To address the special second language learning needs of deaf college students, a project was undertaken at Gallaudet University (District of Columbia), the world's only four-year liberal arts university for the deaf, to create 36 videotaped lessons in grammar, signed in American Sign Language, for first-year French and Spanish instruction. The tapes are intended for use in either classroom or language laboratory. The tapes are not geared to any specific textbook, and the vocabulary is simple and repetitive. The report describes the unique instructional needs of the students, production of the videos, distribution of the tapes to other schools and programs for the deaf, and feedback received about the materials. Appended materials include forms for both teachers and students to use in implementing/using and evaluating the videotapes, a brochure, and a separately published catalog of the tapes available. Year 2 $ 75,629
Total: $150,878
Gallaudet University, the world’s only four-year liberal arts university for the deaf, requires its students to take a four-semester sequence in a foreign language. Deaf students face many pedagogical problems because of limited English language skills, foremost of which is the lack of appropriate and accessible textbooks and laboratory materials, particularly in the study of a foreign language. This project produced videotaped grammar explanations for French and Spanish classes in ASL, the native language of deaf people. Thirty-five video-classes, each approximately 17 minutes long, cover the grammar fundamentals taught in any first-year college foreign language class.

At Gallaudet University, the world's only liberal arts college for the deaf, students are required to take a two-year four-semester sequence of foreign language study. Textbooks used are the same textbooks used in beginning and intermediate foreign language courses in other colleges. Our project was to make videotapes which explain French and Spanish grammar in ASL, the native language of deaf people. This very seemingly simple project is a response to a very complex situation which involves understanding some of the pedagogical problems in deaf education, including the

- dilution of requirements for deaf students at most high school institutions; (Most deaf students have not had the opportunity to study a foreign language in high school as most foreign language courses are taught orally and the deaf student is often waived from the requirement. 70% of deaf children are enrolled in local schools; 30% attend schools for the deaf.)
- lack of appropriate and accessible materials; (It is obvious that foreign language textbooks are written for hearing students. What this implies is that most of the homework exercises are orally oriented and are inappropriate for deaf students.)
- limited English language comprehension of many students; (Most textbook material is inaccessible to the majority of deaf students as the deaf student is operating in a foreign language already: American Sign Language (ASL) is the most common first language of deaf children in the United States. English is therefore a second language for many deaf students. It is important to note that the average reading level of an entering freshman at Gallaudet is sixth grade.)
- polemic of using ASL in the classroom (Most foreign language teachers are hearing and their use of ASL, which has its own grammar, syntax and idioms and varies considerably from standard American English, is most often imprecise and awkward. (See Appendix.).
- difficulty in student understanding of teacher signing (Many students with poor English skills have difficulty comprehending this inexact English.)
- questioning of why bother teaching foreign languages to the deaf, and
- how do we go about teaching a foreign language to deaf students?

Eighty-five percent of students at Gallaudet study French or Spanish. We therefore proposed to make grammar videotapes, called video-classes, signed in ASL, to explain the grammar taught in most first-year college-level French and Spanish classes. These grammar video-classes can be used in the classroom or in a language lab.
Because the video-classes are not geared to any one particular textbook and the foreign language vocabulary used in the graphics is kept simple and repetitive, the tapes can be used by any teacher or school and will not become outdated. Gallaudet's foreign language students can get additional explanations and help in a language they understand by "borrowing" the videotapes through Gallaudet's video library. The video-classes were made available to all French and Spanish teachers at Gallaudet. Although we proposed making thirty videotapes, we ended up making thirty-six, including an unplanned for introductory videotape called "Why bother and how to teach foreign languages to the Deaf?" Brochures announcing the completion of the videotapes and availability, cost, etc. were sent to the more than 800 schools, programs, centers, colleges and institutions serving deaf students at the high school and college level in the United States and Canada. See Appendix.

Project Activities? We first wrote 4 scripts: 2 for Spanish, 2 for French. The scripts were translated into ASL by two validators, both of whom are at least second-generation deaf. The videotaped scripts were then back-translated into English by a third individual to assure that the ASL was correct and clear. Then four students were selected who had studied the foreign languages, also at least second generation deaf, who practiced signing the tapes and were filming signing the tapes in a very complex system in the television studio: One of the validators signed the script from a TelePrompTer, the student imitated what was being signed. We tried to have the student sign from the TelePrompTer, but the signing was very awkward. The videotapes were then captioned. The evaluation specialist set up an evaluation system that operated in 4 classes: 2 Spanish, 2 French, in which the tapes were pilot-tested. We learned a lot and changed a lot. Although we would have preferred to use student peer signers on the video-classes, we discovered that professionals who have had television experience are called professional for a good reason and we abandoned the students. Although the quality of the tapes was unsatisfactory to us, the students and teachers who watched them gave good feedback and we made changes accordingly. We were able to get additional funding from the Dean so that we could get the writing of the scripts out of the way and use monies instead to pay the ASL validators to translate the scripts into ASL, make practice videotapes, review the tapes with others to make changes and be the actual actors in most of the video-classes. For the last six tapes, we hired a professional deaf actor to perform the video-classes and although this person does not know a foreign language and is not involved in language teaching as did the other two ASL validators, her on-screen performance was superior. We used one of the validators to run the TelePrompTer during videotaping and set up cameras so that all deaf personnel involved were in visual contact with everyone else. We additionally hired sign-language interpreters to sit in the TV studio to double validate the signing to make sure that it was correct, clear and as ASL as possible. Because of multiple equipment problems and TV study scheduling conflicts, the graphics and editing had to be done at a different time and the Project
Director assisted the graphics generator operator in putting the graphics on the computer and in doing the timing of adding the graphics to the completed and edited video. She also had to assist in the editing of the tapes.

We realized that educators of the deaf were sceptical about teaching foreign languages to the deaf so we decided to write an additional 50-minute video that explains why deaf students should study a foreign language and how we go about teaching a foreign language to the deaf. Through a previous grant from the National Endowment for the Humanities, the Project Director had given a series of workshops on how to teach foreign languages to the deaf, so the information simply needed to be rearranged for video format. This videotape will be included in the package of videotapes bought by schools and programs and will also be marketed separately. We decided that the best people to market the tapes were the TV, Film and Photography Department at Gallaudet and we were able to get the tapes advertised in their annual catalog before the tapes were even finished. (See Appendix for copies of the catalog and brochure) They are able to sell them at a very reasonable rate ($165 for a series of 18 tapes or $12 per tape). A second brochure about the videotapes will be sent out in April 1995 to the 800 schools and programs for the deaf. The brochure will additionally be sent to the libraries of those schools and programs. Included with the tapes is a feedback form so that we can continue to learn what works best. Other departments at Gallaudet have expressed an interest in developing video-classes as support materials. Copies of the video-classes are held at the Media Desk of the library for student use and there are copies kept in the Department for faculty use. An e-mail message telling about the availability of the tapes was sent to all students in French and Spanish classes 101, 102 and 201 as not all teachers use the tapes.

