This English pronunciation manual for adults was developed by teachers for teachers of English as a Second Language (ESL), specifically aimed at those who do not have training in linguistics or foreign language instruction. It is a compendium of methodologies used by ESL teachers and is not aimed at any particular foreign language learner. Chapters include an overview of the principles and theories of language; specific help on the individual sounds of English in words, phrases, and sentences; a listing of foreign language specific (from Arabic to Vietnamese) grammatical and syntactical linguistic interference that teachers may encounter; a supply of foreign language-specific practice sentences; and several practical, meaningful, and enjoyable basic pronunciation activities for students. A feedback survey for ESL teachers is included. Contains 23 references. (Adjunct ERIC Clearinghouse for ESL Literacy Education) (NAV)
ON SPEAKING TERMS

After using the manual, please share your thoughts, comments and ideas by completing and returning this survey to the above address.

Information about the Manual

1. What was your initial impression of On Speaking Terms?

2. Which sections were most helpful?

3. What was least helpful?

4. Are the descriptions of how the sounds are formed clear?

5. Did you modify, adapt, or add to the sentences in Sec. III?

6. Did your students find the materials helpful?

7. How consistently have you used the book?

8. Are there other languages you would like to see added?
9. Please provide other recommendations, ideas and concerns.

**Professional Information**

1. What level of ESL do you teach?

2. How many hours per week does your class meet?

3. What kind of certification do you have?

4. What kind of training do you have in linguistics/ESL/foreign language training?

5. How do you incorporate pronunciation practice in your classroom activities?

6. As an ESL teacher what are your professional concerns or needs?

7. How can the Resource Center assist you in meeting those needs?

8. What ESL staff development topics would you recommend?

Special Thanks To . . . .

Jim Bowling, Assistant Director of Vocational and Career Education, Adult Basic
and Literacy Education, and his fine staff of consultants.

Delores Tocco Tekieli, Director of Community Education, Euclid City Schools,
and Project Administrator.

Our Advisory Board:

Anne Klein, Cleveland Public Schools
Sarah Nixon-Ponder, Assistant Director of Ohio Literacy Resource Center
Ellie Nurre, ESL Instructor

And of course, Mary Beth Quinn, Northeast ABLE Resource Center Assistant,
who will have the word "schwa" indelibly etched in her heart forever.
This project was supported by the United States Department of Education and the Ohio Department of Education with funds provided under Section 353 of the Adult Education Act, P.L. 100-297 as amended. The opinions expressed herein do not necessarily reflect the position or policy of the United States Department of Education or the Ohio Department of Education, and no official endorsement by these offices should be inferred.
The purpose of this project was to provide ESL teachers with a reproducible pronunciation manual. ABLE ESL teachers often do not have training in linguistics and foreign language instruction or, if they do understand the importance and mechanics of language instruction, they don't often have access to classroom sets of pronunciation books. We hope this project fills that void.

A secondary purpose of this project was to offer an opportunity to ESL teachers to share their talents and experience, collaborative learning at its best. The teachers applied and were chosen because of their expertise, experience and enthusiasm for the project. This is a manual written by ABLE/ESL teachers and for ABLE/ESL teachers. It is an attempt to simplify and de-mystify the complicated field of linguistics. We purposely avoided jargon and oversimplified where necessary. We may occasionally step on some linguistic toes, but in the process we hope we have produced something that is useful, simple and helpful.

With the possible exception of the day Marianna, my wonderful Brazilian student, who after weeks of trying finally heard the difference between "Tuesday" and "Thursday," nothing in my personal experience has brought me greater pleasure. It was a rare privilege to share and work with such a talented group of professionals.

We have included a survey in the manual so our collaborative efforts can extend to you, the user. Such field based research will be helpful in future projects. Please share your comments, experience and ideas.

G. W. G.
TO THE TEACHER: Book Design

Section I - An Overview of Language

Instead of technical terms and abstract theories, the principles are explained in commonly-used language. Definitions for these ideas are written so that additional resources should not be necessary to obtain a basic understanding of the term.

We chose to err on the side of simplicity when selecting terms for use in the manual. Our purpose was not to reinvent the wheel, but rather to give an overview of some of the practical pronunciation techniques we have found to be effective.

Section II - Individual Sounds of English

Some sounds were combined, as they are so similar in pronunciation that a non-native speaker would not be able to discern the differences. Included for each sound are:
- common names (short a)
- the phonetic symbol
- common spellings of the sound
- an illustration of the mouth shape
- a key word that contains the sound

Production - Production describes the physical aspects of making the sound in non-technical terms. Sounds that are related, such as the voiced sound "d" and the voiceless sound "t," are compared when applicable.

Words - The words demonstrate the sound in the initial, final, and medial position, starting from the least difficult to the most difficult position to produce. Several spelling variations for the sound were included when possible.

Contrasting pairs - This section provides a comparison of the target sound with sounds that might easily be confused by the student, or that may be substituted in error. For example, the voiceless "th" sound in the initial position might be heard or reproduced by the student as possibly a "d," "t," or "z" sound. By comparing these sounds, the student may be able to distinguish the target sound from similar sounds.

Phrases - The sound is repeated in a set of ten phrases which are used in everyday English. The phrases were selected both for the repetition of the sound and for creating a basis for conversation. They are also rich vocabulary and idiom practice.

Sentences - This section extends the practice in context. Even if the sound is not difficult for all students, they will still benefit from the spelling review and vocabulary practice.
Section III - Linguistic Interference

Linguistic interference is the grammatical and syntactic "baggage" that a non-native speaker carries along when he or she is attempting to learn a new language. For example, if a teacher who speaks no Vietnamese had a Vietnamese student enter the class, the teacher would be able to understand why the student has trouble with multi-syllable words in English, word order, etc.

There are also characteristic pronunciation difficulties that a non-native speaker will bring to the English class as part of this linguistic interference. If a Turkish student comes into class, more than likely that student will have difficulty pronouncing the "w" sound. With this knowledge, the teacher can better understand and guide the student to better pronunciation.

Section IV - Practice Sentences

Language-specific exercises for each of the twenty targeted languages can be reproduced and given to the student for practice in both hearing and producing the sound. The sentences can be used quickly and easily so that the student has effective and individualized material to practice at home and in class. They can be referred to repeatedly as individual practice.

Section V - Pronunciation Activities

These basic activities can be utilized in the course of a language class to reinforce pronunciation lessons. The activities may be short and simple, but they offer the English student an opportunity to repeat problem sounds in a safe, structured environment. It is hoped that these activities will also inspire teachers to incorporate pronunciation practice as a regular part of their classroom routine.

PLEASE NOTE: FEEL FREE TO COPY ANY SECTION OF THIS BOOK.

SECTION V . . . . . . . . . Pronunciation Activities and Bibliography
PRONUNCIATION

Introduction

The purpose of this section of the book is to introduce key concepts and terms to ABLE/ESL teachers.

Teaching ESL is, first and foremost, foreign-language instruction. We are not English teachers, we are foreign-language teachers—a critical distinction. As English teachers we tend to focus on the structure of the language. As foreign-language teachers we focus on communication. In other words, if our students can't be understood when they speak, all the irregular verb practice and non-count noun discussions in the world won't help.

Many of us have a limited foreign-language background. This section is an overview of the study of language, what elements of language are important, and a list of key terms.

Overview

Linguistics is the study of language as a system of communication. Phonetics is the study of sounds. Linguists agree on this much (usually). They don't, however, agree on much more (or so it seems). There is great disagreement over how languages are learned or how they should be taught. There is even disagreement over how many sounds exist in the English language and what symbols should be used to represent them.

Teaching pronunciation is complicated by students' native languages, their age and their ability to learn a language. As with math, some students have more difficulty than others; even their personality can affect their outcome. (For example, an outgoing person may take more risks and speak with strangers more easily.) Finally, practice is critical. Too often, students are surrounded by their families and friends and don't have opportunities to practice English.
There are many approaches to teaching pronunciation and speaking skills. The ultimate goal is to improve communication through suprasegmentals (a group which continues over more than one sound using stress, intonation, etc.). To be understood, the student must be able to use the music of the language as well as the sounds. In order to teach pronunciation and communication skills, some basic understanding of language and English is needed.

Spelling and Pronunciation

English is not a phonetic language (i.e., one letter does not always represent a specific sound). Some languages are phonetic and this can confuse students. Don’t assume your students understand this fact. By explaining that English is not phonetic, you can allay a lot of confusion. In other words, explain that words like dough, tough, thought and bough exist in English. The language is crazy; the students aren’t.

However, also explain that there are patterns of spelling. In fact over 80% of our words fit into these patterns. For example, the sound "ow" is consistently spelled either ow (cow) or ou (as in house). Phonics (the relationship between letters and sound) is very different from the linguistic term phonetic. So while students cannot look at a word and know automatically how to pronounce it, if they hear a sound they can learn the predictable ways to spell it.

Vowels and Consonants

While consonants usually are consistent in sound, vowels are not. There are more vowel sounds than letters to represent them. (v = vowel, c = consonant)

Long vowels usually require two letters for the sound.

- meat or meet
- mete
- vv
- vcv

Short vowels usually require only one letter.

