Healthy School Meals...Healthy Kids! A Leadership Guide for School Decision-Makers.

The School Meals Initiative for Healthy Children was launched in June 1994 to improve the health and education of children through better nutrition. This leadership guide provides information to school decision-makers on using materials and resources developed by the U.S. Department of Agriculture and describes Team Nutrition, an implementation plan to support schools in implementing the new policy, provide state-of-the-art nutrition education to children and families, and training and technical assistance for food service personnel. Part 1 of this document, "Changes, Challenges, and Choices," outlines the framework for the National School Lunch and Breakfast Programs; presents the components of Team Nutrition for classroom-based nutrition education from pre-kindergarten through grade 5; describes the food service components; presents information on promoting nutrition in the school environment through activating a Team Nutrition supporters network and adopting a school nutrition policy; describes materials available for families, the community, and the media. It also discusses how schools can work with Team Nutrition supporters and partners and provides an example of a Team Nutrition activity. Part 2 of the document provides information on nutrition materials and resources, including classroom curriculum kits, publications, and on-line information. The guide also includes information on enrolling as a Team Nutrition School and lists State Child Nutrition Education and Training Coordinators, State Child Nutrition Directors, and State Extension contacts. The document concludes with a list of Team Nutrition supports and partners and the mission statement of Team Nutrition. (KB)

CHANGES, CHALLENGES, AND CHOICES
Healthier School Meals
Because of USDA's new policy changes, children all across the country are eating healthier school meals, and for the first time schools will be meeting the Dietary Guidelines for Americans. Cafeterias in 94,000 schools are serving new, improved meals with a larger variety of fruits, vegetables, and grain products, and lower-fat food choices, in the National School Lunch and Breakfast Programs.

Historic Policy Change
The School Meals Initiative for Healthy Children, a comprehensive, integrated plan to ensure healthy meals at school, was launched in June 1994 and resulted in historic legislation. The vision of this initiative is simple:

...improve the health and education of children through better nutrition.

For the first time in 50 years, USDA has updated the nutrition standards for school meals based on current, scientific research. However, just enacting policies will not accomplish this change, and USDA cannot do this job alone.
Using This Leadership Guide

We need your help! Making changes in your school lunch and breakfast programs will involve some challenges. This Guide shows you step by step how you can take the lead using the exciting and innovative materials and resources developed by USDA and our partners. Everyone in your school and community—students, teachers, parents, food service personnel, coaches, school nurses, health educators, and nutrition supporters—can have a role in providing healthy school meals and nutrition education in your school.

Check out the many materials and resources described in this Guide. Follow the action steps listed in the “Getting Results” sections beginning on page 8. There are many choices and options available to your school. USDA can work with you to make changes come alive in your school.

Team Nutrition: Supporting the Changes

That is why USDA established Team Nutrition, an implementation plan to continuously improve school meals and promote the health and education of 50 million children in 94,000 schools.

Team Nutrition is all about change and supporting schools in innovative ways to implement the new policy. Team Nutrition provides state-of-the art nutrition education for children and families and training and technical assistance for food service professionals.

- Team Nutrition helps children and their families change their diets to expand the variety of foods they eat; add more fruits, vegetables and grains to the foods they already eat; and construct a diet lower in fat.

- Team Nutrition supports food service personnel through these changes by offering training sessions, distributing newly developed menus and recipes, revising purchasing specifications, and practicing new culinary skills designed to make food look and taste great to kids.
Team Nutrition Schools
Recognizing the challenge that schools face in making these changes in their school meals, USDA has created an incentive program, Team Nutrition Schools.

As the community focal point, each Team Nutrition School works to engage educators, students and their families, food service staff, and community leaders in this exciting new effort. A designated Team Nutrition School Leader coordinates all activities and shares information throughout the school and community environments.

Every school can become a Team Nutrition School! As of April, 1997, over 20,000 schools have enrolled in the program. This school year thousands more schools will join Team Nutrition. Team Nutrition Schools receive special materials to support nutrition education and healthier meals.

Additionally, over 200 supporters at the national level and thousands at the local level are working to make Team Nutrition come alive in schools throughout the Nation. See page 39 for a listing of Team Nutrition Supporters.

For information on enrolling as a Team Nutrition School, turn to page 26. Your local school food service director or State Agency Child Nutrition (CN) Director can provide more information on the program and a list of supporters who are working with Team Nutrition Schools in your state. A listing of State CN Directors is on page 30.
WHY ARE SCHOOL MEALS CHANGING?

Health Statistics Support Need for Change...
Scientific research confirms that a diet high in total fat, saturated fat, and cholesterol causes increased risk of cardiovascular disease. Lack of fruits, vegetables, and grains increases the risk for some forms of cancer.

Overweight and obesity are increasing among children and adolescents in the United States. The prevalence of overweight among youths ages 6-17 years has more than doubled in the past 30 years.

Nutrition Facts
- The leading causes of death are nutrition-related diseases.
- Diet is linked to health, and chronic disease often begins in childhood.
- Food habits are formed in childhood.
- School-based nutrition education can improve the eating behaviors of young people.

Education Facts
- Students who participate in the School Breakfast Program perform better in school and have fewer absences than nonparticipants.
- Undernutrition increases the risk and severity of illnesses, and iron deficiency anemia results in shortened attention span, fatigue, and decreased ability to concentrate. The National School Lunch and Breakfast Programs can help improve the nutritional status—and readiness to learn—of the Nation's children.
The School Meals Initiative for Healthy Children is built around a four-point framework for action for the National School Lunch and Breakfast Programs. The initiative makes the following contributions.

1. **Eating for Health: The Dietary Guidelines for Americans**
   - Updates and expands school meal nutrition standards to include the 1995 Dietary Guidelines for Americans (See page 24 for information on the Dietary Guidelines).
   - Congressional action requires implementation of the Dietary Guidelines by School Year 1996/97.
   - Provides increased flexibility for schools including five different menu planning systems.

2. **Making Food Choices: Nutrition Education, Training & Technical Assistance**
   - Builds children's skills to make healthful food choices through Team Nutrition activities in the school, home, community, and media.
   - Develops new culturally and regionally diverse recipes that are lower in fat and sodium.
   - Recruits volunteer chefs and culinary institutes to work with food service professionals to maximize customer appeal and taste.
   - Involves Team Nutrition supporters to provide schools with materials and resources.
3. Maximizing Resources: Getting the Best Value
   - Makes available healthier commodities to schools including:
     - reduced-fat cheddar cheese,
     - lunchmeat, canned pork and canned beef with reduced-fat content,
     - frozen potato wedges which have 50% less fat than potato rounds,
     - low-fat macaroni and cheese,
     - turkey ham (95% fat free).
   - Provides nutrition labeling on all USDA commodities.

4. Managing for the Future: Streamlining Administration
   - Extends the cycle for school reviews from 4 to 5 years and provides a flexible system for monitoring.
   - Allows schools with accurate counting and claiming systems to develop their own system of internal controls.
Team Nutrition gets results by forming strategic public-private partnerships to extend Team Nutrition's reach and amplify its messages. Team Nutrition has turned new policy into real improvements in the diets of children through nutrition education and training and technical assistance.

In just over one year Team Nutrition has enrolled over 20,000 schools, reaching over 8.1 million children. For example, Team Nutrition has produced and distributed:

- 3.1 million children's nutrition education materials to children and their parents through schools and community organizations;
- healthy school meals training materials to 94,000 schools;
- over 2 million parents guides and 200,000 activity planners, developed in cooperation with the National PTA, to families nationwide;
- 10,000 Teacher Resource Kits, nutrition education curricula developed in cooperation with Scholastic, Inc., to schools across the country;
- 20,000 Team Nutrition School Resource Kits to Team Nutrition Schools nationwide; and
- 100,000 copies of Food, Family and Fun: A Seasonal Guide to Healthy Eating, a family resource book.

Please refer to page 22 for a complete listing of Team Nutrition Materials and resources.

Over 155 Team Nutrition Leadership Forums in almost every state have been conducted—these activities involved over 2,000 community leaders nationwide. As a school decision-maker, your leadership and support in working to get results will improve the health and education of your students.

Team Nutrition Action Plan

Using the many materials and resources available through USDA's Team Nutrition can help your school implement the required policy changes and get results fast. Following are some action steps to achieve these changes for healthy school meals...healthy kids!

There are ideas for your teachers, school food service staff, coaches, school nurses, parents, students, and community supporters. Working together can make Team Nutrition come alive in your school.
Scholastic Classroom Kits

- Use Scholastic's comprehensive, activity-based program to build skills and motivate children to make food choices for a healthy diet. The program consists of classroom kits for the following levels:
  - Food Time (PreK-K)
  - Food and Me (Grades 1-2)
  - Food Works (Grades 3-5)

Each kit has:
- Teaching guide – instructional materials packed with activities and hands-on learning ideas.
- Videos – fun and informative, promote nutrition messages through songs, jokes, and more!
- Scholastic Classroom magazines – colorful and engaging, present lively articles and activities on food and nutrition.
- Take Out – A family newsletter – delivers nutrition message to parents and caregivers.
- Classroom posters – colorful and motivational, keep the topic of food choices before students.
- Reproducible worksheets – attractive activity sheets provide teachers with the tools to bring the teaching guide lessons to life. Ordering information is on page 23.

- Help teachers locate funding sources for materials and supplies to support the classroom activities. Check with your school's parent group and community business groups for possible support.

- Meet with school food service staff and teachers to see how the classroom and cafeteria link can be strengthened. Use ideas from the Scholastic Classroom Kits.

Nutrition Posters

- Create excitement with classroom posters some of which feature Lion King characters, Pumbaa and Timon.

Other Nutrition Education Materials

- Contact your State Nutrition Education and Training (NET) Coordinator or local Cooperative Extension Specialist for other ideas, curricula sources, and available teacher training opportunities. See address listings on pages 32 and 35.
RESULTS IN THE CAFETERIA

(Coordinate these activities with your School Food Service Director/Manager)

New low-fat or reduced-fat school commodities
- Arrange an event for parents and students to taste some of the new low-fat or reduced-fat school commodities. Invite the media so the public is aware of the new foods and healthier menus in your schools. See page 7 for a listing of some of the new commodities.

New recipes, menus, and training materials
- Encourage school food service staff to use recipes from A Tool Kit for Healthy School Meals: Recipes and Training Materials and School Lunch Challenge I and II Recipes. Let students taste-test recipes.

- Prepare a media release to make the community and families aware of the healthier meals in your school. Get help from your school system public affairs section or the USDA Regional Team Nutrition Contacts. See page 29 for address listing.

- Make sure your school food service staff has the new training materials, Menu Planner for Healthy School Meals, A Tool Kit for Healthy School Meals: Recipes and Training Materials, School Lunch Challenge I and II Recipes, and Healthy School Meals Training Materials.

- Display a nutrient analysis of menu items on the serving counter and include this information in menus and newsletters sent home to parents.

Hands-on learning activities
- Plan a Great Nutrition Adventure (an activity that brings chefs in the classroom and cafeteria to teach children about nutrition and to share culinary skills with food service staff).

USDA’s Great Nutrition Action Packet was sent to school districts in spring 1996. The packet includes a video, poster, event planner, chef’s directory, and information on how to plan the event. For assistance on planning an event, contact your State Child Nutrition Director. See page 30 for address listing.
Posters, nutrition education messages
- Use nutrition posters in your cafeteria. Posters available include *School Lunch, Smart Yet Satisfying; Devour for Power, Growth Chart; Timon’s Special;* and *Pyramid Poster.* Check with your State CN Director or State NET Coordinator to get the posters. See listings on pages 30 and 32.

- Display the Disney *Devour for Power* Serving Counter Card on your cafeteria line (available only for elementary schools).

- Display children’s artwork on nutrition in your cafeteria. Have an art teacher or local community artist work together with a school or community nutritionist to help children design and develop nutrition education posters.

Food service staff training
- Check with your Food Service Director/Manager to make sure your food service staff takes advantage of training opportunities offered by USDA, State agencies, the NFSMI, and the American School Food Service Association.
Volunteer chefs

- Involve local chefs in nutrition education activities in your school. Use USDA's Great Nutrition Adventure Action Packet as a resource.

Parent involvement

- Include parents in cafeteria activities such as taste-testing events, and health and nutrition fairs.

- Plan a “Do Lunch at School Day”—invite parents and grandparents to have lunch or breakfast with their children.

