Editorial Policy

Publications indexed in the *Business Education Index* will be limited to specific business education publications and those related to business education. Priority will be given to journals that are essential to research and teaching in the broad business education spectrum with emphasis on information systems (including business communications), business teacher education, and vocational education (primarily marketing education).

The publications in the *Index* must provide sufficient information to be of significant use to researchers. Also, the ability to locate journals and magazines from library sources is essential to the research process. Therefore, state and regional business education publications will be indexed if they meet the following requirements:

1. Publications that are a minimum of 10 pages in length.
2. Publications containing at least three substantive articles, preferably research-based.
3. Publications that are distributed to NABTE institution libraries or to NABTE institution departments in which business education is located.
4. Publications that are provided without charge to the editor.

Any organization or editor who wishes to have a publication included in the *Index* should contact the 1997 *Index* editor.

Author Entries

An author listing in alphabetical order follows the subject section.

For two author entries, each author is listed first one time. For three or more authors, the term "et al." follows the author name; each author is listed first one time.

Thoughts From the Editors

As you may have noticed, over the last few years the subjects and journals listed in the Business Education Index have changed. Each year, we revise the subject list and review the journal offerings to reflect the current literature and readings in business education. We as business educators embrace the changes in our profession and believe that the Index supports this growth.
