are distinct. We do not doubt, for example, that had the police broken into defendant’s house and removed the records from a waste paper basket in defendant’s bedroom, the records would not be admissible as evidence against him, even if all that was in the waste paper basket was garbage.

For present purposes, an expectation of privacy is simply an interest protected by the Fourth Amendment. The alleged trespass invaded defendant’s privacy if it infringed some interest the Fourth Amendment was intended to protect. The Fourth Amendment protects at least three possible interests that would have been at stake had the police broken into defendant's house to search for his drug records.* First is defendant’s interest in peace and quiet. The Fourth Amendment protects that interest by prohibiting searches that physically disrupt people’s households. United States v. United States District Court, 407 U.S. 297, 313, 92 S.Ct. 2125, 2134, 32 L.Ed.2d 752 (1972) ("[P]hysical entry of the home is the chief evil against which the wording of the 4th Amendment is directed ***"). Police cannot, for example, ransack someone’s house, see, e.g., Mapp v. Ohio, 367 U.S. 643, 81 S.Ct. 1684, 6 L.Ed.2d 1081 (1961), or fly a helicopter 20 feet above the roof of his house, see, e.g., People v. Sneed, 32 Cal. App.3d 535, 108 Cal.Rptr. 146 (Cal.Ct.App. 1973), to look for evidence of criminal conduct. Second is defendant’s interest in relaxation, in retiring someplace, his home, where because what he says and does is not subject to public scrutiny, he can act as he pleases. Many people enjoy stepping off stage now and then; it gives them a chance to do and say things they might well be too reserved to do and say in public. The Fourth Amendment protects that interest; it keeps people’s homes off the public stage by limiting the power of the government to eavesdrop and spy on home lives even when the spying and eavesdropping do not physically disrupt households. Alderman v. United States, 394 U.S. 165, 89 S.Ct. 961, 22 L.Ed.2d 176 (1969); Katz v. United States, 347,88 S.Ct. 507, 19 L.Ed.2d 576 (1976); Diem v. Time, Inc., 284 F.Supp 925 (C.D.Cal.1968), affirmed on state grounds, 449 F.2d 245 (9th Cir.1971). Third is defendant’s interest in public esteem. Most people know facts about themselves, i.e., habits they have, customs they observe, beliefs they hold, thoughts they think, that they prefer to keep to themselves, not because they would act any differently if the public knew them but because the public might think less well of them if it knew them. By limiting the power of the police to eavesdrop and spy in ways that are not physically intrusive, the Fourth Amendment also protects this interest.

The trespass defendant alleges to have occurred did not infringe any of these interests. Defendant claims, and as noted above we assume, that the police removed Kramer’s trash bags from just inside a knee-high chain fence that runs along a street curb some 30 feet from the front of the defendant’s house. (See Government’s Exhibit 102-1-2). To do so, it was necessary for the police to trespass a few feet upon the outer edge of yard either by reaching across the fence into the air space above the yard or by stepping across the fence onto the yard. Neither act was a threat to the peace and quiet of defendant’s home. The trespass did not interfere with defendant’s enjoyment of his front yard—the police emptied trash bags at the station, not on defendant’s lawn—but did it interfere with the weekly routine defendant followed to dispose of his garbage—the police unobtrusively picked up the trash bags on the same days defendant’s regular garbage collector would have. In fact, defendant did not even discover that the trespass had occurred until the government told him of it some 3 1/2 years later pursuant to its open file policy. Nor was this kind of trespass and seizure a threat to the secrecy of
defendant's home life. It did not enable the police to hear or see things in or near defendant's house that they would not have been able to see or hear if they had remained just beyond the fence, which was a single chain of metal suspended some 2 or 3 feet above the ground, not a solid 20-foot wall. Compare, e.g., *State v. Boynton*, 58 Hawaii 530, 574 P.2d 1330 (Haw. 1978). The fence may have persuaded passers-by not to wander onto defendant's front lawn, but it certainly did not keep them from observing activities about defendant's house.

[3] Defendant does, of course, have a possessory interest in his land, an interest in preventing others from using it, and that interest was infringed by the assumed trespass. But the Fourth Amendment does not protect possessory interests in land. *Rakas v. Illinois*, 439 U.S. 128, 143-144 n. 12, 99 S.Ct. 421, 430-431 n. 12, 58 L.Ed.2d 387 (1978); *Hester v. United States*, 265 U.S. 57, 44 S.Ct. 445, 68 L.Ed. 898 (1924). Every trespass, by definition, invades someone's right of possession, but not every government trespass violates the Fourth Amendment. *Hester*, supra. Only those that infringe a privacy interest do; preventing others from using one's land in the circumstances here is certainly not a privacy interest. Therefore the district court's denial of the motion to suppress was proper.
Chapter 4

SOURCES OF INFORMATION

Student Workbook
CHAPTER INTRODUCTION

CHAPTER SUMMARY

The financial investigator must know where to look for information that may ultimately be used as evidence against or, on the other hand, in support of a suspect. This chapter focuses on sources of information that may be of interest to the investigator.

CHAPTER OBJECTIVES

- Discuss what factors influence the selection of a suspect to target in an investigation.
- Identify appropriate sources to obtain specific information.
- Analyze financial records for leads.

CHAPTER WORKBOOK CONTENTS

Sources of Information -
Public Records

George Chapman Embezzlement

</table>
SCENARIO:

An informant has provided the following information to your agency.

George Chapman just "stole" $30,000 from a trust fund he was administering for the Widow Jones and her three babies. Chapman allegedly used the stolen money for a $12,500 down payment on a lake cottage and a "big power boat." George and his wife, Susan, live in Madison, Wisconsin.

Your supervisor asks you to handle the investigation. You plan to do the following:

1. Check the suspect out to see what you can find out
2. See what public records can tell you about the suspect
3. Report back to your supervisor with the findings.

PART I - GEORGE CHAPMAN INTERVIEW

Chapman tells you that your source of information, whoever it is, is "all wrong." He admits that he just bought a Ski Master super powerboat and a lake cottage, and provides the purchase invoice for the boat (cost = $29,500) and closing statement for cottage (down payment = $12,500). Chapman then tells you the $42,000 came from the sale of his old house, and he doesn't like cops, so either arrest him or "pound sand." You leave with copies of the documents, notes of what he said, and a suspicion that he may not be telling the truth.

What information needs to be verified from the interview?
PART II - SEARCH OF PUBLIC RECORDS

You are now ready to search the records at the County Register of Deeds to see if Chapman told the truth.

You explain what you want to do to one of the clerks at the county Register of Deeds office. Being a helpful soul, the clerk shows you how to search the records and tells you that on January 1, 1980, the Real Estate Transfer Fee rate increased from $1.00 per thousand to $3.00 per thousand.

Attached are the copies of the documents that you located during your search. Using the documents provided, complete the chart on the following page.

PART III - EVALUATE FINDINGS

STEP 1. Determine Proceeds from Sale of Old Residence

Note: You know that a 30-year mortgage, such as this, calls for mostly interest payments in the early years, and mostly principal in the later years. Your best estimate is that during the first 10 years of the 30, Chapman probably paid about one-fourth of the principal.

STEP 2. Determine Cost of New Residence

STEP 3. Determine Cash Invested in New Residence

STEP 4. Summarize Findings
WARRANTY DEED

DOCUMENT NO. 1528537

This Deed, made between Harvard Builders, Inc., a Wisconsin Corporation Grantor and George R. Chapman and Susan M. Chapman, husband and wife, as joint tenants Grantee

Witnesseth, That the said Grantor, for a valuable consideration conveys to Grantee the following described real estate in

County, State of Wisconsin.

Lot 2, West Meadow Hills, city of Madison, Dare County, Wisconsin; subject to all Restrictions, Easements and zoning ordinances of record.

Grantees acknowledge that the land to the southeast of the extension of Putnam Road south and Prairie Road east, is zoned R-3 or R-4 for future planned unit development; and, that the land south of Raymond Road, north of Pilgrim Road, and east and west of McKenna Boulevard extended to Raymond Road is zoned C-1, R-3 or R-4 for commercial use, duplexes or apartments, and that Grantees or their successors will not object to such use.

FINANCIAL INVESTIGATIONS 4 8 995 Chapter 4 Sources of Information
MORTGAGE

THIS MORTGAGE ("Security Instrument") is given on July 18th, 1977. The mortgagor is George R. Chapman and Susan M. Chapman, his wife and in her own right ("Borrower"). This Security Instrument is given to Department of Veterans Affairs which is organized and existing under the laws of Wisconsin and whose address is 77 North Broward Street, Madison, Wisconsin 53901 ("Lender"). Borrower owes Lender the principal sum of Forty one thousand one hundred dollars ($41,100). This debt is evidenced by Borrower's note dated the same date as this Security Instrument ("Note") which provides for monthly payments, with the full debt due and payable August 1, 2007. This Security Instrument secures to Lender: (a) the repayment of the debt evidenced by the Note, with interest, and all renewals, extensions and modifications; (b) the payment of all other sums, with interest, advanced under paragraph 7 to protect the security of this Security Instrument; and (c) the performance of Borrower's covenants and agreements under this Security Instrument and the Note. For this purpose, Borrower does hereby mortgage and convey to Lender, with power of sale, the following described property located in Dare County, Wisconsin:

Lot 2, West Meadow Hills, city of Madison, Dare County, Wisconsin

which has the address of 2300 Walter Road Madison
Wisconsin 53713 (City) (Zip Code) ("Property Address").

TOGETHER WITH all the improvements now or hereafter erected on the property, and all easements, rights, appurtenances, rents, royalties, mineral, oil and gas rights and profits, water rights and stock and all fixtures now or hereafter a part of the property. All replacements and additions shall also be covered by this Security Instrument. All of the foregoing is referred to in this Security Instrument as the "Property."

BORROWER COVENANTS that Borrower is lawfully seised of the estate hereby conveyed and has the right to mortgage, grant and convey the Property and that the Property is unencumbered, except for encumbrances of record. Borrower warrants and will defend generally the title to the Property against all claims and demands, subject to any encumbrances of record.

THIS SECURITY INSTRUMENT combines uniform covenants for national use and non-uniform covenants with limited variations by jurisdiction to constitute a uniform security instrument covering real property.

Chapter 4, Sources of Information
MORTGAGE

THIS MORTGAGE ("Security Instrument") is given on December 1, 1987. The mortgagor is George R. Chapman and Susan M. Chapman ("Borrower"). This Security Instrument is given to First Federal Savings and Loan Association, which is organized and existing under the laws of United States of America, and whose address is 202 Main Street, Madison, WI 53703 ("Lender"). Borrower owes Lender the principal sum of One Hundred Twenty Two Thousand and no/100 Dollars ($122,000.00). This debt is evidenced by Borrower's note dated the same date as this Security Instrument ("Note") which provides for monthly payments, with the full debt, if not paid earlier, due and payable according to its terms. This Security instrument secures to Lender: (a) the repayment of the debt evidenced by the Note, with interest, and all renewals, extensions and modifications; (b) the payment of all other sums, with interest, advanced under paragraph 7 to protect the security of this Security Instrument; and (c) the performance of Borrower's covenants and agreements under this Security Instrument and the Note. For this purpose, Borrower does hereby mortgage grant and convey to Lender, with power of sale, the following described property located in Dare County, Wisconsin:

* Husband and wife and each individually

Parcel A: Lot ten (10), Park Ridge Heights, in the city of Madison.
Parcel B: Lot two (2), West Meadow Hills, in the City of Madison.

which has the address of (Lot 2) 2300 Walter Road and 2000 Jack's Place, Madison, WI 53713 ("Property Address").

TOGETHER WITH all the improvements now or hereafter erected on the property, and all easements, rights, appurtenances, rents, royalties, mineral, oil and gas rights and profits, water rights and stock and all fixtures now or hereafter a part of the property. All replacements and additions shall also be covered by this Security Instrument. All of the foregoing is referred to in this Security Instrument as the "Property."

BORROWER COVENANTS that Borrower is lawfully seised of the estate hereby conveyed and has the right to mortgage, grant and convey the Property and that the Property is unencumbered, except for encumbrances of record. Borrower warrants and will defend generally the title to the Property against all claims and demands, subject to any encumbrances of record.

THIS SECURITY INSTRUMENT combines uniform covenants for national use and non-uniform covenants with limited variations by jurisdiction to constitute a uniform security instrument covering real property.

FINANCIAL INVESTIGATIONS

Chapter 4: Sources of Information
MARY AND JOHN CROOK
INVESTIGATION EXERCISE -
PART I

SCENARIO:

An informant has provided the following information to your agency.

