This annual report of the Southern Rural Development Center (SRDC) describes the agency’s extension and research activities from October 1, 1995, to October 1, 1996. SRDC is one of four regional centers coordinating rural development research and extension education programs cooperatively with the land-grant institutions. SRDC cooperates with 29 universities to serve Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Oklahoma, Puerto Rico, South Carolina, Tennessee, Texas, the U.S. Virgin Islands, and Virginia. The first part of the report describes SRDC’s funding, sponsors, audiences, staff, and structure, and lists members of the staff, board of directors, and program advisory committees. The remainder of the report describes SRDC-sponsored activities in the areas of human capital, leadership, rural health, and rural poverty. Under each area, specific programs and conferences dealing with schools, family, food processing, multicultural empowerment, 4-H health curriculum, communities in economic transition, and home-based and micro businesses are briefly noted. Publications are listed. (SAS)
1996 Annual Progress Report

Southern Rural Development Center
Box 9656 • Mississippi State University • Mississippi State, MS 39762
The major function of the 1996 Annual Progress Report is to share information about the activities of the Center during the previous fiscal year. By design, the report is general in nature. For specific information about any of the activities, contact the Center.

Jacqueline F. Tisdale, Writer/editor
Sandra K. Payne, Administrative Secretary

Mississippi State University does not discriminate on the basis of race, color, religion, national origin, sex, age, handicap/disability, or veteran status.

SRDC Number 200

October 1996
The Southern Rural Development Center (SRDC) is one of four regional centers coordinating rural development research and extension (education) programs cooperatively with the land-grant institutions regionally and nationally. The Centers support and strengthen individual state efforts in rural areas by developing networks of university research and extension faculties from a variety of disciplines to address rural issues. Leaders across the region develop strategies for dealing with those issues and share them via conferences, publications and other educational activities and materials. Other Centers are at Iowa State University, Oregon State University and The Pennsylvania State University.

**Funding**

Funding for the Centers is through the U.S. Department of Agriculture's Cooperative State Research, Education and Extension Service (CSREES). The Centers collaborate with state, regional and national public and private organizations and with each other to leverage support from a variety of sources to supplement federal funding and to increase program effectiveness.

**Sponsors**

After a competitive proposal process in the summer of 1996, the SRDC Board of Directors named Alcorn State University (ASU) and Mississippi State University (MSU) to continue to host the Center at MSU where it has been housed since 1974.

The Center works with 29 land-grant institutions in Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Oklahoma, Puerto Rico, South Carolina, Tennessee, Texas, the U.S. Virgin Islands and Virginia.

**Audiences**

The Center has served the Southern region since 1974, providing a base for coordinating the academic leadership of rural development faculties. The SRDC works in liaison with research and extension faculties; with state, regional and national policy makers; with community decision makers; and with other rural development professionals. The ultimate beneficiaries are the rural people of the South who receive help through the research and education programs developed by land-grant personnel in cooperation with the SRDC.
Staff

The Center functions with a small staff consisting of a Director, an Assistant to the Director, a Writer/Editor and an Administrative Secretary. The 1995-96 staff members are as follows:

H. Doss Brodnax, Director
(Retired June 1996)

After the retirement of Dr. Brodnax, the Board of Directors appointed Dr. John E. Lee, Jr., Professor and Head, Department of Agricultural Economics, Mississippi State University and Dr. Jerome Burton, Associate Division Director of Cooperative Extension, Alcorn State University, to serve as Interim Co-Directors. A national search is underway for a Director.

Bonnie P. Teater, Assistant to the Director
Jacqueline F. Tisdale, Writer/Editor
Sandra K. Payne, Administrative Secretary

Structure

Regional participation is a strength of the Center. The organizational structure is designed to foster active involvement of the states in program determination.

Board of Directors. A Board of Directors establishes policies and sets guidelines. Members come from the region's 1862 and 1890 land-grant institutions and the private sector. Composition includes three 1862 extension representatives, one 1890 extension representative, three 1862 research representatives, one 1890 research representative and one representative each from the private sector and the Farm Foundation. Ex-officio representatives from Cooperative State Research, Education and Extension Service-USDA and Economic Research Service-USDA serve as advisors. The 1995-1996 board includes the following members:

Extension representatives

Hiram D. Palmertree, chair (Retired June 1996)
Mississippi State University

Richard Phillips
North Carolina State University

Lawrence Carter
Florida A&M University

Chester Fehlis
Texas A&M University

Pedro Rodriguez Domínguez
University of Puerto Rico

Research representatives

James A. Boling
University of Kentucky

Leroy Davis
Alcorn State University

Verner G. Hurt (Retired June 1996)
Mississippi State University

Thomas Klindt
University of Tennessee
Private sector representative
Dennis Robertson
Arkansas Rural Electric Cooperative

Farm Foundation representative
Walter Armbruster, chair
Oak Brook, Illinois

Advisors
Marvin Konyha
Cooperative State Research, Education and Extension Service-USDA

Patrick J. Sullivan
Economic Research Service-USDA

Program Advisory Committees. Program advisory committees on individual land-grant campuses contribute to the SRDC Regional Program Advisory Committee. The Regional Program Advisory Committee meets biennially to focus the activities of the Center on specific areas of need.

