C-SPAN

This C-SPAN publication is intended to serve as a forum, enabling college-level members of C-SPAN in the classroom program to share ideas regarding programming and classroom academic research. This issue explains the different C-SPAN networks and what their purposes are. The publication contains 12 articles written by professors who use the C-SPAN network in their classrooms. The professors discuss how they incorporate the relevant issues broadcasted over C-SPAN's air waves into their study. Subject areas addressed include speech, political communication, broadcast journalism, natural resources issues, history/modern British politics, and U.S. foreign policy. (JAG)
C-SPAN NETWORKS: PROFESSORS' GUIDE

C-SPAN IN THE CLASSROOM

FALL 1994

"PERMISSION TO REPRODUCE THIS MATERIAL HAS BEEN GRANTED BY
Parkley Kern
TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)."

BEST COPY AVAILABLE
C-SPAN NETWORKS: PROFESSORS' GUIDE is published once each year by C-SPAN in the Classroom, the network's free membership service for college and high school educators. This publication is intended to serve as a resource to college and high school educators to integrate C-SPAN in the Classroom into their curriculums. It provides a comprehensive overview of the network's programming as well as classroom and academic resources.

We welcome your ideas on using C-SPAN in classrooms and research projects. Contact the network at C-SPAN in the Classroom 410 North Capitol St. NW Suite 650 Washington, DC 20001. For more information about C-SPAN on the Classroom membership, call the C-SPAN Hotline at 1-877-275-7856.

1994 National Cable Television Corp. Educators are encouraged to make copies of this material. This material is not for sale but is intended for use that advances the purposes of C-SPAN in the Classroom.

C-SPAN
A PUBLIC SERVICE CREATED BY AMERICANS AND FOR AMERICANS.
ABOUT THE C-SPAN NETWORKS

C-SPAN Cable Television Networks
The cable television industry created the Cable Satellite Public Affairs Network in 1979 to provide live, gavel-to-gavel coverage of the U.S. House of Representatives. Since then, C-SPAN’s programming has broadened beyond Congress with in-depth coverage of the federal government's executive and judicial branches, as well as other national and international public affairs events. The network's original and ongoing goal is for its programming to serve as a vehicle that allows viewers to judge for themselves and to critically assess current issues. The events that are aired on

GSPAN are monitored and commercial-free.

liberal
C-SPAN is America’s electronic town hall, providing cable viewers with a link to their government officials in Washington, DC. On C-SPAN, viewers see their own U.S. representative at work on the House Floor. With C-SPAN’s companion network, C-SPAN 2, viewers can watch their senators debate issues on the floor of the U.S. Senate. And through C-SPAN’s viewer call-in programs—conducted every weekday—callers can speak directly to their own legislators, as well as other public policy-makers and journalists.

educators find
the network’s programming

C-SPAN’s commitment is to cablecast the U.S. House of Representatives whenever it is in session. In addition, the network offers a number of regularly scheduled programs, as well as congressional hearings, election coverage, White House press briefings, university and political party forums, newsmaker speeches, international conferences and other public affairs events at home and abroad.

The C-SPAN Audio Networks
The C-SPAN Audio Networks, C-SPAN Audio 1 and C-SPAN Audio 2 were created in 1989 to complement C-SPAN's television offerings. Provided through your local cable system, these networks project a global perspective on public affairs, news and cultural events. They are available to your local cable system free of charge and can be part of your total cable package.

C-SPAN Audio 1 offers daily, international, English language news programs from China, Cuba, India, Germany, France, Canada, Korea, Australia, Israel, South Africa, as well as the Voice of America. Programs are subject to change. This network also offers special historical programs produced from archival recordings, including memorable political and historic speeches.

C-SPAN Audio 2 airs the BBC World Service live from London 24 hours a day. The British Broadcasting Corporation offers news, music, programs, entertainment and cultural information.

C-SPAN's Weekly Radio Journal is an hour-long radio program that offers a balanced synopsis of C-SPAN programming from the preceding week. In addition to airing on more than 80 public and commercial radio stations nationwide, C-SPAN's Weekly Radio Journal can be heard every Monday at noon ET on C-SPAN Audio 1.
Ways to Obtain the Program Schedule

Due to the limited nature of C-SPAN's programming, not every event is scheduled daily. Here's how to find out what's on:

**Our Schedule Hotline** provides the latest C-SPAN and C-SPAN 2 schedules: 24 hours a day — 202/626-2708.

**Program Updates** are on C-SPAN at these times:
- Weekdays: 7:55 am, 6:25 pm, 11:55 pm ET
- 4:55 am, 3:25 pm, 4:55 pm PT
- Saturdays: 7:55 am ET/4:55 pm PT
- Sundays: 7:55 am, 4:55 pm ET/11:55 am PT

**Computer Information Services** America Online, the internet and X*Press X*Change provide
- C-SPAN schedule information
- The internet gateway: cspan.org
- America Online keyword: CSPAN

---

**C-SPAN 2**

C-SPAN's companion network, C-SPAN 2, was created in 1986 to cablecast all U.S. Senate sessions live and in their entirety. When the Senate is not in session, C-SPAN 2 provides cable subscribers with additional choices in public affairs programming, including timely congressional hearings, newsmaker speeches, election coverage and more.

**C-SPAN Programming**

Events are selected daily for coverage by C-SPAN's vice president of programming and the senior producers of the programming editorial board. Every weekday afternoon, the editorial board meets to choose the events that crews will cover the next day. With six two-camera crews and two one-camera crews, C-SPAN has the ability to cover between seven and 14 events daily. In addition, C-SPAN cablecasts the following regularly scheduled programs:

**Viewer Call-in Programs**

C-SPAN opens the phone lines daily to give cable viewers the opportunity to speak directly with legislators, policymakers and journalists about the issues of the day.

