This module, which may be used as the basis for a workshop or as a special topic unit in adult basic education or English-as-a-Second-Language (ESL) courses, focuses transferring professional skills, degrees, or credentials from one's native country. The basic career planning and job search principles are relevant to learners at all educational levels. The module contains the following: an overview of the topic; the specific skills that the module emphasizes; and teaching points, learning activities, resources, and commercial textbooks. A sample lesson plan begins with a cover sheet with objectives, learners and context, room setup, to bring, to do ahead, media used, and steps. The lesson plan indicates time required, materials required, and teacher and student activities. Other contents include overhead transparency masters, handouts, presurvey, and postassessment. The objectives for this module are as follows: analyze skills, licenses, and education requirements for a job; analyze own skills and education; locate information on professional organizations and licensing authorities; and prepare a career plan of action. LAES activities are funded by contract #4213 of the Federal P.L. 100-297, Section 353, from the Adult Education Unit, YAAES Division, California Department of Education. However, the content does not necessarily reflect the position of that department or of the U.S. Department of Education.
MODULE 21
Transferring Professional Skills, Degrees or Credentials from One's Native Country

Overview

Among immigrants to the United States, there are always individuals with technical or professional backgrounds or individuals with partially completed training or preparation from their native countries. They come to the United States for a variety of reasons. Some come for personal reasons -- to join spouses, siblings, or children. Some are refugees. Others leave their home countries because there is no work for them in their own country or because they are poorly paid, despite the fact that they have years of education and training. Some leave because they no longer wish to live under oppression or undemocratic regimes. Others may come to the U.S. with high hopes for finding a social system where there is no corruption.

Whatever their reasons for coming to the United States, almost all immigrants want to use the skills they acquired in their home country in their new environment, both to earn a living and to contribute to the life of the communities they live in. For example, many Latin immigrants who are trained teachers are now volunteering to help other community members improve their basic skills.

It is useful for all adult education instructors to find out about their students' educational and occupational backgrounds and current aspirations -- in part to individualize instruction to their level and interests, but also as part of helping them in the difficult process of mobilizing their skills in a new and unfamiliar context.

Unfortunately, a lot of immigrant talent is wasted because there is no clearly defined system for evaluating their backgrounds; for helping them determine exactly what they need to do in order to find a job in their field, or in a closely related one; and for helping them find a job in their field when they have the appropriate qualifications.

A crucial problem is that this experience does, in fact, shake anyone's self-confidence. Also, there is often a tendency of potential employers to incorrectly assume that foreign training or professional standards are more lax in other countries than in the U.S. or, even when attempting to evaluate an immigrant's skills objectively, credentialing technicians sometimes encounter difficulties interpreting different terminologies.
Consequently, immigrants who seek to realize the full potential of their job skills here in the U.S. need to establish a clear-cut goal, explore many avenues seeking information and advice, sort out conflicting information, determine their options, make choices, not take "no" for an answer, be determined, persuasive and know how to approach people in order to elicit their help in their quest. This is an art, not a science. There is no one avenue which can lead to the desired result -- a job which makes use of one's talents, training and education.

Also, the reality may be that it will be necessary to accept employment which is not really commensurate with one's skills and slowly, over several years, work upward into employment similar to one's original employment. Quite practically, a key concern is to build the English-speaking skills necessary to work effectively in the United States, or, alternatively, find meaningful employment where foreign language communication skills are the primary requirement.

The task faced by immigrants with professional backgrounds is not unlike that faced by native born young people pursuing a professional career or older people changing careers of their own volition or due to corporate downsizing. The difference is that native born individuals usually have more contacts and understand the "system" better. Immigrants need to carefully inventory their skills and experience, scan and understand occupational skills demands in the United States and "translate" their training into a new frame of reference.

Basic Skills Development

This module is designed primarily for advanced ESL classes where students are quite literate. However, the basic career planning and job search principles addressed in the module are relevant to learners at all educational levels, including students who may not have a great deal of education but who are strongly committed to continuing their education. The primary skills areas addressed in this module are:

Basic Skills

Reading and interpreting information presented in standardized, highly-structured formats, experience in communicating one's skills and in securing information on labor market demand and alternative career options.

Thinking Skills

Critically examining personal values, strategic planning taking into account tradeoffs between educational costs, benefits, and increased earnings; analysis and assessment of one's own skills correspondence to analysis of occupational skills demands.
Uses Resources

Finding up-to-date relevant information on occupational skills demands, certification standards, alternative pathways to certification, information on labor market demand.

