The five-volume directory describes more than 1,200 discretionary grants and contracts supported by the Research to Practice Division of the Office of Special Education Programs. The projects are grouped into sections representing the seven program areas of the Individuals with Disabilities Education Act Amendments (1997), Part D. This volume, the fifth of the directory, describes projects designed to assist state educational agencies and their partners in reforming and improving their systems for providing educational, early intervention, and transitional services including systems for professional development, technical assistance, and dissemination of knowledge about best practices. The 85 projects are grouped by funding competitions and include information on grant number, title, project director, beginning and ending dates, and contact information. An abstract usually describes the project's purpose, proposed method, and proposed products. Three indexes are provided: (1) a project director index; (2) an organization index; and (3) a subject index. (DB)

This directory, which is presented in five separately published sections, describes more than 1200 discretionary grants and contracts supported by the Research to Practice Division of the Office of Special Education Programs, which administers the discretionary programs authorized by the 1997 amendments to the Individuals with Disabilities Education Act (IDEA). The projects were funded under the provisions of the original IDEA but for the purposes of this directory are grouped into five separate sections representing the seven program areas of the newly authorized IDEA Part D:

1: **Research, Innovation and Evaluations** (which covers two programs: Research and Innovation and Studies and Evaluations)

2: **Personnel Preparation**

3: **Technical Assistance, Dissemination, and Parent Training** (which covers two programs: Technical Assistance and Dissemination and Parent Training and Information)

4: **Technology and Media Services**

5: **State Improvement**

This section of the directory, “State Improvement,” presents projects designed to assist State educational agencies and their partners in reforming and improving their systems for providing educational, early intervention, and transitional services, including their systems for professional development, technical assistance, and dissemination of knowledge about best practices, to improve results for children with disabilities.

Within this section of the directory, the projects are grouped by the competitions under which they were originally funded. Access to the project information is enhanced by several indexes, which include:

- Project Director Index
- Organization Index
- Subject Index

This directory is also accessible as a searchable database on the World Wide Web. The Uniform Resource Locator is [http://www.cec.sped.org/osep/search.htm](http://www.cec.sped.org/osep/search.htm)

If any errors are found in this material, please report them to the ERIC/OSEP Special Project (chriss@cec.sped.org) so that future editions of the directory and the database will be as accurate as possible.
Competition 84.029H:
State Education Agency Grants
**State Improvement**

**Grant Number:** H029H40001

**Special Education for Culturally & Linguistically Diverse Exceptional Student (SECLDES)**

**Project Director:** GILLES, CYNTHIA  
**Beginning Date:** Sep 1, 1994  
**Ending Date:** Aug 31, 1999

**Purpose:** This project will address the substantial statewide shortage of dually certified special education and bilingual personnel currently available to meet the educational needs of culturally and linguistically diverse students with disabilities attending public schools. This population includes non-English speaking, limited-English-proficient, and bilingual students. Adequate numbers of appropriately trained teachers are a prerequisite in identifying and addressing the special education needs of exceptional students with culturally and linguistically diverse backgrounds through nondiscriminatory assessment, appropriate placement, and culturally and linguistically relevant special education programming. Such appropriately trained personnel must be sufficiently reflected throughout the state’s system of bilingual special education programs, from the teacher preparation institutions to the 23 public schools serving 11,378 culturally and linguistically diverse students identified as having disabilities. The current statewide number of 139 teachers certified in bilingual/special education, which represents an overall ration of 82 students per teacher, substantially fails to exemplify sound educational practice or comply with minimal legal standards intended to serve and protect this at-risk population. This project is intended to promote excellence among, provide skill development to, and increase both numbers and capacities of future and current teachers, enabling and empowering them to better serve this targeted population. The goals are: * To establish two to four statewide training consortia involving institutions of higher education, local school districts, and/or collaboratives in order to develop expertise in the training and retraining of teachers serving culturally and linguistically diverse students with disabilities, leading to an increased number of teachers with dual certification in special education and bilingual/ESL education; * To provide training and technical assistance to the bilingual and special education professionals in school districts in order to support appropriate assessment strategies, identify appropriate placements for students with disabilities, and acquire appropriate instructional strategies to teach to the talents and needs of linguistically and culturally diverse exceptional students.

**Grant Number:** H029H40002

**The Alabama Consortium: SEA, IHEs and CSPD**

**Project Director:** EAST, BILL  
**Beginning Date:** Jun 1, 1994  
**Ending Date:** May 31, 1999

**Purpose:** This five-year project will assist the Alabama Special Education Consortium in addressing the state’s personnel needs in special education at the preservice and inservice levels. The consortium is
formed by the State Department of Education’s Division of Special Education Services (DSES), the Alabama Comprehensive System of Personnel Development Committee, and the 14 Alabama colleges and universities approved to offer special education teacher preparation programs. The identified critical needs are: emotional conflict, learning disabilities, mental retardation, mild learning/behavioral disabilities, and speech language pathology. Preservice training will consist of the recruitment of two undergraduate and/or graduate students with general education certification or those seeking certification through an alternative fifth-year program in the identified need areas at each institution of higher education. Each institution will receive two incentive awards per approved program certification area to provide student support for three years. Inservice training will focus on inclusive education. Workshop materials for the inservice component will be developed with the assistance of the Southeast Regional Resource Center. After completing training, consultants from each institution of higher education will receive funds to provide inservice programs in their areas for teams of public school administrators and educators. The building-based teams will consist of the principal, a general educator, a special educator, and related personnel from the same school. When trained, the team of administrators and educators will be able to provide training for other colleagues in their schools.

Grant Number: H029H40003

Pennsylvania Comprehensive System of Personnel Development

Project Director: BOST, LOUJEANIA

BEGINNING DATE: Oct 1, 1994

ENDING DATE: Sep 30, 1999

Purpose: Pennsylvania is in the midst of educational reform. In 1990, sweeping changes were made in special education regulations, followed by substantive changes in the funding system. These changes are facilitating true changes in the manner in which programs are delivered to students with disabilities, from self-contained separate programs to support for students with disabilities in regular classrooms. Changes in special education paved the way for reform of Pennsylvania's total educational system through its revised curriculum regulations. Better known as Chapter V, these regulations call for outcomes-based education and facilitate true restructuring at the district level. The third component of this trilogy of change involves higher education. Systemic reform of higher education is underway. As the third component of sweeping reform of the entire educational system, the State Board of Education is in the process of conducting hearings on what its higher education system of the future will be. Draft regulations will be presented in the near future which reflect a sentiment of local school collaboration with higher education in teacher training. Pennsylvania's Comprehensive System of Personnel Development (CSPD) is designed to assure an adequate supply of qualified personnel, including special education and related services personnel and leadership personnel. The CSPD interfaces systems change initiatives with preservice and inservice training, augmented by supplementary services. This creates a community-based system whereby personnel within the Commonwealth's 501 school districts are capable of delivering quality education and related services to all infants, toddlers, children, and youth, including those with disabilities.
Grant Number: H029H40004

Project Ho’okoho: Inservice Training for Personnel
Working with Special Needs Populations

Project Director: AIZAWA, HERMA

HAWAII SEA
PO BOX 2360
HONOLULU, HI 96813
(808)586-3310

Purpose: Project Ho’okoho is the Hawaii Department of Education’s inservice training mechanism to address needs and priorities identified by the State of Hawaii’s Comprehensive System of Personnel Development. The major purpose is to assist in the establishment and maintenance of a statewide, systematic inservice training program for personnel working with children and youth who have special needs. The project comprises four major activities: * The delivery of inservice training modules; * The ongoing coordination of workshops, conferences, and other training activities related to disabilities; * Ongoing, comprehensive inservice training to Hawaii school administrators; and * Support of regular and special education partnerships. Since 1981, members of the Department of Education, professors at the University of Hawaii, and other professionals have developed modules for Project Ho’okono. The project’s library consists of more than 100 competency-based modules that are delivered by a cadre of trainers at school sites. The project also serves as a liaison and coordination point for the many topical conferences on disabilities sponsored by individual school districts, state agencies, and community organizations. During a given year, the project sponsors and co-sponsors statewide conferences, including the Special Education Conference, the Pacific Rim Conference on Disabilities, and the Special Parent Information Network (SPIN) Conference. The State Department’s Special Education Section also sponsors statewide conferences for its transition and preschool staff. In the effort to promote collaboration between special services teams and other professional staff, the project co-sponsors inservice training for speech pathologists, occupational and physical therapists, psychological examiners, educational evaluators, school social workers, and other diagnosticians to further strengthen the team approach. The project also supports the efforts of regular and special education teachers as they move toward creating an inclusive school environment for students with disabilities. During the 1992-93 school year, Ho’okono activities reached approximately 4,220 teachers, 1,830 related services personnel, 350 paraprofessionals, 600 educational officers, and 450 parents. The new federal grant will continue and expand on these activities.

Grant Number: H029H40006

CSPD in Indiana

Project Director: MARRA, ROBERT

INDIANA SEA
DIVISION OF SPECIAL ED STATE HOUSE, ROOM 229
INDIANAPOLIS, IN 46204
(317)232-0570

Purpose: This project addresses one critical issue and two critical inservice needs. The critical issue is the management and coordination of Indiana’s Comprehensive System of PEOPLE Development. The two inservice needs are: * To provide preservice and inservice training regarding inclusion, collaboration,
and interagency cooperation as they relate to least restrictive environment and free, appropriate public education of infants, toddlers, children and youth with disabilities and their families; and * Training in policies, procedures, rules and regulations.

Grant Number: H029H40007

TLC for LEAS: Training Leadership Competencies for Local Education Agencies

Project Director: HAYDEN, HAL

KENTUCKY SEA
DIVISION OF EXCEPT CHILD SERVICES
500 MERO ST, RM 809
FRANKFORT, KY 40601
(502)564-4970

Beginning Date: Oct 1, 1994
Ending Date: Sep 30, 1999

Purpose: The Kentucky Education Reform Act of 1990 (KERA) is driving change in the way education is being provided to Kentucky's children. KERA is redefining the service role of the Kentucky Department of Education, and creating new mechanisms to assure accountability. KERA encourages such concepts as collaboration and inclusion through its ungraded primary and other programs. This project will provide inservice to local education agency personnel and related service personnel to prepare them to meet the needs of infants, toddlers, children, and youth with disabilities, and to assist them in complying with federal and state mandates. It contains three goals: * To coordinate and implement a statewide system for training and support of local education agency personnel; * To train local education agency personnel in the management, leadership, and instructional skills necessary for effectively serving children and youth with disabilities; and * To train local education agency personnel in priority topics through the use of interactive television and follow-up training packets. Initiative 1 is the provision of training resources and coordination of eight Regional Exceptional Children Consultants (RECCs). The RECCs will serve all local education agencies through the same eight geographic areas of the Regional Service Centers that were created by the KERA. The RECCs will train local education agency and related service personnel in priority topics and other identified topics. They will also assist local districts with training to prepare for monitoring, with implementation of corrective action plans, due process hearings, or complaints and with developing Part B applications for IDEA funds. They will assist the State's Division of Exceptional Children Services, when appropriate, with on-site monitoring outside their assigned region, and with complaint investigations. Initiative 2 is the provision of training via interactive television or computers for local education agency and related service personnel. Because KERA created a demand for massive retraining of local personnel, districts are grateful to receive training without travel expenses or substitute teachers. All school districts can receive the personnel development STAR Channel of Kentucky Educational Television (KET). With the advice of nationally known consultants, training will be conducted on prioritized topics identified by the latest CSPD Report, local personnel, and staff of the Division of Exceptional Children Services. Training will be aired over the statewide network of KET, over the television network of the universities, by computers, or by other means which may become available. Trainees will include administrators, supervisors, guidance counselors, regular and special education teachers, related service personnel, and parents. At the end of five years, personnel in all school districts in Kentucky will have had an opportunity to benefit from the training provided by this project.
Grant Number: H029H40008
An Inclusive Elementary and Special Education Preparation Program for Teachers

Project Director: MEYERS, DEAN

SOUTH DAKOTA SEA
700 GOVERNORS DR
PIERRE, SD 57501
(605)773-4698

Beginning Date: Oct 1, 1994
Ending Date: Sep 30, 1999

Purpose: Quality inclusive schooling entails the delivery of special education services in regular education classrooms and neighborhood schools, rather than in alternative, self-contained classrooms and segregated disabled-only schools. The Inclusive Elementary and Secondary Preparation (IESEP) project will challenge teachers and other school personnel to collaborate across traditional disciplinary lines—therapist with teacher, and regular education teacher with special education teacher. The IESEP program will also challenge university faculty to begin designing a teacher education program that incorporates a variety of innovative research-based teaching practices. A redesigned teacher education program is a necessary component if coordination and collaboration are going to continue to occur among school district and university personnel. In general, preservice education has been reluctant to redesign curriculum and teaching techniques to more closely align with school district efforts. This will change through the efforts of this project and the efforts of Black Hills State University faculty. Future students will graduate from Black Hills State University with a bachelor’s degree in Inclusive Elementary and Special Education. Elementary education majors of the future will no longer have the option of choosing special education as a second major; it will be included in their teacher preparation program. Therefore, the IESEP program represents a commitment by Black Hills State University’s College of Education to begin to model the teacher education program on the principles and practices recommended and supported in schools. The development of Professional Development Schools is extremely important to the success of this project. The Professional Development Schools will provide the sites for the field experiences and support the inclusive teacher education program. Intensive and varied field experiences will begin during the student’s sophomore year. Students will participate in a sequence of school placements at both primary (K-3) and intermediate (grades 4-6) levels and will be supervised by both regular and special education cooperating teachers. In addition to a school placement during the sophomore year, students are assigned in pairs to spend time weekly throughout the school year with a child with disabilities. These placements will be arranged by schools, and community and family support agencies, and are intended to give students a child and family perspective. The junior year includes a series of weeklong placements closely linked with coursework in elementary content areas and special education. Students will be required to complete a portion of these placements working with secondary age students with disabilities (to accommodate the inclusion of grades 7-12 in the special education certification). Finally, during the senior year student teaching experience, students will be placed in a fully inclusive classroom where children with a range of disabilities receive their special education services in the regular classroom rather than in a disabled-only setting.
Grant Number: H029H40009

Statewide Training on Delivering Services in Inclusive Settings:
Staff Development for Experimental Model Teams

Project Director: HERNER, JOHN

Beginning Date: Sep 1, 1994
Ending Date: Aug 31, 1999

OHIO SEA
DIVISION OF SPECIAL ED 933 HIGH ST
WORTHINGTON, OH 43085
(614)466-2650

Purpose: The intent of this project is to facilitate, on a statewide basis, the meaningful inclusion of students with disabilities into integrated regular education environments by providing comprehensive inservice training to school building teams in all areas of the state. Currently, Ohio Rules for the Education of Handicapped Children prohibit special educators from delivering services to students with disabilities in regular education classrooms. In an effort to break down some of the barriers between regular and special education that state rules and interpretations have created, the Ohio Department of Education's Division of Special Education has begun to allow school districts to convert existing special education teacher units to "experimental model" status. The implementation of one of the four types of experimental units allows districts to operate outside existing state rules, making it possible for special education teachers and regular education teachers to collaboratively plan and deliver services to students with disabilities. Experimental models also make it possible for special education teachers to work with at-risk students, who are not identified as having a disability, on a limited basis. Two of the four experimental models promote the inclusion of students with disabilities into regular education environments. This project will provide comprehensive and ongoing staff development to 96 five-member building-level teams per project year, for a total of 480 building teams, or 2,400 trainees by the end of the five-year period. Each five-member team will include the building principal, the key regular and special education teachers implementing the experimental model, a parent, and one other team member, chosen at the building staff's discretion. Only schools that have made a commitment to operate an inclusive experimental model will be eligible to participate on teams. Each experimental model building-based team will participate in an intensive workshop and three follow-up meetings held throughout the school year. Training activities will be conducted by state and regional staff, with the assistance of national-level consultants. A small portion of grant funds will be devoted to assisting at least one district in each of Ohio's sixteen special education regional resource center (SERRC) areas to become a fully inclusive model site. Further, project information, findings, and outcomes will be disseminated through the establishment of a practitioners' network that encourages ongoing interaction among school personnel across Ohio.
State Improvement

Grant Number: H029H40010

Kansas Comprehensive System of Personnel Development

Project Director: KELLY, PHYLLIS

KANSAS SEA
120 SE 10TH AVE
TOPEKA, KS 66612
(913)296-3867

Beginning Date: Oct 1, 1994
Ending Date: Sep 30, 1999

Purpose: The goal of this project is to enhance the capability of the Kansas State Board of Education (KSBE), institutions of higher education, and local education agencies to develop and refine the professional and leadership excellence of Kansas educators. Through this project, the CSPD will function in seven areas: personnel development, information assistance, product development, recruitment and retention, needs assessment and policy development, evaluation and research, and collaborative planning. Activities in these areas are summarized below. PERSONNEL DEVELOPMENT * Regional personnel development programs; * Local personnel development program technical assistance; * Personnel development via interactive television; * Statewide conferences; * State-sponsored personnel development for administrators, teachers, related services personnel, paraprofessionals, faculty in higher education, parents, advocates, and KSBE staff; and * Internships to local education agency model training sites. INFORMATION ASSISTANCE * A toll-free hotline to provide information about services and resources; * SpecialNet distribution of a personnel development calendar and national information linkage; * Project PIN (Professional Information Network) through the Southeast Kansas Education Service Center; and * Consultative services upon request. PRODUCT DEVELOPMENT * Modules created for personnel development programs; * Packets containing information pertaining to prioritized areas of need; and * Media developed to supplement printed training materials. RECRUITMENT AND RETENTION OF SPECIAL EDUCATION PERSONNEL * Refinement of a supply data model; and * Development and implementation of strategies for recruitment and retention. NEEDS ASSESSMENT AND POLICY DEVELOPMENT * CSPD needs assessment; and * Policy review and development in the areas of local in-service plans, certification, accreditation, and institutions of higher education program approval. EVALUATION AND RESEARCH SYSTEM * Evaluation of CSPD training efforts; and * Research areas of concern in the CSPD area. COLLABORATION ACTIVITIES AMONG KSBE, HIGHER EDUCATION, AND LOCAL EDUCATION AGENCIES * Conferences and meetings; and * Identification of priorities for CSPD collaborative efforts.

