This document consists of the last two issues of the now discontinued printed "ERIC Administrative Bulletin" (EAB). For nearly twenty years, EAB was the internal "house organ" of the Educational Resources Information Center (ERIC), the nationwide bibliographic information system covering the educational literature. ERIC is sponsored by the Office of Educational Research and Improvement (OERI) within the U.S. Department of Education. The EAB was prepared by the ERIC Processing and Reference Facility on the basis of material submitted by the ERIC Clearinghouses and other components of the ERIC system. All EAB articles were reviewed and approved by the ERIC Program Office before publication. The EAB was distributed solely within the ERIC system (approximately 20 contractors) and was intended as an internal newsletter or journal of the ERIC system and a major means for the decentralized components of ERIC to communicate and interact with one another. The EAB was also a permanent record reflecting most of the major events in the life of the ERIC system (such as personnel changes, Standing Order Customer changes, etc.) and providing in printed form essential documents (such as ERIC policy and priority statements, Clearinghouse scope statement modifications, "ERIC Processing Manual" revisions, etc.). Major categories for announcements were: Action Items; Network News; Vendor News; International News; Personnel; Clearinghouse Publications; and Meetings Participated In. All new forms and all major reports commonly were included as attachments to EAB issues. (WTR)

Assistant Secretary Named

Sharon P. Robinson, a former classroom teacher, has been confirmed by the U.S. Senate as the new Assistant Secretary for Educational Research and Improvement.

Before joining OERI, Robinson was director of the National Education Association's National Center for Innovation, NEA's research and development unit. She also directed the Center's Teacher Education Initiative.

A native of Louisville, Kentucky, Robinson earned a doctorate from the University of Kentucky in educational administration in 1979. Besides NEA, she belongs to a number of professional associations, including the Association of Teacher Educators, the Association for Supervision and Curriculum Development, and the American Educational Research Association.

**ERIC CLEARINGHOUSE COMPETITION RESULTS**

During the last quarter of 1992 and the first quarter of 1993, the contracts for the sixteen (16) ERIC Clearinghouses were competed. Two Clearinghouses shifted to new host institutions: (1) The ERIC Clearinghouse on Tests, Measurement, and Evaluation (TM), previously at the American Institutes for Research (AIR), moved to Catholic University; (2) the ERIC Clearinghouse on Counseling and Personnel Services (CG), previously at the University of Michigan, moved to the University of North Carolina at Greensboro.

All the new contracts are five year contracts and all began in June 1993. There were a total of seven name changes, as follows:

<table>
<thead>
<tr>
<th>New/Old Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>New: Counseling and Student Services</td>
</tr>
<tr>
<td>Old: Counseling and Personnel Services</td>
</tr>

<td>Old: Tests, Measurement, and Evaluation</td>
</tr>
</tbody>
</table>

Attachment 1 is the OERI Press Release that announced the results of the competition. Attachment 2 is the Education Daily (June 25, 1993) article that announced the results, based on an interview with ERIC Director, Bob Stonehill.

**REAUTHORIZATION OF OERI/ERIC**

S.1275, the bill to reauthorize the Office of Educational Research and Improvement, was considered by the Senate Committee on Labor and Human Resources in early 1992 and a report (Report 102-269) recommended that the bill (as amended) should pass. That recommendation has yet to be acted on by Congress, but the comments in the report excerpted below (p.25) on reauthorizing ERIC are of interest:

Subparagraph (2)(p) reauthorizes the Education Resources Information Clearinghouses. The Committee recognizes that the clearinghouses are an effective method of providing information to the field, and basically reauthorizes them in their present form. However, the Committee believes that ERIC could do a better job of coordinating and selecting key sources in science journals to be indexed. Therefore, we have directed ERIC to develop a coherent policy for the abstracting of books, periodicals, reports, and other materials related to education. The authorization level for the ERICS is $7 million in fiscal year 1993 and such sums as may be necessary for each of the fiscal years 1994 through 1999.

**WITHDRAWAL OF PLAN TO CHARGE VENDORS USAGE FEES FOR ERIC DATABASE**

In August 1990, at the suggestion of the ERIC Directors, a proposal was drafted to charge usage fees for the use of the ERIC database in machine-readable form. The major component of the proposal was a 10% fee that would have been imposed on online and CD-ROM vendors. Income generated from such a fee would have been held by the ERIC Facility and used for needed system improvements. This proposal generated a lot of discussion and considerable objection from the American Library Association (who felt that it would result in librarians paying more for ERIC) and from the Information Industry Association (who objected on behalf of the vendors who would have had to share their ERIC revenues). These groups made their objections known to the cognizant Congressional committee and, as a result, the fee proposal has been shelved, at least for the time being.

A letter from the Director of ERIC, dated April 9, 1993, went to all ERIC database recipients and other interested parties, announcing the withdrawal of the usage fee proposal (see Attachment 3).
"DEPARTMENT OF EDUCATION" AND "ERIC" WRITE-UPS IN NEW REFERENCE WORK INTRODUCTION TO UNITED STATES GOVERNMENT INFORMATION SOURCES

The history, major dates, and authorizing legislation for the Department of Education somehow seem to come up regularly for ERIC staff members. In 1992 a new comprehensive reference work was published by Libraries Unlimited, Introduction to United States Government Information Sources (4th edition), by Joe Morehead and Mary Fetzer, which contains a very succinct summary of the Department history and uses the Superintendent of Document's classification numbers (as used in the GPO Monthly Catalog) to refer to the agency's components. (See Attachment 4.)

RESOURCES IN EDUCATION (RIE) IS ONE OF ONLY TWELVE SERIAL PUBLICATIONS WHOSE BACK COPIES ARE NEEDED AND ACCEPTED BY THE LIBRARY OF CONGRESS'S EXCHANGE & GIFT DIVISION

Surplus issues of unbound Government agency serials have, in the past, frequently been sent to the Library of Congress (LC) for their use in exchanging documents with foreign institutions. Recently, LC announced (see Attachment 5) that it would no longer accept unbound serial issues except in the case of twelve serials that are in high demand. It is gratifying to note that Resources in Education (RIE) is one of the twelve and that it's in distinguished company, e.g., Journal of Research of the NIST.

CLEARINGHOUSE NEWS

AskERIC—A NEW SERVICE FOR K-12 EDUCATORS, OPERATED BY ERIC/IR

AskERIC is a pilot Internet-based development and research project funded by the U.S. Department of Education as part of the ERIC Program and the SMARTLINE initiative. It is one of several projects located at Syracuse University designed to explore Internet usefulness and accessibility.

AskERIC solicits questions from K-12 educators sent as e-mail messages via the Internet network of networks. AskERIC undertakes to respond with an answer within 48 working hours, also via the Internet. Frequently, a quick preliminary response can be made directly by the AskERIC staff, followed later by a more complete response from the particular ERIC Clearinghouse dealing with the subject matter in question.

Attachment 6 is a flyer providing a complete description of the AskERIC service, together with e-mail addresses, telephone numbers, fax number, and mailing address. Attachment 7 is an article on AskERIC that appeared in NetTeach News, "a newsletter for K-12 networking teachers". Attachment 8 is a news notice on AskERIC that appeared in Education Week (June 9, 1993).

ERIC/EA BOOK WINS EdPRESS "EXCELLENCE IN EDUCATIONAL PUBLISHING" AWARD FOR 1993

A book by the ERIC Clearinghouse on Educational Management (EA) at the University of Oregon has been recognized for its excellence by a national association of educational journalists.

At-Risk Families and Schools: Becoming Partners won an award for best special publication in EdPress's 1993 "excellence in educational publishing" awards competition.

EdPress (the Educational Press Association of America) is an independent association of some 700 education periodicals and other organizations involved in educational communications. An awards banquet to honor winners was held in Philadelphia on June 10. The banquet was part of the 1993 Annual EdPress Conference.

A strength of At-Risk Families and Schools: Becoming Partners is that the author, Clearinghouse research analyst Lynn Balser Liotos, integrates both research and practice. As Don Davies of Boston University says in the Foreword, "Liotos pulls together and describes the various strands of theory, research, and demonstration that are necessary to understand and properly use the practical examples and how-to-do-it advice that are offered."
The book gives educators tools to reform attitudes, policies, and practices so they can reach out effectively to parents who are poor, nonwhite, or speak a language other than English.

EDRS has also investigated the possibility of an ERIC full-text product involving the same ERIC documents that they film, but the current economics of such a product have not yet been convincing. Oryx Press is now considering full-text products that might mix documents and articles in various ways. The Oryx Press market survey form, sent out to field users on June 16, 1993, appears as Attachment 17.

Mario, Chile

The Directory of ERIC Information Service Providers is being revised for 1993. The data-gathering phase of this premiere reference work began in April 1993 and is just about to close.

Future initiatives will involve expanding ERIC networking activity to various non-Internet information services and bulletin boards used by teachers and identifying non-ERIC digest-like documents that can be added in full-text to the existing ERIC Digests Online file (see Attachment 16).

ORLYX PRESS CONSIDERS ERIC FULL-TEXT PRODUCT (MARKET SURVEY FORM)

An ERIC full-text product appears to be difficult to develop and sell during an economic downturn. The UMI prototype product “Compact ERIC” operated successfully, but was not put on the market because it was felt to be more expensive than the current market would bear.

ERIC FACILITY REPORT TO THE DIRECTORS AND NATIONAL TECHNICAL MEETING (JUNE 21-24, 1993)

The ERIC Facility prepared a printed 6-page report as a handout for both the Directors Meeting and the National Technical Meeting (see Attachment 19). This document summarized all major accomplishments, problems, and issues dealt with by the Facility during the previous six month period. It contains 25 separate points and covers such diverse topics as the EPM, Usage fees, 800 numbers, Digests. Publications about ERIC, ERIC Ready References, ERIC Acquisitions Arrangements, Dictionary of Education, ERIC on DataStar, International ERIC, International Bibliography of Higher Education, Reproduction Release Forms on microfiche, ISSN number problems, Education-related books in ERIC, electronic journals/articles, Facility LAN, Internet, iNET, ADR file expansion, etc.
ERIC ARTICLE FOR 1993 BOWKER ANNUAL

Each year the R.R. Bowker company invites the Facility to prepare an article on ERIC for their best-selling Bowker Annual. Formerly, ERIC received treatment only every 3-4 years, but in the last decade, ERIC has been prominent enough to warrant articles every year, similar to LC, NLM, NCLIS, etc. We always try to cover both basic statistics and accomplishments, major changes, and new initiatives. The article covering 1992 (for the 1993 edition) appears as Attachment 20.

LEXICOGRAPHY—PROPOSED REVISION OF VOCABULARY REVIEW PROCESS

In an effort to provide a more even flow of new terms across the year, the Chair of the Vocabulary Review Group (VRG) has drafted a revised procedure which is currently being discussed and refined. It is hoped that the new procedure, or something close to it, would be put into effect by January 1994, if not before. See Attachment 21 for a draft of the latest version of the revised procedure.

REQUESTS FROM JOURNALS WANTING TO BE COVERED BY CIJE (FORM LETTER RESPONSE)

At least once a month lately the Facility has received a request from a journal editor or publisher that their journal be indexed in CIJE. We have no idea how many such requests are regularly being received by the Clearinghouses, but we imagine they are substantial. Such requests can be useful when they bring to ERIC's attention a hitherto unknown journal that really should be covered by CIJE.

The Facility formerly responded to such requests with a customized letter. Each such request would then be forwarded to the appropriate ERIC Clearinghouse for action. Lately, the volume of such requests has been increasing and we have come to the conclusion that a form response, telling each requester the whole story and the same story would be a more efficient process.

Attachment 22 is a copy of the form response we are putting into effect. It has been approved by the ERIC Program Office and may contain some useful ideas for Clearinghouses faced with making the same kind of response.

ERIC READY REFERENCES (COMPLETE LIST OF ALL PUBLISHED TO DATE, WITH COPIES OF RECENT NEW ONES)

Good ideas for useful new ERIC Ready References continue to come in from the ERIC Clearinghouses and other components and the Facility continues to act on them and convert them into handouts that all can use.

We now have a total of 19 Ready References, with the latest three being:

17A/B Journals Currently Covered by CIJE
18 Field Labels/Tags in Use by Vendors for the ERIC Database
19 ERIC at a Glance. ERIC System Components Graphically Displayed

See Attachment 23 for a complete list of all ERIC Ready References prepared to date, together with the date of last revision.

Copies of ERIC Ready References are available for the asking from the ERIC Facility.

INTERNATIONAL NEWS

INTERNATIONAL BIBLIOGRAPHY OF HIGHER EDUCATION (INTERNATIONAL ASSOCIATION OF UNIVERSITIES)

The International Bibliography of Higher Education, a product of the International Association of Universities (IAU), is now a going concern. Contributions are being received from several countries, including from ERIC/HE for the United States. Nevertheless, the project has several problems, some attributable to the minuscule staff IAU can afford to give it. Many potential contributors are not yet on board; no printed product has yet been prepared; technical questions, such as how to handle duplicate submissions, abound. A planning meeting to help consider and solve some of these problems is planned for September 13-14 in Paris at Unesco (see agenda, Attachment 24) and ERIC has been invited to attend. Bob Stonehill, Jon Fife, and Ted Brandhoest will likely be the attendees.
"INTERNATIONAL ERIC"
(A NEW CD-ROM PRODUCT OF INTERED AND DIALOG
INFORMATION SERVICES)

The first "International ERIC" CD-ROM is scheduled to be shipped in late October 1993. Final design work on the logo and on pricing is being wrapped up. The disk will contain (as separate files) the databases of the ERIC equivalent organizations in Australia, Britain, and Canada: Australian Education Index; British Education Index; Canadian Education Index. The price will probably be around $750 per year. One interesting feature is that each file will be accompanied by its own specific "Thesaurus", each of which is to some extent based on ERIC, but each of which has its own national differences. A "prospectus" for this new product is Attachment 25.

DIALOG

DIALOG BUYS DATASTAR

In March 1993, Knight-Ridder, the owners of DIALOG Information Services, announced the acquisition of the major European online service, DataStar. It was anticipated that the two companies would continue to operate as two separate services for the time being, with areas of eventual merger being carefully studied before changes are made. A letter, press release, and series of questions and answers on the acquisition appear as Attachment 26.

KNOWLEDGE INDEX MOVES TO COMPUSERVE

In March 1993, DIALOG announced that Knowledge Index (DIALOG's reduced price, after-hours service) will be accessible worldwide (except for Korea) exclusively through the Compuserve Information Service. DIALOG will continue to maintain the databases and system operations, while marketing, customer support, and administration will be conducted by Compuserve (see Attachment 27).

DIALOG OnDISC ERIC — 1993 PRICES

DIALOG announced late in 1992 that there would be new, reduced prices for its ERIC OnDisc product. The table below shows both the old and new prices. Prices for renewals dropped 14%. Prices for the current disc only dropped 20%. Prices for the complete product dropped 8%.

BRIAN ALLEN (DIALOG'S DATABASE MANAGER FOR ERIC) CHANGES ADDRESS AND TELEPHONE NUMBER

You may recall that responsibility for ERIC within the DIALOG organization is split between two people: (1) Eireann Carroll, at DIALOG's headquarters is responsible for financial and administrative matters, (2) Brian Allen, in Colorado, is responsible for technical matters (including any problems, conversions, new fields, etc.). Brian operates out of his home and has recently moved to Elizabeth, Colorado. The letter announcing his new location and telephone number is Attachment 27.
SILVERPLATTER

SILVERPLATTER DISCONTINUES SUPPLYING NETWORK HARDWARE (THIRD PARTY VENDORS TO SUPPLY HARDWARE)

In January 1993, SilverPlatter announced that it will cease supplying the hardware required for CD-ROM networking systems. As networking technology has become more readily available, it is possible for SilverPlatter to remove itself from the hardware business and to concentrate on its core software and database development business. SilverPlatter will recommend authorized third party vendors. (See the Press Release appearing as Attachment 29.)

SILVERPLATTER ADDS DIGEST FULL-TEXT TO ERIC CD-ROM

SilverPlatter is the first CD-ROM vendor to add the full-text of ERIC Digests to their CD-ROM product. (DIALOG will shortly follow suit with their ERIC OnDisc product.)

ERIC Digests have been available in full-text online from DIALOG for some time and are rapidly spreading to various Internet sources. Their availability on the CD-ROM products was only a matter of time. (See Attachment 30 for SilverPlatter’s press release and shipping note on the topic.)

BRS DATABASES NOW ACCESSIBLE VIA INTERNET

BRS announced late in 1992 that all the databases offered by either BRS or ORBIT can now be accessed via the Internet, using the “TELNET” remote login application. ERIC is offered by BRS but is no longer offered by ORBIT. The details of this option are contained in a Press Release (see Attachment 31).

ADDITIONAL CD-ROM VENDORS OFFER ERIC: EBSCO AND NISC

The extreme low price of the ERIC database and the absence of any royalties or usage fees has led to a number of vendors offering ERIC on CD-ROM at bargain basement prices. The two newest entrants to this club are EBSCO Publishing and National Information Services Corporation (NISC).

EBSCO

EBSCO is offering the full file at $1,295 and annual subscriptions to the Current Disc only for $695 (see Attachment 31).

NATIONAL INFORMATION SERVICES COMPANY (NISC)

NISC is offering ERIC as a free bonus with direct subscriptions to any other NISC product priced $595 or higher. (See Attachment 32.)

WRITINGS OF INTEREST TO ERIC

(See Attachments 34-39)

The EAB regularly produces articles and notices that are relevant to ERIC. Item 1 describes the Clinton Administration’s emphasis on making Government information available at cost—a policy that strikes directly at any ERIC hopes of realizing revenues from vendor use of its database. Item 2 is a brief article by Lilian Kaze (ERIC/PS) that appeared in the prestigious New York Times. Items 3 and 4 are both statements by the recently-departed head of OERI, Diane Ravitch. It is always interesting to see what ex-Assistant Secretaries say when they are no longer constrained by the job. Item 5 describes the ILLINET Online Network in Illinois and is of interest because of the prominent way the ERIC database is featured. Item 6 deals with electronic journals, a subject that is currently on ERIC’s plate to consider vis-a-vis ERIC database coverage policies.

PERSONNEL NEWS

LYNN SMAARTE JOINS ACCESS ERIC

Lynn Smarte, who only recently returned to the EC Clearinghouse after a few years as a teacher, has been selected as the next Director of Access ERIC. She will assume her new duties in September 1993.

Lynn brings to the position many years of experience with ERIC and unmatched skills in dealing with users effectively. She is an ideal choice for the outreach arm of ERIC and her well-deserved advancement should be welcome to all.
FRED WEINTRAUB LEAVES ERIC/EC, REPLACED BY BRUCE RAMIREZ

The following notice was recently placed on ERIC e-mail by the EC Clearinghouse:

ERIC is losing Fred Weintraub as Director of the Clearinghouse on Disabilities and Gifted Education. The Council for Exceptional Children has been undergoing a lot of reorganization of late, as many of you may already know. Fred's division and another have been merged, but Fred will stay on at CEC for the immediate future. The new Clearinghouse director is Bruce Ramirez, who has worked with Fred and others at CEC for over 15 years. We welcome him to the ERIC family and look forward to working with him. Our thanks and best wishes to Fred and hopes for his continued support to ERIC.

ELIZABETH DEFILIPPO LEAVES USER SERVICES POST AT ERIC/HE

The following notice was recently placed on ERIC e-mail by the HE Clearinghouse:

I would like to announce that I am resigning as the User Services Coordinator at ERIC/HE because I am moving to LA to seek my fortune (and sunshine)!! It was wonderful working with everyone in the ERIC system. I learned a great deal during my 5 years with ERIC/HE. The Tech meeting was a highlight because I was able to put names with faces. I hope that in the future I will work for the ERIC system.

I wish you all the best and I will miss you!
EDITOR (ed-i-ter), n. (L.), 1. One who edits, or alters another's writing. 2. A high priest of prose; a saviour to the uncertain and an arch-fiend to the self-satisfied. 3. The final repository of blame for a publication's textual faults. 4. A gadfly, hair-splitter, magician, intermittent ghost-writer, pedant, interpreter, and egotist. 5. One who, unlike a writer, is excused from the necessity of beginning anything.

anopisthographic
\an-\text{-}pis\text{-}the\text{-}graf\text{-}ik\ adj: having writing or printing on one side only

As an antiquarian bookseller, Mr. Bradshaw was well aware that early books with anopisthographic pages were still avidly sought by collectors.

EDUCATION DEPARTMENT EXPANDING INFORMATION CENTERS; CLASSROOM TEACHERS TO HAVE NEW RESOURCES AVAILABLE

The U.S. Department of Education today announced the award of new contracts to significantly expand the operations of its 16 Educational Resources Information Center (ERIC) Clearinghouses. The ERIC system is the world's largest source of educational materials and information. Funding will total nearly $6 million for the first year of the five-year contracts to operate the ERIC Clearinghouses.

"Expanding the reach of ERIC will enable more teachers to locate materials that help improve both classroom teaching and learning," said U.S. Secretary of Education Richard W. Riley. "To reach the national education goals, we must make resources available to classroom teachers."

OERI will also expand the "AskERIC," service, an Internet-based electronic system that provides teachers with personalized answers to education questions within 48 hours. Now operating in three states as a prototype, AskERIC soon will answer teacher questions nationwide, offer lesson plans via direct computer access, and conduct searches.

Users may call ACCESS ERIC at 1-800-LET-ERIC for general information about ERIC's products and services. Specific information is provided by the ERIC Clearinghouses.

The 16 ERIC clearinghouses are operated by universities and other education organizations. Under the new contracts, the clearinghouses will add books to the database, provide toll-free access, offer ERIC through the Internet and other computer networks, and select the most useful materials for dissemination.

Supported by the department’s Office of Educational Research and Improvement (OERI), ERIC's database is available on-line, as well as on CD-ROM and in print. It contains descriptions of more than 800,000 documents and journal articles, as well as the full texts of selected research summaries. ERIC computer searches, microfiche collections, and print materials are currently available at more than 3,000 locations worldwide.

In 1992 ERIC Clearinghouses added 30,000 new items to the database, responded to 120,000 requests for education information, and produced more than 200 publications.

The following ERIC clearinghouse contracts and initial year funding estimates were announced:

**TOTAL** $5,862,000
No Major Changes In 16 ERIC Clearinghouse Contracts

Sixteen groups have won five-year contracts to run the Education Department's computer research service, ED plans to announce today.

None of the contracts to operate Educational Resources Information Center (ERIC) clearinghouses changed hands, although two followed their directors to new universities.

The clearinghouse on assessment and evaluation, previously at the American Institutes for Research, moved to Catholic University of America with a first-year contract of about $353,000. The clearinghouse on counseling and student services, previously at the University of Michigan, went to the University of North Carolina at Greensboro with first-year funding of about $337,000.

This year's competition—with two new bidders, neither of which won contracts—was much quieter than the last round in 1988, when three of four new bidders won contracts, ERIC Director Robert Stonehill said in an interview.

The ERIC clearinghouses and their estimated first-year contracts are:

- Adult, career and vocational education, Ohio State University at Columbus, $392,000;
- Community colleges, University of California at Los Angeles, $326,000;
- Disabilities and gifted education, Council for Exceptional Children in Reston, Va., $351,000, plus about $500,000 from ED's Office of Special Education and Rehabilitative Services;
- Education management, University of Oregon at Eugene, $360,000;
- Elementary and early childhood education, University of Illinois at Urbana, $355,000;
- Higher education, George Washington University, Washington, D.C., $403,000;
- Information and technology, Syracuse University, Syracuse, N.Y., $415,000;
- Languages and linguistics, Center for Applied Linguistics, Washington, D.C., $344,000;
- Reading and communications, Indiana University at Bloomington, $425,000;
- Rural education and small schools, Appalachia Educational Laboratory, Charleston, W.Va., $324,000;
- Science, mathematics and environmental education, Ohio State University at Columbus, $348,000;
- Social studies and social science education, Indiana University at Bloomington, $407,000;
- Teaching and teacher education, American Association of Colleges for Teacher Education, Washington, D.C., $368,000; and
- Urban education, Teachers College, Columbia University, New York City, $355,000.

Stonehill said educators' capacity to use ERIC has grown tremendously in the past few years and is poised to expand even more through such global computer networks as Internet.

"Five years ago, nobody knew what Internet was," he said, adding that 28 states now have electronic teacher networks, and virtually all will within a few years. --Annette Licitra

Education Daily • June 25, 1993
Dear ERIC User:

In November, 1992, the Educational Resources Information Center (ERIC) Program requested public comment on the issues of copyright and user fees for online and CD-ROM uses of the ERIC database. Based on those comments, the Department of Education has decided to withdraw its permission allowing the contractor that produces the ERIC database to establish copyright, and to postpone indefinitely the implementation of a new user-based pricing structure for the ERIC database.

The Department received approximately 40 responses to the ERIC proposal. Most of the respondents were college and university librarians and administrators, but the Department also received comments from a number of national organizations—including the American Library Association—as well as school districts, state libraries, and state education agencies.

Most of the respondents were specifically opposed to copyrighting the ERIC database; almost an equal number were critical of the higher prices they might have to pay to use ERIC online or on CD-ROM. Although many of the comments were highly favorable toward the products and services available through ERIC, and many respondents acknowledged the need for ERIC improvements, respondents nevertheless were strongly opposed to the imposition of new user fees as the means to improve those services. Several letters explicitly endorsed the use of appropriated funds, rather than new user fees, to support ERIC program improvements. A small number of comments supported ERIC's user fee proposal.

Later this year, the Department will be recompeting the contract for the ERIC Processing and Reference Facility, which produces the ERIC database. The decisions discussed in this letter—to disapprove copyright and to at least delay new user fees—will become features of that new contract. Thank you for your continuing interest in ensuring that ERIC's products and services be of the highest possible quality, and be universally accessible at reasonable cost to educators, librarians, and the general public. We look forward to working with you on these areas of important and mutual concern.

Sincerely,

Robert M. Stonehill
Director, Educational Resources
Information Center (ERIC)

WASHINGTON D.C. 20208-
Department of Education

The Department of Education (ED) was created as an executive department by the Department of Education Organization Act, approved October 17, 1979 (93 Stat. 668). It traces its origins to the Bureau of Education, which was created as an independent agency by act of March 2, 1867 (14 Stat. 434), and transferred to the Department of the Interior on July 1, 1869 (116), by an act of July 20, 1868 (15 Stat. 106). In 1929, it was renamed the Office of Education and transferred to the Federal Security Agency (FS 5) by Reorganization Plan No. 1 of 1939, effective July 1, 1939. On April 11, 1953, the Office of Education became part of the newly created Department of Health, Education, and Welfare, which replaced the Federal Security Agency (HE 5).9 The Education Amendments of 1972 (86 Stat. 327) created within the Department of Health, Education, and Welfare an Education Division (HE 19), under which was placed an Office of Education (HE 19.100).10 National Institute of Education (HE 19.200),11 and National Center for Education Statistics (HE 19.200).12 The Education Division was transferred to the Department of Education in 1979.

During the Reagan administration, the Department of Education underwent various internal reorganizations under two secretaries of education. However, GPO failed to establish new SuDocs author symbols for subordinate agencies that were created or reorganized. Most publications issued by these subordinate agencies were given ED 1 class numbers. The Office of Educational Research and Improvement (OERI) absorbed the functions of the National Institute of Education (ED 1.300) and the National Center for Education Statistics (ED 1.100). The latter was first renamed Center for Statistics and, in 1987, Center for Education Statistics within the OERI. The Elementary and Secondary School Improvements Amendments of 1988 (Public Law 100-297) revitalized and restored its name and established the National Center for Education Statistics as a semi-independent agency within the department. The National Institute of Education was transferred to OERI by act of October 17, 1979 (93 Stat. 678). The Office of Special Education and Rehabilitative Services absorbed the functions of the Rehabilitation Services Administration (HE 1.200), which had been transferred from the Department of Health, Education, and Welfare by the Department of Education Organization Act of 1979 (HE 23.4100). Publications of the Office of Financial Assistance are assigned ED 1 SuDocs class numbers.

The Department of Education sponsors the Educational Resources Information Center (ERIC), which publishes Resources in Education (ED 1.310). This source is described in more detail in chapter 11. The National Center for Education Statistics publishes annually The Condition of Education (ED 1.109), Education Directory: Colleges and Universities (ED 1.111), and Projections of Education Statistics (ED 1.120).

Introduction to United States Government Information Sources.
EDUCATIONAL RESOURCES INFORMATION CENTER

The Educational Resources Information Center (ERIC), a nationwide information network, is a unit of the Educational Research and Improvement Office within the U.S. Department of Education. Established in 1966, its purpose is to acquire, index, and disseminate timely education-related materials for the use of teachers, administrators, researchers, students, and other interested persons. This is accomplished by a central coordinating staff in Washington, D.C., plus sixteen full and three adjunct clearinghouses located at universities or professional organizations across the country. Each clearinghouse is responsible for a particular subject area of education and for collecting all relevant unpublished, non-copyrightable material of value on that topic. Examples of clearinghouse areas include rural education and small schools; adult, career, and vocational education; reading and communication skills; and information resources. The clearinghouse for the last area, known as ERIC/IR, is located at Syracuse University in Syracuse, New York, and is sponsored by the university's School of Information Studies and School of Education. Today, the ERIC database, the world's largest source of educational information, contains abstracts of over 7,000 documents and journal articles.

ACCESS ERIC

In 1989, ACCESS ERIC, a comprehensive outreach and dissemination program for the entire ERIC system, was established. ACCESS ERIC includes reference staff trained to answer questions about the system and maintains its own databases of organizations that provide computerized searches of the ERIC database, of resource centers and other organizations that provide information in education-related areas, and of education-related conferences. ACCESS ERIC sells publications produced from these smaller databases and, by 1990, had begun to offer these reference and referral databases online to anyone with a personal computer, modem, communications software, and telephone line through GTE Education Services (Irving, Texas). ACCESS ERIC, located in Rockville, Maryland, has a toll-free number (1-800)USE-ERIC for assistance on other new services such as Compact ERIC and ERIC SchoolDisc, intended to provide the full-text, compact disk versions of 2,000 to 3,000 documents and journal articles of special interest to teachers and administrators. It also provides gratis copies of A Pocket Guide to ERIC, All about ERIC, and Directory of ERIC Information Service Providers (all revised in 1991); and The ERIC Review (ED 1.331), published three times a year.

Bibliographic Tools

Two major indexing/abstracting services provide the bibliographic control of educational materials screened by the clearinghouses and accepted into the ERIC database. Resources in Education (RIE) announces "document" literature, and Current Index to Journals in Education (CIJE) covers the "journal" literature. Both tools are available in paper version for manual searching, and the major link between them is their use of a common indexing vocabulary, established by the Thesaurus of ERIC Descriptors. RIE and CIJE are also available as an integrated service online and on CD-ROM. Online access is available through DIALOG Information Services, through BRS, and through ORBIT. The popular CD-ROM format may be obtained from DIALOG, SilverPlatter, and OCLC. As with online versions, search procedures vary, and the individual vendors should be consulted for search idiosyncrasies.
Resources in Education

Resources in Education, a monthly abstract journal, is sold through the Superintendent of Documents and is distributed to depositories (ED 1.310). It consists of a main entry section composed of "résúmés" arranged in clearinghouse/accession order number and indexes. The indexes are by subject, author, institution, publication type (book, dissertation, report, audiovisual material, etc.), and clearinghouse number/ED number cross-references.

A sample résumé from RIE appears in figure 11.4 (see page 368), and a page from RIE's main entry section is shown in figure 11.5 (see page 369). Preceding the bibliographic citation above each abstract are two alphanumeric codes. The ED followed by six digits is the more important, as it represents the permanent accession number assigned by the central processing staff and allows the user to locate a document in the ERIC collections, which many libraries have purchased in microfiche. A small percent of ED citations have double parallel strokes or slashes following them, signifying that the document is not available from the ERIC Document Reproduction Service (EDRS) and is not, therefore, in the fiche collection. However, a closer look at the bibliographic reference should yield an alternative source for obtaining the document cited. Libraries may, of course, have some of these items elsewhere in their collections. The alphanumeric designation opposite the E" number is merely the temporary accession number assigned by staff at one of the sixteen clearinghouses.