Interpersonal Skills

Engaging others, credentialing technicians and counselors, potential employers in appreciating one's skills and problem solving to overcome barriers to goal.

Works With Systems

Comparison of home-country skills classification and certification frameworks with U.S. skills classification and certification frameworks. Comparison of “official” and “real-world” skills assessment and certification criteria and use of information on “local” systems (e.g. local employer perspectives, employee perspectives) to guide career and job search planning.

Teaching Points

1. **Have a clear sense of personal objectives, but remain flexible about your options and alternatives.** If, for example, you taught school in your native country and would like to become a teacher here you may need a credential. Obtaining one may be necessary to attaining your goal - a teaching position. However, it is possible to teach for private institutions with a bachelor's degree. A credential may not be needed. One's role is that of detective and, at times, lawyer. What works for one person may or may not work for another.

2. **Obtain all transcripts, certificates, and letters of recommendation or other pertinent documents from your native country.** These materials can be translated, organized in a portfolio and interpreted so that people unfamiliar with what they mean can appreciate what they certify.

3. **Try to find people from your native country who are working in your field.** They may be an excellent source of information. It is important to ask questions and network with people in situations similar to yours. Ask them how your profession in the United States is similar and how it is different from your profession in your native country. Contact professional associations in your field to meet such people and to see if other assistance is available. Building the communication skills to interest and engage them in your career advancement efforts is the foundation for succeeding in this networking.
4. Consider alternative career paths, taking a job for a while for which you may qualify and which is very related to your field, even it is beneath your actual qualifications. For example, a teacher might work as a substitute with an emergency credential or be a teacher's aide. This will allow you to make contacts, see if indeed you would like to continue working in your profession here in the United States. This work experience will provide a way to get local letters of recommendation and work experience. It is important to keep an eye open for new possibilities, for example, an uncredentialed teacher might find a new position designing curriculum which may not, itself, require any particular credentials, but, instead, creativity and experience.

5. Try to determine how long it will take to reach your goal, how much it will cost you, and prepare yourself. Also, try to determine if there will be jobs available to you after you attain your goal and how much money you can expect to earn. For example, the job market for legal paraprofessionals in California may actually be better than for lawyers and an immigrant with a law degree from a foreign country may do better working in a highly responsible non-professional position than in seeking to “jump through the hoops” of U.S. accreditation and the bar examination.

6. Enroll in a career guidance class at a community college. This might help you determine what career paths there are in your field. It is also a place to explore the possibility of a career change or career shift to a related but different field. For example, in the United States it is extremely expensive to set up a dental office. The equipment, insurance, etc. costs a great deal. A dentist from another country might choose to become a dental hygienist. This is a very well paid, high demand profession which does not require a lot of capital and which is a much less time consuming and costly career path than that of a dentist.

7. Make an appointment with a counselor, preferably one who specializes in helping immigrant students, and explore your options for making use of home country work experience, education, certificates or degrees. Enroll in a course at your local community college, if necessary, so that you can take advantage of their counseling services. Also, if you can afford fees for one or two counseling sessions, vocational rehabilitation counselors can provide creative advice about career options for any job-seeker, based on their expertise retraining disabled workers for new careers.

8. Find industry or trade journals or magazines to educate yourself as to current trends in your field and how the job market is changing. A problem faced by both native-born and immigrant workers whose training is not recent is that there is skills demand only in some sub-specialties. For example, even experienced electronics technicians who are not familiar with solid-state technology may not be qualified for the jobs which are available. They are, however, very likely to do extremely well in a specialized accelerated course designed to teach about a sub-specialty or new technology. Demands for skills in
different sub-specialties changes constantly and the decision to invest in re-certifying or upgrading skills require very careful thought about current and future labor market trends.

9. Contact personnel offices of firms or institutions that you would like to work for. See if you can make appointments with directors or employers of those firms. Show them your resume and ask them what more you might need in order to be employed by them. These informational interviews are a good networking tool as you might get names of other companies or organizations where you might apply and information as to what training or education you need to acquire in order to get a job in your field. If you need to go to a college or university find out exactly what degree they require of employees and what college or universities they prefer.

10. Review the California Employment Development Department’s “Digest of Licensed Occupations.” Get a copy of the digest from a local library or by writing to State of California, Employment Development Department, Labor Market Information Division, PO Box 826880, Sacramento, CA 94200-0001. This is a book of occupational titles and licensing authorities. For example, teacher credentialing commissions are listed in this booklet.

