* Netherlands

This is the third edition of a publication that describes the opportunities for study in the Netherlands for students interested in either advanced training for professionals or exchange programs and scholarships. This "Europe" edition is intended mainly for distribution in western, central, and eastern Europe. Highlighted by photographs and student interviews, the publication presents an impression of what it is like to study in the Netherlands. Sections highlight the value of study abroad; contemporary Dutch society; student life, roles, and choices; describe the two components of Dutch higher education university education and the polytechnics and colleges known as hogescholen; advanced training for professionals; exchange programs and scholarships, and offer advice on money, housing and other practical matters. A separate section lists courses and study programs conducted in English, by subject area (science and technology, agricultural and related sciences, medical and related sciences, development-oriented studies, management and business, law and international relations, European studies, culture, education, and media, fine and performing arts), with separate entries for each program and school. Another section summarizes these offerings in scatter charts by subject area and school. A final section provides a list of institution addresses, phone, fax, and e-mail information, as well as a list of Netherlands Alumni Associations.

Study in the Netherlands? This booklet will tell you all about it.
'Study in the Netherlands' offers information, addresses and practical tips for anyone who might be interested in taking a course or earning a degree at a Dutch institution for higher education. You can read about the possibilities for:
• studying for a short time through an exchange programme;
• enrolling in a regular degree programme or earning credits towards a degree in your own country;
• taking a course conducted specially in English.
Give your education a European flavour

More and more students are convinced that considerable value is added to their higher education if at least part of it is obtained in a foreign country. You learn about other cultures and other ways of thinking. In societies where globalization and international contacts are increasingly important, such knowledge can serve you well.

Especially in the European Union, life—even life within countries—will be increasingly European in the years to come. No matter which career you are planning, it is wise to keep this in mind. If you do not want to be left behind, you should take steps now to give your own education a multinational dimension—a European character, as it were. In this case you could hardly pick a better point of entry than the Netherlands, which is a sort of Europe in miniature. Nestled as it is between France, England and Germany, it offers opportunities to sample the influences of three of Europe’s major cultures.

Large numbers of students are completing entire degree programmes in countries other than their own. But even more are spending part of their student career at a foreign institution, often in connection with an international partnership between two institutions. The European Union, for example, has established the Leonardo and Socrates programmes to stimulate exactly this sort of exchange.

The Netherlands is a founding member of the European Union and has remained one of its staunchest supporters. This enthusiasm for Europe is evident in national education policies. Numerous steps have been taken to make it easier for foreign students to complete all or part of their studies in the Netherlands. This publication provides a full survey of the possibilities. It also offers an impression of what it is like to be a student in the Netherlands, and why this country could be a wise choice for you.
Just tulips, wooden shoes and coffee shops?

A dynamic, knowledge-base

Ask anyone what the name Netherlands brings to mind, and they will likely say tulips, wooden shoes, and coffee shops. For many years this image has dominated the perception of the Netherlands. But it is not the whole story. The Netherlands is a dynamic, modern society. A country that offers global services has an attitude of openness towards the rest of the world. It is open to do business, but also open socially and culturally. This makes the Netherlands ideally suited for receiving people who seek to enrich their knowledge through study abroad. What they find is hospitality in an open, safe society that is accustomed to dealing with people from around the world, and above all, to working with them.

The Dutch population itself has always represented a variety of religious and political viewpoints. Respect for the other person's opinions and convictions is the national virtue that gives strength to the fabric of society, with its many strands. In one sense or another, everyone is a member of some minority, and understands that to be treated with respect requires treating others the same way.

Cosmopolitan outlook

The national income in 1996 was approximately 25,000 dollars per capita. This wealth is distributed fairly evenly over the population as a result of a graduated system of taxation (the more you earn the higher percentage you pay in tax) and an elaborate system of subsidies and social benefits. This has three consequences. First, if the Netherlands wants to maintain this level of prosperity, it must earn its living with advanced products and services. This means that continuous innovation on all fronts is absolutely vital. Secondly, the country needs a highly educated population.
And thirdly, it must be cosmopolitan-oriented to the world, and without provincialism.

'The rest of the world is a big place,' say the Dutch, well aware of how small their country is. The Netherlands lies at the point where the German, British and French cultures meet. This is evident as soon as you turn on the television. In this well-cabled country, programming from these three countries and more can be received in nearly every household. It is also evident in the average Dutch bookstore. The Netherlands imports more books in English than any other non-English-speaking country. And cinemas show films from around the world in their original languages. Alongside the usual church towers and synagogues, the minarets of mosques are now appearing in the large cities. You can dance the salsa every bit as easily as in Latin America, and Italian. Spanish and Greek food is becoming almost as familiar as standard Dutch fare.

Cultural oriented.
The minute she arrived in the Netherlands at the end of January 1995, Tula was confronted with water. On television she saw how swollen rivers were endangering the dykes. Students told her that Tilburg was also under water. On the map they couldn't see clearly whether Tilburg was affected or not. All they saw on every news programme, even in Finland, was how high the water was. Tula has long since reassured them that her coming to the Netherlands has brought nothing but good fortune. And now I know that the rivers don't reach those heights every year,' she laughs.

In Finland, Tula Huttunen (27) had read about the Netherlands in her history books-about windmills and the Delta Works. She already knew that the Netherlands has been struggling against water for centuries. The fact that this small country—much of which lies below sea level—has managed in recent decades to make its defences against water virtually impregnable, made coming here all the more special to her. When an Erasmus grant enabled her to supplement her studies of information, management and business at the University of Joensuu in eastern Finland with a period of study abroad, she knew just what she wanted to do. She came to the Netherlands—to Tilburg.

The few days of watching dykes being reinforced did not alter her image of the Netherlands, however. 'It's a very nice country. The people are friendly and polite. And all the bicycles—wonderful. You see so many different cultures, so many different people,' Tula describes the Netherlands as 'a well organized, rich and developed country.' At the university she is benefiting from that wealth, and from the good quality education that results from development. To gain more insight into European policies for social welfare, she is taking several courses with a European orientation. She is learning about European law, European social policy, and about minorities and migration.

The Finnish student is also making grateful use of opportunities to learn computer applications for business. 'Everything I need is right here,' says Tula. The curriculum is right for me, most of the teachers are easy to understand, and the courses are conducted in English. And what's especially important in my field—there's all the software you could ever need.' When pressed for criticism, Tula manages to come up with a negative point. 'Here you have separate exam periods, when everyone is very busy. In Joensuu exams are spread over the whole year, which means you don't have crazy weeks, like here.'
Internationally speaking, Dutch higher education has a good reputation. This is based not only on such Nobel-prize winners as the Tinbergen brothers (Jan in economics, and Nico in ethology), but more importantly on the standard of the average graduate. In general, it is fair to say that a person who has completed a programme of Dutch higher education has mastered the breadth and depth of theory they need to work creatively within their discipline. A large share of all study programmes is occupied with writing papers, working in groups to analyze and solve specific problems, acquiring practical work experience in internships, and conducting experiments in laboratories. There are close links between the world of work and the needs of society on the one hand, and higher education and research on the other. The government spends nearly 5.5 billion guilders (USD 2.8 billion) a year supporting fundamental research, which is conducted by universities, research institutes and private enterprises. This is 355 guilders per head of population.

Innovative mentality

Dutch employers expect to be able to put young applicants directly to work, even in positions of responsibility, without first giving them extra training. Because of their broad educational backgrounds, young graduates are thought capable of dealing with new developments and novel problems. Experience shows that people with Dutch higher education function very well in other parts of the world as well. The cosmopolitan outlook of Dutch institutions, and the familiarity Dutch students gain with scientific literature from other countries, ensure that they quickly feel at home in a foreign professional situation. The same is true of foreign nationals who obtain all or part of their higher education in the Netherlands, for example by taking courses that are offered specially in English. They too move easily into excellent positions. They have adopted the innovative mentality that is such an essential part of Dutch education. But at the same time they have learned the value of tradition and continuity, for these too are part of Dutch higher education, which traces its roots back to the 16th century.
Students in the Netherlands:

Critical and independent

Thanks to various programmes of international cooperation, more and more foreign students are coming to the Netherlands to complete all or part of their studies, or to pursue a doctorate. Since the 1950s the Netherlands has offered courses conducted in English especially for the benefit of foreign students. But the number of foreign students enrolling in regular degree programmes is also growing. All of these students soon learn that higher education in the Netherlands means lots of opportunities but also lots of hard work. Students are expected to be critical of what they read and hear, and to be capable of working independently.

The courses offered by the international institutions are mainly at postgraduate level and tend to be highly specialized. Most of them are in disciplines in which the Netherlands has long played a leading role. These courses are becoming more numerous and cover an ever broader range of fields. The ones that are particularly well known around the world include courses in management studies, the agricultural sciences, astronomy, medicine, civil engineering, remote sensing, and the arts. (For details, see the yellow pages of this booklet.)

Education in Dutch and in English

Nowadays there are also many foreign students enrolling in regular degree programmes. Dutch students are becoming accustomed to speaking English since most will switch to English any time there is a foreign student in their project group, even if that student has learned to speak Dutch before coming to the Netherlands. 'Internationalization' has become a buzzword at Dutch universities and hogescholen. Each institution is seeking partners in other countries, often for the purpose of exchanging students. The most common approach is to set up a special programme of courses, in English and usually lasting a few months, so that the visiting students are saved the trouble of learning Dutch. This means that anyone coming from another country for a period of study or research will generally not experience language as a problem. Nearly all required reading is available in English, and also in daily life it is possible to manage in this language.

An active role for students

Students from other countries soon notice that at a Dutch institution for higher education everyone is expected to do a lot of talking. The traditional situation of a professor standing before a large audience delivering a lecture plays only a small role in most curricula. This teaching method is used only to explain...
Dutch students are expected to have well-founded opinions.

basic material or to elaborate on the written materials that form the basis of the stiff examinations that first- and second-year students must pass. The most common form of teaching is the seminar or working group. Under a teacher's supervision, a small group of students analyzes a certain problem. They get together to discuss it as a group, usually on the basis of a paper one of them has written about one aspect of the problem in question. Teachers stimulate students to take a critical view, not only of the papers presented by their peers but also of the published literature they have read in connection with the problem. In such working groups, everyone is expected to play an active part. On examinations students must demonstrate not only that they know the material, but also that they have formed well-founded opinions on the subject.

Multidisciplinary programmes
Internships, or periods of placement in real work situations, are being incorporated into more and more Dutch programmes of higher education. A variety of multidisciplinary programmes are established in which, for example, foreign language study combined with business studies and social sciences. Two examples of this are the programme in European Studies at the University of Amsterdam and the Latin American Studies programme at Leiden University. In their curricula, the higher education institutions are increasingly taking into account the needs and wishes of society. This makes the programmes more career-oriented.

Independent choices
Enrollment in a Dutch programme of higher education means hard work and above all independence. Because Dutch higher education is aimed at imparting not just factual knowledge but also insight and creativity, it is not enough just to memorize the required material. Sometimes students are asked to put together their own reading list for an exam, which they then submit for the lecturer's approval. There is also a wide range of elective subjects to choose from. A student who can explain how a particular elective subject is relevant to his or her programme will always be permitted to take the subject. In the midst of the many options and the mountain of literature, an inexperienced student can easily get lost. Fortunately, the teaching staff is there to help students make choices.
VICTOR FROM SPAIN ON THE SUBJECT OF GROUP LEARNING

‘In class it’s impossible to sit back and just listen.’

Victor met a Dutch girl in his own country, Spain. Head over heels in love, he followed her to the Netherlands. After a year spent adjusting and learning Dutch, he is now a first-year student of econometrics at Erasmus University in Rotterdam. ‘It’s a top university in economics,’ he says.

Something entirely new to him was group learning. ‘I found it very strange at first. You’re with a group of 24 people and you have plenty of time to ask questions and look around to make sure that your calculations have come out the same as everyone else’s. It’s impossible to sit back and just listen. You have to take part in the discussion, and work together with other students. And if you’re lucky the other students will become your friends as well,’ says Victor. He has also had to attend lectures delivered to larger groups—something he was accustomed to in Alicante, where he studies business administration. ‘But the size of the audience is small compared with some other fields. Erasmus University only has about 90 first-year students in econometrics, so the group can never be bigger than that.’

The system would not work without the efforts of the teachers, says Victor. They deserve praise, in his opinion. ‘Each semester you have two or three tests in each subject. That must be a lot of work for the teachers. They have to prepare the tests, and correct them. And if you don’t understand something or have another kind of problem, you can go see the teacher any time. This is quite normal. As long as you take the initiative yourself, the university and its teaching staff are there to give you what you need. The education is at a high level, the pace is fast, and the coordination is good. Everything goes according to schedule.’

The language, which Victor spent a year working hard to master, is not a problem for him now. ‘But it was at first. I came back from a long summer holiday in Spain and had trouble understanding the teachers’ various accents,’ he says. The group work with other students made learning the language easier. ‘But even now, if I want to explain something, I sometimes have trouble. I have to search for the right words. Fortunately, with the sort of classes we have here, they give you enough time, so eventually I always manage to say what I want to say.’

Besides regular four-year programmes at universities and hogescholen, the Netherlands has been offering another form of higher education for more than 40 years. Advanced courses are conducted in English in what is known as International Education, or IE. Many of these courses are offered at special IE institutions; some are offered by universities and hogescholen. (See the yellow pages in this booklet.)

Universities and hogescholen

At both universities and hogescholen the formal length of most study programmes is four years, although in some cases students are allowed more time than this. The main exceptions are university programmes in engineering, which take five years. The start-
The Netherlands has two main types of higher education: university education, and higher professional education, which is offered at the polytechnics and colleges known in the Netherlands as hogescholen). The universities train students for the independent practice of science. The hogescholen are more practice-oriented; they prepare students directly for careers. Transfer between the two types of higher education is possible.

University education

The Netherlands has 13 universities, which train students for the independent practice of science. The oldest is Leiden University, which was established in 1575. It was a gift from Prince William Orange, the founder of the Dutch republic. William wanted to reward the city for the heroic resistance it offered against the Spanish. The University of Maastricht is the newest university, dating from 1976. The universities of Amsterdam and Utrecht are the largest, with about 25,000 students each. Average enrollment at the universities is 12,000. Alongside the traditional institutions is the Open University, which offers distance education at university and hogeschool level. (See box.)

The universities differ in the programmes they offer. Nine offer education in a broad range of fields: natural sciences, health, economics, law, behaviour and society, and language and culture, for example. These are the universities of Leiden, Amsterdam, Groningen, Utrecht, Maastricht, Nijmegen, Tilburg, Rotterdam, and the Vrije Universiteit Amsterdam. Three universities specialize mainly in engineering (Delft, Twente and Eindhoven), and one specializes in agriculture (Wageningen).

Teaching and learning

The basic courses of the first year, known as the propedeuse, provide a general introduction to the chosen field and lay the foundation for the increasingly specialized subsequent years. As students progress, they have more freedom to choose their subjects. The final requirement is a thesis based on the student's own research.

Within the Dutch higher education community there is some disagreement as regards the term hogescholen in English. The institutions themselves and their association, the HBO-Raad, prefer the term 'universities of professional education'. The education ministry, on the other hand, retains the Dutch term in English texts.
Fredrik from Norway, at the Hotel School

“We had to organize a summer party for 300 people.”

“Right away, in the first two months of the programme, you have to cook a meal and serve it to the other students,” says Fredrik. “In the second year you do a six-month internship in a hotel in Europe or America where you learn all the practical aspects of the hotel business. You work as a cook, receptionist, housekeeper and waiter, for example. And in the last year of the programme you do another six-month internship, but this time at management level.”

Fredrik Torp (22) is in his first year at Hotel School The Hague, where he is enrolled in the course conducted in English known as European Hospitality Management. The course lasts four years because a relatively large amount of time is devoted to practical training. In Norway, says Fredrik, hotel management school is for people who already have several years of practical experience working as a bellboy, for example, or a cook or waiter. The course in Norway also has the problem of too few places for students. “In many fields you have to wait for years before you can get a place. That’s why the Norwegian government encourages students to go abroad and it’s quite easy to get a scholarship.”

Fredrik had heard of the school in The Hague from a friend who was studying there. It sounded good and he asked for more information about it from a student organization in Norway. They told me that Hotel School The Hague is one of the three best hotel schools in the world. So I applied, and went through the screening process. That consisted of several oral and written tests. You have to be good in English and one other foreign language—French, for example. Then, together with nine other applicants, you have to do a group assignment. Ours was to organize a summer party for 300 people. The selection committee watches how you function in a group, and how you present yourself.” Fredrik was accepted into the course, and was awarded scholarships by both the Dutch and Norwegian governments. The Dutch grant pays his tuition fee, and the Norwegian one his living costs.

The level of the course is high, says Fredrik, but he is managing to keep up even though he had to take many subjects in the first semester—from psychology and economics to nutrition and hygiene. “But that’s what makes the hotel business so interesting,” says Fredrik. “You’re not sitting in an office all the time. You have an office where you do the administration, but mainly you’re interacting with people. You learn all about cuisine, and quite a lot about wine, marketing and even architecture. In which other field would you find such a combination?”

Degrees and titles

There is only one degree before the doctorate: the doctoraal. Graduates of a doctoraal programme may use the title doctorandus (drs), ingenieur (ir) or meester (mr). Ir is the title in engineering and agriculture, mr is the title in law, and drs is used in all other fields. Dutch university graduates also have the right to use the internationally more familiar title Master. University titles are legally protected in the Netherlands, conferred only by recognized institutions that meet the same standards. The nearest equivalents to a doctoraal degree are the master’s degree in Britain, the Diplom in Germany and the Maîtrise/DEA in France.

Further study

Most students’ academic careers end with the doctoraal. There are many possibilities for further study, however, in virtually all sectors. Post-doctoraal training is required for qualification to teach at secondary schools. Students learn the practical skills needed for the specific profession.

Another type of post-doctoraal study leads to the doctorate, the highest academic degree in the Netherlands. Candidates conduct independent research, and report the results in a dissertation, which must be publicly defended. If successful, they may use the title doctor. The Dutch doctorate is comparable to a British PhD.

Higher Professional Education (HBO)

Higher professional education, or Hoger Beroeps Onderwijs (HBO), is practice-oriented. Students are prepared for professions that require scientific knowledge as well as skills for applying that
knowledge. There are some 65 hogescholen in the Netherlands, enrolling a total of some 275,000 students. Hogescholen pride themselves on being flexible and alert. They generally have close ties with the industries and organizations that employ their graduates. This enables them to adapt their programmes quickly to the changing needs of the labour market. Hogescholen vary in size; some enroll 300 students, others 25,000. Hogescholen generally tend to be regional in character; often they interact with Chambers of Commerce and other representatives of local industry through regional networks. Internationally, HBO can be compared to the education offered in Fachhochschulen in Germany and in the new universities of the United Kingdom.

The hogescholen offer a variety of full-time and part-time programmes in any of seven sectors: agriculture and the natural environment, behaviour and society, health care, engineering and technology, fine and performing arts, economics and management, and education.

Teaching and learning An HBO study programme consists of a foundation phase known as the propedeuse, followed by a main phase. The propedeuse introduces the basic subjects in the particular field, and orients the student to the profession in question. During the main phase students explore the field in greater depth, often choosing from several possible specializations and often putting together their own combinations of subjects. An essential component of all HBO programmes is the internship or work placement, through which students acquire practical experience in real work situations. This generally occupies a large portion of the third year. The fourth year is taken up mainly by an individual project and thesis; this too usually involves solving a real problem in a professional setting.

Degrees and titles HBO graduates may use the title baccalaureus, abbreviated to bc. In engineering, technology and agriculture, the title is ingenieur (ing.). Dutch HBO graduates also have the right to use the internationally more familiar title of Bachelor. Like university titles, HBO titles are protected by law and may be conferred only by recognized institutions.

Further study Advanced programmes are available in virtually all sectors of HBO. They can last anywhere between two weeks and two years. Some lead to postgraduate diplomas, and some to accredited master's degrees. The latter are often conferred in cooperation with a British university. Like university graduates, HBO graduates are also eligible to pursue a doctorate at a university.

The first things you need to know

If you are considering enrolling in a regular, four-year programme of study at a Dutch university or hogeschool, there are several things you need to know.

Enrolling as an independent foreign student—that is, not in connection with an exchange programme—requires careful preparation. You must make sure to choose the programme and course that meet your needs, and you must obtain all the necessary information from the university or hogeschool in question. The best person to contact first is usually the student dean; this should be done at least a year in advance of the academic year you wish to come to the Netherlands. The dean will tell you about the possibilities at his or her institution for earning advanced-level credits in particular subjects, or for spending a year taking a range of courses.

The following contains a brief summary of the procedures and most common possibilities. For more specific information you should write to the university or hogeschool of your choice. The addresses are given on the last pages.

Admission and registration

Admission to higher education is centrally administered, and there are national requirements. Foreign students must have a secondary school diploma judged equivalent to the minimum
diploma required of Dutch students. The institutions may also set their own additional requirements, such as specialization in a maximum of two secondary school subjects, and knowledge of the Dutch language. Remedial courses are often given to help students fill gaps and thus meet such admission requirements. In some fields—the arts, for example, and hotel management—hoger- scholen have extra freedom to set requirements and select students.

The Dutch VWO diploma required for university admission is comparable to the German Abitur, the French baccalauréat, and the British GCE A-levels. In the American system, it is comparable to a diploma from the top (or college-preparatory) stream of a good high school, or to a high school diploma plus one year of college. The Dutch Havo diploma required for admission to hogescholen is comparable to the German Fachabitur and the British GCSE. (See the table on the next page.)

The international relations office of the hogeschool or university can give you details about all the formal procedures that precede registration. The fees that foreign students pay for registration and tuition vary from one institution to the next, since the institutions set these fees themselves. Generally the combined fee is somewhere between NLG 2575 and NLG 4000 a year. The institution of your choice can tell you what it is exactly.

Obtaining a doctorate

For foreign students with a degree equivalent to a doctoraal, the universities offer the possibility of pursuing a doctorate and obtaining the doctor's degree, the title for which is abbreviated dr. This is the highest academic degree to be earned at a university in the Netherlands. A candidate for this Dutch equivalent to a

---

**MICHAELA FROM AUSTRIA**

'They find it very important that you take the initiative yourself.'

'In Austria I studied biology, specializing in botany. While doing library research for a paper on the biology of soil, I kept running into the name 'Wageningen',' says Michaela Arnsdorfer. 'After finishing my studies I got a job, but I felt dissatisfied. I wanted instead to go abroad for postgraduate study. I chose the MSc course in Ecological Agriculture offered in English at Wageningen Agricultural University in the Netherlands.'

'First I had to take several entrance exams to prove that my English, math and statistics were good enough. I also had to write some short essays on topics related to my field. Of the 80 or so people who applied, 40 were accepted. I was able to arrange everything from Austria.'

'During the first part of the course the classes are taught mainly in the classical way. The students come from all sorts of countries and this helps everyone lay the same foundation. After six months you start working more in groups. It's a liberal programme; you have a large number of subjects to choose from. If you like, you can even suggest subjects yourself and do them on your own. Fieldwork begins in July. I want to do mine in Austria or Germany. Three months are prescribed for this part of the programme, but most students spend more time at it. At the moment I'm putting the finishing touches on my research proposal.' Before I began I wasn't sure what the course would be like. I only knew which subjects were available. Fortunately I was given an excellent introduction to Wageningen, for two weeks at the end of August. First there was a workshop in which all the MSc students told about their cultures. In the second week you got to know the department, and a second-year student showed me where I would be living. Now I'm a member of the International Student Panel (ISP), a committee that offers advice regarding facilities for foreign students.'

'What I appreciate about the course is the importance they attach to students acting on their own initiative. This caught me off guard at first because I'm in a field where it's usually enough just to make your own soil samples. I hope this diploma will help me find a job in sustainable agriculture. The MSc course itself isn't a complete education, but it's very useful to have mastered skills yourself and to have worked with an international group of people.'
PhD is not generally considered a student, but in most cases is employed by a university as a research assistant. Holders of a bachelor’s degree are not automatically eligible to pursue a doctor’s degree in the Netherlands.

Obtaining a doctorate is known in Dutch as being admitted to the promotie. Normally this takes four years or more and consists of conducting independent research and writing a dissertation. The first step is to find a supervisor, known as a promotor, and to agree on a topic. The promotor is generally a university professor. The candidate then writes a research proposal, which also requires faculty approval. The period of research follows, and the writing of the dissertation. This must be defended orally at a formal public session. Candidates are questioned by several professors and specialists in the field. The dissertation may be written and defended in Dutch, English, French or German. For all other languages, special permission is required.

For foreign students there are very few Dutch scholarships or fellowships available for pursuing a doctorate at a Dutch university. Instead, paid positions are made available for pursuing a doctorate. These are temporary jobs, for a maximum of four years. They are advertised in the newspapers and people apply for them as for any job. Often they are also advised by word of mouth, through national and international networks of colleagues. There is no central register of these positions, you must make your own inquiries.

Also: a growing number of Dutch university departments are making a special effort to accommodate doctoral candidates from other countries. For example, foreign students can earn a doctor’s degree using the ‘sandwich model’. They prepare their research projects at the Dutch university, conduct fieldwork in their own countries, and then return to the Dutch university to write up and defend their dissertations and receive their degree.

Susanne from Switzerland

'The Dutch dance academy is only a start, I hope.'

Susanne Wytl, from Switzerland, did not choose the easy way. With the diploma she earned in Zurich as a sports teacher specialized in dance, she could be working as a dance teacher right now. I've been dancing since I was four, and have already done some substitute teaching. In my country, actually, you don't really even need a diploma to teach dancing.

But Susanne thought she was not yet good enough. 'I wanted to learn more. I do fairly well in modern dance, but I know too little of other styles. The idea of classical training appealed to me.' Switzerland does not have the dance school she was looking for, so she had to leave her own country to audition. A course at a well known dance academy in the U.S. was eliminated immediately as too expensive. Her choice fell on the Netherlands. The audition went well, and for the regular tuition fee of 2575 guilders a year she could enroll in the Rotterdam College of Music and Theatre. 'I knew that Rotterdam has a good reputation. Later, if I want to teach dance in my own country, my Rotterdam diploma will serve me well.'

Susanne is now in the first year of the course in dance teaching, and sometimes feels a bit out of place. 'I'm 24, which for this school is rather old. My classmates are girls of 17 and 18, who tend to take a different, more lighthearted view of life.' But Susanne is not complaining. During the lessons in theory she occasionally felt she had wandered into a primary school, but the practical lessons have more than made up for it. 'Careful attention is given to technique, and the teachers point out my mistakes whenever it's necessary. I'm now certain that this course will give me exactly the basis I wanted.' It will indeed be a basis, because Susanne sees her training in Rotterdam as only a beginning. She hopes afterwards to obtain even more international dance training. Eventually she will return to Switzerland, she says, to take a job in a secondary school where she will teach young people not only sports but also the basics of modern and classical dance. 'And perhaps one day I may even wind up as a director of a Swiss dance academy. Maybe there I can devote some hours to someone who was trained in Rotterdam.'
In certain popular fields, the universities and hogescholen cannot accommodate all the applicants who are eligible. A national system of selection, in which both student grades and chance play a role, goes into operation for university study programmes in such fields. For the academic year 1997/1998, there are quotas for programmes in biomedical health sciences, biomedical technology, medicine, dentistry and veterinary medicine. The hogescholen have their own selection procedures for fields in which demand exceeds supply. For the academic year 1997/1998, there are quotas for programmes in animal management, occupational therapy, tourism and recreation, european studies, industrial design engineering, journalism, tourism and recreation (the short programme), the teaching of Islam in secondary schools (grade-two certificate), dental hygiene, orthoptics, podiatry, social and legal services, physiotherapy, and speech therapy. The international relations office of the university or hogeschool can give you details about the formal procedures that precede registration.

The Dutch language
In regular degree programmes, the language of instruction is usually Dutch. You will have to learn this language if you plan to enroll as a regular student; in general the university or hogeschool will ask you to pass a test before admitting you to a degree programme. And because so much required reading is in English, you will have to be competent in this language as well.

There are various possibilities for learning Dutch. Especially in the months prior to the start of the academic year, most universities and hogescholen offer Dutch lessons for foreign students. At city hall, the municipal education department can give you a list of the language courses available locally. Private agencies offer many such courses; these are more expensive than those offered by the higher education institutions and the municipality itself, however. Each year the Foreign Student Service publishes a list of non-university language courses, complete with addresses. The list costs NLG 6, and can be ordered from the Foreign Student Service, Oranje Nassaulaan 5, 1075 AH Amsterdam, phone: +31 (0)20 671 59 15

Do not think you can pick up Dutch as you go along; if you have not reached a level of mastery before starting a course conducted in Dutch, you will soon be lost, with no hope of catching up. First-year courses are generally given in Dutch. In later years it becomes increasingly possible to receive instruction and do your own work in English. For this reason, it is easier for foreign students to come to the Netherlands at a later stage in their studies.

A growing number of advanced-level courses are being offered in English. In recent years the universities and hogescholen have also begun to offer international study programmes; in such cases the language of instruction is English from start to finish. A list of these courses is given in the yellow pages.

International Education (IE) was set up originally to meet needs of developing countries. All IE courses are designed for professionals who wish to add more depth to their existing knowledge. All revolve around how specialized scientific knowledge can be applied to solving problems.

Study programmes
Advanced courses are conducted in English. Many of these courses are offered at special IE institutions: some are offered by universities and hogescholen. The Netherlands has almost 400 different courses and study programmes, which each year enroll just over 4500 participants. A wide range of subjects are covered. IE courses last anywhere from a few weeks to four years. Most IE courses lead to a diploma; a number of the longer courses lead to a master’s degree; and at some IE institutions one can earn a PhD.

Teaching and learning
The concern for practical application requires curricula that are flexible. Teaching staff must be capable of adapting to the varying demands of students who face similar problems but in vastly different contexts. This means that International Education places heavy demands on the students themselves. To get the most out of a course they must actively contribute.
Students of International Education have access to the Netherlands' entire academic infrastructure, including all the universities' libraries. Because almost all IE courses include field trips, IE students visit relevant companies and organizations in the Netherlands and sometimes even elsewhere in Europe.

Admission and registration
Admission requirements for the courses vary, but most successful applicants have at least a bachelor's degree or its equivalent, plus several years of on-the-job experience. For all courses, however, it is absolutely essential that a person understand, speak, read and write English well.

For the person who wishes to increase and update his or her expertise, International Education in the Netherlands thus offers many advantages:

- Courses are at an advanced level.
- They are conducted in English.
- They are intensive.
- Specialized knowledge.
- They can be adapted to suit a person's own requirements.
- They are both theoretical and practical.
- They offer an inside view of advanced science and technology as applied in the Netherlands.

For more information about the courses, their admission requirements and tuition fees, apply to the institutions directly. Their addresses can be found in the yellow pages in this booklet.

---

Paolo from Italy, on the subject of International Education

Paolo Segalla made his plan a long time ago. The 29-year-old Italian, who comes from a village near Milan, has had just one aim since finishing his studies in agriculture: to work in Africa. But after two years spent working hard in Africa, he began to have doubts. 'I could see that there were things I needed to learn extra theory.' In Benin he heard about the programme in rural development offered in the Netherlands at the Institute of Social Studies (ISS).

Paolo knew that his application would be accepted only if he were good enough in English, the language of instruction at ISS. Since he had learned very little English, he failed the required TOEFL test twice. Paolo laughs as he tells how an African shaman finally solved the problem for him. 'He gave me a magic pencil that would give me confidence. And what do you know, the next time round I passed.'

He has now been studying for several months in The Hague, the seat of Dutch government. 'It's hard work,' he says. 'But I'm enjoying it. The fast pace is good. I'm here for just six months and want to learn all I can. What will this course give me besides an extra diploma? Internationally speaking, this country has an excellent reputation. In France, for example, if you say you studied in the Netherlands, it immediately counts as something special.' Paolo admires his teachers. 'They're not content just to stand before the class. They dig into their own experience, based on their own regular trips to other parts of the world, including Africa. That way they can offer more than just theory. And if you know that what the teacher says is based in reality, you're much more willing to listen.'

But Paolo's favourable impression of the Netherlands is based on more than the classroom. Choosing his words carefully, he says, 'It's a very peaceful, free and open place. And it's complex, because there's room for creativity. This is possible because of the country's wealth, I know. But it's good to see a rich country that also knows how to spend its money well-on culture, for example, and on developing a multinational society.'

According to Paolo, not much is left to chance in the Netherlands. 'Everything is so well organized-the entire country, the school, even the road for getting to the school.' To someone with a Latin temperament, this can make the country seem rather cold at times. 'The Dutch are very rational. The head is more important than the heart,' he says.

Paolo recommends that everyone spend at least a few months studying something in a Dutch setting. 'Do whatever you have to get here. And once you're here, don’t just go to school. Get out and explore. You can learn a lot from this country and its people.' He hesitates and then adds with a smile, 'Oh yes. And try to arrive in the springtime....'
Exchange and scholarships

European exchange programmes
Most student exchanges within Europe are funded by the European Union. For students, the EU exchange programmes have the advantage that many important matters are already taken care of, such as funding, housing and residence permits. Often a student even knows in advance how many credits he or she will earn during the period of exchange. The European Union's programmes offer students from the member states possibilities for completing either entire degree programmes or parts of programmes in another country.

Socrates
The Socrates programme is named after the Greek philosopher who taught Plato. Socrates is meant to encourage cooperation among the higher education institutions of Europe. A large amount of money has been earmarked for supporting students who wish to complete part of their studies in another country of Europe. A Socrates scholarship covers a period of 3 to 12 months; the maximum award is 5000 ecus. Your own institution must have a structural relationship with an institution in the Netherlands. For information, ask at your own institution.

Leonardo
Leonardo is the European programme for professional education. The scheme is named after the famous Italian artist, writer and scientist, Leonardo da Vinci. With a Leonardo scholarship, you can do an internship in the Netherlands or take courses at a hogeschool. The size of the scholarship depends on your status. For information, ask at your own institution.

Tempus
The Tempus programme enables countries of Central and Eastern Europe to establish partnerships in the European Union that help them to restructre and adapt their higher education systems. The programme is also aimed at the countries of the former Soviet Union.

Other exchange programmes
Various universities and hogescholen in the Netherlands have established their own partnerships with institutions elsewhere in Europe for the purpose of exchanging students. These arrangements are often limited to a specific field or discipline. Ask at your own institution if there are any such possibilities.

