This paper is based on the premise that as computer assisted learning becomes more prevalent, teachers will be required to make decisions as to the quality of the software available for instruction. Assessment guidelines from the ERIC Clearinghouse on Reading, English, and Communication Digest No. 79 and the North Carolina Department of Public Instruction were used as a starting point, for discussions with three reading consultants, a Reading Recovery teacher trainer, and the coordinator for secondary reading. A 17-point checklist was then developed to be used as an instrument to assess software—a 4-point list presents additional factors to consider on an individual basis. The paper then provides the names and brief descriptions of the following software programs, along with relevant information (publisher, hardware requirements, positives, negatives, and "unknown"): "Little Planet Literacy: Glowbird and Ribbit Collection" (PreK-4); "Imagination Express" (Grades 1-6); "Ellis Intro.ESL" (Grades 7 and up); "English Express Deluxe.ESL" (Grades 7 and up); "Adventures of Tom Sawyer" (Secondary Grades); "That Strange Mr. Poe" (Secondary Grades); "In My Own Voice: Multicultural Poets on Identity" (Secondary Grades); and "Writing for Readers" (Grades 3-12). A 5-item bibliography concludes the paper. (NKA)
A Guideline for Assessing CD-ROM Software as Supplemental Material to Language Arts Instruction

by

Mary Crawley
(Peachtree Middle School)

Course: Supervision and Administration of a Reading Program
Sponsor: DeKalb County School System
Instructor: Dr. Bill Hammond
Date: Summer 1998
A Guideline for Assessing CD-ROM Software as Supplemental Material to Language Arts Instruction

While computers are never expected to replace the role of the teacher in the classroom, they have become an integral component in the school environment. As computer assisted learning becomes more prevalent, teachers will be required to make decisions as to the quality of the software available for instruction. Using assessment guidelines from the ERIC Clearinghouse on Reading, English and Communication Digest #79 and the North Carolina Department of Public Instruction as a starting point, I engaged in discussions with Robert King, Katherine Foster and Roselyn Daniels, reading consultants, Betsy Harrell, Reading Recovery teacher trainer and Dr. Dorothy Brown, secondary coordinator for reading. These conversations aided in producing the following checklist as an instrument that may be used to assess software. Additional factors to consider relating to individual situations are included at the end. All of the professionals involved agreed that there should be a component in the software allowing the teacher to individualize instruction and that the software should include assessment and management capability. Dr. Brown indicated teacher training was necessary for successful implementation of any computer assisted instruction.

1. Is the program grounded in research based instructional practices?
2. Does the program present a balanced representation of cultural, ethnic and racial groups?
3. Is the program developmentally appropriate for the target group?
4. Does the program incorporate both reading and writing components?
5. Is the program multisensory?
6. Does the program promote active student involvement encouraging critical thinking skills?
7. Is the program suitable for a wide range of learners and learning styles?
8. Does the program offer word recognition and/or vocabulary in a contextual framework?
9. Does the program include extension activities?
10. Does the program include a curriculum guide and/or teacher training component?
11. Does the program have a management and record keeping system?
12. Does the program include assessment features and, where appropriate, diagnostic features?
13. Is the program teacher controlled so that instruction may be individualized on an as needed basis?
14. Is the program user friendly?
15. Does the program have high quality audio and video components?
16. Are there instructions for installation and operation of the software?
17. Is there a toll free technical support phone number?
On an individual basis there are other factors to consider.

1. Is the program appropriate to the classroom instructional plan and system curriculum?
2. Is the hardware of available computers compatible with the software? (All software requires multimedia PC.)
3. Is the price of the software comparable to similar programs?
4. Most publishers provide CD-ROM demos at no charge from which many determinations about the software can be made.

Ten programs are described below using the above criteria. None of the programs have been viewed in their entirety therefore some assessments were determined by talking to the publisher directly.

Reproduction Release
(Specific Document)

I. DOCUMENT IDENTIFICATION:

| Title: Guideline for Assessing CD-ROM Programs as Supplements to Language Arts Instruction | Author(s): Mary Crawley | Corporate Source: Dekalb Co. Schools | Publication Date: July, 1998 |

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign in the indicated space following.

<table>