Classroom links

- Meet with school food service staff and teachers to see how the classroom and cafeteria link can be strengthened. Use ideas from the Scholastic Classroom Kits.
Reaching children and their families in a variety of community settings reinforces the nutrition messages they are learning in the school classroom and cafeteria. Joining the Team Nutrition Schools program gets results in the school environment. See page 26 for information on how to enroll your school as a Team Nutrition School. Following are some other ideas for getting your entire school involved in making changes for healthier children.

- Activate your Team Nutrition supporters network and together plan school-wide health, nutrition, and fitness fairs. Involve coaches, school nurses, physical education teachers, school nutritionist, food service staff and community supporters. See page 22 for information on the Team Nutrition School Activity Planner.

- Adopt a school nutrition policy to support healthy eating throughout the school. Refer to Team Nutrition's mission and principles (page 41) and Centers for Disease Control's Guidelines for School Health Programs to Promote Lifelong Healthy Eating for background information. See page 24 for information on how to get a copy of the Guidelines.

- Involve teachers, parents, school administrators, food service personnel, and students in developing your school nutrition policy.

- Include these areas in your school nutrition policy:
  - nutrition education classes
  - school lunch and breakfast
  - classroom snacks and parties
  - adequate time for children to eat and enjoy food at lunch and breakfast (some studies report an average total lunch period is 29 minutes; other researchers suggest a minimum eating time at the table of 20 minutes for lunch)
  - food sold on campus other than in the cafeteria, i.e. vending machines, snack bars, and fundraisers.
All the teachers identified the school-wide chef’s taste testing party as being very effective...teachers commented on how much the kids enjoyed tasting the new, lowfat foods. When speaking of the school-wide activities, the teachers at Fairmont frequently commented that they needed to provide the education “tie-in” for the school-wide activities to reinforce the messages of the lessons."

— from Fairmont Elementary, a Team Nutrition Pilot Community Project

- Start a Team Nutrition garden project where children can grow vegetables and learn where food comes from. Help children harvest and serve their vegetables in the school cafeteria. Seek help from Team Nutrition Supporters for gardening tools and seeds.

- Plan a Great Nutrition Adventure (see page 10).
GETTING RESULTS IN THE HOME - REACHING FAMILIES

- Make parents aware of the availability of Food, Family & Fun: A Seasonal Guide to Healthy Eating. This brand new book from USDA:
  - Features 50 healthy, tasty, and fun recipes—many contributed by nationally recognized chefs
  - Provides parents with innovative ideas to get children involved in healthful eating and cooking at home
  - Highlights family nutrition education activities including a family visit to a farmers’ market
  - Includes exciting new recipes such as vegetable rice salad; chicken salad roll-ups; baked bananas; meal in a potato; baked lemon chicken, and some jazzed-up old favorites like “new macaroni and cheese.”
  - Lists over 200 Team Nutrition supporters, hundreds of community resources, useful information, addresses, internet sites, and phone numbers including hotlines on nutrition and health.

- Purchase copies of Food, Family and Fun to use as incentives or door prizes for nutrition events.

- Send home monthly menus with nutrient disclosure information to showcase your healthy menus. Include messages about healthy eating.

- Use parent reproducibles from Scholastic Classroom Kits to inform parents about what their children are learning in school.

- Use Team Nutrition’s Parent Pak to deliver nutrition information to your students’ families. Work with your school’s PTA to get the information to parents.
Check with your local Cooperative Extension Specialist about community links. Use USDA's Community Nutrition Action Kit as a resource.

Refer to other sections in this guide for community activities on pages 18-20.

Seek the support of local supermarkets, businesses, and organizations in promoting your nutrition messages to the community.

USDA's Center for Nutrition Policy and Promotion in partnership with the Cooperative State, Research, Education, and Extension Service developed the Community Nutrition Action Kit filled with child-driven, innovative, hands-on activities that reinforce the nutrition education messages children are learning in school. The kit contains 17 youth activities, 12 family activities, and 6 community activities, with guidelines for implementation and handouts.

Target audience: Grades 3-5.
GETTING RESULTS IN THE MEDIA

The Team Nutrition Mission includes the media because of the essential link between the media and children, and how children respond to messages. Team Nutrition is designed to reach children where they live, learn and play.

