This interdisciplinary module for grades 4-8 takes advantage of student interest and participation in baseball. This module presents a conceptual framework for an alternative summer program. Included are suggested activities, materials, and handouts. The module is provided as a guide for teachers and administrators wishing to develop thematic units of instruction. Day headings in the chapter titles characterize the types of activities contained within that day. These activities relate to different content areas, such as Mathematics, Language Arts, and Science. The chapters are: (1) "Scouting Report"; (2) "Motivational Day"; (3) "Information Day"; (4) "Research Day"; (5) "Seventh Inning Stretch"; (6) "Activity Day"; and (7) "Culmination Day." Contains an extensive bibliography divided into three sections: fiction; non-fiction; and biographies. (EH)

Introduction

Baseball has provided many hours of enjoyment for young and old alike. From card collecting to watching and playing games, or simply discussing favorite teams or players, the game of baseball allows for many different levels of participation. This module for Grades 4-8 entitled *Baseball* takes advantage of this interest and involvement. It is designed to assist teachers by providing thematic lessons which are both motivating and innovative.

This module presents a conceptual framework for an alternative summer program. Included are suggested activities, materials, handouts, and an extensive bibliography of reading materials. A variety of activities has been provided so that teachers may select those activities which are appropriate for their students needs. Day headings characterize the types of activities contained within that day. These activities relate to different content areas, such as Mathematics, Language Arts, and Science, and match the Indiana State Curriculum Proficiencies.

The *Baseball* module seeks to help teachers in establishing interdisciplinary learning modules. This module is provided as a guide for teachers and administrators wishing to develop thematic units of instruction. Other sports, such as basketball and football could be used to develop similar thematic modules and activities.

So grab your bat and ball, put on your baseball cap, and join us as the umpire shouts, "PLAY BALL!"

The following guidelines were developed to help schools restructure their thinking about the curriculum provided and the learning climate being established. In establishing a climate that promotes learning, Indiana schools should attempt to:

1. **Encourage active involvement of students.** Learning is enhanced when students participate in "hands-on" activities and experiences.

2. **Relate learning to the real world.** Learning occurs naturally when students interact with their environment. Formalized learning is facilitated and reinforced when instruction is related to the real world.

3. **Decrease usage of workbook skill and drill activities.** Teachers should be encouraged to use workbook skill and drill more wisely so as not to encourage superficial learning.

4. **Provide a stimulating learning atmosphere.** Teachers should maintain active classrooms where all students interact, talk, share, and are involved in meaningful learning.

5. **Use an interdisciplinary approach to learning.** Teachers utilizing a theme approach to plan for instruction to maximize the interrelatedness of learning.

6. **Appreciate learning styles.** Students in need of remediation often exhibit characteristics of the tactile/kinesthetic learner. Teacher strategies and materials should include instructional strands directed toward the learning styles of each student.

7. **Promote cooperative learning.** Partner grouping and small groups should be encouraged as the class structural format during the summer period.

8. **Utilize motivational techniques.** Teachers should use a variety of techniques to motivate the learner. Rewards, praise, personal interactions with teachers, peers, and team building are integral parts of successful alternative programs.

9. **Involve parents.** Innovative plans should be implemented to actively involve the students and parents. Ideas such as a weekly newsletter with activities and suggestions might be implemented.

SCOUTING REPORT

“Summer All Stars” - Knox Community School Corporation

The theme for the summer school program was decided after attending an Indiana Department of Education Extended Learning Program Conference. It was decided to provide Integrated Thematic Instruction in all Grades K-5 using a baseball theme. Interested staff members were made aware of the theme in early May.

All summer staff members were inserviced on Monday prior to classes beginning on Wednesday. We brainstormed a few more ideas, shared resources, and prepared the building. All classrooms, hallways, office areas, and student areas were decorated with our theme. All rooms were ready upon student arrival on Wednesday. (Staff members received a two-hour pay for the actual two-hour inservice.)

All staff wore baseball style or favorite team clothing on the first day. Students were informed to wear something from their favorite team on the first day. (Consequently, Cubs-mania hit the school!) Students lined up the classes on the blacktop and formed a large “wave” prior to entering the building. Students received a baseball name tag, found their “team rosters” outside their classrooms, and had mascots and team logos designed for each of the rooms. Miniature team logos and team colors were determined.

Classrooms were set up as baseball diamonds or with baseball centers scattered throughout the room. Many ideas were implemented from Indiana Department of Education publications; the thematic module entitled Baseball, and the resource book “What Works!” Brainstorming sessions from the Knox staff also served as an “idea bank” from which many exciting and creative learning activities were derived.

Teachers were provided with materials to teach daily lessons in reading, math, and language. They were instructed to provide a minimum of one “baseball-themed” activity each day. They were also instructed to keep all dittos and duplicated materials to a bare minimum. Overhead projectors were provided for each room. Computers, System 80s Machines, listening centers, and access to the library were provided for each classroom. All four elementary schools pooled their equipment resources into one building, so each class had several computers, a diverse supply of software, System 80s, and sets of manipulatives available.

Teachers were also required to teach “Critical Thinking Skills.” Several teachers found ways to implement the baseball theme during their higher order thinking skills lessons.

Parents and student aides were utilized on a volunteer basis. All “players” parents were invited to a “home game preshow” in which all classrooms did a “baseball-themed” activity for the “home-team fans!”

On Tuesdays, the Concession Stand was opened for all students. We do not have a concession stand area in our school but we set up tables and made decorations to appear as a concession stand might be. Students were allowed to purchase items at the concession stand with their “attendance money.”
All students received seven cents a day for attending summer school. If they arrived late or left early, they would only receive four cents for that day. If they were absent, they did not receive any money. Students with perfect attendance for the week received an additional twelve cents. Real money was used by all students in Grades 2-5. Kindergarten and first grades used the plastic (natural-looking) money found in their math manipulative kit. Students could use all their money, some of it, or save it for the next week. They were not allowed to share or bring money from home.

Items available at the concession stand were either donated to the school by the community businesses, donated by the PTO, or purchased by the school. These items included cold pop, pizza, hot dogs, popcorn, peanuts, M & M's, candy bars, and licorice ... traditional fare for all baseball enthusiasts!

Students were expected to read the menu sign, figure out the cost of their purchase, determine the correct coins to use, and compute their own change in the least amount of coins. What better way of applying math skills! Student attendance was much better after the first week the concession stand had opened.

The general opinion of the program came out during the evaluation process. Students and teachers were required to fill out an evaluation questionnaire. Teachers felt the twenty day program “went too fast” or “whizzed right by.” Students liked “having reading a new way,” “more access to computers,” treats while they worked, and the ever-popular Concession Stand. Some suggestions for improvements were to offer a longer recess break, offer more opportunities to deviate from the summer school texts and allow teachers to prepare their own materials. Students, of course, wanted longer recess (longer than the work day) and also ... the Concession Stand open every day.

MAJOR LEAGUE TRIVIA

How well do you know the rules of the Major Leagues?

The rules of baseball seem pretty simple at first. Hit the ball, run to first. No problem, right? There are actually hundreds of rules governing the game. See if you can get a lucky bounce and take this quiz to test your knowledge of a few Major League Baseball's rules - 1900s style!

1. What size are the bases?
   A) 12 inches square  B) 15 inches square
   C) 8 inches square   D) Triangle shaped

2. What size is the pitching rubber?
   A) 24 inches x 6 inches  B) 12 inches x 4 inches
   C) 36 inches x 10 inches D) No regulation size

3. Dugout benches must be at least how far from the baseline?
   A) 10 feet  B) 50 feet  C) 25 feet  D) 75 feet

4. What is the maximum allowable bat length?
   A) 38 inches  B) 40 inches
   C) 42 inches   D) As big as the batter can swing

5. Tape, pine tar, etc., can be no farther than up the barrel of the bat?
   A) 10 inches  B) 20 inches  C) 15 inches  D) 18 inches

6. What is the official weight of a Major League baseball?
   A) 5 to 5.25 ounces  B) 6 ounces  C) 4.5 ounces  D) 9 ounces

7. The pitching rubber is 60 feet 6 inches from what part of the plate?
   A) The front  B) The middle
   C) The rear point D) It's up to the ground crew.

8. In the ball parks constructed after 1958, the left and right field walls must be at least feet from home plate.
   A) 275 feet  B) 300 feet  C) 325 feet  D) 350 feet

9. Exactly how far apart are the bases?
   A) 45 feet  B) 60 feet  C) 75 feet  D) 90 feet

10. What is the standard size of the batter's box?
    A) There is none  B) 3 feet x 3 feet
    C) 4 feet x 5 feet  D) 4 feet x 6 feet
1. B—15 inches square
2. A—24 inches x 6 inches
3. C—25 feet
4. C—42 inches
5. D—18 inches
6. A—5 to 5.25 oz.
7. C—The rear point
8. C—325 feet
9. D—90 feet
10. D—4 feet x 6 feet
Activity: Autographs... Autographs... Autographs

Proficiency/Indicator:

Language Arts

Write personal letters to communicate ideas.
Engage in prewriting, drafting, peer sharing, editing, and publishing.

Materials:

Papers, envelopes, stamps, list of addresses of players
(See attached)

Directions:

1. Student selects a baseball player or coach from the list provided.

2. Teacher MODELS writing a friendly letter on blackboard. Students dictate this letter. (Include in the body of the letter something personal about the player.)

3. Students write their letters, peers edit, and then write in final form for reading.

1. List all words with double letters.
   1. __________________  5. __________________
   2. __________________  6. __________________
   3. __________________  7. __________________
   4. __________________  8. __________________

2. Circle the double letters.

3. Fill in vowels (a, e, i, o, u).
   a. l__g__
   b. __m__t__r
   c. __cqu__r__d
   d. c__r__r
   e. s__cr__f__c__
   f. c__ll__g__t__
   g. __rr__r
   h. __mp__r__

4. Write the two words that are past tense.
   __________________________________________
   __________________________________________

5. Write sacrifice, assist, and umpire as past tense.
   __________________________________________
   __________________________________________

6. List the root words for:
   professional
   collegiate
   aggressive

7. Write two other words that can be made by using the same root word.
Activity:
Cards 'R' Us - Part I

Proficiency/Indicator:
Language Arts
Use writing/speaking to express ideas and clarify meaning.
Interact with a variety of printed materials.
Alter reading to purpose.
Understand abbreviations.
Write initial drafts with emphasis on content.
Share drafts with peers.

Materials:
Baseball Cards, Overhead of a Baseball Card (Sheet attached)

Directions:
1. Teacher passes out baseball cards for students to peruse.
2. OR, teacher can have students bring in cards.
3. Teacher shares overhead/discuss information available on card.
4. Students alphabetize their set of cards/with a partner to check alphabetizing skills.
5. Use partner’s set to sort according to American or National League.
6. Use information on the card to write a paragraph.
7. Share paragraph with partner for editing.
8. Rewrite paragraph.
### Career Highlights

2nd on Braves in RBI and 3rd in HR in '91...Missed nearly 6 weeks of '91 with back injury...Had 5 RBI in 1 game 9/9/91 vs. Giants...NL Rookie of the Year in '90, leading all major lg. rookies in HR...Began '90 season at Richmond (.356, 2 HR, 7 RBI)...Spent most of '89 at Richmond, batting .261 with 12 HR and 58 RBI...Hit .290 with 22 HR and 105 RBI at Sumter and Durham in '86...Appalachian Lg. All Star in '85 at Pulaski (.245, 10 HR and 46 RBI in 66 games)...Attended Thomas More (KY) Coll.

Denotes Led League

327
Activity: Cards ‘R’ Us - Part II

Proficiency/Indicator: Formulate problems from real world situations.

Mathematics Compare and order a set of whole numbers and decimals.

Find solutions to real world problems that involve the concept of percent.

Materials: Assorted baseball cards, markers, scrap paper

Directions:

1. Provide each student with a set of 12-15 baseball cards. Have the students select one card from the set you provided. Discuss the information on the back of the card and what each statistic means.

2. At the top left-hand corner of each card is a number representing the place the card appears in an entire collector’s series. Ask students to order their set from least to greatest.

3. Have students select a card from the set, making sure the player is not a pitcher. The students will then compute the players batting average (hits divided by at bats) by first estimating the batting average for their player and then using a calculator to work the problem. (When using a calculator, the average will need to be rounded to the nearest thousandth.)

4. Next, direct the students to select another non-pitcher card. Have each student locate the career batting average for the player on their card (this number will be in decimal form.) On a large piece of scrap paper, have the students record the player’s career average in large print using markers. Next, direct the students to move to an area of the classroom with relatively few obstacles. The students should then order the decimals by forming a line starting with the lowest decimal and ending with the highest. Confusion may result before a decision is made by students, however, do not help the students with the placement of the highest and lowest percentage. Discuss the impact that batting average’s have on a player’s worth i.e., ranking and salary.

5. Students may make their own word problems using information from baseball cards.
Throughout baseball lore players have been tagged with nicknames. The history behind each nickname is as much fun as the names themselves. Some are picked up in the minor leagues, others come from a player’s size or strength. But most simply, names that someone said jokingly and somehow stuck.

