This curriculum guide defines social studies as the integrated study of the social sciences and humanities to promote civic competence. A framework for the K-12 social studies program in Alabama's public schools is provided. The curriculum emphasis on civic responsibility will encourage students to become informed, responsible, participating citizens, and enable them to function well in both their private and public lives. Content standards in the guide are minimum and required, and fundamental and specific but not exhaustive. School systems may include additional content standards and add implementation guidelines, resources, and/or activities. The curriculum guide uses history and geography as the central disciplines, with the addition of specific core information and ideas from economics, law, and U.S. government interwoven into all courses to provide for the program goals of historic, geographic, political, and economic literacy. These program goals support the commitment to provide a curriculum that prepares all of Alabama's students to lead productive and independent lives. The guide presents an introduction to the course of study, the conceptual framework, position statements, directions for interpreting the minimum required content, and the minimum required content and overview for various subjects in kindergarten through second grade, for third and fourth grade, for fifth and sixth grade, for seventh grade, for eighth and ninth grade, the ninth grade-twelfth grade social studies program, and for other ninth, tenth, eleventh, and twelfth grade materials. Appendices contain Alabama high school graduation requirements, and guidelines and suggestions for local time requirements and homework. A bibliography concludes the guide.

It is the official policy of the Alabama State Department of Education that no person in Alabama shall, on the grounds of race, color, disability, sex, religion, national origin, or age, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program, activity, or employment.
STATE SUPERINTENDENT OF EDUCATION'S MESSAGE

Social Studies is the integrated study of the social sciences and humanities to promote civic competence. The *Alabama Course of Study: Social Studies* Bulletin 1998, No. 18), establishes such a curriculum. The emphasis on civic responsibility encourages students to become informed, responsible, participating citizens. It is hoped that this curriculum will enable them to function well in both their private and public lives.

A comprehensive core curriculum for students at all grade levels provides rigorous course content and high-level academic standards delineating expected achievement by all students. The social studies curriculum pattern establishes a fundamentally new direction by providing a sound framework for historic, geographic, economic, and political literacy. The Social Studies State Course of Studies Committee, composed of educators and business and community leaders, the State Board of Education and I believe a sound program of instruction has been developed to guide the local systems in the implementation of their social studies curriculum.

PREFACE

The Alabama Course of Study: Social Studies (Bulletin 1998, No. 18) provides the framework for the K-12 social studies program in Alabama's public schools. Content standards in this document are minimum and required (Ala. Code §16-35-4). They are fundamental and specific but not exhaustive. In developing local curriculum, school systems may include additional content standards to reflect local philosophies and add implementation guidelines, resources, and/or activities, which, by design, are not contained in this document.

In addition, committee members attended state, regional, and national conferences; read articles in professional journals and other publications; reviewed similar curriculum documents from other states; listened to and read statements from interested individuals and groups throughout the state; used each member’s academic and experiential knowledge; and discussed issues among themselves and with colleagues. Finally, the Committee reached consensus and developed what they believe to be the best social studies curriculum for Alabama’s K-12 students.
ACKNOWLEDGMENTS

This document was developed by the 1997-98 Social Studies State Course of Study Committee composed of early childhood, intermediate, middle school, high school, and college educators appointed by the State Board of Education and business and professional persons appointed by the Governor (Ala. Code §16-35-1). The Committee began work in April 1997, and the State Board approved the Committee’s work in February 1998.

Throughout our state and nation, citizens from all walks of life are calling for significant educational reform. Consistent with the reform movement, the Alabama Course of Study: Social Studies provides Alabama’s public school students the opportunity to experience a curriculum that reflects the essence of reform: preparing students for full participation as twenty-first century citizens.

The overall social studies goal of civic responsibility requires the development of competent citizens committed to the fundamental constitutional values and principles. Sustained and systematic attention to responsible citizenship throughout the social studies curriculum will equip Alabama’s students to contribute effectively to their community, state, nation, and world.

Alabama Course of Study: Social Studies uses history and geography as the central disciplines. However, specific core information and ideas from economics, law, and U.S. government are interwoven into all courses to provide for the program goals of historic, geographic, political, and economic literacy. These program goals support the commitment to provide a curriculum that prepares all of Alabama’s students to lead productive and independent lives.

The high academic standards of the social studies curriculum provide a program of excellence as students are prepared to develop the knowledge, skills, and attitudes needed to enter the working world in the twenty-first century. The commitment to provide solid content knowledge in the core social studies courses, the attention to develop the critical thinking skills necessary to apply knowledge, and the encouragement of personal qualities of responsibility and self-management promote competent, productive citizens. These qualities are necessary for the successful completion of an overall program of studies reflecting world class standards.

1 History and Geography: Exploring My World

Alabama Course of Study: Social Studies
Alabama’s K-12 Social Studies curriculum encompasses four program goals that lead toward civic responsibility: historic literacy, geographic literacy, economic literacy, and political literacy. These program goals are not developed independently but will be attained as a result of planned, organized instruction that integrates social studies disciplines with specific emphasis on information literacy. The integration of the disciplines is necessary to show relationships, to present accurate and meaningful content, to interpret past and present events and conditions and to plan for the future. Instruction should equip students to retrieve, acquire, think about, organize, and share information.

**Program Goals**

**Historic literacy** proceeds from the development of historic thinking skills and historic understandings.

Historic thinking students:

- Understand the relationships of time, continuity, and change;
- Evaluate evidence;
- Analyze and interpret the historical record;
- Interpret cause and effect; and
- Construct sound historic arguments and perspectives.

Historic understandings include students’:

- Knowledge about local, state, national, and world history;
- Comprehension of the roles of individuals, groups, and institutions in history; and
- Appreciation of the interaction between the geographical and cultural foundations of the state, the nation, and other regions of the world.

**Geographic literacy** represents the students’ ability to recognize the integrative nature of geography.

Geographically informed students:

- Use maps and other geographic tools to identify human and physical characteristics of regions;
- Understand the processes that shape the world;
- Understand how the physical environment has been modified by human activities;
- Appreciate how human activities have been influenced by Earth’s physical features and processes; and
- Comprehend how geography can be used in the analysis of historical events and in planning for the future.

**Economic literacy** includes understanding basic economic concepts and the ability to reason logically about key economic issues that affect the lives of individuals as workers, consumers, and citizens.
Economically literate students:

- Understand the free enterprise system and the American economy;
- Understand the international marketplace;
- Identify economic problems and alternatives;
- Appreciate the differing views held by economists on economic issues; and
- Recognize the areas of consensus among economists on issues and methods of analysis.

Political literacy is reflected in understanding what governments are and what they do.

Politically literate students:

- Appreciate the foundations of the American political system;
- Understand the organization and responsibilities of local, state, and federal governments;
- Comprehend the relationship of the United States to other nations and world affairs; and
- Understand the rights and responsibilities of citizens in American democracy.

Information Literacy

Process skills in the Social Studies curriculum have traditionally been referred to as acquiring information, organizing and using information, and interpersonal relationships and social participation. For purposes of this document, acquiring information and organizing and using information are collectively referred to as information literacy and are categorized as defining the task, retrieving information, acquiring information, thinking about information, organizing information, and sharing information.

Defining Task

- Analyze the question or problem.
- Determine information needed.

Retrieving Information

- Consider possible sources, e.g., informational indexes, encyclopedias, newspapers.
- Employ organizational systems used to find information, e.g., table of contents, key words, cross references.

Acquiring Information

- Read, listen to, and view various sources of relevant information.
- Clarify vocabulary using word identification skills, e.g., phonics, structural analysis, and context clues.
- Use map, globe, and graphic-reading skills.
Thinking About Information

- Understand, recall, and use information, e.g., identify, define, explain.
- Apply information in new situations, e.g., interpret, illustrate and determine relationships.
- Analyze information, e.g., compare/contrast, classify, categorize.
- Synthesize information, e.g., create/design a new plan, communicate orally and in writing.
- Evaluate information, e.g., assess, evaluate, judge.

Organizing Information

- Prepare notes, outlines, summaries, time lines, and graphics.
- Construct databases, spreadsheets, and computer-generated charts.

Sharing Information

- Write reports and research papers.
- Make presentations, e.g., multimedia, computer-generated material, charts and poster creations.

Scope and Sequence

Students encounter the four program goals throughout all grade levels. In the early grades, they learn more about themselves and the local environment. They participate in activities directed toward developing responsibility, learning cooperation, and participating in decision-making. Third graders study the settlement of the land and land use by its inhabitants. The formal study of history begins in the fourth grade with Alabama History and continues with United States and World History in two-year sequences through the eleventh grade. In the seventh grade, Social Studies instruction includes civics and consumer economics as well as world geography. Twelfth graders complete the formal study of Social Studies with courses in government and economics.
Position Statements

Primary Source Documents

Primary source documents of and about the time enrich the social studies program and enable students to visualize and empathize with people of other times and places. The Committee believes that the use of selected primary sources and documents is essential in the social studies curriculum. Therefore, this Course of Study includes standards that reflect the need for students to read and study selected primary sources and documents.

Literature

Literature from and about the various periods and places provides a rich resource for knowledge and understanding. Literature also enables students to gain insights into the lives of people at various times. Literary selections included in this document are offered as examples. Other titles may be appropriate. The committee encourages teachers to stay abreast of new literature that may enhance the social studies curriculum.

A Multicultural and/or Global Perspective

Ethnic diversity can be considered an asset in the classroom. In a democratic and multicultural society, students need to understand multiple perspectives that are derived from different ethnic vantage points. This understanding enhances the ability to relate to people in the United States and throughout the world.

Service Learning

Service Learning is a teaching/learning method that connects meaningful community service experiences with academic learning, personal growth, and civic responsibility. Students use the knowledge and skills learned in the classroom to meet real needs in the community. Students gain valuable learning experiences that deepen their understanding not only of the curriculum but also of life. Social Studies content standards may be extended beyond the classroom into the community through real-world experiences of serving in the community. (42 U.S.C. §12501 et seq., and 45 CFR Part 2510 et seq.)

Current Events

The focus of the K-12 Social Studies curriculum is the production of responsible citizens. The committee strongly recommends the inclusion of current events as an essential element of the social studies instructional program. Knowledge about and
analysis of current events are vital in learning to be a responsible citizen. Current events should be incorporated at each grade level and in every social studies course.

**Technology**

Technology continues to impact the Social Studies curriculum. All students should participate in learning activities using the most current technological innovations. Technology in the Social Studies class should be a tool to extend knowledge and understanding of content.
1. **CONTENT STANDARDS** are statements that define what students should know and be able to do. In this document, the content is listed as content standards. The order in which content standards are listed is not intended to convey a sequential order for instruction. A content standard may describe a concept or skill that will be addressed throughout the school year.

2. Content standards describe what students should know or be able to do at the conclusion of a course. Each content standard contains a STEM that completes the phrase, “Students will....”