Team Nutrition is also designed to reach parents, families, and communities—and the media plays a significant role in delivering the Team Nutrition message nationwide. In the past year, Team Nutrition has been covered by national newspapers, magazines, broadcast and cable television, radio, and even on the Internet. Following are some ideas that you can use to get results in the media.

- Look for the Disney Pumbaa and Timon Public Service Announcements (PSAs) on your television. Use these to initiate nutrition education lessons with your students.
  - The Team Nutrition PSAs are shown 5 days a week on Disney Afternoons, available in over 90 percent of the country and seen daily by over 580,000 children between the ages of 2 and 11.
  - Data from our Team Nutrition pilot communities indicated that 63 percent of the children in four pilot sites have seen the PSAs.
  - USDA tested the Team Nutrition PSAs and found that 90 percent of children liked them and most understood the messages to eat more fruits, grains, and vegetables and make healthy food choices.
  - The Team Nutrition PSAs have been incorporated into classroom curricula, reinforcing and expanding the messages that children see on television.

- Use the Event Planner from USDA's Great Nutrition Adventure or Team Nutrition School Activity Planner for ideas on working with the media to publicize nutrition education events.

- Invite the media to your school-wide events such as nutrition fairs, taste testing parties (especially the healthier commodities), and your Great Nutrition Adventure activity.

- Coordinate your media requests through your school district's public affairs section if applicable.

- Check with your Regional USDA Team Nutrition Contact or State CN Director for assistance in preparing media releases. See pages 29 and 30.
We want every child to have the opportunity to learn how to eat for good health. This ambitious goal is made possible by extensive, strategic public-private partnerships and over 200 Team Nutrition Supporters on the national level and thousands on the local level who represent all of the organizations that touch children's lives. These include: nutrition, health, education, food, agriculture, consumer, media, technology, and government groups.

Supporters and partners bring nutrition messages to children in fun and interesting ways in a language they understand, while strengthening social support for children's healthful food choices among parents, educators, and food service professionals. By leveraging government resources through public-private partnerships, Team Nutrition promotes food choices for a healthful diet through schools, families, the community, and the media.

**Team Nutrition Partners**
Partnerships with Scholastic, Inc., and The Walt Disney Company are examples of Team Nutrition's strategic plan to work with organizations to leverage the Government's investment and to extend the reach of this unique program. See pages 22-25 for the resources made possible for your school through these partnerships.

**Team Nutrition Supporters**
Team Nutrition Supporters take a leading role in making good nutrition a community priority. Thousands of Team Nutrition Supporters are actively working with schools on the local level. Here are some ways to bring the community into the classroom by involving supporters in your area:

- Use the Team Nutrition School Activity Planner for schools and supporters to connect with your local Team Nutrition Supporters. Contact one or several local members of the over 200 Team Nutrition supporters in your community for help with nutrition education activities such as nutrition fairs and food tasting activities. See the list of Team Nutrition Supporters on page 39 for reference.
Create a Team Nutrition Committee. Bring the community to the classroom by involving TN Supporters with teachers, parents, school administrators, food service personnel, and students in a Team Nutrition Committee. Develop a year-round action plan made up of monthly nutrition education activities such as: Team Nutrition fairs, tasting activities, nutrition gardening, classroom presentations, and field trips. Make plans to highlight key Nutrition dates such as National School Lunch Week and National Nutrition Month. See pages 22 for resource materials.

Write about Team Nutrition in newsletters. Supporters can involve the community and their members in Team Nutrition by letting them know about the changes taking place in schools across the Nation and how they can be involved locally. Newsletter information pieces are available through USDA regional offices. See page 29 for contact information.

Reinforce Team Nutrition messages in the community. Personalizing and reproducing Team Nutrition materials for parents, customers and employees reinforces Team Nutrition messages through multiple channels. Reproducible materials are available through Team Nutrition. See page 22 for contact information.

Include a Public Information Roundtable at your school activities. Over 2,000 organizations around the country have taken part in Team Nutrition Roundtables that educate the community on the changes taking place in Team Nutrition Schools and involve them in the process.