Grant Number: H029H40011

Training Personnel for the Education of Individuals with Disabilities
Grant to State Education Agencies

Project Director: TERRY, CINDY

ILLINOIS SEA
100 NORTH1ST ST
SPRINGFIELD, IL 62777
(217)524-4832

Beginning Date: Oct 1, 1994
Ending Date: Sep 30, 1999

Purpose: The Illinois Legislature and the governor have allocated the Illinois State Board of Education a separate budget line item of $1,200,000 for Regular Education Initiative activities to be used for person-
nel development. This project will be an additional resource for addressing the Regular Education Initiative through training, and for continuing work on other activities that have been undertaken for personnel development. A newly structured Comprehensive System of Personnel Development has emerged, as the former CSPD Committee and the Higher Education Advisory Council were merged to support the concept of personnel development as a seamless system of continuing education, from preservice through inservice. Educational Service Regions throughout Illinois will serve as conduits for the Regular Education Initiative training and for training on IEP development and transition planning as part of the IEP.

Grant Number: H029H40012

Comprehensive System of Personnel Development (CSPD)

Project Director: NASH, LYNNE

ARIZONA SEA
1535 W JEFFERSON
PHOENIX, AZ 85007
(602)542-3184

Beginning Date: Oct 1, 1994
Ending Date: Sep 30, 1999

Purpose: The current demand for training local school district staff in Arizona on specific issues in the education of children with disabilities is reflected in the most recent needs assessment conducted by the State CSPD Advisory Committee, which sent 2,902 survey instruments to all district and site administrators of public and private schools and agencies, teachers, related service personnel, university personnel, parents, and the Arizona Department of Education staff. The response to the survey indicates the following needs, which this project will address: * All 1,027 returned surveys indicated a need for additional preservice and inservice training of special educators to provide quality teaching for children with disabilities. * The three areas of training identified as the highest priorities by 68 percent of respondents were: (a) educational programming (including strategies for the regular classroom, collaboration, behavior modification, and transdisciplinary teaming); (b) attention deficit disorder (including characteristics, assessment, strategies for the classroom, and service delivery); and (c) legal issues (especially mediation and discipline of students in special education). * Other areas of training identified as being high priority needs were: bilingual and multicultural issues (including assessment, cultural sensitivity, language acquisition, and teaching methods and curriculum materials) and least restrictive environment (including continuum options and placement). * Principals (21 percent) identified legal issues, attention deficit disorder, and educational programming as their priorities for training. * Directors of special education (48 percent) identified assessment, bilingual and multicultural issues, and educational programming as their training needs. * Teachers (30 percent, general and special educators) identified educational programming, attention deficit disorder, legal issues, and collaboration as their highest priorities. * School psychologists (73 percent) identified assessment, least restrictive environment, and bilingual and multicultural issues as their training needs. * Related service personnel (20 percent) identified educational programming and assessment as their training needs. * The CSPD Advisory Committee identified least restrictive environment, bilingual/multicultural issues, and educational programming (focusing on inclusion) as their training needs. * The State Department staff identified secondary transition and programming, other health impaired issues, medically fragile children, preschool issues, bilingual and multicultural issues, the Arizona Student Assessment Program, site-based management, least restrictive environment, and discipline of students in special education as their training needs.
Grant Number: H029H40013

Training Personnel for the Education of Individuals with Disabilities

Project Director: ROSEN, PAMELA

MAINE SEA
STATE HOUSE STATION #23
AUGUSTA, ME 04333
(207)287-5119

Purpose: Through this project, a comprehensive multi-method training program will dramatically change the way Pupil Evaluation Team meetings (PETs) are conducted to develop Individual Education Plans (IEPs). Training of the broader educational community of parents, school board members, and regular and special educators (including administrators, related services personnel, and auxiliary services personnel) is integral to this process. The training plan has been developed to help education personnel and parents overcome several barriers in the implementation of a free and appropriate education. Those barriers are perceived to be: (a) a lack of shared knowledge of the rules and regulations developed as a result of the Individuals with Disabilities Education Act (IDEA); and (b) the resulting frustration and animosity between the parties. Through expanding the network of existing partnerships in Maine, preservice and in-service training will be delivered to educational personnel in their own regions. Through the use of interactive television and the train-the-trainer model, parents and professionals will receive training in their local districts. Modules will be integrated into conference and workshop strands of existing projects, thereby promoting collaboration and cross training throughout the state. The training curriculum includes specific content areas and process skills in special needs evaluation, identification procedures, and appropriate use of related and auxiliary services. The training will use a team-building process incorporated with content knowledge so that those who are trained will be able to participate in a process resulting in meaningful IEPs with objectives which may be successfully implemented. Educational personnel will be more equipped to provide education in the least restrictive environment, utilizing an appropriate level of supportive services. The identification process will result in a partnership of those parties involved.
Discretionary Projects Supported by OSEP

Grant Number: H029H40014

Part D Training Personnel for Education of Individuals with Disabilities

Project Director: PARSONS, DEBORAH

Beginning Date: Oct 1, 1994
Ending Date: Sep 30, 1999

MISSOURI SEA
PO BOX 480
JEFFERSON, MO 65102
(314)751-8165

Purpose: This new federal grant will assist Missouri in maintaining preservice programs for educational interpreters and provide inservice programs to prepare special and regular education personnel, including teachers and administrators to meet the needs of children and youth with disabilities in inclusive education settings. The major goals of the project are: * To continue support for the Interpreter Training Program at William Woods University for two years; and * To develop and implement a training initiative in the areas of collaboration and inclusive education. The project’s activities in collaboration and inclusion will be conducted by the Department of Elementary and Secondary Education, in conjunction with the Special Education Dissemination Center (SEDC) and the Missouri LINC projects, which will be merged to provide more effective technical assistance. The broad mission of the center will be the provision of services to consumers through training, research and development, and product dissemination. The center will include four interdependent operating components which will also be interactive: * Product dissemination * Resource library * Training and instruction * Research and development Financial support for this project’s inclusion activities will begin in 1994-95, will gradually increase in 1995-96, and will be the primary focus of the remaining three years of the funding cycle.

Grant Number: H029H40015

Louisiana Training and Recruiting Project

Project Director: COULTER, EMILIE

Beginning Date: Jul 1, 1994
Ending Date: Jun 30, 1999

LOUISIANA SEA
PO BOX 94064
BATON ROUGE, LA 70804
(504)763-3933

Purpose: Over the past four years, the Louisiana Department of Education’s Office of Special Education Services (OSES) and 13 university programs have dedicated the resources of the Louisiana Training and Recruiting Project toward increasing the number of qualified, dually certified special education teachers by recruiting new personnel from regular education training programs and special education. Those personnel who are recruited return the investment of stipends received by teaching in special education assignments in Louisiana schools once certification is achieved. Through this new grant, the Louisiana Training and Recruiting Project will build on past accomplishments and focus on three areas identified by the Louisiana Special Education State Plan for 1994-96. The overall goal for the CSPD in the State Plan projects that, by the Year 2000, Louisiana will have sufficient numbers of qualified, competent, and caring personnel (including minority personnel and persons with disabilities) to provide an effectively coordinated service delivery system for individuals with special needs (birth to age 22) in the state. The priority objectives for achieving that goal are as follows: * establish an ongoing, comprehensive needs assessment process which provides effective collection, analysis, and interpretation of personnel supply/demand and trend data for achieving a more inclusive service delivery system; * increase the number of entry level per-
sonnel of appropriately trained individuals for education, health, and human services to show significant progress in meeting the demands of a more inclusive special education delivery system; * establish a coordinated system for continuing (inservice) education based on current data analysis, and train personnel from regular education, special education, related services, leadership, parent and professional groups, and other agencies by providing quality training, technical assistance, evaluation and dissemination activities; and * establish a framework for an interagency, multilevel, coordinated system of continuing education for personnel serving children with disabilities and their families, to ensure a smooth transition of services, including transition services for children moving from Part H to Part B eligibility. This five-year project will have two major goals. * Goal 1 is to increase the number of fully certified personnel teaching in special education in Louisiana by assisting temporarily certified personnel to achieve certification for an estimated total of 1,000 personnel per year for the next five years. Activities toward meeting this goal include: (a) development of the advisory process to determine criteria for competitive subgrants totaling $80,000 to be awarded to accredited programs to enhance and expand outreach efforts, and coordinate coursework offered through the higher education institutions; (b) to increase the number of, and access to, courses needed by the majority of personnel on temporary certificates, through technology and coordination; and (c) to provide ongoing evaluation of the results of the effort and utilization of the analysis for planning for the next five-year project. * Goal 2 is to increase, by 50-plus personnel over the next five years, the number of speech, language, and hearing specialists available in Louisiana to provide services for Part B and Part H eligible children and their families. The activity components include: (a) development of the advisory panel for refinement of the comprehensive needs assessment for this service area, and determination of criteria for competitive grant applications of $41,000 to support training through non-traditional and innovative efforts of an existing accredited program; (b) to increase the number of language and hearing specialists through the enhancement and/or coordination of non-traditional or innovative programs for recruiting and retaining prospective therapists; and (c) to evaluate the results of these efforts, and utilize the analysis for planning the next five-year project.

Grant Number: H029H40016

Meeting Personnel Training Needs in Texas

Project Director: RILEY, MELINDA

Beginning Date: Nov 1, 1994
Ending Date: Oct 31, 1999

TEXAS SEA
1701 NORTHCONGRESS AVE
AUSTIN, TX 78701
(512)463-9414

Purpose: The Texas Education Agency’s project will support two priority areas: * Meeting the needs of culturally and linguistically diverse students with disabilities through alternative certification; and * Non-traditional training in speech-language pathology. This project will continue to develop alternatives to address severe personnel shortages and eliminate barriers created by traditional staffing patterns and traditional four-year college programs, by supporting a pilot alternative certification program to prepare bilingual educational diagnosticians. The project will also continue support for two non-traditional graduate programs in speech-language pathology which will produce approximately 90 master’s level professionals by May 1995 to provide services in remote, rural areas of the state.

301 N Wilmington St  
Raleigh, NC 27601  
(919)715-1565

*Purpose:* The objectives of North Carolina's training grant are to: A) Provide leadership training for exceptional children's program administrators to meet certification requirements and to improve current educational practices. B) Provide intensive training institutes to meet the needs of professionals who have been identified through certification regulations or self-evaluation as needing essential competencies necessary for their roles as teachers of exceptional children. Offerings will include: *Structure of the behaviorally/emotionally handicapped classroom; *Braille for the beginning teacher; *Cooperative teaching; *Learning strategies: Advanced institute; *Learning strategies: Beginners’ institute; *Learning disabilities: Methods and materials; *Learning disabilities: Current concepts and issues; *Infusing transition into the IEP process; *Transition planning and implementation: Intergroup collaboration, supported employment, and job coaching; *Improving interpreter skills: Intermediate and advanced; *Educational teaming for the student who is deaf or hard of hearing; *Social skills programming for behaviorally/emotionally handicapped classrooms; *Speech-language specialists supporting students in general education classrooms; *Working in regular classes with students who are visually impaired; *Behavior management; *Very special arts; *Evaluating and enhancing cognitive vision in preschool multihandicapped children; *Collaborative integrated curriculum management for exceptional children’s programs; and *Structure and function of the eye and low vision. C) Provide minimal tuition support for speech and language specialists and teachers of students who are severely or profoundly handicapped, who must take higher education courses in order to meet the provisional certification requirements for continued employment.

**Wisconsin Personnel Preparation Project**

*Project Director:* ROGERS-RHYME, ANNE  
*Beginning Date:* Jul 1, 1994  
*Ending Date:* Jun 30, 1999

Wisconsin Sea  
125 S Webster St  
Madison, WI 53702  
(608)266-1146

*Purpose:* Training activities for this project have been chosen on the basis of identified priorities and extent of need, as documented in the Wisconsin State Program plan for 1993-95 and CSPD, the 1993 report on Supply of and Demand for Educational Personnel for Wisconsin Public Schools, and the 1993 statewide professional development needs assessment survey. In order to meet Wisconsin's overall CSPD goal, three objectives have been selected as the major activities of this project: * To increase the retention of teachers of students who have learning disabilities or emotional disturbance, particularly those teachers on emergency licenses, by supporting mentorship models in local districts in collaboration with institutions of higher education; * To support the leadership training needs of directors and designees of special education and pupil services, building principals, and M-Team Coordinators; and * To develop and implement training opportunities for paraprofessionals serving students with disabilities, through statewide con-
ferences and training opportunities in local districts and cooperative education service agencies (CESAs). In addition, through discretionary funds Wisconsin also operates four major statewide CSPD initiatives, as follows: * The Wisconsin School Inclusion Project helps schools to develop the capacity to educate students with disabilities in the most inclusive manner that is appropriate to their exceptional education needs. * Project SELECT increases the number of fully licensed ED and LD teachers by assisting teachers on emergency licenses with an alternative certification system to complete the necessary coursework for a regular license. * The Wisconsin Assistive Technology Initiative develops and implements assistive technology evaluation sites, collects and loans assistive/augmentative devices, and provides training to educators and paraprofessionals. * The Wisconsin ADD Project provides educators and parents with training, a newsletter, resource materials, and evaluation of students with attention deficit disorders. Collectively, these project objectives and statewide initiatives will assist in meeting Wisconsin's goal of a Comprehensive System of Personnel Development, which has a large interagency focus and includes cooperation among local districts, cooperative education service agencies, institutions of higher education, and the state agency.

**State Training Grant for Personnel Preparation**

*Project Director*: HOUSTON, DEBBY

**FLORIDA SEA**

325 W GAINES ST, SUITE 622

TALLAHASSEE, FL 32399

(904)488-1106

**Beginning Date**: Oct 1, 1994

**Ending Date**: Sep 30, 1999

**Purpose**: This project supports Florida's capacity to ensure adequate numbers of qualified personnel to meet the educational needs of infants, toddlers, and youth with disabilities. Consistent with the priorities established by the Florida Comprehensive System of Personnel Development: Oversight Committee, the objectives of the project are as follows: * To enhance coordination and facilitation of efforts among state and local education agencies, institutions of higher education, other agencies, professional associations, and parents in all personnel development activities necessary to meet Florida's critical teacher shortages and quality program needs; * To develop and maintain a personnel data system to assist the State in addressing current and projected exceptional education and related services personnel needs; * To enhance capabilities for recruitment and retention of qualified personnel, including persons from minority backgrounds and those with disabilities; * To enhance capabilities for establishing new professional standards and training of exceptional education, regular education, and related services personnel to ensure quality of services provided to students with disabilities and their families; and * To identify, develop, evaluate, and promote the use of alternate training delivery models proven to be effective in impacting personnel development in critical needs areas. The project will enhance Florida's capacity for the coordination and implementation of preservice training, inservice, and continuing education activities; recruitment and retention of teachers in exceptional education; the implementation of revised endorsement requirements for teacher competencies and development of a new model for certification; and the replication of effective alternative training models. It will also support the effective use of personnel data and Regional Personnel Development Partnerships in Florida's Comprehensive System of Personnel Development.