Subject indexing of ERIC materials is guided by the Thesaurus of ERIC Descriptors, discussed below. The institution and publication type indexes also warrant further elaboration. The former, in much the same manner as the corporate author indexes in GRA&l, shows the various institutions or agencies responsible for initiating, funding, or managing a project and can be extremely useful for a number of reasons. It can help one identify the specific types of research being done within various universities, think tanks, agencies, etc. Even IGOS such as UNESCO may sometimes be found among the institutions listed, and it may come as a surprise that the ERIC collection is so wide-ranging that it may, therefore, include the actual selected documents from some IGOS. The publication type index, on the other hand, is ideal for helping one narrow the vast number of materials in the ERIC database down, for instance, to teaching guides, to legal/regulatory materials, or to tests and evaluation instruments. Cumulative indexes to the ERIC collection from 1966 to the present are described under the section titled “Other ERIC Products and Services.”

Other features of RIE include thesaurus additions and changes, ordering information, and a current list of ERIC clearinghouses. Semiannual indexes covering January/June and July/December are available for sale or on deposit.

On July 19, 1982, GPO Survey 82-16 accompanying Depository Shipping List No. 17,246 offered depository libraries the opportunity to select Education Documents Announced in RIE (ED 1.310/2). The annotation for this category conveyed the impression that all the documents listed in RIE would be made available on microfiche. The September 1982 issue of Administrative Notes apologized for this inaccuracy, stating that “only those publications printed by the National Institute of Education or otherwise federally funded will be distributed to depository libraries. Thus you will not receive all of the documents announced in RIE. Under Title 44, section 1903, GPO is only authorized to distribute Government publications.” Unfortunately, even this putative clarification was misleading. It remained for ERIC officials to provide the correct information.

The fact is that Education Documents Announced in RIE comprises somewhat less than 10 percent of ERIC's total announcements. The 100 or so documents per issue of RIE obtained from ERIC by GPO for the microfiche shipments represent only those Department of Education prepared or sponsored documents that have been issued by the entity and that have met ERIC selection criteria. They do not necessarily represent the total departmental output. Presumably libraries that acquire the full ERIC collection would not select this smaller subset of material available on deposit.
CIJE is produced and distributed in paper copy by Oryx Press. In 1989 it was temporarily discontinued as a depository item because of microfiche contract problems. However, the difficulties were resolved and, according to the June 15, 1991, issue of Administrative Notes, the microfilming process is on schedule and "running smoothly." 14

Although the annotations found in CIJE bear EJ accession numbers, they, unlike their RIE counterparts bearing ED numbers, function only within the source itself and do not represent materials available in a microfiche collection. CIJE users must obtain the full journal citation and seek out the original journal itself. Copies of many of the articles included are also available from University Microfilms International, Ann Arbor, Michigan, when indicated by the words "(Reprint: UMI)" in the main entry section.

Thesaurus of ERIC Descriptors

The Thesaurus of ERIC Descriptors, twelfth edition, was published in clothbound edition by Oryx Press in 1990. In addition, it was distributed through GPO on microfiche (ED 1.310/3) to depository libraries. The thesaurus contains a controlled vocabulary of education terms called "descriptors" that conform to the major terms used in the subject indexes of both RIE and CIJE. Subjects can be located through a main "Alphabetical Descriptor Display," which provides a variety of information including scope notes; narrower, broader, and related terms; and terms no longer valid. The "Rotated Descriptor Display" groups related terms in an alphabetical index; the "Hierarchical Display" provides "generic trees" for each descriptor; and "Descriptor Groups" serves as a table of contents for the thesaurus. The thesaurus is kept current by the section in both RIE and CIJE called "Thesaurus Additions and Changes" until a new revision of the basic thesaurus is published.

Duplication of Information

Citations to ERIC documents appear in various sources, and a number of studies have sought to determine the extent of duplication. Studies found that there was a 25 percent overlap in the journals regularly scanned and indexed in CIJE and Psychological Abstracts, and a much greater duplication was found "between CIJE and Education Index ... though CIJE covers about three times the number of journals as does Education Index." The overlap between RIE and Dissertation Abstracts was approximately 4 percent. 15 Until 1990, a few documents in RIE were also found in GRA&l, but since then the ED numbers have been eliminated from the NTIS database. Even in earlier years, duplication between RIE and GRA&l appears to have been "numerically insignificant." 16

Other ERIC Products and Services

Most documents announced in RIE may be purchased from the ERIC Document Reproduction Service (EDRS) in Springfield, Virginia, in paper copy or microfiche. Each issue of RIE contains an order form that gives the current unit price schedules for paper copy and microfiche. ERIC documents may also be ordered online through the vendors. In addition, more than 800 libraries and resource centers worldwide subscribe to the ERIC microfiche collection. 17 Directory of ERIC Microfiche Collections, revised periodically, lists subscribers to the collections alphabetically by state and name of institution.
EDRS also produces and sells special microfiche products that include cumulative subject, institution, author, and descriptor/identifier usage report indexes from 1966 to date. The last is a concise cumulative index containing in four separate lists all the terms used in each publication with the ED or EJ numbers for the documents or articles to which they were assigned. The fiche provides the only published access to minor identifiers.

In addition to collecting the literature of education for announcement in RIE and CIJE, the ERIC clearinghouses analyze and synthesize information into research reviews, bibliographies, state-of-the-art studies, and interpretive studies on topics of interest to users. Called Information Analysis Products (IAPs), these studies are usually available directly from the appropriate clearinghouse. When announced in RIE, they are available in paper copy or microfiche from EDRS. Periodically, ERIC prepares bibliographies of its IAPs, and these are assigned an accession number and abstracted in RIE. A 1991 Catalog of ERIC Clearinghouse Publications lists about 500 such publications. The GPO also distributes a publication entitled The Best of ERIC (ED 1.323).

SURPLUS SERIALS POLICY CHANGES

The Library of Congress has announced that it will no longer accept surplus unbound serials from Federal agencies, except for the following titles:

1. Agricultural Research
2. Economic Indicators
3. Energy Research Abstracts
4. Government Reports Announcements & Index
5. Journal of Research of the National Institute of Standards and Technology
6. Journal of the National Cancer Institute
8. Monthly Labor Review
9. Public Health Reports
10. Resources in Education
11. Scientific and Technical Aerospace Reports
12. Survey of Current Business

Prior to shipment, questions concerning the usefulness of an agency's surplus library materials should be directed to the Exchange & Gift Division, Receiving & Routing Section (202) 707-9511.

The AskERIC Service for K-12 Educators

ERIC is...
...the Educational Resources Information Center (ERIC), a federally-funded national information system that provides access to an extensive body of education-related resources. The ERIC Clearinghouse on Information Resources (ERIC/IR), sponsor of the AskERIC Project, is one of 16 ERIC Clearinghouses nationwide which provide a variety of services, products, and resources at all education levels.

AskERIC is...
...a pilot Internet development & research project funded by the U.S. Department of Education as part of the ERIC program and SMARTLINE initiative. AskERIC is also part of a series of Internet projects at Syracuse University seeking to explore Internet usefulness and accessibility. The specific purpose of AskERIC is to develop and study Internet-based education information services, systems, and resources that best meet the needs of K-12 end users.

AskERIC provides an Internet-based question-answering service for teachers, library media specialists, and administrators. Anyone involved with K-12 education can send an e-mail message to AskERIC. Drawing on the extensive resources of the ERIC system, AskERIC staff will respond with an answer within 48 working hours. If you have questions about K-12 education, learning, teaching, information technology, educational administration--AskERIC. Send your questions about education to: askeric@ericir.syr.edu. Some hot topics this month include: year round schools, authentic assessment, multigraded classes, and environmental issues.

AskERIC also offers the "AskERIC Free Library" -- a Gopher/FTP site of selected full-text education resources and database citations. Current directories and databases in this site include:

1. About_AskERIC_Gopher.
2. AskERIC_News/
3. Digests_HelpSheets/
4. ERIC_FullTexts(Keyword Searchable)/
5. ERIC_Monographs.
6. InfoGuides/
7. LessonPlans/
8. Listservs/
9. MiniSearches/
10. No_Cost_Resources.
11. Oliver (Multimedia Consortium -- experimental)/
12. Other Gopher Sites/
13. Q&A/
To Gopher to the AskERIC site:
If you have Gopher: Gopher to ericir.syr.edu (port #70)
or
1. Access the National Gopher System through: gopher.micro.umn.edu
2. AskERIC is in the following directory:
   Other Gopher and Information Servers/
   North America/
   USA/
   General/
   AskERIC - (Educational Resources Information Center)

If you don’t have Gopher, telnet to a Gopher client on the Internet:
1. Telnet to hafnhaf.micro.umn.edu
2. Login as directed (usual login is: ‘gopher’)
3. Access the National Gopher System
4. AskERIC is in the following directory:
   Other Gopher and Information Servers/
   North America/
   USA/
   General/
   AskERIC - (Educational Resources Information Center)

To FTP to the AskERIC site:
1. Log into your local host, and invoke the FTP program.
2. Write ericir.syr.edu as the remote host computer name.
3. The username is: anonymous
4. The password is your email username (e.g. toml@machine.edu)

Looking to the future...

...we are excited about AskERIC’s success to date and are eager to expand AskERIC question-answering to new K-12 audiences and to further develop services and resources. The key is to work cooperatively with federal, state, regional, and local institutions and organizations. If you or your organization are interested in pursuing options, please contact:

Mike Eisenberg
Director, ERIC/IR Clearinghouse

May 1993
The Promised Land
by Janice Abrahams

And lo, it was said that as pilgrims trudged through the desert, they were given a sign. It came in the form of the written word. They found a message on a paper they had long treasured.

Rejoice, it said, for the promised land lies just ahead. You shall find it as you drift along the shore of knowledge, prepare your children, for they shall know the land as if it were their own.

In order to reach this land, you must first cross the bridge of technology, along the Internet sea. The sea is calm but surrounded by fog and the bridge is hard to see. It is guarded by souls who speak in tongues, their words known only to a sacred few.

They use a machine to aid in the crossing. It is a magicalpendefy machine. In order to reach this land of plenty, you must divine the language of the guardians, master the machine and cross the bridge.

In the Promised Land you will find joyful pilgrims who have already mastered this machine, seen through the fog, and arrived upon the shore. They will welcome you. They will lead you through the Promised Land, showing you wonders never seen.

All will have access to knowledge, and images of great beauty will shine before your eyes. All will have the ability to communicate. You will be granted the power to share thoughts and learn with others who live in far-away lands.

Children will be filled with joy as friendly knowbots bring knowledge in an unending stream, and gophers dig up gold. All questions will be answered, none will ever go hungry, and your days shall be filled with sun.

Then more words on the paper suddenly appeared, obliterating all other writing on the page. The words were still seen.

"GOODLUCK", they said. Good luck.

K-12 educators—poor, dusty and tired yet hopeful--continue in their quest for Internet information. In a land plagued by a drought of network knowledge, they still manage to remain cheerful pilgrims searching for the secrets to allow them to bring the Internet into their classrooms.

The secret is knowledge of the Internet—enough knowledge to get them to their peers already on the net, lead them to successful curriculum-applicable lesson plans, help them past the hurdles of their lack of computer experience.

The Promised Land
(continued from front page)

Teachers need to know how to use the Internet to gain the knowledge they seek. Paradoxically, all the help they need is waiting on the net. Peers and colleagues will support them, and information sources lie waiting to be discovered. Educators desperately need help getting to these valuable resources.

Wonderful resources are available to those who can guide themselves past the Unix prompts, the telnet instructions, and the ftp commands in order to unlock the secrets waiting across the bridge.

But wait! Some simple services can be reached by email. And, one of the best of these services is the Eric Clearinghouse.

This system is a perfect example of how one pointer into the Internet cloud can help users become excited, comfortable and educated quickly. The Eric Clearinghouse bypasses the initial frustration of not knowing where to go and allows new users a direct one-on-one experience through the net.

The AskERIC Project is a question-answering help and referral service for K-12 educators. Funded by the U.S. Dept. of Education, the ERIC Clearinghouse on Information Resources is managed by Syracuse University. Originally concentrated on three state networks: Nysernet in New York, Texnet in Texas, and Sendit in North Dakota, they are expanding to reach a national audience.

Staff are courteous, prompt and offer faxed responses directly to the user. For example, a request for information on an Oceanography database suitable for fifth to seventh grade children received a response within two hours.

The AskERIC project acts as a friendly buffer between the resources and the new user. They do the literature searches and contact people on the net. The Eric System is constructed of 16 clearinghouses of content-specific information. Eric also publishes a two-page digest on Internet uses for beginners. In addition, they provide instructions for new users to access ERIC databases via the net.

Please send any comments or ideas to: Janice Abrahams - janice@bitnic.edu com.edu

K-12 Educators AskERIC and the ERIC System

Educators: Do you have education-related questions? AskERIC and the ERIC system can help.

ERIC is: The Educational Resources Information Center (ERIC) is a federally-funded national information system that provides access to an extensive body of education-related literature. ERIC provides a variety of services and products at all education levels.

AskERIC is: AskERIC is a question-answering service for teachers, library media specialists, and administrators. Anyone involved with K-12 education can send an e-mail message to AskERIC. Drawing on the extensive resources of the ERIC system, AskERIC will respond with an answer within 48 working hours. If you have questions about K-12 education, learning, teaching, information technology, educational administration - AskERIC.

In the first eight weeks of service, AskERIC has answered hundreds of questions. Highlights include helping:
- A reading teacher locate information on a particular instructional technique.
- A school computer teacher find information on computer software copyright laws.
- A high school teacher use the Internet as a source of teaching/learning materials for his school.
- A school administrator find information on student testing.
- A school librarian learns how to conduct ERIC database searches via the Internet.

If you have an education-related question, AskERIC will provide an answer. To AskERIC, e-mail your question(s) to:

askeric@ericir.syr.edu

ERIC Clearinghouse on Information Resources
030 Huntington Hall
Syracuse University
Syracuse, New York 13244-2340
TECHNOLOGY

A U.S. Education Department pilot program to encourage educators to use a national computer network to access its system of eruc clearinghouses has handled roughly 200 inquiries a week from teachers since its inception in November, far exceeding expectations.

"Demand is overwhelming," said Michael Eisenberg, a professor of information science at Syracuse University and the director of the "AskERU" project.

Mr. Eisenberg held an informal briefing for Education Department employees late last month on the status of the project, which is part of the office of educational research and improvement's "Smartline" initiative.

By logging on to the Internet, a global "network of networks" that connects scientists, researchers, and others, teachers in New York, Texas, and North Dakota are able to exchange electronic-mail messages and to search for information through the AskERU system.

A simplified menu system that allows users to search specially designed databases and electronic versions of texts is used more than 5,000 times a week, he said.

An electronic discussion group for K-12 administrators similarly has grown rapidly in popularity, attracting more than 300 users in less than three weeks, he added.

The pilot program targets states where an electronic infrastructure already exists.

But any expansion of the service, Mr. Eisenberg said, will depend on how rapidly states develop a means of connecting to the "information superhighway" envisioned by the nation's telephone and cable-television companies.

1301 Piccard Drive, Suite 300
Rockville, MD 20850-4305

Dear Ted:

In recent months, ACCESS ERIC has averaged nearly 1000 requests for information per month. This represents a significant increase in our dissemination activity. We have also recently begun a new outreach effort involving the inservice program coordinators for each of the 50 states. In addition to referring callers to your clearinghouse, we would like to include your informational brochure along with our general information packet, where appropriate. We believe this would result in increased awareness and use of the clearinghouses, and may also be an administrative savings for you.

I am writing to solicit your aid in helping us to increase awareness of the range of ERIC System resources. We are requesting 100 copies of your clearinghouse brochure to aid us in this effort. Please feel free to include any other material (publications or order forms) that you would deem helpful.

Thank you for helping us to get the word out about how ERIC can serve the needs of the education community.

Sincerely,

Matthew Soska
Information Specialist
April 1993

Dear Colleague:

ACCESS ERIC is in the process of updating the Directory of ERIC Information Service Providers. ERIC provides the Directory free, upon request, to those who want to locate agencies and organizations that provide computerized searches of the ERIC database, have a sizable collection of ERIC microfiche, and/or subscribe to and collect ERIC publications. Your organization was included in the last edition and we would like to include it in the upcoming edition as well.

The enclosed printout reflects the information we currently have on file for your organization. To ensure that the next Directory of ERIC Information Service Providers describes your organization accurately, please take a few minutes to review and update the printout. To assist you in filling out the form, a sample printout and audience and service codes are enclosed.

Please call our toll-free number—1–800–LET–ERIC—with this information, FAX it—301/251-5767—or mail it to ACCESS ERIC, ISP Updates, 1600 Research Boulevard, Rockville, MD 20850 by May 21, 1993.

The Directory of ERIC Information Service Providers and several other ACCESS ERIC Reference and Referral Databases are available online through GTE Education Services (GTE ES). ACCESS ERIC is also negotiating with several other online vendors to make this information accessible through as many online vendors as possible. For more information, please call our toll-free number, 1–800–LET–ERIC.

Thank you for taking the time to update your profile. Your continued participation in the Directory will assist librarians, researchers, and the general public in locating valuable ERIC information resources worldwide.

Sincerely,

Belinda J. Taheri
User Services Coordinator

Enclosures
April 1993

Dear Directory Participant:

ACCESS ERIC, the outreach and promotional arm of the Educational Resources Information Center (ERIC), sponsored by the U.S. Department of Education’s Office of Educational Research and Improvement, would like to thank you for submitting information about your organization for publication in the 1993 ERIC Directory of Education-Related Information Centers. Your organization is one of 400 international, national, and regional organizations included in this year’s Directory.

The Directory is a valuable resource that can help you quickly locate the appropriate source for your information needs. Each entry provides detailed information about an education organization including director, contact person, purpose, services, publications, and access procedures. For ease of use, the Directory also includes several indexes: subject, geographic, and master organization.

We would now like to offer you the opportunity to purchase the 1993 Directory. It is available from ACCESS ERIC for $20, including postage and handling. An order form is enclosed for your convenience, or if you wish to order by phone with your VISA or Mastercard, call 1-800-LET-ERIC (538-3742).

Once again, we would like to thank you for your contribution to this year’s Directory. I look forward to working with you in the future.

Sincerely,

Matthew Soska
Information Specialist and
Editor of the 1993 Directory
Memorandum

To: ERIC Directors and User Services Staff

From: Carol Boston/AE and Dianne Rothenberg/PS

Date: April 20, 1993

Re: Outreach to ASCD Network Facilitators

At the recent Association for Supervision and Curriculum Development (ASCD) conference, we gave a brief presentation about ERIC to the ASCD Network Facilitators—40+ members who run special interest groups on broad education themes. Some ASCD Networks line up neatly with certain ERIC Clearinghouses and others cut across several scopes. Because many ASCD Networks have their own newsletters or bulletin boards, they offer the ERIC System a great outreach opportunity.

At the presentation, we gave out sample ERIC Clearinghouse Digests and brochures and encouraged members to contact relevant Clearinghouses to get on mailing lists, receive search strategy consultations, submit curriculum resources, etc. We also sent the enclosed follow-up letter. To help the System make these important contacts, we're forwarding you an address list showing all the ASCD Network Facilitators. Please add some or all to your mailing list. You may also wish to contact them directly—several seemed interested in receiving copy for their newsletters.

Judging from our reception at the meeting, this is one case when individuals won't mind being contacted by several people within the ERIC System! Thanks in advance for your help.
April 20, 1993

Dear ASCD Network Facilitator:

We enjoyed meeting many of you at the Network Facilitators Meeting on March 28 and hope that you have found the ERIC materials we distributed useful. Enclosed is an ERIC Digest from the ERIC Clearinghouse on Information Resources that summarizes access points to ERIC. This Digest, like most ERIC material, is in the public domain. Feel free to reprint it in your newsletters or photocopy it for your members.

We’d like to encourage you to contact any or all of the 16 subject-specific ERIC Clearinghouses to get on their mailing lists for complimentary Digests, newsletters, and publication announcements. Each Clearinghouse has a user services staff member who can:

- consult with you about a database search strategy;
- recommend Clearinghouse publications that match your interests; and
- provide general reference and referral within their subject expertise.

Clearinghouses would also be happy to consider curriculum resources that Network members produce for possible inclusion in the database. This will help make your work accessible to colleagues around the world. To submit material, fill out the Reproduction Release form from the brochure you received, Submitting Documents to ERIC, and send it and two copies of the material to the Clearinghouse most closely aligned with your topic.

To help link ASCD Network Facilitators and ERIC Clearinghouses, we will be sending each of them your names and addresses, but you don’t have to wait for them to contact you. Write, call, fax, or e-mail the Clearinghouses that interest you. If you have general questions about ERIC or are not sure which Clearinghouse you need, call 1–800–LET–ERIC. The ERIC System is eager to be of service to you and your members.

Sincerely,

Carol Boston

Ted Brandhorst, Director
ERIC Processing and Reference Facility
1301 Piccard Drive, Suite 300
Rockville, MD 20850-4305

Dear Ted:

Enclosed are your complimentary copies of our latest publications, Catalog of ERIC Clearinghouse Publications, the ERIC Users' Interchange, and the latest issue of The ERIC Review, featuring K-12 computer networking. Please review and provide ACCESS ERIC with your feedback. We value our on-going relationships with each of you. Thank you for your support.

The awards for the 16 ERIC Clearinghouses will be very soon. Meanwhile, ACCESS ERIC is preparing for the ERIC Directors' Meeting to be held the last of June as well as gearing up for two new projects (1) acquisitioning non-ERIC Digests from labs, Centers, and education associations to expand the existing ERIC On-line Digest file and (2) Online networking with commercial networks, e.g. America Online, CompuServe, ServeLine, etc. These projects should begin in a month or so. We'll keep you posted, or better yet, log on to these systems and give us your feedback.

I want to especially thank all of you for publicizing our Calendar of Education-Related Conferences and telling others about the services provided by the ERIC System. A point of interest is that the Calendar will be online soon with a number of networks, including the Internet (through Syracuse University's Gopher).

Please keep us informed of your ideas and concerns about ACCESS ERIC and the ERIC System.

Sincerely,

Beverly Swanson
Director

Rockville, MD 20850-4305

Dear Ted:

Per our announcement on E-mail on July 23, we have begun data collection for the September 1993 issue of the ERIC Users' Interchange. In particular, we are looking for information regarding:

- new technology
- price changes
- new Clearinghouse initiatives for the latest contract cycle
- new services, search strategies and techniques
- any other exciting ERIC System news

In addition, this issue will include the usual features such as "Ask ERIC—Letters to the Editor" and new Clearinghouse and Component products. If you have noticed any trends in information requests, i.e. frequently-asked questions or common areas of confusion among users, please send us this information, as well as your responses to these inquiries, so that we may include it in our column, if appropriate.

We would like to include submissions from as many Components as possible. To be included, all materials must be received no later than Friday, August 20, to meet our September publication deadline. You can fax the information (301/251-5767), mail it to my attention, or send it via the Internet (bjtaheri@gwavm.gwu.edu; btaheri@inet.ed.gov). If you have any questions, please don't hesitate to call me at 1-800-538-374? or 301/251-5264.

Sincerely,

Belinda J. Taheri
User Services Coordinator
Now Available From ACCESS ERIC!

ACCESS ERIC, the promotional and outreach arm of the Educational Resources Information Center (ERIC) System, sponsored by the U.S. Department of Education's Office of Educational Research and Improvement, announces the availability of the 1993 ERIC Directory of Education-Related Information Centers and the 1993 Catalog of ERIC Clearinghouse Publications.

1993 ERIC Directory of Education-Related Information Centers

Education encompasses many disciplines and a broad range of topics. When you need education-related information there are many agencies to turn to—so many, in fact, that it is often difficult to locate quickly the appropriate source for your information needs. Now, one publication can help you quickly locate education-related resources. The 1993 ERIC Directory of Education-Related Information Centers lists alphabetically 400 national and regional organizations that provide services that include information dissemination, reference and referral, technical assistance, online searching, and outreach. For ease of use, the Directory also includes several indexes: Subject, Geographic, and Master Organization.

1993 Catalog of ERIC Clearinghouse Publications

Educators, Librarians, parents, and students will find more than 1,350 current education titles—including teaching guides, bibliographies, research summaries, monographs, and more—published by ERIC's 16 subject-specific clearinghouses. Most of the publications are free; others are available at a minimal cost. The Catalog includes an extensive subject index, prices, and ordering information.

Return this order form to: ACCESS ERIC, 1600 Research Boulevard, Rockville, MD 20850-3172, 1-800-LET-ERIC.

Writing for Successful Publication
Kenneth T. Henson, 263 pages, $25

Get an insider's grasp of the world of publishing! Learn to develop fresh topics, edit yourself, and communicate effectively with editors and publishers. This book is a must for faculty members and subject experts who want to get their ideas into print.

Citizenship for the 21st Century
William T. Callahan, Jr., and Ronald A. Banaszak, 354 pages, $17

What will citizenship look like in the 21st century? Several leading civics educators examine current issues and ideas in education for democratic citizenship.

Striving for Excellence: The National Education Goals
ERIC System, 74 pages, $5

Find out what you can do to bring about education reform in your community. This compilation offers 30 practice-oriented ERIC Digests grouped around the National Education Goals. Explore innovative approaches to school readiness, school retention, student achievement, adult literacy, and safe, disciplined, drug-free schools.

Teaching Mathematics Effectively and Equitably to Females
Katherine Hanson, 39 pages, $5

How can we prepare women for higher-level mathematics and professions requiring advanced mathematics? This monograph provides specific suggestions for changing prevailing attitudes and expectations, math curricula, classroom organization, and instructional strategies to help females succeed in this critical subject.

Trends in Educational Technology
Donald P. Ely, 66 pages, $9.50

Technology holds great promise for improving teaching and learning in this country. This state-of-the-art analysis focuses on the personnel, tools, and applications of educational technology.

Striving for Excellence: The National Education Goals
ERIC System, 74 pages, $5

Find out what you can do to bring about education reform in your community. This compilation offers 30 practice-oriented ERIC Digests grouped around the National Education Goals. Explore innovative approaches to school readiness, school retention, student achievement, adult literacy, and safe, disciplined, drug-free schools.

Empowering Young Black Males
Courtland C. Lee, 95 pages, $18

How can we empower young Black males to acquire attitudes and skills that will enable them to cope more effectively with the frustration, underachievement, and failure that comprise the current educational reality for all too many of them? This book explores the psychosocial development of Black males and facets of Black culture, and includes four empowerment training modules.

Empowerment for Later Life
Jane E. Myers, 122 pages, $18

How can we help older people feel a sense of self-esteem and self-worth? This book explores the concept of empowerment in detail, reviews developmental issues key to understanding the aging process, and discusses the empowerment strategies through a holistic wellness approach.

BEST COPY AVAILABLE
Counseling Underachievers
Jeanne Bleuer, 89 pages, $13

How can counselors become a significant force in improving the academic achievement of students? This book summarizes achievement theories and presents a comprehensive model for counseling interventions.

Critical Thinking Across the Curriculum: Building the Analytical Classroom
Victor P. Maiorana, 176 pages, $17

Critical thinking skills development is becoming an essential characteristic of successful classrooms all over the country. This book reviews the meaning, purpose, and attributes of critical thinking and offers a blueprint for making your classroom an analytical one.

Learning Technology Resource Guide
Lisa Crooks Zugner, 59 pages, $8

How can we improve education through electronic technology? This resource guide offers information about selected projects, centers, institutions, software, courseware, products and services, consortiums, forums, and other sources.

Libraries for the National Education Goals
Barbara K. Stripling, 118 pages, $12

Libraries are key to the success of any education reform. This monograph presents highlights from a wealth of programs your school or community library can adopt to support the National Education Goals.

ACCESS ERIC

A report to the ERIC Directors

Beverly Swanson
June 22, 1993
ACCESS ERIC Update

This update is divided into three sections to present the following: highlights from the past year that are likely to be of particular interest to ERIC Directors, an overview of current collaborations with ERIC components, and a sketch of upcoming initiatives.

1. Year-to-Date Highlights (August 1992–present)

Systemwide Referrals and Publications Development

- Even as more users are contacting ERIC through electronic means, the toll-free 1–800–LET–ERIC line keeps ringing! An average of 400 educators, librarians, parents, and others call for general ERIC information and education reference and referral each month; another 200 per month send letters. Questions about gaining free access to the ERIC database via the Internet are becoming very common. In the last ten months, ACCESS ERIC staff have made more than 1,500 referrals within the ERIC System (see Attachment A for breakout by component). In addition, ACCESS ERIC has distributed more than 2,000 single copies of various System publications by mail (see Attachment B).

- In recent months, the following materials have been produced by ACCESS ERIC (many, of course, with substantial input from the rest of the System):

  • A Pocket Guide to ERIC (revised)
  • 1993 ERIC Calendar of Education-Related Conferences
  • ERIC Review issues devoted to education partnerships (with JC) and K–12 school computer networks (with IR)
  • Catalog of ERIC Clearinghouse Publications In-Print: 1993
  • ERIC Users' Interchange

Other publications in various stages of development include:

- ERIC Annual Report 1993 (draft distributed to Directors)
- Striving for Excellence: The National Education Goals, Vol. 2 (in formatting stage)
- ERIC Directory of Education-Related Information Centers (bluelines being held pending new Clearinghouse addresses)
- Brochures for parents and teachers on parent involvement, substance abuse prevention, kindergarten (with PS), and standardized testing (with TM) (in review)
- ERIC Review issue on alternative assessment (with TM; in draft ms. stage)
- Directory of ERIC Information Service Providers (in data collection stage)
Outreach Activities

- Staff have represented the ERIC System through exhibits and presentations at several conferences, including those of the National Association of Partners in Education, the National Community Education Association, the American Library Association, the National Middle Schools Association, the Association of Supervision and Curriculum Development, the Education Writers Association, and the Partnership of Drug-Free Schools and Communities. Special thanks to the many Clearinghouses that sent materials for distribution at one or more of these conferences and to Dorothy Stewart of SP, who provided ERIC database searches at two of them.

- ACCESS ERIC and EDRS sent a joint mailing to the nation’s 17,000 public school superintendents to acquaint/reacquaint them with ERIC and its resources for administrators and teachers. Several hundred superintendents called to receive follow-up information.

- Staff are about halfway through a project to contact the inservice coordinators at every state department of education in the country to determine their staff development priorities and their familiarity with ERIC and its resources for teachers. Most of the contacts thus far have emphasized alternative assessment and school restructuring as their top priorities. While they themselves tend to be familiar with ERIC, they report that the teachers with whom they work are generally not, unless they are doing graduate work. In response to the information gained during the phone interviews, staff follow up by mailing resource packages that include general ERIC information, ERIC Digests, and referrals to appropriate Clearinghouses. We anticipate making the list of inservice directors and their interests available to the whole ERIC System after the initial interviews are completed.

- In the past year, ACCESS ERIC has placed information about ERIC materials and services in many publications, ranging from the national-level Education Week and Teacher and Electronic Learning magazines to association organs such as the National Association of Secondary School Principals’ Bulletin and the National Science Teachers Association’s Science and Children to local newspapers, including the Prince George’s County (MD) Journal and Bergen County (NJ) Kids.

- For the past six months, ACCESS ERIC has maintained a bulletin board on the popular online service, America Online. (Check it out: it’s in the Teachers’ Information Network–Resource Pavilion section of the Learning and Reference file). Bulletin board users can post questions and download files, including A Pocket Guide to ERIC and IR’s Internet Access Points to ERIC. Recently, we have begun working with Clearinghouses to prepare topical information packages for AOL that consist of ERIC Digests, sample searches, and referrals from the Education-Related Information Centers database. So far, packages on school restructuring (EA), site-based
management (EA), nongraded and mixed-age education (PS), portfolio assessment (CS), and whole language (CS) have been uploaded.

