To gather data on the expectations, goals, perceived barriers, and academic plans of new freshmen students, the Trumbull Campus of Kent State University, in Ohio, surveyed the 358 new freshmen in fall 1993. Completed questionnaires were received from 276 (81%) of the students. An analysis of responses revealed the following: (1) the largest reported academic and career goal areas were health care and medical fields, with 58 students citing nursing; (2) 61% indicated that they intend to transfer to another institution; (3) 17.6% expected to complete their academic goals in 1 to 3 years, while 54.4% expected to take 3 to 5 years; (4) 52% were receiving some form of financial aid, while 46% identified financial difficulties as the greatest barrier to academic performance; (5) 28% of the respondents indicated that they had children of child care age and of these, 82% indicated that they would use on-campus child care; (6) 87% felt that they received sufficient information on their academic programs, requirements, and course selection options, and 84% reported that they had received the schedule that they wanted; (7) 37% indicated that they were the first in their family to go to college. Appendixes include student comments related to suggestions for improving services, issues of child care, student-identified academic and career goals, and concerns about their first semester in college. (TGI)
Institutions of higher education are, more than other educational enterprises, required to respond to changes in the needs, values, and expectations of its students. To maintain relevant, purposeful, and effective services, it is essential for institutions to closely monitor the expectations and perceived barriers students have as they enter the higher education experience. To introduce a structured mechanism for monitoring new freshmen students, a survey was designed to solicit information concerning expectations, goals, perceived barriers, and academic plans. The survey is intended to produce data for immediate use as well as provide a foundation for measuring patterns of change in plans over the progress of students' academic experiences.

THE SURVEY

A 14-item survey is designed to solicit information from first semester students regarding the following topics and issues:

- Academic and Career goals
- Transfer plans
- Time frames for completing goals
- College choice decision making
- Financial Aid status
- Perceptions of barriers
- Child Care issues
- Perceptions of Advising/registration services
- Perception of Basic Skills Assessment Process
- College experience of family members

These items are established with the intent of monitoring students' choices and career goals over time. The assumption is that students change life, major and career objectives several times during their college experience. These changes are affected by different factors, i.e., grades, course selection, life changes etc. Also, students' decision making affects such things as motivation, direction and their persistence to degree. To help us understand patterns of student decision making and those factors affecting decisions, part of the data solicited is designed to be used in a longitudinal study of those factors affecting students' choices. Other aspects of the survey were designed to monitor student perceptions of the advising/registration and Basic Skills Assessment processes. Student perceptions are indicators of potential problems in the campus processes.
through the survey is designed to answer specific questions about first semester Kent Trumbull students. These questions include:

**What are the academic and career goals of first semester freshmen students?**

**What percentage of first semester freshmen are first generation college students?**

Does being a first generation college student affect such things as: Major selection, career choices, academic performance, or perceptions of barriers?

Does receiving financial aid affect such things as major selection, career choices Academic performance, and perception of barriers?

What are first semester freshmen’s perceived barriers to academic success?

Do first semester freshmen have child care needs?

Would first semester freshmen use on-campus child care?

Beyond these stated questions, the survey data can be used to answer other questions about student choices and characteristics. Of particular interest are what factors affect student choice changes over the course of the academic experience.

**THE SURVEY POPULATION**

The target population for this survey was all first semester students enrolled for the Fall 1993 semester. **Three hundred fifty-eight** first semester freshmen students attended Kent Trumbull in the Fall 1993 semester. The University Orientation course was used as the method of distributing the survey to fall 1993 first semester freshmen. University Orientation is a one credit hour course required for all new students and is designed to provide information to assist in the transition into the college experience. The survey was distributed to each of the 341 students enrolled in the University Orientation course.

A problem exists using the enrollment in the University Orientation course because a large number of students take the University Orientation course out of sequence. Often students put off taking the orientation course sometime until the semester in which they are going to graduate. Though course instructors were directed to distribute surveys only to first semester freshmen, there is no easy method for identifying the class rank of every student.
who received and completed a survey.

Two hundred seventy-six completed freshmen surveys were returned from the 341 surveys distributed, representing a response of 81% from the surveyed University Orientation enrollment.

Survey Responses

The following are student responses to the survey question "What are your academic and career goals?"

Text Box 1. Academic and Career Goals Identified by Fall 93 Freshmen

Text box (1) shows the categories of academic and career goals identified by those Fall '93 freshmen students surveyed. By far the largest reported academic and career goal areas were health care/medical fields. This represents somewhat of a shift from the business related goals that have dominated student choices for the last five to seven years. Also, the students responses seem to indicate that there is an increased interest in education careers among first semester freshmen students.