The Dutch government is attempting to make Dutch higher education as accessible as possible to students from other countries, among other things by urging that more courses be conducted in English. Foreign students enrolled as regular students pay the same tuition fee as local students; this is relatively low since regular higher education is heavily subsidized in the Netherlands. But the Dutch government does not make any scholarships available for foreign students who wish to take a complete degree programme at a Dutch university or hogeschool. Foreign students are not eligible for the student grants and loans that the Dutch government provides for permanent residents. There are several other possibilities for funding, however, which are described briefly here.

Countries in Europe with which the Netherlands has a Cultural Agreement:
- Austria
- Baltic States
- Bosnia-Hercegovina
- Bulgaria
- Croatia
- Czech Republic
- Denmark
- Finland
- Germany
- Great Britain
- Greece
- Hungary
- Iceland
- Ireland
- Luxembourg
- Norway
- Poland
- Portugal
- Romania
- Slovakia
- Slovenia
- Spain
- Sweden
- Switzerland
Cultural Agreements

On the basis of bilateral agreements between the Netherlands and other countries, the Dutch government awards scholarships to foreign students wishing to come to the Netherlands. If you are from one of the countries listed in the box, ask about the possibilities at the Dutch embassy in your country.

On your own

In some cases it is possible to spend a few months studying at a Dutch university or hogeschool without being part of an exchange programme. Generally such students are far along in their studies and know of a specific course in the Netherlands that would make a good addition to their own programme. These students, called 'free movers', make all the arrangements themselves. Although students from EU member states have fewer problems than 'free movers' from other countries, this is not an easy route. For example, you must find out whether your own institution will accept the credits you earn in the Netherlands. You also have to find your own funding, obtain the appropriate residence permit, and find a place to live. You need to start planning at least a year in advance. Begin by inquiring at the international relations offices of your own institution and the Dutch institution in question.
A number of matters must be arranged, which is why you need time. You will need to know if there are any admission quotas, for example. If you are from a country of the European Union you need a valid passport or national identity card. Otherwise, to obtain a residence permit for the Netherlands, you will need the tentative statement of admission that is sent to you after you submit your application. Remember that the academic year in the Netherlands is from the end of August to the middle of June.

Insurance
In the Netherlands you are not automatically insured against medical costs. Students must make sure that they have adequate coverage. Foreign students who are privately insured in their own country should carry with them a statement (in English) describing their insurance. If you do not already have insurance that will cover you fully against medical expenses and liability while you are in the Netherlands, you will have to take out a policy. Either the student dean at your chosen institution, or Nuffic, can provide you with more information.

Money
Experience shows that to live and study in the Netherlands for one year costs a foreign student at least 13,500 guilders. This is needed to cover daily expenses and to pay the registration and tuition fee. You cannot count on finding a source of income once you are in the Netherlands. Only citizens of EU member states are allowed to hold jobs alongside their studies. But even they do not really have the time to work and study as well. The universities and hogescholen do not have funds for supporting students. Although differences between incomes are small in the Netherlands, most students live towards the bottom of the economic ladder. If you have an average student income—from a scholarship, for example—you will find that one-third of it will go towards housing, and food will cost you another third. Fortunately, most universities and hogescholen offer hot meals at reasonable prices. Many cities have pubs (called cafes in the Netherlands) where you can eat cheaply and well. But the cheapest and most pleasant way to eat is to do your own cooking, perhaps together with housemates. The remaining third of your money will go towards books, transportation, and other expenses. Like Dutch students, you will have to learn to manage your finances carefully.

Housing
Finding a place to live is not easy in a country as crowded as the Netherlands. The phenomenon of the campus is virtually unknown. Some student housing does exist, but this is hardly ever part of the institutional complex as such. You will not find large concentrations of student life. Universities and hogescholen have begun in recent years to concentrate their faculties and

Be sure to allow plenty of time for preparation. You will need to begin at least a year in advance. First, examine the alternatives and choose the course or study programme that interests you most. So that you will not be disappointed, make some second choices as well. Then contact the student dean or international relations office of your own institution to find out about possibilities for scholarships and exchanges. Only then should you contact the relevant institution in the Netherlands for more information.
Public transportation or your bicycle will take you almost anywhere.

departments in large new complexes, but many are still doing their work in buildings scattered throughout the city. Apartment blocks are built especially for students and other young people, but the waiting lists for them are long. It is usual for students to find their own rented rooms on the private market. If you are taking part in an exchange programme, it is possible that a furnished room will be arranged for you. Accept it immediately, or you will regret it later! To find a room yourself takes a long time, and rents are high. Student rooms in the Netherlands are usually unfurnished, and kitchens and bathrooms are shared with others. Furnished apartments are scarce and far more expensive. In fact, students can seldom afford them.

So how do you find a place to live? Before you leave your own country, try to get in touch with someone who has studied in the Netherlands or with the Dutch consulate. Any tips they can...
give could prove useful. If you are in the Netherlands and still
looking for a place, go to the international relations office or the
student dean. And let your fellow students know you need a room.
Hang notes on the bulletin boards of supermarkets, libraries and
other public places. It will be up to you to take the initiative.

Student culture
Although the higher education institutions are scattered
throughout the country and even within the cities, there is cer-
tainly a student culture. Around each university and hogeschool
there is a network of associations that bring students together
for sport and recreation. These are run by students; some are
international, and all receive at least indirect support from the
institution. Students also have their favourite pubs, restaurants
and other meeting places. The Dutch higher education commu-
ity wants to be part of society, and not isolated from it.

Transportation
In the Netherlands you do not need a car to get around. Public
transportation will take you almost anywhere. Although train
and bus fares are not cheap, it costs much more to operate a car.
Particularly in the western part of the country, the cities are very
accessible by train.

The bicycle is the cheapest and easiest way to get
around, especially if you live in a city. Most Dutch people, regard-
less of their profession or status, own a bicycle. Buy a second-
hand one rather than a new one. This will save you money, but be
sure to buy a strong lock. Sometimes a lock costs more than the
bicycle itself!

Residence permits
If you are from a country of the European Union or the
European Economic Area, all you need is a valid passport or
national identity card. These countries are Austria,
Belgium, Denmark, Finland, France, Germany, Greece,
Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Monaco,
Norway, Portugal, Spain, Sweden, Switzerland, and the
United Kingdom.

You will also need health insurance, which is mandatory in
the Netherlands. (See ‘Insurance’.) For more information,
contact the Dutch embassy or diplomatic representative in
your own country.

ULLA FROM SWITZERLAND

‘My advice? If you want a room, start early!’

Ulla is from Switzerland, and right after she heard
that her audition at the Dutch dance academy had
won her a place, she began her preparations. This
spared her the awful problem so many first-year stu-
dents must overcome—finding a place to live.

In April, almost six months ahead of time, Ulla had arranged
a room for herself. ‘First I contacted the student housing office
for information. I telephoned to see if a room would be available for me, and then I came here in person to have a look.
Almost straight away I had a room for September. Classmates
of mine started looking months later, and had a lot more trou-
ble finding something,’ says Ulla, who managed to arrange
other practical matters well in advance too. A Swiss health
insurance policy could be made to cover her in the Netherlands,
and liability insurance could be arranged as soon as she
arrived. She did not need a residence permit, but she does have
to report to the local immigration office every few months.

Now Ulla is living in a house that a private landlord rents to
students at the dance academy. She lives with two Dutch girls
and a Belgian girl. It takes her only about ten minutes to get
to the academy every morning. She pays her expenses from
money she saved in Switzerland.

Ulla likes living in the Dutch-style student house. ‘At first I
couldn’t speak any Dutch; I spoke high German with my house-
mates. But later I noticed that my Swiss German was not so
very different from Dutch’!

The thing that bothers Ulla most is all the rubbish her student
household produces—mainly from packaging. ‘A Dutch student
I met in Switzerland told me once that Dutch student houses
are often a mess. But I couldn’t believe what I saw in my house.
Three or four big bags full of rubbish every week. At home with
my parents in Switzerland, we fill one bag a week at most. Of
course my mother buys more fresh food than my student friends
do here. That way you have less rubbish to throw away.’
Courses and study programmes conducted in English

Dutch universities, hogescholen and institutions for International Education are conducting more and more courses and entire study programmes in English. The present chapter lists these in general categories. The courses vary in length from a few weeks to four years. Fees are indicated in Dutch guilders (NLG). The educational prerequisites are listed separately for each course; the institutions decide for themselves which specialized knowledge or professional experience candidates will need for the course in question.

All courses and programmes listed here have been carefully checked by Nuffic. You can be certain that they are of high quality and meet the standards set by Nuffic. Only those offered on a regular basis are included.

The courses are listed by institution and grouped under the following eight headings:

1. Science and technology p. 23
2. Agriculture and related sciences p. 34
3. Medical and related sciences p. 43
4. Development-oriented studies p. 48
5. Management and business p. 53
6. Law and international relations p. 66
7. European studies; culture; education p. 69
8. Media; fine and performing arts p. 73

The reply cards at the back of this booklet can be used to request more information about specific programmes or courses. You may complete and send in as many as you like. Please fill in the code number of the course (which is printed before the name of each individual course) and the name of the institution. In each case, the institution in question will send you the information directly.

1.01 M.Sc. Degree Course in Geoinformatics (GFM.2)
Objectives: Persons in the field of geoinformatics will be able to design and manage geographic information systems and to undertake research in related areas.
Type of qualification: Master of Science degree.
Duration: 1.5 years.
Educational requirements: University degree (B.Sc. or equivalent).
Fees: NLG 23,500.

1.02 Professional Master Degree in Geoinformatics (GFM.3)
Objectives: Theoretical and practical training, for staff of academic institutions and production and user organisations, in the handling and management of systems for the acquisition, processing, transmission and presentation of geoinformation.
Type of qualification: Professional Master degree.
Duration: 1 year.
Educational requirements: B.Sc. degree or equivalent in geodesy, land surveying, computer science, civil engineering, geography, mathematics, physics or a related science.
Fees: NLG 12,000.

1.03 Diploma Course in Geoinformatics (GFM.4)
Objectives: Training in map and geoinformation production for staff working at national and regional agencies, for the staff that trains them, and for teaching staff at technical institutions.
Type of qualification: Diploma.
Duration: 40 weeks.
Educational requirements: University entrance level in mathematics for all options. plus university entrance level in geography for cartographic option.
Fees: NLG 9,000.

1.04 Digital Image Processing Postgraduate Certificate Course (DIP.5)
Objectives: Training for post-graduate students, researchers, and engineers, in the numerical processing and analysis of remote sensing data and its applications.
Type of qualification: Certificate.
Duration: 16 weeks.
Educational requirements: B.Sc. or equivalent degree in geodesy, land surveying, geology, forestry, civil engineering, geography, physics or a related science.
Fees: NLG 4,000.

1.05 M.Sc. Degree in Geoinformation Systems for Cadastral Applications (GIC.2)
Objectives: Training in the design, implementation and management of (multipurpose) cadastral land information systems, and skills for research and development in multidisciplinary environments in land-related information systems.
Type of qualification: Master of Science degree.
Duration: 1.5 years.
Educational requirements: B.Sc. degree in geodesy, land surveying, geography, economics, law, management or public administration.
Fees: NLG 23,500.

1.06 Professional Master Degree in Geoinformation Systems for Cadastral Applications (GIC.3)
Objectives: Staff from cadastral and land-related organisations gain competence in the use of GIS technology for the implementation and
Educational requirements: B.Sc. degree in geodesy, land surveying.
Type of qualification: Professional Master degree.
Duration: 1 year.
Educational requirements: B.Sc. degree in geodesy, land surveying, geography, economics, law, management or public administration.
Fees: NLG 12,000.

1.07 M.Sc. Degree Course in Geoinformation for Forest and Tree Resource (FOR.2)
Objectives: Graduates are able to use and apply geographic information in a research project and produce a thesis which is relevant to their own work and which deals with the management of forests and trees.
Type of qualification: Master of Science degree.
Duration: 1.5 years.
Educational requirements: B.Sc. degree or equivalent in forestry.
Fees: NLG 23,500.

1.08 Professional Master Degree in Forest Survey (FOR.3)
Objectives: Training for forestry officers in the use of remote sensing techniques and geographic information systems for collecting, analyzing and managing spatial data to support sustained management of forest resources.
Type of qualification: Professional Master degree.
Duration: 1 year.
Educational requirements: B.Sc. degree or equivalent in forestry.
Fees: NLG 11,000.

1.09 Professional Master Degree in Forestry for Rural Development (FRD.3)
Objectives: Graduates are able to prepare plans by which trees and shrubs contribute to sustainable rural development, and to integrate these plans into wider land-use planning activities.
Type of qualification: Professional Master degree.
Duration: 1 year.
Educational requirements: B.Sc. degree in forestry, agriculture or equivalent.
Fees: NLG 12,000.

1.10 M.Sc. Degree Course in Geoinformation Systems for Rural Applications (GIR.2)
Objectives: To build competence in the development, design and implementation of geoinformation systems for problems and organisations dealing with natural resource management and to build competence in performing independent scientific research in this field.
Type of qualification: Master of Science degree.
Duration: 1.5 years.
Educational requirements: B.Sc. degree in agricultural sciences, economics, geography, planning or comparable science, or B.Sc. degree in informatics.
Fees: NLG 22,500.

1.11 Professional Master Degree in Geoinformation Systems for Rural Applications (GIR.3)
Objectives: To build competence in the use of GIS technology for the implementation and operational management of geoinformation systems. For the staff of organisations involved in natural resource management.
Type of qualification: Professional Master degree.
Duration: 1 year.
Educational requirements: B.Sc. degree in agricultural sciences.

1.12 Environmental Systems Analysis and Monitoring (ESM.2) M.Sc. Degree Course with 2 specialisations:
I: RLE.3 + ESM.2; II: WRS.3 + ESM.2
Objectives: Training in the use of aerospace surveys, GIS and modelling tools for environmental data acquisition, impact and change analysis, risk and hazard assessment, and decision support methods.
Type of qualification: Master's degree.
Duration: 82 weeks.
Educational requirements: I: B.Sc. degree in agronomy, ecology, geography or vegetation sciences. II: B.Sc. degree in hydrology, geography, geology, engineering sciences.
Fees: NLG 25,500.

1.13 M.Sc. Degree Course in Rural and Land Ecology Survey (RLE.2)
Objectives: Development of research capacity in the survey, analysis and interpretation of vegetation and agricultural land use data for natural resource management, using remote sensing and geoinformation systems (GIS).
Type of qualification: Master of Science degree.
Duration: 1.5 years.
Educational requirements: B.Sc. degree in agronomy, biology, geography, environmental sciences or equivalent.
Fees: NLG 23,500.

1.14 Professional Master Degree Course in Rural and Land Ecology Survey (RLE.3)
Objectives: Training in the survey, analysis and interpretation of vegetation and agricultural land use data for natural resource management, using remote sensing and GIS.
Type of qualification: Professional Master degree.
Duration: 1 year.
Educational requirements: B.Sc. degree in agronomy, biology, geography, environmental sciences or equivalent.
Fees: NLG 12,000.

1.15 M.Sc. Degree Course in Geoinformation for Soil Resource Management (SOL.2)
Objectives: Graduates will be able to conduct applied research in the field of natural resource management based on soil data analysis and interpretation.
Type of qualification: Master of Science degree.
Duration: 1.5 years.
Educational requirements: B.Sc. in a natural science (soil, biology, agronomy, physics, geography, etc.).
Fees: NLG 23,500.

1.16 Professional Master Degree in Soil Survey (SOL.3)
Objectives: Graduates will be able to design and carry out soil surveys, with emphasis on the use of aerospace remote sensing techniques, and to use soil survey information in multipurpose applications, with emphasis on the use of GIS.
Type of qualification: Professional Master degree.
Duration: 1 year.
Educational requirements: B.Sc. degree with a major in soil science, agricultural sciences, physical geography, biology, or equivalent.
Fees: NLG 12,000.
Wageningen Agricultural University in the Netherlands is one of the world's top education and research centres in the agricultural and environmental sciences. Its graduates are recognized internationally for the quality of their scientific training, and many scientists spend their sabbatical leave in Wageningen. Today, the 'knowledge centre' of Wageningen, which includes dozens of scientific and technological institutes surrounding the university, is looking forward to a dynamic future at the hub of European and intercontinental education and research.

Wageningen Agricultural University stresses the importance of its relations with government and commercial business.

‘A balance for a healthy future at Wageningen’

Wageningen Agricultural University offers an International Postgraduate Programme leading to the title of MSc (Master of Science), MBA (Master of Business Administration) or PhD (Doctor of Philosophy)

START PROGRAMME MSc September  MBA PART-TIME January
MBA FULL-TIME August  DURATION MSc 17 months
DURATION MBA PART-TIME 24 months  MBA FULL-TIME 17 months
REQUIREMENTS BSc, University degree or equivalent, fluency in English, working experience
ADMISSION MSc based on entrance examination
ADMISSION MBA Graduate Management Admission Test
TUITION FEES MSc NLG 6,500 - NLG 17,000  TUITION FEES MBA NLG 35,000

Objectives: To provide theory and critical training for acquiring, analysing and applying socio-economic information for development planning and environmental and natural resource management; specialisation; land-use planning; rural energy development.

Type of qualification: Master of Science degree.

Duration: 1.5 years.

Educational requirements: A good* B.Sc. degree in natural or social sciences (*‘good’ = first or upper second class degree or its equivalent).

Fees: NLG 23,500.