- met
- not
- cvc
- cvc
Short vs. long vowels are the most difficult sounds for students to hear and reproduce. For example:

- hat vs. hate
- mat vs. mate
- not vs. note

Spend time explaining the difference between long and short vowels. This helps their pronunciation and does wonders for their spelling. Explain in simple terms that a long vowel says the name of the letter (ex. eat). It usually takes two letters to make a long vowel sound. "The first (vowel) does the talking, the second does the walking" - i.e. the second vowel is silent. Short vowel sounds are usually spelled with only one letter. Short vowel sounds are hard for most students to hear and produce. They are the "ugly" sounds of English; the grunting sounds that sound so unfamiliar to many students.

**Sounds and Production**

**Vowels** are sounds made with unrestricted flow (from teeth, lips etc.). All vowels are voiced (use vocal chords). There are front, middle and back vowels.

**Consonants** are sounds which are interrupted by teeth, lips, tongue or soft palate (top of the mouth). They may be voiced (use of vocal chords) or unvoiced (no use of vocal chords). They may stop (as in p, b, a, k, g, t) or they may continue, or flow (as in m, n, f, v etc.)

**Voiced vs. unvoiced** - "B" and "P" are produced in exactly the same way. The difference is that one is voiced and one is unvoiced. Have students place their hands on their Adam's apple (or over their ears) to feel the difference. Voiced sounds use vocal chords, unvoiced do not.

**Nasals** (m, n, ng) - Some sounds are made with air pressing through the nose, not the mouth. (Have students hold their noses shut to hear the differences.)
Use the descriptions of productions of sounds in Section II to help students use the right parts of their mouth to produce a sound. **Aural skills** (learning to hear a sound) and **oral skills** (learning to produce a sound) are an essential and significant, but small part, of communication.

Technical terms such as fricatives, glides and the precise pictures are available in any good pronunciation manual. Some teachers find them useful; many do not. A bibliography is attached if more information is needed.

**Production in Context**

**Phonology** (the study of sound patterns) is the next step in pronunciation. Sounds are sometimes pronounced differently according to their position in a word or sentence. Students should be aware of these patterns. The "t" in toe is pronounced differently from the "t" in little.

**Aspiration** is the burst of air from some sounds (p, t, k). However, when (for example) an "s" comes before a "p," the air stops and the sound is not aspirated. Try these words:

- pot
- spot
- to
- stew
- pier
- spear

Some sounds are aspirated more in other languages and students may need to practice this.

**Flapping** - when a "t" sound is placed between an accented and unaccented vowel, it often becomes a "d" sound. Examples are:

- butter ("budder")
- putting ("pudding")
- patio ("padio")
- got to go ("godda go")

**R-Coloring** - The consonant R following a vowel can affect the pronunciation of that vowel. The vowel sound becomes obscured and is changed by the "r" influence. Examples are:

- ear
- beer
- bear
**Digraphs** are two or more letters that join together to make a new sound.

Digraphs include:

- **ch** choice
- **ng** ring
- **sh** shoe
- **th** thing
- **th** this

These may be new sounds for students and may require extra practice.

**Consonant Clusters** (blends) are common letter combinations such as spr, st, spl (initial) or nk, lk, nd (final). For a variety of reasons, these can cause great difficulty for students. Students may add a vowel ("street" becomes "estreet" to a native Spanish speaker) or they may delete a consonant ("green" becomes "geen" or "fast" becomes "fat"). These are language-specific problems.

**Stress** (more commonly known as accent) occurs in syllables, words and sentences. Each is important for pronunciation.

- Stressed vowels are longer and louder in English. (In many languages they are only louder.)
- Almost all unstressed vowels become the same reduced vowel sound.

- [schwa (uh)]. This causes a great deal of trouble for students, as many languages do not have reduced (or neutral) vowels. The unaccented vowel (whether it's a, e, i, o or u) becomes an "uh" (reduced) sound in contextual spoken English. In other words, the word turnip when pronounced alone may be "turn-ip," but in a sentence or phrase becomes "turn-up" as in "The turnip is large."

Some examples are:

- appeal (uh-peal)  
- college (coll-uhge)  
- tulip (tul-uhp)

- syllable - stress on two syllable words is generally:
  - noun - first syllable  
  - verb - second syllable
English as a Stress-Timed Language

English is a stress-timed language, in which we stress content words not syllables. Many other languages such as French are syllable-timed in which speech forms a regular rhythms according to syllables. Content words include:

- nouns
- main verbs
- adverbs
- interrogatives
- adjectives
- interogatives

Function words which are not usually stressed include:

- articles
- auxiliaries
- pronouns
- prepositions
- conjunctions

This difference in stress pattern is very important. Speakers of Hindi, for example, may be very difficult to understand more because of the differences in their stress pattern than their "accent."

Intonation is the music of the language, or the rise and fall of the pitch. Generally in English, pitch falls at the end of a sentence and rises at the end of a question. Example:

I'm going home.
Am I going home?

Linking is the connecting of words or word groups together. Classic examples include:

- wanna (want to)
- gonna (going to)

Often in English we connect the last sound of a word to the beginning sound of the next word. So in this sentence, "The boy walks fast" becomes "The boy walk-sfast." We don't carefully pronounce every word or syllable in English. This makes it difficult for students to understand us and to reproduce our pronunciation patterns. Teaching some of the common production "tips" such as linking (wanna, whaddya etc.) can make a significant difference in students' ability to understand and be understood. Besides, they love practicing them. Whaddya Say? by Weinstein is a good source.
Other Linguistic Terms

Syntax is word order. The usual pattern in English is:

Noun  Verb  Object

This is not necessarily true of all languages. Understanding the basic English word patterns helps all facets of students language skills (i.e. reading writing, speaking, and listening).

In a declined language the form (and spelling) of the word changes as its grammatical function changes. For example, in Russian the word book as a subject is kniga, but book as a direct object is knigu. Students need to know English is not a declined (inflected) language.

Phoneme means sound.
Grapheme means letter.
Morpheme means word.

One of the difficulties in linguistics is that while it is a science, it is also an art. Language is fluid and constantly changing and technical terms become overused and confused with laymen's terms. Accent, for example, has taken on many meanings other than stress; phonics and phonetics are often interchanged and then there is the poetry of a language. How do you "explain" the beauty of Shakespeare or the genius of Dr. Seuss?

This section presents the science of the language. However, also keep in mind in that you are teaching the art of language. Help your students understand that a language is more than a collection of words. Help them understand the art as well as the science.
PRONUNCIATION TIPS

English has roughly 44 sounds (depending on their classification). All languages combined have roughly 100 sounds. Children through the age of about adolescence maintain the ability to natively produce most sounds. Among all the other things that go haywire at puberty, the ability to distinguish non-native sounds diminishes. **If you can't distinguish a sound, you can't duplicate it.** Here are some basic tips

**Step #1**
Teach your students to hear the sounds of English (Section II).
Students must hear the sounds before they can repeat them.
Although some of the sounds exist in their language, some do not.

**Step #2**
Teach your students to produce the sound.
Physically explain how the sound is made (put your teeth on your bottom lip, etc.). Use a mirror, exaggerate, compare and contrast.
The production of each sound is explained in Section III. Practice the sound in all three positions (initial is easiest, medial the most difficult specific to learn).

**Step #3**
Identify difficult sounds for the student.
Read through Section III on linguistic interference. Identify which sounds a Japanese student, for example, has trouble producing and explain those problem areas to the student. Highlight them, exaggerate them, make the student aware of them.

**Step #4**
Practice, Practice, Practice
Once a student can physically hear and produce the sound, have him/her practice in context. Language, after all, does not come in isolated sounds. Use section IV (Language-specific sentences) over and over again. Tape-record the students if possible so they can hear themselves improving. Tape-record yourself so they can model stress and intonation. It's important, though, that students develop a sensitivity and awareness to the sounds and patterns they need to correct.
Step #5  Make pronunciation practice an integral part of your class. Section V of the book offers a variety of ways to practice pronunciation. Make a conscious effort in each class to devote time to the practice of pronunciation.

Elements of Pronunciation

Age, language ability and desire will affect the students' progress. Few adults will completely reduce their accents. (The goal should not be to eliminate the accent, but to help the student be more easily understood.) Concentrate on the sounds and/or patterns of speech which interfere with them being understood.

More importantly, get your students to speak. Encourage discussion in your class where they feel "safe" making mistakes. Give them speaking assignments. Gently correct them in the course of discussion. Give them topics for discussion (next Tuesday we'll talk about favorite foods) so they can prepare and learn the vocabulary.

(Be aware of ESL teachers' greatest hazard - Don't talk too much.)

A Final Note . . .

Humor is one of the highest levels of language, one of our most basic needs and one of the most neglected areas of study. Do what you can to integrate humor into your classroom. Tell jokes. Teach you students how to tell a joke. Share funny stories. Laugh out loud and encourage your students to do so. Humor can bridge a lot of oceans and make us all feel more comfortable and more easily understood.

A Very Final Note . . .

May my oversimplifications and/or deletions not disturb the eternal rest of my late, great linguistics professor, Dr. Bob Phillips.

