This guide begins by stating that the curricular items recommended for civic education classes meet the provisions of Romania's Education Law, articles 3 and 4, and particularly, the educational ideal and the ultimate goals of education. Noting that the process of socialization should start early in life, the guide states that the place of civic education in grades 3 and 4 is justified by the need to introduce students to civic behavior in a democratic society. The guide then lists specific objectives, and outlines reference objectives that illustrate key concepts related to democracy. The guide enumerates recommended teaching practices.

For grade 7 it is stated that the place of civic culture as a "lower secondary school discipline" is justified by the need to take further the civic education of children and strengthen it by exercising a civic behavior in a democratic society. The guide is divided into five sections: (1) "Presentation Note"; (2) "A Teaching Model for Social and Humanist Disciplines"; (3) "Basic Objectives"; (4) "Reference Objectives and Learning Activities"; and (5) "The Contents of Learning." The grade 8 guide states that an in-depth study and nuanced discussion of the democratic value and principles is emphasized as well as the exercise of specific democratic political practices that were partially introduced to students in grade 7. The guide explains that the knowledge acquired by students in grade 7 can be integrated and reassessed, and specific skills and capabilities further developed in a new context. (BT)
CIVIC EDUCATION CURRICULUM

GRADES 3 AND 4

Bucharest, 1996

CIVIC EDUCATION CURRICULUM

Grades 3 and 4

Presentation Note

The curricular items recommended for third and fourth grade Civic Education classes aim to meet the provisions of the Education Law, Articles 3 and 4 more particularly, on the Educational Ideal and the Ultimate Goals of Education.

Furthermore, the civic education activities put forth in this curriculum are in agreement with the spirit and letter of:

> The Vienna Declaration of the heads of state and government of Council of Europe member states - October 9, 1993

> The 1989 Convention on the Rights of the Child

The place of Civic Education in grades 3 and 4 of primary school is justified by the need to introduce schoolchildren to the exercise of a civic behaviour in a democratic society:

A behaviour which is active, free, responsible, tolerant, open, communicative, reflexive and self-evaluative.

Given that:

(1) Education for democracy is a long and complex process; and that
(2) Primary schoolchildren are involved in civic life through family, play and learning groups and by their specific relations with certain institutions and organisations (e.g. school, the church, the policlinic, the police, the mayor’s office, clubs, NGOs, etc) active in the community they live in

The process of socialisation can and should start early in life.

It is important that the issues and strategies for civic education classes should be so chosen as to take the children’s experience at their age into account. Resignification through integration of knowledge provided by all other disciplines that were taught is a basic feature of civic education which is a preeminently interdisciplinary approach. This resignification, specific of philosophical disciplines, implies placing greater emphasis on the emotional-attitudinal dimension associated to the cognitive one by stimulating critical reflexion, participation and communication so that school, as a system of society, may favour the development of a democratic behaviour.
General Objectives

Civic Education classes will help third and fourth graders:

- To know the basic democratic values and practices
- To build - as part of activities appropriate for their age - the skills required for the exercise of democratic-type civic behaviours based on communication, participation and tolerance
- To know the rights of the child and the institutions/agencies that monitor their observance
- To be able to distinguish in context between “good” and “bad”, democratic and undemocratic practices taking the Civic Education class activities as a model
Specific Objectives – Grade 3

Civic Education classes are to teach third graders:

- To think of themselves and of other people in terms of persons
- To discuss similarities and dissimilarities among individuals
- To show self-respect and respect for others as well as take care of themselves and of “others” (persons, environmental features)
- To discuss the pro-active effects of respect, courage, kindness, sincerity, dignity – on the one hand - and of their negative counterparts – on the other.
- To develop positive attitudes to: objects and things
  plants and animals.

Specific Objectives – Grade 4

Civic Education classes are to teach fourth graders:

- To understand the notion of group
- To recognise and describe the main types of groups they belong to (the family, the play group, the learning group, group of friends, etc.)
- To discuss the role of rules in groups
- To know and discuss various types of intra- and inter-group relations, both positive and negative
- To exercise non-violent solutions to conflicts inside the group
- To discuss the major institutions of the Romanian state and know the national symbols

Contents

* The curriculum provides a list of key concepts related to democracy that teachers are invited to consider and discuss with schoolchildren as part of the theme approached:

Authority, Power, Rights/Responsibilities, Tolerance/Respect, Diversity (Differences), Equality, Values/Norms/Rules, Communication, Justice, Freedom, Property, Accountability, Friendship, Public/Private

| explain what a person with special needs means  
| provide examples of how individuals with special needs may fulfill themselves in society  
| Is a person and his/her body one and the same thing? In what way? |
| - Distinguish between what is natural and what is man-made  
| - provide examples of the difference between things and ideas about things  
| - identify situations in which people state their preferences for things  
| - make a connection between a person’s characteristics and the preferences expressed by that person  
| - analyse how things may contribute to a pleasant or unpleasant environment  
| - compare various attitudes to things  
| - assess these attitudes  
| - provide arguments to support the need for positive attitudes  
| - analyse the role of various things as play, work and learning instruments  
| - compare things, beings and persons  
| - use various criteria to rank the similarities and dissimilarities that were found  
| - compare various types of attitudes to animals and plants  
| - assess these attitudes  
| - provide arguments in support of the need for positive attitudes  
| - provide examples of animals and plants that are a symbol in various cultural contexts  
| - analyse the role of plants and animals as intermediaries to play, work and learning activities  
| - assess the role of plants and animals in human life  
| - bring arguments in support of the need for environment-friendly behaviours  
| II. Our relationship to things and beings (22 hours)  
| 1. Our relations to things  
| What are things?  
| Things and ideas about things  
| Things that express us:  
| a. Toys, collections, my room, my clothes  
| b. Technology, art, urbanism, etc.  
| Attitude to things (carefulness, carelessness, etc.)  
| What do we need things for?  
| (Things and play, work and learning activities)  
| 2. Our relation to animals and plants  
| On animals and plants:  
| Do they feel? Think? Communicate? Do they have habits? Do they imagine things? Are they persons?  
| Our attitude to animals and plants (care, brutality, compassion, love, respect, fear, etc.)  
| Animals and plants as emblems and symbols:  
| Signs of the zodiac, totems, fantastic animals  
| Why do we need animals and plants?  
|

Total hours: 34 + 17
Recommended teaching practice

- Dialogue on an issue should be the main form of class activity if the implication for each theme is that:
  
  - It is assumed to be an issue by everyone in class;
  - It is broken up into its constituents
  - Everyone becomes involved in the discussion of each aspect

Given the permanent ambivalence of the values in respect of which situations are assessed, value judgements are made, attitudes and behaviours are built, we emphasise that the aim of the whole activity is to develop awareness of that ambivalence and make appropriate options for each separate case.

- It is important to note that no single solutions, no “right” or “wrong” answers are being sought. The aim is for everyone to do the thinking, to judge a person in relation to the natural and the social environment. We suggest the preeminent use of the following methods:
  
  - Case studies
  - Microinvestigations conducted at class, school or district level
  - Discussion of excerpted articles taken from publications for children
  - Discussion of cases that were in the focus of (and highly publicised by) the media at a particular time
  - Systematic observation of relations within the microgroups the schoolchild belongs to
  - Imagining complex social cases to which solutions are provided by each schoolchild (an that may be discussed with parents at home) and supported with arguments
  - Editing a “newspaper” of the class to voice the opinions on potential specific cases
  - Designing rules and packages of norms intended for the whole class as a microgroup
  - Assuming responsibility for coordination of class activities (by rotation, with the discussion of the remarks for that particular period)

- Class activities could be extended to involve young schoolchildren in practical complex socialising activities such as:
  
  - Letter-writing to counterpart school graders in another city or town. Schoolchildren could mutually describe their school and town, introduce themselves to potential friends and show their likes and dislikes, concerns and interests, etc.
  - Building a younger brother/sister-like relationship with institutionalised orphaned children by writing to them on special occasions, preparing and offering to them small gifts (drawings, posters, etc.)
  - Introducing children to the issues of people with special needs without making such people the object of children’s curiosity

- In order that form and contents not be at odds, classes should be held in a communication-friendly, tolerant if rigorous environment in consideration of everyone’s personality, as well as of institutions, norms and rules.

