WOMEN'S LIFE EXPERIENCES IN CONTEMPORARY INDIA

FULBRIGHT PROJECT
RUTHANNE PIPKIN
SUMMER 1994
WOMEN'S LIFE EXPERIENCES IN CONTEMPORARY INDIA

OBJECTIVES

The rational for this lesson is to help students develop new understanding and sensitivity towards another culture and to help them develop skills for learning to ask questions about and explore alternatives within their own lives. This lesson has been designed for individual assignments but it could also be adapted for classroom use, or as enrichment or extra credit. It could be used in World Cultures courses, Contemporary Problems, Current World Issues, Cultural Geography, Sociology, or Women's Studies courses. It is intended for high school use.

OBJECTIVES

Students will be able to:
1. Describe the societal position of women in Indian society, recognizing the tremendous differences within the society.
2. To begin to define the cultural, historical and personal factors which affect decisions in the lives of these women and to understand the cultural, historical and personal factors which currently affect one's own life.
3. To become familiar with the female experience in Indian society, to understand some of their experiences, their values, the obstacles they face, the dreams they have.
4. To be able to recognize ethnic and sexual stereotypes and describe possible economic and personal consequences of specific stereotypes on their own futures.
5. Describe changes either positive or negative that women in Indian society have experienced. Consider the number and quality of options open to them in their activities, persons they can relate to, places they can live in or travel to or visit. Consider the degree of satisfaction they gain from their lives.

Strategies: The students will read, think, and write about cultural patterns, social institutions, attitudes and personal actions which affect the lives of these Indian women. They can then begin an analysis of similar factors which have affected their lives. This lesson could be extended by interviewing or reading about women from other cultures or interviewing a variety of women within their own lives to recognize the various factors in American society which combine to create the female experience here in the United States.

The students could do any variation of the following assignments:

1. Read Women In India: Two Perspectives, Doranne Jacobson and Susan S. Wadley, Manohar Publishers & Distributors, New Delhi, India. 1992, and answer the questions included in this project.

2. Read Through Indian Eyes, vol. I The Wheel of Life, edited by Donald J. and Jean E. Johnson, Praeger Publishers, New York, 1975, pp13 - 91. The Teachers Lesson Plans which are available through CITE, New York and Washington, offers excellent, thought provoking questions which involve the student in interacting with the material and challenging them to re-examine many of their own values.

3. Read Nectar in a Sieve, Kamala Markandaya, The John Day Company, 1954. Included in this unit are questions for this assignment.

4. Read Jasmine, Bharati Mukherjee, Grove Weidenfeld, New York, 1989. Questions for this book are also included in this packet. Students could also be asked to write a comparative paper in which they compare books 3 and 4 which are fiction with books 1 and 2 which are non-fiction accounts. Students can begin to identify cultural factors in India which consistently pressure women to behave a certain way. They can then begin to identify factors in the lives of women in other societies or factors in their own lives that they recognize have shaped them.