Test your knowledge of baseball nicknames by working in pairs and matching the nicknames with the player’s full names. If you want to find out where these nicknames come from, check out baseball books from your local library.

1. Billy Buck
2. Big Ben
3. Bye Bye
4. The Cat
5. Catfish
6. Charlie Hustle
7. Chicken Man
8. Mr. Cub

FF. Reggie Jackson
ANSWERS - WHAT'S IN A NAME

1. B — Bill Buckner
2. P — Ben McDonald
3. U — Steve Balboni
4. E — Andres Galarraga
5. J — Jim Hunter
6. X — Pete Rose
7. R — Wade Boggs
8. G — Ernie Banks
9. AA — Dwight Evans
10. A — Dwight Gooden
11. L — Nolan Ryan
12. I — Ty Cobb
13. O — Andre Dawson
14. D — Howard Johnson
15. EE — Lou Gehrig
17. W — Hank Aaron
18. C — Leo Durocher
19. BB — Stan Musial
20. H — Will Clark
21. Y — Deion Sanders
22. FF — Reggie Jackson
23. CCCarlton Fisk
24. Q — Tim Raines
25. S — Roger Clemens
26. M — Daryl Strawberry
27. DD — Ryne Sandberg
28. K — Willie Mays
29. T — George Anderson
30. V — Ozzie Smith
Activity: Read Between the Lines

Proficiency/Indicator:
Language Arts

Use language to analyze and enlarge upon thoughts.
Participate as members of a group discussion.
Write to record information.

Materials:
Attached worksheet

Directions:
This is an “anticipatory set” activity for groups in a cooperative arrangement to review and define baseball rules.

1. Divide class into two to three members in a group.
   Brainstorm with group members. Use the worksheet provided.
   Write a sentence or more about each of the headings.

2. Take the subheadings and the individual sentences to write a four paragraph report on baseball. Each member might take one or two paragraphs as his/her responsibility. Use computers if available, or use butcher paper or newsprint.

3. Each group share final product with class. i.e., share final product as a sportscaster on television with microphones, commercials, etc.
Read Between the Lines

I. Baseball Field

diamond
bases
home plate

II. Personnel

positions of players
number of players
umpires
managers

III. Rules

innings
strikes
outs
balls
bunts
singles
doubles
triples
home runs
double play
walk

IV. Equipment

baseball
bat
uniform
glove
Activity: On the Ball

Proficiency/Indicator: Analyze systems and propose generalizations.

Science

Materials: One expensive and one inexpensive baseball, scissors

Directions:

1. Locate an expensive and inexpensive baseball (contact the high school baseball coach or purchase them). Have students observe the design of the two baseballs and list observations about each ball.
   a. How do they feel?
   b. How do they smell?
   c. How do they look?
   d. What sounds do they make when you hit them with a bat?
   e. Which goes the greatest distance when it is hit - do this three times.

2. Next, have students analyze the materials and design elements that determine the quality and price of baseballs.
   a. Give each group (three to four students) one expensive and one inexpensive baseball. Do not tell them which one is the most expensive.
   b. Have them remove the stitching and study the cover and other parts of the body.
   c. What did they notice about the stitching? Record their observations.
   d. What did they observe about the covers? How were they different?
   e. What observations did they make about other parts of the baseball?

3. Which baseball did the group decide was the most expensive and best?

4. Compare and contrast the findings of all groups.
5. Graph their findings. Contact the high school baseball coach for assistance with this activity.

6. Have a baseball coach or sporting goods owner talk to class about:
   a. What makes up the quality and price of baseballs.
   b. Where baseballs and baseball bats are made.
   c. What determines the prices of baseballs and bats.
   d. What will baseball be like in the year 2000.
## Activity:
The Sports Page

## Proficiency/Indicator:
Language Arts

## Language Arts Proficiency/Indicator:
- Understand and bring meaning to reading by recognizing main idea.
- Locate information in newspapers.
- Read and make use of newspapers.
- Speak before an audience for a variety of purposes.

## Materials:
Newspaper Article

## Directions:
1. Bring in newspapers and let students select baseball articles/or students can bring in baseball articles.
2. Students read an article. Have students cut out the article and underline the main ideas they want to share.
3. Direct students to summarize what their article was about.
4. Teacher collects cut out articles to ascertain if students found main ideas.

---

Humanitarian Impact: 

- Class Champion
- Good Sports
- High Scorers
Activity: Baseball Greatest Hits

Proficiency/Indicator: Language Arts

Use note taking techniques to select and record information.
Use writing to express ideas.
Read drafts aloud to hear the message.
Write biographical sketches.

Materials: Encyclopedias, biographies

Directions:

1. Students select a baseball player they will write a biographical sketch about.
2. Teacher lists on board what information is wanted:
   a. full name
   b. date of birth
   c. birthplace
   d. parents
   e. education - high school, college
   f. one thing of interest
   g. team he plays/played for, etc.
   h. career highlights, unusual feats.
3. Teacher selects a player and with student's help locates the above information from an encyclopedia.
4. Teacher MODELS using the information to write a paragraph.
5. Students begin project.
6. Students read reports to class.
Activity: How Much Does It Cost?

Proficiency/Indicator: Formulate problems from real world situations.

Mathematics Use investigative, cooperative learning, and communication in the problem-solving process.

Materials: Cost analysis information from different baseball organizations, calculator (optional)

Directions:

1. Students should write to a local little league, a minor baseball league, or a major baseball league for information on the following:
   a. Average cost to sponsor one baseball game.
   b. Average concession stand earnings per game.
   c. Average game attendance.
   d. Admission fees for a game. Include information on season ticket box holders.

2. With the above information, students can generate many word problems to solve. At this point, students should be assigned to a team of two to three per group.

3. With the information on concession stand earnings, students should solve the problem of "How much do we charge to make a profit?" They would investigate the cost of one hot dog, one bun, and condiments for one sandwich. With this information, students can determine the price of each of the concession stand food items. Determining unit prices is a very valuable lesson in consumer mathematics. Students might also want to contact the individual concession stands and determine what they charge for their food items, and, then, do a comparison.

4. Students should investigate all the costs and procedures involved in sponsoring a baseball game. This information-gathering procedure should include the cost of the maintenance crew, utilities cost, grounds upkeep, etc.

5. Using both the attendance figures and the admission fees, students can determine the total receipts for a typical baseball game.
6. This cost analysis activity will generate enough statistical data and numerical information for the groups of students to solve a variety of word problems. The students should be encouraged to create their own problems, and, then, ask someone else in the class to solve them.
Batting Stats

These are the abbreviations on the back of a hitter's card. Check out Wade Boggs' card and fill in the blanks. What was Wade's SO ratio (SO per AB) for the 1991 season?

