This paper summarizes various studies exploring the effects of racial bias on poor academic performance by Native Americans. Historically, school counselors and teachers have had low expectations for their Native American students. A 1968 study of Native American dropouts indicated that home support was a major factor in students' dropout behavior, as was lack of encouragement from the school. A 1993 study of 991 Native American women reported that Native American students were told in both direct and indirect ways that they were not worthy or good at anything. Many Native American students are encouraged to pursue a vocational rather than academic track. Native American writers and researchers note that this attitude persists, despite attempts at reform, and teachers' low expectations of Native American students confirm other teachers' doubts about these students' performance in the classroom. The literature documents the interactional behavior between teacher expectations and student achievement. This interaction is a dominant influence underlying teacher collaboration with young Indians in the classroom. (SM)
Low Expectations by Teachers within an Academic Context

Wallace C. Strong

Introduction

In 1903, U.S. Indian Commissioner William A. Jones made this comment:

Give the Indian a white man's chance. Educate him in the rudiments of our language. Teach him to work. Send him to his home, and tell him he must practice what he has been taught or starve. It will in a generation or more regenerate the race. It will exterminate the Indian but develop a man [emphasis added].

(Coleman, 1993: 46)

In 1893 Congress authorized the Secretary of the Interior to withhold rations and other annuities from parents and guardians who refused to send their children to school (Coleman, 1993:45). This should have been a godsend to many tribal groups for in contemporary society there have been studies on tribes like the Pima, and hundreds of others, who are now suffering from rations doled out by the government. It trapped them in a diet of saturated fats that escalated the prevalence of diabetes.

The Northwest Regional Educational Laboratory in Portland, Oregon (1968) reported in their study of Native American dropouts, that home support was a major factor, also "lack of encouragement from the school," was a major factor. In her study of nine hundred ninety-one Native American women, Ardy Bowker (1993) reported that when these women told their stories about their school experience they were told in both direct and indirect ways that they were not worthy or good at anything.

My own experience of low expectations by counselors and teachers left a dramatic impression on my own expectations to succeed. The counselors at my high school persistently advised me to opt for the vocational track. I took the vocational track, participated in baseball and became an expert in leather crafts. When I look back at my experience of low expectations from high school staff, I wonder if I sold out myself, or if the school treated me shabbily because Native American parents were not involved in school policy-making and teaching. Now I'm completing a doctorate degree beyond anyone's expectations, except myself - I clearly see the "race card" that was dealt to the majority of Native American students.

Implications and possibilities of change

Wilma Mankiller, in her book Mankiller, a Chief and her People, states that:
Some things never change. Almost since its inception, there have been many attempts to reform the BIA. I guess I agree with former Creek Chief Claude Cox of Oklahoma, who said reforming the BIA was kind of like rotating four bald tires on an old car. The net result would be no change (Mankiller, 1993: 168)

An additional humorous anonymous note is the repartee:

Grandma and her friend would ride her horse five miles to school in a raging blizzard, and grandpa would be walking behind carrying his books, lunch, wood for the stove and an apple for the teacher.

Finally, Dr. Lionel Demontigney (1968) states that teachers' attitude of low expectancy confirms teacher doubts about young Indians' performance in the classroom or school setting.

Conclusion

For Freire (1990), specific literacy programs are shaped by what he calls "the yearning of the oppressed for freedom and justice, and their struggle to recover their lost humanity (28)." Delpit (1996) has documented relevant examples of Native American experiences on low expectations for Native American people. Thus, the literature documents this interactional behavior. I call this interaction a dominant inference underlying teacher collaboration with young Indians in the classroom.

REPRODUCTION RELEASE
(Specific Document)

I. DOCUMENT IDENTIFICATION:

Title: Low Expectations by Teachers within an Academic Context

Author(s): Wallace C. Strong

Corporate Source: University of Illinois, Urbana-Champaign

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign at the bottom of the page.

The sample sticker shown below will be affixed to all Level 1 documents

<table>
<thead>
<tr>
<th>Level 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Check Box]</td>
</tr>
<tr>
<td>![Signature] Wallace C. Strong</td>
</tr>
<tr>
<td>![Print Name/Position] Yokyma Valley College, Yakima WA</td>
</tr>
<tr>
<td>![Organization/Address] 1801 N. Campus Rd, Watoga WA 98951</td>
</tr>
</tbody>
</table>

Check here for Level 1 release, permitting reproduction and dissemination in microfiche or other ERIC archival media (e.g., electronic) and paper copy.

The sample sticker shown below will be affixed to all Level 2A documents

<table>

Check here for Level 2B release, permitting reproduction and dissemination in microfiche only.

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but no box is checked, documents will be processed at Level 1.

I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.

III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS.)

Publisher/Distributor:
