The Partnership Schools Initiative (PSI) originated among Texas schools in 1992 as a network to create an educational system for achieving excellence and equity for all students. Participants in the network developed a matrix to be used by schools embarking on restructuring efforts, which identifies what leaders of successful schools can do to create a context for change. This document contains the framework developed by the Partnership Schools facilitators, who incorporated feedback from educators, teachers, and Education Service Center directors. The framework is based on the experiences of the Partnership Schools members as they worked through a systemic change process. Each part of the framework addresses one of the six PSI objectives. Each objective and its essential components are described through a continuum of stages of change. The objectives are to: (1) involve all levels of the campus community in the decision-making process; (2) provide comprehensive staff development that addresses campus needs; (3) develop partnerships that support campus plans for improvement; (4) identify and remove barriers that hinder student performance; (5) design and implement a plan to improve the performance of all students; and (6) share the experiences and results of campus initiatives. A list of participating schools is included. (LMI)

ACKNOWLEDGMENTS

Appreciation is extended to the numerous individuals who have contributed to the development of the Framework for Change: A Continuum for School Restructuring. This document was developed through the partnership of the Education Service Centers, the Texas Education Agency, and the Partnership Schools Initiative (PSI) campuses and districts. Appreciation is also extended to former Commissioner of Education Lionel R. Meno for his vision embodied in the Partnership Schools.

Very sincere thanks go to all facilitators for their hard work and contributions in furthering the development of the Framework for Change and to all the stakeholders in the field who gave feedback and input.

The following individuals were responsible for the development of this document: Partnership Schools Initiative Facilitators Gloria Crum, Education Service Center (ESC) Region I; Stuart Isdale, ESC Region II; Melba Nuñez, ESC Region III; Mary Ann Currie, ESC Region IV; Monica Mahfouz, ESC Region V; James Delbert, ESC Region VI; Brent Taylor, ESC Region VII; Marsha McCoy, ESC Region VIII; Marilyn Keck, ESC Region IX; Kathie van Teeckelenburgh, ESC Region X; Ann Hoover, ESC Region XI; Linda Holbrook, ESC Region XII; Nora Nielsen, ESC Region XIII; Ann McLennan, ESC Region XIV; Barbara Brown, ESC Region XV; Ricki Chapman, ESC Region XVI; Maria Mora de Gamble, ESC Region XVII; Sharon Welch, ESC Region XVIII; Joseph Parker, ESC Region XIX; Ed Varra, ESC Region XX; Gloria Amescua, Director of Programs, and Laura Price Cobb, Senior Director, Partnership Schools Initiative, Texas Education Agency.

Additional acknowledgments are offered to the contributions of the following people who assisted the schools in their restructuring: Former Partnership Schools Facilitators Shelley Range, ESC Region II; Betty Musch, ESC Region XI; Emily O'Connor, ESC Region VIII; Carolyn Dungan, ESC Region VIII; and Lydia Ozuna, ESC Region IV, who also led the facilitators and directors in the initial process of developing the Framework.

Special thanks go to Gloria Nava, Administrative Technician, Partnership Schools Initiative, Texas Education Agency, and Della Mae Mertens, Secretary, Education Service Center, Region XX, for their invaluable assistance.

The feedback and ideas contributed by Education Service Center Executive Directors, and Partnership Schools Initiative superintendents, central office personnel, principals, and teachers also greatly enhanced the document.

“Every Person is a Change Agent.”

Michael Fullan
Change Forces, 1993
FOREWORD

The schools in the Partnership Schools Initiative, named in 1992, accepted a challenge to create an educational system designed to achieve excellence and equity for all students. Along with this opportunity for growth and development, they accepted the responsibility to examine who they were, where they were going and why. In this process, they have faced a complex journey of change.

The change process is one that is difficult to characterize. The participants have found that it is exhausting and thrilling. They have also found that it is nonlinear—that there are times to push for risk-taking and times to support, times for searching and times for plunging in, times for action and times for reflection. They have learned that there is forward motion, backsliding and the status quo, but also that change is a continuous cycle or spiral.

