Project Path at Illinois' College of DuPage was established to provide pre-employment training and career counseling for disabled students. To encourage the integration of qualified individuals with disabilities into the workplace, the project compiled this resource manual for area businesses, providing tips for interacting with disabled people and names, addresses and telephone numbers of service providers. Following a brief introduction, the manual presents a glossary of terms related to disabilities, tips on changing common habits of speech that reinforce myths and stereotypes about people with disabilities, tips on communicating with deaf/hearing impaired people, suggestions for interacting with persons with visual impairments, and tips for preparing for encounters with wheelchair users. Next, a fact sheet is provided on Americans with Disabilities Act (ADA) requirements from the U.S. Department of Justice Civil Rights Division. Also, information related to appropriate interview questions for disabled job candidates and writing non-discriminatory job descriptions and advertisements is presented. The bulk of the manual consists of telephone numbers and/or addresses of resource agencies, including Illinois and national government agencies dealing with ADA, disabilities, and access; national advocacy groups; groups dealing with specific disabilities; organizations providing assistive technology training and consulting; groups providing materials, services, and publications; transportation service organizations; job training centers in Illinois; agencies offering job placement or other services to employers; and educational institutions with employment services for people with disabilities. INTRODUCTION

This manual, a compilation of varied resources, is distributed to businesses located within the greater College of DuPage District 502 area as a product of Project Path, a grant funded through the Summer of 1994 by the United States Department of Education, Office of Special Education and Rehabilitative Services. It was designed with input from representatives of numerous local companies, which resulted in a valuable exchange of ideas. We offer it to you with the hope that it will afford increased and convenient access to information pertaining to disability issues in the workplace. As our ultimate goal is to encourage integration of qualified persons with disabilities into the broadest spectrum of employment, we believe that providing you with expanded access to useful information will facilitate that process. We are pleased to offer the Project Path Employer Resource Manual as our finished product.

The materials included in the manual were gathered from numerous sources. Where applicable permission to copy was obtained. Names, addresses and telephone numbers were current at the time of printing but remain subject to change. The information contained within should not be considered to constitute legal or professional advice or endorsement. We recommend that all employment actions and decisions made by those who use this manual be made in concert with existing company policy and/or after consultation with an attorney.

Please feel free to duplicate and disseminate the Project Path Employer Resource Manual and share it with others.

For further information, contact Cooperative Education and Career Services office at College of DuPage, 22nd Street and Lambert Road, Glen Ellyn, IL 60137-6599, (708) 858-2800, ext. 2612.

Habits of speech, which reinforce myths and stereotypes about people with disabilities, can be powerful barriers. Language reflects a mental picture that develops, in part, out of our attitudes. It is important to evaluate our use of language to avoid phrases that trap people into stereotypes.

It is usually best to use the phrases "a person with a handicap" or "an individual with a disability." Both of these words can be used. Preference is based on geographical location. However, there appears to be greater acceptance of the word "disability" among advocates. They tend to associate the word handicap with "cap in hand," as in begging. There is an assertion that any physical or mental condition that limits function can be referred to as a disability and that a person is handicapped only when that condition causes problems. In other words, people are handicapped by a lack of resources available to them. People with orthopedic disabilities may be handicapped when there is no ramp into a building. People who are blind are handicapped when only ink printed instructions are offered. People who are deaf may be handicapped when there is no interpreter available in a court room.

Here is a list of some words that trap people behind stereotypes:

**Suffers** This word, used in such phrases as "he suffers from polio," would seem to indicate that someone is in constant pain. This is rarely true. Polio is associated with a lessened sensation. Even when disabling conditions involve certain levels of pain, people are usually able to control its effect by a variety of processes. Don't impose unsolicited pity on anyone.

**Invalid** This word has many meanings, all of which are negative. It means nonvalid, not qualified or unfit. This emphasis is inappropriate. Totally paralyzed individuals have a wide range of positive characteristics.

**Normal** Sometimes we call non-disabled people "normal" and imply by that usage that anyone else is abnormal. This is inappropriate. Save this word to use when you are talking about numbers or temperatures.