John Crook has been selling cocaine in large quantities for several years. He is married to Mary Crook who also may be selling cocaine. John drives a new Porsche, and both he and Mary own a lot of expensive jewelry. John and Mary have a new home in Brookfield, but the informant doesn’t know the exact address. John uses his mother to purchase cars and other assets. His mother’s name is Susan Dilweg. John may also have a prior drug arrest.

Your supervisor decides to open an investigation. He asks you to conduct the financial investigation.

In the space below, list some of the things, the financial investigator might do to begin this investigation.
Chapter 5

FINANCIAL INSTITUTIONS AS SOURCES OF INFORMATION

Student Workbook
CHAPTER SUMMARY

A financial investigator must be aware of what financial records exist and must be able to interpret the information contained in the records. Banks, brokerage firms, Western Union, and casinos all provide a wealth of financial information.

This chapter focuses on information that can be obtained from these financial institutions.

CHAPTER GOALS

- Describe terms related to banking and brokerage firms.
- State what records are available from banks and brokerage houses.
- Analyze bank and brokerage firm records.
- State what information is available from Western Union and casinos.

CHAPTER WORKBOOK CONTENTS

- Summary of Bank Document Information
- Bank Document Request List
- Loan Application Form
- Safe Deposit Box Lease Form
- Bank Reconciliation Exercise

You authorize the credit union to obtain and/or furnish information concerning your credit affairs to any association, firm, corporation or personnel office. When you accept or endorse a check advanced to you under this Plan, you agree to the terms and also acknowledge receipt of: (1) information regarding billing errors or inquiries. (2) the LOANLINER Credit Agreement and Truth in Lending Disclosures. You agree to make payments of the amount and at the time shown on the voucher accompanying the check. If security and/or a change in terms is noted on the voucher your endorsement constitutes acceptance of the terms of the security agreement and/or the change in terms. If the advance will be secured by shares and/or deposits you pledge the shares and/or deposits shown on the voucher. You further understand that when applicable a Personal Identification Number (PIN) may be issued. This PIN, when validated will allow you the co-applicant and any authorized users to access your credit union’s CREDIT CARD/ATM accounts through participating Automated Teller Machine (ATM) networks, subject to the terms and disclosures of the acknowledgement of receipt and agreement to the terms of the CREDIT CARD/ATM Access Card disclosures. You promise that everything you have stated in this application is correct in the best of your knowledge and that the above information is a complete listing of all your debts and obligations. You authorize the credit union to check your employment and credit history and to obtain credit reports in connection with this application for credit and for any update, renewal or extension of the credit received. If you request the credit union will tell you the name and address of any credit bureau from which it received a credit report on you. You understand that it is a federal crime to willfully and deliberately provide incomplete or incorrect information on loan applications made to federal credit unions insured by the NCUA.

Lease of Safe Deposit Box By Two or More Persons

Box No. Rental $ Key No Date

Due annually in advance.

The lessor, in consideration of rental at the above annual rate, the receipt of one annual installment of which is hereby acknowledged by these presents leases unto the undersigned lessees its safe deposit box bearing the above number and the space necessary for its reception, situated in its Safe Deposit Vault in its banking house at

from the date hereof to renewal in subsequent terms of one year each, upon the same general terms, conditions, and agreements, as are herein contained, and in the event that a renewal lease in writing shall not be executed and delivered, then this instrument shall of itself operate as and be held to be renewal or successive renewals hereof subject to the right of cancellation as herein provided.

21. If the lessor do not wish access to be given in accordance with the provisions of paragraph 20 above and wish to require the presence of two or more lessees whenever access is given to the safe deposit box, special instructions in writing relative thereto must be given to the lessor. Unless such special instructions are given at the time of execution of this agreement, it shall be presumed that paragraph 20 has been approved and shall be applicable. Whenever special instructions are given requiring the presence of more than one lessee at the time of access and one of said lessees shall die, his personal representative shall thereafter act in his place and stead, unless the special instructions provide otherwise.

The National Bank,

Lessor

We have read the above contract, the meaning of which is clear to me. The provisions of paragraph 9 limiting the value of property in the safe deposit box are satisfactory to us and we do not desire to place a greater maximum valuation on said property.

FINANCIAL INVESTIGATIONS

Chapter 5 Financial Institutions As Sources Of Information
SITUATION:

Richard and Jeanne Wright live in a suburb of Washington, D.C. Mr. Wright is an accountant working for AFCO Manufacturing. To supplement his income, Mr. Wright works part-time as a bookkeeper for a local health and fitness club. Mrs. Wright is a homemaker who cares for their four children.

PART 1

Richard Wright's checkbook on 1/31/93 shows a balance of $1,744.47. The bank statement ending 1/25/93 for Mr. Wright's account shows a balance of $2,406.20. Using the Bank Reconciliation Worksheet, the monthly bank statement for 12/24/92 through 1/25/93 and checkbook registers provided on the following pages, prepare a bank reconciliation. Record your results on the Bank Reconciliation Worksheet.

PART 2

Mr. Wright is under investigation for embezzling funds from the health and fitness club where he works as a part-time bookkeeper.

Upon reviewing the monthly bank statement provided for 12/24/92 through 1/25/93, what might alert the financial investigator to possible financial wrongdoing?
What other bank documents might be helpful to the financial investigator in proceeding with the investigation?
### BANK RECONCILIATION WORKSHEET

**STEP 1**

Place a checkmark (✓) beside each check in the checkbook register that appears on the bank statement. Those checks NOT marked off, list below as outstanding checks.

<table>
<thead>
<tr>
<th>Check No.</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>

Chapter 5: Financial Institutions As Sources Of Information
Chapter 6

TRACING THE MOVEMENT OF MONEY THROUGH A BUSINESS

Student Workbook
CHAPTER SUMMARY

The financial investigator is often faced with reviewing the business dealings of a suspected criminal. An understanding of business organizations, a working knowledge of how basic accounting systems function and skill at using auditing techniques are important to the investigator.

This chapter focuses on information that can be obtained from business records and reports.

CHAPTER OBJECTIVES

- Describe the basic forms of business organizations.
- Explain why a knowledge of accounting is important to the financial investigator.
- Define or describe basic accounting terms.
- Journalize transactions.
- Post journal entries to a general ledger.
- Prepare a balance sheet and an income statement.

CHAPTER WORKBOOK CONTENTS

- Start-Up Business Exercise
- Widget, Inc. - Fact Sheet
- Mary and John Crook Investigation Exercise - Part II
- Basic Accounting Principles Booklet
SCENARIO:

John Reed started a new business, Reed's Photographic Studio, on March 1, 1993.

PART I

Using the information on business transactions that occurred during the first month of operation, the chart of accounts prepared for the business, and the blank general journal and account ledger cards provided:

(A) Journalize each transaction
(B) Post to the appropriate account in the business ledger.

NOTE: In order to restrict the length of the illustration and to reduce repetition, some of the transactions are stated as a summary. For example, sales of services for cash are ordinarily recorded on a daily basis, but in the illustration summary totals are given only at the middle and end of the month. Similarly, all sales of services on account during the month are summarized as a single transaction; in practice each sale would be recorded separately.

PART II

Using the account ledger information, blank statements and forms provided, prepare:

(A) A trial balance,
(B) A Balance sheet (Month ending March 31, 1993),
(C) An Income statement (As of March 31, 1993).
BUSINESS TRANSACTIONS:

Mar. 1  John Reed operated a photographic business in his home on a part-time basis. He decided to move to rented quarters as of March 1 and to devote full time to the business, which was to be known as Reed Photographic Studio. The following assets were invested in the enterprise: cash, $2,500; accounts receivable, $650; supplies, $800; and photographic equipment, $9,500. There were no liabilities transferred to the business.

Mar. 1  Paid $1,500 on a lease rental contract, the payment representing three months' rent for the studio.

Mar. 4  Purchased additional photographic equipment on account from Carson Equipment Co. for $2,500 debt owed.

Mar. 5  Received $575 from customers in payment of their accounts.

Mar. 6  Paid $80 for a newspaper advertisement.

Mar. 10  Paid $500 to Carson Equipment Co. to apply on the $2,500 debt owed.

Mar. 13  Paid receptionist $275 for two weeks' salary.

Mar. 16  Received $1,280 from sales for the first half of March.

Mar. 20  Paid $650 for supplies.

Mar. 27  Paid receptionist $275 for two weeks' salary.

Mar. 31  Paid $39 for telephone bill for the month.

Mar. 31  Paid $85 for electric bill for the month.

Mar. 31  Received $1,470 from sales for the second half of March.

Mar. 31  Sales on account totaled $975 for the month.

Mar. 31  Reed withdrew $1,000 for his personal use.

1. Money comes in from three sources, as follows:
   
   (a) Widget Sales - $2,000,000
   (b) Interest - $50,000
   (c) "Rebates" from Widget Supplier - $50,000

2. 5% of the Widget Sales are returned by Purchasers as defective units and refunds are paid on all returns.

3. The Widget Inventory is carried on the books at $100,000 all the time.

4. A total of $900,000 of Widgets were purchased during the year 199X. Shipping and storage costs were $100,000.

5. The books reflect "selling expenses" as follows:
   
   $300,000 for sales salaries/commissions
   $240,000 for travel expenses
   $180,000 for rent expense

6. The books reflect "Administrative Expenses" as follows:
   
   $100,000 for Administrative salaries
   $60,000 for office expenses
   $20,000 for telephone and postage expenses
   $10,000 for insurance expense

7. The Corporation also paid and recorded in the books an expense for income taxes of $36,000.

A) Re-arrange the above into an Income Statement. (Use the blank form provided on the next page. This form utilizes the multi-step format.)

B) What was the net profit from operations?

C) Which items seem to need investigation? (List 4)

SCENARIO:

Mary and John Crook, alleged to be mid-level narcotics traffickers, earn an estimated $300,000 per year from drug sales. The Crooks opened Crook's Seafood Restaurant three years ago using $50,000 of drug proceeds. The Crook's are alleged to be laundering their drug proceeds through their business.

Reviewing the Income Statements for Crook's Seafood Restaurant for the past three years, answer the following questions.

What items on the income statements would lead the financial investigator to believe the Crooks are laundering money through their business?

What steps might the investigator take to analyze the available information?

Section 1
INTRODUCTION TO ACCOUNTING

WHAT IS ACCOUNTING

Accounting is a system that provides information about the financial activities of a business. This information is used to make informed decisions.

Accounting is concerned with:

- Recording transactions
- Summarizing recorded data
- Interpreting the results.

WHY USE ACCOUNTING

Businesses use accounting systems. They produce goods and provide services to be bought and sold. It makes sense that the exchange of goods and services can be observed and measured. Accounting is the "language of business" because it objectively measures and records the business exchanges that occur throughout society.

For accounting purposes, a business transaction is the exchange of goods and services and begins with recording, in dollars and cents, what is received and what is paid out.

HOW IS IT USED

Business transactions are accumulated over an interval of time designated as an accounting period or a fiscal period. The period of time may be a month, a quarter of a year, a year, or any other significant time interval. Ordinarily financial measurements are made over a period of a year, with the year being divided into months or quarters.
WHAT'S INVOLVED IN ACCOUNTING

This document presents some basic accounting principles and procedures to include:

- The Accounting Elements
- The Accounting Equation
- The Accounting Cycle
- How to Record Business Transactions
- How to Summarize Business Transactions
OVERVIEW

Business transactions can be stated in terms of the resulting changes in the basic elements of accounting--Assets, Liabilities and Owner's Equity. Income and Expenses. These changes are reflected in what is known as the Fundamental Accounting Equation.

ASSETS, LIABILITIES AND OWNER'S EQUITY

Assets

Assets are things of value that are owned by a business and are classified as either current or fixed.

<table>
<thead>
<tr>
<th>Current</th>
<th>Fixed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash or any other asset that can be converted to cash within one accounting year.</td>
<td>Assets that are not intended for sale but are to be used by the business over several years. (Property, Plant and Equipment).</td>
</tr>
</tbody>
</table>
| - Cash
  - Currency in business
  - Currency in financial institutions | - Furniture/Fixture |
| - Notes Receivable
  - Money owed from debtor | - Allowance for Depreciation |
| - Accounts Receivable
  - Customer credit | - Amount fixed assets have decreased value |
| - Allowance for Bad Debt
  - Money not paid by customer credit accounts | - Delivery Equipment |
| - Merchandise Inventory | - Buildings/Land |
| - Prepaid Expenses | |
Liabilities

Liabilities are debts. Those who lend money are called creditors and the amounts of money owed to them are called liabilities.