Advancing the Frontier: Wyoming Special Education Personnel Training

Project Director: STERRE, ELIZABETH

WYOMING SEA
2300 CAPITOL AVE
CHEYENNE, WY 82002
(307)777-7708

Beginning Date: Jul 1, 1994
Ending Date: Jun 30, 1999

Purpose: This project represents a systematic effort to apply the best of what is known from current research in staff development and special education toward three goals that have been identified by a representative sample of the 680 special education personnel in the State of Wyoming who serve the needs of more than 10,600 special education students, as of the December 1992 child count. The goals are: * TRAINING: To provide special and regular education personnel and parents of children with disabilities with inservice training reflecting needs assessments and program evaluation priorities; * RECRUITMENT: To provide assistance and enhancement to statewide efforts to recruit and retain qualified special education and related services personnel; and * DISSEMINATION: To disseminate current research and best practices information on targeted areas of concern and to disseminate information on training opportunities offered by other agencies. These goals were developed by the Wyoming Department of Education and the Wyoming CSPD Committee in response to the needs of special and general educators, related service providers, administrators, and parents throughout the State of Wyoming.

Grant Number: H029H40021

Training Personnel for the Education of Individuals with Disabilities

Project Director: BERGANT, MARGARET

OKLAHOMA SEA
2500 N LINCOLN BLVD
OKLAHOMA CITY, OK 73105
(405)521-3351

Beginning Date: Jul 1, 1994
Ending Date: Jun 30, 1999

Purpose: Oklahoma’s goal for its 1994-96 training grant focuses on the recruitment and retention of qualified personnel to serve children and youth with disabilities, aged birth through 21, and their families. Specific activities have been designed to accomplish this goal, including joint consortia, development of consistent higher education curricula, leadership training, distance learning, high school recruitment, and information dissemination. These activities will involve students, parents, higher education personnel, local education agency personnel, and state education agency personnel. Individuals trained through these activities will gain an awareness of special education, information on the implementation of promising practices, and awareness of training opportunities. In addition to personal gains, these activities will provide gains to the State of Oklahoma. Collaboration between higher education institutions and the Oklahoma Department of Education will improve preservice training programs, which will be in greater alignment with the Oklahoma Department of Education’s vision for infants, toddlers, children, and youth. The primary gain will be personnel who are better prepared to provided needed services to infants, toddlers, children, youth, and their families. The project will be directed by the Comprehensive System of Personnel Development team of the Department’s Special Education Section. The CSPD team includes
personnel with diverse backgrounds, and a team leader who will have overall administrative responsibility for the project.

Grant Number: H029H40022

Outcome Training for Special Education Material

Project Director: Parshall, Lucian

MICHIGAN SEA
PO BOX 30008
LANSING, MI 48909
(517)335-0460

Beginning Date: Oct 1, 1994
Ending Date: Sep 30, 1999

Purpose: As the field continues to turn education toward restructuring issues, the importance of a systematic, reliable, and up-to-date mechanism for dissemination and training relating to innovations and effective special education practices becomes even more important. Materials developed by Michigan's Office of Special Education (OSE) to address important needs such as transition and instructional effectiveness must include ongoing dissemination and training strategies to achieve full adoption. Using a concerns-based approach to adoption, the following goals comprise the focal point of this project: * To continue to train educators and parents in the purpose and use of the Program Outcomes Guides and Student Assessment Material; and * To begin the training of local transition teams in the use of materials developed through two statewide transition grants. The first goal is a continuation of long-term efforts by the OSE relating to Outcome Education. To date, this effort has retrained more than 10,800 individuals in the use and purpose of outcomes and student assessment materials. More recently, OSE has initiated two statewide efforts relating to transition of students with disabilities from school to adult life roles. One effort began with the recent receipt of a federal systems change grant for transition services, and the second is a state-initiated project. Two factors distinguish these efforts from other dissemination or staff development attempts: * Materials that comprise the focus of the dissemination and training efforts of the Outcomes materials have been proven content-valid and strategically successful over seven years. In addition, they are widely accepted for their validity and usefulness and are efficiently packaged in a usable, easily accessed format. The transition strategies are also based on this successful methodology. * A strategy that provides assistance and direction at the "grass roots" level, with easily recognizable benefits and promises of immediate success for stakeholders, as well as those with whom they come into contact, through a well supported resource network of trainers. The intent of the project is to provide the opportunity for EVERY special education professional in the State of Michigan to receive training in the area of transition over a 60-month cycle. In addition, every special educator will have received training over a final 12-month period in the area of outcome education.
Grant Number: H029H40023
To Increase the Pool of Special Education & Related Services Personnel Who Work with Individuals Having Disabilities

Project Director: DUNCAN, EDNA
Beginning Date: Oct 1, 1994
Ending Date: Sep 30, 1999

MISSISSIPPI SEA
PO BOX 771
JACKSON, MS 39305
(601)359-3494

Purpose: Mississippi continues to experience a shortage of certified special education teachers and related service personnel. Continued formalized studies to determine the reasons for this critical shortage are needed. Also, it is necessary to address the expansion of speech-language pathology through graduate courses and alternative ways for graduate students to obtain courses, since there are only two graduate programs in the state. Innovative recruitment and retention efforts must also be addressed in a long-range plan to enable the Mississippi Department of Education to achieve its stated commitment. This project will increase the pool of fully certified special education teachers and increase the knowledge base of leadership personnel, teachers, and related service personnel. This will be accomplished through inservice training implemented through collaborative teams of district personnel.

Grant Number: H029H40024
Comprehensive System of Personnel Development Collaboration Project

Project Director: DEFANTI, ANNE
Beginning Date: Sep 1, 1994
Ending Date: Aug 31, 1999

RHODE ISLAND SEA
225 WESTMINSTER STREET
PROVIDENCE, RI 02908
(401)277-3505

Purpose: Over the coming five years, Rhode Island's Comprehensive System of Personnel Development is designed to connect to the National Goals 2000 and to the Rhode Island Department of Education's restructuring focus on ALL KIDS being ready to learn, demonstrating competency and using their minds well. Areas identified as critical and emerging needs for the CSPD in Rhode Island are: * The study of personnel needs and the training of qualified personnel to address the needs of diverse populations; * The overhaul of the IEP document and placement procedures; and * Continuing education of personnel on issues of collaboration and inclusion. Communication and coordination of all statewide CSPD activities is the goal of the newly formed interagency CSPD. This project will support this goal within the framework of the National Education Goals and the state goals in this regard.

**Grant Number: H029H40026**

**Inservice Education**

**Project Director:** SCHENDEL, JULIE

IOWA SEA
GRIMES STATE OFF BLDG
DES MOINES, IA 50319
(515)271-3936

**Beginning Date:** Jul 1, 1994
**Ending Date:** Jun 30, 1999

**Purpose:** The Iowa Department of Public Instruction’s Bureau of Special Education has made a concerted effort to enhance its current and future efforts with regard to staff development. Necessary areas of improvement in Iowa’s staff development efforts include the following: 1. Bureau of Special Education staff should enhance their skills as change facilitators; * School reform/systems change efforts must involve special education and related disciplines; * Staff development efforts must coordinate activities across general education and special education, including all instructional and support personnel and administrators from local education agency and area education agency levels; * Staff development must examine system factors, as well as individual factors in planning effective activities; * There is a need for more widespread knowledge and skills related to planning and staff development; * Staff development activities should place a heavier emphasis on skills training and generalization activities; * The Bureau of Special Education should serve as a model for effective planning and staff development; * Staff development activities must be evaluated in order to determine their impact on professional practice and student outcomes; and * Successful school reform/system change efforts should be shared with wider audiences throughout the state by a variety of dissemination activities, such as conference presentations, newsletters, mentoring relationships, and other activities. Based on the needs described above, the following are the goals for Iowa’s State Educational Agency Training Grant: 1. Apply principles of effective planning and staff development to Iowa’s CSPD process and future CSPD planning; 2. Enhance the capacity of Bureau of Special Education staff as system change facilitators through the provision of skills training and followup; 3. Expand general knowledge of principles of effective planning, staff development, and systems change among local education agency and area education agency staff, as well as higher education faculty, and promote collaboration among staff developers from general education and special education, local education agencies, area education agencies, and higher education institutions; and 4. Apply principles of effective planning, staff development, and systems change through intensive support of demonstration sites engaged in school reform efforts.

**United States Virgin Islands Program for Training Personnel for the Education of the Disabled**

**Project Director:** STRIDIRON, PRICILLA

VIRGIN ISLAND SEA
NORTH44-46 KONGENS GADE
ST THOMAS, VI 00802
(809)776-5802

**Beginning Date:** Oct 1, 1994
**Ending Date:** Sep 30, 1999

**Purpose:** This project is a collaboration with the basic preservice training program at the Teacher Education Division of the University of the Virgin Islands. Through preservice training, this project will im-
prove the quality of services for students with learning disabilities, severe/multiple disabilities, and severe emotional disorders. Additional planning will include a systematic inservice program for personnel already working with children and youth with disabilities. These activities will also focus on proficiency in technology for both personnel and pupils with disabilities. The inservice program will serve as the liaison and coordination point for the conferences on disabilities sponsored by the individual school districts and state agencies, and for the co-sponsorship of other training with various government agencies, parent groups, and community agencies. The inservice component is a major vehicle through which school personnel will be able to receive training and inservice credits on topics and needs identified at the school level.

Grant Number: H029H40028

Personnel Preparation of Teachers of Visually Impaired, & Hearing Impaired, Related Personnel & Students with Disabilities

Project Director: VALENTINE, MICHAEL

WEST VIRGINIA SEA
1900 KANAWHA BLVD EAST
CHARLESTON, WV 25305
(304)558-2696

Beginning Date: Oct 1, 1994
Ending Date: Sep 30, 1999

Purpose: This project is intended to ensure that an adequate number of skilled personnel are available and maintained to provide educational programs for students who are blind and partially sighted and students who are deaf and hard of hearing. In addition, the project will focus on inservice personnel development for educators regarding the inclusion of students with disabilities. The major goals are: * To prepare candidates for certification as teachers who can serve a wide range of blind and partially sighted learners in both day and residential school settings; * To prepare candidates for certification as teachers who can serve a wide range of deaf and hard-of-hearing students in both day and residential school settings; * To provide professional development opportunities for teachers regarding current research and best practices for blind and partially sighted and deaf and hard-of-hearing learners; * To provide professional development opportunities for teachers of visually impaired students regarding orientation and mobility; * To provide professional development opportunities for interpreters of deaf students and braille specialists for blind students; and * To provide inservice professional development to special and regular educators, related services and early intervention personnel, and their supervisors regarding the education of students with disabilities in inclusive learning environments. It is anticipated that training opportunities will be provided to 10 teachers of students with visual impairments and 15 teachers of students with hearing impairments over a three-year period. In addition, it is anticipated that at least 20 teachers of students with sensory impairments will participate in coursework to update and upgrade their skills. The project also expects the participation of a significant number of interpreters for deaf students and braille specialists serving blind students within the state in training opportunities. Eight additional school sites per year will benefit from professional development opportunities in the education of students with disabilities in inclusive environments. The project is strengthened by regional collaboration and cooperation among the West Virginia Department of Education, The West Virginia Schools for the Deaf and the Blind, Western Maryland College, the Virginia Department of Education, the West Virginia Graduate College, and local education agencies in the state. Faculty from out of state will travel to West Virginia to provide training or will conduct training via satellite at identified sites.

State Education Agency Program

**Project Director:** MAREK, ANN

**Beginning Date:** Oct 1, 1994

**Ending Date:** Sep 30, 1999

NEVADA SEA
400 W KING ST
CARSON CITY, NV 89710
(702)687-3140

**Purpose:** This project provides a collaborative model for both preservice and inservice training which will meet the needs identified through the emerging five-year strategic plan of Nevada’s Comprehensive System of Personnel Development and the strategic planning of both the CSPD Steering Committee and the sub-committee assignments. Other methods employed to ascertain the types of training desired and the methods for delivering training have been, and will continue to be: needs assessments; result of monitoring activities; input of school districts including parent advisory groups, agencies, and task force committees; technical assistance requests; state and national priorities; and the topics requested by districts. Training needs are impacted by a variety of forces, such as rapid growth, Nevada’s geographic constellation, the continuing shortage of qualified personnel, increasing diversity of populations, significant growth in the area of early childhood, reduction of fiscal resources, the influence of reform, and the changing roles of educators and parents. Within this framework, the CSPD Steering Committee identified three major goals to guide its work in personnel development through this project: 1. To train, recruit, and retain well-qualified professionals working in the field of special education; 2. To enhance data collection efforts and apply relevant findings to problem-solving in personnel development; and 3. To develop and market Nevada’s VISION for the implementation of a Comprehensive System of Personnel Development. Goal 1 will be addressed through targeting training in the following areas: * Training for personnel who are less than fully licensed to serve the children and youth with disabilities they have been employed to serve; * Training for administrators and supervisors to enable them to develop the knowledge and supervision skills necessary to the development of quality educational programs that ensure compliance training in transition services, as related to issues, best practices, and policies in both early childhood and secondary levels; * Training in effective classroom management and behavior management skills; * Training in curriculum, collaboration, strategies and modifications to facilitate successful integration of students with disabilities; * Training for early childhood personnel; * Training in assessment, strategy and curriculum for low incidence disabilities, such as autism and traumatic brain injury; * Working with students who represent cultural and linguistic diversity; * Training in technology, related to assessment, services, and funding sources; and * Training in areas of parent-professional partnerships, as well as in peer-professional relationships. Activities under Goal 2 include the examination of data collection procedures currently in place; identification of gaps in data collection; and utilization of data to more clearly represent the critical issues in personnel development, including the efficacy of various recruitment efforts and relationships between personnel shortages and the quality of Nevada’s special education programs. Goal 3 will be addressed through a variety of dissemination and public awareness activities designed to improve public opinion about the education of students with disabilities, garner support for increased state funding, and set the stage for developing a statewide planning partnership among all constituencies interested in the education of children and youth. Central to all planning and implementation efforts is the CSPD VISION for Nevada, which was developed in September 1993 through the collaborative efforts of Nevada stakeholders in the provision of education to children and youth with disabilities. As a part of Nevada’s continued efforts to collaborate in providing appropriate and relevant training, and to develop a model delivery system for the provision of that training, the CSPD strategic planning efforts will remain an integral part of the project’s overall design.
Grant Number: H029H40030
Training of School Professionals, Administrators, & Aides, &
Community Personnel to Further Develop Improved Services
Programs in the 55 LSD in Alaska

Project Director: BROWN, DIANN
ALASKA SEA
801 W 10TH ST, SUITE 200
JUNEAU, AK 99801
(907)465-2972

Purpose: This project will develop new and innovative features for an existing personnel preparation pro-
gram, emphasizing services to infants, toddlers, children, and youth with disabilities. The project is built
on the need for personnel trained to accommodate diverse learners in inclusive classrooms and the educa-
tional knowledge and skills needed for the 21st century. Alaska's Comprehensive System of Personnel
Development Committee has created alternative delivery systems that will bring effective training to a
much larger number of professionals and paraprofessionals. The major features of this alternative ap-
proach are to: * Continue development and training, using modules of instruction that can be taught to a
small number of professionals and paraprofessionals at rural and remote sites by qualified staff on a part-
time basis; and * Ask school districts to submit proposals for grants, after assessing their greatest needs
(but within the priorities established by CSPD), to use modules and other prepared and suitable training
packages. The districts may also use their own training designs. Districts are asked to work coopera-
tively with other school districts and other agencies, such as parent groups, higher education programs,
professional organizations, and the State Department of Education. Approximately 15 to 20 districts will
be funded each year to carry out training plans. In this manner, many more people will be reached be-
cause the instruction can come to them at far less cost than if the trainees had to be financially supported
to travel great distances to assemble on a campus.