**Patient** When people are in the hospital or being treated by a medical professional, it may be appropriate to refer to them as "patients", however; most disabled people do not need that kind of attention any more than able-bodied people do. People who are...
living in the community and are developing self-reliance are offended when they are called "patients."

Victim We usually associate this word with the idea of a "dupe," as of a swindler or of someone sacrificed. Very few of the people you will meet have been "sacrificed." Do not use this word when talking about disabled conditions.

Crippled The picture this word creates involves a helpless and non-valid person. It carries the message of incapability. It has rightly fallen into disuse. Don't revive it; it deserves to die.

Afflicted The phrase "afflicted with a disability" implies continued pain and torment. It suggests a misfortune that is intolerable. Don't inflict this label on people.

Case Often in social service agencies we find ourselves using this word, but it sounds like something you file away. People resent being filed away.

Dumb When used as "deaf and dumb," this word is nonsensical. Deaf people may be verbal or nonverbal in their communication but they are not stupid. This out-of-date phrase should be considered only as historically interesting. The word, used alone, does not describe anyone.

Unfortunate The implication of this word involves the idea of bad luck or lack of success. You may think a person is unlucky to be disabled, but you only add to the problem by using a phrase that minimizes personal self-reliance.

Confined The phrase "confined to a wheelchair" is used so often it almost seems like one word. The implication is that the chair is an essential part of experiencing the person. In fact, many people make a choice to use this tool of mobility and efficiency. They might be able to get about by other means but would needlessly exhaust themselves. They prefer to use a chair for efficiency. Others may not have the luxury of a choice. They may have to depend upon a chair for their mobility, but it is probably one of several tools they use.
COMMUNICATIONS TIPS

Remember that hearing loss impairs—sometimes drastically—a person’s ability to receive information through sound. Therefore, deaf/hearing impaired people depend very heavily on their eyes to understand what people are saying to them. It is vital that you take some simple, sensible steps to help them see what you say as clearly as possible.

SOME DOS AND DON'TS

Do be aware that even a small hearing impairment can hamper a person’s ability to understand what you say. Don’t assume that a hearing aid corrects hearing loss.

Do get the deaf/hearing impaired person’s attention before you begin to speak, and don’t start speaking without it. It is perfectly acceptable to tap a person lightly on the shoulder or arm or to wave a hand, small piece of paper, or cloth gently in the person’s direction to attract his or her attention.

Do face the deaf/hearing impaired person and maintain eye contact throughout the conversation. Don’t talk directly to an interpreter, but always to the deaf/hearing impaired person.

Do stand close to the deaf/hearing impaired person. Don’t let any object obstruct the person’s view of you. Don’t, for example, talk while you write on a chalkboard.

Do make sure the deaf/hearing impaired person can clearly see your mouth and face. Don’t eat, smoke, chew gum, or hold your hands in front of your mouth while you talk.

Do stand in a well-lighted place. Don’t stand with your back to a light source such as a lamp or window. This throws your face into a shadow and makes it difficult to see clearly.

Do try to converse in a quiet place. Don’t assume that background noise makes no difference.

Do speak and enunciate clearly and normally, but don’t exaggerate your lip movements.

Do use your voice, but don’t shout. Many deaf/hearing impaired people can get some information through sound, but shouting distorts both the sound of words and the lip movements.

Do use facial expressions and body language to clarify your message. Don’t be embarrassed to be expressive.
Do be sensitive to whether the deaf/hearing impaired person is understanding or just being polite and nodding without following what you’re saying. Don’t assume that a bland expression implies a deaf/hearing impaired person is catching what you say.

Do write technical or difficult vocabulary on the board or paper the first time you present them. Don’t assume that a deaf/hearing impaired person will be able to catch long or unusual words orally.

Do rephrase sentences that deaf/hearing impaired people don’t understand. Don’t just repeat the same words over and over in the same sequence.

Do use pencil and paper or visual aids as necessary. Don’t be embarrassed about writing things down.