Nationwide, Team Nutrition has conducted hundreds of events in schools and communities. At every Team Nutrition School, Leadership Forums have brought community activists and policy makers together in support of Team Nutrition's mission and principles. The following example shows how the elements were successfully and imaginatively included in local activities.
Team Nutrition Supporter and Community Volunteer Involvement

The Phantom Lake Elementary School in Bellevue, Washington, brought together more than 24 organizations during the Team Nutrition Schools national roll-out incorporating the elements of a successful Team Nutrition School activity. Community organizations including educators, food service staff, parent organizations, farmers, small businesses and corporations, health and nutrition experts, and volunteer chefs provided interactive nutrition and health activities and in-class and take-home resource materials, and shared ideas on how they could continue to work together to support the mission of Team Nutrition in their local schools. Examples of their involvement are highlighted below.

Interactive Learning Activities

Washington State University created a vegetable guessing game where children were asked to put their hands into a mystery food box to feel and identify the vegetable. Using a pyramid filled with models of grains, breads, and pastas, The Wheat Commission asked children to identify which foods were grains and where in Washington grains were grown.

Cafeteria Link

The Bellevue district’s dietitian shared nutrition tips that have made them successful:

- Find lower fat versions of popular foods such as chicken nuggets and pizza; and
- Offer a produce bar (salads, vegetables and fruits) in your schools.

Teacher and Team Nutrition Partner Involvement

Teachers organized an all-school assembly which allowed all the children to be a part of the Team Nutrition School Banner presentation. A first-grade class arranged pictures of food on a food pyramid. Some teachers used Scholastic, Inc., lesson plan suggestions for various courses: math teachers asked students to count calories; social-studies classes explored the role of farming in American life; and English teachers assigned students to write about the best meal they had ever eaten. In addition, Walt Disney materials featuring Pumbaa and Timon from The Lion King reinforced messages in the cafeteria and classrooms throughout the day.

Parent Involvement

Parents were involved in the event and children were given take-home tasting samples, educational resource materials, and fun activities to share with their families. The Bellevue PTSA Council provided activity support and participated in the Public Information Roundtable.

The following organizations participated in the event:

Bargreen Ellington
Bellevue Journal American
Bellevue PTSA Council
Bellevue Nutrition Service
Coastal Marketing
Coyote Grill
Encore Brokers
Evans Food Group
Food Service Specialists
Food Services of America
Kenco Food Service
King County WIC Program
KOMO, KKZO, and KASB Radio
National Frozen Foods Corp
Neighborhood House

Washington State University
Here is the help that's out there for your school! USDA is committed to providing schools with the materials, resources, and training that they need to fully implement the Schools Meals Initiative for Healthy Children. Check out the resources and materials on the following pages. There's help on every aspect of Team Nutrition and how to get started providing healthier meals and nutrition education to your students.
Team Nutrition provides many valuable resources for parents, teachers, students, and food service professionals. For more information on the items listed below contact your State CN Director (page 32) or your USDA Regional TN Contacts (page 29). Most of the following items are available free to school districts.

Resources for Food Service Professionals

- Training Guidelines for Healthy School Meals
- Team Nutrition Training Materials for Healthy School Meals
- Menu Planner for Healthy School Meals
- Choice Plus, Food Purchasing Manual
- Assisted NuMenus Guidance
- A Tool Kit for Healthy School Meals
  (53 new recipes & marketing guide)
- USDA's Great Nutrition Adventure Action Packet (with video)
- School Lunch Challenge Recipes, I & II
- Culinary Training Videos
- Serving It Safe: A Manager's Tool Kit
- Team Nutrition Training Grants for Healthy School Meals
  (available only to State Agencies)
- Team Nutrition for Healthy School Meals
  Training Workshops
- Culinary Training Institutes
- Healthy School Meals Resource System (electronic)
- Customer Service Help Desk
- Child Nutrition Nutrient Database
- USDA Approved Software List

Resources for Students, Parents and Teachers

- Team Nutrition Resource Kit
- Team Nutrition Certificate
- Team Nutrition Banner
- Team Nutrition “Eating Smart” Growth Chart
- Team Nutrition “Smart Yet Satisfying” Poster
- Team Nutrition “Devour for Power” Poster
- Team Nutrition “Devour for Power” Food Guide
- Pyramid Poster
- Team Nutrition “Timon’s Special” Poster

