Guides - Classroom Use - Teaching Guides (For Teacher) (052)

Adult Education; *Class Activities; *Classroom Techniques; *Creative Activities; High Schools; Learning Strategies; *Motivation Techniques; Proverbs; Teaching Methods

This booklet consists of approximately 50 motivational instructional strategies identified and used by educators in adult high schools. Strategies include the use of humor by teachers; an emphasis on student autonomy, responsibility, and collaboration; and self-analysis of work. Specific ideas include involving students in activities, making education relevant to students' life experiences, involving students in goal-setting, using group activities and enhancing self-esteem, positive role modeling by teachers, and having a variety of activities such as performing skits, creating in-class businesses, and using art work to inspire classroom discussion. The activities encourage students to bring their own contributions to the classroom. Most exercises are preceded by a proverb. (JLS)

PREFACE

The following booklet was compiled by the Instructional Strategies Group for the research project Michigan Adult Education Practitioner Inquiry Project 1996 (MAEPIP) and it was funded by The Michigan Department of Education Office of Extended Learning.

Included in this booklet are the most effective motivational instructional strategies identified and used by adult educators. As you read the pages of the booklet, we challenge you to implement some of these "tried and true" methods. We also encourage you to vary and adapt them to your classroom needs.
DEDICATION

To Gail Rachor, Educational Director, who through her positive modeling, stimulated our thoughts and challenged our capacities which resulted in the presentation of this book.

ACKNOWLEDGMENTS

The group acknowledges Betty Ryan for the formatting and typing of this book.

Thank you, Betty

Peer Teaching/Cooperative Learning

The food production worker class adult students trained the middle school students in all aspects of running a commercial kitchen. Middle school students worked in different stations of the kitchen each week and were taught by the adult students. Food was prepared and served by students. Field Trip

I plan field trips to places in which most people wouldn't think an Alternative High School teenager would be interested. The destinations usually have historical significance that relate to the course material. All students are required to dress their best for these trips. The key to the motivational value of the trips are as follows:

1. **Students must have the knowledge necessary for the trip.** The students are told that before the date of the trip, they have to have a certain amount of material read. Also every student must receive passing scores on the related assignments, projects, tests, etc... The students accept this explanation without argument. It generally motivates the students to do the work.

2. **Students self-esteem improves and motivation is increased.** When the students dress their best, they are treated accordingly. When adults treat them with respect and dignity, it sparks motivation within them to build upon the experience by trying more often.

History

I try to make subject matter fun and interesting for students so they can see the relevance of learning the material in their lives. For example: I teach history and I try to relate events in history to the students' lives today. Students can transfer the classroom theories to daily living experiences.

I like to get students involved in the learning. Sometimes it may be having them read about a topic (not from the textbook all the time). I encourage them to work together to answer questions. I like to tie-in other subjects to history, especially art & literature. Several times if we are studying a culture, I ask my students to make something pertaining to the culture. Example: a coat of arms for the Middle Ages.

Set Goals

Help students set goals that are achievable, that are believable, that can be seen and measured on a daily basis. The goals should be something that is desired by the students and something to which they are committed. Finally, arrange a schedule whereby the students can review their goals at specific times.

Part of the real life experience is helping the students realize that what is learned in class can be helpful outside of the class.

I try to find a useful purpose for what I am teaching for all levels and abilities. I give examples how my subject matter will help them achieve their goals. I explain how to use math in their lives.

I try to always encourage, accept some setbacks as normal, and let my adult learners know there is no shame in not knowing, but in not trying.

Group Contributions

I suggested to the groups that they would be a part of a study to help make educational situations improve for the future. Self-Esteem

Self esteem building strategies...even a small success creates motivation and a thirst for more "success." Initiate a community service. Example: Become a secret pal to a shut-in or an elderly person in a medical care facility. Some of the patients in the facility have little or no family contact. The students eventually begin to feel that they are important and can make a positive difference in someone else's life.

Promoting teamwork and team pairs with different strengths (or potential strengths), builds confidence and allows them to realize their particular values and abilities. Also, occasionally I will show my personal mistakes in order to let them know that everyone makes mistakes. I emphasize that it is part of the learning process and that it is okay to make a mistake.

Art Motivation

So you want to expose your students to art. Why not do it? Simply hang a painting and have a discussion on color, mood, style, feelings, and media used by the author. Ask students what their feelings are. Display these pieces along with students' remarks and the author's name and history on the picture. Culture just came into your room with no pain and no strain.

A Conversation Starter

A conversation starter is begun by placing two to three words on the board or placards. Ask the students what they can say without giving little thought about these words. As in brainstorming, write down the ideas given by the students so that there is a composite of information about these words from which they can create a sentence. Then have them read and share their creations. The surprise is the amount of information the group can compose.

