Developed in Virginia, this publication contains task analysis guides to support selected tech prep programs that prepare students for careers in the business and marketing cluster. Guides are included for accounting systems, legal systems administration, office systems technology, and retail marketing. Each task analyses guide has the following essential elements: (1) an occupational task list derived from a panel of local workers or employers (occupational analysis) consisting of a duty area, a task or competency, a performance objective, a performance measure, and enabling objectives and activities; (2) a collection of secondary and postsecondary instructional objectives and performance measures that reflect the occupational analysis; (3) a list of courses and programs that make up the tech prep program; and (4) a list of resources that can be used to support instruction. INTRODUCTION

This publication contains task analyses guides to support selected Tech Prep programs that prepare students for careers in the Business and Marketing cluster.

Tech Prep curriculum guides are essentially local products, developed to support programs offered by a community college and the school divisions in its consortium. Each guide is intended to serve as a model for other sites that wish to establish a similar program, and for this reason, all deliverables as they are received are placed in the library of the Virginia Vocational Curriculum and Resource Center (VVCRC), available on loan. A few have been selected for publication and broader distribution by the Virginia Community College System, based on their potential for widespread use.

Each task analyses guide included in this publication has the following essential elements:

- An occupational task list derived from a panel of local workers or employers (occupational analysis)
- A collection of secondary and postsecondary instructional objectives and performance measures that reflect the occupational analysis
- A list of courses and programs that make up the Tech Prep program
- A list of resources that can be used to support instruction.

Certain other elements, such as related academic competencies and career path information, have been included if developed by the local site. Other information, including learning activities, sample student schedules, course descriptions, and other introductory matter, may be obtained from the complete guide in the VVCRC library or from the project director.

Each task analyses guide has been reviewed and approved for statewide use in secondary schools by the appropriate content specialist at the Virginia Department of Education. Due to recent restructuring of many secondary program areas, the content of a Tech Prep guide, based on local employment requirements, may differ from the VDOE-recommended course content. Suggestions by the content specialist to reconcile these differences may be noted in the guide.

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic/optical media, and sold through the ERIC Document Reproduction Service (EDRS) or other ERIC vendors. Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following two options and sign at the bottom of the page.

- **Level 1 Release:** Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media (e.g., electronic or optical) and paper copy.
- **Level 2 Release:** Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media (e.g., electronic or optical), but not in paper copy.

The sample sticker shown below will be affixed to all Level 1 documents.

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but neither box is checked, documents will be processed at Level 1.

*Hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic/optical media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.*