1.17 M.Sc. Degree Course in Socio-Economic Information for Natural Resource Management (SIG.2)

Objectives: To provide the methodological background and practical training needed to acquire and apply socio-economic information to decision-making in environmental and natural resource management (NRM).

Type of qualification: Professional Master degree.

Duration: 1 year.

Educational requirements: B.Sc. degree or equivalent in natural or social sciences.

Fees: NLG 12,000.

1.18 Professional Master Degree in Socio-Economic Information for Natural Resource Management (SIG.3)

Objectives: To provide participants with recent developments in geoinformation systems for natural resource and land management.

Type of qualification: Certificate of Attendance.

Duration: 3 weeks.

Educational requirements: Senior position in a public or a private sector related to land management.

Fees: NLG 1,000.

1.19 Information Management for Natural Resource Development (SIG.5)

Objectives: To familiarise participants with recent developments in geoinformation systems for natural resource and land management.

Type of qualification: Professional Master degree.

Duration: 1 year.

Educational requirements: B.Sc. degree in urban planning, geography, civil engineering, architecture or equivalent.

Fees: NLG 23,500.

1.20 M.Sc. Degree Course in Geoinformation for Urban Planning and Management (USH.2)

Objectives: To introduce urban planners to new methods and techniques for collecting, analysing and presenting urban data, and to increase their ability to conduct independent research.

Type of qualification: Master of Science degree.

Duration: 1.5 years.

Educational requirements: B.Sc. degree in one of the spatial urban sciences (e.g. urban or regional planning, urban geography, civil engineering, architecture) or equivalent.

Fees: NLG 23,500.

1.21 Professional Master Degree Course in Geoinformation for Urban Planning and Management (USH.3)

Objectives: To introduce urban planners to techniques for investigating sites for civil engineering projects.

Type of qualification: Professional Master degree.

Duration: 1 year.

Educational requirements: B.Sc. degree in one of the spatial urban sciences (e.g. urban or regional planning, urban geography, civil engineering, architecture) or equivalent.

Fees: NLG 12,000.

1.22 M.Sc. Degree Course in Geoinformation Systems for Urban Management Applications (GIU.2)

Objectives: To prepare urban managers for establishing and managing the operation of a geographic or land information system.

Type of qualification: Master of Science degree.

Duration: 1.5 years.

Educational requirements: B.Sc. degree in urban planning, geography, civil engineering, land management or related discipline.

Fees: NLG 23,500.

1.23 Professional Master Degree Course in Geoinformation Systems for Urban Management Applications (GIU.3)

Objectives: To prepare urban managers for establishing and managing the operation of a geographic or land information system.

Type of qualification: Professional Master degree.

Duration: 1 year.

Educational requirements: B.Sc. degree in urban planning, geography, civil engineering, land management or related discipline.

Fees: NLG 12,000.

1.24 Applied Geomorphological and Engineering Geological Survey AGS.3 Postgraduate Diploma Course (I), AGS.2 M.Sc. Degree Course (II)

Objectives: Training in the assessment of terrain with respect to its geomorphological and geological characteristics, and to natural hazards and/or environmental vulnerability, making use of aerospace data in combination with GIS.

Type of qualification: I: Postgraduate diploma; II: Master’s degree.

Duration: I: 44; II: 87 weeks.

Educational requirements: I: B.Sc. degree in geology or mining, with good marks in mathematics and physics, or B.Sc. degree in civil engineering with geology in both theory and practice.

Fees: I: NLG 10,000; II: NLG 25,500.

1.25 Engineering Geology ENG.3 Postgraduate Diploma Course (I), ENG.2 M.Sc. Degree Course (II)

Objectives: I: Practical and theoretical training for engineers in techniques for investigating sites for civil engineering projects; II: As I + training and designing, planning and supervising site investigations for civil engineering projects.

Type of qualification: I: Postgraduate diploma; II: Master’s degree.

Duration: I: 48; II: 95 weeks.

Educational requirements: I: B.Sc. degree in geology or mining, with good marks in mathematics and physics, or B.Sc. degree in civil engineering with geology in both theory and practice.

Fees: I: NLG 11,000; II: NLG 27,500.

1.26 Exploration Geophysics EXG.3 Postgraduate Diploma Course (I), EXG.2 M.Sc. Degree Course (II)

Objectives: I: Theoretical and practical training for geophysicists in the design, execution and supervision of geophysical programmes for the geological mapping, management and exploration of natural resources and for national development planning.

Type of qualification: I: Postgraduate diploma; II: Master’s degree.

Duration: I: 39; II: 91 weeks.

Educational requirements: I: B.Sc. degree in physics, mathematics, mining engineering or geology with physics and mathematics.

Fees: I: NLG 9,000; II: NLG 26,500.

1.27 Geological Survey GEO.3 Postgraduate Diploma Course (I), GEO.2 M.Sc. Degree Course (II)

Objectives: Training in the assessment of geological conditions in relation to their potential for earth resource exploration, in environmental impact assessment, and in the integration of data through the use of GIS.

Type of qualification: I: Postgraduate diploma; II: Master’s degree.

Duration: I: 48; II: 87 weeks.
Duration: I: 39: II: 78 weeks.
Type of qualification: I: Postgraduate diploma; II: Master's degree.

Objectives: Training for geologists and mining engineers in the design and execution of exploration programmes for and evaluation of mineral resources, for purposes of resource development and national development planning.
Type of qualification: I: Postgraduate diploma; II: Master’s degree.
Duration: I: 39; II: 78 weeks.
Educational requirements: B.Sc. degree in geology or mining engineering with minor in geology.
Fees: I: NLG 9,000; II: NLG 23,500.

1.29 Remote Sensing Applications for Earth Sciences
RSE.3 Postgraduate Certificate Course

Objectives: Introduction to the basic principles of remote sensing, and training in the interpretation and digital enhancement of images for the purpose of extracting information on earth resources.
Type of qualification: Certificate.
Duration: 6 weeks.
Educational requirements: B.Sc. degree in geology, geomorphology or physical geography.
Fees: NLG 2,000.

1.30 Water Resources Surveys WR.S.3 Postgraduate Diploma Course (I), WR.S.2 M.Sc. Degree Course (II)

Objectives: Training in techniques for assessing water resources that make use of remote sensing and GIS, and in methods for conducting applied research on groundwater. Specialisation: watershed management (WM) or groundwater (GW).
Type of qualification: I: Postgraduate diploma; II: Master’s degree.
Duration: I: 48; II: 87 weeks.
Educational requirements: B.Sc. degree in geology, civil engineering, for WM also agricultural engineering, hydrology, forestry, soil science, or B.A. degree in geography or a related field.
Fees: I: NLG 11,000; II: NLG 25,500.

2.01 Master Programme in River Engineering and River Basin Development

Objectives: Graduates of this programme have the up-to-date knowledge and skills needed to deal with the technical aspects of river basin development, and understand the social, economic and environmental implications of this development.
Type of qualification: Taught Master degree: additional 1/2 year for M.Sc. possible.
Duration: TM: 48 weeks; M.Sc.: 74 weeks.
Educational requirements: Degree in civil engineering or a related science.
Fees: NLG 12,000 (+ NLG 6,000 for M.Sc.).

2.02 Master Programme in Coastal Engineering and Port Development

Objectives: Graduates of this programme gain access to the Netherlands’ unique concentration of know-how in coastal hydraulic engineering, and are able to use the latest design techniques, including techniques for probabilistic design.
Type of qualification: Taught Master degree: additional 1/2 year for M.Sc. possible.
Duration: TM: 48 weeks; M.Sc.: 48 weeks.
Educational requirements: Degree in civil engineering or a related science from a recognized institution.
Fees: NLG 12,000 (+ NLG 6,000 for M.Sc.).

2.03 Master Programme in Land and Water Development

Objectives: The LWD engineer can develop and manage irrigation and drainage systems, land reclamation and water resources, primarily for agricultural purposes.
Type of qualification: Taught Master degree: additional 1/2 year for M.Sc. possible.
Duration: TM: 48 weeks; M.Sc.: 74 weeks.
Educational requirements: Degree in civil or agricultural engineering or a related science from a recognized institution.
Fees: NLG 12,000 (+ NLG 6,000 for M.Sc.).

2.04 Master Programme in Hydroinformatics

Objectives: Engineers and hydroscientists are trained to develop and use advanced modelling tools and computer-based decision-support systems for solving engineering and management problems in river and maritime hydraulics.
Type of qualification: Taught Master degree: additional 1/2 year for M.Sc. possible.
Duration: TM: 48 weeks; M.Sc.: 74 weeks.
Educational requirements: Degree in civil engineering or a related science from a recognized institution.
Fees: NLG 12,000 (+ NLG 6,000 for M.Sc.).

2.05 Master Programme in Hydrology

Objectives: Engineers specialised in surface or ground-water are able to analyse (geo)hydrological data and processes, integrate environmental aspects into water resources/ground-water management, use mathematical models and develop (geo)hydrological design criteria.
Type of qualification: Taught Master degree: additional 1/2 year for M.Sc. possible.
Duration: TM: 48 weeks; M.Sc.: 74 weeks.
Educational requirements: Degree in civil engineering, or hydrology with an engineering background.
Fees: NLG 12,000 (+ NLG 6,000 for M.Sc.).

2.06 Master Programme in Sanitary Engineering

Objectives: Sanitary engineers become professionals who know how to combine theoretical concepts of basic subjects with engineering practice, and to integrate them into master planning.
Type of qualification: Taught Master degree: additional 1/2 year for M.Sc. possible.
Duration: TM: 48 weeks; M.Sc.: 74 weeks.
Educational requirements: Degree in civil, sanitary, mechanical or chemical engineering.
Fees: NLG 12,000 (+ NLG 6,000 for M.Sc.).

2.07 Master Programme in Water and Environmental Resources Management

Objectives: Professionals are educated to work in a multidisciplinary environment (which brings together hydrology, environmental
science, water resources (quality, engineering, planning and management) and receive solid training in their discipline.

**Type of qualification:** Taught Master degree; additional 1/2 year for M.Sc. possible.

**Duration:** TM: 48 weeks; M.Sc.: 74 weeks.

**Educational requirements:** Degree in civil, agricultural or chemical engineering; chemistry, biology, hydrology, physical geography, natural resources.

**Fees:** NLG 12,000 (+ NLG 6,000 for M.Sc.).

---

**2.08 Master Programme in Transportation and Road Engineering for Development**

**Objectives:** Mid-career professionals are provided with the knowledge and skills necessary for the planning, design, management and operation of highway and road systems, and transportation networks.

**Type of qualification:** Taught Master degree; additional 1/2 year for M.Sc. possible.

**Duration:** TM: 48 weeks; M.Sc.: 74 weeks.

**Educational requirements:** Degree in civil, agricultural or chemical engineering, preferably with a specialisation in road/transportation engineering.

**Fees:** NLG 12,000 (+ NLG 6,000 for M.Sc.).

---

**2.09 Master Programme in Environmental Science and Technology**

**Objectives:** An integrated programme covering a wide range of fields related to environmental management makes environmentalists, technologists, engineers and decision-makers better able to work together at the regional or national level.

**Type of qualification:** Taught Master degree; additional 1/2 year for M.Sc. possible.

**Duration:** TM: 48 weeks; M.Sc.: 74 weeks.

**Educational requirements:** Degree in civil, sanitary, mechanical or agricultural engineering or chemistry, with a specialisation in related fields related to environmental and sanitary engineering.

**Fees:** NLG 12,000 (+ NLG 6,000 for M.Sc.).

---

**2.10 International Seminar on Port Management**

**Objectives:** Port directors, terminal managers, freight forwarders and policy-makers have an overview of the organisational and managerial aspects of modern ports and are exposed to new developments in the rapidly changing world of modern port and transport industry.

**Type of qualification:** Certificate of Attendance.

**Duration:** 6 weeks.

**Educational requirements:** Open to port officials with a degree or equivalent experience.

**Fees:** NLG 5,500.

---

**2.11 International Course in Integrated Coastal Zone Management (CZM)**

**Objectives:** Decision-makers and officials in the field of coastal management are provided with a comprehensive survey of the latest developments.

**Type of qualification:** Certificate of Attendance.

**Duration:** 2 weeks.

**Educational requirements:** A relevant university degree or work experience.

**Fees:** On request.

---

**2.12 International Course in Anaerobic Waste Water Treatment**

**Objectives:** Through a comprehensive programme, participants learn to select up-to-date technologies and supervise the design, construction and operation of anaerobic waste treatment installations.

**Type of qualification:** Certificate of Attendance.

**Duration:** 31/2 weeks.

**Educational requirements:** Degree in biology, chemistry, chemical, civil and environmental engineering and related fields.

**Fees:** NLG 5,500.

---

**2.13 International Course in Low-Cost Water Supply and Sanitation**

**Objectives:** Practising professionals in water supply and sanitation are equipped with skills for working with low-cost, people-centred engineering for rural and peri-urban areas.

**Type of qualification:** Certificate of Attendance.

**Duration:** 8 weeks.

**Educational requirements:** Degree in civil, sanitary, mechanical or chemical engineering.

**Fees:** NLG 5,500.

---

**2.14 Polder Development**

**Objectives:** Senior civil/agricultural engineers are able to design and prepare action plans for water management systems/schemes, to write proposals, and to understand the socio-economic and environmental aspects of lowland development.

**Type of qualification:** Certificate of Attendance.

**Duration:** 3 weeks.

**Educational requirements:** Degree in civil engineering or a related science.

**Fees:** NLG 5,500.

---

**2.15 Service Oriented Management of Irrigation Systems**

**Objectives:** Participants are offered a comprehensive view of the various aspects of irrigation system management and the process of selecting alternative options (technical and managerial) to improve system performance.

**Type of qualification:** Certificate of Attendance.

**Duration:** 31/2 weeks.

**Educational requirements:** Degree in civil or agricultural engineering.

**Fees:** NLG 7,500.

---

**2.16 International Course in Water Quality Management for Decision-Makers**

**Objectives:** Water management officials understand how the management of water quality in river and lake basins requires the integration of scientific and managerial aspects, and are capable of applying this understanding.

**Type of qualification:** Certificate of Attendance.

**Duration:** 7 weeks.

**Educational requirements:** B.Sc. degree in chemistry, biology, chemical, civil and environmental engineering and related fields.

**Fees:** NLG 5,500.

---

**2.17 International Course in Environmental Resource Management and Impact Assessment**

**Objectives:** Participants learn to integrate the approaches of research, planning and implementation, and are thus provided with a sound basis for a career in environmental resource management.

**Type of qualification:** Certificate of Attendance.

**Duration:** 8 weeks.

**Educational requirements:** Degree in biology, chemistry, chemical engineering or a related science.

**Fees:** NLG 5,500.
2.18 Integrated Water Resources Management
Objectives: Graduates are aware of the latest developments and prepared to face the most challenging questions in WRM. They have broadened their technical knowledge and can apply new concepts and tools to policy development and the formulation/analysis of strategy.
Type of qualification: Certificate of Attendance.
Duration: 4½ weeks.
Educational requirements: B.Sc. level.
Fees: NLG 7,000.

2.19 Commercial and Financial Management of Water Utilities
Objectives: Participants have been introduced to institutional and financial reform, are conversant with requirements for sound C&F management and the operation of water utilities. They are motivated to promote change in their job. They have made a plan to improve their work.
Type of qualification: Certificate of Attendance.
Duration: 4 weeks.
Educational requirements: B.Sc. level.
Fees: NLG 17,000.

3.01 Environmental Sanitation Activities in Rural and Low-Income Urban Areas
Objectives: Programme leaders and staff who plan and manage household sanitation activities in rural and low-income urban areas have improved the skills needed to develop, implement and manage a plan to promote improved environmental sanitation.
Type of qualification: Certificate of Attendance.
Duration: 2 weeks.
Educational requirements: Completed higher education in a relevant discipline.
Fees: NLG 4,500.

3.02 Monitoring for Effectiveness in Water Supply and Sanitation Activities
Objectives: Project leaders and staff working in the water and environmental sanitation programmes have enhanced their capacity to plan and implement monitoring activities which work to improve performance over the short term.
Type of qualification: Certificate of Attendance.
Duration: 2 weeks + 1 week optional.
Educational requirements: Completed higher education in a relevant discipline.
Fees: NLG 4,500 (2 weeks) + 1,700 (for optional week).

3.03 Hygiene Education and Promotion: Planning and Management for Behavioural Change
Objectives: Staff who plan and manage activities that promote hygiene in water supply and sanitation programmes have improved the skills needed to effectively develop, implement and manage a hygiene-promotion component.
Type of qualification: Certificate of Attendance.
Duration: 3 weeks.

4.01 International Master's Programme, Master of Environmental Science
Objectives: Graduates are able to work in internationally operating organizations, consultancies and industries, tackling environmental problems with an integrated approach in a multi- and interdisciplinary manner.
Type of qualification: Master's degree.
Duration: 1 year.
Educational requirements: Bachelor's degree (or comparable), with a major in environmental science, biology, ecology, agriculture, forestry or another scientific or technical discipline.
Fees: NLG 3,000.

4.02 International Master's Programme, Master of Environmental Technology
Objectives: The master of environmental technology is able to set up a master plan for large-scale monitoring and improvement of environmental quality. He/she will find a place with internationally operating consultants/funding institutions such as EU. World Bank.
Type of qualification: Master's degree.
Duration: 1 year.
Educational requirements: Bachelor's degree (or comparable), with a major in environmental technology, biology, ecology, agriculture, forestry or another scientific or technical discipline.
Fees: NLG 3,000.

