This report contains results of a survey at Bronx Community College (New York) that queried career placement counselors on how their field had changed over the past 5 years and what changes they foresaw for the future. Questions were open-ended and directed toward identifying problems and shifts in career planning and placement. More than half of those who responded cited the introduction of new technology, such as fax machines, computerized production of resumes, computerized guidance systems, and job banks, as the greatest change in the field. Other changes named included a greater demand for services, an increasing diversity of the population being served, a change in the focus of career placement to include more comprehensive services, and a change in the economy, which has resulted in downsizing and a reduction in college recruiting. The single greatest problem facing the career placement field over the next several years was overwhelmingly thought to be budget and staffing constraints, compounded by increased demand for services. Also mentioned was the changing structure of jobs that demand complex and technical skills. Appended is the survey, with charts illustrating the answers. (EMH)

Trends in career planning and placement for

Bronx 2000

The survey asked counselors a series of open-ended questions directed toward identifying problems, changes, or projected changes in career planning and placement. Specifically, counselors were asked to comment on how the field had changed over the past five years and what changes they foresaw for the future.

Changes in career planning & placement over the past five years

More than half of those who responded cited the proliferation of technology as the greatest change in the career planning and placement field over the past five years. They referred to the increased use of fax machines, computerized production of resumes, computerized guidance systems, and job banks, in particular. As one respondent put it, the use of computerized resources and data bases puts offices without computers “way behind.”

Other changes cited frequently included the greater demand for services and the increasing diversity of the population being served; the change in the focus of career planning and placement -- from placement to more comprehensive career services; and the change in the economy, which has resulted in downsizing, mergers, and a reduction in college recruiting.
Changes in college students over the past five years

The most frequently given response to the question on how students had changed over the past five years was the increased diversity of the student body -- more Hispanic monolingual students, more older students and career changers.

A number of counselors used the term "Generation X." Many more, while not using the actual term, did use the descriptions that define the term: a need for personal contact; a preference for concrete, specific information; and a preference for keeping options open and postponing commitments.

Most counselors thought today's students were more conservative; a few thought they were less conservative. Most thought today's students had a sense of entitlement, that they deserved high-paying jobs and wanted them immediately, that they were not willing to pay their dues and begin with entry-level jobs. A few counselors thought today's students were more realistic and realized they would have to start out in entry-level positions.

Counselors were split on almost all other issues. Some thought today's students were more career-oriented; others thought they were less so. Some thought today's students were more willing to relocate; others thought they were less so, particularly older students with families. Some thought more students were going on to senior colleges; others thought more students were passing up senior college to get a job right away because of financial pressures.
Changes in career planning and placement over the next several years

The greatest change that career planning and placement counselors will have to make over the next several years is doing more with less. Some counselors are worried about how they will maintain present programs and services as they face budget reductions and staffing outs. For most, however, maintenance isn’t the problem: They see increase demand for their services and believe they will be held more accountable for those services, despite budget and staffing cuts.

With fewer employers recruiting on campus, more students will be demanding assistance from the career planning and placement office. And increasingly they will be nontraditional students – alumni, older students, career changers, monolingual Hispanic students, part-time students, disabled students, and international students.

How will they cope with the increased work load? Most see automation as the best way to increase their efficacy. They expect to look for alternatives to on-campus recruitment, like career fairs, consortium events, more experiential education programs, and more electronic recruiting through the web. Funding remains a concern; some counselors are looking for alternate sources of funding, while others expect to begin “charging fees” for services.

Most important aspect of career planning & placement

Counselors were asked what they considered the single most important thing their office did or should do to assist college students in making the transition to the world of work. Some counselors stressed some aspect more than others, but their answers in aggregate basically amounted to a comprehensive career services program.
First, they stressed career counseling, with more than half of those specifying one-on-one counseling. As one counselor put it, “in-depth, individualized counseling is still the most important service we offer.” Such counseling included self-assessment, career exploration, and decision-making skills offered through a course.

Also, counselors indicated the need to provide students with “reality checks”—helping students set realistic goals and time frames. They stressed the importance of experiential education programs to introduce students to the realities of the workplace.

The career service they cited most frequently was teaching students the process, strategies, and techniques of the job search. Many pointed out that these were skills students would need throughout their working lives.