Through risk-taking, creativity, and collaboration, the Partnership Schools engaged in restructuring. What has been learned through this process evolved into a desire and a need to develop a tool that schools could use for self-assessment, reflection, dialogue, motivation, and direction.

The beginning and planning for the development of what is now known as the *Framework for Change: A Continuum for School Restructuring* began in the summer of 1994. The Partnership Schools facilitators and the TEA directors met in the fall to begin the development of an innovation configuration matrix which could be used by the Partnership Schools and by other schools embarking on restructuring. The initial discussions centered around what leaders of successful schools do and about creating a context for change. Two models were starting points for the development: the Innovation Configuration Matrix developed by the Research and Development Center for Teacher Education, The University of Texas at Austin, available through the Southwest Educational Development Laboratory (SEDL), as well as SEDL’s process model, and A Continuum of Systemic Change developed by InSites, A Support Network for Educational Change.

Throughout the fall, this group worked on identifying and defining the configuration of components, stages, and descriptors through discussions and writing of design teams and the entire group. They reached consensus about all aspects of the *Framework* including that its design be narrative and developmental.

At this point, the facilitators sought input from the field from principals, teachers, superintendents, and Education Service Center Directors. Their comments and suggestions were reviewed and incorporated early in 1995. Thus, the *Framework for Change: A Continuum for School Restructuring* is a document which incorporates the best thinking from those involved in the Partnership Schools and in the process of facilitating and supporting change at the campus, district, regional and state levels.

Without the commitment of the many people involved in this initiative, the progress that the Partnership Schools have made would have been difficult. These campuses accepted the challenge of changing the old system and meeting the needs of all students to work toward excellence and equity. Their efforts and progress in preparing their students for the future are to be commended.
RATIONALE

The Partnership Schools Initiative was created to be a catalyst for systemic change. Campuses were empowered to meet the unique needs of their students. They were given the freedom and flexibility to restructure with the goal of improving student achievement and closing the performance gap among students.

The Partnership Schools along with their school educational support structures are in the third year of restructuring their schools. Representing the diversity of the State of Texas, the Partnership Schools are at various stages in the process of change. Their restructuring is providing crucial learning about the process of change in different situations. What has been learned from the experiences of the Partnership Schools as they work through a systemic change process has led to the creation of the Framework for Change: A Continuum for School Restructuring.

The Framework for Change is a developmental tool that can be used by schools that are restructuring to benchmark their progress through stages of change. It is a document that captures the essence of the growth taking place in the Partnership Schools, which reflects the changes taking place in any school that is undertaking systemic change. The stages of growth indicate a continuum where the majority of the school community may be at any given time. This document focuses on systemic change rather than just program implementation.

The intent of the document is that it be used as a developmental tool that charts progress. It is specific so that those who are using it will have a clear idea of who is responsible, who might be involved, and for what specific actions. Since it is specific, it is not intended to simply be handed out to users. The document needs the human element to guide the campus community through it, whether it is being used to stimulate dialogue, for planning, or various other purposes.

Each part of the Framework addresses one of the six PSI objectives. Each objective and its essential components are described throughout a continuum of stages of change. A school should be able to recognize if a majority of its staff, students, parents, and community exhibit a preponderance of the descriptors. The descriptors are not inclusive of all aspects of each objective, but they describe various indicators that are probably present. A campus may be, and most likely will be, at different stages depending upon the component and objective.

An additional concept is that after being maintained, the new system becomes the old. The Framework for Change indicates a process that is cyclical in nature, encouraging futuristic thinking. The stages remain the same but with different descriptors. Campuses that have restructured and evolved will have learned how to transition more quickly through the stages. Having learned the process of change, schools can incorporate many components at a higher level.

The Framework for Change: A Continuum for School Restructuring has many possible uses. It is hoped that it is not only the Partnership Schools that will benefit from its development, but that the Framework enhances the sharing of the experiences of the Partnership Schools to the benefit of schools throughout Texas and beyond.
THE PARTNERSHIP SCHOOLS INITIATIVE

MISSION STATEMENT

The Partnership Schools Initiative, as a catalyst for systemic change, provides support, freedom and empowerment to campuses in meeting their unique needs and involves all stakeholders in facilitating academic excellence and equity.

GOAL

The goal of the Partnership Schools Initiative is to demonstrate that schools can overcome complex challenges to improve student achievement and close performance gaps.

OBJECTIVES

- To involve all levels of the campus community in the decision-making process.
- To provide comprehensive staff development that addresses campus needs.
- To develop partnerships that support campus plans for improvement.
- To identify and remove barriers which hinder student performance.
- To design and implement a plan to improve the performance of all students.
- To share the experiences and results of campus initiatives.
DESCRIPTION OF TERMS

Objectives - The objectives are derived from the Partnership Schools Initiative mission and goal. They support restructuring to improve student achievement.

Stages - (across the top) These indicate where a school might be in the process of restructuring. These titles suggest what might be occurring in a period of progress, growth or development.

Components - (down the sides) These can be thought of as critical attributes or essential considerations for each objective.

Descriptors - These are the descriptions or variations which list some conditions that may be experienced by the school, segments of the school, or school community.

DESCRIPTION OF STAGES
(Key Words and Phrases)

Maintenance of Old System - the known, the comfort zone, “That’s the way we’ve always done it.”

Awareness - learning, brought to my attention

Exploring - trying out, going out to see what’s happening; looking for options available

Transitioning - doing, starting to use, adopting new, commitment to identified areas

Emerging - connecting, full implementation, beginning of internalization

Predominance of New System - institutionalization, system established
OBJECTIVE 1
To involve all levels of the campus community in the decision-making process
<table>
<thead>
<tr>
<th>Identification of campus community members in the decision-making process</th>
<th>• Principal only makes decisions.</th>
<th>• Principal asks a select group of teachers to give input into the decisions.</th>
<th>• Principal and select group of teachers begin to explore potential community members to be involved in decisions.</th>

</tbody>
</table>

**BEST COPY AVAILABLE**
**Transitioning**

- Selected students are invited to "sit-in" on meetings with no expectation from campus personnel for students to participate.
- Specific parents that represent various ethnic groups and economic levels are asked to assist with decisions; however, they are expected to willingly agree.
- Select committee recognizes that divergent thinking is needed to address the school's problems.
- Volunteers from the community "at large" are asked to join the committee. SBDM committee is formed and begins making decisions.
- SBDM committee recognizes the need to correlate the various task forces or subcommittees according to function and purpose.
- SBDM committee initiates the collection of data or information. Principal's approval is not required.
- Data is collected and given to various groups to make recommendations to the SBDM committee.
- SBDM committee uses recommendations; however, only "majority rule" decisions are made by the group.
- SBDM committee recognizes the need for training in consensus-building strategies to be given to the group.
- Campus begins to use technology and other communication devices to involve/inform its clientele.
- Campus committees recognize the need to make parents and community members feel valued.
- Alternative and creative methods are implemented to reach out and bring the community into the school i.e., family picnics, festivals, mentor parents for new families, multilingual presentations at school functions.
- All of the campus community members know the procedures followed by the school in obtaining and disseminating information.
- Campus provides a list of new families to the PTA/PTO.
- New families are contacted, informed and invited to school meetings.
- Community members are notified that the school is having a meeting.
- Evaluative information is requested from participants. However, no action is taken with the material.
- Groups formed for the purpose of decision-making begin to represent grade levels, departments, content areas, etc.