Students who do not formulate career or academic goals are at a greater risk of not persisting in their initial enrollment. Retention strategies focus on those students who have not formulated academic and career goals. Text box (1) shows two categories that relate to student indecision labeled "undecided" and "not specific." The "undecided" category includes responses from those students who are unsure or who have not as yet formulated academic/career goals. The "not specific" category includes students whose responses identified general academic and career goals. Students whose responses are excluded in this
category make general comments such as "I want to get a degree and get a good job"; I want to get an education and make money," or even more general "I want to succeed in life." These responses, though not specific, are goals, and do provide students enough of a target outcome to motivate them through the initial stages of their educational process. The "undecided" category identifies students who are truly without formulated academic and career goals. These students are at risk of not persisting in their initial semester. The number of students not having formulated academic or career goals is 12 or 4% of the total number of students surveyed. Appendix "C" has the specific student academic and career goal comments.

Students were asked "Do you plan to transfer to another institution" in an attempt to identify the extent, pattern, and direction of first semester student transfer plans. When asked whether students planned to transfer to another institution, 167 answered that they intended to transfer to another institution representing 61% of those students surveyed. This however, is not a totally accurate figure because some students said they did not plan to transfer, but indicated they were going to the Kent Campus. Other students said they were not going to transfer and identified majors not attainable at Kent Trumbull.

*Text Box 2. Reported Institution to Which Students Plan to Transfer*

Students were asked the question "How long do you think it will take you to
complete your goals?* to better understand student goals and expectations for completing academic objectives.

Figure (1), Illustrates students’ expectations of the time it will take to complete their career goals. This data reveals some interesting results:

- 17.6% of those students surveyed expect to complete their academic goals in from one to three years.
- 54.4% of students surveyed expect to complete their academic goals in three to five years.
- 28% of students surveyed expect to spend over five years completing their academic goals. These expectations indicate the large number of students who are pursuing academic goals part/time. Students who plan to take five or more years to complete their academic goals typically fall into two categories:
  - Students with professional degree goals having extended education and/or training requirements, and;
  - Students employed in career positions who are pursuing degrees to enhance and secure their current occupation and careers or who are planning for a career change.

Students identifying their high school graduation year revealed the following pattern

158 students graduated between 1990 and 1993 representing 62% of those responding to the question.

92 students graduated before 1990 that represents 38% of those New freshmen surveyed who responded to the question asking students their high school graduation year.

33 did not respond to the inquiry to their high school graduation year representing 16% of
the total number of students completing surveys.

Students were asked "Who was the most influential person (people) in your decision to go to college?" This question was asked to provide insight into student decision making regarding their choice to pursue a university education.

Text Box 3. Student reported influences in decision making

Text Box (3) above shows students identifying the most influential persons in their decision to attend college. Though many of the responses correspond to traditional patterns of influence, there are several important deviations from what is typically found regarding student reported influences in decision making. The high number of students who identified themselves as being the primary influence in the decision to go to college suggests several things:

1. A large number of students possess a level of independence, confidence and maturity. This maturity could be a reflection the large number of non traditional age students attending college as freshmen.

2. This pattern of response could be part of a larger cultural trend which increasingly values independent, self-determination rejecting the existence of external influences

The few responses identifying high school guidance counselors as influences on student decision making can also be attributed to the maturity of the freshmen population.

Students were questioned about why they decided to attend Kent Trumbull
This was an attempt to better understand student motivations for choosing Kent Trumbull.

As in the past surveys of Kent Trumbull students, the overwhelming reason why students choose to come to Kent Trumbull is LOCATION. Two-hundred-forty-eight or 90% of those students surveyed identified the closeness of the campus to work and home as the primary reason for choosing Kent Trumbull. One hundred six students or 38% of those students said that the lower tuition of Kent Trumbull was a factor in their decision to enroll here. Students were asked "How did you hear about Kent Trumbull?" in assessing effective advertising strategies and to identify other effective means of marketing the campus. The most cited source of receiving information about Kent Trumbull was from high school recruiting activity. Eighty-two students or 30% responded that they received information about Kent Trumbull Campus from high school recruiting activities. Sixty-six students or 24% said they received information about Kent Trumbull from family and friends.

In an attempt to assess the impact of financial aid on new freshmen students were asked "Are you receiving financial aid?"