<table>
<thead>
<tr>
<th>Students will</th>
</tr>
</thead>
<tbody>
<tr>
<td>Demonstrate an understanding of the movement of Europeans and Africans to America.</td>
</tr>
<tr>
<td>(Third Grade - Content Standard 15)</td>

3. Additional minimum required content may be listed under a content standard stem and is denoted by a bullet (•) or a hyphen (-). The ADDITIONAL CONTENT provides further specificity for the content standard.

4. **EXAMPLES** clarify content standards. They are illustrative but not exhaustive. Teachers may choose to add to or substitute examples when planning instruction. References to literary selections are meant to provide direction only. Other titles may be equally appropriate.

Kindergarten - Second Grade Overview

The Kindergarten, First Grade, and Second Grade curriculum focuses on extending the experiences of students in order to increase their understanding of the world in which they live. The K-2 program introduces the young student to basic Social Studies concepts by emphasizing the importance of each child’s interaction with his/her environment. As students actively participate in a variety of activities, such as drama, art, music, storytelling, and literature, they begin to understand their world better.

The K-2 Social Studies curriculum is organized thematically with map and globe skills, graphic organization, and reference skills developed throughout the three-year sequence. These themes are addressed in each grade level, K-2.

- Civic Awareness
- Geographic Awareness
- Economic Awareness
- Historic Awareness
- Cultural Awareness
The Kindergarten program is based on an outgrowth of children's own life experiences. Changes that occur in their lives, in the history of the school, and in their community provide a foundation for understanding events in the past, present, and future. Initial citizenship education includes the importance of following rules and respecting rights of other people. Learning is enhanced when information is presented in a thematic, interdisciplinary approach with emphasis on flexibility, attention to individual learning styles, and active participation in learning. Students are also exposed to the concepts of self-control, justice, courage, heroism, and leadership. Because many of the elements and concepts of social studies are abstract, the use of literature is encouraged to make events more meaningful to children. Through the excitement of discovery and exploration, students will develop individual and group responsibility toward humanity and the environment.

THE FIRST FOUR CONTENT STANDARDS ARE APPLIED THROUGHOUT THE COURSE.

Map and Globe Skills

Students will

1. Develop initial map and globe skills.
   • Location: Describe self in spatial relationship to other people and objects in the room.
     Examples: locating the teacher’s desk on a map of the classroom, drawing a circle-time picture showing seating of students
   • Direction: Give and follow verbal instructions related to classroom positions (front, back).
     Example: taking turns in front of the line when traveling through the school
   • Distance: Estimate distance using non-standard measures.
     Example: measuring length of classroom using book lengths
   • Scale: Compare the differences in size between a person/object and a representation of same.
2. Develop an awareness of map and globe representations.
   Examples: using play dough to create a replica of ocean and land masses; demonstrating mapping from a bird's-eye view by showing apples at eye level on a table and on the floor, then comparing the different views; reading *As the Crow Flies* by Gail Hartman

**Information Literacy**

3. Develop initial ability to display information in graphic form.
   - Graphs
     Example: making a pictograph of the methods of transportation used in getting to and from school
   - Maps
     Example: making a map of the playground as a treasure map for locating hidden treasure
   - Globes
     Examples: observing different sizes of globes, noting features such as land forms and water
   - Time lines
     Example: recording events on time lines such as holidays, projects, programs, daily news, yesterday, today, tomorrow
   - Models
     Example: constructing homes and school using large blocks and props

4. Locate new information and express understanding of the new information in various classroom projects.
   Examples: Projects—creating a variety of table-top models of houses from around the world, designing local neighborhoods using large appliance boxes, constructing animal homes utilizing various resources
   Research Resources—pictures, posters, charts, storybooks, fact books, trade books, songs, music, maps and globes, cooperative planning, media center use, computer and technological tools, guest speakers, field trips

**Civic Awareness**

5. Develop an awareness that school is a safe place for learning and working.
   Examples: *Will I Have a Friend?* by Miriam Cohen, *Annabelle Swift, Kindergartner* by Amy Schwartz

6. Develop an awareness of the reasons for rules in the school setting.
Examples: suggesting rules, abiding by rules, understanding reasons for rules, helping make group decisions, developing conflict resolutions

7. Exhibit behaviors that are part of responsible civic life in the school setting resulting in harmonious and socially satisfying relationships with others.
   - Sharing
   - Considering the rights, ideas, and feelings of others
   - Using good manners
   - Taking turns
   - Doing chores
   - Following rules and laws
   - Accepting consequences

8. Contribute to solutions of problems that arise in the school setting.
   Examples: sharing scarce resources, sharing space with others, sharing the teacher with others, bringing activities to conclusion

9. Become aware of patriotism, country, flag, the Pledge of Allegiance, and patriotic songs.

10. Exhibit personal responsibility for the care of the physical environment.
    Examples: classroom supplies, personal property, school campus, property of others, use of biodegradable products, gardening, anti-litter projects

11. Discover characters and events from literature that demonstrate the impact of one person's behavior upon another.
    - Consequences of helping others
    - Consequences of hurting others
    Example: *Rainbow Fish* by Marcus Pfister

12. Develop an awareness of character traits that appear in literature.
    - Selected stories
    - Nursery rhymes
    - Poetry
    - Fables
    - Folk tales

13. Associate behavioral choices with their resulting impact on self and others.
    Example: *Me Too!* by Mercer Mayer

*Alabama Course of Study: Social Studies*
14. Begin to develop an awareness of local laws and enforcing officials.
   Example: a visit from a policeman, local judge, sheriff

15. Become aware of safety signs and workers performing safety roles in school and the community.
   Example: *I Read Signs* by Tana Hoban

**Geographic Awareness**

16. Increase awareness of various environments.
   - Home
   - School
   - Neighborhood
   - Farm
     Example: *Little House* by Virginia Lee Burton and *Rooster's Off To See The World* by Eric Carle

17. Become familiar with the physical features of the school and the surrounding locality.
   - Location
     Examples: crosswalk near the school, flagpole
   - Place
     Examples: hilly, flat
   - Physical systems
     Example: trees and grass on a playground
   - Human systems
     Example: transportation route from home to school
   - Environment and society
     Example: improvement of the school neighborhood
   - Regions
     Example: model of neighborhood with school, houses, shopping areas

18. Relate the effects of weather and seasons on daily living.
   - Personal/family
   - School grounds
   - Rural/farms

19. Develop an awareness of the reasons for changes in the environment.
   - Weather
   - Time
   - Human alteration
     - Positive
- Negative

20. Demonstrate the ability to construct models of physical structures in the immediate environment.
   Examples: three-dimensional floor map, table-top models

**Economic Awareness**

21. Identify various workers and their roles in the community.
   Example: *The Jolly Postman* by Janet and Allen Ahlberg

22. Distinguish between goods and services.
   Example: creating goods and tangible items made from play dough

23. Distinguish between wants and needs.

24. Distinguish between producers and consumers.
   Example: using role-playing at a lemonade stand

25. Describe ways that people in various group settings satisfy wants and needs.
   • Trading
   • Purchasing
   • Savings
   Example: short drama of a customer buying merchandise in a store

26. Identify human-made and natural resources.
   • Energy
   • Water
   • Trees
   • Soil
   • Books

27. Trace the production of a product from beginning to end.
   Example: *Charlie Needs A Cloak* by Tomie DePaola

**Historic Awareness**

28. Begin to compare different forms of communication from the past and the present in different times.
Examples: Pony Express, telegraph, sending letters by ship, telephone, E-mail

29. Begin to compare different forms of transportation from the past and the present in different times.
   Examples: *Things That Go: A Traveling Alphabet* by Seymour Reit, *Airport* by Byron Barton, *Bernie Drives A Truck* by Derek Radford

30. Recognize growth in one's life.
   Examples: portfolio, personal history booklets with height and weight charts, pictures taken throughout the year, samples of work

31. Compare and contrast the lives of fictional and non-fictional children in stories of the past and present.
   Examples: *Young Squanto: The First Thanksgiving* by Andrew Woods, *When I Was Young in the Mountains* by Cynthia Rylant

32. Recognize important historical figures in American history through songs, poetry, literature, and drama.

33. Develop an awareness of current events.
   - Self
   - Family
   - Class
   - Community
   - World

Cultural Awareness

34. Develop an awareness of the uniqueness of individuals.
   Examples: characteristics, basic emotions, capabilities

35. Develop an awareness of how people are the same and yet different.
   Example: *It Takes A Village* by Fletcher Cowen

36. Build an understanding of different cultures through the exploration of holidays, customs, and traditions.

37. Develop an awareness of the lives of children in other places.
Example: *Gilberto and the Wind* by Marie Hall Ets
First Grade
History and Geography:
Exploring My World

The First Grade program encourages students to learn more about the world around them as they study their locality in relationship to other places both near and far as well as now and long ago. First Grade students learn more about themselves, others, and the physical world through literature. Students expand their sense of time and place as they increase their appreciation for people and ways of life in a larger world different from their own. Through involvement in a thematic approach with active manipulation and exploration of their environment, students construct understanding of relationships among objects, people, and events. The overall goals of the first-grade curriculum are to increase students' knowledge of their human and physical worlds and to increase their appreciation for different people and different ways of life.

The First Four Content Standards Are Applied Throughout the Course.