In April 1996, the Program Advisory Committee met in San Juan, Puerto Rico, with the SRDC-sponsored "Southern Region Leadership Conference." The Committee identified several needs. The Center will target resources to the following key issues:

Human Capital Development
Economic Impact Analysis
Business Retention and Expansion
Leadership
Infrastructure Development
Rural Health Issues
Economics of Agriculture

Rural Poverty
Small Scale/Alternative Agriculture
Energy Issues/Environmental Issues
Marketing
Local and State Government Public Policy
Natural Resource Base

The Program Advisory Committee and the institutions they represent are as follows:

Alabama
Gerald C. Wheelock
Alabama A&M University
J. Walter Prevatt
Auburn University

Arkansas
Lott Rolfe III
University of Arkansas/Pine Bluff
Donald E. Voth
University of Arkansas/Fayetteville

Florida
Cassel S. Gardner
Florida A&M University
James L. App
University of Florida

Georgia
Horace Hudson
The University of Georgia
Fred Harrison
Fort Valley State University
Kentucky
Richard C. Maurer
University of Kentucky
Sheron L. Randolph
Kentucky State University

Louisiana
Owusu Bandele
Southern University
Albert Ortego

Randy Williams
CSREES/USDA
Accomplishments

The SRDC has directed considerable work and resources over the past year on issues emphasized by the Program Advisory Committee.

Center Projects. The following section of this annual report provides insight to extension and research activities from October 1, 1995, to October 1, 1996. The variety of projects and the diversity of the people and organizations involved attest to the value of the Southern Rural Development Center and to the impact it has on the lives of the rural people and communities in the region it serves. The report is organized by issue areas: human capital, leadership, rural health and poverty. The SRDC funds rural development research and extension activities on a competitive basis; sponsors, supports and participates in conferences and workshops on key rural development issues; and publishes rural development materials. Publications include conference proceedings, results of research and extension projects, education and training materials and a periodical entitled Capsules. The Center attempts to integrate extension and research, but the following activity reports do not necessarily make the distinction.

Human Capital

Good Schools Improve Rural Development Prospects project investigated the role of local school quality in 1980 to 1990 economic development in South Carolina using school and community-level data. School quality was measured by high school test scores and student-to-teacher ratios. Findings indicate school quality does matter, especially in the more geographically isolated rural areas. The importance of school quality as a rural economic development strategy depends on the location and characteristics of the community. Improvements in school quality will enhance community development prospects for those communities with the appropriate mix of other amenities. Thus, improvements in local schools and students' performances should be viewed as one of several components of a holistic community development process. Future competition among rural communities for residents and jobs will be intense, and advantages go to communities perceived to provide good schools and the resulting quality of labor force and quality of life. Principal investigators were David L. Barkley, Mark S. Henry and Shuming Bao, all of Clemson University. Good Schools Improve Rural Development Prospects, SRDC No. 195, is the report of their project.

Linking Family and Community Strengths national conference had nearly 200 educators and community partners at Louisville, Kentucky. The primary purpose of the conference was to improve extension educators' ability to partner with extension colleagues in other areas of specialization, and with outside organizations and agencies. In particular, community development, family resource management and family development extension staffs focused on building capacity in families and communities. The conference was an outgrowth of a project funded by the SRDC. Other sponsors included the remaining regional rural development centers, CSREES/USDA, the National 4-H Council, the W.K. Kellogg Foundation and the Farm Foundation. One-thousand-dollar mini grants were awarded to 13 participants to transform conference learning into action. Three proposals from the Southern region were funded. A follow-up evaluation will be conducted at the end of six months.
School Choice Policy: Estimates of Supply and Demand Response in Private Education was an SRDC-funded project conducted in Georgia by Warren Kriesel, Andrew G. Keeler and Marc White, University of Georgia. Policies that would facilitate households’ switching to private schools have been proposed in response to a perceived crisis in public education. Proponents argue that vouchers or tuition tax credits would encourage competition that would serve as a catalyst in improving public education. However, necessary conditions for effective competition are (a) that private schools have sufficient excess capacity to absorb new students, and (b) that students exit public schools in adequate numbers to cause teacher layoffs and school closure. Research results for the state of Georgia suggest that while the private schools can take on additional students, the demand response by households would probably fall far short of fostering effective competition between private and public schools. Finally the demand model shows that parents are sensitive to indicators of public school quality in making their schooling decisions. This means that public school administrators can decrease the loss of pupils by improving their school’s performance. The complete report is available as SRDC No. 196.