<table>
<thead>
<tr>

Activity: Batter Up

Proficiency/Indicator: Data gathering and investigative skills

Science

Materials: Baseballs, bats, measuring tape(s), paper, pencil

Directions: Use a baseball field or playground to experiment how far a baseball will travel when hit by a metal bat and a wooden bat. Check with the high school baseball or track coach for measuring tapes and baseballs. This activity must be carefully supervised, perhaps parents or community members could assist. Divide the students into teams of three or four. Have each team:

1. Hit the ball three (3) times with a metal bat and measure how far the ball travels.
2. Add the distances together and divide by three to obtain an average.
3. Hit the ball three (3) times with a wooden bat and measure how far the ball travels.
4. Add the distances together and divide by three (3) to obtain an average.
5. Compare the two averages and decide which bat has more driving power.
6. Compare your findings to other groups.
7. Graph this information on a chart.

<table>

8. Which bat did the class decide was best?
Activity: Who Was the Greatest Yankee Home Run Hitter?

Proficiency/Indicator: Mathematics

Interpret and analyze data from graphs, tables, and charts.

Choose an appropriate scale and construct a graph using given information and graph information.

Collect, organize, and present a set of numerical data using displays, such as stem-and-leaf and box-and-whisker plots.

Understand and determine the various measures of central tendency of a set of data (mean, median, mode).

Materials: Yankee home run chart (sheet attached), graph paper

Directions: Using the table provided, answer the following questions:

1. At first glance, which player appears to be the greatest home run hitter? Give reasons for your choice.

2. Rank the four players in a manner meaningful to you. (You might choose to compute the means, medians, or quartiles, or make line plots, stem-and-leaf plots or box plots.)

3. Explain the ranking of the four players and state your rationale for the choice of plots.

Extended Activity: Students could do similar activities with other teams and home run hitters. They should do the research first and then create their plot and interpret the data.

Data Collection and Graphing

Interpret and analyze data from graphs, tables, and charts.

Choose an appropriate scale and construct a graph using given information and graph information.

Collect, organize, and present a set of numerical data using displays, such as stem-and-leaf and box-and-whisker plots.

Understand and determine the various measures of central tendency of a set of data (mean, median, mode).

Materials:
Reference books, baseball books, and baseball magazines listing team pennant winners and team colors, baseball cards, graph paper

Directions:
1. Students should be divided into teams of two or three per group. Each group researches team pennant winners for a certain number of years, team colors, home run leaders, or attendance figures. (See attached charts)

2. With the information obtained, the groups can interpret their data and graph it in some form (line, bar, circle, stem-and-leaf, box plots, etc.)

3. As an additional activity in data collection and graphing, students can survey other members of the class about their favorite team, favorite player, etc., and from this information make a graph. Keep in mind graphs need a title and both axes labeled.

4. After graphs have been made, a large group discussion should follow. Students need practice interpreting data from the graph. Questions should include, “How many more students like the Cubs than the Cardinals?” “How many students like either the Cubs, the Cardinals, or the Mets?” Do not limit questions to a single piece of information from the graph.

Activity: Timeline
Proficiency/Indicator: Understand and bring meaning by sequencing.
Language Arts
Materials: A sheet of plain white shelf paper, attached sample timeline
Directions:
1. On shelf paper mark off years.
2. Tape on wall where students can write on it.
3. Write names of players on paper that played baseball during these years.
4. Use biographical sketches, articles, etc., to add to timeline.

Activity: "Take Me Out to the Ballgame"
Proficiency/Indicator:
Language Arts
Recognize rhyme scheme.
Analyze the values presented in a song.
Materials:
Closure sheet
Directions:
1. Pass out “Take Me Out to the Ballgame.” (Attached sheet)
2. Students fill in missing words.
3. Discuss rhyme scheme.
4. Discuss Harry Carey who leads fans in singing of this song.
5. Do choral reading: i.e.,
   a. Girls say pronouns
   b. Guys say remainder
   c. Sing in rounds
   d. Sing it all together!
6. Compose a “rap” or song about baseball settings.
7. Draw impressions of a baseball game, i.e., murals, chalk, paint, newsprint, posterboard.
Take me out to ___ ballgame.
Take me out ___ the park,
Buy me ___ peanuts and cracker jacks,
  don't care if I ___ get back,
For it's ___, root, root for the home team,
If they don't win ___ a shame,
  for it's ___, two, three strikes
you're ___ at the ole ball ____.
Teachers can use this baseball game to review facts and concepts in any content area. It is simple to play, and the use of real baseball cards adds a significant degree of realism. Your students will love to play this game.

The object of the game is to score more runs than the opposing team. Each student receives one baseball card (pitcher card optional), and takes a position in the "batting order." The teacher asks questions to each batter. If the student does not know the answer he/she "strikes out." If he/she answers the question correctly then dice are rolled and charts are consulted to determine if the result is a "hit" or an "out," and if a "hit" is a single, double, triple, or home run. Teams can also make base stealing and bunting decisions. The game is over when nine innings are played or when a time limit is reached.

Rules

1. Divide the class into two teams. Each team has one student who doubles as the team manager. Distribute a baseball card to each student, making sure that the card represent players of a variety of ability levels i.e., not all superstars. Students may wish to choose all players from the same professional team.

2. Determine a batting order for each team.

3. Keep track of the score on the chalkboard. Also draw a baseball diamond on the board to keep track of base runners.

4. Read a question to each batter. A correct answer means the batter makes contact and hits the ball into play. A missed answer is a strike out.

5. After a correct answer, the student rolls the dice and uses the Batting Chart to determine if the ball that was put into play results in a "hit" or an "out." To find the correct column on the chart, use the career batting average of the player on the card. (Another possibility is to choose a particular year to simulate. Of course, make sure all the baseball players actually played during that year!) After three outs the other side is "up."

6. If a player gets a "hit," then he/she rolls the dice again and uses the Slugging Chart to determine whether the hit is a single (S), double (D), triple (T), or home run (HR). To find the correct column, determine the player's career average yearly home run total. Simply have students divide the number of career home runs by the number of years played. (When only a few games are played in a year this can distort averages. You may wish to count only years where players have played in more than 20 games. Also, on some baseball cards, only major league, as opposed to minor league, statistics are considered when computing home run and
stolen base totals. If this is true, when computing averages, divide by the number of years in the major leagues.)

7. Players and baserunners advance the number of bases determined by the type of hit. A single advances all runners one space, a double two spaces, and so on.