**Emerging New System**

- Committee includes community members that represent business/industry, higher education, social service organizations, and feeder campuses.
- Committee expects that the new members will serve in an advisory capacity to the school.
- Committee expects the student representative to represent the student body.
- SBDM committee recognizes the need to obtain information and recommendations from multiple committees.
- SBDM committee recommends that other groups be formed to assist with decisions.
- Additional committees and/or task force groups are formed to assist with decisions.
- SBDM committee and task force groups are empowered to gather, analyze and prioritize data, plus make recommendations for decisions.
- SBDM committee uses recommendations to make decisions. (The majority acknowledges the rights of the minority with some consideration given to the needs and requests of the minority.)
- Equity of group membership is becoming important to the composition of the SBDM committee.
- SBDM committee, task groups, and other campus committees begin to plan activities and functions that utilize a variety of innovative methods and communication devices to involve/inform the entire school population.
- Campus and PTA/PTO work together to provide methods for new families to be contacted, informed, invited and taken to the meetings.
- Community members attend meetings with no expectation from anyone to participate.
- Evaluative information is requested with results acted upon and incorporated into future agenda.

**Predominance of the New System**

- Students select representative(s) to participate on the committee.
- Equal representation of socioeconomic and ethnic groups is required.
- Committee members are expected to fully participate in making decisions.
- Focus of the committee is for the entire community and not only the "good" of the school.
- Time is allocated by all members of the community to participate fully in the decision-making process.
- SBDM committee defines its roles and functions.
- SBDM members are empowered to reach consensus-based decisions.
- The campus community is empowered to make decisions by its involvement in the SBDM committee or one of the other subcommittees or task groups.
- The campus community is provided training in decision-making and consensus-building.
- The collaborative process for making decisions is in place and functioning.
- Appropriate decisions are consensus driven.
- All campus community functions are planned by the various committees utilizing alternative and creative methods to involve all aspects of the population.
- Campus committees and task force groups meet on a regular basis.
- Meetings are publicized in advance with notification using innovative communicative devices and multilingual approaches to reflect the population.
- Input for the agenda is actively solicited prior to meetings.
- Meeting agenda is distributed in advance.
- Committees and task force groups continue to function when the campus or group leadership changes.
- Meetings include representatives from all identified campus community decision-makers.
- Campus community members use reflection to self-correct at various points in the meeting.
- Evaluative information is used for designing structure and process of future meetings.
OBJECTIVE 2
To provide comprehensive staff development that addresses campus needs
### OBJECTIVE 2

**To provide comprehensive staff development that addresses campus needs.**

**Maintenance of Old System**

<table>

OBJECTIVE 3
To develop partnerships that support campus plans for improvement
### Objective 3

**To develop partnerships that support campus plans for improvement**

<table>
<thead>
<tr>
<th>Maintenance of Old System</th>
<th>Awareness</th>
<th>Exploring</th>
</tr>
</thead>
</table>
| **Identification of partners** (partners include all stakeholders i.e. students, parents, teachers, administrators, community and business members, etc.) | **No partners are identified.**  
- Traditional partners (PTA/PTO, room mother, booster club) are identified.  
- Self-selected volunteers are involved. | **Teachers and SBDM council identify partners.**  
- Process is developed for identifying partners.  
- Presentations are made to civic/business groups to develop an awareness of program. |
| **Levels of Involvement** | **People outside school are not involved.**  
- Partnerships are one-shot supplemental activities. | **School leaders begin conversations with potential partners on core educational issues.**  
- Partners serve as tutors. |
| **Roles** | **Selected parents serve on Site-Based Decision Making (SBDM) council.**  
- Campus staff members become aware of the multiple roles partners can play in the educational program. | **Campus study groups research different roles for partners.** |
| **System of communication** | **Newsletters are sent periodically.**  
- Occasional newspaper articles are written on school activities.  
- Flyers are distributed.  
- Voice mail messages (announcements, one-way, etc.) are available. | **Business and community partners are invited to campuses (open house, information fair, and other organized activities).**  
- Meeting is held with identified partners.  
- Newspaper articles are written to share curriculum and instruction.  
- Newspaper articles are written to seek potential new partners.  
- Cable TV is utilized to communicate to larger community.  
- Two-way communication (e.g., homework hotlines, parent hotlines) is established. |
| **Results** | **No link is evident between partnerships and campus improvement plan.**  
- Activities comply with parent involvement mandate.  
- No information is formally gathered on effectiveness of partners. | **New ways for interacting with partners are developed**  
(set up a business advisory committee to develop ways to assist schools). |

- **Results**
  - **No link is evident between partnerships and campus improvement plan.**  
  - Activities comply with parent involvement mandate.  
  - No information is formally gathered on effectiveness of partners.