Map and Globe Skills

Students will

1. Extend the development of initial map and globe skills.
   - Features: Distinguish between land masses and bodies of water on maps and globes.
     Example: continents and oceans
   - Location: Extend comprehension and use of relative terms.
     Examples: in front of, beside, below, behind, to the right of, next to
   - Location: Identify prominent features of their locality on student-constructed maps and models.
     Example: creating a map showing location of students' homes, *Me on the Map* by Joan Sweeney
   - Directions: Give and follow directions using relative terms.
     Examples: to the left of, to the right of, forward, backward
   - Directions: Become aware of cardinal terms (north, south, east, west) and associate terms with maps and directions.
   - Distance: Measure distances using both non-standard and standard measures.
1st

- Scale: Compare the differences between the size of the actual school and/or locality to a representation.
  Examples: pictures, maps, models

Information Literacy

2. Extend initial ability to display information in graphic form.
   - Globes
   - Maps
   - Charts
     Example: *Seasons of Arnold's Apple Tree* by Gail Gibbons
   - Graphs
     Example: graphing over time the number of books read
   - Time lines
     Example: constructing time lines of classroom activities, school holidays, community activities, current events
   - Models
     Example: examining several types of scaled models such as cars, homes, or communities

3. Extend initial ability to locate new information and to express understanding in various classroom projects.
   Example: imitating activities encountered in reading about other times and other places
   Research Resources: computer and technological use, storybooks, songs and music, student-generated books, field trips, guest speakers, interviews, pictures, posters, fact and fiction books, maps and globes, cooperative learning, use of writing portfolios

Civic Awareness

4. Extend the range of behaviors, rights, and courtesies that are part of responsible civic life within the school setting.
   - Working cooperatively
   - Respecting opinions of others
   - Proposing actions to benefit the group
   - Proposing solutions to classroom problems

5. Develop an awareness of government.
   - Helping establish rules, rewards, and penalties
Examples: helping define roles and responsibilities, proposing actions to benefit the group, proposing solutions to classroom problems, selecting/electing classroom leaders

   Example: role-playing

7. Analyze character traits encountered in works of literature.

8. Identify school leaders and their roles.
   Examples: principal, librarian, counselor

**Geographic Awareness**

   - Rural
   - Urban
   - Natural
   - Human-made
     Example: lakes

10. Relate land use in their locality to the physical features of the land.
    Examples: physical features—water resources, soil, vegetation
             land use—residential areas, commercial areas, recreational areas, industrial sites, transportation systems, agricultural areas

11. Describe the impact of cultural changes on the locality over time.
    Examples: new neighborhoods, shopping malls, highways

12. Develop an awareness of environmental problems in local communities.
    Example: Earth Day activities

13. Exhibit an awareness of the ways personal actions benefit or harm the local environment.
    Examples: recycling, littering, volunteering
14. Discover why geographic changes occur over time and how these changes affect the people who live and work in the area.
   Examples: natural disasters, weather patterns, new construction

Economic Awareness

15. Compare work in the local community today to work in the past.
   Example: surveys of family members

16. Develop an understanding of specialized work in service industries.
   - Repairing or packaging goods
   - Transporting goods
   - Marketing goods
   Examples: finished product traced to its origin, participation in Career Day

17. Develop an awareness of exchange systems within the family, school, and community.
   Examples: chores performed for goods and services, money exchanged for goods and services

18. Develop an awareness of price in the exchange of goods and services.
   - Money or goods asked for something
   - Money or goods given for something
   - Cost of something obtained
   Examples: purchase price of pencils, lunch, or toy; Picking Peas for a Penny by Angela S. Medearis

19. Describe ways people are interdependent within the family, school, and community.
   Examples: culturally, economically, environmentally, politically

20. Exhibit an appreciation of the way life in a locality is enriched by the world community.
   Examples: goods and services, literature, music, art

Historic Awareness

21. Compare transportation today and to transportation in the past.
22. Compare the history and features of the local community with a contrasting community.
   - Rural
   - Urban
   - Natural
   - Human-made

   Example: *A Country Far Away* by Nigel Gray

23. Compare the lives of children living today to the lives of children of a different time period.

24. Describe how the locality is connected to the larger world geographically and economically now and long ago.

   Examples: communication—post office, radio station, satellite dish, facsimile, voice mail, answering machine, modem; transportation—highways, railroads, air travel, space travel, *Mr. Grigg’s Work* by Cynthia Rlant

25. Analyze the movement of selected people and ideas from place to place over time.

   Examples: immigration, migration

26. Develop an awareness of historical figures.

   Examples: Thomas Jefferson, Sequoyah, George Washington Carver, John F. Kennedy, Rosa Parks, Mikhail Baryshnikov, Georgia O’Keeffe, Leontyne Price

**Cultural Awareness**

27. Describe the origins of holidays in various cultures.

   Example: *Village of Round and Square Houses* by Ann Grifalconi

28. Describe traditions of various cultures noting similarities and differences.

29. Become acquainted with various cultures encountered in stories from literature.

   Examples of aspects of culture: beliefs, customs, ceremonies, traditions, social practices, moral teachings, *Raven: A Trickster Tale From the Pacific Northwest* by Gerald McDermott

30. Retell stories about communities in other times and places that reflect cultural diversity and commonality.
1st

Example: *Knots On A Counting Rope* by Bill Martin Jr. and John Archambalut

31. Exhibit an understanding of cultural diversity found in the classroom, in the locality, and in the world.
   Examples: family members, classmates' family members
Second Grade
Interdependence:
Making A Difference In Our World

The Second Grade program encourages students to develop a connection with people—both past and present — by learning about how people make contributions to society. Through the integration of civic awareness, geography, history, and basic economic concepts, these connections can be achieved. Students will be involved in using good research, reading and hearing relevant literature, working in cooperative groups, and participating in related arts education activities. A special emphasis is placed on the role of the individual in an increasingly independent world.

THE FIRST FOUR CONTENT STANDARDS ARE APPLIED THROUGHOUT THE COURSE.

Map and Globe Skills

Students will

1. Develop map and globe skills appropriate to developmental level and grade level.
   - Features: Demonstrate a working knowledge of maps and globes in classroom activities.
     - Hemispheres
     - North Pole
     - South Pole
     - Continents
     - Equator
     - Arctic Circle
     - Antarctic Circle
     Example: creating salt maps
   - Symbols: Become aware of symbols used in map legends.
     Example: compass rose
   - Symbols: Be able to invent symbols to represent objects in student-made maps.
   - Location: Be able to locate on maps and globes major land masses and bodies of water associated with characters encountered in fiction and non-fiction.
   - Location: Be able to locate sites on a map associated with food production, transportation, and sale.
     Example: locating production sites found on the labels of canned foods
   - Directions: Apply knowledge of cardinal directions in classroom activities.

Alabama Course of Study: Social Studies
Examples: going on a treasure hunt, driving a toy car on a large floor map, *Roxaboxen* by Alice McLerran, *Make Way For Ducklings* by Robert McCloskey

- Scale: Be able to evaluate several routes on simple maps to find the shortest route between two points.
  Example: *As the Crow Flies* by Gail Hartman

**Information Literacy**

2. Develop the ability to interpret and display information in graphic form.
   - Maps
   - Globes
   - Charts
     Examples: creating a chart to display types of transportation used to move people now and long ago, *I Go With My Family to Grandma's* by Riki Levinson
   - Graphs
     Example: graphing the number of students in the class born in the local area versus students born out of the area
   - Time lines
     Example: developing a time line displaying significant events in family histories, class histories, and historic events

3. Develop the ability to locate new information and to express understanding of this information in various classroom projects.
   Example: imitating activities from other times and other places encountered in talks with grandparents and other “old-timers”
   Research Resources: cooperative learning groups, computer programs and technological use, speakers, field trips, writing portfolios, topics, pictures, posters, charts, fact and fiction books, songs and music, interviews

**Civic Awareness**

4. Identify reasons for rules.

5. Extend awareness of the role of government.
   - Roles of community leaders and officials
     Examples: law enforcement officials, religious leaders, local government officials
6. Develop an initial understanding of the election process and the duties of political leaders.
   Example: mock elections

7. Develop an awareness of the basic values and principles of American democracy.
   Examples: truth, justice, patriotism

8. Develop a respect for human rights including those of individuals and minorities.
   Example: *Elmer* by David McKee

**Geographic Awareness**

9. Relate the study of significant people to the elements of geography.
   - The world in spatial terms
     Example: pins placed on an appropriate map to show locality or birthplace of significant people
   - Places and regions
     Example: photographs and pictures of architectural features in the community designed and/or built by local craftspeople and architects, highlighted areas on a large local map depicting recreation places visited during a period of time such as week, month
   - Environment and society
     Example: comparisons of antique and modern tools and machines used by family members to change the physical environment
   - Human systems
     Example: stories written by students about places families visit for recreation
   - Physical systems
     Examples: oceans, rivers
   - Use of geography
     Example: community changes

10. Identify ways the natural environment affects occupational opportunities.
    Examples: landforms, soil, water sources, climate, plants, animals

11. Identify ways people affect the land.
    Example: *Letting Swift River Go* by Jane Yolen

12. Develop an initial awareness of geographic concepts related to the food industry.
    - Climate
    - Soil fertility
- Water sources
- Natural disasters
- Overuse of farmlands
- Urban development
- Regional diversity in agriculture
- Transportation networks

Economic Awareness

13. Become aware of the role of government in regulating goods and services.
   Example: food industry

   - Producers
   - Processors
   - Distributors

15. Develop an awareness of specialization and interdependence as they relate to workers in the food industry.
   Examples: benefits and drawbacks of specialization, instances of ways that specialization creates interdependence

16. Develop an awareness of the resources used in the production of goods and services in the food industry.
   - Natural
   - Human
   - Capital
   Example: Milk From the Cow to the Carton by Aliki

17. Explain how scarcity of resources requires people to make choices about goods and services in the food industry.

18. Develop an understanding of international trade.
   Example: production and distribution of food products, clothing labels

19. Develop an awareness of occupational opportunities that have evolved from conservation and resource management.
   Examples: scientists, environmental engineers, waste managers

20. Develop an understanding of the impact of technology on occupations related to goods and services.
• Communication
  Examples: facsimile, satellite technology, Internet
• Agriculture
  Examples: automatic sprinklers, hydroponics, fertilizers
• Transportation
  Examples: rapid delivery systems, refrigerated transports
• Health care
  Examples: diagnostic procedures, laser surgery

Historic Awareness

21. Develop a sense of history through the examination of family histories.
  Examples: family tree, location of family origin, migration of family to present location, family photos or letters, family adventures, family legends, Grandparents Day, interviews, Long Way to a New Land by Joan Sandin, Watch the Stars Come Out by Riki Levinson, Home Place by Crescent Dragonwagon

22. Compare transportation methods of families now to those used by families long ago.
  Example: murals depicting past and present

23. Compare occupations of family members now to those of family members long ago.
  Examples: Pioneer Day, Career Day

24. Identify major celebrations of events in U.S. history.
  Examples: Independence Day, Thanksgiving Day, Veterans Day, Memorial Day, Presidents Day

25. Associate significant historical and contemporary political figures with the impact they have had on our society.
  Examples: George Washington, Paul Revere, Abigail Adams, Benjamin Franklin, Thomas Jefferson, Abraham Lincoln, Davy Crockett, Susan B. Anthony, Eleanor Roosevelt, Martin Luther King, Rosa Parks, Sandra Day O’Conner, Elizabeth Dole, Colin Powell

Cultural Awareness

26. Describe the contributions of significant individuals who have affected our lives.
  Examples: Clara Barton, Thomas Hart Benton, Andrew Carnegie, Roberto Clemente, Marie Curie, John Dewey, Thomas Edison, Bill Gates, Jane
27. Recognize individuals of various cultures who have contributed significantly to the arts and humanities.

   Examples: Leonard Bernstein, Aaron Copland, Duke Ellington, George Gershwin, Lois Lenski, Robert McClosky, Beverly Sills, Phyllis Wheatley, Mother Teresa, Princess Diana

28. Recognize similarities and differences among family culture and the cultures of appropriate literary characters.

   Example: *Keeping Quilt* by Patricia Polacco
Third and Fourth Grade Overview

CONTENT EMPHASES

The Land and Its People

- Uses of the Land and Resources
- Significant Historical and Political Personalities
- Regions
- Economic Changes
- Native Americans
- Geography
- Early Settlement

Alabama History and Geography

- Natural Environment
- Native Americans
- European Settlement
- Alabama Society
Students in Third and Fourth Grades are introduced to their first formal studies in history and geography. Third Grade students study the interaction of people with the natural environment. Special emphasis is placed on how the environment has influenced historic, economic, political, and cultural development.