4.03 International Master's Programme, Master of Urban and Regional Planning
Objectives: The interdisciplinary urban/regional planner in Europe, focused on practice, research or design, and working in the private/public sector, has to deal with European policies, finance, networks, physical relations, and the role of the European Commission.
Type of qualification: Master's degree.
Duration: 1 year.
Educational requirements: Bachelor's degree (or comparable), with a major in environmental science, urban/regional planning, geography, agriculture, forestry or another scientific or technical discipline.
Fees: NLG 3,000.

4.04 International Master's Programme, Master of Environmental Management in European Rural Areas
Objectives: Many environmental issues transcend national frontiers and require a common response. There is a growing awareness of the need for a broader European dimension in the environmental protection and management of rural areas.
Type of qualification: Master's degree.
Duration: 1 year.
Educational requirements: Bachelor's degree (or comparable), with a major in environmental science, biology, ecology, agriculture, forestry or another scientific or technical discipline.
Fees: NLG 2,000.

5.01 Training Course on Energy Management & Cleaner Production in Small & Medium Scale Industries

Objectives: Participants are able to analyse the role of energy in production processes, the possible sources of energy, consequences and environmental impacts of fuel and technology use, to make efficient use of energy, to formulate policy options and strategies.
Type of qualification: Certificate of Attendance.
Duration: 5 weeks.
Educational requirements: B.Sc. degree or equivalent in a relevant subject.
Fees: NLG 10,000; NLG 7,500 for local sponsors.

5.02 Training Workshops on Energy & Environment for Sustainable Development

Objectives: To provide participants with a survey of recent developments and practical training.
Type of qualification: Certificate of Attendance.
Duration: 5 weeks.
Educational requirements: B.Sc. or M.Sc. or equivalent degree in a relevant field of study.
Fees: NLG 7,500.

University of Twente / Faculty of Applied Mathematics

Fax +31 (0)53 489 48 88
Email msc@math.utwente.nl

6.01 Master of Science in Engineering Mathematics

Objectives: Graduates in mathematics or engineering and professionals are able to improve their proficiency in modern applied mathematics and mathematical modelling.
Type of qualification: Master's degree.
Duration: 2 years.
Educational requirements: B.Sc. in mathematics or engineering, or equivalent qualification.
Fees: NLG 20,000.

Utrecht University / Research Institute of Toxicology (RITOX)

P.O. Box 80176
3408 TD Utrecht

Fax +31 (0)30 253 50 77
Email kroes@ritox.dgk.ruu.nl

7.01 Risk Assessment and Risk Management of Chemicals

Objectives: Participants possess the fundamental (eco)toxicological knowledge needed to carry out research: they understand the general principles of risk management as it pertains to chemicals: and they are able independently to perform routine risk assessments.
Type of qualification: I: 1 year; Diploma/II: 1 1/2 years: Master of Science.
Duration: I: 1 year; II: 1 1/2 years.
Educational requirements: Completed university degree (M.Sc. level) or proven experience in: biology, chemistry, pharmacology, medicine or veterinary science.
Fees: NLG 40,000.

Universiteit van Amsterdam / ACCESS

8.01 M.Sc. Programme in Science and Technology Studies

Objectives: Graduates of this interdisciplinary programme have learned to examine current issues in science and technology using insights from sociology, philosophy, the history of science, anthropology and political science.
Type of qualification: Master of Science degree.
Duration: 42-66 weeks.
Educational requirements: Bachelor's degree or equivalent with special requirements.
Fees: NLG 10,500 per year/4,500 1st/3,000 next periods.

Maastricht University / Faculty of Arts and Culture

P.O. Box 616

9.01 Problems of Society, Science and Technology in Europe

Objectives: Researchers and students interested in technological change and innovation learn to develop informational resources, analytical skills and conceptual frameworks, and to apply these to the study of innovation, ethical issues and modern societies.
Type of qualification: Master's degree (full course); Diploma (1st sem.).
Duration: 62 weeks.
Educational requirements: Bachelor's degree in any field.
Fees: NLG 15,000 (full course); 8,000 (1st sem.).

13.21 Master of Science Programme in Technical Mathematics

Objectives: Graduates of this top-level university programme in engineering, which is offered in an international context, possess thorough technical knowledge, practical skills, and are able to work in a multidisciplinary environment.

Type of qualification: Master of Science degree.

Duration: 2 years.

Educational requirements: B.Sc. degree in mathematics from an accredited university of technology with excellent results.

Fees: NLG 8,500 per year.

13.22 Master of Science Programme in Technical Informatics

Objectives: Graduates of this top-level university programme in engineering, which is offered in an international context, possess thorough technical knowledge, practical skills, and are able to work in a multidisciplinary environment.

Type of qualification: Master of Science degree.

Duration: 2 years.

Educational requirements: B.Sc. degree in informatics from an accredited university of technology with excellent results.

Fees: NLG 8,500 per year.

13.41 European Mining Course

Objectives: Participants acquire in-depth knowledge of advanced mining subjects through 4 course periods of 7 weeks each at 4 leading European universities (in the Netherlands, Finland, England and Germany).

Type of qualification: Postgraduate diploma/with thesis: Master's degree.

Duration: 28 weeks.

Educational requirements: B.Sc. level or equivalent in mining engineering.

Fees: NLG 45,000.

13.51 Master of Space Systems Engineering

Objectives: Engineers working in the aerospace field acquire a specialisation in space systems.

Type of qualification: Certified University Master's degree.

Duration: 12 weeks.

Educational requirements: University degree in engineering or physics.

Fees: NLG 62,000.

Institute for Biotechnology Studies Delft / Leiden

13.61 Advanced Course on Microbial Physiology and Fermentation Technology

Objectives: To familiarise biotechnologists with the integrated interdisciplinary approach required to provide a link between the fundamental and technical aspects of large-scale processes in modern industrial biotechnology.

Type of qualification: Certificate.

Duration: 2 weeks.

Educational requirements: M.Sc. degree or equivalent.

Fees: NLG 7,000-8,000 (for Ph.D. students NLG 3,500).

13.62 Postgraduate Biotechnology Study

Objectives: Multidisciplinary theoretical and practical training to prepare science graduates for careers in the biotechnology industry.
Type of qualification: Master of Biotechnology degree.
Duration: 2 years.
Educational requirements: M.Sc. degree or equivalent.
Fees: NLG 40,000.

Email training centre@ptf.hwb.nl

14.01 Master of Science in Biotechnology
Objectives: Participants are prepared for independent research positions in the agriculture, food, health and environmental protection industries as well as in academic research centres throughout the world.
Type of qualification: Master’s degree.
Duration: 1 year.
Educational requirements: B.Sc. in biological sciences, biotechnology, biochemistry, chemistry or combined sciences, or an equivalent level through work experience.
Fees: NLG 19,500.

Graduate School BioCentrum
Amsterdam

Email k.hellingwerf@chem.uva.nl

15.01 Molecular and Physiological Aspects of Oxygenic and Anoxygenic Photosynthesis
Objectives: To provide a state-of-the-art review of molecular and physiological aspects of photosynthesis in micro-organisms and plants.
Type of qualification: Certificate.
Duration: 2 weeks.
Educational requirements: M.Sc. degree or equivalent with general knowledge of biochemistry and microbiology.
Fees: NLG 1,500.

15.02 From Biological Activity to Protein to Gene: Advanced Course in Protein Purification and DNA Technology
Objectives: Participants acquire practical knowledge of modern strategies and techniques for gene isolation, manipulation and protein purification.
Type of qualification: Certificate.
Duration: 2 weeks.
Educational requirements: M.Sc. degree with general knowledge of biochemistry.
Fees: NLG 5,500.

15.03 Advanced Course in Microbial Physiology
Objectives: Participants are acquainted with advanced theories in microbial physiology, and with modern techniques for cultivation, control and measurement on laboratory and industrial scales.
Type of qualification: Certificate.
Duration: 4 weeks.
Educational requirements: M.Sc. degree, with general knowledge of biochemistry and microbiology.
Fees: NLG 2,000.

NLS - Holland Schreiner International Air Training
P.O. Box 204
6190 AE Beek
Phone +31 (0)43 364 84 84
Fax +31 (0)43 364 66 19

16.01 Airline Pilot Training Courses
Objectives: To provide inexperienced student-pilots with the knowledge, practical training and flying hours required for the Dutch licence (CAA-RLD).
Type of qualification: CAA-RLD licences and NLS certificates.
Duration: 69 weeks.
Educational requirements: Secondary education at advanced level, with mathematics and physics.
Fees: NLG 186,000.

16.02 Aircraft Type Training
Objectives: To train student-pilots in the operation and handling of twin-engined aircraft, providing them with the knowledge and practical training required for the Dutch CAA-RLD multi-engine rating.
Type of qualification: CAA-RLD rating and NLS certificates.
Duration: 4-12 weeks.
Educational requirements: Secondary education at advanced level, with mathematics and physics.
Fees: On request.

16.03 Flight Instructor Training (FIC)
Objectives: To provide licenced pilots with the knowledge and practical training required for the Dutch rating of flight instructor (CAA-RLD).
Type of qualification: CAA-RLD licences and NLS certificates.
Duration: 12 weeks.
Educational requirements: Secondary education at advanced level, with mathematics and physics.
Fees: NLG 30,000.

16.04 Synthetic Flight (Instructor) Training (SFT)
Objectives: To provide participants with the knowledge and practical training required for qualification as a synthetic flight instructor.
Type of qualification: NLS certificates.
Duration: 20 weeks.
Educational requirements: Secondary education at advanced level, with mathematics and physics.
Fees: NLG 40,000.

16.05 Flight Operations & Dispatch Training (FOO)
Objectives: To provide participants with the knowledge and skills required for dispatching flights over short, medium-range and long-range routes.
Type of qualification: NLS certificates.
Duration: 7 weeks.
Educational requirements: Secondary education at advanced level, with mathematics and physics.
Fees: NLG 15,000.
b) Agricultural and related sciences

Wageningen Agricultural University / Dean's Office for International Students

P.O. Box 453
6700 AL Wageningen
Phone +31 (0)317 48 26 80/48 36 18
Fax +31 (0)317 -48 44 64
Email jeanine.hermans@doffs.sz.wau.nl

17.01 M.Sc. Programme in Agricultural Economics and Management
Objectives: Academic training in agricultural economics and management for graduates.
Type of qualification: Master of Science degree.
Duration: 74 weeks.
Educational requirements: B.Sc. degree in agricultural economics or related sciences.
Fees: NLG 12,000.

17.02 M.Sc. Programme in Agricultural Engineering
Objectives: Training in the design, selection and management of agricultural machinery and systems, suited to local needs, resources and socio-economic conditions.
Type of qualification: Master of Science degree.
Duration: 74 weeks.
Educational requirements: B.Sc. degree in agricultural engineering, agriculture, engineering or a related science. Entrance examination in home country.
Fees: NLG 8,000 (EU); NLG 14,500 (non-EU).

17.03 M.Sc. Programme in Animal Science
Objectives: Advanced training in developing the academic and analytical skills and the critical attitude needed for the development of animal science in participants' home countries.
Type of qualification: Master of Science degree.
Duration: 74 weeks.
Educational requirements: B.Sc. degree in agriculture, animal science, veterinary science or a related science.
Fees: NLG 8,000 (EU); NLG 14,500 (non-EU).

17.04 M.Sc. Programme in Aquaculture
Objectives: Advanced academic and practical training for the development of aquaculture and fisheries in participants' home countries.
Type of qualification: Master of Science degree.
Duration: 74 weeks.
Educational requirements: B.Sc. degree in biology, fisheries, agriculture, animal science or a related science.
Fees: NLG 8,000 (EU); NLG 14,500 (non-EU).

17.05 M.Sc. Programme in Biotechnology
Objectives: Academic training in biotechnology for young graduates and researchers.
Type of qualification: Master of Science degree.
Duration: 74 weeks.
Educational requirements: B.Sc. degree in chemistry, biology or another related science.
Fees: NLG 6,500 (EU); NLG 13,000 (non-EU).

17.06 M.Sc. Programme in Crop Science
Objectives: Postgraduate training in one of four specialisations: crop breeding, production ecology, integrated pest management or greenhouse horticulture.
Type of qualification: Master of Science degree.
Duration: 74 weeks.
Educational requirements: B.Sc. degree in agriculture or a related science.
Fees: NLG 6,500 (EU); NLG 13,000 (non-EU).

17.07 M.Sc. Programme in Ecological Agriculture
Objectives: Academic training in the establishment and development of sustainable agricultural systems.
Type of qualification: Master of Science degree.
Duration: 74 weeks.
Educational requirements: B.Sc. degree in agriculture or a related science.
Fees: NLG 10,500 (EU); NLG 17,000 (non-EU).

17.08 M.Sc. Programme in Environmental Sciences
Objectives: Academic training in specialisations of environmental science (protection, health, technology or management), for young graduates, researchers, lecturers, project managers, extension workers and civil servants.
Type of qualification: Master of Science degree.
Duration: 74 weeks.
Educational requirements: B.Sc. degree in environmental, agricultural or a related science.
Fees: NLG 10,500 (EU); NLG 17,000 (non-EU).

17.09 M.Sc. Programme in Geographic Information Systems for Rural Applications (in cooperation with ITC Enschede)
Objectives: Participants have acquired the academic knowledge and skills needed to design, implement and maintain GIS systems for natural resource management.
Type of qualification: Master of Science degree.
Duration: 74 weeks.
Educational requirements: B.Sc. degree, preferably in geography, rural planning, soil and water conservation or a related science.
Fees: On request.

17.10 M.Sc. Programme in the Management of Agricultural Knowledge Systems
Objectives: Academic training in agricultural extension and education and rural development, for managers, researchers, lecturers and policy-makers.
Type of qualification: Master of Science degree.
Duration: 74 weeks.
Educational requirements: B.Sc. degree in agriculture or a related science.
Fees: NLG 10,500 (EU); NLG 17,000 (non-EU).

17.11 M.Sc. Programme in Soil and Water
Objectives: Academic training in agricultural sciences, for young graduates, researchers, teaching staff, project executives and extension workers.
Type of qualification: Master of Science degree.
Duration: 74 weeks.
Educational requirements: B.Sc. or M.Sc. degree in agriculture or a related science.
Fees: NLG 10,500 (EU); NLG 17,000 (non-EU).

17.12 M.Sc. Programme in Tropical Forestry

Objectives: Academic training in tropical forestry for policy-makers, managers, researchers and lecturers.
Type of qualification: Master's degree.
Duration: 74 weeks.
Educational requirements: B.Sc. degree in forestry or a related science.
Fees: NLG 10,500 (EU); NLG 17,000 (non-EU).

Wageningen Agricultural University / Department of Fish Culture and Fisheries

P.O. Box 338
6700 AH Wageningen
Phone +31 (0)317 48 33 07/48 35 10
Fax +31 (0)317 48 39 37
Email office@alg.venv.wau.nl

17.21 International Course on Fish Larvae Nutrition

Objectives: To provide postgraduate students, junior scientists and hatchery managers with a comprehensive view of the biological basis of fish larvae nutrition.
Type of qualification: Certificate of Attendance/ transcript acad. Records.
Duration: 2 weeks.
Educational requirements: B.Sc. in biology, animal sciences, aquaculture, fisheries or equivalent.
Fees: NLG 750.

International Agricultural Centre (IAC)

P.O. Box 88
6700 AB Wageningen
Phone +31 (0)317 49 01 11
Fax +31 (0)317 41 85 52
Email iac@iac.agro.nl

18.01 International Course on Data Handling for Tropical Fisheries Management

Objectives: Training in collecting data at landing sites, estimating ratios of catch to effort, and processing data.
Type of qualification: Certificate of Attendance.
Duration: 6 weeks.
Educational requirements: B.Sc. degree or equivalent in biology.
Fees: NLG 4,500.

18.02 International Course on Food and Nutrition - Food and Nutrition security: caring for women and children

Objectives: Participants are able to identify problems of food and nutrition security at community level and have adequate knowledge and skills to formulate, implement and evaluate programmatic activities directed at alleviating such problems.
Type of qualification: Postgraduate diploma.
Duration: 22 weeks.
Educational requirements: B.Sc. degree or equivalent in nutrition, food technology, home economics, medicine or related science.
Fees: NLG 6,500.

18.03 Cours international de vulgarisation rurale (course given in French)

Objectives: Training for middle- and upper-level extension managers in methods and strategies that make extension a more effective instrument for rural development.
Type of qualification: Certificate of Attendance.
Duration: I: 4; II: 6 weeks.
Educational requirements: B.Sc. degree or equivalent in extension or a related science.
Fees: I: NLG 5,000; II: NLG 9,000.

18.04 International Course on Applied Plant Breeding

Objectives: Participants learn to plan, initiate and supervise the breeding process in a technical, institutional and socio-economic context, taking account of new developments and techniques in plant breeding.
Type of qualification: Certificate of Attendance and/or Diploma.
Duration: 15 weeks.
Educational requirements: B.Sc. degree in agriculture, plant breeding or related science plus knowledge of genetics and statistics.
Fees: NLG 5,500.

18.05 International Course on Integrated Pest Management (IPM): Strategies to Control Diseases and Insect Pests

Objectives: To broaden participants' views on plant protection and its role in plant production, to strengthen their knowledge and skills in plant protection methods with emphasis on IPM, and to teach them to use IPM in their own work.
Type of qualification: Certificate of Attendance.
Duration: 15 weeks.
Educational requirements: B.Sc. degree or equivalent in agriculture or biology.
Fees: NLG 5,500.

