This curriculum guide for middle school student development was created in response to needs expressed by business and other organizations throughout the Southwest Florida School-to-Careers Consortium. The guide encompasses four curriculum categories: academic achievement, career development, personal and social development, and community involvement. Each of these four areas is further subdivided into general goals and attendant student outcomes. Activities are provided as examples of the range of possible activities that can be used to meet any particular outcome or goal. A reference section accompanies the guide. The curriculum content is organized in the following eight sections, with course content suitable for middle school students: (1) introduction and information on using the curriculum guide; (2) school-to-careers competencies; (3) correlation of sunshine state standards; (4) curriculum matrix; (5) exceptional student education adaptations; (6) evaluation; (7) character education and school-to-careers; and (8) sample activities. Southwest Florida School-to-Careers Consortium
Comprehensive Student Development Curriculum

Evaluation

Please respond to the questions below by circling your response using the following scale: 1 = strongly agree, 2 = agree, 3 = neutral, 4 = disagree, 5 = strongly disagree. Your responses will be used to make future revisions to these curriculum guides. A self-addressed, stamped envelope has been provided. Please return surveys by March 19, 1999. Thank you.

1. The material was easy to understand.
   
   1   2   3   4   5
   
   Comments:

   ____________________________________________________________
   ____________________________________________________________
   ____________________________________________________________

2. The format of the guide was helpful, clear, and easy-to-follow.
   
   1   2   3   4   5
   
   Comments:

   ____________________________________________________________
   ____________________________________________________________

This project was funded by the Southwest Florida School-To-Careers Consortium, 1997-99.
VISION STATEMENT

Students recognize choices and make decisions in their personal lives, academic growth, career, and community involvement with competence and confidence.

MISSION STATEMENT

Students lead successful and productive lives because schools have incorporated a comprehensive approach to student development throughout all levels of education.
TABLE OF CONTENTS

- Introduction/Using the Curriculum Guide
- School-To-Careers Competencies
- Correlation of Sunshine State Standards
- Curriculum Matrix
- Exceptional Student Education Adaptations
- Evaluation
- Character Education and School-To-Careers
- Sample Activities
This series of comprehensive student development curriculum guides were developed in response to needs expressed by business and other organizations throughout the Southwest Florida School-To-Careers Consortium, a five-county alliance that includes Charlotte, Collier, Glades, Hendry, and Lee County School Districts; Edison Community College and Florida Gulf Coast University. The grant specified that school-to-career philosophies and activities needed to be institutionalized beyond the life of any funding and that to do so would be most effective by codifying a K-Postsecondary curriculum.

Student development is most frequently and properly located under the training and responsibility of counselors, the student development specialists in educational institutions. Their training includes curriculum in career awareness, planning, and choice as well as individual development. They were thus selected as the team leaders and the majority of the writing team to develop these curriculum frameworks and guides. Other educators from related fields were also included.

The curriculum writing team represented all levels of education and all involved districts. The team consisted of the following:

**Elementary School (K-5):**

**Team Leaders:** Susan Shoemaker, Lee County  
Mary Fischer, Lee County  
Ann Cole, Lee County  
Susan Rose, Charlotte County  
Mary Lowell, Charlotte County

**Middle School (6-8):**

**Team Leader:** Sharon Zebley, Lee County  
Karen David, Collier County  
Anthony Lettleri, Collier County  
Deborah Marsh, Charlotte County
High School (9-12):
Team Leaders:  
Jack Pause, Glades County  
Christopher B. Smith, Collier County  
Vicki Chipman, Hendry County  
Janice Foster, Hendry County  
Jessica Owen, Charlotte County

Post-secondary (Freshman-Senior)
Team Leaders:  
Dr. Lorraine Guth, Florida Gulf Coast University  
Susan Potts, Edison Community College  
Cheryl Lynn Dratler, Career Counselor  
Russ Crawford, Lee County  
Yolanda Flores, Collier County  
Carolyn Gorton, Charlotte County  
Nancy Iacovone, Collier County

Exceptional Student Education
Team Leader:  
Mary Fischer, Lee County  
James Bedrava, Collier County  
Christine Ford, Collier County  
Richard Hollis, M.Ed., JobSmart, Inc.  
Brenda Lazarus, Florida Gulf Coast University  
Jessica Owen, Charlotte County  
Donna Robson, Lee County

Evaluation Team:
Team Leader:  
Dr. Madelyn Isaacs, Florida Gulf Coast University  
Jack Pause, STC Coordinator  
Susan Potts, Edison Community College  
Susan Shoemaker, Lee County  
Lynn Thiewes, Collier County

The writing project was coordinated by:  
Dr. Madelyn Isaacs, Florida Gulf Coast University  
Dr. Lee O’Hare, Lee County Schools  
Jack Pause, STC Coordinator

The manuscript was initially prepared by Dr. Scott Fry, Hendry County and was edited by Dr. Madelyn Isaacs, Florida Gulf Coast University. The revised
The process of development began with the adaptation of Florida's Student Development Program into a matrix of goals and outcomes. The program was already geared toward comprehensive student development and the infusion of school-to-work concepts and activities. Once the matrix for K-post-secondary curriculum outcomes was identified, the writing team met as a large group, divided into subgroups based on levels of experience and the need for overlap and transitions between school levels, and compiled activities for each applicable outcome in school-based, connecting, and work-based environments.

The curriculum is designed as a whole with special attention to transitions between levels. However, it is presented in sections by school level: elementary, middle, high, and post-secondary. Districts and post-secondary institutions are expected to review the total curriculum, customize it to best meet individual district/institutional needs and goals, and begin to disseminate the curriculum by training counselors and administrators in its outcomes and activities.

Each level specifies competencies presumed to exist upon student entry and exit competencies for which it would be accountable. Each curriculum section contains such a statement. This statement is followed by a chart of how the curriculum coordinates with Florida's Sunshine State Standards in Health and Social Studies. These subject areas are most often infused throughout the Student Development Domains.
This curriculum guide is organized into four curriculum categories: Academic Achievement (AA), Career Development (CD), Personal and Social Development (PSD), and Community Involvement (CI). Each of these four areas is further subdivided into general goals and attendant student outcomes. The curriculum categories, goals, and outcomes are designated by letter codes and numbers. Thus "CD 2.2" translates to mean Career Development Goal number 2, "Understand interrelationships among life roles and the world of work", and outcome number 2, "describe the advantages of various life role options."

For some goal and outcome areas, an "N/A" or "Not Applicable" is designated. For these, it was determined that the outcome or goal was either not applicable yet to the age/grade/developmental level or had been adequately covered previously. For information about how other levels have addressed specified outcomes, see the curriculum guides in their entirety.

Activities are meant as examples of the range of possible activities to meet any particular outcome or goal. These are listed in the appendices and copies are included in the back of the curriculum guide. It is assumed that there are many other activities already developed or to be developed which can also meet curriculum goals. A reference section accompanies each guide. Some extended reference material was adapted from Insights from the Florida Department of Education, Bureau of Career Development, and Developmental Guidance: Classroom Activities from the Center on Education and Work at the University of Wisconsin at Madison. These two curriculum guides are especially recommended although many other quality collections of activities exist and could be appropriate and useful.
When students enter from Elementary school they should be able to demonstrate:

- Appropriate grade level reading, mathematics and writing skills
- Interpersonal skills including working with others and conflict resolution/mediation skills
- Decision making and goal setting skills
- Career Awareness: knowledge of the world or work, how jobs interact, examples of range of work from local environment and why work is important.
- Introduction to community service
- Working cooperatively in groups
- Notion of good physical and mental health
- Basic keyboarding and computer literacy skills
- Understanding the importance of standardized testing

During 6th Grade the following areas will be covered:

- Assess entering career, decision making, conflict resolution skill level
- Orient students to middle school rules, conduct, class scheduling, attendance and other policies
- Conduct diversity awareness activities including cultural, varying teacher styles and expectations, learning styles
- Begin career awareness activities: self-assessment (interests, aptitudes and goals) e.g., Career Cruiser (begin portfolio with self-assessment information)
- Continue computer literacy and processing skills
- Orient toward school rules - homework & attendance accountability
- Orient to employability skills - attendance, timeliness of assignments, etc.
- Continue planning and goal setting behaviors - using planner for time management, etc.
- Continue decision making and problem solving skills and knowledge of consequences of decision making
- Master appropriate academic skills

During 7th Grade the following areas will be covered:

- Introduce concept of the four-year plan
- Introduce local job market, career cluster information
- Continue computer literacy and processing skills
- Introduce resume writing; continuing portfolio development

Southwest Florida School-To-Careers Consortium
Comprehensive Student Development Curriculum
Middle School
• Orient toward school rules - homework & attendance accountability
• Orient to employability skills - attendance, timeliness of assignments, etc.
• Continue planning and goal setting behaviors - using planner for time management, etc.
• Continue decision making and problem solving skills and knowledge of consequences of decision making
• Master appropriate academic skills

During 8th Grade the following areas will be covered:
• Complete 4 years of 6 year plan of study
• Begin high school orientation to graduation requirements,
• Make students aware of scholarship and financial aid opportunities
• Continue computer literacy and processing skills
• Orient toward school rules - homework & attendance accountability
• Orient to employability skills - attendance, timeliness of assignments, etc.
• Continue planning and goal setting behaviors - using planner for time management, etc.
• Continue decision making and problem solving skills and knowledge of consequences of decision making
• Master appropriate academic skills

When students leave middle school and enter high school they should be able to demonstrate or have the following:
• Completed 4 years of 6 year Plan
• Aware of Florida academic and vocational/technical scholarship opportunities
• Aware of high school graduation requirements
• Career awareness - introduction of local job market and career clusters, portfolio and resume writing
• Assessment results from preliminary formal assessment instrument (CHOICES Jr., or some other program)
• Continuing computer literacy and processing skills
• Orientation toward high school rules in advance: homework & attendance accountability, credit accrual and denial policies
• Orientation to employability skills - attendance, timeliness of assignments, etc.
• Planning and goal setting behaviors - using planner for time management, etc.
- Decision making and problem solving skills and knowledge of consequences of decision making
- Master appropriate middle school academic skills
- Interpersonal skills

</table>

**Academic Achievement**

AA 1.0 Understand and participate in a school environment

AA 2.0 Develop effective study skills

AA 3.0 Develop effective time management skills

AA 4.0 Develop effective stress management skills

AA 5.0 Understand attitudes and behaviors related to academic achievement

AA 6.0 Develop interpersonal and communication skills for successful learning

AA 7.0 Assess self and school success skills

AA 8.0 Set academic goals and make decisions that help attain those goals

---

**Career Development**

Acquire self-knowledge

CD 1.0 Develop a positive, stable, integrated self-concept as related to career problem solving and decision making

CD 2.0 Understand interrelationships among life roles and the world of work

Acquire educational and occupational knowledge
CD 3.0 Attain awareness of personal development and lifelong learning as related to productive meaningful work

CD 4.0 Understand the relationship between school achievement and educational and career opportunity

CD 5.0 Understand how the needs of society and the structure of the economy are related to the nature of work

CD 6.0 Understand and use career information to solve career problems and make career decisions

Develop career problem solving and decision making skills

CD 7.0 Acquire career problem solving, decision making, and planning skills

SS.A.4.3.1 knows the factors involved in the development of cities and industries (e.g., religious needs, the need for military protection, the need for a marketplace, changing spatial patterns, and geographical factors for location such as transportation and food supply).

SS.A.6.3.5 understands how Florida has allocated and used resources and the consequences of those economic decisions.

SS.B.1.3.6 understands ways in which regional systems are interconnected.

SS.B.2.3.8 knows world patterns of resource distribution and utilization.

SS.D.1.4.1 understands how many financial and non-financial factors (e.g., cultural traditions, profit, and risk) motivate consumers, producers, workers, savers, and investors to allocate their scarce resources differently.

SS.D.2.3.1 understands how production and distribution decisions are determined in the United States economy and how these decisions compare to those made in market, tradition-based, command and mixed economic systems.

SS.D.2.4.6 understands factors that have led to increased international interdependence and basic concepts associated with trade between nations.
<p>| CD 8.0 Develop the capacity for self-awareness and self-regulation in the career problem solving and decision making process |
| Develop employability skills |
| CD 9.0 Develop skills to enable one to seek, obtain, maintain and change jobs |
| CD 10.0 Develop effective human relations skills to enable positive and productive work relationships |</p>

**School-Based Activities**
- Discussion-Brainstorm when academic work is complete. Social Studies design a research project to evaluate different schedules.
- Plan a daily-weekly academic schedule. Put in chart form for monitoring.
- Keep a journal, noting the success of personal responsibility. Small group discussion; evaluate the importance of maintaining a balance between school and other activities.
- Create skits that depict the lack of time-management skills—Discuss.
- Develop work sheet: stress manager. Discuss stress management skills.

**Work-Based Activities**
- Field trip to local business. theme: "What are their priorities?" Discuss the value of time-management.
- Guest speaker from hospital, topic: Stress management skills.
- Develop work sheet: stress management skills.

Exceptional Student Education Overview
Middle School

This Exceptional Student Education guide is an addendum to the Southwest Florida School-to-Careers Consortium Comprehensive Student Development Curriculum. No one set of modifications is applicable to the special needs of all learners. The ESE population represents perhaps the most diverse within our schools, so the modifications suggested represent tangible assistance for many students. Some students have needs for changes to the learning situation, others for changes in the learning environment, others for self-management strategies, and still others for physical changes in activities. While some special education students are integrated into classes with all other students, some special education students are engaged in classes that only contain other special education students. However, regardless of learning needs, accommodations required, or classroom setting, all special education students are to be served by comprehensive student development. Student development (academic, career, and personal/social development) is one of many areas in which ESE students are guaranteed access by law.

Our daily responsibility to these students is to make the often simple modifications, accommodations, and adaptations of the exercises contained in the curriculum. When planning to implement this curriculum, the primary emphasis should be on individual learning needs. Thus, whenever planning a lesson, an activity, an off-campus visit, or working with families to develop short and long-range plans to meet students' needs, all counselors and teachers must account for meeting all students' needs. Classroom guests (counselors presenting periodic lessons or outside speakers) should talk to teachers in advance to identify any special considerations. Special educators, who recognize and meet their students' individual needs on a daily basis, may be a good source for many supplementary activities and adaptations.

All student learning needs and curriculum adaptations are specified in an annually prepared Individualized Educational Plan (IEP). The IEP all specifies the degree to which students participate in least restrictive environments, an educational practice called "inclusion". Inclusion means helping students with learning disabilities and other handicapping conditions to work and learn in the least restrictive environment they can manage with reasonable accommodations. This is frequently a regular classroom setting which affords the opportunity to become as independent as possible while gaining social skills and exposure to the widest range of goals and possibilities. All students in the class will benefit through the opportunity to become familiar and accepting of a more diverse range of individuals.
Ultimately, the goal of all children and their families is academic achievement at the student’s highest capability that leads to eventual independent adult life. For all students the relationship between education and the world of work is critical, for ESE students that explicit relationship is also critical. The successive career activities involved in awareness, development, and implementation of careers allows ESE students and their families time to explore and plan lives in which the impact of handicapping conditions can be minimized. Career development activities can help identify careers that are available and plan ways to overcome any barriers to success.

Parents are partners in their children’s successes at school and in life. For the ESE student, ongoing involvement and partnership with the family is just as essential as for any other student. Reaching out to families with newsletters, home visits, cable television, and other new technologies keeps parents and teachers informed of mutual concerns involving students who may need additional support to prepare for a career. Educating parents that their students should be receiving career development curriculum and services, and the potential impact of those services and curriculum is an important part of that role. Other aspects may include coordinating with families concerning supportive home activities as well as helping families access supportive community agencies and programs.

The adaptations suggested in this guide are a sample of the kinds of changes, accommodations, or adaptations that may be required by many students of many activities. Not every activity requiring changes was selected an example. As well, many activities are suggested specifically for ESE populations that do not appear in the comprehensive student development curriculum. It is up to the educator to insure that selected activities are planned carefully to serve the needs of the intended population.

Working with ESE Students in the Regular Classroom

1. Reduce the amount of work and concentrate on the correctness of work done.
2. When the student does a task well, let him be responsible for helping others with it.
3. Teach the same subject, but also present it through concrete experiences and visual media.
4. Teach tasks as much as possible through functional activities such as shopping, making change, reading the newspaper, playing games, etc.
5. Reduce distractions by: having only one task at a time, using worksheets with

Southwest Florida School-To-Careers Consortium
Comprehensive Student Development Curriculum
Middle School
lots of space, providing a quiet work area, giving simple directions or questions.

5. When homework is given, it is best to give work the student can already do with which he needs more reinforcement.

6. Pair up the mainstreamed student with another student that has leadership, compassion, and patience capabilities.

8. Move the student to a closer position for teacher supervision.

9. Move distracting or disturbing students/materials.

10. Allow the student to use any necessary crutch to learn; it will be discarded when no longer needed.

11. Individualize instruction where needed.

12. Set fair and clearly defined limits for classroom behavior and academic expectations. Follow through with consistency.

13. Make a definite effort to see that each student has some sort of success each day.

14. Allow for open communication between yourself and the ESE student.

15. Actively control variables which make learning occur, such as directing attention, arranging tasks, prompting responses, differentially reinforcing behavior.

16. Be flexible with output; have students write, talk aloud.

17. Provide directions which are simple, specific, and consider the clarity, speed, complexity, and channel of delivery: check for comprehension: have student repeat and/or paraphrase.

18. Encourage homework as promoting academic progress, not as a punishment for poor achievement.

19. Use a variety of assessment techniques: written, oral, demonstration.

20. Be flexible and ready for change!

Middle School
The following information was adapted from briefing papers and fact sheets available on http://www.nichcy.org/disabinf.htm. This web site provides a wealth of information concerning different disabling conditions, their characteristics and incidence as well as educational implications and a wonderful list of resources in each category. You are strongly encouraged to visit this site for more information about these and other important topics.

Attention-Deficit/Hyperactivity Disorder (AD/HD) is a neurobiological disorder. Typically children with AD/HD have developmentally inappropriate behavior, including poor attention skills, impulsivity, and hyperactivity. These characteristics arise in early childhood, typically before age 7, are chronic, and last at least 6 months. Children with AD/HD may also experience problems in the areas of social skills and self esteem.

Many children with AD/HD experience great difficulty in school, where attention and impulse and motor control is virtual requirements for success. Children with AD/HD tend to overreact to changes in their environment. Whether at home or in school, children with AD/HD respond best in a structured, predictable environment. Here, rules and expectations are clear and consistent, and consequences are set forth ahead of time and delivered immediately. By establishing structure and routines, parents and teachers can cultivate an environment that encourages the child to control his or her behavior and succeed at learning.

Adaptations which might be helpful (but will not cure AD/HD) include:
-- posting daily schedules and assignments
-- calling attention to schedule changes
-- setting specific times for specific tasks
-- designing a quiet work space for use upon request
-- providing regularly scheduled and frequent breaks
-- using computerized learning activities
-- teaching organization and study skills
-- supplementing verbal instructions with visual instructions
-- modifying test delivery.

Autism and Pervasive Developmental Disorder NOS (not otherwise specified) are developmental disabilities that share many of the same characteristics. Usually evident by age three, autism and PDD-NOS are neurological disorders that affect a child's ability to communicate, understand language, play, and relate to others.

Early diagnosis and appropriate educational programs are very important to children with autism or PDD. Educational programs for students with autism or PDD focus on improving communication, social, academic, behavioral, and daily living skills. Behavior and communication problems that interfere with learning sometimes require the assistance of a knowledgeable professional in the autism field who...
develops and helps to implement a plan which can be carried out at home and school.

The classroom environment should be structured so that the program is consistent and predictable. Students with autism or PDD learn better and are less confused when information is presented visually as well as verbally. To overcome frequent problems in generalizing skills learned at school, it is very important to develop programs with parents, so that learning activities, experiences, and approaches can be carried over into the home and community. With educational programs designed to meet a student's individual needs and specialized adult support services in employment and living arrangements, children and adults with autism or PDD can live and work in the community.

Cerebral palsy is a condition caused by damage to the brain, usually occurring before, during or shortly following birth. "Cerebral" refers to the brain and "palsy" to a disorder of movement or posture. It is neither progressive nor communicable. It is also not "curable" in the accepted sense, although education, therapy and applied technology can help persons with cerebral palsy lead productive lives. It is not a disease and should never be referred to as such. It can range from mild to severe.

Early identification of cerebral palsy can lessen developmental problems and lead to appropriate intervention when it helps the most. Activities for children with cerebral palsy may include:

- speech and language therapy;
- occupational therapy;
- physical therapy;
- medical intervention;
- family support services;
- early education; and
- assistive technology.

As a child gets older and begins formal schooling, the intensity of services will vary from individual to individual. Persons with cerebral palsy are usually able to attain a substantial degree of independence but, in some cases, may need considerable assistance. People extensively affected by cerebral palsy can still be highly functional and independent. The HEATH Resource Center, the clearinghouse on postsecondary education for individuals with disabilities, states that a significant number of students with cerebral palsy are enrolled in colleges and universities. Advanced technology, including computers and engineering devices, has been applied to the needs of persons with cerebral palsy. Technological innovations have been developed in the areas of speech and communication, self-care, and adapting living arrangements and work sites.

Southwest Florida School-To-Careers Consortium
Comprehensive Student Development Curriculum
Middle School
Another important development has been the increased ability of persons with disabilities, including those who have cerebral palsy and other severe disabilities, to live independently in the community. Adults with cerebral palsy are now living, with or without assistance, in their own apartments or townhouses. Independent Living Centers have also proven to be important resources for persons with disabilities.

Hearing impairment is defined by IDEA as "an impairment in hearing, whether permanent or fluctuating, that adversely affects a child's educational performance."

Deafness is defined as "a hearing impairment that is so severe that the child is impaired in processing linguistic information through hearing, with or without amplification."

Thus, deafness may be viewed as a condition that prevents an individual from receiving sound in all or most of its forms. In contrast, a child with a hearing loss can generally respond to auditory stimuli, including speech.

Hearing loss or deafness does not affect a person's intellectual capacity or ability to learn. However, children who are either hard of hearing or deaf generally require some form of special education services in order to receive an adequate education.

Children who are hard of hearing will find it much more difficult than children who have normal hearing to learn vocabulary, grammar, word order, idiomatic expressions, and other aspects of verbal communication. Since the great majority of deaf children (over 90%) are born to hearing parents, programs should provide instruction for parents on implications of deafness within the family.

Down syndrome is the most common and readily identifiable chromosomal condition associated with mental retardation. It is caused by a chromosomal abnormality: for some unexplained reason, an accident in cell development results in 47 instead of the usual 46 chromosomes.

Shortly after a diagnosis of Down syndrome is confirmed, parents should be encouraged to enroll their child in an infant development/early intervention program. These programs offer parents special instruction in teaching their child language, cognitive, self-help, and social skills, and specific exercises for gross and fine motor development. Research has shown that stimulation during early developmental stages improves the child's chances of developing to his or her fullest potential. Continuing education, positive public attitudes, and a stimulating home environment have also been found to promote the child's overall development.

Just as in the normal population, there is a wide variation in mental abilities, behavior, and developmental progress in individuals with Down syndrome. Their
level of retardation may range from mild to severe, with the majority functioning in the mild to moderate range. Due to these individual differences, it is impossible to predict future achievements of children with Down syndrome. Because of the range of ability in children with Down syndrome it is important for families and all members of the school's education team to place few limitations on potential capabilities. It may be effective to emphasize concrete concepts rather than abstract ideas. Teaching tasks in a step-by-step manner with frequent reinforcement and consistent feedback has been proven successful. Improved public acceptance of persons with disabilities along with increased opportunities for adults with disabilities to live and work independently in the community, have expanded goals for individuals with Down syndrome. Independent Living Centers, group shared and supervised apartments and support services in the community have proven to be important resources for persons with disabilities.

Many terms are used to describe emotional, behavioral or mental disorders. Currently, students with such disorders are categorized as having a serious emotional disturbance, which is defined under the Individuals with Disabilities Education Act as follows:

"...a condition exhibiting one or more of the following characteristics over a long period of time and to a marked degree that adversely affects educational performance--

(A) An inability to learn that cannot be explained by intellectual, sensory, or health factors;
(B) An inability to build or maintain satisfactory interpersonal relationships with peers and teachers;
(C) Inappropriate types of behavior or feelings under normal circumstances;
(D) A general pervasive mood of unhappiness or depression; or
(E) A tendency to develop physical symptoms or fears associated with personal or school problems." (Code of Federal Regulations, Title 34, Section 300.7(b)(9))

The educational programs for students with a serious emotional disturbance need to include attention to mastering academics, developing social skills, and increasing self-awareness, self-esteem, and self-control. Career education (both academic and vocational programs) is also a major part of secondary education and should be a part of every adolescent's transition plan in his or her Individualized Education Program (IEP).