Alabama History and Geography introduces Fourth Grade students to their first chronological study. The unique character of Alabama's economy, government, and culture emerges as students trace the history and geography of their state.

The Third Grade curriculum is organized thematically, and the Fourth Grade curriculum is organized chronologically. The program goals, historic literacy, geographic literacy, economic literacy, and political literacy; map and globe skills; graphic organization; and reference skills are integrated throughout both courses.

Third Grade—The Land and Its People

- The Land of Early Native Americans
- Settlement of the Land
- Interaction Between Land and People
- The Land and Its People Today

Fourth Grade—Alabama History and Geography

- Alabama's Physical Location and Characteristics
- Alabama's Earliest Inhabitants
- Early European Exploration and Settlement
- Alabama in the Nineteenth Century
- Contemporary Alabama
The Third Grade curriculum is a study of the way people live or have lived in their natural environment at different times. Students develop an understanding of how the environment affects its inhabitants and ways people have changed the land. Students learn how a society’s ideas, cultures, desires, and needs are reflected in land use patterns. Civic awareness is developed through the study of all levels of government.

THE FIRST FOUR CONTENT STANDARDS ARE APPLIED THROUGHOUT THE COURSE.

Map and Globe Skills

Students will

1. Extend their development of map and globe skills.
   - Symbols: Associate symbols with features of thematic maps.
     Examples: locating different Native American groups on a map of the United States using a colored dot system, creating a map of the United States using graphics to identify different types of land cover and vegetation.
   - Features: Demonstrate a working knowledge of maps and globes in classroom activities.
     - Hemispheres - Tropic of Capricorn - Longitude
     - Prime Meridian - Tropic of Cancer - Continents
     - International Date Line - Arctic Circle - Oceans
     - North Pole - Antarctic Circle - Mountain ranges
     - South Pole - Compass rose - River systems
     - Equator - Latitude
   - Location: Demonstrate an understanding of simple grid systems created for and applied to various maps.
     Example: establishing the absolute location of early American cities
   - Direction: Apply understanding of compass reading in selected activities.
     Example: acting out orienteering with and without a compass such as the movement of Native Americans, voyages of Europeans
3rd

- Scale: Become aware of relationships between time and distance.
  Examples: discussing and recording the time it takes to travel from one world region to another, *From Sea to Shining Sea* by Amy Cohn

**Information Literacy**

2. Know how to interpret and display information and data using various graphic organizers.
   - Maps
   - Globes
   - Charts
   - Graphs
   - Time lines
   - Tables
   Example: creating an illustrated time line tracing events associated with European and African settlements

3. Use references for independent investigations of selected topics.
   - Atlas
   - Computer
   - Dictionary
   - Encyclopedia
   - Media center
   Example: accessing information on the Internet, on CD-ROM, on laser disks

**The Land of the Early Native Americans**

4. Describe the natural environment of North America.
   - River systems
   - Physical geography
     - Land forms
     - Natural regions
   - Natural resources
     - Native wildlife
     - Vegetation

5. Relate the elements of geography to the time of the early Native Americans.
   - The world in spatial terms
     Example: student-generated maps or models showing landforms and bodies of water in a selected Native American community
   - Places and regions
Examples: a three-dimensional model of a Native American village, field trip to a Native American site, listings of common characteristics shared by selected Native American communities

- Environment and society
  Example: stories about Native Americans that describe adaptations to the environment such as clothing, crops, building materials

- Human systems
  Example: group discussions about types of transportation used by Native Americans

- Physical systems
  Examples: oceans, rivers, climates

- Uses of geography
  Example: location of settlements

6. Compare different groups of Native Americans.
   - Food
   - Shelter
   - Clothing

7. Relate the movement of various Native American groups to features of the natural environment.
   Examples: mountains, deserts, rivers, plains, woodlands

8. Describe how the natural environment influenced the development of Native American cultures.
   Examples: how their villages looked, why their villages were located where they were, which structures were built, how those structures were related to the climate, what methods and forms of production and exchange were used

9. Compare cultural aspects of selected Native American groups.
   Examples: tribal identity, art, religion, folklore, customs, traditions, political structures, The Legend of the Bluebonnet by Tomie DePaola, The Popcorn Book by Tomie DePaola

10. Investigate Native American concepts of government.
    Examples: League of Iroquois, The Great Council of the Muscogee Nation (Creek), system of federalism of the Lakota

Settlement of the Land
11. Describe relationships between early settlements and the natural environment.
   - Choice of settlement sites
   - Basic needs of settlers
   - Occupations of settlers
   - Clearing land
   - Use of natural resources
   Examples: hunting, farming, fishing, mining

12. Identify the formation of various forms of governing.
   Examples: religious principles, English Common Law, Mayflower Compact

13. Describe land use by Native American and European settlements.
    Examples: *Wagon Wheels* by Barbara Brenner, *Little House in the Big Woods* by Laura Ingalls Wilder

14. Demonstrate an understanding of the movement of Europeans and Africans to America.
    - Routes
    - Motivation
    - Obstacles

15. Compare the lives of Europeans and Africans during the exploration and settlement of America.
    - Locations
    - Cultures
    - Economic systems
    - Political systems

**Interaction Between Land and People**

16. Describe natural features.
    - Physical characteristics
    - Natural resources
    - Interdependency

17. Evaluate how land use affects the land and its inhabitants.
    - Economy
      Examples: agriculture; industry; transportation;
      *House on Maple Street* by Bonnie Pryor; *A River Ran Wild*;
      *An Environmental History* by Lynne Cherry
18. Identify examples of land rights and responsibilities of citizens.
   Examples: public parks, home ownership, public buildings

19. Develop an understanding of the reasons for the location of human-made places.
   Examples: cities, highway systems, industrial areas, recreational areas, agricultural areas

The Land and Its People Today

20. Relate current events to their historical foundation.
    Examples: Independence Day, Veterans Day, election day, census-taking

21. Compare careers of the past to careers of the present.
    Example: General Store by Bobbie Kalman

22. Differentiate between producers and consumers.
    Examples: sellers and buyers, low cost versus high cost, supply and demand, customer services

23. Differentiate among county, state, and country.

24. Distinguish among local, state, and national governments.
    • Leaders
    • Structure
    Examples: local—elected mayor and council; state—executive, legislative, judicial

25. State the term of office for various political offices.
   Example: *Bumper to Bumper: A Traffic Jam* by Jakki Wood

27. Identify patriotic symbols.
   - State
   - National
   Example: *We The People* by Peter Spier

28. Examine the effects of changing technologies on the global community.
   Examples: irrigation methods, compass, telegraph, E-mail, satellite, communication, Internet
Fourth Grade
Alabama History and Geography

Alabama History and Geography is a year-long course that serves as the introduction to chronological history for Fourth Grade students. This course builds on the concepts and appreciation of history and geography that students have gained in previous studies. Students acquire skills for reading, interpreting, and analyzing historical materials in textbooks, literature, documents, and other primary sources. Students will present information in both written and oral form; apply problem-solving and critical-thinking procedures; use maps, globes, charts, and graphs; and understand time and chronology related to Alabama’s history.

THE FIRST FOUR CONTENT STANDARDS ARE APPLIED THROUGHOUT THE COURSE.

Map and Globe Skills

Students will

1. Extend the development of map and globe skills.
   • Features: Extend knowledge of symbolic systems through work with various thematic maps of Alabama.
     Examples of natural characteristics: weather/climate maps, physical-relief maps, land-cover maps
     Examples of human characteristics: transportation maps, political boundary maps, economic development maps, land-use maps
   • Location: Apply an understanding of intermediate directions (NE, SE, NW, SW) in various classroom activities.
     Examples: locating major cities and their home county in Alabama; giving directions about how to move from one location to another; locating major cities in regions of the United States such as Washington, D. C., Atlanta, GA, Sacramento, CA, Denver, CO; Oklahoma City, OK, New York City, NY, Phoenix, AZ, Detroit, MI
   • Direction: Demonstrate orientation skills by following and giving specific verbal instructions.

Alabama Course of Study: Social Studies
Examples: describe the location of Montgomery relative to other major cities using an Alabama map, describe the location of Alabama relative to other states and countries using a world map or globe.

- Distance: Use a scale to measure distances between places. Compare distances between places using a scale and mileage markers.

- Scale: Understand variations in a scale.
  Examples: examine a variety of maps using different scales, draw representations of the classroom using various proportions

**Information Literacy**

2. Interpret and display information and data using various graphic organizers.
   - Maps
   - Globes
   - Charts
   - Graphs
   - Illustrations
   - Tables
   - Time lines

3. Apply reference skills in independent investigations of selected topics.
   - Atlas
   - Electronic resources
   - Dictionary
   - Encyclopedia
   - Media center

**Alabama’s Physical Location and Characteristics**

4. Comprehend the geographic link between Alabama and regions of the United States.
   - Land regions
   - River systems

5. Describe the natural environment of Alabama including significant geographical features.
   - Mountains
   - Valleys
   - Bodies of water
   - Landform regions
     - Highland Rim
     - Cumberland Plateau
Alabama’s Earliest Inhabitants

6. Investigate significant methods of obtaining prehistoric and historical data.
   - Archaeological study
   - Research of literature
   - Use of primary sources
   - Personal interviews

7. Identify the major characteristics of prehistoric Indians: Paleo, Archaic, Woodland, and Mississippian.
   - Approximate times of existence
   - Culture
   - Government
   - Economy
     - Hunting
     - Farming
     - Trading

8. Assess the impact of European contact on Native American populations in Alabama.
   - Epidemics
   - Reorganization of tribes

9. Describe historic Indians of Alabama after European contact.
   - Name and location during selected time periods
     - Choctaw
     - Cherokee
       Example: Dancing Drum: A Cherokee Legend by Terri Cohlene
     - Chickasaw
     - Creek (Muskogee)
   - Culture
     Examples: folklore, games, dance, music
   - Government
   - Economy
   - Significant personalities

10. Describe aspects of the lives of historic Indians of Alabama.
    Example: projects reflecting cultural aspects of historic Indians
11. Explain lasting contributions made by Alabama's earliest inhabitants.
   Examples: place names, food, folk traditions, recreation

**Early European Exploration and Settlement**

12. Describe European explorations and settlements in Alabama and identify reasons for and consequences of each.
   - Spanish explorations and settlement
     - Piñeda
     - de Soto
     - de Luna
   - French explorations and settlements
     - Iberville Le Moyne
     - Bienville Le Moyne
   - British explorations and settlements