Feedback on the tapes has been excellent, particularly from students. Unfortunately, several foreign language teachers at Gallaudet do not use or recommend the video-classes to their students. It seems that the worse a teacher signs (and the worse the teacher teaches), the less often the video-classes are used. Teachers whose sign ability is good and who do not feel threatened by ASL have made good use of the videotapes. The Project Director and the Department of TV, Film and Photography will continue to aggressively market the tapes outside of the campus and are willing to work with other departments on campus to promote the producing of a variety of video-classes in ASL. Project staff is certain that we have put together a very innovative and comprehensive educational tool. Now that the project is completed, we will write articles and announcements for various publications, both on campus and off, explaining the project and its import. In addition, an announcement will be made through DeafNet, the electronic mail bulletin board subscribed to by most deaf institutions and educational programs.
Signed Video-Classes for Foreign Language Study

PROJECT OVERVIEW: At Gallaudet University, the world's only liberal arts college for the deaf, students are required to take a two-year four-semester sequence of foreign language study. Textbooks used are the same textbooks used in beginning and intermediate foreign language courses in other colleges. Our project was to make videotapes which explain French and Spanish grammar in ASL, the native language of deaf people. This very seemingly simple project is a response to a very complex situation which involves understanding some of the pedagogical problems in deaf education, including the

- dilution of requirements for deaf students at most high school institutions;
- lack of appropriate and accessible materials;
- limited English language comprehension of many students;
- polemic of using ASL in the classroom;
- difficulty in student understanding of teacher signing;
- questioning of why bother teaching foreign languages to the deaf; and
- how do we go about teaching a foreign language to deaf students?

Eighty-five percent of students at Gallaudet study French or Spanish. We therefore proposed to make grammar videotapes, called video-classes, signed in ASL, to explain the grammar taught in most first-year college-level French and Spanish classes. Because the video-classes are not geared to any one textbook and because the
foreign language vocabulary used in the captions/graphics are kept simple and repetitive, the tapes can be used by any teacher or school and will not become outdated. These grammar video-classes can be used in the classroom or in a language lab. Foreign language students can get additional explanations and help in a language they understand by "borrowing" the videotapes through Gallaudet's video library. The video-classes were made available to all French and Spanish teachers at Gallaudet. Although we proposed making thirty videotapes, we ended up making thirty-six, including an unplanned for introductory videotape called "Why bother and how to teach foreign languages to the Deaf?" Brochures announcing the completion of the videotapes and availability, cost, etc. were sent to the more than 800 schools, programs, centers, colleges and institutions serving deaf students at the high school and college level in the United States and Canada.

PURPOSE: It is necessary to give a description of the problems listed above so that the significance of the project is better understood. Most hearing-impaired students have not had the opportunity to study a foreign language in high school as most foreign language courses are taught orally and the deaf student is often waived from the requirement. Seventy percent of hearing-impaired children are enrolled in public schools; thirty percent attend schools for the deaf. It is obvious that foreign language textbooks are written for hearing students. What this implies is that most of the homework exercises are orally oriented (repeated speaking/pronunciation) and are inappropriate for deaf students.
In addition, most textbook material is inaccessible to the majority of deaf students as they are operating in a foreign language already: American Sign Language (ASL) is the most common first language of deaf children in the United States. English is therefore a second language for many deaf students. Although it is expected that they know English well, the average reading level of an entering freshman at Gallaudet is sixth grade! Most foreign language teachers at Gallaudet are hearing. They usually do not use ASL; rather they use what is commonly called Pidgen Signed English, which is the signing of English words in English word order, but omitting connecting words, helping verbs, classifiers and endings. Students with poor English skills have difficulty comprehending this inexact English. (See Appendix to see the differences between Pidgin Signed English, what the deaf student sees and ASL.) Because approximately seventy percent of Gallaudet's students are prelingually deaf, this problem is enormous. ASL, in addition to having its own structure, syntax and idiomatic use, is a visual-gestural language. While spoken language is linear (one word at a time), ASL is three dimensional and a seemingly more natural way of organizing information visually. It is almost impossible for a hearing person to become fluent in ASL. The conflict is often between teachers who don't know ASL and students who want instruction in ASL only. The purpose of this project was to address the problems described herein so as to eliminate some of the barriers to learning a foreign language.

BACKGROUND AND ORIGINS: In addition to the problems described
above, the attitude of deaf students towards hearing teachers has become more and more negative since the Deaf President Now campaign at Gallaudet when an elected hearing president was forced to resign and a deaf president was elected in her place. Since that time eight years ago, students have argued for instruction to be in ASL and not in Pidgin Signed English. Arguments used include the inexactitude of signed English, the difficulty in understanding this inexact language and the idea that subject matter is what needs to be clear. Students with poor English skills believe that English should be left to the English Department. The underlying argument is not really a linguistics one. As stated above, the conflict is between hearing teachers whose use of ASL is limited and prelingually deaf students whose English language skills are poor and who cannot understand the pidgen English used by their teachers. The production of video-classes in ASL was certainly a response to that demand. The University was fully supportive of this project as eighty percent of the 2,000 undergraduates take French or Spanish to fulfill the foreign language requirement. The Dean of the College of Arts and Sciences financially supported what he could to indicate his support and even added summer support so as to free up money for additional ASL-interpreter personnel in the actual filming. The Department of TV, Film and Photography gave many more hours to the project than were planned for because there were several technical breakdowns and "glitches." We probably got the least amount of support from colleagues in the Department of Foreign Languages and Literatures who felt threatened by the need
for and the eventual existence of these video-classes.