Behavior modification is one of the most widely used approaches to helping children with a serious emotional disturbance. However, there are many other techniques that are also successful and may be used in combination with behavior modification. Life Space Intervention and Conflict Resolution are two such techniques.
The regulations for Public Law (P.L.) 101-476, the Individuals with Disabilities Education Act (IDEA), define a learning disability as a "disorder in one or more of the basic psychological processes involved in understanding or in using spoken or written language, which may manifest itself in an imperfect ability to listen, think, speak, read, write, spell or to do mathematical calculations."

Parents and teachers need to concentrate on the individual child. They need to observe both how and how well the child performs, to assess strengths and weaknesses, and develop ways to help each child learn. It is important to remember that there is a high degree of interrelationship and overlapping among the areas of learning. Therefore, children with learning disabilities may exhibit a combination of characteristics.

Because learning disabilities are manifested in a variety of behavior patterns, the Individual Education Program (IEP) must be designed carefully. A team approach is important for educating the child with a learning disability, beginning with the assessment process and continuing through the development of the IEP. Close collaboration among special class teachers, parents, resource room teachers, regular class teachers, and others will facilitate the overall development of a child with learning disabilities.

Some teachers report that the following strategies have been effective with some students who have learning disabilities:
-- Capitalize on the student's strengths;
-- Provide high structure and clear expectations;
-- Use short sentences and a simple vocabulary;
-- Provide opportunities for success in a supportive atmosphere to help build self-esteem;
-- Allow flexibility in classroom procedures (e.g., allowing the use of tape recorders for note-taking and test-taking when students have trouble with written language);
-- Make use of self-correcting materials, which provide immediate feedback without embarrassment;
-- Use computers for drill and practice and teaching word processing;
-- Provide positive reinforcement of appropriate social skills at school and home; and
-- Recognize that students with learning disabilities can greatly benefit from the gift of time to grow and mature.

People with mental retardation are those who develop at a below average rate and experience difficulty in learning and social adjustment. The regulations for the Individuals with Disabilities Education Act (IDEA) provide the following technical definition for mental retardation:

"Mental retardation means significantly subaverage general intellectual functioning existing concurrently with deficits in adaptive behavior and..."
manifested during the developmental period, that adversely affects a child's educational performance."

"General intellectual functioning" is typically measured by an intelligence test. Persons with mental retardation usually score 70 or below on such tests. "Adaptive behavior" refers to a person's adjustment to everyday life. Difficulties may occur in learning, communication, social, academic, vocational, and independent living skills. They do learn, but slowly, and with difficulty.

Persons with mental retardation have the capacity to learn, to develop, and to grow. The great majority of these citizens can become productive and full participants in society. As with all education, modifying instruction to meet individual needs is the starting point for successful learning. Throughout their child's education, parents should be an integral part of the planning and teaching team.

In teaching persons with mental retardation, it is important to:

- Use concrete materials that are interesting, age-appropriate, and relevant to the students;
- Present information and instructions in small, sequential steps and review each step frequently;
- Provide prompt and consistent feedback;
- Teach these children, whenever possible, in the same school they would attend if they did not have mental retardation;
- Teach tasks or skills that students will use frequently in such a way that students can apply the tasks or skills in settings outside of school; and
- Remember that tasks that many people learn without instruction may need to be structured, or broken down into small steps or segments, with each step being carefully taught.

Children and adults with mental retardation need the same basic services that all people need for normal development. These include education, vocational preparation, health services, recreational opportunities, and many more. In addition, many persons with mental retardation need specialized services for special needs.

People with severe disabilities are those who traditionally have been labeled as having severe to profound mental retardation. These people require ongoing, extensive support in more than one major life activity in order to participate in integrated community settings and enjoy the quality of life available to people with fewer or no disabilities. They frequently have
additional disabilities, including movement difficulties, sensory losses, and behavior problems.

Early intervention programs, preschool and educational programs with the appropriate support services are important to children with severe disabilities. In order to effectively address the considerable needs of individuals with severe and/or multiple disabilities, educational programs need to incorporate a variety of components, including language development, social skill development, functional skill development (i.e., self-help skills), and vocational skill development.

Classroom arrangements must take into consideration students' needs for medications, special diets, or special equipment. Adaptive aids and equipment enable students to increase their range of functioning. The use of computers, augmentative/alternative communication systems, communication boards, head sticks, and adaptive switches are some of the technological advances that enable students with severe disabilities to participate more fully in integrated settings.

Community-based instruction is also an important characteristic of educational programming, particularly as students grow older and where increasing time is spent in the community. School to work transition planning and working toward job placement in integrated, competitive settings are important to a student's success and the long-range quality of his or her life. In light of the current Vocational Rehabilitation Act and the practice of supported employment, schools are now using school-to-work transition planning and working toward job placement in integrated, competitive settings rather than sheltered employment and day activity centers.

Speech and language disorders refer to problems in communication and related areas such as oral motor function. These delays and disorders range from simple sound substitutions to the inability to understand or use language or use the oral-motor mechanism for functional speech and feeding.

The speech-language pathologist may assist vocational teachers and counselors in establishing communication goals related to the work experiences of students and suggest strategies that are effective for the important transition from school to employment and adult life. Communication has many components. All serve to increase the way people learn about the world.
around them, utilize knowledge and skills, and interact with colleagues, family and friends.

Traumatic Brain Injury (TBI) is defined within the IDEA as an acquired injury to the brain caused by an external physical force, resulting in total or partial functional disability or psychosocial impairment, or both, that adversely affects a child's educational performance.

Despite its high incidence, many medical and education professionals are unaware of the consequences of childhood head injury. Students with TBI are too often inappropriately classified as having learning disabilities, emotional disturbance, or mental retardation. As a result, the needed educational and related services may not be provided within the special education program. The designation of TBI as a separate category of disability signals that schools should provide children and youth with access to and funding for neuropsychological, speech and language, educational, and other evaluations necessary to provide the information needed for the development of an appropriate individualized educational program (IEP).

Careful planning for school re-entry (including establishing linkages between the trauma center/rehabilitation hospital and the special education team at the school) is extremely important in meeting the needs of the child. It will be important to determine whether the child needs to relearn material previously known. Supervision may be needed (i.e. between the classroom and restroom) as the child may have difficulty with orientation. Teachers should also be aware that, because the child's short-term memory may be impaired, what appears to have been learned may be forgotten later in the day. To work constructively with students with TBI, educators may need to:

-- Provide repetition and consistency;
-- Demonstrate new tasks, state instructions, and provide examples to illustrate ideas and concepts;
-- Avoid figurative language;
-- Reinforce lengthening periods of attention to appropriate tasks;
-- Probe skill acquisition frequently and provide repeated practice;
-- Teach compensatory strategies for increasing memory;
-- Be prepared for students' reduced stamina and increased fatigue and provide rest breaks as needed; and
-- Keep the environment as distraction-free as possible.

Southwest Florida School-To-Careers Consortium
Comprehensive Student Development Curriculum
Middle School
Initially, it may be important for teachers to gauge whether the child can follow one-step instructions well before challenging the child with a sequence of two or more directions. Often attention is focused on the child's disabilities after the injury, which reduces self-esteem; therefore, it is important to build opportunities for success and to maximize the child's strengths.

**Middle School**

The Student Development Curriculum matrix identifies activities supporting the four domains: Academic Achievement, Career Development, Social/Personal Development and Community Involvement. ESE students are expected to successfully develop their individual abilities in all four domains. Since students often have several classes in middle school and may have several teachers and counselors who infuse student development activities, all must be aware of individual student needs, accommodations, and adaptations necessary.

In middle school, academic achievement skills are refined and continue to develop to meet the challenges of a new school organization and structure. Career awareness continues to career and self-exploration. Social/Personal development includes skills to manage increasingly complex relationships. Community involvement expands beyond the school.

Specific accommodations may be required to help students who engage in career inventories, self-awareness activities, computerized career exploration activities, or competency testing. Counselors and teachers may seek parallel forms of tests or instruments based on lower reading levels or which break tasks into smaller groups to accommodate the needs of students who have trouble maintaining focus for long periods of time.
Suggested Modifications for Activities In Middle School Appendices

M1 Appropriate to deliver verbally and discuss for low and nonreaders. Also consider abbreviated version.

M2,5 Specific examples need to be tailored to population.

M3,16 Lower levels might need to work closely under teacher guidance.
34,38,50 Role play.

M4 Might not be appropriate for nonreaders or lower functioning students, however, could be simplified and administered verbally.

M6 First Activity: Though some students may need teacher prompting, this activity should be able to be delivered in written form.
Communication Skills: Checklist needs to be simplified and/or presented verbally.

M7,9 May need to do verbally and/or simplify. May need to rewrite, shorten, reword or customize.

M8 Listening Skills: Might be too awkward or complex to accomplish with lower functioning students. Listening Quiz: For lower students, present as a class discussion. Brainstorm “What is a good listener?” Make a list of characteristics.

M10 May need to limit or eliminate written portion.

M11 May be done as a class activity. May need to rewrite, shorten or customize.

M12, 18 May need to administer verbally or consider Reading Free Interest Inventory replacements.

M13 May need to simplify and do verbally. Need to be tailored to Middle School. Pictures from magazines could replace written goals.

M14 This activity might be abbreviated and/or done verbally.

Southwest Florida School-To-Careers Consortium
Comprehensive Student Development Curriculum
Middle School
M20 Identifying Your Leisure Time: Simplification with larger time slots. Other activities could be done verbally in a simplified format.

M21 Reading level may affect delivery.

M23 Could work as a whole class project with specific clusters assigned to individuals or small groups.

M25 Scoring might be facilitated in group or as class project.

M26 Teacher may provide simplified research materials. Concepts could be presented verbally.

M27, 35 Could be teacher guided all class or small group activity.

M28 Try minimizing or eliminating writing.

M29 May need to modify, simplify, or perhaps do orally.

M30 Would lend itself to small group or all class discussion with role playing. Teacher may need to deliver verbally.

M31 Poster sized shield would support all class or small group activity, utilizing pictures from magazines. Teacher could present each section separately.

M33 Teacher may need to put undefined examples of faces on board.

M36 Magazine cut outs could replace writing. Could be done as an all-class activity.

M37 May need to introduce separately enhancing each concept.

M39 Pages of My Life: Close teacher guidance and simplification might be required. I Have a Dream: This activity could be accomplished with drawing or magazine cut outs.

M41 Stand Up and Speak Out: This concept could be presented verbally and reinforced with role playing and repetition. See Yourself: May need to present as an all class activity with discussion.
M42 Keeping in Balance: Lower level readers could succeed with all class activities and/or utilizing magazine cut outs and pictures. Do It Today: Could be written with “key” words. May need to be completed with direct teacher guidance. Prioritizing Activities: May need to simplify.

M44,45 Speakers and videos should be selected with given ESE populations interest and readiness levels taken into consideration.

M47 This activity works as an excellent bridge linking school with the community, leading toward regularly scheduled community experience. Some special needs students will need a higher ratio of adult supervision.

M48 Mentor Section. This might work well with higher functioning special needs students.

M49 Significant adjustments or elimination all together of this section might best serve the nonreading student. This also might work as a remediation program encouraging overall reading improvement.

</table>
Why Assessment in Student Development?

Curriculum assessment gets to the heart of the matter in education today; can counselors or any educators demonstrate their worth to the education process and to meeting standards? Accountability is critical as districts and buildings are increasingly free to select staffing patterns that best meet student learning needs. Those who cannot demonstrate their effectiveness in terms of student learning and outcomes will be increasingly vulnerable. Assessment is required of any continuous quality improvement process. If our goal is truly student development, we have to be ready to examine our methods and assumptions in helping students achieve their goals.

Current trends in education see a movement toward increased accountability for curriculum delivery and effectiveness. In student development curriculum areas, such assessment is not often as simple as standardized testing nor are skills as discrete as those are in English or math. However, accountability to curriculum goals for student development requires that some assessment practices be incorporated into any curriculum adoption. This guide presents ideas for assessment of the Comprehensive Student Curriculum developed for the Southwest Florida School-To-Careers Consortium.

This assessment effort is breaking new ground. Most information about student development concerns inputs and counselor/teacher time accountability when it is gathered at all. This shifts the focus to student learning and the effectiveness of programs on student decisions and attainment. As a new process, it must be continually revisited, revised and time/benefits in assessment activities must be evaluated.

Purposes of Assessment

Assessment serves several general purposes that can be broadly defined under decision making, communication, and accountability.

Decision making. Assessment information can be used to help students make individual decisions about career paths, and course planning as well as helping students identify skills, knowledge or attitudes that they still need to learn. Individual students and their families benefit from such assessment as specific skills are identified as having been acquired or which need further exposure and development. Teachers and counselors can identify students’ needs for curriculum planning. They can also use information to improve
instruction and curriculum activities. Schools or districts can use assessment information to continue or improve instruction, programs, and curriculum as well as to contribute to the school improvement process as a whole. District administrators can use such information in curriculum planning, training, district improvement goals and in setting priorities for meeting student needs. Increasingly, staffing decisions may be made based on assessment data.

**Communication** Assessment information is already used to communicate progress toward educational goals to students, parents, community members, and administrators. As well, assessment information is often used to communicate special strengths or successful features of programs, curriculum activities, or schools. For student development purposes, assessment may also communicate areas of student achievement that have previously been ill-defined and may advocate for the importance of such student achievement goals in the overall curriculum and educational program.

**Accountability** Assessment information is at the heart of school, district and program accountability; an increasingly critical factor in all aspects of education’s operations. Without assessment, many believe that there is little accountability. Little accountability makes staff and their programs vulnerable to criticism, lack of understanding, or reductions in support.

**Assessment Approaches**

Several approaches to assessment are possible. When considering assessment methods, it is important to recognize that assessment based on all self-report data may not provide an entirely accurate picture of what a student really has experienced or learned. The same may be true of assessment based entirely on a list of inputs. Consider a mixture of data sources and types of assessment to get the most accurate picture of what individual students and programs have accomplished.

First, inputs can be assessed. Did curriculum units get delivered? Teachers and/or counselors can be asked to list activities, materials, and annual schedules for student development curriculum delivery. Examples of such activities can be obtained by reviewing the Florida’s Comprehensive Student Development Curriculum for a School-To Career System (1994).

A second approach involves assessing student learning of each discrete activity. For example, when middle school students are engaged in the

Southwest Florida School-To-Careers Consortium
Comprehensive Student Development Curriculum
Middle School

108
work-based learning activity of touring a hospital to learn about different occupations that occur there, they can be asked to list three occupations they observed and list the educational qualifications each requires, or each can be asked to write an essay to relate a work of fiction about medicine to match observations at the hospital. Another example might be, students demonstrating specific career skills as part of the activity itself, e.g., completing a four-year plan. While such assessment may be readily adapted to school-to-career curriculum, and are certainly recommended as much as possible, such activities may become burdensome to a school day already burgeoning with increased curricular requirements and testing.

A third approach is to assess broader student development accomplishments. This type of assessment is by nature more synthetic of a broader range of skills and competencies and would occur after longer periods of instruction and experiences; i.e., after a year or at transition points between school levels or between school and work. This approach is more portfolio or performance based and creates an accountability at the “seams” of a student’s school progression. As well, since school-to-career curriculum activities are often infused into other curriculum areas, separate assessment may be neither appropriate nor convenient. It adds less burden to teachers and counselors and can be used to communicate to the next consumer of a student’s skills (teacher, counselor, employer) that the student has achieved a specified level of competence in identified school-to-career objectives.

Another approach to assessment can be overall program assessment. Such assessment may be included in school climate surveys of students, school personnel, administrators, and community members. Or specific surveys to evaluate skill acquisition, career awareness and development, and the degree to which classroom and community based activities, can be developed and administered. Questions should focus on a variety of areas including:

- Career awareness, career decision making skill acquisition, and career maturity;
- Personal/Social development goals including those for working with others, self-management skills, and communication skills;
- Involvement of family in academic and career planning and parental knowledge of the student’s progress and school-based activities;
- Infusion of academic, career and personal/social development in all aspects of educational program;

Southwest Florida School-To-Careers Consortium
Comprehensive Student Development Curriculum
Middle School
Degree to which school-based, linking/connecting or work-based activities have been observed or are considered successful.

Gathering and Maintaining Assessment Information

The information collected by methods suggested in this guide may be used in several ways. Some tracking and inclusion in student records is recommended. Each segment may be used separately by each level and may be tracked through student maintained portfolio on a student developed folder or may be maintained by student services professionals on a paper or electronic portfolio. Each method has benefits and drawbacks. Student maintained portfolios are most effective in terms of staff time and student responsibility. However, they are often incomplete, can be easily lost and are not readily available for accountability surveys or program assessment. Such portfolios are commercially available, though costly as consumable goods. Paper portfolios have advantages in that they are available to school staff for program evaluation, provide artifactual evidence of student progress and program effectiveness, and allow individual student progress and learning needs to be tracked and monitored. However, these can be expensive to maintain and may add to already crowded school files.

Electronic tracking has several advantages in its capability to provide individual, small group or district aggregate data readily. As well, sophisticated analyses can be performed with other electronically maintained data like test scores and grades that create a potential wealth of program and accountability data. It would also readily lend itself to a student development transcript available for post-secondary institutions and employers alike. However, only one electronic portfolio system is available and it is an expensive investment which requires some personnel or trained students to input data to maintain. A one-time commitment of resources to create such a portfolio might be worth the investment by a district or consortium of districts which has immediate interface with other student record systems as a distinct advantage. Ultimately, skill acquisition and work experience history benefits students as they progress through school. As technology continues to improve, more electronic tracking mechanisms will become available and are ultimately considered to be most desirable. One commercially available product, InfoTracker (available from TechLan, Inc.) can provide an individualized student portfolio of all student development accomplishments and activities, especially those related to school-to-career activities and elements, in an electronic format.

Southwest Florida School-To-Careers Consortium
Comprehensive Student Development Curriculum
Middle School
Two commercially available products are available for K-12 or 6-12 assessment. The first, the Career Maturity Inventory can be used to assess student progress and career development needs at key points in development - transition between levels. The CMI provides information concerning attitudes and competencies in career decision making skills. Iowa Career Learning Assessment provides information concerning career development, school-based learning, work-based learning and connecting links. The survey combines information from students, educators, parents and community partners and is geared toward student competencies and career maturity as well as degree to which school-to-career type of activities have occurred. Both instruments provide individual and group data useful to program assessment. In particular, schools that have career development courses in ninth grade can use the instrument to measure aspects of the effectiveness of the course and related experiences. However, each has initial and recurring costs and individual schools or districts may well wish to customize aspects of these evaluation programs or develop individual evaluations.

The following guide will present examples of assessment activities that can be performed at transition points or in a few cases, a year end. At each transition point several types of activities will be recommended and fully described.

Each section of this guide is presented in terms of the overall goals for students completing that level of education, specific competencies expected by transition and assessment strategies and formats which can be used.

Southwest Florida School-To-Careers Consortium
Comprehensive Student Development Curriculum
Middle School
MIDDLE SCHOOL

The middle school experience is one where students engage in exploration of careers, continued skill acquisition and increased social awareness and competence.

When students enter middle school they are expected to demonstrate the following competencies

When students enter from Elementary school they should be able to demonstrate:

- Appropriate grade level reading, mathematics and writing skills
- Interpersonal skills including working with others and conflict resolution/mediation skills
- Decision making and goal setting skills
- Career awareness: knowledge of the world or work, how jobs interact, examples of range of work from local environment and why work is important
- Ability to work cooperatively in groups
- Awareness of good physical and mental health practices
- Basic keyboarding and other computer literacy skills
- An understanding of the importance of standardized testing

To significant elementary school knowledge, skills, and awareness the middle school curriculum adds a different experience in each grade.

During 6th Grade the following are covered:

- Assess entering career, decision making, conflict resolution skill level
- Orient students to middle school rules, conduct, class scheduling, attendance and other policies
- Conduct diversity awareness activities including cultural, varying teacher styles and expectations, learning styles
- Begin career awareness activities: self-assessment of interests, aptitudes and goals e.g., Career Cruiser.
- Begin middle school portfolio with self-assessment information from above activities.
- Continue computer literacy skill development
- Orient to school rules, homework and attendance accountability
- Orient to employability skills, e.g. attendance, timeliness of assignments
- Continue planning and goal setting behaviors, ie. using a

Southwest Florida School-To-Careers Consortium
Comprehensive Student Development Curriculum
Middle School
planner for time management.

- Continue development of decision making and problem solving skills; with focus on consequences of decision making
- Master appropriate academic skills

During 7th Grade the following are covered:
- Introduce concept of the four-year plan
- Introduce local job market, career cluster information
- Continue computer literacy skill development
- Introduce resume writing;
- Continue middle school portfolio development
- Orient to school rules with a focus on homework and attendance accountability
- Orient to employability skills
- Continue planning and goal setting skills development
- Continue development of decision making and problem solving skills; with focus on consequences of decision making
- Master appropriate academic skills

During 8th Grade the following are covered:
- Complete 4 years of 6-year plan of study
- Orientation to high school and graduation requirements,
- Make students aware of scholarship and financial aid opportunities
- Continue computer literacy development
- Orient to school rules
- Orient to employability skills,
- Continue planning and goal setting skills development
- Continue development of decision making and problem solving skills
- Master appropriate academic skills

When students leave middle school and enter high school they should be able to demonstrate or have the following:
- Completed 4 years of 6 year Plan
- Aware of Florida academic and vocational/technical scholarship opportunities
- Aware of high school graduation requirements
- Career knowledge of local job market and career clusters, portfolio development and resume writing
- Assessment results from preliminary formal assessment instrument (CHOICES Jr., or some other similar program as designated by the Southwest Florida School-To-Careers Consortium

Comprehensive Student Development Curriculum
Middle School
school district).

- Appropriate computer literacy skills
- Knowledge of high school rules concerning homework, attendance accountability, behavior, credit accrual and denial policies
- Knowledge of employability skills e.g., attendance, timeliness of assignments.
- Appropriate planning and goal setting skills
- Appropriate decision making and problem solving skills
- Mastery of appropriate middle school academic skills
- Appropriate interpersonal skills
Assessment Activity Examples

Evaluation of Middle School competencies can be done in several different ways or in a combination of several different ways depending on which is best suited for your school. They include a checklist, a portfolio, or a menu of activities. All students complete a six year plan.

- The first option is to have the following checklist filled out by the guidance counselor and the student. This would hopefully be done annually at mid-year so that any areas of weakness could be addressed before the end of the school year.

- The second option is to create portfolios that would include key information about students and their work towards mastering the competencies.

- The third option is to have a menu of grade 6, 7 and 8 activities. School staff and/or students check off activities that students have successfully completed.

Evaluation would be optimally done on all students, however, realistically counselors may need to randomly pick 50 - 100 students with whom to complete the evaluation process. This would give an appropriate sampling of the degree of mastery students demonstrate.
**Evaluation Checklist**

Please complete the following checklist by marking Yes, No or Not Applicable.

<table>
<thead>
<tr>

Southwest Florida School-To-Careers Consortium
Comprehensive Student Development Curriculum
Middle School
Student can explain the connection between attendance/timeliness of assignments and employability skills
STUDENT EVALUATION PORTFOLIO

The contents of the portfolio would include, but not be limited to the following:

- Formal interest inventory or computerized career exploration program results.
- Completed four year of six year plan (if required by your district)
- Sample resume
- Sample job application
- Course outline covering computer skills
- Copy of three weeks out of the student planner
- Written information covering the high school requirements and rules
- Transcript of grades
- Short paragraph on why attendance and timeliness of assignments are important to future employment. (Normally completed in a Language Arts class.)
- Short essay giving an example of decision making/problem solving including the identification of probable consequences. (Normally completed in a Language Arts class.)
- List of at least three Florida scholarship opportunities
- List of community service or volunteer experiences.
- List of work or work-related experiences.