11. Contact the licensing authority in a related field to determine what requirements are necessary to get certified in order to get a job in a specific field. Ask about credit for work already done in one’s native country. It is a very good strategy to consult these commissions as well as colleges and universities. Sometimes when a credential is needed this is a much faster track than enrolling in a credentialing program at a college or university because the commissions may accept more of your prior course work or experience from your native country.

12. Check with institutions you are considering for requirements and ways to prepare. If you wish to attend higher institutions of education in the U.S. there are often English language proficiency exams like TOEFL (Test of English as a Foreign Language). Needless to say, costs at a community college are much lower than tuition at a university or state college. Community colleges offer English placement tests, counseling and an array of ESL classes. If you need or want to attend a college or university in the U.S. it is a good idea to consider private institutions because they often recognize more work from the native country and offer more financial assistance. In the end, it may be a faster and cheaper way of achieving your goals.

13. Make an appointment with or call the head of the department in which you wish to study to discuss transfer of course work from the native country and prerequisites for acceptance to a higher institution. Sometimes the college or university will evaluate your course work to determine equivalencies or they will tell you to contact an evaluating institution for this purpose. Sometimes you have to have descriptions of your course work translated into English. If
there are pre-requisite courses that you must take before you can be admitted to the institution, you can often do the course work at a community college and save money and transportation costs. You should get a clear plan of what you need to do before you can be admitted to the institution.

14. Talk with students from your native country, who are attending colleges or universities you are considering, to get their impressions of the quality of education provided in the institution where they are enrolled. An important consideration may be what support they provide for students with solid educational background but some limitations in English, whether they provide tutoring, English composition classes, etc.

15. Get your transcripts professionally evaluated. Some universities evaluate foreign transcripts but many do not. Also, if you wish to apply to several colleges or universities, it might be a good idea to get your transcripts evaluated by a professional organization. All transcripts and course descriptions must be translated into English first. Translating services can be found in the yellow pages or by asking the university where you wish to apply for referrals. There are evaluating organizations around the United States. A word of caution, these organizations often vary widely in the way that they evaluate foreign course work.

17. Track how the laws and regulations about financial aid to legal immigrants are changing. It will be very useful to keep up with changes in laws about immigrants. (See Module 20).

Sample Learning Activities

1. Invite immigrant professionals to class and have them tell what approach they took to finding their current employment.

2. If appropriate, have students contact the state licensing authority for their field and ask questions about what they would have to do to obtain a license. Report back to the group. This information will be useful even for students in other fields as it will give them an idea how licensing rules vary.

3. Have students seek an appointment with an employer or a professional in their field for an informational interview. Have students prepare mock interview questions in advance (including both the questions they expect to ask the employer and what they expect the employer to tell them). Have them share their questions with others in the class for feedback before you go to the interview. After they have the appointment, have them report back about the
interview, including their reflection about whether there were any surprises in
the interview and how the interview may have changed their thinking about
their career strategy.

4. Have each student in your class with a professional or technical background
explain to other students what they are qualified to do in their profession or
occupation and have other students play the role of employers interviewing
them. These interviews can include questions regarding related jobs the
interviewee might be willing to accept.

5. Have students clip job advertisements from the Sunday newspaper and analyze
what skills and experience are required. Have them list each job requirement
separately in the first column of a two-column table and list in the second
column their skills, relevant certificates, and experience.

6. Have students considering whether or not to re-certify their professional
qualifications in the United States
   a) research licensing requirements,
   b) compute the costs of courses for re-certification,
   c) list characteristic earnings for professionally-qualified persons, and
   d) compare the benefits of increased earnings and costs of additional
      education to their earnings from non-licensed similar occupations.

7. Have students seeking information about professional qualifications in their
field search the World-Wide Web for professional journals' Websites, for the
home pages of companies employing in their field (which often include listing of
job openings) and for institutions offering courses in their field.

8. Encourage students in your class to form an informal job-seeking support club to
meet regularly, say once a month, to exchange information about how their job
searches are going and how they are modifying their strategies for moving into
the occupational areas they want to work in.

9. Invite a vocational rehabilitation counselor to class to talk about the concept of
"transferable skills" and explain to students how different occupations may have
overlapping skills clusters. (Because they often specialize in working with clients
who have been injured and cannot continue in their former occupation,
vocational rehabilitation counselors are particularly well prepared to analyze
how skills acquired in one occupation or educational system can best be used in
another new one).

21. TRANSFERRING JOB SKILLS

OBJECTIVES
- Analyze skills, licenses and education requirements for a job;
- Analyze own skills and education;
- Locate information on professional organizations and licensing authorities;
- Prepare a career plan of action.

