ABSTRACT

This report presents findings of a study of the attitudes of college freshmen who will likely graduate in 2001. Interviews with 2001 freshmen attending public and private four-year colleges and universities are analyzed in text and tables for the following topics: generational differences; beliefs and values; goals and aspirations; finances, social and political concerns; race relations; and a typical week for one member of the class of 2001 students. An executive summary highlights the following major findings: (1) students hold mixed views on generational differences; (2) although marriage and family are important, students are not "wed" to traditional values; (3) parents are students' most frequently named role models; (4) students have specific goals and are confident they will succeed; (5) about half of these students plan to enter the workforce immediately upon graduation; (6) helping others is a high priority, both in their current activities and career aspirations; (7) a minority of students cite high salary or prestige as career goals; (8) students have relatively little knowledge about vehicles for financial security; (9) students are split regarding the country's direction; (10) most students have a negative view of current race relations; and (11) sleeping and socializing take up most of these students' time. A section on the survey methodology and an annotated questionnaire are appended. (DB)

## **Introduction**

*Generation 2001: A Survey of the First College Graduating Class of the New Millennium* was conducted by Louis Harris and Associates, Inc. on behalf of Northwestern Mutual Life Insurance Company to explore the hopes and aspirations of today's college freshmen: the Generation 2001 students. The survey was designed to explore the following broad areas:

- how Generation 2001 views themselves and other generations
- career and lifestyle goals and aspirations
- political and social views and outlook

## **Methodological Overview**

The findings described in *Generation 2001: A Survey of the First College Graduating Class of the New Millennium* are based on interviews with 2,001 first-year freshmen attending public and private four-year colleges and universities across the United States. Interviews averaging 24 minutes in length were conducted by telephone between November 11, 1997 - January 12, 1998. A detailed methodology is outlined in Appendix A of this report. The survey questionnaire appears in Appendix B.

## **Notes on Reading Tables**

The base for each question is the total number of respondents answering that question. All bases sizes shown in the report are unweighted; percentages for responses are weighted. An asterisk (\*) on a table signifies a value of less than one-half percent (0.5%). A dash represents a value of zero. Percentages may not always add up to 100% because of computer rounding or the acceptance of multiple answers from respondents answering that question. Note that in some cases results may be based on small sample sizes. This is typically true when questions were asked of subgroups. Caution should be used in drawing any conclusions from results based on these small samples.

### **Project Responsibility and Acknowledgments**

The Harris team responsible for the design and analysis of the survey included David Krane, Executive Vice President, and Amy Cottreau, Research Associate. Deanna Tillisch, Director of the Generation 2001 study for Northwestern Mutual Life Insurance Company; and Ken Swoyer, Principal of Cobey Communications, provided an invaluable contribution to the design of the questionnaire. Louis Harris and Associates, Inc. is responsible for final determination of topics, question wording, collection of data, analysis and interpretation in the report.

### **Public Release of Survey Findings**

All Louis Harris and Associates, Inc. surveys are designed to comply with the code and standards of the Council of American Survey Research Organizations (CASRO) and the code of the National Council of Public Polls (NCPP). Because data from the survey may be released to the public, any release must stipulate that the complete report is also available.

## Executive Summary

The stereotypical image of a member of a Generation 2001 student is often that of a self-interested, lazy youth with few goals beyond their plans for that evening. In reality however, Generation 2001 students have many concerns and interests beyond themselves and appear motivated to realize their hopes and aspirations for a bright future. The results of “Generation 2001: A Survey of the First College Graduating Class of the New Millennium” are based on 2,001 interviews conducted with freshmen and reveal a number of interesting findings:

### 1. Generation 2001 holds mixed views on generational differences

- Generation 2001 students are divided on whether their generation is special or unique. While fully 44% feel that they are part of a new generation, a slight majority (55%) feel they are basically no different from other generations living today.
- However, the majority (57%) of the Generation 2001 students believe there is at least some difference between themselves and their parents when regarding values and lifestyles.
- Technology tops the list of advantages while crime, violence, and drugs are the leading problems the Generation 2001 students sees facing them.
- Generation 2001 students are more likely to trust older people than their younger contemporaries.

### 2. Although marriage and family are very important, Generation 2001 students are not “wed” to traditional values.

- While over three-fourths (77%) of the Generation 2001 students believe strongly that having close family relationships is a key to happiness, less than four out of ten (37%) strongly agree that marriage is a cornerstone of societal values and fully 61% at least somewhat agree that divorce is an acceptable solution if two people are unhappy in a marriage.
- Additionally, over two-thirds (68%) of the Generation 2001 students agree that pre-marital sex is okay when two people love each other and nearly as many (64%) agree that living together before getting married is a good idea.

**3. Mom and Dad are significant role models.**

- When thinking of the people they most admire and respect, honesty and integrity are most often named as the most important attribute that causes Generation 2001 students to admire them. Mom and Dad, are most often named as most admired.

**4. Having set goals, and believing hard work is important to success, Generation 2001 students are confident they will get to where they want to be in life.**

- Nearly nine out of ten students (88%) have established specific goals for the next five years and more than three-fourths (78%) agree strongly that they are sure that someday they will get to where they want to be in life.
- A strong majority (75%) disagree that lucky breaks are more important to achieving success than hard work and 57% are willing to work more than 40 hours per week to reach their career goals.

**5. Nearly half of the students from the Generation 2001 (47%) plan to immediately enter the workforce upon graduating from college.**

- While most (62%) students would not consider doing what either of their parents do, a significant 37% would consider following in Mom or Dad's footsteps.
- Most members of the Generation 2001 students believe that a two-income household will be at least somewhat important in ensuring that they reach their lifestyle goals.

**6. Helping others is a high priority for the Generation 2001 students - both in their current activities and career aspirations.**

- Nearly three out of four students (73%) report having volunteered in the last year, and a clear majority (58%) say it is very likely that they will volunteer in the future.
- When considering their future career, the most important two components are having idealistic and committed co-workers and doing work which gives them opportunity to help others (with 67% and 65% respectively saying it is very important that this be a component of their career).

**7. In comparison, money does not seem as important to Generation 2001 students.**

- Only one third (33%) say that earning a high salary is a very important part of their career and similarly only one in four (26%) find high job prestige to be very important.
- The average starting salary expected by Generation 2001 students when they begin their career is \$38,000 and fully 42% do not expect to be earning more than \$30,000 when they begin their career.

**8. Despite their perceived importance, Generation 2001 students often lack knowledge about vehicles for financial security.**

- Owning a home tops the list but life insurance trails closely behind, with IRAs and pensions also being seen as very important by significant pluralities.
- Depending on the financial vehicle, between 15% and 57% of all students report that they are not very or not at all knowledgeable about the aforementioned financial vehicles.

**9. Generation 2001 students are split in support of direction of the country.**

- Grading America's social and political institutions, medicine is viewed most favorably. Government trails behind with local being the best received, followed by the White House and then Congress. The press and media rank lowest of all one-third of all students giving them a grade of "D" or "F".
- Nearly all (96%) students say they are at least somewhat concerned about the education system when thinking of the future and the education system ranks number one as the most important issue for government or society to address.
- A clear majority of students (63%) strongly agree that preserving the environment is very important to them and ranking third among issues Generation 2001 students believe is most important for government or society to address.