143 students said that they were receiving some form of financial aid, this represents 52% of the responding first semester students.
Students were asked "Are you coming directly from High School?" in an effort to identify enrollment behavior and the experiences of new freshmen students. 162 or (59%) students said that they were coming directly from high school.

The survey attempted to identify what students anticipate causing them the most difficulty during their first semester by asking "What do you expect to cause you the most difficulty in your first year of college?"

| Student Identified areas they believe will cause the most difficulty in the first year |
|---------------------------------|---------------------------------|
| English                        | 75                              |
| Work & School                  | 117                             |
| Math                           | 108                             |
| Family                         | 62                              |
| Reading                        | 24                              |
| Finances                       | 126                             |

Text box 6. Student perceptions of areas of difficulty during their first semester

One hundred twenty six or 46% of those students responding to the survey identified financial difficulties as the number one barrier to academic performance. Two other common areas identified by students as affording difficulty were work and school, with 117 or 42% and Math with 108 responses or 39% of the total number of students responding. Complete student comments identifying perceived barriers to academic success are found in Appendix D.

Text box 7. Other student perceived barriers to academic performance during the first year
Courses and subject areas students identified as potential barriers to their academic success:

- Anatomy/Physiology
- Biology
- Economics
- Psychology
- Accounting
- Chemistry
- Philosophy
- Sociology

Child Care Issue

Students were asked several questions regarding child care issues, "Do you have children?" and If on campus child care was available would you use it?

- Seventy-six students representing (28%) of students surveyed responded that they had children of child care age.
  - Twenty students representing (26%) of students who reported having children said they were currently having child care problems
  - Sixty students or (82%) of students those students who have children indicated that they would use on-campus child care.

To get an understanding of student perceptions of the Admissions/Registration process students were asked "Did you think the Admissions/Registration process was well organized?"

- Two hundred thirty nine students representing 87% of students surveyed indicated that they thought the Admissions/Registration process to be well organized.
  - Ninety-seven percent of the freshman students surveyed responded that they felt they were treated courteously in the Admissions/Registration process.

Data was gathered to provide an assessment of the Advising/Basic Skills Assessment process by asking students if the felt the Advising/BSAT process was organized?

- One hundred sixty two students or 59% of students surveyed said they thought the Advising/BSAT process was well organized.

This response is revealing because it shows that students have different expectations about the assessment process they are experiencing. An additional investigation into students' perceptions of the basic skills assessment process has been undertaken. Preliminary findings indicate before they enter the assessment process students do not have a clear understanding...
of the BSAT process and its implications for course selection. Students are not fully aware of how much time is necessary to complete the different components of the assessment and some are not fully aware of the Developmental Education program.

Students were asked the question "Were you given sufficient information during your advising session on academic programs, program requirements, and course selection options?" in order to provide an understanding of student satisfaction of the advising process.

Two hundred forty or (87%) of the students surveyed felt they received sufficient information on their academic programs, requirements, and course selection options in the advising process.

Two hundred thirty or (84%) of students surveyed said they got the schedule they wanted.

An important variable affecting student academic performance is the college experience of family members. Students who are the first generation in their family's to attend college are a higher risk of not persisting in their first college experience. Identifying first generation college students allows us to monitor the progress of these students and develop intervention strategies to assist those who may begin to have difficulty academically. In an effort to identify students, who are first generation college students, students were asked "Do other members of your family have college experience?"

One hundred two or 37% of the freshmen students surveyed indicated that they were the first in their family to go to college.

Finally, students were asked "What do you think of the services you have received at Kent Trumbull?" This question was asked to provide data for an assessment of new student satisfaction of the Campus services they received, and to identify areas of service needing improvement.

Excellent - 37  Good - 67  Adequate - 34

In addition to these responses, there were an additional 84 positive comments on services as well as 23 negative comments. The student responses identifying specific areas of service are shown in Appendix A.

Appendix A
Student Suggestions for Improving Services

What would you suggest to improve our services?

ADVISING:

Make appointments longer and easier to make.
Academic and financial aid advisors available on a walk-in basis.
If the advisors would tell you to confirm your teacher and class if you requested specific instructors. When I got to class a different teacher was teaching.
I felt I was rushed when I saw my advisor because he had so many appointments that day.
I didn’t ask any questions because I felt bad he had such a long day. I think more time needs to be scheduled per advisory appointment.
More counselors
More information on classes for majors.
Advisor should have explained more. I understand she had 1000’s of people to see. If you’re that busy I’d rather do it myself.
I have been told several different things about the info given on Associate’s degree program which conflict, and I don’t always know which way to turn. I have no idea, more guidance or explaining. I don’t know who to talk to.
More information on what classes are available and what each class involves
More one-on-one with upcoming students.