Illinois Relay Service
ITAC
P.O. Box 64509
Chicago, IL 60664
(312)419-4200 Voice
(312)419-4211 TT

10 COURTESY TIPS
FOR INTERACTING WITH PERSONS WITH VISUAL IMPAIRMENTS
Prepared by and reprinted with permission from Mary Kozy, ACSW, LCSW

Here are a few tips to increase your comfort in dealing with persons who are blind or visually impaired.

1. **Identify yourself** when addressing a person with a vision impairment. It is also a good idea to let the person know when you are leaving the room.

2. **Ask before you help.** Do not be offended if your offer is not accepted.

3. Allow **guide dogs** to concentrate on their job. Talking to them, petting them or feeding them distracts their work.

4. **Offer your arm** when walking with a person who has a visual impairment. That way, he/she is walking 1/2 step behind you and can easily follow your movements.

5. When giving directions, **be specific.** Example: "To the left, 30 feet" and "Straight ahead" are helpful, while "This way" and "Over there" are too vague.

6. **Talk directly to the person** with the visual impairment, not to the companion.

7. Persons with visual impairments normally are **not hard of hearing.** You don’t have to talk loudly to them.

8. **Hand money to the person** when giving change in a manner easy for them to distinguish the amounts. Example: "The $5.00 bill is on the top."

9. It’s fine to use words like **"look" and "see."** They are a part of everyday language.

10. **Don’t worry** about making mistakes. Relax and be yourself.

Mary Kozy, LCSW & ACSW, is a licensed clinical social worker in private practice in Wheaton, IL. Mary offers presentations on disability awareness issued for health care and professional groups. For more information contact her at (708)250-0580.
MEETING SOMEONE IN A WHEELCHAIR

From "Volunteers Who Happen to Be Disabled," President's Committee on Employment of the Handicapped

Meeting someone in a wheelchair should not be an awkward situation. However, many people are unsure of how to act, which can create some embarrassing moments. The rehabilitation staff at Scholtz Medical Center, Waterloo, Iowa, has prepared a brochure as an informational guide on wheelchair etiquette to help prepare people for encounters they may have with wheelchair users. The tips also apply to those who care for patients in wheelchairs.

1. **Ask Permission.** Always ask the wheelchair user if he or she would like assistance. It may be necessary for the person to give you some instructions.

2. **Be Respectful.** A person's wheelchair is part of his or her body space and should be treated with respect.

3. **Speak Directly.** Be careful not to exclude the wheelchair user from conversations. Speak directly to the person and if the conversation lasts more than a few minutes, sit down or kneel.

4. **Give Clear Directions.** When giving directions to a person in a wheelchair, be sure to include distance, weather conditions and physical obstacles that may hinder a wheelchair user's travel.

5. **Act Natural.** It is okay to use expressions such as "running along" when speaking to a person in a wheelchair. It is likely the wheelchair user expresses things the same way.

6. **Wheelchair Use Doesn't Mean Confinement.** When a person transfers out of the wheelchair to a chair, toilet or other object, do not move the wheelchair out of reaching distance.

7. **Children Are Okay.** Don't discourage children from asking questions. Most wheelchair users are not offended by questions children ask them about their disabilities or wheelchair.

8. **Some Wheelchair Users Can Walk.** Some users can walk with aid, such as braces, walkers or crutches and use wheelchairs some of the time to conserve energy and move about more quickly.
9. **Wheelchair Users Aren't Sick.** Don’t classify persons who use wheelchairs as sick.

10. **Relationships Are Important.** Remember that persons in wheelchairs can enjoy fulfilling relationships that may develop.

11. **Wheelchair Use Provides Freedom.** Don’t assume that a wheelchair is in itself a tragedy. It is a means of freedom that allows the user to move about independently.
Americans with Disabilities Act Requirements
Fact Sheet

From: U.S. Department of Justice
Civil Rights Division

Employers may not discriminate against an individual with a disability in hiring or promotion if the person is otherwise qualified for the job.

Employers can ask about one's ability to perform a job, but cannot inquire if someone has a disability or subject a person to tests that tend to screen out people with disabilities.

Employers will need to provide "reasonable accommodation" to individuals with disabilities. This includes steps such as job restructuring and modification of equipment.