PROJECT DESCRIPTION: Summarized briefly are the activities of the first year of funding, already reported on in the first-year report. We first wrote 4 scripts: 2 for Spanish, 2 for French. The scripts were translated into ASL by two validators, both of whom are at least second-generation deaf. The videotaped scripts were then back-translated into English by a third individual to assure that the ASL was correct and clear. Then four students were selected who had studied the foreign languages, also at least second generation deaf, who practiced signing the tapes and were filmed signing the tapes in a very complex system in the television studio: One of the validators signed the script from a TelePrompTer, the student imitated what was being signed. We tried to have the student sign from the TelePrompTer, but the signing was very awkward. The videotapes were then captioned and edited. The evaluation specialist set up an evaluation system that operated in 4 classes: 2 Spanish, 2 French, in which the tapes were pilot-tested. We learned a lot and changed a lot. Although we would have preferred to use student peer signers on the video-classes, we discovered that professionals who have had television experience are called professional for a good reason and we abandoned the students. Although the quality of the tapes was unsatisfactory to us, the students who watched them gave good feedback and we made changes accordingly. We were able to get additional funding from the Dean so that we could get most of the writing of the scripts out of the way during the summers and use monies to pay the ASL
validators to translate the scripts into ASL, make practice videotapes, review the tapes with others to make changes and be the actual actors in most of the video-classes. Each script was rewritten at least ten times. Both the Project Director and the Assistant Project Director would write a script, give it to the other for feedback, rewrite it, give it to the other again with changes made, rewrite it, etc. Each time a script was edited, three scripts had to be rewritten: the regular script, the TelePrompTer script and the graphics and captioning script. (Because a TelePrompTer has a limit of 20 characters per line and scrolling must be controlled so that it advances at a normal speaking speed; the TelePrompTer script often looks very different from a normal script. For example, there are no graphics examples on the TelePrompTer scripts. There must be some kind of code however to indicate to the person signing that what they are talking about is in a graphic either at the bottom of the screen (G1,2 or 3: 1, 2 or 3 lines of examples), to the left of the signer (R), to the right of the signer (L) or on both sides of the signer (R and L). The cameraman also needs directing during filming so as to zoom out or to pan right or left so as to leave space for the graphics.) The regular script was then given to the two ASL validators who translated it into ASL and videotaped it in a practice mode. The Project Director then reviewed the videotaped script and edited the script based on what worked, what didn’t work and ASL problems. The three principals then got together to discuss the ASL problems. What appears fine in normal ASL discourse does
not always work on the flat screen. There were some very unpleasant discussions between the hearing Project Director and the deaf signer and many compromises had to be made which did not always please those involved. For the last six tapes, we hired a professional deaf actor to perform the video-classes and although this person does not know a foreign language and is not involved in language teaching as did the other two ASL validators, her on-screen performance was superior. We used one of the validators to run the TelePrompTer during videotaping and set up cameras so that all deaf personnel involved were in visual contact with everyone else. We additionally hired sign-language interpreters to sit in the TV studio to double validate the signing to make sure that it was correct, clear and as ASL as possible. Because of multiple equipment problems and TV studio scheduling conflicts, the graphics and editing had to be done at a different time and the Project Director assisted the graphics generator operator in putting the graphics on the computer and in doing the timing of adding the graphics to the completed and edited video. She also assisted in the editing of the tapes. The amount of time the completed project required was probably double the estimated time.

The length of each videotape varies from 17 to 28 minutes. Comparisons between English grammar and the foreign language grammar are often made so as to reinforce the understanding of both languages. We tried for an even balance between repetition and boredom, sometimes difficult to assess. There are frequent "fade to black" pauses before which the signer asks if the viewer
understands or is still not sure in order to give him or her the opportunity to rewind the tape and watch that section again before continuing. When appropriate, mini-quizzes are built in to the video lessons at various points so that the viewer can see if he or she understands. Students, and deaf students in particular, tend to think they understand when they really don’t, so it is a good idea pedagogically to explain, give examples, re-explain, give more examples, then quiz the students on that one particular grammar point before continuing. The following are the topics of the video-classes produced:

SPANISH:  
Subject Pronouns and Verbs  
Nouns  
Telling Time  
Adjectives  
Possessive Adjectives  
Comparison/Superlative  
Direct Object Pronouns  
Indirect Object Pronouns  
Ser vs Estar  
Por vs Para  
Gustar  
Reflexive Verbs  
Imperfect vs Preterite  
Relative Pronouns  
Possessive Pronouns  
Demonstrative Pronouns  
Affirmative/Negative Idioms  
Subjunctive  

FRENCH:  
Subject Pronouns and Verbs  
Nouns  
Telling Time  
Writing Questions  
Adjectives  
Possessive Adjectives  
Comparison/Superlative  
Passé Composé  
Articles: Def/Indef/Partitive  
Direct Object Pronouns  
Indirect Object Pronouns  
Reflexive Verbs  
Imperfect vs Passé Composé  
Future/Conditional Verbs  
Relative Pronouns  
Possessive Pronouns  
Subjunctive  

We realized that educators of the deaf were sceptical about teaching foreign languages to the deaf so we decided to write an additional 50-minute video that explains why deaf students should study a foreign language and how we go about teaching a foreign language to the deaf. Through a grant from the National Endowment for the Humanities in 1983, the Project Director gave sixteen one-
day workshops throughout the United States and Canada on these two topics. The information was therefore already available and simply had to be reformatted for a fifty-minute videotape. This videotape, which will be fully captioned, will be included in the package of videotapes bought by schools and programs and will also be marketed separately. The script for this tape has been written but it has not yet been produced. The Department of TV, Film and Photography will cover production and reproduction expenses and the Dean of the College of Liberal Arts will cover people time on the project. A copy of this tape "Why bother and how to teach foreign languages to the Deaf" will be submitted to you upon completion. (April 29th has been reserved as the taping day. It will then be edited, captioned and reproduced for distribution by the end of May 1995.)

PROJECT RESULTS: We decided that the best people to market the 36 tapes were the TV, Film and Photography Department at Gallaudet and we were able to get the tapes advertized in their annual catalog before the tapes were even finished. (See Appendix for copies of the catalog and brochure) They are able to sell them at a very reasonable rate ($165 for a series of 18/17 tapes or $12 per tape). A second brochure about the videotapes will be sent in April 1995 to the 800 schools and programs for the deaf. The brochure will additionally be sent to the libraries of those schools and programs. Costs will be covered by the office of the Dean of the College of Arts and Sciences. Included with the tapes is a feedback form so that we can continue to learn what works best. (See Appendix) Other departments at Gallaudet have
expressed an interest in developing video-classes as support materials. Copies of the video-classes are held at the Media Desk of the library for student use and there are copies kept in the Department for faculty use. An e-mail message telling about the availability of the tapes was sent to all students in French and Spanish classes 101, 102 and 201 as not all teachers use the tapes.

Feedback on the tapes has been excellent, particularly from students. Unfortunately, several foreign language teachers at Gallaudet do not use or recommend the video-classes to their students. It seems that the worse a teacher signs (and the worse the teacher teaches), the less often the video-classes are used. Teachers whose sign ability is good and who do not feel threatened by ASL have made good use of the videotapes. The evaluation of the pilot-tested materials proved what we expected: The video-classes are clear explanations of the grammar and give the student the certainty that he or she does understand the material explained. The evaluation results showed that student preference is for an explanation in ASL rather than in signed English (Table 3 of the Evaluation Report). In addition, the participating teachers in the pilot-testing were not always cooperative: one’s contract was not renewed, one is deaf and did not encourage his students to use the tapes, another lives in his own world, has little knowledge of ASL and has shown no interest in using the tapes. There was little encouragement by the teachers that their students participate in the pilot study. As happens often, the response of teachers and educators outside the university has been more responsive and
enthusiastic.

CONCLUSIONS: The Project Director and the Department of TV, Film and Photography will continue to aggressively market the tapes outside of the campus and are willing to work with other departments on campus to promote the producing of a variety of video-classes in ASL. The English Department, and in particular, a special recently-created program to address literacy problems, has expressed interest and is seriously considering applying for a grant to do English grammar video-classes. When a member of the Physics Department learned what would be involved in making ASL video-classes, his enthusiasm waned. The project staff know that we have put together a very innovative and comprehensive educational tool. It is hard to believe that with all the emphasis on the need for ASL expertise by educators of the deaf, that no one has thought of establishing a library of teaching tapes on any and all subject matter signed in ASL. We will write an article this semester for Gallaudet’s weekly faculty and staff newsletter and quarterly alumni magazine so that others will be more aware of our project. We will continue to try to encourage other departments to think about ASL video-class applications to their own field. In addition, announcements for deaf publications and journals as well as on the DeafNet electronic mail bulletin are in the works.
APPENDICES:

- Differences between English, Pidgin Signed English and ASL
- Evaluation Report
- Feedback Questionnaire
- Brochure Announcing the Video-Classes
- The Video Catalog, Department of Television, Film and Photography, Gallaudet University
The following is a series of three paragraphs to try to show the differences between English, Pidgin Signed English and ASL. Although neither Pidgin Signed English nor ASL is a written language, we have "written" the word order of both. Underlining indicates words which are fingerspelled.