- Other online activity that ACCESS ERIC is undertaking on behalf of the ERIC System includes the following:

  - Making the **ERIC Calendar of Education-Related Conferences**, the **ERIC Directory of Education-Related Information Centers**, the **Directory of ERIC Information Service Providers**, and the **ERIC Digests Online** files available on GTE. Negotiations are now underway to develop an ERIC bulletin board on GTE that will include a listing of "ERIC Bestsellers" with online ordering capacity.

  - Providing ERIC information, including *A Pocket Guide to ERIC* and selections from *The ERIC Review* and *Striving for Excellence*, to CompuServe, America Tomorrow, and SERVE-Line (SouthEastern Regional Vision for Education's toll-free bulletin board service).

  - Supporting AskERIC through referrals and file sharing.

II. Collaborations with ERIC Components

- As noted above, Clearinghouses and support components have provided valuable content development and review of publications produced this year, particularly the **Catalog of ERIC Clearinghouse Publications**, the **ERIC Calendar of Education-Related Conferences**, **The ERIC Review**, and **Striving for Excellence**. We look forward to your ongoing collaboration in developing and publicizing these resources and will be happy to continue to provide information for, and review of, ERIC-developed publications as requested.

- ERIC Clearinghouses have been very responsive in providing electronic copies of Digests and other materials for various online activities. To date, our efforts to upload topical packages to America Online have been driven by initial user requests and have involved only a handful of Clearinghouses. We would eventually like to prepare topical packages in collaboration with all interested Clearinghouses.

- ACCESS ERIC continually looks for opportunities to promote the Clearinghouses through special mailings such as one on behalf of SE to 200 African American secondary science and mathematics teachers in the Quality Education for Minorities network; one on behalf of SO to the fifty state-level coordinators of the National Geographic Alliance; and one on behalf of the entire System to the Network Facilitators of the Association for Supervision and Curriculum Development. A mailing to the education liaisons of the National Governors Association and the membership of the Education Writers Association are under development.
ACCESS ERIC continues to promote and distribute ERIC Clearinghouse publications directly as requested. Five Clearinghouses currently participate in this no-cost program; their total reimbursements are expected to exceed $3,000 by the end of this contract year (August 1993). Other Clearinghouses are welcome to send titles and announcements for any publications they would like ACCESS ERIC to distribute to Beverly Swanson or Matt Soska; you will receive a reimbursement check and a list of publications sold at the end of each month.

III. Future Initiatives

Contract Modification

ACCESS ERIC has received a contract modification to accomplish the following:

1) Format two issues per year of Recent Publications of the U.S. Department of Education in the ERIC Database (to replace the OERI Early Alert publication);

2) Expand networking activity on behalf of the ERIC System to various non-Internet information services and bulletin boards used by teachers; and

3) Identify and prepare ERIC Digest-like materials produced by the National Research and Development Centers, Regional Educational Laboratories and professional education associations for addition to the ERIC Digests Online file.

Revitalized Liaison Program

Because the various Clearinghouses and support components have different needs in terms of reaching their target audiences, ACCESS ERIC plans to designate a staff member to plan and carry out collaborative projects with each component.

Training

As more individuals become able to access ERIC through public and private networks (as opposed to libraries, where searching assistance is available), we anticipate high demand for additional training on how to approach a database search. (WAIS and other technologies may eventually make Boolean logic obsolete, but for right now, we are hearing from baffled callers with newfound access to ERIC who don’t get what they need when they key in "reading"!) There is a clear need for training materials that take these novice users into account.

Further information about these initiatives will be forthcoming later this summer.

DATE: June 16, 1993

SUBJECT: Potential New ERIC Product in Electronic Format

As most of you know, Oryx Press has proudly published CIJE and many other ERIC publications, including the Thesaurus of ERIC Descriptors, for almost 15 years. Our commitment to the ERIC system and its users remains constant.

For the past several years, we have heard from many of you that there is a existing need for full-text ERIC information. This is consistent with the ERIC mission to extend its outreach to schools, specifically administrators and teachers, in addition to better meeting the needs of its current customer base by providing primary information. For this reason, Oryx has been working diligently to identify the optimum information product to meet these criteria. We have completed our initial product development work and we are now at the stage at which we need involvement and specific direction from you.

We have tried to make this process simple so that you can communicate your reaction to our thinking via the attached survey. It is our intent to shape our plans based on the responses we receive. Therefore, I hope that each of you will be candid about the following points: that you will think about your information needs in the future as well as at the present time; will gather collective intelligence from your colleagues, patrons, co-workers, etc., in order to ensure that we consider a variety of users for the product; and that you will be realistic in estimating how far you are willing to stretch your budget in order to access a full-text ERIC electronic product that will eliminate the need for a number of your print subscriptions.

If, after you complete the attached survey, you feel that there are additional considerations that we should take into account before moving ahead, please either jot them down and send them to me, or, if you prefer, please call us so that we can have the benefit of talking with you and hearing your reactions.

Oryx has made this investment because we believe, from all that we have heard through the ERIC system and its users, that the time is here (if not overdue) for us to publish the type of full-text electronic products that you will see described on our survey. We are prepared to go ahead with this venture if the survey supports the idea that there is a need and a ready market for a successful product launch. If you can complete this brief survey and return it to us within the next few weeks that will be very helpful to our planning for getting the product out this year.
TO: ERIC Colleagues and Customers

SUBJECT: Potential New ERIC Product in Electronic Format--Survey

*************************************************************************

BACKGROUND

(1) For whom do you work?
   ___Academic Library ___School Library ___Public Library
   ___College or University ___School ___Medical Facility
   ___School District ___Other
   ___Department of Ed

(2) If you work in a library, is it
   ___Large ___Medium ___Small

(3) What is your title? _______________________

(4) Do you actively participate in deciding what CD-ROM or other electronic products
    your institution purchases? ___Yes ___No
    ___We don't purchase CD-ROM or electronic products

ERIC FULL-TEXT PRODUCT SURVEY

(1) Do you and/or your co-workers or library users currently use ERIC? If Yes, please note:
   (a) Who uses it? _______________________
   (b) How often? _______________________
   (c) In what format? _______________________

(2) Would you be interested in a full-text ERIC CD-ROM product?
   ___Yes ___No ___Don't know
(3) Please note the degree to which you would be interested in purchasing the following full-text ERIC products:

**PRODUCT A:** 15 YEARS OF THE FULL ERIC BIBLIOGRAPHIC DATABASE WITH FULL-TEXT OF THE MOST RECENT 5 YEARS OF ALL INDEXED JOURNALS AND 2,500 "BEST OF ERIC" DOCUMENTS.

- [ ] Very interested in product at an estimated price of $6,000.
- [ ] Somewhat interested in product at an estimated price of $6,000.
- [ ] Not at all interested.

**PRODUCT B:** 15 YEARS OF THE FULL ERIC BIBLIOGRAPHIC DATABASE WITH FULL-TEXT OF THE MOST RECENT 5 YEARS OF ALL INDEXED JOURNALS (NO DOCUMENTS).

- [ ] Very interested in product at an estimated price of $5,000.
- [ ] Somewhat interested in product at an estimated price of $5,000.
- [ ] Not at all interested.

**PRODUCT C:** 15 YEARS OF THE FULL ERIC BIBLIOGRAPHIC DATABASE PLUS FULL-TEXT OF ONE-THIRD OF THE 5 YEARS INDEXED JOURNALS AND 2,500 "BEST OF ERIC" DOCUMENTS.

- [ ] Very interested in product at an estimated price of $3,000.
- [ ] Somewhat interested in product at an estimated price of $3,000.
- [ ] Not at all interested.

**PRODUCT D:** 15 YEARS OF THE FULL ERIC BIBLIOGRAPHIC DATABASE PLUS FULL-TEXT OF ONE-THIRD OF THE LAST FIVE YEARS INDEXED JOURNALS (WITH NO DOCUMENTS).

- [ ] Very interested in product at an estimated price of $2,000.
- [ ] Somewhat interested in product at an estimated price of $2,000.
- [ ] Not at all interested.

(4) If estimated price has affected your response to any of these four products, please indicate:

**PRODUCT A**
Affordable at ________

**PRODUCT B**
Affordable at ________

**PRODUCT C**
Affordable at ________

**PRODUCT D**
Affordable at ________

(5) Are you currently on the Internet?

- [ ] Yes
- [ ] No

(6) Do you search the ERIC database on the Internet?

- [ ] Yes
- [ ] No
ERIC DIRECTORS MEETING
ERIC NATIONAL TECHNICAL MEETING
June 21-24, 1993
Washington, DC

ERIC Processing and Reference Facility Report

I. GENERAL

A. ERIC Processing Manual (EPM) Revision

The lengthy EPM revision effort was finally completed in September 1992. All sections were completely re-written and brought up-to-date. A Glossary and Subject Index were added to facilitate use. The new EPM was entered into the database (ED 348 055) and some stock was set aside for sale to the public (@ $75 each).

B. ERIC Usage Fees

The long battle to impose modest usage fees on the online and CD-ROM vendors for their use of ERIC was lobbied against aggressively by ALA and IIA and was finally put on indefinite hold by the agency. The hope is now that appropriated funds will become available for the various system improvement activities for which usage fees were originally targeted. As a result of this decision, the copyright notice placed on all ERIC magnetic tapes leaving the Facility during 1992-1993 will be removed.

C. Facility 800 Number

In line with the system-wide trend, the ERIC Facility recently acquired an 800 number (1-800-799-3742). It will be added to the ERIC Network Directory, Pocket Guide to ERIC, Facility letterhead, etc. For a mnemonic, remember 1-800-QYZ-ERIC!

II. PRODUCTS

A. ERIC Digests

A complete annotated bibliography of all ERIC Digests (1,504) produced to date was published in April 1993. This handy reference provided a full set of indexes to Digests, identified those in the database (1,321), identified those not in the database (165), identified those available in full text (1,062) and tried basically to be a complete reference for Digests.

B. Publications About ERIC

A complete annotated bibliography of all publications written about ERIC, 1960-1992, was published in January 1993. This item listed 689 citations and provided a full set of indexes. It cumulates (and therefore supersedes) all previous editions of this bibliography.
C. Encyclopedia of Library and Information Science

An extensive article on ERIC was prepared for the Encyclopedia of Library and Information Science. The article is notable in including a complete table listing all ERIC components to date and all past and present Directors of those components (including their years of service).

D. ERIC Ready References

Ideas for new ERIC Ready References continue to be suggested. The Facility is currently working on the following three new Ready References: #17 Journals Covered by CJJE; #18 Field Labels in Use by ERIC Database Vendors; #19 ERIC-at-a-Glance (Graphic Display).

E. ERIC Acquisitions Arrangements List (EAA)

The 1993 edition of the complete list of ERIC Acquisitions Arrangements List is currently being reproduced and will be available before this conference is over. It lists a total of 1,771 arrangements.

Because we have not yet heard from all Clearinghouses concerning their contacts with educational publishers, no information on this subject could be included in this EAA, but it will be included in supplements and future editions.

III. LEXICOGRAPHY

ERIC has been invited by the AERA and Oryx Press to participate in a massive project to update and revise Good's Dictionary of Education. The Facility Lexicographer will attempt to see that this effort takes advantage of the many fine definitions developed by ERIC for its Thesaurus over the years and that any ERIC definitions used receive appropriate credit.

IV. INTERNATIONAL

A. ERIC on DataStar

ERIC was added to the DataStar online offerings in late 1992. Shortly thereafter, DataStar was acquired by RadioSuisse by DIALOG. Word has it that DataStar will continue as an independent operation during 1993 but that in 1994 changes may occur. When BRS and ORBIT were acquired by the same company, ERIC was continued on BRS but was dropped from ORBIT, in order to avoid double loading of the ERIC database. The same phenomenon could occur in this case.

B. International ERIC

In October 1993, DIALOG is scheduled to come out with a new CD-ROM product entitled (with ERIC's permission) "International ERIC". This product will contain the three ERIC-like databases from Australia (AEI), Britain (BEI), and Canada (CEI). The thought is that creating this "data proximity" will inevitably lead to further efforts at standardization, coordination, and elimination of duplication.
C. IAUDOC

The International Association of Universities (IAU) has produced the first electronic version of its *International Bibliography of Higher Education*. The ERIC/HE Clearinghouse has been selecting ERIC accessions for the U.S. contributions to this international bibliography. The ERIC Facility has been converting these records to IAUDOC format. This collaboration will continue and ERIC is attempting to help improve the level of participation by other countries and the prospects for an eventual commercial product.

V. DATABASE BUILDING

A. Reproduction Release Forms as Last Pages of Document (and Microfiche)

Beginning with the 1993 input to RIE, the Clearinghouses were asked to include the Reproduction Release (Specific Document) Form as the last page of each document requiring such a form. This new procedure has been implemented with a minimum of problems and seems to be going smoothly. It provides a handy way to archive these permissions without setting up extensive paper files. (Having the contributor's telephone number on a large percentage of these forms has already come in handy on many occasions for purposes of resolving problems and obtaining better copies.)

B. "Practice File"

The DIALOG problem involving accidentally deleting the 27,000 "Practice File" accessions from their ERIC CD-ROM has come and gone. The new DIALOG disk has restored the missing accessions. The glitch was useful in that it led to DIALOG choosing a totally different selection algorithm when pulling ERIC records from their online file for purposes of updating their CD-ROM file.

C. ISSN Number Problem

As a result of a bug in the computer program that checks EJ records against the "Source Journal Index", some 1,338 EJ records in the last three years were given incorrect ISSN numbers. These records were identified by Oryx Press and corrected by the Facility. Corrected records were sent to all major vendors and offered to all tape subscribers (free of charge). DIALOG has already mounted the corrected records.

D. Education-Related Books in ERIC Database

As a result of the new Clearinghouse Statements of Work, increased numbers of education-related books are beginning to be seen in the input for RIE. Since ERIC has always included some books, there is no major problem in processing this material for the database. However, some new processing guidance is in order and will be prepared. So far the major concern has been copyrighted books that are also clearly funded by the U.S. Department of Education. These should be processed at Level 1 and it will be necessary for the Clearinghouses to send in actual copies of such documents with the resumes.

**BEST COPY AVAILABLE**
E. RIE Input Levels for 1993

RIE input levels for 1993 are running approximately 500 documents under total input levels for the same period in 1992. The Facility attributes this primarily to the disruption caused by all sixteen Clearinghouses being competed simultaneously in 1993. With work already started on the August issue, indications are that this trend may not be completely reversed in the four issues remaining. If so, the annual total for 1993 will be closer to 12,500 than last year’s 13,000.

F. Electronic Journals/Articles

As electronic journals continue to grow in number, the question of whether ERIC should create database entries for electronic articles from these journals has arisen. The Facility is concerned about the future availability of such articles and believes that the criteria for selecting such items should include some evidence that provisions have been made for the archiving of the journal for the benefit of future users trying to follow-up on retrieved citations. In order to focus the discussion, a possible ERIC policy for the processing of electronic journals has been drafted and is available as a separate handout.

G. Digests in Full Text File (EDO)

The EDO file currently contains a total of 1,062 ERIC Digests in full text. There is an interest in extending the content of this file to non-ERIC Digest-like publications. ACCESS ERIC has been given a task to identify non-ERIC candidates for the EDO file. The Facility believes that approximately 75% of such non-ERIC items are already being acquired through present acquisitions efforts and can be found in the database. ACCESS ERIC is testing this hypothesis. A search by the Facility of the first quarter of 1993 revealed 25 non-ERIC Digest-like documents in the database.

A set of selection criteria for non-ERIC Digests has been developed by the Facility and is available as a separate handout.

All items appearing on the EDO file must first be entered into the ERIC database in order to have a basic description prepared. This processing would occur in the normal way. Once selected for the EDO file, the item would have to be converted to electronic full text either by obtaining electronic text from the source or by ERIC’s scanning or keying the item directly.

V. Computer-Related

A. Boeing Computer Services (BCS) — ESA Operating System

BCS is the central computing facility of the U.S. Department of Education. The Facility is directed to do all of its mainframe processing work at BCS. During the past year BCS made a major conversion to a new Operating System called ESA. This conversion involved changes in virtually every Facility file stored at BCS, in all the ERIC programs run at BCS, and in the way data corrections and changes are made online from remote Facility terminals connecting with BCS. All of this work was, of course, transparent to the Clearinghouses, but occupied a considerable amount of the time of our computer staff. The changeover is now complete.
B. ERIC Facility Local Area Network (LAN)

During the past year, the Facility has installed a Novell-based LAN interconnecting all sixteen microcomputers serving ERIC Facility staff. The LAN provides all staff with common access to a large body of office software, such as WordPerfect, Lotus 1-2-3, etc., as well as high-speed modems, Laser printers, and major internal systems such as the “Documents in Process” (DIP) package used by Acquisitions, the “RIE Removes/Delays” package used by the RIE Editors, and the “Acquisitions Data Report” (ADR) file used for duplicate checking purposes. We are currently at work on a front-end system that would essentially downsize the LIDS part of the ERIC software to the LAN, thereby permitting the Editors to check and validate data against authority files and make changes locally online without having to go to the mainframe. The LAN increases the Facility’s computer resources and provides these resources to each and every Facility staff member.

C. Internet

Probably the biggest computer-related news of the year is ERIC’s headlong surge toward the Internet: e-mail via Internet, data/file transmissions via Internet, and connection with the user via Internet. All this has happened with startling speed and continues to evolve. The final outlines are by no means set. The simple local bulletin board system ERIC formerly used called Multilink has long the way of the country cracker barrel store. Internet is a new way to send and receive messages and data, augmenting mail, telephone, and the FAX. ERIC has enthusiastically jumped on the Internet “ride” and only time will tell exactly where it will take us.

D. INET

The INET computer system is OERI’s Internet node. It is now up and running and provides OERI staff with a way into the Internet and common access to any number of OERI data files mounted on the INET server.

Access to INET is being given to the ERIC Facility and to ACCESS ERIC and will soon replace the Facility’s current way into the Internet via GW University.

E. ADR File Expansion

The Acquisitions Data Report (ADR) is a file of all documents currently in-process at the ERIC Clearinghouses. “In-process” can mean different things at different Clearinghouses, but it generally means at a minimum that the document is thought to be a serious candidate for RIE announcement. A document may be a month away from getting an author-signed Reproduction Release Form, but entry in the ADR means that it is in the pipeline.

With the demise of “Early Alert” product, there is an interest in seeing to what extent the Acquisitions Data Report (ADR) can fill the gap in providing access to items at an early stage and before they have managed to make it into the ERIC database.

In order to do this, the current truncated ADR record (developed strictly for duplicate checking needs) would have to be expanded to fill other information needs. For example, we would probably have to capture full title, add first author, and capture some institutional name data (however unstandardized it might be at that stage).

The Facility has submitted a proposal to expand the ADR record and to re-write the ADR software. The resultant file/system would probably be made available to OERI and agency staff via INET. Access beyond that at a later date is also possible.

The impact on the Clearinghouses would be that they would have to create a slightly larger ADR record, e.g., full title, first author, institutional name indication.
Educational Resources Information Center

For FY 1992, $7.1 million was appropriated for ERIC. Of this amount, approximately 80 percent went to support the 16 ERIC Clearinghouses. The remaining 20 percent was used to fund the printing of ERIC publications by the U.S. Government Printing Office (GPO) and the operations of the three technical support contractors: ERIC Processing and Reference Facility (for database building); ERIC Document Reproduction Service (EDRS) (for micrographics and document delivery); and ACCESS ERIC (for outreach). Throughout the ERIC network of contractors, approximately 250 individuals are involved (part-time or full-time) in creating ERIC products and providing ERIC services.

Database Size and Growth

The ERIC database comprises two files: Resources in Education (RIE) and Current Index to Journals in Education (CIJE). The ED records announced in RIE represent documents; they are approximately 1,800 characters long on average. The EJ records announced in CIJE represent journal articles; they are approximately 650 characters long on average. Overall, the ERIC database through 1992 is approximately 908 million bytes in size and growing at a rate of around 35 million bytes per year.

ERIC Operations

Reproduction Release Forms

Beginning with the January 1993 issue of Resources in Education, ERIC began to film, as the last page of each document (and the last frame of each fiche), the signed reproduction release form giving ERIC permission to reproduce that document. If the document is covered by a blanket release (on file) or is federally funded, a "reproduction basis" form stating the particular case is used in lieu. This action obviates the need for ERIC to maintain separate paper files of signed repro-

Reprinted from:

The Bowker Annual, 1993
duction release forms. The form will not be included as part of paper copies reproduced on demand for users.

Full-Text Products

Products that will store the full text of selected ERIC documents and journal articles on optical media are an obvious next step and are under development at several locations. In anticipation of such products, ERIC has, since 1990, retained copies of the original documents accessioned into its database, in the event that they should be needed for scanning purposes. Also, since the first generation of such products is apt to be selective rather than comprehensive, the ERIC Clearinghouses continue to tag the accessions that are the best candidates (i.e., that meet both quality and size criteria) for full-text products.

Internet

Internet is a network of computer networks providing users with E-mail, bulletin board, and file transfer capabilities. During 1992, all the ERIC components systematically acquired Internet addresses for their organizations as a whole and for their staff individually. ERIC is now fully interconnected for rapid communication purposes via Internet, augmenting the existing telephone connections. The Internet addresses of each ERIC component are provided in the semianual ERIC Network Directory and can be obtained on request by contacting any ERIC component.

ERIC Products and Services

ERIC Processing Manual

The ERIC Processing Manual (EPM) documents the rules and guidelines for the acquisition, selection, and technical processing of documents and journal articles by the various components of the ERIC system. It contains chapters titled "Acquisitions," "Selection," "Handling and Shipping," "Cataloging," "Abstracting/Annotating," "Indexing," "Vocabulary Development and Maintenance," "Data Entry," "Database Changes (Post-Publication)," and "ERIC Clearinghouse Scope of Interest Guide." There are a glossary and general index. During 1992 the EPM was completely revised and updated. The 1992 edition (ED-348 055) supersedes the 1982 edition (ED-219 082). In addition to being in the ERIC database and microfiche collection, the new EPM may be obtained in printed form from the ERIC Facility ($75, domestic postage paid; $7.50 per section).

Publications about ERIC

Being one of the earliest machine-readable bibliographic databases, and one of the first such to be made available online and via CD-ROM, ERIC has been the subject of many documents and articles. The ERIC Facility has attempted to keep up with these writings and has periodically issued an annotated bibliography listing them.
Accession numbers follow:

<table>
<thead>
<tr>
<th>Accession No.</th>
<th>Period Covered</th>
<th>No. of Entries</th>
</tr>
</thead>
<tbody>
<tr>
<td>ED 169 955</td>
<td>1964–1978</td>
<td>259</td>
</tr>
<tr>
<td>ED 282 784</td>
<td>1979–1984</td>
<td>131</td>
</tr>
<tr>
<td>Not published</td>
<td></td>
<td></td>
</tr>
<tr>
<td>In process (early 1993 publication)</td>
<td>1989–1992 (cumulative)</td>
<td>166</td>
</tr>
<tr>
<td></td>
<td>1960–1992 (cumulative)</td>
<td>572</td>
</tr>
</tbody>
</table>

Because the three bibliographies published to date force today's researcher to look inconveniently in three different places, because some of the earlier items did not originally have accession numbers, but later acquired them, and because some historically useful precursor documents have been newly identified, it was decided to make the fourth edition (due out in early 1993) a superseding cumulative of the citations found to date. It will contain a total of 673 citations (561 to items in the database and 112 to items not in the database). It can be obtained from the ERIC Facility.

ERIC Document Reproduction Service

ERIC Document Reproduction Service (EDRS) is the document delivery arm of ERIC. Orders for microfiche or reproduced paper copies may be placed by correspondence, telephone, online vendor, E-mail, FAX, or in person. EDRS prices for microfiche and reproduced paper copies are the most economical in the business. Prices for 1993 are as follows:

<table>
<thead>
<tr>
<th>Product</th>
<th>Price</th>
</tr>
</thead>
<tbody>
<tr>
<td>Microfiche (price per card)*</td>

</tr>
</tbody>
</table>

*Dazo, unless otherwise specified.

1 A major article on ERIC was published toward the end of 1992 in the Encyclopedia of Library and Information Science (volume 51, supplement 44), pp. 208–223. This article provides a historical list of the directors of all ERIC Clearinghouses and other components for the 27-year period 1965–1991.
ERIC Digests

ERIC Digests are concentrated two-page treatments of key education topics, designed for the educator who needs information but has little time to search or to read. Through 1992, ERIC had published approximately 1,400 digests (see ERIC Ready Reference 10A-B for the latest list). Most are available free from the producing clearinghouse. The full text of approximately 1,000 digests is now available online, via the various ERIC-on-CD-ROM products, and from several WAIS servers via Internet. For example, on the DIALOG online file, DT = 073 will retrieve the records and Format 9 will print the full text of each.

AskERIC

Starting November 1992, the ERIC Clearinghouse on Information Resources (IR) began AskERIC, a prototype Internet-based electronic question-answering, help, and referral service. AskERIC is intended to provide insight into (1) the nature and extent of the information needs of K-12 educators, and (2) alternative approaches for delivering question-answering, help, and referral services to individuals over Internet. AskERIC will begin its service with three state networks: NYSERNET (New York State area), TENET (Texas), and SENDIT (North Dakota). Conclusions drawn from the project will help determine future roles for the ERIC system in meeting national education information needs.

AskERIC will receive questions from K-12 teachers, library media specialists, and administrators via Internet. Within 48 working hours, AskERIC will respond with an appropriate answer or referral response. ERIC Clearinghouses will be requested to provide information in their specialty areas to AskERIC users.

External Relations

DataStar

The European online vendor DataStar (owned by Radio-Suisse) worked with the ERIC Facility during 1992 to mount the ERIC database on its online service in November. DataStar now takes its place next to DIALOG, BRS, and OCLC as one of the four major online services offering access to ERIC.

International Bibliography of Higher Education

The International Association of Universities (IAU) in Paris launched an International Bibliography of Higher Education during 1992, based on contributions from the ministries of education (or equivalent organizations) from Unesco member countries. The ERIC Clearinghouse on Higher Education (ERIC/HE) was designated the official contributor for the United States and makes the selection of items to be sent to IAU from the ERIC database on a quarterly basis. The ERIC Facility wrote a computer program to convert ERIC records into the required IAU/DOC format.

InterEd

The Australian Education Index (AEI), British Education Index (BEI), and Canadian Education Index (CEI), together with ERIC, constitute an informal group known as...
InterEd, aimed at improving cooperation, compatibility, convertibility, and coordination between these organizations with similar interests. During 1992, the big news was the signing of an agreement with DIALOG for a single combined CD-ROM product to include AEL, BEI, and CEI, and to be called (with ERIC's permission) International ERIC.

Information Science Abstracts Plus

During 1992, SilverPlatter launched a new CD-ROM product called Information Science Abstracts Plus. It consists of the regular Information Science Abstracts database (published in printed form by Plenum Publishing), augmented by relevant input from the ERIC database. The resultant product is made up of approximately 30 percent ERIC citations (with no attempt made as yet to eliminate duplication between the two sources). The ERIC input is provided by the ERIC Facility and is arrived at automatically via a complex computer search profile negotiated with SilverPlatter.

ERIC Usage Fees

During 1992, the ERIC Program Office announced a proposal to seek usage fees from commercial and academic purchasers of the ERIC data tapes. Heretofore, ERIC has realized basic cost recovery for providing its tapes, but has not received any income from commercial or other use of its database. The proceeds of such a fee would be used for maintenance and dissemination-related system improvements, e.g., renovation of ERIC's aging software. Vendors would be asked to pay 10 percent on ERIC-related revenues. Academic institutions would be asked to pay a flat $750 annual fee.

Reactions to ERIC's announcement were mixed, with the American Library Association registering a strong negative.
PROPOSED REVISION OF VOCABULARY REVIEW PROCEDURES

Dear VRG Members:

The current process for vocabulary development was designed subsequent to the Vocabulary Improvement Project (VIP), when all 16 Clearinghouses had a representative on staff who had been trained in vocabulary development and who during the VIP garnered a considerable amount of experience in assessing vocabulary problems and needs, writing scope notes, and preparing displays. Unfortunately, few of these staff members are still with the ERIC system. The new vocabulary coordinators find the process too cumbersome, difficult, frustrating, and time-consuming. Systemwide, there is dissatisfaction with the length of time required to get a new term into the Thesaurus. This problem is compounded by the fact that Clearinghouses tend to batch their vocabulary proposals toward the end of their contract so that the Facility lexicographer is inundated with a large number of terms in a short period of time each year.

Jim Houston, Kevin Arundel, Pat Coulter and I have been working on the development of a revised process to resolve many of the problems that have been identified with the current system. The revised process, which has already benefited from input from Jane Henson, Sandra Kerka, Ted Brandhorst, and Carolyn Weller, seeks to accomplish the following:

- Speed up processing;
- Regularize Clearinghouse input;
- Reduce duplication of effort by Clearinghouse and Lexicographic staff;
- Streamline and simplify the process, for both experienced and relatively untrained staff;
- Continue broad input both from within and outside the system;
- Ensure that the Facility lexicographer receives a more evenly spaced number of proposed changes and modifications that he can commit to handling each month;
- Utilize the Internet to reduce paperwork and facilitate communication.

Please review the procedures outlined below and send me your reactions. Whenever possible, if you identify a potential problem -- particularly with respect to the ways in which the new process will affect your vocabulary work -- suggest specific ways in which the problem may be remedied. I am hoping to have responses from everyone within two weeks. If you will not be able to respond by August 27, please let me know as soon as possible.

Thanks for your prompt attention to this.

Anita Colby, VRG Chair
Procedures:

(1) To propose a new term or modification, Clearinghouses should put a message up on the Vocabulary LISTSERV (which has been created and is being managed by ERIC/PS) containing:
(a) the proposed new term;
(b) all Identifiers to be transferred to the term;
(c) a narrative discussion of what the term means, how and in what fields it is being used, and any relevant background information (such as reactions from experts in the field); and
(d) a list of synonyms (if any) to be considered as UF's.

The VRG group address is vocab@listserv.cso.uiuc.edu.

Please keep in mind that the MAJORDOMO software used to maintain the list differs from other LISTSERV software. If you have any questions or encounter any problems, please contact Phil Meyer at ERIC/PS at pmeyer@alexia.lis.uiuc.edu.

Simultaneously, the Clearinghouse will send to the Facility lexicographer:
(e) an ASCII list of EDs and EJs to which the term will be posted (excluding those already posted with the Identifiers to be transferred to the new term); and
(f) photocopies of as many definitions and significant usages as can be found (at least 5) with focus on definitions culled from the ERIC literature and relevant dictionaries, glossaries, etc. (Citations must be provided).

* * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * *
* Any Clearinghouses that wish to complete a full lexicographic work-up *
* of their terms are welcome to do so. In this case, the LISTSERV *
* message will include a proposed scope note and a full display of *
* UF’s, BT’s, NT’s, and RJ’s. *
* * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * *

However, Clearinghouses do not have to supply finished scope notes or complete hierarchical displays. The Facility lexicographer will provide a template indicating the information that should be submitted. Clearinghouses are free to download and use the template or submit their proposals in another form. The Facility lexicographer will provide immediate feedback if there is a problem in the material the Clearinghouses are asked to submit, the search conducted, etc. The Facility lexicographer will verify the adequacy of the search, but generally will not attempt to verify all of the postings.

(2) In an effort to regularize the flow of new terms coming into the Facility, Clearinghouses will have a ceiling on input of 1 new term per month (a maximum, not a goal). If they wish to submit several terms, they can borrow slots from Clearinghouses with no vocabulary input that month. If they do not submit a term during a given month or arrange to switch terms with another Clearinghouse, they do not have the option of sending multiple terms/proposals later in the year. Switching of monthly slots can be arranged via the LISTSERV. Under this arrangement,
there should never be more than 16 terms/modifications coming into the Facility in any given month, and there should generally be less.

(3) The 16 (or fewer) terms received in any one-month period will be fully processed (i.e., implemented or rejected) within two months.