Example: What could they say about the following words?
1. salt
2. umbrella
3. energy

"Puff ball" can be used to "jog" and "invigorate" the class, especially after a difficult or lengthy concentration task. It can serve as a tension reliever while at the same time become a review of homonyms, antonyms or vocabulary. Gently and carefully pitch a soft Nerf or rag ball to a student while calling out a word from one of the above type lists that students are working on mastering. The object is to have the student catch the ball returning it to you with the accompanying word. More than 10 minutes of this activity could negate its effectiveness. It is adaptable to any list, table, chart, or fact list that has been created in the class.

Example: The teacher might say "civilized." Student's response: "barbaric."
Example: The teacher might say "polite." Student's response: "courteous."

Class Project

As a class project, why not write a class song by taking a well-known tune and rewrite new words to it? Naturally, the words chosen should fit the class and the purpose. This song may be used on special occasions or as a morale booster. Post these words where they are easily accessible to be sung at a moment's notice if necessary. If you prefer not to sing a song, you might use a motto, a poem, or an axiom--something that will build cohesiveness in the group.

WELL DONE IS BETTER THAN WELL SAID.

BENJAMIN FRANKLIN
Controversial Statement

You could pose a controversial statement that is of a current, political, economic, or environmental nature. This could arouse lively conversation. Next, suggest that the students move to the group that best expresses their feelings regarding the issues. The groups might be categorized as agree, disagree, strongly agree, strongly disagree, or no opinion. Once they have joined their groups, they are to write down all opinions and thoughts of the groups; after which, a spokesperson will present the group's ideas to the entire class. How do you know that you have selected an interesting subject? Just observe how many feelings have been aroused. You may want to review a few rules with the class before starting:

a. There are to be no interruptions of the speaker.
b. Set a time limit for the spokesperson.
c. No person is to make negative remarks about another.
d. Each person should show respect for the other's opinions.

Since this is an open-ended discussion, you are not looking for a solution. Instead, you are listening and allowing others to express their views.

Humor

"Laugh and the world laughs with you; cry and you cry alone." Humor makes the job of teaching easier and entices the reluctant learner. Who doesn't like a joke or a funny story?

Humor is a great strategy for motivating students to enjoy learning. So, collect humorous jokes, cartoons, stories, essays and share them with your class each day.

Keep a cardboard hat on display in your classroom. (Make it yourself and be sure to decorate it in some wild and colorful manner.) Keep jokes, riddles, pantomimes, and guessing games in it. Teacher Modeling

Teacher modeling is a way of showing students how to approach a task, such as finding the main idea of a story. **Explicit Modeling:** There are two types of explicit modeling. 1. The "talk-aloud modeling" involves the teacher giving the student a series of steps they must follow to complete a task, and then ask questions to guide students through the task from beginning to end. The emphasis is on the procedural steps used to complete a task, like finding the main idea. 2. The "think-aloud activity" involves the teacher sharing with students the thinking process that one must go through to approach a task and complete it.

The emphasis here is on the actual thinking process that the student goes through in approaching and carrying out a cognitive task, like inferring a main idea.

Prompt Feedback

Provide consistent and prompt feedback to students. Knowledge of results, comments about skill performance, or notes on a written assignment are part of the feedback given to students. Feedback enhances motivation because it allows the students to evaluate their progress, to understand the level of their competence, to maintain their effort toward realistic goals, to correct their errors with little delay, and to receive encouragement from their teachers.

Expectations

In addition to the regular curriculum, have several concurrent and continuing activities in the classroom. Allow time for them periodically and often. Also write a brief outline each day on the board as to what you want to accomplish that day. This will answer many questions ahead of time. In addition, make a brief list on the board as to what the class has accomplished previously in the semester. Note how well the students are doing and ask if there needs to be more review on any of the prior accomplishments.

Try to accomplish the majority of this work earlier in the semester. Students do not like to be rushed at the last minute. Keeping this in mind, you may then use the latter weeks of the semester to reflect the value and application of the course material. Finally, post the students' successes on the bulletin board.

Direct Quotations

At the beginning of a lesson dealing with the concept of DIRECT QUOTATIONS, have a certain group of students give direct quotations by famous people. Seat the students in north, south, east, west and the central areas of the classroom.

At the given signal, these students will stand up and shout their quotation strongly and clearly. Heads will turn in all directions. It will be fun to observe this unruly behavior.

Since the students are speaking individually, thus representing famous people, the class will realize subconsciously what is a DIRECT QUOTATION.