The guidance counselor or the student can maintain these portfolios. Pieces can be added to the portfolio whenever completed. Trained community partners could be used to make sure the portfolios are complete at the end of 8th grade. Guidance secretaries, data entry or counselors could be responsible for producing and filing transcripts.
Resources for Comprehensive Student Development and School-To-Career Curriculum

There are many resources for classroom, school and community based activities which will work well to achieve the learning objectives contained throughout this comprehensive student development curriculum. The activities contained in the appendices of this curriculum guide are intended only as examples of what can be done with students. Other resources for information and activities are listed below.

Middle School
**Character-Building Word for September**

**RESPONSIBILITY**

Accountability for your choices, obligations, and duties

---

**WEEK 1**

Today's preparation determines tomorrow's achievement.

--- Anonymous

Each is responsible for his own actions.

--- H.L. Hunt

Winners make goals; losers make excuses.

--- Anonymous

I discovered I always had a choice and sometimes it's only a choice of attitude.

--- J. M. Knowlton

Well done is better than well said.

--- Ben Franklin

---

**WEEK 2**

The buck stops here.

--- Harry Truman

It's the little things in life that determine the big things.

--- Anonymous

Winners never quit and quitters never win.

--- Anonymous

I never did anything worth doing by accident, nor did any of my inventions come by accident, they came by hard work.

--- Thomas Edison

Strive for excellence, not perfection.

--- Anonymous

---

**WEEK 3**

Responsibility is accepting the positive and negative consequences of our actions.

--- M. Popkin

If you don't have time to do it right, when will you have time to do it over?

--- Anonymous

Every job is a self-portrait of the person who did it.

--- Claude Bristol

The ability to accept responsibility is the measure of the man.

--- Roy L. Smith

By failing to prepare, you are preparing to fail.

--- Ben Franklin

---

**WEEK 4**

Stop blaming others. Take responsibility for every area of your life.

--- Anonymous

He who is good at making excuses is usually little good for anything else.

--- Ben Franklin

It's not over till it's over.

--- Yogi Berra

We are judged by what we finish, not by what we start.

--- Anonymous

Winners are people who do jobs uncommonly well even though they don't feel like doing them at all.

--- Anonymous

---

**RELATED WORDS**

Accountable Reliable
Dependable Answerable
Trustworthy Duty
Independence Making Choices
Self-reliance

**RESPONSIBILITY TO:**

Self Community School
Family Country Planet
Learning

---

**PRACTICAL APPLICATIONS**

Returning what you have borrowed in the same condition.

Taking responsibility for learning,

Getting help when you don't understand something

Developing strategies that can help you learn

Completing homework

Taking the responsibility to be prepared

Being helpful before you are asked

Taking care of your possessions

Being accountable to friends and family, not making excuses

Accepting the consequences of one's choices and actions

Understanding how responsibilities change as we get older

Discuss what the students are responsible for this school year as well as other employees at the school. Is it important for everyone to carry out their responsibilities?

---
Activities

C= Community Activities  S= School Activities  F= Family Activities

C S F Read and/or discuss a daily quote, on the morning news, in the newspaper, at dinner.

C S F Have students complete the "Character Cartoon" and/or write their answers to Character ED on the E-mail.

C S F Make a "graffiti" wall, board, poster, with the title "Responsibility is...". Ask the students to add their thoughts. Sections can be added for the other months.

C S F Discuss the importance of following through with your responsibilities. What does it mean to do the absolute minimum or seeing something through because it is the responsible thing to do.

C S F Think about a time you relied on someone and were let down. Reflect on some aspect of this experience.

C S F Make classroom/home expectations clear and hold students accountable for their actions. Practice procedures that help the class run smoothly i.e. lining up, greeting visitors, changing activities, turning in homework, etc.

C S F Include anecdotes of responsible student behavior in the school newsletter to parents.

C S F Provide opportunities for volunteer service. Tie this into responsibility towards others and the community.

C S F Publicly recognize the work and achievements of "Unsung Heroes"... the custodians, repairmen, teachers, secretaries, cafeteria workers, and volunteers who demonstrate a strong commitment to their responsibilities.

C S F Character Honor Roll - Students observed by anyone in the school/workplace to have demonstrated Character can have photo displayed or other recognition.

C S F Encourage students to discuss taking responsibility for their own learning. Encourage students to develop meta-awareness of how they learn best and develop strategies for improvement. For example ask students to remember "Gershwin wrote An American in Paris" and "James Baldwin wrote For Want of a Horseshoe Nail". Discuss how they remembered these facts.

C S F Plant Parents- Plant a seed and nurture to mature growth. Tell students it is their responsibility to care for this living thing. Talk about how plants responded, in relationship to the time and care they received. Relate this to their other responsibilities in life.

C S F The Not Making Excuses Jar - Fill a jar with one bean for each minute of class time. Each time a student makes an excuse one bean is removed. Time that is not wasted listening to excuses can be free time at the end of the week/month. Previously removed beans can be replaced when students demonstrate responsibility.

C S F I Did My Homework - Students who consistently complete and turn in homework could be recognized.

C S F Encourage students to make a responsibility chart, listing responsibilities at school, home, and in the community.

C S F Pick a famous person who showed responsibility. Have a "Who am I?" contest. Add clues daily.

C S F Discuss how taking responsibility for ourselves involves accepting the consequences for our actions and choices. This means that the things we do affect what happens to us. Discuss how the "poor pitiful me" attitude blames others for our circumstances while giving us an excuse not to take responsibility.

C S F You Are What You Eat - Create activities, discussions targeted at making responsible food choices.

C F Involve students in the shared responsibility for the appearance and cleanliness of the school.
Points To Ponder

Math - What is a researchers' responsibility in reporting accurate statistics or research? Now that anyone can put information on the internet, how can we critically evaluate information? Save, Share, and Spend - Create discussion or activities aimed at responsible money budgeting.

Vocational Education - What are your career goals in relationship to your responsibilities to yourself, your current family and your future responsibilities? What makes a good employee? - Invite local employers to discuss CHARACTERistics of successful employees and what they look for when hiring. Character can be as important as know-how on the job.

Literature- What character traits did the characters in the story exhibit? What affect did they have on the character's lives. How would the story end if the character displayed different traits.

One day in 1946, Louis Slotkin, a noted physicist, was nudging pieces of plutonium toward one another trying to form a mass large enough to produce a chain reaction. Through his own error he moved two pieces too close together. A chain reaction began and alarms went off as the room filled with radioactivity. Without a moments hesitation, Slotkin reached in and pulled the pieces apart with his bare hands. In the blink of an eye he had made a critical decision that saved the lives of his seven co-workers while costing him his own.

Character Newsletter, April 1993

Parent Corner

In the final analysis, the great need in this world is not for more genius, or even for more skill. It is for people to be willing to accept the responsibility for what they do. "Ahh!" you might say. "Now we're getting down to it... it's my children's actions that I want them to be responsible for." Once our children are taught basic principles, they should then be taught that responsibility for their actions is truly theirs, not ours. We are simply there to help. Our challenge is to teach children how to cope with actions that are a problem, how to control their anger, and how to handle success and failure. Once they have these tools, we must let them take responsibility for solutions to problems regarding their actions. Our tendency is to demand our own solutions arbitrarily.

Condensed from Teaching Your Children Responsibility by Linda and Richard Eyre

Strategies for parents:

Make your expectations clear. Expect them to take responsibility. Remember that it is difficult for them to take responsibility if you do not give it to them. If they know that you will continue to remind them to do something, they are likely to leave this responsibility to you. They may wait until you either do it or you lose your temper. Either way you are holding onto the responsibility of seeing that it is done. Instead try stating your expectations clearly and providing an appropriate consequence after asking the first time.

Be on the lookout for opportunities to reinforce character in daily situations. Play the what would you do if ... game. Talk about situations they may encounter.

Make sure your behavior is what you want your child to emulate.

WOW

THE WORLD OF WORK

In the real world of work, being able to take responsibility is a key to success at every level. When prospective employers review a student's application they look for signs that the applicant will become a dependable employee. References might be asked questions concerning attendance, punctuality, attitude, and effort. (How would you rate yourself on a responsibility scale of 1-10? How would others rate you?)

Another aspect of responsibility in the world of work is the ability to be accountable for the things that go wrong as well as the things that go right. Everyone makes mistakes. It is part of being human. Being honest enough to take the blame for something you have done and then take the responsibility for making it right is a quality of character that often makes the difference between an employee who gets the promotions and one who does not. (When was the last time you said, "I really blew that! Don't worry, though, I'll take care of it.")

Taking responsibility on the job means doing what needs to be done. No employer wants to hear, "But you didn't tell me to do that." Some call it the ability to work independently or without supervision, while others call it initiative. Whatever it is called, it means being someone who can be relied upon, someone responsible. (When was the last time you did more than you "had" to do just because it was the right thing to do? How did it feel?)

Being responsible is more than a building block of character, it is also an essential employability skill. There are many other ways in which the ability to be responsible is important. How do you think of some other aspects of responsibility? What are you right now that will either help or hinder your chances of getting the job you want.
Early Childhood Activity

Rainbow Fish to the Rescue By Marcus Pfister 1995
Rainbow Fish organizes all the other fish to divert a shark's attention from a striped endangered fish. Together they save the other fish.

Activity: Discuss what it means to be a responsible person: to help someone or to take care of someone.

Read the book
Discuss how Rainbow Fish helped the other fish, How he was responsible?
Small group - Provide a variety of mediums: markers, colored pencils, crayons, and pastels and precut fish shapes. Invite the students to decorate the shapes using dots circles and stripes.

Character-Building Word for October

RESPECT

Showing regard for the value of persons or things through courteous consideration and appreciation

Don't hurt anyone or anything on the outside or inside.

WEEK 1

If you want to get the best out of a man, you must look for the best that is in him.

Bernard Haldane

Be a major difference in your own life.

Irene Kasoria

To handle yourself use your head, to handle others use your heart.

Anonymous

Life is more fun when you don’t keep score.

Anonymous

A friend is one who knows you as you are, understands where you have been, accepts who you have become, and still gently invites you to grow.

Anonymous

WEEK 2

Do unto others as you would have them do unto you.

Anonymous

Criticizing others is a dangerous thing, not so much because you make mistakes about them, but because you may be revealing the truth about yourself.

Judge Harold Medina

I never met a man I didn’t like.

Will Rogers

I don’t agree with what you say, but I will defend to the death your right to say it.

Anonymous

A good listener is not only popular everywhere, but after awhile he knows something.

Wilson Mizner

To get respect, you have to give respect.

Anonymous

A friend in need is a friend in deed.

Anonymous

WEEK 3

Live and let live.

Sir Roger L'Estrange

There is so much good in the worst of us, and so much bad in the best of us, that it hardly becomes any of us to talk about the rest of us.

Anonymous

A good listener is not only popular everywhere, but after awhile he knows something.

Wilson Mizner

In giving rights to others that belong to them, we give rights to ourselves.

John F. Kennedy

WEEK 4

Leave everything a little better than you found it.

Anonymous

People will not always believe what you say, but they will always believe what you do.

Anonymous

One has only to grow older to become more tolerant. I see no fault that I might not have committed myself.

Theodore Roosevelt

Man must go back to nature to find information.

Thomas Paine

The secret in education is respecting the pupil... Emerson

Rudeness is the weak person's imitation of strength... Eric Hoffer

PRACTICAL APPLICATIONS

- Respect others' right to say no
- Understanding the value of objects in terms of the time and energy used to replace them
- Treating others as you would like to be treated
- Accepting others without feeling obligated to embrace all of their ideas
- Believing in yourself, understanding your strengths
- Understanding the connection between respecting self and respecting others
- Respecting individual differences
- Consider how the different expressions of disrespect act as triggers to anger and violence
- Trusting your own judgement, without letting others intervene into something
- Respecting your body by keeping neat, clean, rested and healthy
- Participating in Red Ribbon Week activities
- Recognizing your individual self-worth and value in the community
Activities

C = Community Activities
S = School Activities
F = Family Activities

CSF RESPECT - write new words to Aretha Franklin's song.

CSF Have each student put his name on top of a piece of paper. Pass the papers around the room and have each student write what unique qualities contribute to his respect for that person.

CSF Establish a "no putdown" environment. Ask students for examples of putdowns and constructive criticism. Ask children to chart the number of putdowns found on popular TV shows. Compile a list of commonly used putdowns. Help students understand that putdowns are the result of strong feelings, help them develop skills in staying calm, such as counting, deep breathing, really listening, and trying to see the others perspective. Encourage students to explore their own strengths as a shield against putdowns. (Additional information available)

SF Respecting Me - have students create news releases about themselves. What would they say now? What would they say in 5 or 10 years?

CSF Taking care of you - Identify ways in which students show self-respect for their bodies and themselves. Tie this into Red Ribbon Week activities.

CSF Effective listening shows respect for the feelings and ideas of others. You can't listen effectively when you are thinking about the next thing you want to say. Ask students to practice responding to what others are saying without adding their own agenda. After intently listening, ask the listener to paraphrase what has been said. Discuss how this felt for both parties.

SF Keep a respect log. For 24 hours list every example you can find of people showing respect. As a class, list how many different ways there are to show respect.

CSF Have a Respect for Our Environment Day. Begin by having them clean up their own personal environment - their bookbags and desks; then have a clean-up of the school grounds. (Math tie-in: sort trash and graph results)

CSF List what habits and manners show respect, (please, thank you, excuse me, etc.). Challenge students to practice these manners for a given period of time. Discuss the results. (We assume all children know how to be polite and respectful; this is not always true. Sometimes these skills need to be taught, at any age.)

SF Have students Journal thoughts about what Character Education quotes and traits mean to them.

SF Give each student a potato to study. Then have them find their potatoes among others. Discuss how on the surface all potatoes look different, put under the surface they are all the same. Relate this to people and differences in culture, religion, race, etc.

CSF Invite law officers to speak, or take a trip to a courtroom or a jail. Discuss respect for the law and what would happen if everyone made his own rules.

CSF Discuss what it means to "agree to disagree". How does this help us show respect for others' opinions?

CSF Discuss the saying, "Treat others the way you would like to be treated". Have students list and discuss ways they are treated and would like to be treated.

CSF Pretend you are a new owner of a large company. Think about your family and friends. What qualities do you respect in them that could potentially benefit your business. There is a wonderful activity called the Web of Life that helps people understand their leadership style and appreciate the contributions of others. (Available upon request)
Subjects to Consider

Social Studies - The Bill of Rights, discuss how rights are related to respect and responsibility.

Languages - Respect for other cultures as well as our own. Include information about a country's culture in reports.

Science - Respect for the earth's resources. When Aristotle introduced science, it was so that humans could assume the role as caretakers and stewards of the natural world. Biology is based on the respect for life. The goal of science is not only to produce scientists, but also to prepare well-rounded, clear thinking, scientifically literate citizens who will respect the implications of their work.

Literature - Was there a character in the story who did not show respect for others? How did this affect relationships?

Music - We show respect for our country by standing for the "Star Spangled Banner." Compose a song about respect, i.e.,

- Respect each other every day,
- In what you do and what you say,
- Show each other that you care,
- When they need help you're always there.

Health - Discuss: "If I'd known I was going to live so long, I would have taken better care of myself."

Parent Corner

Extend Respect and Then Expect Respect

Everyone, including children, needs to feel like he has some control over his life. Parents often get into power struggles with kids for this very reason. When adults respect their ability to make good decisions by offering two positive alternatives, it can cut down on power struggles. For example:

"I hear too much noise in the house. You can either find a quieter game inside or play outside." Of course you may still have to follow through with a consequence, but you can bring home the idea that it was something the child chose, not something you are doing to him. You can also respect their feelings by saying "I'm sorry that you are disappointed that you can't go out to play right now. Maybe next time you will make a better choice."

Teaching good habits and politeness is a positive way of showing respect. They don't come naturally. Using the words "please" and "thank-you" are still very powerful. Somehow, being cool has become more important than being courteous. Whether we like to admit it or not, we do try to impress others. But many people don't recognize that the best way we can leave a good impression with others is to treat them the way we would like them to treat us, with respect and dignity. Manners are usually taught by following the example of others. If this has not been their experience, gentle directions and practice may be helpful. We can no longer assume that everyone has good manners.

If you think about it, you begin to notice that the people you most admire consist of those words that are pleasant and positive. It's a habit we can all benefit from. Respecting others leads to building good relationships; earning the respect of others; and receiving better treatment from other people. It helps build a solid reputation.
Early Childhood Activity

**Elmer by David Mckee, 1968**

Elmer is a patchwork elephant who enjoys having fun. He does not like being different. He colors himself with berry juice so that no one can recognize him. Rain comes and takes away the berry stain, and he is his old self again. The elephants decided that he has played a good trick and decided to once a year decorate themselves to look like Elmer and have a party.

**Activity:** Discuss elephants. Ask if anyone has ever seen a multicolored one. Discuss the qualities of being different.

**Read the book.**

Discuss the importance of being kind to each other.

**Small group** - Provide a variety of multicolored squares, glue, gray paint, brushes, and precut elephant shapes. Invite the children to decorate the elephants with the various materials.

**HISTORIC QUOTES**

I have a dream that my four little children will one day live in a nation where they will not be judged by the color of their skin but by the content of their character.

*Dr. Martin Luther King Jr., 1963*

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty, and the pursuit of Happiness.

*The Declaration of Independence, 1776*

Four score and seven years ago our fathers brought forth on this continent, a new nation, conceived in Liberty, and dedicated to the proposition that all men are created equal.

*Abraham Lincoln, 1863*

**PRACTICAL APPLICATIONS**

* Participating in school and community activities
* Accepting others without feeling obligated to embrace all of their ideas
* Contributing to a team or group effort
* Understanding an individual's rights and responsibilities
* Understanding that the choices we make affect other people as well
* Following the strength of our convictions in spite of what peers are doing
* Helping out around school, at home, and in the neighborhood
* Recycling and respecting the environment
* Respecting authority at school and in the community
* Developing a personal mission
* Voting
* Working
Activities

C = Community Activities  S = School Activities  F = Family Activities

CSF  Design, develop and implement a service-learning project. Ask students to brainstorm and research community needs; collectively choose a project and follow through with a service to the community. This activity can be very effective when combined with a journal, and is an opportunity to discuss how the students felt about the experience and what they learned.

CSF  Recognize the importance of individuals who have made a difference in history and the significance of personal character for both good and evil. Include this in a report to the class about an "American Hero."

CSF  Brainstorm what a "good citizen" looks like, in the classroom, community, and country or "What are you doing to be a good citizen?" Share the lists from small groups with larger group.

SF  Ask the students to design a game and write the rules for playing. Discuss why rules are important. How do they protect players and provide equal opportunities for all players? Does your game have consequences for poor choices or fouls that negatively affect other players? Ask students to explain how and why they decided on their rules. Relate this to developing our constitution.

CSF  Discuss what we are entitled to as citizens of the United States according to the Bill of Rights. Do all countries entitle the same rights to their citizens? What responsibilities go along with these rights?

SF  Provide incentives for students to use the word of the month in class discussions. For example, a student may define someone as a good citizen when discussing his/her reading assignment.

CSF  Ask students to interview family members or friends who have come to America from a foreign country. Learn about what citizenship means to them.

CSF  Ask students to make brochures describing why our community is a great place to visit or live.

CSF  Attend a government or public meeting. Write to public officials about an issue of concern.

CSF  Discuss why laws are important to follow. Does the law apply to everyone? How does it affect others when people cheat, or steal? Who really pays the cost of stolen merchandise?

SF  Teach the process for democratic problem solving that includes consideration for all points of view, discussion, debate, and consensus seeking or voting.

CSF  Invite members of the VFW, American Legion, or other veterans to speak about what citizenship and patriotism mean to them.

CSF  Discuss how citizens provide service to the community through different jobs.

CSF  Bulletin Board Ideas: Show persons of all colors and nationalities across a map of the U.S. Provide the header "Liberty and Justice for All" or post articles about good citizens in your community titled "Meet the Good Citizens of Lee County."
Subjects to Consider

Social Studies- Have students brainstorm what they think is included in the Bill of Rights. Compare these to the contents of an actual bill. See if any extras can be found in one of the amendments.

Discuss ways in which legislative decisions have impacted our community (i.e., the net ban).

Math- It is said that we get to live in a free society. Does that mean we get to live in our society for free? Discuss the costs of running government-funded activities or organizations. Develop a budget for a small project.

Journalism- Ask students to interview an adult who participated as a juror or witness of a trial. Develop a list of questions to ask.

Literature- Teach the students to analyze the media critically for hidden messages and agendas. How does this pertain to the freedom of speech?

Music- Teach patriotic songs and discuss the true meaning of the words.

Health- Develop a service-learning project and follow through.

WOW World of Work

Lee County business leaders and educators developed this list of transferable work skills for High School Students.
Character plays an integral part!

Parent Corner

We Live by Choice, Not by Chance

Everything you do is by choice! Hal Urban told a student, "You chose to come to school this morning." He responded that he didn't choose, he had to come. Dr. Urban proceeded to ask what would happen if he hadn't chosen to come to school, and the student reeled off a list including grounding, detention, etc. "Right, you made a choice. You chose to come to school instead of choosing the consequences of not coming. Some of your classmates are not here they chose not to come for whatever reasons they had. You don't have to do anything, but you do get to do a lot of things."

The following is a list of some of our most important choices. We're free to choose:

- our character - the type of persons we become
- how we handle adversity
- what we'll accomplish
- our attitude

Discuss with your children what type of citizens they choose to be.

From 20 Things I Want My Kids To Know by Hal Urban
Swimmy by Leo Lionni,
Swimmy, a fish, teaches a tiny school of fish how to use teamwork. As a group they appear to be a large fish, and they scare a big fish away. This saves the little fish from being eaten.
Activity: Discuss what it means to be part of a family, a group, or a class. How can we help each other?
Read the book.
Discuss the importance of working together and being part of a team.
Small group - Provide a variety of mediums: markers, colored pencils, crayons, pastels, and large drawing paper. Invite the children to draw many fish in an underwater scene.

- Concern
- Acceptance
- Feelings
- Cultural Diversity

---

**Practical Applications**

- Realizing that careless or intentional injury to another is unacceptable.
- Giving to others who are less fortunate.
- Willingness to share another person's pain or joy.
- Thinking of another person's feelings.
- Being kind even when others are not.
- Including those who are less skillful in group activities.
- Treating others as you would like to be treated.
- Understanding cultural differences.
- Understanding that feelings are natural and healthy; it's how we act upon these feelings that can hurt us and others.
Encourage Random Acts of Kindness - Generosity of spirit in something that incorporates many character traits. Involving students in activities that benefit others can show how any individual can matter to others and prevent the "I quit because I don't matter" pattern of development.

Write Thank-You notes as a class assignment. These can be written to parents, teachers, aides, or anyone who has helped the child. Students can each pick another student's name out of a hat and send them a thank-you note and letters of encouragement during the week. Contact hospital or convalescent home for the names of people who would like of receive cards over the holidays.

Ask students to brainstorm the traits they look for in a friend. Ask them to pretend that Character ED has all of those traits. Ask students to tell what they think he would do in different situations. You can start with the cartoon, or everyday situations can be teachable moment: "What would Character Ed say about cutting in line?"

Patience is enduring the skill levels of younger children when playing a game. Tell about a time when you were patient with a family member or friend. Encourage students in your class to tutor or mentor a student from another class.

Each day choose a different person that students are likely to interact with, such as a friend, parent, sibling, and teacher. Brainstorm ways to show caring to each of these persons. Have students do one idea for homework.

Role play - provide an opportunity for students to walk a mile in someone else's shoes - choosing a real person, someone with a handicap or a character from literature.

Select a recent news story that includes a tragedy and a compassionate response. Discuss how tragedies often bring out the best in people and why they think that is or isn't so.

Imagine a helpful invention which could probably never become a reality. For example a gadget which would analyze the world's problems and tell how to solve them. Ask students to demonstrate their invention to the class.

Make a list of the people that students think care about them. How do these people demonstrate caring? Ask students to put their own names on the top of a sheet of paper, then rotate the papers so that everyone has an opportunity to say something positive about each person.

Practice finding the good in other people by finding the good in even the worst characters in literature.

Teach students active listening skills, body language, rephrasing, and tuning-in to feelings. Pair up students and ask them to interview each other one at a time. These interviews can be used to introduce students to the rest of the class, or they can play the "New Friend Game." To play have students sit in two rows opposite their partners, ask students questions, like, "What type of music would they have on at home?" Give the teams points for matching answers.