**10. While a majority Generation 2001 students hold a negative view of the current state of race relations in the United States, many expect that these relations will improve by the year 2001.**

- In a perhaps related outlook, nearly three-fourths (72%) of all students believe that it is at least somewhat likely that a person of color will be elected President of the United States. Somewhat fewer (64%) think it is as likely that a woman will be elected President.

### **11. Typical week for a member of the Generation 2001 students**

- Sleeping and socializing take up most of a Generation 2001 student's time, but school is important with class time, studying and homework following close behind.
- Given more time, socializing, exercising, and sleeping rank as the top three activities students would like to do. Studying, homework and class are those activities they would most like to spend less time at then they do now.

## 1. Generational Differences

### Uniqueness of Generation 2001

In trying to understand this new generation of young people, perhaps one of the first things to look at is how they distinguish themselves from others. However, when asking Generation 2001 students if they feel that people their age are special or unique in some way or if they are basically no different from other generations, opinion is divided. While fully 44% feel that they are part of a new generation, a slight majority (55%) feel they are basically no different from other generations living today. Women and blacks, however, are somewhat more likely than men and whites respectively, to view their generation as special or unique (46% women v. 41% males and 51% blacks v. 42% whites).

**Table 1-1**  
**Generation 2001: Is it Unique?**

Q100. Some people have said that the Generation 2001 students is part of a new generation. Do you feel people your age are special or unique in some way or are you basically no different from other generations living today?

	<u>Total</u>	<u>Sex</u>		<u>Race</u>			
		<u>Male</u>	<u>Female</u>	<u>White</u>	<u>Black</u>	<u>Other</u>	<u>Hispanic</u>
Base	2001	941	1060	1546	127	328	141
	%	%	%	%	%	%	%
Special or unique	44	41	46	42	51	47	53
No different	55	58	52	56	49	51	47
Don't know	1	1	1	1	-	2	*
Refused	*	*	-	*	-	-	-

***Observation:*** *The slight differences in viewpoints of these groups may be a reflection of their perception of the changes that have occurred as a result of the women's rights and civil rights movements; differentiating people their age from older generations.*

This majority believe that Generation 2001 is basically no different from other generations living today provides an overly simplistic picture of their perceptions of generational differences. Differences do exist for example, when comparing themselves to their parents, the majority (57%) of the Generation 2001 students believe there is at least some difference between themselves and their parents regarding values and lifestyles. Further, nearly one in four (24%) students characterize the generational gap between themselves and their parents regarding how they want to live their lives as a big difference. This gap is largest among blacks, 37% of whom report a big difference between themselves and their parents, compared with only 21% of whites.

**Table 1-2**  
**Difference Between Generation 2001 and Parents**

Q101. Considering the way you intend to live your life, how would you characterize the difference between you and your parents regarding values and lifestyles, do you feel there is a big difference, some difference, only a little difference, or almost no difference?

	<u>Total</u>	<u>Race</u>			
		<u>White</u>	<u>Black</u>	<u>Other</u>	<u>Hispanic</u>
Base	2001	1546	127	328	141
	%	%	%	%	%
<u>Difference</u>	57	55	61	66	63
Big difference	24	21	37	30	28
Some difference	33	34	24	36	35
<u>No difference</u>	43	45	39	34	37
Only a little difference	28	28	30	25	27
Almost no difference	15	17	9	8	10
Don't know	*	*	-	*	-
Refused	*	*	-	-	-

## Trust and the Generations

However, even though Generation 2001 students do acknowledge some differences between themselves and their parents, they still look to the older generations. Specifically, when comparing the moral integrity and honesty of their generation with that of others, Generation 2001 students sees age as good proxy for these attributes; trusting older people more than their younger contemporaries. They are most likely to trust their grandparent's generation a lot (79%), followed by their parent's generation (68%). Curiously, when considering their generation and "Generation X," trust falls considerably, with only one in four or less (25% and 19% respectively) trusting the moral integrity and honesty of these generations a lot.

**Table 1-3**  
**Trust Moral Integrity and Honesty - Generation 2001 - Summary**

Q104. Thinking about different generations, how much do you trust the moral integrity or honesty of your generation -- a lot, a little or not at all?

	Trust <u>A Lot</u>	Trust <u>A Little</u>	Trust <u>Not At All</u>	Don't <u>Know</u>	<u>Refused</u>
Base	2001 %	1546 %	127 %	328 %	141 %
Your grandparent's generation	79	17	2	2	*
Your parent's generation	68	30	2	1	*
Your generation	25	67	7	1	*
Generation X	19	67	10	5	*

African-American students are somewhat stronger in their skepticism of their generation and “Generation X.” They are more than twice as likely as whites to report that they do not trust their generation (13% v. 6%) or “Generation X” (17% v. 8%) at all.

**Table 1-4**  
**Moral Integrity and Honesty of Generation 2001**

Q104A. Thinking about different generations, how much do you trust the moral integrity or honesty of your generation -- a lot, a little or not at all?

Don't know	5	5	6	7	8
Refused	*	*	-	*	-

## Advantages and Disadvantages of being in Generation 2001

Regardless of their perceptions of the differences between generations, Generation 2001 students do identify specific advantages and disadvantages to being a member of their generation. Technology tops the list of advantages, followed by better career opportunities (cited by 37% and 13% of students respectively). More educational resources and opportunities, as well as increased tolerance, freedom and choices are also notes as important advantages or good things about being in Generation 2001.

**Table 1-6**  
**Most Important Advantages of Generation 2001**

Q102. Regardless of what you think about the differences between generations, what would you say are the most important advantages or good things about being in your generation at this time?

Base	<u>Total</u> 2001 %
Technology (non-specific)	37
Better career opportunities	13
Computer/e-mail/internet	5
More Educational Resources/Opportunities	5
More tolerant of other people	5
More Freedom/Choices	4
People are More Open-Minded/Awareness of World/Social Issues	3
More Opportunities for Women and Minorities	2
Better Educated	2
More Opportunity (other)	2
Advances in medicine	1
Access to More Information	1
Other answer given	11
Not given	6
Don't know	5

Crime and violence, as well as drugs are the leading disadvantages or special problems that Generation 2001 believes they have to face that other generations before them didn't have to face when they were the same age. HIV/AIDS is also seen as a disadvantage unique to this generation, although this perception is much stronger among white students when compared with black students (9% v. 1%).

**Table 1-7  
Most Important Disadvantages of Generation 2001**

Q103. What would you say are the disadvantages or special problems that you or your friends have to face that other generations before you didn't have to face when they were your age?

Base	Race				
	Total	White	Black	Other	Hispanic
	2001	1546	127	328	141

## **2. Beliefs and Values**

### **Marriage and Children**

Marriage and children are clearly in the future for Generation 2001 students. Nearly all (94%) students hope to someday get married and a small 2% already are married. And they aren't going to wait too long.