This approach will lead them to an understanding of the lesson, and with further quotes and usage, the class will learn the lesson and the grammatical usage of quotation marks.

Example: sample quotations secretly given to students can be:

"No man is an island, entire of itself." (John Donne) or

"Ask not what your country can do for you, but ask what you can do for your country." (John F. Kennedy)

NATALIE S. GLIME
Substitute the sound of musical instruments in place of punctuation marks. A **PERIOD** is the final end of a sentence. It is best expressed by striking the drum once. A **COMMA** is a brief, delicate break in a sentence. It can be imitated by a triangle. A **QUESTION MARK** is an uncertain, worried, or inquisitive mark that can be expressed by a tambourine. An **EXCLAMATION MARK** is a sharp, unexpected sound that can be signified by the clash of a cymbal. A **QUOTATION MARK** separates the exact words of the speaker from the rest of the sentence. They can be effectively represented by the shaking sounds of the maracas.

As a classroom activity, choose a familiar text, then divide the class into:

1. a group of readers
2. a group of instrumentalists.

Have the **first** group read the story and at the appropriate time the **second** group strikes the various instruments.

Guessing

Prompt the students to make as many intelligent guesses as possible, even though they may not know the answers. Guessing is founded on our knowledge and increases our knowledge when done well.

Write the following message on the board and see how quickly the students guess the words based on the consonant clues:

_f y__ c_n r__d th_s m_ss_g_ g_ g_t _ dr_nk _f w_t_r, th_n c_m_ b_ack _nd w_tch th_ f_n.

Place a small, empty box in front of the students. Then ask them to guess what is in the box. This is a good opportunity to teach the word "empty," discuss synonyms and antonyms, and to use them in sentences.

After a lengthy mind exercise, it does the body good to stand and do some physical exercise. Music supplies the ambiance, so pick a "toe tapping," "down home" tune that suggests fun and relaxation. Have all the students stand—even the shy and retiring ones because eventually they, too, will decide to join. If the educator, as the model, keeps time with the music with a few body shakes, arm and leg movements, then it is a signal that it's okay to relax and let your hair down. Use this antidote sparingly but at strategic times as it will definitely rejuvenate. Now you are ready for a vigorous enthusiastic attack on the next task at hand.

As an approach to a free writing assignment, try the "smellies." Disguise 4 or 5 pungent smelling articles in plastic bags which you pass around to the students. Examples are perfume or alcohol on a cotton pad, crushed cedar fresh from a tree or bush, cinnamon, or garlic. Next, have students write down what this odor brings to their minds. Where were they when they first smelled the scent? Who was associated with it? When did the experience occur? Use your imagination! Since most of our experiences are associated with the five senses, it is doubtful that any student will be at a loss as to what to write. Thus, you have an exciting writing class!

Journal Writing

Journal writing isn't new, but it is a wonderful dimension and experience for your class. Prepare simple journals for your students and keep them in a special box. Make a daily entry part of the routine. Some students may be reluctant at first and may write very little, but eventually when they understand the reason and purpose they will add to their writing.

Journals provide the students with a way in which to ventilate their feelings, thoughts, and moods without fear of criticism or correction. Always ask the students if they feel comfortable sharing their journal with you. If they do, then mark the cover with a symbol, read it, and make positive, appropriate remarks.

CAN A BRUISED EGO BE CONSIDERED A WORK-RELATED INJURY?

ASHLEIGH BRILLIANT
Brainstorming offers a dynamic introduction to writing. Write a word on the board. Start with adjectives, then continue with more difficult words. Students are to say words that they associate with this word. The leader places the words on the board as students give them. There should be no judgmental remarks. The students now have a repertoire of words and ideas from which to begin their writing.

UNKNOWN
Did You Know?

As part of the classroom ambiance, create a "Did you know these facts?" corner. Here you list facts on health, new current events, unusual words, tongue twisters, parenting information, etc. These should be ongoing and informative. Occasionally review or orally quiz the students to provide a way of mastery. Trivial information, such as this, often gives the shy reluctant students a chance to discuss as they are not threatened by academic material.

HETERONYMS

Heteronyms are words that are spelled alike but have a different pronunciation and a different meaning.

Challenge the students to use these words in a sentence or to compose a story with them:

- content
- address
- invalid
- subject
- present
- record
- present
- desert
- produce

Example:

1. Please present John with a present.
2. Are you content with the contents of this box?
3. If you do not desert him in the desert, we'll have a delicious dessert.

Help? What's Wrong?

WORD DEMONS: YOUR, YOU'RE (Help! What's Wrong?)