Discuss and give examples of whether or not these old adages are true, "To have a friend you must be a friend," or the old adage "Sticks and stones may break my bones but words can never hurt me."
Subjects to Consider

Social Studies - Identify themes and dilemmas throughout history: prejudice and intolerance versus civil rights; treatment of ethnic groups such as Native Americans, Jews, and Japanese during World War II; war and peace; greed vs. giving; attitude towards slavery.

Science - Take care of class pets or a bird feeder. Study explanations for the eating habits, illnesses, and behaviors of the animal you have chosen.

Math - Ask students to keep count and produce charts analyzing the frequency of kind remarks. This could be compared to the frequency of unkind remarks.

Language Arts - Ask students to rewrite the end of a story as if a character were more compassionate than depicted.

Art - Ask students to design and send holiday or thank-you cards.

Physical Education - Discuss how your team treats the other team after a win or loss. What is good sportsmanship?

Music - Discuss and explain the history and tradition of "Love" songs in our culture.

Health - Discuss how reading body language helps us understand each other better.

WOW

World of Work

Forgive

That slight misdeed of yesterday,
Why should it mar today?
The thing he said, the thing you did,
Have long since passed away;
For yesterday was but a trial;
Today you will succeed.
And from mistakes of yesterday
Will come some noble deed.

Forgive yourself for thoughtlessness,
Do not condemn the past;
For it is gone with its mistakes;
Their memory cannot last;
Forget the failures and misdeeds,
From such experience rise,
Why should you let your head be bowed?
Lift up your heart and eyes!

Author Unknown

Ask students to discuss in groups their interpretations of this poem. Talk about how mistakes are how we learn. Relate this to the World of Work and what employees need to do when they have made a mistake.

Parent Corner

KIND WORDS COST LITTLE, BUT ACCOMPLISH MUCH

Provide your children with unconditional love. Help them understand that you will always love and support their efforts, even though you may not always agree with them or approve of what they are doing, or what they have done. The world can be a tough place growing up and everyone needs to feel appreciated and supported. If children do not get these needs met at home they will find another group of people that they feel meets these needs, they may even turn to gangs. This does not mean that you overlook or accept "bad" behavior, but consequences can be provided without anger. Tough problems can be solved together with the responsibility for correcting or improving the behavior/situation still falling upon the child.

Parents can bring out the best in their children by emphasizing what they have done right or what they could do, instead of what they have done wrong. Studies have shown that encouraging and expecting the best in our children is the best predictor of success.

Teach by example. During this month be extra friendly and polite to everyone including your children. Use please, thank you, and excuse me profusely. Smile a lot and let them know they are loved. Sit down, look them in the eye, and really listen to what they are saying. Try to put yourself in their place.

Watch television with your child and use this opportunity to talk about situations in which characters are mean and hateful. Point out alternative ways that characters could have chosen to act.

When your child begins to say things or act in ways that will hurt others, immediately point out how that behavior makes others feel. Clearly establish or restate your family's beliefs or rules for the treatment of others. For example; "If you don't have anything nice to say, don't say anything at all," or "Treat others as you would like to be treated."
Early Childhood Activity

**Stellaluna,** by Janell Cannon. Stellaluna, a baby fruit bat, is separated from her mother and falls into a nest of baby birds. In order to stay with the other babies, Stellaluna must eat bugs and act like a bird. She eventually is reunited with her mother. Stellaluna and the birds learn that you can be very different and still feel alike.

**Activity:** Discuss caring for each other and treating others the way you want to be treated. Discuss bats and birds.

**Read the book.** Discuss what is different about a bat and a bird; i.e. eating fruit versus bugs, sitting on limbs versus hanging upside down; flying at night versus during the day.

**Small group -** Provide a variety of soft fruits (mangos, bananas, plums, peaches). plates and knives. Invite the children to cut up and sample the different fruits. Write words generated through the various tastes.

---

**READING MATERIALS**

**K-2**  
- *Koko's Kitten* by Patterson - A real life story of a gorilla who cares for a kitten and speaks in sign language.  
- *Frog and Toad are Friends* by Lobel - Two special friends who go to great lengths to show they care.  
- *A New Coat for Anna* by Ziefert - After many months a mother's determination produces a beautiful gift.  
- *It's Mine* by Lionni - Three selfish frogs learn the value of kindness from a toad who helps them.

**3-5**  
- *The Aunt and the Elephant* by Peet - A small character helps a bigger one solve a problem.  
- *The Giving Tree* by Silverstein - A story about the selfless act of giving and giving.  
- *Sachiko Means Happiness* by Sakai - A girl deals with loving her grandmother with Alzheimer's disease.  
- *Badger's Parting Gifts* by Varley - The woodland animals share memories when one of their friends dies.

**6-8**  
- *After the Rain* by Mazer - A 15-year-old learns to love and appreciate her dying grandfather.  
- *Almost a Hero* by Neufeld - A boy balances responsibility with good deeds in a service-learning project.  
- *The Watsons' Go to Birmingham* by Curtis - An African-American family take a poignant trip together.  
- *What About Me?* by Rodowsky - A teenager has mixed feelings towards her brother with Down Syndrome.

**Draw your own conclusion**

Are there things that we take for granted that others can not do? What would it be like to not be able to walk around, see or hear? When we see someone who appears different, how would they like us to react? How does this apply to everyone, not just people with disabilities?
Character-Building Word for January

COMMITMENT

Binding yourself to a course of action despite obstacles:
Make yourself a promise and keep it.

WEEK 1

Genius is one percent inspiration and ninety-nine percent perspiration.
Thomas Edison
A journey of a thousand leagues begins with a single step.
Lao-tzu
Life is like riding a bicycle. You don't fall of unless you stop pedaling.
Anonymous
The difference between the impossible and the possible lies in a man's determination.
Tommy Lasorda
Remember that overnight successes usually take fifteen years.
Anonymous

WEEK 2

Be like a postage stamp stick to something until you get there.
Josh Billings
When you are committed to something, you accept no excuses: only results.
Kenneth Blanchard
Character is determined by what you accomplish when the excitement is gone.
Anonymous
If you are not sure where you are going, you are liable to end up somewhere else.
Robert F. Mager
Little strokes, fell great oaks.
Anonymous

WEEK 3

The man who does things makes many mistakes, but he never makes the biggest mistake of all-doing nothing.
Benjamin Franklin
The only limitation is in your own mind.
N. H. Moos
Climb high, climb far. Your goal the sky. Your aim the star.
Anonymous
I can't imagine a person becoming a success who doesn't give the game of life everything he's got.
Walter Cronkite
A man can fail many times, but he isn't a failure until he gives up.
Anonymous

WEEK 4

One reason for doing the right thing today is tomorrow.
Anonymous
Do it! Make it happen! No one ever sat their way to success.
Anonymous
A good friend is like toothpaste. He comes through in a tight squeeze.
Anonymous
A jug fills drop by drop.
Buddha
The rung of a ladder was never meant to rest upon, but only to hold a man's foot long enough to enable him to put the other somewhat higher.
Thomas Huxley

PRACTICAL APPLICATIONS

* Being willing to finish what we start
* Being true to friends and family even when they are not around
* Doing what we say we will do.
* Being on time
* Giving our best effort
* Keeping promises
* Following through with something even though there may be challenges
* Setting goals for ourselves and persisting in their accomplishment.
* Having a clear vision of what we want to accomplish.
* Believing that "we can succeed". "We cannot consistently perform in a manner inconsistent with our self-image." Dr. J. Brothers
* Understanding the importance of working independently as well as the benefits of teamwork.
* Breaking tough tasks into manageable steps
* Committing to a personal belief and sticking to it even when it may be unpopular (i.e., not smoking)
* Making goals and seeing them through
* Commitment to relationships and problem solving

Relationships

Try putting activities for families in your school newsletter.
Encourage students to develop short-range and long-range goals and a plan of action.

Discuss the quote "A winner is someone who sets his goals, commits himself to those goals and then pursues his goals with all the ability given him." Then write New Year's Resolutions and commit to keeping them.

Discuss the relationship between commitment and responsibility.

Ask students to think of a goal they would like to accomplish. On a 1-10 number line ask them to list under the 10 what a person really committed to reaching that goal would be doing (i.e., research, writing letters, interviewing, studying at least 1/2 hour per night, etc.) Under number one have them list what someone who has given up might be doing. Ask them where they fit on the number line on that day. Ask where they would like to be, and what behaviors they would need to develop to affect that change. This exercise helps them see their own responsibility in this process. This process can be used for other traits of character as a whole.

Have students outline the commitment it took to become a free nation.

Discuss a leader that was committed to a certain cause or ethical decision.

Emphasize the importance of working hard and striving for their best effort. Discuss how our own expectations and the expectations of others affect our efforts.

Discuss The Tortoise and the Hare and how it relates to the quote, "The race is not always to the swift but most often to the one who keeps on running."

Provide and recognize opportunities for students to: "Know what is right in their head (cognitive), feel the need to do what is right in their heart (emotional), and activate the will to do that which is right (behavioral)" ...Thomas Lickoma

Encourage their commitment to building positive character traits by implementing the Character Exercise Chart. This is based on the analogy that exercising muscles is to building strong bodies as exercising good character is to building strong character. Students brainstorm ideas (for example smile and make a new friend, wait patiently, say 'No' when asked to do something wrong.) The students decide which character building exercises to enter in the 12 boxes on their individual grids. Let them tally how many times they do each exercise. In order to emphasize that "character is what you do when no one else is looking." students can keep their own charts.

Read biographies about individuals who have overcome great difficulties to reach their goals, for example: Helen Keller, Jackie Robinson, Gloria Estefan, Dr. Martin Luther King, etc.

Provide extra credit for writing about "What commitment means to me," or the quotes.

Discuss what their parents' commitment to them means to them and what commitments they feel. Discuss commitments students have made outside of school (i.e., music lessons, scouts, sport, church, pets, etc.) Talk about obstacles that make it difficult to keep these commitments.
Subjects to Consider

Social Studies - Discuss how the commitment of famous historic figures helped mold our country.

Science - Discuss how it took great commitment on the part of many inventors to work through numerous problems to attain success. Thomas Edison had many more failures than successes.

Math - A commitment to memorizing basic facts and formulas will help students become more successful.

Language Arts - Ask students to improve their reading by making a commitment to read regularly.

Art - Ask students to design and send holiday or thank-you cards.

Physical Education and Health (Wellness) - Help students understand the importance of being committed to a healthy life-style, including eating right, exercising and being drug-free.

Driver's Education - Making the commitment to buckle-up.

WOW

World of Work

Goals serve as a stimulus to life. They tend to tap deeper resources and draw out of life its best. Where there are no goals, neither will there be significant accomplishments. It is difficult to resist instant gratification for a long-term commitment, when you see no future or have no goals.

Here are some suggestions from Hal Urban that will help students get started in goal setting.

Help students:

• Understand the difference between a goal and a wish. A wish is a vague dream (being rich) that happens to us. A goal is something we can specifically plan for.

• Write down their goals and make them specific. Writing the goals is the first step towards commitment. Seeing them on paper is a first step towards making them a reality.

• Categorize and balance their goals. Students can include goals related to careers, family, fun, spiritual, etc.

• Review and revise their goals. Explain that they may change as they grow older.

From 20 Things I Want My Kids to Know by Hal Urban

Parent Corner

GOALS ARE DREAMS WITH DEADLINES

People with goals succeed because they know where they are going. ...Earl Nightingale

Success is the progressive accomplishment of worthy goals. Success doesn't happen by accident. It happens by design. Living without goals is like going on trip with no destination. If you don't know where you are going, you will probably never get there. The following are some of the benefits of setting goals:

• Motivation. Goals give us a reason to start moving towards something.

• Independence. Goals help us take charge of our lives and choose our paths, instead of following the crowd.

• Destination. We are far more likely to get someplace when we know where we are going.

• Meaning. Goals give us a sense of purpose and add meaning to our lives.

• Enjoyment. How can you be bored when you have exciting things to do? Our lives become more fun.

• Fulfillment. Goals help us reach our potential. Each successful step towards our goal builds confidence.

From 20 Things I Want My Kids To Know by Hal Urban

As parents one of the greatest gifts we can give our children is to teach them how to turn dreams into goals by breaking them into reasonable steps that include time limits. For example, my dream is to be rich. My goal is to get 3.5 average so that I can get into college. The second is easier to plan for and accomplish. Jack Field suggests putting a drawing of a football field on your refrigerator. Have the whole family put his/her names and his/her goals on paper footballs. When someone in the family accomplishes their goal move their football over the goal post. Celebrate as a family with time together. Everyone celebrating together encourages each family member to help each other reach their goals.
Early Childhood Activity

The Little Engine That Could by Watty Piper. A little red engine is carrying toys and good food to the other side of the mountain. Her engine quits, but finally a little blue engine comes along to help her over the mountain. As the blue engine pulls its heavy load it says, "I think I can. I think I can."

Activity: Talk about trains; talk about going over hills, maybe on a bike, talk about going up and over. Talk about how it takes hard work and commitments to work to get up the hill.

Read the book. Discuss things that may be hard to do but we do them because we want or need to.

Small group - Provide "train type" materials using linking legos and blocks. Invite children to build hills for the "trains" to travel over. Or ask children to draw pictures on the trains of things they would be willing to work hard to achieve.

Grade

K-2 The Little Red Hen by Galdone - This folktale illustrates a lesson in the rewards of hard work.
Charlotte's Web by - Charlotte demonstrates her commitment to her friends and her young.

The Little Engine That Could by Piper - The little train was committed to taking the toys over the mountain.

3-5 Lesson's Learned from the Uncommon Friends by Foundation - Available to all 4th grade teachers.
Thomas Edison by Nirgiotis - Edison overcame many failures before perfecting many inventions.
Charles Lindbergh, Hero Pilot by Collins - The commitment of Lindburgh's solo flight.

Jim Abbot, Star Pitcher by Gutman - A star major league pitcher who was born with no right hand.

6-8 Kidstories by Delisle - Stories of 20 real kids and the things they did great and small.

Hatchet by Paulson - After a plane crash, A13-year old boy must figure out how to survive by himself.

Homecoming by Voight - After being abandoned by their mother, A 13-year-old cares for her siblings.

What About Me? by Rodowsky - A teenager has mixed feelings towards her brother with Down Syndrome.

- Dependability
- Keeping Promises
- Trustworthiness
- Genuineness
- Honest Praise
- Truthfulness
- Fairness
- Justice
- Sincerity

**PRACTICAL APPLICATIONS**

- Never stealing someone else's possessions or ideas (cheating)
- Telling the truth in spite of what you think the consequences will be
- Being consistently truthful so that others can trust you
- Helping others maintain honest standards
- Making sure that our motives are unselfish
- Giving praise only when it is sincere
- Giving criticism only when it is constructive
- Understanding that truths out of context can be deceiving
- Understanding that "spins" on the truth can be created from a particular point of view
- Understanding that people can see the same incident differently often causing conflicts
- Being a good friend involves honesty
- Omitting information can be as damaging as outright dishonesty

Try putting activities for families in your school newsletter
ACTIVITIES

C=Community Activities  S=School Activities  F=Family Activities

CSF  Ask students to develop skits that culminate in honest and dishonest decisions. Ask to include the consequences in each scenario.

CSF  Students can create their own cartoons depicting Character ED in different situations. Cartoons could depict what would happen if ED told the truth and another cartoon depicting what would happen if he didn't. Students could do this in teams. This could be tied into literature or social studies.

CSF  Brainstorm the different ways there are to be dishonest. Turn the situations around so that the student is the one being lied to. Discuss how that feels.

SF  On a blank sheet of paper have students trace their hands, draw a large heart inside the palm, and draw a picture of themselves inside the heart. While they are doing this explain how this depicts the three areas of character development. The head learns the principles, the heart understands why and when to use the principles, and the hand puts understanding into actions. Ask them for examples of their experiences in thinking through decisions.

CSF  Discuss plagiarism and how to give proper credit.

CSF  Ask students to think of people in their lives or in literature whom they consider trustworthy. Develop a list of characteristics.

CSF  Have students find examples of advertising that purposely mislead the public. Discuss how the truth can be misleading: for example, products that claim that they are sugar free but contain other high calorie sweeteners such as molasses and corn syrup. Students can create honest advertisements.

CSF  Discuss who really ends up paying when you cheat or steal from companies.

CSF  Write an acrostic using the word Honesty.

CSF  Read the Little Boy Who Cried Wolf. Talk about telling the truth, but remember if you don't have anything nice to say - sometimes it is better to say nothing at all. Ask students to make pop-up books with honesty on the outside and a quote or act illustrated as a pop-up.

CSF  Find a character in literature or history who has been affected by not telling the truth.

CSF  Discuss classroom disruptions. Do they "steal" learning time from other students?

CSF  Read and discuss biographies of Presidents Washington and Lincoln. Talk about how they are remembered for their honesty and character.

CSF  Admit mistakes and seek to correct them. Discuss why "mistakes are for learning" and how no one does anything perfectly the first time.

CSF  In a newspaper or magazine, find an example of a person who was honest or dishonest. Write a paragraph about the situation and identify the choices that person made. What were the consequences?
Subjects to Consider

Social Studies - Discuss historic figures and how their honesty or dishonesty changed history. Discuss presidents known for honesty such as Lincoln or Washington and how this trait was highly regarded and reported in stories over the years.

Physical Education - Rainy days or times of student conflict provide an opportunity for students to really listen to each other’s concerns and brainstorm better solutions. See below.

Language Arts - Read Matilda, Who Told Lies, and Was Burned to Death. (Book of Virtues) Compare this to The Boy Who Cried Wolf. Ask students to write a poem or story about a lie and its consequences.

Health (Wellness) - Being honest with oneself means understanding ourselves and the reasons for the decisions we make.

Math - Discuss how numbers never lie but can be interpreted to support different points of view.

WOW - World of Work
From: 20 Things I Want My Kids to Know by Hal Urban

There seems to be an attitude in the world today that dishonesty is OK, “Everybody’s doing it.” Seeing what we can get away with has almost become a sport. But dishonesty takes its toll in many ways. Schweitzer once wrote that we can’t have reverence for life unless we develop a code of ethics, which includes honesty and truthfulness. Dishonest employees cost businesses money every day. We have been caught in a battle between right and wrong and good and evil since the beginning of time. We have choices to make everyday. Employers are interested in hiring people they can trust. In many cases this may be more important than skill.

William James, in his book To Thine Own Self Be True, explains that dishonest behavior is at the root of most psychological problems. Dishonesty is unhealthy for our spirit as well as our physical well being. The effort to sustain a false impression places enormous stress on the nervous system, hence the ability of lie detectors to record dishonest statements.

Dishonesty usually catches up with us. It ruins relationships and prevents us from fulfillment. Dishonest habits become roadblocks to success in business and experiencing our true selves.

Honesty affords a peace of mind. We do not have to constantly cover up or remember the last lie we told to whom. Honesty strengthens relationships and builds trust. We can only be all that we are capable of when we are honest with ourselves.

Parent Corner
Teaching Children to Problem Solve Situations

When children get into difficult situations they look for a way that will help them look better to the people they want to impress or get out of doing something that they don’t want to do. By brainstorming other alternatives and their consequences, children can explore better ways of solving difficult situations than being dishonest.

First discuss with your child your family’s values about honesty and what you expect. “Actions speak louder than words.” Parents can help their children to become honest adults by being honest role models. Talk to them about the consequences of being dishonest, not only from their parents, but also about how one lie leads to another and gets the liar into more and more trouble. Talk about the fable, The Boy Who Cried Wolf, and how it is difficult to trust someone who has a reputation for being dishonest.

Look for teachable moments to help your child brainstorm positive choices. For example, Sally asked Eddie if he had finished his homework when he wanted to go out to play with the neighborhood kids. He knew that he had a couple more math problems and needed to study for his spelling test, but he said, “Yeah, Mom,” and continued playing. Later that evening Sally found out that Eddie’s homework wasn’t finished. She did not let him off the hook for lying; he had to stay in the next day. During that time she asked Eddie to brainstorm other things he could have done. Eddie responded that he could have gotten started earlier instead of watching television, he could have told his mother the truth and promised to finish his work after dinner (with the condition that this would be done on a trial basis; if it did not work out, there would be consequences), or he could have worked earlier. They discussed the pros and cons of each choice, and after careful consideration, Eddie promised to handle the situation differently next time.

Children and adults are faced with difficult choices every day. Helping our children think about and weigh a variety of responses will help them make more successful choices.
Early Childhood Activity

**Pinocchio by Lorenini.** A puppet is transformed into a little boy, but when he doesn't tell the truth his nose grows, and he gets into difficult situations.

**Activity:** Talk about the difference between a lie and the truth. What happens when we lie? Can anyone remember when that got them into more trouble?

**Read the book. Discuss** things that may be hard to do, but we do them because we want or need to.

**Small group** - Provide a drawing of Pinocchio without a nose. Have the children put a round nose on him if what you say is the truth and a longer triangular nose on him when you say something that is not true.

---

**READING MATERIALS**

**Grade K-2**
- Andy and the Lion by Ormerod - A powerful lesson about the value of keeping one's word
- The Boy Who Cried Wolf by Aesop - A boy learns what can happen when he continuously tells lies
- Pinocchio by Lorenini - This magical puppet/boy's nose grows when he tells a lie

**Grade 3-5**
- Max Malone and the Great Cereal Rip-Off by Herman - Max is tempted to be dishonest with a youngster
- The Big Lie by Leitner - Isabella finds out how leaders during World War II tell "the Big Lie" to victims
- The Animal, the Vegetable, and John D. Jones by Byers - Two families learn honesty and family harmony
- Maggie Marmelstein for President by Sharmat - Maggie learns about making campaign promises
- Number the Stars by Lowry - A girl, during WW II, is concerned about her parents lying to protect Jews

**Grade 6-8**
- The Story of Regulus by Baldwin - The Legend of Regulus keeping his word immortalized him in Rome
- Honest Abe by Alger - Habits of a truthful heart begin early in life
- The Emperor's New Clothes by Andersen - Honesty, unlike new clothes never goes out of fashion

---

Are there times when it seems tempting to take something that does not belong to you or to tell a lie? What might happen if the girl in the cartoon keeps the money? How would you have felt if it was your money she had found?
Character-Building Word for March
Courage

The personal strength to face difficulties, obstacles, and challenges
Be brave, make positive choices

WEEK 1
If at first you don't succeed, try, try, again.
Anonymous

If fifty million people do a foolish thing, it is still a foolish thing.
Anonymous

What you believe yourself to be you are.
Claude M. Bristol

A man of character finds a special attractiveness in difficulty, since it is only by coming to grips with difficulty that he can realize his potentialities.
Charles DeGaulle

Act as if it were impossible to fail.
Anonymous

WEEK 2
The only thing we have to fear is fear itself.
Franklin D. Roosevelt

You only feel the victory if you accept the challenge.
Anonymous

All our dreams can come true if we have the courage to pursue them.
Walt Disney

It takes courage to push yourself to places you have never been before... to test your limits, to break through barriers.
Anonymous

Courage is not the absence of fear, rather it is the ability to take action in the face of fear.
Nancy Anderson

WEEK 3
The right angle to approach a difficult problem is the "try-angle."
Anonymous

Don't be afraid to go out on a limb. That's where the fruit is.
Arthur Lenihan

Courage is what it takes to stand up and speak; it is also what it takes to sit down and listen.
Anonymous

In the middle of difficulty lies opportunity.
Albert Einstein

Moral courage is a more rare commodity than bravery in battle or great intelligence.
John F. Kennedy

WEEK 4
All glory comes from daring to begin.
Eugene F. Ware

Don't be afraid to take a big step if one is indicated.
You can't cross a chasm in small steps.
David Lloyd George

The men who try to do something and fail are infinitely better than those who try to do nothing and succeed.
Lloyd Jones

The key to your universe is that you can choose.
Carl Frederick

Ingenuity, plus courage, plus work, equals miracles.
Bob Richards, pole vaulter 2 Olympic gold medals

RELATED WORD
Bravery
Fearlessness
Firmness
Self-determination

PRACTICAL APPLICATIONS
* Planning options to face something that takes courage.
* Understanding the difference between courage and foolishness.
* Telling the truth in spite of the consequences.
* Believing in our abilities, despite odds.
* Doing what we feel is right even in a crowd that doesn't.
* Apologizing and admitting mistakes, and accepting the consequences.
* Resisting the temptation to do wrong.
* Willing to replace our wrong decisions with the right ones.
* Taking the first step in a difficult or menial task.
* Following our dreams and goals.
* Having the courage of our convictions.
* Taking reasonable, positive risks.
* Taking pride in being unique.
Activities

C = Community Activities  S = School Activities  F = Family Activities

**CSF** Given sample situations, ask students to decide which choices are courageous and which are foolish. For example: Walking away from a fight vs. fighting, making fun of someone vs. standing up for someone, doing something because your friends expect it vs. doing what you know is right.