. . . And may the "schwa" be with you.
Introduction

In English, the 26 letters of our alphabet can create between 40 and 44 basic phonemes (sounds). English is not a phonetic language (one sound is represented by one symbol), unlike Russian or Spanish which follow the alphabetic principle quite closely. In English, **spelling is not pronunciation.** More words in English are not spelled phonetically than words that are.

Knowing some of the spelling/phonetic inconsistencies can help students understand why they are having trouble in spelling or pronunciation. For example:

- A sound can be represented by more than one spelling, and the /f/ sound in *fan, photograph, and rough.*
- The same letter can represent several different sounds as the /o/ in *women, cone, got, love, and cork.*
- Two letters may be combined to represent one sound, as in *watch.*
- "Silent" letters represent no sound at all, as in *bake.* The "silent" letters may also influence the sound of other letters, as the long a sound in *bake.*

Moreover, because English has borrowed so many of its words from other languages, a systematic method of spelling and pronunciation cannot be applied. There is also the problem of regional dialects, which introduce additional discrepancies between spelling and sound.
Section II is designed to be used as a workbook of speech drills for use by students of all levels. Each page begins with a key word that represents a "target" sound in English. Common spellings are also listed for each target sound. Examples of the sound in different positions follow. The section on contrasting pairs is set up to develop the students' ability to discriminate the difference between the target sound and similar sounds. In this way we begin to introduce the idea that sounds are not made in isolation but are part of a specific context. The phrases and complete sentences demonstrate how the sounds are used in common speech as well as giving students practice in sound production.

Teachers are encouraged to add their own words, phrases, and sentences to the list. By no means is the material assembled here comprehensive. We hope we have provided a firm base for additional exercises and practice.
Production of Short A:

The tongue is relaxed, flat, and low behind the lower teeth. The bottom jaw drops and the sound is voiced (low position).

Words:

<table>
<thead>
<tr>
<th>(INITIAL)</th>
<th>(MEDIAL)</th>
</tr>
</thead>
<tbody>
<tr>
<td>as</td>
<td>fat</td>
</tr>
<tr>
<td>add</td>
<td>dad</td>
</tr>
<tr>
<td>attic</td>
<td>hat</td>
</tr>
<tr>
<td>answer</td>
<td>sad</td>
</tr>
</tbody>
</table>

Contrasting Pairs:

at/eat                         mat/met                        map/mop
at/ate                         pan/pen                        cat/cot
and/end                        mass/mess                       hat/hate

Phrases:

cat in the hat
land on sand
magic hat
hand in hand
fat cat

answer the question
ants in your pants
Spanish class
adjectives and adverbs
ham sandwich

Sentences:

Fat Pat sat on the mat.
Ann and Max had candy.
Andy was sad because Cathy was mad.
### Production of Short E:

The relaxed tongue is in the middle of the mouth. The jaw and face are also relaxed. Open the mouth and drop the lower jaw slightly making a voiced sound (mid position).

#### Words:

<table>
<thead>
<tr>
<th>(INITIAL)</th>
<th>(MEDIAL)</th>
</tr>
</thead>
<tbody>
<tr>
<td>any</td>
<td>set</td>
</tr>
<tr>
<td>enter</td>
<td>men</td>
</tr>
<tr>
<td>energy</td>
<td>Wednesday</td>
</tr>
<tr>
<td>Emily</td>
<td>pet</td>
</tr>
</tbody>
</table>

#### Contrasting Pairs:

- end/and
- ex/ax
- Ed/add
- bet/bat
- set/sat
- men/man
- pet/pit
- wet/wit
- ten/tin

#### Phrases:

- set the table
- no energy left
- men's room
- guess again
- ready, set, go
- best friend
- bet your life
- dead-end
- Federal Express
- get ahead

#### Sentences:

- Emily entered the contest Wednesday.
- Ed likes eggs every day.
- November eleventh is Ellen's anniversary.
Production of Short I:

Raise the tongue high and to the front of the relaxed mouth. Open the mouth only slightly. Make a voiced sound (high position).

Words:

<table>
<thead>
<tr>
<th>(INITIAL)</th>
<th>(MEDIAL)</th>
</tr>
</thead>
<tbody>
<tr>
<td>it</td>
<td>sit</td>
</tr>
<tr>
<td>if</td>
<td>give</td>
</tr>
<tr>
<td>is</td>
<td>quick</td>
</tr>
<tr>
<td>interest</td>
<td>his</td>
</tr>
</tbody>
</table>

Contrasting Pairs:

<table>
<thead>
<tr>
<th>it/at</th>
<th>sick/seek</th>
<th>sit/set</th>
</tr>
</thead>
<tbody>
<tr>
<td>it/eat</td>
<td>pick/peek</td>
<td>hid/had</td>
</tr>
<tr>
<td>is/ease</td>
<td>fill/feel</td>
<td>hit/hot</td>
</tr>
</tbody>
</table>

Phrases:

bit my lip
knit mittens
pet the kitten
ship-shape
inner belt

Skinny dip
hit-skip
flip my lid
British English
in the city

Sentences:

Is it difficult?
Bill lives in the middle of the city.
Phil will sit still and take his pill.
Production of Short O:

The tongue is relaxed in a wide open mouth with the jaw dropped. The tongue is resting on the bottom of the mouth. The sound is voiced.

Words:

<table>
<thead>
<tr>
<th>INITIAL</th>
<th>(FINAL)</th>
<th>(MEDIAL)</th>
</tr>
</thead>
<tbody>
<tr>
<td>art</td>
<td>ma</td>
<td>hot</td>
</tr>
<tr>

<tbody>
<tr>
<td>are/ore</td>
<td>pot/putt</td>
<td>hot/hut</td>
</tr>
<tr>
<td>rot/rat</td>
<td>lock/luck</td>
<td>tot/taught</td>
</tr>
</tbody>
</table>

Phrases:

- hop scotch
- hot shot
- drop the mop
- odd jobs
- crop-top
- fox trot
- stop and shop
- hot spot
- hot spot
- 50 watt bulb
- ma and pa

Sentences:

- Usually October is not hot.
- "Artists are an odd lot," said Arthur.
- Bob and his father shop at the garden center.
Production of Short U:

The mouth is opened slightly and the tongue is relaxed. The sound is voiced.

<table>
<thead>
<tr>
<th>(INITIAL)</th>
<th>(MEDIAL)</th>
</tr>
</thead>
<tbody>
<tr>
<td>us</td>
<td>cut</td>

</tbody>
</table>

Contrasting Pairs:

- putt/pot
- cut/cot
- cup/cap
- bug/bag
- luck/lock
- tug/tag
- buck/book
- cuff/cough
- cut/caught

Phrases:

- under the sun
- ugly duckling
- undone
- enough is enough
- some fun
- mud puddle
- a month ago
- funny bunny
- cut the cake
- honey bun

Sentences:

- The ugly mutt jumped into the mud puddle.
- Honey buns cost too much money.
- Doug is as snug as a bug in a rug.
Common Spellings

- pain/pen
- pain/pin
- wait/wet
- raid/red

Phrases:

- pay day
- baby face
- main gate
- take a break
- bake a cake
- shake and bake
- make my day
- stay away
- wide awake
- potato pancakes

Sentences:

- Jane placed her daisies in the gray vase.
- Nate played with Jay all day.
- Katie ate cake from a paper plate.
Production of Long E:

The tongue is high leaving only a tiny space with the mouth almost shut. The teeth are close together with a tense chin and mouth. The lips form a smile and the sound is voiced.

Words:

<table>
<thead>
<tr>
<th>(INITIAL)</th>

Contrasting Pairs:

| eel/ill   | weak/wick | beat/built |
| sheep/ship| feel/file  | feel/fell  |
| meat/mitt | seat/sit   | meal/Mel   |

Phrases:

- tea and cookies
- peach tree
- be a sweetie
- agree with me
- three times a week

- keep the peace
- please be neat
- green beans
- lean on me
- breathe deep

Sentences:

Jeannie and Mandy teach reading to people.
"Bees can be mean and sting," said Steve.
Sleet falls every week of January.
Production of Long I:

The tongue is low in the mouth, then lightly touches the bottom front teeth with the tip. Lower the jaw and open lips wide. Raise jaw and make a voiced sound.

Words:

(INITIAL) (FINAL) (MEDIAL)
I tie diet
eye sky file
iris shy height
island reply invite

Contrasting Pairs:

I'll/oil height/heat bite/bit
tie/toil might/meet sight/sit
tie/tea time/team fight/fit

Phrases:

pie in the sky I cried and cried
sty in my eye I'm shy
high and dry fly by night
might makes right bye-bye
don't fight Friday, July 9th

Sentences:

I'm five foot nine.
I invited Iris for pie and ice cream.
The fire was inviting on a cold night.

bluegrass music

Sentences:

Ruth wanted new blue shoes for school.
Luke and Sue had a cool drink.
The bluebird flew due south.

* oo is sometimes classified separately from long u. cute (yoo) vs. boot (oo)
Production of OO:

Lips are pushed out and slightly rounded. The tongue is midway. A short voiced sound is made.