**Table 2-1**  
**Marriage Expectations**

Q204. Do you hope to get married someday, or not?

Base	<u>Total</u> 2001 %
I hope to get married someday	94
I don't hope to get married someday	3
Already married (Vol.)	2
Don't know	1
Refused	*

The average age that they expect to be when they get married is 26 years old. Women seem somewhat more eager to wed, with 21% expecting to marry between the ages of 18 and 23, compared with only 11% of their male counterparts seeing themselves walking down the isle at a correspondingly young age. Similarly, men are nearly twice as likely as women to see themselves as waiting until they are at least 30 before marrying (13% v. 7%).

**Table 2-2  
Age When Generation 2001 Expects to Get Married**

Q204A. How old do you expect to be when you get married?

Regardless of their marriage schedule, Generation 2001 students plan to raise a family. Fully 89% hope to have children someday and 2% already do. Somewhat surprisingly, men are slightly more interested in having children than women (93% v. 86%).

**Table 2-3  
Generation 2001 Expects to Have Children**

Q205. Do you hope to have children someday, or not?

	<u>Total</u>	<u>Sex</u>	
		<u>Male</u>	<u>Female</u>
Base	2001	941	1060
	%	%	%
I hope to have children someday	89	93	86
I don't hope to have children someday	7	5	8
Already have children (Vol.)	2	1	4
Don't know	2	2	3
Refused	*	-	*

While the majority of Generation 2001 hope to have two children, fully 42% hope for three or more, bring the average number of children desired up to three. Perhaps not surprisingly, over three-fourths (77%) of the Generation 2001 students agree strongly that having close family relationships is a key to happiness.

**Table 2-4**  
**Family Values - Summary**

Q203. Now let me read you some statements about marriage and relationships. For each please tell me whether you tend to strongly agree, somewhat agree, somewhat disagree, or strongly disagree with that statement?

	<u>Strongly Agree</u> %	<u>Somewhat Agree</u> %	<u>Somewhat Disagree</u> %	<u>Strongly Disagree</u> %	<u>Don't Know</u> %	<u>Refused</u> %
Having close family relationships is a key to happiness	77	20	2	1	-	-
The really important thing in dating is how two people get along, not what their race or religion might happen to be	77	18	4	1	*	-
Marriage is a cornerstone of societal values	37	51	10	2	1	*
Pre-marital sex is okay when two people love each other	25	43	14	18	*	*
Living together as a couple before getting married is a good idea	27	37	18	18	*	*
Divorce is an acceptable solution if two people are unhappy in a marriage	22	39	25	13	*	*

## Family Values

Although marriage and family are very important, Generation 2001 students are not “wed” to traditional values. Less than four out of ten (38%) strongly agree that marriage is a cornerstone of societal values, although support for this statement rises among those students who identify themselves as Republican to nearly half (48% as compared with 32% and 33% of Democrats and Independents, respectively).

**Table 2-5**  
**Attitudes Toward Societal Values - Summary**

Q203A. Do you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with that statement?

	% Agreeing				
	<u>Total</u>	<u>Party Affiliation</u>			<u>Something Else</u>
		<u>Republican</u>	<u>Democrat</u>	<u>Independent</u>	
Base	2001	631	636	497	183
	%	%	%	%	%
Having close family relationships is a key to happiness	97	98	97	97	93
The really important thing in dating is how two people get along, not what their race or religion might happen to be	95	92	97	96	93
Marriage is a cornerstone of societal values	88	94	87	86	79

Living together as a couple before getting married is a good idea	64	53	73	63	68
Divorce is an acceptable solution if two people are unhappy in a marriage	61	51	71	62	56

Men are also somewhat more likely than women to strongly agree that marriage is a cornerstone of societal values (40% v. 34%).

**Table 2-6**  
**Attitudes Toward Societal Values - Marriage**

Q203A. Marriage is a cornerstone of societal values -- do you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with that statement.

	<u>Total</u>	<u>Sex</u>	
		<u>Male</u>	<u>Female</u>
Base	2001	941	1060
	%	%	%
<u>Agree</u>	88	87	88
Strongly agree	37	40	34
Somewhat agree	51	48	54
<u>Disagree</u>	12	13	11
Somewhat disagree	10	11	9
Strongly disagree	2	2	2
Don't know	1	*	1
Refused	*	-	*

Having been raised in an era of climbing divorce rates, the majority (61%) of Generation 2001 students agree that divorce is an acceptable solution if two people are unhappy in a marriage. Republicans, who are more likely to see marriage as a cornerstone of societal values, are also less likely to see divorce as an acceptable solution if two people are unhappy in a marriage (19% strongly disagreeing compared with 7% of Democrats and 14% of Independents).

When considering relationships before marriage, over two-thirds (68%) of the Generation 2001 students agree that pre-marital sex is okay when two people love each other. While less than two-thirds of women (64%) agree with this statement, nearly three-fourths (73%) of men agree that pre-marital sex is okay.

**Table 2-7**  
**Attitudes Toward Societal Values - Pre-Marital Sex**

Q203B. Pre-marital sex is okay when two people love each other -- do you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with that statement.

Strongly disagree	18	15	20
Don't know	*	-	*
Refused	*	-	*

Interestingly, students who attend small schools with student populations of 5,000 and under as well as schools in the Midwest and South are moderately less likely to endorse pre-marital sex as well. Beyond pre-marital sex, nearly two-thirds of all Generation 2001 students (64%) agree that living together before getting married is a good idea. While nearly three-fourths (72%) of all men support this idea, women are somewhat divided on the issue with 57% agreeing it is a good idea while 42% disagree.

**Table 2-8**

## Religion

Above and beyond the specifics of their values, religion definitely plays a role in the lives of a majority Generation 2001. Nearly nine out of ten (89%) students believe in God and fully three-fourths (75%) believe in life after death. When it comes to religious participation however, numbers drop to just over two-thirds (68%) of students attending religious services at least occasionally.

**Table 2-9**  
**Belief in God**

## Admired and Respected Attributes and People

When thinking of the people that they most admire or respect, members of Generation 2001 most value the attributes of honesty and integrity (28%). Hard work and dedication are also important to many (14%) of Generation 2001 students.

**Table 2-13**  
**Admired and Respected Attributes**

Q201. Now, thinking of the people you most admire and respect, what is the single most important attribute that causes you to admire them?

Base	<u>Total</u> 2001 %
Honesty/integrity	28
Hard working/dedicated	14
Motivation/desire	6
Other answer given	49
Not given	2
Don't know	1

When thinking of who it is that they most admire or respect, parents are clearly tops in the eyes of Generation 2001. Mothers and fathers (or both parents) account for nearly sixty percent (59%) of those most admired by Generation 2001. Women, however, are more likely than men to name their mother as most admired or respected, while men are more likely to name their father (Women: 37% Mom v. 17% Dad compared with Men: 14% Mom v. 33% Dad). Somewhat interestingly, as reported family income increases, so does the likelihood that Dad is named as the most admired or respected.