8. To keep the game moving, have players compute and record averages before the game begins.

9. (Optional) After a successful hit, the player (or manager) may also decide to attempt a steal. Roll the dice and use the Base Stealing Chart to determine if the base stealer is safe or out. To determine the correct column, determine the player’s career average yearly stolen base total. Divide the career stolen base total by the years played. No stealing of home base is allowed. When runners are on first and second bases, a successful steal attempt will result in a “double steal.” In this case, use the stealing statistics of the lead runner. (To help managers make decisions, students can record and summarize the base stealing statistics for their team.)

10. (Optional) After answering a question correctly, a player (or manager) may choose to sacrifice bunt instead of hit. Use the Bunting Chart. A successful bunt (S on the chart) moves all runners (except those on third base) forward one base, with the batter being out. A U means the sacrifice is unsuccessful, the batter still being out. A Hit means that the sacrifice is successful, and that the batter gets an infield hit, advancing to first base.

11. Rule Variations: Teachers can vary the game by creating different rules.

   a. Defensive Dice Rolls: Let the defensive team roll the dice after each successful hit (except a home run) by the opponent. If the defensive team rolls a 2 or a 12, the batter is out for trying to stretch his hit to an extra base.

   b. Buying Teams: Teachers could also give teams a set amount of money and have them purchase player contracts. Available players and their salaries could be posted on the board. Or, teams could bid on players’ contracts, letting the auction prices determine player salaries.

   c. Using Pitchers: Teams must choose (purchase) several pitchers of varying abilities i.e., significantly different ERAs. Make several new Batting Charts, adding or taking away “outs” to reflect pitchers with different ERAs. For example, if a pitcher has a very low (and therefore excellent) ERA you could make all dice rolls of 10 an “out” instead of “hit” as they are now. If National League Rules are used and pitchers bat, use the Pitcher’s Only column on the Batting Chart. Make up rules determining how many innings a pitcher may pitch. Teams may also pinch hit for pitchers. The student representing the former pitcher could represent the new pinch hitter.

   d. All Star Games: Let students pick the best possible players from each league and then have an All Star Game.

The New York Knickerbockers were the first team to wear baseball uniforms. In 1851 they appeared wearing dark blue trousers, white shirts, and straw hats! The baseball uniform has gone through many changes since those early days. Pictures from the 1940s show baggy pants, which became much more tight-fitting in the 1960s. Colors have also changed. Bright colors were not introduced until 1962, when the Kansas City Athletics wore green and gold uniforms. Within a few years, other teams were wearing bright colors, too!

Color can make a big difference in the appeal of a uniform and what it represents. Some meanings commonly associated with colors are:

- **White**: strength, purity, innocence
- **Black**: strength, death, fear
- **Yellow**: life, sun, truth
- **Red**: liberty, love, life
- **Purple**: royalty, honor
- **Blue**: truth, protection, strength
- **Green**: happiness, good fortune, growth
- **Brown**: pleasure, humility

If you were to design a baseball uniform, what colors would you choose? Why would you choose them?

What would you name your team?

What symbols would you use to represent your team? Why?

Using your colors and symbols, design a new baseball uniform for your favorite team!

**Challenge Project**: Create a pictorial timeline showing the changes in uniforms over the years.

**Source**: Donruss Learning Series
Activity: Out In Left Field

Proficiency/Indicator: Identify and use appropriate units of measurement.

Mathematics: Yardsticks, meter sticks, trundle wheels, tape measures, drawing paper

Materials:

Directions:

1. Divide students into teams of two or three per group. Some students should measure the baseball field using the customary unit of measure for length and other students should use the metric linear unit of measure.

2. Measurement of the baseball field should include the distance from home plate to first base, first base to second base, second base to third base, third base to home plate and home plate to the pitcher's mound.

3. After all the dimensions have been obtained, students in their groups should make a scale drawing of the baseball field.

4. If a baseball field is not available for measurement, students can research the information using reference and library books and then make a scale drawing using the obtained data.
Activity: Fraction Baseball

Proficiency/Indicator: Mathematics

Perform the four fundamental operations on whole numbers, fractions, and decimals.

Materials: A game board showing a baseball field, with various fractions labeled (see attached):

Two dice (red and white) with the following fractions written on their faces:

"RED" — 5/7, 8/9, 2/3, 7/10, 4/5, 5/6 and
"WHITE" — 1/6, 1/3, 2/5, 4/9, 5/8, 1/4

Tokens that allow players to advance on the bases.

Directions:

1. Players take turns rolling the dice and subtracting the fraction shown on the white die from the fraction on the red die.

2. The player then finds the answer on the field and advances his or her token the number of bases designated. If a fraction is labeled "player out," the player loses a turn. Once a player reaches home plate, he or she scores one run (one point). (Note: For example, if a token is on second base and a player rolls a home run, the token is advanced four bases — the player receives one point and ends up on second base again.)

3. The player who has scored the most runs at the end of the game is the winner. The number of innings to be played or a time limit can be set by the teacher.

4. The game can be played with addition, multiplication, and division of fractions. The same fractions on the dice can be used, but the answers on the field should be changed.

Activity: Call 'Em Like You See 'Em

Proficiency/Indicator: Language Arts

Materials: Video (VCR) tape of a baseball game

Directions:
1. Speak expressively by varying volume, rate, and information.
2. Students watch game (no audio) and plan how they would broadcast (play radio sports broadcaster) for a series of plays. They can use notes or do it impromptu.
3. Tape students' broadcasting.
4. Students listen and critique their broadcasts.
Activity: Casey At The Bat

Proficiency/Indicator: Language

ArtsInteract with a variety of printed materials e.g., poetry.

Recognize rhyme scheme.

Be curious about unfamiliar words and use dictionary to determine meaning.

Understand and bring meaning to reading by paraphrasing.

Materials: Poem, activity sheets (attached)

Directions:

1. Students read poem silently.

2. Ask a student to read orally a stanza at a time.

3. On the blackboard and with student input write a sentence that paraphrases each stanza i.e., Stanza 1 - Mudville was losing the game two to four in the ninth inning with two men out.

4. Pass out vocabulary sheets. Students working in pairs, locate the vocabulary words in the poem and circle. By using context clues, predict the meanings of the words.

5. Discuss with class - assign words to look up in dictionary if there are discrepancies.

6. Discuss rhyme scheme of poem a,a,b,b.

7. Students complete rhyme scheme sheet.
CASEY AT THE BAT

It looked extremely rocky for the Mudville nine that day,
The score stood two to four, with but one inning left to play.
So, when Cooney died at second, and Burrows did the same,
A pallor wreathed the features of the patrons of the game.

A straggling few got up to go, leaving there the rest,
With that hope which springs eternal within the human breast.
For they thought: "If only Casey could get a whack at that."
They'd put even money now, with Casey at the bat.