- **Monday:** "Events in the News." Two journalists take viewer calls about national issues. 8 am ET/5 am PT.
- **Tuesday-Thursday:** Guests—usually policymakers and journalists—take questions from viewers. 8 am ET/5 am PT.
- **Friday:** "Journalists' Roundtable." Three journalists take part in an open discussion about the news of the week. 8 am ET/5 am PT.
- **Monday-Friday:** Call-ins are held every weeknight with public policy experts and public policy-makers. 6:30 pm ET/3:30 pm PT.
"American Profile"
On most national holidays, C-SPAN airs in-depth interviews with public officials as well as opinion and business leaders. Call the network's Schedule Hotline in advance of the holiday for more information—(202) 628-2205.

"America & the Courts"
This weekly program provides insight into the workings of the federal judiciary and current legal issues. Although cameras are not presently allowed in the Supreme Court, this program offers a behind-the-scenes look at key cases through interviews with leading legal experts and coverage of speeches by Supreme Court justices.

Saturdays at 7 pm ET/4 pm PT

"Booknotes"
This author-interview program provides in-depth conversations with writers and editors of recently published historical, political, and public policy books.

Sundays at 8 pm and 11 pm ET/5 pm and 8 pm PT
Mondays at 6:35 am ET/3:35 am PT

"Event of the Day"
Whether it's the president speaking from the Rose Garden, a press conference from the Pentagon or a congressional hearing on a Supreme Court nominee, the day's top news story unfolds on C-SPAN in its entirety and without commentary.

Weeknights at 8 pm ET/5 pm PT

Viewing Tips
- Events covered each day will generally air on C-SPAN or C-SPAN 2 that same evening or within the next 24 hours.
- To provide you with the most timely public affairs programming, the evening schedule for each day is determined by 7:55 pm ET/4:55 pm PT the same day. The evening schedule begins at 8 pm ET and 5 pm PT.
- Most programs air at least three hours or earlier C-SPAN or C-SPAN 2 within a week of the day the event was recorded.
- Selected programs air on the weekend. Weekend programs will not air during the following week. Friday afternoon a weekend schedule overview is available, specific weekend hours are determined by 8 pm ET/5 pm PT the prior evening.
- Occasionally, events C-SPAN covers are designated as "save" programs and are set aside to air at a later time. Because of their content, these programs still contribute to the public policy discussion even weeks after the event occurred. Most "save" programs air on national holidays and when Congress is in recess. These programs are usually scheduled up to 24 hours in advance of their air times.

Congressional Hearings
When Congress is in session, C-SPAN provides access to timely congressional hearings on important domestic and global concerns such as Cabinet nominations, international trade and the federal budget.
International Legislatures

The network provides a look at international governments by televising legislatures from Japan, Poland, Israel, the former Soviet Union, Germany, Canada, Argentina, Australia, France, Hungary, and Mexico, as well as the European Parliament. These programs air periodically on the network.

"Evening News From Moscow"

C-SPAN televises the nightly news from Moscow to provide viewers with an inside look at happenings in the former Soviet Union.

- Monday-Friday at 6 pm ET/3 pm PT
- Tuesday-Saturday at 7:30 am ET/4:30 am PT

British House of Commons' Question Time

During Question Time, Britain's prime minister responds to members of his own party and the opposition. When the House of Commons is not in session, C-SPAN airs other public affairs programming from Britain.

- Sundays at 9 pm and midnight ET/6 pm and 9 pm PT

National Press Club Speeches

C-SPAN televises all National Press Club luncheon addresses, which are given by journalists, public policy leaders, and other public figures.

- Saturdays at 6 pm ET/3 pm PT

"Road to the White House"

This look at the 1996 presidential election provides coverage of possible presidential candidates. The program will increase in frequency as 1996 approaches. Call the Schedule Hotline for updates.

- First Sunday of the month at 9:30 pm ET/6:30 pm PT

The Close Up Foundation

Each week during October through June, high school students, educators, and senior Americans discuss current events and issues in the news through programs produced by the Close Up Foundation. Several types of Close Up programs air on C-SPAN, including teleconferences, in-studio discussions, town meetings and student roundtable forums. For more information, contact the Close Up Foundation directly at (703) 706-3579. "Close Up on C-SPAN" airs at the following times:

- Mondays at 5 pm ET/2 pm PT
- Saturdays at 10 am ET/7 am PT
- Sundays on C-SPAN 2 at 5:30 pm ET/2:30 pm PT

C-SPAN in the Classroom Membership

C-SPAN in the Classroom is the network's free membership service for college and high school educators. Over 9,500 educators are members of C-SPAN in the Classroom and are entitled to the following benefits:

- The Educators' Hotline
  C-SPAN in the Classroom encourages members to stay in touch through a toll-free number reserved solely for teachers. By calling (800) 523-7596, educators can receive information about any of the services described here, as well as same-day programming updates.

- C-SPAN Professors' Guide
  This guide is intended to serve as a communication vehicle between college-level members who use the network's programming in the classroom or for academic research. Professors are encouraged to submit their own ideas for possible use in upcoming issues.
**Liberal Copyright Policy**

C-SPAN encourages educators and degree-granting educational institutions to tape the programming produced by the network for educational use. No prior permission from the network is required as long as taping is for classroom or research use, not for commercial sale or political purposes. This liberal copyright policy allows teachers to air the network live, record programs at school or home, assign students to watch a program or create their own videotapes for classroom use. In addition, C-SPAN programs may be retained in perpetuity for future school use. There is no fee for using C-SPAN as a teaching resource according to these criteria.