**Table 2-14**  
**Person Most Admire and Respect**

Don't know	2	3	1

### 3. Goals and Aspirations

#### **Goal Setting**

Having set goals, and believing hard work is important to success, Generation 2001 students are confident they will get to where they want to be in life. Nearly nine out of ten students (88%) have established specific goals for the next five years. Women seem more goal focused than men, with nearly two-thirds (65%) strongly agreeing that they have specific goals for the next five years, while only half (51%) of men feel the same.

**Table 3-1**  
**Setting Specific Goals for Next Five Years**

Q200E. I have established specific goals for the next five years -- do you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with that statement.

	<u>Total</u>	<u>Sex</u>	
		<u>Male</u>	<u>Female</u>
Base	2001	941	1060
	%	%	%
<u>Agree</u>	88	85	91
Strongly agree	58	51	65
Somewhat agree	30	33	26
<u>Disagree</u>	12	15	9
Somewhat disagree	9	11	7
Strongly disagree	3	4	2
Don't know	*	*	*

Additionally, Generation 2001 students seem confident that they will meet these objectives. More than three-fourths (78%) agree strongly that they are sure that someday they will get to where they want to be in life. Confidence rises among women as compared to men (81% v. 74% strongly agree) and blacks as compared to whites (92% v. 76%).

**Table 3-2**  
**Confidence in Accomplishing Goals**

Q200J. I am sure that someday I will get to where I want to be in life – do you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with that statement.

	<u>Total</u>	<u>Sex</u>		<u>Race</u>

Don't know	*	*	*	*	-	*	-
Refused	*	-	*	*	-	-	-

## Confidence and Work Ethic

When it comes to following through on achieving these goals, students in the Generation 2001 students are not likely to rely on chance to meet their ends. A strong majority (75%) disagree that lucky breaks are more important to achieving success than hard work and 57% are willing to work more than 40 hours per week to reach their career goals.

**Table 3-3**  
**Personal Values and Beliefs - Summary**

Q200. Now, I will read you a list of statements. For each one please tell me whether you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with that statement.

	<u>Strongly Agree</u> %	<u>Somewhat Agree</u> %	<u>Somewhat Disagree</u> %	<u>Strongly Disagree</u> %	<u>Don't Know</u> %	<u>Refused</u> %
To me, learning is a lifelong priority	84	14	1	*	*	-

Helping others is more important than helping myself	43	47	8	3	*	-
I have established specific goals for the next five years	58	30	9	10	*	-
I would be willing to fight for my country	31	43	16	42	*	*
Lucky breaks are more important to achieving success than hard work	4	21	33	51	*	*
Money buys happiness	3	21	25		*	-

Students from Generation 2001, on average, report a willingness to work 48 hours per week in order to reach their career goals. Willingness to work more than 50 hours per week drops off among women as compared to men. While nearly thirty percent (29%) of men would work 51 hours or more in order to reach their career goals, less than one out of five (18%) women is willing to do the same.

**Table 3-4**  
**Willingness to Work: Hours Per Week**

Q304. How many hours per week are you willing to work in order to reach your career goals?

	<u>Total</u>	<u>Sex</u>	
		<u>Male</u>	<u>Female</u>
Base	2001	941	1060

Median	45	50	44
Don't know	4	3	5
Refused	*	*	*

## Lifestyle Choices

When considering their ability to afford the type of lifestyle they were raised in, students from Generation 2001 are equally confident in their ability to achieve this objective. While two-thirds (67%) say it is very likely that they will be able to afford the kind of lifestyle they grew up in, an additional 29% say it is somewhat likely they will be able to do so.

**Table 3-5**  
**Affording Lifestyle Grew Up With**

Q400. Now I have a few questions about personal finances. How likely do you think it is that you will eventually be able to afford the kind of lifestyle you grew up in - - very likely, somewhat likely, not very likely, or not likely at all?

	<u>Total</u>
Base	2001 %
<u>Likely</u>	96
Very likely	67
Somewhat likely	29
<u>Not likely</u>	4
Not very likely	3
Not likely at all	1
Don't know	*
Refused	*

Generation 2001 students do believe, however, that a two-income household will be necessary in helping them achieve this objective. More than eight out of ten (82%) believe that a two-income household will be at least somewhat important in ensuring that they reach their lifestyle goals. Women in particular see this as important, with fully four in ten (41%) seeing a two-income household as very important, compared with only 29% of men feeling as strongly.

**Table 3-6**  
**Importance of Two - Income Household**

Q401. How important do you think a two-income household will be in ensuring that you reach your lifestyle goals -- very important, somewhat important, not very important, or not important at all?

	<u>Total</u>	<u>Sex</u>	
		<u>Male</u>	<u>Female</u>
Base	2001	941	1060
	%	%	%
<u>Important</u>	82	80	83
Very important	35	29	41
Somewhat important	47	51	43
<u>Not Important</u>	18	20	16
Not very important	13	15	11
Not important at all	5	5	5
Don't know	*	*	*

***Observation:*** Perhaps significantly, the era of the single-income family appears to be over. Only 5% of students from the Generation 2001 students feel that a two-income household will not be important at all in achieving their lifestyle goals. Combining this with their family plans, it seems that child care will become an increasing and significant social need.

## Graduation and Career Plans

When it comes to determining when Generation 2001 plans on beginning their career, nearly half of the students from Generation 2001 students (47%) plan to immediately enter the workforce upon graduating from college. A significant 42% plan to continue their education. Students from families with higher incomes are more likely to plan on continuing on with their education after completing their undergraduate degree as opposed to immediately entering the workforce.

**Table 3-7  
Plans After Graduation**

Q300. Now thinking about your future career plans. What do you think you are likely to do upon graduating from college: immediately enter the workforce, continue on with further education, take some time off to travel or relax, marry and start a family, or something else?

	Total	Family Income		
		\$35,000 or Less	\$35,001- \$75,000	\$75,001 or Over
Base	2001	527	709	539

Immediately enter workforce	47	50	51	37
Continue education	42	39	39	51
Take some time off to travel or relax	7	7	6	8
Marry and start family	5	5	4	5
Something else	5	5	6	3
Don't know	1	*	*	1

In determining what career Generation 2001 students would like to pursue, parents do not seem to be serving a mentoring role. In fact, most (62%) students would not consider doing what either of their parents do. A significant 37%, however, would consider following in Mom or Dad's footsteps.

Among those who would consider doing what their parents do, students seem to identify most readily with the parent of their sex: more than two-thirds (69%) of those who would consider doing what their mother does are female, while nearly three-fourths (73%) of those who would consider doing what their father does are male.

**Table 3-8**  
**Would Consider Same Job as Parents**

Q310. Would you ever consider doing what either of your parents do (did), or not --INT: IF Yes: Was that what your father does(did), or what your mother does(did), or both?

	<u>Total</u>	<u>Sex</u>

Answer given	10
Not given	7
Don't know	2
Refused	*

When considering their future career, the most important two components are having idealistic and committed co-workers and doing work which gives them opportunity to help others (with 67% and 65% respectively saying it is very important that this be a component of their career). Women are more likely than men to feel that it is very important that this be a component of their career (76% v. 53%). While these two attributes stand out as clearly the most important -- with nearly all Generation 2001 thinking they are at least somewhat important (97% and 98%, respectively), they have strong opinions about many other career aspects.