**CSF** Have students interview someone who has come here from another country. Ask them to tell about the courage it took to move to a new place.

**SF** In cooperative learning groups, have students study a quote and explain it to the rest of the class through a skit, story, artwork, poster, etc.

**CSF** What would the world have missed if Walt Disney or Thomas Edison had not had the courage to follow their dreams?

**SF** Play telephone; have the students pass a whispered message around a circle. Discuss having the courage to be a peacemaker; understanding the whole story before you follow the crowd; why it is important not to listen or act on rumors, and having the courage to talk to the source directly to clear up any misinterpretation or misinformation. Discuss how students sometimes alter or start rumors as a form of peer pressure.

**CF** Watch a favorite TV show and report about whether the characters were demonstrating courage or foolishness.

**CSF** Discuss having the courage to address difficult situations. Teach students how to define the problem and look for a variety of solutions. This process can be practiced with examples from students, literature, or history. This can be related to conflict resolution and mediation to help students find the courage to solve individual problems. Successful people often have more than one alternative.

**SF** Discuss obstacles in our lives and how it takes courage to overcome them. Read about and discuss Helen Keller, Stevie Wonder, Franklin Roosevelt. Discuss the meaning of bravery.

**CSF** Invite survivors of the Holocaust to speak to your students about incredible courage.

**CSF** List what someone with courage looks like as a group activity. Explain how the purple heart has long been a symbol of soldiers being courageous in battle. Have the students cut out their own purple heart and list or draw things they have done that took courage.

**SF** Discuss or write about: “What would you do today if you knew you couldn’t fail?”

**SF** Discuss the phrase, “Have the courage of your convictions.” How can students show this?

**CSF** Develop a student group that meets to write and produce skits and vignettes using the quotes and/or original material about the character traits.

**SF** Discuss: To dream anything that you want to dream. That is the beauty of the human mind. To do anything that you want to do. That is the strength of the human will. To trust yourself to test your limits. That is the courage to succeed ....Bernard Edmonds

**CSF** Encourage goal setting. Discuss the quote: “We all live under the same sky, but we don’t all reach for the same stars.” Encourage students to develop their own short and long-term goals.

1. Define the goal (that is within the student’s ability to influence)
2. Outline the steps needed to achieve the goal.
3. Consider possible blocks and ways of dealing with them.
4. Set deadlines, break up the task if necessary and set deadlines for parts. ...Quest
Subjects to Consider
Discuss the difference between a celebrity and a hero and the different traits that make them famous. Celebrities are made famous by the media. They make news but not necessarily a positive impact. Heroes are known for achievement, portraying ideals, and making a difference in the lives of others. Heroes have the courage to overcome or persist in order to achieve their goals. Heroes may not be great to everyone, but they have a powerful impact on the people around them.

History
Ask students to report about someone from history who they considered a hero. How did this person exhibit courage? How would they solve a related problem today? Discuss the courage it took to bring about change in the history of our country or the world.

Literature
Ask students to write about people in literature or people in their own lives that they consider heroes. How did they exhibit courage?

Health
Discuss the difference between courage and risky behavior. Discuss having the courage to say no to peer pressure. Encourage students to set long term goals and discuss what they will need to do to achieve these. What may they have to give up along the way?

Creative Writing
Write a story about a character who has to make a choice that requires courage.

Social Studies
Bring in or have students interview people that they think are heroes in their community.

WOW - World of Work
It Takes Courage to Be Successful!

It takes courage to apply for a job, walking into the unknown. One way to help this is with practice. Practice filling out applications and role play interviews. Employers want to know what you can offer their business, not what their business can do for you. Think about your answers to questions they might ask in advance. Like: Why would you like to work here?

It takes courage to admit mistakes. Covering up mistakes on the job can lead to more problems! None of us are born experts. We made several mistakes before we learned to walk, but from each of those mistakes we learned to eventually master the task of walking. In the world of work ask questions when you are not sure. Learn from the mistakes you make so they are not repeated.

It takes courage to try something new, a new job or a new task. Very often once we master a task at work, we are given more difficult things to do; that’s what getting promoted is all about.

Parent Corner
Teaching Children to Be Brave (But Not Foolish)

Courage is taking reasonable risks. Encourage children to make good decisions by allowing them to practice good decision making at home. Offer choices; let them see that the choices they make have positive and negative consequences. For example, if your son is bouncing the ball in the house you can ask him to either bounce the ball outside or find something quieter to do in the house. If he continues, he needs to understand that this was a poor choice, the consequence of which is that the ball will be taken away. When decision making is encouraged early and consistently, children are more able to muster the courage to stand by the decisions they make.

This includes helping children and young adults develop a resistance to negative peer pressure by helping them learn to evaluate their choices. It is often difficult to choose between immediate pleasure, what is easier or feels good now, and long term goals; what actions would have positive future consequences. Young adults can get into difficult situations when they do not have the courage to ask about what others are inviting him to do.

Courage is not something we can demand from children; it grows from the experience of making good choices that provide successful outcomes. Children and young adults need to feel capable of handling difficult situations. Help them think through several alternatives; very successful people have fall-back options. For example, your son suggests that he doesn’t want to go to school because someone is picking on him on the bus. Ask him to list some solutions to this problem. List them all including not going to school, or hitting the other boy first, until you get some more workable alternatives. Go over the list with him and ask what would happen or be the consequences of each alternative. Have him choose the ones that will most likely provide a positive consequence.

Clarify the difference between courage and loudness and lack of courage and snyness. This will help your child see that courage is a quality of character, not personality. Explain that there is a quiet courage - the courage to say no to something that is wrong or to say hello to a child who has no friends.

We all make decisions every day. It is important that we help our children have the courage to think through their choices and resist the pressures from others in order to do what they feel is right.
Early Childhood Activity

**Amazing Grace** by Mary Hoffman and Carolyn Binch. Grace is a young girl who loves to act out stories. Auditioning for Peter Pan, her classmates tell her that she can't get the part because she is a girl and she is black. Her Nana proves to her she can be anything she wants to be. Grace goes on to give a great performance as Peter Pan.

**Discuss:** facing problems, being brave, things we can't do yet, but will be able to do someday.

**Read the book.** Discuss what Grace accomplishes and introduce the word courage.

**Small group** - Provide a variety of mediums: markers, colored pencils, crayons, pastels, paints, and large drawing paper. Invite the children to draw/paint pictures of things they can do. Label the pictures.

Do you sometimes feel that your peers are encouraging you to do something you do not want to do? What are some other things we can do to avoid a fight and still save face? What situations are courageous, and what situations are foolish?

To Districts/Schools Outside of Lee County

These Character Education materials were used in Lee County for the 1997-1998 school year as part of our districtwide pre-kindergarten through grade twelve initiative. If you would like to use these copyrighted materials for your school or district give us a call. We will be glad to help support this initiative; call The School District of Lee County (941) 337-8606.
Character-Building Word for April
Integrity

Adhering steadfastly to a personal sense of honorable and ethical behavior
Sticking to what you know is right

WEEK 1
A person's true character is revealed by what he does when no one is watching.
Anonymous

Ability will enable a man to go to the top, but it takes character to keep him there.
Anonymous

When you walk what you talk... people listen.
Anonymous

The greatest thing in this world is not so much where we are, but in what direction we are moving.
D.W. Holmes

Character is not an inheritance; each person must build it for himself.
Anonymous

WEEK 2
Real integrity stays in place whether the test is adversity or prosperity.
Charles Swindoll

A person's true ideals are those he lives by, not always those he talks about.
Anonymous

The height of your accomplishments will equal the depth of your convictions.
William F. Scolavino

Keep pace with the drummer you hear, however measured or far away.
Henry David Thoreau

A good conscience is a continual feast.
Sir Frances Bacon

WEEK 3
The man who cannot believe in himself cannot believe in anyone else.
Roy L. Smith

What lies ahead of us and what lies before us are small matters compared to what lies within us.
Ralph Waldo Emerson

Integrity is the glue that holds our way of life together.
Billy Graham

One person with a belief is equal to the force of ninety-nine who only have interests.
Anonymous

Peace is not something you wish for; it's something you make, something you can do, something you are, and something you give away.
Anonymous

WEEK 4
What you value is what you think about. What you think about is what you become.
Joel Weldon

When you know what your values are, making decisions becomes easier.
Glenn Van Ekeren

If you don't stand for something, you'll fall for anything.
Anonymous

Success is knowing what your values are and living in a way consistent with your values.
Anonymous

The evil of the world is made possible by nothing but the sanction you give it.
Danny Cox

RELATED WORDS
Respect  Humility  Justice
Responsibility  Loyalty  Uniqueness
Citizenship  Reliability  Honesty
Compassion  Kindness  Courage
Commitment  Self-control

PRACTICAL APPLICATIONS
* Putting all of the character traits into action.
* Doing what you feel is right, whether or not others are watching.
* Behaving in such a way that people trust you.
* Doing what is right even in a crowd that doesn't.
* Admitting that we are wrong and accepting the consequences.
* Being accountable for our choices.
* Apologizing, admitting mistakes, and accepting the consequences.
* Resisting the temptation to do wrong.
* Willing to replace our wrong decisions with the right ones.
* Keeping promises and commitments.
* Thinking before acting.
* Being a responsible member of our community.
* Being fair and just to others.
* Taking pride in being unique.

Character is what you do when no one else is looking.
Activities

C = Community Activities  S = School Activities  F = Family Activities

CSF Write a story or draw a picture about someone who demonstrates integrity. Examples could include: Abraham Lincoln, Joan of Arc, Aristotle, Florence Nightingale, Francis Bacon, Mother Theresa, Mahatma Gandhi, Jesus Christ, Plato, Confucius, or someone you know. Tell how he/she showed integrity.

CSF Discuss: I'm the one who writes my own story. I'll decide the person I'll be. What goes in the plot, and what does not is pretty much up to me. (Author unknown)

CSF Make a chart on the board with four categories: HOME, SCHOOL, WORK, WORLD. Have the students list activities associated with the four areas which exemplify integrity or are the antithesis of integrity.

CSF List at least 10 ways of stealing besides actually holding someone up or robbing a house, for example forgetting to return money or belongings, or plagiarism.

CSF Ask students to think about a time when they took a stand concerning something. Maybe they saw others doing something wrong, or were involved in a discussion and they stated their views even though they were unpopular. Discuss how that can feel scary and ask for examples of positive outcomes.

CSF List and discuss the ethical dilemmas caused by computers/advanced technology. How does this relate to the quote, “A person’s true character is revealed by what he does when no one else is looking”?

SF In cooperative learning groups, have students study a quote and explain it to the rest of the class through a skit, story, artwork, poster, etc.

CSF Discuss campus “issues of character” on a regular basis (vandalism, good deeds, etc.).

SF Provide students with the opportunity to practice integrity. Discuss and practice the “STAR” ethical problem-solving method: this gives students a process or system to think through potential actions or review past actions for alternatives. It includes;  
Stop, take time to think through an action about to be taken  
Think, make a mental list of the options available in a particular situation  
Act, choose the best alternative  
Review, will my action get me further from or closer to my goal, and how will it affect others? This can be used as a short activity also. Ask the class what STAR means; provide a situation; for example, pretend you find a dollar bill on the floor, then ask them to go through the STAR steps when deciding what to do. ...from, The Case For Character Education by David Brooks

SF Have students trace each other on a large sheet of paper or draw a quick self-portrait. Ask students to label their drawings “A person of integrity.” Write around the edges or in the center adjectives or adjective phrases describing what they feel or do that shows integrity. They could also do this as a generic activity, or draw “Character ED” listing what integrity means to them.

SF Write about a special event in your life. How did it affect your character?

SF Ask the students to ask their parents what integrity means to them; share these responses.
Subjects to Consider

The new Sunshine State Standards includes Student Performance Standard 5 which focuses on developing ethical and responsible workers. Students are expected to display positive and constructive social skills by following school rules and customs and by respecting the rights and property of others. According to Dr. Philip Fitch Vincent, in his book, Developing Character in Students, there are 5 things teachers can include in what they are already doing that will support Standard 5:

Develop rules that are expectation of appropriate behavior. Practice these until they become a habit. If disrespectful behavior is a problem in your classroom, develop a rule that lets students know what is expected. Actually practice this rule during classroom discussions, until it becomes a habit.

Cooperative Learning provides an opportunity for students to promote social behavior. Through structured activities and clear expectations, students will learn how to take individual and team responsibility for outcomes and develop better relationships and understanding of other students.

Teaching for thinking. When students are taught to brainstorm, compare and contrast, understand cause and effect, develop goals, make choices, and interpret and evaluate information, they practice assessing what is stated related to their own experience. This practice will help them make responsible decisions in the future.

Reading for character. Good literature requires readers to reflect on the actions and circumstances of individuals and their ideas. Through good literature students vicariously experience the lives of characters and develop a storehouse of moral models as guides for future actions.

Service Learning provides an opportunity for students to practice the art of caring about others. When students can decide what service they would like to provide, plan the activity and have an opportunity to reflect on the experience, it is much more meaningful than just bringing in cans for the hungry or getting volunteer hours over with.

WOW - World of Work

It Takes Courage to Be Successful!

"Ability will enable a man to go to the top, but it takes character to keep him there." Author Unknown.

Employers today are looking for employees with good character. They can train them in the skills they need for the job, but integrity, honesty, respect, compassion, and responsibility are necessary for employees to maintain employment and gain advancement. This is true no matter what the job, from the highest levels of government to baby-sitting jobs. If the people who put you in office or the people who trusted you to get a job done have good reason to question your integrity it will not matter how well you do the job. You could be the best computer programer, with a great amount of knowledge and expertise, but if you cheat the company, or cannot be counted on to make responsible choices and decisions, you are a liability rather than an asset.

"Character is not an inheritance: Each person must build it for him/herself." Author unknown

Life is a daily series of choices. The decisions we make and the actions we take demonstrate to others our integrity. When we treat others with honesty, responsibility, courage, compassion, and respect, we build a reputation that employers can depend on.

Parent Corner

Talk to Your Children About Your Family's Values

Explain to your children which values are important in your family. Here are some examples:

In our family, we all work together to get jobs done for the good of the family.

In our family, we talk to each other with respect.

In our family, we let others know where we are going so that they do not get worried.

In our family, we tell the truth.

These could go on and on, but it is important for your children to hear you say them. These are expectations that children need to hear often and be held accountable for. It is also a positive way to handle discipline. For example when two kids appear ready to get into an argument, remind them that in our family, we expect everyone to treat each other with respect and solve differences without hurting one another. Or when you ask your child to help with the yard work and they give you one of those faces or claim they have more important things to do, remind them that the are part of a family and that we all work together to get things done.

Saying, "If you don't have anything nice to say, don't say anything at all," over and over again will eventually sink in. It's a positive way of telling them to stop picking on one another. We hear adults say, "My Mom always said..." What do you want your children to say?
Early Childhood Activity

Jamaica's Find by Juanita Havill. Jamaica, a little girl, finds a toy dog and a hat in the park. She turns in the hat, but keeps the toy. Her mother tells her the toy probably belongs to a little girl just like her. He turns in the toy, meets the owner and finds a new friend.

Discuss: What it feels like to lose something. What you would do if you found something that did not belong to you.

Making good choices.

Read the book. Discuss the benefits to Jamaica for being honest (showing integrity)

Small group - Provide a variety of mediums: markers, colored pencils, crayons, pastels, paints and large drawing paper. Invite the children to draw/paint pictures of their favorite toys. Label the pictures.

Reading Materials

K-3
Mike Mulligan and His Steam Shovel, by Virginia Burton; Mike stays faithful to his old stem shovel, despite new machines.
The Legend of Bluebonnet, by Tomie dePaula; An Indian girl offers her precious doll to end drought and famine.
Mufaro's Beautiful Daughters, by John Steptoe; Tribal history is woven into a tale about pride going before the fall.

4-6
The Indian in the Cupboard, by Lynne Reid Banks; A young boy learns about life from an Indian who come to life.
Helga's Dowry: A Troll Love Story, by Tomie dePaula; Helga is so poor that her love will not marry her, when she works hard to become wealthy she has choices to make.
My Side of the Mountain, by Jean George; A 13-year-old tests his independence by living alone in the wilderness.

6-8
Stealing Home: The Story of Jackie Robinson, by Barry Denenberg; The first black baseball player's fight for equality.
The Sign of the Beaver, by Elizabeth George Speare; A 12 year-old, befriended by Indians must make a difficult choice.
Roll of Thunder, Hear My Cry, by Mildred Taylor; An unforgettable story of black pride and heritage.

- Peer Pressure
- Conflict Resolution
- Temperance
- Obedience
- Abstinence
- Moderation
- Restraint
- Adaptable

---

**PRACTICAL APPLICATIONS**

- Controlling one's temper.
- Eating and drinking what is good, not just what tastes good.
- Avoiding participating in gossip and name calling.
- Counting to ten or taking several deep breaths.
- Resisting the temptation to do wrong.
- Not talking back to teachers or parents.
- Share your feelings with someone you trust.
- Doing the right thing when parents and teachers are not around.
- Setting aside time for homework, in spite of distractions.
- Not hitting back.
- Thinking before you act.
- Believing that you can make a difference in your own life.
- Understanding that things don't just happen to you, but that you have some control over circumstances.

---

Every action you take is an expression of the choice you have made about the effect you want to have on the world..... Constance Dembrowsky
Activities

C= Community Activities  S= School Activities  F = Family Activities

**S** Bulletin board idea! Put a student figure going up stairs and on each step write techniques for self-control: such as, count to ten, STAR, stop and think, make wise food choices, consider the consequences, etc.

**CSF** Discuss verbal and nonverbal communication. Can nonverbal communication stir strong emotions in others? Which is harder for us to control?

**CSF** Discuss putting off short-term gratification for long-term goals. How does this relate to drinking, smoking and sex?

**CSF** Discuss ways we learn self-control at various stages in our lives.

**CSF** Have students collect/generate examples of both physical and verbal self-control. Create skits and role play situations that show the different consequences when people use or do not use self-control.

**CSF** Explain to students that feelings are OK, it's the way we respond to these feelings that can get us into trouble. It takes a lot of self-control to do things differently from the way we have done them before. Ask students to brainstorm a list of emotions then list good choice actions and bad choice actions for each emotion. Discuss the different consequences of each.

**S** Provide character awards for students as part of the graduation ceremony.

**SF** Ask students to describe what a conflict is. Discuss that to resolve conflicts it is necessary to make a plan to solve the disagreement or problem in a helpful, not harmful manner for everyone involved. Sometimes it takes a lot of self-control not to act in an angry manner, but instead to think about solving the problem without attacking the person. Read *The Wolf's Chicken Stew* and discuss the conflict and how it was resolved in that story.

**SF** Help students relate self-control to the expression of emotions. Read *On Monday When It Rained*. Have students write or discuss appropriate ways of expressing each emotion discussed in the book.

**CSF** Discuss the quote, "Discipline is doing what does not come naturally." Discuss the similarities and differences between self-control and self-discipline.

**CSF** Discuss how anger is only one letter away from danger.

**CSF** Teach children to take control of and responsibility for their own learning. Provide strategies that will help them address learning difficulties in a way that will help them control frustrated behaviors and replace them with helpful behaviors: for example: if students have trouble remembering verbal information while you are talking suggest that they take notes about, draw pictures of, or highlight information to remember.

**CSF** Discuss how characters in literature have displayed self-control. How would the end of the story been different if they had made other choices?
Subjects to Consider

**Health** - Identify foods that represent healthy choices. Ask students to chart and/or discuss how they feel when they eat healthy and exercise. Ask them to experiment by leaving out one unhealthy food they eat a lot of for one week, ask if they feel different.

**Social Studies** - Discuss examples of persons who lost their freedom and the control over their own lives. Ask students how they would feel if their choices were taken away.

**Physical Education** - Talk about athletics and the kind of self-control it takes to become good enough to get million dollar jobs. Point out that self-control is a learned skill, just like sports.

**Language Arts** - Write about an incident in which you practiced self-control and the outcome of that incident. Titles could include: I thought it over and decided not to do it, or I acted impulsively and regretted it.

Some ideas have been adapted from *Teaching for Character* by Dotson and Dotson.

**Science** - A dramatic demonstration of the spread of sexually transmitted diseases. Provide enough clear glasses for each student. In one tenth of the glasses put a one molar solution for Sodium Hydroxide, in the rest of the glasses put plain water. Fill all less than half way. Have the students mark their names on the glasses. Without telling students what is in the water have them move around the room sharing liquid with four other students by pouring one glass into the other and then pouring half back. Put a drop or two of phenolphthalein in each glass. The ones that turn red have the Sodium Hydroxide in them. Explain how many glasses “carried the disease” originally. Discuss how sexual diseases are transmitted. Tie this into a discussion of self-control.

Adapted from *Activities that Teach* by Tom Jackson.

**WOW World of Work**

As we travel from the world of home and school to the world of work we become more responsible for our own actions and success. The nurturing school or home environment is replaced in the workplace with greater expectations of independence and self-control. The following are examples of self-discipline in a mature, responsible employee:

- Behaving and performing from an internal desire to succeed, not because someone else stands over you to make it happen.
- Understanding and projecting oneself into another person’s world, therefore developing greater understanding, acceptance, and compassion for others.
- Making up one’s own mind about the boundaries of behavior and respecting those boundaries regardless of pressure from others.
- Being able to forgo one’s own pleasure and immediate gratification for the greater good.
- Setting goals and working hard toward them.
- Taking responsibility for one’s mistakes and working to correct the situation.

Adapted from *20 Teachable Virtues* by Unell/Wyckoff.
Early Childhood Activity

The Very Grouchy Ladybug by Eric Carle. A ladybug is very grouchy to a variety of animals as she travels seeking food. At each encounter she asks the animal if it wants to fight. She eventually ends up where she started and is invited by another ladybug to share aphids.

Discuss: sharing; being kind; what it means to fight; using self-control.

Read the book. Discuss how the ladybug put herself in a dangerous position; discuss thinking before you act.

Small group - Provide red paint, small paper bowls, pre-cut black dots and wing shapes and feelers, glue, and black pipe cleaners for legs. Invite the children to make ladybugs.

A special thanks to Judith Schulman for sharing her ideas in the monthly Early Childhood Activity section.

To Districts/Schools
Outside of Lee County

These Character Education materials were used in Lee County for the 1997-1998 school year as part of our districtwide pre-kindergarten through grade twelve initiative. If you would like to use these copyrighted materials for your school or district give us a call. We will be glad to help support this initiative; call The School District of Lee County (941) 337-8606.

Do students get angry with each other on the bus? How can you use self-control when other students are trying to get you angry?

Who controls the way you feel? What are some strategies for dealing with bullies?

Save your character words for next year.

We would like your Feedback about the Character Education Initiative!

Which parts of the newsletter were the most helpful to you?

In our classroom we discussed Character on an average of ____ times a month.

Character education has had a positive impact in my classroom. yes or no

Suggestions for next year.

Please send to Meg Krieg/Curriculum, call 337-8606, or e-mail.
What is Work Skills?

Work Skills is an extra curricular, enhancement activity for high school students interested in skilled, technical and engineering careers related to the construction, manufacturing and maintenance industries. It's not a class, but an opportunity to participate in projects sponsored by local industry.

Work Skills initiatives support four basic premises:

- There is a need for skilled, technical and engineering professionals.
- Students and educators are unaware of the diversity, opportunities and requirements for skilled and technical careers.
- Students need to possess a responsible work ethic.
- The private business sector can and will provide work and school based learning opportunities.

History

Locally, Southwest Florida is faced with a shortage of skilled workers in the construction, manufacturing and vehicle service industries. The Work Skills Program is a public school based initiative designed to address this need for skilled and technical workers. Originally funded by State “Break the Mold” grants, the Work Skills Program provides a variety of initiatives for high school students, teachers and administrators to become familiar with skilled trades and engineering careers. The program was piloted at Fort Myers High School during the 1996-97 school year and expanded during school year 97-98 to include Estero, North Fort Myers and Riverdale High Schools.