- Members of the Vocabulary Review Group (VRG) will have two weeks from the time the term is first proposed to comment. Responses may be as limited as "No comment" (only if the VRG member truly has no thoughts on the matter) or "Approve" (if the proposal has Clearinghouse support) or as substantive and detailed as desired. Some response is required from each VRG member, however, to ensure that everyone has received and reviewed each term.

- For approved terms, the Facility lexicographer will prepare the scope note and the full display. Scope notes will be prepared on the basis of the materials submitted by the originating Clearinghouses, other VRG members' comments, and original research conducted by the Facility lexicographer.

- When work on a term is completed, the term, scope note, and display will be routed to the VRG via the LISTSERV.

- The VRG will have 1 week to respond. Once again, some response is required.

- Unless there are major problems, the term will be added to the Thesaurus.

* * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * *
* The two-month overall turnaround time will be fully implemented in January 1994, with the new Facility Contract. (See "Implementation Timeline, Stage 2). *
* * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * * *

(4) The Facility lexicographer and the VRG chair will decide if a term/change isn't warranted. In cases of controversy, the proposal will be brought to the VRG for a vote.

(5) The VRG chair will keep a log of all VRG LISTSERV activities, and will submit a monthly report to the VRG/Facility monitors at the ERIC Program Office.

(6) Over the next six months, the Facility Lexicographer will be working steadily to eliminate to the extent possible the current backlog of 113 terms/modifications already submitted by the Clearinghouses. When the new process is fully in place, it is likely a small backlog will still exist. At that time, instead of proposing 1 new term, Clearinghouses can elect to prioritize 2 terms from the existing Vocabulary Backlog.

(7) The VRG Chair will work with any Vocabulary Coordinators who wish to enhance their lexicographic skills.
Implementation Timeline

The LISTSERV will be used for VRG communication, beginning immediately, replacing the Vocabulary Status Report (VSR) for soliciting input from the VRG on Thesaurus changes and for reporting completed Thesaurus modifications. The Facility Lexicographer will post finalized Thesaurus modifications to both the Vocabulary LISTSERV and ERICDIR LISTSERV. He will also put backlog terms he has received during the past year (since the last VSR) up on the LISTSERV to be voted on.

After I have received your comments and if accepted by the VRG, the new Vocabulary Process will be implemented in two stages. During the first stage, from August 1993 to approximately December 1993, Clearinghouses can begin submitting new terms via the LISTSERV, and VRG members will begin voting on proposals.

During the first stage, the Facility Lexicographer will give top priority to eliminating the backlog, rather than to processing new terms within the new limits on turnaround. The provision for a two-month maximum turnaround on new terms will go into effect during the second stage, which will begin with the new Facility contract early next year.

* * * * S T A G E 1 * * * *

August 1-December 31 The Facility Lexicographer and VRG Chair will attempt to eliminate the existing backlog.

August 12, 1993 The revised Vocabulary Review process will be submitted to the VRG for reactions, comments, and recommended modifications. VRG members will have 2 weeks to respond.

August 16, 1993 The Facility Lexicographer will begin putting the 49 new terms/modifications received but not yet voted on by the VRG up on the Vocabulary LISTSERV. Clearinghouses will have two weeks to respond. Some response is required.

Clearinghouses will begin submitting new terms and modifications at a maximum of 1 per month via the LISTSERV and submitting backup materials specified under the new system. These terms will be added to the backlog.

Within the new two-week turnaround, Clearinghouses will begin using the LISTSERV
for voting on new terms and modifications submitted directly to the VRG on the LISTSERV. Some response is required.

*** STAGE 2 ***

January 1, 1994  The two-month maximum turnaround will be implemented with the new Facility contract. Clearinghouses can select terms from the backlog to prioritize.

June 1, 1994  An evaluation of the process will be conducted, and the need for a VRG training manual (suggested by the Steering Committee) will be reassessed.

June 1994  A meeting of the VRG will be held during the Technical Meeting to discuss the new process and remaining problems and concerns.
To:

From: ERIC Processing and Reference Facility, Acquisitions Department

Subject: Your Request that ERIC Index the Articles Appearing in Your Journal

Journal Name: ____________________________

ERIC receives several requests each month from journal editors/publishers to index the articles appearing in a particular journal in ERIC’s monthly abstract journal, Current Index to Journals in Education (CIJE).

We are grateful for such requests because they often call our attention to new journals that should be covered by the ERIC database. All such requests receive careful and individual consideration. Because of the volume of such requests, however, it has become necessary to respond to them (at least initially) with this form letter, stating ERIC’s journal selection policies and the standard procedures a journal coverage request receives. Later, if the particular journal is selected for regular coverage in CIJE, a letter is sent to the publisher by the selecting Clearinghouse, usually requesting a complimentary subscription and notifying them when coverage will start.

I. [ ] Your request (and any sample issues) have been forwarded for review to:

[Blank line]

You will hear directly from the above organization about their decision concerning coverage of your journal.

II. [ ] Please provide some sample issues of your journal, as these are necessary in order to properly review and evaluate it for possible coverage.

III. [ ] Your request (and any sample issues) are being returned herewith, as your journal does not appear to be sufficiently education-related to be covered by ERIC.
SELECTING JOURNALS FOR COVERAGE BY CIJE

ERIC's Scope of Interest

ERIC's field of interest is education. All documents and journal articles cataloged and indexed by ERIC must have a demonstrable and explicit link with the field of education. ERIC does not cover material on disciplinary topics (e.g., Psychology, Sociology, Demography, Communication, Criminology, Health, Medicine, Mathematics, etc.) unless there is a direct connection made between the material and education, or, the material is specifically designed to be used in an educational context.

ERIC Clearinghouse Role in Selection

The ERIC Clearinghouses are the subject experts in the ERIC system and apply the formal ERIC selection criteria to documents and journal articles that they receive. Journals received at the ERIC Program Office, at ERIC Support Contractors, or at other system components, for possible coverage by CIJE, are forwarded to the appropriate ERIC Clearinghouse (based on subject scope) for review and decision.

ERIC Selection Criteria

The most important journals for ERIC to cover are the major "core" journals of the field, that are totally devoted to education, that have the largest circulation, that carry most of the literature that is shared and cited amongst educational researchers and practitioners, and that can be found for perusal in the collections of major academic libraries. All Clearinghouses attempt to identify these "core" journals first and to make them the foundation for their input to CIJE. Following the core group are journals devoted to education, but of somewhat lower overall quality and circulation level, and journals that are not devoted to education, but that contain a sufficient number of education-related articles to make them candidates for selective coverage. The Clearinghouses select journals from these secondary and tertiary groups up to the limit of their budgeted resources for article processing. It is essential that they have sample issues in hand to study during this process. In many cases national-level journals must be given preference over local and regional journals. It is important to note that not all candidate journals can be covered by ERIC with its existing resources.

Comprehensive vs. Selective Coverage

"Core" education journals are generally covered comprehensively, i.e., all their articles are processed. Non-core education journals are generally covered selectively, i.e., only the best and most significant articles are covered. Non-education journals are always covered selectively, i.e., only the occasional education-related article is processed.

Source Journal Index (SJI)

At the front of each issue of CIJE is a list of the journals currently covered by CIJE. This is a constantly changing list, as new titles are added and as old titles are discontinued or are dropped. The SJI is arranged alphabetically by the name of the journal and provides full publisher addresses, subscription price, International Standard Serial Number (ISSN), and reprint service information (e.g., University Microfilms International), if any. If your journal is selected for regular coverage by CIJE, it will be listed in the SJI and subscription information will be provided for the benefit of users.

Complimentary Subscription

ERIC covers over 750 journals in CIJE. Clearinghouses cannot afford paid subscriptions to that many journals and, therefore, they generally request a complimentary subscription from the publisher.

Value of CIJE Coverage

Journal articles processed by ERIC become bibliographic records in the ERIC database and announcements in the monthly abstract journal Current Index to Journals in Education (CIJE). As ERIC is searched by its worldwide users, the bibliographic records are retrieved and users seek (and cite) those articles that seem most relevant to their needs. They may seek articles via conventional library means or they may request reprints from commercial services such as UMI's Article Clearinghouse or ISI's Genuine Article Service, both of which pay royalties to publishers for each article copied.
The ERIC Processing and Reference Facility has regularly produced a series of "ERIC Ready References" designed to provide a maximum amount of information on a single, well defined ERIC database-related topic. While most are intended to be a single page quick reference sheet, some have expanded to several pages, i.e., list of ERIC Digests (10A/B), as the information displayed has expanded. ERIC Ready References are useful attachments with reference responses to public inquiries. New ideas for Ready References are solicited and are regularly evaluated. ERIC Ready References may be obtained free of charge from the ERIC Facility. The Ready References issued to date are listed below:

Ref: T93/1707  
Paris, 5 August 1993

Dear INTBIB Participant,

Following our formal invitation to attend the Meeting of Participants in the International Bibliographic Database on Higher Education (INTBIB) on 13-14 September 1993, we have pleasure in enclosing further documents for your information.

The Status Report will provide you with a summary of the International Bibliographic Database on Higher Education project, the different options proposed and solutions adopted.

An evaluation of the database prototype distributed last Spring will be forwarded to you within a few days. This evaluation document called Report on EYRISKO Search Software and Indexing in the International Bibliographic Database on Higher Education was prepared by Angela Lonardo, Consultant IAU, and combines her own comments with those received from the different partners in INTBIB.

In order to continue preparations for the Meeting we kindly ask you to send us, before 31 August 1993, together with your Registration Form, an evaluation of the costs you think will be involved on your side for participation in INTBIB (i.e., personnel, travel, equipment or overheads). We propose you refer to the cost evaluation made by the Coordinating Agency as a model.

We hope to hear from you very soon.

Yours sincerely,

Claudine Langlois  
Head, IAU/UNESCO Information Centre on Higher Education

Enc.  
Registration Form;  
Provisional Agenda;  
Provisional List of Participants;  
Status Report;  
Report on Database Products (Item 3a.);  
Report on Intended Audience of INTBIB (Item 5);  
Report on Types of Users and their Subject Interests as Documented by the Partner Agencies (Item 5);  
Project of Contract between Coordinating Agency and Partners in INTBIB (Item 6).
MEETING OF THE PARTICIPANTS
IN THE
INTERNATIONAL BIBLIOGRAPHIC DATABASE
ON HIGHER EDUCATION

Paris, 13-14 September 1993

Unesco House, Education Sector
Room 4.042, 10 a.m.

Provisional Agenda

First day, 13 September 1993

POLICY ISSUES

1. Review of Coordinating Agency's role, its tasks and responsibilities

2. Review of partners' roles:
   a) Role and responsibilities of each agency including those involved in the establishment and maintenance of a regional network
   b) Role of Coordinating Agency regarding these regional networks
   c) Cost of establishing and maintaining regional networks

3. Resources required for the further development of the International Bibliographic Database:
   a) Database products:
      ♦ CD-ROM
      ♦ on-line: Dialog, ESA, Internet, etc.
      ♦ print version
   b) EYRISKO or other search software development
   c) Development of a thesaurus
      ♦ software
      ♦ personnel
   d) Training and Documentation
4. Availability of documents
   a) hardcopy
   b) photocopies (articles)
   c) full text on microfiche or CD-ROM
5. Scope of the Database
   a) review of themes and publication formats
   b) review of potential partners
6. Establishment of formal contract between partners
7. Copyright considerations

Second day, 14 September 1993

DATABASE DEVELOPMENT
8. Establishment of selection criteria
9. Identification of desired publications
11. Indexing and abstracting of publications
12. Descriptor translation & conversion
13. Evaluation and revision of the database structure
14. Evaluation and revision of interface software
15. Revision of descriptor list & Thesaurus development
16. Creation & revision of the Users' Searching Guide
17. Activities related to distribution and database products
18. Training

86
IAU/UNESCO INFORMATION CENTRE ON HIGHER EDUCATION

International Bibliographic Database

on

Higher Education

STATUS REPORT
July 1993

1. An International Bibliographic Database: the Objective

The development of an international bibliographic database on higher education was initiated by the International Association of Universities (IAU) and the Clearinghouse on Higher Education of the Educational Resources Information Centre (ERIC), the major American database on education.

ERIC saw the need to make information about education worldwide available through its system, thereby making American researchers more aware of international developments and promoting the exchange of ideas and the strengthening of international linkages.

The International Association of Universities has always had, as one of its primary roles, the dissemination of information on higher education. In this context, IAU has published two major reference works, the International Handbook of Universities and the World List of Universities and has maintained a documentation centre, for many years.

2. Information on Higher Education: the Need

The improvement of access to information on higher education worldwide is important for a number of reasons. There has been much written during recent years about the "crisis" facing universities, and it is undeniable that institutions are indeed facing a combination of increasing and changing demands on the part of the State, the private sector or the students themselves. These demands are being made at the same time that most institutions are faced with diminishing resources. This situation clearly calls for creative responses if institutions are to address these challenges successfully. Information about other jurisdictions and innovative responses becomes very important for decision makers, planners and administrators faced with such demands and challenges.

The creation of a joint initiative on the part of a number of partner organizations to
develop an integrated database of the appropriate references selected from their respective holdings is both timely and efficient. With the descending costs of electronic storage of information and the growth in the use of electronic networks, the promise of more easily accessible information in electronic form has become realizable in many countries. The establishment of a network of organizations with significant collections on higher education will serve not only to facilitate access, but also to increase efficiency by eliminating the duplication of effort among the partner organizations.

An international database will promote a broader exchange of information among individuals working in the area of higher education. Information from countries and regions whose output has had more narrow dissemination, and has been less well known as a consequence, can become more widely accessible through the network of participating agencies. Facilitating access to the literature and research on higher education will assist those developing countries, which must place high demands upon the higher education system, to further develop their own research capacities in the domain of higher education.

3. Organization and Coordination

3.1 The Coordinating Agency

Originally, the International Association of Universities agreed to act as the coordinating agency for the collaborative development of an international bibliographic database, given the congruence of the initiative with the information mandate of the Association.

In recent years, there has been a significant effort to strengthen the clearinghouse function of the Association. In 1989, the joint IAU/UNESCO Information Centre on Higher Education was formed, to the mutual benefit of both organizations. The Centre is connected to the UNESCO mainframe computer and benefits from various services and from close association with the UNESCO network of regional centres. In turn, the Information Centre serves as the focal point for information on higher education for UNESCO. This relationship means that IAU has in fact two information networks, one through an approximate six hundred member institutions spread across more than 100 countries, and the other through the established UNESCO regional networks.

At the same time, the Centre began to automate its own functions, thus creating a database for more efficient access to the references to the holdings of its library and also creating databases to support the publication of the reference works and the dissemination of the information in other formats. The implementation of the concept of an International Database on Higher Education became the first major new development to take place within the framework of the joint Centre.

3.2 The Partner Agencies

The initial participants in the network of partner agencies included the International
Association of Universities, the ERIC Clearinghouse on Higher Education, the UNESCO centres for higher education (CEPES in Bucharest and CRESALC in Caracas) and the International Bureau of Education.

The expansion of the network was foreseen in order to enhance the geographic coverage of the existing data. However, it was deemed most efficient to invite additional partners after the initial developmental and evaluation period had been completed. Nonetheless, the Association of Commonwealth Universities made its interest known during the past year, and was able to contribute sample data. Authorization was given by Unesco to select references from the main bibliographic database UNESBIB and the first version of the database also includes their data.

More recently, two other Unesco offices have expressed interest to participate in the bibliography: the International Institute for Educational Planning (IIEP) in Paris and the Unesco Principal Regional Office for Asia and the Pacific (PROAP) in Bangkok.

Contact has been established with interested parties in Canada and with OECD and there is a strong interest in the latter organization in becoming a partner. The EURYDICE programme of the European Community has also been informed of the development of the database.

When the final database format and ongoing organizational structure of the network has been agreed upon, systematic contacts will be made with appropriate organizations to continue the expansion of the network to form a truly international network.

4. Development to Date

Following the agreement of the various partner agencies to develop an international bibliographic database, the following activities were undertaken:

* a database format, manual and list of descriptors were developed and forwarded to the participating agencies to support the selection of data and its integration into a standardized format;

* each of the two UNESCO regional centres, CEPES and CRESALC began work to establish a local network of institutions to submit and disseminate information;

* all regional centres and offices of UNESCO with information on higher education were informed of the development of the International Bibliographic Database and invited to consider participation;

* data was submitted by each participating agency;

* the results of the conversion programmes were assessed and modifications suggested;

* the references submitted by each agency were reviewed and refinements
made;

* the database was reviewed to eliminate duplicate references and to reformat some information;

* the database was tested by producing a bibliography on the subject of the IAU Mid-Term Conference and a copy was forwarded to each member of the network of organizations as an example of the potential output of the database in its current state;

* a user friendly search interface (EYRISKO) was identified and work undertaken to adapt it to the needs of the potential users of the database who might not be familiar with the CDS/ISIS software;

* the database together with the EYRISKO interface was distributed on diskette to the partner organizations for evaluation;

* a questionnaire was forwarded to the partner organizations to guide and standardize the evaluation process to provide feedback to the coordinating agency as input for refinement and development.

* Following replies and comments received from partner organizations, an assessment of the EYRISKO search software and the indexing structure of the International Bibliographic Database on Higher Education has been written. This report includes a General Overview, in which the main points regarding the functionality of the search software, and the indexing structure, are presented. The report then continues with an index by index review of the database. Included in this section are recommendations regarding word versus phrase indexing, index contents, the elimination of some indexes and the inclusion of others, and the impact the search software has on the functionality of the indexing.

5. Further Development of the Database

5.1 Expansion of the Network

At the present time, the database represents a selection from the collective holdings on higher education of IAU, UNESCO, ERIC and ACU. Initial discussions with a potential Canadian partner, OECD and the European Community programme, EURYDICE, have also been positive. There is clearly the potential to increase the number of partners and the range of data collection. While this would have the beneficial effect of expanding the geographic coverage and completeness of the references, it would also entail a greater resource requirement within the coordinating agency than is presently available.

5.2 Increased Access

The basic objective of the formation of the network and the International
Bibliographic Database on Higher Education is to increase access to information on higher education for planning, policy development and analysis. The creation of the network, as an organizational principle, has the advantage of sharing the labour associated with data collection, selection and dissemination. However, from the perspective of the coordinating agency, increased demand upon the resources of the IAU/UNESCO Information Centre on Higher Education will surely be an indication of the success of the endeavour. This eventuality should be foreseen and planned for, in order to avoid inadequate support for the strengthened clearinghouse function and information service capability of the Centre.

5.3 Distribution of the Database and Potential Products

The initial product of the integrated database has been a demonstration copy of the database on diskette (containing 5000 entries) which in the Spring of 1993 has been forwarded to all partner organizations for evaluation. A copy has been sent to OECD for the purpose of assessing potential participation and to IIEP in Paris and PROAP in Bangkok, who are motivated to join the network. Copies should also be sent to all other UNESCO regional centres to encourage participation.

The eventual regular distribution of the database on diskette leaves the responsibility of provision of access and distribution of the information up to the partner agencies.

A next logical step in increasing distribution could be making the database available on-line. ERIC is already available through several database vendors such as DIALOG and BRS. Access through Internet is also envisaged.

However, electronic access, whether on diskette or on-line, will not meet the needs of all users. Therefore, a print product should be considered, once the database content and maintenance has been satisfactorily regularized. A print product could be produced by the coordinating agency in collaboration with a publisher. Before proceeding to the production of printed output from the database, an analysis of the potential market and the projected costs of publication will need to be assessed.

The preparation of bibliographies is another potential output of the database. They could be prepared as regular publications, as a series of subject based documents, or upon demand. Any member of the network would be capable of producing bibliographies in any of the formats mentioned. Coordination will be needed to ensure that there is no overlap.

6. Issues for Consideration

6.1 Reflections on the Organizational Model

The current organizational model is essentially based upon the original agreement between IAU and the ERIC Clearinghouse on Higher Education. The intention was to create a database of references which would inform inquiry and analysis at the international level by adding relevant selections from the ERIC database on higher education to those from the IAU/UNESCO Information Centre. Participation was
broadened to include the UNESCO Centres on higher education, CEPES and CRESALC, the International Bureau of Education (IBE), the Association of Commonwealth Universities (ACU) and the Unesco main bibliographic database UNESBIB.

This arrangement combines one national, and a number of international organizations. The former organization charges the users for the products of its database. The latter organizations make their information available largely free of charge, respecting their service function.

The original objective was the formation of a network, whereby the data which was deemed to be of interest to an international audience would be submitted by each organization for the formation of an "integrated bibliographic database". The identification and manipulation of the appropriate references was expected to be a marginal additional activity to the normal activities of each organization, and therefore, an efficient manner of making information on higher education available worldwide.

The original output envisioned was a publication, the "International Bibliography on Higher Education" and a potential publisher, Oryx Press, had expressed interest, given its responsibility for the ERIC publications.

Given the unevenness shown by an early analysis of the input from the various partner agencies, it was recommended and agreed that the initial output should be a copy of the database, on diskette. It was proposed and agreed that a demonstration database be made available to each participating agency and to a selected group of other agencies for the purpose of promoting active participation and evaluation.

At this stage in the development of the network, it is appropriate to review the understanding and expectations of each agency, and whether it would be desirable to have a more formal agreement in place before distributing the integrated database for full use by the partner organizations. Such an agreement should also reflect the needs of the regional networks formed by CEPES and CRESALC for the purpose of selecting and disseminating data compiled in the international database.

Therefore, it would appear to be timely to reiterate the original understanding of the terms of the informal agreement subsequent to the release of the demonstration database, in anticipation of more widespread and regular distribution of the database, and other eventual products.

6.2 Contractual and Copyright Considerations

The contractual and copyright terms of the network of organizations participating in the development, maintenance and dissemination of the International Bibliographic Database on Higher Education should be formally stated to clarify for each partner its rights and responsibilities.

At the present time, there exists an informal agreement among the primary partners
that, in return for the selection and submission of the appropriate references, each receive a copy of the integrated database containing all the submissions from all partners.

Some more formal agreements exist between CEPES and its network. These have been developed and put in place by CEPES, independently of the other partners.

6.3 Selection Procedures and Criteria

The International Bibliographic Database on Higher Education is intended to inform the reflection on, and the analysis of, issues in higher education in an international context. It differs from the databases of its partner agencies and other major databases on higher education in that its contents have been selected as significant references for this specific purpose. This means that those consulting the database will expect that clear criteria have been applied by knowledgeable professionals to ensure that the most important documents, and only those, have been included.

It is intended to be a tool for a broad range of organizations, agencies, institutions and individuals seeking information on the important issues and concerns relating to higher education.

As such, the major value of the International Bibliographic Database on Higher Education to those consulting it relates to its comprehensiveness in terms of worldwide coverage, and its selectivity in terms of the focus of the content.

The present organization of the network of agencies participating in the database development gives the responsibility for the selection of the most appropriate references for the database to the coordinating centre. This is efficient in the developmental stage, but may be undertaken by each partner when the selection criteria have been discussed and very clearly defined.

7. Resource Considerations

7.1 Maintenance of the International Bibliographic Database

IAU has a small secretariat which is supported through membership fees along with a modest annual subvention, space and access to computer facilities and expertise from UNESCO. The organization has capable staff in the Information Centre, but does not have the staff complement with which to continue supporting the remaining developmental activities, at the current rate.

Exploratory efforts have been made to assess the feasibility of obtaining additional short term funding to ensure continuing development and it is essential that these efforts be continued.

7.1.1 Database management

The following activities are involved in the management of the database and are
undertaken by the coordinating agency:

* data entry
* on-going revision of the database format and data entry manual
* on-going refinement of the descriptor list
  * translation problem resolution
  * conversion problem resolution
  * thesaurus updating

7.1.2 Data conversion problems resolution

There continue to be a number of data conversion problems, for example, with ISIS, and with other software programmes used by ERIC and the Association of Commonwealth Universities.

7.1.3 Selection process

The selection process entails the following activities:

* selection of appropriate references
* refinement of the selection criteria
* on-going contact with participating agencies

7.1.4 Database distribution

Distribution of the database includes the following responsibilities:

* on-going testing and revision of interface software
* on-going refinement of search interface and preparation and revision of user manual
* identification of appropriate distribution list
* copyright, access and costing considerations

7.1.5 Training

Some training activities may be necessary as the number of partners is expanded.

7.1.6 Contact with the participating agencies

There will be ongoing contact with the partner organizations in the course of the
regular operation of the International Bibliographic Database and for any problem resolution. This responsibility will lie with the coordinating agency.

7.1.7 Evaluation process

Ongoing evaluation of the administrative and technical tasks associated with the operation of the database, the products and the communication within the network of participating agencies is essential to ensure that the network operates most efficiently.

7.2 Expansion of the Network of Participating Agencies

The expansion of the network will involve the following steps:

* identification of potential partners
* establishment of a priority ranking of potential partner agencies

Once the priorities have been established for adding new partners, the following tasks will be undertaken for each partner:

* review the database structure and interface software
* if necessary, determine a conversion strategy
* evaluate the conversion process on a set of sample records, and give feedback to the partner agency
* assess the scope of the collection of the partner agency
* determine a selection strategy
* load the data selected into the Integrated Database
* analyze the scope and coverage of the references selected and give feedback to the partner agency
* refine the selection procedures
* finalize the operational processes and details specific to the partner agency
* incorporate the partner agency into the regular functioning of the network
PROSPECTUS

"International ERIC"

International ERIC is a family of three national English-language educational research databases:

- Australian Education Index (AEI)
- British Education Index (BEI)
- Canadian Education Index (CEI)

International ERIC is a cooperative enterprise without a formal organization behind it. The individual members of the group have banded together around these objectives:

- to rationalize the coverage of international educational research literature
- to promote better exchange of information
- to build compatible retrieval tools, indexes, and thesauri
- to stretch resources by eliminating duplication

In Fall 1993, the first International ERIC service will be released by Dialog Information Services in the form of International ERIC OnDisc: a CD ROM product containing databases of the three participants. Although each database is presented separately on the CD, International ERIC OnDisc will serve as a unifying force for the three database producers participating in the venture. It will also provide users of the three files with unprecedented ease of access to comparative literature in fields of interest.

Throughout its formative stages, the International ERIC project has received the active support and cooperation of ERIC, the U.S. national information system in education. As the project gains momentum, it is anticipated that closer cooperation will develop among the four sponsors towards better realization of the objectives above. It is the group's intention to develop cooperative processing standards, unified authority lists (including subject indexing vocabularies), and rules for eliminating unnecessary duplication.

AUSTRALIAN EDUCATION INDEX*

In Australia, the literature of education is covered by the Australian Education Index (AEI) and the Bibliography of Education Theses in Australia (BETA), both prepared by the Australian Council for Educational Research (ACER).

In addition to its own coverage, AEI benefits from regular input from the National Technical and Further Education (TAFE) Clearinghouse and from the Australian Clearinghouse for Library and Information Science (ACHLIS). TAFE state representatives forward bibliographic entries to the TAFE Clearinghouse for inclusion in Initiatives in Technical and Further Education and also in printed and database versions of AEI. ACHLIS publishes Australian Library and Information Science Abstracts (ALISA) annually. The ALISA records are included in the printed AEI (without abstracts) and in the AEI database (with abstracts).

Australian Education Index

AEI covers both published and unpublished forms of literature: journal articles, books, monographs, research and technical reports, conference papers and proceedings, curriculum materials, tests, newspaper articles, legislation, etc. AEI aims at comprehensive coverage of the education-related literature originating in Australia and also that by Australian authors or about Australian education published in overseas sources. All levels of education are covered.

AEI has been published in printed form regularly since 1957, but has been produced as a machine-readable database only since 1979. The printed AEI is published quarterly with an annual cumulation. Approximately 350 Australian journals are regularly covered by AEI and another 500 overseas journals are scanned for Australian content. AEI increases annually by about 4500 records, 50% of which are for journal articles. About 400 of these records are contributed annually by BETA. All records are indexed using the Australian Thesaurus of Education Descriptors. For the period 1979 through 1991, the total AEI database contains approximately 50,000 records.

AEI is available online through the Australian Information Network (AUSINET), operated by ACI Computer Services, Inc., using the TYMNET or TELENET communication networks. AEI is also available on AUSTROM, a CD-ROM retrieval system containing thirteen social science, law, and education databases.

Bibliography of Education Theses in Australia (BETA)

BETA is an annual publication of theses in education accepted for higher degrees at Australian universities and colleges. Descriptions include author, title, higher degree, awarding institution, subject index terms, and author's abstract. BETA contributes approximately 400 records a year to the AEI database.

Document Delivery. There is no centralized document delivery. All document entries in AEI state the availability of the document. In addition, the indexing institutions (i.e., the ACER, TAFE, and ACHLIS libraries) hold copies that can be made available.

BRITISH EDUCATION INDEX *

In the U.K., the periodical literature of education is covered by the British Education Index (BEI) and the thesis literature is covered by the British Education Theses Index (BETI). There is a modest education-related document literature that is not currently covered systematically, but that may in the future be added to BEI coverage. The education-related book literature is covered (along with all the other national book literature) by the British National Bibliography (BNB).

British Education Index (BEI)

The BEI was established in 1954 by the Librarians of Institutes and Schools of Education (LISE). In 1972, it moved to the British Library/British National Bibliography. In 1985, it transferred to Leeds University. Coverage extends to approximately 300 British, and a number of major European, English-language journals. It aims at comprehensive coverage of the education-related periodical literature originating in the U.K. and about the U.K. Approximately 4000 records concerning British education are added annually.

The records contain author, title, journal citation, and index terms (from the British Education Thesaurus (BET)), but no annotation/abstract.

BEI is printed and published in the form of three quarterly parts a year, each containing over 1000 references, with a final fourth cumulative issue combining all records for the year and forming a permanent annual index volume.

Through March 1992, the machine-readable version of the BEI contains 57,902 records (some never appearing in the printed BEI) extending from 1976 onwards. This file was first made available online in 1976 via the British Library Automated Information Service (BLAIS), but after the transfer to Leeds in 1985 was eventually shifted to DIALOG Information Services where it became publicly available online on a worldwide basis as File 121 in August 1988.

British Education Theses Index (BETI)

BETI is a subject and author index to theses since 1950 on all aspects of education, which have been listed in Aslib's Index to Theses Accepted for Higher Degrees by the Universities of Great Britain and Ireland and the Council for National Academic Awards. It is produced by the Librarians of Institutes and Schools of Education (LISE).

BETI is published annually only in microfiche form. It is also available online (along with BEI) via DIALOG's File 121.

Document Delivery. Neither BEI nor BETI maintain a document delivery service. This is largely because of the comprehensive national service available from the British Library Document Supply Centre and the ready availability of theses in the U.K. via regular interlibrary loan procedures.

CANADIAN EDUCATION INDEX

The Canadian Education Index (CEI) was first published in 1965 by the Canadian Council for Research in Education. The Canadian Education Association took over production of CEI in 1973. In 1988, Micromedia Limited, a commercial publisher of reference works, acquired the CEI from the Association. At that time the Directory of Education Studies in Canada was absorbed into the CEI.

Canadian Education Index covers journal articles, government and research reports, monographs, provincial curriculum guides and graduate dissertations in education. Approximately 200 Canadian education journals (English and French-language) are covered. The complete database contains approximately 31,000 monograph records and 69,000 journal articles, with a current growth rate of about 5,000 records per year.

Canadian Education Index is published three times per year; two paperbound issues are combined with new material in an annual clothbound cumulation. Beginning in 1994, CEI will be published 4 times per

year. Abstracts are provided for all research reports and selectively for theses. Journal articles are not presently abstracted.

The *Canadian Education Index* file on International ERIC OnDisc also contains, as a subset, the ONTERIS database, which originated in 1972 with the Ontario Ministry of Education, and is now produced through the Ontario Institute for Studies in Education (OISE). ONTERIS covers research reports and curriculum documents originating from sources in the Province of Ontario, including governments, research organizations, and school boards. The ONTERIS backfile contains approximately 14,000 records, and the database is growing at a rate of about 700 records per year.

