# Selected Genealogical Reference Sources for Introductory Research

## Introduction

As the field of genealogy continuously grows in popularity, there are hundreds of useful print and electronic sources available for research. This bibliography focuses on reference material that provides an introduction to these tools for the beginning genealogical researcher. With little exception, these publications were produced in the 1990's and are still in print.

Many publications include some discussion of electronic sources since these have begun to play an ever-increasing role in genealogical research. Inclusion of these sources has been noted here in the annotations. This bibliography also includes an Internet section which lists leading websites and listservs in the area of genealogy.

## Bibliographies

Clegg, Michael Barren, ed. *Bibliography of Genealogy and Local History Periodicals with Union List of Major U.S. Collections*. Fort Wayne, Ind.: Allen County Public Library Foundation, 1990.

Arranged alphabetically by title. Contains over 5400 entries providing publication information, frequency of periodical, ISSN number, and holdings information from eleven major institutions. Some of information is dated. Intended to be a companion volume to *PERiodical Source Index*. Subject index. 528p.

*Genealogies Catalogued by the Library of Congress since 1986: With a List of Established Forms of Family Names and a List of Genealogies Converted to Microfiche Since 1983*. Washington, D.C.: Cataloging Distribution Service, Library of Congress, 1992.

Supplements Marion J. Kaminkow's *Genealogies in the Library of Congress: A Bibliography* which is now out-of-print. Section one lists 8997 genealogies received and cataloged by the Library of Congress in 1986 through July 1991. Section two provides a list of surnames and variations to aid in the use of the first section. Older genealogies that have been copied to microfilm format since 1983 are listed in the last section. This is unfortunately arranged by call number. Overall, provides useful material, but can be frustrating to use due to inconsistent treatment of variant surname spellings and lack of a comprehensive surname index. 1349p.