Employers do not need to provide accommodations that impose an "undue hardship" on business operations.

Who needs to comply:
All employers with 25 or more employees must comply by July 26, 1992.

All employers with 15-24 employees must comply by July 26, 1994.
As a hiring authority, please be aware of information that can and cannot be requested when interviewing candidates who are disabled.

* An employer may not make any pre-employment inquiry about a disability or the nature and severity of a disability on application forms, in job interviews, or in background or reference checks. Nor may an employer make any medical inquiry or conduct any medical examination prior to making a conditional offer of employment.

Before making a job offer, an employer may make the following inquiries:

* Ask questions about an applicant's ability to perform specific job functions (i.e., Can you lift boxes weighing 40 pounds from the floor to waist level 10 times per hour, 8 hours a day?) If this question is asked, it must be asked of all applicants in this job category, regardless of disability.

* An employer may ask all applicants to describe or demonstrate how they will perform a job with or without an accommodation. If this question is asked, it must be asked of all applicants in this job category, regardless of disability.

* If an individual has a known disability that might interfere with his/her performance of a job function, he/she may be asked to describe or demonstrate how these functions will be performed, with or without accommodation, even if other applicants are not asked to do so; however,

* If a known disability would not interfere with the performance of job functions, an individual may only be
required to describe or demonstrate how he/she would perform a job if this is required of all applicants for this position.

Questions that may not be asked on application forms or in job interviews include the following:

* Have you ever been treated for any mental condition?
* Have you had a major illness in the last 5 years?
* Do you have any physical disabilities which preclude you from performing certain kinds of work? If yes, describe such disabilities and specific work limitations.
* Are you taking any prescribed drugs?
* Do you have any disabilities or impairments which may affect your performance in the position for which you are applying? (The applicant may be asked about ability to perform specific job functions, with or without reasonable accommodation.)
Writing a job description and advertisement that attract a diverse and qualified pool of applicants while conforming with applicable non-discrimination statutes can be a challenging assignment. One complication is the number of different statutes and non-discrimination policies which may apply.

Title VII of the Civil Rights Act of 1964, as amended, prohibits discrimination on the basis of race, color, religion, sex, or national origin. The Age Discrimination in Employment Act prohibits discrimination in employment on the basis of age. The Americans With Disabilities Act (ADA) requires that disabled persons be given an equal opportunity to compete for positions where they can perform the essential function of the job with reasonable accommodation. Additional non-discrimination statutes apply to employers who receive federal funds. Finally, most law schools are members of the Association of American Law Schools (AALS), which prohibits discrimination on the basis of sexual orientation. Many AALS-member schools require employers who recruit their students to comply with this policy as well.

Following are a few guidelines on drafting job descriptions and advertisements in conformity with the federal non-discrimination statutes which apply to all employers, and the AALS non-discrimination which must be considered as well.

Job Descriptions
Perhaps the most important rule for a job description is to make sure that you write one. Not only is writing a job description the best way to think through what skills the job requires, it also can be your best evidence should an unwarranted claim of discrimination be filed. To serve as evidence the description must be written before the job is advertised, so this always should be your first step.

In writing the job description, think in terms of specific skills required for the position, rather than the personal attributes, academic qualifications, or work experience for which you believe you are looking. This focus is important for several reasons. First, to comply with the ADA, the job description must define the "essential functions" of the job so that disabled persons can demonstrate that they are able to perform those functions with reasonable accommodation. Second, defining a job in terms of personal attributes can lead to a discrimination charge; a
candidate may read "energetic" as a preference for a younger candidate, "aggressive" as a preference for a male and "compatible" as a preference for a white, heterosexual, and/or Christian candidate.

Finally, describing a position in terms of academic qualifications or types of experience can eliminate a disproportionate number of minority candidates, who may have the required skills but not the requested experience or academic background. For example, only a few minority candidates will meet the qualifications for a legal job requiring law review experience or a federal clerkship. A job description and advertisement asking instead for extensive legal writing and research experience will serve your organization's needs while being more inclusive of minority candidates.

