AUTHOR Strauss, J. P.; van der Linde, H. J.; Plekker, S. J.; Strauss, J. W. W.

TITLE Education and Manpower Development, 1997. No. 18.

INSTITUTION University of the Orange Free State, Bloemfontein (South Africa).

ISBN ISBN-0-86886-602-4

PUB DATE 1998-09-00

NOTE 57p.

AVAILABLE FROM Research Institute for Education Planning, Faculty of the Humanities, University of the Orange Free State, P.O. Box 339, Bloemfontein 9300, South Africa.

PUB TYPE Numerical/Quantitative Data (110) -- Reports - Descriptive (141)

EDRS PRICE MF01/PC03 Plus Postage.

DESCRIPTORS Black Students; *Educational Attainment; Educational Trends; *Elementary Secondary Education; *Enrollment; *Ethnic Groups; Foreign Countries; Minority Groups; Racial Differences; Sex Differences; Trend Analysis; White Students

IDENTIFIERS *South Africa; South Africans

ABSTRACT

This eighteenth publication in the series provides a visual overview of various facts on education in South Africa. Up to 1995, educational data were presented by racially segregated education departments; now data are presented by the newly structured nonracial departments. The unavailability of data on a racial basis means that educational progress made by different population groups could not be measured. Information is also lacking on teacher education and teacher supply and development in various provinces. In 1997, 12,001,813 students were enrolled in South Africa's schools, with nearly 25% in the Kwaulu-Natal Education Department. About one-third of these students were in grades 1 to 3, the "Foundation Phase." Other phases are "Intermediate" (grades 4 to 6), "Senior" (grades 7 to 9), and "Further Education and Training" (grades 10 to 12). Learner enrollment is given according to gender and grade and enrollment projections are given for each of the provinces. Information is also supplied for university enrollment and faculty by racial population, and data are presented on aspects of educational finance, including expenditures per student for each province. (Contains 17 graphs.) (SLD)

PREFACE

This eighteenth publication in the series provides, like the previous issues, a visual overview of various facts on education in South Africa. While most of the issues before 1994 concentrated on information about the formal school phases, the education picture has since 1994 changed to such an extent that it was necessary to change the contents to also cover other educational sectors.

Up to and including 1995 educational data were collected by the racially segregated education departments. 1996 was the first year when it was done by the newly structured non-racial departments.

The unavailability of data on a racial basis is still a problem and educational progress made by the different population groups could not be measured. Information on various other aspects is also incomplete.

Provinces have as yet not completed rationalisation of colleges of education and the absence of definite policies and teacher supply, utilisation and development in provinces complicates projections in this area.

Qualified education management information staff is in short supply and many an office is run on skeleton staff. The large portion of the budget being taken up by teacher salaries, leaving little funds for other areas, is clearly felt by EMIS sections - resulting in massive delays in the capturing and processing of data.

Educational data still travel only one way and apart from matrix results made available by the press to the general public, education information is in many cases a well kept secret. The burden of completing

numerous forms will only be appreciated as an asset when information is made available and useful on district and school level.

Progress was made by the National Department in piloting the newly devised EMIS questionnaire in a number of provinces. This exercise emphasised the fact that the standardisation of procedures and the format of data collecting between provincial departments and the national department could speed up the process and make data much sooner available for planning purposes.

As was the case with the previous publication, these 1997 data are also not complete. Teacher, classroom and subject data are at present still inadequate. Information on the Further Education and Training (FET) sector (grades 10, 11 and 12) outside of formal schooling is vague and will hopefully become clear after the implementation of the FET act which provides for the collecting of data on this sector.

The ideal still remains that all educational data will eventually be easily accessible as public domain data and that the general public, research organisations and education departments could make informed conclusions, analysis and decisions to the benefit of education.

The aim of this brochure is to give a visual, easy to understand overview of some aspects of education in South Africa. We trust that the reader will find it interesting and especially that it would contribute to a better understanding of the complicated nature and especially urgent need for support of education to the benefit of all the country

HJ van der Linde
Director: RIEP

Fig. 1: Learner enrolment according to province, 1997

The Kwazulu-Natal Education Department has the largest number of learners in South Africa (nearly 25%). The four largest education departments have more than two thirds of the total number of learners in South Africa. The 12 001 813 learners show a decline of 0,4% compared to the number of learners of 1996. This decline is mainly caused by the fact that there is a decline in intake in Grade 1.

