How to Research Your Family at the Library of Michigan

The Library of Michigan houses an array of resources for those with Michigan ancestors.

To begin researching your family: start with yourself and work backward, generation by generation. Since everyone has 1,024 direct ancestors ten generations back, the size of the task is enormous and may take years.

Step 1 - Get a pedigree chart.

The first step in researching your family is to ask for a five-generation pedigree chart and a family group sheet at the Genealogy Desk on the second floor of the Library of Michigan. The pedigree chart is like a map showing you what you know and what you need to find out.

Step 2 - Read, Read, Read!

Select a “how-to” book on genealogy. Be sure to read a “how-to” book on United States research; you can explore your British, French-Canadian, Scottish, Irish, and German ancestors at a later time.

Step 3 - Don’t start until you have done your homework.

Take the pedigree chart and book home. See how much of the five-generation chart you can fill in by using home sources. The best home source is talking to your parents, grandparents, aunts, uncles, cousins, and others in your family.

Other home sources include:

- journals-diaries
- letters
- baby books
- scrapbooks
- newspaper clippings
- announcements
- school records
- family Bibles
- medical records
- photo albums
- certificates
- church records
- memorial cards
- family traditions
- autograph books
- other family books
Step 4 - Oral history.
Remember to ask questions about: names, dates, relationships, localities, church memberships, and military service. If possible, make a tape recording of the interview, first acquiring written permission to tape and use the information recorded.

Step 5 - Plan a search strategy.
From your pedigree chart, select an unknown item of information you believe could be found in our library, and ask to see the *Sourcebook of Michigan census, county histories and vital records, LG L69: 17S72* and the brochure *Genealogy and Local History Collection*. These two booklets will help you expand your search into the genealogy and local history book collection.

Step 6 - Collect and Organize.

Step 7 - Census search.
Search the U.S. census records. Ask at the Genealogy Desk for filmed censuses and a flyer on how to use the soundex code. The Library has the Michigan federal census records from 1820-1920.

Step 8 - Additional sources.
Ask to see Michigan history magazines, genealogical periodicals, city directories, and the *Michigan Surname Index, F 565 .M544z*.

Step 9 - Getting the ANSWER.
Using the ANSWER online catalog. To search by:

- **AUTHOR:** Type "a=" then AUTHOR’S LAST NAME, a space and AUTHOR’S FIRST NAME, then press the ENTER key. Example: a=Doane
- **SUBJECT:** Type "s=" then SUBJECT (as listed in the Library of Congress Subject Heading List) and press the ENTER key. Example: s=Callard family
- **TITLE:** Type "t=" then TITLE, then press the ENTER key. (Omit "A", "AN" OR "THE" if the first word of title). Example: t=Genealogical Dictionary
- **KEYWORD:** Type "k=" then KEYWORD and SECOND KEYWORD, then press the ENTER key. Example: k=Ohio and military
- **CALL NUMBER:** Type "c=" then CALL NUMBER, then press the ENTER key. Example: c=C56 .C66

Step 10 - Don’t hesitate to ask Library of Michigan staff for assistance.

SOUNDEX CODING GUIDE

The number Represents the letters
1 BPFV
2 CSGJQXZ
3 DT
4 L
5 MN
6 R

Disregard the letters A, E, I, O, U, W, Y, and H.

**STEP 1**
On line 1, write the surname you are coding, placing one letter in each box.

**STEP 2**
On line 2, write the first letter of the surname in the first box.

**STEP 3**
On line 1, disregarding the first letter, slash through the remaining letters A, E, I, O, U, W, Y, and H.

**STEP 4**
On line 2, write the numbers found on the Soundex Coding Guide for the first three remaining unslashed letters. Add zeros to any empty boxes. Disregard any additional letters.

---

**NAMES WITH PREFIXES**
If your surname has a prefix - like Van, Von, De, Di, or Le - you should code it both with and without the prefix because it might be listed under either code. The surname vanDevanter, for example, should be coded in the two ways shown. (Mc and Mac are not considered prefixes.)

**NAMES WITH DOUBLE LETTERS**
If your surname has any double letters, they should be treated as one letter. Thus, in the surname Lloyd, the second L should be slashed out; in the surname Callard, the second L should be slashed out.

**NAMES WITH LETTERS SIDE BY SIDE THAT HAVE THE SAME NUMBER ON THE SOUNDEX CODING GUIDE**
Your surname may have different letters that are side by side and have the same number on the Soundex Coding Guide; for example, PF in Pfister (1 is the number for both P and F); CKS in Jackson (2 is the number for C, K, and S). These letters should be treated as one letter. Thus, in the name Pfister, F should be slashed out; in the name Jackson, K and S should be slashed out.

With your ancestor's name correctly coded, you are ready to use the microfilmed Soundex card index, which is organized by state, thereunder by Soundex code number, and thereunder alphabetically by first name or initial. There are four types of index cards. The information you should copy from each is on the next page.
