## ABSTRACT

The College-Level Academic Skills Test (CLAST) is mandated as part of Florida's system of educational accountability. The CLAST is an achievement test that measures students' attainment of the college-level communication and mathematics skills that have been identified by the faculties of community colleges and state universities. Four subtests make up the CLAST: (1) essay, a test of writing skill; (2) English language skills, a test of word choice, sentence structure, grammar, spelling, and capitalization; (3) reading, a test of literal and critical comprehension; and (4) mathematics, a test covering arithmetic, algebra, geometry, measurement, logical reasoning, and statistics. This document contains the combined results of the three CLAST administrations for the 1992-1993 school year, as well as separate results for October 1992, February 1993, and June 1993 in four color-coded tables. Results are based on the performance of first-time examinees in public institutions and in independent institutions. They include the means and passing rates for each subtest for each institution, for both genders and each racial and ethnic category. (SLD)

## INTRODUCTION

The College-Level Academic Skills Test (CLAST) is part of Florida's system of educational accountability and is mandated by Section 229.551(3)(k), F.S., 1986. The CLAST is an achievement test which measures students' attainment of the college-level communication and mathematics skills which were identified by the faculties of community colleges and state universities through the College-Level Academic Skills Project (CLASP). The skills have been adopted by the SBE and are listed in Rule 6A-10.0316, FAC.

The CLAST consists of four subtests -- essay, English language skills, reading, and mathematics. The essay subtest affords students an opportunity to demonstrate the writing skills adopted by the SBE by writing an essay on one of the two topics presented. The English language skills subtest measures skills in the broad skill areas of word choice; sentence structure; and grammar, spelling, capitalization, and punctuation. The reading subtest measures skills in the broad skill areas of literal comprehension and critical comprehension. The mathematics subtest measures skills in the broad skill areas of arithmetic, algebra, geometry and measurement, logical reasoning, and statistics, including probability.

This document contains the combined results of the three CLAST administrations for the 1992-1993 school year (white pages), as well as separate results for October 1992 (blue pages), February 1993 (yellow pages), and June 1993 (pink pages). Results are based on the performance of first-time examinees in public institutions and in independent institutions. These results include means and passing rates for each subtest for each institution, for both genders, and each racial ethnic category.