Job Advertisements
After you have written a job description outlining the specific skills required for the position, take care to phrase the advertisement in wording similar if not identical to the job description. We all are aware of the need to write advertisements and job descriptions in gender-neutral terms, but the most common error is to include language that suggests age bias.

Many legal employers advertise openings by requiring a certain number of years of experience rather than specific skills: "three to five years' experience in commercial real estate" is typical of the language used. While this is a common practice, it could lead to charges of age discrimination where there is a cap on the number of year's experience sought, or even reverse age discrimination where, for example, twenty years of experience is required. Instead, include in the job description a detailed list of the specific skills a successful candidate must have (such as "negotiating office building sales" and "drafting shopping center loan documents" in the case of the real estate position), and include in the advertisement a reference to the skill level expected ("seeking a candidate with significant experience in negotiating and closing complex real estate transactions").

Those of us at law schools who draft job postings from telephone conversations with employers should take care in how we word these job listings. After I started work on this article, I was embarrassed to note how many notices I have prepared for alumni seeking to hire a "recent graduate!" Next spring and summer I will write instead that "bar passage and legal work experience are not required."

Age bias can be implied not only from the advertised description of the position but also from the way the employer characterized itself. An advertisement by a "young, dynamic" firm may be read to infer that older candidates need not apply. Study all advertisements carefully before they are published and substitute synonyms, even awkward ones, for loaded language. "Newly formed
and growing" may not have the punch of "young and dynamic," but it does not have the negative connotations either.

To indicate clearly your organization's interest in diversity hiring, include a non-discrimination statement in every advertisement. Law schools generally will have a university policy or will subscribe to the policy of the AALS. Private employers should consider formulating a policy if one is not already in place. A statement that your organization is "an equal opportunity employer" can be included in published advertisements in place of a more detailed policy.

After the advertisement is prepared, consider also in which media it is published. To maximize the number of minority applicants, your organization may want to go beyond the major media in your city or region. If you are located in a large city, think about placing your ads in publications of the minority communities. In smaller towns, you may want to post listings with local minority organizations. These steps can be helpful evidence of non-discriminatory intent in the event a Title VII charge is filed.

Finally, when a position is open, your organization always should advertise it publicly or post the position. An employer who fills a job opening only by "word of mouth" or by promoting from within risks a successful discrimination suit by a candidate who was not given the opportunity to apply. To ensure the broadest possible pool of diverse candidates, private employers should advertise all lateral openings and not fill those positions only from candidates brought to them by professional search firms (unless, of course, the search firm advertises the position on the employer's behalf).

One last word: once you or someone else in your office has mastered the art of drafting non-discriminatory job descriptions and advertisements, you may want to place that person in charge of writing all job descriptions and advertisements for your organization. Even the best intentioned attorney or law school dean may not know how to write in conformity with current non-discrimination laws.

BRIDGES
1640 West Roosevelt Road
Room 251B
Chicago, IL 60608
(312) 413-7788 Voice
(312) 413-0453 TDD
A University of Illinois affiliated program funded by the Marriott Foundation for people with disabilities.
Services: Provides students with job training and work experience that enhances employment potential, and helps local employers gain access to an often overlooked source of employees.

CAREER VISION
800 Roosevelt Road, C120
Glen Ellyn, IL 60137
(708) 469-6270
Services: Career Counseling and opportunities for high school, college students, persons experiencing mid-career changes, women and retirees.

THE CENTER FOR THE TRAINING & THE REHABILITATION OF THE DISABLED
6610 North Clark Street
Chicago, IL 60626
(312) 973-7900
Services: Vocational evaluation, counseling, work adjustment and skill training program. Sheltered and supported employment, occupational, speech and language therapy.

COOK COUNTY PRESIDENT'S OFFICE OF EMPLOYMENT TRAINING
1311 Maybrook Drive
Maywood, IL 60153
Services: Referral and information about employment. Free skill training for jobs such as: data entry, food services, nurse's aid, computer technicians, building and janitorial services, word processing, machine operators, drafting. Summer youth programs, adult and youth programs. Employment Resource Center.