**Seminars for Professors**

Every year, C-SPAN in the Classroom hosts three two-day seminars for college-level educators who are interested in using the network's programming to enhance classroom learning. Applications to attend the seminars are mailed to the C-SPAN in the Classroom membership. Prospective participants may also contact the network on the Educators' Hotline to request an application.

Invited attendees spend two days in Washington, DC. They learn how to integrate C-SPAN into coursework, participate in sessions designed to demonstrate and evoke a wide variety of applications, and meet with C-SPAN staff who address issues related to classroom use of the network's telecasts (copyrights, videotape editing, obtaining programming information and more).

Applications are encouraged from professors from two- and four-year colleges and universities who have never attended a C-SPAN Seminar for Professors and are interested in learning about the network's potential classroom uses. The seminar’s interdisciplinary format will be of particular interest to professors of political science, mass communication, journalism and speech communication; however, instructors of all disciplines are invited to apply.

One of the three annual seminars for professors is an Advanced Workshop. The workshop highlights special C-SPAN programs and provides time for further discussion about using the network’s programming for teaching and research. Previous seminar participants are invited to apply.

**Faculty Development Grants**

For the fifth consecutive academic year, the network will award faculty development grants redeemable for $500 worth of videotapes of C-SPAN’s programming from the Public Affairs Video Archives at Purdue University. These grants are awarded to college and university professors who submit creative proposals for using the network’s programming in the classroom or in research projects.

Since the program’s inception, C-SPAN has awarded faculty development grants to instructors of political science, speech communication, journalism, public administration, law, business and other disciplines.

Applicants should send a 500 to 750 word description of the project in which they plan to use C-SPAN programming, along with their curriculum vitae, to Joanne Wheeler, Manager of Education and Marketing Services, 400 North Capitol St., NW, Suite 650, Washington, DC 20001. Proposals are reviewed and grants awarded on a rolling basis throughout the school year.
The Public Affairs Video Archives

Since 1987, the Public Affairs Video Archives at Purdue University has videotaped, indexed, and archived all programming cablecast on both C-SPAN and C-SPAN 2, operating independently and with the full support of C-SPAN. The Archives makes videotapes of these programs available for purchase by educators.

The following features make it easy to find out about the Archives' holdings, select tapes for classroom use, and discover research possibilities.

Toll-free Phone Number
This number (800) 423-9630 — is an easy way to contact the Archives about program availability and cost, as well as any of the services discussed here.

Videotapes for Purchase
Educators can purchase videotapes of any C-SPAN programming. Call the Archives for information on pricing.

Affiliate Memberships
Archives' affiliate members can borrow tapes and are eligible for discounts on purchases. In addition, members receive monthly program updates via electronic mail or fax and have access to the Archives' comprehensive on-line database.

Electronic Mail and Topic Searches
All of the Archives' staff are connected to the Internet and can respond electronically to inquiries about holdings. Electronic searches can generate program listings for individuals, committees, countries, key words or event sponsors.

CD-ROMs
The CD-ROMs, produced by the Archives, are a chronicle of C-SPAN public affairs programming for the years 1991 and 1992. They contain full abstracts of all C-SPAN programs, complete full-text transcripts of 8,700 public affairs events and software designed especially for teaching and research. CD-ROMs for subsequent years will soon be available.

Special Catalog Supplements
Throughout the year, the Archives publishes catalogs describing programs that are available in the fields of legislative studies, communications, and other topics.

Compilation Tapes
Every year, the Archives creates compilation tapes that contain excerpts of longer C-SPAN programs. The following compilation tapes are among those that are available: "How a Bill Becomes a Law: The Clean Air Act," "American Government Highlights," "Gulf War Debate," "Campaign Commercials," "1992 Campaign Classics" and "Democratic and Republican Convention Highlights."

Transcripts
For some C-SPAN programs, the Archives offers transcripts obtained from an independent transcription service. (See page 8.)

Research Conferences
Educators from communications and political science came to Purdue University in November 1992 for the Archives' first research conference. Another 30 educators attended the first summer institute, "Researching the Modern Congress," in late June 1993. Other conferences are planned for the future.
Publications

C-SPAN publishes and distributes publications that can be used as supplemental texts in many disciplines. Bulk orders are available. To order the publications listed below, call the network's fulfillment house at (800) 523-3174 between 8 am and 10 pm ET/5 am and 7 pm PT.

**C-SPAN's U.S. Congressional Directory**

This photo directory of the members of Congress provides biographical information, addresses, phone numbers, committee assignments and much more.

**Gavel to Gavel**

A guide to the proceedings of the House and Senate, this publication is specifically geared toward watching Congress on television. (C-SPAN and C-SPAN 2, respectively, air the House and Senate when they are in session.)

**Justice for All**

This guide to the federal judiciary includes a history of the Supreme Court; landmark decisions, details of the confirmation process and a roster of justices. (C-SPAN's America & the Courts airs Saturdays at 7 pm ET/4 pm PT.)

**Commons Sense**

A C-SPAN viewer's guide to the British House of Commons, this booklet features an overview of Parliament and a glossary of terms. (Question Time with the prime minister airs on C-SPAN every Sunday at 9 pm ET/6 pm PT.)