Goal

The Work Skills Program is designed to bridge the gap between the employer's needs and the student's skills by identifying transferable work skills, teaching those skills in a career-focused environment and validating a student's mastery of those skills. By providing a direct link between the high school and the workplace through school and work-based learning opportunities, the Work Skills Program can improve student motivation and academic performance and prepare students to choose and follow careers in skilled trades, technology and engineering. Through the strong support of over 60 local employers and professional organizations, Work Skills combines school-based enhancement activities and work-based learning opportunities to encourage student participation.
Program Components

Current Work Skills initiatives include: Project Work Skills, Student Work-Based Learning, Summer Institute for Educators and Transferable Work Skills ("Golden 25").

**Project Work Skills:** Several times throughout the school year, students in grades 10-12 work side by side with skilled tradespeople from local businesses to learn about technical and skilled trade careers. During school year 97-98 students completed industry designed projects in: electrical wiring, plumbing, carpentry, automotive technology, commercial construction, heating and air conditioning, auto cad, masonry, heavy equipment operation and golf course maintenance.

Student acceptance into the Work Skills program is based on career interest, academic success, attendance and teacher recommendation.

**Students must:**
- Have a sincere desire to learn about skilled trade career opportunities.
- Maintain a minimum GPA of 2.0.
- Have a good school attendance record.
- Demonstrate good conduct at all times.
- Attend all project and Work Skills events.
- Keep a Work Skills journal.
- Participate in showing appreciation to the business sponsors.
- Accept responsibility for making up missed classroom work.

**Work Skills Student Work-Based Learning:** During Summer break students will have the opportunity to gain work-based learning experience in a skilled trade related area. Business partners involved with the Work Skills Program will offer summer employment to interested students.

**Work Skills Summer Institute for Educators:** The purpose of the Work Skills Summer Institute is to familiarize teachers and counselors with skilled trades and technical careers available in southwest Florida. Educators spend one week employed in a helper capacity out "in-the field" with a skilled trade or technical trade employer. From this experience, they design two curriculum projects that will incorporate real world problems that they witnessed during their workweek.
"Golden 25" Work Skills: Local business leaders and educators met and chose the top 25 work skills that high school students should master. These skills are described as “transferable skills” due to the fact that they are applicable to almost any industry and future employment situation. The majority of these skills are also very relevant to what it takes to be a successful student. Work Skills students are expected to master these skills in order to receive a “Gold Card” that indicates successful completion of the program. Several local businesses recognize this Gold Card and offer hiring preferences and incentives to the holder of such a card.

The influence of the “Golden 25” has spread beyond the Work Skills Program. Many Lee County teachers are using them regularly in their classrooms and the “Golden 25” list can be seen prominently displayed in numerous local business offices.

The Work Skills "Golden 25":

- Demonstrates promptness and dependability.
- Understands the importance of workplace safety and health rules.
- Demonstrates good listening skills.
- Works effectively as part of a team.
- Has taken and passed a drug test.
- Demonstrates logical reasoning and analytical skills.
- Understands and practices good customer service skills.
- Responds promptly to instructions with a positive attitude.
- Demonstrates a responsible attitude toward work assignments.
- Follows the social expectations within the workplace.
- Possesses a valid Florida driver's license.
- Understands the effect of a criminal record on employment options.
- Shows initiative.
- Accepts change (flexible).
- Understands technical and trade opportunities and career paths.
- Demonstrates respect and tolerance for different races, cultures and sexes.
- Accurately uses common linear, weight and volume measurement tools.
- Demonstrates good time management skills.
- Demonstrates good organizational skills.
- Recognizes the need for continuing education.
- Solves ratio and proportion problems common to the workplace.
- Solves problems involving use of time increments (fractions).
- Solves workplace pertinent word problems.
- Solves basic math problems without calculator or pencil and paper.
- Correctly changes fractions to decimals and decimals to fractions.

- Developed by Lee County Business and Education Leaders August 15, 1996

STUDY SKILLS QUESTIONNAIRE

Read carefully each of the following questions and answer them honestly with a yes or no response.

1. I have a quiet place to study?
2. I write down all my assignments?
3. I want to make good grades?
4. I spend enough time studying?
5. I study the harder subjects first?
6. I pay attention in class and don't daydream?
7. I keep up with all my classwork?
8. I eat a well balanced breakfast?
9. I keep a neat and organized notebook?
10. I get enough sleep?
11. I always review material before a test?
12. I have the proper supplies when I go to class?
13. I am in good shape?
14. I take good notes in class and when I read to learn?
15. I set goals for myself?
16. I always read the summary at the end of the chapter first?
17. My friends are concerned about their schoolwork?
18. I am happy most of the time?
19. I am proud of what I do in school?
20. I join in class discussions?
21. If I'm absent, I call on someone for my homework?
22. I study the illustrations in the textbook?
23. I study some every night?
24. I take short breaks when I get tired?
25. I know the importance of a good education?
26. I test myself?
27. I use flash and index cards?
28. I ask the teacher for help if I don't understand?
29. I review often?
30. I am willing to make sacrifices to reach my goals?
TEST TAKING #1

Purpose: Assist students in becoming "testwise."

Materials: "Your Test Attitude"

Introduction: "Would you like to see television pictures of yourself taking a test? Watch a group of your friends testing and you will probably see yourself.

"Sweaty palms? Nervousness? Sleeplessness? Lack of concentration? Do any of these or possibly even other symptoms describe you as you walk into a classroom to take a test?"

Hand out "Your Test Attitude." Read the instructions and allow the students enough time to complete the survey.

After students have completed the survey discuss the results.

"What steps can you take to help prevent the classic test anxieties?

1. "Be prepared"—scouting motto works for testing. Confidence does great things to help get rid of testing fears.

2. There are test-taking hints for the two different types of tests - objective and subjective. We will learn those in later sessions.

3. Avoid last-minute reviews. Plan to review over a period of several days. Try to be so well prepared that you could go to a movie the night before a test. Cramming usually gains little for improving a test score.

4. Keep your regular schedule for sleep and meals.

"What happens if you've done all the right studying but upon entering the test room a panic attack for no real reason hits you.

Your heart beats like your chest is going to explode or your stomach feels queasy or you begin to perspire or you start breathing faster and shallower or your mind seems confused or agitated.
"Possibly all of these symptoms hit you. What can you do now? The old expression "Mind over matter!" could work for you.

"Learn to relax. You can relax anywhere. But it does require regular practice and use. Let's try it now. Pretend you are in a classroom ready to take a test.

1. Make yourself comfortable.

2. Close your eyes; focus on your breathing. Listen to the soft sound of the air as it flows in and flows out. Make sure you are "belly breathing."

3. After a minute or two of concentrating on your breathing, start counting up to ten inhalations and say "Relax" as you exhale. As you inhale say "one;" see the number one in your mind. Then as you exhale say the word "Relax" and see the word "RREELLAAXX" in your mind. Continue counting until you feel your mind is focused and not bothered by outside thoughts. The counting process is a good way to focus your mind and prevent outside thoughts from bothering you. It is difficult for a person with an active mind to focus his/her attention.

4. There are many different activities that students can use to focus attention and relax.

   1. Walk through an English garden
   2. South Pacific island beach.
   3. Hiking in the mountains.

   Use any one that works for you.

"Test fears are real and students must learn how to prevent them from disabling them at test times."

Summary: Remember:

I will be prepared for a test.
I can relax.
I can control my mind.
I can concentrate on my studies.
I can perform to the best of my ability.
YOUR TEST ATTITUDE

Directions: Below are statements that could relate to your feelings about taking tests. Read the statement thoroughly. Choose a letter from the continuum that best matches your own feelings about test taking. Place the letter in the blank at the beginning of the statement. There are no correct or incorrect answers.

A  B  C  D  E
Always Almost Sometimes Almost Never Never

1. The more important the test, the worse I seem to do. 
2. I like a book better if I don't have to read it for a class. 
3. I work best under pressure. 
4. Essay tests are easier for me than multiple choice exams. 
5. Being nervous while testing helps me to do better. 
6. I don't think it's fair that classes with labs should have tests in both the class and lab. 
7. When I am not prepared for a test, I get upset and do even worse than I really should. 
8. As I take an exam being nervous keeps me from doing as well as I could. 
9. Once I start a test, nothing distracts me. 
10. I do better in courses for which the grade depends primarily on one test. 
11. I look forward to taking tests and exams. 
12. By the time I start a test, I am so tired from worrying that I don't care how well I do. 
13. In a class where I have been doing poorly, my fear of getting a bad grade on the test reduces my ability to do well. 
14. I would prefer to take self-paced classes over more traditional classes with three tests and a final exam.
16. I may seem to be nervous before a test; but once I begin to test, I forget all about being nervous.

17. It is more fun for me to take a hard exam rather than an easy one.

18. The pressure of trying to finish a test on time causes me to do worse than others in my class.

19. If I were given a choice, I would rather write a paper than take an exam.

20. My mind seems to go blank at the beginning of a test, and it takes me a few minutes for me to recover and start to answer the questions.

21. I seem to do better on the more important tests.

22. Getting a good night's sleep is more important to me than staying up and cramming for a test.

23. If I have difficulty on a hard question at the beginning of an exam, it upsets me enough that I have trouble answering even the easy questions.

24. I don't think closed-book tests are as fair as open-book exams.

25. I don't seem to understand exam questions, and I must reread them many times so they will make sense.
SAMPLE TEST

Follow all directions exactly. Work this test in 20 minutes.

I. If any of the following statements are True, circle F after it.

1. Only smart students do well on tests. T F
2. A course in study skills is an important part of all school programs. T F
3. Tests never scare people. T F
4. This material guarantees you an A on every test. T F
5. Nobody feels that tests are fair. T F

II. Answer these problems in fractional form.

1. \(.5 + .25 = \) __________
2. \(.75 - .25 = \) __________
3. \(.25 \times .25 = \) __________
4. \(.5 \div .25 = \) __________

5. What is the next number in this sequence: \(\frac{1}{8}, \frac{2}{8}, \frac{3}{8}, \frac{4}{8}, \) __________

III. Complete each of the following sentences with a word beginning with the letter a.

1. Students who know how to take tests often find them ____________.
2. Among the tests that can have the biggest influence on your life are those that we call ____________.
3. Since you are studying this material, you probably take tests ____________.
4. Students who have scored much higher on earlier tests find that when they face a new one, they feel it will be ____________.

IV. In the following statements, underline each noun that is a subject, circle each subject that is not plural, x out each noun that is not a subject, and put a dot beside every subject that is not a noun.

1. Teachers always give tests when students least expect them.

2. Tests are sometimes used as punishment.

3. Many students are afraid of tests because they did not study.
V. Arrange the answers to these problems in numerical order, biggest to smallest.

1. \( 7 + 4 = \) ______
2. \( 15 \cdot 20 = \) ______
3. \( 3 + 3 = \) ______
4. \( 16 \div 4 = \) ______
5. \( 1 \times 7 = \) ______

VI. In these "fill-in-the-blank" sentences, do not fill in the blanks.

1. You are probably studying this material because you are ____________ about taking tests.
2. Students who know how to take tests are called _____________.
3. The best pattern to follow for studying and test-taking is preview, _____________, review.
4. Session II of this material details hints about taking objective types of _____________.
5. If you have filled in the blanks in the above questions, you are in ________________.

VII. With a pencil, connect the words in Column A with those in Column B that have the same number of letters.

<table>
<thead>
<tr>
<th>A</th>
<th>B</th>
</tr>
</thead>
<tbody>
<tr>
<td>worry</td>
<td>pencil</td>
</tr>
<tr>
<td>study</td>
<td>scale</td>
</tr>
<tr>
<td>percentage</td>
<td>wrong</td>
</tr>
<tr>
<td>right</td>
<td>pen</td>
</tr>
<tr>
<td>try</td>
<td>oral</td>
</tr>
<tr>
<td>write</td>
<td>test</td>
</tr>
<tr>
<td>answer</td>
<td>worry</td>
</tr>
<tr>
<td>figure</td>
<td>number</td>
</tr>
<tr>
<td>survey</td>
<td>directions</td>
</tr>
</tbody>
</table>
VIII. In the following sentences, circle the words that do not contain an a.

1. Define what is meant by being testwise in terms of the intelligence of the test taker, the ability to read instructions, and the approach to the test itself.

2. Outline the best procedure for studying and for taking tests.

3. Compare and contrast the difference between the way you take tests and the way a testwise student does.

4. Explain why you are studying this material.

5. The instructions told you only to circle the words that did not contain an a. If you followed those instructions, why? If not, why not?

IX. Define the following words that have fewer than four letters.

1. perfect ____________________________
2. fear ____________________________
3. contrast ____________________________
4. try ____________________________
5. grade ____________________________

X. To this list of words relating to testing, add six relating to history.

grades ____________________________
review ____________________________
test ____________________________
XI. The following paragraph contains a number of errors. Ignore the errors and circle any word that applies to test taking.

Tests (1) is a way of grading students. (2) Being as they are a means of judging a (3) students' potential, (4) you ought to be (5) admiring various elements (6) regarding as how tests can be (7) of beneficial to anyone as a test taker. Testwise students know how to approach (8) exams, being used to the process. Once you have learned how to take examinations, it will be easier for you to (9) do good on tests. (10) Consequence shows that ability to pass examinations (11) will be greatly enhanced.

1. __________________________ 7. __________________________
2. __________________________ 8. __________________________
3. __________________________ 9. __________________________
4. __________________________ 10. __________________________
5. __________________________ 11. __________________________
6. __________________________ 12. __________________________

XII. Read all these questions before answering any of them. Answer by circling the correct letter, or letters.

1. To do your best on a test you should
   (a) Study.
   (b) Preview first.
   (c) Be careful.
   (d) Not panic
   (e) All of the above.

2. Test taking is
   (a) Hard.
   (b) A skill in itself.
   (c) Easy when you know how.
   (d) Something that takes practice.
   (e) All of the above.

3. You can do well on a test if
   (a) You haven't studied.
   (b) You are scared.
   (c) You've done poorly before.
   (d) You don't know the answers.
   (e) All of the above.

4. This material will
   (a) Not give you all the answers.
   (b) Help develop your study skills.
   (c) Help you feel better about tests.
   (d) Share secrets of testwise students.
   (e) All of the above.

5. Do not answer any of the above questions. Answer only this item. You have now learned that
   (a) You don't follow instructions as well as you thought you did.
   (b) You do follow instructions well.
   (c) Sometimes all the answers on a multiple-choice test are "correct."
   (d) Instructions are a crucial part of any test.
   (e) None of the above.
INSTRUCTIONS?

The following are not the answers to the preceding quizzes! Rather, they are analyses of the instructions to those quizzes.

I. The instruction was to circle F for every true answer. Did you do that?

II. The instructions asked for answers in fractional form. What form did you use?

III. The test taker was directed to use only words beginning with e. How many did you think of?

IV. Did you answer each statement by filling in the blank? Or did you follow each direction. Read the instructions again, word for word, to see how you did.

V. In what numerical order did you put your answers?

VI. Anyone who filled in the blanks failed this test.

VIII. Did you answer each question--or instead circle all the A-less words, as the instructions asked?

IX. How many words did you define? According to the directions, "try" is the only word you should have.

X. You could have added any six words, as long as they had nothing to do with tests or grades.

XI. What did you do here--correct the grammar or circle all test-related words?

XII. If you answered any question before 5, your answer to the last question is 5a, c, and d. If you did not answer any question before 5, your answer is 5b, c, and d--and Congratulations!
Students who are testwise would have done perfectly on all of those ridiculous examples because they would have read the directions completely. It is *that* important to read and understand the instructions provided with any tests.

Any time you do not understand all of the instructions—*ask*! It is to your advantage to guess on some tests, but it is *never* to your advantage to guess at instructions. The worst that can happen when you raise your hand for help is that the teacher will say, "You have to figure that out for yourself"—but you are no worse off. The best that can happen is that you will receive help that will enable you to work the test properly—in which case, you are better off.

If the test is an oral one, and the teacher dictates the questions, you need to pay even closer attention. Jot down a few key words of each question so that you can remember them should you have to go back. If you need to, ask the teacher to repeat the question. And again, if you are confused, ask, no matter how silly you may feel. You will feel even sillier if you mess up because you didn't understand something.
PREVIEW, VIEW, REVIEW

On the board write "Preview, View, Review." Using the techniques indicated in these three words can help you do better taking tests.

Preview

Before beginning a test, read or listen to the instructions carefully. No matter what the test, the instructions are part of it. You could also take note of the following:

1. Did the teacher say write on every line?
2. Where was I supposed to put my name? Was it last name first?
3. For multiple-choice, underline, circle, or $\times$ or put the right answer or wrong answer?
4. Time limit?
5. Use pen or pencil?
6. Work the test in any order?
7. Use complete sentences for essay questions?
8. Is it safe to guess?

The next step for Preview is to survey the test and allot the time for each section. Remember different types of questions require different amounts of time to answer. Also, as you survey the test if you think of important items jot them down on scrap paper or in the margins for further recall.

The last step of Preview is to relax. There are some exercises to help you relax. Here are a couple.

1. Take a deep breath, close your eyes, and count to ten. Repeat three times.
2. Clench every muscle in your body, hold your breath, count to ten, gradually relax each section of your body from your head to your toes, start breathing slow deep breaths.

Many students think Preview wastes time, but test experts all tell us your understanding of the instructions and your overview of the questions enable you to contend with the test effectively.
Now you are ready to take the test.

1. Answer easiest questions first. This will give you time to mull over the harder ones.

2. Go back to the harder questions. Reread and think about them trying to relate them to something you've learned in class. Don't think "I can't do it;" instead think "I can do it!" Open your mind and let the ideas flow out. Look for clues in the question itself. For example, sometimes there is only one answer that will fit grammatically.

3. If you find something on the test that you do not understand--ask!

4. Remember your time allotments. If you find a question that you cannot answer often trying all the above items--let it go. However, if the test form allows, put something down that shows you made an attempt; and you may get some credit for showing you tried.

Review

No matter how confident or insecure you felt about a test, nothing is ever lost by going back over your test answers. Look for:

1. Two answers circled or darkened.
2. Numbers look like the numbers you intended them to be.
3. Did you miss any answers.
4. Is your writing legible.
5. Use all the allowed time. Sometimes this makes a good impression.
GENERAL TEST-TAKING TIPS

1. Arrive early and make sure you have all the needed supplies.

2. Make sure you understand the instructions. If anything is unclear, ask. Underline key words in the instructions. Make certain your name is clearly written on answer sheet.

3. Survey the test before you start. If you think of something, write it down.

4. Plan your time. Pace yourself so you will have enough time to answer all the questions.

5. Do the easier questions first so you can have more time for the more difficult ones.

6. Read questions carefully, underlining key words or times, and decide what you are expected to do. Make certain your answer responds directly to what the question asked.

7. Attack each question systematically.

8. Draft your answers so you can find mistakes more easily.

9. Take your time, don't tense up.

10. Have a strategy for regaining confidence and control in case you panic during the test.

11. Write something down for every question.

12. Review, check, proofread, and correct your test answers before handing it in.

13. Use all your time.
Introduction - Human Bingo

Goal: To help students get acquainted.

Instructional Objective: Students will get to know each other.

Materials: 1. Handout "Human Bingo"

Procedures: 1. Follow instructions on handout "Human Bingo"
HUMAN BINGO

Directions

1. Find a person who meets the qualifications of each item below.
2. Have that person sign your card in any square.
3. Write the letter of or information you found out in the same square.
4. You cannot use any person or any letter more than twice.

Find a Person ....

a. last name begins with the same letter as yours
b. born in same state as you
c. born in different state
d. owns a cat
e. owns a dog
f. is on a diet
g. has never smoked
h. shares your favorite food
i. lives in an apartment
j. has been to a foreign country
k. is in a physical fitness program
l. shares your favorite TV program
m. was born in this state
n. wearing something the same color as you
o. has the same color eyes as you
COMMUNICATION SKILLS

Purpose: To assist students in understanding the importance of good communication skills.

Materials: Communication Skills Checklist

Introduction: First define communication. Allow students to make their own suggestions. As they continue to suggest "talking," model nonverbal communication with them. For example, stand in the front of the room and demand silence without saying a word. Finally, define communication as "understanding between two or more people." Introduce the Communication Skills Checklist. Allow students enough time to complete.
COMMUNICATION SKILLS CHECKLIST

Introduction: How good are your communication skills? Remember to communicate well you need the following skills: listening, speaking, and writing. Let's see how well you do by evaluating your communication skills. Respond to the following statements according to the way it describes you by placing the appropriate letter by each statement.

"A" = Always  "S" = Sometimes  "N" = Never

DO YOU:

___ Think about what you are going to say before you say it?
___ Have a good vocabulary?
___ Avoid using complex words that your listener may not understand?
___ Make your points in a clear and concise order?
___ Listen attentively while others are speaking?
___ Write exactly what you want to say or mean?
___ Ask a speaker questions if you are not sure what he/she is trying to say?
___ Restate a speaker's ideas to be sure you have understood the message?
___ Build on you listener's past knowledge?
___ Try to communicate on a higher level with those you communicate with more often?
___ Make a habit of sending constructive messages?
___ Avoid using slang?
___ Use good eye contact when talking to others?
___ Reread your written communications in order to avoid mistakes?
___ Avoid any type of behavior that blocks communication?
___ Check your grammar and spelling in your written communications to insure correctness?
___ Use positive body language to enhance your verbal messages?
___ Reply to notes and letters in a reasonable amount of time?
___ Use neat handwriting when communicating through letters and memos?
___ Try to speak to others in a manner that makes them feel at ease?

Give your self two (2) points for each "A" response and one (1) point for each "S" response. Add up your points. If you scored 35 or more you are an excellent communicator; 30-34 very good; 25-29 good; 24 or less, you need to practice your communication skills.
INTERPERSONAL SKILLS

Purpose: To assist students in developing interpersonal and social skills needed for positive interaction with others.

Materials: Getting Along With People - A - Worksheet
Getting Along With People - B - Worksheet

Introduction: "More people lose their jobs because they cannot get along with others, than because they do not perform the skills required. Snobbishness, quarreling, and gossiping are three activities workers must avoid. Getting along with others is not always easy. Often one must work as hard at getting along with others as they do with the job itself.
"Let's brainstorm some guidelines for getting along with others."

Examples:
- Treat others as you wish to be treated.
- Do not gossip.
- Be cheerful.
- Avoid sarcastic remarks about other people
- Be a good listener.
- Practice good manners at all times.

Hand out "Getting Along With People - A" Worksheet.

After students complete the worksheet, go over each statement. Enlist class participation.

Follow-Up: Homework assignment - "Getting Along With People - B" Worksheet.

During the following class session, divide the class into small groups and have them role play incorrect and correct ways to handle the different situations.

Note: This represents an excellent time to have the personnel director of a local company speak to the class to reinforce the concept that interpersonal skills play an important role in the workplace.
# GETTING ALONG WITH PEOPLE - A

**Directions:** Read each statement below. Mark the column which best describes your feelings. Be honest.

<p>| | | |</p>
<table>
<thead>
<tr>

Suppose you come upon each of the following situations. What should you do? Write your answer on the line.

1. You saw Mr. Smith and Mrs. Jones, who work in your office, having lunch together.

2. You feel grumpy. Alice says, "Hi."

3. Joe whistles all the time. You cannot think.

4. You promise to work on Saturday, but Ann asks you to go shopping.

5. Marvin interrupts all the time when you are talking.

6. Art asks you to do his work so he can go fishing.

7. You want to get into a group, but they do not want you.

8. Mae said one thing, you know what she said is not true.

9. Bill and Jim called you a name which you do not like.

10. You work with an older lady who loves to talk about her grandchildren.

11. April asks dumb questions all the time.
12. Two of the people you work with are angry at each other because of a misunderstanding. You
know the whole story. ________________________________

13. Mary wants you to help her; Tom needs your help, too, at the same time. __________________

14. The boss is in a bad mood. You want the weekend off. ________________________________

15. The smoke from your friend's cigarette bothers you. ________________________________

GOAL SETTING/DECISION-MAKING

The goal of this unit is to provide counselors and classroom teachers with ready-to-use activities that can be utilized in small groups or classroom settings.