DEPARTMENT OF REHABILITATION SERVICES (DORS)
2901 Finley Road, Suite 109
Downers Grove, IL 60515
(708) 495-0500
The Department of Rehabilitation Services (DORS) is the State of Illinois agency that receives federal funds to provide vocational services to persons with a physical and/or mental disability which for that person is a barrier to employment. The Department of Rehabilitation Services' vocational rehabilitation program helps people with disabilities find and maintain employment.

Services: Vocational guidance and assessment to establish appropriate career goals, counseling, funding of vocational training, job placement assistance, follow-up, and other support services to insure that a client will be successful on a job.

DIRECTION SERVICE OF ILLINOIS
730 East Vine, Room 107
Springfield, IL 62703
(800) 634-8540 Voice & TDD
(217) 523-1232
(217) 523-6805 Fax
Services: Statewide directory of services for people of all ages who have disabilities. Information primarily on services, but also has access to information on research, books and materials, equipment and assistive technology. Speakers' bureau.

DUPAGE AREA OCCUPATIONAL EDUCATION SYSTEM (DAOES)
301 South Swift Road
Addison, IL 60101
(708) 620-8770
All Davea Career Center programs developed in conjunction with area business and industry. Job placement center helps students find employment.

DUPAGE COUNTY HEALTH DEPARTMENT
Transitional Services Unit
(708) 668-5850
Services: Prepares individuals with emotional disabilities for employment. Structured activities help people get ready to work in the community, find a job and keep a job. Vocational job placement considers the individual's skills and interests, transportation needs, and the use of a job coach for supported employment. Job support (short and long-term) includes individual job placement follow-up and a work support group.
DUPAGE PIC JOB TRAINING OFFICES
(708) 682-7884
Services: Offers vocational training, individualized job training, on-the-job training, job club and adult work experience. Training opportunities are the result of a partnership between local business and local government. Training programs developed by these bodies bridge the gap between employers and the unemployed.

EL VALOR CORPORATION
1850 West 21st Street
Chicago, IL 60608
(312) 666-4511
Services: Provides information and assistance for Spanish speaking persons with disabilities. Vocational evaluation and training, job placement and counseling.

EPILEPSY FOUNDATION OF GREATER CHICAGO
(312) 939-8622
The purpose of the program is to give clients with seizure disorders assistance in the vocational area.
Services: Offers a training program via the Department of Rehabilitation Services; a job bank, and a networking source for both corporations and clients. Corporate visits and presentations made regarding epilepsy education, first aid for seizures, and job candidates. Agency contact made for purposes of exchanging information and establishing referral process. In-services on epilepsy information and first aid can also be given.

FORTY PLUS OF CHICAGO (40+)
28 East Jackson Blvd., Suite 1900
Chicago, IL 60604
(312) 922-0285
Self-help job search group.
Services: Assistance with job seeking skills; exposure to employers in the Chicagoland area; job bank; information and referral.

GEORGE H. RYAN,
ILLINOIS SECRETARY OF STATE
DEPARTMENT OF HUMAN SERVICES
450 Centennial Bldg.
Springfield, IL 62756
Services: Provides disability awareness programs throughout the state, free of charge.

HELPING HAND REHABILITATION CENTER
9649 West 55th Street
Countryside, IL 60525
(708) 352-3580
Services: Supported employment program improves transition to work for individuals by training the individual at the job site;
consequently no transfer of skills is necessary. Offers the employer an incentive for hiring the disabled, as free training is provided by the job coach as well as the guarantee that the job would be completed. Follow-up services will be available to both the employer and employee even after completion of the program. Problems occurring from either the perspective of the employee or employer will be addressed by intervention of the placement specialist or job coach.

IAM/CARES
(312) 738-5581
When IAM/CARES established its Projects with Industry Program (AIM/PWI) in 1980, it became part of a national network of more than 200 programs that help disabled men and women in all parts of the country enter jobs in more than 10,000 participating business and industrial enterprises.