13. Describe the origin of conflict between Europeans and Indians.
   - Exploration
   - Trading
   - Land expansion
     - Examples: Tecumseh, Shawnee Rebel, Rober Cwiklik

14. Summarize the distinguishing features of the Creek Civil War and the Creek War.
   - Causes
   - Battles
   - Personalities
   - Results

15. Explain the effects of European domination over Native Americans in Alabama from 1519 to 1815.
   - Social
   - Political
   - Economic

**Alabama in the Nineteenth Century**

16. Illustrate the impact of the expansion of American settlements on Indian society in Alabama.
   Examples: lands sold by William McIntosh, *Trail of Tears* by Conrad Stein
17. Relate geographical features of Alabama to the movement of Alabama settlers during the nineteenth century.
   - Mountains
   - Rivers
   - Valleys
   - Plains
   - Soils

   - Locations
   - Modes of transportation
   - Family life/social life
   - Classes of people
   - Importance of religion
   - Land speculators and squatters
   - Music, dancing, storytelling
   - Early schools
   - Economic development

19. Summarize the important aspects of Alabama's entry into statehood.
   - Land surveys
   - Establishment of political boundaries
   - First constitution
     - Organization of the three branches of government
   - Governors William W. Bibb and Thomas Bibb

20. Explain reasons for the change in locations of Alabama's state capital.
   - St. Stephens
   - Huntsville
   - Cahaba
   - Tuscaloosa
   - Montgomery

21. Explain the importance of natural resources and land regions to the beginnings of industry and the development of Alabama's economy.
   - First factories
   - Advent of stagecoaches, railroads, steamboats
   - Development of plantation economy
   - Yeoman farmers
22. Compare local and regional life on plantations (owners and slaves) to the life of the townspeople and those who lived on small farms.
   - Transportation
   - Homes
   - Arts
   - Education
   - Economics
   Examples: *Alabama Angels* by Mary Barwick,
   *Alabama Angels in L.A. (Lower Alabama)* by Mary Barwick

23. Analyze slavery's impact on Alabama's society.
   - Psychological injustices
   - Economic conditions
   - Religious experience
   - Codes/legal basis
   - Family division
   - Music
   - Folk traditions

Fifth and Sixth Grade 
Overview - United States Studies

Fifth and Sixth Grade students are involved in a two-year sequence of courses called United States Studies that focus on the chronological development of the United States. Through an integrated approach that includes historic, geographic, economic, political, social, and cultural perspectives, this course emphasizes the role various groups played in the development of American society. The two-year time frame allows for a deeper, richer experience with American literature, art, drama, music, and architecture.

United States Studies is organized chronologically by major time periods focusing on the four program goals. Information literacy skills are developed throughout the two-year sequence.

Time Periods

Grade 5—United States Studies: Beginning to 1900

- Beginnings: Prehistoric Settlements and Native American Life
- European Exploration and Early Settlement: 1400s - 1600s
- English Colonization: 1600s - 1763
- Gaining Independence: 1763 - 1783
- The Forming and Growth of a Nation: 1776 - 1859
- Civil War and Reconstruction: 1860-1877
- Westward Expansion/Transition: 1900

Grade 6—United States Studies: 1900 to the Present

- The Emergence of Modern America: 1900 - 1930
- The Great Depression and World War II: 1929 - 1945
- Postwar United States: 1945 - 1969
- Contemporary United States: 1970 - Present

In spite of some overlap in years between these time periods, using these conceptual divisions will allow a deeper exploration and richer understanding of the period under study. It is strongly advised that teachers clearly point out and discuss these overlaps with students. Time lines and other graphic organizers will help students form an accurate conception of the broad time span.

Alabama Course of Study: Social Studies
In the Fifth Grade, students gain an understanding of the foundations of the United States from prehistoric times through the nineteenth century. This chronological treatment takes students from earliest settlements through the forming and growth of our nation to the brink of the twentieth century. Special emphasis is placed on the study of the founding documents and the development of American democracy; similarities, differences, and contributions of various cultural groups; and the emergence of a unique American culture.

THE FIRST THREE CONTENT STANDARDS ARE APPLIED THROUGHOUT THE COURSE.

Map and Globe Skills

Students will

1. Extend the development of map and globe skills.

   - Features: Locate major geographic features associated with the study of America’s history.
     Examples: ocean currents, prevailing winds, large forests, major rivers, significant mountain ranges
   - Relative Location: Use cardinal and intermediate directions to describe the relative location of selected places in North America.
     Examples: Maine in the northeastern United States, Mexico to the south of the United States, the Atlantic Ocean on the eastern border of Georgia
   - Absolute Location: Use a grid system to describe the absolute location of selected places encountered during the study of America’s history.
     - Latitude and longitude
       Example: comparing climates of places in America with countries of the origin of early settlers
     - Equator
     - Tropics of Cancer and Capricorn
     - Arctic and Antarctic Circles
     - Prime Meridian, International Date Line relative to North America and the world
• Directions: Extend orientation skills by following and giving specific cardinal directions and verbal instructions.
  Example: describing proposed trade and exploration routes through the eyes of the explorers

• Scale: Compare differences found on a variety of scales.
  Example: comparing a local area map with a map of a larger area such as Jamestown with the 13 colonies or with the North American continent

Information Literacy

2. Read, interpret, and organize information using a variety of sources and tools.
   • Charts
   • Globes
   • Graphs
   • Illustrations
   • Maps

The Sixth Grade course focuses on modern America from the beginning of the twentieth century to present times. Because our world today is mostly affected by national and international events and changes after World War II, the thrust of this year's study is placed most heavily on recent history. Special emphasis is placed on the study of America as a world leader.

At the beginning of the course, the industrial, urban, and social changes in America from 1870-1900 are briefly reviewed as a transition into modern America. Many historians recognize this period of time as a turning point because of the emergence of the United States as a major world power after the Spanish-American War. There were economic and social changes as well, including new inventions in communication and transportation that occurred during this period.

THE FIRST THREE CONTENT STANDARDS ARE APPLIED THROUGHOUT THE COURSE.

   - Military campaign in the African and European theaters: El Alamein, Normandy, Battle of the Bulge
   - Military campaigns in the Pacific theaters: Tarawa, Saipan, Iwo Jima, Okinawa, Midway
   - Economic and human cost: Holocaust, The Diary of Anne Frank, global casualties
   - Bombing of Hiroshima and Nagasaki casualties

27. Assess the impact of World War II on American culture.
   - Industrialization of the country: retooling of factories, “Rosie the Riveter”
   - Scientific and technological development
   - Restrictions of personal and civil rights: selective service, rationing, internment camps, censorship of the press
   - National heroes: McArthur, Eisenhower, Audie Murphy, Patton, Nimitz
   - State heroes

79

Alabama Course of Study: Social Studies
Example: Red Erwin
- Role of women
  Examples: the work force, military (WACs, WAVES, USO), heads of family
- Fine arts
  Examples: big bands, jitterbug, “Kilroy was here,” Duke Ellington

Postwar United States: 1945 - 1969

28. Evaluate changes in the United States after World War II.
   - Economic
     Examples: consumerism, instant credit, job market, industrial changes, GI Bill
   - Technological
     Examples: transportation, communication, industry
   - Military
     Example: desegregation of the military

29. Describe American society and culture of the 1950s “Baby Boom.”
    Examples: suburbs, consumer culture, television age, rise of youth-centered
    entertainment, automobile, decay of inner city, Elvis Presley, Mickey
    Mouse Club, I Love Lucy, American Bandstand

30. Describe the social and cultural implications and significant events of the Cold War.
    - Berlin airlift
      Examples: humanitarian aid, “Iron Curtain”
    - Korean conflict
      Examples: North vs. South Korea, “Bamboo Curtain”
    - Red Scare
      Examples: McCarthyism, “black list,” Hollywood, bomb shelters, air raid
      drills
    - Berlin Wall
      Examples: division of East/West Germany, Checkpoint Charlie
    - Cuban missile crisis
      Examples: Castro, Khrushchev, Bay of Pigs, first threat of nuclear warfare
    - Vietnam War
      Examples: North versus South Vietnam, domino theory, expense, length,
      heroes, Jeremiah Denton
    - Space race
      Examples: Sputnik; “Miss Baker,” the monkey; Alan Shepherd;
      Neil Armstrong; Huntsville

31. Contrast domestic policy of postwar presidents from the 1940s through the 1960s.
• Truman’s “Fair Deal”
• Eisenhower’s “Peace and Prosperity”
• Kennedy’s “New Frontier”
• Johnson’s “Great Society”

32. Understand the key events and people in the Civil Rights movement.

• National
  - *Brown v. Board of Education of Topeka, Kansas*
  - Dwight Eisenhower
  - March on Washington
  - Martin Luther King
  - Civil Rights Act of 1964
  - Lyndon B. Johnson
  - Voting Rights Act of 1965
  - “The Year of Chaos 1968”

• State
  - Montgomery Bus Boycott
  - Rosa Parks
  - The Selma March
  - Freedom Riders
  - George Wallace
  - Birmingham church bombing
  - Eugene “Bull” Conner
  - The University of Alabama

33. Understand the social/cultural implications of the Vietnam War for America.

Examples: protests, Kent State, popular culture, challenging of authority, returning veterans, POWs, MIAs

**Contemporary United States: 1970 - Present**

34. Explain the affects of Richard Nixon and Watergate on the public perception of the office of president.

35. Evaluate the effectiveness of the Nixon, Ford, Carter, Reagan, and Bush administrations.

• Environmental
  Examples: Clean Air Act, Environmental Protection Agency, Endangered Species Act, surface mining in Alabama

• Social
  Examples: Equal Rights Amendment, Supreme Court ban on school prayer, protection of the handicapped

81
Alabama Course of Study: Social Studies
• Political
  Examples: opening relations with China, Middle East peace talks, Strategic Arms Treaty with Soviet Union, regime in El Salvador, Iran-Contra scandal, collapse of the Iron Curtain and Berlin Wall, Desert Shield and Desert Storm

• Economic
  Examples: involvement in developing countries, reduction in military spending, “Read my lips—no new taxes.”