Business liabilities are debts owed to a manufacturer for merchandise shipped on credit or funds owed to a bank which has loaned the business money.

Owner's Equity

Owner's Equity is that part of the assets which belongs to the owners after subtracting the claims of the creditors. Sometimes this is referred to as proprietorship or owner's capital.

**EXAMPLE:** Mr. Olsen has a computer system worth $6,000 that he uses in his law practice. He took a loan of $1,500 from the bank to purchase the system. That part of the system that he owns is $4,500. This is called his owner's equity.

| Computer System Value | $6,000 |
| Unpaid Loan | $1,500 |
| Owner Equity in System | $4,500 |
ACCOUNTING EQUATION

Assets can be acquired with funds supplied either by owners or by creditors. Therefore, owners and/or creditors will have certain rights or claims against those assets for which they have provided the funds to buy.

The fundamental accounting equation states that the value of the assets must always equal the value of the rights of the creditors plus the rights of the owners.

\[ \text{Assets} = \text{Liabilities} + \text{Owner's Equity} \]

**EXAMPLE:** Mr. Olsen's computer system (his asset) is worth $6,000. The bank (creditor) has a claim of $1,500 against it. Mr. Howard's interest in the computer system is $4,500.

\[
\begin{align*}
\text{Value of assets} & = \text{Creditor's interest} + \text{Owner's Equity} \\
$6,000 & = $1,500 + $4,500 
\end{align*}
\]

Here is another way of stating the fundamental accounting equation. The owner's interest or rights to an asset will equal the value of the asset less any debts owed.

\[ \text{Assets} - \text{Liabilities} = \text{Owner's Equity} \]

**EXAMPLE:** Mr. Olsen's computer system is worth $6,000 and a debt of $1,500 is owed against it. The value of the system less the debt will equal Mr. Olsen's owner's equity in it.

\[
\begin{align*}
\text{Assets} - \text{Liabilities} & = \text{Owner's Equity} \\
$6,000 - $1,500 & = $4,500 
\end{align*}
\]
EFFECT OF BUSINESS TRANSACTIONS
ON THE ACCOUNTING EQUATION

When a business transaction occurs, one or more of the accounting elements -- assets, liabilities or owner's equity -- is affected. This, in turn, affects the accounting equation.

Principle: Each transaction ultimately affects other components of the equation -- an addition or subtraction to one item involves a change to another.

Principle: At the conclusion of each transaction, both sides of the accounting equation must be equal.

EXAMPLE:

Business Transaction = Cash received resulting in asset increase

Cash increase possibly due to any of these reasons:

- Outsider purchased other asset resulting in asset decrease
- Loan made by outsider resulting in liabilities increase
- Investment by owner resulting in owner's equity increase

NOTE: This dual aspect of each transaction forms the basis underlying what is called double-entry bookkeeping. This system requires that two or more entries be made in the business records to show the dual effect of the transaction. On the other hand, a single-entry bookkeeping system requires only one entry be made to record the transaction. A checkbook register is an example of a single entry system. Most businesses use the dual system because of the necessity to show the full effect of the transaction.
EXAMPLE 1: The Green Company has cash of $10,000 and merchandise of $20,000. It owes the bank $5,000, and Mr. Green’s proprietorship interest in the business is $25,000.

At this point, the fundamental accounting equation for the Green Company would show that:

\[
\text{Assets} = \text{Liabilities} + \text{Owner’s Equity}
\]

\[
\begin{align*}
\text{Cash} &+ \text{Merchandise} = \text{Loan} + \text{Mr. Green’s Capital} \\
$10,000 &+ $20,000 = $5,000 + $25,000
\end{align*}
\]

Assume that Mr. Green borrows an additional $5,000 from the bank and gets cash. This would affect the fundamental accounting equation in two areas: 1) cash would increase by $5,000; and 2) bank loan would increase by $5,000.

At the conclusion of the transaction, both sides of the equation are again equal.

\[
\begin{align*}
\text{Assets} & = \text{Liabilities} + \text{Owner’s Equity} \\
\text{Cash} &+ \text{Merchandise} = \text{Loan} + \text{Mr. Green’s Capital} \\
$15,000 &+ $20,000 = $10,000 + $25,000
\end{align*}
\]

It is not necessary for a business transaction to increase both sides of the fundamental accounting equation as it did in the preceding example. Sometimes, one asset is exchanged for another.

EXAMPLE 2: Mr. Brown starts Brown’s Tax Service with $10,000 in cash, of which $4,000 is his own money and $6,000 was obtained from a bank loan. His fundamental accounting equation would read:

\[
\text{Assets} = \text{Liabilities} + \text{Owner’s Equity}
\]

\[
\begin{align*}
\text{Cash} & = \text{Loan} + \text{Mr. Brown’s Capital} \\
$10,000 & = $6,000 + $4,000
\end{align*}
\]

He uses $500 of his cash to buy a typewriter. The new fundamental accounting equation would read:

\[
\begin{align*}
\text{Assets} & = \text{Liabilities} + \text{Owner’s Equity} \\
\text{Cash} &+ \text{Typewriter} = \text{Loan} + \text{Mr. Brown’s Capital} \\
$9,500 &+ $500 = $6,000 + $4,000
\end{align*}
\]

The totals are the same but the composition of the assets has changed.
INCOME AND EXPENSES

Thus far, the business transactions discussed have consisted of acquiring assets either by borrowing or by owner investment. But a business is not formed merely to acquire assets. Rather it seeks to use the assets to secure more assets. In other words, it wants to MAKE MONEY. A business firm sells goods or services which involves income, expenses and net profit or loss.

Income

The proceeds from the sale of goods or services is called income or revenue. The income in a manufacturing business or a store comes mostly from sales of merchandise. The income in a service business or a profession comes mostly from fees for services performed. There are also other forms of income such as interest paid by a bank on a savings account--interest income.

Expense

Any payments that are made in connection with producing income are called expenses. Rent, electricity, salaries of employees, advertising, etc., are typical expenses.

Profit or Loss

If income received during a period of time is larger than expenses, the business will have a profit. If expenses exceed income, a loss will result.
EFFECT OF INCOME AND EXPENSES ON OWNER'S EQUITY

Every time income is received the ownership interest in the business—the owner's equity—is increased. Every expense decreases owner's equity. If, at the end of a period of time, income has exceeded expense, the profit that results belongs to the owners, and the ownership interest has been increased. In other words, the interest at the end of the period will be equal to the original owner's equity plus profit.

If the fundamental equation at the beginning is expressed as--

\[ \text{Assets} = \text{Liabilities} + \text{Owner's Equity} \]

then the equation at the end of a period of business can be expressed as--

\[ \text{Assets} = \text{Liabilities} + \text{Owner's Equity} + \text{Profit or Loss} \]

OR

\[ \text{Assets} = \text{Liabilities} + \text{Capital} + (\text{Income} - \text{Expense}) \]

EXAMPLE: Mr. Olsen, the lawyer, starts in practice with $8,000 of office equipment, a $2,000 bank loan and $6,000 of ownership (capital) in his business.

\[
\begin{align*}
\text{Assets} & = \text{Liabilities} + \text{Owner's Equity} \\
\text{Office Equipment} & = \text{Loan} + \text{Mr. Olsen's Capital} \\
$8,000 & = $2,000 + $6,000
\end{align*}
\]

During the month he collects $5,000 in fees and spends $2,000 in rent and other expenses. At the end of the month he has--

\[
\begin{align*}
\text{Assets} & = \text{Liabilities} + \text{Owner's Equity} + (\text{Income} - \text{Expenses}) \\
\text{Office Cash} + \text{Equip} = \text{Loan} + \text{Capital} + (\text{Fees} - \text{Rent}) \\
$3,000 + $8,000 = $2,000 + $6,000 + ($5,000 - $2,000)
\end{align*}
\]
The three basic elements of accounting involve:

- Assets (what business owns)
- Liabilities (what business owes)
- Owner's Equity (business assets owned by individuals).

The Accounting Equation states that:

\[
\text{The Value of the Assets} = \text{The Value of the Rights of the Creditors} + \text{The Value of the Rights of the Owners}
\]

Businesses increase assets and make a profit when income exceeds expenses and in turn the owner's equity increases.
OVERVIEW

To understand accounting, it's necessary to know the relationship among the events that occur during the process and the documents used to record the events. The process of recording and summarizing aspects of accounting is referred to as the "Accounting Cycle."

The flow of the information in the cycle can be illustrated as follows:
**PROCESS SUMMARY**

The following is a brief description of the events of the accounting cycle. Each of these topics is discussed in greater detail in later sections.

**SUMMARY**

The Accounting Cycle involves *events and documents* used to record, summarize and eventually interpret the business transactions of a company.
Section 4
RECORDING FINANCIAL TRANSACTIONS

OVERVIEW

The recording of financial transactions takes into account the first three events of the accounting cycle--documenting transactions, journalizing the transactions and posting the transactions to the business ledger.

SOURCE DOCUMENTS

A business transaction is ordinarily supported by some form of source document, which serves as evidence or proof of the transaction and gives information about what has happened. It may be received from an outsider or it may originate within the business.

SAMPLE SOURCE DOCUMENTS

Received from Outside Businesses
- Vendor Invoice
- Customer Cash
- Loan Notes

Within Business
- Property Transfer
- Employee Check
- Inventory Form

Sent to Outside Businesses
- Checks to Vendors
- Customer Bills
ACCOUNTS

Business transactions shown on the source documents are organized through a system of accounts. Like transactions are kept together and form an account. The record is often referred to as the account card. There is an account for each asset, liability, owner's equity, revenue and expense.

EXAMPLE: All cash transactions = Cash Account (Asset)

All the company account records together form what is known as the ledger. This will be discussed later.

Chart of Accounts

A chart of accounts is prepared in order to help organize the accounts and make it easy to locate each account. Each business has its own particular set. Each account is given a number; the accounts are filed in the ledger in numerical order; and the chart of accounts shows the number which has been assigned to it. A typical numbering system for the accounts is as follows:

<table>
<thead>
<tr>
<th>Assets</th>
<th>100s</th>
<th>Income/Expenses</th>
<th>400s/500s</th>
</tr>
</thead>
<tbody>
<tr>
<td>Liabilities</td>
<td>200s</td>
<td>Expenses</td>
<td>500s</td>
</tr>
<tr>
<td>Owner's Equity</td>
<td>300s</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>KAREN'S T-SHIRT SHOP CHART OF ACCOUNTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASSETS</td>
</tr>
<tr>
<td>111 Cash</td>
</tr>
<tr>
<td>112 Accounts Receivable</td>
</tr>
<tr>
<td>113 Inventories</td>
</tr>
<tr>
<td>114 Fixtures</td>
</tr>
<tr>
<td>LIABILITIES</td>
</tr>
<tr>
<td>211 Accounts Payable</td>
</tr>
<tr>
<td>212 Bank Loans Payable</td>
</tr>
<tr>
<td>OWNER'S EQUITY</td>
</tr>
<tr>
<td>311 Karen White, Capital</td>
</tr>
</tbody>
</table>
**T - Account Format**

In its simplest form, an account is illustrated using a "T format."

<table>
<thead>
<tr>
<th>Account Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>Debits</td>
</tr>
</tbody>
</table>

- Debit - refers to any amount recorded in the left-hand side of an account. When an amount is recorded in the left-hand side of the account, the account is said to be debited or charged.
- Credit - refers to any amount recorded in the right-hand side of the account.

**EXAMPLE:** The following shows that there is a debit of $100 and a credit of $50 to the cash account of Karen's T-Shirt Shop.

<table>
<thead>
<tr>
<th>Cash Account 111</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) $100</td>
</tr>
</tbody>
</table>

**Procedures for Debiting and Crediting Accounts**

When a business transaction takes place, it affects the business accounts in several ways.

- **Principle:** More than one account is affected (Double-Entry Bookkeeping).
- **Principle:** Accounts affected will be either increased or decreased depending upon the type of account and the rules that apply.
- **Principle:** Each transaction will result in equal debits and equal credits.
Each of these principles is shown by following the procedures outlined below.

**STEP 1** Decide which accounts are affected by the transaction. Determine which items have been increased or decreased or whether income has been earned or expenses incurred.

**EXAMPLE:** Karen's T-Shirt Shop buys $3,000 worth of hats on credit from Gray Hat Company. What has happened?

- Karen's inventory has increased. This is an asset account.
- At the same time, the bills that the Karen's shop owes (its accounts payable) have also been increased. Accounts payable is a liability account.