POSSESSIVE ADJECTIVES

ENGLISH:

You already know that adjectives describe nouns. You have already learned that an adjective must agree with the noun it is talking about in both gender and number. Gender means either masculine or feminine. Number means either singular or plural. The word "possessive" means to own. Therefore a possessive adjective shows you to whom something belongs, for example, her brother, my parents, our house, their books, your friend. Like all other adjectives in Spanish/French, the possessive adjective must agree with the noun it describes in gender and number. The possessive adjective agrees with the noun and NOT with the person that the noun belongs to! In the example of "her brother", the possessive adjective "her" must be masculine singular because the noun "brother" is masculine singular.

PIDGIN SIGNED ENGLISH: (as signed by a hearing person and seen by a deaf person)

You finish know that adjective describe noun. You finish learn that adj necessary agree with noun relate also-also gender and number. Gender mean male female. Number mean one or many. Word "possessive" mean own. Therefore own adj show you who thing belong, for example, her brother, my parents, our house, their books, your friend. Also also all other adj Spanish or French, own adj necessary agree with noun describe gender number. Own adj agree with noun NOT with person that noun belong! Example her brother, own adj her necessary male alone because noun brother male alone.

ASL: (as signed by a native user of ASL)

You know (nodding head with a confirming facial expression) adjective (pointing with the left index finger to the right hand which is fingerspelling the word "adjective") explain (pointing with the right index finger to the left hand which is fingerspelling the word "noun") noun. Finish you (nodding head affirmatively) learn learn learn (pointing first with the left index and then with the right index finger to represent adjective/noun) adj and noun must connect same gender and number. Gender what mean? mean male female. Number what mean? one or many-many. Word possessive mean what? mine or have mine. So (with two open hands in a shrug) mine adj show who thing belong, like-like, her brother, my parents, our house, their books, your friend. Same same all other adj Spanish or French, mine adj must agree same-same with noun (pointing with the right index finger) same same agree with noun belong! like like her brother, mine adj word her must male one. why? follow noun brother self male one.
This evaluation report on Sign Language Video-Classes for Foreign Language Study (FIPSE Grant Number P116B20370, Carole N Frankel, Principal Investigator) includes both a report on the implementation of the pilot study and an evaluation plan for the national dissemination of the video-classes.

Sign Language Video-Classes for Foreign Language Study refers to lessons on videotape which focus on grammatical points that have traditionally been especially troublesome for deaf foreign language learners. In these video-classes, a lesson on the topic is presented in American Sign Language (ASL). This project has resulted in the creation of video-lessons in French and Spanish, both of which were evaluated in the pilot project.

By the end of the project, seventeen French and eighteen Spanish video-classes were produced. For the pilot project, four lessons -- two lessons in each language -- were the focus of the evaluation.

Table 1 lists the video-classes in French and Spanish. The topics of the four lessons in the pilot study are indicated in the table.

PILOT STUDY

Sample

Five classes taught by two French teachers and two Spanish teachers in Fall Semester 1993 comprised the sample of 65 students for the pilot study. Students were in the second semester of the foreign language study, in a beginning course identified as French 102 or Spanish 102. Table 2 shows the breakdown of the sample.

Instrumentation

Teachers

Evaluation instruments developed to collect information from the teachers during the semester regarding the foreign language classes are included in Appendix 1. This aspect of data collection was intended to document the instructional features that might influence student achievement in the foreign language. The instruments collected information on general course background and logistics, student attendance, student grades, and class instructional activities.

Students

Evaluation instruments developed to collect information from the students at the beginning and the end of the semester are included in Appendix 2. Besides a permission form, students received a questionnaire soliciting information regarding their previous exposure to the foreign language at the beginning of the semester. At the end of the semester other instruments asked students to answer questions regarding their lessons in class and regarding each video lesson viewed. Also included is an interview protocol that was used in each class to collect anecdotal information and student recommendations.
Implementation and Results

Student Participation

Three of the 24 students in the French classes did not agree to participate, resulting in 21 French students (88%) participating in the study. Six of the 41 students in the Spanish classes did not agree to participate, so that 35 Spanish students (85%) were in the study. The results of this study are based on the 21 French and 35 Spanish students who agreed to participate.

Language Background

In the first two weeks of the semester the students were asked about their language background in French or Spanish and in other foreign languages. The questions were asked during class using a printed form (Student Form 1) distributed and collected by their classroom teachers. The student characteristics and opinions described below are based on 18 French students and 32 Spanish students who provided information.

French students' language background. Seven of the 18 French students mentioned having taken a previous high school or college course in French. Two Canadian students had been exposed to French in Canada. Three students had spent time in Quebec or with French-speaking people, and one had been to France. Three mentioned a friend or acquaintance who spoke French, and one uses a computer program in French.

Six French students mentioned exposure to another foreign language through their families. One student mentioned another spoken language as his native language, and another sign language as an additional language. Four students mentioned ASL among the foreign languages.

Spanish students' language background. Most of the 32 students in the Spanish classes mentioned their previous college course in Spanish. Six had also taken Spanish in high school. The families of three students speak Spanish at home, and the family of another student was studying Spanish. Four lived in Spanish-speaking neighborhoods, and five had a friend or relative who uses Spanish. The family of one student had a foreign exchange student who awakened interest in the language and in travel to Spain. Eight students mentioned having traveled to a Spanish-speaking country, most to Mexico.

Few of the Spanish students had had exposure to other foreign languages. Only five students mentioned taking a course in another foreign language, and two listed ASL or sign language in describing their experience with another foreign language.

Anticipated Enjoyment

In response to a question (in Student Form 1) asking for some of the things they think they will like about their current French course, the French students listed learning and reading about French culture and France, communicating in French, and passing a graduation requirement. Some mentioned class-specific factors such as having a teacher who is motivating him to learn about French, the use of videotapes and slides, computer use, finding it fun to learn French. Two mentioned dissatisfaction with their teacher's signing or teaching.
In response to the question asking for some of the things they think they will like about their current Spanish course, the Spanish students listed history, fingerspelling in Spanish, learning how to use the Spanish language, being able to understand another language, reading Spanish books, Spanish vocabulary, Spanish literature and culture, and learning about places to travel some day. Some mentioned class-specific factors like rapport with the teacher, activities and work together in groups, using more time explaining in class than in discussion, preference for lecture, playing games, and the way the teacher teaches the course.