Transcripts

Transcripts of selected C-SPAN programs, including some National Press Club luncheon speeches, "American Profile" and "Booknotes" interviews, are available for purchase. Transcript announcements are made at the end of the program. When offered, transcripts may be purchased by writing to C-SPAN Transcripts, c/o Tapewriter, P.O. Box 885, Lincolnshire, IL 60069.
C-SPAN APPLIED IN THE COLLEGE CLASSROOM

The following articles were written by college professor members of C-SPAN in the Classroom. These educators share innovative techniques for using C-SPAN programming across a wide range of disciplines.

Readers are invited to submit their own ideas about using C-SPAN in classroom and research projects. For submission guidelines, write to C-SPAN in the Classroom, 400 North Capitol St., NW, Suite 650, Washington, DC 20001 or call the Educators' Hotline at (800) 523-7586.

Communications/Speech
C-SPAN: A Key Resource for Contemporary American Public Address
Ferald J. Bryan
Department of Communication Studies
Northern Illinois University, DeKalb, IL

Once a year at Northern Illinois University, I teach an upper-level course titled “Contemporary American Speakers and Speeches.” Through my use of numerous C-SPAN videotapes, students who take the course are reminded of the value of public address and the power that it still has in American society.

Syllabus for “Contemporary American Speakers and Speeches”
The course begins with a two-week introduction to three of the most commonly used approaches to rhetorical criticism: “traditional” (or “neo-Aristotelian”), “dramatistic” (or “Burkeian”) and “generic.” Readings from Contemporary American Public Discourse, edited by Halfrud Ross Ryan, and Richard L. Johansson’s Contemporary American Speeches provide students with examples of these three types of rhetorical analysis. To demonstrate how each technique can be applied, I show a C-SPAN videotape of President Clinton’s inaugural address in its entirety and then conduct a structured discussion of the key points of analysis suggested by these techniques.

After this orientation to rhetorical criticism, we study the six units of speeches outlined in Johansson’s Contemporary American Speeches: “Speeches That Increase Understanding,” “Speeches That Affirm Propositions of Fact,” “Speeches That Affirm Propositions of Value,” “Speeches That Create Concern for Problems,” “Speeches That Affirm Propositions of Policy” and “Speeches That Intensify Social Cohesion.” I ask students to read the texts of the speeches and then view a videotape of the speech, if available.

Many of the speeches in the Johansson volume can be purchased from the Public Affairs Video Archives at Purdue University. My department and I have purchased most of the tapes that correspond to the printed texts available in Contemporary American Speeches, including the following:

- President George Bush, “War With Iraq” from January 16, 1991
- President George Bush, “A Just War” from January 26, 1991
- Sen. John Danforth (R-Missouri), “Against a Constitutional Amendment Banning Flag Burning” from October 20, 1989
- Sen. Sam Nunn (D-Georgia), “Against Granting War Powers to the President” from January 10, 1991
In addition, I use the following speeches covered by C-SPAN that have corresponding texts in Halford Ross Ryan's *Contemporary American Public Discourse*:

- President George Bush. inaugural address from January 20, 1989
- Gov. Ann Richards (D-Texas). Democratic National Convention keynote address from July 18, 1988

**Analysis Activity: Persian Gulf War Speeches**

One activity involving C-SPAN videotapes has been particularly effective in this course: an analysis of 1991 speeches by President George Bush and Sen. Sam Nunn (D-Georgia) on the Persian Gulf War. Undergraduates see the conflict with Iraq as “their” war, and the rhetorical techniques used by Bush and Nunn seem relevant to them. I first ask students to read Nunn’s speech, “Against Granting War Powers to the President”; then, we view the C-SPAN video of the speech. Next, I assign the reading of George Bush’s “War With Iraq” speech and show the corresponding video. The subsequent class discussion focuses on the issue of “war rhetoric” either as a significant genre or special “act of drama” in the political life of the United States.

I spend at least three hours a week viewing C-SPAN and keep a blank video cassette close by so that I can tape a particularly important presidential or congressional speech for possible use in my class. C-SPAN is a key resource that helps me keep this course truly contemporary for my students.

**Communications/Broadcast Journalism**

**Raw News for the Classroom: C-SPAN in a Broadcast Journalism Class**

Roger L. Sadler

Department of Communication Arts and Sciences
Western Illinois University, Macomb, Il.

Before C-SPAN came into existence, I had difficulty finding uncut press conferences and news interviews for use in my broadcast journalism class. To provide students with a chance to see and write about such events, I had to arrange a time outside of class where they could view a press conference, board meeting or other news gathering. On top of that, I wanted to take them beyond local meetings. That’s when C-SPAN came to the rescue. C-SPAN’s coverage of major news events brought “raw” reporting to my classroom.
For a great in-class learning experience, I have the students write a story after viewing a press conference or other news event aired on C-SPAN. (I record C-SPAN programs at home and bring them to class.) When possible, we then compare student stories with network coverage of the same event. Did the students leave out valuable information that the networks put in? Did the students include something they feel the networks should have included? This use of C-SPAN’s programming allows my students to see that separating the chaff from the grain is a daily part of a journalist’s job.

We also discuss what video bites are most likely to be used in a network news story. For example, why did the network reporter choose to use a particular 15-second bite from a press conference that may have lasted a half-hour?

I have found two events covered by C-SPAN especially useful for such in-class exercises: the November 30, 1993, bill-signing ceremony for the Brady Bill and a press conference featuring U.S. Rep. Tim Penny (D-Minnesota) regarding his spending-reduction bill, which had recently been defeated.