**STEP 2** Debit or credit each affected account according to the rules for debiting or crediting each type of account.

### RULES FOR RECORDING INCREASES AND DECREASES

<table>
<thead>
<tr>
<th>RULE</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>RULE 1 - Assets</strong></td>
<td>Increases on the left (debit) Decreases on the right (credit)</td>
</tr>
<tr>
<td><strong>RULE 2 - Liabilities and Owner's Equity (Capital)</strong></td>
<td>Decreases on the left (debit) Increases on the right (credit)</td>
</tr>
<tr>
<td><strong>RULE 3 Revenue</strong></td>
<td>Decreases on the left (debit) Increases on the right (credit)</td>
</tr>
<tr>
<td><strong>RULE 4 Expenses</strong></td>
<td>Increases on the left (debit) Decreases on the right (credit)</td>
</tr>
</tbody>
</table>
EXAMPLE: Karen's T-Shirt Shop transaction involving the credit purchase of hats affected the inventory account which is an asset account so Rule 1 applies. An increase (debit) of $3,000 in inventory has occurred. At the same time the accounts payable liability account has increased by $3,000 so Rule 2 applies and a credit to the account occurs.

\[
\begin{array}{l}
\text{Inventory 113} \\
\quad \quad 3,000 \\
\text{Accounts Payable 211} \\
\quad \quad 3,000
\end{array}
\]

Be sure the debit and credit from each transaction are equal.

EXAMPLE: Note in the example of the hats purchased on credit the same amount ($3,000) is debited and credited.
The Accounting Equation and Debiting/Crediting Accounts

The accounting equation is used to help show how the different accounts are affected: increases and decreases and balancing the accounts. The information is used later to prepare the balance sheet and income statement.

\[
\text{ASSETS} \quad \text{= LIABILITIES} + \text{OWNERS' EQUITY}
\]

\[
\begin{array}{c|c||c|c|c|c}
\text{Dr.} & \text{Cr.} & \text{Dr.} & \text{Cr.} & \text{Dr.} & \text{Cr.} \\
(+) & (-) & (-) & (+) & (+) & (-) \\
\end{array}
\]

\[
\begin{array}{c|c}
\text{INCOME} & \\
(-) & (+) \\
\end{array}
\]

\[
\begin{array}{c|c}
\text{EXPENSES} & \\
(+) & (-) \\
\end{array}
\]

EXAMPLE: The example on this page and the next page shows what accounts have been affected by the transaction listed, the increases and decreases in each type of account and how transactions show that the credits and debits are equal. The amounts are numbered so that they can be identified with the transactions.

(1) Karen White invested $75,000 in cash to begin business operations.
(2) A $900 prepayment was made for rent of a store for three months.
(3) Equipment was purchased on account at a cost of $30,000.
(4) Cash of $28,000 was paid to the creditors from whom equipment was purchased.
(5) Merchandise costing $50,000 was purchased on credit terms.
(6) Merchandise was sold to customers on account for $48,000.
(7) Paid wages of $800 in cash for two weeks.
(8) Received a promissory note for $8,000 from a customer.
(9) Paid cash of $200 for heat and light for one month.

GENERAL JOURNAL

Because of the need to have the transactions shown in one place, transactions are first recorded chronologically in a general journal referred to as the "Book of Original Entry."

Each transaction makes up a journal entry. Both the debit and credit entry are shown together. This helps to reduce the number of errors resulting from improper bookkeeping.

**Journalizing a Transaction**

**STEP 1** Using the original business document (i.e. sales receipt, invoice, etc.), determine which accounts are to be debited and which are to be credited. See page 24 and 25, STEPS 1 and 2, for information on debiting/crediting an account.

**STEP 2** Fill in the date of the transaction. Write the day in the date column. Do not rewrite month or year unless they have changed since the preceding entry or you are starting a new page.

**STEP 3** Write in the exact name of the ledger account to be debited in the description column and record the amount to be debited in the debit column. On the next line, indented slightly, write the name of the account to be credited and the amount to be credited in the credit column.

**STEP 4** Repeat the above steps for each transaction.

**NOTE:** Leave the Post Reference Column blank while journalizing the transaction. This column will be completed when the transactions are posted to the ledger. NOTE: Sometimes this column is referred to as the LEDGER FOLIO.
EXAMPLE: Using an excerpt from the General Journal for Karen’s T-Shirt Shop shown on the page 22, see how the following transactions were journalized.

<table>
<thead>
<tr>

<td></td>
<td>30,000</td>
<td>30,000</td>
</tr>
</tbody>
</table>

Transaction 1: On Oct 1, 1992, Karen White invested $75,000 in the business. The accounts that were affected were the cash account which was increased by the $75,000 so it was entered as a DEBIT and the owner’s equity capital account which was credited $75,000.

Transaction 2: On Oct 1, 1992, Ms. White paid the rent resulting in a decrease (credit) to the cash account and an increase (debit) to the prepaid rent asset account.

Transaction 3: Also on Oct 2, 1992, equipment was purchased on account at a cost of $30,000. This resulted in an increase (credit) in accounts payable, a liability account, as well as an increase (debit) in the equipment asset account.
SPECIALIZED JOURNALS

Often business transactions of a certain type are repeated time and time again. There are likely to be many purchases of merchandise, sales to customers, cash receipts, and cash disbursements. To record each transaction separately in a two-column journal as an increase or as a decrease to a given account is unduly burdensome. Transactions of a similar type should be classified together, summarized for a period such as a month, and posted as one aggregate transaction for the month.

Types

The most common types of special journals by a business are the:

- Sales Journal
- Purchase Journal
- Cash Receipt Journal
- Cash Disbursement Journal

Remember, these special journals are used in addition to the general journal. Those transactions which do not fit into the above categories of special journal transactions would be entered in the general journal.

Other types of journals can be used if like transactions occur frequently enough to warrant their use.

Format

The format of the journal may vary with each business. Each business must decide what special journals are to be used as well as the design of the special journal so that it fits their needs. The following are examples of some special journals and how they can be used.
Sample Sales Journal

One of the most widely used special journals is the sales journal often referred to as the Accounts Receivable Journal. This journal is used to record all sales made on credit. It does not include cash sales.

<table>
<thead>
<tr>
<th>DATE 1992</th>
<th>CUSTOMER NAME</th>
<th>ACCOUNTS RECEIVABLE (DR.)</th>
<th>SALES (CR.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oct 3</td>
<td>Customer A</td>
<td>100</td>
<td>100</td>
</tr>
<tr>
<td>4</td>
<td>Customer B</td>
<td>500</td>
<td>500</td>
</tr>
<tr>
<td>5</td>
<td>Customer A</td>
<td>250</td>
<td>250</td>
</tr>
<tr>
<td>5</td>
<td>Customer E</td>
<td>100</td>
<td>100</td>
</tr>
<tr>
<td>5</td>
<td>Customer C</td>
<td>500</td>
<td>500</td>
</tr>
<tr>
<td>30</td>
<td>XXXX</td>
<td>XXXX</td>
<td>XXXX</td>
</tr>
</tbody>
</table>

| TOTAL     |               | 10,000                    | 10,000      |

EXAMPLE:

1. Customer A made a purchase of $100 on credit. The transaction is recorded by date, name of customer and a debit to the Accounts Receivable and a credit to the Sales Account is noted.

2. The Sales Journal total Accounts Receivables ($10,000) debit and the total sales ($10,000) credit are used for posting to the account ledgers instead of each individual customer’s entry. This is usually done on a monthly basis.
Sample Purchase Journal

Merchandise which the firm buys for resale to its customers is sometimes bought on account not for cash. The bills which the firm owes arising out of these purchases are called accounts payable.

<table>
<thead>
<tr>
<th>DATE 1992</th>
<th>VENDOR NAME</th>
<th>(513) PURCHASES (DR.)</th>
<th>(211) ACCOUNTS PAYABLE (CR.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oct 1</td>
<td>X Wholesaler</td>
<td>250</td>
<td>250</td>
</tr>
<tr>
<td>2</td>
<td>Y Vendor</td>
<td>500</td>
<td>500</td>
</tr>
<tr>
<td>3</td>
<td>Z Wholesaler</td>
<td>750</td>
<td>750</td>
</tr>
<tr>
<td>4</td>
<td>Y Vendor</td>
<td>500</td>
<td>500</td>
</tr>
<tr>
<td>4</td>
<td>Z Wholesaler</td>
<td>750</td>
<td>750</td>
</tr>
<tr>
<td></td>
<td></td>
<td>2,750</td>
<td>2,750</td>
</tr>
</tbody>
</table>

EXAMPLE:

- Karen’s T-Shirt Shop purchased from X Wholesaler merchandise for resale on credit. The transaction is recorded by date, name of vendor and the amount of $250 is debited to the purchase account and the same amount is credited to the Account Payable account.

- The Purchase Journal total Accounts Payable ($2,750) credit and the total purchase account ($2,750) debit are used for posting to the account ledgers instead of posting to each individual vendor entry. This is usually done on a monthly basis.
Sample Cash Receipt Journal

In many businesses, cash is received. For example, cash is received when a cash sale is made, when a customer pays his outstanding bill, or when the firm borrows money from a bank and from other sources. The cash may be in the form of currency or in the form of a check.

<table>
<thead>
<tr>
<th>DATE 1992</th>
<th>PAYEE</th>
<th>CASH (Dr)</th>
<th>A/R (Cr)</th>
<th>SALES (Cr)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oct 6</td>
<td>Customer B</td>
<td>50</td>
<td></td>
<td>50</td>
</tr>
<tr>
<td>15</td>
<td>Customer A</td>
<td>200</td>
<td>200</td>
<td></td>
</tr>
<tr>
<td>18</td>
<td>Customer C</td>
<td>250</td>
<td>250</td>
<td></td>
</tr>
<tr>
<td>31</td>
<td>Customer E</td>
<td>100</td>
<td></td>
<td>100</td>
</tr>
<tr>
<td></td>
<td></td>
<td>20,300</td>
<td>9,300</td>
<td>11,000</td>
</tr>
</tbody>
</table>

**EXAMPLE:**

- Customer B made a cash purchase of $50. The transaction is recorded by date, name of individual or company making the transaction, the amount debited to the cash account or amount credited to accounts receivable or sales accounts.

- The Cash Receipt Journal total Cash Account debit ($20,300), Accounts Receivable ($9,300) credit and Sales Account ($11,000) credit are used for posting to the account ledgers instead of each individual payee entry. This is usually done on a monthly basis.
Sample Cash Disbursement Journal

Many business transactions involve the payment of cash by the business. In a business situation, cash payment refers to payments made with currency or by check. All cash payments made by a company may be recorded in a Cash Disbursement Journal.

<table>
<thead>
<tr>
<th>DATE</th>
<th>PAYEE</th>
<th>CASH (Cr)</th>
<th>A/P (Dr)</th>
<th>SALARY (Dr)</th>
<th>GENERAL (Dr)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Oct</td>
<td>Brown Realty</td>
<td>900</td>
<td></td>
<td></td>
<td>900</td>
</tr>
<tr>
<td>6</td>
<td>Glove Company</td>
<td>1,800</td>
<td>1,800</td>
<td></td>
<td></td>
</tr>
<tr>
<td>15</td>
<td>Salary Expense</td>
<td>2,500</td>
<td></td>
<td>2,500</td>
<td></td>
</tr>
<tr>
<td>18</td>
<td>Dressmaker Mfg.</td>
<td>3,000</td>
<td>3,000</td>
<td></td>
<td></td>
</tr>
<tr>
<td>19</td>
<td>Office Supply</td>
<td>57</td>
<td>57</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>8,257</td>
<td>4,857</td>
<td>2,500</td>
<td>900</td>
</tr>
</tbody>
</table>

**EXAMPLE:**

- The date, name of the person or vendor being paid, the amount being credited to the cash account (decrease in cash) and the amount debited to the other accounts involved are recorded. The business would have to determine which accounts are most frequently used and a column would be made to record the data. A general debit column is used to record all other accounts debited. On Oct 6th, the Glove Company was paid $1,800 which resulted in a credit to the Cash account and a debit to the Accounts Payable account.

- The Cash Disbursement Journal total Accounts Payable ($4,857) debit, total Salary Account ($2,500) debit, and the total Cash Account ($8,257) credit are used for posting to the account ledgers. The General Debit column is not totaled. Each item is treated separately and is posted to the ledger in the appropriate account. In this example the rent expense account would be debited for $900.
After the information has been recorded in the journals, the information is transferred to the ledger accounts. These consist of the individual accounts which are grouped together to form the ledger. The journal entries are entered in the ledger through a process called posting. Posting should be done often enough so that the ledger accounts are reasonably up-to-date. Some businesses post daily from journal to ledger; others once a week or even less often, depending on the nature and the needs of the business.