- All-Star Team Nutrition (future)
- Team Nutrition Parent Pak (coming soon)
- Team Nutrition Reproducible Activity Pages
- Fun Ways to Meet the Dietary Guidelines at Home
Scholastic, Inc., in cooperation with the USDA has developed Team Nutrition Classroom Kits. A new, hands-on approach to nutrition education, Team Nutrition provides teachers, students, and families with teacher-tested, easy-to-use materials that will help children to:

- Expand the variety of foods in their diets
- Add more fruits, vegetables, and grains to the food they already eat
- Construct a diet lower in fat

These comprehensive, activity-based materials help you teach the basics of healthy eating in an exciting way that engages students and takes the message beyond the classroom and the school cafeteria and into students' homes. It also focuses on changing actual behavior by using fun, hands-on activities children can easily relate to.

The Team Nutrition curriculum offers teachers a menu of engaging activities. By picking and choosing from the menu, teachers can easily adapt the program to fit their specific classroom needs. Classroom kits include:

- A teacher's guide
- A live action video (Grades 1-2 and 3-5)
- Classroom magazines
- Family newsletters
- Full-color classroom posters
- Reproducible worksheets

The lesson plans can be easily integrated into the school's core curriculum. The Scholastic materials serve as a core for Team Nutrition educational messages and activities. Additionally, some sample materials are available on Scholastic's Homepage at http://scholastic.com.

Each Team Nutrition Classroom Kit is customized by grade level: Pre-K and Kindergarten, Grades 1 and 2, and Grades 3 to 5. Call Scholastic at (800) 724-6527 to order the kits.
The following publications are available for a nominal charge from the Superintendent of Documents:

USDA's Team Nutrition is a network of public and private partnerships that promote food choices for a healthy diet through the media, schools, families, and the community. USDA's Team Nutrition supports the new policy updating school meals nutrition standards to reflect the Dietary Guidelines for Americans. This historic policy change—the School Meals Initiative for Healthy Children—is the most significant reform of the school meals program since it began in 1946.

Team Nutrition Schools represent the community focal point for USDA's Team Nutrition. They are the link to community-level implementation of the School Meals Initiative for Healthy Children. A growing national network of local schools showcase healthy changes in school meals and new nutrition education programs. Team Nutrition Schools model the involvement of Team Nutrition partners and supporters at the local level and actively promote school meals that offer more healthful choices. All schools currently participating in the National School Lunch Program are eligible to become a Team Nutrition School.

**A Team Nutrition School Will:**
- Support the USDA's Team Nutrition mission and principles
- Designate a Team Nutrition School Leader
- Demonstrate a commitment to meeting the Dietary Guidelines for Americans in school meals
- Distribute Team Nutrition education materials
- Involve teachers, children, parents, food service personnel, and community organizations in nutrition education activities
- Share successful strategies and programs with other schools
- Participate in the National School Lunch Program
- Demonstrate a well-run Child Nutrition Program

**A Team Nutrition School Will Receive:**
- A Team Nutrition Leadership Award acknowledging their commitment
- Recognition in a National Directory of Team Nutrition Schools
- Team Nutrition resource materials for use in the classroom, in the cafeteria and at home, such as Scholastic's classroom kits and Disney educational posters featuring Lion King characters
- Early alerts about the many additional products available in the future
- Team Nutrition School designation for 2 years

USDA's Team Nutrition brings to life the promise of healthy children—Team Nutrition schools fulfill that promise by bringing together all those who care about children...join the team!

Complete the following School Information Sheet, detach, and mail. Only one information sheet per school should be submitted. Your school will be notified of its status as a Team Nutrition School, which will be valid for a 2-year period. Any questions can be directed to your District School Food Service Director or your State Child Nutrition Director at your State Education Agency or write to USDA at Team Nutrition Schools, P.O. Box 0812, Rockville, MD 20848-0812.
Our Team Nutrition School Leader is:

☐ Ms.  ☐ Mrs.  ☐ Mr.  ☐ Other

First Name  Last Name

Title  School's Name

Total Enrollment  Grades Taught

School District  School County

School's Address

City  State  Zip Code

Telephone (  )  FAX (  )

E-mail address

Please check one or more of the appropriate grade ranges:

☐ P (Preschool) PreK  ☐ E (Elementary) K - 5/6  ☐ M (Middle) 6/7 - 8  ☐ H (High) 9-12

We agree to:

- Support USDA's Team Nutrition mission and principles.
- Demonstrate a commitment to meet the Dietary Guidelines for Americans.
- Designate a Team Nutrition School Leader.
- Distribute Team Nutrition materials to teachers, students, and parents.
- Involve teachers, students, parents, food service personnel, and the community in interactive and entertaining nutrition education activities by having at least one nutrition event per year.
- Participate in the National School Lunch Program
- Demonstrate a well-run Child Nutrition Program.
- Share successful strategies and programs with other schools.