- Already at this stage a distinction should be made between scientific rigour inherent in science objects and that specific of philosophical disciplines. This differentiation is important to avoid a rather frequent mistake, namely that in Civic Education classes.
discussions have “no rules” and everyone may say whatever crosses one’s mind, since that is one’s opinion.

How these classes are designed and held is essential to illustrate the role of Civic Education as **moral personality integrator**. This object provides the setting in which the **design and practice of social relations can be exercised**. It is the starting point for a long range of **reflexion objects** – which is what social and humanist disciplines are – that pursue to develop social creativity, stimulate societal imagination and, why not, individual metaphysical imagination.

PRESENTATION NOTE

(1) The Place of "Civic Culture" in the Lower Secondary School

"Civic culture" is a discipline included in the education plan for grades 7 and 8 with a time budget of 34 hours per year (one hour per week).

The Civic Culture curriculum for grades 7 and 8 meets the requirements of the Education Law, Articles 3 and 4 more particularly, on the Educational Ideal and the Ultimate Goals of Education.

Furthermore, the civic education activities put forth by this curriculum are in agreement with the spirit and letter of:

- The Vienna Declaration of the heads of state and government of Council of Europe member states - October 9, 1993;

The place of Civic Culture as a lower secondary school discipline is justified by the need to take further the civic education of children which started in primary school and strengthen it by exercising a civic behaviour in a democratic society:

A behaviour which is active, free, responsible, tolerant, open, communicative, reflexive and self-evaluative.

(2) Specifics of the Civic Culture discipline in lower secondary school

Civic Culture taught in grades 7 and 8 (one hour a week) resumes the issues specific for this field which were first approached in grades 3 and 4:

- A person's relations with other persons

and

- The citizens' relationship with the state.

The subject, barely outlined in primary school which introduced children to its specific language, themes and learning activities, is resumed in a concentric approach which goes deeper as key civic education dimensions are considered:

- The descriptive-informative dimension (knowledge of persons, society and the state)
- The normative dimension (conveyance of social values and norms);
- The interrogative-reflexive and valuational dimension (critical reflexion on social values and norms);
The practical dimension (building democratic attitudes and behaviours and exercising them as part of activities that take democratic practice for reference)

Civic Culture as taught in the lower secondary school has several definitional features and characteristics:

- The balance between instruction – education – practical action is to be achieved by taking into account the fact that the knowledge-values-attitudes/behaviours relationship should not make knowledge its main focus; while knowledge is important, it should generally be used as a source or pretext for exercising critical thinking and democratic attitude-formation.

- Specific words and knowledge cannot be taught separately, once and for ever, or exhaustively (e.g. the state, democracy, the separation of powers, the constitution, etc); further explanations and examples need to be given and specifications made, with basic information and knowledge mutually rounding out their meaning as various specific contexts are considered and referred to society as a whole.

- Civic Culture classes should set a model for a student-teacher democratic relationship.

- Explicit civic education class activities are to build awareness of the need and possibility to develop a sense of self-respect and respect for others, and acceptance of pluralism under its various facets (political, economic, religious, cultural, etc.); the actors involved in this process should not forget that civic education is a lengthy process which can and must start early in life and needs to be “strengthened” during one’s lifetime.

- Civic Education is an integrative inter-disciplinary and inter-cultural activity which calls for openness, communication and flexibility all while promoting them; as part of this activity, a dialogue inevitably emerges between various types of knowledge and various cultures:
  - the scientific “academic disciplinary” culture and opinionative culture associated to controversial subjects and issues that do not admit of simple “Yes” or “No” answers or intersubjective controllable solutions;
  - the culture of various ages or different geographic, linguistic or religious areas;
  - adult culture and child culture
  - formal culture (as provided by school) and media culture, street culture, friendship culture, etc.