In-Class Exercise: Signing Ceremony for the Brady Bill
Several individuals spoke at the bill-signing ceremony for the Brady Bill. From C-SPAN’s complete coverage of this event, I chose to show my students the speeches by two individuals: President Clinton and a private citizen named Melanie Musick. (Video bites from these two speeches were used in a network news story that I later showed in class.) I showed C-SPAN’s coverage of the Clinton and Musick speeches for the class, and we discussed which sound bites from this event were most likely to have been used on national newscasts. Then, we watched a national network’s coverage of the ceremony to see which bites were actually chosen.

The students were fairly adept at picking out the bites that were used by the networks. The networks had chosen a bite of President Clinton telling a story about his boyhood days and learning to use guns for hunting. The president used this story to support his assertion that the Brady Bill would not affect gun use for hunting or recreation. The Musick bite that was shown by the networks was more emotional. She talked about the day when she learned that her husband had been shot and killed at random in a public place.
We then discussed why the network news story we watched in class contained no video clips of President Reagan's press secretary, James Brady, or his wife, Sarah Brady, who also had spoken at the ceremony. After all, the bill was named after James Brady, who had been seriously wounded in the 1981 attempted assassination of President Reagan. Because of head injuries suffered in the assassination attempt, Brady read in a halting manner from a prepared script. Students theorized that Brady's somewhat stilted delivery may have prevented some reporters from using bites from him. They also deduced that reporters chose not to use bites from Mrs. Brady because she acted as "emcee" for the bill-signing. The class decided that her comments, as a result, were less emotional than those of Clinton and Musick.

This exercise was an excellent way to show students that news gathering is a subjective process. Students learned that reporters from other networks might use the same bites, portions of bites or entirely different bites. They also saw that each reporter uses certain bites in accordance with his or her own writing style.

In-Class Exercise: Press Conference with U.S. Rep. Penny

After our discussion about the Brady Bill ceremony, I played a portion of the press conference by U.S. Rep. Tim Penny (D-Minnesota). I used this as an example of an event that received no coverage on major network newscasts.

Neither I nor my students saw any mention of this press conference on any national newscasts. What factors determined the use or nonuse of this particular news conference? One student suggested that it may have been because the Penny-Kasich measure had been defeated seven days prior to this.
press conference, so the story may have been considered "old news." Another student commented:

"C-SPAN may cover it, but the major news media in a half-hour newscast don't have the time to report on every politician or political group that has a press conference in Washington." Yet another observed that perhaps the national networks felt they had more "important" news to cover in their half-hour newscasts that night.

Other questions came up regarding the lack of coverage of the Penny press conference: Was this a news day that was dominated with major crises? Did network reporters think the individuals involved had nothing new or exciting to say on the subject?

These are all basic concepts about news gathering that I try to get across to my students every semester. C-SPAN is a great tool to help students see these concepts applied in the real world of broadcast journalism and to get them thinking about the gatekeeping process in news. Through these exercises, students learned about the factors that influence how much attention, if any, a particular story will get on national news.

Such C-SPAN exercises are also useful for teaching writing skills. I have had students compare their "news stories" with those of network news reporters. In what ways did national reporters use language to bring out certain points about the story? Was any reporter's story especially good or especially bad?

To end the exercise on a humorous note, I asked my students, "Hey, why don't we set up a local C-SPAN for our community?" Appropriately, the students laughed. Our college town, including students, has a population of about 30,000. Gathering enough local news for our six half-hour TV newscasts each week is enough of a challenge. Rarely do we have to edit stories from our newscasts like producers of national newscasts frequently do.
These C-SPAN exercises show beginning news students that broadcast news on a national level involves more discretion and "weeding out." National news reporters and producers have to choose from a wide array of national and international stories each day. These in-class exercises using C-SPAN take my students beyond small-town broadcast news and introduce them to a "higher level" of news gathering.

Forestry/Natural Resources Issues

Using C-SPAN to Teach About Natural Resource Issues

Thomas J. Straka
Department of Forest Resources
Clemson University, Clemson, SC

Forestry education tends to be somewhat provincial. Just as the forest is divided naturally into the North, South, East, and West, students of forestry and natural resources often have a difficult time understanding the different management philosophies in other regions. Forestry students at southern universities tend to think of the forest resource as being owned by regular people like their families, relatives, or farmers (and they're right). Nonindustrial private forest land in the East is 70 percent of total forest land) or owned by forest industry (another 20 percent). These forestry students have a hard time understanding why federal timber policies are such a "big deal" out West.

Forest statistics can explain a large part of the reason for this. Almost three-quarters of the nation's commercial timberland is in the eastern United States. The remaining quarter is concentrated on the Pacific coast and in the northern Rocky Mountain states. Two-thirds of the western commercial timberland is in public ownership. Before the recent controversies over the spotted owl, ancient forests and timber harvesting in old-growth forests, nearly 50 percent of western timber harvests came from public lands, while less than 10 percent of eastern harvests took place on public land.
work has covered many forestry-related events, including the following:

- President Clinton’s April 2, 1993, Forest Conference in Portland, Oregon
- The Agriculture Committee’s joint hearing on harvesting in old-growth forests
- Former Secretary of the Interior Manuel Lujan’s address on off-shore drilling for oil in California
- Former Secretary of the Interior Manuel Lujan’s plan for spotted owl protection
- An Environmental Law Institute forum on administrative appeals of timber sales

I found C-SPAN’s coverage of the Portland Forest Conference especially useful. During this event, President Clinton, Vice President Gore, several members of the president’s Cabinet and other key administrators met with local community members, forest industry leaders, environmentalists, scientists and forestry educators.