LEARNERS & CONTEXT
Adult students. Average ability of the group is medium. The range of ability is wide. Motivation is high. Group size is between 11 and 30. There are many learners whose English is limited.

ROOM SETUP
Chairs and small tables to facilitate small group activities

TO BRING
Extra materials needed for research

TO DO AHEAD
Have available copies of:
Digest of Licensed Occupations,
California Occupational Guide,
Dictionary of Occupational Titles
Area phone books

MEDIA USED
Overhead and print

STEPS
Warm up
Introduction
Analyze occupations
Review background
Find resources
Report back
Prepare questions
Interviews
Break
Second session
Reflection
Action Plan
Closure
Lesson Plan: Transferring Job Skills...

<table>
<thead>
<tr>
<th>Warm up</th>
<th>Teacher tells a story about a friend with a Masters Degree in Linguistics who had taught Spanish to foreigners at the University in Mexico City, but could not find a teaching position in California. Everyone told her that she needed a credential, but nobody could tell her how to get one. With her transcripts, diplomas and letters of recommendation in her briefcase, she visited several universities only to be told that studies abroad did not count. She was also told that she had to start from scratch to get a BA and then a teaching credential. This lady was very distressed, not only she did not have the money to go to school for five years, but she felt that it was unethical to demean the degree from her home country. Eventually she found a teaching job with someone who was willing to guide her in understanding the intricacies of the licensing process.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Motivation</td>
<td>Teacher asks students: How many have completed technical or academic degrees? and Are they working in a job related to and commensurable with their training?</td>
</tr>
<tr>
<td>Introduction</td>
<td>Teacher states that with this lesson. You will be able to: • Analyze skills, licenses and education requirements for a job; • Analyze own skills and education; • Locate information on professional organizations and licensing authorities; • Prepare a career plan of action.</td>
</tr>
<tr>
<td>Analyze occupations</td>
<td>Teacher explains that the first step is to analyze the skills needed and the education requirements of a job. Teacher hands out sample copies of the California Occupational Guide and asks the students to look for: 1. the job skills; 2. entrance, training and license requirements; 3. three places that employ these workers; 4. related occupations; 5. where to get more information. (Teacher might give each student a different “job” or the group can work on one “job sheet” together and later select one “job” interesting to them.)</td>
</tr>
<tr>
<td>Review background</td>
<td>Teacher asks students to now look at themselves, their past school and job experiences, as well as other activities that developed their skills. Students list the skills they have and the skills they need to acquire. Teacher monitors students' activity and assists by clarifying concepts.</td>
</tr>
<tr>
<td>Time</td>
<td>Activity Description</td>
</tr>

</table>
| (25 min) | **Find resources**  
  Teacher shows on the overhead a list of resources that need to be located.  
  Teacher asks students to select in which group they would like to work.  
  Students may use phone books, Internet or Local library to:  
  1. locate professional transcript evaluation services,  
  2. locate licensing authorities for appropriate disciplines,  
  3. locate professional organizations,  
  4. locate preparation courses and testing schedules for TOEFL, SAT, etc. |
| (10 min) | **Report back**  
  Students report back on what they found, and list what needs to be pursued later. |
| (15 min) | **Prepare questions**  
  Teacher explains to the students that another way of gathering information is to interview people in the target profession.  
  Students are to prepare questions that they would like to ask about the target job. |
| (8 min)  | **Interviews**  
  Teacher explains that the following activity will be done on their own individually or if they prefer with partners.  
  They are to contact by phone or in person and interview (using the prepared questions):  
  1. employees working in the target field;  
  2. a spokesperson, member, or employee of a professional organization;  
  3. a school counselor, college counselor, rehabilitation counselor  
  Students select their assignments and partners; and register their selection with the teacher. |
### Lesson Plan: Transferring Job Skills...

3. Please read about Rodrigo in the information below, and provide some suggestions for how he can find a job as an accountant in the U.S.

**Background.** Rodrigo has lived in California for 5 years. He is 33 years old. He speaks some English but needs to improve his English language skills if he wants to get a better job. He is working for a landscape contractor for $7 an hour. In Mexico, he worked as a certified accountant for a large exporting company. Make a plan of action for Rodrigo so that he can find a job where he can use his skills in the United States.

a. What does he need to do and Who does he need to talk to?

b. List the steps he needs to take to reach his goal.

c. How long do you think this will take?

