ABSTRACT

A rubric is a descriptive measurement for defining what a learner should know and can do. This document was created to define the knowledge and ability of every student in how they: construct meaning from information; create a quality product; learn independently; participate as a group member; and use information and information technologies responsibly and ethically. The rubrics are designed in a matrix, or grid, of benchmarks which define the information literate student. The far left column contains the Target Indicators, or the individual components of each of the five information literacy guidelines. Each target indicator is followed by four qualities, or key behavior skills, to be measured. These are written in student language and are labeled "In Progress," "Essential," "Proficient," and "Advanced." The first page provides an overview for all five guidelines; pages 2-8 address specific benchmarks. The final page is a checklist of information literacy guidelines for students and teachers which may be used in the assessment process. These guidelines describe students as: knowledge seekers; quality producers; self-directed learners; group contributors; and responsible information users. The ideal application and use of these assessments is in a collaborative curriculum involving the student, teacher, media specialist, and other stakeholders in the school environment. They are applicable to all grades and content areas. (Author/AEF)

The Information Literacy Rubrics are an extension of the Model Information Guidelines (1994; Colorado Department of Education, State Library and Adult Education Office, Colorado Educational Media Association).

A **rubric** is a descriptive measurement for defining what a learner should know, and can do. This document was created to define the knowledge and ability of every student in how they:

- Construct meaning from information.
- Create a quality product.
- Learn independently.
- Participate as a group member.
- Use information and information technologies responsibly and ethically.

The rubrics are designed in a *matrix*, or grid of benchmarks which define the information literate student. The far left column contains the *Target Indicators*, or the individual components of each of the five information literacy guidelines. Each target indicator is followed by four qualities, or key behavior skills, to be measured. These are written in student language, beginning with a minimal level of understanding, labeled In Progress, followed by Essential, Proficient, and Advanced. Page 1 is an overview for all five guidelines; pages 2 - 8 address specific benchmarks. The final page is a checklist for a student or teacher which may be used in the assessment process.

It should not be a goal to have each student attempt to achieve the Advanced level in each skill area on each project. Rather, the goal should be to assess students on the *key points* important to the specific content area task, and *understand the process* for applying that skill in other curricular work. [Example: In a task involving the knowledge seeking process, the student might first be assessed in determining information needs, and acquiring the information. In a later task, they could be assessed in the organization, processing, and evaluation of the information].

The ideal application and use of these assessments is in a collaborative curriculum involving the student, teacher, media specialist, and other stake holders in the school environment. These rubrics can be used as written to define information goals for the student, or as a framework for student/teacher-written assessments. They are applicable to all grades and content areas, but only through a cooperative effort between the key players will they be truly effective in ensuring student buy-in to understanding the information literacy process.

Knowing how to apply these skills is necessary for successful living in the twenty-first century, and beyond.

Plans the Quality Product	<ul style="list-style-type: none"> I need help to understand the steps needed to plan my work. I like someone to help me with each step in completing the product. 	<ul style="list-style-type: none"> I need to be shown the steps to make my plan, and then can work on my own. 	<ul style="list-style-type: none"> I know the steps necessary for completing my product and make a plan to complete it. 	<ul style="list-style-type: none"> I create a process and a timeline (with a back-up plan) for all the steps needed to complete my product
Creates a Quality Product	<ul style="list-style-type: none"> I need help to find which sources to use. I don't know how to use the facts to solve the problem. Students as Self-Directed Learners: Information Guideline #3

	In Progress	Essential	Proficient	Advanced
<i>Voluntarily Establishes Clear Information Goals and Manages Progress</i>	<ul style="list-style-type: none"> Setting information goals is difficult for me. I need help from someone to choose what I'm supposed to do. I work best with problems that have only one answer. I usually use the easiest source, and only one source. 	<ul style="list-style-type: none"> I can set some information goals by myself. I can sometimes find what I'm supposed to do on my own. I see that sometimes there may be more than one solution for my project or problem. I can do what is asked of me, and usually find answers to questions after consulting a few sources. 	<ul style="list-style-type: none"> I almost always set my own information goals. I can usually find a variety of information resources to achieve those goals. When there is more than one solution, I choose the appropriate one for my project or problem. I understand how different sources are organized, and look for the ones that best meet my needs. 	<ul style="list-style-type: none"> I can set my own information goals, and choose the best way to achieve them. I like to explore and evaluate various resources and solutions. I use them to create a new solution to the problem. I'm comfortable in situations where there are multiple answers, or no "best" answer. I look at many different sources to find those that meet my needs. I consider various point-of-view and the merits of the resources before choosing those that work best for me.
<i>Voluntarily Consults Media Sources</i>	<ul style="list-style-type: none"> I have trouble enjoying my reading, and have a hard time staying with a book -- or other reading material. I tend to over-use certain information resources to the exclusion of others when I do read. I have trouble exploring new topics. Someone needs to help me get started. 	<ul style="list-style-type: none"> I enjoy reading certain types of books and other information resources. I usually read only about one subject, or stay with one author's works. I explore new topics when required. 	<ul style="list-style-type: none"> I like reading several different types of literature. I enjoy reading in a variety of formats (e.g. books, CD-ROM, and other media). I read to explore and learn about a variety of topics. 	<ul style="list-style-type: none"> Reading is very important to me, and I enjoy reading and exploring many different topics. I use information resources for information and personal needs, and actively seek answers to questions. I consider alternative perspectives and evaluate differing points-of-view. I read for pleasure, to learn, and to solve problems
<i>Explores Topics of Interest</i>	<ul style="list-style-type: none"> I just do what I'm told. Someone tells me if it's good or not. 	<ul style="list-style-type: none"> I know when I've done a good job. 	<ul style="list-style-type: none"> I know when I've done a good job, and know why I was successful. I am satisfied with the results. 	<ul style="list-style-type: none"> I know how I learn best, and can choose the method(s) which guarantees my success. I can evaluate what I've done. I'm not always satisfied with my results.

<p><i>Follows Guidelines and Etiquette when Using Electronic Information Resources</i></p>	<ul style="list-style-type: none"> Someone tells me how to use the information resources, and works with me to get the information I need.