- **System of communication**
  - **Newsletters are sent periodically.**  
  - Occasional newspaper articles are written on school activities.  
  - Flyers are distributed.  
  - Voice mail messages (announcements, one-way, etc.) are available.

- **Levels of Involvement**
  - **People outside school are not involved.**  
  - Partnerships are one-shot supplemental activities.

- **Roles**
  - **Selected parents serve on Site-Based Decision Making (SBDM) council.**  
  - Campus staff members become aware of the multiple roles partners can play in the educational program.

- **Maintenance of Old System**
  - **No partners are identified.**  
  - Traditional partners (PTA/PTO, room mother, booster club) are identified.  
  - Self-selected volunteers are involved.

- **Awareness**
  - **Principal assumes sole responsibility for identifying partners.**  
  - Presentations are made to civic/business groups to develop an awareness of program.

- **Exploring**
  - **School leaders begin conversations with potential partners on core educational issues.**  
  - Partners serve as tutors.

OBJECTIVE 4
To identify and remove barriers which hinder student performance
### Objective 4  
**To identify and remove barriers which hinder student performance**

<table>
<thead>
<tr>
<th>Maintenance of Old System</th>
<th>Awareness</th>
<th>Exploring</th>
</tr>
</thead>
</table>
| **Process of Identifying barriers which hinder student performance** | • Available data are not utilized to identify barriers.  
• No barriers are identified.  
• Emphasis is placed on remediation programs which do not target specific barriers. | • The need to use data in identifying barriers is recognized.  
• Discrepancy between expected outcomes and actual outcomes is recognized.  
• Unfocused remediation programs are recognized as ineffective. | • Principal and some staff explore different types of data to collect to identify barriers (AEIS, instruction, grouping, curriculum, staff development, climate, Correlates of Effective Schools, etc.).  
• There is a search for reasons to understand why there is a discrepancy.  
• Other options (instructional practices) that directly address barriers are surveyed. |

| **Process of removing barriers which hinder student performance** | • No process is in place for removing barriers caused by local rules/regulations for compliance (inflexible system).  
• Difficulties occur in accessing waiver process.  
• Staff development is general and not targeted to identified barriers. | • The need to have a process in place to remove barriers is acknowledged.  
• Campus administration becomes aware that a waiver process can be accessed.  
• Campus administration recognizes that specific staff development is needed to improve skills to overcome identified barriers. | • The different processes by which barriers could be removed are explored.  
• The state’s system of rules/regulations for barriers to student performance is examined.  
• Available trainings that target identified barriers are explored. |

| **Participants in the process of identifying and removing barriers which hinder student performance** | • No one identifies barriers.  
• Barriers are identified through a system of compliance from the state. | • Central office staff makes campus administration aware of the need to identify barriers.  
• There is recognition that meeting compliance issues does not necessarily remove barriers because the process does not involve local stakeholders or focus on student achievement. | • Campus administrators and small groups (counselor, department heads, grade levels chairs, leaders) participate in the process of trying to identify barriers.  
• New roles and responsibilities are given to district campus staff to determine barriers from the state. |

<p>| <strong>Evaluating the process of identifying and removing barriers which hinder student performance</strong> | • No process is in place for evaluation. | • The need for evaluation is recognized. | • Different evaluation processes are explored. |</p>
<table>

OBJECTIVE 5
To design and implement a plan to improve the performance of all students
**Objective 5**  
**To design and implement a plan to improve the performance of all students**