**Document Delivery.** Most reports and monographs in *Canadian Education Index* (including many in ONTERIS) are available on microfiche through a subscription service available from Micromedia; alternatively, individual items may be ordered on demand in fiche or paper form via Micromedia's Document Delivery Service. Theses may also be ordered by ISBN number from Micromedia's Document Delivery Service. Backfile copies of most of the 200 journals indexed in *Canadian Education Index* are available in microform from Micromedia; individual article copies are also available.

**Finding Aid.** The *Canadian Education Thesaurus* is a bilingual controlled vocabulary developed by the Canadian Council of Ministers in Education for the indexing of French or English-language material in education. Approximately 4500 descriptors are provided.

**Curriculum Guides.** Micromedia Limited also publishes an annual collection on microfiche of provincial curriculum guides and courses of study. The microfiche collection is accompanied by a hardcopy Index.
March 1, 1993

Mr. Ted Brandhorst  
ERIC Processing & Reference Facility  
1301 Piccard Dr.  
Suite 300  
Rockville, MD  20850-4305

Dear Ted:

I am happy to tell you of the just-announced acquisition of the Data-Star service by Knight-Ridder, Inc., Dialog's parent company. The enclosed press information was released today from Miami and European locations.

This is an extremely exciting development for both Dialog and Data-Star, and we are looking forward to working together to build European and worldwide markets and increase revenues for your database.

Dialog and Data-Star will continue to operate as two separate services with separate computer operations for the foreseeable future. The areas where you will see change are sales and marketing, where we intend to merge the Dialog and Data-Star staffs together to benefit all of us.

I anticipate that you will have many questions about how this acquisition will affect you. The enclosed Question and Answer list should answer many of these, and I will be available to respond to any other questions you may have. Please don't hesitate to contact me.

Sincerely,

[Signature]

Eireann M. Carroll  
Account Manager

Enclosure
MIAMI, March 1, 1993 - Knight-Ridder, Inc., the U.S. newspaper and information services company, today announced the acquisition of Data-Star, Europe's leading online information service.

The Data-Star business, based in Bern, Switzerland, was purchased from Motor-Columbus, the Swiss engineering technology firm.

Knight-Ridder owns Dialog Information Services, Inc., a U.S. based leading online information services company. Knight-Ridder will build on the individual strengths of the two companies with Dialog and Data-Star operating jointly in the service and sales areas. The combined services will contain a comprehensive range of business and scientific databases. The combination of Dialog and Data-Star will provide customers access to a global information services company.

Dialog and Data-Star have been recognized as pioneering and award-winning online information services, innovative, responsive and vital to the flow of information in major organizations and libraries everywhere in the world. Data-Star offers access to 250 medical, business, pharmaceutical and European directory databases. Data-Star has customers not only in Europe, but also in the United States and Japan.

Heinz Ochsner, Director of Data-Star, stated, "With the combined technical, marketing and support experience of the two most progressive online services, we intend to set new high standards for the online industry and to give better value than ever before."

Pat Tierney, CEO of Dialog, stated, "We are especially pleased that Data-Star's staff and management will remain with the organization, working with Dialog to maintain continuity and expand the European market. Most importantly, we will increase substantially our ability to provide strong support for our customers, particularly in Europe as well as throughout the world. By joining our R&D efforts we will be able to better respond to the rapidly changing information services needs of our customers."

Knight-Ridder is an international communications company engaged in newspaper publishing, business news and information services, electronic retrieval services, news, graphics and photo services, cable television and newsprint manufacturing. The company publishes 29 daily newspapers in the United States. Around the world, news, advertising and information from Knight-Ridder reach more than 100 million people. Knight-Ridder stock trades on New York Stock Exchange, the Tokyo Stock Exchange and the Frankfurt Stock Exchange.
Dialog Information Services is the acknowledged world leader in electronic information access and delivery. The DIALOG* service contains more than 400 databases, primarily in the business, news, scientific and technical areas, used by customers in more than 90 countries. The DIALOG OnDisc collection of databases on CDROM consists of more than 40 titles specializing in business, science and technology.

For more information, contact Data-Star's Director, Rolando Henrich, at 41-31-50 95 11; Dialog's Vice President, Worldwide Sales & Service, Richard P. Ream, at 44-71-5220042; Dialog's Senior Director, Worldwide Marketing, Narendra Rana, at (415) 858-3816; or Knight-Ridder's Vice President, Corporate Relations and Planning, Frank N. Hawkins, Jr., at (305) 376-3828.

*DIALOG is a service mark and DIALOG OnDisc is a trademark, of Dialog Information Services, Inc., Registered U.S. Patent & Trademark Office. Dialog Information Services, Inc. is a Knight-Ridder company.
Questions and Answers for Dialog Information Providers

Q1: What are the benefits for Information Providers?
A: With the combined technical, sales and support experience, we intend to grow the market. This should lead to higher royalty income for you. Also, we will be looking forward to working even closer with you on new projects and opportunities.

Q2: Why did Knight-Ridder buy Data-Star?
A: To improve its international position, and better serve all customers.

Q3: Why did Motor-Columbus sell Data-Star?
A: You will have to address specific questions to the seller, but generally Data-Star was not a strategic fit with the rest of their business.

Q4: Is this a stock transfer or asset purchase deal? Does this affect the continuity of existing customer contracts and Information Provider agreements?
A: Knight-Ridder is acquiring the equity of the Radio Schweiz AG (RadioSuisse), whose principal business is Data-Star. It is the intention of Dialog to continue to operate Data-Star and to fulfill mutually agreed contractual terms.

Q5: Will details of the acquisition be available?
A: The details of this deal are considered confidential and there will be no public disclosure on this. The transaction will not have a material effect on the results of KRI's consolidated operations.

Q6: What are the anti-trust implications of the deal, especially in Europe?
A: We don't see any antitrust problems. The choices available to customers for information services are expanding all the time. The coming together of Dialog and Data-Star will benefit customers and will not have any significant impact on customer choices.
Q7: What will change for an Information Provider?
A: There will be no change in 1993. Royalties will come as before from two sources, updates need to be sent to two places as before, and training and documentation will remain unchanged. In other words, the two services will continue to operate independently. All mutually agreed contractual terms will be honored.

Q8: Will databases be eliminated from either service?
A: Although the two operations will work together to identify possibilities for eliminating some areas of redundancy, the primary objectives are to consolidate the strengths of both services and to provide information access and delivery in ways which best suit each customer's needs. The introduction of a two-way gateway between the two services will be a high priority.

Q9: Do Dialog customers automatically become Data-Star customers? How about the reverse?
A: Since the services operate separately, initially customers will contract for either one just as they have in the past. Our intention will be to develop a joint contract over time.

Q10: Will computer operations be consolidated at one location?
A: No, computer operations will be separate in Bern and Palo Alto.

Q11: Will the search languages change?
A: The two search systems will be run separately for the foreseeable future. We will continue to focus on investments in new technology and monitor customer demand. There will be a move to integrate the two systems over time.

Q12: How will this be different from the BRS/Orbit acquisition by Maxwell?
A: The situations are very different. The current Data-Star facility will form the core of our European operations, which will focus on meeting the needs of European information users. The features and database content of both systems will continue to be developed with the objective of enhancing our leading position in the European marketplace. Combining European Sales, Marketing and Customer Service will result in a real gain in resources available for serving both Dialog and Data-Star customers in Europe and worldwide.
Q13: Will there be a change of name in any of the countries where both companies operate today?

A: We expect that the Dialog and Data-Star names will continue to be used. We believe that both names are valuable.

Q14: What will the new management structure be?

A: Dialog and Data-Star are both part of KRI's Electronic Publishing Group, reporting to Pat Tierney, who is also CEO of Dialog. Heinz Ochsner and Rolando Henrich will continue in their current management roles at Data-Star, reporting to Martin Buerger, who has taken the new role of Vice President, European Operations, reporting to Pat Tierney. The European Sales and Services organization will be combined under Stuart Urwin, Managing Director, European Sales and Service, reporting to Richard Ream, Vice President, Worldwide Sales and Service. Peter Martin will assist in the transition for a period of time, before assuming new responsibilities in Dialog's headquarters.

Q15: What is happening to D-S Marketing?

A: This business is also being acquired concurrently with the Data-Star transaction.

Q16: What will you do about duplicate facilities and personnel?

A: Both Dialog and Data-Star have historically been leanly staffed organizations. We plan to assign system development personnel from both organizations to accelerate the development of new technology platforms and information delivery systems that can benefit both operations. We will also look for ways to consolidate administrative support such as production, fulfillment and storage of publications for distribution in Europe, payroll administration for European employees, etc.

Q17: Will my contact in Database Development change?

A: There is no change in your contact for the next six months. Dialog Information Providers should continue to use their existing contacts at Palo Alto and Data-Star Providers should continue to use their Data-Star contact in Europe. Any changes to this procedure will be sent to you in writing.
KNOWLEDGE INDEX® Moves to CompuServe®

Strategic alliance between Dialog and CompuServe

As part of the recently announced strategic alliance between Dialog Information Services, Inc. and CompuServe Incorporated, we are pleased to announce that KNOWLEDGE INDEX. Dialog's reduced price, after-hours service, will be accessible worldwide (except for Korea) exclusively through the CompuServe Information Service, starting April 1, 1993. Dialog will maintain the databases and system operations for the service, while marketing, customer support, and administration will be conducted by CompuServe. Dialog sees this alliance as a very positive step in making a broad scope of services available to the current KNOWLEDGE INDEX customer base.

KNOWLEDGE INDEX users will benefit greatly from accessing the service through the CompuServe Information Service because they will have many new service options and enhancements available with continued professional customer assistance. They will enjoy the best of two worlds; continued access to KNOWLEDGE INDEX and additional options that the CompuServe Information Service has to offer.

Beginning on April 1, 1993, the KNOWLEDGE INDEX service will only be accessible through logging on to the CompuServe Information Service. The Terms and Conditions of the KNOWLEDGE INDEX databases will remain the same. With the exception of some minor changes, the commands, menus, databases, and other features on KNOWLEDGE INDEX are unchanged. KNOWLEDGE INDEX via the CompuServe Information Service will continue to provide to home users worldwide information through an easy-to-use menu and command search system.

DIALOG CHRONOLOG • MARCH 1993
KNOWLEDGE INDEX Moves to CompuServe

For immediate release

Oxford, 15 February 1993, DIALOG Information Services, Inc. is pleased to announce a strategic partnership between DIALOG and CompuServe Inc. This new alliance includes a transfer of the KNOWLEDGE INDEX service to the CompuServe Information Service, effective 1 April 1993. CompuServe will provide customer support for KNOWLEDGE INDEX while DIALOG will continue to provide technical maintenance. In Europe, customer support will be provided by the Bristol office of CompuServe.

The KNOWLEDGE INDEX service began in 1982 providing a few popular DIALOG databases using a simplified command language. This service enables home users such as engineers, doctors, journalists, small business owners and students to access a broad range of information at a reduced rate on evenings and weekends. Over the past decade, the service has grown to include 100 databases and a Menu version, in addition to the easy Command version. KNOWLEDGE INDEX has become a prime source of information for professionals who need to conduct their own research.

As part of the CompuServe Information Service, KNOWLEDGE INDEX will continue to provide reduced price after-hours access to some of the most popular DIALOG databases. In addition existing KNOWLEDGE INDEX users will have access to CompuServe's more than 1700 services.

"We're delighted that through this alliance with CompuServe, our current KNOWLEDGE INDEX users will have access to the many valuable services on CompuServe, while maintaining easy access to KNOWLEDGE INDEX", says Donna Holloway, DIALOG's Programme Manager for KNOWLEDGE INDEX. "In addition, we're pleased that this will allow easy access to those CompuServe members who, in the past, have not had an opportunity to explore and discover the benefits of KNOWLEDGE INDEX".
Established in 1979, the Compuserve Information Service* provides its worldwide membership of 1.1 million with more than 1700 databases and services to meet both business and personal interests. CompuServe can be accessed by any modem-equipped personal computer using the CompuServe Information Manager interface or any general communications software.

In addition to the Compuserve Information Service, CompuServe Inc. provides frame relay, wide and local area networking services, business information services, and software to major corporations and government agencies worldwide. CompuServe is an H&R Block Company.

DIALOG Information Services is the acknowledged world leader in electronic information access and delivery. The DIALOG service offers access to over 400 online databases primarily in the business, scientific and technical areas, and produces the DIALOG OnDisc range of over 50 CD-ROM products. The DIALOG Information Service is used by more than 140 000 customers in approximately 100 countries.

DIALOG is the servicemark of DIALOG Information Services, Inc., Registered US Patent & Trademark Office. DIALOG Information Services Inc. is a Knight-Ridder company.

-Ends-

For more information on the above, please contact Mike Sullivan at DIALOG Europe, PO Box 188, Oxford, OX1 5AX UK or call +44 (0)865 326226.

*CompuServe is a registered trademark of CompuServe Inc., an H&R Block Company.
Dear Ted,

I am sorry to do this to you again, but the telephone company has finally installed my telephone lines as they should be. As a result, my new telephone is (303) 646-0385. This was the original number that I gave you, but the telephone company was not able to provide the additional lines that were required when I moved. Everything is working as it should be, and there will be no change for quite some time. I apologize for any inconvenience, but I will be more available with the dedicated line for voice/fax, whereas, I have had to share this with a dedicated modem over the past few weeks.

Please make note of the new address and telephone:
Brian Allen, Database Manager
36054 Winchester Road
Elizabeth, Colorado 80107
Telephone: (303) 646-0385
Fax: (303) 646-0385

Best regards

Brian A. Allen

SilverPlatter to Discontinue Supplying Network Hardware
Third Party Vendors to Supply Hardware

Norwood, MA — SilverPlatter Information has announced that it will cease supplying
the hardware required for CD-ROM networking systems. Effective immediately, SilverPlatter
will turn the business of selling and servicing network hardware over to third party hardware
vendors. SilverPlatter will continue to develop and improve its networking software, and to
provide software products which improve connectivity and hard disk delivery. The decision
will allow more resources for these developments, as well as an increased focus on providing
customers with excellent information products and retrieval software.

In recent years, networking technology has become more readily available and
most computer environments are already — or will soon be — running on a network. This in-
creased popularity of networking has resulted in a higher level of support and maintenance
being provided to networking customers by local hardware companies. Because of the extensive
amount of resources needed to provide such high levels of service, SilverPlatter has decided to
remove itself from the hardware business, and to concentrate its resources on software and
database development.

This decision will also allow networking customers to take advantage of lower
costs offered by larger hardware vendors. Most third party vendors also have experience with a
variety of hardware components, so customers can be sure that the hardware they buy will
integrate well with their current hardware. Third party vendors can also help customers config-
ure their system for price or for performance, depending on their needs.

(More)
According to Ron Rietdyk, Executive Vice President of Sales and Marketing at SilverPlatter, "The decision to disband SilverPlatter's networking hardware products enables us to focus on our core business of supplying customers with excellent information products and retrieval software. Our choice to focus development efforts on these areas, and to leave the business of hardware to local suppliers, will give customers quality networking products and the best information available. Ultimately, this decision will result in significant benefits to the customer."

SilverPlatter will continue to recommend optimal equipment configurations for its software. The HD-1000, CD-1000, and ERL-1000 are current model configurations which will continue to be designed and certified by SilverPlatter. For customers who would like assistance in buying hardware, SilverPlatter can recommend authorized third party vendors who meet the standards set by SilverPlatter.

Current customers will continue to receive full service and technical support for the duration of their contracts. When their contract expires, those customers will have the option of renewing their service contract with a third party vendor. Customers who have any questions can contact their Network Account Executive at 1-800-343-0064.

As one of the first providers of information on CD-ROM, SilverPlatter has a distinguished reputation for providing quality CD-ROM products, innovative technology, and excellent service its customers. With over 100 titles available on compact disc, SilverPlatter remains the leader in bringing people and information together.

Full-Text Digest Records Added to ERIC on SilverPlatter

Arlington, VA — SilverPlatter Information has announced the addition of the full text of more than 1,000 ERIC Digests to its CD-ROM version of the ERIC database. The new records are available at no extra charge to subscribers of the ERIC database on SilverPlatter.

ERIC Digests are one- to two-page documents targeted specifically at teachers, administrators, and other practitioners. They are designed to provide an overview of information on a given topic, and to provide references to items with more detailed information. The digest records were previously contained in the database, but without the full text of the actual documents.

ERIC (the Educational Resources Information Center) on SilverPlatter abstracts and indexes the literature of education. Its focus is the English-language literature, though selected foreign-language articles are processed. Sponsored by the U.S. Department of Education, ERIC blends two files: Resources in Education (RIE), covering the document literature, and Current Index to Journals in Education (CIJE), covering the published journal literature from over 775 periodicals.

Documents covered in ERIC include research and technical reports, conference presentations, instructional and curriculum materials, project and program descriptions, dissertations and more. One of the most widely searched databases in the world, the ERIC database on SilverPlatter contains more than 775,000 records on two compact discs.

As one of the first providers of information on compact disc, SilverPlatter has earned a reputation for high-quality electronic information products and services. With its collection of more than 150 CD-ROM titles, SilverPlatter remains the leader in bringing people and information together.

###
SilverPlatter is pleased to announce the addition of ERIC Digest records to the current ERIC disc (SP-002-036). The coverage period for these records is 1984 - present.

ERIC Digest records are full text records published by the ERIC Clearinghouses pertaining to topics of current interest in education. They are targeted specifically for teachers, administrators, policy makers and other practitioners of the educational community. Each Digest record is comprised of an ED record and an appended text field. A search can be limited to ERIC Digest records as follows:

073 in DTN or
ERIC-Digests in ID

The on screen guides contain details and further instructions for searching ERIC Digest records.

If you have any questions, please contact your local distributor or the appropriate support department listed below.

NEW ACCESS POINT TO MILLIONS OF SCIENTIFIC, MEDICAL AND TECHNICAL
RECORDS NOW AVAILABLE ON THE INTERNET

McLean, Virginia -- Maxwell Online announces that more than 200
databases available on its ORBIT and BRS online search services
can now be accessed via the Internet.

The Internet is an international "network of computer
networks" that is used extensively by colleges, universities,
research facilities, and commercial organizations for the rapid
and open exchange of information. ORBIT and BRS search services'
availability on the Internet is managed by Advanced Network and
Services Inc. (ANS) headquartered in Elmsford, NY.

Subscribers to ORBIT Search Service, BRS Search Service or
BRS Colleague can connect to their respective hosts over the
Internet using Internet's "telnet" remote login application and
the appropriate ORBIT or BRS address, ("telnet ORBIT.COM", or
"telnet BRS.COM", respectively). Telecommunications charges,
which are $6 per hour for either service, will appear on monthly
ORBIT and BRS invoices.

ORBIT Search Service and BRS Search Service are world
leading suppliers of online scientific, medical and technical
information. Information available on ORBIT is intended for the
professional in search of comprehensive and current patent,
chemical, and technical information. Its databases include World

Maxwell Online, Inc. 8000 Westpark Drive, McLean, Virginia 22102  Tel: (703) 442-0900  Fax: (703) 893-4632
BRS files provide the latest medical, pharmaceutical, and life sciences information for health sciences professionals working around the world. Its databases include MEDLINE®, BIOSIS, EMBASE, and Comprehensive Core Medical Library.

For subscription information about ORBIT or BRS search services, call (800) 955-0906, or send Internet electronic mail to INFO@CS.ORBIT.COM or INFO@CS.BRS.COM. Organizations desiring access to the Internet should contact ANS at (800) 456-8267.

###
NOTES from Technical Services:

Dear EBSCO ERIC User:

Welcome to the innovative CD-ROM world of EBSCO Publishing. With the enclosed disc, you will soon be enjoying the most sophisticated and practical information available in this technology. If you subscribe to the full ERIC file you will have received Discs #1 and #2, if you subscribe to the current file only, you will have received Disc #1.

Installation of this disc is easy, provided you follow these simple directions!

1. Microsoft Extensions, version 2.1 or greater, must be installed before installing this CD-ROM disc. If you are using EBSCO's workstation, Extensions has already been installed. DO NOT REINSTALL! If you purchased your computer elsewhere, please be sure that Microsoft Extensions has been installed once.

2. Turn on your computer. Type: CD\ and press the [ENTER] key. This accesses the root directory of the hard disk. If you get the same prompt, you are already there.

3. Insert the ERIC CD-ROM disc in the player. If you ordered the full ERIC file, and you have only one CD-ROM player, then insert Disc #1 in the player. EBSCO workstations and some other CD-ROM players require the use of a cartridge disc holder. Place the disc in the cartridge and insert it into the player.

4. Your ERIC software must be installed before you use it. To install ERIC, type: D:\INSTALL ERIC and press the [ENTER] key. (*D* represents your CD-ROM drive letter in the installation command) NOTE: Most EBSCO workstations use "D" as the drive letter where you have placed Disc #1. *D* and *E* are the most common drive letters assigned to the CD-ROM player by the Microsoft Extensions program. Substitute your drive letter if different.

5. You will be prompted to answer several questions during the installation process. When the Installation is complete, the following message will appear: "Successfully completed installation of ERIC." If you are networking and need networking directions, please contact Technical Support.

In order to serve you better, we have invested in a new phone system. We have a separate phone number for Technical Support, 1-800-758-5995. Our Customer Service and Sales staff telephone number remains 1-800-653-2726. Your call is very important to us.

We look forward to assisting you and making your CD-ROM experience a pleasant one. Help is available from our Technical Support Department at our toll-free line (800-758-5995) from 9 a.m. to 7:00 p.m. Eastern Time, Monday through Friday or FAX our Technical Support Department at 508-535-8523.

Sincerely,

Jennifer O'Malley
Technical Support Manager
Your electronic key to a wealth of educational resources

Your electronic key to a wealth of educational resources. EBSCO Publishing is proud to offer ERIC®EBSCO CD-ROM, the database of the Educational Resources Information Center of the U.S. Department of Education. ERIC® contains citation and abstract information from over 750 educational periodicals and related documents. EBSO-CO® software provides immediate keyword access to information from journals included in the Current Index to Journals in Education and the Resources in Education Index along with educational symposium report literature dating back to 1967.

ERIC (1966 - Present) on CD-ROM 
with a direct subscription to any NISC DISC priced $595 or higher

ERIC on CD-ROM • 1966-Present. The complete ERIC database on CD-ROM - yours to keep - at no extra charge. The ERIC database, plus new documents announced in RIE and CJE, the ERIC Digest records, and the Thesaurus of ERIC Descriptors are all part of NISC’s new two-disc CD-ROM package. Whether you’re an experienced researcher or casual CD-ROM user, you’ll find NISC’s state-of-the-art software unrivalled in power and ease of use. No library should miss this opportunity to get the best ERIC CD-ROM absolutely free with another NISC DISC subscription. Install on any CD-ROM hardware platform • single user station, LAN, or WAN access free of charge! The Educational Resources Information Center (ERIC) database is the world’s largest collection of educational materials, spanning more than a quarter century of federally-supported education resource management. This database contains over 760,000 bibliographic records of documents and journal articles; approximately 8,000 records added with each quarterly update disc. NOTE: Update disc shipments based upon paid subscription update cycle.

Water Resources Abstracts • Volume I • 1967-Present. The entire 250,000 abstracts of the Selected Water Resources Abstracts database from the USGS on one disc. Advanced Data preparation and software features make this the disc of choice for the USGS and many others. *NISC has a descriptive and attractive introductory menu screen which Dialog and other publishers should adopt... Online help is excellent, with clear sample search examples. This product is also available from OCLC but their software interface is frustrating to use, has slow response time, is on two compact discs instead of one and not recommended.* - Jill Powell, Engineering Library Cornell University; *Beyond Compendex Plus: A Survey of Selected Core Engineering Compact Disc Databases,* CD-ROM Professional, Vol No.5; Sept, 1991. • Quarterly updates, $685.00/yr.

Water Resources Abstracts • Volume II • 1970-Present. This collection of major water databases from around the world delivers 165,000 abstracts of worldwide coverage on all major areas of water research. Canada’s AQUAREF file focuses on the resources of North America while DELFT HYDRO from the Netherlands emphasizes the engineering and construction aspects of water projects as well as hydraulic modelling and many experimental techniques. • Semi-annual updates, $395.00/yr. subscription.

Oceanographic & Marine Resources • Volume I • 1976-Present. Worldwide coverage drawn from major bibliographic databases on marine and oceanographic resources on one CD-ROM. This collection of over 330,000 records is comprised of four major databases from the United Kingdom which include Oceanographic Literature Review (OLR) - equivalent to the print versions of OLR and Deep-Sea Research, Part B, published by Pergamon Press, the Institute of Oceanographic Sciences Deacon Laboratory (IORS), Proudman Oceanographic Laboratory (POL), and the Plymouth Marine Laboratory (PML). Semi-annual updates, $970/yr.

Oceanographic & Marine Resources • Volume II • 1960-Present (full coverage), 1807-1959 (partial coverage). Over 165,000 bibliographic records provide more than 80 years of coverage. This NISC DISC is composed of the Sea Grants Abstracts from the National Sea Grant Depository, University of Rhode Island and the National Oceanic and Atmospheric Administration (NOAA). Topics include climatology, meteorology, engineering, law and policy, hydrographic surveying, marine resources, satellite applications, NOAA’s rare book collection, and more! • Semi-annual updates, $445/yr. subscription.

Fish & Fisheries Worldwide • 1971-Present. This CD-ROM covers the world’s literature on fisheries and fish related topics. Over 145,000 citations are drawn from several leading sources which include Fisheries Review from the U.S. Fish & Wildlife Service, the acclaimed FISHLIT database from the JLB Smith Institute of Ichthyology, FISH HEALTH NEWS abstracts, and AQUACULTURE. • Semi-annual updates, $695.00/yr. subscription.

NISC • A COMPANY IN THE PUBLIC INTEREST
Wildlife Worldwide • 1971-Present (full coverage), 1935-1970 (partial coverage). Over 320,000 citations provide more than 50 years of coverage on all aspects of wildlife. This NISC DISC is comprised of four major databases which include Wildlife Review from the U.S. Fish & Wildlife Service, BIODOC from the Biological Documentation Center of the National University of Costa Rica, the WIS (HERMAN) database from the Wildlife Information Service, and the Waterfowl and Wetlands Database from the U.S. Fish & Wildlife Service in Vicksburg, Mississippi. • Semi-annual updates, $695.00/yr.

Natural Resources Metabase. A masterful integration of over 120,000 records drawn from a vast network of private, U.S. Government, and foreign sources covering wetlands, Pacific islands, ecosystems, endangered species, national parks, resource management and development, and much more. • Semi-annual updates, $665.00/yr. subscription.

Wildlife Review/Fisheries Review • 1971-Present. More than 300,000 citations from the U.S. Fish & Wildlife Service’s Wildlife Review and Fisheries Review publications only. In depth subject coverage, taxonomic, and geographic identifiers as specific as the community and lake level. A good choice for the budget conscious natural resource researcher. • Semi-annual updates, $695.00/yr.

GeoArchive on CD-ROM • 1974-Present. This NISC DISC of over 705,000 records provides better coverage of the GeoArchive database than any online versions and includes the contents of all the printed publications from Geosystems, Ltd. of the United Kingdom. This premiere geoscience and hydroscience CD-ROM includes Geoxtiles, Bibliography of Economic Geology, Geoscience Documentation, Hydrotiles, and Geosaurus. The breadth of topics indexed by GeoArchive makes this disc an essential tool for serious research on all topics of geology and related disciplines. The coverage of East European and Russian materials is without peer. • Semi-annual updates; CD-ROM only subscribers - $1,995.00/yr. Geoxtiles subscribers - $1,395.00/yr.

Arctic & Antarctic Regions (Cold Regions) • 1800-Present. Ten of the world’s leading databases compose this valuable metabase of over 65,000 citations and abstracts. Multidisciplinary in scope, AAR is the one-stop source for polar librarians and scientists - a barometer of Global Change. *Due to the amalgamation of individual databases, the Arctic & Antarctic Regions CD-ROM is quickly becoming the premier information source for north and south polar regions, with no online or printed equivalent. If you need access to polar literature, this is it .... The search software has powerful and highly developed features AAR (Arctic & Antarctic Regions) is indispensable for any individual or institution with Arctic or Antarctic research interests.* - Peter Brugegeman, UCSD Scripps Institution of Oceanography Library; Optical Product Review, CD-ROM Librarian, V.5 No.11; December, 1990. • Semi-annual updates, $795.00/yr. subscription.

Environmental Periodicals Bibliography • 1973-Present. More than 455,000 citations from the Environmental Studies Institute of the International Academy. The world’s most extensive collection of records focused on environmental issues and research. Widely respected for the breadth and quality of its indexing, the EPB database is your reference to thousands of scientific, technical, and popular periodicals from around the world. Coverage includes: Air, Land, Water, Energy, Human Ecology, and Nutrition & Health. • Semi-annual updates; call for subscription. (Discounts available for printed edition subscribers.)

Ceramic Abstracts • 1976-Present. Over 150,000 records from the American Ceramic Society, Inc. cover the world’s scientific, engineering, and commercial literature pertaining to ceramics and related materials, including processing and manufacturing aspects. Subjects include abrasives, art, design, ceramics, plasters, glass, clay, semiconductors, superconductors, ferroelectrics, magnetic materials, nuclear materials, production processes and equipment, etc. • Semi-annual updates, $695.00/yr. subscription.

World Energy CD-ROM by Longman/Microinfo features resumes to over 38,000 key personnel, plus facts, production and financial figures for 2,600 major oil, gas, and mining companies as well as research facilities. Access the European Communities’ SESAME-INFOIL file of over 2,700 hydrocarbon and related energy projects. Get the details on OPEC members plus more! This is the disc for a thorough study of all industry changes - growth, concentration, fragmentation, and performance for any energy topic or individual company. • Regular updates, $995.00/yr. subscription.

World Research Database by Longman/Microinfo is the only major authoritative reference to detailed R&D information available on CD-ROM. Enjoy fast access and exhaustive searching of vital details for over 20,000 world class research centers in over 150 countries - plus a “Who’s Who”, resume-type data, and contact details on almost 50,000 senior scientists, technologists, and directors of international standing. Great for “networking” and finding valuable contacts. Quickly identify research centers/scientists qualified for special projects. Easily generate targeted mailing labels straight from the disc. Semi-annual updates, $1,895.00/yr. subscription.

About the ROMWright™ Search & Retrieval Software included with each NISC DISC

Users will like the “flow” of the program: the combination of speed, consistency, straightforward currollability, and attractive screen display. It is truly designed to work as "second nature," so users can concentrate entirely on their research tasks. ROMWright™ combines workhorse power with forward-looking sophistication, yet presents the user with a minimum of fuss. From basic browsing to advanced search strategies using full Boolean and proximity retrieval capabilities, this is the software that will make the job of training new users fast and easy. Whether you’re used to free-text searching in a global index or prefer field specific searches (combining search sets and selecting terms from permuted indices) the ROMWright software’s NOVICE, ADVANCED, or EXPERT search modes has the answer for you. So, take us for a spin!
FEDERAL NEWS CD-ROM. The only primary source/verbatim texts of our nation’s leaders as taken from the satellite transmissions of the Federal News Service. Full text of about 500 federal-level political and business news events per month, covered just as they happened: official briefings, presidential campaigns, on- and off-the-record statements, press conferences, diplomatic meetings, congressional hearings, broadcast interviews, press releases, etc. Browse by source: White House, Congress, Commerce, State and Defense Departments, Treasury, United Nations, foreign diplomats, and special interest groups. Search for your favorite topics or speakers, from presidential candidates to TV interviewers and CEOs. This is the insiders’ news source used by the world’s major newspaper and broadcast media. Invaluable resource for newsmakers and businesses, exciting material for government students. • Quarterly updates, $1,195.00/yr. subscription.

Consumers Reference Disc • 1985-Present. Consumer Health & Nutrition Index from Oryx Press and Consumers Index from PTerian Press, together on one CD-ROM, are sure to make this disc one of the most used CD-ROMs in your collection. From potato chips to microchips, 170,000 abstracts and bibliographic citations keep you informed about popular consumer interests, product evaluations, warnings, recalls, alerts and important health issues. • Semi-annual updates, $695.00/yr. subscription.