Until my students saw the actual people and problems involved in major forest policy decisions, they thought of curtailing old-growth timber harvests to protect an owl as a “short-term forest inventory problem.” Their textbooks tend to talk about trees and timber inventory, seldom mentioning the economic and social aspects of using this inventory. Viewing this conference helped my students understand the socio-economic implications of forest policies.

During the conference, local residents discussed economic uncertainty, polarization, frustration and fear. Loggers pointed out that the median income for a person living in Trinity County, California, is $13,900. “We don’t have a whole lot to compromise with at that rate,” they said. “Don’t send us money. Let us work. We need these jobs. We need that pride.” Forestry professionals asked, “What does society want for and from their forests? How do they want to make a living? How do they want the Pacific Northwest to look? How much assurance do they want that endangered species will survive and flourish?” Local people showed their anger about the control over their livelihood by federal and state natural resource agencies, environmental groups and large timber corporations with out-of-state headquarters. An executive vice president of Weyerhaeuser Company said, “There must be a vision. You can’t have a vision established by the
courts: you can't have a vision established by three different regulatory agencies; you can't have a vision established by everyone pulling in every direction." One of the questions addressed by the conference, "Where do we go from here?" was answered by a member of the Yakima Indian Nation: "We go home to worried families and stressed ecosystems."

Such national and regional debate on these forestry and natural resource issues adds tremendous depth to forest policy and management courses at the university level. There is no better way to move beyond the textbook than a "real world" C-SPAN presentation. And the real world is all that C-SPAN presents.

Political Science/Political Behavior
"Real-World" Politics in a Political Behavior Course

William K. Hall
Department of Political Science
Bradley University, Peoria, IL

In the fall semester of every election year since 1972, students in my junior/senior-level political behavior course have analyzed select contests for the U.S. Senate. Their objective: to predict the winner of one of these contests and justify their predictions with research and analysis. To add some real-life excitement to this project, I require them to turn in their papers predicting and justifying the candidate they've chosen by noon on Election Day, even though the voters—by the very moment the students' papers are due—are still in the process of deciding who will win the contest!

My students have always followed the last two to six months of their Senate races by subscribing to a major newspaper of the chosen senator's state. In addition, in the last several years, they have begun to use C-SPAN as a resource as well. They now watch for debates between the Senate candidates in their states as well as programs on the year's Senate campaigns, such as party briefings and political commercials. I encourage them to watch C-SPAN programs in which incumbent senators up for re-election might be appearing—viewer call-in shows and the like. If the chosen race features an incumbent or a House member making a race for the Senate, I urge them to watch that incumbent or House member on C-SPAN fulfilling her or his duties as a legislator (all the while campaigning, of course).

The Senate Campaign Activity

I begin this activity by selecting approximately 25 Senate contests which—at that point in the campaign calendar—appear to be the most competitive of the year. Then, I provide a brief overview of each of these Senate races and ask...
students to choose the one they want to follow. Their work then begins.

In September, students try to become "experts" on their chosen state. They research the state itself in areas such as current political situation (including the current election year's primary election); political history (major figures, events and election results for state and congressional elections for the past two decades); demographics; and structure of the economy.

This first phase of the students' research is crucial. If they do a thorough job, they will have the foundation needed to help them interpret their chosen Senate elections. When the students begin to feel comfortable with the background information they have gained, they are prepared to study the chosen Senate race.

Throughout the month of October and the few days of November prior to Election Day, the students are busy analyzing the chosen Senate contest as it unfolds. By reading an in-state daily newspaper, they find out about the candidate's position on various issues, keep track of what is happening in the state and in both Senate campaigns, study polls on how the race is going, sense the importance of the statement "all politics is local," and determine what that might mean for their particular race. They are also busy writing up their analyses, summing up their research and beginning to draw their conclusions.

Finally, on Election Day, they turn in their "prediction papers." The accuracy of the students' predictions plays a tiny part of my evaluation of their work. In fact, the most important use of their projections is to play a little game in which the students try to "out-predict" the professor. Members of the class announce their predictions during class on Election Day, and I announce my own independent projections for all of the Senate races that have been followed by the class. We then hold a contest to see who correctly predicted more races: the class or the professor?

Using C-SPAN to Follow the Campaigns

In 1990, I attended a C-SPAN Seminar for Professors. As I returned to my home campus, I knew that I wanted to make some significant changes to my Senate election project assignment.

That year, for the first time in my classes, students analyzing one of the Senate races had the opportunity to use C-SPAN to see their candidates "in the flesh." They watched the candidates debating one another. They watched the candidates campaigning for office. They could actually watch some of the television commercials being aired to
“sell” the candidates, just as though they were voters being wooed. Students reported that C-SPAN coverage helped them feel as if they were in the state during the election, watching it unfold before their eyes. In that first election in which we used various C-SPAN programs, students were overwhelmingly positive about the benefits C-SPAN provided.

By the time the 1992 Senate races were underway, I had designed numerous improvements on my use of C-SPAN in this class. In addition to the contemporary programming on the Senate contests and candidates in 1992, we made use of archival material. If an incumbent was seeking re-election, we went to the indices at the Public Affairs Video Archives at Purdue University to see when the senator had appeared on C-SPAN and which appearances could be useful. If a senator running for re-election had chaired important hearings, the tapes were viewed and an opinion of the senator could be constructed.

I urged students to make use of videotapes compiled by the Purdue Archives, such as the “Senate Campaign Update and Commercials” tapes created in 1988 and 1990. Both of these compilations include campaign updates and party briefings on the Senate campaigns of that year as well as a collection of campaign commercials from various Senate races. I also used segments of these tapes in the classroom to illustrate various points about television and politics.