### Sample Ledger

<table>
<thead>
<tr>
<th>ACCOUNT</th>
<th>Cash</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCOUNT NO.</td>
<td>111</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>DATE</th>
<th>ITEM</th>
<th>POST REF</th>
<th>DEBIT</th>
<th>CREDIT</th>
<th>BALANCE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oct</td>

<td>Balance</td>
<td>75,000</td>
<td>00</td>
<td>75,000</td>
</tr>
<tr>
<td>3</td>
<td></td>
<td></td>
<td>900</td>
<td>00</td>
<td>74,100</td>
</tr>
<tr>
<td>4</td>
<td></td>
<td></td>
<td>28,000</td>
<td>00</td>
<td>46,100</td>
</tr>
<tr>
<td>5</td>
<td></td>
<td></td>
<td>800</td>
<td>00</td>
<td>45,300</td>
</tr>
<tr>
<td>15</td>
<td></td>
<td></td>
<td>200</td>
<td>00</td>
<td>45,100</td>
</tr>
</tbody>
</table>

**Date.** This is not necessarily the same date that the entry is made in the journal.

**Item.** Space to record anything unusual about the item. Often it is not used.

**Post Ref.** Used to record the page number from the journal where the entry is located. It can be used to trace item if necessary. Sometimes referred to as Ledger Folio.

**Debit/Credit Amount and Balance.** A summary of all the account's debit and credit transactions can be obtained. Balance is used in preparing statements.
Posting to the Ledger

1. Open the ledger account which is to be debited. Copy the amount of the debit from the journal to the debit column of that ledger account.

2. Copy the date from the journal.

3. Write the number of the page of the journal from which you are copying the transaction in the post reference column of the ledger account.

4. Repeat the procedure for the credited items.

5. Write the number of the ledger account beside each item in the Post Reference Column of the Journal.

EXAMPLE: The following shows an example of journalizing a transaction where a cash sale of $50 was made at Karen's T-Shirt Shop.

(Entries in the General Journal)

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

(Journal entry is posted to sales account as a credit. Journal page recorded as post reference number.

<table>
<thead>
<tr>
<th>DATE</th>
<th>ITEM</th>
<th>POST REF</th>
<th>DEBIT</th>
<th>CREDIT</th>
<th>BALANCE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oct 15</td>
<td>J-12</td>
<td>50 00</td>
<td>50 00</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

(Post Reference column of the Journal is filled in with the appropriate Ledger account numbers.)

<table>
<thead>
<tr>
<th>DATE</th>
<th>ACCOUNTS AND EXPLANATIONS</th>
<th>POST REF</th>
<th>DEBIT</th>
<th>CREDIT</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oct 15</td>
<td>Cash</td>
<td>111</td>
<td>50</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Sales</td>
<td>411</td>
<td>50</td>
<td></td>
</tr>
</tbody>
</table>
Sample Subsidiary Ledgers

Sometimes it becomes necessary for a business to have more detailed information on certain ledger accounts, such as the accounts receivable balances or the amount owed to a particular vendor. This is accomplished through the use of subsidiary ledgers.

<table>
<thead>
<tr>
<th>DATE</th>
<th>ITEM</th>
<th>POST REF</th>
<th>DEBIT</th>
<th>CREDIT</th>
<th>CREDIT BALANCE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oct 3</td>
<td>SJ-1</td>
<td></td>
<td>100</td>
<td>100</td>
<td></td>
</tr>
<tr>
<td>5</td>
<td>SJ-1</td>
<td></td>
<td>250</td>
<td>350</td>
<td></td>
</tr>
<tr>
<td>15</td>
<td>CR-4</td>
<td></td>
<td>200</td>
<td></td>
<td>150</td>
</tr>
</tbody>
</table>

EXAMPLE: In the example of the subsidiary ledger for Customer A, each time an entry is made to the Sales Journal or to the Cash Receipt Journal it is posted to customer A’s account. This is done on a daily basis. At the end of the month a total of the customer’s account can be seen.

A similar process could be used for individual vendors (using the Purchase and Cash Disbursement Journals).
SUMMARY

Accounts are used as a basis of organizing financial transaction data so that the information can be recorded. Accounts are established for all the assets, liabilities and owner's equity aspects of the business.

A system of debiting/crediting the accounts is used to show how an account is affected by a business transaction.

The increases and decreases to the accounts from debits and credits must always result in a balance between the two.

Documents used in the recording process include--

- Source Documents
- General Journal
- Specialized Journals (optional)
- Account Ledger
- Subsidiary Ledgers (optional)
Section 5
SUMMARIZING FINANCIAL DATA

OVERVIEW

Summarizing financial data takes into consideration the last several events of the accounting cycle--preparing a trial balance and preparing the financial statements.

TRIAL BALANCE

At intervals, one kind of check is made on the accuracy of the ledger accounts by preparing a trial balance. This is done after the posting of the journal entries to the ledger.

Most businesses do this once a month. However, it may be done more or less often depending upon the needs of the business.

The listing shows whether or not the debit balances are equal to the credit balances.

Procedures. Preparing the balance is a two-step process.

A balance for each account is computed by subtracting the sum of the credit entries from the sum of the debit entries. This is called footing the account. These amounts are shown at the bottom of the column. Subtract the smaller from the larger--the difference is the account credit or debit balance. If a Balance column, as shown here, is provided on the card, a running balance is kept. This should equal the footed balance.
EXAMPLE: Karen White’s Cash Account

<table>
<thead>
<tr>

$175,000 $175,000
BALANCE SHEET

One of the simplest ways of showing the assets, liabilities, and owner’s equity of an individual or a business is in a balance sheet.

A balance sheet is a listing of the assets as of a certain date and the claims against these assets, liabilities and owner’s equity, as of that date.

EXAMPLE: If it is assumed that all Mr. Olsen owned and owed on September 1, 1992, was his computer system and his bank loan, a very simple balance sheet for him might be drawn up.

<table>
<thead>
<tr>
<th>Assets</th>
<th>Liabilities and Owner’s Equity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Computer System</td>
<td>Bank Loan</td>
</tr>
<tr>
<td>$6,000</td>
<td>$1,500</td>
</tr>
<tr>
<td></td>
<td>Mr. Olsen’s owner’s equity</td>
</tr>
<tr>
<td></td>
<td>$4,500</td>
</tr>
</tbody>
</table>
**Sample Balance Sheet**

The Balance Sheet can be presented either in a report form, with items listed one under the other, or in the account form, with assets listed on the left side and liabilities and owner's equity listed on the right side. The Balance Sheet shown here is what is referred to as a report format.

### Karen's T-Shirt Shop

<td></td>
</tr>
</tbody>
</table>
Procedures for Preparing Balance Sheet.

Prepare Heading.

- Company's Name
- Title of Statement
- Date of Statement (Given date - moment in time not period of time)

*EXAMPLE*: The Balance Sheet was prepared to show the financial condition of Karen's T-Shirt Shop as of October 31, 1992.

List and Total Assets.

Assets are listed by name and amount.

**NOTE 1**: Column A on the sample sheet is used to list asset account amounts that have a relationship and require an additional computation prior to being placed in Column B. Column B shows items from all asset accounts that are used to determine total asset figure.

**NOTE 2**: A single line is ruled to show that a total follows. A double line is drawn to show the composite total for assets.
EXAMPLE:

- The total assets shown for Karen’s T-Shirt Shop is $131,990 represented by a double line.

- The allowance for doubtful accounts ($1,500) was subtracted from the Accounts Receivables total ($40,000) with the resulting total ($38,500) placed in Column B for further computation.

- A similar procedure was followed for the equipment asset account and the accumulated depreciation amount.

NOTE 3: Some Balance Sheets are prepared separating assets into the categories of fixed and current.

STEP 3: List total Liabilities and Owner’s Equity.

List liabilities account totals and owner’s equity total. The amounts are added together to come up with the liability and owner’s equity total amount.

EXAMPLE: The total liability amount is $52,700 and the total owner’s equity is $79,290 for a total of $131,990 for both accounts.

STEP 4: Compare the Asset and Liabilities/Owner’s Equity amounts.

They should be equal. If so, the Account is balanced.
INCOME STATEMENT

The income statement reports the amount of income the business earned during the period, the expenses incurred, and the net profit or loss.

Sample Income Statement

Note: The income statement discussed here is for a mercantile firm, where most of the income is received from the sale of merchandise.

<table>
<thead>
<tr>
<th>Karen's T-Shirt Shop</th>
<th>Income Statement</th>
<th>For the Year Ended October 31, 1992</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Income:</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Sales</td>
<td>$48,000</td>
<td></td>
</tr>
<tr>
<td>Less: Cost of Goods Sold</td>
<td>$40,000</td>
<td></td>
</tr>
<tr>
<td>Gross Profit on Sales</td>
<td>$ 8,000</td>
<td></td>
</tr>
<tr>
<td><strong>Expenses:</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Wages</td>
<td>$1,500</td>
<td></td>
</tr>
<tr>
<td>Uncollectible Accounts</td>
<td>1,500</td>
<td></td>
</tr>
<tr>
<td>Rent</td>
<td>300</td>
<td></td>
</tr>
<tr>
<td>Depreciation</td>
<td>250</td>
<td></td>
</tr>
<tr>
<td>Heat and Light</td>
<td>200</td>
<td>$3,750</td>
</tr>
<tr>
<td><strong>Total Expenses</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Net Income</strong></td>
<td></td>
<td>$4,250</td>
</tr>
</tbody>
</table>
Format. In preparing an income statement, a single-step format can be used to show the relationship among the three major items:

\[
\begin{align*}
\text{Total Income} \\
\quad - \quad \text{Expenses} \\
\quad \quad \quad \quad \quad \text{Net Profit or Loss}
\end{align*}
\]

Another format, the multi-step format, which is designed to show the relationship of expenses to income at various intervals. This is done in a step fashion. Each step is a deduction of one or more expenses:

\[
\begin{align*}
\text{Sales Income} \\
\quad - \quad \text{Cost of Goods Sold} \\
\quad \quad \quad \quad \quad \text{Gross Profit} \\
\quad - \quad \text{Total Operating Expenses} \\
\quad \quad \quad \quad \quad \text{Operating Earnings} \\
\quad - \quad \text{Interest Expenses} \\
\quad \quad \quad \quad \quad \text{Earnings Before Taxes} \\
\quad - \quad \text{Income Tax Expense} \\
\quad \quad \quad \quad \quad \text{NET INCOME}
\end{align*}
\]

Some businesses or professions obtain most of their income from fees for services or commissions, etc., rather than from selling merchandise (doctors, lawyers, rental agents, etc.). Businesses of this kind will not have a cost of goods sold section in their income statements since what they are selling are services, not goods. For such operations, the income statement consists of:

\[
\begin{align*}
\text{Income (Service Fees/Other Income)} \\
\quad - \quad \text{Expenses} \\
\quad \quad \quad \quad \quad \text{NET INCOME (Profit or Loss)}
\end{align*}
\]
Procedures for Preparing Income Statement

1: Prepare Heading.
   - Company's Name
   - Title of statement
   - Period of time covered by the statement

   EXAMPLE: The sample income statement for Karen's T-Shirt Shop was for a period of one year ending in October.

2: List Sales Income.

   All income company earned during the period.

   EXAMPLE: The annual sales income from Karen's T-Shirt Shop was $48,000.

3: Calculate Cost of Goods Sold.

   When a business obtains most of its income from sale of merchandise, its expenses are divided into two groups:
   - the actual cost of the merchandise sold,
   - all the other expenses involved in the business.

   To obtain the cost of the goods sold, take the amount of goods that were on hand at the beginning of the period and add all purchases made during the period.

   These two items represent the goods available for sale during the period. To find the actual amount of goods sold, subtract the inventory of goods left at the end of the period (the ending inventory). The difference is called the cost of goods sold.

   Beginning inventory
   + Purchases
   Cost of goods available for sale during the period,
   - Ending inventory
   Cost of goods sold
EXAMPLE: If the beginning inventory at Karen's T-Shirt Shop was worth $50,000 and purchases were made totaling $15,000, then the total cost of goods available for sale during the year was $65,000. At the end of the period, the inventory was worth $25,000 and the cost of goods sold was $40,000.

\[
\begin{array}{r}
$50,000 \\
+ & 15,000 \\
- & 25,000 \\
\hline
65,000 \\
\hline
40,000 \\
\end{array}
\]

STEP 4: Determine Gross Profit on Sales.