<table>
<thead>
<tr>
<th>Alignment</th>
<th>Awareness</th>
<th>Exploring</th>
</tr>
</thead>
</table>
| • The campus plan is not connected to a vision.  
• Isolated, individual faculty efforts occur throughout the campus. | • The need for coordination of efforts in addressing improved student performance is recognized. | • Dialog groups are initiated.  
• Open communication about student performance exists. |
| Needs assessment | Needs are assessed through  
• stakeholders survey  
• disaggregation of data  
• examination of additional sources of information. | Needs are assessed through  
• stakeholders survey  
• disaggregation of data  
• examination of additional sources of information. |
| • There is no needs assessment.  
• Needs are determined in a top-down fashion (sole source). | • The gap that exists between student performance and the desired outcome becomes apparent. | Needs are assessed through  
• stakeholders survey  
• disaggregation of data  
• examination of additional sources of information. |
| Collaboration | • Top-down or limited collaboration determines campus plan content. | • The potential power of collaboration (synergy) is recognized. |
| Writing the plan | • Writing is done by one or a few persons.  
• Responsibility of stakeholders is unclear.  
• Plan is general and vague. | • The need to involve all stakeholders in the planning process is recognized.  
• The need for the campus plan to address the improved performance of all students is acknowledged. |
| Plan in action | • No connection exists between what is going on at the campus and the campus plan.  
• Plan is shelved. | • A campus needs assessment is conducted.  
• Goals and objectives are explored. |
| • Individuals see the plan as a separate part of their job.  
• Staff development is provided to assist in implementation of campus plan. | • Dialog about the linkages between the campus plan and student performance occurs.  
• Various stakeholders experiment with implementation of the plan. |
| Assessment | • The need to evaluate, monitor and adjust the plan as appropriate is recognized. | • Procedures and processes for assessment are examined.  
• Benchmarks with associated time lines are identified.  
• Desired outcome behaviors are identified. |
| • One summative evaluation is only source.  
• No assessment of movement toward increased student achievement is conducted. | | |

---

**BEST COPY AVAILABLE**
### Transitioning
- Short-term annual plan begins to focus on sharing opportunities.
- District support through resources, release time, etc. increases.
- Staff members are coached in presentation skills.
- Teams meet to develop ways to share.
- Action research continues

### Emerging New System
- Process/procedures are in place to promote sharing.
- Stakeholders begin to implement long-range and short-term plans for sharing.
- Stakeholders begin to identify innovative ways to secure additional resources to support sharing.
- Teachers receive training to become trainers/presenters.

### Predominance of the New System
- Commitment to sharing is evidenced by the implementation of a collaborative, long-range communication plan which includes: purpose/outcomes, strategies, time lines, persons responsible, resource allocations, training, and assessment.

<table>
<thead>
<tr>
<th>Types of communication delivered locally and regionally, such as presentations and written communications, expand.</th>
<th>Stakeholders use a broad variety of communication techniques at local, regional, and state levels, such as presentations, written communications, and interactive networking.</th>
<th>Stakeholders actively seek opportunities to exchange information.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Structured sharing/networking activities expand.</td>
<td>Openness to incoming site visits with planned interaction and supplemental materials is publicized.</td>

COMPLIANCE STATEMENT

TITLE VI, CIVIL RIGHTS ACT OF 1964; THE MODIFIED COURT ORDER, CIVIL ACTION 5281, FEDERAL DISTRICT COURT, EASTERN DISTRICT OF TEXAS, TYLER DIVISION

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

1. Acceptance policies on student transfers from other school districts;
2. Operation of school bus routes or runs on a nonsegregated basis;
3. Nondiscrimination in extracurricular activities and the use of school facilities;
4. Nondiscriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;
5. Enrollment and assignment of students without discrimination on the basis of race, color, or national origin;
6. Nondiscriminatory practices relating to the use of a student's first language; and
7. Evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

The Texas Education Agency shall comply fully with the nondiscrimination provisions of all federal and state laws, rules, and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or any other personnel action, or be denied any benefits or participation in any educational programs or activities which it operates on the grounds of race, religion, color, national origin, sex, disability, age, or veteran status (except where age, sex, or disability constitutes a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency is an Equal Employment Opportunity/Affirmative Action employer.