4. What do you want to learn about transferring professional skills, degrees or credentials from one’s native country?

I want to learn:

---

22
Module 21, Transferring Professional..., Pre Survey, P. 3
Module 21
Transferring Professional Skills, Degrees or Credentials from One's Native Country

Instructions: Please join with a partner to work on this activity together. The activity is divided in two parts. The first part asks you to develop a career action plan for a person or group of people in a situation described below. The second part asks you to reflect on your work with this module and tell us what you learned.

Part I. Students should work with partners
A. With your partner read the following 3 situations or problems.
B. Choose one and together make a career action plan for the person or persons. What do they need to do? Who do they need to talk with? What documents do they need?
C. Write the action plan on the answer sheet provided with this activity.

Situation 1.
Rodrigo has lived in California for 5 years. He is 33 years old. He speaks some English but needs to improve his English language skills if he wants to get a better job. He is working for a landscape contractor for $7 an hour. In Mexico, he worked as a certified accountant for a large exporting company. Make a plan of action for Rodrigo so that he can find a job where he can use his skills in the United States. What does he need to do? Who does he need to talk to? List the steps he needs to take to reach his goal. What different options should he consider? How should he decide among them?

Situation 2.
Carmen lives in California with her husband and 2 children. She works part-time in a Mexican restaurant as a waitress. She took English classes and speaks very well. Before coming to the United States to join her husband, she was a nurse at a large hospital in Mexico. She loved her work. Now her children are all in school. She has more time to make some changes in her life. She wants to earn more money and get a nursing job in the United States. Make a career action plan for her.

Situation 3.
Rogelio is from Guadalajara. His family owns a small restaurant there. He lives in the United States now. He and his brother Jose want to open a restaurant in the United States. They speak English but they can't write very well. Rogelio cooked at the family restaurant and Jose waited on customers and cleaned tables and dishes. Neither of them have any experience actually running a restaurant. Their father bought everything for the restaurant, paid the bills and kept the books. Make a career action plan for them. Who do they need to talk to? What do they need to do?
Answer Sheet Module 21
Transferring Professional Skills, Degrees or Credentials from One's Native Country

Situation you are working on from previous page:  1  2  or  3

1. Career Action Plan for:

2. Job desired:

3. Education and/or Experience from Home Country:

4. Important papers or documents:

5. Skills, licenses and requirements for U.S. job:
6. **People and agencies to talk to:**

   ____________________________________________
   ____________________________________________
   ____________________________________________

7. **Related alternative jobs or careers:**

   ____________________________________________
   ____________________________________________
   ____________________________________________

8. **Step-by-Step Career Plan:**

   a. ________________________________________

   b. ________________________________________

   c. ________________________________________

   d. ________________________________________

   e. ________________________________________
Part II. Please tell us what you learned from your work with this module

1. Did you benefit from your work on this module regarding any of the following?

<table>
<thead>
<tr>
<th>Understanding better how to:</th>
<th>Yes/No</th>
<th>Please comment on either:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>- How you benefited; or</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Why you feel this module was not useful for you in this area</td>
</tr>
<tr>
<td>a. Formulate a strategy for career and professional development?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>b. Translate professional degrees and/or school documents from another country into English and organizing them for presentation?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>c. Get your transcripts of schooling from another country evaluated by a professional here, to see what careers or academic choices are open to you?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>d. Identify and consider new employment options which differ from, but are related to, your primary career objective?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>e. Create ways to “network” among people working in your field of expertise or interest?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>F. Enroll in a Career Guidance course at a local community college?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>g. Do “informational interviews” with firms or individuals connected with your profession?</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
2. Did your work in this module help you in any of the following areas?

<table>
<thead>
<tr>
<th>Understand better how to</th>
<th>Yes/No</th>
<th>Please comment on either:</th>

I. DOCUMENT IDENTIFICATION (Class of Documents):

All Publications:
Tierra de Oportunidad

Series (Identify Series):

Division/Department Publications (Specify)  
Adult Education Policy & Planning Unit
YAAES Division, Specialized Programs Branch, California Dept. of Education

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic/optical media, and sold through the ERIC Document Reproduction Service (EDRS) or other ERIC vendors. Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce the identified document, please CHECK ONE of the following options and sign the release below.

☐ Sample sticker to be affixed to document
☐ Sample sticker to be affixed to document  
☐ Permitting microfiche (4"x 6" film), paper copy, electronic, and optical media reproduction
☐ Permitting reproduction in other than paper copy.

Sign Here, Please

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but neither box is checked, documents will be processed at Level 1.

"I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce these documents as indicated above. Reproduction from the ERIC microfiche or electronic/optical media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries."