These Goal-Setting and Decision-Making activities are designed to give the instructor a tool to use in helping students acquire greater understanding of themselves, their interests, their abilities, and their values in terms of setting goals and making decisions.

Goal-Setting and Decision-Making requires a process of integrating two constructs: Self (values, interest, abilities, lifestyle) and the world of work (career exploration and selection). The activities in this unit will assist students in making educated career choices and acquiring a better understanding of a whole life pattern as it relates to their needs, work, and lifestyle.

The objectives of these Goal-Setting and Decision-Making activities are to enable students to:

- Identify career activities as a way to reach life goals.
- Demonstrate their ability to use the decision-making process.
- Relate personal characteristics in determining and evaluating career alternatives.
- Identify major influences that affect career decisions and lifestyle selection.
- Make a step-by-step education plan of action enabling them to reach their goals and determine alternatives.
- Determine the difference between: 1) short-term and long-term goals and 2) critical and routine decisions.
- Learn how to solve problems and make decisions in a group setting.

Goal-Setting and Decision-Making is something most of us do throughout our lives--it is a continuing process of changing values, lifestyles, interests, careers, and wants and needs.
LISTENING SKILLS

Purpose: To assist students in gaining knowledge of effective listening and attending skills.

Materials: Listening Quiz
Flip Chart/Marker Board/Overhead
Attending Skills Handout

Introduction: Teacher introduces the lesson as a follow-up to the Communication Skills session.

"A study of people in various occupations shows that 70 percent of their waking time is spent in communication. Here's how we spend our time: (illustrate on flip chart, overhead, or board)

![Waking Time Pie Chart]

Listening - 45%
Talking - 30%
Writing - 9%
Reading - 16%

"Notice that communication has two major components or parts: expression (talking) and listening, or the give and the take. How well we listen greatly affects our:

- Quality of friendships.
- Family relationships.
- Effectiveness in school or work.

"How well do you listen? Here's a quick listening quiz to find out." Hand out the "Listening Quiz."

Follow-Up: "Although we like to think differently, few of us are really good listeners. Researchers claim that 75 percent of oral communication is ignored, misunderstood, or quickly forgotten. Rarer still is the ability to listen for the deepest meanings in what people say. Listening is a combination of HEARING and INVOLVEMENT. You may say, 'My friends LISTEN to what I say; my parents HEAR me talk.' Get the difference ???
"If listening is the major portion of communication and the majority of us do not listen well, what can be done to improve our listening abilities? The handout I am going to give you now includes three clusters of skills that relate to improving your listening skills. Today we'll look at ATTENDING SKILLS."

Handout: Attending Skills

Go over the handout with the students.

Continue with the following activity:

Divide students into pairs. Instruct them to place their hands, palms up, on their knees; sitting facing each other, close enough that knees almost touch but do not. Ask one of the pair to look at the other without talking, laughing, or looking away. Try to have students continue in this pose for three minutes.

"Attending in communication is giving your whole person, physically, to the other. It has tremendous impact. It shows you are interested in what he/she has to say. Nothing can make you feel better than when you are trying to say something and knowing you have the full attention of the listener.

"Attending is often one of the most effective behaviors we can offer when listening to someone. Make a conscious effort to attend to someone important to you today. Watch for any positive behavior responses."
LISTENING QUIZ

One of the most important parts of communication is listening. Poor listening habits are usually the cause of communication problems. Rate your listening habits on the scale below by circling one of the numbers (1-5) after each item.

<table>
<thead>
<tr>
<th></th>
<th>USUALLY</th>
<th>OFTEN</th>
<th>SOMETIMES</th>
<th>NOT USUALLY</th>
<th>HARDLY EVER</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. After only a short period of listening, I start thinking about what I’m going to say next.</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>2. If I don’t like the person, I don’t really listen to what he/she is saying.</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>3. I interrupt others before they are finished talking.</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>4. I fake attention.</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>5. I talk mostly about myself.</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>6. I ask questions.</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>7. I give other people a chance to talk.</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>8. I try to see things from the other person’s point of view.</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>9. I maintain good eye contact when listening.</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>10. I get so busy taking notes, that I miss some of what is said.</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>11. I get distracted easily.</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>12. I let my mind wander or I daydream when someone is talking.</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
</tbody>
</table>

Add the circled numbers to get your score.

45-60 You are a good listener. More than likely, people enjoy talking to you and being with you.

31-44 Not bad, but there is room for improvement.

12-30 You need to improve your listening skills. You have probably lost some friends or made mistakes at work because of your poor listening habits.
ATTITUDE

Purpose: To assist the students in learning the importance attitude plays in their success.

Materials: Attitude Checklist
Study Skills Questionnaire

Introduction: Introduce the idea that attitude makes the person. Explain how a positive attitude results in success, while a negative one can result in anger. Assign the Attitude Checklist, then the Study Skills Questionnaire.

Follow-up: Go over the checklist, then the questionnaire. Discuss or role play different situations and how attitude can get the student in or out of trouble. For example, a student/teacher conflict, student/student, and parent/student. Go through the entire questionnaire. Many good, open discussions can result in finding solutions. Allow other students to help with the bad attitudes. Stress the idea: "If you believe it will happen, it will. If you believe it won't happen, it won't."
ATTITUDE CHECKLIST

Directions: Consider each of the following questions carefully and try to answer with an honest yes or no. Write a Y for yes or N for no on the line provided. If after careful consideration you can't make up your mind then write NT for not sure.

1. Are you in school only because you have to be?
2. Do you dislike more of your courses than you like?
3. Do you dislike more of your teachers than you like?
4. Do you arrive late or cut class frequently?
5. Are you certain there are some classes that you will fail?
6. Are you convinced you are frequently picked on or treated unfairly?
7. Do you believe school is a waste of time?
8. Are most of your classes boring?
9. Does studying or homework upset you?
10. Are you unable to bring yourself to study or to do assignments?
11. Are school and studying less important than most of the things you have to do?
12. Are you grouchy, argumentative, belligerent, or difficult to get along with at school?
13. Are you withdrawn or fearful in class?
14. Do you arrive at midterm or final exams with a massive amount of work undone?
15. Do you regularly miss assignment deadlines?
16. Are you secretly pleased or relieved when others do poorly?
17. Do you panic at exam time?
18. Are you frequently absent with minor ailments or because you are tired?
19. Do you rely on others for completing assignments?
20. Do you actively seek excuses to miss class?
21. Generally speaking, do you consider yourself a failure in school?
22. Do you feel you are not as bright as most other students?
23. Are you frequently in trouble at school?
24. Do you feel that no one in school likes you?
25. Do you sneer at or make fun of students who do well?

Follow-up: If you have more than just a few answers with Y or many NT answers, it would be a good idea for you to review your general attitude toward school. You should probably review your feelings and outlook on school with a school counselor or other professional, your parents, or a trusted friend.
STUDY SKILLS QUESTIONNAIRE

Read carefully each of the following questions and answer them honestly with a yes or no response.

1. I have a quiet place to study?
2. I write down all my assignments?
3. I want to make good grades?
4. I spend enough time studying?
5. I study hardest subjects first?
6. I pay attention in class and don't daydream?
7. I keep up with all my classwork?
8. I eat a well balanced breakfast?
9. I keep a neat and organized notebook?
10. I get enough sleep?
11. I always review material before a test?
12. I have proper supplies when I go to class?
13. I am in good shape?
14. I take good notes in class and when I read to learn?
15. I set goals for myself?
16. I always read the summary at the end of the chapter first?
17. My friends are concerned about their schoolwork?
18. I am happy most of the time?
19. I am proud of what I do in school?
20. I join in class discussions?
21. If I'm absent, I call on someone for my homework?
22. I study the illustrations in the textbook?
23. I study some every night?
24. I take short breaks when I get tired?
25. I know the importance of a good education?
26. I test myself?
27. I use flash and index cards?
28. I ask the teacher for help if I don't understand?
29. I review often?
30. I am willing to make sacrifices to reach my goals?
THE ME POSTER

Purpose: To enable students to explore themselves and appreciate their uniqueness.

Materials: Posterboard
Magazines
Art Supplies

Introduction: In order to explore student's uniqueness, they must be provided with an opportunity to be creative. This exercise can be done with paper and pen or can become an involved seeking-and-discovering exercise with posterboard, magazines, and markers. In either case, allow students ample time to think and complete the work properly.

Instruct the students to reveal themselves on paper. They are to create a collage of words and images. Have them write, draw, and/or cut out words and pictures that describe themselves. They should also be required to write a paragraph, poem, rap, etc., about themselves.

Follow-Up: Have the students present their posters to the class. Ask questions to draw them out and praise something unique to build their self-esteem. This is critical at this point in the class.
Establishing Priorities

Establishing goals for your life also involves establishing priorities. Suppose, for instance, that you want very much to become a fashion designer, but you are failing English. Your immediate priority is to figure out how to pass English. You recognize that if you don’t pass the course, you will not graduate from high school. Very few employers will hire someone who hasn’t graduated from high school.

A typical list of things to do follows. Pretend that you must arrange them in order of priority. Put the most important item first.

- Get a date for Friday night
- Clean up my room
- Change the strings on my guitar
- Study for the history midterm exam to be given tomorrow
- Buy tickets to next Sunday’s concert
- Explain to the coach why I missed practice yesterday
- Go shopping for jeans
- Complete the algebra problems that are due tomorrow
- Talk to my parents about increasing my allowance
- Recopy my English essay that is due by fourth period today

Although priorities will vary among people, most students will agree that the English essay, the algebra problems, the history exam, and the discussion with the coach are very high priorities. The exact order of these priorities would depend on factors like the following:

- How long the English essay is and whether you have a study hall before fourth period
- How much studying remains to be done for the history test
- How long the algebra problems should take to complete
- How upset the coach gets when you miss practice

At any given time, some activities are more important than others. Once you get in the habit of establishing priorities, you can use this skill to set goals for yourself.

INTEREST, APTITUDES, AND ABILITIES

Purpose: To show students how interests, aptitudes, and abilities relate to career planning.

Materials: "Self-Awareness" Worksheet

Introduction: "The knowledge or self enables individuals to make better decisions--not only personal decisions, but also career decisions. One needs to understand and accept uniqueness of self in order to make sound decisions. An interest inventory or self-awareness test will reveal useful information." Assign the self-awareness test.

Follow-Up: Discuss the assignment. Have students come up with some careers that might allow them to do these things while they earn a living.
1. List ten activities you like to do.

2. Rank them according to what you enjoy the most to the least.

3. Then, check whether you do the activity alone or with others, whether money is needed, whether a skill is required, whether you might be doing this activity ten years from now.

4. Finally, add up your checks in each column and put the number in the TOTALS box.

<table>
<thead>
<tr>

5. Using your totals, what can you conclude about your present lifestyle and what you enjoy doing?

6. What might this indicate about the kind of career choice you could make?
LEARNING ABOUT YOURSELF

Purpose: To enable students to discover who they are and to learn how their personal interests influence their career choice, and what they do in their leisure time.

Materials: "What Are Your Personal Interests"

Introduction: This activity is designed to help you learn more about yourself and the changes that take place as you grow in your personal development and relationships. Your personal interests can help you choose or identify occupations that will be interesting to you.
### WHAT ARE YOUR PERSONAL INTERESTS

**Directions:** Look at the statements below and place a check to indicate your level of interest using the following scale:

- VM - very much
- SW - somewhat
- PN - probably not
- NAA - not at all

<table>

Goals

To explain goal setting procedures to students.

Instructional Objectives: Students will learn and practice goal setting procedures.

Materials:

1. "Goal Setting" Teacher Discussion Sheet
2. Handout - Taking a Look at Yourself
3. Handout - Establishing Priorities
4. Teacher Introduction to Goal Organizer Sheets
5. Handout - Sample Goal Organizer
6. Handout - Goal Organizer

Procedures:

1. Share information on teacher discussion sheet "Goal Setting"
2. After introduction to goal setting distribute handout "Taking a Look at Yourself." Have students complete and discuss.
3. Have students complete handout "Establishing Priorities."
4. Lead discussion based on information contained in "Teacher Introduction to Goal Organizer Sheet"
5. Distribute handouts "Sample Goal Organizer" and "Goal Organizer."
When you define your goals, you provide yourself with a very important sense of direction. You become sure about where you are heading and what you need to achieve in order to get what you want out of life.

Explain that many times people do not make action plans for their lives out of ignorance of fear.

Social Psychologist Dr. A. H. Maslow wrote “Let us think of life as a process of choices, one after another.”

“Cheshire Puss, Alice asked rather timidly. "Would you tell me, please, which way I ought to go from here?"

“That depends a good deal on where you want to get to,” said the cat.

“I don't much care where - ” said Alice. "Then it doesn't matter which way you go," said the cat.

Lewis Carroll
Alice in Wonderland

When you don’t plan a direction in life you make a choice that is, NO CHOICE.

This can lead to dull and sometimes sad consequences.

If you were to talk with the best students in your class about school, you would find that the majority of them have thought about their short-term and long-term goals. Typically, the best students define good grades as one of their most important short-term goals. Being accepted into college or getting a particular job is often one of their long-term goals.

Let’s examine the role your study habits may play in helping or hindering you in attaining your goals.
EVALUATING YOUR STUDY HABITS

Understanding how you study is an important step in the process of improving your study habits in order to achieve academic goals. The word study includes doing homework and preparing for tests.

The following checklist will help you see where you need improvement. Be honest with yourself. Fill out the checklist to reflect the way you are, not the way you think you should be.

<table>
<thead>
<tr>
<th>Study Habits Checklist</th>
<th>Yes or No</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Do you have goals for yourself?</td>
<td></td>
</tr>
<tr>
<td>2. If you have goals, are you working toward achieving them?</td>
<td></td>
</tr>
<tr>
<td>3. Do you usually have all the supplies you need to do your work at school?</td>
<td></td>
</tr>
<tr>
<td>4. Do you usually have all the supplies you need to do your work at school?</td>
<td></td>
</tr>
<tr>
<td>5. Do you usually write down your assignments?</td>
<td></td>
</tr>
<tr>
<td>6. Do you usually remember instructions?</td>
<td></td>
</tr>
<tr>
<td>7. Do you usually study in a quiet place?</td>
<td></td>
</tr>
<tr>
<td>8. Do you usually study without a lot of interruptions?</td>
<td></td>
</tr>
<tr>
<td>9. Do you have a written weekly schedule?</td>
<td></td>
</tr>
</tbody>
</table>

If your answers are mostly "yes," you probably have a head start on achieving your academic goals. If you answered "no," you may want to examine the affect of poor study habits on your long-term goals.
Establishing Priorities

Establishing goals for your life also involves establishing priorities. Suppose, for instance, that you want very much to become a fashion designer, but you are failing English. Your immediate priority is to figure out how to pass English. You recognize that if you don’t pass the course, you will not graduate from high school. Very few employers will hire someone who hasn’t graduated from high school.

A typical list of things to do follows. Pretend that you must arrange them in order of priority. Put the most important item first.

- Get a date for Friday night
- Clean up my room
- Change the strings on my guitar
- Study for the history midterm exam to be given tomorrow
- Buy tickets to next Sunday’s concert
- Explain to the coach why I missed practice yesterday
- Go shopping for jeans
- Complete the algebra problems that are due tomorrow
- Talk to my parents about increasing my allowance
- Recopy my English essay that is due by fourth period today

Although priorities will vary among people, most students will agree that the English essay, the algebra problems, the history exam, and the discussion with the coach are very high priorities. The exact order of these priorities would depend on factors like the following:

- How long the English essay is and whether you have a study hall before fourth period
- How much studying remains to be done for the history test
- How long the algebra problems should take to complete
- How upset the coach gets when you miss practice

At any given time, some activities are more important than others. Once you get in the habit of establishing priorities, you can use this skill to set goals for yourself.
III. Teacher Introduction to Goal Organizer Sheets

When Jodi was in fifth grade and went to her first high school football game, she knew that she wanted to be a cheerleader someday. Being a cheerleader seemed exciting and glamorous to Jodi.

By the time Jodi entered high school, she was aware that there were girls in her class who were more coordinated and, perhaps, more popular than she was. Most of them also wanted to become cheerleaders. This did not discourage Jodi. She was certain that she would become a cheerleader.

To make the squad, Jodi realized that she would have to work very hard. She would have to be able to do each cheer better than anyone else trying out. She knew that she would have to project her enthusiasm, her personality, and her spirit.

Jodi also realized that she had to make sacrifices. Instead of spending her free time with her friends after school, Jodie worked for at least an hour practicing the cheers and routines. After mastering one cheer, she would begin preparing and practicing the next one.

Jodi's practice and preparation paid off. She was selected to be on the freshman cheerleading squad and, later, she became the captain of the varsity squad.

You, too, can get what you want. Like Jodi, you must first establish goals and then work to achieve them. Jodi's long-term goal was to be a cheerleader, and her short-term goals were to master the cheers. You will find that short-term goals are necessary in order to achieve long-term goals.

Let's assume that you know what you want to do when you finish school: you have decided to become a veterinarian. To become a veterinarian, you probably know that first you must graduate from high school with good grades. After high school you must go to college and get good grades there. Finally, you must be accepted at a school of veterinary medicine. Because so many students want to become veterinarians, getting into such a school is extremely difficult. The programs are highly competitive, and only the best students are accepted.

Once you realize that becoming a veterinarian is not an easy process, you are faced with the challenge of figuring out how to achieve your goal. Here's the challenge:

**Long-Term Goal:** To become a veterinarian

**Short-Term Goals** (These goals may be monthly or yearly, but they must be achieved in order to reach the long-term goal.):

1. Take the required science courses.
2. Get good grades throughout four years of high school.
3. Impress your teachers with your performance so that they will recommend you for college.
4. Begin saving money for college expenses.

If you don't have any long-term goals, don't be discouraged. This is perfectly normal for a young person. Begin by getting used to thinking about your future. Once you do set some long-term goals for yourself, don't be afraid to change them. It is normal to change goals as you mature.
Here is a sample Goal Organizer. It has been filled out to show you how a typical student might establish his or her goals.

After you understand how the sample Goal Organizer has been filled out, complete your own Goal Organizer.

If you do have long-term goals, fill them in. If not, focus on short-term goals such as getting a good grade in your science class. Remember that a good high school record will permit you to choose what you want to do with your life.

Please note that weekly and daily goals have also been filled in on the sample Goal Organizer. Students who choose to establish daily and weekly goals for themselves will become "super organized." They probably will find that they have more free time than they realized!
### SAMPLE GOAL ORGANIZER

**LONG-TERM GOALS**

1. Graduate from high school with a B average or better.
2. Become a starter on the varsity basketball team.
3. Qualify for a college scholarship.
4. Become a lawyer.

**SHORT-TERM GOALS**

1. Receive a minimum of B on the next English book report.
2. Complete a review of the first six chapters in the history text.
3. Copy biology notes for the two days absent last week.
4. Receive a minimum of B on the next algebra test.

**WEEKLY GOALS**

1. Complete all science problems by Thursday.
2. Compare history notes with Joan.
3. Read a minimum of thirty pages in the novel for the next book report.
4. Review Spanish vocabulary from previous weeks.

**DAILY GOALS**

1. Check to make sure I have written down all assignments.
2. Be sure to hand in daily Spanish sentences on time.
3. Check to make sure I have all science handouts.
4. Get to gym class on time!
III. Setting Goals

Goal Area: To increase awareness of goal setting to students.

Instructional Objective: Students will practice writing short and long term goals.

Materials:
1. Handout "Goals"
2. Pencil

Procedure:
1. Explain to students that by setting goals, one has a direction to follow. Setting goals gives us purpose and achievement.

2. Goal setting should be ongoing, we need daily goals as well as weekly, yearly, and future goals.

3. Give students handout and ask students to list at least three goals they would like to accomplish today.
   Example: 1. Return call to Judy
   2. Buy paper
   3. Get to bed by 10:00

4. Ask them to think about goals they would like to have accomplished by this week.
   Example: 1. Save $5.00
   2. Finish report
   3. Visit Mom

5. Tell them to continue with longer term goals (think within a year).
   Example: 1. Pass with a "B" average in all subjects.
   2. Stop biting nails
   3. Save $260.00

6. Finally, have students think about and write at least 3 longer term goals for their future.
   Example: 1. Own a car
   2. Have beautiful nails
   3. Open several IRA's
GOALS

I want to accomplish...

3.
INTEREST, APTITUDES, AND ABILITIES

Purpose: To show students how interests, aptitudes, and abilities relate to career planning.

Materials: "Self-Awareness" Worksheet

Introduction: "The knowledge or self enables individuals to make better decisions—not only personal decisions, but also career decisions. One needs to understand and accept uniqueness of self in order to make sound decisions. An Interest Inventory or self-awareness test will reveal useful information." Assign the self-awareness test.

Follow-Up: Discuss the assignment. Have students come up with some careers that might allow them to do these things while they earn a living.
SELF-AWARENESS

1. List ten activities you like to do.

2. Rank them according to what you enjoy the most to the least.

3. Then, check whether you do the activity alone or with others, whether money is needed, whether a skill is required, whether you might be doing this activity ten years from now.

4. Finally, add up your checks in each column and put the number in the TOTALS box.

TOTALS

5. Using your totals, what can you conclude about your present lifestyle and what you enjoy doing?

________________________________________________________________________

6. What might this indicate about the kind of career choice you could make?

________________________________________________________________________
LEARNING ABOUT YOURSELF

Purpose: To enable students to discover who they are and to learn how their personal interests influence their career choice, and what they do in their leisure time.

Materials: "What Are Your Personal Interests"

Introduction: This activity is designed to help you learn more about yourself and the changes that take place as you grow in your personal development and relationships. Your personal interests can help you choose or identify occupations that will be interesting to you.

Review the interests you have checked and choose the five (5) interests that appeal to you most.

1. 
2. 
3. 
4. 
5. 

Based upon these five interests you have listed, describe a career that you feel would be ideal for you. Explain why.
HIDDEN TEST

PURPOSE: This self-awareness test can be used to allow students to think about themselves and the way others see them.

MATERIALS: Have students take out a blank piece of paper and a pen or pencil.

TIME: 1/2 of a Class period.

INSTRUCTIONS: Have students number their paper from 1-3. Next to number one, have them write down their favorite color. Next to their favorite color, have them write down 3 adjectives that describe that color. (Make sure the students know that adjectives are words that describe. For example, if their color is red, one adjective could be bold, since that is an adjective that one might think of in association with that color). Explain to the students that it is important that they do not share their answers with their classmates at this time.

Next to number two, have the students write down the name of an animal, and 3 adjectives that describe that animal.

Next to number three, have the students write down a body of water. This does not have to be specific -- they could write ocean, stream, lake, etc. Then they are to write 3 adjectives that describe that type of water.

After the students have completed all three items, explain to them how to interpret this "test":
- **Item one reveals how they see themselves**
- **Item two reveals how others see them**
- **Item three reveals how they see their life**

FOLLOW-UP: Allow students to discuss their answers and interpretations with each other and with the group. Ask how many students agree and disagree with the interpretation.
Reading the Want Ads

The want ads in your newspaper may be a gold mine of information about job openings. Most job hunters head for the want ads first.

The front page of each newspaper usually tells you on what page to find the want ads (classified ads). Once you've found the right section, look under "Help Wanted" or "Employment Opportunities." Sometimes want ads are listed alphabetically. For example, jobs advertising for accountants would be near the beginning and those for zebra keepers near the end. Sometimes the ads are grouped under headings such as "Administrative," Sales," or "Technical."

What should you do when you open the newspaper and find hundreds of jobs listed? How can you decide which jobs to go after? Look at the information shown in the ad below.

<table>
<thead>
<tr>
<th>TYPE OF JOB</th>
<th>HELP WANTED</th>
</tr>
</thead>
<tbody>
<tr>
<td>WORK EXPENSE REQUIRED</td>
<td>Auto Mechanic Needed. HS req., 2 yrs exp., 8-5, 5 days/wk.</td>
</tr>
<tr>
<td>PERSONAL EQUIPMENT REQUIRED</td>
<td>TOOLS A MUST. $8,000 guar. Phone 444-4444, BOB'S SERVICE SPOT.</td>
</tr>
</tbody>
</table>

Look for these kinds of information each time you read an ad. By doing this you will have a good idea of what the advertised job has to offer. You may be able to tell if it's the right job for you.