Grant Number: H029H40031
Training Leadership Teams for Effective Leadership of
School Programs for All Students

Project Director: HAMPTON, ANN
TENNESSEE SEA
710 J ROBERTSON PARKWAY, 8TH FL
NASHVILLE, TN 37243
(615)741-2851

Purpose: The promotion of effective leadership practices in the management of special education pro-
gرامs has been established as the first priority and the greatest need in the provision of appropriate educa-
tion and related services to Tennessee's children and youth with disabilities. This project addresses that
continuing need. Four Tennessee institutions of higher education were chosen for administrator training
in 1992 and six in 1993, on the basis of such factors as geographic need, ability to address needs of the re-
igion, quality, and cost-effectiveness of training. Six institutions will be chosen to provide training during
1994 and 1995. Each institution will train approximately 25 to 30 building-level administrators from lo-
cal education agencies and programs in the management of special education. Each of these principals
will select a team to be trained from his or her school or program. Participating institutions of higher education will also offer technical assistance to the participating school systems at the building level. Participants are selected from those nominated by the school superintendent/director and have made a commitment to improving the quality of educational services provided for students with disabilities. An incentive for the principals has been to receive graduate credit coursework from some of the participating institutions. It is also an incentive for the principals to have training for their participating school teams. The goal of the project is to improve the quality of instruction to students with disabilities in inclusionary educational environments. This will be accomplished by increasing the number of principals appropriately trained in administration of school programs which serve the individual needs of all students through courses and ongoing inservice in research and best practices regarding inclusionary educational practices. Approximately 150 principals, along with a team from each of their schools, will be provided training through this project.

Grant Number: H029H40032

Training Personnel for the Education of the Handicapped: Preservice

Project Director: GUERRERO, VINCE

GUAM SEA
P O BOX DE
AGANA, GU 96910
(671)475-0057

Beginning Date: Aug 1, 1994
Ending Date: Jul 31, 1999

Purpose: The goals of this project are: * To reduce special education staff turnover each school year; * To increase the number of undergraduates and graduates entering the field of special education; and * To provide personnel the opportunity to obtain certification in a specialized area of special education. The project focuses on awarding financial aid to individuals pursuing both undergraduate and graduate degrees at the University of Guam; on awarding financial aid to individuals pursuing master’s degrees off island in areas not offered at the University of Guam; and on awarding financial aid to individuals wishing to pursue specific special education certifications. The Department of Education’s Special Education Division and the University of Guam’s Special Education Department will participate in the selection of individuals pursuing degrees, and these two agencies will maintain a close working relationship to ensure that the needs of students are met. The Staff Development Specialist of the Special Education Division will be the liaison between the University and Department of Education, and will be responsible for maintaining the integrity of the project.
**Grant Number: H029H40033**

Vermont Statewide Educational Personnel Preparation Program to Support Students with Disabilities and Their Families

*Project Director:* KANE, DENNIS

**VERMONT SEA**
120 STATE ST
MONTPELIER, VT 05620
(802)828-3141

**Beginning Date:** Sep 1, 1994  
**Ending Date:** Aug 31, 1999

**Purpose:** This project is a collaborative effort between the Vermont Department of Education and the University Affiliated Program at the University of Vermont. The purpose is to implement a statewide personnel preparation program to meet training needs identified in Vermont's Comprehensive System of Personnel Development. There are three components, as follows. * Support for the Vermont Personnel Development Coordinating Council (VPDCC) will focus on statewide training and technical assistance to support school districts and their surrounding communities in developing a comprehensive three to five year plan for inter-professional personnel development across communities for improving outcomes for all children and their families. Statewide training content will provide training and support for implementing a strategic planning process for establishing and improving existing partnerships within each community. * The emotional and behavioral disorders component has two areas of emphasis. First, it will provide inservice training and technical assistance to regions of the state which have not developed a collaborative plan for providing an appropriate continuum of services for children and youth with emotional and behavioral disorders. Second, it will provide follow-up inservice training and technical assistance to schools as they implement local plans developed during this current year for crisis management and prevention. Plans include dealing with crises that may occur as a result of suicide, accidental death, or violence on school grounds. * The third component focuses on including students with disabilities in statewide performance assessments. The development of new, more meaningful student performance assessments has become a central issue in the current school reform movement in Vermont. There is a need to determine where learners with disabilities fit into these reforms. State policies and procedures need to be expressed as guidelines for performance assessment of all students. This component will support the implementation of assessment and evaluation guidelines through extensive statewide training of educational professionals.

Professional Development Plan for Teachers & Administrators in South Carolina Public Schools

*Project Director:* GINN, MARY

**SOUTH CAROLINA SEA**
1429 SENATE ST, RM 511, RUTLEDGE
COLUMBIA, SC 29201
(803)734-8126

**Beginning Date:** Oct 1, 1994  
**Ending Date:** Sep 30, 1999

**Purpose:** This project has been developed for the purpose of providing continuing education opportunities for teachers, evaluation personnel, administrators, and speech/language clinicians. The training initiatives focus on three areas: emotional disabilities, autism, and speech language disabilities. The selection of
these priority areas were based on: results of needs assessments conducted by local education agencies; in-
formation obtained in public hearings conducted by the Joint Legislative Governor's Committee on Men-
tal Health and Mental Retardation; recommendations of State Board of Education committees;
recommendations of statewide committees and task forces of various South Carolina Departments and
agencies; and recommendations of the staff of the Office of Programs for Exceptional Education and the
Office of Technical Assistance of the South Carolina State Department of Public Instruction. The goals
of this project are to: * Develop and implement a fully inclusive undergraduate program that involves
ALL elementary education majors in a unified program of study leading to dual certification (as opposed
to dual enrollment in two separate programs); and * Develop and support Professional Development
Schools in order to provide a core of professional options for those students participating in field experi-
ences. This program will develop a preservice program, an inservice program, and a series of field sites
(Professional Development Schools) that will attempt to match changes in the schools. This project will
take shape as follows: * Regional training on mental health issues of school-aged children with emo-
tional/behavioral problems. School-based teams will be trained to respond to students who suffer from
mental illness, child maltreatment, or drug-related problems. Training will address educational program-
ing, developing relationships, and communicating with children and their families. * Training for the es-
tablishment of model EH/BD classrooms to serve as training sites for South Carolina. Local education
agency personnel from two school districts will receive on-site training at a model program located out of
state. This program will be replicated in these districts and serve as training sites for local education
agency personnel in other South Carolina school districts. * Crisis intervention training. This training is
a “train the trainers” program to develop skills and techniques for effective non-violent crisis intervention.
* Training of autism specialists. This training will include evaluation personnel and instructional person-
nel. * Training of speech-language clinicians is also part of this project.

(303)866-6887

Beginning Date: Oct 1, 1994
Ending Date: Sep 30, 1999

Purpose: The Colorado State Training Grant will be facilitated by a Continuing Education and Professional Development Task Force and a Preservice Task Force. The content will feature standards-based education, leadership training for Goals 2000, and preservice preparation in special education.

Grant Number: H029H40036

Recruitment & Preparation of Occupational Therapists, Physical Therapists, & Speech-Language Pathologists for Washington’s Public Schools

Project Director: GILL, DOUGLAS
WASHINGTON SEA
P O BOX 47200
OLYMPIA, WA 98504
(206)753-6733

Beginning Date: Sep 1, 1994
Ending Date: Aug 31, 1999

Purpose: This project is designed to: * Increase the number of speech/language pathologists, occupational therapists, and physical therapists entering public school service from Washington State institutions of higher education over the next five years; and * Increase the number of Hispanic/bilingual professionals in these fields to address the needs of the state’s increasing Hispanic population. Activities will focus on recruitment of personnel interested in providing services in public schools and on support and further development of the state’s five preparation programs at institutions of higher education. The objectives of the project are: * To establish recruitment activities to interest high school and community college students in selecting careers as school occupational therapists, physical therapists, or speech and language pathologists; * To increase the number of undergraduate and graduate students in occupational and physical therapy and in speech/language pathology who choose to work in the school system; * To provide support to the five university preparation programs so that each can implement or augment a program component considered critical to increasing its production of students who elect to provide school service; and * To develop recruitment procedures and strategies to increase the number of Hispanic/bilingual students enrolled in both undergraduate and graduate preparation programs for school service. Recruitment strategies will include the provision of: (a) career programs and shadowing experiences for high school and community college students; (b) conditional stipends for students who agree to serve two years in Washington’s public schools; and (c) school field experiences and mentorship. Support for the state’s five preparation programs will include assistance in the facilitation, development, and provision of coursework through telecommunications and the provision of support for additional preparation components identified by each institution as critical to increasing the numbers of therapists selecting school service.
**Grant Number: H029H40037**

**Personnel Preparation for Serving Students with North Dakota Schools**

**Project Director:** GRONBERG, GARY

NORTH DAKOTA SEA
600 EAST BLVD AVE
BISMARCK, ND 58505
(701)224-2277

**Purpose:** In North Dakota, a number of special education positions are vacant, filled by persons in need of upgrading skills, or filled by an individual who has not fully met state qualifications. There is a strong need to develop available resources so that all personnel are fully qualified to assess and meet the educational needs of students with disabilities. This project will prepare educational personnel to meet the needs of students with disabilities through three objectives, which are to: * Award a limited number of year-long internships and a limited number of summer traineeships in priority areas of need; * Conduct a study to identify factors that influence retention of special education personnel in North Dakota; and * Assess the nature and scope of assistive technology training needed by personnel serving students with disabilities, and develop a plan to deliver training. Objectives will be carried out through methods, procedures, and techniques that have been used successfully in North Dakota in the past with regard to personnel preparation. For example, between 1991 and 1993, internships and traineeships enabled 107 individuals to receive additional training that increased their qualifications to meet state certification or credentialing requirements.

**Grant Number: H029H40038**

**Building the Capacity to Address Bilingual Special Education Issues in New York State**

**Project Director:** NEVELDINE, THOMAS

NEW YORK SEA
1 COMMERCE PLAZA, RM 1610
ALBANY, NY 12234
(518)474-5548

**Purpose:** This project concerns a variety of issues related to the provision of special education and related services for bilingual and multicultural students suspected of having a disability or who have a disability. There are three interrelated goals. The first goal addresses skill development for school district providers responsible for the evaluation of, and program recommendation for, bilingual students with disabilities. Related activities will establish an advisory committee of experts in the areas of nonbiased assessment, bilingual education, multicultural issues, and special education to advise the Department in all areas related to the project and to: * Establish a procedure to identify and disseminate information about outstanding programs; * Develop and deliver a one-day awareness training program for administrators and decision makers; * Develop and deliver an intensive training program for evaluators, Committee on Special Education members, and Committee on Preschool Special Education members; * Develop and deliver parent education materials for distribution by the State Department and local education agencies; and * Provide ongoing technical assistance and support to public school district personnel. The second goal addresses coordination and linkages with institutions of higher education through establishment of a preservice sub-
committee to the advisory committee, and through conducting annual University Leadership Institutes for key higher education personnel responsible for special education teacher/provider preparation programs. The intent of the coordinated effort is to encourage higher education to develop new or expanded programs to include skills regarding bilingual special education within the curriculums of their teacher education programs. This is a major undertaking when considering that New York State has more than 50 higher education institutions involved with teacher/related service provider preparation at the undergraduate and graduate levels. The third goal addresses state education agency leadership and capacity building within the higher education community by identifying strategies to reduce the critical shortages of bilingual special education teachers, speech and language personnel, psychologists, and evaluators. New York State will initiate an effort to identify and organize a National Leadership Group with representatives from other states and urban areas experiencing severe shortages of qualified bilingual special education personnel. The outcome of this activity will be to collectively identify innovative strategies that will be implemented at the state education agency level. New York State is particularly interested in conducting this component in concert with the federal Office of Special Education Programs, the National Association of State Directors of Special Education, and the National CSPD Collaboration Institute.

**Providing Occupational, Physical And Speech-Language Therapy As Integrated Related Services In CT's Early Intervention & Educational Systems**

**Project Director:** KIRNER, MARIA

**Beginning Date:** Jul 1, 1994

**Ending Date:** Jun 30, 1999

CONNECTICUT SEA
25 INDUSTRIAL PARK RD
MIDDLETOWN, CT 06457
(203)632-1485

**Purpose:** The purpose of this project is to improve the educational and early intervention services received by infants, toddlers, children, and youth with disabilities and their families through the provision of high quality integrated related services by professionals in occupational therapy (OT), physical therapy (PT), and speech/language pathology (SLP). The Connecticut CSPD Council has identified the shortage of OT, PT, and SLP personnel for early intervention, preschool, and educational programs as a major personnel need. The CSPD Council has also identified a number of concerns regarding the preservice preparation of these personnel and the need to retrain currently practicing personnel so as to emphasize collaboration and teamwork skills; pediatrics; and family-focused, interdisciplinary, community-based models of service delivery. During the five years of the project, activities to address the supply and qualifications of these personnel will be undertaken. Major activities include: * Statewide recruitment programs and initiatives; * Pilot programs to improve preparatory coursework and clinical experiences for these allied health professionals; * A comprehensive and coordinated program of professional development; and * The establishment of regional support groups for practitioners. A Project Advisory Board will have broad-based representation and will be involved in all project activities. A major charge to the Board will be to address problems and barriers across agencies, organizations, and systems that interfere with collaboration and systemic change.
Grant Number: H029H40040

Special Project to Provide Inservice Training and Technical Support to Promote Collaborative Teaming for Regular and Special Education Teachers

Project Director: ERICKSON, WAYNE

MINNESOTA SEA
550 CEADER ST
ST PAUL, MN 55101
(612)296-6104

Beginning Date: Jul 1, 1994
Ending Date: Jun 30, 1999

Purpose: The Minnesota Department of Education has conducted a series of needs assessments to ascertain the training needs of providers of services to students with disabilities. Two major training needs emerged as a result of these assessments. The first priority to be addressed is to train regular education teachers and special education teachers to work together collaboratively. The second priority is to research and pilot service delivery models for providing positive behavior management for students with behavior disorders. To address those needs, the Minnesota Department of Education will train 30 teams of teachers (a regular education teacher and a special education teacher per team) each year. The teams will receive in-depth training on the Minnesota Mainstreaming Model. In that model, participants explore strategies to work collaboratively, develop communication skills, and utilize actual strategies for use in the classroom. They also learn skills on how to train others about the model. Over five years, 150 of these teams will be prepared. The teams will serve as a resource bank and will train additional teams in their districts or regions. Activities will be implemented to acquire and disseminate significant information derived from the model to interested teams in the state. Service delivery models that promote positive behavior management will be identified. After models are selected, they will be piloted in three to five sites to assure that the models are appropriate. If piloted successfully, the models will be disseminated statewide, and training will be offered regionally.

Grant Number: H029H40041

A State-Wide Telecommunications-Based Training Program for Instructional Assistants

Project Director: HOFMEISTER, ALAN

UTAH SEA
250 EAST 500 SOUTH
SALT LAKE CITY, UT 84111
(801)797-3718

Beginning Date: Oct 1, 1994
Ending Date: Sep 30, 1999

Purpose: The problem addressed by this project is the lack of a systematic, statewide infrastructure to equip paraprofessional staff working in urban and rural districts with the skills they require to meet increasingly complex demands of providing educational programs to students with disabilities. The project will emphasize paraprofessional training which: (a) is tied to validated competencies; (b) is delivered in field based settings; (c) includes procedures for assessing the mastery of the competencies which are taught; and (d) uses course structures that integrate knowledge acquisition and practicum experiences. Paraprofessionals targeted in this project will include noncertified staff with direct instructional responsibilities for students with disabilities. The project will develop, field test, and evaluate a training program addressing skills and attitudes needed for paraprofessionals to perform their duties effectively. The pro-
Discretionary Projects Supported by OSEP

Program will be competency-based and field-based. The six competency areas of focus are as follows: * Orientation, role, and responsibilities of the paraprofessional; * Introduction to special education; * Instructional delivery for mildly to moderately disabled students, or instructional delivery for severely disabled students; * Behavior management; * Facilitation and support of integration; and * Physical and sensory impairments and special health care needs. In each competency area, training will be delivered via a course of 24 contact training hours for each trainee. Each course will consist of six sessions, each of which will include videotaped instruction, discussion and clarification of video material, development of a plan to implement the newly taught skill, direct practice with special education students, and evaluation of the mastery of new skills.