- As part of Civic Education activities there obviously is a strong interaction between the written (formal, intentional) or proposed curriculum and the student’s hidden curriculum as a specific expression of a clash of values.

- The proposed contents and working strategies must duly consider the life experience of children at their age and put it to good use.

(3) Structure of the Curriculum in the Lower Secondary School
The curricular items for grades 7 and 8 are structured as follows:

- In grade 7 Civic Education is designed as a combination of what the speciality literature refers to as civic education in the broad sense (a) and civic education in the narrow sense (b);
  - the basic contents for (a) are:
    
    the individual as a person; relations with other persons within social groups or communities, relations between groups and communities (communication, relational, conflictual, cooperative, solidarity, competitive), the position of persons and groups/communities to values, norms, laws;

  - the basic contents for (b) are:

    the rule of law in a democratic society; relations between the individual and rulers; basic democratic practice; democracy and the existence of civil society; respect for human rights and the rule of law; Romania's political system.

- In grade 8, the approach to basic tenets and concepts of democracy (such as authority, accountability, justice, liberty, ownership, etc.) invites to an in-depth and nuanced discussion of democratic values and principles, and the exercise of democratic practices already introduced to students in grade 7.
Along with history, social and humanist disciplines fall within the Social Studies curricular area. They are included in the education plan as early as grades 3 and 4 where they are taught as a subject called Civic Education. In conformity with the current education plan, the study of social and humanist disciplines is resumed under the name of Civic Culture in grades 7 and 8 and continued in every year of the upper secondary school.

Social and humanist disciplines can, by their interdisciplinary and integrative potential, help students get a comprehensive picture of themselves, of others and of society. They will come to understand actional and institutional conditionalities, the linkage between thought and action in various fields. Students will be trained as informed individuals, apt to make qualified judgments, creatively integrate themselves in social dialogue and action and take over responsibilities in private and public life. An appropriate use of the language specific to these disciplines, transfers, and promotion of a critical and flexible way of thinking, communication and dialogue will end up in shaping personalities apt to help strengthening an open society in Romania and improve social, economic and political action.

*Methodological articulation* (see Annexes I and II) is done in light of the common basic objectives and teaching strategies appropriate for these disciplines, *by combining scientific accuracy with the valuational dimension.*

The focus of the teaching model for the social and humanist disciplines are the (intellectual and social) learning processes achieved mostly by interactive strategies.

The large categories of training objectives pursue to develop the following capabilities and skills:

1. To have access to information and to know
2. To perform operations/applications
3. To recognise and resolve theoretical and practical problems
4. To evaluate
5. To have positive attitudes and behaviours.

The structure and development of specific skills (see Annexes I and II) are indicative of the option for an educational model that puts the dignity of the individual – its acceptance and achievement – above all.

Annex 1

Social and Humanist Disciplines

Skills and Skill-Building

1 – Access to information/knowledge on man and society
2 – Information management and use
3 – Individual expression
4 – Group relationship and interaction
5 – Social, economic and political participation
6 – Information acquisition skills and capabilities. Vocabulary – Readings – Audio-Visual Absorption – Study
7 – Cognitive skills and capabilities. Analysis, Classification, Interpretation, Summarising (Abstract-Making), Synthesis, Evaluation
8 – Expression of personal opinions/beliefs. Conveying one’s own thoughts, sentiments, beliefs. Adjustment to context and specifics
9 – Exercising different roles as part of group activities or in allegiance groups. Participation in setting a group’s aims and rules
10 – Acceptance and fulfilment of freely assumed group or community tasks and responsibilities. Acknowledgment of situations that call for (social) action
11 – Decision-making skills and capabilities
12 – Participation in actions pursuing to: persuade, compromise, achieve consensus, discuss, negotiate, choose the leader, resolve conflicts in a non-violent fashion. Participation in building a positive emotional climate in the group
13 – Information on topical issues. Decisionmaking on the right action to be taken in various situations
14 – Metacognitive skills/capabilities. Problem-solving strategies; self-evaluation and self-control of the cognitive effort
15 – Influencing powerful persons and institutions to resolve social problems. Observing the law, social order, justice and liberty, the fundamental human rights and the rights of the child
Annex 2