36. Explain the dynamics of a politically divided government.
   Examples: Republican Congress and Democratic Executive branch, Democratic Congress and Republican Executive branch

37. Compare the “frontier” concept in modern America to earlier concepts of the frontier.
   • Space
   • Oceanic exploration

38. Demonstrate an understanding of the American economy and economic decision making on American society.
   • Intradependence of U.S. decisions
     Examples: imports and exports, supply and demand, inflation, deficit spending, advantages of free trade
   • Interdependence of world and U.S. decisions
     Examples: shoes, clothing, electronics, OPEC/gasoline, transportation

39. Analyze the environmental and social consequences of humans changing the physical environment.
   • TVA and U.S. Army Corps of Engineers’ damming of rivers
   • Construction of interstate systems
   • Strip mining
   • Destruction of wetlands
   • Clear cutting of timber

40. Describe the impact of technological innovations on American life from the 1970s to the present.
   • Economic
     Examples: robotics, computer revolution, rapid rail system, satellite communication in the twentieth century
   • Social/Cultural
     Examples: microwaves, electricity, television, computers, Internet, satellite, music, video games, cellular phones, compact disks
   • Political
Examples: C-SPAN, sound bites, television and radio advertising

41. Describe the impact of and reasons for the influx of immigrants on American life in the twentieth century.
   Examples: religious diversity, language, internment labor, health care, welfare system

42. Discuss the social issues of the 1990s from differing perspectives.
   Examples: urban violence, drug traffic, affirmative action, juvenile crime, obsession with sports

The development of civic responsibility requires specific instruction in the components of citizenship that include an understanding of representative democracy, law, personal economics, and civic responsibility. The placement of the Citizenship course at the seventh grade level serves as a bridge between the curriculum emphases in the elementary and secondary grades. The Citizenship course provides an instructional emphasis to foster the student's desire to assume responsibility for his/her actions and fosters the development of a productive role in society.

The World Geography course places emphasis on the knowledge and skills that allow the students to develop a geographical perspective. The six essential elements of geography form a framework within which major geographic concepts are introduced. This conceptual approach allows teachers to select specific world regions or countries for in-depth studies. This course enhances the chronological study of world history at the Eighth and Ninth Grades and U.S. History in the Tenth and Eleventh Grades by providing a geographic foundation to understanding landscapes on which human history has evolved.

Both courses are arranged thematically.

**Citizenship**

- Representative Democracy
- Law
- Personal Economics
- Civic Responsibility

**World Geography**

- The World in Spatial Terms
- Places and Regions
- Physical Systems
- Human Systems
- Environment and Society
- Uses of Geography
This one-semester course is designed to provide students with basic knowledge and skills for functioning in modern American society. The workings of the American government and economy are studied as students explore the active role of citizens in the United States. Application to students' individual lives is stressed throughout the course as students acquire and apply information and skills to issues and problems in contemporary society. The following topics are to be explored in this course.

- Representative Democracy
- Law
- Personal Economics
- Civic Responsibility

**Representative Democracy**
This section focuses on the foundations and organization of representative democracy in the United States. Emphasis is placed on understanding the framing documents of American government and their relevance to our lives today. This component establishes the groundwork for developing knowledge, skills, and behaviors needed for active, responsible participation at the community, state, and national levels.

**Law**
In this section, students examine the American justice system. Consideration is given to civil and criminal laws, particularly those affecting Alabama's youth.

**Personal Economics**
Students gain knowledge of the basic elements of economics, their influence on the American consumer, and the role of the consumer in the marketplace. Personal finance principles are studied and then applied to life situations.

**Civic Responsibility**
Students recognize the meaning and importance of their responsibilities in a representative democracy and develop an appreciation of the need for creative thinking, strong ethical standards, and courageous action as citizens in today's society. Students explore the political process, the role of civic leaders, and the value of
Contributing to the general welfare and betterment of society while maintaining the rights of the individual.

Representative Democracy

Students will

1. Explain the significance and relevance of the U.S. founding documents.
   - The Declaration of Independence
   - The Constitution
     - Preamble
     - Three branches of government
     - System of checks and balances
   - The Bill of Rights

2. Discuss the essential characteristics of American democracy.
   - The source of authority
   - Representative government
   - Limited government
   - Constitutional government

3. Explain the historical background of Alabama's Constitution and its impact.

4. Explain the American political system.
   - Organization and functions of political parties, campaigns, and elections
   - Process of selecting political leaders
     - Nomination
     - Primary election
     - Referendum
     - People's initiative
     - Appointment
   - Identity of major office holders
     - Community
     - State
     - Nation
   - Evaluation of actions of public officials

5. Compare the American government with other governmental systems.
   Examples: monarchy, dictatorship, theocracy
6. Describe the organization, functions, and jurisdiction of courts within the American judicial system.
   - Local, state, national
   - Juvenile, adult
   - Civil, criminal

7. Explain the kinds of law.
   - Criminal law
     - Crimes against persons
       Examples: homicide, assault and battery
     - Crimes against property
       Examples: arson, vandalism, robbery
     - Other
       Example: substance abuse
   - Juvenile law
     - Distinction between juvenile and adult
     - Reasons for having separate system
     - Juvenile justice procedures
     - Juvenile rights
   - Civil law
     - Housing laws
     - Family laws
     - Labor laws
     - Contract laws
     - Tort laws

8. Explain the constitutional rights of citizens.
   - Due process
     Examples: search and seizure, arrest, preliminary hearing, appeal of verdicts, parole
   - Habeas Corpus
   - Speedy and public trials
   - Right to counsel
   - Trial by jury
   - Right against self-incrimination
   - Religious expression
   - Freedom of speech
   - Freedom of press
   - Freedom of association and assembly
   - Right to privacy
   - Right to equal protection
   - Right to bear arms
Personal Economics

9. Analyze the impact of the consumer in the marketplace.
   - As a consumer
   - As a citizen
   - As a worker

10. Explain the basic elements of economics as they apply to consumers.
    - Scarcity
    - Opportunity costs
    - Cost/benefit analysis
    - Characteristics of a market economy
    - Supply and demand

11. Apply the principles of money management to the preparation of a personal budget.
    Examples: housing, transportation, food, clothing, medical expenses, insurance

12. Apply the principles of money management to the various services provided by financial institutions.
    - Checking
    - Savings
    - Loans
    - Investments

13. Analyze the costs and benefits of using credit.
    - Credit cards
    - Loans

14. Apply principles of money management to purchases.
    - Comparison shopping
    - Brand-name buying

15. Identify the laws protecting the rights of consumers and the avenues of recourse for the violation of those rights.
    - Local, state, federal
    - Consumer protection agencies and organizations

Civic Responsibility

16. Explain the difference between citizens and noncitizens and the way that U.S. citizenship is acquired.
17. Evaluate the responsibilities of citizens.

- Personal responsibilities
  - Getting an education
  - Choosing a career
  - Providing for oneself and one’s family
  - Saving for the future
  - Behaving in a civil manner

- Civic responsibilities
  - Obeying the law
  - Paying taxes
  - Being informed
  - Monitoring public officials
  - Participating in the political process
    - Examples: voting, working in a campaign, holding office, attending rallies, writing letters, petitioning
  - Serving on a jury
  - Serving in the armed forces

18. Discuss the influence of the media on American life.

- Voter
- Consumer

19. Apply a civic problem-solving model.

- Identifying a problem
- Gathering information
- Generating possible solutions
- Selecting the most appropriate solution
- Developing an action plan
- Implementing the plan

Examples: recycling, revitalization of neighborhoods, tax support for public services, curfews, teen issues
This one-semester study of geography in the Seventh Grade emphasizes the knowledge and skills necessary to develop a geographic perspective. By the end of this course, students should understand the fundamental physical and human patterns on the Earth’s surface as well as the processes that created these patterns. Representative areas of the world should be selected for detailed studies of the content standards. In this course students learn how to apply a geographic perspective to the past, present, and future. This Seventh Grade study of Geography supports the study of World History in the Eighth and Ninth Grades as well as the study of U.S. History in the Tenth and Eleventh Grades. The six essential elements of geography are used to organize the content standards. Geographic skills and perspectives (*Geography for Life*, 1994) are interwoven throughout the content standards.

**Geographic Elements**

- **The World in Spatial Terms**  
  The structuring of geographic information, the ordering of knowledge into real and mental maps, and the spatial analysis of that information
- **Places and Regions**  
  The basic units of geography and how those units are organized differently by different people
- **Physical Systems**  
  Physical and environmental phenomena, such as land forms and climate, and their interaction through ecosystems, renewable resources, and the hydrologic cycle
- **Human Systems**  
  Human populations and their economic activities, migration patterns, settlement patterns, territorial arrangements, and political conflicts
- **Environment and Society**  
  Interaction between physical and human systems and identification of the central role of resources in environment-society links
- **Uses of Geography**  
  A component to understand the past, interpret the present, and plan for the future

Geographic skills provide the necessary tools and techniques for students to think geographically. They enable students to observe patterns, associations, and spatial order as they are asking geographic questions; acquiring, organizing, and analyzing geographic information; and answering geographic questions.
Geographic perspectives specifically addressed in this course are a spatial perspective and an ecological perspective. Students will gain experience in applying a spatial perspective through the inquiry of where and why (space and place) the human experience occurred in a particular place. An ecological perspective will be developed and applied through the examination of the connections and relationships between and among the living and nonliving elements on Earth.

Technology use is vital to this course. The use of spatial databases, Internet resources, census information, remotely sensed imagery, and virtual maps including daily television weather maps will enhance instruction. Students also benefit from the integration of content from other subject areas such as mathematics, earth science, and language arts.

The World in Spatial Terms

Students will

1. Explain map essentials: type, size, shape, distance, direction, location, scale, symbols.
   - Reference and thematic maps, topographic and planimetric maps
   - Globes
   - Map projections
   - Aerial photographs
   - Satellite images
   - Latitude and longitude
   - Cardinal and intermediate directions
   - Fractional, graphic, and verbal scale
   - Conventional symbols used in atlases

2. Illustrate spatial information using data, symbols, and colors to create thematic maps.
   Examples: patterns of population, economics, rainfall, vegetation, landforms, hurricane tracks over several seasons, international trade in commodities

3. Illustrate graphically and analyze the distribution of major physical and human features on Earth’s surface using different scales.
   Examples: Physical features—continents, mountain chains, oceans, rivers, climate
   Human features—countries, cities, population, economy, language, religion, resources

4. Evaluate the spatial arrangement of urban and rural land-use patterns in the local community or in a nearby community.
   - Commercial
   - Residential
7th - Citizenship

- Industrial
- Agricultural
- Mining

Places and Regions

5. Locate selected countries, cities, and physical features on maps, globes, and satellite images.

6. Identify physical and human criteria used to define regions at different spatial scales.
   Examples: hemispheres, regions within continents or countries, city boundaries, school districts, developed and less developed regions of the world

7. Evaluate the impact of human activity on landscapes over time using maps, graphs and satellite-produced images.
   Examples: agricultural patterns in different areas of the world, tree clearing in rain forests, damming of rivers and destruction of wildlife habitats, urban growth, land use change

8. Compare the physical and human characteristics of places using observation data and geographic resources.
   Examples: soils, landforms, vegetation, wildlife, religion, language, politics, population, land use

9. Relate place names with cultural and/or political perspectives.
   Example: names given to places or regions to symbolize an event or principle or to honor a person or cause

10. Relate the use of technology to the way culture groups perceive and use places and regions.
    Example: Air conditioning in the southern U.S. increases productivity and encourages migration into the South.