You won't find all of this information in every ad. Sometimes ads give very little information but sound like they're advertising terrific jobs. Read about Fran's experience.
**Opportunity Knocks... In The Newspaper!**

Jobs can be divided into many different categories. See if you can find a job advertised in the newspaper for each of these categories listed below. Then paste the ad in the appropriate box.

<table>

TIME WHEEL

PURPOSE: To determine how students spend their time (on any given day), and how students can better use their time to accomplish certain goals.

MATERIALS: Class set of "How I Spend My Time" Worksheet Colored pencils

TIME: 1/2 Class Period

INSTRUCTIONS: Discuss with students that time is a precious commodity because we can never "BUY" more time. How we spend our time daily can determine what goals we can accomplish. For example, if a student had an after school job, that student would have to be disciplined enough to set time at night to complete homework instead of watching 4 hours of television.

Read aloud to the students what each color represents on the wheel, and have them add to the list if they have any special activities (i.e., football, karate, piano lessons, etc.). Then have them color the time wheel with what they feel represents their day.

FOLLOW-UP: Discuss results when students are finished. Survey the student to see if most of them use their time in the same manner. On the back have the students write suggestions on how they could improve their time usage. Have students determine how this activity is related to career choices.
1. Each slice of the wheel represents one hour.

2. Typical wheel includes: sleep, school, at work, with friends, on homework, alone, on chores with family and on the telephone.

Black = sleeping
Red = school
Green = work
Orange = chores
Blue = homework
Brown = watching
Purple = using the telephone
Yellow = with friends or family
Take a Close Look

**Purpose:**
To increase awareness of factors that influence self-concept, including messages from other people and one's own strengths and weaknesses. The students will know that how they feel about themselves has a direct relationship to their behavior, including their use of drugs.

**Materials/Preparation:**
Corresponds with student handout, "Take a Close Look."

**Instructions:**
As a class, brainstorm a list of people who have an effect on building self-image of students.

Write this list on the board.

Ask the students to complete the handout "Take a Close Look."

Ask the students to score their paper.

- Scoring criteria: total all odd statements; total all even statements.

Discuss with the students the following personality profiles for odd and even statements, asking them to determine which profile describes them best.

**Score on the odd statements**

A score of 0-10 on the odd statements would mean you are a "Self-Assured Susan." You do not need a great deal of approval from other people. You are honest about your accomplishments and are able to deal responsibly with disappointments.

A score of 11-20 on the odd statements would mean you are a "Vaccillating Valerie." You sometimes feel positive about yourself but often let others' opinions sway you. You may be able to ask others for help, but feel inferior when you do so.
A score of 21-30 on the odd statements would mean you are a "Nervous Nancy." You may not feel good about yourself, or you may have a poor self-image. You tend to allow others' opinions to direct your feelings and actions.

**Score on the even statements**

A score of 0-10 would mean you are an "Anxious Andy." You may not feel very good about yourself, or you may have a poor self-concept. Perhaps you are unable to act assertively, unsure about taking responsibility, or let other people affect how you feel about yourself. Making decisions may be scary for you and you may decide to do what others would want you to.

A score of 11-20 would mean you are a "Wavering Willy." You may often feel good about yourself, but if something negative is attributed to you, your self-confidence may drop. You can act assertively, but it is very hard for you. You may feel nervous when in new situations and tend to put down your own accomplishments. You may welcome making your own decisions, but sometimes feel pressured to make a decision that will please others.

A score of 21-30 would mean you are a "Steadfast Stuart." You feel good about yourself and do not need approval from others. You are able to let others know your feelings, take responsibility for yourself and do not feel the need to criticize others in order to make yourself feel good. Your self-concept is strong enough that you do not feel you must make decisions that please others.

**Discuss with students the following questions:**

- How does peer pressure influence self-image and behaviors such as drinking at school functions, drinking and driving, and mixing alcohol with other drugs?

- How can setting personal goals help to raise self-esteem?

- What are some characteristics students would like to change?

- How does self-image affect behavior and drug use decisions?
Score each statement by writing the appropriate number in the blank:

0: not true 1: somewhat true 2: largely true 3: true

1. It is very important to me to please others.
2. I feel at ease around most people.
3. I often exaggerate my accomplishments to build myself up.
4. I accept praise without embarrassment.
5. I get angry at others when my decisions don't turn out as I expected.
6. I am able to ask for help when I need it and it doesn't mean that I am inferior.
7. I don't like to make decisions.
8. I eagerly anticipate new situations.
9. I feel inferior when I lose.
10. I am able to let others know what is important to me.
11. I have a hard time waiting for things I want now.
12. I feel good about my accomplishments.
13. I often feel like people are criticizing me.
14. I take responsibility for the consequences of my decisions.
15. I feel nervous in new situations.
16. I accept responsibility for myself and do what I believe is right.
17. I am often critical of others.
18. I am able to let my family know I care about them.
19. I have a strong need for recognition and approval.
20. I am not prejudiced towards people who are different from me.

SCORING CRITERIA:
Total from all odd statements
Total from all even statements
CAREER GUMBALL MACHINE

PURPOSE: To explore different careers to determine the school subjects required for employment.

TIME: 1 Class Period.

INSTRUCTIONS: Give each student a different colored gumball and have them write the following on their gumball:
1. Career choice or any career
2. Subjects required in school to prepare for this career.

SECRETARY
  typing
  English
  shorthand

Circulate around the room to encourage students to select a wide variety of careers (to avoid duplication of research). Allow students to use the available resources for help in their research.

Have students place their gumball on the bulletin board. Discuss with students the different careers on the board and the subjects required.

FOLLOW-UP: These careers may be used later as choices for the research paper.
The ABCs of Careers

Using the newspaper, the dictionary, or the yellow pages of the telephone book, identify two careers for each letter of the alphabet.

PURPOSE: To understand the attitudes necessary for success in work and learning.

MATERIALS: Attitudes at School and Work (Handout)
School Situations... Is Your Attitude Showing? (Handout)
Career Situations... Is Your Attitude Showing? (Handout)
Dictionaries

TIME: 1-2 Class Periods

INSTRUCTIONS: 1. Write the 10 attitudes on the board.

2. Divide the class into cooperative learning groups and have each group use the dictionaries to look up the definitions of the attitudes. (Depending on the number of groups, some may need to define two words.)

3. Discuss the definitions of the attitudes with the class and arrive at a consensus of their meanings.

4. Distribute the Attitudes at School and Work handout at each group.

5. Using the School Situations... Is Your Attitude Showing? handout, read each story to the class, or have a different student from each group take turns reading them aloud.

6. After each story is read, the students are to decide within their group which attitude they believe is displayed by the behavior described in the story, or which attitude needs to be developed by the person or persons in the story. The students should place their choices on the blanks provided under "School" on the Attitudes at School and Work handout.
7. After all 10 stories have been read and discussed by the groups, the groups should share their responses with the class.

8. Distribute the Career Situation... Is You Attitude Showing? handout. Follow the same procedure as above, reading the situations to the class and having the groups determine the attitude involved. Groups now place their choices under "Career" on the Attitudes at School and Work handout.

9. Discuss the groups' choices after the exercise is completed.

FOLLOW-UP: Have each student write an example of one time they displayed one of the positive attitudes from this lesson.
ATTITUDES AT SCHOOL AND WORK

A. Honesty
B. Acceptance of criticism
C. Patience
D. Dependability
E. Cooperation
F. Willingness to learn

CAREER SITUATIONS ....

Is Your Attitude Showing?

1. Carol, an airline stewardess, was scheduled for a flight to New York departing at 9:00 p.m. Stewardesses are required to check in an hour before flight time. When Carol did not check in or call by 8:30, her supervisor had to make arrangements for someone else to take her place. At 9:00 p.m. Carol came rushing in, explaining that she had overslept. The supervisor placed Carol on probation for not notifying them that she would be late. Her negligence caused an inconvenience to another stewardess and a delay of the flight.

What attitude did Carol fail to display? (dependability)

2. John, 20, worked at Graham's Garage. He was unusually slow in performing brake jobs for customers. When his supervisor tried to show him how he could do it faster, he refused to listen. He said that his way was the best, even though it was slower. John had shown a similar attitude about other jobs around the garage, always insisting on doing things his way, whether his way was best or not.

Which attitude does John lack? (willingness to learn)

3. Jimmy works in an office where he is paid by the hour. He wants to go skin diving in the Keys during the weekend with his friends but doesn't want to lose two-hours' pay. He tells his boss he doesn't feel well and wants to go to the doctor. The boss gives him permission to leave without losing pay.

Which attitude is Jimmy lacking in this situation? (honesty)

4. In a large department store during the holiday season the manager requested that the sales personnel take their lunch breaks from 11 a.m.-12 noon or 1-2 p.m. because of heavy customer traffic between 12 and 1. Sue had been eating lunch with her boyfriend from 12-1 since she had begun working at the store. She felt that she had earned the right to choose her lunch time; however, she changed her lunch time along with the other employees.

Which attitude best describes Sue's behavior? (cooperation)

5. In a machine shop, directions for the use of each machine and the safety precautions are posted above the machines. Frank, as a new employee, was told to read and follow the posted instructions very
carefully. In his eagerness to show he could finish faster than the other employees, Frank neglected to wear his safety glasses while operating his machine. As a result, Frank had to be taken to the emergency room at the hospital where a piece of metal had to be taken from his eye.

Which attitude did Frank fail to display? (willingness to follow directions)

6. Maggie, 18, has just completed high school and has her first job as a receptionist in a savings and loan company. She appears to enjoy her job and smiles amiably at everyone who comes into the bank. Many people stop to chat with her just because she seems so friendly. She looks forward to going to work every morning and is sorry when her workday is over. Maggie can hardly wait to get home each night to tell her family and friends about the interesting and exciting things that happen to her at work.

What attitude does Maggie display? (enthusiasm)

7. Jack was a checker in a large supermarket. He was a good worker, very dependable, and never late for work. However, he made at least one mistake a day on his cash register receipts because he tried to ring up the groceries too fast. The manager became weary of seeing notes in Jack's cash register each day explaining his errors. So he decided to speak to Jack about it. He suggested that Jack should slow down and try to be more accurate. Jack realized that the manager was only trying to help him to do a better job.

Which attitude did Jack display? (acceptance of criticism)
INSTRUCTIONAL OBJECTIVE
Having collected and identified pictures that show positive as well as negative feelings for the environment, students will create collages contrasting the two types of feelings.

PROCEDURES
PRIOR TO BEGINNING ACTIVITY
Teacher should bring a collection of magazines to the classroom. All types of magazines may be included in the collection, but those representing outdoor themes are a particular necessity. Motivation for the initial discussion could be that of placing representative positive and negative environmental scenes on a bulletin board with the caption, "How does this picture make you feel?" The teacher can also solicit magazines from the students for a classroom collection, again making a point of stressing environmental/outdoor publications.

1. Begin activity by discussing environmental objects or situations that evoke or convey a particular mood or feeling:
   - a setting sun over a mountain lake (peace, serenity, nostalgia)
   - a weeping willow tree (sadness, death, melancholy)
   - a mountain stream (cleanliness, youth, energy)
   - graffiti carved on an oak tree (destruction, intrigue)
   - a dried up river bed (death, neglect, concern)
   - a landscaped garden (care, love of nature, work)
   - a bird building a nest (necessity, pride, curiosity)
SUPPLEMENTARY RESOURCES

TEACHER

STUDENTS

FOLLOW-UP ACTIVITIES

Students may wish to research (and possibly interview) agencies and organizations in the community whose purpose is that of promoting friendship and support among members. Examples of these types of agencies/organizations could include:

- Rotary International
- Kiwanis
- Benevolent Order of Elks
- Parents without Partners
- American Field Service
- Senior Citizen Clubs

(No attempt is made to include or exclude all these types of organizations in this activity. Teacher should focus on those most active in his/her locality.)

Students may wish to work with church and civic agencies to adopt "friends" in health care facilities and local sanitariums/hospitals.

TEACHER'S NOTES
- a dog greeting his/her owner
- a rose bursting into bloom
- a polluted stream
- refuse on a city street
- a harvest scene

(love, friendship, loyalty)
(birth, beauty, warmth)
(neglect, anger, concern)
(abuse, carelessness)
(thankfulness, pride, labor)

Choose any of the above objects or situations (particularly one where obvious emotion is displayed by the class as a whole). Encourage more students to elaborate on this list.

Have magazines ready to distribute or readily accessible. Direct students to find a picture that illustrates the object or situation chosen in Procedure #2.

Allow students to search magazines with the overall objective being that of an environmental scene that evokes positive or negative feelings. Personal values and experiences will become an integral part of the searching process. The sharing of ideas and the reasons for positive or negative feelings should be encouraged by the teacher.

Provide materials for designing personal collages and direct students to create two collages, one showing positive feelings toward the environment and one depicting negative reactions.

Encourage students to find appropriate scenes from available magazines. However, allow the option of personal illustrating if so desired. Some students may even wish to complete their collage with a quotation from a famous environmentalist or a poem.

Prepare a place in the classroom where collages can be displayed and shared by their creators.

Culminate activity by stimulating a discussion about environmental awareness and concerns. Questions to initiate discussion could include:

- Why do some young people trample and destroy flower beds and shrubbery?
- Why do certain people take pride in maintaining their property?
- Why do some people break off tree branches without just cause, or pick lady slippers?
- What satisfaction is to be gained from feeding the birds?
- Why do some people unnecessarily harm animals?
- How can individuals create pleasing environmental surroundings?
SUPPLEMENTARY RESOURCES

TEACHER

STUDENT

FOLLOW-UP ACTIVITIES
Students can draw their own positive feelings for their environment on construction paper by designing posters expressing the idea of "Protecting the Environment."

TEACHER'S NOTES
Cooperation - a daily occurrence

Conceptual focus: Cooperation

SOCIAL SITUATION
The classroom is a social group. Each of us is expected to be a member of this group. Everyone has reason to want the classroom to be a good place in which to study and learn new things.

If the classroom is going to be a good place to study and learn new things, class members must cooperate with one another and with the teacher.

We cooperate when we share ideas, the things we own, and when two or more of us work together to complete a task.

Nine ways for cooperation in the classroom are listed below. Use the space that is provided after each item to explain why the behavior identified requires cooperation.

1. When we play games, we cooperate. How?
2. When different class members do different things to build a bulletin board, we cooperate. How?
3. When we do the work the teacher assigns, we cooperate. How?
4. When we participate in a class discussion, we cooperate. How?
5. When we collect money to pay for a bus and take a field trip, we cooperate. How?
6. When small groups of students do an experiment in science, we cooperate. How?
7. When we help break up fights between classmates, we cooperate. How?
8. When each of us brings something for a class party, such as potato chips, we cooperate. How?
9. When we plan and do a group project, we cooperate. How?

The Classification Format of the Value Sheet
Individual Decision Sheet

Complete this decision sheet working alone. Nine ways in which members of a class may cooperate are listed below. All nine can be important. Some are probably more important to you than others. Your task is to rank order these from the one that is most important to the one that is least important.

____ Playing games.
____ Building bulletin boards.
____ Completing assigned work.
____ Speaking and listening during class discussions.
____ Collecting money for field trips.
____ Conducting science experiments.
____ Helping enemies become friends.
____ Sharing cookies and other good things for a party.
____ Planning and doing a group project for the class.

The Classification Format of the Value Sheet
Group Decision Sheet 2

The three least important ways in which we might cooperate are:
A. 
B. 
C. 

Suppose members of your class never cooperated in these three ways. How might this make your class a bad place in which to study and learn?

These three are least important because 

The Classification Format of the Value Sheet
Working with Community Service Organizations

Mentors and role models are very important for young people, especially at-risk adolescents. Shadowing and internship opportunities are very meaningful but finding volunteers can be difficult and time consuming. Yet many people in business are interested in helping young people prepare for the working world. So, if you haven’t already, why not consider recruiting one of the service organizations in your community to sponsor your school’s program.

FINDING THE RIGHT SERVICE ORGANIZATION TO APPROACH

If you aren’t familiar with the different community service organizations in your community, contact your local Chamber of Commerce to get a list. They will have the names and phone numbers of the president and the program chairperson for each organization in your community.

Some of the organizations you should consider contacting include:
- Altrusa
- American Association of University Women
- Business and Professional Women
- Kiwanis
- Lions Club
- Rotary
- Soroptimist
- Zonta International

These organizations are made up of professional and career-oriented individuals who will probably be particularly interested in helping young people become ready for the work force.

Do some homework before you contact someone within the organization. Try to find out which organizations within your community are particularly interested in supporting either youth or education. Use your network of friends and professional acquaintances to research this information. If you have an advisory board, they will be helpful with this task.

RECRUITING THE SERVICE ORGANIZATION

Once you have determined which organization(s) would be most interested in becoming involved with your school’s program, contact the program chair and offer to give a presentation at one of their meetings. For the organizations which have weekly meetings (usually at lunch), program chairs are constantly on the lookout for interesting presentations about the community. Your call will be most welcome.
The topics for discussion in *Career Choices* raise many opportunities for guest speakers to come into the classroom. It is up to the individual instructor, of course, to decide who to use and how to use them. But, to make things a bit easier, we have compiled a chart listing possible speakers for the entire course. Since you are unlikely to be personally acquainted with experts and resource people in all these areas, tracking them down could be time-consuming. Therefore, we recommend using this chart to get some help.

You might simply want to make photocopies of the chart and pass them around to friends and co-workers who might be able to supply some names and phone numbers. If you belong to community organizations such as the Kiwanis, Soroptomists, or the Rotary, you might pass a chart around at the next meeting. If you enjoy public speaking, you could make a presentation about your class to some of these organizations, and then ask for help from the members. Or you might get community people involved by bringing your request before the school improvement team. The list can be easily tailored to reflect community needs or the needs of your students.

On page 178 we have outlined a description of a “Director of Mentors.” Perhaps, the person who holds this volunteer position could be enrolled to assist in locating and scheduling guest speakers.

If you conduct this class many times throughout the day, it may be difficult to find individuals who can devote that amount of time. We suggest scheduling your guest speakers in the morning, a half hour to forty-five minutes before the school day begins. Most working adults are used to breakfast meetings, and it should not interfere with their work day. Therefore, it should be easier to get guest speakers at this hour. While students may groan about the earlier hour, you could point out that schedule adjustments are common in the work world and that flexibility of time is a mandatory requirement of most jobs. The expectations should be clear and this should be seen as part of their homework.

Arrange for the presentations to be held in the school theater so many classes can be accommodated. Be sure to advise the other faculty members of your scheduled presentations. Perhaps they would like to attend.

If the school has a video recording service, arrange for a student to video the presentations. This way you can keep the better ones on file and can share them with the counseling office for individual counseling situations.

It might be helpful to lend each speaker a copy of the text *Career Choices* so he or she can review the appropriate section and be familiar with the concepts the students are studying.

Theme: Communication Station:
Tune In At Your Library

Rules:
1. All entries must be done on the
bookmark form on this page.
2. All bookmarks must be done in
black crayon, pen, or marker.
No colors, please.
3. Each entry must have your name,
phone number, grade in school,
and the name of your branch
library.
4. Do not staple, tape, glue, punch
holes in, or fold your design.
5. Only two entries per person.

Judging: Bookmarks will be judged on creativity
and originality. Two winners will be
chosen from each library—one from
grades 1 through 3, and one from
grades 4 and 5. Two county-wide
winners will be chosen from all
winning entries.

Deadline:

Prizes: All winning bookmarks will be
commercially reproduced and
used in the library during the year.
The two county-wide winners will
each receive a $50.00 U.S.
Savings Bond.

CAREER VIDEOS
"Career Discovery Field Trips"

PURPOSE: To learn about different careers by taking a "field trip" through the use of video tapes.

MATERIALS: "Career Discovery Field Trip" video set

TIME: 1 1/2 Class Period

INSTRUCTIONS: Contact Learning Resources for availability

The teacher should preview the videos in order to prepare follow-up questions. Each video lasts approximately 22 minutes. The videos can be used together or to supplement previous lessons.

FOLLOW-UP: Discuss the videos or have students complete written essays concerning the content of each video.
Don't let your middle grade students miss this powerful series. Preview the first three videos for 30 days free!

As every librarian, audiovisual supervisor, counselor, and teacher knows, children learn faster and better when they enjoy the experience. The first three Career Field Trip videos take middle graders behind the scenes — o a hospital, a construction site, and a video production studio — for a fascinating look at the way career people earn their livings. Each video highlights several jobs. Each is accompanied by a Teacher's Guide that makes it easy to help students get the most out of their "field trip." From time to time, exciting new videos will be added to the series.

Career Discovery Field Trips offer five unique advantages to students:

1. Designed for middle graders. This is not watered-down high school or stretched-out elementary school material. The videos are aimed at 5th through 8th graders. About 22 minutes in length, they are geared to the interests and viewing level of adolescents.
2. Extremely realistic. Students watch and listen to real working people, not actors playing roles.
3. The experience can be stopped and played back. If the teacher wants to make a point, or if a student has a question, just go to "instant replay." Or pause the videos about every two minutes after each job is highlighted — while that job's qualifications are listed on the screen.
4. Relates careers to classes students are taking now. The videos motivate students to take their schoolwork more seriously by emphasizing how their studies relate to career choices.
5. Suggests ways to prepare for careers. For example, students are encouraged to try woodworking, model building, and home repair projects to prepare for careers in construction.

Teacher's Guides help teachers promote learning every step of the way.

Each handy 8-page guide provides these features:

- Synopsis of the video.
- Objectives for the learning experience.
- Summary of careers profiled.
- List of related jobs.
- Special projects for learning more about careers.
- General skills needed for success.
- Vocabulary for testing class.
- Discussion questions.
- Essay questions.

Each package of three 22-minute videos with accompanying Teacher's Guides fill three class periods with involving, interactive learning. Great for Career Week or any week at all!

Save more than $20.00 — order a package of three Career Discovery Field Trips.

Our introductory price for each video and guide is just $49.95, plus $4.50 shipping and handling. And, for each package of three, your cost is only $129.95, plus $4.50 shipping and handling — an even greater value!

Mail enclosed Certificate today — or call 312/590-5480, Ext.13 — for your 30-day free preview!
Letter Writing Exercise

(to Invite speakers)
(Thank you note exercise to thank speakers)

Lesson on letter writing:
* Give explanation and demonstration of letters (ask for input/ideas)
* Sample Letter
* Quiz on letter writing

Example:

Sunrise Middle School
1640 Sunrise Blvd.
Ft. Lauderdale, Fl. 33333

Mr. John Stark, Director
Community Chest
22 1st St.

Dear Mr. Stark:

Before we begin another school year, we, Mrs. Smith's 7th Grade Class, would be very happy if you could spend some time with us and teach us about your organization and how we can work on projects together.

We are looking forward to hearing from you.

Sincerely,

Nancy Jones

    a. In the upper right-hand corner
    b. In the center of the envelope
    c. In the upper left-hand corner
    d. Anywhere you want it
The Purpose of the mentoring program / process is to provide adults who can build personal relationships with students. Often students don’t have role models in their families to help them envision a quality of life for themselves.

How it Works:
* Identify Mentors
* Identify Students
* Match students and mentors
* Hold mentor - student meetings
* Involve parents
* Hold counselor - mentor debriefing

Shadow Program Mentor Survey

We are seeking volunteers for a Career Shadow Program for students. This important activity links young people with someone in a career field in which they have expressed an interest. For a day or a portion of a day, they "shadow" that individual. Like a shadow they only silently observe. They have been coached not to be obtrusive or to interrupt your work time. All we ask is that you grant 15-30 minutes for an interview at the end of the day for questions and follow-up.

If you are interested in allowing a student to "shadow" you for a day or a portion of a day, please complete the following survey and return to:

________________________________________

The student assigned to you will contact you directly by letter and phone, so the two of you can arrange a convenient time.

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign at the bottom of the page.

<table>
<thead>
<tr>
<th>Level 1</th>
<th>Level 2A</th>
<th>Level 2B</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

Check here for Level 1 release, permitting reproduction and dissemination in microfiche or other ERIC archival media (e.g., electronic) and paper copy.

Check here for Level 2A release, permitting reproduction and dissemination in microfiche and in electronic media for ERIC archival collection subscribers only.

Check here for Level 2B release, permitting reproduction and dissemination in microfiche only.

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but no box is checked, documents will be processed at Level 1.

I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.

Printed Name/Position/Title: Jack Pause, Coordinator

Organization/Address: SWF School-To-Careers Consortium

3800 Michigan Avenue

Fort Myers, FL 33916

III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS.)