Words:

(MEDIAL)
book
woman
could
crook

Contrasting Pairs:
could/coal
could/cool
should/shoot
took/tool
full/fool
should/show
cook/kook
foot/food
soot/suit

Phrases:
push a cart
took a look
push and pull
look out
good looking

cookbook
shook up
took my book
catch the crook
wool coat

Sentences:

She shook her right foot.
You should use a cookbook.
The woman took a good look at the crook.
Production of OW:

The tongue is low and against the bottom teeth. The mouth is wide open, then closed, making a puckered shape. A voiced sound is made.

Words:

(INITIAL) (FINAL) (MEDIAL)
out    cow     pout
owl    now     house
hour    how     towel
ouch    allow   announce

Contrasting Pairs:

Production of OI:

Start with aw where the tongue is low and tense, the lips tight, and the jaw dropped. Slide into e by moving the tongue high and tensing the tongue and cheek muscles. The mouth pulls into a smile.

Words:

(INITIAL) (FINAL) (MEDIAL)
oil toy boil
oyster boy point
ointment joy voice
oink Roy appointment

Contrasting Pairs:

boy/blow
choice/chess
royal/roll

voice/vow
joy/jaw
oil/earl

toil/toll
foil/foul
coil/call

Phrases:

toys bring joy
boiling point
rubbing ointment
joyful noise
point it out

foiled again
boys will be boys
royal treatment
good choice
Detroit River

Sentences:

The toys brought joy to the boys.
Bring oil only to the boiling point.
After cooking oysters, wrap them in foil.
Common Spellings

|   |  
|-----------------|---|
| ir  | fir  |
| er  | mother |
| ur  | urban |
| or  | harbor |
| ear  | learn |
| R - controlled vowels *  |  

Production of ER Stressed & Unstressed:

Cheek muscles are tightened and make a voiced "err" sound from the throat.

Words:

- **(INITIAL)**
  - urban
  - earth
  - early
  - urge

- **(FINAL)**
  - doctor
  - harbor
  - father
  - sister

- **(MEDIAL)**
  - injured
  - curtain
  - work
  - surgery

Contrasting Pairs:

- stir/stay
- work/weak

**Production of AW:**

The tongue is tense and low away from the teeth. The lips are tense. The bottom jaw drops as you make a voiced sound.

**Words:**

(INITIAL) (FINAL) (MEDIAL)

| August   | paw    | call  |
| awful    | law    | bought |
| autumn   | draw   | wrong  |
| automatic| saw    | thought |

**Contrasting Pairs:**

| call/cole | saw/sew  | paw/pow   |
| hall/hole | taught/tot | gnaw/now |
| law/low   | caught/cot | awed/odd |

**Phrases:**

awful fall  bought a lot
lost cause  long fall
long order  Santa Claus
daughter-in-law  wrong number
call for help  automatic withdrawal

**Sentences:**

Paul took a long walk through the mall.
Auggie cut the lawn twice in August.
He thought Dawn was an awful cook.
Note:
Vowels occurring in unstressed syllables often become the neutral vowel sound "uh". This causes a great deal of confusion for students. In their native languages vowels do not often change like this. By carefully pronouncing each vowel, they change both the rhythm and the sound, becoming even less understandable. According to Dixson, students will be much better understood if the accented syllable is stressed strongly and all remaining vowels are obscured.

Production of Schwa (uh):
The lips are relaxed and open slightly, and the tongue is in mid-position. The sound is voiced.

Words:

<table>
<thead>
<tr>
<th>INITIAL</th>

Phrases:

- by the bay
- baby baboon
- remember Bill
- probably so
- big boy

Sentences:

- Bob will probably become a Boy Scout.
- Barbara buys fresh bread and butter from the baker.
- Betty's baby boy has blond hair and blue eyes.
Production of CH:

This sound is a combination of the t and the sh sounds. The front of the tongue is raised firmly to the gum ridge for the t sound. Lips protrude while the airstream is restricted there, the sh is added before releasing the ch sound. This gives a voiceless sound.

Words:

(INITIAL) (FINAL) (MEDIAL)
chair each picture
chance rich kitchen
change catch century
child watch nature

Contrasting Pairs:

cheap/jeep hunch/hunt choke/joke
churn/turn arch/art batches/badges
chin/tin etch/edge cheat/sheet

Phrases:

fat chance turn of the century
loose change chunk of cheese
made for each other pitcher and catcher
rich and famous cheapskate
watch out catch forty winks

Sentences:

A child can choke on a chunk of cheese.
Chuck paid for the church picture by check.
Choose the chicken sandwich for lunch.
Production of D:

The tip of the tongue is placed behind the upper front teeth on the front end of the gum ridge. The air is stopped briefly at the gum ridge and then released pushing the tongue away, which gives a voiced sound. T is identical but voiceless.

Words:

(INITIAL) (FINAL) (MEDIAL)

day bed leader
deed road president
does wood window
decide need modern

Contrasting Pairs:

dad/bad pedal/pebble drain/train
date/bait bride/bright ladle/label
dark/bark nod/not bad/bat

Phrases:

big deal third degree

down in the dumps laid an egg
past due divide the donuts
don't know good condition
daily dose under the weather

Sentences:

My wedding dress is old.
I heard a bird sing under my window today.
The old lady decided to do the laundry.
Production of F:
Hold the upper front teeth lightly against the bottom lip, and push air out. F is voiceless. V is identical but voiced.

Words:

<table>
<thead>
<tr>
<th>(INITIAL)</th>

</tbody>
</table>

Contrasting Pairs:

| face/vase | safe/save | half/have |
| fuse/views | life/live | belief/believe |
| fail/veil  | leaf/leave | fat/pat   |

Phrases:

- fame and fortune
- fifty-five feet
- fat chance
- funny feeling
- forget it
- flow freely
- fair-weather friends
- fresh coffee
- first place
- photo finish

Sentences:

Fred coughed and sniffed.
Frank fell off the front steps into the flower bed.
Professor Franklin photographed the firefly.
Production of G:

The tongue is raised in order to touch the back of the mouth. Air is released quickly, breaking the contact, which produces a voiced sound. K is identical but voiceless.

Words:

(INITIAL) (FINAL) (MEDIAL)
got big sugar
gave egg alligator
guide dog muggy
give bug igloo

Contrasting Pairs:

good/could bag/back grain/crane
goat/coat dug/duck glue/clue
guard/card peg/peck grow/crow

Phrases:

guessing game figure it out
go get it green grass
good as gold get along
give a gift great suggestion
ground hog go golfing

Sentences:

The green grass grows in August.
Greg guides the group by the golden gate.
The girl forgot to get sugar and eggs for her grandmother.
Production of H:

Open the mouth and push out a puff of air without vibrating the vocal cords.

Words:

Words:

(INITIAL)  (FINAL)  (MEDIAL)

king    sick    quickly
coat    music    mechanic
call    neck    doctor
can     book    discover

Contrasting Pairs:

call/gall  back/bag  clean/glean
curl/girl  bicker/bigger  crow/grow
cold/gold  tucking/tugging  frock/frog

Phrases:

of course  practice makes perfect
call me    cash a check
crystal clear  squeaky clean
well known fact  Christmas card
coffee cake  cook book

Sentences:

Carrying coal is back-breaking work.
The kitchen cook quickly cut a piece of chicken.
Cathy carries both cash and credit cards.
Production of L:

Before vowels, place the tip of the tongue on the upper gum ridge, just behind the teeth. The middle of the tongue is high. After vowels, the back of the tongue is high as the tip of the tongue touches the teeth. L is a voiced sound.

Words:

<table>
<thead>
<tr>

- count on me
- do not enter
- on the phone
- turn around
- not now
- once in a while

Sentences:

- No news is good news.
- Nick never wears new neckties.
- Ned enjoys his New England chowder without any onions.

* common silent letters
Production of NG:

The back of the tongue moves toward the back part of the roof of the mouth and touches it firmly, which forces the air to flow into the nasal cavity. This results in a voiced sound.

Words:

(INITIAL) (FINAL) (MEDIAL)
king jungle angry
long linger tango
among coming

Contrasting Pairs:

hung/hum rung/rug hung/luck
bang/bag hang/ham hang/hand
clang/clam bang/bank ring/rig

Phrases:

bring it along single file
among old friends king of the hill
hang up long ego
everything looks great jungle gym
think Spring young and strong

Sentences:

The English language makes me angry.
The king has a single ring on his finger.
The singer sang songs of Spring.

* nk is often added as a variation of this sound.
Production of P:

Both lips are closed, the air is stopped at the lips, then the lips open. There should be a puff of air that comes out. The sound is voiceless. B is identical but voiced.

Words:

</tbody>
</table>

**Contrasting Pairs:**

- tank/thank
- team/theme
- tick/thick

**Phrases:**

- take turns
- don't tell
- too tight
- stand tall
- tattle tale

**Sentences:**

- Ted's hot temper got him into a fight.
- Sometimes Tracy talks too much.
- Our computer training material is terrific.

* common silent letters
Production of TH:

Place the tip of the tongue firmly against the cutting edge of the upper front teeth and puff air out. While the air is pushed out, make a voiceless sound without making the vocal cords vibrate. Hint: Have the student exaggerate by sticking the tongue out more than necessary.