The Southern Region Consortium to Address Food Processing Industry Competitiveness links the land-grant systems in the Southern region into an alliance to address food processing technology issues, work force training and development issues and leadership and management development issues across the region. A regional design team with research and extension representatives from various aspects of the land-grant system was formed to address these issues. The team is producing a composite directory of faculty and facility resources at each of the land-grant institutions in the Southern region. A print copy will be distributed to each design team member. In addition, a disk version will be provided so that individual states can print copies and make revisions as needed. The third media is via the Internet. A directory home page will be a component of the SRDC’s home page. It will allow access to the directory with linkage to individual home pages at the land-grant institutions in the region. The chair of the design team is Joe McGilberry, Mississippi Cooperative Extension Service.

Leadership

The Center funded a project at Prairie View A&M University, Assure People Empowerment via Active Leadership (APEAL). A major goal of the project is to generate and evaluate a leadership training program with multi-cultural application. They translated fifteen units and an introduction into Spanish from the Community Voices material developed by North Carolina State A&T Cooperative Extension Program with support from the W.K. Kellogg Foundation. The translated version of the curriculum, “Voces de la Communidad,” was field tested in Brazoria County, Texas. The material is designed to build a community vision and provide the skills of leadership that empower people and bond groups to identify and solve problems, marshal resources and bring positive community change. According to principal investigator Cassi Steele, it can be a tool in promoting the assimilation of Hispanics to the existing cultural climate through developed leadership. The translated materials are available via computer diskettes.

Building a Foundation for Community Leadership: Involving Youth in Community Development Projects was funded in part by SRDC as an extension project to involve high school students in
assessing community needs. The program is to be used by extension professionals, community leaders and school teachers or administrators for implementing student-supported community needs assessments. One goal of the project is to help students increase their understanding of and commitment to their communities and to become empowered to work toward solving local problems. Another goal is to show communities the value of the contributions their youth can make in identifying and meeting local needs, thereby expanding opportunities for students to participate in community affairs. The program was pilot tested in two rural sites, then the handbook of materials was revised. The curriculum was peer reviewed before being published in a notebook as SRDC No. 199. Principal investigators are Glenn D. Israel, University of Florida, and Thomas W. Ilvento, University of Delaware (formerly with the University of Kentucky).

Southern Region Leadership Conference brought together more than 125 leadership development professionals from extension and other government agencies, universities and the private sector with an interest in rural and community development. Together they explored the latest trends and resources to help rural community development efforts. Sessions focused on leadership development, empowerment, ethical leadership, motivational leadership and current issues, changes and challenges. The SRDC was a co-sponsor with the University of Puerto Rico and the Farm Foundation. Carmen González, Puerto Rico Agricultural Extension Service, was chair of the team that put together the conference held in San Juan, Puerto Rico.

The Joint Southern Region Program Leadership Committee Meeting's theme was "Taking Responsibility." Cooperative State Research, Education and Extension Service/USDA Administrator Bob Robinson delivered the keynote address. North Central Regional Center for Rural Development Director Cornelia Flora also was a plenary session speaker. The annual meeting is designed to increase communication and planning among extension program leaders in the Southern region. Other goals are to develop a common understanding among program leaders of the program planning environment in the South; to improve extension programs through sharing ideas and resources and planning regional actions; and to identify new issues important to the South and implications for current and future programs. The 1996 meeting, held in Birmingham, Alabama, had 140 participants. The meeting format allows program leaders to meet together by discipline after plenary sessions address the theme. The Southern Rural Development Center provides administrative support, conference material production and registration materials and personnel.