Grant Number: H029H40042

Oregon SEA Inservice Training Project: Merging Educational Reform and Supported Education

Project Director: JACKSON, PATRICIA

OREGON SEA
255 CAPITOL ST NE
SALEM, OR 97310
(503)378-5598

Beginning Date: Jul 1, 1994
Ending Date: Jun 30, 1999

Purpose: This project is the marriage of two initiatives: educational reform and inclusive education. Combining these efforts will create a new educational structure that will be responsive to the unique individual needs of all students, will provide relevant education preparing students for a new future, and will develop communities of caring citizens. As a result of this newly created educational system, all students will emerge with skills commensurate with their capabilities. Their educational preparation will allow them choices for their futures, whether this be higher education, advanced professional or technical training, or immediate transition into the world of work. The priority need for the Oregon Department of Education is the creation of a new educational system which integrates special education and general education into one system that supports all students and families. This need is documented by multiple sources, including administrators, general education and special education teachers, support personnel, families and advocates, business community leaders, legislators and students. Special education plays a key leadership role in creating a new educational system that is responsive to the needs of each of Oregon's students. This project is designed to assist in the retooling of Oregon's educators. Teachers, administrators, early intervention personnel, and community members will engage in ongoing professional development to learn new and more effective systems in which to teach students to be prepared for the future. This project will support local school districts as they move through the change process. For many districts, this will mean exploring the rationales for change and building a knowledge base regarding educational restructuring and inclusionary practices. For some, it will mean assisting them in their journey by enhancing efforts at educational reform and ensuring that all students are included. For still others, it will mean helping them to incorporate new educational practices into existing systems that already support all students within neighborhood schools. The emphasis of this project is to facilitate systems change efforts at the local level by supporting early intervention agencies, schools, and districts to investigate and develop their own site-based models for service delivery, rather than providing "a model" that districts would adopt. In order to precipitate the development of effective programs, the Department will assist local districts by implementing an overall plan to nurture and guide their development. The plan is based on the process of change as described by Matthew Miles and Michael Fullen. This project will systematically provide a variety of supports to school districts and early intervention personnel engaged in creating a new kind of educational system. As a result of this project: * School districts will have increased knowledge, under-
standing of rationales, and strategies for educational reform; * School district personnel will demonstrate competencies and increased capacity for implementation of school reform; and * Participants will become reflective practitioners as evidenced by adopting, developing, and implementing best practices in schools and special education restructuring.

Grant Number: H029H40043
Learning Links: A Project Responding to Personnel Shortages and Training Needs

Project Director: Losh, Mary Ann

NEBRASKA SEA
PO BOX 94987
LINCOLN, NE 68509
(402)471-4357

Beginning Date: Aug 15, 1994
Ending Date: Aug 14, 1999

Purpose: This project will alleviate critical personnel shortages and improve the qualifications of personnel by developing a Learning Links team — by identifying, training, brokering, and networking the services of special education service providers. This strategy is intended as one among several implemented by institutions of higher education and the Nebraska Department of Education (NDE) designed to alleviate shortages of special education teachers in certain endorsement areas and to improve the quality of service to children with disabilities in special and general education classrooms. Nebraska is a rural state with a teacher certification and endorsement system that allows a teacher to serve students with any handicapping condition, as long as the special education teacher's endorsement matches the disability category of at least one student in the caseload. NDE data on recent CSPD reports do not reflect a substantive shortage of unfilled teaching positions, but the Department is aware that many districts provide special education services with teachers who may lack specialized endorsements for certain students in their caseloads. In November 1993, the CSPD Committee set as a priority for this project the redirection and enhancement of an earlier pilot project which recruited and developed a team of specialists able to provide direct service, consultation, and training for teachers in areas where personnel shortages and teacher preparation deficiencies are most acute. A summary of activities is as follows. OBJECTIVE: Revise, modify, and expand the Approved Service Provider System to create a team of personnel able to meet the needs of children with disabilities who are unserved or underserved. ACTIVITIES * Refine the Service Provider list to provide school personnel with detailed information about provider qualifications, education, experience, and expertise. * Recruit additional service providers, including retired, not presently working, independently employed, other employed and under-employed special education and related services personnel and inservice trainers as Learning Links team members. * Provide two days of training per year for service providers. * Develop and disseminate a hard copy catalog of service providers. * Provide a toll-free telephone number for schools and providers to use to access information about potential service providers. * Provide access to the service provider catalog via electronic communication. * Disseminate and network the skills of team members through a Promising Practices Conference and a series of annual teleconferences for an audience of special educators and other consumers of services. * Evaluate the training provided to the team, the teleconference, and the Promising Practices Conference. * Evaluate the quality of services provided. This project will provide training to the team, and, through team activities, provide inservice/consultation to an estimated 550 teachers annually via brokering, dissemination, and networking of the Learning Links team. Services delivered to schools through this project will provide high performance learning outcomes for students with disabilities.

Personnel Training Grant

Project Director: RATOOSH-SIMON, AMY

GEORGIA SEA
1970 TWIN TOWERS EAST
ATLANTA, GA 30334
(404)656-2425

Beginning Date: Sep 1, 1994
Ending Date: Aug 31, 1999

Purpose: The goal of this project is to provide additional resources to address special education personnel supply and training needs, as identified in Georgia’s Comprehensive System of Personnel Development. This information has been gleaned from analysis of information from the Education Recruitment Services Office; Professional Standards Commission; CSPD State Advisory Panel; needs assessment surveys; and interviews with local school system administrators, teachers, consortia, State Advisory Panel, Georgia Council of Administrators of Special Education, the Local Education Agency Planning Committee, faculty from Georgia’s colleges and universities, and Georgia Department of Education staff. Regional and statewide training objectives for meeting the overall goal include: * Provision of inservice training activities in educational programming identified in the most recent CSPD/State Advisory Panel needs survey. Educational programming includes but is not limited to: educational strategies, technology, transition, and preschool vision training. * Provision of inservice technical assistance, training, and dissemination activities related to strategies development in technology. * Development and implementation of a strategy targeting special recruitment and retention efforts to address critical personnel shortages in special education. * Further development and refinement of management procedures for collecting, analyzing, and disseminating information relating to the CSPD. Implementation of these activities will be conducted through the 17 centers of the Georgia Learning Resources System (GLRS) network, in coordination with the state education agency, local school systems, and colleges and universities. Activities will be available statewide and regionally, and each local region will also design additional activities to meet objectives, as identified through its local needs assessment processes.

Grant Number: H029H40045

IDEA-D Statewide Inservice Training Based on CSPD Needs

Project Director: SMITH, GEORGE

DELAWARE SEA
P O BOX 1402, TOWNSEND BLDG.
DOVER, DE 19903
(302)739-4667

Beginning Date: Sep 1, 1994
Ending Date: Aug 31, 1998

Purpose: This project addresses Delaware’s major inservice needs, based primarily on the findings contained in the 1993 CSPD Report. These findings were derived from the annual needs assessment survey. The goals and objectives of this project are as follows: GOAL 1: To provide special and regular education teachers with inservice reflecting CSPD curricular priorities. * Objective 1: To provide a summer training conference addressing identified CSPD needs, primarily in the topical areas of curriculum/treatment. * Objective 2: To provide follow-up, on-site coaching on effective instruction and classroom management. GOAL 2: To provide special and regular education teachers with inservice reflecting least restrictive environment (LRE) and Individualized Education Plan (IEP) policies and procedures. * Objective 1: To assist districts in establishing new and/or reviewing previously established LRE sites. * Objective 2:
To assist districts in the development of IEPs, computerized and otherwise. GOAL 3: To maintain the pool of trained educational surrogate parents, especially for school districts experiencing shortages. GOAL 4: To provide staff of low-incidence populations (emotional and behavioral disturbance) with training on the assessment and treatment of this population. * Objective 1: To establish and train positive behavioral support teams. GOAL 5: To assist in the statewide recruitment efforts for speech and language pathologists. GOAL 6: To support New Directions training on statewide assessment and implications for instruction.

Arkansas Department of Education Training Program

Project Director: WOOD, MARGIE

Arkansas Department of Education Training Program

Project Director: WOOD, MARGIE

Grant Number: H029H40046

Purpose: The following objectives have been developed to implement a five-year plan for the system of personnel development that is required to fulfill Arkansas' commitment to an inclusive educational environment: * Provide the materials and content training on specific topics to maintain an adequate current knowledge base for the personnel providing educational services to young children and youth of Arkansas, as identified through established needs assessment processes; * Provide training and planning opportunities to facilitate and reinforce collaborative teams within disciplines and across disciplines; and * Provide training and networking opportunities to develop and reinforce leaders within and across specific disciplines, constituencies, and agencies.

In-Service Training of Personnel for Related Services: Psycho-Educational Assessment/Speech Pathology

Project Director: REYES, EILEEN

Puerto Rico Department of Education has identified a need to develop a program which focuses on the preparation of personnel in the area of psychoeducational assessment and speech pathology. This need has been identified as the result of the compliance agreement with the federal government, and analysis of the number of children still awaiting their initial assessment and re-evaluation as required by law to determine eligibility for special education services. To address these needs, the Puerto Rico Department of Education will enhance psychoeducational assessment and speech pathology services for disabled students by training additional and more competent specialists in psychoeducational assessment and speech pathology.
Discretionary Projects Supported by OSEP

speech pathology at the graduate level and making recommendations to higher education institutions for the improvement of the preparation of personnel in these areas.

Grant Number: H029H40048

Inservice Training, Technical Assistance and Peer Coaching Activities for Students with Disabilities to Be Served in an Inclusive Environment

Project Director: BAILEY, SUSAN

MONTANA SEA
PO BOX 202501
HELENA, MT 59620
(406)444-2046

Beginning Date: Oct 1, 1994
Ending Date: Sep 30, 1999

Purpose: The Montana Training for Inclusive Education (TIE) project consists of a program of inservice training, technical assistance, and peer coaching activities to increase opportunities for students with disabilities to be served in an inclusive educational environment. Over a period of five years, 90 local education agency teams will receive extensive training in strategies for cooperative learning and inclusion and in techniques for team-building, collaboration, and peer coaching. Teams will receive technical assistance as they implement their training in their schools and classrooms, and they will serve as peer coaches to other educational personnel seeking to implement inclusive education. Each team will include six people: a regular education teacher, a special education teacher, an administrator, a member from related services, a parent, and a paraprofessional. Working together, they will form an effective and supportive system for initiating inclusive education to the extent appropriate to the needs of the student with disabilities. Further, because of their various roles, team members will be effective in communicating with other teams seeking to initiate inclusive education strategies. Regional trainers/consultants will provide a cost-effective rural service delivery model for inservice training and technical assistance. The model also ensures locally relevant service delivery to address the diverse needs of a large, rural state. By training local district teams, the project will develop the commitment, cooperation, and collaboration among several individuals necessary to effectively integrate students with disabilities into regular classrooms. By developing local district teams to serve as peer coaches, the project will create a mechanism for supporting the changes required in an inclusive education approach, both in their home schools and in peer schools. Through the activities conducted in the nine regions of the state, the project will train 540 individuals in 90 school districts. It has the potential for directly benefiting approximately 20 percent of Montana students with disabilities. Peer coaching activities by participants could also result in a training “ripple effect” which could benefit at least an additional 20 percent. By increasing the educational options available, the Montana Training for Inclusive Education project will provide more opportunities for students with disabilities to receive the most appropriate education.
Grant Number: H029H40049

Comprehensive System of Personnel Development (CSPD) Training Grant

Project Director: KOEHLY, KENNETH

NEW JERSEY SEA
225 W STATE ST, CN 500
TRENTON, NJ 08625
(609)633-6430

Purpose: This project is one of a group of projects funded to assist state education agencies in establishing and maintaining programs for preservice and inservice training of teachers of infants, toddlers, children, and youth with disabilities, or supervisors of such persons, consistent with the needs identified in the State’s comprehensive system of personnel development (CSPD).

Grant Number: H029H40050

California Comprehensive System of Personnel Development

Project Director: THALACKER, BARBARA

CALIFORNIA SEA
P. O. BOX 944272
SACRAMENTO, CA 94244
(916)657-4222

Purpose: This project is designed to strengthen the statewide Comprehensive System of Personnel Development (CSPD), building on the collaborative work that produced the document called “Plan 2000: Strategic Implementation Plan for the California Comprehensive System of Personnel Development.” The project has a parallel structure of state and regional activities. Component 1 describes the state activities, which are led and managed by state-level teams and then modeled to Regional Coordinating Councils. These Councils will adapt the process to match geographic priorities. The three activities addressed in Component 1 are: (a) the CSPD Advisory Committee; (b) Plan 2000 Design Team task forces; and (c) the Strategic Leadership Seminar. Component 2 includes a process to ensure that regions continue their collaborative, strategic efforts at the regional level. This application proposes to support their efforts through three activities: (a) Regional Match grants; (b) Personnel Recruitment Regional Consortia (PeRRC); and (c) technical assistance provided to the Regional Coordinating Councils. The six priority goals in Plan 2000 address statewide needs and require continued collaborative work among the California Department of Education, local education agencies, institutions of higher education, private schools, parents, families, professional organizations, other agencies, and community groups. Representatives of these groups will work together in task forces on the six goal areas of the plan, which relate to families, personnel recruitment and retention, qualified personnel, transition, early intervention, and least restrictive environment. They will implement strategies to ensure that outcomes are achieved and quality personnel are available to meet the needs of infants, toddlers, children, and youth with disabilities and their families. In addition to the development of Plan 2000, strategic planning was begun in 1992 by the 12 CSPD Regional Coordinating Councils at training conducted by National Strategic Planning Institute staff. These regional teams participated in and began the development of plans to reflect the diverse population, economic, and geographic differences throughout the state. In 1993, staff from the National Institute for CSPD and from the state CSPD design team conducted day-long follow-up training and technical assistance visits to the twelve regions and to the state CSPD Advisory Committee to further the planning and to refine strategic
thinking, management, and leadership. This project builds on and expands the success experienced over the past two years of CSPD strategic planning.

Grant Number: H029H40051

Special Education Personnel Preparation

Project Director: AABRUSSELL, JANE

Beginning Date: Oct 1, 1994
Ending Date: Sep 30, 1999

AMERICAN SAMOA SEA
DEPT EDUCATION P. O. BOX DOE
PAGO PAGO, AS 96799
(684)633-5237

Purpose: This project will continue and expand the training program for special education teachers and specialists in American Samoa. The goal is to provide degree-related course work on-island thorough technical assistance agreements with the Hawaii University Affiliated Program of the University of Hawaii and with the American Samoa Community College. The quality of inservice training for teachers and specialists will also be improved through consultation with University of Hawaii faculty members. Inservice training activities will take place on-island and in Honolulu. An important feature of the project is the continued utilization of local specialists to deliver undergraduate special education courses on-island, through the mentorship program with the University of Hawaii. Local capacity building and enhancement of the knowledge and skills of the specialists are important benefits. Fifty-five special education teachers and eight specialists are expected to benefit from the preservice degree-related activities. Eighty-two teachers and specialists will benefit from the inservice activities of the project.

Grant Number: H029H40052

Special Education and Related Services Personnel Preparation in CNMI

Project Director: RUDY, BARBARA

Beginning Date: Oct 1, 1994
Ending Date: Sep 30, 1999

CNMI SEA
P. O. BOX 1370 CK
SAIPAN, MP, ZZ 96950
(670)322-9956

Purpose: This project focuses on the development of locally based personnel development and allows the Public School System to support existing personnel and local youth to seek career development and advancement in special education and related services. The project was developed in collaboration with Northern Marianas College, the University of Guam, and the University of Hawaii, in order to: * Develop, implement and evaluate a Comprehensive System of Personnel Development; * Plan, deliver and evaluate inservice training activities (non-degree training); and * Plan, deliver, and evaluate degree-focused training. The primary objectives of this project are: * To enhance opportunities for indigenous people to enter and remain in careers in special education and related services; and * To increase the level of education of current Public School System personnel up to the bachelor’s level. Through the expansion of current training programs available at the associate level at Northern Marianas College, development
of local opportunities for the bachelor's degree, and coordination with advanced degree programs, the pro-
ject will increase the resource pool of local personnel and the training options available to them.

**Training Personnel for the Education of Individuals with Disabilities**

*Project Director:* READ, JOAL

**Beginning Date:** Oct 1, 1994  
**Ending Date:** Sep 30, 1999

VIRGINIA SEA  
P. O. BOX 2120  
RICHMOND, VA 23216  
(804)225-2096

**Purpose:** This project is a joint effort among the Virginia Department of Education, the Departments of Occupational Therapy and Physical Therapy at Virginia Commonwealth University, the Virginia Institute for Developmental Disabilities, and the Department of Occupational Therapy at Shenandoah University. It will expand the number of occupational therapists and physical therapists who are specially trained to provide services to students in the public schools of Virginia. Once these personnel are employed in a school system, follow-up support will be given to trainees through a mentorship program. Two levels of training will occur. The first will prepare entry level occupational therapy and physical therapy students with basic skills to practice in school settings; they will receive an interdisciplinary certificate in school-based therapy. The other level will recruit and prepare currently registered therapists to work in school settings. Graduate courses in school-based therapy, interdisciplinary team work, and school-based field work will be developed. A retraining program and a mentorship program will also be implemented. Overall, the project addresses the following seven purposes:  
* To select at least 10 trainees in occupational and physical therapy each year (50 over five years) who will participate in a specialized program designed to develop interdisciplinary skills to work in the school system after graduation;  
* To develop a competency-based training program for occupational and physical therapy trainees, with the following priorities for school system practice: (a) using collaborative teamwork skills within a variety of service delivery models; (b) developing educationally relevant and functional goals for students; (c) implementing full inclusion and transition services; (d) providing effective service delivery in unserved rural/urban school systems; and (e) supervising certified assistants and paraprofessionals effectively;  
* To implement a regional mentorship program so all trainees will be provided with support during their first year of working in a public school system;  
* To expand the capacity of Virginia Commonwealth University's Department of Occupational Therapy to accept eight to ten additional students into the entry-level training programs;  
* To recruit already trained therapists to work in the school system through inservice education or graduate study;  
* To systematically evaluate and document outcomes from the project and modify the training project according to evaluation results; and  
* To disseminate project information and materials to other states and universities to: (a) describe program methods, content, and effectiveness, and (b) provide a model for replication.