But Flynn preceded Casey, and likewise so did Blake,
And the former was a pudd'n, and the latter was a fake.
So on that stricken multitude a deathlike silence sat;
For there seemed but little chance of Casey's getting to the bat.

But Flynn let drive a 'single,' to the wonderment of all.
And the much-despised Blakey "tore the cover off the ball."
And when the dust had lifted, and they saw what had occurred,
There was Blakey safe at second, and Flynn a-huggin' third.

Then from the gladdened multitude went up a joyous yell-
It rumbled in the mountaintops, it rattled in the dell;
It struck upon the hillside and rebounded on the flat;
For Casey, mighty Casey, was advancing to the bat.

There was ease in Casey's manner as he stepped into his place;
There was pride in Casey's bearing and a smile on Casey's face;
And when responding to the cheers he lightly doffed his hat,
No stranger in the crowd could doubt 'twas Casey at the bat.

Ten thousand eyes were on him as he rubbed his hands with dirt,
Five thousand tongues applauded when he wiped them on his shirt;
Then when the writhing pitcher ground the ball into his hip,
Defiance glanced in Casey's eye, a sneer curled Casey's lip.

And now the leather-covered sphere came hurtling through the air,
And Casey stood a-watching it in haughty grandeur there.
Close by the sturdy batsman the ball unheeded sped;
"That ain't my style," said Casey. "Strike one," the umpire said.

From the benches black with people, there went up a muffled roar,
Like the beating of the storm waves on the stern and distant shore.
"Kill him! kill the umpire!" shouted someone on the stand;
And it's likely they'd have killed him had not Casey raised his hand.

With a smile of Christian charity great Casey's visage shone;
He stilled the rising tumult, he made the game go on;
He signaled to the pitcher, and once more the spheroid flew;
But Casey still ignored it, and the umpire said, "Strike two."

"Fraud!" cried the maddened thousands, and the echo answered "Fraud!"
But one scornful look from Casey, and the audience was awed;
They saw his face go stern and cold, they saw his muscles strain,
And they knew that Casey wouldn't let the ball go by again.

The sneer is gone from Casey's lips, his teeth are clenched in hate,
He pounds with cruel vengeance his bat upon the plate;
And now the pitcher holds the ball, and now he lets it go,
And now the air is shattered by the force of Casey's blow.

Oh, somewhere, in this favored land the sun is shining bright,
The band is playing somewhere, and somewhere hearts are light;
And somewhere men are laughing, and somewhere children shout,
But there is no joy in Mudville - Mighty Casey has struck out.

Ernest Lawrence Thayer
Work in groups. Locate words from the vocabulary list in the poem and circle. Using context clues predict meaning of the word.

This poem uses a, a, b, b as a rhyme scheme. Fill in the rhyming words from the poem.

Activity: Where in the U.S. is Tommy LaSorda?

Proficiency/Indicator: Examining patterns

Science

Materials: Maps and list of major league baseball teams (map attached)

Directions:

Give each group of students a map of the United States and a list of major league baseball teams. Have each group:

1. Locate each team in the correct state.

2. Select a favorite team and research players, name of their stadium, year they were founded, outstanding players (past and present), etc.

3. Write a letter to the team requesting brochures, information about players, batting averages of each player, pitching records, and other important information.

4. Design a display area in classroom to share pictures, baseball cards, posters, letters, VCR tapes, brochures, etc.

WARM-UP PITCHES
HONORING THE BEST

Purpose:
To develop understanding of the top honors in baseball and build sportsmanship among students.

Materials:
Sportsmanship Hall of Fame Chart, Good Sportsmanship Award Certificates (both attached)

Directions:
1. Share the attached background information with students. Discuss the importance of sportsmanship, as well as skill, in being an outstanding teammate.

2. Work on the goal of developing sportsmanship as a class. Direct the students to complete the All-Time Winners hand-out. Post a chart entitled, “Sportsmanship Hall of Fame,” and ask students to nominate classmates who have a winning attitude and deserve a place in the Hall of Fame.

3. Add students’ names to the chart as they are nominated, and give each student a copy of the Good Sportsmanship Award Certificate.

Background Information for the Teacher . . .

Following the World Series, several baseball players are given awards for excellence. The Baseball Writers Association of America chooses the winners. The outstanding player in each league is awarded the MVP or Most Valuable Player award. The American League began this tradition in 1922, honoring George Sisler of the St. Louis Browns. In 1924 the National League’s first MVP was chosen: Dazzy Vance of the Brooklyn Dodgers. Frank Robinson is the only player to win the MVP in both leagues. Playing for the Cincinnati Reds in 1961 he was chosen National League MVP, and in 1966 he was the American League MVP when he played for the Baltimore Orioles.

The Cy Young Award is given annually to the outstanding pitcher in each league. This award is named after Denton Ture “Cy” Young. From 1889 through 1911, Young pitched for the Cleveland Spiders, St Louis Cardinals, and the Boston Pilgrims. He won 511 games, the all-time record.

The Gold Glove Award was established to recognize excellence in fielding. This began in 1957, and each year a trophy is given to the outstanding fielder at each position.

The Rookie of the Year Award recognizes the outstanding first-year player in each league, on the basis of all-around performance. Jackie Robinson of the Brooklyn Dodgers was the first to receive this title in 1947.
The Triple Crown is one of the rarest awards in baseball. To win this award, a player must lead the league for the season in three categories: batting average, runs batted in, and home runs. Only nine players have won the triple Crown. The last winner was Carl Yastrzemski in 1967.

The all-time greats of the sport are elected to Baseball’s Hall of fame. Since the Hall of Fame began in 1936, more than 290 players have been chosen. To be eligible, a player must have played in the major leagues for 10 years and must be retired for at least five. The player must receive 75 percent of the votes cast by 10-year members of the Baseball Writers Association, the Baseball Veterans Committee, or the Negro Leagues Selection Committee. The Hall of Fame is part of The National Baseball Museum and Hall of Fame in Cooperstown, New York.

You’re A Good Sport

ALL-TIME WINNERS! - Student Handout

Many awards are given each year to honor players demonstrating excellence in baseball. Some of these are . . .

MVP
The Most Valuable Player award, given to the outstanding player of each league.

CY YOUNG AWARD
Outstanding pitcher in each league.

GOLD GLOVE AWARD
Excellence in fielding, given annually to the outstanding fielder at each position.

ROOKIE-OF-THE-YEAR AWARD
Outstanding first year player in each league based on all-around performance.

TRIPLE CROWN
Rare! Player who leads the league for the season in three categories: batting average, runs batted in, and home runs.

BASEBALL HALL OF FAME
Awarded to all-time greats who have been retired for at least five years and played in major leagues for at least 10 years.