Student Preferences for Teaching Methods

Students were asked about their preferences for teaching methods for learning something new and for learning something new about a foreign language (Student Form 1). Their responses regarding their preference for each of five methods and "other" were indicated on a Likert-type scale ranging from 1 (never) to 5 (always). In four of the five language classes, having someone explain in ASL received the highest preference rating. In one Spanish class, reading by oneself received the highest rating. The widest difference of opinion was related to the method of working together with other students to help each other.

The responses indicating student preferences for teaching methods are summarized in Table 3. Salient preferences (3.7 and higher) are shown in boldface to facilitate their recognition.

French students indicating a preference for "other" teaching methods included three who mentioned using a computer, one each who mentioned using a dictionary, liking to read the book, homework, and the teacher writing on the board. Spanish students indicating a preference for "other" teaching methods included two students who liked having a tutor, one who liked learning via computer, and one who found success studying just before a test.

Class Descriptions and Student Performance

Teachers provided information on their classes (Teacher Form 1), information on student attendance (Teacher Form 2), student grade information (Teacher Form 3), and descriptions of class activities (Teacher Form 4). The amount of time devoted to the lessons of the video-classes was consistent with that devoted to other topics or chapters in the courses, and the activities described did not appear to differ from the remainder of the course. All of the teachers gave homework assignments that were reviewed in class and regular lesson tests and unit tests. The teachers also gave quizzes that were announced in advance. One French teacher and both Spanish teachers had a "syllabus", a set of written "groundrules" or "policies" to give students studying tips and other advice. Most teachers had a written absence policy and recorded student attendance as well as grades.
Teachers and students reported that class activities included using a board for reviewing and correcting student homework. One French teacher used an overhead projector. The use of class time for reviewing homework and accompanying explanations appeared to be a major feature of the classes. Individual and collective exercises were used, and lecture was used as well. Unusual occurrences that interrupted the conduct of classes included several fire alarms.

**Student Feedback on Lessons in Class**

Near the end of the semester the evaluator visited each class to collect confidential student opinion regarding the lessons on the two topics as they were covered in class and in the videotapes. The feedback was given on questionnaires (Student Feedback on French Lessons and Student Feedback on Spanish Lessons) distributed and collected during class in the absence of the teacher. Student opinions regarding various teaching tools and activities related to the lessons on the pilot video-classes are summarized in Table 4. The related information on the videotapes is included in the table although the number of students responding to that item was much smaller than those responding to the other items. None of the 19 French students in class on the days of data collection had viewed the videotapes, and only 11 of the 25 Spanish students who were in class during the data collection had viewed the videotapes. On average, the 11 Spanish students who viewed the videotapes regarded them less helpful than the other class activities for learning the preterite and reflexive verbs. For ease of interpretation of the information in the table, the highest rating in each class or composite group is shown in boldface type.

**Student Feedback on In-Class and Out-of-Class Activities**

Students provided written confidential feedback regarding most helpful and least helpful activities both in and outside of class using the Student Feedback on French Lessons and Student Feedback on Spanish Lessons forms.

**French students' feedback on activities.** French students listed several activities in class as being most helpful for learning *passé composé* and *partitive articles*. The most popular activity involved writing on the board. Others that received mention were feedback on homework during class, using the overhead projector, clear explanations, in-class conjugation exercises with teacher correction, and teacher lectures. The most frequently cited activity outside of class as most helpful was homework exercises. Several students also
mentioned classmates' explanations and classmates helping each other. Other out-of-class activities mentioned were the workbook, reading the book chapter, a tutor, and a French computer program. One student mentioned difficulty in finding an interested study partner.

French students listed several activities in class as being least helpful for learning passé composé and partitive articles. The most cited activity was extensive teacher lecture or teacher explanation, specifying lecture that is unbroken by other activities. Also mentioned were using the book by oneself and quizzes. Cited as least helpful situation outside class was when there is no homework assigned. Group work outside of class was also mentioned by several students. Others mentioned going to the teacher's office and the lack of feedback outside of class.

Recommendations for improving the lessons on passé composé and partitive articles included group discussions by students for giving and getting feedback outside of class, more practice and more assignments, more writing on board with teacher corrections or explanations, more time focused on topic, more quizzes, individual contact with teacher, focus on verb spellings, improvement of teacher signing, and using questions and games.

Spanish students' feedback on activities. Spanish students listed several activities in class as being most helpful for learning preterite and reflexive verbs. As with the French students, the Spanish students' most popular activity involved writing on the board. Other activities that received mention were fill-in-the-blank activities, examples, matching cards, overhead projector use, teacher lecture, repetitive practices and exercises, and groups working together. The most helpful activity outside class was homework. Several students also mentioned reading the text and using the videotapes. Other activities mentioned as helpful outside class were studying in groups, dictionary, Spanish on computer, tutor, reviewing homework assignments.

Spanish students listed several activities in class as being least helpful for learning preterite and reflexive verbs. There was little consensus, with each student listing different activities as least helpful. Those listed were doing classwork, watching video, long complicated explanations, split in groups to work together, lectures, not doing all the homework from the book, lack of variation in activities (always overhead with responses from homework), and class participation with students not offering clear explanations. Considered least helpful activities outside class were doing homework individually, skimming or staring at the book, homework without explanation or directions, and videotape.

Recommendations for improving the lessons on preterite and reflexive verbs included using a variety of fun activities and games in class to help student remember information better and keep interest, continue use of videotape, use board and overheads, continue to give out handouts and practice papers, vocabulary practice before a lesson or video, pass out answer sheets for the homework to study, get better book, teacher learn more sign language to communicate clearly with students, more examples and comparisons to English, more in-depth explanations, mindless repetition.

Student Viewing of the Video-Courses

At the point in the semester when the classes were focusing on the lessons covered by the four pilot video-classes, approximately half of the students in each class were invited to view the videotapes by checking them out in the library. The library has ample appropriate
Equipment and liberal open hours that facilitate assignments such as this. The assignment came in the form of an electronic mail message sent directly to the 31 selected students as well as in direct communication by the teacher in class. Of the 21 French students in the study, 11 were assigned to view the tapes, but only one of the students viewed the two French video lessons. Of the 35 Spanish students in the study, 20 were assigned to view the tapes. Of these students, 8 checked out one tape (4 students) or both tapes (4 students). Three additional students provided feedback on the tapes, although they had not checked out the tapes. Because of the confidential nature of the students' identities, it is not known whether these students did indeed view the videotapes.

Eleven Spanish students responded to items 5 and 15 (How helpful was the ASL videotape?) on Student Feedback on Spanish Lessons. These 11 students rated the helpfulness of the two Spanish videotapes 2.9 (Preterite) and 2.8 (Reflexive Verbs), which is lower than the ratings given by the 25 students for the other items in Table 4 collected in the same way, using the same scale. Because 3 of the 11 students rating the videotapes had not signed them out from the library, the reader is warned that the accuracy of the videotape reaction data is suspect.

Student Reaction to the Video-Classes

The students who viewed the video-classes were asked to complete a two-page questionnaire. They were told their responses would remain confidential and summarized in this report. They were asked to return the questionnaires to the evaluator via campus mail.