CPEP: The Center for Professional Education Partnerships

Project Director: NORRIS, NATHANIEL

NEW HAMPSHIRE SEA
101 PLEASANT ST
CONCORD, NH 03301
(603)271-6693

Beginning Date: Oct 1, 1994
Ending Date: Sep 30, 1999

Purpose: This project will develop a Center for Professional Education Partnerships (CPEP), which will assume the management of the PEP Program (an alternative program for training special educators), and also will conduct other significant programs in accordance with current and emerging high priorities identified by the CSPD. In addition to continued PEP training, a key activity planned for 1994-95 is the continuation of the Special Education Leadership Institute, a special education administrator staff development program. In addition, CPEP will enable PEP to accomplish several things not previously possible: * The development and delivery of discrete portions of its training package on an inservice basis for educators who are not seeking certification, but who wish to expand their skills with respect to students with disabilities; * The transformation of PEP into a program which is no longer dependent on state and federal funding; and * Exploration of the feasibility of using the PEP model to train educators and related service personnel in other shortage areas. The content of all CPEP programs will be based on competencies set forth by the State of New Hampshire for certification of personnel, and further influenced by exemplary professional practices and stakeholder needs. Program operations, including ongoing curriculum development and improvement, management services, and technical support are subcontracted to State institutions of higher education. Evaluation consists of monitoring of activities, determination of effectiveness, and assessment of impact. CPEP is funded by its stakeholders, with the state and federal education agencies, local school districts and trainees sharing operational costs. Funds from the new federal grant will be used mainly to support current PEP trainees and activities of the Special Education Leadership Institute.

New Mexico Interagency Collaboration Model to Prepare Special Education Personnel

Project Director: PENN, PATRICIA

NEW MEXICO SEA
OFF SPECIAL ED EDUCATION BLDG
300 DON GASPAR
SANTA FE, NM 87501
(505)827-6541

Beginning Date: Sep 1, 1994
Ending Date: Aug 31, 1999

Purpose: This project supports a multi-agency collaborative initiative that was established in 1990 among the New Mexico State Department of Education, the five public state universities, a university of continuing education offering courses through distance delivery models, and statewide parent advocacy organizations to meet critical shortages of fully licensed and certified special education personnel in the State of New Mexico. During the coming five years, this project will fund the training of approximately 625 students, special education teachers, related service personnel, parents, and paraprofessionals to serve chil-
State Improvement

dren and youth with disabilities, birth through age 21. The project addresses the following specific personnel training needs identified in the New Mexico Long-Range Plan for Special Education, “Vistas Sin Limites.” * Resolve knowledge/experience/commitment deficiencies; * Improve support for instructional personnel; * Improve services for children with disabilities who are culturally and linguistically diverse; * Improve specialized programs/services in local education agencies, regional education cooperatives, and state-supported educational programs; * Improve interagency collaboration; * Improve parent involvement in the schools; and * Improve leadership of the state education agency. The specific objectives of this project are to: * Enhance interagency collaboration among the participating agencies, universities, and organizations; * Identify, recruit, and enroll trainees from rural areas, those who are culturally and/or linguistically diverse, and those who have a disability or are parents or family members of individuals with disabilities in special education personnel training programs; * Involve parents of children and youth with disabilities in special education personnel training programs through each of the five collaborating universities; * Enable project-supported students in paraprofessional and/or teacher training programs to acquire and demonstrate competencies in special education required for state certification or licensure; * Disseminate “best practices” information resulting from the New Mexico Interagency Collaboration Model to Prepare Special Education Personnel on a regional and national basis; and * Develop mechanisms to assure continuation of multi-agency efforts after termination of the grant period.

Grant Number: H029H40057

Enhancing the Capacity of the SEA in Conjunction with the IHE System to Retain Teachers and Improve the Quality of Teaching

Project Director: BALCOM, FRED

IDAHO SEA
SPECIAL EDUCATION SECTION 650 W STATE ST
BOISE, ID 83720
(208)334-3940

Beginning Date: Jul 1, 1994
Ending Date: Jun 30, 1999

Purpose: The focus of this project is to expand Idaho’s regionally based delivery system of information, technical assistance, and training, which was cooperatively developed by the major universities and the State Department of Education. This system has been extremely effective, but the growth in the southeast region has outstripped the current resource. The addition of one regional consultant in the southeast will realign the number of districts and the number of special education students closer to the numbers for the north and southwest regions. The additional activities include: * Continuing the partial support for the CSPD consultant in the State office; * Continuing support of the State’s CSPD Committee; * The development of technical assistance videos in cooperation with Idaho’s Public Broadcast System to address the recommendations of the Special Education Advisory Panel; and * An introduction to distance learning telebroadcasts as an alternative to providing information to rural and remote districts.
Competition 84.086J:
Statewide Systems Change:
Children with Severe Disabilities
**Grant Number:** H086J20008

**Maryland-Least Restrictive Environment/Neighborhood Inclusion Project**

**Project Director:** WHITE, JERRY

MARYLAND STATE DEPARTMENT OF EDUCATION
DIVISION OF SPECIAL EDUCATION
200 W. BALTIMORE STREET
BALTIMORE, MD 21201
(410)333-2498

**Beginning Date:** Oct 1, 1992
**Ending Date:** Sep 30, 1998

**Purpose:** To extend the commitment of the Maryland State Department of Education to improve the quality of special education services to students with disabilities and to change the delivery of those services from segregated to integrated settings.

**Method:** This project aims to establish model quality inclusive programs for students with severe disabilities in 16 local education agencies (LEAs) at the elementary, middle, and high school levels. To achieve this goal, several approaches will be used: training and consultation will be provided; information and support will be provided to families; certification standards and personnel preparation practices will be reviewed and modified; coordinated procedures and practices will be developed to promote the inclusion of students with disabilities in their home schools and communities; and information will be disseminated on inclusion, and on project activities, procedures, and outcomes.

**Products:** Students participating in this project will be placed in neighborhood schools, be offered a functional curriculum and instruction in regular classes, and they will find increased opportunities for friendships.

---

**Grant Number:** H086J30004

**Maine Statewide Systems Change Project for the Inclusion of Students with Severe Disabilities**

**Project Director:** STOCKFORD, DAVID

MAINE DEPARTMENT OF EDUCATION
DIVISION OF SPECIAL EDUCATION
STATE HOUSE STATION #23
AUGUSTA, ME 04333-0023
(207)287-5950

**Beginning Date:** Jul 1, 1993
**Ending Date:** Jun 30, 1998

**Purpose:** To improve and increase educational services to students with severe disabilities, ages birth through 21.

**Method:** Specific project objectives include: 1) coordination of relevant school restructuring efforts; 2) preparation and support of activities in four regional sites; and 3) provision of intensive support, technical
assistance and training activities. Each regional site will proceed through a systematic three-year process of preparation, implementation and follow-along that reflects locally defined needs and affords regional site management. In addition to regional site development, systems change activities will include: 1) development of a child count system that identifies students categorically by level of disability and by percentage of time spent in regular education placements; 2) development of opportunities for students with severe disabilities to participate in integrated recreation programs in their communities; and 3) coordination of relevant school restructuring efforts to ensure that all Maine students benefit from these projects.

Products: In addition to direct benefits to a great number of participants and stakeholders in the state education system, indirect benefits are expected for approximately half of Maine’s children and youth with and without disabilities and their teachers. Project findings will be further disseminated through a series of conference presentations, a monograph, articles in state and regional newsletters, presentations for community and parent groups, and a summer institute on exemplary practices in inclusive education for teachers, school administrators, and other service providers.

---

**Grant Number: H086J30006**

**Louisiana Systems Change Project for Inclusive Education**

*Project Director: SHARPTON, WILLIAM*

UNIVERSITY OF NEW ORLEANS
DEPARTMENT OF SPECIAL EDUCATION
NEW ORLEANS, LA 70148

*Beginning Date: Oct 1, 1993*
*Ending Date: Sep 30, 1998*

**Purpose:** To improve educational outcomes for all students with severe disabilities through effective instruction within inclusive school and community contexts.

*Method:* The project will begin by assisting family members, educators and administrative personnel in the creation of a vision for inclusive education throughout the state. Policies and procedures supporting inclusive educational services for students with severe disabilities will be identified, developed, revised and adopted as appropriate. Collaborative efforts will be expanded among general education, special education, family and community resources on state, regional and local levels. Effective models of inclusive education will then be promoted throughout the state, and the capacity of state, regional and local agencies to provide training on inclusive education will be increased. The program will also advocate for adoption of grant-generated practices by key agencies and programs.

*Products:* The primary outcome of the program will be dissemination of validated practices, to be reflected also in establishment of collaborative networks and general heightened public awareness. During the first project year, the main objective will be to familiarize the educational community with the existence, goals and activities of the program and to identify potential sites for intervention. In later project years this objective will be expanded to include the distribution of professional knowledge developed through implementation of the project.
Grant Number: H086J30015

New Hampshire’s Statewide Systems Change Project: Creating a Permanent Capacity to Implement Quality, Inclusive Educational Programs for Students with Severe Disabilities

Project Director: KENNEDY, ROBERT

NEW HAMPSHIRE DEPARTMENT OF EDUCATION
BUREAU FOR SPECIAL EDUCATION SERVICES
101 PLEASANT STREET
CONCORD, NH 03301
(603)271-3741

Beginning Date: Oct 1, 1993
Ending Date: Sep 30, 1998

Purpose: To increase the capacity of LEAs to include students with severe disabilities in regular education classes in their home schools.

Method: In addition to increasing the number of students enrolled in regular classes, the partnership will continue to directly influence policies and practices in the areas of: a) State Dept. of Educ. realignment to merge special education and general education personnel and functions; b) endorsement by the State’s Professional Standards Board of new teacher and administrator certification standards reflecting inclusive practices; c) increased participation of families to advocate for inclusion; d) establishment of a state-supported training and technical assistance network related to best practices for students with disabilities; and e) national dissemination of materials relating to effective inclusion.

Products: This project will expand upon the past achievements of the partnership to address inclusion for very young students, to facilitate the restructuring of professional education programs, and to support State Department of Education and LEA restructuring which will promote inclusion and best practices for students with severe disabilities.

Grant Number: H086J30020

Oklahoma Systems Change Project

Project Director: CORPOLONGO, JOHN

OKLAHOMA STATE DEPARTMENT OF EDUCATION
2500 LINCOLN BLVD
OKLAHOMA CITY, OK 73105-4599

Beginning Date: Oct 1, 1993
Ending Date: Sep 30, 1998

Purpose: This project seeks to improve the quality of special education and all related services in the state of Oklahoma.

Method: Under the direct supervision of local school district special education staff, students with severe disabilities will have opportunities to: 1) enhance interaction with peers without disabilities both within and beyond school settings; 2) increase independence in home, school and community settings; and 3) fa-
Discretionary Projects Supported by OSEP

cilitate their transition to subsequent education and work settings. The project is based on six criteria for quality education: a) integration and inclusion in school and community environments; b) referencing the curriculum to peers and natural performance environments; c) direct instruction of generalized responding; d) heterogeneous students grouping; e) collaborative and transdisciplinary approaches to the delivery of educational and related services; and f) active family involvement.

Products: Through this project school districts throughout Oklahoma will significantly increase the number of students with severe disabilities who are taught in age-appropriate schools alongside non-disabled peers. In addition, the ability of educators to deliver effective instruction in inclusive school and community settings through collaborative teaming will be increased. The results and products of the project will be disseminated through direct mailing, presentations at state and national professional conferences and submission of research reports to professional journals.

---

**Grant Number: H086J30021**

**Improving the Quality of Education and Support for Students with Severe Disabilities and Their Families within Regular Education Environments in Rural Vermont**

**Project Director:** FOX, WAYNE

**Beginning Date:** Oct 1, 1993  
**Ending Date:** Sep 30, 1998

UNIVERSITY OF VERMONT  
CENTER FOR DEVELOPMENTAL DISABILITIES  
BURLINGTON, VT 05405

**Purpose:** To assure that Vermont students with severe disabilities, including those with dual sensory impairments and serious emotional disturbance (aged birth through 21 years) will receive a quality education within regular education settings in their local schools and communities.

**Method:** At the state level, project staff will assess the impact of current laws, regulations and school restructuring efforts on the education of students with severe disabilities. Staff will also work to infuse the values, attitudes and competencies for supporting students with severe disabilities in general education classes and activities into the undergraduate and graduate education curriculum of teacher preparation institutions within Vermont. Project staff will also provide statewide and regional training in the form of regional workshops on innovative practices for inclusion and on specialized training for administrators, school board members and agency support personnel. Model school programs will be developed through long-term collaborative efforts between selected local schools, this project, and other state and regional agencies. Model schools will also serve as professional development schools for undergraduate and graduate students in general and special education, social work and psychology from the University of Vermont.

**Products:** Products of the proposed project will include a revision of the Best Practices Guidelines for Educating All Students in Local Schools, a revision of the manual Implementing Best Practices for All Students in Their Local Schools as well as other manuals detailing innovative general education and special education practices developed through model school activities.
Grant Number: H086J30028

Wisconsin’s School Inclusion Project: Developing Models in Local Schools to Educate Students with Severe Disabilities in an Inclusive Manner

Project Director: FORD, ALISON  
Beginning Date: Oct 1, 1993

UNIVERSITY OF WISCONSIN  
BOARD OF REGENTS  
DEPARTMENT OF EXCEPTIONAL EDUCATION  
PO BOX 340  
MILWAUKEE, WI 53201  
(414)229-6566  
Ending Date: Sep 30, 1998

Purpose: To help schools and districts improve models for educating students with severe disabilities in an inclusive manner.

Method: The project will offer ongoing technical assistance to school districts to develop models that can be replicated in other parts of the state. Models will vary based on unique characteristics of schools and districts, and in full recognition that there exists no single best model for achieving inclusion. A summer leadership institute on inclusive education will be provided, as will a regionalized consultant bank for parents and consultants. An interuniversity training consortium will be established for the purpose of building consensus and making policy on the best way to prepare personnel for roles in inclusive education programs. Parent-to-parent training will be promoted with regard to school inclusion and quality education of students with severe disabilities. A state-level management team and advisory group will be utilized to address barriers to inclusionary practices and stimulate interagency collaboration. Project materials will be developed and disseminated to help schools and districts move forward with inclusion and quality curriculum.

Products: As a result of these state-wide strategies and inclusion principles, the state will see measurable change in opportunities for movement from separate to regular settings; improved regular education, special education and related services; improved decision-making models; and responsive and coordinated policies and resources. A national impact will be felt through a wide variety of project dissemination activities.
Grant Number: H086J40003

Inclusion: On Course with New Directions

Project Director: BROOKS, MARTHA

DEPARTMENT OF PUBLIC INSTRUCTION
EXCEPTIONAL CHILDREN TEAM
P.O. BOX 1402 TOWNSEND BLDG.
DOVER, DE 19903
(302)739-5471

Beginning Date: Jul 1, 1994
Ending Date: Jun 20, 1999

Purpose: To ensure the full inclusion of children and youth with severe disabilities in Delaware’s systemic reform initiative New Directions, providing these students with appropriate in-class support.