Physical Systems

11. Explain patterns in the physical environment within the context of physical processes.
    Examples: tectonic processes and continental drift, ocean and atmospheric circulation, erosion, Earth-Sun relationships and seasons, weather and climate, renewable and nonrenewable resources
12. Predict the short- and long-range effects of extreme weather phenomena and human activity on the physical environment.
   Examples: hurricane’s impact on a coastal ecosystem, heavy rainfall on hill slopes after deforestation

13. Describe ecosystems and explain why they differ from place to place.
   Examples: differences in soils, climates, topography, and populations

14. Identify changes over time in a nearby ecosystem resulting from human intervention.
   Examples: natural wetlands being replaced by farms, forests and farmland being replaced by housing developments

**Human Systems**

15. Describe human populations on the Earth’s surface.
   - Characteristics
     Examples: birth rate, death rate, life expectancy, population density
   - Distribution
     Examples: dot maps and choropleth maps of population concentration or dispersal, population pyramids
   - Migration
     Examples: rural to urban migration, southerners into northern areas of the United States in the twentieth century, northerners into the southern region in the late twentieth century, movement of Mongols across Asia and into Europe in the thirteenth century

16. Identify ways in which communities reflect the cultural background of their inhabitants.
   Examples: distinctive building styles, billboards in Spanish, foreign language advertisements, ethnic restaurants

17. Relate economic activity of a region within its geographic context.
   Examples: mining coal and other resources, irrigation and agriculture, sport franchise, impact on the local or regional community of the gain or loss of certain economic activities

18. Evaluate trading patterns of the United States and other countries related to locations.
   Examples: petroleum, wheat, cotton, automobiles, textiles

19. Discuss major industries in the United States from the perspective of how geography and the factors of production helped determine the locations of manufacturing plants.
7th - Citizenship

Example: those producing steel, aircraft, automobiles, food products, textiles, apparel

20. Identify major agricultural and urban settlement types and the geographic reasons for their location.
Examples: plantation, subsistence farming, truck-farming communities, port city, governmental center, planned city, single-industry city

21. Explain factors that contribute to conflict within and between countries.
Examples: use of land, economic competition for scarce resources, boundary disputes, cultural differences, control of strategic locations

Environment and Society

22. Evaluate the environmental effects of human actions on the four basic components of Earth’s physical systems.
   • Atmosphere
     Examples: effects of ozone depletion, climate change
   • Biosphere
     Examples: the effects of deforestation, reduction in biodiversity
   • Lithosphere
     Examples: the effects of land degradation, gully erosion
   • Hydrosphere
     Examples: the effects of pesticides and non-point pollution washed into river systems, decline of quality groundwater

23. Identify the significance of major technological innovations that have been used to modify the physical environment, both in the past and in the present.
   Examples: the effects of the introduction of fire, steam power, diesel machinery, electricity, work animals, explosives

24. Explain how the characteristics of different physical environments affect human activities.
   Examples: how people in Siberia, Alaska, and other high-latitude places deal with the characteristics of tundra environments such as frost heaves, freezing of public utilities, very short growing seasons; how people in low latitudes deal with tropical heat and high humidity with mid-day siestas

25. Explain the ways humans prepare for natural hazards.
   Examples: earthquake preparedness, constructing houses on stilts in flood-prone areas, designation of hurricane or tornado shelters and evacuation routes in hurricane- and tornado-prone areas
26. Describe world patterns of resource distribution and utilization by mapping and discussing such natural resources in terms of the locations of major deposits.
   Examples: petroleum, coal, copper, iron ore

27. Relate the importance of energy resources to the development of human societies.
   Examples: wood and water to people settling in new lands, natural gas for heating and cooling of buildings, coal for factories

The Uses of Geography

28. Identify changes over time indicating the process of urban growth in the United States.
   • Site characteristics
   • Situations
   • Function

29. Assess the role of different land-survey systems in establishing contemporary landscape patterns by examining maps.
   Example: comparing the history and landscape of a metes-and-bounds state, such as Georgia, with a rectangular land-survey system state such as Alabama

30. Evaluate the geographic impact of using major energy sources in the twenty-first century.
   Examples: petroleum, coal, nuclear power, solar energy

31. Analyze a geographic issue developing sound arguments in favor of recommendations for specific actions on the issue.
   Examples: building a dam and reservoir, construction to revitalize a downtown area, siting of a new landfill

32. Assess the balance between the negative impact of human habitation on the environment and the need for natural resources thought essential to sustain human life.

Overview - World History and Geography

Eighth and Ninth Grade students are engaged in a two-year course studying the chronological history of the world. This course addresses a broad range of content focusing on the four integrative program goals. Because accounts of human experience draw from many sources and influence the contemporary world, the Eighth and Ninth Grade course places equal emphasis on these.

Essential elements of geography - It is imperative that students apply the elements of geography within historical context. Students must have a concrete knowledge of physical geography to understand its impact on economics, population distribution, cultural development, and cultural diffusion. Students should associate the effects of these geographical factors on political activity over time.

Time lines - It is essential that students develop the ability to think chronologically.

Utilization of various literary sources - Historical fiction, essays, biographies, primary-source documents, legends, folk tales, poetry, plays, songs, and myths provide a vehicle for students to explore historical and geographical concepts and events. Literature also enables students to gain insights into other cultures and lives of people at various times.

Current events - Understanding contemporary events and relating them to the past are essential to a relevant social studies course. Current events should be included as an ongoing integral part of the course.

Technology - It is essential that students understand the importance of technological changes that have shaped modern society. Technology should be utilized as a component of instruction to enable students to compete in a rapidly changing world. Computer software and Internet access provide opportunities for students to explore historical and geographical concepts.

Time Periods

Eighth Grade - World History and Geography to 1500
- Early Civilizations to 500 B.C.
- Classical Civilizations: 500 B.C. to 500 A.D.
- World Expansion of Agrarian and Commercial Civilizations: 500 A.D. to 1500 A.D.

Ninth Grade - World History and Geography Since 1500
- The Emergence of a Global Age: 1500 to 1650
- The Age of Revolutions: 1650 to 1815
- The Age of Isms: 1815 to 1914
- Era of Global War: 1914 to 1945
- The World from 1945 to the Present
Eighth Grade World History and Geography to 1500 directs students to think critically about the various forces that combined to shape the world today. Emphasis is placed on geographic impact, development of civic knowledge/responsibilities, and emerging economic systems within a chronological context.

Critical thinking and analysis are important in this course; consequently, asking questions about societies and comparing and contrasting civilizations over time are essential. Through historical inquiry, students need not focus on world history and geography as endless factual detail; rather, they may gain an understanding and appreciation of history as an exciting story of people much like themselves at other times and places.

Early Civilizations to 500 B.C.

Students will

1. Evaluate the minimum components essential for the development of a civilization.
   - Technology
   - Division of labor
   - Government
   - Calendar
   - Writing

2. Compare the significant features of civilizations that developed in the Tigris-Euphrates, Nile, Indus, and Huang He River valleys.
   - Natural environment
   - Urban development
   - Social hierarchy
   - Written language
   - Ethical and religious belief system
   - Government and military institutions
   - Economic systems

NOTE: Efforts have been made to follow the Pinyin method of spelling with Chinese terms.
3. Compare the development of major world religions, philosophies, and their key tenets.
   - Judaism
   - Hinduism
   - Confucianism and Taoism
   - Christianity
   - Buddhism

4. Analyze the cultural contributions of Classical Greece.
   - Politics
     Examples: polis, democracy
   - Intellectual life
     Examples: Sophists, Socrates, Plato, Aristotle
   - Arts and architecture
   - Science

5. Compare the Hellenic and the Hellenistic world.
   - Role of Alexander the Great
   - Geographic features
   - Political and military factors
   - Intellectual life
   - Cultural interaction and religious diversity
   - Economic features

6. Analyze the key factors in the expansion of the Roman Republic.
   - Influence of geography
   - Organization of the government
   - Plebeians versus patricians
   - Roman army
   - Relations with conquered peoples

7. Evaluate the transformation of Rome from Republic to Empire.
   - Collapse of the Republic
   - Reforms of Augustus
   - Pax Romana
   - Imperialism
   - Economic factors
     Examples: agriculture, trade, manufacturing, taxes

8. Assess the Roman cultural contributions.
   - Roman law and political theory

Alabama Course of Study: Social Studies
9. Trace important aspects of the diffusion of Christianity.
   - Relationship to Judaism
   - Missionary impulse
   - Organizational development
   - Transition from persecution to acceptance in Roman Empire
   - Church doctrine

10. Analyze the reasons for the decline and fall of the Roman Empire.
    - Economic and social decline
      - Examples: class divisions, alienation, depopulation
    - Influence of Christianity
    - Political and military problems
    - External factors
      - Provinicial disorder
      - Loss of trade
      - Tribal migrations and attacks
    - Size and diversity

11. Interpret elements of classical civilization in India.
    - Religions
    - Arts and literature
    - Philosophies
    - Empires
    - Social structures
      - Example: caste system

    - Religions
    - Politics
      - Examples: Chi’n Dynasty, weapons, military unification, the Great Wall
    - Centrality of the family
      - Example: Mandate of Heaven
    - Zhou and Han Dynasties
    - Inventions
      - Examples: paper, gunpowder, porcelain
    - Economic impact of the Silk Road and European trade
World Expansion of Agrarian and Commercial Civilizations:
500 A.D. to 1500 A.D.

13. Analyze the rise of the Byzantine Empire, its institutions, and its legacy.
   - Shift of the Roman Empire from the west to the east
   - Emperors
     - Constantine
     - Justinian
   - Code of Justinian
   - Preservation of heritage of antiquity
   - Art and architecture
     Examples: Hagia Sophia, mosaics, icons
   - Establishment of Eastern Orthodox Church
   - Strengths and weaknesses

14. Assess the characteristics and spread of Islamic civilizations.
   - Mohammed and the origins of Islam
   - Geography
   - Political/religious diversity
     Examples: Suni, Shia
   - Role of women
   - Islamic expansion
   - Arts and literature
   - Science, mathematics, and medicine
   - Preservation and transmittal of ancient Greek and Indian works
   - Invasion of India

15. Evaluate the forces and institutions that shaped the early Middle Ages in Europe.
   - Invasions
     Examples: Huns, Franks, Angles, Saxons, Visigoths, Magyars, Vikings, Muslims
   - Early medieval church
     Examples: papacy, monasticism
   - Military leaders
     Example: Charlemagne
   - The Norman Conquest
   - Agricultural methods
   - Manorialism
   - Feudalism

16. Analyze the characteristics of Japan’s Classical Age.
• Political
  Examples: feudalism, the Kamokura
• Economic
• Religious
• Cultural

17. Analyze the characteristics of the Middle Empire in China.
  • Continuity of civilization
  • The great dynasties
  • Golden Age of art and culture
    Examples: painting, porcelain, poetry, Li Po, Tu Fu
  • Rise of domestic and foreign trade
  • Mongol contributions

18. Explain the development of the early Russian state.
  • Rise of Kiev
  • Conversion to Orthodox Christianity
  • Geography and peoples of Central Asia
  • Mongol conquest (Tartar Yoke)
  • Relations with Western Europe
  • Rise of Muscovy
  • Trade system

19. Analyze the forces and institutions that shaped Western Europe in the High Middle Ages (1000-1350 A.D.).

Ninth Grade - Twelfth Grade
Social Studies Program

Students in Grades 9-12 must complete four Social Studies courses as described in §16-6B-2(b)(4) Code of Alabama and in the Graduation Requirements as prescribed by the State Board of Education (Appendix C).