The gross profit on sales is the difference between the income from sales and the cost of the merchandise sold.

Note: No other expenses aside from the actual cost of the goods sold are subtracted in determining the gross profit on sales.

Income from sales

\[
\text{Cost of goods sold}
\]

Gross profit on sales

EXAMPLE: Sales income was $48,000; cost of goods sold was $40,000; and the gross profit on sales was $8,000.

STEP 5: List Expenses.

Expenses other than the cost of goods sold.

EXAMPLE:

<table>
<thead>
<tr>
<th>Expense</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Selling expense</td>
<td>$400</td>
</tr>
<tr>
<td>Rent expense</td>
<td>400</td>
</tr>
<tr>
<td>Miscellaneous expense</td>
<td>200</td>
</tr>
<tr>
<td>Supplies expense</td>
<td>60</td>
</tr>
<tr>
<td></td>
<td>$1,060</td>
</tr>
</tbody>
</table>
Determine Net Income.

Subtract expenses from the gross profit on sales. The resulting figure is the net profit or loss on sales for the business for the period.

\[
\begin{align*}
\text{Sales income} & - \text{Cost of goods sold} \\
& \quad \text{Gross profit on sales} \\
- \text{Expenses} & \quad \text{Net profit on sales}
\end{align*}
\]

**EXAMPLE:** In the case of Karen's T-Shirt Shop, gross profit on sales was $8,000; expenses were $3,750; and a net profit of $4,250 was earned.

**NOTE:** In cases where the cost of goods sold plus expenses are greater than sales income, the company will have a net loss, rather than a net profit.
SUMMARY

A Trial Balance is prepared as a check to see if the debits and credits are in balance.

A Balance Sheet shows the financial picture of the company as of the date prepared.

An Income Statement shows the financial status of the company.
Section 6
AN ACCOUNTING PROBLEM

OVERVIEW

Working through an accounting problem helps bring together all the accounting principles discussed. The following scenario is used to illustrate how:

- Debits and credits are used to show the effect of business transactions on an account
- Business transactions are recorded in the accounts
- Business transactions are used to prepare financial statements.

SCENARIO

The following illustrative problem is used to show the business transactions of Larry Olsen’s law practice as they occur over a period of one month.

Notes: The number preceding each transaction is used throughout the illustration to identify the transaction in the accounts.

The accounting equation is used in this example:

\[
\begin{align*}
\text{Assets} & = \text{Liabilities} + \text{Owner's Equity} \\
\text{Debit for increases} & | \text{Credit for decreases} & \text{Debit for decreases} & | \text{Credit for increases} & \text{Debit for decreases} & | \text{Credit for increases}
\end{align*}
\]
1. On July 1, Larry Olsen invested $5,000 in a new law practice.

<table>
<thead>
<tr>
<th>Cash</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) 5,000</td>
<td>(2) 900</td>
</tr>
</tbody>
</table>

Analysis of the transaction: The transaction increased the cash of the practice and at the same time it increased the equity of Olsen in the business. Increases in assets are debited and increases in owner's equity are credited. Consequently, to record the transaction, Cash should be debited and Larry Olsen, Capital should be credited for $5,000.

<table>
<thead>
<tr>
<th>Larry Olsen, Capital</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) 5,000</td>
<td></td>
</tr>
</tbody>
</table>

2. Paid the office rent ($900) for three months in advance.

<table>
<thead>
<tr>
<th>Cash</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) 5,000</td>
<td>(2) 900</td>
</tr>
</tbody>
</table>

Analysis of the transaction: The asset prepaid rent, the right to occupy the office for three months, is increased and the asset cash is decreased. Increases in assets are debited and decreases are credited. Therefore, to record the transaction, debit Prepaid Rent and credit Cash for $900.

<table>
<thead>
<tr>
<th>Prepaid Rent</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>(2) 900</td>
<td></td>
</tr>
</tbody>
</table>

3. Purchased office equipment for $3,700 cash.

<table>
<thead>
<tr>
<th>Cash</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) 5,000</td>
<td>(2) 900</td>
</tr>
<tr>
<td>(3) 3,700</td>
<td></td>
</tr>
</tbody>
</table>

Analysis of the transaction: The asset office equipment is increased, and the asset cash is decreased. Debit Office Equipment and credit Cash for $3,700.

<table>
<thead>
<tr>
<th>Office Equipment</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>(3) 3,700</td>
<td></td>
</tr>
</tbody>
</table>
4. Purchased on credit from Alpha Company office supplies ($60) and office equipment ($300).

<table>
<thead>
<tr>
<th></th>
<th>(4)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Office Supplies</td>
<td>60</td>
</tr>
<tr>
<td>Office Equipment</td>
<td>300</td>
</tr>
</tbody>
</table>

Analysis of the transaction: This transaction increased the assets office supplies and office equipment, but it also created a liability. Increases in assets are debits and increases in liabilities are credits; therefore, debit Office Supplies for $60 and Office Equipment for $300 and credit Accounts Payable to $360.

5. Completed legal work for a client and immediately collected a $500 fee.

<table>
<thead>
<tr>
<th></th>
<th>(1) 5,000</th>
<th>(2) 900</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash</td>
<td></td>
<td></td>
</tr>
<tr>
<td>(5) 500</td>
<td>(3) 3,700</td>
<td></td>
</tr>
<tr>
<td>Legal Fees Earned</td>
<td>(5) 500</td>
<td></td>
</tr>
</tbody>
</table>

Analysis of the transaction: This revenue transaction increased both assets and owner's equity are credits. Therefore, Cash is debited and in order to show the nature of the increase in owner's equity and at the same time accumulate information for the income statement, the revenue account Legal Fees Earned is credited.

6. Paid the secretary's salary ($400) for the first two weeks of July.

<table>
<thead>
<tr>
<th></th>
<th>(1) 5,000</th>
<th>(2) 900</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash</td>
<td></td>
<td></td>
</tr>
<tr>
<td>(5) 500</td>
<td>(3) 3,700</td>
<td></td>
</tr>
<tr>
<td>(6) 400</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Office Salaries Expense</td>
<td>(6) 400</td>
<td></td>
</tr>
</tbody>
</table>

Analysis of the transaction: The secretary's salary is an expense that decreased both assets and owner’s equity. Debit Office Salaries Expense to decrease owner’s equity and also to accumulate information for the income statements, and credit Cash to record the decrease in cash.
7. Signed a contract with Coast Realty to do its legal work on a fixed-fee basis for $300 per month. Received the fee ($450) for the first month and a half in advance.

<table>
<thead>
<tr>
<th>Cash</th>
<th>Unearned Legal Fees</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) 5,000</td>
<td>(7) 450</td>
</tr>
<tr>
<td>(2) 900</td>
<td></td>
</tr>
<tr>
<td>(3) 3,700</td>
<td></td>
</tr>
<tr>
<td>(5) 500</td>
<td></td>
</tr>
<tr>
<td>(6) 400</td>
<td></td>
</tr>
<tr>
<td>(7) 450</td>
<td></td>
</tr>
</tbody>
</table>

Analysis of the transaction: The $450 inflow increased cash, but the inflow is not a revenue until earned. Its acceptance before being earned created a liability, the obligation to do the legal work for the next month and a half. Consequently, debit Cash to record the increase in cash and credit Unearned Legal Fees to record the liability increase.

8. Completed legal work for a client on credit and billed the client $1,000 for the services rendered.

<table>
<thead>
<tr>
<th>Accounts Receivable</th>
<th>Legal Fees Earned</th>
</tr>
</thead>
<tbody>
<tr>
<td>(8) 1,000</td>
<td>(8) 1,000</td>
</tr>
</tbody>
</table>

Analysis of the transaction: Completion of the revenue transaction gave the law practice the right to collect $1,000 from the client and thus increased assets and owner’s equity. Consequently, debit Accounts Receivable for the increase in assets and credit Legal Fees Earned to increase owner’s equity and at the same time accumulate information for the income statement.

9. Paid the secretary’s salary ($400) for the second two weeks of the month.

<table>
<thead>
<tr>
<th>Cash</th>
<th>Office Salaries Expense</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) 1,000</td>
<td>(6) 400</td>
</tr>
<tr>
<td>(2) 900</td>
<td>(9) 400</td>
</tr>
<tr>
<td>(3) 3,700</td>
<td></td>
</tr>
<tr>
<td>(5) 500</td>
<td></td>
</tr>
<tr>
<td>(6) 400</td>
<td></td>
</tr>
<tr>
<td>(7) 450</td>
<td></td>
</tr>
</tbody>
</table>

Analysis of the transaction: An expense that decreased assets and owner’s equity. Debit Office Salaries Expense to accumulate information for the income statement and credit Cash.
10. Larry Olsen withdrew $200 from the law practice to pay personal expenses.

<table>
<thead>
<tr>
<th></th>
<th>Cash</th>
<th>Larry Olsen, Withdrawals</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1)</td>
<td>5,000</td>
<td></td>
</tr>
<tr>
<td>(2)</td>
<td>900</td>
<td></td>
</tr>
<tr>
<td>(5)</td>
<td>500</td>
<td></td>
</tr>
<tr>
<td>(3)</td>
<td>3,700</td>
<td></td>
</tr>
<tr>
<td>(7)</td>
<td>450</td>
<td></td>
</tr>
<tr>
<td>(6)</td>
<td>400</td>
<td></td>
</tr>
<tr>
<td>(9)</td>
<td>400</td>
<td></td>
</tr>
<tr>
<td>(10)</td>
<td>200</td>
<td></td>
</tr>
<tr>
<td>(10)</td>
<td>200</td>
<td></td>
</tr>
</tbody>
</table>

Analysis of the transaction: This transaction reduced in equal amounts both assets and owner's equity. Cash is credited to record the asset reduction and Larry Olsen Withdrawals account is debited for the reduction in the owner's equity.

11. The client paid the $1,000 legal fee billed in transaction 8.

<table>
<thead>
<tr>
<th></th>
<th>Cash</th>
<th>Accounts Receivable</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1)</td>
<td>5,000</td>
<td></td>
</tr>
<tr>
<td>(2)</td>
<td>900</td>
<td></td>
</tr>
<tr>
<td>(5)</td>
<td>500</td>
<td></td>
</tr>
<tr>
<td>(3)</td>
<td>3,700</td>
<td></td>
</tr>
<tr>
<td>(7)</td>
<td>450</td>
<td></td>
</tr>
<tr>
<td>(6)</td>
<td>400</td>
<td></td>
</tr>
<tr>
<td>(9)</td>
<td>400</td>
<td></td>
</tr>
<tr>
<td>(10)</td>
<td>200</td>
<td></td>
</tr>
<tr>
<td>(11)</td>
<td>1,000</td>
<td></td>
</tr>
</tbody>
</table>

Analysis of the transaction: One asset was increased, and the other decreased. Debit Cash to record the increase in cash, and credit Accounts Receivable to record the decrease in the account receivable or the decrease in the right to collect from the client.

12. Paid Alpha Company $100 of the $360 owed for the items purchased on credit in transaction 4.

<table>
<thead>
<tr>
<th></th>
<th>Cash</th>
<th>Accounts Payables</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1)</td>
<td>5,000</td>
<td></td>
</tr>
<tr>
<td>(2)</td>
<td>900</td>
<td></td>
</tr>
<tr>
<td>(5)</td>
<td>500</td>
<td></td>
</tr>
<tr>
<td>(3)</td>
<td>3,700</td>
<td></td>
</tr>
<tr>
<td>(7)</td>
<td>450</td>
<td></td>
</tr>
<tr>
<td>(6)</td>
<td>400</td>
<td></td>
</tr>
<tr>
<td>(11)</td>
<td>1,000</td>
<td></td>
</tr>
<tr>
<td>(9)</td>
<td>400</td>
<td></td>
</tr>
<tr>
<td>(10)</td>
<td>200</td>
<td></td>
</tr>
<tr>
<td>(12)</td>
<td>100</td>
<td></td>
</tr>
<tr>
<td>(12)</td>
<td>100</td>
<td>360</td>
</tr>
</tbody>
</table>

Analysis of the transaction: Payments to creditors decrease in like amounts both assets and liabilities. Decreases in liabilities are debited and decreases in assets are credited. Debit Accounts Payable and credit Cash.
13. Paid the July telephone bill, $30.

14. Paid the July electric bill, $35.

### Cash

</table>

#### Analysis of the transactions:
These expense transactions are alike in that each decreased cash; they differ in each case as to the kind of expense involved. Consequently, in recording them, cash is credited, and to accumulate information for the income statement, a different expense account, one showing the nature of the expense in each case, is debited.