**Table 3-10**  
**Importance of Career Components**

Q311. Please tell me how important it is to you that each of these be a component of your career?

	<u>Very Important</u>	<u>Somewhat Important</u>	<u>Not At All Important</u>	<u>Don't Know/Refused</u>

Working for a non-profit or government agency	5	3	6	4	5	7	8
Having idealistic and committed co-workers	62	64	71	67	69	69	77
Having a 9-5 work schedule	15	11	19	12	35	15	15
Earning a high salary	34	37	31	28	61	41	44

Doing work which requires creativity is very important to nearly half (47%) of Generation 2001 students. Having a lot of responsibility is very important to nearly four in ten (39%) and at least somewhat important to fully 93%. In comparison, money does not seem as important to Generation 2001 students. Only one third (33%) say that it is very important for them to earn a high salary as part of their career.

Given this, it is perhaps not surprising that very few (24%) Generation 2001 students agree that money buys happiness, although men are more likely to agree with this than women (30% v. 19%).

**Table 3-12**  
**Does Money Buy Happiness?**

Q200I. Money buys happiness -- do you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with that statement.

	<u>Total</u>	<u>Sex</u>	
		<u>Male</u>	<u>Female</u>
Base	2001	941	1060
	%	%	%

Black students, however, are much more concerned about salary than white students with fully 60% of blacks reporting that this is a very important component of their career, while less than one-third of whites (28%) feel the same. Similarly, while high job prestige is very important to one-fourth (26%) of Generation 2001 as a whole, it is very important to only 23% of white students while 39% of blacks see this as a very important component of their career. Additionally, they have much higher starting salary expectations. The average black student expects their starting salary to be \$50,000 while the average white student expects it to be \$35,000.

Additional career components that are at least somewhat important to a majority of Generation 2001 are: Working independently (79%), having a 9-5 work schedule (59%), and being self-employed (52%). Women are more likely than men and blacks are more likely than whites to feel that it is very important for them to have a 9-5 work schedule (19% v. 11% and 35% v. 12%, respectively). Working for a large corporation (49%), a non-profit or government agency (45%) and having a high pressure work environment (44%) are all less important career components to members of the Generation 2001 students.

### Volunteerism

Perhaps driving their desire for a career which will allow them the opportunity to help others, fully nine out of ten (90%) members of Generation 2001 students agree that helping others is more important than helping oneself.

**Table 3-16**  
**Importance of Helping Others**

Q200C. Helping others is more important than helping oneself -- do you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with that statement.

## **4. Finances**

### **Importance of Financial Vehicles**

When considering the importance of various financial vehicles, owning a home tops the list with fully 81% of students believing it is very important as a vehicle for their financial security.

**Table 4-1**  
**Importance of Financial Security - Summary**

Q402. How important do you think the following are as vehicles for your financial security -- Life Insurance -- very important, somewhat important, not very important or not important at all?

	<u>Very Important</u> %	<u>Somewhat Important</u> %	<u>Not Very Important</u> %	<u>Not Important At All</u> %	<u>Don't Know</u> %	<u>Refused</u> %
Owning a home	81	16	2	*	*	-
Life Insurance	74	21	4	1	*	-
Employer-paid pension	46	46	5	2	1	-
An IRA (Individual Retirement Account)	46	45	6	2	1	*
Qualified plans like a 401K	30	48	10	3	8	*
Stocks, Bonds & Mutual Funds	30	48	17	4	*	-
Profit Sharing	18	61	13	4	5	*

Life insurance trails closely behind with just less than three-quarters (74%) of Generation 2001 students believing it is a very important vehicle for their financial security. Women are somewhat stronger in view of the importance of life insurance than men (79% v. 69% very important).

**Table 4-2**  
**Importance of Financial Security - Life Insurance**

Q402A. How important do you think the following are as vehicles for your financial security -- Life Insurance -- very important, somewhat important, not very important or not important at all?

<u>Not Important</u>	5	7	3
Not very important	4	5	2
Not important at all	1	2	1
Don't know	*	*	*

IRAs and employer-paid pensions are also seen as very important by significant pluralities (46% each) but perceived importance drops for qualified plans like a 401K, stocks, bonds, mutual funds, and profit sharing.

Contrary to the recent growth in popularity of mutual funds and personal investing, less than one-third of Generation 2001 students (30%) sees stocks, bonds and mutual funds as very important vehicles for their financial security. Perceived importance of stocks, bonds and mutual funds as vehicles for financial security does rise with family income; from less than one-fourth (22%) of those whose family income is \$35,000 or less to nearly forty percent (38%) of those whose family income is more than \$75,000.

**Table 4-3**  
**Importance of Financial Security - Stocks, Bonds and Mutual Funds**

Q402D. How important do you think the following are as vehicles for your financial security -- Stocks, Bonds & Mutual Funds -- very important, somewhat important, not very important or not important at all?

Base	<u>Total</u> 2001 %
<u>Important</u>	78
Very important	30
Somewhat important	48
<u>Not Important</u>	21
Not very important	17
Not important at all	4
Don't know	*

## Knowledge of Financial Vehicles

Despite the belief that they are very important, many students do not yet feel knowledgeable about these financial vehicles. Depending on the financial vehicle, between 15% and 57% of all students report that they are not very or not at all knowledgeable about the aforementioned financial vehicles. Qualified plans like a 401k plans rank highest among financial vehicles with just over one in five (21%) Generation 2001 students not knowledgeable at all. Generation 2001 students are only slightly more knowledgeable when it comes to profit sharing and IRAs. The majority of the students feel at least somewhat knowledgeable about employer-paid pensions, while two-thirds or more feel knowledgeable when it comes to stocks, bonds and mutual funds, life insurance and owning a home. Generation 2001 students are not overly confident in their understanding of any particular financial vehicle with less than one-third reporting they are very knowledgeable about any of the aforementioned financial vehicles.

**Table 4-4**  
**Summary**

Q403. And how knowledgeable do you think you are about (ITEM) - - very knowledgeable, somewhat knowledgeable, not very knowledgeable, or not knowledgeable at all?

	Very Knowled- geable %	Somewhat Knowled- geable %	Not Very Knowled- geable %	Not Knowled- eable At All %	Don't Know %	Refused %
Owning a home	29	56	12	3	*	-
Life Insurance	17	56	21	6	-	-
Stocks, Bonds & Mutual Funds	16	53	23	8	*	-
Employer-paid pension	6	49	34	10	-	-
An IRA (Individual Retirement Account)	7	39	38	16	*	-
Qualified plans like a 401k	6	37	36	21	*	-
Profit Sharing	6	37	39	18	*	-

Interestingly, while a majority of Generation 2001 students report that they are at least somewhat knowledgeable about with stocks, bonds and mutual funds, less than one third (30%) believe they are very important as a vehicle for their financial security. Employer paid pensions, by comparison are unfamiliar yet very important to nearly half the Generation 2001 students (44% not very or not at all knowledgeable and 46% very important).