French student reaction. The student who viewed the French videotapes had all positive and no negative comments about them. He said he would recommend them to next semester's students. He recommended that the tapes be watched more than once, specifying watching before the first class on each lesson and before the test on each lesson.

His strategy while viewing the video-classes was to use the rewind and pause functions of the video player in reading text on the screen, reading captions, and filling in answers. He found the quizzes helpful and felt the examples were sufficient and understandable.

Spanish student reaction. Four of the students who viewed the Spanish videotapes provided written feedback. Most of the feedback was positive. They generally felt the signing was clear, not (or somewhat) too slow, not difficult to understand. One student felt the signing on the videotapes was too fast, but the other two disagreed. The tapes were considered neither too long nor too short by most, but one considered the tapes too long. All respondents said the videotape helped them learn about the topic. All but one recommended the videotapes to next semester's students, specifying watching them before the first class on each lesson or after the first class on each lesson. Two students recommended watching the videotapes one time all the way through, and two recommended watching more than once. Recommendations for improvement included that the signer should use more expression and that English signing should also be included.

The students had sufficient time to read the text on the screen, read the captions, and answer the questions. The quizzes helped them understand the lessons. The students mentioned that the signed explanations on the videotape were clearer to them than
explanations in the book or in class. They felt the examples were sufficient and understandable.

Limitations

The results of the study are severely limited by the lack of student compliance in viewing the videotapes. Most of the feedback on the video-classes came from only five students. Because of the low student compliance, it was not possible to examine statistical relationships among the instructional and student achievement variables and use of the video-classes.

Summary of Pilot Results

Most of the 21 French and 35 Spanish students were in their first year of study of the foreign language and had had little exposure to the language outside of school. Only a few students had experience in using the language in travel or with family members who use the foreign language at home. The students said they were motivated to learn about culture as well as communication in the language.

At the beginning of the semester, students were asked about their preferences in foreign language teaching methods. In describing their preferences, students overwhelmingly emphasized the importance of having someone explain in ASL. Working together with other students was most controversial, with many strong proponents and many strong opponents.

At the end of the semester, students were asked about their in-class and out-of-class activities. Writing homework and other exercises on the board was perceived as the most helpful activity in class. As helpful activities outside of class some students included homework exercises, group study, and viewing the videotapes. Others mentioned the textbook, the workbook, and a computer program.

Students did not find it helpful when class consisted of extensive lectures, and suggested more board work and using questions and games as alternatives. Students also found it not helpful when the teacher neglected to assign homework. Some students recommended more board work and improved teacher signing. For outside class, some students recommended studying in groups and viewing the videotapes.

Specific recommendations regarding the videotapes were made by the five students who viewed them. Although tape length, signing speed, examples, and clarity of signing were met with general approval, some students suggested that the signer use more facial expression. Those who viewed the videotapes were nearly unanimous in their approval of the video-classes. They recommended that the videotapes be used with future students. Some viewers recommended viewing the tapes straight through, while others preferred to use the rewind and pause features of the video player.
NATIONAL DISSEMINATION

Evaluation Plan

In order to facilitate the convenient collection of information that can guide dissemination efforts and ongoing development activities, the forms shown in Appendix 3 were developed. These forms may be included with all video-classes distributed, with a request to return the completed forms by mail.

Information regarding the user satisfaction and recommendations may then be reviewed periodically. The focus of these periodic evaluation reviews may include the following three areas: 1) development of additional videotapes, 2) development of viewing guidelines based on user preferences, and 3) refinement of promotion and dissemination activities.

Student Feedback on French Lessons

This questionnaire is intended to gather the opinions of Gallaudet students about French lessons during Fall Semester 1993. Please answer this questionnaire. Your answers will be kept confidential. A summary of information from all the students together, without names, will be shared with French teachers at Gallaudet and others interested in improving foreign language teaching. Thank you for your help.

Name (please print clearly): 

Date:

Please answer these questions about learning passé composé.

1. How helpful was the book chapter? [ ] not helpful [ ] very helpful

2. How helpful were the teacher's explanations in class? [ ] not helpful [ ] very helpful

3. How helpful were the activities in class? [ ] not helpful [ ] very helpful

4. How helpful were the homework assignments? [ ] not helpful [ ] very helpful

5. How helpful was the ASL videotape? [ ] not helpful [ ] very helpful
   [ ] I did not see the videotape.

6. What activities in class were most helpful for learning passé composé?

7. What activities outside of class were most helpful for learning passé composé?

8. What activities in class were least helpful for learning passé composé?

9. What activities outside of class were least helpful for learning passé composé?

10. What recommendations do you have for improving the lesson on passé composé?
Please answer these questions about learning partitive articles.

11. How helpful was the book chapter? not helpful □ □ □ □ very helpful □ □ □ □
12. How helpful were the teacher's explanations in class? not helpful □ □ □ □ very helpful □ □ □ □
13. How helpful were the activities in class? not helpful □ □ □ □ very helpful □ □ □ □

### Passe Composé

1. Did you watch the videotape on passé composé?
   - [ ] Yes  
   - [ ] No (If no, go to question 14)

2. Was the ASL signing in the videotape clear?
   - [ ] Yes  
   - [ ] Somewhat  
   - [ ] No

3. Was the ASL signing in the videotape too fast?
   - [ ] Yes  
   - [ ] Somewhat  
   - [ ] No

4. Was the ASL signing in the videotape too slow?
   - [ ] Yes  
   - [ ] Somewhat  
   - [ ] No

5. Was the information in the videotape difficult to understand?
   - [ ] Yes  
   - [ ] Somewhat  
   - [ ] No

6. Was the information in the videotape easy to understand?
   - [ ] Yes  
   - [ ] Somewhat  
   - [ ] No

7. Did the videotape help you learn passé composé?
   - [ ] Yes  
   - [ ] Somewhat  
   - [ ] No

8. Was the videotape too short?
   - [ ] Yes  
   - [ ] Somewhat  
   - [ ] No

9. Was the videotape too long?
   - [ ] Yes  
   - [ ] Somewhat  
   - [ ] No

10. How could the videotape on passé composé be improved?

11. Would you recommend the videotape to next semester's students?
    - [ ] Yes  
    - [ ] Maybe  
    - [ ] No  
    If yes, answer questions 12 and 13.

12. When would you recommend that the students watch the videotape?
    - [ ] Before the first class on passé composé.  
    - [ ] After the first class on passé composé.  
    - [ ] Any time before the test on passé composé.

13. How would you recommend watching the videotape?
    - [ ] Watch one time all the way through.  
    - [ ] Watch more than once.

### Partitive Articles

14. Did you watch the videotape on partitive articles?
    - [ ] Yes  
    - [ ] No (If no, go to question 27)

15. Was the ASL signing in the videotape clear?
    - [ ] Yes  
    - [ ] Somewhat  
    - [ ] No

16. Was the ASL signing in the videotape too fast?
    - [ ] Yes  
    - [ ] Somewhat  
    - [ ] No

17. Was the ASL signing in the videotape too slow?
    - [ ] Yes  
    - [ ] Somewhat  
    - [ ] No

18. Was the information in the videotape difficult to understand?
    - [ ] Yes  
    - [ ] Somewhat  
    - [ ] No

19. Was the information in the videotape easy to understand?
    - [ ] Yes  
    - [ ] Somewhat  
    - [ ] No

20. Did the videotape help you learn about partitive articles?
    - [ ] Yes  
    - [ ] Somewhat  
    - [ ] No

21. Was the videotape too short?
    - [ ] Yes  
    - [ ] Somewhat  
    - [ ] No

22. Was the videotape too long?
    - [ ] Yes  
    - [ ] Somewhat  
    - [ ] No

23. How could the videotape on partitive articles be improved?

24. Would you recommend the videotape to next semester's students?
    - [ ] Yes  
    - [ ] Maybe  
    - [ ] No  
    If yes, answer questions 25 and 26.

25. When would you recommend that the students watch the videotape?
    - [ ] Before the first class on partitive articles.  
    - [ ] After the first class on partitive articles.  
    - [ ] Any time before the test on partitive articles.

26. How would you recommend watching the videotape?
    - [ ] Watch one time all the way through.  
    - [ ] Watch more than once.

27. Write any additional comments about the videotapes on the back of this page and send it to Dr. Carol Traxler, Denison House, Gallaudet University.

ANNOUNCING:
ASL-SIGNED VIDEO EXPLANATIONS OF FRENCH AND SPANISH GRAMMAR

Special Materials for Teachers and Students of French and Spanish from Gallaudet University
The Department of Foreign Languages and Literatures at Gallaudet University is now able to offer videotaped grammar explanations for French and Spanish classes in ASL. These special videos were produced with support from a grant from the U.S. Department of Education's Fund for the Improvement of Post-Secondary Education.

The video-classes cover the grammar fundamentals taught in any Spanish or French language course. Because most foreign language texts are not written for deaf students and are often inappropriate and inaccessible, we decided to make visual grammar videotapes using ASL to explain the grammar that most students learn in any two-year foreign language program, either at the high school or college level.

The tapes are not captioned, but they incorporate graphics/captions for charts and examples. Because the tapes are not geared to any one particular textbook, they will not become outdated. Foreign language vocabulary used in the examples is kept simple and repetitive. Emphasis is placed on comparing English grammar with the target language grammar. These visual grammar explanations can be used in place of classroom instruction or to reinforce teacher-taught explanations.

Each tape is between 16 and 25 minutes long. Pauses are built in so that the segments can naturally be stopped, rewound, and watched again before continuing. The responses to using the tapes by both teachers and students have been excellent. Each set of tapes (Spanish-18 tapes; French-17 tapes) costs $165. Individual tapes are priced at $12. All costs include postage and handling.

If you have any questions about the materials, please write or call Carole N Frankel, Project Director, Department of Foreign Languages and Literatures, c/o the Gallaudet address, (202) 651-5563.

Gallaudet University is an equal opportunity employer/educational institution and does not discriminate on the basis of race, color, sex, national origin, religion, age, hearing status, disability, covered veteran status, marital status, personal appearance, sexual orientation, family responsibilities, matriculation, political affiliation, source of income, place of business or residence, pregnancy, childbirth, or any other unlawful basis.
Introduction

The videotape programs in this catalog have been produced by Gallaudet University to encourage public awareness of deafness through informational and instructional programs, and to meet the needs of deaf and hard of hearing individuals.

In October 1986, Gallaudet College became Gallaudet University. Many items in this catalog still refer to "Gallaudet College," and we cannot change their historical context.

Type of Materials

The materials listed in this catalog come in two different formats:

1/2" VHS videocassettes (price as shown)
1/2" S-VHS videocassettes (add $5.00 to price as shown)

When ordering programs it is important to be specific about which format is desired. Read the program listings carefully; they indicate the available formats for each program.

Availability of Materials

All programs in this catalog are available for sale only. Due to heavy demand, requests should be made as far in advance as possible.

To keep handling and other costs as low as possible, the Department of Television, Film, and Photography will provide tape stock for all video sales requests.

Where to Send Your Order

All orders for videotape sales should be sent to the Department of Television, Film, and Photography. An order form is enclosed with this catalog, and a new copy of the order form will be sent with each mailing.

Mailing

All materials are shipped by United Parcel Service (UPS), when possible. UPS does not deliver to post office boxes. Please give a street address for delivery. Overnight delivery is available at additional cost. Express service is available.

(202) 651-5115 (TTY/V)  (202) 651-5124 (FAX)
Sales Outside of the U.S.

Programs available for sale may be purchased by any customer in Canada and worldwide. Purchasers from outside the U.S. should be aware that the television system used in some other countries is not compatible with the 525-line NTSC system used in the U.S. We are able to provide video programs in the 625-line PAL or SECAM systems (add $3.00 to price as shown). Please check compatibility before ordering.

Sales

Only videocassettes are sold. The price of a video program depends on the program and videocassette format. New blank tapes are used for all video sales. Programs more than 60 minutes in length may be recorded on two or more tapes that are priced separately; e.g., an 80-minute program would be regarded as one 60-minute and one 20-minute program and priced accordingly (except where the program descriptions indicate a different division).

Prices include the cost of new blank tape, copying charges, handling, and insured shipping charges. Institutional orders may be billed by invoice, but individuals must prepay by check or money order.

Make checks or money orders payable to Gallaudet University or charge to your VISA or MasterCard account. Please allow two to four weeks for delivery.

Because of the added handling complications and the nominal cost of tape stock, we cannot accept requests to copy onto user-supplied blank tapes or grant permission for copying our programs.

Conditions

All programs are sold on the condition that they will not be copied or otherwise reproduced in any form, shown on broadcast or cable television outside of educational institutions, or shown where admission is charged, without express written permission from Gallaudet University Department of Television, Film, and Photography. A signed statement acknowledging these conditions is required on all sale orders; you may sign the one on the order form or sign a similar statement on your institutional letterhead. ALL PROGRAMS DISTRIBUTED BY GALLAUDET UNIVERSITY ARE SUBJECT TO COPYRIGHT LAW.

Gallaudet's experienced captioners provide a full range of services to corporations, schools, and government agencies. Closed or open captions are recorded in D-2, one-inch, betaSP, 3/4", SVHS and VHS formats, using our modern production facilities. Proceeds benefit deaf education. Check out our prices. You'll be pleased!
Tales from a Clubroom

Written by Bernard Bragg and Eugene Bergman. This two-act play takes place in a typical deaf club that can be found in any American city. Deaf clubs are the principal meeting places and forums for deaf people and, in most cases, are the only places where deaf people can socialize. The play's characters are representative of the people one meets at the average club: The club president and his wife; the theater lover; the treasurer, to whom people come for advice; the sexpot who has been divorced three times; the bartender/bouncer who is eloquent in ASL; a manual alphabet card peddler; the club's star basketball player; and many other colorful characters. Dr. Lawrence Newman, educator and former president of the National Association of the Deaf states: "The play makes clear that the need for a clubroom is a powerful need for deaf people, for here is not just a refuge from the world of sound but a place that is the shaker and the maker of lives, of customs and attitudes, a clearinghouse for moods and emotion. Here can be seen how the deaf communicate with each other in the highly effective, colorful, pithy, three-dimensional richness of ASL."
1 hr. 58 min.