Social and Humanist Disciplines
Skill-Building Dynamics

1 - Information acquisition skills

3 – Individual expression skills
4 – Group relationship and interaction skills
5 – Social, political and economic participation skills

Grades 3 and 4  Grades 7 and 8  Grades 9 and 10  Grades 11 and 12
BASIC OBJECTIVES OF THE CIVIC CULTURE DISCIPLINE (GRADES 7 AND 8)

Lower secondary school-leavers, having learnt the Civic Culture discipline for two years, in grades 7 and 8, will be able:

- to use appropriately and in a flexible fashion the three basic forms of expression and communication – spoken, written and pictorial language – with reference to specific social and political contents:

  - fundamental democratic values and practices, human rights and the rights of the child;
  - a person's position to values and norms; a person's relations with social structures
  - political structures of society; democracy and the rule of law in Romania; Romania and Euro-Atlantic integration
  - relations of a person (persons) with the economic and political structures of society; civic rights and duties/responsibilities;

- to engage in dialogue by using specific types of argumentation all while accepting pluralism and valuing differences (physical, economic, social, political, cultural-religious);

- to show individual and group work abilities, and interest in stimulating cooperation, fair competition and social creativity;

- to prove their capacity to value and critically reflect on pro-social values and norms, attitudes and behaviours;

- to take an interest in social participation and in exercising their citizenship
REFERENCE OBJECTIVES AND LEARNING ACTIVITIES

Learning activities are closely linked to the main attitudes and skills to be built by Civic Education.

Such activities are to help integrate the knowledge, skills and attitudes into training profiles appropriate for the role of citizens in a democratic society. Subject to context, such learning activities may be performed individually, by pairs or by groups of 3-5. They may done in class, at home as homework or as projects that take longer than a class hour to implement and generally involve partnership or teamwork.

Note

Learning activities marked (*) are curricular items at the discretion of schools (30%). Accordingly, such activities may be adjusted to the conditions prevailing in each school. The learning activities that are not marked (*) are part of the core curriculum.

</tr>
</tbody>
</table>

1 The word skills refers to the abilities that schoolchildren and students are to develop and use by activities specific to civic education.
### Development of Communication Skills

**Students are to:**

- use their dialogue, public discussion of an issue, negotiation, conflict-resolution skills and abilities;
- assess and value different perspectives of thought and action as sources of mutual enrichment;
- reflect critically on their own and others' prejudices and stereotypes

- Argumentation exercises
- Text addition or continuation, text commenting or summarising exercises
- Self-evaluation and evaluation exercises
- Guided conversational activities (questions and answers), free dialogue and discussion on a specific topic, on a controversial subject, etc
- Exercises requiring the expression of personal opinions/beliefs/feelings
- Answers to letters, opinion polls, investigations (personal surveys)*
- Negotiations, decision-making by consensus or by compromise, choosing the leader, etc.
- Conflict resolution exercises*
- Exercising the use of modern communication technology*
- Newspaper, film, photographic album-making activities and exercises (teamwork project)*

### Development and Use of Skills Required for Social Participation

**Students are to:**

- Take part in negotiating their rights and duties in class and in school
- Assume responsibilities
- Link up decisionmaking to action and the consequences thereof
- Recognise and involve themselves in cases when social action is needed
- Develop and use teamwork, cooperation, and fair competition skills
- Take an interest and show a sense of initiative in resolving the problems of their communities