IAM/CARES is unique within the network of placement projects in that, in companies with collective bargaining agreements, union representatives as well as those employers contribute to the rehabilitation of the disabled employee. IAM/Cares is authorized by the National Institute on Disability and Rehabilitation Research (NIDRR) to provide information, materials, and technical assistance to individuals and entities covered by ADA.

ILLINOIS DEPARTMENT OF EMPLOYMENT SECURITY (IDES)
837 South Westmore
Lombard, IL 60148
(708) 495-4345
Services: Administers state unemployment insurance and job service programs. Determines eligibility and pays unemployment insurance benefits to qualified clients. Assists clients in finding employment. Assists employers in filling vacancies with qualified clients. Determines eligibility for the targeted jobs tax credit program. Collects, analyzes and distributes labor market information and employment statistics for state.

JEWISH VOCATIONAL SERVICE
1 South Franklin Street
Chicago, IL 60606
(312) 357-6400
Services: Comprehensive job placement, vocational counseling, rehabilitation and skills training services to meet the work and career needs of the metropolitan area. Career development services: Helps people choose a career and find an appropriate job. Educational and vocational counseling, scholarship assistance, employment interviewing, psychological testing and job seeking and placement services.

THE CHICAGO LIGHTHOUSE FOR PEOPLE WHO ARE BLIND OR VISUALLY IMPAIRED
(312) 666-1331
Services: Job readiness and placement services available to anyone who is experiencing difficulty in finding or retaining employment due to visual impairment. Placement counselor works closely with employers regarding job development. Work site visited to identify jobs for visually impaired persons, to analyze specific job tasks, and to suggest modifications in equipment or work setting as needed. Assist persons to retain jobs or to upgrade their positions when task or equipment changes occur due to advanced technology. Awareness seminars provide information to employers and co-workers about blindness and visual impairment.

MARIANJOY REHABILITATION CENTER
(708) 462-4000
Marianjoy rehabilitation hospital is a 100 bed facility which treats individuals who have physical disabilities as a result of serious accidents or birth defects.

Services: Initial interview, vocational counseling and guidance; computerized job matching, vocational aptitude and interest testing; job analysis and employer negotiation; and job placement. Marianjoy also offers a supported employment program, in conjunction with the Department of Rehabilitation Services and Public Aid, to assist severely disabled brain and spinal cord injured persons to work. In both programs a job coach assists an individual to locate an employer in the field of his choice, to then secure job placement, provide subsequent on-the-job training until he/she can become competitive full-time and finally, to provide support to the employer and employee to ensure successful job placement.

MINORITY ECONOMIC RESOURCES CORPORATION (MERC)
2570 West Devon
Des Plaines, IL 60018
(708) 297-4705

Services: Technical assistance to minorities, women and women-owned businesses, customized skills training, career assessment, job placement, research and development, corporate relations. Workshops and seminars in human resource development for private sector.

PARENTS ALLIANCE EMPLOYMENT PROJECT
(312) 790-3060
The Parents Alliance Employment Project, a professionally staffed employment service funded by the Department of Rehabilitation Services (DORS) and the DuPage County Jobs Training Partnership Act (JTPA) to provide services throughout most of DuPage County at no cost to the employer or the applicant.

Services: Offers job search, job development, and job coaching to adults with disabilities - primarily disabilities identified as intellectual limitations (EMH, TMH) or learning disabilities. Provides individualized placement in the normal business community, appropriate job match, proximity to place of residence, and access to available transportation are additional
priorities within the design.

**CHICAGOLAND PROJECT WITH INDUSTRY**

(312) 908-6275

Chicagoland Project With Industry, Inc. is a business initiated effort to develop job placement opportunities for qualified applicants with disabilities. PWI applicants represent a variety of skill levels including professional, clerical, data processing, technical production and service job candidates.

**Services:** Offers employers a centralized single link to rehabilitation resources. Candidates recruited from all of the major rehabilitation organizations who have job-ready clients. Training seminars conducted at your company site, designed to meet specific company needs on topics related to employment of the disabled, e.g. interviewing techniques applied to applicants with disabilities. PWI provides information on funding resources for job accommodations, if they are needed, plus post employment follow-up services. All services are available at no charge.