Words:

<table>
<thead>
<tr>
<th>INITIAL</th>
<th>FINAL</th>
<th>MEDIAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>thin</td>
<td>earth</td>
<td>healthy</td>

</tbody>
</table>

Contrasting Pairs:

- thin/tin
- through/true
- thirst/first
- death/deaf
- moth/moss
- oath/oat
- three/free
- thrill/frill
- mouth/mouse

Phrases:

- think thin
- thank goodness
- well thought out
- three-thirty
- three in one
- happy birthday
- both of us
- take a bath
- through thick and thin
- healthy diet

Sentences:

- I think the thimbles will fit my thumb.
- He thanked both of us for everything.
- Theo's birthday party is on Thursday, the thirteenth.
Production of **\( \text{th} \) (voiced):**

The tip of the tongue is placed against the cutting edge of the upper front teeth. The air is pushed out, making the vocal cords vibrate (a voiced sound). Hint: Have the student exaggerate the sound by sticking the tongue out more than necessary. \( O \) is identical but voiceless.

**Words:**

love of my life
old wives' tale

Sentences:

Love me or leave me.
Every November eleventh is Veteran's Day.
Very careful drivers avoid swerving into curves.
Production of W:

Push the lips forward and blow out air to produce a voiced sound.

Words:

(INITIAL) (FINAL) (MEDIAL)
will meow always
way ow forward
were
water sandwich homework

Contrasting Pairs:

why/rye west/vest wine/vine
wet/vet way/ray wipe/ripe
wise/risewait/rate wheei/veal*

Phrases:

will power weeping willow
don't dwell on it
wash and wear within reasons
woodwork one way
homework in the whole wide world
watch your step

Sentences:

Wash and wear is wonderful.
The Winter wind blows from the West.
We won't wait for Willy on Wednesday.

* Some people pronounce the wh sound with an "h" puff of air. "Which" and "witch" for example sound differently when spoken this way.
### Production of Y:
The lips are spread. The front of the tongue is raised toward the roof of the mouth and the tip of the tongue is behind the lower teeth. This produces a voiced sound.

### Words:

<table>
<thead>
<tr>
<th>Initial</th>
<th>Medial</th>

Contrasting Pairs:

closed/close      rise/rice      razor/racer
plays/place       zoo/Sue        peas/peace
graze/grace       trays/trace    prize/price

Phrases:

zigzag            closed down    
close your eyes    razor sharp    
a dozen roses      fizzled out     
grows like a weed  raisin bread    
easy does it       fingers and toes

Sentences:

Zebras are always grazing at the zoo.
Roses and daisies blow in the breeze.
Zak uses his razor on his fuzzy face.
Production of ZH:

Push out the lips. Raise the front of the tongue to the upper gum ridge making a voiced buzzing sound. Sh is identical but voiced.

Words:

(FINAL) (MEDIAL)
beige vision
rouge measure
garage leisure
massage usually

Contrasting Pairs:

measure/mesher

Phrases:

red rouge clear vision
parking garage beyond measure
beige color at your leisure
usually right business or pleasure
watching television hidden treasure

Sentences:

We usually treasure pleasurable trips.
His decision usually causes confusion.
Watching television is a leisure activity.
NOTABLE EXCEPTIONS, DELETIONS, AND SIMPLIFICATIONS

w/wh

Some linguists classify these as tow sounds. Some people pronounce which and witch differently.

qu

Since "q" is always followed by a "u" in English, this becomes a "kw" combination. Practice these words:

- quiet
- quick
- quilt
- queen
- quiver
- quit

x

"x" at the beginning of words is almost always pronounced as "z" in English. Some linguists classify medial "x" as a different sound. It is a combination of g/s or k/s. Practice these words:

- extra (ks)
- excited (ks)
- excuse (ks)
- external (ks)
- excellent (ks)
- exact (gs)
- example (gs)
- exhausted (gs)

ar

"A" combined with "r" is sometimes classified as a separate sound (a as in arm). It is very similar to a short o/r combination. Practice these words:

- arm
- army
- article
- art
- artificial
- artery
- ark
- party

oo

is sometimes classified separately from the long u sound.

- cute
- boot
- (yoo)
- (oo)
LINGUISTIC INTERFERENCE

Introduction

ESL teachers are continually coping with the problem of acceptable, understandable pronunciation from students. They need to understand why Peter from Poland cannot say "th", or why John from Hungary is saying "v", when they are attempting to teach him to say "w". ESL teachers can avoid much frustration if they are made aware of the basic linguistic interference that students bring from their native languages. This interference includes pronunciation, syntax, and grammar. If teachers are aware of the interference they can, in many cases, find alternatives and improve student pronunciation dramatically.

An example of this occurs with students whose native language is Spanish. They do not think they can pronounce words like "this" or "thirteen"; however, that sound DOES occur in the Spanish language. The problem is that it is not used at the beginning of words, but at the end of words. When Spanish-speaking students are made aware that they do have that sound in their language, their pronunciation improves immediately.

Another example is in word placement for dates and addresses. In many languages, the date is given with the number first, the month second, and the year last. Similarly, an address is given with the house number first followed by the name of the street, and the zip code followed by the city. Although this linguistic interference is difficult to change, the awareness of the problem is helpful to the ESL teacher.

The problem becomes most difficult when the English sound does not occur in the students' native language at all; however, frustrations can be eased when the ESL teacher is at least aware of these problems.

The following explanation of some of the basic linguistic interference is an attempt to simplify the complicated job of the ESL teacher.
A. SYNTAX AND GRAMMAR DIFFERENCES

1. Arabic uses a non-Roman script alphabet. Reading and writing are from right to left. Traditionally, a book will be opened from the left.

2. Both nouns and adjectives have articles.

3. Adjectives follow nouns. The brown shoes > the shoes the brown.

4. Although accent varies in Arabic speaking countries, the language will be generally understood by educated Arabs.

5. Verb phrases do not occur in Arabic.

6. Since vowels are not written separately in Arabic, they may be left out when an ESL student attempts to write in English. In many cases, street > strt; dress > drs, etc.

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. The R is formed in the front of the mouth, and it is trilled or rolled.

2. The aspirated P as in put does not exist. The sound will resemble a B sound. Paper > baber.

3. The TH sound does not exist in Arabic.
   a. Voiceless initial TH will be replaced with S. thin > sin.
   b. Voiced initial TH will be replaced with Z or D. that > zat or dat.

4. The aspirated T will sound more like D. too > doo.

5. CH does not exist. It is replaced by SH. cheep > sheep.

6. There is no hard G as in go. The G is always soft as in gentle.

7. The short vowel sounds can cause difficulties for the ESL learner.
A. SYNTAX AND GRAMMAR DIFFERENCES

1. There are various styles of writing and reading in Chinese.
   a. The old, traditional style is written and read in vertical columns, top to bottom, right to left. The front of the book is on the left.
   b. The new style is written and read horizontally from left to right.

2. Characters are used in place of a phonetic alphabet.

3. Chinese is a tonal language; different tones give different meanings to words. Rhythm and stress can cause problems for ESL students.

4. Chinese is made up of one-syllable words. This can cause much difficulty in the comprehension of long English words.

5. Articles are optional.

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. Consonant clusters are rare in Chinese. Since English has many of them, this can create pronunciation problems for the ESL student.

2. The TH sound does not exist.
   a. Voiceless TH will be replaced by T or F.
      think > tink or fink
   b. Voiced TH will be replaced by D or V.
      that > dat or vat

3. The L and R sounds are difficult to produce since students cannot distinguish the difference between the two sounds. Some will always use "R" for both sounds, while others will always use "L."
   glass > grass or grass > glass
   blew > brew or brew > blew

4. In the initial position a sound resembling L will usually replace an R.
   road > load

5. Chinese has no Z sound. It is replaced with SH or S.
   zip > ship or sip
CROATIAN, SERBIAN

A. SYNTAX AND GRAMMAR DIFFERENCES

1. Croatian and Serbian form two of the four main languages from this area in Europe. They include many dialects and variations in pronunciation and grammar.

2. Croatian uses the Roman alphabet, while Serbian uses the Cyrillic alphabet.

3. Nouns, pronouns, and adjectives must agree in gender (masculine, feminine, or neuter).

4. Verb endings are used in place of pronouns.

5. There are no articles.

6. In a sentence, expressions of time and place occur according to their importance within the context of that sentence.

7. Irregular verbs may be difficult. Perfect tenses will be unfamiliar in meaning.

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. Voiced and voiceless TH do not exist. Students will tend to pronounce these sounds as D or T.
   both > bod or bot; these > dese or tese

2. The short English vowel sounds are very difficult. Generally, the student tends not to hear the slight variations in these sounds.

3. The letter R is rolled.

4. The letter W does not exist. It is replaced by V or F.
   want > vant or fant

5. In many cases V > B, C > S, and X > H.
   vat > bat; cold > sold; Texas > Tehas
CZECH

A. SYNTAX AND GRAMMAR DIFFERENCES

1. Nouns as well as adjectives have gender (masculine, feminine, and neuter).
2. The endings on the words signify the gender, the person, and the tense.
3. Articles are not used.