Just as important as a player’s skill in a sport, are his attitude and ability to work as a team member. Write a paragraph describing what it means to be a good sport and watch for classmates who deserve this recognition in the coming weeks!

GOOD SPORTSMAN AWARD

Presented to

Who knows that how you play the game is more important than winning it.

Awarded by ____________________ on ____________
Activity: Letter League
Proficiency/Indicator:
Language Arts
Materials:
Directions:

Follow accepted conventions of spelling.

Chalkboard, Chalk, baseball words (List attached)

1. Students divide into teams.
2. Students can select a single, double, or triple word to spell.
3. Alternate from one team to the other team.
4. Three outs (misspelled words for a team) takes one point away.
5. Give a Prize! i.e., leave two minutes early, a baseball card, etc.
   * You can give spelling list the night before if you want!

Directions:

1. Have popcorn, hot dogs, pop, crackerjacks, etc.
2. Students organize into teams and play a baseball or softball game.
3. If the weather does not allow a baseball or softball game to be played, the following commercial baseball games are available.

**Commercial Baseball Games**

- Baseball Strategy (Sports Illustrated)
- Status Pro Baseball (Sports Illustrated)
- Superstar Baseball (Sports Illustrated)
- All Star Baseball Game
- Strat-O-Matic Baseball
- Sure Shot Baseball Game
- Backyard Baseball
- Electronic Baseball Giant Screen

IF POSSIBLE, ATTEND A BASEBALL GAME AS THE GRAND FINALE FOR THIS BASEBALL UNIT!
BASEBALL RESOURCES

Using literature in the Extended Learning Program Classroom - There are a variety of ways to bring the exciting world of literature to your students, and below are some possibilities that you will want to consider.

Reading Aloud: Build time into your schedule (15-20 minutes minimum) to read aloud, reflect, and share feelings about the books you read with your students. Start each day by reading from a chapter book or picture book, and perhaps share from a poetry book before the day ends.

Independent Reading Time: Students should be allowed time to read self-selected reading material in their classroom. Even ten minutes of free reading a day has a positive impact on reading comprehension scores on standardized measures (Anderson, Wilson, and Fielding, 1986).

Book Buddies: Try pairing students with a book (based upon interest, not ability) and let them read the story or book together. This builds cooperation and sharing responsibility between the readers . . . and cuts the cost of books in half.

Literature Circle: Author, topic, and genre studies are just a few possibilities in which small groups of students can engage, and a good start for both teachers and students to break away from the basal reader and immerse themselves in literature.

I. Fiction

**And Don’t Bring Jeremy** by Marilyn Levinson, 1985, 122p b&w illus.

Finally starting to make friends in their new neighborhood, eleven-year-old Adam finds himself being put on the sidelines again because of some of the boys attitude toward his older, slightly neurologically impaired brother. The story is essentially introspective and will be enjoyed by mature readers.

On a major losing streak since a new player appeared on their rival baseball team, the McCarthy Roaders have high hopes that the street’s newcomers will add the skills they need. Fast-paced and full of humor, this baseball story also deals with fears and facing up to them.

**Benny, Benny Baseball Nut** by David A. Adler, Scholastic, 1987, 46p b&w.

Told by Benny’s sister, a better baseball player than Benny because he announces the game as he plays, usually with himself as hero, the story combines humor and baseball. But even baseball dreamers who are nuts about the game can succeed. Benny will be a small, but satisfying,
challenge for those readers who feel confident enough to leave picture books and go on to easy chapter books.

All Myron Saltz wants for his thirteen birthday is to be a Little League superstar and to skip his dreaded bar mitzvah in the fall.

**Fox Steals Home** by Matt Christopher, Little Brown, 1978, 178p illus.

Bobby Canfield has a difficult time while he strives to succeed at his favorite sport of baseball and at the same time become accustomed to life without his father—after his parents are divorced.

Coach Venuti has more problems with his team The Blazers than one could possibly imagine. But he has two ideas—one, that winning is more fun than losing, and two, that if they could begin to get some confidence in themselves they could play winning baseball.

Herbie Jones cannot get out of playing summer baseball, no matter how bad he is, because his uncle Dwight is the coach. Each short chapter finds Herbie in another funny situation as he works things out.

**Johnny No Hit** by Matt Christopher, Little Brown, 1977, 43p col illus.

Johnny Webb is afraid of Roy Burke, a neighborhood bully, and almost gives in to Roy's threats. But in the end Johnny decides he won't let that bully bluff him and gets the winning run for his team and against Roy's pitching.

A young female sleuth solves the mystery of her grandfather's baseball, autographed by Babe Ruth, that has been missing since 1928. She cleverly puts together clues, found in an old family scrapbook, that were left by the culprit-cousin who had hid the ball in the first place.

Two mice teams play a zany game of baseball long after the fans have gone home from the ballpark. Many surprises are included in this beginning reader.
Rosie's Double Dare by Robie Harris, Knopf, 1980, 111p. illus.

When a vacancy on her brother's baseball team occurs, Rosie thinks she has a chance to play. But she demands "shrimp rules." To get them, the boys require her to take a double dare which gets her into all sorts of predicaments. Ease of readability level may make this title useful in providing motivation for reluctant readers.

Hilarious account of the madcap adventures of a boy who always gets the uniform that is way too big, the baseball trophy for the most Improved Player of the Year, and into other hopeless situations. This is one of the funniest books around for this age group. There are no illustrations, but the scenes are vividly portrayed.

Ten-year-old Paul, who is great as a pitcher and loves it, discovers he has leukemia and is hospitalized. But he sneaks off and plays for the team and of course lands back in the hospital. Paul's outlook stays optimistic and courageous as the story deals plausibly with the problem he faces.

Something Queer at the Ballpark by Elizabeth Levy, Dell, 1984, 48p.

Gwen captures the culprit who stole Jill's lucky baseball bat. This slim book has colorful, cartoon-like drawings.

Now in the sixth grade, Jeremy finds the companionship of elderly Mr. J a welcome relief after school and baseball practice with a rigidly strict teacher. Lots of dialogue and largely likable characters keep the pace moving.

Forbidden to play ball in the house because she might break the lamp, wake the baby, smash the cake, or disturb the family, Debbie goes outside and bats away. After four strikes she makes a real hit; the ball goes through the window, breaks the lamp, wakes the baby, but misses the freshly baked cake.

Taunting by his team members because if his evident fear of the baseball is enough to send Josh
off to live with his father, new stepmother, and stepsister. Surprisingly easy to read, this will appeal also to less skilled and/or reluctant readers.

**Thank You, Jackie Robinson** by Barbara Cohen, Lothrop, 1974, 125p b&w illus.

Life, death, love, and baseball combine in the story of young Sam and Davy, about the then Brooklyn Dodgers and they share baseball talk, games, and matters important to a growing boy. Friendship and love are at the heart of this warm, tender, and sometimes humorous memorable reading experience.