Fig. 2: Learner enrolment according to school phase and gender, 1997

Approximately one third of the total number of learners in South Africa are in the Foundation Phase (grades 1 to 3). The other phases are the Intermediate Phase (grades 4 to 6), the Senior Phase (grades 7 to 9) and the Further Education and Training (FET) Phase (grades 10 to 12).

Fig. 3a: Learner enrolment according to gender and grade in the EASTERN CAPE, 1997

Fig. 4: Flow of learners from Grade 1 to Grade 12 in South Africa from 1980

This figure shows the flow of learners from grade 1 to grades 8 and 12 over a period of 12 years for 7 different beginning years. The ratio of each group in the different grades is indicated between brackets on the horizontal axis. There was an increase in the ratio of learners that reached grades 8 and 12 as the years increased.

Fig. 5: Flow of learners from Grade 8 (1993) to Grade 12 (1997), passes and exemption per province

This figure compares the flow of learners from grade 8 to grade 12, the number that passes and the number that passes with exemption per province. The highest ratio of learners that passes grade 12 with and without exemption is found in the Western Cape.

Fig. 6: Grade 12 examination results per province, 1997

Fig. 8: Students at universities according to population group, 1997

The largest university in South Africa is Unisa (not shown in fig.8) with 48 289 white, 4 973 coloured, 12 212 Asian and 60 867 black students. The total number of students at universities is 368 329. This is slightly more than indicated according to population group, because a small number could not be grouped accordingly.

Fig. 9: Number of staff members at universities according to population group, 1997

The total number of staff members at the indicated universities is 34 467. The majority of them are still whites.

Fig. 10: Students at universities 1988, 1991, 1994 and 1997

This figure compares the numbers of students at the different universities. Most of the universities show a growth in numbers over the period. The universities of Durban-Westville, Fort Hare, Vista Western Cape and Witwatersrand indicate a decrease in student numbers from 1994 to 1997. Unisa indicates a constant growth in student numbers, from 99 416 students in 1988 to more than 126 000 in 1997.

Fig. 11: Students at technikons according to population group, 1997

Technikon SA (not shown) is the largest technikon in South Africa with 19 595 white, 5 021 coloured, 2 830 Asian and 52 639 black students. In comparison with 1996, it is the number of black students that shows the largest growth in 1997.

Fig. 12: Number of staff members at technikons according to population group, 1997

Of the total of 10 049 staff members at technikons the majority is white, namely 5 076, followed by 3 397 blacks.

Fig. 13: Students at technikons 1988, 1991, 1994 and 1997

There was a constant growth in student numbers at technikons over the mentioned period, except at the Pretoria Technikon where there occurred a decrease in numbers from 1994 to 1997. The Border, Eastern Cape and North West technikons came into being only after 1988. The Technikon SA had an increase from 10 557 students in 1988 to 80 325 in 1997.

Fig. 14: Students at colleges of education per province, 1997

The majority of the teachers are trained in Kwazulu-Natal, the Eastern Cape and the Northern Province. Although the Free State Education Department is the second smallest of the provincial departments, the fourth most students are being trained at colleges of education in this province. Several provinces have decreased the number of new entrants into the colleges of education.

Fig. 15: Number of lecturers at colleges of education per province, 1997

This figure indicates the number of lecturers at colleges of education. The student:lecturer ratios vary from 9 to 16 in the various provinces if it is assumed that part-time students will complete their studies in 2 years.

Fig. 16: Expenditure on school education per province for 1997/98

The amounts in this figure indicate the expenditure on school education (both public and private schools). The per capita expenditure varies from R1 650 to R3 000 in the different provinces.

Fig. 17: Expenditure on teacher training at colleges of education per province, 1997/98

The figure shows the expenditure on teacher training at colleges of education. The expenditure per student varies from about R10 000 to more than R20 000 in the various provinces.