### **Financial Responsibility of Elderly Parents**

When thinking of future financial responsibilities that will come from the costs of caring for their parents when they become elderly and unable to take care of themselves, a clear majority (63%) of Generation 2001 students believe that they should bear these costs. Small minorities believe that their parents themselves (12%), other family members (10%) or the government (10%) should bear the costs of caring for their elderly parents.

**Table 4-5  
Caring for Elderly Parents**

Q404. Who do you believe should bear the financial costs of caring for your parents when they become elderly and unable to take care of themselves -- your parents, you, other family members, society, or the government?

## Lottery Winnings

Should they come into a sudden windfall of money, Generation 2001 students would use the money in a variety of ways. Taking a trip tops the list of things to do if they won a million dollars in the lottery, and given unlimited time and money, their "dream vacation" would be to travel the world and Europe. One in six students (15%) from the Generation 2001 would invest or save their lottery winnings while a similar number would donate their money to charity, or share their winnings with family and friends. Nearly as many (14%) would purchase a new car.

**Table 4-6**  
**Winning the Lottery**

Q405. Now I have a few questions, just for fun. What one thing immediately comes to mind that you would do if you won a million dollars in the lottery?

## 5. Social and Political Concerns

### **The Direction of the Country**

While a majority of Generation 2001 students (56%) feel the country is generally headed in the right direction, a significant four out of ten (42%) believe the country is headed in the wrong direction. Men are more optimistic than women about the country's bearing with just over sixty percent (61%) of men feeling the country is headed in the right direction while shared sentiment drops to only a slight majority (52%) among women. Also interestingly, while the majority of white students (57%) believe the country is headed in the right direction, the majority of black students (53%) feel the country is headed in the wrong direction.

**Table 5-1**  
**Direction of Country**

Q500. Returning to a more serious topic. Overall, do you feel the country is generally headed in the right direction or the wrong direction?

	<u>Total</u>	<u>Sex</u>		<u>Race</u>			
		<u>Male</u>	<u>Female</u>	<u>White</u>	<u>Black</u>	<u>Other</u>	<u>Hispanic</u>

Don't know	2	1	2	2	2	2	2
Refused	*	-	*	*	1	*	-

### **Grading America's political and social institutions**

These mixed sentiments about the current direction of the country are reflected in the grades these students give to various social and political institutions. Medicine is viewed most favorably of all institutions with 38% giving them a grade of "A". The Military, Supreme Court, and major education institutions are also quite well viewed by the Generation 2001 students with roughly one-fourth (21-25%) of all students giving them an "A" grade. Organized religion, and major companies fall mid-pack with most members giving them a grade of "B". Government trails behind with local government being the best received, followed by the White House and then Congress. Only the press and media rank lower with fully one-third (33%) giving them a grade of "D" or "F".

**Table 5-2**  
**Grading America's Institutions - Summary**

Q505. Now I'd like to talk to you about America's political and social institutions. If you had to grade the people in charge of running (ITEM) what grade would you give them - - an A, B, C, D, or F?

	<u>A</u>	<u>B</u>	<u>C</u>	<u>D</u>	<u>F</u>	<u>Mean</u>	<u>Don't Know</u>	<u>Refused</u>

Q504. Regardless of how you might vote, what do you usually consider yourself -- a Republican, a Democrat, an independent, or something else?

	<u>Total</u> 2001 %
Base	
Republican	31
Democrat	34
Independent	24
Something else	9
Don't know	2
Refused	1

Although the military ranked rather favorably among America's political and social institutions, less than one-third (31%) of the students of Generation 2001 strongly agree that they would be willing to fight for their country. As one might expect, willingness to fight for the country is stronger among men than it is among women (41% v. 21% strongly agree). Perhaps not as intuitively, white students are also more likely than black students (33% v. 13%) and Republicans are more likely than Democrats (43% v. 21%) to strongly agree that they would be willing to fight for their country.

**Table 5-5**  
**Willingness to Fight for Country**

Q200D. I would be willing to fight for my country -- do you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with that statement.

## Education

When thinking about the future, education holds a high place in the minds of Generation 2001 students. The education system tops the list of things that the Generation 2001 students are most concerned about when thinking about the future. Fully, 96% of all students say they are at least somewhat concerned about the education system with two-thirds (68%) saying they are very concerned.

**Table 5-7**  
**Concern About Issues - Summary**

Q501. Thinking about the future, how serious are your concerns about (ITEM) -  
- would you say you are very concerned, somewhat concerned, not very concerned, or not concerned at all?

	<u>Very</u> <u>Concerned</u> %	<u>Somewhat</u> <u>Concerned</u> %	<u>Not Very</u> <u>Concerned</u> %	<u>Not</u> <u>Concerned</u> <u>At All</u> %	<u>Don't</u> <u>Know</u> %	<u>Refused</u> %
The education system	68	28	4	*	-	*
Crime and violence	65	29	5	1	-	*
The environment	54	40	6	1	-	*
Disease	53	37	8	1	-	*
The health care system	45	44	9	2	*	*
The economy	36	50	12	1	-	*
The political leadership in this country	42	42	14	3	-	*
Global overpopulation	28	48	20	4	*	*
Global political upheaval	18	51	26	5	1	-
Nuclear war	31	37	25	7	-	*
A terrorist attack on the U.S.	24	40	29	6	-	*

Additionally, the education system ranks number one as the most important issue for government or society to address.

**Table 5-8**  
**Most Important Issue For Society to Address**

Q502. Which ONE of the items we just discussed, do you think is the most important issue for government or society to address?

Base	<u>Total</u> 2001 %
The education system	27
Crime and violence	19
The environment	13
The political leadership in this country	8

Completely unprepared	5	3	5	15
Don't know	*	-	-	-
Refused	*	-	-	*

Further, Generation 2001 students are in nearly unanimous agreement (98%) that, to them, learning is a lifelong priority. To that end, (as discussed previously) a significant minority (42%) plan to continue their education upon graduation for college.

### **Crime, Violence and Other Social Concerns**

Crime and violence trails education as an issue that the majority (65%) of Generation 2001 is very concerned about and is ranked as the second most important issue they believe government or society should address. The environment and disease are also issues about which a majority of Generation 2001 students are very concerned about when thinking about the future (54% and 53% , respectively). While the health care system, the political leadership in this country and the economy are a significant concern to at least a third of the students of Generation 2001, future threats of nuclear

war, a terrorist attack on the US, global overpopulation and global political upheaval rank at the bottom of the list with between one-fifth and one-fourth of the Generation 2001 students not very or not at all concerned about these issues when thinking of the future.

***Observation:** Interestingly, across nearly all issues, men are significantly less likely than women to be very concerned about these issues, as are white students when compared to black students.*

**Table 5-10  
Concern About Issues**

Q501A. Thinking about the future, how serious are your concerns about (READ EACH ITEM) -- would you say you are very concerned, somewhat concerned, not very concerned, or not concerned at all?

	% Very Concerned						
	Total	Sex		Race			
		Male	Female	White	Black	Other	Hispanic
Base	2001	941	1060	1546	127	328	141

Global overpopulation	28	31	25	26	28	37	34
Global political upheaval	18	16	19	17	15	25	31

## Global Environmental Concerns

An clear majority of students (63%) strongly agree that preserving the environment is very important to them.