CLASS OFFERINGS/SIZE:

Offer the same classes everyday not just on, for example T-H.
Offer those classes on M-W also.
Having more classes offered of ones that fill up fast.
Offering more classes in the morning that are offered at night.
Some kind of class to help you enroll in college and how to go about everything.
Get more of the required classes in the schedule if there were more times available
More classes offered at more times.
More classes
Not enough choices
Less students or bigger classrooms
Make the classes on another day
More class offerings
Offering more classes from these professors.
More available classes.
I am very happy with system, orientation should be offered before the start of the semester.
I would like to see some more courses at this branch so a student doesn’t have to transfer to the main campus.
Have more time scheduled for classes that more students are taking.
My problem was getting the teacher I wanted with class I wanted - this was not a problem caused by admission/registration.
Bigger classes, more classes.
More classes offered.
Offering more diverse majors and courses.
More classes
Bigger classes

Appendix i
REGISTRATION:

Being able to register by phone.
Scheduling earlier.
Registering earlier
Make sure everyone tries to register by the same date.
Signing up earlier.
Telephone scheduling like Bowling Green.
Get more organized with your registration office.

BSAT TESTING:

The time of the basic skills assessment was too long. It needs to be shorter.
When taking the assessment test you should be told how long the test is and that you might have to stay longer before hand. Having the Basic Skills open longer.
I would only suggest a break in the middle of the Basic Skills Assessment Tests.
I don’t understand how I did well-enough to take the advanced math assessment test, but I was put into the easy Algebra class.
Have them at different times
Make the testing as a guideline not mandatory.

FINANCIAL AID:

Simpler financial aid process. Time concerned with grants could be positively utilized in my studies.
Making grants easier.
Making grants etc, easier to find.

MISCELLANEOUS:

Have the room numbers on the schedule.
Give more information to the people who are employed at the university in order for them to give better service.
To let the students be more aware of rules of the school.
Make the catalogs more understandable.
All the processes were good except for the book store! The salespeople there except for two were rude and had attitudes!
Appendix B

Student comments on child care issues

Would you utilize on-campus child care services?

Definitely! I imagine lots of women don’t attend Kent because of not having child-care.
My wife doesn’t work, and stays at home.
I have an 11 yr old son. If care were to be made available for his age group, yes.
It would be great if child care was available. It would save so much time for me.
I would like to work there.
If I had children, yes
MOST DEFINITELY! It would be a Godsend. We need this more than a pub on campus.
I think that would be great.
I think Kent should have a day care center.
Also meeting single moms and coping with family as well as our child.
This would give more time to be able to be here for after class study sessions.
It is difficult in the morning. I have to put my 6 yr old on the bus, and the 15 mo old to
daycare.
Then go to school, get baby, and be home before the bus.
I can barely make it because I have 3 children and it’s expensive.
I would offer to pay more an hour. because it would be more convenient.
Don’t think Kent should be in the babysitting business.
I wish the campus had child care.
If I have need for it. Every semester may vary.
My son is in school during the day, but I need a sitter after school. I can do research and
extra-curricular activities.
My children are older.
I have gone through two babysitters this semester.
It’s hard to find reliable people that I trust.
On campus child care would be great. There are so few sitters to find in the summer or on
days public schools are off for NEOTA etc.
I would be able to come in and use the facilities more.
I live with a 4 and 7 yr old and if I had to bring them, I would use it.
Even though I don’t have children, it would be a good idea.
It would be very convenient to be able to come in on other days to study - other than
class days when I have daycare.
But my children are older.
I don’t have any children, but I think on-campus child care is a very good idea.
I hate kids
Good idea
I believe many students would use on-campus childcare - many students are forced to bring children or skip
class and get behind.
Need to know the caregiver would be good, adequate.
At times it would be helpful
My own children are all grown and on their own.
If you can’t care for your children, don’t have them.
No one said it would be easy.
Only if the guidance was people who were trained in the field.
Someday when I have children.
Would be nice for people who had children.
Definite need for child care on campus.

Appendix iii

16
I wish that there was on-campus child care so that I could bring my child with me. For people with children it would be a great thing.

Appendix C
Student Identified Academic and Career Goals

NOT SPECIFIC

To get a degree in a field and make my life prosperous.
Four year degree
To finish school and get a better job.
To do my best in college so that I can transfer and get my major.
To have a job that goes with my major, and stay with it until I retire.
To do very well in all my classes and after graduation find a good job.
Get a college education
To become an 'A' student and maintain that to my senior year.
3.5 GPA, make $$
Have a nice steady job.
To graduate
To make money
To get a good paying job, find a job I like.
I plan on receiving a 4 yr. degree
To graduate with honors from college. I want to attain a high GPA throughout college. I want a good job with good pay.
To get at least a 3.0 average throughout college and enjoy whatever I decide to do with the rest of my life.
To finish college and get a good job.
My career goals are to graduate if 5 yrs. find a job in my field and start my life.
To get a better education so that I may make a better life for my daughter.
My academic goals include not just passing all my classes but doing well in them.
I would like to be on the Dean's List and receive scholarships.
To make it through college, get good grades, get a good job.
To finish college some day.
This semester I want to get at least a 2.0 average and be able to have BUR continue helping me.
To get a college degree (Assoc.), have a job in my field, and to succeed.
To graduate and get a good career for myself, then give daughter everything she needs.
To receive a degree and hopefully find a career I enjoy.
To be able to retain a C average or better.
To get through it with good enough assess to get into a good firm career: become financially secure.

NURSING

Registered Nurse
Get a degree in nursing.
I plan to get a degree in nursing.
To be a nurse, to go to OSU after one year here.
My career goal is to be a Registered Nurse
My goal is to be a Registered Nurse
Registered Nurse
Would like to eventually get my master's degree in nursing.
I wish to go into either Nursing or psychology.
To get an Associate's degree or Bachelor's degree in Nursing and on the Dean's List.

Appendix iv
To become a Registered Nurse
I want an Associate degree in nursing
To receive my Registered Nurse Degree
Nursing or medical field
I hope to keep a 2.5 or above and be an Registered Nurse then maybe come back and specialize in pediatrics.(Associate degree)
I plan to get my degree in nursing, then go further and receive my degree to be a nurse anesthetist. I plan to have a career in nursing after completing a 4 yr. bachelor degree.
I want to make no less than B's in my courses. I want to be an Registered Nurse.
Associate in nursing
BS IN Nursing
School of nursing
Nursing - ER, surgery, ICU Captive propagation of select reptiles amphibiains, birds, and arachnids.
Associate of Nursing.
RNBS of Nursing
Not to get straight A's just the understanding of the courses I'm taking. I hope to get Associate Degree in nursing.
Would like 3.0 average nursing degree
To become a nurse
To become a Registered Nurse
Associate Degree in Nursing
To attain a bachelor's degree in nursing.
I would like to get a bachelor's degree in Nursing
To get a degree in nursing.
Graduate from college with a degree in medical assisting/nursing.
Get a job in that field.
I want to be a nurse, and maintain a B' or better average.
To get an associate's degree in nursing. I would like to work as a delivery nurse or on a maternity floor.

To get my BSN
Nursing BSN
BSN
Become a nurse
Nursing RN BSN
Nursing and to receive A's and B's in all my classes.
BSN
To get a four year degree as an RN, and then going another 3-4 yrs. to become a nurse anesthesist. To finish the nursing program and stabilize myself in the field of nursing.
To become an RN and work at Rainbow babies and children hospital.
To get my associate RN degree to become a RN
BSN
To become a RN
To become a RN and work in Life Flight
To graduate from school of nursing along with passing my state boards. To do as much of my nursing as possible at Kent State, To be an RN
Interested in Associate degree in nursing.
To finish school with a degree in nursing

Appendix D
Student Concerns About Their First semester in College

What other concerns do you have about coming to College?