Method: This project includes four main goals. To achieve Goal 1, staff will identify policy, funding and structural barriers to effective inclusion and develop strategies to remove them. First, staff will ensure that all people associated with this project reflect the diverse populations of the state of Delaware. Staff will then use the report from the Special Education Study Committee to develop implementation strategies for recommended changes aligned with New Directions. To meet Goal 2, project staff will develop and implement a plan to ensure that parents and educational personnel have the necessary competencies to support children with severe disabilities in inclusive settings. Staff will develop in-depth information and skill development training modules on inclusive education, and prepare parent training modules, increasing the existing resources of the Parent Information Center (PIC). Project staff will also develop and implement a plan for modifying both pre-service and in-service professional development within the State to ensure that both regular and special education staff have the necessary competencies to meet diverse student needs in inclusive settings. Goal 3 includes the development, implementation, and replication of age appropriate inclusive sites for children with severe disabilities that maximize family and interagency involvement. Through Goal 4, staff will provide for students with severe disabilities a statewide performance-based assessment and accountability system that is linked to the regular state system for all students, but provides more meaningful information for making system and individual decisions for such students. To meet this goal, staff will define the linkages of functional curricula for students with severe disabilities to the curriculum frameworks for all students and establish agreement on those linkages.

Products: This project will provide a cross-categorical model designed to improve integration into age appropriate sites, and an alternative portfolio system that parallels the regular assessment system and will accurately reflect the skills of students with severe disabilities. Materials, curricula, etc. will be disseminated through current state newsletters and other publications.
State Improvement

Grant Number: H086J40005
Massachusetts Inclusion Initiative

Project Director: KIERNAN, WILLIAM
Beginning Date: Oct 1, 1994
Ending Date: Sep 30, 1999

UNIVERSITY OF MASSACHUSETTS/BOSTON
GRADUATE COLLEGE OF EDUCATION
100 MORRISSEY BOULEVARD
BOSTON, MA 02125
(617)287-5705

Purpose: To develop a statewide inclusive education system for all students in Massachusetts, birth through 21 years of age.

Method: This project will utilize a collaborative structure that will implement six discrete but inter-related components intended to effect systems change on both state and local school district levels. The project’s two-fold conceptual framework includes systems theory and change strategies on the state and local levels and an inclusive education model on the programmatic level. System change strategies will include 1) administrative restructuring to develop a unified system of education, 2) building-based leadership emphasizing training principals on inclusion values, 3) support to community service providers including coordination of health and social agency services, and 4) collaboration among schools, early intervention programs, and state-and community-based agencies. The project’s educational components include 1) collaboration among regular education, special education and related services personnel and 2) technical assistance to teachers to help develop collaborative teaming, cooperative learning, non-aversive behavior management, assistive technology, natural supports, etc. Project staff will also establish a Project Advisory Committee (PAC) composed of a consumer majority, analyze and implement policies to promote inclusion of students with severe disabilities coordinating existing inclusion initiatives, develop an Inclusion Guide focusing on strategies for adapting curricula for regular and special educators, provide technical assistance to agencies serving infants and toddlers and LEAs that will prevent the placement of students in segregated settings, and train parents, early intervention staff, administrators, community service professionals, and students with and without disabilities (N=750) on inclusion of students with severe disabilities.

Products: This project will result in increased inclusion of all infants, toddlers and students with severe disabilities in their local communities, development of statewide outreach strategies to serve students and family members from diverse ethnic and cultural backgrounds, and dissemination of training materials and implementation guides to all state LEAs, early intervention programs, and programs that specialize in deaf/blindness.
Discretionary Projects Supported by OSEP

Grant Number: H086J40007

Pacific Basin Region Wide Systems Change Project

Project Director: STODDEN, ROBERT

UNIVERSITY OF HAWAII
OFFICE OF RESEARCH ADMINISTRATION
2540 MAILE WAY SPALDING 253
HONOLULU, HI 96822
(808)956-5009

Beginning Date: Jul 1, 1994
Ending Date: Jun 30, 1999

Purpose: To facilitate systems change to improve the quality of special education and related services for children with severe disabilities in the outer Pacific Basin through full inclusion in their homes, communities and regular age-appropriate classrooms in neighborhood schools.

Method: The change process to be replicated, having been implemented and field tested in Hawaii, includes the following components: (1) piloting of innovations; (2) establishing innovations through model demonstration; (3) replicating models at other sites; and (4) institutionalizing support for those innovations through systems change. A plan will be developed and implemented to evaluate the current and desired status of inclusion of students with severe disabilities in all participating jurisdictions. A plan for full inclusion services and supports for children and youth with severe disabilities currently being served in their home schools will also be developed and implemented. Students not currently served, underserved, or served on segregated school campuses will be the subject of a further plan for full inclusion services. Project staff will identify and modify jurisdiction and state guidelines, policies, and procedures to support inclusive education and to eliminate policies and procedures that serve as incentives. Social interactions, acceptance, and friendships between children and youths with severe disabilities and their non-disabled peers will be promoted and planned for as well. Department of Education and school program improvements supporting inclusive home, community and education services and supports will also be evaluated and monitored. The project will further work to institutionalize, replicate, and disseminate full inclusion services and supports for children and youth with severe disabilities in home, community and school environments.

Products: The Hawaii UAP will provide leadership and support to each jurisdiction in planning, development, and evaluation of activities to meet goals and activities of the project. Furthermore, the project will monitor and evaluate program activities at each project site, nurture the unique cultural values of each site and promote and ensure self-determination in each island community.
Grant Number: H086J40012

Georgia Systems Change Project for Education of Children and Youth with Severe Disabilities

Project Director: ALBERTO, PAUL

GEORGIA STATE UNIVERSITY
COLLEGE OF EDUCATION
DEPARTMENT OF SPECIAL EDUCATION
UNIVERSITY PLAZA
ATLANTA, GA 30303
(404)651-2310

Beginning Date: Oct 1, 1994
Ending Date: Sep 30, 1999

Purpose: To improve the quality of special education and all related services delivered in inclusive, age-appropriate regular school and community environments for students with severe disabilities.

Method: Project Staff will first identify, develop, revise, and adopt policies and procedures which support effective inclusive educational strategies for students with severe disabilities. After documenting and disseminating policy results, staff will facilitate a collaborative approach among various resources on state, system and campus levels to meet the educational needs of children and youth with severe disabilities. Project Staff will then provide training opportunities to state, system, and campus personnel while increasing their capacity to provide ongoing training through best practice case studies and data-based presentations concerning inclusive education and its impact on learners with and without disabilities and their families. To develop teacher training programs, staff will collaborate with the Institutions of Higher Education (IHE) Consortium of Teacher Preparation programs in Severe Disabilities to recommend inclusion strategies. Staff will also facilitate family participation at all levels of policy discussion and collaboration by providing training experiences for family members for per-to-peer training. Staff will also prepare products specifically for family members, including slide presentations and information factsheets. Finally, staff will ensure that the process to improve educational services for students with severe disabilities continues beyond the funding period by providing a system for ongoing policy/procedure and strategy review.

Products: This project will result in increased awareness of inclusion options and benefits by family and community members and demonstrations in ten systems of the implementation of strategies/models for the provision of inclusive education for students with severe disabilities. Project results including policy review documents and revision plans will be disseminated on various levels.
Purpose: To merge regular education school reform and special education initiatives to create inclusive neighborhood school options for all learners.

Method: Bellamy’s Whole School Framework (1993) will be used as the conceptual basis for project efforts to bring about systemic school reform. The main features of the WSF model as it pertains to this project include enhancement of the learning environment and ongoing professional development. After identifying schools to participate, staff will develop a self-evaluation instrument based on the WSF model to evaluate functioning levels of these schools. Based on these results, specific building-level action plans will be developed. The capacity of the building level leadership teams network will be built up through access to and training in electronic communication, bulletin boards, literature and database systems. Linkages will then be developed between participating schools in their first year and other schools to be mentored in the second year. Special and regular education staff development systems will be merged, and materials and media which are responsive to the needs of school professionals will be acquired and made available. Professional development opportunities will be provided which focus on individualization of assessment, curriculum, and instruction. An annual summer institute will be conducted to provide professional development opportunities in areas of targeted need, and onsite reviews will be linked to further opportunities for professional development. Through parent training and liaison, staff will create community support for change and organizational restructuring incorporating inclusionary practices through parent/local community members. Strategies for the implementation of Goals 2000 and the Standards Based Education Act will be developed and results of this implementation for students with disabilities will be analyzed.

Products: Project outcomes will include: (1) formation and maintenance of Building Level Leadership Team networks; (2) ongoing professional development supporting collaboration, curriculum, instruction and assessment meeting the needs of all learners; and (3) dissemination of information gathered through implementation of this project to state-level policy makers engaged in crafting guidelines for Standards Based Education.
Grant Number: H086J50011
California Confederation on Inclusive Education

Project Director: PUMPIAN, IAN

SAN DIEGO STATE UNIVERSITY FOUNDATION
5178 COLLEGE AVENUE
SAN DIEGO, CA 92182-1900

Beginning Date: Jan 1, 1995
Ending Date: Dec 31, 1999

Purpose: To support the development and replication of inclusive schools as the next step toward the state’s goal of providing the least restrictive educational environment for all students with severe disabilities.

Method: A shared data base will be established to be used commonly across all current state level educational reform programs to use as the basis for increased general and special education communication and collaborative planning. A statewide policy audit will also be conducted with the input and guidance of stakeholder groups representing teachers, parents, advocacy groups, and administrators. This audit will develop the following: (1) a California Department of Education policy on inclusive education; (2) state guidelines for inclusive education which are supportive of a well-defined, individualized process; (3) changes to the California Education code to better support innovative inclusive models which retraining individualized protections; and a fiscal model based on student needs rather than locations. Standards impacting inclusive education will be inventoried and analyzed in order to develop programmatic standards for inclusive education, identification and adoption of specific competencies, and dissemination of a statewide model IEP format. Locally, the program will provide technical assistance to 24 LEAs to facilitate development and implementation of inclusive schools across all grade levels. LEAs will be linked with other districts in their region to ensure relevance and continuity of the planning and change effort, and with “mentor” districts implementing inclusive education. At the site level, staff will conduct needs assessment and establish a collaborative student planning process to ensure relevant, individualized, and effective instructional programs and support plans. At least 24 building level resource centers will be established with representative training teams to provide outreach, training, visitations, and information for replication partners both within and beyond the LEA. Project staff will assist in developing growth plans and training teams to support team outreach.

Products: The primary products of the project planned for dissemination will include the state level initiatives data base, local procedural handbooks, training modules, regional resource libraries, resource center activities, and an innovative preservice training programs data base. Project findings will otherwise be disseminated through newsletters, journal articles, audio conferencing, training modules, and telecommunications networks. Public awareness presentations and local workshops and inservices will also be conducted to increase general awareness and enhance local competencies.
Grant Number: H086J50012

Statewide Systems Change for Children with Severe Disabilities

Project Director: MCGREGOR, GAIL

UNIVERSITY OF MONTANA
RURAL INSTITUTE ON DISABILITIES
52 CORBIN HALL
MISSOULA, MT 59812
(406)243-5467

Beginning Date: Jul 1, 1995
Ending Date: Dec 25, 1999

Purpose: To support schools in developing plans for educational change that are: (a) locally determined and responsive to local needs; (b) based on learning about available possibilities; (c) based on an awareness of the dynamics of change; and (d) broadly focused on the various components that define the culture of the school.

Method: Staff will provide training and disseminate information to increase the awareness of educational approaches that enable general education classrooms to be more responsive to the individual needs of diverse students, including those with severe disabilities. A network of local schools that are using successful classroom practices to meet diverse student needs will be formed, and the program will sponsor network opportunities to foster the exchange of ideas among local school districts looking for responsive instructional and organizational practices. Support and training will be provided to increase the availability and capacity of local and regional providers of technical assistance to support schools in their adoption of inclusive education strategies. Key individuals and organizations will be identified which can bring fresh perspectives on inclusion to the policy and program implementation levels beyond the arena of special education.

Products: Presentations, a newsletter, and individual support will be provided to disseminate project findings at local, regional and state levels. Conference presentations, journal articles, and a directory of model sites will also be produced.
Competition 84.158A: State Systems for Transition Services for Youth with Disabilities
State Improvement

Grant Number: H158A30007
A Blueprint for School to Community Inclusion

Project Director: BRUCE, TED

FLORIDA DEPARTMENT OF EDUCATION
DIVISION FOR VOCATIONAL, ADULT & COMMUNITY EDUCATION
325 WEST GAINES STREET
TALLAHASSEE, FL 32399-0400
(904)922-6298

Beginning Date: Jul 1, 1993
Ending Date: Jun 30, 1998

Purpose: To connect students and educational professionals with employers and members of the community to improve post-secondary outcomes for students with disabilities as they transition from school to adult community life.

Method: State and local transition policy board boards will be created to coordinate policy review and revision efforts. A Request for Proposal process will be employed to promote innovation, coordination of available funding with nontraditional funding sources, and promotion of replication activities. Funding for these projects will support community education, responsive training, technical assistance services, and dissemination opportunities. After pilot programs are funded and supported, best practices will be disseminated and demonstrated, followed by selection of additional sites for supported replication.

Products: The program will establish an ongoing process oriented to continual systematic improvement in interagency planning and service delivery and expansion of collaborative efforts into the private sector. A tracking system will be established for linking electronic data systems combining student status and progress information. Self-advocacy and empowerment of students with disabilities and their families will be achieved through both their inclusion in local and state policy boards and incorporation of person-centered futures planning into individualized planning processes. The program in general is expected to result in improved graduation rates, employment rates, earnings rates and entry into postsecondary education and training.

Grant Number: H158A30008
Transition from School to Employment and Inclusive Communities

Project Director: BALDWIN, RICHARD

MICHIGAN DEPARTMENT OF EDUCATION
OFFICE OF SPECIAL EDUCATION
PO BOX 30008
LANSING, MI 48909
(517)335-0460

Beginning Date: Oct 1, 1993
Ending Date: Sep 30, 1998

Purpose: To ensure employment, inclusion, and support of youth with disabilities in their communities throughout Michigan.
Method: The program will establish state and local policies and interagency planning and coordination to support effective transition from school to employment and community inclusion. Youth with disabilities and their families will be supported in the transition from school to employment and community inclusion. Emphasis will be placed on increasing employment and community inclusion of youth with disabilities from minority backgrounds, including special education dropouts, students with moderate to severe disabilities aged 21-26, and students from ethnic minority groups. The systems change process and effectiveness of transition policies as indicated by student outcomes will be evaluated through a longitudinal assessment.

Products: The program will increase Michigan's employment rate and community inclusion of youth with disabilities and develop effective state and local coalitions across employment and training organization to ensure services and outcomes to students with disabilities.

Grant Number: H158A30014

Wisconsin's Design for Transition Success

Project Director: ODELL, BRENTE

WISCONSIN DEPARTMENT OF PUBLIC INSTRUCTION
DIVISION FOR HANDICAPPED CHILDREN
125 S. WEBSTER STREET PO BOX 7841
MADISON, WI 53707
(608)266-6981

Beginning Date: Jul 1, 1993
Ending Date: Jun 30, 1998

Purpose: To establish and promote a collaborative and complementary service delivery model so that all Wisconsin students with disabilities will exit secondary education prepared to live, work, recreate and pursue lifelong education in the community.

Method: A local public-agency "bidders conference" will be conducted by the participating state agencies to define best practices in transition and set the expectations for local project applications. A request for proposal approach will then be used to solicit local community consortia transition project proposals. Once funded, each project will be required to: attend comprehensive transition issues trainings; develop and implement transition activities to address their identified needs; and evaluate and collect data on student outcomes for use in transition program improvement.

Products: Evaluation data from these project models will be utilized by state agencies to develop state level policies, interagency agreements, legislation and procedures for effective transition practices, and institute a statewide multi-agency system to plan and deliver transition services to students with disabilities.
Grant Number: H158A30016

Indiana Transition Initiative

Project Director: ASH, PAUL

INDIANA DEPARTMENT OF EDUCATION
DIVISION OF SPECIAL EDUCATION
ROOM 229, STATE HOUSE
INDIANAPOLIS, IN 46204-2798
(317)232-0563

Purpose: To effect broad improvement in the quality and availability of transition service to all students with disabilities and to undertake the needed changes in the structure of state and local systems to support these improvement.

Method: The first year of the project will focus on a variety of planning and capacity-building mechanisms and the establishment of organizational structures. Years 2 through 5 will focus on statewide implementation of training and model replication activities, revision of state policies and procedures, broad dissemination of information, and implementation of evaluation activities to determine the impact of the program on students with disabilities and overall systems operation. A coordinated management information system will be installed to provide follow-up on students who exit special education programs. Project data will be used for the evaluation of practices and improvement of policies. Training and technical support will be provided to professionals involved in transitional services, and college programs for teachers and related professionals will be assisted in developing preservice training programs to address competencies for effective transition planning.

Products: Services and supports will be coordinated or developed to enable approximately 29,000 high school students with disabilities to make successful transitions from school to adult life, including employment, postsecondary education and training, community living opportunities, and participation in community life.