Barry McGee has learned to hit so well that he is the respected hit-away batter for the Peach Street Mudders. But Barry has more to learn about baseball than he realizes. He must decide whether it is more important to win or to play fairly.

**Wrongway Applebaum** by Marjorie Lewis, 1984, 63p. b&w illus.

Known as the fifth grade clutz, Stanley Applebaum has been miserably aware for years that his classwork is mediocre and his athletic ability nonexistent. He does join the fifth-grade team sponsored and coached by his baseball-mad grandmother; but come the championship game, fast-running Stanley becomes a hero in reverse.

II. Nonfiction

Children are fascinated by the real world... and using attractive stimulating non-fiction books; books about real people, places, and things, begin to satisfy that innate curiosity.

Dividing students into research groups based upon their interest is a marvelous way to empower the learner as a researcher. Each student will be responsible for discovering information about their topic from a variety of sources, and presenting their new-found knowledge to their peers and parents. Below are some titles that you will want to include in your research area.

A good overview of the game of baseball with information on the equipment, rules, and statistics.

**Baseball Rules in Pictures** by G. Jacobs, Perigee/Putnam, 1985, 69p illus.

Captioned cartoon drawings explain the rules of baseball succinctly. References are made to the official rules which are appended. A good choice for a book talk.

Introduces the game of baseball with a format that features clear color photographs, large print, and very easy text. For the beginning player.

I Can Be a Baseball Player by Carol Greene, Children’s Press, 1985, 31p

This book gives a very simple, but well-done overview of the baseball profession. A chart in the beginning shows all the positions of the game; text tells the basics of the job - from training camps to the World Series.

Baseball Bat by H.I. Peeples, Calico/Contemporary, 1988, 22p color illus.

Humor and information are skillfully combined in this straightforward explanation of the manufacture of baseball bats from the growing of the trees and their selection by a forester to the finished product used by beginners and professionals.

A look at playing baseball through the eyes of a boy in his first year of Little League. Basics are carefully explained with the terms in boldface type. The realities of the game, exercises before practice, missing the ball, not getting the position you want, sitting on the bench, help balance the glories of meeting a professional player, and making a crucial play.

Asking the reader to make baseball managerial decisions for the World Series games by analyzing pertinent facts in an interesting approach to problem solving. The actual decisions made by the managers are supplied.

Baseball: It’s Your Team by Nathan Aaseng, Lerner, 1985, 103p b&w photos.

Challenges the reader to make the decisions in ten crucial situations then explains what major league baseball owners really did.

Hundred and Fiftieth Anniversary Album of Baseball by Harvey Fromemr, Watts, 1988, 96p. b&w illus.

Presents the history of baseball from before the turn of the century to modern times.

I Can Be A Baseball Player by Carol Greene, Children’s Press, 1985, 31p

Explains the basics of baseball for the youngest sports fan. Large print and colorful pictures will make this easy reader appealing to the baseball novice.
Follows the manufacturing of professional baseball bats from the felling of selected trees through the first shaping of the logs and on to the factory processes in the plant.

Focuses on the activities of the Little Mets of Brooklyn as they practice for their big game against the mighty Bombers.

Pitcher by George Sullivan, Crowell, 1986, 53p b&w photos and illus.
Little League pitchers will find the practical advice on essential skills helpful.

Spring Training by Henry Horenstein, Macmillan, 1988, 6p col. illus.
Explains the activities of spring training as the Boston Red Sox head for Florida. The rigors of practice and of exhibition games are reflected in full color photos that convey the spirit of the great American pastime.

Instructs neophyte baseball players in the fine art of hitting the ball. The format is easy to follow and the full page photos clearly define the attributes of a good hitter.

Take Me Out To The Ballgame by Dennis Fertig, Albert Whitman, 1987, unp. b&w illus.
Follows Ryan’s experiences as he attends his first major league baseball game with his father. The enthusiasm, wide-eyed wonder and occasional boredom are all authentic and will be easy for young fans to understand.

Basic rules of play and tips on playing better are given.

The history and idiosyncrasies of baseball for young fans.

Tom Seaver’s Baseball Card Book by Tom Seaver, Messner, 1985, 192p b&w illus.
Catalogs baseball cards with information on their history, printing, prices, and categories. A reference source for collectors of sports cards.

Simple account of the career of this famous baseball player. There is an emphasis on his determination to be a baseball star. It includes some quotes from Parker and intermittent black-and-white illustrations.

III. Biographies

Readers at the primary and intermediate grades and especially at the middle school level will be interested in reading about the lives of real people in order to find out more about themselves. There are many different kinds of famous people; sports heroes, movie and rock stars, historical and contemporary figures in the arts, politics, science, etc.

Suggest to your students to read about a famous person and compare and contrast that life with the students! Sharing opportunities might include dressing the character, book talking the biography, or preparing a game to help others learn more about the character.

Jackie Robinson: He Was the First by David A. Adler, Holiday, 1989.

Babe Ruth, Sultan of Swat by Charles Verral, Garrard, 1976.

Fernando Valenzuela: The Screwball Artist by Mike Littwin, Children's Press, 1983.

IV. Poetry and Humor

Using poetry in the Extended Learning Classroom - Students of all ages enjoy hearing the rhythm of poetry. Young children can independently read poetry with short phrases while it serves as a model for writing with older students. Poetry can be shared aloud with the whole class, purely for its aesthetic value; or a poet's work can be studied by a small group, looking for specific word usage, theme, topic, etc. The possibilities are endless!

Casey at the Bat by Ernest Thayer, Raintree, 1985, 31p.

Reveals the mighty Casey in his glory and defeat as the heroic baseball player strikes out in the crucial moment of the game.

Using riddle and joke books in the Extended Learning Classroom - Laughter makes the world go 'round, and riddle and jokes are a fabulous way to encourage the reluctant reader to pick up a book! These books allow for the teacher to discuss the multiple meanings of words and word play without the use of worksheets. Don't forget to include "Knock-Knock" jokes, limericks, tongue-twisters, etc.

This fine, cartoon-style illustrated collection of riddles and jokes about baseball players, teams, and other aspects of the game of baseball should appeal to young children who are interested in the sport.

V. Magazines

Sports Illustrated for Kids Time, Inc., P.O. Box 830607, Birmingham, AL 35283-0607.

Introduces children ages eight to thirteen to professional and amateur sports through articles and interviews with athletes.

Kid City, P.O. Box 53349, Boulder, CO 80322.

A general interest magazine for children ages six to ten, encourages reading and writing by focusing on unusual topics.