Beginning with the Senate elections of 1994, I plan to help students make much greater use of the Purdue Archives. I also will probably make enormous use of the C-SPAN Educators’ Hotline to learn about program schedules and the like. In addition, by the time my students do the Senate election project for the 1996 election cycle, I will possess video files of campaign commercials for each election going back to 1988. Students will be able to see what an incumbent senator did with commercials six years ago when he or she last ran for the Senate.

Students always evaluate this project positively. Many say it gives them a chance to take what they learned in a classroom and apply it to a “real-world” situation. I find that it not only gives them a chance to analyze a real political case study but also shows them the value of building a firm research foundation. Students take theories from the pages of our texts and test them in the crucible of a Senate election contest.
The addition of what I call the "C-SPAN component" has made student evaluations even more positive. Future students in my political behavior course are likely to be much better informed about their Senate races than those students who completed the project before I began using the network’s programming. C-SPAN has improved what was already an excellent student project.

Political Science/First Amendment Rights

The First Amendment Establishment Clause Comes Alive With C-SPAN

Mary A. Hepburn
Vinson Institute of Government
University of Georgia, Athens, GA

"The (C-SPAN) videos were the best introduction I’ve seen on how differences over rights can become a lawsuit and then become a Supreme Court case." "The tapes really made the ‘establishment of religion’ phrase of the First Amendment come alive.”

The above comments are from students who were interviewed after taking a 1991-92 course at the University of Georgia, “The First Amendment, Religion and American Society,” in which C-SPAN video documents—many created from the network’s weekly “America & the Courts” program—were used to analyze a Supreme Court case. The course was one of the special short courses sponsored by the Bill of Rights Educational Collaborative of the American Historical Association and the American Political Science Association, and supported by the Pew Charitable Trusts. The students, who are also school teachers, were recalling the sessions in which school prayer was discussed in relationship to First Amendment guarantees, using the case Lee v. Weisman as the current example.

In the process of selecting readings and other instructional materials for the course, I found that most textbook readings regarding separation of church and state were outdated. As alternatives, I sought information and analysis in law newsletters, newspapers and news magazines, in addition to videotapes of C-SPAN programming from the Public Affairs Video Archives at Purdue University.

Several taped interviews related to Lee v. Weisman were listed in the Archives indices. I selected one in which plaintiff Robert Lee was interviewed and another in which the defendant, Daniel Weisman, and his daughter were interviewed. The tapes were made only a few weeks before the course began and were far more current than textbook material we had on the issue. Moreover, they provided a human dimension to the issue of school prayer and to the specific case. My use of these tapes turned out to be pivotal for the students, not only because of the information and personal insights on rights which they provided, but also because of the way in which they demonstrated the use of video documents in analyzing a public issue.
As with any documentary material, the effectiveness of the tapes in instruction is dependent on the context in which they are used. In this course, readings and lectures provided background on the precedent for the case, the changing makeup of the court, the close 5-4 decision in a recent related case, and a summary of the arguments in the *Lee* case.

The class examined the interpretation of the Establishment Clause of the First Amendment as well as the current issues related to it. After the class viewed the videotapes, a panel of diverse clergy and a philosophy professor discussed issues of separation of church and state with the students.

**The Case of Lee v. Weisman**

The case of *Lee v. Weisman* was initiated by Daniel Weisman, father of a student at a Providence, Rhode Island school. At issue was the practice of a benediction or prayer as part of graduation ceremonies. Mr. Weisman's daughter objected to the inclusion of prayer in the public school graduation ceremony. (Over the years, the school principal had rotated the invitation to lead the prayer to clergy of various denominations.)

Arguments revolved around the precedent of the "Lemon test" set in the 1971 case *Lemon v. Kurtzman*. Under *Lemon*, governmental activity violates the Establishment Clause of the First Amendment if it fails to satisfy any of three requirements: (1) the activity must have a secular purpose; (2) it must not advance or inhibit religion; and (3) it must not foster excessive entanglement with religion. One question raised was whether the prayer traditionally offered at the school graduation in Providence failed to meet the requirements set down in the *Lemon* case. Another question was whether the "Lemon test" was outdated and likely to be thrown out by the Court.

The District Court decided in favor of the Weismans. The appeal to the U.S. Court of Appeals for the First Circuit was also decided in their favor. The Providence School Board then decided to appeal the decision to the U.S. Supreme Court, and the Supreme Court agreed to review the First
In 1992 the Court issued its decision, holding that the "Lemon test" had been violated. The majority opinion stated that the practice of having invocations in public school graduations "creates an identification of governmental power with religious practice, endorses religion, and violates the Establishment Clause." (Lowe Week, 1992).

The Videotapes' Effect in the Classroom

Although argued before the Court during this course, the decision was not handed down until after the course had concluded. Consequently, this case was ideal for arousing interest and motivating study as the students tried to predict the outcome. Additionally, the case placed the establishment of religion issue in a school setting familiar to the teachers in the course.

Today, many of the teachers who took the course use copies of the tapes in their own classrooms as they teach about the First Amendment, the Establishment Clause and freedom of religion. (When we purchased the tapes, we obtained permission from the Purdue Archives to reproduce the tapes for teachers in the class.) Several teachers have expressed how the tapes have enriched their lessons on the First Amendment. Like our university faculty, the teachers are learning to videotape other appropriate C-SPAN programs to further enrich studies of law, history, government, international relations and public affairs generally.