18.06 International Potato Course: Production, Storage and Seed Technology

Objectives: To train professionals in methods for producing, storing and propagating potatoes with special attention for adaptation to local conditions in developing countries.
Type of qualification: Certificate of Attendance.
Duration: 14 weeks.
Educational requirements: B.Sc. degree or equivalent in agriculture.
Fees: NLG 5,500.

18.07 International Course on Seed Production and Seed Technology

Objectives: Specialised training for seed agronomists and seed technologists from developing countries.
Type of qualification: Certificate of Attendance.
Duration: 14 weeks.
Educational requirements: B.Sc. degree or equivalent in agriculture.
Fees: NLG 5,500.

18.08 Stage sur les Plants de Pomme de Terre (course given in French)

Objectives: To acquaint participants with the latest theory and practice related to seed potato production systems.
Type of qualification: Certificate of Attendance.
Duration: 3 weeks.
Educational requirements: B.Sc. degree or equivalent in agriculture.
Fees: NLG 3,750.
18.09 International Course on Extension Management

Objectives: Participants have increased their understanding of the tasks and role of extension managers, their capacity to analyse and solve problems, and their motivation to explore management alternatives.

Type of qualification: Certificate of Attendance.
Duration: 6 weeks
Educational requirements: B.Sc. degree or equivalent in extension or related science.
Fees: NLG 5,500.

18.10 International Course on Vegetable Production

Objectives: To extend and deepen participants' knowledge of vegetable production, acquaint them with Dutch methods of producing and marketing vegetables, and enable them to study issues and crops of particular relevance to their work in their own countries.

Type of qualification: Certificate of Attendance.
Duration: 14 weeks
Educational requirements: B.Sc. degree or equivalent in agriculture, vegetable production or horticulture.
Fees: NLG 5,500.

18.11 International Course on Food Processing: Quality Assurance and Marketing in Food Processing Enterprises

Objectives: To broaden participants' views on issues of food processing, to increase their ability to analyse problems and select appropriate technology, and to teach them techniques for implementing technologies, focusing on QA and marketing.

Type of qualification: Certificate of Achievement.
Duration: 14 weeks
Educational requirements: B.Sc. degree in food technology, food engineering, related agricultural sciences, or equivalent background acquired through alternative training and experience.
Fees: NLG 6,500.

18.12 International Course on Dairy Farming in Rural Development

Objectives: To update the knowledge of participants regarding recent developments in dairy farming in developing countries.

Type of qualification: Certificate of Attendance.
Duration: 14 weeks
Educational requirements: B.Sc. degree or equivalent in agricultural or veterinary sciences, dairy cattle husbandry or related sciences.
Fees: NLG 5,500.

18.13 International Course on Nutrient Management for Sustainable Agriculture

Objectives: To update the knowledge and improve the managerial skills of staff involved in policy formulation and planning, and in the management of soil resources and plant nutrient programmes.

Type of qualification: Certificate of Attendance.
Duration: 4 weeks
Educational requirements: B.Sc. degree or equivalent in agriculture.
Fees: NLG 4,500.

18.14 International Course on Local Level Management of Trees and Forests for Sustainable Land Use

Objectives: To provide the information, the wider viewpoints and the tools required to conceptualise, plan and evaluate forestry in rural development projects.

Type of qualification: Certificate of Attendance.
Duration: 15 weeks
Educational requirements: M.Sc. degree (preferred) or B.Sc. degree (or equivalent) in forestry, agricultural or social sciences.
Fees: NLG 5,500.

18.15 International Course on Protected Cultivation

Objectives: To extend and deepen participants' theoretical and technical knowledge of protected crop production in a technical and economic context, for optimising the use of greenhouses and/or polyhouses.

Type of qualification: Certificate of Attendance.
Duration: 4 weeks
Educational requirements: B.Sc. degree or equivalent in agriculture, or any other proof that the candidate masters the basics of horticulture.
Fees: NLG 6,000.

18.16 International Course on Food and Nutrition Programme Management

Objectives: Programme officers (both government and NGO) enhance their ability to manage programmes and projects directed at improving the food security and nutrition situation of population groups, with due consideration for local constraints.

Type of qualification: Certificate of Attendance.
Duration: 6 weeks
Educational requirements: B.Sc. degree or equivalent in food and nutrition, health, medicine, agriculture, education or social sciences (including economics and planning).
Fees: NLG 4,500.

18.17 International Postgraduate Course on Soil and Plant Analysis and Data Handling

Objectives: Practical training to improve laboratory performance and management.

Type of qualification: Certificate.
Duration: 9 weeks
Educational requirements: B.Sc. degree or equivalent in agriculture, biology or chemistry.
Fees: NLG 10,000.

18.18 International Course on Gender in Policy Development for Sustainable Land Use

Objectives: Participants are better able to develop policies with an appropriate balance of consideration for sustainable land use and gender issues, and are motivated to take these issues to heart.

Type of qualification: Certificate of Attendance.
Duration: 2 weeks
Educational requirements: M.Sc. degree or equivalent.
Fees: NLG 5,500.

18.19 International Course on Agrodiversity: Biodiversity and Environmental Variation for Agrosystems

Objectives: Participants increase their knowledge and understanding of agrodiversity concepts, and their ability to value and utilize agrodiversity for problem analysis and research design in agriculture.

Type of qualification: Certificate of Attendance.
Duration: 2 weeks
Educational requirements: M.Sc. degree or equivalent in agriculture.
Fees: NLG 5,500.

18.20 International Course on Strategic Environmental Assessment: A Framework for Sustainable Land Use Planning

Objectives: Participants learn methods and strategies to be used in
analytical and holistic frameworks for solving environmental problems.

18.21 International Course on Technology for Ecological Agriculture

Objectives: Participants acquire knowledge and awareness of the principles and technologies of ecological agriculture, and the design of sustainable agricultural systems, and of the possibilities and constraints of ecological agricultural technology.

Type of qualification: Certificate of Attendance.

Duration: 2 weeks.

Educational requirements: M.Sc. degree or equivalent (e.g. B.Sc. with approx. 7 years of relevant experience).

Fees: NLG 5,500.

18.22 Environmental Economics: Tools for Policy Analysis in Rural Development

Objectives: Students learn to incorporate environmental impact assessment into economic analyses, methodologies for integrating environmental economics into rural development policy/programme design, and skills to design environmental policy tools.

Type of qualification: Certificate of Attendance.

Duration: 2 weeks.

Educational requirements: Preferably M.Sc. or comparable degree.

Fees: NLG 5,200.

RIZA Institute for Inland Water Management and Waste Water Treatment/Min. of Transport, Public Works & Water Management

P.O. Box 17
8200 AA Lelystad
Phone +31 (0)320 29 83 46
Fax +31 (0)320 29 83 39
Email b.ottow@riz.rws.minvenw.nl

19.01 International Course on Wetland Management

Objectives: Managers of wetlands will increase their knowledge and improve the skills they need for drawing up and implementing a concise wetland management plan. This includes insight into ecological and socio-economic processes.

Type of qualification: Certificate of Attendance.

Duration: 6 weeks.

Educational requirements: B.Sc. or equivalent academic degree in biology or related field.

Fees: NLG 8,500.

International Centre for Development Oriented Research in Agriculture (ICRA)

P.O. Box 88
6700 AB Wageningen
Phone +31 (0)317 42 29 38
Fax +31 (0)317 42 70 46
Email icra@iac.agro.nl

20.01 Development-oriented Research in Agriculture

Objectives: To enable agricultural scientists to work in multidisciplinary teams on the diagnosis of agricultural change and the formulation of research programmes, in consultation with farmers, extensionists and policy-makers.

Type of qualification: Certificate of Attendance.

Duration: 27 weeks.

Educational requirements: M.Sc. or Ph.D. degree in agriculture or related science.

Fees: NLG 54,000.

International Institute for Land Reclamation and Improvement (ILRI)

P.O. Box 45
6700 AA Wageningen
Phone +31 (0)317 49 01 44
Fax +31 (0)317 41 71 87
Email ilri@ilri.nl

21.01 International Course on Land Drainage

Objectives: To increase participants' insight into the physical and agricultural principles underlying land drainage and into the interdisciplinary planning of land drainage projects. Mid-career course for professionals engaged in planning/design/research/education.

Type of qualification: Certificate.

Duration: 15 weeks.

Educational requirements: B.Sc. degree in agricultural engineering, civil engineering, hydrology or related field with a good background in mathematics and physics.

Fees: NLG 6,000.

21.02 International Course on Microcomputer Applications in Land Drainage

Objectives: Survey of computer programs relevant for land drainage, with special reference to subsurface drainage.

Type of qualification: Certificate.

Duration: 3 weeks.

Educational requirements: University degree in agricultural engineering or equivalent.

Fees: NLG 6,000.

21.03 International Course on Computer Applications in Irrigation

Objectives: To familiarise participants with computer software which has been developed for various aspects of irrigation.

Type of qualification: Certificate.

Duration: 4 weeks.

Educational requirements: University degree in agricultural engineering or equivalent.

Fees: NLG 8,000.
21.04 International Course on Drainage Execution and Maintenance

Objectives: Technical staff of governmental, public and private organizations learn to coordinate and supervise the installation, operation and maintenance of surface and sub-surface drainage systems.

Type of qualification: Certificate of Attendance.

Duration: 5 weeks.

Educational requirements: B.Sc. in civil or agricultural engineering.

Fees: NLG 8.000.

22.01 Environmental Technology and Protection Programme

Objectives: Graduates are able to investigate environmental protection and technology issues. They are able to approach and solve problems from an international perspective and can function in an international team.

Type of qualification: Bachelor of Science / Certificate of Attendance.

Duration: Min. 8/max. 40 weeks.

Educational requirements: At least in the second year of academic studies in natural science.

Fees: Programme: NLG 2.600; each module: NLG 1.500.

22.02 Environmental Policy and Management Programme

Objectives: Graduates are able to investigate environmental policy and management issues. They are able to approach and solve problems from an international perspective and can function in an international team.

Type of qualification: Bachelor of Science / Certificate of Attendance.

Duration: Min. 8/max. 40 weeks.

Educational requirements: At least in the second year of academic studies in natural science.

Fees: Programme: NLG 2.600; each module: NLG 1.500.

22.03 Nature and Wildlife Management Programme

Objectives: Graduates are able to investigate nature and wildlife management issues. They are able to approach and solve problems from an international perspective and can function in an international team.

Type of qualification: Bachelor of Science / Certificate of Attendance.

Duration: Min. 8/max. 24 weeks.

Educational requirements: At least in the second year of academic studies in natural science.

Fees: Programme: NLG 2.600; each module: NLG 1.500.

Larenstein International Agricultural College, Deventer (LIAC)

P.O. Box 7
7400 AA Deventer

Phone +31 (0)570 68 46 00
Fax +31 (0)570 68 46 08
Email io@iahdev.agro.nl

23.01 International Course on Training in Rural Extension and Teaching

Objectives: Trainers of extension staff and rural development workers are able to develop training programmes in the field of extension education and management in relation to rural development.

Type of qualification: (Postgraduate) diploma; Bachelor of Science degree.

Duration: 42 weeks.

Educational requirements: Diploma or B.Sc. degree in agricultural science.

Fees: NLG 12.225.

23.02 International Course on Farm Mechanisation

Objectives: Professionals engaged in farm mechanisation as trainers, managers or providers of extension services are able to select proper equipment for different farming systems; to manage/repair this equipment, and to design/manufacture new equipment and tools.

Type of qualification: (Postgraduate) diploma; Bachelor of Science degree.

Duration: 42 weeks.

Educational requirements: Diploma or B.Sc. degree in agricultural science or engineering.

Fees: NLG 11.900.

23.03 International Course on Tropical Animal Production

Objectives: Professionals engaged in animal production as trainers, managers or providers of extension services are able to identify problems, to evaluate options for solutions and improvements, and to act as agents of change.

Type of qualification: I. Diploma; II. Degree.

Duration: 42 weeks.

Educational requirements: Diploma or B.Sc. degree in agricultural science, animal production, veterinary science or related studies.

Fees: NLG 11.950.

23.04 International Course on Women, Extension Workers and Agriculture

Objectives: Professionals engaged in home economics, nutrition or primary health care extension are able to develop strategies for implementation of programmes taking into account the role of women, and to assess and promote small-scale agricultural projects.

Type of qualification: (Postgraduate) diploma; Bachelor of Science degree.

Duration: 42 weeks.

Educational requirements: Diploma or B.Sc. degree in home economics, nutrition, primary health care or one of the social sciences.

Fees: NLG 11.175.

23.05 International Agri-Food Production & Marketing

Objectives: Graduates, who will work in agricultural business, are able to manage production processes and practise quality control; and to coordinate plant activities and the distribution and sale of products.
Type of qualification: Bachelor of Science (honours) degree.
Duration: 2 years.
Educational requirements: First two years completed of B.Sc. course in agriculture or agrifood.
Fees: NLG 2,575 per year.

23.06 Master of Science Course in International Agriculture

Objectives: Students with an agricultural background are prepared for future management positions in international agribusiness or the agro-related public sector.
Type of qualification: Master of Science degree.
Duration: 62 weeks.
Educational requirements: B.Sc. degree in agriculture, rural development or related studies.
Fees: NLG 12,500.

23.07 European MBA in Food and Agribusiness

Objectives: Professionals involved in the management of international agribusiness operations are trained in decision-making as is common at different levels in the agricultural production chain in Europe.
Type of qualification: Master of Business Administration degree.
Duration: 62 weeks.
Educational requirements: B.Sc. or B.A. degree in agribusiness.
Fees: NLG 15,500.

Larenstein International Agricultural College, Velp (LIAC)

P.O. Box 9001
6880 GB Velp
Phone +31 (0)26 369 57 16
Fax +31 (0)26 361 52 87
Email gislar@iahlvlp.agro.nl

23.11 International Course in Geographical Information Systems (GIS), Remote Sensing (RS) and Global Positioning Systems (GPS)

Objectives: Practical and theoretical training for researchers, lecturers and project managers in the use of GIS, RS and GPS for the collection, processing, management and presentation of geographical information.
Type of qualification: Certificate of Attendance.
Duration: 3 weeks.
Educational requirements: B.Sc. or M.Sc. degree in geodesy, geography, forestry, agriculture, soil science, hydrology, regional planning, (landscape) ecology, environmental science, civil engineering, or similar field.
Fees: NLG 5,000.

Den Bosch Polytechnic of Applied Agriculture

P.O. Box 90108
5200 MA 's-Hertogenbosch

Fax +31 (0)73 692 36 99
Email hasdb@hasdb.agro.nl

24.01 International Module in Agricultural Trade and Environment

Objectives: To provide the knowledge and skills required to export and import agricultural products. To familiarise students with Dutch agriculture and typical Dutch products (like tomatoes and cut flowers).
Type of qualification: Certificate of Attendance.
Duration: 16 weeks.
Educational requirements: Diploma or 1-2 years of higher education in agriculture, business administration or horticulture.
Fees: NLG 5,000 (Socrates students: no fees).

Hogeschool Delft

P.O. Box 3190
2601 DD Delft

Fax +31 (0)15 215 02 99
Email lennart@bart.nl

25.01 Quality, Farm Management and Environment Related to Sustainable Animal Production Systems

Objectives: Participants are able to act under highly complex circumstances, to deal with environmental issues and the possibilities of market-oriented production, and to interpret and analyse farm data.
Type of qualification: Certificate of Attendance.
Duration: 14 weeks.
Educational requirements: Diploma or 1-4 years of higher education in animal production or agriculture.
Fees: NLG 7,500.

IPC Livestock Barneveld College, International Training Centre on Animal Husbandry and Milling Technology

P.O. Box 64
3770 AB Barneveld

Fax +31 (0)342 49 28 13
Email io@ipcdier.hacom.nl

26.01 International Course on Pig Husbandry

Objectives: Participants acquire understanding of the role which pig husbandry can play within livestock farming systems, and expertise for effectively transferring this knowledge to different target groups.
Type of qualification: Diploma.
Duration: 26 weeks.
Educational requirements: Preferably a diploma in agricultural science with a major in animal production. or equivalent, from a recognized institution.
Fees: On request.

26.02 International Course on Poultry Husbandry

Objectives: Participants acquire understanding of the role which poultry husbandry can play within livestock farming systems, and expertise for effectively transferring this knowledge to different target groups.
26.03 International Animal Feed Training Programme

Objectives: Training for professionals from developing countries to enable them to disseminate practical and theoretical knowledge of animal feed and manufacturing and to utilise locally available ingredients.

Type of qualification: Diploma.
Duration: 26 weeks.

Educational requirements: Preferably a diploma in agricultural science with a major in animal production, or its equivalent, from a recognized institution.

Fees: On request.

26.04 Modern Animal Feed Manufacturing

Objectives: Training of participants in the management of feedmills, taking into consideration all technological, nutritional, economic and administrative aspects.

Type of qualification: Certificate of Attendance.
Duration: 13 weeks.

Educational requirements: Preferably a diploma in agriculture with a major in animal production or equivalent, or at least secondary education and considerable relevant experience.

Fees: On request.

26.05 Modern Pig Farm Management

Objectives: Training in the management of a commercial pig farm, in the economic and technical analysis of production units, and in the identification of problems and the implementation of improvements.

Type of qualification: Certificate of Attendance.
Duration: 2 weeks.