**Table 5-11**  
**Importance of Preserving Environment**

Q200A. Preserving our environment is very important to me -- do you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with that statement.

	Party Affiliation				
	<u>Total</u>	<u>Republican</u>	<u>Democrat</u>	<u>Independent</u>	<u>Something Else</u>
Base	2001	631	636	497	183
	%	%	%	%	%
<u>Agree</u>	97	96	98	98	95
Strongly agree	63	54	66	72	59
Somewhat agree	34	42	33	26	35
<u>Disagree</u>	3	4	2	2	5
Somewhat disagree	2	3	2	2	3
Strongly disagree	1	1	*	-	3

Thinking of the future, the environment remains an area of concern with over half (54%) of the Generation 2001 students saying they are very concerned about the environment and over one-fourth (28%) similarly concerned about global overpopulation. Additionally, the environment ranks third among issues the Generation 2001 students believes it is most important for government or society to address.

## Life in Space

Given all of these concerns about life here, it is perhaps not surprising that fully one half (50%) of Generation 2001 is at least somewhat interested in the living aboard a space station or on another planet, if it becomes possible in the future. Men are more prepared than women to give life in space a try with the majority (56%) of men saying they would be interested while the majority (56%) of women are not interested in living aboard a space station or on another planet.

**Table 5-12**  
**Interest in Living in Space Station**

Q407. If in the future, it becomes possible to live aboard a space station, or another planet, how interested would you be in living there? -- very interested, somewhat interested, not very interested, or not interested at all?

	<u>Total</u>	<u>Sex</u>

<u>Not Interested</u>	50	44	56
Not very interested	26	23	29
Not interested at all	24	21	27
Don't know	*	*	-

## **6. Race relations and the Generation 2001 students**

Views on the current state of race relations in the United States are clearly different between whites and blacks. While white students are roughly divided on whether the current state of race relations is positive (48%) or negative (52%), black members of Generation 2001 are strongly of the opinion that things are negative (71%) as opposed to positive (28%).

**Table 6-1**  
**Race Relations: Current State**

Q506. How would you rate the current state of race relations in the United States? Are things generally excellent, pretty good, only fair or poor?

	<u>Total</u>	<u>Race</u>			
		<u>White</u>	<u>Black</u>	<u>Other</u>	<u>Hispanic</u>
Base	2001	1546	127	328	141
	%	%	%	%	%

Poor	11	9	21	11	14
Don't know	*	*	-	-	-
Refused	*	-	1	*	-

Despite these differences, and while an overall majority (55%) of the Generation 2001 students hold a negative view of the current state of race relations in the United States, many (43%) expect that these relations will improve by the year 2001. Additionally, black and white students share the outlook that things will either stay the same (41% overall) or improve.

**Table 6-2**  
**Race Relations: Future State**

Q507. By the year 2001, do you expect that race relations in the United States will improve, stay the same, or get worse?

Base	<u>Total</u> 2001 %
Improve	43
Stay the same	41
Get worse	15
Don't know	*
Refused	*

In a perhaps related outlook, nearly three-fourths (72%) of all students believe that it is at least somewhat likely that a person of color will be elected President of the United States. Somewhat fewer (64%) think it is as likely that a woman will be elected President. In both cases, white students are more likely than black students to think it is at least somewhat likely that such a person will hold the office of President in their lifetime.

**Table 6-3**  
**Likelihood that President Will Be Person of Color**

Q510A. In your lifetime, how likely do you think it is that the President of the United States will be a -- Person of color -- very likely, somewhat likely, not very likely, or not likely at all?

Despite any of the aforementioned differences between black and white members of Generation 2001, more than two-thirds (77%) strongly agree that the really important thing in dating is how two people get along, not what their race or religion might happen to be.

**Table 6-7**  
**Attitudes Toward Societal Values - Dating**

Q203E. The really important thing in dating is how two people get along, not what their race or religion might happen to be -- do you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with that statement.

Base	<u>Total</u> 2001 %
<u>Agree</u>	95
Strongly agree	77
Somewhat agree	18
<u>Disagree</u>	5
Somewhat disagree	4
Strongly disagree	1
Don't know	*

## **7. Typical week for a member of the Generation 2001 students**

Perhaps logically, sleeping tops the list with an average of 44 hours spent per week in bed, socializing follows with 26 hours per week, although dating takes up an average of only 7 hours per week. Class time (17 hours), studying and homework (15 hours) combine for a total of 32 hours per week. Reading purely for pleasure, however, averages only 3 hours per week. Students report listening to music an average of 15 hours per week, and when thinking about which of today's singers or groups will still be performing in 30 years Boyz II Men is named most frequently along with the Dave Matthews Band.

**Table 7-1**  
**A Typical Week - Summary**

Q206. Thinking of a typical week, how many hours do you spend (ITEM)?  
Summary Table of Means

	<u>Total</u>
Base	2001
	%
Sleeping	44.1
Socializing	25.9
Going to class	17.4
Studying or doing homework	14.8
Listening to music	14.7
Using a computer	10.6

Answer given	24
Not given	17
Don't know	10

Using a computer takes up an average of 11 hours per week with 6 hours on average spent online. Generation 2001 students are not couch potatoes, however, with nearly as much time spent exercising per week (7 hours) as spent watching television (8 hours). This is perhaps reflective of an earlier majority (68%) belief that staying physically fit is very important to their overall well-being. While the majority (52%) of male students strongly agree that they are satisfied with their physical appearance, female students are not as confident with less than four in ten (38%) responding similarly.

**Table 7-3**  
**Satisfaction with Physical Appearance**

Q200H. I am satisfied with my physical appearance -- do you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with that statement.

	<u>Total</u>	<u>Sex</u>		<u>Race</u>

APPENDIX A:  
SURVEY METHODOLOGY

### **Survey Methodology**

“Generation 2001: A Survey of the First College Graduating Class of the New Millennium” is based on a telephone survey of 2001 first-year freshmen attending public and private four-year colleges and universities across the United States. The process by which the sample was selected involved a multi-phase approach. The first step involved selecting a sample of schools with equal probability based on probability proportionate to the size of the student body within the school. The sample of schools was further stratified by region of the country and control of institutions (i.e., public and private) to ensure that each region and type of institution are proportionately represented.

Once a college or university was selected, an attempt was made to acquire a the most up-to-date list of first-year freshmen at each school. The acquisition of these lists involved a number of different methods. Some of the lists were purchased through American Student Lists (ASL). In the event that a list of students could not be purchased from ASL, schools were contacted directly by Harris. In such cases we were either able to acquire the lists directly from the schools or, if available, purchase a student directory.

Once the list was acquired from each school, a random selection of students was made at each school. Each of these students was contacted by telephone. In most cases the students were interviewed in their dorm rooms.

Table A-1 lists the 101 colleges and universities from which students were interviewed.