Rural Health

Issue Based 4-H Health Curriculum was developed by a task force to help young people develop a healthy appreciation of themselves, their families and friends. Units include Celebrating Self, Celebrating the Body, Medical/Cultural Influences, Interpersonal Skills, Decision-Making and Health Behaviors. The modules are applicable to 9-11 year olds. A member's manual, leader's guide and parent helper sheets are included. The materials were pilot tested with groups of young people from diverse backgrounds in after-school programs, clubs, health department groups, in-school programs, EFNEP day camps and others. The development of this curriculum was funded in part through a grant from the SRDC. The materials will be available from the North Carolina State University in early 1997.
Measuring the Importance of the Health Care Sector on a Rural Economy: A Brief Literature Review and Procedures to Measure Local Impacts reviewed the literature of studies that measure the economic importance of the health sector and developed three procedures to measure the impact. The principal investigators conclude that direct and secondary impacts on community employment and income often account for 15 to 20 percent of the total community’s employment and income. In addition, the literature strongly supports the conclusion that a viable health sector is needed if a community wants to attract industry, business or retirees. The procedures developed to measure the economic impact of the health sector on a local economy include 1) an aggregate approach that measures employment and income impacts for the health sector, 2) a disaggregate approach that employs a spreadsheet and measures the economic impact of five health sectors, and 3) a dynamic approach developed via a spreadsheet to measure disaggregate health sector impacts for the next five years. All three approaches can easily be completed with the spreadsheet and the report. Principal investigators are Gerald A. Doeksen, Oklahoma State University, and Tom Johnson, Virginia Tech.

The Southern Extension and Research Activity - Information Exchange Group - 19 (SERA-IEG-19) developed a resource directory of individuals with expertise in rural health and safety. The directory listing consists of university personnel and others in each state and territory who are recognized for their knowledge in rural health and safety. Southern extension and research faculties, university and medical school faculties, health and human services professionals and state officers of rural health policy are included as recognized authorities and potential collaborators in health care. A grant from the SRDC supported this project. The directory is available on-line through the SRDC home page at http://www.ces.msstate.edu/~srdc/ruralhlt/. Members of the SERA-IEG are updating the listings annually with SRDC maintaining the directory.

Rural Poverty

Communities in Economic Transition (CET). The SRDC and the other three regional rural development centers are taking a proactive role in promoting this Extension National Initiative and its five design teams. The Centers share the goal of CET, “to develop and implement state-of-the-art strategies and tools to support high impact programming related to rural economic development across five targeted areas of opportunities.” The areas are: Business Retention and Expansion, Home-Based and Micro Businesses, Retail Development, Small Manufacturing and Value Added and Tourism. The CET design team chairs, regional rural development center directors and national Extension staff met in August at Kansas City, Kansas, to develop a strategy for implementing the goal of the CET initiative. The SRDC compiled, printed and distributed a CET update brochure that lists the activities and projects of the design teams. A Center Director will participate on the CET national management team.

Fund for Rural America (FRA). The 1996 Farm Bill has a section authorizing grants for research, extension and education projects to assist people in rural areas of the country. The Center is collaborating with the office of the Southern Association of Agricultural Experiment Station Directors to support regional response to the request for proposals of the Fund for Rural America. Multi discipline, multi state, joint research and extension projects and joint 1862 and 1890 projects are being fostered through this alliance. Persons with ideas for regional projects suitable for the FRA
funds were asked to write concept papers. These papers are being collected, collated and organized by idea. Based on the compilation, teams of researchers and extension personnel will be assembled to write regional proposals for submission to the FRA. The Center is serving as a clearing house, easing the process necessary to deliver successful regional proposals.

**Home-Based and Micro Businesses Resource Directory** was developed by the Home-Based and Micro Businesses Design Team as part of the Extension Communities in Economic Transition (CET) National Initiative. They solicited information from states through the state program leaders and extension home-based/micro business state contacts. The resource directory is designed to help professionals who work with entrepreneurs by providing information on proven programming materials developed and used by extension field faculty and specialists. The directory also contains a comprehensive research bibliography of this subject-matter area. The Center published the directory in support of the CET National Initiative. There were two printings of the first edition in 1995. It was updated and the second edition printed in April 1996 as SRDC No. 194. The Center serves as the repository of copies. Beth Duncan, Mississippi Cooperative Extension Service, serves as co chair of the design team.

**A Proposed Model for Quantifying the Impact of Home-Based Businesses on Community/State Economic Development in the Southern Region** is a four-state research project (Kentucky, Oklahoma, Mississippi, Virginia) to develop a model to measure the impact of home-based businesses on community and state economic development in the South. While there are extensive statistics for other parts of the country, this is the first research project that will provide information for the Southern region. Data have been collected and analyses are underway. The Center funded the project through the Home-Based and Micro Businesses Design Team as part of the Extension Communities in Economic Transition National Initiative. Glennis Couchman, Oklahoma Cooperative Extension Service, serves as chair of the project team.