SUMMARY

Each business transaction must be able to be traced through the accounting system.

Each business transaction affects other components within the system.

All business transactions that occur must result in a balance to the accounting system.
Chapter 7

TRACING FUNDS USING THE DIRECT METHOD OF PROOF

Student Workbook
CHAPTER SUMMARY

The financial investigator must know how to prove the suspect has committed a crime. There are several methods that can be used to establish proof—either directly or indirectly.

This chapter focuses on the specific item method of establishing direct proof of a criminal wrongdoing.

CHAPTER OBJECTIVES

- Explain the concept of "direct proof."
- Describe various point-of-payment schemes.
- Describe information surrounding "suspect payments" that cause an investigator to become suspicious.

CHAPTER WORKBOOK CONTENTS

- Double Trouble Case Study
- National Insurance Case Study
- Payment Schemes
- Mary and John Crook Investigation
- Exercise - Part III
DOUBLE TROUBLE CASE STUDY

PURPOSE:

This case study is used to illustrate a fictitious Payable Scheme.

- Newspaper Article
- Evidence discovered during case
- Case Synopsis
Pair charged with fraud

State Journal staff

A husband and wife were charged in Dane County Circuit Court on Wednesday with defrauding their employers — Cisco Union and Clark Technical College — of more than $22,000 over three years.

CATC physical plan director Will Chaffey, 39, and Lisa Chaffey, 35, both of 123 Berry Ave., were each charged with two counts of parties to the crime of theft by fraud stemming from thefts that occurred between 1989 and 1992.

According to a criminal complaint, the two were in positions at each school to approve bogus invoices for equipment or services and have the schools pay the money to five personal bank accounts under various aliases and companies.

Lisa Chaffey issued about $14,239 in fraudulent invoices while she worked for Cisco Union between January 1989 and January 1992, according to the complaint. A maintenance supervisor said the university did not receive any of the items charged on numerous invoices issued by her.

Police said Will Chaffey authorized about $7,795 in false billings while at CATC in the summer of 1991. An accounting supervisor with CATC said the school did not receive any of the items ordered by him.

Each faces a maximum of 20 years in prison and $20,000 in fines if convicted of the crimes. A preliminary hearing is set for Aug. 5.

FINANCIAL INVESTIGATIONS

7-6 Chapter 7: Tracing Funds Using the Direct Method of Proof
DOUBLE TROUBLE CASE
Case Synopsis

CASE INITIATION:

On April 2, 1992, the Internal Audit staff at the University of Wisconsin was provided a $543 invoice from "Fairmont Company" for cleaning supplies. The invoice had been paid. The referral to Internal Audit resulted from a spot-check by an "Accounts Payable" supervisor who discovered that the merchandise had not been received by the University.

An auditor attempted to contact the "Fairmont Company" at the telephone number on the invoice, during normal business hours. After several contacts during which no one at the "Fairmont" telephone number was able to assist the auditor with any information, the Internal Audit Staff "froze" any further payments to the "Fairmont Company."

On April 15, 1992, Internal Audit received from Accounts Payable the $543 Bank Money Order payable to the Cisco Union. The Money Order was received on 4/13/92 by the Accounts Payable section with a hand written note explaining that the "Fairmont Company" was refunding $543 due to a clerical error that led to a double billing of the University by Fairmont. The Internal Audit Staff began a systematic search for any other "Fairmont" invoices paid by the University, and referred the supposed double billing fraud to the University Police Financial Crimes Unit.

PROCESS OF INVESTIGATION BY INVESTIGATOR:

1. The case detective called the "Fairmont Company" telephone number. After a brief period of "verbal gymnastics" the detective learned that the telephone number was not "Fairmont Company" but was an answering service (Quick Network) paid to answer as "Fairmont Company" and to take and deliver messages.

2. The owner of Quick Network gave the detective the name and address of the person who paid for the "Fairmont Company" answering service.

   Jayne Fairmont
   P.O. Box 331
   Glen Park, Illinois

3. A postal office employee at the downtown Glen Park, Illinois, Post Office confirmed that P.O. Box 331 was rented on 02/14/89 by a person who identified herself as Jayne Fairmont.
4. A postal inspector obtained physical descriptions of the female who signed the Answer Network service contract and the female who rented Post Office Box 331. The descriptions were essentially identical. The postal clerk who dealt with Jayne Fairmont recalled she had been driving an older, white Oldsmobile with Wisconsin license plates when she rented the P.O. Box in February of 1989. The postal clerk checked her rental records and advised that the same female again renewed the rental of P.O. Box 331 on 2/15/91 and was driving a new red "mini-van" with Wisconsin license plates.

5. A Glen Park Police detective examined the past three years' telephone directories and City Directories for both Glen Park and Evanston, Illinois. The detective advised there were no listings for telephone service or any physical locations in those directories for either the "Fairmont Company" or "Jayne Fairmont." The detective learned there had been no utilities subscribed to by either "Fairmont Company" or "Jayne Fairmont" during the same three years.

6. The University's Internal Audit staff advised the university police detectives that the review of the file of Fairmont Co. invoices disclosed that all of those invoices had been "approved for payment - merchandise received" by Lisa Chaffey during the period from March of 1989 through January of 1992, when Mrs. Chaffey resigned.

7. The university detective faxed a copy of Mrs. Chaffey's ID card photo to the Glen Park detective. Both the owner of the "Quick Network" and the postal clerk identified the photo of Mrs. Chaffey as the person each had dealt with as "Jayne Fairmont."

8. The university detective obtained and examined the trash from the Chaffey's residence and found, among other items, "Jackson Chemicals" invoices. Those invoices were for cleaning supplies that were supposedly sold to Clark Area Technical College (CATC) by "Jackson Chemicals," P.O. Box 331, Glen Park, IL. A discrete contact with the Accounts Payable supervisor at CATC disclosed that all of the paid invoices from "Jackson Chemicals" were approved for payment by the school's Physical Plant Director, Will Chaffey.

9. Wisconsin Department of Transportation records disclosed that the Chaffeys traded-in their 1986 Oldsmobile on a $22,000 Pontiac mini-van in September of 1990. The mini-van was observed in the Chaffey's driveway by the university police detective who noted that it was red in color.
CASE CONCLUSION:

Based on the information that was learned through the financial (and other) investigative steps taken, the university detective obtained and executed, with city police, a search warrant for financial records and documents related to the "Fairmont Company" and "Jackson Chemicals" frauds perpetrated by Mr. and Mrs. Chaffey. The entire contents of two filing cabinets located at the Chaffey residence were seized during the execution of the warrant. Since one cabinet was labeled "Fairmont" and the other "Jackson," the cabinets were also seized. The University Police detective stated later that the Chaffeys were "compulsive record-keepers," who kept at least one copy of every piece of paper (also called evidence) that they created in their schemes. The detective also said that he had never worked a "paper case" before, but now is looking forward to working "lots more."
Executive charged in fraud

State Journal staff

A mail fraud charged was filed Thursday in U.S. District Court against a former National Insurance Company vice president who allegedly set up a fictitious firm that billed the insurance company for more than $430,000 in orders the company never placed.

Michael Findlay, 41, Mount Haven, who was an assistant vice president and senior corporate officer at the Sun Prairie-based company, allegedly set up a fictitious company called S.S. Consulting and used it to bill National Insurance for business forms it never ordered or received.

According to a complaint, Findlay allegedly used his position at National Insurance to approve billing statements from S.S. Consulting by filling out a cash disbursement form. That caused National’s insurance’s accounting department to mail checks in payment of the fictitious statements to a post office box in Middleton belonging to Findlay’s fictitious firm, the complaint states.

In all, Findlay collected $436,335 from National Insurance between March 2, 1987 and May 1, 1991, according to the complaint.

At National Insurance, Findlay was responsible for several areas of administration, including mail and supply, printing, furniture acquisition, fleet acquisition and maintaining the Sun Prairie building and other branches, the complaint states.

Findlay was fired on May 6. The case was investigated by the Sun Prairie Police Department and the U.S. Postal Service Inspection Unit.

Findlay is scheduled to appear in federal court Sept. 17.

</table>
SCENARIO:

Mary and John Crook, alleged drug dealers, are being investigated by your investigation unit. You have been assigned the investigation. Thus far in the investigation, the following has been noted:

- Their business, Crook's Seafood Restaurant, has been doing extremely well over the past three years.

- Review of police records did not produce anything noteworthy.

- The cars and jewelry that the Crooks received in 1991 appear to be legitimate gifts to the Crooks from John's mother.

So far in the investigation, the Crooks have been very cooperative--almost too cooperative. Something, just doesn't seem right to you. You set out to make one more attempt to see what you can find.
PART I: SURVEILLANCE

The first thing you decide to do is to "hang out" near the Crook's restaurant to see if you can get any clues to what is going on. You found out the restaurant is open nights from 5:30-10:30 Monday through Thursday and 5:30-12:00 on Friday and Saturday. The restaurant is closed during the day and on Sundays. You decide to do your surveillance work the week of March 21-27, 1993. This is what you noted:

Monday through Wednesday was very slow. Only a handful of people went to the establishment each of those nights. However, you did notice that several times people entered the restaurant only to exit it about five minutes later. You observed that none of them were carrying anything out with them.

From the observations, what information might be important to you?

PART II: INTERVIEW

The next thing you decide to do is to talk to one of Crook's employees to see if you can learn any more about the situation. You got the name of the employees from a knowledgeable source.

Sue works as a waitress for the Crooks. This is what Sue had to say:

I'm really getting tired of the job. The tips are lousy and I can't stand to just stand around and do nothing. It's really bad if you have to work Monday, Tuesday or Wednesday nights. Mr. Crook is an "okay kind of guy" to work for, but he is hardly there. When he is there, he has all these people that "pop in" to see him. On the other hand, Mary Crook is a "real bear" to work for. She practically runs the place. Maybe she is so difficult to deal with because she has a lot on her shoulders. They don't employ many people to help run the place--besides herself, there is Patsy and Tina who wait on tables and Joe, the cook. Mary fills in for Joe and does the cooking on the nights he has off. Besides doing the cooking, she sometimes has to wait on tables if one of us gets sick. I guess she spends her days ordering all the supplies and keeping up with the records. I know she does all the recordkeeping. She signs all the checks.

From the interview, what information would be important to you? What from this interview, might give you clues to look for when reviewing business and bank records?
PART III: BUSINESS RECORDS

The next thing you decide to do is to go back to the Crook’s business. Since the Crooks have been cooperative thus far, you hope to stretch your luck a little more and see if you can review some more of their records. When you asked the Crooks to review their business personnel and accounting records, you noted a slight nervous glance from Mary towards John; maybe you were on to something.

From the documents provided, see what might be important for you to pursue in your search to find a specific item of financial fraud. What other documents might you ask to see to help with this investigation?

## PART IV: BANK RECORDS

Without letting the Crooks know what you found, you went to the bank where the Crooks do their business banking. You were able to review the following bank record.

What information in the records would be important to you and how might the information be used to locate a specific item of proof in the investigation?

Chapter 8

TRACING FUNDS USING INDIRECT METHODS OF PROOF

Student Workbook
CHAPTER SUMMARY

Oftentimes the financial investigator cannot find a specific item to prove the suspect has participated in some form of financial wrongdoing. The investigator must then resort to other ways of proving financial fraud—indirect methods of proof.

CHAPTER OBJECTIVES

- Differentiate between direct proof and indirect proof.
- Describe what types of information are gathered through the completion of a financial profile.
- State when it is appropriate to use an indirect method of proof.
- State the requirements of proof for each indirect method of proof.
- Write the formula for each indirect method of proof.
- Perform net worth analysis.
- Perform expenditures analysis.
- Perform bank deposit analysis.

<tr>
<td>Equals: Funds from Unknown Sources</td>
<td></td>
</tr>
</tbody>
</table>

*Note: If additional years were being investigated, the calculations would be continued using subsequent year figures.

NOTE: These procedures employ a single-step format of working the formula versus the multi-step format presented in the textbook.
BACKGROUND:

This exercise is a completion of the exercise started in Chapter 1. In this exercise, you will be computing your current net worth and determining if you have had an increase or decrease in your net worth since the beginning of the course. You will be using the net worth analysis method.

DIRECTIONS:

STEP 1. Go to the Net Worth Exercise located in Chapter 1 of this workbook. Locate WORKSHEET A. Complete Column II of the worksheet to determine your current net worth.