Educational requirements: Preferably a diploma in agriculture with a major in animal production or equivalent, or secondary education with extensive experience in commercial pig production.

Fees: On request.

26.06 Artificial Insemination of Pigs

Objectives: After attending the course, participants are able to artificially inseminate pigs and to set up and manage an AI station for the production and distribution of boar semen.

Type of qualification: Certificate of Attendance.
Duration: 2 weeks.

Educational requirements: Agricultural and/or veterinary education (completion of secondary education is a requirement) and/or practical experience in pig husbandry.

Fees: On request.

26.07 Modern Layer Farm Management

Objectives: To provide managers of commercial poultry (layer) farms with a survey of the latest technological developments in egg production, and with skills to successfully manage a layer farm.

Type of qualification: Certificate of Attendance.
Duration: 2 weeks.

Educational requirements: Preferably a diploma (or B.Sc. degree) in animal or veterinary science, or at least secondary education and considerable relevant experience.

Fees: On request.

26.08 Modern Broiler Farm Management

Objectives: Training in the management of a commercial poultry farm for the production of broilers and/or breeders, in the economic and technical analysis of production, and in the identification of problems and the implementation of improvements.

Type of qualification: Certificate of Attendance.
Duration: 2 weeks.

Educational requirements: Preferably a diploma in agriculture with a major in animal production or equivalent, or at least secondary education and considerable relevant experience.

Fees: On request.

26.09 Modern Hatchery Management

Objectives: Participants acquire the knowledge and skills required to manage a commercial hatchery, and tools to analyse production results and to identify problems and implement improvements.

Type of qualification: Certificate of Attendance.
Duration: 2 weeks.

Educational requirements: Preferably a diploma (or B.Sc. degree) in agriculture with a major in animal production or equivalent, or at least secondary education with considerable relevant experience.

Fees: On request.

26.10 Modern Breeder Farm Management

Objectives: Participants acquire the knowledge and skills required to manage a commercial breeder farm and unit, to analyse production units technically and economically, and to identify bottlenecks.

Type of qualification: Certificate of Attendance.
Duration: 2 weeks.

Educational requirements: Preferably a diploma in agriculture with a major in animal production or equivalent, or at least secondary education and considerable relevant experience.

Fees: On request.

26.11 International Course on Dairy Husbandry and Milk Processing

Objectives: Depending on their specialisation, participants are able to either to start and manage a small-scale dairy plant; to develop, implement and monitor a local extension service; or to manage a large-scale dairy farm using modern management techniques.

Type of qualification: Diploma.
Duration: 26 weeks.

Educational requirements: Diploma or B.Sc. degree in agriculture, veterinary science or food processing.

Fees: On request.

26.12 International Course on Modern Dairy Farm Management

Objectives: Participants are able to manage large-scale dairy farms using modern management techniques, resulting in efficient milk production.

Type of qualification: Certificate of Attendance.
Duration: 6 weeks.
Wageningen School of Management for the Food Industry and Agribusiness

Working in the food industry or agribusiness and aiming at a postgraduate management programme? Wageningen Agricultural University offers the perfect combination: an international MBA Food Industry and Agribusiness with a focus on agri-industrial chains. A study of the path from farm via supplier, processor, distributor and retailer to the final customer, highlighting technological developments. Profit from our partnerships with trade, industry and other knowledge institutions in the Netherlands and abroad.

Shoot ahead with the international
MBA Food Industry and Agribusiness

The MBA (Master of Business Administration) is open to university and college graduates or working professionals who have evident affinity for the food industry and agribusiness.

Start programme  part-time January, full-time August  
Duration  part-time 24 months, full-time 17 months  
Requirements  BSc, fluency in English, working experience  
Admission  GMAT (Graduate Management Admission Test)  
Tuition fees  NLG 35,000  
Ask for the complete brochure  Wageningen Agricultural University, Wageningen School of Management for the Food Industry and Agribusiness, c/o Dean's Office for International Students  P.O. Box 453, 6700 AL Wageningen, The Netherlands

This project was made possible by a grant from the Foundation of Agri-Chain Competence, a Dutch organization, aimed at enhancing at agri-industrial chains
Educational requirements: Diploma in agriculture or veterinary science.
Fees: On request.

26.13 International Course on Milk Processing
Objectives: Participants are able to start and manage a small-scale dairy plant efficiently and effectively.
Type of qualification: Certificate of Attendance.
Duration: 6 weeks.
Educational requirements: Diploma in agriculture, veterinary science, food science, chemistry or biology.
Fees: On request.

30.01 International Course in Health Development (ICHLD)
Objectives: Health officers learn methods for planning and managing health care systems within a broader context of development.
Type of qualification: Master's degree in Public Health.
Duration: 42 weeks.
Educational requirements: Degree in medicine or health-related field.
Fees: NLG 20,585.

30.02 International Course on District Health Care
Objectives: Public health workers learn techniques for effective teamwork in health care units at district level, and in public health care.
Type of qualification: Certificate of Attendance.
Duration: 11 weeks.
Educational requirements: Degree or diploma in a health-related field.
Fees: NLG 16,950.

31.01 Master of Public Health Degree
Objectives: The MPH programme focuses on the acquisition of knowledge and skills needed for a career in the field of public health.
Type of qualification: Master's degree.
Duration: 1 year.
Educational requirements: Master's degree in a relevant discipline or Bachelor's degree in combination with relevant work experience.
Fees: NLG 8,750.

31.02 Master of Science in Epidemiology
Objectives: Graduates are able to understand and critically evaluate the theoretical and empirical literature on epidemiological research, and to conduct epidemiological studies in various research settings.
Type of qualification: Master's degree.
Duration: 1 year.
Educational requirements: Master's degree in a relevant discipline or Bachelor's degree in combination with relevant work experience.
Fees: NLG 13,500.

31.03 Summer University Health Sciences
Objectives: Professionals in the fields of public health planning and administration, and environmental health, can update their knowledge. For practitioners, advanced students and researchers.
Type of qualification: Certificate of Attendance.
Duration: 5 courses of 1 week.
Educational requirements: Master's degree.
Fees: NLG 1,450 per course.

34.01 M.Sc. Degree Programme in Clinical Epidemiology
Objectives: Theoretical and hands-on training in the principles and methods of medical research, for those pursuing a career in
Master Programmes at
Maastricht University

Maastricht University is an internationally renowned centre of educational innovation. The purpose of the Faculty of Health Sciences/School of Public Health of Maastricht University and its Master programmes is to provide leadership and expertise in the fields of education, research and services. Accomplishing this purpose requires the joint efforts of professionals from various disciplines involved in the understanding of various factors that maintain health or cause disease.

MASTER'S DEGREE IN PUBLIC HEALTH

Within the MPH programme four 'phases' have been distinguished: The first phase will focus on analysis and diagnosis within the field of public health. The second phase highlights intervention and evaluation methods and techniques. During the third step the application of acquired knowledge to existing public health problems is the focus of interest and the last phase, consists of writing the thesis.

The MPH is a programme for which students register for full-time study over a twelve-month period. The MPH programme will commence in September of each academic year.

MASTER OF SCIENCE DEGREE IN EPIDEMIOLOGY

The programme consists of a theoretical segment and a practical research segment. The theoretical segment includes seven intensive modules scheduled from September through December. Following an Introduction to Epidemiology and Biostatistics, modules concentrate on the design and analysis aspects of observational and experimental studies, as well as advanced statistical analyses. The practical research phase will take place from January through June.

The M.Sc. in Epidemiology is a programme for which students can register as full-time (one-year) or part-time (two-year) students. This programme will commence in September of each academic year.

MASTER'S DEGREE IN HEALTH PROFESSIONS EDUCATION

The leading theme in the curriculum is the competences required of an educationalist in the health professions' domain. The first year focusses on the creation of active learning environments, which are adapted to the capabilities of students and focus on the health needs of a population. The second year will be devoted to the organisation of education and quality assurance and to the acquisition of skills in research and educational development.

The Duration of this programme is two years. Students are required to reside in Maastricht for three periods of six weeks each. During the remaining periods, students will carry out learning activities by way of distance education. This programme will commence in January of each year.

epidemiology. The aim is to train candidates for independent research.

Type of qualification: Master of Science in Clinical Epidemiology.
Duration: 44 weeks.

Educational requirements: University degree in medicine, biology, pharmacy, veterinary medicine, dentistry, health sciences, statistics.
Fees: NLG 20,000.

34.02 M.Sc. Degree Programme in Health Services Research

Objectives: To prepare candidates for research work in the health services sector and for positions that link this research to health policy and management.

Type of qualification: Master of Science in Health Services Research.
Duration: 44 weeks.

Educational requirements: University degree in medicine, biology, pharmacy, veterinary medicine, dentistry, health sciences, statistics, economics.
Fees: NLG 20,000.

34.03 M.Sc. Degree Programme in Medical Informatics

Objectives: To familiarise participants with the methodological issues of data analysis, problem-solving and decision-making in the fields of medicine and health care.

Type of qualification: Master of Science in Medical Informatics.
Duration: 44 weeks.

Educational requirements: University degree in medicine, computer science, electrical engineering, physics.
Fees: NLG 20,000.

34.04 M.Sc. Degree Programme in Epidemiology

Objectives: Theoretical and hands-on training in the principles and methods of medical research. The aim is to train candidates for independent research.

Type of qualification: Master of Science in Epidemiology.
Duration: 44 weeks.

Educational requirements: University degree in medicine, biology, pharmacy, veterinary medicine, dentistry, health sciences, statistics.
Fees: NLG 20,000.

34.05 Master of Public Health (in cooperation with NSPH)

Objectives: Public health professionals have learned to draw on knowledge and skills from a variety of disciplines in order to define, assess and resolve public health problems.

Type of qualification: Master of Public Health.
Duration: 44 weeks.

Educational requirements: Degree in medicine, dentistry, social sciences, economics or a related discipline. Graduates with backgrounds in nursing and health administration are invited to apply as well.
Fees: NLG 26,000.

37.01 5th In-Depth Training Course on Teaching Rational Drug Therapy

Objectives: The summer course aims to equip participants with the skills and knowledge needed to implement a problem-based scheme of rational drug therapy at their local school or institution.

Type of qualification: Certificate of Attendance.
Duration: 2 weeks.

Educational requirements: M.D., M.Pharm.
Fees: NLG 6,000.
38.01 Amsterdam Master's in Medical Anthropology

Objectives: Social scientists, physicians and other health care professionals are familiar with medical anthropological theories and research methods; and can design and realize research projects and participate in multidisciplinary teams.

Type of qualification: Master's degree.

Duration: 1 year.

Educational requirements: Master's degree in social sciences, or in medicine/public health/pharmacology, or paramedical science.

Professional qualifications other than these to be evaluated by the Admission and Exam Committee.

Fees: Approx. NLG 18,500.

39.01 Diploma Course in Community Health

Objectives: Theoretical and practical training for health care workers in developing countries, primarily middle management staff in districts, hospitals and schools for nursing.

Type of qualification: Diploma.

Duration: 16 weeks.

Educational requirements: Bachelor's degree in nursing or paramedical studies (physiotherapy, occupational therapy), health education, and administration.

Fees: NLG 6,150.

39.11 Rehabilitation Management in Development Programmes (in cooperation with Leiden Polytechnic)

Objectives: Rehabilitation personnel acquire the skills needed to manage community-based rehabilitation programmes.

Type of qualification: Certificate of Attendance.

Duration: 3 weeks.

Educational requirements: Degree or diploma in health or social sciences.

Fees: NLG 5,500.

40.01 International B.Sc. Degree Programme in Physiotherapy, Fysiofutura

Objectives: Graduates are trained to be highly qualified, independent professionals.

Type of qualification: Bachelor of Science degree in Physiotherapy.

Duration: 4 years.

Educational requirements: Secondary education at an advanced level. Physics is recommended.

Fees: NLG 13,500 per year.

41.01 European Graduate School of Child Neuropsychology

Objectives: Participants are able to assess and treat children with brain-related behavioural disturbances, to conduct research in this area, and to communicate adequately with professionals in related scientific fields.

Type of qualification: Diploma of the European Graduate School.

Duration: 25 weeks.

Educational requirements: M.A. or M.Sc. or comparable qualification in psychology, medicine or special education.

Fees: NLG 8,200 (+ NLG 300 application).

42.01 Graduate Programme in Periodontology
Objectives: Scientific and practical training for the practice of periodontics and oral implant therapy at a specialist level.
Type of qualification: Master of Science degree in Periodontology.
Duration: 3 years.
Educational requirements: Qualification in dentistry (DDS or equivalent) from an accredited dental school.
Fees: NLG 25,000 per year.

42.02 Graduate Programme in Endodontology
Objectives: Participants have developed a strong basic science background, coupled with advanced diagnostic and clinical skills, and are able to practise endodontics.
Type of qualification: Clinical certificate.
Duration: 3 years.
Educational requirements: License in dentistry.
Fees: NLG 15,000.

43.01 Introductory Course in Mycology
Objectives: Introduction to the taxonomy and cultivation of fungi.
Type of qualification: Certificate.
Duration: 4 weeks.
Educational requirements: B.Sc. degree in biology or related field.
Fees: NLG 2,500.

43.02 Course in Medical Mycology
Objectives: Training for medical microbiologists and technicians in the identification of medically relevant fungi including yeasts.
Type of qualification: Certificate.
Duration: 3 weeks.
Educational requirements: B.Sc. degree in biology or related field.
Fees: NLG 2,500.

44.01 Course on Laboratory Animal Science
Objectives: To present basic facts and principles that are essential for the humane use of animals and for quality research. For young scientists whose research involves the use of vertebrate animals, and for those who intend to set up a similar course.
Type of qualification: Certificate.
Duration: 2 weeks.
Educational requirements: M.Sc. in biology, medicine, veterinary medicine, zoology, pharmacy.
Fees: NLG 2,550.

44.02 Veterinary Epidemiology and Herd Health
Objectives: To teach epidemiology for performing independent research, statistics for the independent analysis of epidemiological data, and economics for discussing topics on a scientific level; and to offer practice in applying this theory in veterinary medicine.
Type of qualification: Master of Science degree.
Duration: 1.5 years.
Educational requirements: In general a DVM (Doctor of Veterinary Medicine) is required.
Fees: NLG 15,000.

44.03 Master of Science in Animal Pathology
Objectives: Students have acquired knowledge of general pathology and mechanisms of disease and the skills needed to conduct independent scientific research and analytical surveys.
Type of qualification: Master of Science degree in Animal Pathology.
Duration: 84 weeks.
Educational requirements: Doctor of Veterinary Medicine or Master’s degree in Biomedical Sciences.
Fees: NLG 20,000.

45.01 Agricultural and Rural Development (ARD) M.A. Programme

Objectives: Training for practitioners (government and non-government professionals), university teachers and researchers in strategies and policies to reduce rural poverty and inequality and to generate economic growth.
Type of qualification: Master of Arts degree.
Duration: 67 weeks.
Educational requirements: B.A. degree in a relevant field of study.
Fees: NLG 13,250.

45.02 Economics of Development (ECD) M.A. Programme

Objectives: Training for young professionals pursuing a career in development agencies, development banking, economic policy work, or university teaching and research; providing the theory and skills for understanding major policy issues in developing countries.
Type of qualification: Master of Arts degree.
Duration: 67 weeks.
Educational requirements: B.A. degree in economics.
Fees: NLG 13,250.

45.03 Employment and Labour Studies (ELS) M.A. Programme

Objectives: Training for policy advisors, planners, researchers, teachers, and staff of non-governmental organisations concerned with employment strategies; human resource development, labour-management practices and trade union policies.
Type of qualification: Master of Arts degree.
Duration: 67 weeks.
Educational requirements: B.A. degree in a relevant field of study.
Fees: NLG 13,250.

45.04 Politics of Alternative Development Strategies (PADS) M.A. Programme

Objectives: Training for staff of NGOs or representatives of social movements in the South; academics in social/political research and teaching; staff of Northern/international advocacy/aid agencies; planners/advisers in ministries; development studies specialists.
Type of qualification: Master of Arts degree.
Duration: 67 weeks.
Educational requirements: B.A. degree in a relevant field of study.
Fees: NLG 13,250.

45.05 Public Policy and Administration (PPA) M.A. Programme

Objectives: Training for administrators, academics and staff of NGOs in the formulation and implementation of policy programmes based on a study of the role of the state's administrative apparatus and its development policies.
Type of qualification: Master of Arts degree.
Duration: 67 weeks.
Educational requirements: B.A. degree in a relevant field of study.
Fees: NLG 13,250.

45.06 Local and Regional Development (LRD) M.A. Programme
Objectives: Training for staff of national/local government agencies and development corporations. NGOs, universities and firms involved in local economic development, employment creation, enterprise promotion, urban development and management.
Type of qualification: Master of Arts degree.
Duration: 67 weeks.
Educational requirements: B.A. degree in a relevant field of study.
Fees: NLG 13,250.

45.07 Women and Development (W & D) M.A. Programme
Objectives: Training for women working in NGOs, international organisations and government. in the analysis and development of strategies to create understanding of women’s contributions to society with special reference to grassroots initiatives and state policies.
Type of qualification: Master of Arts degree.
Duration: 67 weeks.
Educational requirements: B.A. degree in a relevant field of study.
Fees: NLG 13,250.