The C-SPAN interviews, panel discussions and on-site recordings offer a wide variety of in-depth, interdisciplinary resource material on significant public issues. In a period when most television news and information is offered in sound bites, the expanse and depth of C-SPAN's public affairs coverage is a breath of fresh air for academic users.
My decision to design a course around C-SPAN programming stemmed from my participation in a June 1991 C-SPAN Professors' Seminar. Based on the techniques I learned there, I presented a videotape case study of the Persian Gulf War to my American foreign policy and my politico-military strategy classes. Student reaction to the case study was favorable, so I decided to use C-SPAN materials in the classroom on a regular basis.

Creating the Course
The first step in creating “Intelligence in the Post-Cold War World” was to put together an outline of the topics to be covered. I was particularly interested in new intelligence targeting priorities, new collection techniques and the potential restructuring of the intelligence community. The U.S. House and Senate Select Committees on Intelligence held hearings on these and other topics, and the Bush administration was actively engaged in conducting its own study of the same questions as it tried to head off congressional efforts.

The next step was to contact the Public Affairs Video Archives at Purdue University in order to use my faculty development grant. Archives staff used their computerized information retrieval system to pull together a list of existing tapes on intelligence-related topics, and I found that several types of material were available. I was pleased to find videotapes of public speeches by four present or former directors of Central Intelligence including William Colby.

Creating a New Course With C-SPAN Programming

Edward Platt

A combination of events in 1993 provided me with an opportunity to fully incorporate C-SPAN programming into my teaching. I received a sabbatical from my university and a $500 C-SPAN faculty development grant redeemable for videotapes of C-SPAN programming from the Public Affairs Video Archives at Purdue University. In addition, I received an invitation from the Center for the Study of Intelligence at the CIA to attend a conference called “The Teaching of Intelligence.” The two intelligence courses I had been teaching were rapidly becoming outdated, so I took advantage of my sabbatical to design a new course, “Intelligence in the Post-Cold War World,” incorporating C-SPAN materials from the Archives.
Stansfield Turner, William Webster and Robert Gates. Some of the speeches were made in the aftermath of the Persian Gulf War. Others occurred after central European states had won their independence but before the disintegration of the Soviet Union. There were also two or three speeches that had been given after the Soviet Union lay in shambles.

Available C-SPAN videotapes featuring congressional hearings on intelligence matters took several forms. The tapes included Senate confirmation hearings for Robert Gates and James Woolsey, in addition to hearings on congressional oversight of the intelligence community, its organization and potential restructuring. Finally, "state-of-the-world" presentations on current trouble spots were offered, as well as specific briefings on new areas of concern like nuclear proliferation, terrorism, economic intelligence and the future of covert action.

Clearly, there were tapes on more different topics than I could possibly use. I used three methods to choose my tapes. First, many of the Archives' lists of videotapes featured brief content descriptions. Second, in the case of the public speeches of "sitting" directors of Central Intelligence, the CIA's Office of Public Affairs was frequently able to provide written texts of the presentations. Finally, I referred to the published accounts of the congressional committee hearings in the "government documents" section of our university library. By using all three techniques, I was able to assess the nature of the materials before ordering them.

Techniques for Using C-SPAN in the Classroom
I use the tapes in several ways in the classroom. In most cases, I show relatively short segments as a background for lectures. For example, former Director of Central Intelligence William Colby spoke to Washington Center interns on September 7, 1991. He identified four major post-World War II intelligence "revolutions": the centralization of analysis, technological change in information gathering, congressional oversight, and new roles and purposes assigned to the intelligence community. I use each portion of the speech separately as the basis for launching a longer lecture on the topic. All of the tapes contain a running time sequence guide at the base of the viewing screen, so it is possible to set up the tape at the proper starting point before each class begins.

On another occasion, on November 3, 1992, Mr. Colby spoke to a forum at the American Stock Exchange on the topic, "Economic Intelligence: The New Game for Spies." This particular speech is only 24 minutes long, so I show it in its entirety, then comment upon it.

The congressional hearings are usually rather lengthy. I use the preliminary statement by the guest witness and show segments of the question-and-answer follow-up only if they are particularly significant. Since the preliminary statements also can last for an hour or so, I usually break them down into 10- to 15-minute segments, following the topical pattern of the major points presented to maintain continuity and coherence.

Preparing to use the tapes in the classroom does take some preliminary work. I view the tapes, keep a running record of the time sequence along with notes on the specific topics covered, then type up "viewing guides" for my own use in preparing lecture notes. I only have to do this once, then I'm ready to "roll 'em." I get to the classroom at least 10 minutes early, test the VCR and monitor to make sure they are functioning properly and advance the tape to the proper segment.

Has the work been worth it? We will find out in the fall semester of 1994 when I offer the new course for the first time. My feeling is that I have gained an enormous amount of information in a truly exciting way. If past experience is any guide, my own enthusiasm will be reflected by the students who enroll in the course.
To provide C-SPAN’s audience access to the live, gavel-to-gavel proceedings of the U.S. House of Representatives and the U.S. Senate and to other forums where public policy is discussed, debated and decided—all without editing, commentary or analysis and with a balanced presentation of points of view;

To provide elected and appointed officials and others who would influence public policy a direct conduit to the audience without filtering or otherwise distorting their points of view;

To provide the audience, through the call-in program, direct access to elected officials, other decision-makers and journalists on a frequent and open basis;

To employ production values that accurately convey the business of government rather than distract from it;

To conduct all other aspects of C-SPAN operations consistent with these principles.