Grant Number: H158A50005

The Maryland Transition Initiative

Project Director: MCKENNA, PATRICK

MARYLAND STATE DEPARTMENT OF EDUCATION
DIVISION OF REHABILITATION SERVICES
200 W. BALTIMORE STREET
BALTIMORE, MD 21201
(410)554-3267

Purpose: To develop, implement and improve Maryland’s system to provide transition services for youth with disabilities.
**Method:** Within local education systems, employers, parents, teachers, and other community leaders will be assisted in creating opportunities for students to pursue multiple paths to productive careers through seed grants to local school systems throughout Maryland and through training and technical assistance. Mechanisms to increase the availability, accessibility and quality of transition services for students with disabilities from age 14 through the point of their leaving public school will be planned, developed, and publicized. Students with disabilities, families, and advocates will receive training and support to make informed choices and participate actively in available services. Institutions of higher education will be supported to develop their capacity to meet the unique needs of students with disabilities, and pre-service training programs will adjust their curricula to address competencies pertaining to effective transition planning. A statewide information system will be established to collect, analyze, and disseminate information concerning transitioning youth, tracking demographic data, education, support and transition services provided, and outcomes of student follow-up at one and five years following exit from the school system.

**Products:** This project will blend on a system-wide basis Maryland’s comprehensive school-to-work initiatives for general education with the extant agencies of special education transition. Presentations on project activities will be made at state and regional conferences, and state transition guidelines, transition fact sheets, and other brochures and pamphlets will be disseminated via direct mail and a variety of other networks. A self determination curriculum and futures planning guides will be disseminated through state and local workshops as will as infusion in transition demonstration sites.

**Grant Number:** H158A50008

**South Dakota Transition to Adulthood Systems Change Project**

**Project Director:** BARNETT, DEBORAH  
**Beginning Date:** Oct 1, 1995  
**Ending Date:** Sep 30, 1999

DEPARTMENT OF EDUCATION & CULTURAL AFFAIRS  
OFFICE OF SPECIAL EDUCATION  
700 GOVERNORS DRIVE  
PIERRE, SD 57501-2291  
(605)773-3678

**Purpose:** To design and implement a coordinated and consolidated employment system among local communities in South Dakota to ensure that youth with disabilities master the skills necessary to address the sustained employment responsibilities of adulthood.

**Method:** The South Dakota Alliance for Transition will be established to serve as the guiding agent for statewide transition systems change. By serving as an effective link to existing state systems change services, such as JTPA, school-to-work initiatives provided under the Workforce Development Council of South Dakota, and sustained employment, the SDAT will ensure that goals for transition systems change reflect an integration of goals and support for those youths with disabilities who are so targeted. The SDAT will also ensure that localities are provided with an atmosphere of clear and cohesive communication lines for the timely and accurate dissemination of ideas and data. The SDAT will further offer a network for the provision of support and training, to ensure that local districts are able to properly identify and serve the transition needs of youths with disabilities. Focusing on empowerment of local systems and full utilization of local resources, SDAT will encourage service delivery providers to work toward student and parent participation in transition planning, sensitivity to the culture and personal values of each student, provision of self-advocacy opportunities, promotion of student self-esteem and self-confidence, pro-
motion of student involvement in extracurricular and community activities, and development of school-based programs providing students with appropriate academic social, and vocational skills. Training and technical assistance will be provided to local service providers, better enabling them to work with their local districts, students with disabilities, their families and employers on transition issues.

**Products:** This project will achieve a more equitable, coordinated, and systematic approach to improving transition services for youth with disabilities. A flexible and responsive regulatory mechanism will be created, as will an administrative structure through which necessary resources are provided to the local service providers. The empowerment of local communities will encourage and advance collaboration and the development of shared resource networks.

**Grant Number:** H158A60001

**Missouri Transition Access Project**

**Project Director:** PARSONS, DEBORAH

**DEPT. OF ELEMENTARY AND SECONDARY EDUCATION**
**DIV. OF SPECIAL ED. AND VOCATIONAL REHABILITATION**
**P.O. BOX 480**
**JEFFERSON CITY, MO 65102**
**(314)751-8165**

**Beginning Date:** Aug 1, 1996
**Ending Date:** Jul 31, 1999

**Purpose:** The Missouri Transition Alliance Project seeks to enhance the transition of school to work for students with disabilities to assure that comprehensive services (both employment and independent skills) are accessed through the interagency, community, and consumer collaboration in the planning process.

**Method:** The project will create a regional network to provide leadership, training, and capacity building. It will coordinate a participatory structure at the state level that will interact with the Missouri School-to-Work Initiative to effect policy and practice change and result in improving the transition of students with disabilities from school to work.

**Products:** Through the project's network, transition activities throughout the childhood of students with disabilities will be improved. Assuring implementation of transition activities at the local level, the project will enhance student outcomes.
Grant Number: H158A60002

Project Director: STOTT, THOMAS

R.I. DEPT. OF EDUCATION
22 HAYES STREET
PROVIDENCE, RI 02908

Beginning Date: Sep 1, 1996
Ending Date: Aug 31, 1999

Purpose: The Rhode Island Transition Project is designed to create and coordinate an environment in the state where students and families are encouraged, supported, and assisted in choosing and planning their futures, moving toward independence, and achieving full community integration in living, working, and socializing.

Method: The project will coordinate a system to compile, analyze, and disseminate accessible information for parents and students about their rights and resources in the community related to transition planning. Training opportunities and other forums will bring together parents, teachers, students, providers, and employers to improve the system. Technical assistance, advocacy, and skill building will be provided to help students and families negotiate the system.

Products: The project intends to create better connected systems of services and the means to manage those services. It hopes to establish permanent and accessible resources to support transition efforts and to establish local responsibility for the specifics of transition planning. Real partnerships can be founded which will provide some of the practical details of adult life for students and which will empower parents through support and mentor networks.

Grant Number: H158A60004

State Systems for Transition Services for Youth with Disabilities: Interact Arizona

Project Director: LOVE, LAURA

ARIZONA DEPT. OF EDUCATION
1535 WEST JEFFERSON STREET
PHOENIX, AZ 85007
(602)542-2805

Beginning Date: Aug 7, 1996
Ending Date: Jul 31, 1999

Purpose: The general purpose of InterAct Arizona is to influence local and state-level systems change designed to empower local communities to maximize transition planning and enhance service options for youth with disabilities from age 14 through the age when they exit school.

Method: InterAct Arizona will provide statewide training and technical assistance designed to improve and increase the ability of professionals, parents, advocates, and youth to promote the understanding of and the capability to successfully make the transition from student to adult. Needs assessments will deter-
mine the availability, quality, and accessibility of services needed to successfully transition into adult roles. Project activities to address identified needs will be designed, implemented, and evaluated. Results of evaluations will be used to guide the design of annual activities.

Products: Under the guidance of the InterAct Arizona Council and the network of Arizona Community Transition Teams and Youth Transition Program sites teams, InterAct Arizona will affect state-level and statewide policies, procedures, regulations, and funding mechanisms to improve and expand the availability, access, and quality of transition services for youth with disabilities and their families. Through the expansion of teams and sites, InterAct Arizona will build the capacity of communities statewide to provide more effective delivery of transition services by improving the working relationships among stakeholders in transition services, by developing incentives for accessing and using transition services and resources, and by addressing the unique needs of youth with disabilities from minority backgrounds. The project will produce training and technical assistance materials, resource guides, and other products to facilitate the exchange of information, and will disseminate to local, state, regional, and national audiences.

---

**Grant Number:** H158A60005

**Illinois Transition Consortium — Insure Implementation of Transition Services for Youth with Disabilities**

**Project Director:** JOHNSON, GAYLE

**Beginning Date:** Aug 1, 1996

**Ending Date:** Jul 31, 1999

ILLINOIS STATE BOARD OF EDUCATION
100 NORTH FIRST STREET
SPRINGFIELD, IL 62777
(217)782-6601

**Purpose:** The Illinois Transition Consortium is a five-year systems change project that proposes to improve the personal outcomes for Illinois youth with disabilities who graduate from public schools.

**Method:** The project expects to create expanded partnerships with students, parents, adults with disabilities, minority representatives, advocates, business leaders, state agencies, and others. To guide the project, it will form an advisory group across all stakeholders; it will conduct focus groups with students and implement systems change based on current student outcomes. It will initiate early and ongoing parent/family technical assistance and training and target resources at the local level to demonstrate systems change for improved outcomes. It will establish a training academy for local stakeholders who have not traditionally been involved and establish a clearinghouses of information for all those involved in or concerned with outcomes of youth with disabilities.

**Products:** The consortium intends to enhance Illinois’ capacity to represent the geographical and cultural needs of targeted youth and increase the participation of parents/families and adults with disabilities in preparing for their future; it intends to increase the state’s capacity to plan and develop policy and practices that are inclusive of all youth and responsive to their needs and to develop opportunities for local communities to demonstrate student-centered and outcome-based educational and adult services. It will provide information, training, resources and technical assistance to local stakeholders.
**Grant Number: H158A60006**

**Oklahoma Systems Change for Transition Services for Youth with Disabilities**

*Project Director:* CORPOLONGO, JOHN  
*Beginning Date:* Jul 1, 1996  
*Ending Date:* Jun 30, 1999

**Purpose:** This project is designed to effectively utilize state and local resources to assist local communities, families, individuals with disabilities, schools, and other agencies to develop and improve the delivery of transition services.

**Method:** The Oklahoma Gaining Adult Independence through Needed Support (GAINS) Project will fund innovative models through local implementation sites. Results will be disseminated and will provide a foundation for the state to revise or create policy to enhance transition services for youth with disabilities.

**Products:** The Oklahoma GAINS Project is committed to creating collaborative structures to enable individuals and agencies providing transition services to coordinate their efforts to achieve meaningful results for youth with disabilities. It will support regional advisory boards and local transition councils in implementing projects to improve the availability and accessibility of transition services. It will build local, regional, and state capacities to deliver quality technical assistance, training, and transition process guides. It will develop a system to create or revise policies to effectively implement transition services and coordinate procedures to ensure the implementation. It will inform individuals who provide transition services about issues and practices related to successful transition of students with disabilities.

---

**Grant Number: H158A60007**

**Louisiana Statewide Transition Project**

*Project Director:* EVERSON, JANE  
*Beginning Date:* Aug 1, 1996  
*Ending Date:* Jul 31, 1999

**Purpose:** The Louisiana Statewide Transition Project is an interagency and multi-level project dedicated to statewide systems change in the area of transition services.

**Method:** The project will guide the development of an integrated statewide system for transition service delivery. It will support the development of individual, local, regional, and state transition activities and assure continuation and improvement of the transition delivery system.

**Products:** The goal of the project is to create a multi-level framework of resources and activities for lasting transition services through collaborative activities involving youths with disabilities and their families.
Purpose: The purpose of the Alaska Transition Initiative is to develop a statewide transition system enabling all students with disabilities in Alaska to leave school with the skills, supports, and knowledge required to enhance their participation in adult life.

Method: To ensure that all students with disabilities leave school situated in the working, learning, and living arrangements of their choice and to empower students and their families to become active decision makers in planning and implementing transition services, the project will promote and support state-level collaboration to strengthen transition services and increase awareness of the need for coordinated transition services and build support for programs. It will increase the availability, access, and quality of those services statewide and build the capacity of local networks to implement services. It will provide incentives for local planning, implementation, and evaluation of transition services.

Products: The goals of the project are designed to address systems issues in Alaska and to build capacity within the state, as well as improve local community transition activities. Alaska’s approach to transition for youth builds upon a strong tradition of local control and provides flexibility for local transition networks to develop and implement systems that meet the unique needs and circumstances of their communities, ensuring that local transition services address Alaska’s diverse cultures, geography, political and governmental structures, and economy.

Purpose: This project, administered by the Mississippi Department of Education, intends to increase transition services to youth with disabilities.

Method: Three transition specialist positions will be created for each of the three regions of Mississippi. The specialists will be assisted by vocational staff, local vocational rehabilitation counselors, special population coordinators, and other technical staff to ensure that each district receives regular hands-on training. Each year of the grant, a statewide transition conference will be held for all personnel. A state-
wide transition committee will be created with emphasis on collaboration and policy reform and will assess the effectiveness of policies and integration of new policies and federal and state legislation.

**Products:** The project hopes to effect systemic change in transition services for Mississippi. All school districts will receive individualized training in transition services. Increased knowledge, motivation, and direction will be provided for professionals and students with disabilities. The statewide transition committee will strengthen policies in transition services.

**Grant Number:** H158A60010

**Delaware's Transition Services Quality Management (TQM)**

**Project Director:** PLEDGIE, THOMAS

DEPT OF PUBLIC INSTRUCTION  
P.O. BOX 1402 TOWNSEND BLDG  
DOVER, DE 19903

**Beginning Date:** Aug 1, 1996  
**Ending Date:** Jul 31, 1999

**Purpose:** The mission of the Transition Services Quality Management System project is to implement a quality based coordinated system of supports and services that are consumer responsive, and to enable students with disabilities to transition from school to adult life while becoming valued and contributing members of their communities throughout Delaware.

**Method:** To achieve its outcomes, the project intends to plan and implement a statewide collaborative system, changing the state's delivery system to a consumer-responsive transition system. It plans to model and replicate effective transition components, to implement comprehensive training and technical assistance, to develop the capacity for change at higher education levels, and to disseminate information on promising practices which support systems change efforts.

**Products:** The project goals are to increase the availability and access to quality based transition services, to improve the ability of professionals, families, and advocates in the transition planning process to be responsive and supportive of students interests and preferences, and to enhance and build collaborative relationships between all critical stakeholders that will lead to continuation of quality based transition services after funding ceases.
Grant Number: H158A60011  
District of Columbia Transition Initiative (DCTI)

Project Director: WALLINGTON, CAROL  
Beginning Date: Aug 1, 1996  
Ending Date: Jul 31, 1999

DISTRICT OF COLUMBIA PUBLIC SCHOOLS  
415 12TH STREET NW  
WASHINGTON, DC 20004

Purpose: The purpose of the District of Columbia Transition Initiative is to effect broad and specific improvements in the quality and availability of transition services for area youths with disabilities, and to undertake changes to the structure of systems to support these improvements. A major project strategy is reforming systems through the creation of a new learning enterprise developed jointly by community partners.

Method: The proposed project would plan, develop, and publicize mechanisms to increase the availability, accessibility, and quality of transition services. It would ensure that students with disabilities, families, and advocacy and support groups receive training and support to assure informed and active participation and it would develop a coordinated system to provide that training. It would ensure that institutions of higher education are responsive to the needs of students with disabilities and that preservice training programs address the competencies for effective transition planning. It would create a system-wide mechanism for information dissemination so that project products are made available to interested parties.

Products: The project will enhance the current system of transition in the District of Columbia by implementing statewide policies and program incentives that promote collaboration and coordination across programs, improving statewide data collection and follow-up, and developing administrative policies that encourage long-term and systematic change at all levels. Students will be able to participate in challenging, purposeful programs of study in school and at work. Career development training will be blended with business-driven, hands-on vocational experiences.

Grant Number: H158A60013  
Alabama Transition Initiative to Increase the State’s Capacity to Improve and Expand Its Transition Services and Programs to Meet the Needs of Youth with Disabilities

Project Director: WHETSTONE, MABREY  
Beginning Date: Sep 1, 1996  
Ending Date: Aug 31, 1999

ALABAMA STATE DEPARTMENT OF EDUCATION  
P.O. BOX 302101  
MONTGOMERY, AL 36130

Purpose: The Alabama Transition Initiative’s goal is to provide student-centered transition planning and implementation at the local level. The initiative is designed to create a network of local school-based demonstration programs with effective transition services to be replicated statewide.
Method: Five goals are being proposed: 1) a local program/service initiative, intended to empower local education agencies and communities to implement effective practices. 2) The interagency initiative will strengthen local and state partnerships among agencies in order to impact positive change. 3) The post-school linkage initiative is intended to create linkages between students and local adult services and opportunities available through state agencies, communities, and business and industry. 4) The training and dissemination initiative will implement a comprehensive training and dissemination program designed to improve and increase the ability of all stakeholders in transition. 5) Finally, the intent of the student tracking initiative is to improve at the local level the transition planning process and related service programs and to serve as an accountability index for the state department regarding the performances of its youth and young adults with disabilities.

Products: Through the development and implementation of a comprehensive system of transition services, the Alabama Transition Initiative will positively impact over 67,000 youth with disabilities over the course of the five-year project. Building on existing state capacity, the plan will undertake five initiatives, which, when accomplished, will transfer empowerment to the local level with the direct beneficiaries being the students and their families.