STEP 2. Compute the total amount of your expenditures from LIST A.

STEP 3. Compute the total amount of your income from LIST B.

STEP 4. Calculate any increase or decrease in your net worth by following the formula listed on WORKSHEET B.
STEP 1 DETERMINE TOTAL EXPENDITURES AND KNOWN SOURCES OF FUNDS FOR EACH YEAR*

Classify transaction (asset or liability) as an expenditure or a source of funds.

<table>
<thead>
<tr>
<th>Expenditure (Application of Funds)</th>
<th>Source (Source of Funds)</th>
</tr>
</thead>
<tbody>
<tr>
<td>♦ When cash-on-hand increases</td>
<td>♦ When cash-on-hand decreases</td>
</tr>
<tr>
<td>♦ When bank accounts increase</td>
<td>♦ When bank accounts decrease</td>
</tr>
<tr>
<td>♦ When assets increase</td>
<td>♦ When assets decrease</td>
</tr>
<tr>
<td>♦ When liabilities decrease</td>
<td>♦ When liabilities increase</td>
</tr>
<tr>
<td>♦ When personal living expenses are made</td>
<td>♦ When assets are sold</td>
</tr>
<tr>
<td>♦ When cash expenditures are made</td>
<td>♦ When loans, gifts, or inheritances are received</td>
</tr>
<tr>
<td></td>
<td>♦ When salaries or business profits are earned</td>
</tr>
<tr>
<td></td>
<td>♦ When other sources of income are known</td>
</tr>
</tbody>
</table>
Record each expenditure and known sources of funds and the total amount of each in the appropriate spaces.

*Note: The form is designed to show figures for two years of investigation. If more years are involved, additional columns would be needed.

### EXPENDITURES

SCENARIO:

The investigation of Mary and John Crook continues. Even though, as the investigator assigned to the case, you came up with a specific item of proof indicating the Crooks did commit financial fraud, it's not enough. You now must resort to using an indirect method of proof to show the extent of fraud being employed by your criminals.

Even though all of the business records provided to you look "legit" and you know that regular deposits are being made into the Crooks' business account, you decide to do a bank deposit analysis to see if you can compute their funds from unknown sources for the year 1992.

DIRECTIONS:

Using the facts here and the formula and procedures provided in the textbook and this workbook, perform the Bank Deposit Analysis. You may use the single-step or the multi-step format.

FACTS

a. The Crooks have a checking account which they opened on June 1, 1991. Their balance as of December 31, 1991 was $4,000. During 1992, the Crooks made total currency deposits of $70,000 and disbursements of $65,000. Their balance as of December 31, 1992 was $9,000.

b. A search of your county real estate records shows that the Crooks purchased their present home in 1991 for $150,000 and that they obtained a $50,000 mortgage. Real estate taxes on the property amounted to $1,200 for the year 1992. Contact with the lending institution shows that the Crooks made monthly payments of $1,000 to the lending institution during the subject years.
c. City records indicate that the Crooks purchased a lot for $50,000. They made a $25,000 cash downpayment and received a loan of $25,000 for the remaining amount. Monthly payments are $350.

d. Information obtained from a local dealership shows that the Crooks purchased a recreational vehicle on June 4, 1992 for $36,000 in currency.

e. Records from a local travel agency disclosed that the Crooks took a vacation to Europe during 1993. It cost $15,000.

f. Your review of the books and records from the restaurant shows a net profit of $48,000 for 1992.

g. From an interview with the Crooks, they said their cash on hand was $1,000.

h. The Crooks received a cash gift of $10,000 from Mr. Crooks' mother for Christmas in 1992.

COMPUTATION
Chapter 9

PLANNING, CONDUCTING, AND RECORDING AN INTERVIEW

Student Workbook
CHAPTER SUMMARY

Getting the right information from someone is not always easy. One of the most important skills of an investigator is the ability to get people to open up and talk to them.

This chapter focuses on interviewing techniques the financial investigator can use.

CHAPTER OBJECTIVES

- State the purpose of a financial interview.
- List the objectives of a financial interview.
- Describe the elements that must be considered when planning an interview.
- Describe techniques used when conducting an interview.
- Identify and describe methods used to record an interview.

CHAPTER WORKBOOK CONTENTS

- Interviewing Aids
- Special Agent Interview
Interviewing requires a great deal of skill. Knowing how to prepare for the interview, what to do during the interview and how to record the results are vital in conducting a successful interview.

To help with performing an interview, the following aids have been prepared. They follow on the next pages.

- Interview Preparation Checklist
- Subject Interview Outline
- Summons Format
- Subpoena Format
- Interview Memorandum Format
- Question and Answer Statement Format
- Affidavit Format
- Form Letter Format
INTERVIEW PREPARATION CHECKLIST

WHAT IS THE SITUATION PRIOR TO THE INTERVIEW?

CHECK WHAT APPLIES (√)

☐ Crime alleged or committed but no fact(s) established

☐ Records or documents reflecting financial transactions related to suspected criminal activity have surfaced.

☐ Complainant or victim identified (individual, business or governmental entity)

☐ Rumors, innuendo, or factual information pointing to a specific suspect have emerged.

☐ Other ____________________________________________

WHO SHOULD BE INTERVIEWED?

WHAT ORDER SHOULD THEY BE INTERVIEWED?

WHAT TYPE OF WITNESS(ES) ARE THEY?

People who have documents or knowledge pertaining to financial transactions

FINANCIAL INVESTIGATIONS  9-11 Chapter 9. Planning, Conducting, & Recording an Interview
MEMORANDUM OF INTERVIEW

In re: (name and address of subject being investigated)

Present: (person being interviewed, attorneys, investigators, all persons present during interview)

Place: (location of interview)

Date: (date of interview)

Time: (time interview started and time interview concluded)

(body of report)

All pertinent information relating to the interview should be in some logical manner, either in order of topics discussed, importance, chronological, or any other appropriate order.

I (prepared/dictated) this memorandum on (date), after refreshing my memory from notes made during and immediately after the interview with (person interviewed).

Special Agent

I certify that this memorandum has recorded in it a summary of all pertinent matters discussed with (person interviewed) on (date).

Witness
QUESTION AND ANSWER STATEMENT FORMAT

Testimony of (name, address) given at (location including address) at (time) on (date) about (subject of investigation and their address).

Present at this interview are (names and titles of all persons present).

Questions were asked by (name and title of person asking the questions) and answers given by (person being interviewed).

This interview is being recorded, as agreed upon, by means of (method of recording).

1. Q. You were requested to appear at (location) to answer questions concerning (subject matter). (If appropriate, advise the person being interviewed of his or her rights to counsel, etc.)

2. Q. Please stand and raise your right hand. Do you (person being interviewed) solemnly swear that the answers you are about to give to the questions asked will be the truth, so help you God?

3. Q. (Question 1)
   A. (answer)

4. Q. (Question 2)
   A. (answer)

*Note After the questioning is concluded, the interview is brought to a close with the following questions.*

Q. Have I, or has any other investigator or officer, threatened or intimidated you in any manner?
   A. (answer)

Q. Have I, or any other investigator or officer, offered you any rewards, promises or immunity, in return for this statement?
   A. (answer)

Q. Have you given this statement freely and voluntarily?
   A. (answer)

Q. Is there anything further you care to add for the record?
   A. (answer)

After this statement has been transcribed, you will be given an opportunity to read it, correct any errors, and sign it.

*Note When transcribing the statement include the following:* 

I have carefully read the foregoing statement consisting of page 1 to (last page number), inclusive, which is a correct transcript of my answers to questions asked me on (date of statement) at (location where statement was given), relative to (subject of investigation and their address). I hereby certify that the foregoing answers are true and correct, that I have made the corrections shown, have placed my initials opposite each correction, and that I have initialed each page of the statement.

(signature of person giving statement)

Subscribed and sworn to before me at (time), on (date) at (present location).

(signature and title of investigator)

(signature and title of witnessing investigator)

I (name of person transcribing statement), do hereby certify that I took the foregoing statement of (person giving statement) from (method of recording) and personally transcribed it and have initialed each page.

SAMPLE FORM LETTER

Prosecuting Attorney's Office
Glynn County
300 South Main Street, 4th Floor
Brunswick, GA 31523
Telephone: (912) 555-5982

June 4, 1992

Ms. Michelle Tallmadge
1111 B Street
Glync, GA 31520

Dear Ms. Tallmadge,

This office is conducting an investigation concerning Rosemary Westbury for the years 1989, 1990, and 1991. Ms. Westbury is a corporate officer of Massey TB, Inc. She is also the trustee for Massey TB Trust. We have reviewed the bank records of Massey TB, Inc., and Massey TB Trust. We found several checks made payable to you. Please answer the questions below which relate to the checks we found. We have included copies of the checks for your review.

Should you have any questions, please call investigator Dennis S. Paul at the telephone number listed above.

1. Did you receive checks number 1521, 1571, 1681, 1952, 1991?

2. Did you endorse these checks?

3. Please explain why these checks were deposited into Massey TB Trust's bank account.

4. We would like to talk to you about these checks. Please call us, or provide your daytime telephone number so we can schedule an appointment.

Sincerely,

Ms. Michelle Tallmadge

FINANCIAL INVESTIGATIONS

Chapter 9: Planning, Conducting, & Recording an Interview
SPECIAL AGENT INTERVIEW
ROLE PLAY

- OBJECTIVE - Conduct an interview as part of the financial investigation.

- PARTICIPANTS - You will be assuming the role of a financial investigator assigned to conduct the financial interview. Special Agents from the field/actors/role players will be participating in the role play exercise assuming the role of the financial criminal.

- PROCEDURES - Your instructor will be providing you with instructions on how the role play will be conducted and a written scenario describing your part in the exercise.
Chapter 10

INVESTIGATIVE TECHNIQUES

Student Workbook
CHAPTER SUMMARY

The financial investigator must use all means available to ensure the investigation is a success. This chapter focuses on the "tools of the trade" used by financial investigators.

CHAPTER OBJECTIVES

- State the importance of obtaining a valid search warrant.
- Describe the terms "probable cause" and "curtilage."
- State the purpose of an affidavit.
- List and describe the types of information required in an affidavit for a search warrant for financial information.
- List the objectives of undercover operations.
- List the objectives of surveillance.
- Describe the different types of surveillance.
- Describe how informants contribute to an investigation.
- State why recovering evidence from a suspect's trash, reading the covers of a suspect's mail, and retrieving evidence from a computer are valuable investigative techniques.
- List and describe the types of analyses a document examiner can perform.
- Use link analysis to show relationships in an investigation.

CHAPTER WORKBOOK CONTENTS

Trash Exercise

Mary and John Crook Investigation
Exercise - Part V
PURPOSE: To identify leads to use in a financial investigation by searching through trash.

PROCEDURES:

STEP 1. Sift through the trash provided in the bag with your team member. Look for items to use as leads in an investigation. BE SURE TO WEAR RUBBER GLOVES. THIS IS FOR YOUR SAFETY.

STEP 2. Mark items with evidence tags provided by instructor.

STEP 3. Be prepared to discuss what you found and how it can be used in the investigation.
SCENARIO:

The financial investigation you started on Mary and John Crook, the alleged drug dealers, has turned up quite a bit of evidence. You have uncovered some direct proof that some of their business records have been altered and have proven that they have received considerable funds through unknown sources.

When doing the investigation, you did a check with the phone company and asked for the telephone toll information from the Crooks' business telephone service for a period of one month. After reviewing the Crooks' record, you requested information on several other frequently called numbers as indicated from the Crooks' record.

DIRECTIONS:

A. Perform a link analysis to see if there is more information you can use in connection with the investigation. Use the information on the following pages to prepare an association matrix.

B. How might this information help the investigator?
### Table: Phone Call Log

Chapter 11

MONEY LAUNDERING AND FORFEITURES

Student Workbook
CHAPTER SUMMARY

With the increase of financial crimes, the financial investigator will encounter techniques used by the criminals to "launder" their illegal money proceeds.

This chapter identifies methods and techniques for detecting money laundering schemes. In addition, this chapter addresses the information the financial investigator needs to know concerning asset forfeitures that result from financial crimes being committed.

CHAPTER OBJECTIVES

- Distinguish between the two types of transaction systems.
- Describe three methods of moving money from the cash transaction system to the business transaction system.
- Identify methods used to move money into and out of the United States.
- Identify characteristics of businesses used as money laundering fronts.
- Identify and interpret money laundering and forfeiture statutes.
- Distinguish between civil and criminal forfeitures.
- Describe the factors that assist an investigator in establishing probable cause for a forfeiture proceeding.