Ask students to correct the following "word demons" in the riddles given below:

(Your) in a comic strip. (You're) doghouse is used as a place. (Your) enemy is the Red Baron. (You're) friends are Lucy, Charlie Brown, and Linus. (Your) one of the favorite strip dogs. Who are you? (Your) Snoopy.

(You're) the 35th president of the United States of America. (You're) ancestry is Irish. (You're) birthdate is May 26, 1917. (You're) age at death was 46 years. Who are you? (Your John F. Kennedy.)

As a followup, ask students to make their own riddles. Also, students may use other word demons such as: too, to two, and they're, their, there in stories, riddles and poetry.

SEIZE EVERY OPPORTUNITY FOR ADDITIONAL TRAINING ON YOUR JOB.
Sensory Language

Generate from students words that mean different sounds and list them on the board.
Example: moo chirp baa buzz drip
toot ouch jingle screech crack
boom etc.

Once you have completed a long list, group them into categories:
Example: Sounds humans make
Sounds animals make
Water sounds
Metallic sounds, etc.

Have students use these words in writing for sensory imagery.

Adopt a Tree

Pick one tree near the classroom where you teach, then adopt it as your very own. Encourage the students to really get to know it. This activity could turn out to be a year-long project for your class. Students should describe the tree completely by telling what kind it is, describing its foliage, measuring around the trunk, measuring its height and width, describing the changes it goes through each season, and using bark to "fingerprint" the tree.

Ask students to record their findings in a notebook. Revisit the tree as often as possible and write additional notes.

Encourage the students to use the library to gain as much information as they can. They will not only learn a great deal about this gift, (the tree) but they will also learn to appreciate its beauty and purpose.

OLD SPANISH PROVERB
Vocabulary Building

Word of the Month

Select a key word every month: Example: improvisation, n. Define its meaning: something that is made-up without any previous preparation, or done without much thought such as a song, speech or monologue done on the spur of the moment. Study the word:

a. learn its derivation, i.e., drawn from the Latin Improvisus meaning "unforeseen."

b. List related words, their meaning and part of speech.

Example:

improvise, verb—to do
improvising; verb—in continuous action
improvisor; noun—person doing
improvisator; noun—person in charge
improvisational; adjective—a way of doing

c. Use the word in a sentence:
Jean is capable of improvising new scenes for our class play.

(Continued on next page)
Challenge: How many words of five or six letters can you find in the word improvisation?

impart  piston  spoon  strip  import  sport  
tapir  train  vision  visit  visor  strap  
short  smart  mason  ration  maroon  provision

Challenge B: Try improvising by selecting one word from the above list. Talk about it and add all the thoughts that come to you.

MASON: a family name  
a brick layer  
a jack of all trades  
a house builder

Could these motivational strategies improve your teaching techniques? Since many of our students arrive with a poor self-image, self-defeating attitudes, and negative behaviors, the monumental task is how to alter these "negatives" so that the students are free to learn. Such a task is not easy, but with T.L.C. (tender loving care) positive alterations can be accomplished.

"Fear baggage" carried by students is counter productive to the learning process. Some behavior modification is then required. The motivational strategies listed are offered as aids. They emphasize student autonomy, responsibility, collaboration, and self-analysis of work as well as immediate feedback from both educator and colleagues. This, supplemented with an exciting, challenging environment, plus an educator who projects a good sense of humor while maintaining the role of "resource." will define new vistas. Students who perceive the situation as minimal "risk taking" might indulge themselves to participate, realizing that cooperation is always preferable to competition and that learning imparts power for success.

Our attempt was not to reinvent the wheel, but rather to encourage and challenge you on your amazing journey.

II. REPRODUCTION RELEASE

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche and paper copy (or microfiche only) and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce the identified document, please CHECK ONE of the options and sign the release below.

Selection Criteria Employed by ERIC

QUALITY OF CONTENT

Levity and Reproducibility

Validity—Organizations that wish to see their own documents included in ERIC must provide a description of their own, and that description must be in the language of the original document. The description should be in the original language of the document, and it must be written by an expert in the field. The description should be clear and concise, and it should provide enough information to allow a reader to decide whether or not the document is relevant to their needs.

iegel—The bibliographic description developed by ERIC is based on the original document, and it is designed to be as comprehensive as possible. The description includes information about the document's author, title, publication date, and other relevant details. It also includes a concise summary of the document's main points, and it provides a list of keywords that can be used to search for the document in ERIC's online databases.

Documents accepted by ERIC are entered into the ERIC database after the bibliographic description has been reviewed and approved by the appropriate reviewers. The bibliographic description is then entered into the ERIC database, and it is made available to all users who have access to the database.