# VTTFC . . . $ 59.95

Telling Stories

Written and directed by William Moses, 1989. Music composed by Chris Patton. Produced and directed by Marin P. Allen, Department of TV, Film, and Photography. This international award-winning play is now captured on videotape. Using symbols and myths drawn from the struggles between the world of the deaf and the world of the hearing, this nonverbal, gestural play fascinates audiences regardless of their knowledge of deafness or sign language. An original production of the Gallaudet University Theatre Arts Department.

The Class of '52

The Kendall School on the campus of Gallaudet University has enjoyed national recognition as a leader in the education of young deaf people for more than 100 years. Once welcoming all deaf children who resided within the boundaries of the District of Columbia, Kendall closed its doors to black children in 1905, forcing these children to seek education in neighboring states. This is the story of those children, their parents, their teachers, and their struggle to gain admittance to the Kendall School. This is the story of the Class of '52.

Assistive Devices: Doorways to Independence

For many deaf and hard of hearing people technology offers a variety of devices that can enhance the quality of communication and life. This hour-long videotape, introduced by "L.A. Law's" Richard Dysart, provides a comprehensive survey of assistive devices, including the three main classes: Listening devices, (hearing aids, audio loops, etc.); telecommunications devices (TDDs and phone amplifiers); and alerting devices (visual smoke alarms, vibrating alarm clocks, etc.). An accompanying resource book provides more detailed information, as well as information about how and where to obtain professional counseling and consumer advice on assistive devices. Book also available for this videotape.

# BKADDI . . . $ 24.95 (Book)
"The Bridge" is an opera unlike any other—an opera in American Sign Language. It is a metaphorical tale about a young boy who envisions a better-world across the sea and sets out to build a bridge to reach it. Through the use of digital orchestra and VideoHarp, the music for this production follows the rhythms and pacing established by the signing deaf actors. In this way, "The Bridge" is a breakthrough in music composition and dramatic material written for and performed by deaf actors using American Sign Language.

Originally produced by the Gallaudet University Theatre Arts Department, "The Bridge" was selected from over 900 college and university productions nationwide to open the 1992 American College Theatre Festival at the Kennedy Center, Washington, D.C. The production has been hailed by critics and audience members who cite the opera's universal appeal stemming from the theme of overcoming isolation by taking action to move toward a better place "over there."

The sound track from the production is also available on cassette and compact disk.

series.
# DM101 . . . $ 22.95

FANTASTIC

This program focuses on deaf and hard of hearing
primary school children ages 6-10, providing a blend
of information and entertainment. Many of the
segments are purely visual and so are not dependent
on a child's signing skill or reading ability. Each
program in this series is designed to encourage
children to use their imagination and their creativity.

Silver Cindy Award Winner

FANTASTIC "A"
In "Fantastic's" premiere program, Rita Corey welcomes viewers into a world
of exciting people, places, and things. Some surprises include a trip to a crayon
factory, a jump rope tournament, and mime Bernard Bragg.
# FANVA . . . $ 24.95

FANTASTIC "B"
Sports and travel are two of the themes of this edition of "Fantastic." The audience
will take a ride on a train, watch deaf adults and deaf children compete in athletic
events, and be entertained by the story of "The Lion and the Mouse."
# FANVB . . . $ 24.95

FANTASTIC "C"
This program is going to the dogs! "Fantastic" takes a look at our canine friends
at work and at play. "Fantastic's" own hearing ear dog shows viewers how police
dogs are trained, how hearing ear dogs are trained, and everything from puppies
to dogs in space!
# FANVC . . . $ 24.95

FANTASTIC "D"
Using the performances of deaf clowns, mimes, and actors, this "Fantastic"
stresses the importance of imagination and entertainment. Excerpts from The
Deaf Way provide an international array of talent.
# FANVD . . . $ 24.95
FANTASTIC "E"
Hosted by Mike Montagnino, FANTASTIC "E" focuses on how familiar objects are made in factories—Nabisco animal crackers, Lifesavers, and GM trucks—and shows how a letter written by a little girl to her grandmother reaches its final destination. Mimes Bernard Bragg and Joe Eagby encourage the audience to use their imagination, and storyteller Manu Dadet tells an international folktale in sign.

# FANVE . . $ 24.95

FANTASTIC "F"
Host Mike Montagnino visits colonial Williamsburg, Virginia, and compares the 18th century to the 20th century. Mike visits a colonial bindery and a wheelwright shop, and he peers into a colonial kitchen. Short segments focus on the Hershey chocolate factory, a deaf librarian, an Aesop's Fable, and other stories told in pantomime by Bernard Bragg and Joe Eagby.

# FANVF . . $ 24.95

FANTASTIC "G"
Host Mike Montagnino and two young friends visit Virginia's King's Dominion Theme Park. From this location, segments are introduced about maps and the U.S. Geological Survey, Ben and Jerry's ice cream, and the Navy's Blue Angels. Bernard Bragg and Joe Eagby tell an Aesop's Fable and other stories using pantomime, and Manu Dadet tells a folktale in sign.

# FANVG . . $ 24.95

FANTASTIC "H"
Host Mike Montagnino takes to Vail, Colorado, where he introduces Jamie Mendicino, a deaf 12-year-old trying out for the 1991 Winter World Games for the Deaf, and with his friend, Sport Goofy, watches young children learn to ski. This program features original animation produced by the Capital Children's Museum in Washington, D.C., a visit to the Stride Rite children's shoe factory and to a Nabisco Oreo Cookie factory, and pantomimed and signed stories by Bernard Bragg, Joe Eagby, and Manu Dadet.

# FANVH . . $ 24.95

Fundamental Dance Signs
This videotape integrates bilingual dance and physical activity classes. One of the benefits of this tape is that it enables dance or physical education teachers in mainstream programs to use it in their classes with special populations such as disabled or deaf students. The tape includes a section of general dance terms and a section on rhythm and music signs and body parts. This tape can be used for bilingual and multicultural programs. 21 minutes.

# FUDASI . . $ 24.95

Happy Birthday
A young deaf man drinks too much at his birthday celebration and is arrested while driving home. Presents the facts about drunk driving to deaf people. 21 min., made in 1981.

# V1828 . . $ 12.95
Graduations are always a time of joy and celebration and a
time to share accomplishments with family and friends. This
year, Gallaudet University's Class of 1994 shared their
celebration with a very special guest, the President of the
United States. Every President since Abraham Lincoln has
been patron of Gallaudet University and signs each graduate's
diploma. But for the first time in 30 years, a sitting President,
Bill Clinton, actually visited the Gallaudet campus and
addressed nearly 400 graduates, their families, faculty, staff,
and friends.