We certify our school does not have any outstanding overclaims or significant program violations in our school meals programs.

USDA’s TEAM Nutrition Schools

P.O. Box 0812

Rockville, MD 20848-0812

Team Nutrition is an initiative of the
United States Department of Agriculture

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs and marital or familial status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-2791.

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C., 20250, or call 1-800-245-6340 (voice) or (202) 720-1127 (TDD). USDA is an equal employment opportunity employer.
FOR INFORMATION AND ASSISTANCE FROM YOUR
USDA REGIONAL TEAM NUTRITION CONTACTS

Your USDA Regional Team Nutrition Contacts can provide technical assistance in all aspects of Team Nutrition, especially the Team Nutrition Schools Program, Team Nutrition Supporters and Partners, and the development of media plans.

FOR INFORMATION AND ASSISTANCE FROM YOUR STATE NUTRITION EDUCATION AND TRAINING COORDINATOR

These individuals are great resources of nutrition education materials including Scholastic's Team Nutrition Teacher Classroom Kits. They also can provide assistance with training and technical assistance for food service professionals. They are familiar with Team Nutrition materials and available Team Nutrition training opportunities.

Most State NET Coordinators have resource libraries and loan materials to schools. Many States award mini-grants to local schools for nutrition education projects through the NET Program.

Programs and Services

Education and Training
NETPRO—Training/networking seminars for Child Nutrition professionals, held at various locations throughout the country

Seminars/Special Publications—Training and technical assistance through outreach programs and services

Technology Transfer
Clearinghouse—Timely access to information and resources for Child Nutrition personnel through a toll-free number, 800-321-3054

Satellite—Training and information for Child Nutrition personnel, delivered through the national Nutrition Network, downlinked to more than 1,200 sites nationwide

Applied Research
Research—Supports improvement of the quality and cost-effectiveness of Child Nutrition Programs. The Office of Applied Research is located at the University of Southern Mississippi, Hattiesburg, MS, 601-266-5773.

Publications
NFSMI produces and publishes reports of applied research findings, training guides, and information materials for use by Child Nutrition Programs. NFSMI also reproduces through cooperative publishing agreements, education and training guides, and nutrition education materials developed by state agencies and other nonprofit organizations. All published materials are available on a cost-recovery basis.

To get a complete listing of all the Institute's publications, call or write:
National Food Service Management Institute
The University of Mississippi
P.O. Drawer 188
University, MS 38677-0188
Phone: (800) 321-3054
Fax: (800) 321-3061

Helpline
The NFSMI also operates a Customer Service Help Desk (Your Healthy Food LINE), a helpline providing information on NuMenus, Assisted NuMenus, Food Based Menu Planning Systems, Dietary Guidelines, Nutrient Analysis, computer software, recipes, purchasing, production techniques, financial management, marketing, and equipment. Call (800)-YHF-Line/(800) 943-5463.

Mission

To improve the health and education of children by creating innovative public and private partnerships that promote food choices for a healthful diet through the media, schools, families, and the community.

Principles

Supporters of Team Nutrition share these common values:

1. We believe that children should be empowered to make food choices that reflect the Dietary Guidelines for Americans.

2. We believe that good nutrition and physical activity are essential to children's health and educational success.

3. We believe that school meals that meet the Dietary Guidelines for Americans should appeal to children and taste good.

4. We believe our programs must build upon the best science, education, communication and technical resources available.

5. We believe that public/private partnerships are essential to reaching children to promote food choices for a healthful diet.

6. We believe that messages to children should be age appropriate and delivered in a language they speak, through media they use, in ways that are entertaining and actively involve them in learning.

7. We believe in focusing on positive messages regarding food choices children can make.

8. We believe it is critical to stimulate and support action and education at the national, state and local levels to successfully change children's eating behaviors.