- Information activities concerning the local community: case studies, information bulletins, etc.*
- Group exercises of decisionmaking, of proposing or choosing a problem-resolution strategy
- Project-type activities*
- Activities pursuing to influence public decision-making (letter-writing or media campaigns, cooperation with civic organisations or state institutions, participation in the decision-making bodies of the class or school, etc.*
- Invitations sent out to representatives of the ruling forces or civic organisations as part of class activities*
- Visits to the head offices of civic organisations and government institutions, getting to know their specific projects and activities
### Development of democratic attitudes and their expression

Students are to:

- Develop positive feelings and attitudes to other individuals which show in a sense of cooperation, solidarity/mutual help, fair competition;
- Take care of themselves and of other people, take an interest in public issues and community life;
- Develop and use their empathy
- Value differences among people and conflicting values in society, accept and promote pluralism in its various forms
- Show respect and decency
- Behave properly
- Appreciate quality work and be concerned with the quality of work done

### Hands-on activities, in pairs or in groups, undertaken as:

- Case studies
- Simulation activities
- Role playing based on empathy; other games
- Project-type activities requiring teamwork*
- Contests/competitions
- Cooperation with various persons through involvement in their projects*
THE CONTENTS OF LEARNING

Note

Learning activities marked (*) are curricular items at the discretion of schools (30%). Accordingly, such activities may be adjusted to the conditions prevailing in each school. The learning activities that are not marked (*) are part of the core curriculum.

1. Introduction (2 hours)²

- Civic education – education for democracy

Teachers and students may add to the above practice or they may concentrate on one of them
NATIONAL COUNCIL FOR CURRICULUM

COORDINATION COMMISSION FOR HUMANIST AND ART DISCIPLINES

CIVIC CULTURE CURRICULUM

GRADE 8

Bucharest, 1997
PRESENTATION NOTE

In grade 8 an in-depth study and nuanced discussion of the democratic values/tenets is planned as well as the exercise specific democratic political practices that were partially introduced to students in grade 7. This is to be achieved by taking up such basic principles and concepts of democracy as authority, accountability, justice, liberty, property, etc.

Within this framework, the knowledge acquired by students in grade 7 can be integrated and re-assessed, and specific skills and capabilities further developed in a new context.

To this end, reference will be made to texts already familiar to students (*The Constitution of Romania, The Universal Declaration of Human Rights*) and to other documents, instances, cases, images, etc. discussed in grade 7. The approach to the themes will have to consider the prospects for European integration and EU accession, as well as aspects of Romania’s participation in international organisms (UN, Council of Europe, etc.)
CONTENTS OF LEARNING

Note

Learning activities marked (*) are curricular items at the discretion of schools (30%). Accordingly, such activities may be adjusted to the conditions prevailing in each school. The learning activities that are not marked (*) are part of the core curriculum.

A LIST OF THE CONCEPTS TAUGHT:

• AUTHORITY

• FREEDOM AND ACCOUNTABILITY

• JUSTICE AND EQUALITY

• PROPERTY

• PATRIOTISM

I. DOCUMENT IDENTIFICATION:

Title: Civic Education Curriculum Grades 3 and 4

Author(s):

Corporate Source: Publication Date:

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign at the bottom of the page.

The sample sticker shown below will be affixed to all Level 1 documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 1

Check here for Level 1 release, permitting reproduction and dissemination in microfiche or other ERIC archival media (e.g., electronic) and paper copy.

The sample sticker shown below will be affixed to all Level 2A documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE, AND IN ELECTRONIC MEDIA FOR ERIC COLLECTION SUBSCRIBERS ONLY, HAS BEEN GRANTED BY

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 2A

Check here for Level 2A release, permitting reproduction and dissemination in microfiche and in electronic media for ERIC archival collection subscribers only.

The sample sticker shown below will be affixed to all Level 2B documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE ONLY HAS BEEN GRANTED BY

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 2B

Check here for Level 2B release, permitting reproduction and dissemination in microfiche only.

Documents will be processed as indicated provided reproduction quality permits.

If permission to reproduce is granted, but no box is checked, documents will be processed at Level 1.

I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.