MUSE (MUsic SEarch) • 1970-1986 (RILM Abstracts), 1960-Present (Music Catalog). The International Repertory of Music Literature’s 120,000 abstracts together with 110,000 records from the Music Catalog of the U.S. Library of Congress provide comprehensive coverage to thousands of books, printed and manuscript music, sound recordings, over 300 journals, and all significant literature on music history, theory, analysis, performance, instruments, voice, liturgy, acoustics, psychology, ethnomusicology and related disciplines. • Annual update, $1,195.00/yr. subscription.

Latin American Studies - Vol.1 • 1970-Present. Three leading databases on Latin America, published on one CD-ROM, offer instant access to over 560,000 citations. This NISC DISC includes The Nettie Lee Benson Latin American Collection from the University of Texas at Austin, Hispanic Americas Periodicals Index (HAPI) from the University of California, Los Angeles, and the Handbook of Latin American Studies Vol.50 onward from the U.S. Library of Congress. Multidisciplinary in scope, this disc offers the most comprehensive coverage ever compiled in one convenient form. • Semi-annual updates, $1195.00/yr. subscription.

FREE subscription to
ERIC (1966 - Present) on CD-ROM
with a direct subscription to any NISC DISC priced $595 or higher

ERIC on CD-ROM • 1966-Present. The complete ERIC database on CD-ROM - yours to keep - at no extra charge. The ERIC database, plus new documents announced in JIE and CJE, the ERIC Digest records, and the Thesaurus of ERIC Descriptors are all part of NISC’s new two-disc CD-ROM package. Whether you’re an experienced researcher or casual CD-ROM user, you’ll find NISC’s state-of-the-art software unrivalled in power and ease of use. No library should miss this opportunity to get the best ERIC CD-ROM absolutely free with another NISC DISC subscription. Install on any CD-ROM hardware platform - single user station, LAN, or WAN access free of charge! The Educational Resources Information Center (ERIC) database is the world’s largest collection of educational materials, spanning more than a quarter century of federally-supported education resource management. This database contains over 760,000 bibliographic records of documents and journal articles; approximately 8,000 records added with each quarterly update disc. NOTE: Update disc shipments based upon paid subscription update cycle.

NISC - A COMPANY IN THE PUBLIC INTEREST

Attachment 33-3
Latin American Studies • Volume II • 1986-Present. Over 110,000 abstracts and detailed summaries focused largely on political, economic, and business issues throughout Latin America. Citations are drawn from the INFO-SOUTH database of the North-South Center, University of Miami and the Latin America Data Base (LADB) of the Latin American Institute, University of New Mexico. • Semi-annual updates, $1,195.00/yr. subscription.

NOTIMEX on CD-ROM • 1992-Present. One to two hundred news stories are added to this database each day from Latin America's premiere Spanish wires of the Mexican News Agency. World and national coverage of business, economics, finance, politics, religion, cultural, sports, entertainment, and general news items written by and from the perspective of Latin Americans. Includes special segments such as "Today in History". Great for classroom instruction. • Semi-annual updates, $895.00/yr. purchase.

POPLINE on CD-ROM, 1827-Present. The world's largest population database from the Population Information Program of the Johns Hopkins University School of Public Health and the National Library of Medicine contains nearly 200,000 citations and abstracts from both published and unpublished sources. Coverage includes population, family planning, fertility, population laws and policies, demographics, sexually transmitted diseases, maternal and child health, population and environment, and more. • Semi-annual updates, $695.00/yr. subscription.

Women, Water and Sanitation • 1979-1989. Impacts on Health, Agriculture and Environment. Full-text retrieval and subject coverage ranges from agriculture and health practices to education and training of health workers. Small and large-scale case studies of community-based development projects provide an excellent resource and networking tool for researchers, educators and practitioners. This disc is an interdisciplinary and multisectoral collection of major documents from international development agencies such as USAID, CARE, UNDP/PROWESS, UNICEF, WHO, PAHO, International Reference Centre for Community Water Supply and Sanitation, United Nations International Research and Training Institute for the Advancement of Women (INSTRAW), International Drinking Water Supply and Sanitation Decade (IDWSSD), World Bank, United Nations Interagency Task Force on Women, NGO Committee on UNICEF/Kenya. Published jointly with CD Resources, Inc. • One time price, $320.00.

Speaker's Lifetime Treasury on CD-ROM. Every speech needs a creative spark: use this carefully assembled collection to reflect your own style and originality - with confidence. Where else can you find thousands of quotes, epigrams, stories, along with similes, metaphors, mythology, comedy, audience control techniques, hundreds of business quotes, topics and themes for every day of the year, plus humor, wisdom and much much more!! This unique collection of speaker's and toastmaster's materials can help you develop the perfect speech for any occasion. • Price: $129.00 ($99.00 if ordered before March 31, 1993).

25,001 Jokes, Anecdotes, & Funny Quotes. Speaker Jacob Braude and humorists Gene and Linda Perret, among many others, are featured in this huge compendium of jokes, funny anecdotes, puns, satirical pieces, etc. on over 1,000 subject areas including sports, business, and politics. Search by keyword or topic; output to your word processor for use in speeches, newsletters, correspondence. Includes three calendars of sports and political humor. It's funny, plentiful, and always useful. • Price: $99.00 ($69.00 if ordered before March 31, 1993).

Proverbs & Quotes for All Occasions. Two wonderful reference works of universal value: Encyclopedia of World Proverbs: A Treasury of Wit and Wisdom Through the Ages and What a Piece of Work is Man: Camp's Unfamiliar Quotations from 2,000 B.C. to the Present. Essential for speakers and terrific just to browse - eloquence at your fingertips. • Price: $59.00 ($39.00 if ordered before March 31, 1993).

National Information Services Corporation

BIBLIOGRAPHIC SEARCH & RETRIEVAL SOFTWARE AT ITS FINEST

Baltimore - National Information Services Corporation (NISC) is pleased to announce completion of Phase II of ROMWright™, featuring the latest advances in CD-ROM search and retrieval software for bibliographic and full-text databases. Users appreciate ROMWright™'s thoroughly intuitive responsiveness and clarity of design. Superior search speed, title browsing, record tagging for a variety of output, and a truly interactive automatic index are hallmarks of NISC DISC quality. No other software provides three distinct search modes for accessing the same database; search levels can range from the simplest to the most sophisticated. ROMWright™ is truly faster and more capable, yet easier to use than any other CD-ROM system. And now, several major new capabilities distinguish this powerful software - the premier choice for database users and publishers alike.

SOME OF THE LATEST IN ROMWRIGHT™:

✓ New EXPERT search mode for set searching
  A powerful, innovative update to the online set searching approach. Sure to set new standards for flexibility and convenience.

✓ Superior plural searching
  Automatic on or off - this is the best implementation in the industry.

✓ Greater selection of record display formats
  Browse by title and year, or choose among several citation or whole record formats. Many new features for display and output.

✓ Sorting and incremental sorting
  Sort records by field for display and output. Or sort incrementally - sort-within-a-sort!

✓ System Administrator module
  Control the OPTIONS MENU settings for all users, output to specific drives. Many more system configuration options for LANs.

✓ All-new output features & formatting options
  Every printing and downloading method has been made easier to use. And now you can set margins, line and page length, etc.

✓ Output in citation, display, or custom format
  Choose the default citation format, the current display format, or a custom format you create and save. Fully configurable.

✓ New 50-line record display option
  See more records and more of each record on-screen at a time - very convenient.

✓ Full-text databases of any size
  You won't have to learn a new software, just a few great new features. And great new databases - check out Federal News!

✓ Outlines for full-text databases
  Outlines help make lengthy records as easy to access as short citations.

NOTHING IS FASTER THAN ROMWRIGHT™!

Compare for yourself. Some databases, such as ERIC, are also available from other publishers. If you're using one of their versions, we invite you to try a NISC DISC. Test identical databases side-by-side - you'll be amazed by ROMWright™'s much greater search speed and more thorough search capability. Robust search aids, configurable options, and straightforward display and output make your entire NISC DISC session quicker and more productive. Busy libraries and end-users can save time with every search, regaining hours over the course of a week.

Attachment 33-5
THE EASY-TO-USE SOFTWARE IS NOW EVEN EASIER

Powerful commands, tools, and customizable options are easily found exactly where they ought to be, and without any clutter. Less commonly used features are grouped together, and may be easily accessed when needed. And context-sensitive help, just a keystroke away, is fully informative yet concise - should you ever require it. Users like the "flow" of the program: the combination of speed, well-placed, powerful commands; and attractive screen display. It is truly designed to work as "second nature," so users can concentrate entirely on their research tasks.

ROMWright™ combines workhorse power with forward-looking sophistication, yet presents the user with a minimum of fuss. From basic browsing to advanced search strategy, this is the software that will make the job of training new users fast and easy.

ROMWright™ has never "dropped the ball" on essential areas like title browsing and robust access to the index. While we’ve added many new features, we’ve also enhanced the older, and made them simpler to use. Now there are more valuable options, yet choosing among them requires less effort. And if you ever have reason to restrict an option from your end-users, a new Systems Administrator’s module makes it easy.

THE AUTODEX™ (AUTOmatic inDEX) -- INTERACTIVE INDEX WINDOW

The AUTODEX™ window pops up automatically to assist with search term selection. Use it to locate any indexed word and even to type in automatically the term(s) you want! Fully browsable, the AUTODEX™ unobtrusively alerts you to important topics covered in the database. Options include an alternate format which shows not only the number of records in which each word occurs, but also the total occurrences of the word in the database, indicating how frequently the word appears per record. The AUTODEX™ acts as a clever assistant who knows just when to provide help, and does so instantaneously.

NEW EXPERT SEARCH MODE -- SET SEARCHING

Experienced online users familiar with "set searching" will appreciate an entirely new search mode. We’ve renamed the old "EXPERT" mode to "ADVANCED," and made set searching the new "EXPERT" mode. But the names reflect the differences in the functions of each search mode rather than the level required of the user. Each mode offers a unique set of capabilities that is best suited for a particular overall strategy. The NOVICE and ADVANCED modes both remain perfectly suited to every user. Those who do take advantage of the new EXPERT mode will find that ROMWright™ has added many innovations, such as interactive search aids, and greater flexibility to this traditional command-line approach.

NEW! FULL-TEXT DATABASES...IN ROMWRIGHT™!

Large bibliographic databases and full-text databases do not have to be kept separate any longer. Now there is one software which handles both types of database - without compromise to either. There is absolutely no change or penalty to the retrieval, display, and output of bibliographic citations. Full text is a seamlessly integrated new capability, whether it’s a bibliographic database with substantial abstracts, an exclusively full-text title, or a special volume featuring both types of database. Some disciplines benefit greatly from coverage which includes both bibliographic and full-text files. In such cases NISC is not forced to restrict coverage, or release multiple smaller discs, simply because of database format. In short, NISC can make products exactly as they are wanted.

ROMWright™

TAKE A STEP UP FROM SILVER TO GOLD!

NISC DISC users know the difference between an ambitious software product they enjoy, and the ho-hum accomplishments of our competitors. So if you’re not using ROMWright™, you must be using ROMWrong! Try a NISC DISC subscription today, and take advantage of our free ERIC on CD-ROM offer. Several titles are available for purchase.
NEW RELEASE

ERIC on CD-ROM

Yours FREE with a subscription to another NISC DISC!*

Baltimore - National Information Services Corporation is pleased to announce a breakthrough in ERIC accessibility: the complete ERIC database on CD-ROM - yours to keep - at no extra charge. The entire ERIC database, plus new documents announced in RIE and CIJE, as well as the ERIC Digests and the Thesaurus of ERIC Descriptors, are all part of NISC's new two-disc CD-ROM package. Whether you're an experienced researcher or casual CD-ROM user, you'll find NISC's state-of-the-art software unrivalled in power and ease of use. No library should miss this opportunity to get the best ERIC CD-ROM absolutely free with another NISC DISC subscription. Works just fine on any CD-ROM hardware platform - single user stations, LAN, or WAN access free of charge!

The Educational Resources Information Center (ERIC) database is the world's largest collection of educational materials, spanning more than a quarter century of federally-supported education resource management. The database contains over 760,000 bibliographic records of documents and journal articles; approximately 8,000 records are added with each quarterly update disc. Research papers, dissertations, conference proceedings, literature reviews, syllabi, curricula, and articles from approximately 800 education-related journals are indexed and abstracted for the ERIC database. And the full text of most of the documents is readily available, at cost, from the ERIC Document Reproduction Service (EDRS).

- ERIC Digests are timely two-page research syntheses prepared by the specialists in the twenty ERIC clearinghouses and adjunct clearinghouses. Approximately 1,000 digests address the full spectrum of topics in education, compiling the latest research using the most valuable material entering the ERIC database.

- The Thesaurus of ERIC Descriptors is the complete list of almost 10,000 official index terms used by the ERIC system.

ERIC is used by teachers, students, parents, librarians, school boards, administrators, journalists, civil servants, and other professionals in every state and over 100 countries. Document acquisition focused in specific subject areas is made possible by the ERIC network of clearinghouses and related service organizations. With ERIC on CD-ROM, you will be able to make best use of the efforts of this entire resource system.

OMB's New Government Discount

Agencies Are Urged to Sell Information at Cost, Not a Profit

By Bill McAllister
Washington Post Staff Writer

The Clinton administration has reversed a Reagan administration policy that defined government information as a commodity, often available for sale to private industry.

Instead, the new policy advises government agencies to "maximize" the amount of information available to the public and to "minimize" its cost. If the agencies charge fees for providing information, they will be prohibited from charging more than the cost of delivering the materials.

The long-expected policy, issued earlier this week by the Office of Management and Budget, is important because it outlines the philosophy of federal agencies are to follow in releasing information. It also will provide the foundation for the new "information highway" that Vice President Gore has proposed.

The changes brought praise from information industry spokesmen and from Gary Bass, executive director of OMB Watch, a public interest group that railed against what it viewed as restrictions during the Reagan and Bush administrations. "This is good stuff ... a major repudiation from the Reagan-Bush way of operating," Bass said.

Steven J. Metalitz, vice president and general counsel for the Information Industry Association, a trade group with 500 members, welcomed the policy. "On the whole, it reflects a pretty sensible consensus," he said.

Under rules in effect since 1985, OMB advised federal agencies that government information was "a valuable national resource" and is "a commodity, often with economic value in the marketplace." That policy has led to a number of initiatives by agencies to market their data through private companies which, in turn, would sell it to the public.

The new OMB policy retains the definition of government information as "a commodity in the marketplace" but drops suggestions that the government should make a profit selling information.

Noting that the federal government is the "largest single producer, collector, consumer and disseminator of information in the United States," OMB's circular A-130 calls for a "diversity" of vendors, both public and private, to make government information available. It warns that government information must be provided equitably to all interested parties.

Fees are to be avoided. When imposed, they must be set "at a level sufficient to recover the cost of dissemination but no higher," the circular states.

Bass said the Bush administration had begun to retreat from the Reagan policy during its final year and the Clinton administration is following most of those ideas. The OMB proposal fits the Clinton administration's "new role of government—empowering people by giving information," he said.

If agencies follow the directive, Bass said it could diminish use of the Freedom of Information Act, a route frequently taken by journalists and others to ferret out information. FOIA requests could be...
Reading, Writing, Narcissism

By Lilian G. Katz

URBANA, ILL.

Developing and strengthening children's self-esteem has become a major goal of our schools. Although it is true that many children, especially the youngest students, have low self-esteem, our practice of lavishing praise for the mildest accomplishments is not likely to have much success. Feelings cannot be learned from direct instruction, and constant reminders about how wonderful one is may raise doubts about the credibility of the message and the messenger.

A project by a first grade class in an affluent Western suburb that I recently observed showed how self-esteem and narcissism can be confused. Working from copied pages prepared by the teacher, each student produced a booklet called "All About Me." The first page asked for basic information about the child's home and family. The second page was titled "What I like to eat," the third was "What I like to watch on TV," the next was "What I want for a present," and another was "Where I want to go on vacation."

The booklet, like thousands of others I have encountered around the country, had no page headings such as "What I want to know more about," "What I am curious about," "What I want to do" or even "To make."

Each page was directed toward the child's basest inner gratifications. Each topic put the child in the role of consumer — of food, entertainment, gifts and recreation. Not once was the child asked to play the role of producer, investigator, creator, explorer, experimenter or problem-solver.

It is perhaps this kind of literature that accounts for a poster I saw in a school entrance hall. Pictures of clapping hands surround the title "We Applaud Ourselves." While the sign's probable purpose was to help children feel good about themselves, it did so by directing their attention inward. The poster urged self-congratulation; it made no reference to possible ways of earning applause — by considering the feelings or needs of others.

Ethan G. Katz is professor of early childhood education at the University of Illinois. This is adapted from the summer issue of American Educator.

Another common type of exercise was a display of kindergartners' work I saw recently that consisted of large paper-doll figures, each having a balloon containing a sentence stem that began "I am special because..." The children completed the sentence with the phrases such as, "I can color," "I can ride a bike," and "I like to play with my friends." But these children are not likely to believe for very long that they are special because they can color or ride a bike. What are they going to think when they discover just how trivial these criteria for being special are?

This overemphasizing self-esteem and self-congratulation stems from a legitimate desire to correct previous generations' traditions of avoiding compliments for fear of making children conceited. But the current practices are vast over-corrections. The idea of specialness they express is contradictory: if everybody is special, nobody is special.

Adults can show their approval for children in more significant ways than awarding gold stars and happy faces. Esteem is conveyed to students when adults and peers treat them with respect, ask for their views and preferences and provide opportunities for decisions and choices about things that matter to them. Children are born natural and social scientists. They devote much time and energy to investigating and making sense of their environments. During the preschool and early school years, teachers can capitalize on this disposition by engaging children in investigations and projects.

Several years ago, I saw this kind of project at a rural British school for 5- to 7-year-olds. A large display on the bulletin board read: "We Are a Class Full of Bodies. Here Are the Details." The display space was filled with bar graphs showing birth dates, weights and heights, eye colors, number of lost teeth, shoe sizes and other data of the entire class. As the children worked in small groups to take measurements, prepare graphs and help one another post displays of their analyses, the teacher was able to create an atmosphere of a community of researchers looking for averages, trends and ranges.

Compare this to the American kindergarten I visited recently in which the comments made by the children about a visit to a dairy farm were displayed on the bulletin board. Each sentence began with the words "I liked." For example, "I liked the cows" and "I liked the milking machine." No sentences began "What surprised me was..." and "What I want to know more about is..."

Of course children benefit from positive feedback. But praise and rewards are not the only methods of reinforcement. More emphasis should be placed on appreciation — reinforcement related explicitly and directly to the content of the child's interest and effort. For example, if a child poses a thoughtful question, the teacher might come to class the next day with a new reference book on the same subject. It is important that the teacher shows appreciation for pupils' concerns without taking their minds off the subjects at hand or directing their attention inward.

When children see that their concerns and interests are taken seriously, they are more likely to raise them in discussion and to take their own ideas seriously. Teachers can strengthen children's disposition to wonder, reflect, raise questions and generate alternative solutions to practical and intellectual problems. Of course, when children are engaged in challenging and significant activities, they are bound to experience failures and rebuffs. But as long as the teacher accepts the child's feelings and responds respectfully — "I know you're disappointed, but you can try again tomorrow" — the child is more likely to learn from the incident than be harmed by it.

Learning to deal with setbacks, and maintaining the persistence and optimism necessary for childhood's long road to mastery are the real foundations of lasting self-esteem. Children who are helped to develop these qualities will surely respect themselves — though they probably will have better things to think about.
**Point of View**

By Diane Ravitch

**Enhancing the Federal Role in Research on Education**

"Until there is an adequate program of research to generate new knowledge, there is little point in pouring additional money into disseminating it."

**Attachment**

**TheChronicleofHigherEducation**

April 7, 1997

---

**Enhancing the Federal Role in Research on Education**

SINCE I LEFT GOVERNMENT SERVICE, I HAVE thought a good deal about the chronic anemia of educational research and development. In my capacity as a scientist, I have been a frequent critic of educational research and development. After I became Assistant Secretary for the Office of Educational Research and Improvement in the Department of Education in 1991, reporters wanted to know about my "agenda." So I talked about university rankings, such as those provided by such magazines as Newsweek and US News & World Report, to disseminate research findings to teachers and parents. I wanted to sponsor new research on successful programs for disadvantaged students, on alternatives to standardized tests, and on education in other countries. My response reflected much of what I had learned while serving as co-chair of a panel sponsored by the National Academy of Education on the future of educational research. The federal research program, I believed, should concentrate on discovering ways to improve the education of disadvantaged students.

I soon learned, however, that there was almost no money available for technological innovations or for new research projects. Responsibility for this dismal situation is widely shared, not only by Congress and various educational institutions but also by lobbyists for educational interest groups.

The agency's budget of $495 million is allocated to a score of specific programs mandated by Congress. The budget has increased 30 percent, in a formulaic grant program for libraries. About $800 million goes to the National Center for Educational Statistics, which gathers data and administers the National Assessment of Educational Progress. Other monies are directed to 10 regional educational laboratories ($55 million), 20 national research centers ($25 million), and an array of other programs.

I quickly realized that Congress did not want my agency to have much discretion. Fearing that administration would divert federal funding to political ends—aided by a variety of education lobbyists eager to protect existing programs—had written into law every program that we manage, with strong safeguards that make sure that no one can use this money to further private or ideological ends. Moreover, Congressional staff members would remind me of what had happened 10 years earlier, when a Reagan appointee in the agency had tried to impose a political agenda. As a result, Congress wants OEER to administer grants to developers of computer programs, but prefers that it not have the capacity to conduct its own research, commission new research on its own, or monitor the quality of existing research-and-development programs.

But, in my view, the most important barrier to a good federal research-and-development program was obvious: not enough money. A study by a panel of the National Academy of Sciences in 1992 found that the federal budget for educational research and development had declined by 39 percent in constant dollars between 1973 and 1989, even as the budget of the Department of Education had grown. During my tenure, research and statistics received less than 1 percent of the department's budget, and of that amount, only about $30 million was spent on research.

Even the figure of $30 million understates the amount of money that actually goes to research, according to a study conducted by Maris Vinovskis, a historian and demographer from the University of Michigan who is working on a book on the history of the agency. Vinovskis has concluded that about $30 million was spent on research at our research centers and regional laboratories. He has found that of the $255 million OEER spent on national research centers, about half went for administration, indirect costs, and the dissemination of research results, and the remainder for research. Vinovskis said that educational research was just a lot of jargon, that it had little value for teachers, and that we already knew all we need to know. I knew that there were some truth in this statement, but I also believe that the low esteem in which educational research and its chronic lack of funding have driven first-rate researchers to other fields. Since my original priorities were non-starters, I focused on what could be accomplished within the fiscal and political constraints. The national goals for education, jointly forged in 1983 by President Reagan and the nation's governors under the then-Governor Clinton, provided a bipartisan focus. In support of goals that pledge improved student achievement from kindergartens through high school, we used our few discretionary dollars to avoid granting capacity in student organizations (such as the National Academy of Sciences and the National Geographic Society) to bring together teachers and students to develop voluntary national standards in the sciences, the arts, history, civics, geography, English, and foreign languages, and to model our support of the agency's collaborative work of the National Council of Teachers of Mathematics, which publishes mathematics standards for elementary and secondary schools in 1990.

We sponsored a research seminar on the educational effects of single-sex schooling and commissioned a research synthesis on the subject (which will be published soon). We invited a dozen prominent historians—a technical assistant in American education, and the collection will be published next year by a university press. The agency now is producing major research reviews that identify "what we know and what we need to know" from research to reach the ambitious educational goals.

Despite these accomplishments, the agency itself bears a measure of blame for the low status accorded federal educational research. While I was there, we set about demonstrating pilot projects and development projects. By instituting rigorous quality controls for research that we monitor, we urged the career staff to think of themselves as stewards of public funds, not as liaisons for those who get the money. For the first time in many years, OEER's Office of Valuable New Publications. The National Center for Education Statistics prepared a superb volume, "120 Years of American Education: A Statistical Portrait," gathering important longitudinal educational data into one handy reference volume.

I N TWO INSTANCES, funds were withheld from centers that presented poorly designed studies. Staff members worried that disgruntled project directors would complain to their friends on Capitol Hill, but the quality review was valid and it stood. This experience demonstrates that, even with limited resources, the agency can use its monitoring of quality among recipients of federal funds. The agency's capacity to do so, however, is severely compromised by the lack of top-quality researchers. OEER should be able to support in-house research projects; it should be able to synthesize the studies from the national centers, the regional labs, and independent scholars. It should be able to release research findings to the data and statistics gathered by the National Center for Education Statistics. None of this is currently possible, because there are only about 20 well-qualified researchers in the Office of Research, most of whom also have administrative responsibilities.

I learned that I was wrong in thinking that OEER needs to spend more money on research. Until there is an adequate program of research to generate new knowledge, there is little point in pouring additional money into disseminating it.

We need a stable, long-range program of research and development, to monitor and improve our nation's investment of hundreds of billions of dollars each year in education. We will never have such a program until the turf fighting ends and the agency is accorded the discretion and the money that it needs to attract first-rate talent.

Diane Ravitch, a historian of education, is a visiting fellow at the Brookings Institution
LETTERS TO THE EDITOR

Reforms of America 2000

Edward Fiske’s op-ed article [April 25] about the 10th anniversary of the report “A Nation at Risk” contained an erroneous description of the education policies of the Bush administration.

Mr. Fiske wrongly asserted that “the concept of systemic change never reached the Bush administration, whose thinking about public education started and ended with parental choice. . . .” This statement is untrue; indeed, every educational reform lauded by Mr. Fiske was either initiated or promoted as part of President Bush’s America 2000 program.

The systemic reform strategy of national standards and a national assessment system was launched by the Department of Education under then-Secretary Lamar Alexander as an integral part of America 2000. Beginning in the fall of 1991, the department funded projects to develop national standards in the sciences, history, the arts, civics, geography, English, and foreign languages.

The innovative approaches of Ted Sizer and James Comer—hailed by Mr. Fiske—received millions of dollars from the New American Schools Development Corp., which raised money for “break the mold” schools as part of the America 2000 plan.

In addition, more than 2,500 communities across the nation organized themselves as America 2000 communities and developed their own strategies to reach the national education goals for the year 2000. Today, Secretary of Education Richard Riley has taken over the America 2000 monthly satellite town meeting in order to keep in touch with these community organizations.

We won’t have a chance to reach the national goals by the year 2000 unless we put partisanship aside and work together for the sake of our children and our future.

From Journal Titles to Article Citations: Providing Access to Indexing and Abstracting Services Through the ILLINET Online Network

Brad Baker

Background

Once an online public access catalog (OPAC) is up and running, it does not take long before librarians and library users alike begin thinking ahead to the next level of service that can be provided through the network. In most cases, the immediate interest is in providing access to periodical citation databases as an integral part of the OPAC. Once users can access journal title holdings online, it is not surprising, or unreasonable, that they also expect to be able to search for specific articles by subject in these journals. There is nothing like success to raise user expectations.

The vision of providing access to specific periodical citation databases through ILLINET Online is certainly not new. Hugh Atkinson and other leaders in the state articulated much of this vision several years back in discussions of loading ERIC tapes into what was then LCS. The strategic planning process undertaken by the Illinois Library Computer Systems Office (ILCSO) Policy Council beginning July 1988 provided a forum for indepth discussion of providing access to periodical citation databases through the ILLINET Online network, and it served as an impetus to move this idea off the back burner. The final document that emerged from this planning process called for ILCSO to move forward with evaluating options and implementing new services in this area where feasible and cost-effective for member libraries.

With the adoption of the strategic plan, the ILCSO Policy Council established the ILCSO Access to Periodical Databases Committee to provide recommendations to the Policy Council on access to abstracting and indexing services. I have had the pleasure of serving as a member of this committee and as chair for the past two years. Current membership on the committee is as follows:

Brad Baker, Northeastern Illinois University
Barbara McFadden Allen, Illinois State Library
Thom Brown, University of Illinois, Automated Information System Services
Donna Goehner, Western Illinois University
Clayton Highum, Illinois Wesleyan
Jack McManus, University of Illinois, Automated Information System Services
Bill Mischo, University of Illinois—University of Chicago
Bernie Sloan, Illinois Library Computer Systems Office
Jay Starratt, Southern Illinois University, Carbondale
E. Paige Weston, University of Illinois, Chicago

Illinois Libraries
v75 n2 March 1993
The CARL Uncover Project

The first project for providing citation database access, which was recommended by the Databases Committee and approved by the ILCSO Policy Council, was a pilot connection to the Colorado Alliance of Research Libraries (CARL) Uncover service. CARL Uncover is primarily a table of contents database that provides current access to more than 10,000 journal titles. While it does not include abstracts of articles or support controlled vocabulary indexing, the CARL Uncover service does support keyword searching of article titles from the journals included. The CARL service attracted the attention of the committee for several key reasons. One nice feature was the ability to incorporate journal title holdings information from OCLC Union List tapes. While the product itself was attractive, the other key consideration was that service could be put in place very quickly with very little modification to the ILLINET Online network. A pass-through telecommunications connection between IO and CARL Systems was all that was required to get the service up and running.

The gateway connection to support CARL Uncover access on ILLINET Online terminals was put in place in fall 1990 on a trial basis, with funding from the Cooperative Collection Management Coordinating Committee (CCMCC). The initial grant supported forty simultaneous users from any of the more than 1,500 ILLINET Online terminals. Because this includes the statewide dial-access ports to ILLINET Online, access to CARL Uncover has been available to all libraries throughout Illinois. Some technical problems plagued the project during the initial months of the trial, which limited access to the CARL Uncover ports. Once corrected, the management of CARL Systems agreed to an extension of the contract through summer 1992.

During the trial year of access, CARL Uncover service was evaluated thoroughly by the ILCSO Evaluation of Databases Committee. While identifying a number of specific problems, which needed to be addressed to improve functions of the CARL Uncover gateway connection, the committee recommended maintaining the service in FY 93. With this recommendation, the ILCSO Access to Periodical Databases Committee put together a funding proposal for maintaining CARL Uncover access in FY 93, with the full cost of the service covered through ILCSO member library assessments. The high level of support for the service is indicated by the fact that thirty-eight of the forty ILCSO member libraries elected to maintain CARL access on their ILLINET Online terminals.

The CARL Uncover service has continued to log a high level of use in the current fiscal year. Usage totalled 3,550 connect hours in October alone. A growing number of libraries and individual library users also have been taking advantage of a new feature in CARL Uncover II service, which supports direct online ordering of articles identified in CARL Uncover and delivery via telefax or U.S. mail. The service supports direct credit card input for payment by individual users and deposit account packages for library use. Many libraries have indicated their intent to make further use of this article delivery service in CARL Uncover II to supplement their journal collections and traditional interlibrary loans, especially for expensive journal titles that have been cut due to price increases and budgetary constraints.

The Illinois Bibliographic Information Service (IBIS)

Evan before ILCSO negotiations with CARL Systems began, work had been underway at the University of Illinois in examining alternatives for loading specific indexing and abstracting databases directly onto the network mainframe. The initial intent of the development work was to address the specific needs of the two University of Illinois campuses. Rather than being in conflict, this somewhat parallel development and testing of both a gateway approach for providing access to citation databases and a direct tape loading approach has been of great value to the ILCSO community. It has provided the opportunity to evaluate two very different approaches to database access, while minimizing risk and maintaining the maximum flexibility for everyone involved.

The University of Illinois development efforts with locally mounted citation database files grew into the Illinois Bibliographic Information Service (IBIS). IBIS service is built around the BRS Onsite program from Maxwell Online. The BRS Onsite program is designed to ease development efforts with bringing up indexing and abstracting databases on a local system by providing search software and interface support as well as database tapes ready to load into the IBM mainframe environment. While this has facilitated implementation, a tremendous amount of effort in development and customization has been invested by library and computer systems staff at both the University of Illinois Urbana campus and the University of Illinois Chicago campus to meet local needs in IBIS.