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. W is replaced with a V sound.
   want > vant

2. Y, when used as a vowel, is a long "E" sound.
   symbol > semblol

3. J is a Y sound.
   January > Yanuary

4. The TH sound does not exist.
   a. Voiceless initial TH becomes T.
      think > tink
   b. Voiced initial Th becomes D.
      these > dese
   c. Voiceless final TH becomes F, S, or T.
      with > wif, wis, or wit
   d. Voiced middle TH becomes D.
      mother > modder

5. Final G is replaced by K.
   pig > pik

6. Final D is replaced by T.
   bad > bat
FARSI (PERSIAN)

A. SYNTAX AND GRAMMAR DIFFERENCES

1. The alphabet is made up of script which resembles Arabic.

2. Reading and writing are from right to left.

3. Nouns are followed by adjectives.

4. Nouns and pronouns have no gender. The word for he and she are the same.

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. Farsi lacks some of the letters/sounds that occur in the English alphabet. They include O, Q, U, W, and X. This can cause much difficulty in pronunciation.

2. Initial voiceless Th becomes T or S. 
   think > tink or sink

3. The sound W is replaced by V. 
   want > vant

4. Final D becomes T. 
   bad > bat

5. Initial G may be replaced by C. 
   goat > coat

6. Short vowels will be difficult.
FRENCH

A. SYNTAX AND GRAMMAR DIFFERENCES

1. The rhythm in French is different from English, because the stress on words falls near or on the last syllable. English tends to stress the front syllables in connected speech patterns.

2. All nouns in French are masculine or feminine. Since "pencil" is masculine, its corresponding pronoun is "he." Since the noun "pen" is feminine, its corresponding pronoun is "she."

3. Adjectives and articles agree in gender and number with the noun they modify. Generally, descriptive adjectives follow the noun.

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. The Th sound does not occur in French.
   a. Voiceless initial TH becomes S.
      think > sink
   b. Voiced initial TH becomes Z.
      them > zem

2. The CH sound does not occur in French. It is replaced with SH.
   cheek > sheek

3. The sound of J as in "jeep" does not occur in French. It has the sound of "rouge".

4. The R sound is difficult. Many French speakers substitute the R made at the back of the throat - a "growled" sound. Some will substitute the trilled R.

5. ING as in "ring" does not occur. Ring may become rin.

6. Final S is not pronounced, and final T after a vowel is also not pronounced.

7. P, T, and K are not aspirated. They sound more like B, D, and G respectively.
   cap > cab; bat > bad; back > bag
GERMAN

A. SYNTAX AND GRAMMAR DIFFERENCES

1. The rhythm and word stress in German are similar to English.

2. Word order can be very different from English, especially in a complex sentence where inverted word order occurs. An English sentence like "I will go downtown tomorrow" will become "Tomorrow will I downtown go", in German.

3. Nouns, articles, and possessive adjectives are declined.

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. The TH sound does not occur in German.
   a. Voiceless initial TH will usually be replaced by S.
      think > sink
   b. Voiced initial TH will usually be replaced by Z.
      that > zat

2. W has the sound of V in German.
   want > vant

3. The letter S is difficult for Germans.
   a. S before a vowel becomes Z.
      so > zo
   b. S followed by P, T, or L becomes SH.
      spell > shpell; step > shtep; sleep > shleep

4. When B, D, or G occur at the end of an English word, the ESL student will usually use P, T, or K respectively.
   cab > cap; bad > bat; bag > back

5. The R sound can be difficult. In German, the R is made at the back of the throat and has a "growled" sound.
HINDI

A. SYNTAX AND GRAMMAR DIFFERENCES

1. Hindi uses a non-Roman script alphabet.

2. Hindi is written and read from left to right.

3. Various letters/sounds in the Hindi alphabet have no English equivalents.

4. Sentences are written with the subject first, sentence parts in the middle, and the verb last.

5. Helping verbs such as "to be" are not usually used in Hindi.

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. Voiced and voiceless TH becomes T.
   three > tree; think > tink

2. The sound P is replaced by B.
   pig > big

3. The sound W becomes V.
   want > vant

4. The sound CH becomes SH.
   cheep > sheep

5. Final consonants are often omitted, especially the G from NG.
   doing > doin

6. Short vowel sounds cause much difficulty, since the ESL student does not hear the slight variations.

7. The consonants F, Q, V, X, and Z do not exist as separate characters in the Hindi alphabet.
A. SYNTAX AND GRAMMAR DIFFERENCES

1. The alphabet uses Roman letters, and is written and read from left to right.

2. There are seven voice tones in Hmong. These voice tones give meaning and expression to the words in the language.

3. Usually only the present tense is used.

4. Nouns are not pluralized. The quantitative word before the noun indicates the plural idea. One girl, two girl, many girl.

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. Initial B and P have the same sound.
   
   bad > bad; pad > bad

2. The TH sound causes difficulty.
   
   a. Initial voiceless TH becomes T.
      
      think > tink
   
   b. Initial voiced TH becomes D.
      
      that > dat

3. The sound of T in the middle of a word will become D.
   
   better > bedder

4. The consonants P, T, and K in the final position are replaced with B, D, and G respectively, and become voiced.
   
   hip > hib; hit > hid; sick > sig
A. SYNTAX AND GRAMMAR DIFFERENCES

1. The sentence word order is basically the same as in English.
2. The Roman alphabet is used.

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. Some Hungarian vowel sounds have no English equivalents.
2. There is no sound for W in Hungarian. It is replaced with a V sound.
   want > vant
3. The letter J has a Y sound.
   January > Yanuary
4. The TH sound causes difficulty in Hungarian.
   a. Voiceless initial TH becomes S or T.
      think > sink or tink
   b. Voiced initial TH becomes Z or D.
      that > zat or dat
5. The letter R is trilled or rolled.
JAPANESE

A. SYNTAX AND GRAMMAR DIFFERENCES

1. Japanese uses three writing systems. Two sets of characters are used for most written material and are written in vertical columns read from right to left.

   The third system is written horizontally and read from left to right. It is phonetic and is used for adding foreign words to the language.

2. In Japanese, the subject is generally followed by other sentence parts, and the verb is last (subject, object, verb).

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. The letter C may be pronounced as SH.
   cent > shent

2. The sound W is replaced by V.
   want > vant

3. Initial V becomes B.
   vine > bine

4. The TH sound does not occur in Japanese.
   a. Initial voiceless TH becomes S.
      think > sink
   b. Initial voiced TH becomes D.
      these > dese
   c. Final TH becomes S.
      with > wis

5. The L sound is usually replaced by an R type sound.
   led > red
KOREAN

A. SYNTAX AND GRAMMAR DIFFERENCES

1. Korean is related to Chinese and Japanese, but it has its own alphabet.

2. Traditionally Korean was written and read vertically; the more modern style is horizontal.

3. In a Korean sentence, the order is generally subject, other sentence parts, and the verb last. The word order in English is usually subject, verb, and object(s).

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. The TH sound does not occur in Korean.
   a. Initial TH becomes D.
      think > dink; that > dat
   b. Final voiceless TH is replaced with S.
      with > wis
   c. Final voiced TH becomes D.
      smooth > smood

2. The sound L is usually replaced with an R sound.
   led > red

3. The sound B becomes V.
   bat > vat

4. The J sound becomes a Z sound.
   jeep > zeep

5. The H or WH sounds become an F sound.
   held > feld; white > fight
POLISH

A. SYNTAX AND GRAMMAR DIFFERENCES

1. Nouns are feminine, masculine, or neuter; they are declined like Latin/German nouns.

2. Adjectives are also declined; they must agree in number and gender with the nouns.

3. There are three basic verb tenses; present, past, and future. Verbs are conjugated, so subject pronouns are not necessary.

4. There are no articles in Polish.

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. In the initial position, the letter J will always sound like a Y. January > Yanuary

2. There is no TH sound in Polish.
   a. Initial voiceless TH can become T or F. three > tree or free
   b. Initial voiced TH usually becomes D. that > dat
   c. Final TH can be replaced by S or T. with > wis or wit

3. The letter W becomes V. want > vant

4. Since Polish has several sounds for L, it is hard for students to produce the English L.
A. SYNTAX AND GRAMMAR DIFFERENCES

1. Nouns are masculine, feminine, or neuter and are shown by the article and the ending on the noun.

2. Possessive pronouns and adjectives must agree in gender and number with the nouns they modify.

3. Descriptive adjectives usually follow the noun.

4. No helping verbs are used to form questions. Instead, the verb is placed in front of the subject (inverted).

5. All vowels are pronounced.

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. CH will sound like SH.
   cheep > sheep

2. The letter H is never pronounced.

3. Since Portuguese has many nasal sounds, this may cause the ESL student some problems in pronunciation.
RUSSIAN

A. SYNTAX AND GRAMMAR DIFFERENCES

1. Russian uses the Cyrillic alphabet.

2. Nouns have feminine, masculine, or neuter genders.

3. Nouns and adjectives are declined as in Latin/German. All nouns and adjectives must agree in gender and number.

4. There are fewer verb tenses in Russian than in English.

5. There are no articles in Russian.

6. The verb "to be" is almost never used in the present tense.

   The car is red > car red.

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. English short vowel sounds are very difficult.