All the time needed for class and study.
Will I fail?
Of I have a babysitter for sure?
Insecurity I might fail.
Being able to succeed, and keep up with my class notes.
I will be ineligible.
I have so many questions about how to get where I want to go with my career, and no id.
where to start.
Completing college
Being able to work and take care of the house and chores.
None really, just time to study between work and school.
Getting a passing grade.
Coming back to school after being out for so many years.
I'm worried about having enough time to study, go to classes, go to work, and still have
Time to sleep.
Want to do well.
Making the proper decisions about my future.
Not giving my daughter enough attention she needs.
I have no concerns, I'm very positive about my decision.
Going to a campus far away next year.
I'm concerned about finances and help in choosing the right classes I need.
Going full-time at E. Liverpool and affording child care.
Doing well, managing school and friends.
Succeeding as a single mom and student.
Not getting accepted into the x-ray program.
Afraid of what's expected of me in science courses, but I like them so I'm hanging in there.
Graduating
Not passing a class and having that on my record.
Not having myself prepared.
How will I am going to do.
Some of the classes that I may take might not interest me and then I may fail and I'll just be
here longer.
That I won't be able to find a job when I graduate.
Having enough time for schoolwork due to my
Full-time job working midnights.
That I won't be able to finish college because of financial cutbacks.
Mainly money
Grades
Availability of programs, help from advisors.
Doing well with my classes.
Money, not being able to work and go to school and be with my family
My only real fear is failure, high school was such a breeze for me. I worry that I can't take
the real world.
We should have stickers in our car windows so we can go to main campus and park for free
for as long as we want.
Not getting good grades
If I will pass and succeed
Can I actually do the work.
Because I want to make something out of my life.
Passing exams
Meeting people in my field and meeting new friends.
Finding enough time to fit everything in.
I don't really have any other concerns about coming to college.
Being able to put my life on hold for 5 yrs.
Whether or not it will pay off.
Whether I could do the work.
Will there be a job out there in my field when I finish college.
I don't always have enough time to do everything I need to.
Being able to communicate with the faculty.
The increased work load.
how badly I want to succeed and not be a failure.
Mostly time management
If I'm going to be able to work enough hours to pay for another semester and at the same
time get homework done.
I will not do well enough and that I will let myself and family members down.
Just grades
If I will get some scholarships soon
Not knowing anyone
Radiology is very competitive and difficult to be accepted.
my grades
Time
Getting good grades and achieving my goals
All the responsibilities of the homework
That I don't flunk out.
Passing! Money!
Sticking with it.
Not being allowed in the gym to play basketball.
Scheduling times, what exactly am I coming for.
Passing classes
There is no time left to do anything.
The ability to pass with a 3.5
Will I make it through nursing?
I want to go away to KSU, but I don't know if my dad will let me. Trying to get good
grades so he'll let me possibly.
Can I keep up with studying and family.
I'm concerned if I'll have enough time between work and school to study and get the grades
I want.
I am concerned that my family will support me through this whole experience and be able to
tolerate the up's and downs.
I have a hard time making myself do the work.
Passing with honors.
If I have enough money to keep coming to college.
Motivation
Completing course work in four years.
Accomplishing my goals
The physical therapy program is very tough to get into. I'm very concerned about my
grades.

Appendix xi

24
If I'm going to get decent grades.
If I will be able to complete my course well enough to get a good GPA
I would like to get a high GPA
Is it going to help me without having connections somewhere.
Being able to do the work.
the work load
I was nervous about my classes.
Can I handle the workload and still have time for everything else.
That I will not be able to achieve my goals.
If all the classes I need will be offered at a time that I could attend (night classes)
maintaining a 3.0 GPA
Being able to set a time aside for studying - I'm a procrastinator.
Failure
My good grades
Passing
Whether I am making the correct choice for myself, also interested in computers and architecture and engineering. I'm also afraid I've forgotten too much.
Time
Getting a grant next semester and paying for the rest of my schooling.
The length of time I have to dedicate to college.
Being older than the others/ what would happen if there was a lay-off at work.
getting good grades.
Right now I'm 8 months pregnant and I'm due on our thanksgiving break.
finding a reasonable time frame.
That I take the appropriate courses.
Being able to work and come to school and doing well.
I just hope my credits transfer to another college.
To be able to focus on my studies with 2 smaller children
May not get grants or scholarships for next year. Or may not get enough to take me to the main branch.
I would like to talk to advisors on starting a support group for young girls with children.
College tuition and books are very expensive, cannot receive financial aid because we are supposedly too rich. If I was rich enough I wouldn't need to go to school to get a better job.
Making sure that I get all of my correct classes and credits for my degree.
Knowing what classes I need to complete my degree.
What my major's going to be?
making friends
keeping GPA up
Doing well, making friends
Getting good grades, basically how am I going to do it?
Will I be able to be offered the latest learnings that go with my major so I will be qualified in the latest stuff in Sports Medicine?
Leaving my child at home
Being too old to get back in the routine of studying.
Not being able to get a job, after I get out.
Final exams
Getting good grades and passing
How to pay for it all, no time to work.
Will I really graduate?
Can I make it this time?
If I can make it with the classes I hope I don't bomb out.

Appendix xii