The ERIC Pilot Project in IBIS

Participation in IBIS by other ILCSO libraries began in 1991, following a survey of the ILCSO community regarding IBIS and receipt of a CCMCC grant to expand the site license for the BRS software to include the entire ILCSO community. With the expansion of the software license, the ILCSO Policy Council also
approved a pilot project of access to the ERIC database through IILCSO for the entire ILCSD community.

Getting the ERIC database up and running on IBIS for the forty ILCSD libraries has been a tremendous example of cooperation and collaboration, which have made resource sharing work so well in Illinois. Software licensing funding was provided by CCMC. During the first year, ERIC user fees for the entire network were paid by the thirteen state university libraries. Database loading and technical support was provided by U of I Automated Information System Service (AIS) and the BRS Task Force. Leadership with interface customization to accommodate ERIC was provided by Bill Mischo at UIUC and E. Paige Weston at UIC. Finally, training for library staff members was provided by the ILCSD office and another volunteer committee.

The first evaluation of the ERIC pilot project by the ILCSD Evaluation of Databases Committee resulted in a positive recommendation regarding continuing the project into FY 93. With this endorsement, the Access to Periodical Databases Committee put together a funding plan to allocate the necessary costs to member libraries to maintain ERIC on the network in FY 93. Again, as with CARL Uncover, the response from member libraries was encouraging, with thirty-eight of the forty ILCSD libraries opting to pick up their share of the ongoing subscription costs. The committee is currently in the process of completing a similar mailing, requesting ILCSD member library commitments to renew ERIC access through IBIS for FY 94.

The Wilson Pilot Project in IBIS

While the ERIC pilot was a useful and relatively inexpensive test of network access to a journal index through IBIS, the intent of the committee from the beginning was to expand the service to a core group of databases. Consensus emerged fairly quickly that the target audience for the next group of core databases to be loaded on the network should be the general undergraduate student. It also was agreed that files be chosen to generate the highest demand and search volume across the ILCSD membership.

Following several surveys of member libraries and meetings with key vendors, the committee entered into negotiations with the H. W. Wilson Company regarding an extended pilot test of access to a package of databases through IBIS for the forty ILCSD libraries. The core package of databases identified for the pilot included: Readers Guide Abstracts, the Business Periodicals Index, the Social Sciences Index, the Humanities Index and the General Science Index.

Table 3 and 4 provide the top twenty users of ERIC and the Wilson family of databases as measured by connect hours during November. The fact that the two U of I campuses do have the extra files and longer experience with IBIS can be seen in these institutional usage figures. Usage of IBIS by the other ILCSCO members, however, has been growing significantly each month, and we expect these differences to narrow. It also is interesting to note the number of different ILCSCO libraries that make one of the top twenty lists. In some cases, this is without a great deal of promotion or training of patrons at the local library level.

Funding for IBIS Operations

From the beginning of the IBIS project, the Access to Periodical Databases Committee has put forward a funding model, in which member libraries pay all database royalty fees, user charges and database storage costs. New funding is pursued to cover central site costs for BRS Onsite, system operation and maintenance. During the pilot phase of operation, these central site costs have been covered by grants from the Cooperative Collection Management Coordinating Committee. To attain a permanent funding base for these costs, the committee recently submitted a proposal to the Illinois Board of Higher Education (Enhancing ILLINET Online: Increasing the Effectiveness of Journal Collections Through Online Abstracting and Indexing Databases) seeking a funding base adjustment to maintain the IBIS project.

The other key part of the financial picture for FY 94 and beyond is the subscription-based contribution for IBIS from the ILCSCO member libraries. Given that Wilson licensing fees have been waived during the current pilot phase, the ILCSCO libraries will be facing a large increase in their database access fees to cover the fairly substantial royalties and user fees to maintain access to these files in FY 94. The committee has been negotiating with representatives from H. W. Wilson for the past two years regarding these royalties and have come to agreement on a level of fees that we think is fair for all parties. The committee is currently in the process of surveying libraries regarding the distribution of member library costs for FY 94.
Plans for IBIS and Other Database Services on the Network

The Access to Periodical Databases Committee and the ILCSO Policy Council have discussed a number of options for short- and long-range enhancements to IBIS and database services on the ILLINET Online network. Three areas in particular attract the most discussion: adding other databases, adding access for other libraries, and adding full text capabilities or links.

For FY 94, the focus of attention in IBIS for the ILCSO community will remain on the six core files currently up and running and on moving from a pilot phase into regular production. Given that the Current Contents files and the two additional Wilson files (Biological and Agricultural Index and Applied Science and Technology Index) are already being maintained on the system for use by the U of I campuses, the committee will be examining the possibility of opening access for these specific files. The committee also has received requests from a number of libraries regarding additional files they would like available through IBIS. The intent is to offer optional access on a title by title basis to some of these more specialized files over the next few years.

A second area of future development being reviewed by the Databases Committee is the possibility of opening access to IBIS to nonILCSO libraries. This presents a number of contractual difficulties in dealing with database and software vendors. Another limitation to expansion in this area is the number of ports available on the network and methods for making IBIS available on multiple terminals in nonILCSO libraries. It is possible that developments with netILLINOIS and the evolution of the ILLINET Online telecommunications network into the next generation will make it easier to pursue this type of expansion over the next several years.

The third area of long term development being pursued by ILCSO and the committee is the move to the next level of providing full text links from journal article citations. There has been a great deal of discussion of the gradual paradigm shift in libraries from a “just in case” philosophy to a “just in time” orientation. With this in mind, many librarians have viewed periodical database access through I0 as a means to an end. The objective here is not so much to get to the citations, but to build a framework in which we can get the actual articles to our users through the same workstation. While this capacity has seemed pretty far off, CARL Uncover II allows part of this capability now. Recent agreements between H. W. Wilson and UMI also form an important framework on which to build in implementing full text access at some point in the future.
Virtual Libraries, Complete With Journals, Get Real

Libraries are not favored haunts of chemists, or many other research scientists. Rather than spending hours in vain pursuit of elusive citations, they personally subscribe to—and clutter their offices with—about half a dozen core journals. They want first crack at the hottest papers before the competition gets to them, and while libraries subscribe to the same journals the copies could be missing, loaned out, or damaged. But what if those journals were available through the researcher's desktop computer, which could scan not just six but hundreds of journals and automatically retrieve the relevant articles? And what if those articles were more than just text on a computer screen, but complete copies with detailed graphs and pictures?

That type of library might be haunted more often. And it's virtually here. On 21 April, the Chemistry Online Retrieval experiment, or CORE, a "virtual" library, premiered at Cornell University. It offers Cornell chemists 20 American Chemical Society (ACS) journals—not abstracts, not text, but entire articles with pictures, tables, graphs, and captions conveniently displayed on office computers. A chemist can type in, say, "temperature, reagent, concentration," and a list of articles appears. A quick click with a mouse on one item and a new window opens with just the graph he or she needs from Analytical Chemistry.

The CORE project is only one of several new virtual library programs. Others are under way at Carnegie-Mellon University (CMU), the Naval Research Laboratory, and Columbia University. To make the virtual into reality, engineers and programmers have surmounted one major obstacle: designing systems capable of handling the huge volume of graphic material—charts, tables, pictures of gels—that is an essential part of an average scientific journal. But whether those systems are fast enough to be easy to use, whether directed electronic searches will rob science of spontaneous discoveries gleaned from literature browsing, and whether journal publishers will adapt to systems that could eat into some profits, remains to be seen.

CORE, the most advanced of the current wave of virtual library projects, is a joint venture involving Cornell, ACS, Bellcore, and a database searching service called the Online Computer Library Center (OCLC). CORE currently contains ACS journals from January 1991 through September 1992; that's approximately 20,000 articles, or 142,000 pages. The collection eventually will go back to 1980 for most journals, and would otherwise take up more than 600 feet of shelf space. Getting that mass of data online in a form that's easy to use means some extreme complexity behind the screens. The journals are produced by the publisher with software that sets the appearance of the printed page. That raw data—formatting codes and text and tables and small graphics—is recorded so it can be displayed on a desktop monitor and then sent to the library. There, a user works with a graphical, Windows-like interface developed by Bellcore to activate OCLC's search program, which scans the data for key words—a user types in using familiar "and-or" search strings. A list of matching articles pops up in a window, the user chooses a title, and images of the article appear on the screen.

Since detailed graphics take up huge amounts of memory, at CORE they are scanned in separately and kept as compressed data files on optical storage disks in a mechanical "jukebox." The disks can be flipped through and their images called up on the screen at the click of a screen button. The Cornell chemists' window into this virtual world is a Unix workstation or a Mac IIci with Mac OS software, Ethernet cards, 5-6 Megabytes RAM for System 7, and at least a 68030 processor.

What excites the average user, however, is not the gadgetry but the newfound ability to get the big picture. "It's like having Chemical Abstracts, except you get the whole paper," says Cornell theoretical chemist William Shirley. And being able to get the whole paper online could revolutionize the way scientists keep up with the literature. Keeping up is, after all, the reason "most faculty subscribe to five or six core journals personally. That way they know that nothing in those will slip by them," says Jan Olsen, the Cornell library director. "But CORE will bring a journal to them when they want it, where they want it, and as often as they want it, whether or not someone else is using it. They will tell the computer to 'search this' and the computer does it very rapidly. It's a better job of keeping up than they can do if they have to physically eyeball all the literature every time they want something."

One Cornell graduate student grateful for less wear and tear on her eyes is Kimberly Lawler, who was thinking about doing a study on carbonyl coupling. Not knowing precisely where to look, Lawler used her CORE training to session to search for "McMurtry reaction," "carbonyl," and other terms and came up with a full screen of references. "You can do it in your office and see if it's right for you," she says.

Lawler's endorsement is not wholehearted, however. "Big articles online are a pain because it's harder to flip through the pages," she says. It's true that new pages in an article don't spring to the screen instantaneously, like turning the pages of a book. The mechanical jukebox that holds the complete images slows things down while it flips to the proper disk, and optical drives are inherently slower than magnetic drive. It also takes time for stored images to be decompressed and transmitted across the network. All in all, a new page can take several seconds to appear while the researcher fidgets in his or her seat.

Speed will doubtless improve with better hardware, as it has throughout the history of computers. Other aspects of CORE might prove more troublesome. The efficient search routines, for instance, might cut down on scientific serendipity. "Scientists often approach the literature with no specific idea in mind," Olsen says. "They are not looking for a particular author or title, or compound or concept; they are simply looking for an intellectual adventure. It stimulates ideas, search paths, that are completely unpredictable to them. You can't do that as well with the electronic text. I think this will get them frustrated."

Not everyone agrees with this, and some scientists discount it entirely. It is possible, after all, to browse whole issues electronically by assembling a Table of Contents from an issue date. A mouse click on a line will bring up the article. "You can browse the system just like the printed page," says Rick...
ard Entlich, senior systems analyst. "Searching is actually very visual."

You can also print out what you’ve found. That may be nice for the scientist but it is one aspect of virtual libraries that makes publishers quite nervous. They worry about bootleg journal copies cutting into their circulation rates, and they’re not sure how libraries will keep these virtual journals from becoming part of a pirate publishing industry.

Those issues are of particular concern at the Cornell project, which is being carried out in concert with ACS, the journals’ publisher. The same situation applies to another online library project called TULIP, or The University Licensing Program, which is taking shape with the help of the journal publisher Elsevier. TULIP is furthest along at CMU, where researchers have access to seven Elsevier artificial intelligence journals plus the IEEE Computer Journal and CMU computer science monographs.

Cornell, CMU, and other institutions are considering several different ways to protect the rights of the journal publishers. Restricting laser printing of journals within the institution by proper authorization and validation (computer IDs or library card) may be one way to solve the problem. And some pay-for-use systems will probably emerge, especially if the library offers access to journals to which it doesn’t already have a subscription.

Printing out articles means one other thing: virtual libraries won’t, alas, eliminate the cluttered office. "We do not have strong evidence that people want to leave their hard copies," says CMU’s head librarian Charles Lowry. "You put up a Novell token ring and what do people do? They print out their e-mail!"

Nobody really knows for sure how people are going to respond to online reading until the systems are up and running for some time. Users may go to reading off the screen, or they may print and then read. It’s hard to resist having something to hold in your hands—just ask Cornell’s Entlich. Searching his desk for handouts, he throws up his hands and exclaims, “In the midst of an electronic library project, I’m buried in paper!”

MEMORANDUM

To: All Standing Order Customers
From: Peter M. Dagutis, Director
Date: January 29, 1993
Subject: Subscription Updates

JANUARY 1993 ISSUE:

We are pleased to provide you with the enclosed shipment of the January 1993 issue of Resources in Education (RIE) microfiche. In addition, we will send the February 1993 issue in late February.

DOMESTIC TAX ISSUES:

CBIS began collecting sales tax with the December issue for the following states:

- Alabama
- Arizona
- California
- Colorado
- Dist. of Columbia
- Florida
- Georgia
- Illinois
- Kentucky
- Louisiana
- Massachusetts
- Maryland
- Missouri
- New Jersey
- New York
- Ohio
- Pennsylvania
- Texas
- Utah
- Virginia
- Washington

If your organization is tax exempt and you were charged sales tax with the December issue, please send us a copy of your tax exemption certificate immediately. Without this information, we are required to charge you sales tax.

PRICES:

New prices have gone into effect with this issue. The new price for silver will be $ .235 per microfiche and the new price for diazo will be $ .110.

UPS RATES:

UPS informed CBIS of their rate increases effective February 15. Domestic ground rate changes for commercial deliveries will result in an increase of 3.8% and these new rates will go into effect with the February issue.

QUESTIONS OR COMMENTS:

Should you have any further questions or comments, please feel free to contact me or one of our Customer Service Representatives at 1-800-443-ERIC or (703) 440-1400; or fax your comments to (703) 440-1408.

FEBRUARY 1993 ISSUE:

We are pleased to provide you with the enclosed shipment of the February 1993 issue of Resources in Education (RIE) microfiche. In addition, we will send the March 1993 issue in late March.

POST ISSUE REMAKES:

The following post issue remakes from the January 1993 are included within this shipment:

ED 349 027 1 of 2, 2 of 2
ED 349 130 2 of 3
ED 349 359 1 of 1

UPS RATES:

In our last letter, we informed you that UPS rates were increasing on February 15, 1993. Domestic ground rate changes for commercial deliveries have resulted in an increase of 3.8% and these new rates are now in effect.

PAYMENT TERMS:

This serves as a reminder that for those customers who have not established a prepaid Standing Order account, our payment terms are net 30 days from the invoice date. Although we understand that many institutions have difficulty complying with these terms, if payment is not received within 90 days, further shipments will be held until payment is received. A more detailed explanation of this policy will be included with each customer's invoice or statement.

QUESTIONS OR COMMENTS:

Should you have any further questions or comments, please feel free to contact me or one of our Customer Service Representatives at 1-800-443-ERIC or (703) 440-1400; or fax your comments to (703) 440-1408.

MAY 1993 ISSUE:

We are pleased to provide you with the enclosed shipment of the May 1993 issue of Resources in Education (RIE) microfiche. Included with this shipment is the 1966-1992 cumulative microfiche index and the 1992 Annual Index. This index is part of your subscription to the RIE microfiche and is a contractual requirement with the Department of Education.

The June 1993 issue is in production and will be shipped in late June.

CALIFORNIA TAX:

Due to the passage of a new California State tax law regarding subscriptions, we are no longer required to collect applicable state and local sales taxes for the monthly collections of RIE microfiche.

More information on this development will be forthcoming.

QUESTIONS OR COMMENTS:

Should you have any further questions or comments, please feel free to contact me or one of our Customer Service Representatives at 1-800-443-ERIC or (703) 440-1400; or fax your comments to (703) 440-1408.

JUNE 1993 ISSUE:

We are pleased to provide you with the enclosed shipment of the June 1993 issue of Resources in Education (RIE) microfiche.

The monthly COM version of the RIE index contains a new index section, Publication Type. This index section is arranged in alphabetical order by document title within the publication type code assigned. This new index section will be a permanent addition to the monthly COM index.

The July 1993 issue is in production and will be shipped in late July.

POST ISSUE REMAKES

The following post issue remakes are included with this shipment:

ED 346 033        1 of 1

1966-1992 Cumulative Subject Index
Fiche 0007
Fiche 0008

CALIFORNIA TAX:

As stated in last months memo, CBIS will not be collecting state and local taxes on your microfiche subscriptions. During the months of July and August, refund checks and credits will be issued to those institutions that have paid the sales tax or have been charged the sales tax on their invoices.

ERIC Directors Meeting  
(January 19-21, 1994)

The first ERIC Directors Meeting of 1994 was held at the St. James Hotel in Washington, DC. The agenda is shown as Attachment 1. There were numerous changes in the agenda, but the following major themes emerged: AskERIC and its striking success on the Internet; Document full text in electronic form as a future ERIC offering; Continued growth in Adjunct ERIC Clearinghouses; Fixed price contracts and Clearinghouse operational questions pertaining thereto; Questions concerning the adequacy of ERIC's coverage of the education literature (particularly the dynamic journal literature and the newly-added book literature).

Non-ERIC Digests on EDO File

The ERIC Program Office decided at the end of 1993 to open the ERIC Digest Online (EDO) file to Digest-like publications from any source. The ERIC Facility and ACCESS ERIC were asked to work together to identify non-ERIC candidates for the EDO file, to get them processed into the database, and to convert them into electronic full text for input to EDO.

These two Support Contractors, working together, sent out a joint memo in November 1993 to all Clearinghouses, outlining the plan and the Clearinghouse involvement in it. (See Attachment 2 for a copy of this memo and the Traveler Form to accompany and identify all non-ERIC EDO candidates.) Through March 1994, a total of 45 non-ERIC Digest candidates for EDO have been identified and put in process.

Department of Education  
Documents in the Federal Depository Library Program (FDLP)

After filming by EDRS, all documents accessioned by ERIC that are produced or sponsored by the U.S. Department of Education are forwarded to the U.S. Government Printing Office (GPO) for inclusion in the Monthly Catalog of U.S. Government Publications and in the document distribution program operated by the Federal Depository Library Program (FDLP). This has been useful for ERIC because the entries in the Monthly Catalog have included the ED number, thereby strengthening the use of this number in identifying and ordering Department of Education publications.

Unfortunately, the FDLP program has experienced funding problems and has fallen behind. As a result, the Superintendent of Documents sent a letter on December 23, 1993 to OERI requesting financial assistance for the Department of Education component of the FDLP program (see Attachment 3(A)). This letter raised many issues which were responded to in a letter from the head of OERI to the Superintendent of Documents on December 21, 1993 (see Attachment 3(B)). It was suggested that a meeting be held to resolve the many questions. As of this writing no meeting has yet been scheduled.

ACCESS ERIC

ACCESS ERIC's  
Host Becomes ESOT

Aspen Systems Corporation, the host organization for ACCESS ERIC, announced in August 1993 that it had been purchased by its employees through a stock ownership plan from its former owner, the Dutch firm Wolters Kluwer, n.v. Shown to the right is the notice to this effect that appeared in the Montgomery County Journal (August 1993).

"Know-It-All" Press Kit  
(in collaboration with EDRS)

The December 1993 issue of American Libraries contained a catchy new advertisement for ERIC developed jointly by ACCESS ERIC and EDRS (see Attachments 4(A) and (B)). The ad offered to send an ERIC "Know-It-All" kit in response to an 800 number call. The kit contained a variety of information, some pertaining to ACCESS ERIC products and some to EDRS products, as follows:

- AskERIC and Internet access points to the ERIC Database and ERIC Digests Online;
- Topical and subject-specific microfiche collections available from EDRS;
• Access points to ERIC;
• Document ordering from EDRS;
• ACCESS ERIC and EDRS produces (Striving for Excellence, the 1994 Conference Calendar, etc.);
• The ERIC: In Action video; and
• ERIC System Directory (addresses, phone numbers, and e-mail addresses for Clearinghouses and other components).

Striving for Excellence: The National Education Goals, 1993

To further assist educators in understanding the National Education Goals and strategies for reaching them, ERIC, assisted by ACCESS ERIC, has published a second volume in the “Striving for Excellence: The National Education Goals” series. Volume I was issued in 1991 (see ED-334 713). Volume II was published in October 1993 and was announced in the April 1994 issue of RIE (see ED 363 932). Volume II contains 39 separate ERIC Digests, written by the ERIC Clearinghouses. At 94 pages, it is available from ACCESS ERIC for $8.00. For announcement, see Attachment 5(A); for order form see Attachment 5(B).

Summary of ACCESS ERIC Activities During the Last Six Months (Including Electronic Network Activity)

ACCESS ERIC, like other ERIC components, reports periodically to its Advisory Board and to the ERIC Directors. Those communications are a useful summary of ACCESS ERIC activities during the period of time in question. (For the latest report, see Attachment 6(A)).

In addition, because ACCESS ERIC has recently been emphasizing the placement of ERIC data and files on electronic networks, such as America Online (AOL), a separate summary was recently prepared covering this activity (see Attachment 6(B)).

Employees buy Aspen Systems

BY STEVEN SLATER
Journal staff writer

Aspen Systems Corp. of Rockville—an information management and professional technical services firm—has been purchased by its employees through a stock ownership plan.

The move, made official Thursday, means that the 720 company employees stand to earn increased sums as retirement through stocks they acquire over years of employment, provided the value of the firm goes up.

"The whole purpose is the fruits of the labor go back to the employee," said Aspen President Albert Lampert. "That also means managers and employees are in the same rowboat."

The company was bought for an undisclosed sum from Wolters Kluwer n.v., a Dutch multinational publishing company. Aspen came to the area from Pittsburgh in 1978, when Kluwer bought the company.

The firm is organized into three operating divisions that provide a host of government, legal, and management services.

The company specializes in offering information on juvenile justice, health and education issues to social service providers. The most recent example is work done with the Atlanta-based Centers for Disease Control on distributing AIDS education.

Lampert said the operations and the majority of its employees—about 70 percent—will remain in the area.

Employees were permitted to buy the company through an Employee Stock Ownership Plan put into federal law in the early 1970s. About 11,000 such plans exist in the United States, Lampert said.

Based on the firm’s past success, the purchase is likely to be good news for workers. Earnings have grown $32 million during the past five years; and reported sales in 1992 were $60 million.
Directory of ERIC Information Service Providers (1994)

This Directory has become a standard ERIC product and an essential tool for doing ERIC-related user services and reference work. It lists all the major institutions that subscribe to the ERIC microfiche, ERIC tapes, and ERIC abstract journals, or that provide searches of the ERIC database for users. Complete contact point information is provided, including useful details of ERIC materials on site, hours of access, hardware and services available, etc. No other reference tool or information source covers this same ground.

The 1994 edition was completed at the end of 1993 and published in early 1994. It lists 1,042 ERIC information service providers (including 121 overseas). Copies are available free from ACCESS ERIC.

Directory of Education-Related Information Centers (May 1993)

As part of the effort to make ERIC systemwide products available in a variety of formats, this Directory has been published both in printed form and as a searchable magnetic disk (either 5.25" or 3.5"). The search feature is provided by Open Access Publishing Group. This is the first of several ACCESS ERIC publications to be made available in both printed and magnetic forms. See corresponding order form in Attachment 7.

Brochures

“For Education Information...Call ACCESS ERIC” the basic ACCESS ERIC brochure issued at the end of 1993 is shown as Attachment 8.

The long-awaited revision of “A Pocket Guide to ERIC” appeared in March 1994 and can be seen as Attachment 9. It is notable in including toll free numbers and Internet addresses for all ERIC components.

Order Forms

Order forms for all new ACCESS ERIC publications issued during the last six months or so can be found in Attachment 10.

EDRS

EDRS 1994 Price List

Effective January 1, 1994, EDRS was granted a price increase. Regular subscription microfiche increased from $0.11 to $0.12 per diazo fiche (an increase of 9%), and from $0.235 to $0.249 per silver film fiche (an increase of 6%). On-demand microfiche (one title) went from $1.18 to $1.23 (an increase of 4%). On-demand reproduced paper copies went from $3.30 (per 25 pages) to $3.53 (per 25 pages) (an increase of 7%).

Attachment 11(A) is the official 1994 EDRS price list for all categories of their microfiche and paper copy products. Attachment 11(B) is the simplified version of this list used as a “Special Announcement” for the front of RIE.

New EDRS Order Form

When prices change then order forms change. Simultaneously with the 1994 price changes, EDRS issued a new Order Form that incorporated the new prices, as well as new UPS and USPS rate charts for computing shipping costs. (See Attachment 12.)

ERIC Microfiche Collection - Geographic Distribution (U.S.)

Towards the end of 1993, subscriptions to ERIC microfiche broke the 900 barrier, after being in the 800-899 range for some time. Attachment 13 is a map of the U.S. showing the number of subscribers in each state or territory (for a total of 928). As the map illustrates, every U.S. state and territory have at least one ERIC microfiche collection.

EDRS Free “Hot Topic” Bibliographies and Selected Microfiche Subsets

EDRS has prepared annotated bibliographies on eleven current “hot topics” and has made the results available both in print form (on request) and in electronic form on various online networks. In addition, four of the bibliographies are also being made available as special microfiche subsets (at $195 each).
The eleven topics are as follows, with the titles involving microfiche subsets asterisked:

1. Facing Tough Issues Head On: Ridding the Schools of Drugs and Violence.
2. Sex Education in the Age of AIDS.
3. Going the Distance: Distance Learning Comes of Age.
4. Disabled Students in the Mainstreamed Classes: Supporting Inclusion, Fostering Success.
5. Learning Styles: Building on Strengths.
7. Integrating the Arts into Classroom Activities.
*10. Infusing Multicultural Education Into Today's Schools.

Announcements pertaining to these bibliographies and microfiche subsets appear as Attachment 14.

New EDRS Flyers and Brochures

In addition to the "hot topic" bibliographies, EDRS prepared a variety of flyers and brochures to fit into the joint ACCESS ERIC/EDRS "Know It All" kit: (1) "Obtain ERIC Documents Quickly and Affordably From EDRS"; (2) "Meet Specialized Needs with Subject-Specific ERIC Clearinghouse Collections"; (3) "Beyond Reading, Writing, and Arithmetic" (Bibliography); (4) "Know It All About ERIC Information Products Available from the ERIC Document Reproduction Service (EDRS)". Copies of these items can be found as Attachment 15.
Computer Sciences Corporation (CSC) Purchases ARC Professional Services Group (Facility Host)

On December 30, 1993, Computer Sciences Corporation purchased ARC Professional Services Group (ARC/PSG) from its previous owner Sequa Corporation, for approximately $65 million. ARC/PSG will be integrated into CSC's Systems Engineering Division (SED). The ERIC Facility will continue at its current location under CSC/SED and is looking forward to taking advantage of CSC's formidable technical resources (6000 staff in the Washington area alone).

ERIC Processing Policy for Electronic Journals and Electronic Articles

Most journals are available solely in printed form, some journals are available in both printed and electronic versions, and some are available only in electronic versions. ERIC is accustomed to processing printed journals, citing their publishers and price in the Source Journal Index, and citing their availability as reprints from sources such as University Microfilms Inc. (UMI).

The question has arisen as to whether and how ERIC should process purely electronic journals and their articles. The major issue is future availability of the text of an article. Once in print a journal is always available somewhere, but an electronic journal can disappear forever at the flick of a switch. Keeping in mind ERIC's responsibility to future users of the ERIC database, the ERIC Facility has devised a policy for the processing of electronic journals and their articles (see Attachment 17). This policy circulated for comment at ERIC Technical Meetings, was reviewed by the ERIC Technical Steering Committee, and has been approved by the ERIC Program Office.

ERIC in the Bowker Annual

Annually, the ERIC Facility is invited to prepare an article on ERIC for the Bowker Annual Library and Book Trade Almanac. This article summarizes basic database statistics for the past year cites the major accomplishments that occurred during the year, and describes the directions, initiatives, and trends of the system as a whole. The article covering 1993 (prepared for the volume printed in 1994) is shown as Attachment 18.

ORYX Press

CJJE Now Available on CD-ROM from Oryx Press

Oryx Press has published the paper form of Current Index to Journals in Education (CJIE) since 1979. Now, beginning with 1994, Oryx Press is offering CJIE in the form of a single CD-ROM disk that contains the entire CJJE file since its inception in 1969 (nearly 500,000 records), together with indexes to the records, the full text of ERIC Digests (over 1000 to date), and the Thesaurus of ERIC Descriptors. The subscription price is $199 per year, including quarterly updates. The Press Release and Brochure announcing and advertising this new product are seen in Attachment 19.

This new disk offering utilizes the KAware 2 Retrieval System developed by Knowledge Access International Inc.

CJJE Monthly Report

The CJJE Monthly Report provides for each issue of CJJE a count of the total records input from each Clearinghouse, the total journal issues processed by each Clearinghouse, and the total “one-shot” articles by each Clearinghouse. It is a useful management tool and provides each Clearinghouse with a basis of comparison for their CJJE-related work. (See Attachment 20 for the monthly reports covering October 1993-April 1994.)
CIJE Source Journal Index
Additions, Deletions, Changes

Changes to the Source Journal Index (SIJ) continue to be significant in quantity as the Clearinghouses under their new contracts adjust their coverages to better cover the journal literature of education. (See Attachment 21 for all SIJ modifications for the CIJE issues October 1993 - May 1994.)

AskERIC

AskERIC continues to generate a large volume of Internet activity and to attract the attention of the media. In March 1994, AskERIC was one of the winners in the 1994 Computerworld Smithsonian Award in the education and academia category. Attachment 22 provides the latest ERIC Networker issue describing AskERIC, a special AskERIC flyer developed for inclusion in the ERIC "Know It All" kit, and two AskERIC news items from The Syracuse Record (newspaper).

International

International ERIC

The International ERIC CD-ROM was finally offered by DIALOG in October 1993. The disk contains the Australian Education Index, British Education Index, and Canadian Education Index, as three separate files. Since ERIC has offered to help promote this product in the U.S., for the convenience of the Clearinghouses we are providing (as Attachment 23) various announcements of this product from DIALOG (and DataStar), Micromedia (Canada), Australian Council for Educational Research (ACER), and IBE.

Vendor News

DIALOG

DIALOG onDisc Software Adds Improved Data Compression and Save or Print Search Strategy

Beginning with the third quarter 1993 update disk, DIALOG added two enhancements to their DIALOG onDisc product: improved data compression and the ability to save your search history (strategy) with your search results. The announcement and the Technical Notes pertaining to these enhancements appear as Attachment 24(A).

DIALOG Removes Exceptional Child Education Resources (ECER) (File 54)

Effective November 1, 1993, DIALOG deleted the ECER file from their offerings. The DIALOG Chronolog issue of October 1993 (p.93:278) contained the announcement of this deletion.

DIALOG Announces New Fee Structure for Documents Downloaded Electronically

The April 6, 1994 New York Times contained an article on a new fee structure that DIALOG will announce in April 1994. The fees are based on a graduated scale of number of authorized users. The more end users of a document the larger DIALOG’s charge to the client. There is considerable debate concerning the workability of such a fee. The article appears as Attachment 24(B).

TARGET — A New Relevance Ranking Tool Added to DIALOG's Search Capabilities

At the Online/CD-ROM '93 Conference in Washington, DC, in November 1993, DIALOG previewed a new searching tool called TARGET that will permit searchers to rank their search output in order by its likely degree of relevance to their search topic. The ranking is based on the number of times that the terms searched on appear in the text of the records searched. The Press Release pertaining to TARGET is shown as Attachment 24(C).
SilverPlatter Changes to “No Return Disc” Policy

In December 1993, SilverPlatter announced that subscribers would no longer be required to return superseded CD-ROM discs. Instead, subscribers are required to destroy each superseded disc. The letter making this announcement appears as Attachment 25(A).