**Greatest problem facing career planning and placement**

The last question asked counselors what they saw as the single greatest problem facing career planning and placement over the next several years. Overwhelmingly they pointed to budget and staffing constraints, compounded by increased demand for services. The next most frequently cited problem was the changing structure of jobs that demand complex and highly technical skills. There is the clear imperative that the college must prepare students for such complex and technical jobs.
APPENDIX
CAREER PLANNING AND PLACEMENT SURVEY RESULTS

1. What, in your judgment, have been the greatest changes in career planning/placement over the past five years? Select three (3) order your choices according to the following scale:

1. = 1st greatest of changes in career planning/placement over the past five years.
2. = 2nd greatest of changes in career planning/placement over the past five years.
3. = 3rd greatest of changes in career planning/placement over the past five years.

a) Use of computer technology to assist in career counseling and placement functions.

FIRST
18(8)
44%

SECOND
18(9)
50%

THIRD
18(1)
6%

b) On-line services in the Internet to develop network of job sources.

14(5)
36%

14(7)
50%

14(2)
14%
c) Insuring that students are reemployment ready and know how to get their own jobs.

FIRST
6(1)  17%

SECOND
6(3)  50%

THIRD
6(2)  33%

d) Shift of focus from placement to more comprehensive career services.

8(1)  12%

8(0)  0%

8(7)  88%
e) More emphasis placed on experiential learning, i.e. work experience in addition to the classroom setting.

f) Students are interested in actual jobs, not exploring career.

g) **ADD YOUR OWN:** "Much emphasis is placed on developing resume, job availability seems scarce."

"More of a proactive role in engaging students in career development/study skills and counseling."

"Diversity in the workplace in terms of ability to speak more than one language, telecommuting, flex time, relocation, etc.,

"Courses designed to assist students with career options."

**The four participants who voiced their own opinion above, made this their fourth choice.**
2. What, in your judgment, have been the greatest changes in college students over the past five years? Select three (3) and rank-order your choices according to the following scale:

1 = 1st greatest of changes in college students over the past five years.
2 = 2nd greatest of changes in college students over the past five years.
3 = 3rd greatest of changes in college students over the past five years.

a) More job-oriented: where the jobs are and what they pay.

FIRST
11(6) 55%

SECOND
11(3) 27%

THIRD
11(2) 18%

b) More realistic: they have to pay their dues and begin in entry-level positions.

9(0) 0%

9(5) 56%

9(4) 44%
c) Less willing to put out much effort, poor ethic.

ADD YOUR OWN: "Has remained constant over the last several years: I have not seen significant changes in areas above."

"Students seem to have a greater need for employment whether they are self-supporting or dependent. Many have certain job skills,

"College students display a consumer attitude regarding college."

"Age of college students have increased: over 25 years group, mothers, foreign students, working students, students who support themselves, etc.,"

**Of the four participants who voiced their own opinion, the first 3 comments were three participants third choice and the last comment was choice 4 for the other participant."
3. What, in your judgment, will be the greatest change that career/placement will have to make over the next several years? Select three (3) and rank-order your choices according to the following scale:

1 = 1st greatest change that career/placement will have to make over the next several years.

2 = 2nd greatest change that career/placement will have to make over the next several years.

3 = 3rd greatest change that career/placement will have to make over the next several years.

a) Provide complete computerized services including terminals available for student use for resume forwarding, resume preparation, job listings computerized for self-help, employer data base, etc.

<table>

I. DOCUMENT IDENTIFICATION:

Title: CAREER ABD PLACEMENT SERVICES SURVEY

Author(s): SHIRLEY H. SMITH, PH.D. / DEON YORKE Research Assistant

Corporate Source: Publication Date: October, 1998

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign at the bottom of the page.

<table>
<thead>
<tr>
<th>Level 1</th>
<th>Level 2A</th>
<th>Level 2B</th>

<td><img src="per2b.png" alt="Sample" /></td>
<td><img src="per2b.png" alt="Sample" /></td>
</tr>
</tbody>
</table>

Check here for Level 1 release, permitting reproduction and dissemination in microfiche or other ERIC archival media (e.g., electronic) and paper copy.

Check here for Level 2A release, permitting reproduction and dissemination in microfiche and in electronic media for ERIC archival collection subscribers only.

Check here for Level 2B release, permitting reproduction and dissemination in microfiche only.

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but no box is checked, documents will be processed at Level 1.

I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.