The *Alabama Course of Study: Social Studies* defines the four courses required for the Alabama High School Diploma and the Alabama High School Diploma with Advanced Academic Endorsement. The core content of each course is expressed as content standards.

**Courses Required for Graduation**

**Ninth Grade**  World History and Geography Since 1500

**Tenth Grade**  United States History and Geography: Beginnings to 1900

**Eleventh Grade**  United States History and Geography: 1900 to the Present

**Twelfth Grade**  American Government
Principles of Economics

IB History of the Americas I may be substituted for U.S. History, and IB History of the Americas II may be substituted for American Government and Principles of Economics.
Ninth Grade World History and Geography Since 1500 directs students to think critically about the various forces that combined to shape the world today. Emphasis needs to be placed on geographic impact, development of civic knowledge/responsibilities, and emerging economic systems within a chronological context.

Critical thinking and analysis are important in this course; consequently, asking questions about societies and comparing and contrasting civilizations over time are essential. Through historical inquiry, students need not focus on world history and geography as endless factual detail; rather, they may gain an understanding and appreciation of history as an exciting story of people much like themselves at other times and places.

World History and Geography Since 1500 is a required social studies course for students in Alabama schools. Knowledge and understanding gained during the previous year’s study provides the foundation for the critical analyses required in this course.

Tenth and Eleventh Grade Overview—United States History and Geography

United States History and Geography is a comprehensive two-year sequence beginning in the Tenth Grade with prediscovery to 1900 and continuing in the Eleventh Grade from 1900 to the present. The curriculum builds upon the Eighth and Ninth Grade World History and Geography courses and focuses on critical issues and events that encompass historic, geographic, economic, and political literacy. It is aimed at producing responsible citizens who have the ability to make informed decisions.

This study of American history provides the opportunity for students to:

- Understand the quest for freedom, justice, opportunity, and democracy in the United States.
- Analyze the establishment of representative democracy in America.
- Relate the significance of the past to their own lives, both private and public, and to their society.

The integration of the disciplines—history, geography, economics, and government together with American literature—is necessary to show relationships, to present accurate and meaningful content, and to interpret past and present events and conditions. Concepts related to Alabama’s history and geography are included in this chronological study of U.S. history.

**Time Periods**

**Tenth Grade - United States History and Geography: Beginnings to 1900**

- Three Worlds and Their Encounters in America: Beginnings to 1607
- The Colonial Era: An Emerging American Identity: 1607 - 1763
- Creating a Nation: 1763 - 1815
- Expansion and Reform: 1801 - 1860
- The Civil War and Reconstruction: 1860 - 1877
- The Development of the Industrial United States: 1877 - 1900

**Eleventh Grade - United States History and Geography: 1900 to the Present**

- The Emergence of Modern America: 1900 - 1930
- The Great Depression and World War II: 1929 - 1945
- Post-war United States: 1945 to the Early 1970s
- Contemporary United States: 1964 to the Present
The standards for Tenth Grade students cover the historic development of American ideas and institutions from the Age of Exploration to the present. While focusing on political and economic history, the standards provide students with a basic knowledge of American culture through a chronological survey of major issues, movements, people, and events in United States and Alabama history.

Alabama Course of Study: Social Studies
Twelfth Grade Overview—American Government and Principles of Economics

The Twelfth Grade American Government and Principles of Economics courses serve as the capstone of the K-12 curriculum. Students in these courses gain the knowledge and skills necessary for civic responsibility.

American government is a required one-semester social studies course for the twelfth grade. Students draw on the knowledge and skills from their previous study of United States and World History and Geography as background information. The course focuses on the origins and functions of government as well as the intellectual influences in the development of representative democracy in America. Through a detailed study of the United States Constitution, students become knowledgeable of the structure and workings of government at all levels in the state and nation.

Twelfth-grade economics is a required one-semester study. It focuses on the workings and institutions of modern-day economic systems and economic theory rather than consumer economics content. Students apply the knowledge and understanding acquired in their study of economic factors over time to their study of contemporary problems in economics. The study of economics includes the use and interpretation of maps, charts, graphs, tables, and other expressions of statistical data.

Alabama Occupational Diploma Program
Grades 9-12 Overview
Career Preparation I-IV (Social Studies)

The Alabama Administrative Code specifies four Career Preparation (Social Studies) courses necessary for students with disabilities to meet graduation requirements for the Alabama Occupational Diploma. The Career Preparation (Social Studies) courses in Grades 9-12 are preparatory courses designed to prepare students with disabilities to become self-sufficient, independent, taxpaying adult citizens within their community. Various aspects of civic responsibility are integrated and emphasized within the four courses. Throughout this program, students participate in school-based work assessment and community-based instruction as appropriate. History is taught through instruction using current events in each course. Historical, political, economic, social, and cultural aspects of current events are included in all courses.

Civic responsibilities encompass the adult roles of citizen, consumer, family member, employee, and member of various community groups and organizations. The concepts within the courses are repeated throughout the four years with increasing levels of assimilation. The Course of Study moves the student from classroom-based instruction to school-based work assessment and then to community-based work training. The culminating program experience is competitive employment provided through Career/Technical Cooperative Education.

Career Preparation I (Social Studies) provides a foundation for the development of various skills that are essential to the students’ success. Skills include basic mobility within the community, local government, significant historical events and personalities, and geography of Alabama. Current events focus on present-day social, local, state, and national events. Skills relating to personal development, interpersonal development, and cultural diversity are enhanced. Career exploration offers an opportunity to examine occupational options for possible future employment. The importance of appropriate work habits, following oral and written directions, job attendance and punctuality, good grooming and hygiene, and appropriate interpersonal and communication skills is stressed.

Career Preparation II (Social Studies) expands and builds on the foundation skills. These skills are exhibited through participation in school and community-based assessments of students’ skills in the areas of communication, social development, and appropriate work habits and behaviors. A variety of work experiences in the school and community settings is required. Consumer education, basic knowledge of Alabama state government, and current events are emphasized.

Career Preparation III (Social Studies) emphasizes application of previously learned skills in community-based work training. This course focuses on the rights and responsibilities of individuals within the employment community. Mobility skills are expanded to include demonstration of transportation skills. United States government fundamentals, consumer rights and responsibilities, and current events are taught within the context of community and employment.

Career Preparation IV (Social Studies) allows students the opportunity to demonstrate previously taught skills in specific work settings. Assistance is given in seeking, securing, and maintaining competitive employment. Students must maintain a paid job for a minimum of 540 hours as required by the Career/Technical Cooperative Education Program. Consumer skills, self-advocacy skills, and current events are reinforced within the community and employment settings.

Guidelines and Suggestions for Local Time Requirements and Homework

Total Instructional Time
The total instructional time of each school day in all schools and at all grade levels shall be not less than 6 hours or 360 minutes, exclusive of lunch periods, recess, or time used for changing classes (§16-1-1 Code of Alabama).

Suggested Time Allotments for Grades 1 - 6

The allocations below are based on considerations of a balanced educational program for Grades 1-6. Local school systems are encouraged to develop a general plan for scheduling that supports interdisciplinary instruction. Remedial and/or enrichment activities should be a part of the time schedule for the specific subject area.

Daily instruction with Arts specialists in each of the Arts disciplines is the most desirable schedule. However, schools unable to provide daily Arts instruction in each discipline are encouraged to schedule in Grades 1 through 3 two 30- to 45-minute instruction sessions per week and in Grades 4 through 6 a minimum of 60 minutes of instruction per week. Interdisciplinary instruction within the regular classroom setting is encouraged as an alternative approach for scheduling time for Arts instruction when Arts specialists are not available.

*Established by the State Department of Education in accordance with Ala. Code §16-40-1 (1975)

Kindergarten

In accordance with Alabama Administrative Code r. 290-050-010.01 (4) Minimum Standards for Organizing Kindergarten Programs in Alabama Schools, the daily time schedule of the kindergartens shall be the same as the schedule of the elementary schools in the systems of which they are a part. This standard references the fact that kindergartens in Alabama operate as full-day programs. There are no established time guidelines for individual subject areas for the kindergarten classroom. The emphasis is on large blocks of time that allow children the opportunity to explore all areas of the curriculum in an unhurried manner.

In accordance with Ala. Admin. Code r. 290-050-010.02, the official guide for program planning in kindergarten is Alabama Kindergartens, Bulletin 1987, No. 28. Criteria to be used in scheduling are listed on pages 45-46 of this guide. The full-day program should be organized utilizing large blocks of time for large group, small groups, center time, lunch, outdoor activities, snacks, transitions, routines, and afternoon review.
Appendix B

Individual exploration, small-group interest activities, interaction with peers and teachers, manipulation of concrete materials, and involvement in many other real-world experiences are needed to provide a balance in the kindergarten classroom.

Grades 7-12

A minimum of 140 clock hours of instruction is required for one unit of credit and a minimum of 70 clock hours of instruction is required for one-half unit of credit.

In those schools where Grades 7 and 8 are housed with other elementary grades, the school may choose the time requirements listed for Grades 4-6 or those listed for Grades 7-12.

Character Education

For all grades, not less than 10 minutes instruction per day shall focus upon the students’ development of the following character traits: courage, patriotism, citizenship, honesty, fairness, respect for others, kindness, cooperation, self-respect, self-control, courtesy, compassion, tolerance, diligence, generosity, punctuality, cleanliness, cheerfulness, school pride, respect of the environment, patience, creativity, sportsmanship, loyalty, and perseverance.

Homework

Homework is a vital component of every student’s instructional program. Students, teachers, and parents should have a clear understanding of the objectives to be accomplished through homework and of the role it plays in meeting requirements of a course. Homework should be meaningful and used to reinforce classroom instruction. It should not place students and parents in a position of having to study skills that have not been introduced and practiced through classroom instruction. Furthermore, students and parents should not be burdened by excessive amounts of homework.

Each local board of education shall establish a policy on homework consistent with the State Board of Education resolution adopted February 23, 1984. (Action Item #F-2)

All homework should be directed toward the attainment of lifelong enjoyment and appreciation of social studies. At every level, homework should be meaning-centered and mirror classroom activities and experiences. Independent and collaborative projects that foster creativity, problem-solving abilities, and student responsibility are appropriate.