**Southern Rural Economic Development and Branch Plant/Local Firm Development Options** addresses the contemporary efficacy of branch-plant recruitment strategies through a comparison of the jobs created and the human resource practices of locally owned establishments with national, outside owned establishments in North Carolina. Overall this study does not support the contention that outside establishments bring in better jobs than those offered by locally owned firms, once establishment size and core sector have been controlled. The findings suggest the assertion that branch-plants should be recruited because they create better jobs than locally owned firms should be treated with healthy skepticism. Outside firms seem to come to North Carolina to profit from local norms of low wages and low skills rather than to change them. A grant from the SRDC supported the project. A complete report of the study, SRDC No.197, is available from the Center. Donald Tomaskovic-Dev, North Carolina State University, was the principal investigator.

**State Rural Development Councils** in the Southern region are composed of state-level USDA and other agency representatives who address rural development issues. The Economic Research Service, the National Partnership Office and the four regional rural development centers have a cooperative agreement to provide for research information to inform and enhance the work of the State Rural Development Councils. The Southern Center has frequent contact through conference calls with the
Councils in seven states (Florida, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, Texas) and provides support where appropriate.

Newly Funded Projects. The following three projects were funded in mid-1996 but ample time has not passed for progress reports:

- Replicate an After School Educational and Enrichment Model for School-Aged Youth. Alcorn State University.
- Conducting an Effective Waste Pesticide Disposal Program. Mississippi State University.

Print Communication. A priority of the Center is information dissemination. In keeping with this priority, several publications were completed throughout the year.

- Capsules. The regional newsletter is published 10-12 times a year. It is distributed free of charge to 3000 persons working in rural development and related fields such as rural sociology, education and economics. The format is designed to distribute brief and pertinent information to the interests of rural development researchers and practitioners in the Southern region. Activities of the Center, reports of Center-funded projects, new literature citations and scheduled events are regularly included.

- Conference Materials. Conference materials, including pre-conference brochures, name tags, registration folders, press kits, programs, handouts and proceedings, are developed. The frequent use of workshops and conferences as an integral part of the Center's information sharing makes this an important service to the Southern region.

- Publication Series. SRDC publications printed and distributed by Center staff October 1, 1995, to September 30, 1996, included the following.

<table>
<thead>
<tr>

</tbody>
</table>

Two unnumbered publications printed and distributed by SRDC last year were the 1995 Combined Report and 1995 Combined Publications List. The publications contain information about the activities and publications of the four regional rural development centers.
Electronic Communication. Staff members continue to expand the Southern Center’s Home Page on the Internet. For the Internet to be an effective means of telling the story of the Center, information on the Home Page must be current. The Center updates and maintains the Home Page to make it a visible outreach effort. The publication section includes an up-to-date listing of available Center publications, the current SRDC Annual Report, the current Combined Annual Report of the four centers, several case studies and the current issue of the Center newsletter, Capsules. Subscribing to Capsules through the Internet is now possible. Links to other rural development centers and additional sources of rural development information are listed. The Home Page lists members of the staff, board of directors, program advisory committee and the states and institutions served by the Center. Check out the SRDC Home Page at: http://www.ces.msstate.edu/~srdc.

Miscellaneous Activities. From time to time the Center is called upon to support activities around the region and nation that require small expenditures of resources both financial and human. The Center staff participates in key meetings in support of extension and research personnel; awards small one-time grants for research, service and educational activities; publish occasional papers for distribution throughout the region; and does a myriad of other rural development program activities. A sampling of these activities is included below.

- Produced the 1995 Joint Annual Progress Report of the four regional rural development centers.
- Supported the 4-State Heartland Economic Development Conference, “Building Community Infrastructure in the Heartland.”
- Served on the advisory board of the Center for Cultural Diversity, Kentucky State University.
- Attended Professional Agricultural Workers Meeting, Tuskegee, Alabama.
- Served as a member of the Mississippi Rural Development Council.
- Presented SRDC report to Southern Extension Directors and Administrators' Meetings.
- Participated in the annual meeting of the Southern Extension Public Affairs Committee.
- Participated in the activities of the Southern Extension/Research Activity Task Force on Rural Health, (SERA-19).
- Co Hosted the 2nd Annual Rural Minority Health Conference.
- Co Sponsored the Tri State Bivocational Ministers’ Conference, Memphis, Tennessee.

Bonnie P. Teater, Assistant to the Director
Jacqueline F. Tisdale, Writer/Editor
Sandra K. Payne, Administrative Secretary
The SRDC is one of four regional rural development centers in the nation. It coordinates cooperation between the Research (Experiment Station) and Extension (Cooperative Extension Service) staffs at land-grant institutions in the South to provide technical consultation, research, training, and evaluation services for rural development. For more information about SRDC activities and publications, write to the Director.