**Table A-1**

### **Telephone Interviewing Procedures**

All interviewing was conducted by telephone between November 11, 1997 and January 12, 1998. The telephone interviews averaged 24 minutes in length. In order to ensure a high level of quality, each telephone number was contacted on average five or six times at different times during days and evenings in order to ensure that those students were contacted. Interviewing was regularly quality-monitored by Harris' field supervisory staff. The computer-assisted telephone interviewing (CATI) system permitted on-line data entry and on-line data editing of the telephone interview.

### **Weighting of Data**

In order to make sure that the demographic profile of the students matches the actual proportions in the population the data was weighted by certain variables. These included region of the country, whether the colleges and universities are public or private schools, the race or ethnicity of students and the sex of the students. The source of this weighting information was the U.S. Department of Education, National Center for Education Statistics published in the *Digest of Education Statistics* 1997. Table A-2 shows the effect of weighting on the sample.

**Table A-2**  
**Effect of Weighting on Sample**

	<u>Unweighted</u>	<u>Weighted</u>
Total	2001	2001
	%	%
Region:		
East	30	23

Race/Ethnicity		
White (incl. Hispanics)	77	75
African American (incl. Hispanics)	6	12
Hispanic	7	8
Other	16	13

### Reliability of Survey Percentages

It is important to bear in mind that the results from any sample survey are subject to sampling variation. The magnitude of this variation is measurable and is affected both by the number of interviews involved and by the level of the percentages expressed in the results. Table A-3 shows the possible sample variation that applies to percentage results for this survey. The chances are 95 in 100 that the survey result does not vary, plus or minus, by more than the indicated number of percentage points from the results that would have been obtained if interviews had been conducted with all persons in the universe represented by the sample. For example, if the response for a sample size of 200 is 30%, then in 95 cases out of 100 the response in the total population would be between 24% and 36%. Note that survey results based on subgroups of small size can be subject to large sampling error.

Table A-3  
APPROXIMATE SAMPLING TOLERANCES (AT 95% CONFIDENCE) TO  
USE IN EVALUATING PERCENTAGE RESULTS APPEARING IN THIS REPORT

Number Of People Asked Question On Which Survey Result Is Based	Survey Percentage Result At 10% Or 90%	Survey Percentage Result At 20% Or 80%	Survey Percentage Result At 30% Or 70%	Survey Percentage Result At 40% Or 60%	Survey Percentage Result At 50%
5,000	1	1	1	1	1
3,000	1	1	2	2	2
2,000	1	2	2	2	2
1,500	2	2	2	3	3
1,000	2	2	3	3	3
900	2	3	3	3	3
800	2	3	3	3	3
700	2	3	3	4	4
600	2	3	4	4	4
500	3	4	4	4	4
400	3	4	4	5	5
300	3	5	5	6	6
200	4	6	6	7	7
100	6	8	9	10	10
50	8	11	13	14	14

Sampling tolerances are also involved in the comparison of results from different surveys or from different parts of a sample (subgroup analysis). Table A-4 shows the percentage difference that must be obtained before a difference can be considered statistically significant. These figures, too, represent the 95% confidence level.

For example, suppose a group of 100 has a response of “yes” to a question, and an independent group of 50 has a response of 28% “yes” to the same question, for an observed difference of 6 percentage points. According to the table, this difference is subject to a potential sampling error of 16 percentage points. Since the observed difference is smaller than the sampling error, the observed difference is not significant. Sampling error is only one type of error encountered in survey research. Survey research is also susceptible to other types of error, such as data handling error and interviewer recording error. The procedures followed by Louis Harris and Associates, however, keeps errors of these kinds to a minimum.

Table A-4  
 APPROXIMATE SAMPLING TOLERANCES (AT 95% CONFIDENCE) TO USE  
 IN EVALUATING DIFFERENCES BETWEEN TWO PERCENTAGE  
 RESULTS APPEARING IN SURVEY

Approximate Sample Size Of Two Groups Asked Question On Which Survey Result Is Based	Survey Percentage Result At 10% Or 90%	Survey Percentage Result At 20% Or 80%	Survey Percentage Result At 30% Or 70%	Survey Percentage Result At 40% Or 60%	Survey Percentage Result At 50%

50 vs. 50	12	16	18	19	20

### **CATI System Used in Interviews for the United States**

An example of these procedures is the CATI system - computer assisted telephone interviewing - which is used for all Harris telephone interviews conducted in the United States. This system controls complicated skip patterns based on individual response during the course of the interview, and it also allows consistency checks to be built in for key items. Since interviewers enter the respondents' answers directly into a computer terminal during the interview itself, it also reduces the number of potential clerical errors.

**REPRODUCTION RELEASE**  
(Specific Document)

**I. DOCUMENT IDENTIFICATION:**

Title: Generation 2001: A Survey of the First College Graduating Class of the New Millennium.	
Author(s):	
Corporate Source: Northwestern Mutual Life Insurance Co.	Publication Date: 1998

**II. REPRODUCTION RELEASE:**

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign at the bottom of the page.

<p>The sample sticker shown below will be affixed to all Level 1 documents</p> <div style="border: 1px solid black; padding: 5px;"> <p>PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY</p> <p align="center"><i>Sample</i></p> <hr/> <p>TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)</p> </div> <p align="center">1</p> <p align="center">Level 1</p> <p align="center">↑</p> <div style="border: 1px solid black; width: 20px; height: 20px; margin: 0 auto; display: flex; align-items: center; justify-content: center;"> <input checked="" type="checkbox"/> </div>	<p>The sample sticker shown below will be affixed to all Level 2A documents</p> <div style="border: 1px solid black; padding: 5px;"> <p>PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE, AND IN ELECTRONIC MEDIA FOR ERIC COLLECTION SUBSCRIBERS ONLY, HAS BEEN GRANTED BY</p> <p align="center"><i>Sample</i></p> <hr/> <p>TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)</p> </div> <p align="center">2A</p> <p align="center">Level 2A</p> <p align="center">↑</p> <div style="border: 1px solid black; width: 20px; height: 20px; margin: 0 auto; display: flex; align-items: center; justify-content: center;"> <input type="checkbox"/> </div>	<p>The sample sticker shown below will be affixed to all Level 2B documents</p> <div style="border: 1px solid black; padding: 5px;"> <p>PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE ONLY HAS BEEN GRANTED BY</p> <p align="center"><i>Sample</i></p> <hr/> <p>TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)</p> </div> <p align="center">2B</p> <p align="center">Level 2B</p> <p align="center">↑</p> <div style="border: 1px solid black; width: 20px; height: 20px; margin: 0 auto; display: flex; align-items: center; justify-content: center;"> <input type="checkbox"/> </div>
---	--	--

Check here for Level 1 release, permitting reproduction and dissemination in microfiche or other ERIC archival media (e.g., electronic) and paper copy.

Check here for Level 2A release, permitting reproduction and dissemination in microfiche and in electronic media for ERIC archival collection subscribers only

Check here for Level 2B release, permitting reproduction and dissemination in microfiche only

Documents will be processed as indicated provided reproduction quality permits.  
If permission to reproduce is granted, but no box is checked, documents will be processed at Level 1.

*I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.*