2. There is no TH sound in Russian.
   a. Voiceless initial TH becomes S.
      think > sink
   b. Voiced initial TH becomes Z.
      that > zat
   c. Voiceless final TH becomes F, S, Z, or T.
      with > wif, wis, wiz, wit
   d. Middle TH becomes Z.
      father > fazer

3. There is no W sound in Russian. It is replaced by the V sound.
   want > vant

4. The letter R is rolled or "growled" at the back of the throat.

5. A hard G sound replaces the letter H in foreign words.
   Ohio > Ogio
A. SYNTAX AND GRAMMAR DIFFERENCES

1. Usually descriptive adjectives follow the nouns they modify.

2. Adjectives and articles must agree in gender and number with the nouns they modify.

3. There is no neuter in Spanish. Since the word "car" is masculine, its corresponding pronoun is "he." Since the word "pen" is feminine, its corresponding pronoun is "she."

4. In a question or an exclamation, the punctuation both precedes AND follows the statement: i...! j...?

5. All vowels are pronounced.

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. There are no voiceless consonant blends beginning with "S"; consequently, an "e" sound will precede these blends.
   street > estreet; school > eschool

2. There is no SH sound. It becomes CH.
   shoe > choe

3. The letters R and RR are formed in the front of the mouth and are trilled.

4. The letter H has no sound. The letter J always carries the H sound as does G before the vowels E or I.

5. The sound TH exists in Spanish, but the letters TH are never used together. D will have the TH sound wherever possible in a Spanish sentence. In Spanish, Z and C (before E or I) carry the sound TH.

6. In many cases V will sound like a soft B sound.
   have > h.wb
TAGALOG (FILIPINO)

A. SYNTAX AND GRAMMAR DIFFERENCES

1. 300 years of Spanish control had an effect on the language. It is written and read horizontally from left to right, and it uses the Roman alphabet.

2. The sentence structure resembles English.

3. Tagalog uses three tenses - present, past, and future.

4. ESL students may be able to pronounce English well and quickly, even though their comprehension may still be poor.

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. The letter V has a B sound.
   - vest > best; vat > bat

2. The letter J has a Y sound.
   - jam > yam

3. S and Z have the S sound.
   - zip > sip; zebra > sebra

4. All words ending in TAIN have the same sound as the ending of the word "maintain."
   - fountain > fountain

5. The TH sound is difficult.
   - a. Voiceless initial TH sounds like T.
      - think > tink
   - b. Voiced initial TH sounds like D.
      - these > dese
   - c. Final TH sounds like T.
      - tooth > toot

6. The letter F has a P sound.
   - fan > pan
THAI

A. SYNTAX AND GRAMMAR DIFFERENCES

1. In Thai, a script-like alphabet is used instead of the Roman alphabet. Writing and reading are done from left to right.

2. There are five voice tones in the Thai language; each tone changes the meaning of the word.

3. Nouns have no plural forms. This concept is conveyed, instead, through the use of quantitative words which follow the nouns.
   - six pencils > pencil six; two children > child two

4. Adjectives follow nouns.

5. There is no apostrophe. An "of" phrase shows possession.
   - My mother's hat > the hat of my mother

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. Voiced final consonants in English are omitted. Multiple final consonant clusters are impossible.

2. Voiceless consonant blends at the beginning of English words are difficult. ESL students will tend to voice them.
   - stop > sadop; spend > sabend

3. The TH sound does not exist in the Thai language.
   a. Voiceless initial TH becomes T.
      - three > tree
   b. Voiced initial TH becomes D.
      - that > dat
   c. Voiceless final TH becomes T.
      - with > wit

4. The letter V has a W sound.
   - visit > wisit

5. The letters R and L are interchanged because they sound the same.
   - free > flee; fly > fry

6. CH sounds like SH.
   - cheep > sheep
TURKISH

A. SYNTAX AND GRAMMAR DIFFERENCES

1. The Roman alphabet is used in Turkish.

2. Writing and reading are done from left to right.

3. Turkish and English have many similar consonant sounds. There are very few difficulties in this area.

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. There are no initial consonant clusters in Turkish. The most difficult to learn are those beginning with S. ESL students will insert a vowel before or after the S.
   store > istore or sitore

2. The TH sound does not occur in Turkish.
   a. Voiceless initial TH becomes S or T.
      thin > sin or tin
   b. Voiced TH becomes Z or D.
      that > zat or dat

3. The letters V and W are confusing. V is especially difficult to produce before vowels. W is replaced by oo as in noon.
   white > ooite

4. Words ending in B, D, or G will be substituted with P, T, or K respectively.
   nab > nap; lid > lit; pig > pik

5. Where P, T, or K occur in the middle of a word, B, D, or G will be substituted.
   dipper > dibber; butter > budder; bicker > bigger
VIETNAMESE

A. SYNTAX AND GRAMMAR DIFFERENCES

1. Vietnamese differs from many Asian languages because it uses the Roman alphabet, and it is written and read from left to right.

2. There are six voice tones in the Vietnamese language, and all words are monosyllabic.

3. Vietnamese is patterned like Spanish and Portuguese in syntax, vowel usage, and word order; adjectives follow nouns.

4. There are no plural noun endings.

B. POSSIBLE PRONUNCIATION DIFFICULTIES

1. Pronunciation may be choppy for ESL students because the English language has so many words of more than one syllable.

2. The TH sound is difficult.
   a. Voiceless initial TH can become T or S.
      think > tink or sink
   b. Voiced initial TH can become Z.
      that > zat

3. CH has the Sh sound.
   cheep > sheep

4. The L can have the sound of R.
   load > road

5. The letter D is confusing. It may be replaced by J, Y, or Z.
   dig > zig; jig > yig or zig
INTRODUCTION

Practice Sentences

These sentences were designed to give the student practice in saying the English sounds that are most difficult coming from his native language background. There are also twenty general practice sentences at the end for a little tongue twister fun and challenge. Students almost universally have difficulty with th (thin), th (these) and short vowels.

O'h K K King

Hatie and Cathy collected colored crayons to keep cool colors on the king.
1. Ted had better head west.

2. Put the peeled potatoes in a pot.

3. She is doing the washing this morning.

4. The boys enjoy their toys.

5. It's a pleasure to meet you.

6. Richard is roller skating with Chuck this Thursday.

7. Gigantic garlic and green grapes grow in the garden.

8. I sing songs every evening in Spring.

9. The three brothers' birthdays are this month.

10. Charlie's dishes were chipped when they arrived at the china shop.
1. This is the thigh bone.
2. Rory ran a race.
3. I have a very bad headache.
4. The garden grows bigger in August.
5. Paul has ham and scrambled eggs for breakfast.
6. Harry has half a hamburger.
7. Jack usually drinks orange juice in the morning.
8. Measure the beige garage.
9. There are thousands of these things to think about.
10. She sells seashells by the seashore.

18. Martha thoroughly thanked thirty thin weathermen.
19. Open that pack of pop-top pop, please.
20. Queenie's quail quivered quietly in the earthquake.
INTRODUCTION

PRONUNCIATION ACTIVITIES

The purpose of these pronunciation activities is to provide the ESL teacher with ideas, means, and methods of teaching English in practical, meaningful, and enjoyable ways.

These exercises aim to simplify teaching pronunciation by using a basic method for all activities. It is to be stressed, however, that this is only one method, and by no means the only one. Teachers should feel free to modify it.

1. Write target words on the board.
2. Establish meaning. (Use pictures, drawings, etc.)
3. Teacher says target words several times. Students repeat. (Teacher must exaggerate sounds for students to hear).
4. Teacher uses target words in a phrase. Students repeat.
5. Teacher uses target words in a sentence. Students repeat.
6. Students practice new vocabulary in various activities.

There are many variations to the above suggestions. Teachers should use their own judgment to decide how long to stay with any step, how often to spot check and correct, and finally when to stop. It's important not to be in a hurry when introducing new words and phrases and to allow time for the new sounds to sink in. On the other hand, teachers should keep up a good pace. By the time students have finished, they should feel as if they've had a good workout.

And finally, pronunciation activities should be fun. The spontaneous laughter that is created during a pronunciation class makes teaching a joy and learning a pleasure.
THE ALPHABET

What Do the Letters Sound Like?

An essential life skill for all ESL students is the ability to say (sound out) the letters of the alphabet. Yet, this activity is often given short shrift by the ESL teacher, who may think that learning the alphabet is "kindergarten stuff" or "too easy." She may even think that once taught, it is quickly learned and remembered. Nothing could be farther from the truth. The alphabet needs drilling, repetition, and practice. The ability to spell one's name and address and be easily understood is a vital skill for all ESL students.

Description of Activity

- Post the alphabet in large letters around the room.
- Pronounce letters after the teacher.
- Practice only vowels.
- Practice only isolated consonants.
- Students say and spell own name, address.
- Teacher dictates (spells) new words. Students listen and write.
- One student dictates (spells) teacher-generated words: Examples: names of students, cities and countries of origin, etc.
Students enjoy learning words and phrases that they can use immediately as they struggle to adapt in a new culture. They want to learn common expressions of polite and socially accepted speech. You, as the teacher, will do them an invaluable service by teaching them expressions of kindness, as well as some small talk.

Remember that any new words or phrases will not be learned overnight. It will take "a good listening ear" and much practice to speak and respond in an appropriate manner. Though such phrases seem deceptively easy to us, they are, in fact, very difficult for the foreign student to master.

Description of Activity

- Make a list of common "polite" expressions.
- A partial list might include:
  "Thank you, I appreciate it."
  "How are you; how's it going?"
  "It's good to see you." "It's good to see you, too."
  "May I have . . . . . ." (instead of "Give me")
  "I've missed you." "I've missed you, too."
- Practice the same expression for at least a week.
- Don't be surprised if it takes weeks to "get the feel" of any given expression.
- Post these expressions in huge letters around the room.
- Use them during authentic classroom activities when appropriate.
TURNING THE TABLES

In order to get the sense - - the frustration and the joy - - of learning a new language, have the students teach you and the class a simple poem, greeting, or expression in their own languages. Students love it as you struggle to master the sounds and words that roll so magically off their tongues! Further, in order to get the sense of what students are going through, teachers need frequent reminders of how much practice, repetition and diligence is required to learn even the simplest expression correctly. It's not easy! In short, we need to put ourselves in our students' shoes.

Description of Activity

• Choose a special day - - a holiday or a special occasion to learn about.
• Select one of the better students to "teach" the activity. It can be on the board or on handouts.
• Student-teacher uses the same steps as for other pronunciation activities, identifying key words, speaking slowly and making corrections.
• Class recites poem, greeting, or expression.
Students need to be able to give their full home and work addresses in an understandable way. This skill needs to be perfected early, which makes this pronunciation drill very practical. An effective way of presenting this drill is to present the sentence in small segments and to work intensely from the end of the sentence forward. Be sure to move freely about the room and correct where necessary. It may be necessary to explain the U.S. address system.

Description of Activity

- Write on board: street, road, avenue, lane, boulevard, etc.
- Repeat above after the teacher several times.
- Write street names of students on the board.
- Repeat, for example, "Euclid Avenue."
- Introduce numbers -- 0 to 10 and practice.
- Repeat, "16025 Euclid Avenue."
- Finally, say the whole sentence, "I live at 16025 Euclid Avenue."
THE ALPHABET GAME

"I went to the store and bought . . . . "

Once students have played the alphabet game, they request it often. They enjoy
listening to each other, repeating, as well as the challenge of coming up with a new word.
Don't be surprised if they insist on helping each other! This activity is especially useful
after studying word groups such as foods, clothing, etc. The repetition provides excellent
reinforcement for new vocabulary.

Description of Activity

- Arrange small groups of six to eight students.
- First student begins, "I went to the store and bought apples."
- Second student repeats, "I went to the store and bought apples and bananas."
- Students continue, in turn, with their letter of the alphabet.
THE "S" GAME

This variation of the Alphabet Game takes the same letter of the alphabet for all the students. For example, the letter "S" might be chosen, and all items must start with that letter. It becomes challenging for more advanced students especially, as they run out of nouns!

For example:

"I went to the department store and bought shoes."
"I went to the department store and bought shoes and a shirt."
"I went to the department store and bought shoes, a shirt, and skis."
Students enjoy learning new skills as long as they are practical. The study of math terms is essential for daily life. This game provides an opportunity for the practice of new terms, the reinforcement of numbers, and the fun of discovering a partner's birthday.

**Description of Activity**

- Write on board, explain, and practice the new vocabulary:
  
  1. Add +
  2. Subtract -
  3. Multiply x
  4. Divide ÷

- Working in pairs, student A gives student B the following instructions:

  - Write the number of the month in which you were born.  
    (example: January, write the number 1)
  - Multiply that number by five (5 x 1 = 5).
  - Add seven (5 + 7 = 12).
  - Multiply by four (12 x 4 = 48).
  - Add thirteen (48 + 13 = 61).
  - Multiply by five (61 x 5 = 305).
  - Add the day of your birthday, for example 23 (305 + 23 = 328).
  - Subtract 205 (328 - 205 = 123). Your birthday is 1/23 or January 23.
"SHIRT, SKIRT, SHORTS"

Tactile learning has long been recognized as a sure-fire way of increasing retention. If you touch something, you're more likely to remember it. Put an object in a student's hands, and you immediately create an almost ideal learning situation. The interest is immediate and learning not easily forgotten.

"Shirt, skirt, and shorts" all sound the same to a beginning student. The "ur" sound in shirt and skirt is difficult for students to master. Any activity which promotes pronunciation practice of common objects is important. Students find "Shirt, Skirt, and shorts" fun and worthwhile.

**Description of Activity**

- Bring in as many old skirts, shirts, and shorts to the classroom as you can.
- Identify the objects.
- Have the student hold up the object and say correctly, "This is a shirt." Pass it one to another student. Repeat.
- There are many variations of this game. Play store. "I don't want this shirt. I want a skirt." Practice - "this", "these," singular, plurals, etc.
THE USE OF PICTURES IN PRONUNCIATION

The use of pictures cannot be overstated as a vital resource for pronunciation drills. Students respond enthusiastically to nearly all pictures because they know immediately what the teacher is talking about. It gives them an important sense of confidence in their second language learning. A Picture is Worth a Thousand Words by Anthony Mollica and Norman Rockwell's paintings are possible rich sources for this purpose and can be used in creative ways.

Description of Activity

- Put the picture on the wall (the bigger the better).
- Identify basic vocabulary.
- Students repeat basic vocabulary.
- Teacher checks sounds, words, phrases, and sentences.
- Teacher allows students to finish her sentences as she talks about the picture.
THAT'S MY BIRTHDAY, TOO

This fun birthday game can be used to practice possessive pronouns as well as regular possessives. Students often find it very difficult to say final "s" of possessives. In fact, saying, "my mother's birthday" instead of "my mother birthday" can be a major accomplishment. Remember that all final consonants are voiced, and the "s" in "mother's" is pronounced like a "z."

The teacher should exaggerate and hit those final consonants hard so that students can hear them and finally say them.

Description of Activity

- Teach target vocabulary:
  birthday, mother's, father's, brother's, sister's, son's, daughter's, etc.
  Pay careful attention to pronunciation.
- Students listen carefully as one student gives the month and day of his birth. (Note: The likelihood of two students sharing a birthday is very high, which creates instant interest.)
- Student one says, "My birthday is January 20."
- Teacher or a student responds, "Really? My daughter's birthday is January 23."
- Continue until each student has told his birthday.
SONGS, POEMS, AND RHYMES

Songs, poems, and rhymes are an excellent way to teach the rhythm, stress, and intonation of a language which are essential in transmitting meaning. If the accent (the phrasing) of a sentence is wrong, the student will not be understood even though he can say the word in isolation. It's important for the student to understand that English is spoken in phrases, that there are important pauses, and that certain syllables are accented quite strongly. In addition, some vowels and syllables are obscured (reduced) as they are spoken.

There is nothing better to accomplish this purpose than the inclusion of simple songs, poems, and rhymes as part of the curriculum. Traditional nursery rhymes are an excellent source of material.

Description of Activity

- Students copy poem off the board.
- Teacher identifies necessary vocabulary.
- Teacher reads slowly and accents strongly.
  Teacher and students read together in normal English.
  Some students may want to memorize it.
"THERE WAS AN OLD LADY"

This particular poem covers a great deal of ground in teaching good pronunciation. It shows how words are linked together, vowels reduced, and sentence structure kept intact as it tells a humorous story. Beginning students like it because the beat is strong and the story line repetitive. Advanced students like learning the new vocabulary and even enjoy memorizing all or part of the whole poem!

**Description of Activity**

- Identify vocabulary.
- Go over each verse several times.
- Teacher speaks; students repeat.
- Divide class into groups, each saying one verse, or alternate men and women speaking.
- Bring one group in front of class to recite it.
"THERE WAS AN OLD LADY"

There was an old lady who swallowed a fly.  
I don't know why she swallowed a fly.  
Perhaps she'll die.

There was an old lady who swallowed a spider.  
It wiggled and wiggled and jiggled inside her.  
She swallowed the spider to catch the fly.  
I don't know why she swallowed the fly.  
Perhaps she'll die.

There was an old lady who swallowed a bird.  
Have you heard, she swallowed a bird.  
She swallowed the bird to catch the spider.  
She swallowed the spider to catch the fly.  
I don't know why she swallowed the fly.  
Perhaps she'll die.

There was an old lady who swallowed a cat.  
Imagine that!  She swallowed a cat.  
She swallowed the cat to catch the bird.  
She swallowed the bird to catch the spider.  
She swallowed the spider to catch the fly.  
I don't know why she swallowed the fly.  
Perhaps she'll die.

There was an old lady who swallowed a dog.  
She swallowed a dog as big as a hog.  
She swallowed the dog to catch the cat.  
She swallowed the cat to catch the bird.  
She swallowed the bird to catch the spider.  
She swallowed the spider to catch the fly.  
I don't know why she swallowed the fly.  
Perhaps she'll die.

There was an old lady who swallowed a cow.  
I don't know how she swallowed a cow.  
She swallowed the cow to catch the dog.  
She swallowed the dog to catch the cat.  
She swallowed the cat to catch the bird.  
She swallowed the bird to catch the spider.  
She swallowed the spider to catch the fly.  
I don't know why she swallowed the fly.  
Perhaps she'll die.

There was an old lady who swallowed a horse.  
She died, of course!