45.08 Development Planning Techniques with Computer Applications (DPT) Postgraduate Diploma Programme
Objectives: Training for macro-economic and project planners, national accountants and statisticians. in computer-assisted quantitative techniques for the preparation and analysis of data required for the planning process and policy preparation.
Type of qualification: Postgraduate diploma.
Duration: 29 weeks.
Educational requirements: B.A. degree in economics, business administration, statistics, engineering or equivalent.
Fees: NLG 6,250.

45.09 Rural Policy and Project Planning (RPP) Postgraduate Diploma Programme
Objectives: Training to provide planners, project/programme coordinators and managers of agricultural programmes with the analytical and executive skills necessary to design, implement and monitor rural and agricultural projects and programmes.
Type of qualification: Postgraduate diploma.
Duration: 29 weeks.
Educational requirements: B.A. degree in social sciences or its equivalent or relevant degree in other sciences.
Fees: NLG 6,250.

45.10 International Relations and Development (IRD) Postgraduate Diploma Programme
Objectives: Training in the interdisciplinary analysis of international relations and development. for diplomats, staff of ministries of foreign affairs and international (business) organisations.
Type of qualification: Postgraduate diploma.
Duration: 29 weeks.
Educational requirements: B.A. degree in a relevant field of study.
Fees: NLG 6,250.

45.11 International Law and Organisation for Development (ILOD) Postgraduate Diploma Programme
Objectives: Study of international law and its contributions to development policies. from a North-South perspective, for staff of ministries of foreign affairs, international (business) organisations, universities, etc.
Type of qualification: Postgraduate diploma.
Duration: 29 weeks.
Educational requirements: Degree in (international) law or political science or equivalent.
Fees: NLG 6,250.

45.12 Development, Law and Social Justice (DLSJ) Postgraduate Diploma Programme
Objectives: Study of the relationships between development strategies, power, culture, human rights, and the law. for staff of human rights organisations, etc.
Type of qualification: Certificate of Attendance.
Duration: 7 weeks.
Educational requirements: B.A. degree in a relevant field of study.
Fees: NLG 1,850.

45.13 Population and Development (P&D) M.A. Programme
Objectives: Training for government officials, academics and staff of NGOs wishing to broaden their thinking about population issues in the context of specific systems of production and resource use and how these bear on questions of economic and social development.
Type of qualification: Master of Arts degree.
Duration: 67 weeks.
Educational requirements: B.A. degree in a relevant field of study.
Fees: NLG 13,250.

46.01 International Course on Housing and Urban Development; Specialisation workshop: Urban Poverty: Strategies to Reduce Urban Poverty at Local Level
Objectives: Participants learn to plan and manage effective interventions for reducing urban poverty at the local level.
Type of qualification: Postgraduate diploma.
Duration: 13 weeks.
Educational requirements: Bachelor’s degree or equivalent from a recognized institution in a relevant field of study.
Fees: NLG 12,000.

46.02 International Course on Housing and Urban Development; Specialisation workshop: Municipal Environmental Policies and the Preparation of Local Agendas 21
Objectives: Participants learn to develop municipal environmental strategies and to prepare local Agendas 21 for their home cities.
Type of qualification: Postgraduate diploma.
46.03 International Course on Housing and Urban Development; Specialisation workshop: Housing Policy and Finance
Objectives: Training in analysing linkages between institutional and financial components of a housing policy and in providing policymakers at national and local level with the tools to create sustainable housing delivery systems relying on domestic savings.
Type of qualification: Postgraduate diploma.
Duration: 13 weeks.
Educational requirements: Bachelor's degree or equivalent from a recognized institution in a relevant field of study.
Fees: NLG 12,000.

46.04 International Course on Housing and Urban Development; Specialisation workshop: Urban Management and Planning

67.01 Finance and Accounting

Objectives: Undergraduate degree course to prepare students for middle management jobs in international companies with key responsibilities in the field of international finance and accounting.

Type of qualification: Bachelor of Science degree in Finance & Accounting.
At the crossroads of the new European Union lies the old university town of Groningen, in the north of the Netherlands, 170 kilometers from Amsterdam.

Groningen is the home of one of the country's oldest universities as well as of the Hanzehogeschool, an institute for higher professional education. Traditionally offering a wide variety of courses in the fields of liberal arts, technology and economics in Dutch, the Hanzehogeschool started adding English-language education to its services in 1989.

The International Business School (IBS) & School for Facility Management (FMS) offer four-year Undergraduate Sandwich Courses in

- Marketing/International Management
- Finance & Accounting
- Facility Management
as well as a one-year Postgraduate (MSc) Course in

- International Business.

A student body from 42 countries, language courses in major European trade languages, highly qualified international staff with theoretical & practical backgrounds in their fields of specialisation, and the fact that courses include world-wide exchange programmes & placement opportunities make for an ideal setting within which students can prepare themselves for international careers.

Semesters start every September and February, and the application deadlines are 31 May and 30 November respectively.

If you are interested in our courses in Dutch or English, and would like to receive more information on them, please write to:

70.01 International Economic Studies
Objectives: To prepare students for careers as policy advisors, researchers, or managers within international institutions, companies or organisations.

FACULTY OF ECONOMICS AND BUSINESS ADMINISTRATION
The Faculty lists among the youngest in Europe. Nevertheless, it is a well established and well known institution. According to the ratings in the Netherlands, students and employers have ranked it as the best place to study Economics or Business Administration in the country for several years now. The Faculty is highly internationally oriented and widely known for its scholarly research and innovative teaching: Problem Based Learning. The vast majority of courses are offered in English and about 400 foreign students participate in the Faculty's graduate programmes.

THE MASTER'S DEGREE IN INTERNATIONAL ECONOMIC STUDIES
International Economic Studies is international and practically oriented. The study combines a sound theoretical basis with the mastering of relevant professional skills. It focuses on the international aspects of economics and emphasises applied economic analyses. The students can specialize in Money and Banking, in Labour and Social Welfare, in Technology and Global Development and in Competition and Regulation in Europe. Its graduates are particularly well equipped to work in international institutions, international consultancy companies, commercial and central banks, international companies and organisations.

The graduate programme has a 1-year, 2-years, and 4-years curriculum option, depending on the students' work and training experiences. The minimum entrance qualification for the shorter programmes is a second-class Honours in an appropriate subject.

Tuition f 2,578,— per annum (1997/1998); EU-students are entitled to a reimbursement of their tuition fee.

BEST COPY AVAILABLE

MEDIA-GN, centre for emergent media, has three mutually supportive divisions: Education, Contract Activities and Research & Development.

Here various disciplines collaborate at the frontiers of new digital media developments, profiting from the encounters of artistic, technological and scientific knowledge, skills and attitudes. MEDIA-GN successfully organized international training programmes in computer graphics, computer animation and interactive multimedia the last ten years. Students from more than 30 countries all over the world participated.

The educational programme has three branches:

1. **International Training Programme**
   A course of 18 weeks for students with an Art & Design background who have little or no experience with digital media. This programme starts in January and August each year.

2. **Postgraduate course Computergraphics, MA**
   A postgraduate programme of two years for graduates in Art & Design. This course starts in September each year.

3. **Tailor made courses**
   The programmes of these courses are adjusted to the specific needs of individuals or groups of students.

Formerly known as Stichting Computeranimatie Nederland (SCAN)

---

116.02 Europe in the World: Journalism Course

**118.01 Master of Arts in Image, Synthesis and Computer Animation (MA-ISCA)**

**Objectives:** Students and professional media designers and graphic computer technicians understand and are able to apply digital image techniques to media design and production.

**Type of qualification:** Master of Arts-ISCA.

**Duration:** 1 year.

**Educational requirements:** Students with at least 3 years of study in a relevant field: special exam MA-ISCA.

**Fees:** NLG 10,000.

---

**118.02 Interactive Multi Media (MA-IMM)**

**Objectives:** Graduates in any major subject within the faculty are able to make interactive programmes.

**Type of qualification:** Master of Arts-IMM (RCA).

**Duration:** 1 year.

**Educational requirements:** B.A. in a relevant subject (art, media, technology).

**Fees:** NLG 10,000.
Utrecht School of the Arts / Faculty of Theatre

Janskerkhof 18
3512 BM Utrecht
Phone +31 (0)30 231 26 90
Fax +31 (0)30 232 24 65
Email fac.th@hku.nl

118.11 International Theatre and Education Course
Objectives: To train theatre-makers/educators. Graduates are theatre artists who specialise in helping amateur and professional groups to improve their performance skills, and who are able to teach and direct in culturally diverse situations.
Type of qualification: Bachelor's degree.
Duration: 4 years.
Educational requirements: Secondary education A-level.
Fees: NLG 2,400 per year.

118.12 Master of Arts in Scenography
Objectives: Scenographers have the capability to take a leading role in producing innovative productions that challenge conventional definitions, and enhance the intellectual and artistic experience of theatre collaborators/spectators.
Type of qualification: Master's degree.
Duration: 1 year.
Educational requirements: Honours degree, postgraduate diploma, or equivalent professional qualification in theatre design/scenography/direction.
Fees: NLG 8,000 (EU); NLG 16,000 (non-EU).

Hogeschool van Amsterdam / Instituut voor Fashion Management en Design
Mauritskade 11
1091 GC Amsterdam
Phone +31 (0)20 592 55 55
Fax +31 (0)20 592 55 70
Email s.swart@tmf.hva.nl

120.01 The Amsterdam Master Programme in Fashion Management
Objectives: To meet the need of companies for graduates with business skills for developing creative collections and coordinating a world-wide network of customers and suppliers in an efficient, flexible, innovative way at a strategic general management level.
Type of qualification: Master's degree: Certificate of Attendance.
Duration: 1 year.
Educational requirements: Minimum: Bachelor's degree (with a foundation in the relevant fashion sector).
Fees: NLG 13,500 (full-time); NLG 4,500 (per module).

AKI, Academy for the Visual Arts
P.O. Box 1440
7400 AK Enschede
Phone +31 (0)53 482 44 00
Fax +31 (0)53 433 87 24
Email aki@worldaccess.nl

121.01 Postgraduate Study in Autonomous Art
Objectives: To create an environment that stimulates young artists in their development by providing them with individual guidance.
Type of qualification: Master of Fine Art.
Duration: 2 years.
Educational requirements: Applications are assessed on the basis of work sent in by the applicant.
Fees: NLG 2,575.
The Design Academy (formerly Academy Industrial Design Eindhoven)

P.O. Box 2125
5600 CC Eindhoven
Phone +31 (0)40 212 24 25
Fax +31 (0)40 212 60 15
Email 60x@designacademy.nl

122.01 Industrial Design

Objectives: Designers are able to work as independent professionals in an industrial design environment.

Type of qualification: Bachelor's degree.

Duration: 40 weeks.

Educational requirements: The academy is open only to those whom the Executive Board decides may be admitted to the institution.

General requirement: senior secondary school certificate.

Fees: NLG 2,575.

122.02 Master's Course in Industrial Design

Objectives: To train graduate industrial designers to apply user-centered, scenario-based design skills to independent, multidisciplinary research efforts.

Type of qualification: Master of Arts degree.

Duration: 1 year.

Educational requirements: B.A. or equivalent in industrial design or interior architecture.

Fees: NLG 2,500 (EU); NLG 10,000 (non-EU).

European Design Centre (EDC)

P.O. Box 6279
5600 HG Eindhoven
Phone +31 (0)40 246 63 50
Fax +31 (0)40 246 68 50
Email hellier@edc.nl

123.01 Master Course in Applied Design Research in Industrial Design

Objectives: Industrial designers are able to help create a sustainable society incorporating social/technological developments; to carry out applied research independently and creatively; and to apply the results in the design of concepts for services and products.

Type of qualification: M.A. degree/dip. adv.course in visual art & design

Duration: 1 year.

Educational requirements: Degree in industrial design or another design subject, or a level reached on the basis of professional experience which the selection committee judges to be equivalent.

Fees: NLG 2,500.

Rotterdam College of Music and Dance

Tandwielstraat 1
3083 AV Rotterdam
Phone +31 (0)10 423 00 11
Fax +31 (0)10 486 50 50

124.01 Performing Dance Major

Objectives: To produce versatile, professional modern dancers with technical skills that equip them for national and international contemporary dance companies.

Type of qualification: Professional diploma in Performing Dance.

Duration: 4 years.

Educational requirements: Secondary education at advanced level, and pre-vocational dance training.

Fees: NLG 2,600 per year (EU); NLG 3,000 (non-EU).

Amsterdam School of the Arts

P.O. Box 19117
1000 GC Amsterdam
Phone +31 (0)20 527 76 40
Fax +31 (0)20 527 76 42

125.01 School for New Dance Development I) 4-year Programme II) 2-year Programme

Objectives: The school trains dancers who, on the basis of their physical and creative knowledge and skills, are able to develop their own forms of theatrical dance.

Type of qualification: Professional Diploma in Performing Dance.

Duration: I: 4 years; II: 2 years.

Educational requirements: II: Previous professional training in dance.

Fees: NLG 3,400 per year.

125.02 Master's Degree in Jazz Performance

Objectives: Participants master their instrument in all aspects and at the highest level and are able to perform their own arrangements and/or compositions.

Type of qualification: Master's degree.

Duration: 80 weeks.

Educational requirements: Bachelor's degree in music.

Fees: NLG 9,850 per year.

125.03 Master's Degree Programme in Museology

Objectives: Participants are able to operate in the field of collection management and museum communication.

Type of qualification: Master's degree.
Duration: 1.5 years.
Educational requirements: B.Sc. or M.Sc. in a relevant subject, or proven knowledge and experience in the museum field.
Fees: NLG 15,000 (from September 1998: NLG 18,000).

Royal Conservatory, The Hague
Juliana van Stolbergaan 1
2595 CA The Hague
Phone +31 (0)70 381 42 51
Fax +31 (0)70 385 39 41
Email boehmer@koncon.nl

126.01 Sonology Course
Objectives: Practical and theoretical training in the application of scientific and technical tools to the production and study of musical sound and structure, for musicians (composers and performers), researchers and others interested in modern music technology.
Type of qualification: Certificate of Attendance.
Duration: 38 weeks.
Educational requirements: Secondary education A-level.
Fees: NLG 2,575.
Dutch study programmes

The regular study programmes conducted in Dutch at the Netherlands' universities and hogescholen are presented in the following tables.

If you would like more information about a particular programme, fill in one (or several) of the reply cards you will find in this booklet. You will receive information directly from the institution or institutions in question.

University study programmes

Some university study programmes have prerequisites; certain relevant subjects must be among those in which the candidate specialized during the last two years of secondary school. Often these are math and physics, but it depends on the field. An exemption from such a requirement is granted if the candidate can demonstrate sufficient knowledge in the subject, usually through a test.

Agriculture and natural environment

Full-time programme •

Full-time and part-time programme *

The table also lists study programmes which students enter only after a first year in a related, usually more general field. For more information about prerequisites and procedures for exemption, and about study programmes from the second year, write to the university information office. Use the reply cards in this publication to request information about a specific study programme.

HBO study programmes

Admission to higher education is centrally administered, and there are national requirements. The hogescholen, however, have a little more freedom to determine their own admission requirements than the universities. Information is best obtained from the institutions themselves. Use the reply cards in this publication to request information about a specific study programme.

### The Fontys Hogescholen were formerly known as

- Hogeschool Eindhoven
- Pedagogisch Technische Hogeschool Nederland
- Hogeschool Katholieke Leergangen Sittard, Tilburg, Den Bosch
- Hogeschool Venlo
- Pedagogische Hogeschool Hemelrijken

They are listed here under their old names.

9. List of addresses

The mailing addresses of the Dutch universities and hogescholen are given below. In all cases the last line of the address should of course be 'The Netherlands'.

Courses conducted in English are offered in various departments of the universities and hogescholen. Their specific addresses can be found in the listings under 'Courses and study programmes in English', as can the addresses of the special International Education institutions, which for many years have been offering courses conducted in English (See 'Advanced training for professionals' p. 16).

Nuffic
Nuffic is the Netherlands organization for international cooperation in higher education. Nuffic's information centre can provide general information about studying in the Netherlands.

BEST COPY AVAILABLE
Hogescholen

Within the Dutch higher education community there is some disagreement as regards the term for hogescholen in English. The institutions themselves and their association, the HBO-Raad, prefer the term 'Universities of professional education'. The Education Ministry, on the other hand, retains the Dutch term in English text.

Netherlands Alumni Associations

People who studied or took courses in the Netherlands have founded Netherlands Alumni Associations (NAA) in a number of countries. These independent associations organize various activities. For anyone considering a period of study in the Netherlands, alumni are always a good source of first-hand information. They can tell you about their own experiences, and provide you with practical advice that will help you to prepare for your own stay. We therefore suggest that you contact the local NAA before you leave your own country. We would also encourage you to become a member when you return home.

Netherlands Alumni Associations exist in the following countries:

Netherlands Alumni Association of Argentina
ACANE - Asociación Cultural Argentino - Neerlandesa de Ex-Becarios
c/o Netherlands Embassy
Avda. de Mayo 701, piso 19
1084 BUENOS AIRES
Argentina

Netherlands Alumni Association of Bangladesh
c/o Planning Division
BSEC Bhaban, 6th floor
102 Kazi Nazrul Islam Avenue
DHAKA - 1213
Bangladesh

Netherlands Alumni Association of India
c/o 8-B, Lig Flats, Phase I
Qutab Enclave (near Qutab Hotel)
NEW DELHI 110016
India
If your country is not included in this list, check with the Netherlands Embassy whether an informal NAA exists in your country. The Embassy may provide you with names and addresses.