WinSPIRS Software for Microsoft Windows Environments

SilverPlatter is in the process of releasing a new generation of its SPIRS retrieval software called “WinSPIRS,” that is designed for operation with Microsoft’s Windows. Beta tests took place in 1993 at over 50 sites worldwide and advance copies have been made available to selected subscribers in early 1994. The Facility and the ERIC Program Office both have advance copies. The letter announcing this enhancement appears as Attachment 25(B).

SilverPlatter to Offer Online (including via Internet) Access to ERIC Database Using Intel-based Client Servers Located at Their Headquarters Office

The Internet is causing virtually every vendor to re-examine their products and their access strategies. SilverPlatter has announced a project that will provide online access to about ten (10) databases (of which ERIC is one) that will be mounted on Pentium-based servers located at their headquarters office. Retrieval will be based on the same software used on their disk products. Pricing will be based on the same fixed annual price that disk subscribers pay. (See Attachment 25(C).)

BRS

InfoPro Technologies Sold; BRS Goes to CD Plus

InfoPro Technologies (the new name that Maxwell gave to BRS) has been sold. The BRS Online Products division of InfoPro, the arm that offers online access to ERIC, was picked up by CD Plus (CD+). During 1994, CD Plus will replace the current BRS retrieval interface with their own OVID interface. There are said to be many similarities between the two that should make the transition fairly easy for users. The CD Plus announcement of the takeover and their plans for the future appears as Attachment 26(A). An excellent article on the takeover appeared in the magazine Searcher and is reprinted here as Attachment 26(B).

EBSCO

Local Titles (i.e., Titles you have in your local collection) and SDI Features Now Available on EBSCO’s ERIC Disk

EBSCO has announced two enhancements to their ERIC disk: (1) “Local titles” or the ability to flag those ERIC titles the subscriber has in their local collection; (2) Selective Dissemination of Information (SDI), i.e., providing users with information about specific titles that fit their interest profiles. (See Attachment 27.)

NISC

National Information Services Corporation (NISC)

ERIC has received an offer from NISC to make NISC disks containing the ERIC database (and the NISC retrieval software) available to ERIC for further distribution on a quarterly basis. This offer and its implications are under study by the ERIC Program Office, including the necessary details of any ERIC/NISC contractual relationship.

A copy of the offer letter is shown as Attachment 28(A), followed by a copy of the letter currently received by NISC subscribers to ERIC, the NISC flyer on “ERIC on CD-ROM,” the NISC flyer on its retrieval system, “ROM Wright,” a NISC background paper on itself, and a copy of the standard “Database Publishing With NISC” terms and conditions. (See Attachment 28(B).)
WELCOME ADDITIONS TO THE ERIC FAMILY

Within the past year, ERIC has welcomed into its “family” several children and grandchildren.

From the ERIC Facility...
Gail and John Mathews became grandparents of a grandson, Peter Bradford Edwards, thanks to their daughter and son-in-law, Laura and Sam, on January 15, 1994.

From ACCESS ERIC...
Carol and Bob Boston, became the proud parents of a daughter, Claire Eleanor, on March 29, 1994.

Barbara and Barak Stussman welcomed a daughter, Rebecca Susan, on April 11, 1994.

Belinda and Arman Taheri have been enjoying a son, Arman Alan, born on April 24, 1993.

From CS...
Ellie and Malcolm Macfarlane are the joyous grandparents of Michael Weber Macfarlane and Ian Douglas Rice.

From EA...
Adrienne Lannom is delighted with her first granddaughter (second grandchild), Haley Marie Lannom, born July 2, 1993.

From FL/ADJ-LE...
Jeannie Rennie’s happiness was doubled with the birth of twins, Cassandra (Cassie) Mae and Noah William, born on April 22, 1994.

From PS...
Dianne Rothenberg’s first grandchild, Jeffrey Micah Alexander Rothenberg, was welcomed on December 10, 1993.

From RC...
Velma Mitchell is thrilled that her son and his wife, Lee and Denise Mitchell, made her a first-time grandmother of a beautiful baby girl named Tessa Lee on August 22, 1993.

*******************************
Special “Grandmother” Category

Penny Rogers of EA was made a special “grandmother” when her mare presented her with a colt (a boy) barn-named Jesse. A Thoroughbred/Tennessee Walker, Jesse is a bay (brown with black mane, tail, and legs and a small white star between his eyes) and was born April 19, 1994, weighing in at 110 lbs. (The joy of new life comes in many wonderful forms!)

             Experience with the Book Literature?
             How Are We Covering the Journal Literature?
             How Are We Covering the Document Literature?
1:30–2:15    Potential ERIC System Improvements/New Priorities
2:15–3:00    Collaborative System Activities (Lynn Smarte)
3:00         Adjournment
Dear RIE Input Coordinator:

The popularity of ERIC Digests and of full-text electronic information retrieval has led the ERIC Program Office to decide to open the ERIC Digest Online file to Digest-like publications from any source. To implement this decision, the ERIC Program Office has funded projects at ACCESS ERIC and at the ERIC Facility.

ACCESS ERIC is to find and identify non-ERIC, Digest-like publications that are likely candidates for the expanded EDO file. In performing this task, ACCESS ERIC is searching for Digest-like documents that are already in the ERIC database and also for those that are not yet in. Letters have been sent to several OERI Labs and Centers and to over 100 non-government education information centers asking them to submit brief publications for consideration. As a result of this effort, ACCESS ERIC now has approximately 80 candidate “Digests” to consider.

As long as a publication can satisfy the basic criteria for being “Digest-like” (copy attached), it can now be considered a candidate for ERIC’s full-text file. A key requirement in this process is that any document selected for full-text treatment must first be processed for the ERIC database so that it can acquire a standard bibliographic description and an ED#.

The ERIC Facility will receive from ACCESS ERIC all EDO candidates not yet in the database, will assign them to the appropriate Clearinghouse, and will otherwise put them through standard processing. The Facility will clearly identify these items as EDO candidates (via a brightly colored Digest Traveler Form, copy attached). While it is probably unlikely that many of these items will be rejected, they still must pass the Clearinghouse selection process and any required reproduction release forms must be obtained. The Traveler Form provides for the possibility of rejection by the Clearinghouse for either RIE or EDO.

While these candidates are in process, ACCESS ERIC will take steps to obtain an electronic version of the text. In some cases, the electronic text of publications may be available for the asking directly from the authors/sources. If it is not, ACCESS ERIC is responsible for scanning or keying all approved items. When the electronic version is ready, it will be sent to the Facility to be married up with the regular EDO records and placed on the EDO Master File.

The Clearinghouses can further support this EDO expansion effort by themselves identifying brief, non-ERIC publications that meet the criteria and that are suitable candidates for EDO. We urge everyone in the system to keep their eyes open for short, top quality synthesizing-type publications on high interest topics. The Digest Traveler Form can be used by Clearinghouses to submit their own candidates for the EDO file.

The ACCESS ERIC staff and ERIC Facility staff with principal responsibility for this project are listed below. If you have any questions now or in the future, please contact these individuals.

ERIC
DIGEST FILE CANDIDATE
(TRAVELER FORM)

I. DOCUMENT IDENTIFICATION

Title:

II. FROM ERIC FACILITY TO CLEARINGHOUSE

Clearinghouse to which assigned:

Date sent to Clearinghouse:

The document cited above (to which this form is attached) has been selected as a candidate for ERIC's Digest File (EDO), containing in electronic form the full text of important, useful, and brief, synthesizing documents. The criteria for selecting such Digests are printed on the reverse side of this form. This form should be left on the document throughout the processing cycle in order to properly identify it and reflect decisions made along the way.

III. FROM CLEARINGHOUSE TO ERIC FACILITY

The document cited above:

has been selected for RIE Yes ☐ No ☐ has been selected for EDO Yes ☐ No ☐

Clearinghouse Accession Number Assigned: ____________________________
RIE Shipment Date: ____________________________

If for any reason the Clearinghouse does not choose to process a document sent to them by the Facility for RIE (or for EDO), please cite reason here and return document to Facility:

IV. FULL TEXT STATUS

The Clearinghouse is not required at this stage to obtain the full text of this document in electronic form or even to determine whether such text is available from any source. However, if the electronic full text is obtained at time of original acquisition (e.g., because it was offered by the source), this data should be sent to the Facility in accordance with the directions for EDO found in the ERIC Processing Manual (EPM), Section IX (i.e., the file must be in ASCII and may be submitted via floppy disk or Internet file transfer). The electronic full text should be transmitted the same week the document is shipped for RIE. A paper copy version of the electronic full text should be sent (with a logsheet) for proofing purposes.

If the inputting Clearinghouse does not send the electronic full text, ERIC support contractors will endeavor to obtain it for all approved items from the source or by scanning/keying.

Full Text (Electronic) of this document is:

☐ provided by Clearinghouse ☐ available from source ☐ not available from source ☐ availability of full text is unknown ☐ must be obtained via scanning/keying

Comments: ____________________________

Volume 18, No. 1, May 1994
Attachment 2(B)-1
Criteria for Selecting Non-ERIC Digest-Like Documents

1. BREVITY

The document must be small, brief, succinct. Ideally it will be around the size of an ERIC Digest (i.e., 1500 words). Depending on the paper format, this can amount to 2-7 pages, rarely more.

2. SYNTHESIS

The document must be a truly synthesizing document. It must attempt to boil down a lot of information on a topic to a single document. It must use multiple sources and a broad base of resources. It should not be just the view of one person or organization.

3. BALANCE

When a topic enjoys several reputable schools of thought or points of view, or when a topic is controversial, the document should not take sides or play favorites, but should present a balanced view of the topic.

4. AUTHORITATIVENESS

The document should be authoritative. It should be created by a recognized expert or authority or by an organization that is similarly equipped with credentials in the area. The ideal source organization is a national or international association in whose scope the topic falls.

5. FURTHER RESOURCES/FURTHER READING

There is a limit on how much information can be compressed to 2-3 pages. If the reader/user wants to know more, the "Digest" must lead them to the next level of resources or text. Where can the user find additional information?

6. TEXT PREDOMINATES OVER GRAPHICS

The message of the "Digest" must be contained primarily in its text. Graphics can be difficult if not impossible to render as ASCII "full text". If the message of the "Digest" were primarily in its "pictures", this might make it ineligible for the EDO file (at least at this stage of development).

EFF-067 (11/93)
December 2, 1993

Ms. Sharon P. Robinson  
Assistant Secretary for the Office of  
   Educational Research and Improvement  
U.S. Department of Education  
555 New Jersey Avenue, NW  
Washington, DC 20208

Dear Ms. Robinson:

I am writing to you in an attempt to ensure that Government publications issued by the Educational Resources Information Center (ERIC) continue to be available to the public through the Federal Depository Library Program (FDLP).

Since the early 1980's, ERIC and the U.S. Government Printing Office (GPO) have informally cooperated to deliver the Federally-funded or published information announced in Resources in Education (RIE) to the depository libraries in microfiche format. Under a very unique arrangement, ERIC has supplied hard copies of the publications to GPO. GPO then converted the publications to microfiche format and distributed diazo microfiche to the depository libraries.

However, primarily due to budgetary pressures, this arrangement has broken down and no ERIC publications have been distributed through the FDLP since those titles announced in the August 1992, issue of RIE. There are now in excess of 2,085 eligible titles which have not been distributed to the depository libraries.

Responsibility for the operation of the FDLP is assigned to GPO's Superintendent of Documents under Title 44, Chapter 19, of the United States Code. As required by 44 U.S.C. Section 1902, "[g]overnment publications, except those determined by their issuing components to be required for official use only or for strictly administrative or operational purposes which have no public interest or educational value and publications classified for reasons of national security, shall be made available to depository libraries through the facilities of the Superintendent of Documents for public information."
In addition, as stated in Section 1903, "[t]he cost of printing and binding those publications distributed to depository libraries obtained elsewhere than from the Government Printing Office, shall be borne by components of the Government responsible for their issuance." I understand that the ERIC publications are not produced or procured through GPO. Therefore, this office is not authorized to absorb the cost of the copies required for the depository libraries.

In order to maintain the availability of this information to the public, I am requesting your assistance in establishing a mechanism through which ERIC can supply the requisite 358 copies of each of these publications in either paper or microfiche format.

We would suggest an arrangement similar to one established with the Department of Energy's Office of Scientific and Technical Information (OSTI) in Oak Ridge, Tennessee. Under this arrangement, set out in an Interagency Agreement, OSTI produces microfiche for each of the 358 depository libraries selecting its materials and mails those microfiche directly to the libraries using address information which we provide. GPO reimburses OSTI for the postage and handling involved. Another alternative would be for your office to deliver the copies to our distribution area in GPO and we will send the materials to the selecting libraries with our normal shipments. Because the number of copies required for depository distribution may change, we would ask that ERIC staff contact our Acquisitions Section at least quarterly to determine the current quantity.

I look forward to hearing from you and appreciate your assistance in maintaining the flow of Federally-funded education information to the American public. To discuss these issues, or for additional information on the FDLP, please contact Mr. J.D. Young, Director of the Library Programs Service, on 202-512-1114.

Sincerely,

WAYNE P. KELLEY
Superintendent of Documents

Copy to:
Bernadine A. Hoduski, Professional Staff Member
Joint Committee on Printing
Ted Brandhorst, Director ERIC
Processing and Reference Facility
Mr. Wayne P. Kelley  
Superintendent of Documents (Stop SD)  
United States Government Printing Office  
Washington, DC  20402

Dear Mr. Kelley:

Thank you for your letter of December 2, 1993, in which you suggest some strategies to ensure that publications issued by the Educational Resources Information Center (ERIC) continue to be available to the public through the Federal Depository Library Program (FDLP).

I am sorry to learn that the FDLP has not been distributing Department of Education materials announced in the ERIC database for the past year and a half, and I am certainly willing to work with you to rectify this situation. However, the cost implications for the Department of Education are substantial. You mention that there is a backlog of over 2,085 eligible titles; we estimate that the cost of providing 358 copies (for each selecting depository library) in microfiche of all these titles would be approximately $115,000! Needless to say, this is not an expense for which we had budgeted.

I believe that we must closely examine the situation before we decide on a course of action. In particular, I would like to raise the following issues:

- In 1993, 1,620 documents produced or supported by the Department of Education were announced in ERIC. However, of that number, only 147 were actually published by ED; the remaining documents represent reports prepared by contractors and grantees, commissioned studies, reports of government-sponsored panels, and so on. For the most part, these are not publications of the government; in fact, many of them carry disclaimers which distance their findings and recommendations from official federal policy. I would like some clarification from your office on GPO's definition of a "government publication."

- Of the 147 Department of Education publications, many were in fact printed by GPO, and thus should be available to the FDLP through your office. We would have to look closely at our publications records to document the specific ED publications issued through GPO.

- Finally, it may be that many of the 358 selecting depository libraries already have complete subscriptions to the ERIC microfiche collection, and do not really need the copies provided through the FDLP. We can compare your list of participating depository libraries with the list of our subscription customers to determine whether there is significant overlap.
Since a decision on how best to proceed will be based on the answers to the above questions, I suggest that a meeting may be in order. I will ask Dr. Robert Stonehill, the director of the ERIC Program, to contact Mr. J. D. Young, director of the GPO's Library Programs Service, to arrange such a meeting.

Thank you for bringing these problems to my attention. I am sure that working together we can ensure that the Federal Depository Library Program can once again have full access to the publications of the Department of Education.

Sincerely,

Sharon P. Robinson
Assistant Secretary

cc: Bernadine A. Hoduski
Robert M. Stonehill
MEMORANDUM

To: ACCESS ERIC Liaisons

From: Lynn Sm arte

Date: February 2, 1994

Subject: "Know It All" Kits

Here's a copy of the ERIC "Know It All" Kit that was developed by EDRS and ACCESS ERIC. As you probably know, the kit was created primarily to respond to requests generated by an advertisement in the December issue of American Libraries. The kit includes information on:

* The AskERIC Service and Internet Access Points to the ERIC Database and ERIC Digests Online
* Topical and Subject-Specific Microfiche Collections available from EDRS
* Access Points to ERIC
* Document Ordering from EDRS
* ACCESS ERIC and EDRS Products (Striving for Excellence, the 1994 Conference Calendar, etc.)
* The ERIC: In Action Video
* ERIC System Directory (addresses, phone numbers, and e-mail addresses for clearinghouses and components)

As you can see, the kit is targeted to librarians, rather than individual ERIC users, but you may want to distribute it to some appropriate individuals or groups. The pocket format makes it easy for you to add your clearinghouse brochures. We have printed enough for each clearinghouse to have at least 50 Kits, but there's a good chance we can provide more if you need them. To request copies, contact anyone at ACCESS ERIC. Please let us know, for our records, to whom you plan to distribute them.

cc: Pat Coulter
    Nancy Johnson
Huh?

Volume 18, No. 1, May 1994  Attachment 4(B)-1  192  ERIC Administrative Bulletin (EAB)
Striving for Excellence: The National Education Goals, 1993

October 1993—To further assist educators in understanding the National Education Goals and to expand their knowledge of possible strategies to reach them, the Educational Resources Information Center (ERIC), sponsored by the U.S. Department of Education's Office of Educational Research and Improvement, has published a second volume of Striving for Excellence: The National Education Goals.

Consisting of 39 separate ERIC Digests, written by each of the 16 subject-specific ERIC Clearinghouses, this booklet provides research and program findings that relate to the six Goals: school readiness, high school completion, student achievement and citizenship, science and mathematics, adult literacy and lifelong learning, and safe, disciplined, and drug-free schools. The Digests speak to a wide variety of educators—from school administrators to librarians, counselors, adult educators, and teachers involved in preschool to postsecondary education settings. They summarize current education literature and research in a concrete, practical manner. Here are some of the ways in which they can assist you.

- Parents will learn more about how to prepare their children for school and increase their academic achievement.
- Teachers will be introduced to strategies for helping at-risk students succeed, instructional tools for teaching reading, social studies, mathematics, and science, and models for integrating academic and vocational education.
- School Administrators will gain new perspectives on developing school discipline and substance abuse policies and increasing their students' level of motivation.
- Librarians, Counselors, and Teacher Educators will learn how each Goal relates to their role and specific ways in which they can contribute toward meeting the Goals.
- Adult Educators will be introduced to exemplary workplace literacy programs and innovative approaches designed to meet the special needs of adults in higher education.

This 94-page booklet is available for $8, including postage and handling. Feel free to reproduce it, in whole or in part, and distribute as you wish. To order, contact ACCESS ERIC, 1600 Research Boulevard, Rockville, MD 20850, 1-800-LET-ERIC (538-3742). Purchase orders are welcome from schools, college and universities, and state and local agencies only. Other organizations and individuals may use MasterCard, VISA, or a check. All orders must be prepaid.
Striving for Excellence:

Status Report
ERIC Directors Meeting
January 20-21, 1994

AMERICA ONLINE

America Online. In Year 1, ACCESS ERIC worked with America Online to create an ACCESS ERIC bulletin board in the Teachers' Information Network of the Resource Pavilion. The bulletin board includes a message center and full text of such documents as A Pocket Guide to ERIC, the ACCESS ERIC introductory brochure, Parent-Teacher Brochures, The ERIC Review, and topical packages prepared with the Clearinghouses. Topical packages contain Digests, related information centers, and mini-searches. Some documents have been downloaded hundreds of times since their initial posting.

Because of the popularity of ACCESS ERIC's bulletin board, America Online recently consented to displaying it more prominently and reorganizing the section. In addition to maintaining existing files in Year 2, ACCESS ERIC staff will continue to enhance its section by:

- Preparing additional topical packages (InfoGuides) for display in a special section.

STATUS: ACCESS ERIC has developed 10 InfoGuides for a library section of America Online. Additional InfoGuides that have been developed for the Internet AskERIC free library and for SERVE-Line will also be added to America Online.

- Providing for online access to the ERIC Calendar of Education-Related Conferences and the ERIC Directory of Education-Related Information Centers.

STATUS: ACCESS ERIC has formatted and loaded the first three months of the 1994 ERIC Calendar of Education-Related Conferences. The remaining nine months are currently being formatted and will be uploaded in the coming weeks. As soon as the 1994 ERIC Directory of Education-Related Information Centers is available, it too will be formatted and uploaded.

- Posting bibliographies prepared by the ERIC Document Reproduction Service to increase paper copy orders.

STATUS: ACCESS ERIC has formatted and uploaded 11 bibliographies provided by EDRS. These bibliographies were downloaded a total of 121 times during the month of December.
Encouraging AOL management to provide direct access to the ERIC database for AOL users.

STATUS: ACCESS ERIC has had several discussions with AOL management concerning providing the ERIC database to AOL members. These discussions have turned from purchasing the last few years of the ERIC Tapes to providing stylized access to an existing Internet access point to the ERIC database.

ERIC Digests (1985–present) - ACCESS ERIC has formatted and uploaded all Digests added to ERIC during 1992.

Parent-teacher brochures - ACCESS ERIC has formatted and uploaded all past and present parent-teacher brochures (13).

InfoGuides on current topics - (discussed above)

ACCESS ERIC brochure - Has existed on AOL for just over a year and has been downloaded more than 500 times.

A Pocket Guide to ERIC - Has existed on AOL for just over a year and has been downloaded more than 650 times.

ERIC Calendar of Education-Related Conferences - The first three months of 1994 have been formatted and uploaded.

ERIC Directory of Education-Related Information Centers - The Information will be formatted and loaded as soon as it becomes available.

Selected Internet resources and digests - ACCESS ERIC has loaded a number of introductory Internet resources (ERIC-related and non-ERIC). These resources have been downloaded nearly 2,000 times.

Selected bibliographies on popular topics - (Discussed above)

Message area - ACCESS ERIC’s current message area acts as a discussion group for people interested in education in general and ERIC. Activity in this area has increased in the last few months with new messages being posted daily.

LEVEL OF USER ACTIVITY ON AMERICA ONLINE:

To date, more than five thousand files have been downloaded from the ACCESS ERIC area on AOL. Over the last three months, we have averaged 431 downloaded files as well as hundreds of other accesses into an area that is not currently trackable.
NEA ONLINE

NEA Online is a private area on America Online for the exclusive use of National Education Association members. We are collaborating with NEA and the ERIC Clearinghouse on Teaching and Teacher Education to increase ERIC awareness and make a limited number of ERIC materials available to NEA members. In Year 1, ACCESS ERIC sent Conclusion Brochures, InfoGuides, and other general ERIC information to NEA to be uploaded in an ERIC section. ACCESS ERIC will continue to provide ERIC information to NEA for its ERIC section within the guidelines established by AOL. Exhibit 24 presents the schedule for NEA online.

Current status by type of information/service:

Brochures- ACCESS ERIC has provided NEA Online with all of their past and present Parent-Teacher Brochures, A Pocket Guide to ERIC, and the ACCESS ERIC Brochure.

InfoGuides- ACCESS ERIC has provided NEA Online with five of their most popular InfoGuides.

In the works- ACCESS ERIC has provided NEA Online with a list of ERIC Digests in order for NEA to choose the Digests that they feel best respond to the needs of their users. NEA, in turn, would provide us with the recent back issues (electronic and paper copies) of Doubts and Certainties for the EDO expansion project. Initial discussions have also taken place concerning the possibility of expanding AskERIC services to NEA Online members by placing an AskERIC icon within NEA Online.
AMERICA TOMORROW

America Tomorrow. America Tomorrow Leadership Information Service (ATLIS) and ACCESS ERIC collaborated in Year 1 to offer general ACCESS ERIC and ERIC information such as the Pocket Guide, Striving for Excellence, and the Conclusion Brochures online. Files on America Tomorrow are limited to no more than 2 pages because of the nature of the service.

Staff will continue to send updated publications information to keep America Tomorrow users aware of new contact and access information. In addition, staff are working with Jack Moore of ATLIS and Open Access to distribute ACCESS ERIC’s reference and referral databases on searchable diskette. In Year 1, Mr. Moore prepared a prototype diskette of the Directory of Education-Related Information Centers. ACCESS ERIC will begin marketing this product in September and will work with Mr. Moore to develop and distribute the Calendar of Education-Related Conferences beginning in December. If these searchable diskette products are popular with users, we will collaborate to produce other ERIC products in the same format.

Current status by type of information/service:

Parent-teacher brochures

A Pocket Guide to ERIC

Striving for Excellence Digests

InfoGuides - All InfoGuides developed for SERVE-Line and America Online have been provided to America Tomorrow

LEVEL OF USER ACTIVITY ON AMERICA TOMORROW:

This information is not currently available, but we have requested it.
CompuServe

CompuServe. ACCESS ERIC will work with CompuServe to establish and operate an ACCESS ERIC library and message center. ACCESS ERIC’s section will include InfoGuides—packets of information related to CompuServe users’ frequently asked questions. Each InfoGuide will include the full text of several ERIC Digests, information from ACCESS ERIC’s Education-Related Information Centers Database on agencies the user can contact for more information, and other pertinent information. The ACCESS ERIC section will also include Conclusion Brochures, Digests, conference information, information centers, and ERIC news.

Current status by type of information/service:

Selected ERIC Digests

Parent-teacher brochures- All past and present brochures have been made available (13).

ACCESS ERIC brochure

A Pocket Guide to ERIC- Currently available.

The ERIC Review (Volume 2, Issue 3)- Currently available

Selected bibliographies on popular topics- All eleven EDRS bibliographies have been added to CompuServe.

Message area- ACCESS ERIC’s current message area acts as a discussion group for people interested in education in general and ERIC. Activity in this area has been nearly constant since ACCESS ERIC went live with new messages being posted daily.

LEVEL OF USER ACTIVITY ON CompuServe:

The ACCESS ERIC section on CompuServe contains a number of files provided by ACCESS ERIC and OERI staff. Downloads in this section currently average about 100 per month. The message center is currently being used on a daily basis.
GTE-Educational Services

GTE-Education Services (GTE-ES). For the past 3 years, Aspen has had a relationship with GTE-ES to house four ERIC and ACCESS ERIC information databases:

- ERIC Digests Online (produced by the ERIC Facility)
- ERIC Information Service Providers
- ERIC Calendar of Education-Related Conferences
- ERIC Directory of Education-Related Information Centers

In Year 1, staff discussed with GTE the possibility of offering the Catalog of ERIC Clearinghouse Publications online in conjunction with an online ordering system. This service would be one more way ACCESS ERIC could promote Systemwide publications and increase orders for all components. ACCESS ERIC will work in cooperation with GTE-ES to implement this system in Year 2.

Current status by type of information/service:

ERIC Digests Online
ERIC Database (last 6 years)
ERIC Information Service Providers
ERIC Calendar of Education-Related Conferences
ERIC Directory of Education-Related Information Centers

LEVEL OF USER ACTIVITY ON GTE:

Averages 10 hours per month.
SERVE-Line

SERVE-Line. ACCESS ERIC will continue to work with SouthEastern Regional Vision for Education (SERVE) to establish and operate an ACCESS ERIC section on SERVE-Line, its toll-free online bulletin board system for educators. ACCESS ERIC's section of the bulletin board will include InfoGuides—packets of information related to SERVE-Line users' frequently asked questions. Each InfoGuide will include the full text of two or three ERIC Digests along with information from ACCESS ERIC's Education-Related Information Coaters Database on agencies the user can contact for more information.

SERVE-Line: There are currently 31 Frequently Requested Topics (FRT's) for users to download.

LEVEL OF USER ACTIVITY ON SERVE-LINE:

There have been 172 downloads in the month of December, the first operational month.

ACCESS ERIC and ERIC/IR Collaboration

AE/IR Collaboration to Promote Electronic Access to ERIC. Given the growing interest in accessing ERIC through the Internet, ACCESS ERIC will continue to collaborate with the ERIC Clearinghouse on Information & Technology to publicize access information. To date, IR has prepared three reproducible help-sheets on accessing ERIC and the Internet:

- Access Points to ERIC: Update 1992;
- Internet Basics; and
- Internet Access Points to ERIC.

Another information sheet describes AskERIC. ACCESS ERIC staff mail, fax, and read copies of these instructions to users on demand at a rate of approximately 20 requests per week. We will continue to collaborate with IR to publicize information about AskERIC and public access to ERIC via the Internet, while observing the wishes of those sites that wish to limit Internet access to their patrons.

In addition, ACCESS ERIC and IR staff will cooperate to standardize offerings available to ERIC users on the Internet and commercial networks.
ERIC Directory of Education-Related Information Centers
Now Available on Disk!

Looking for a speaker for your next PTA meeting? Trying to find new instructional materials and teaching ideas for your classroom? Need parent-oriented resources for your new drug prevention program? You can locate organizations that provide information, materials, and services that address these and other education-related topics by searching the 1993 ERIC Directory of Education-Related Information Centers on disk. The Directory includes profiles for 400 federally and privately funded national and regional organizations that provide such services and products as:

- reference and referral
- online searches
- publications
- technical assistance
- outreach
- information dissemination
- information synthesizes
- audiovisual materials

Each entry includes the director and/or contact person and a brief description of the organization, its audiences, services, types of publications, and access procedures. You can search for any word, phrase, or concept that might appear anywhere in an organization’s entry. Pull-down menus for beginners and mnemonic commands for experts support searching at all skill levels. And the Directory on disk supports full boolean logic (AND, OR, NOT), allowing you to further refine your search specifications. Once you’ve identified organizations of interest, you can read about them on your computer screen, print them, or copy them to disk.

The ERIC Directory of Education-Related Information Centers on disk operates on any IBM-compatible computer with DOS 2.0 or higher and 512k RAM (minimum). It offers fast performance—even on older computers equipped with 286 processors. Your hard disk must have at least 1.5 megabytes of space free. A color monitor is recommended but not essential.

The ERIC Directory of Education-Related Information Centers on disk is priced at $25. Hard copy of the Directory is also available for $20 and includes an organization name index, subject index, and geographic index. Order both and receive a $5 discount for the set, bringing your cost to $40. Free technical support is available from OPEN ACCESS Publishing Group, the company that created the electronic version of the Directory. Order yours today!!

YOUR GATEWAY TO THE NATION'S EDUCATION INFORMATION NETWORK

ACCESS ERIC is your gateway to ERIC—the Educational Resources Information Center. Education practitioners, librarians, policymakers, researchers, parents, and students can stay abreast of the most up-to-date developments in the education field through ERIC. ERIC's database, the world's largest single source of education information, contains citations of more than 750,000 documents and journal articles on education research and practice. You can access information on a wide range of subjects such as:

- Adult Literacy
- At-Risk Youth
- Computer Use in Education
- Drug-Free Schools
- Education Reform
- Financing College
- Health Education
- Learning Disabilities
- National Education Goals
- Preschool Programs

ERIC materials are available to the public at about 3,000 locations worldwide. The subject authorities within the ERIC network are the 16 clearinghouses and related adjunct clearinghouses, each of which specializes in different areas of education. Within their subject areas, the ERIC Clearinghouses acquire significant literature for the database, publish research summaries and other products, and provide reference and referral services. This national education information network is supported by the Office of Educational Research and Improvement, U.S. Department of Education.

Reference Services
Link You to Education Information

ACCESS ERIC is a toll-free service to keep you informed of the wealth of information offered by the ERIC network and other education sources. ACCESS ERIC staff answer questions, refer callers to education sources, and provide information about the ERIC network.

ACCESS ERIC can help you use ERIC services and resources to enhance your education, career, or everyday life. For example:

- If you are a first-time or returning college student, ACCESS ERIC can send you financial aid information produced by the ERIC Clearinghouse on Higher Education and provide the telephone number for the Federal Student Aid Information Center.
- If you need to evaluate a curriculum or develop instructional materials, ACCESS ERIC can refer you to an ERIC Information Service Provider for a search of the ERIC database for relevant materials and recommend education-related information centers as resources.
- If you are a concerned parent who wants to be more involved in your child's education, ACCESS ERIC can help you identify important information about schools and gifted programs, send you a variety of pamphlets on questions commonly asked by parents about their child's education, and refer you to education information centers for additional publications and reference and referral services.

BEST COPY AVAILABLE
CALL ACCESS ERIC 1-800-LET-ERIC ... Resources Tailored to Your Information Needs

ACCESS ERIC produces several products in convenient formats to help you access and use the information available through the ERIC network. Educators, administrators, and policymakers will want to keep A Pocket Guide to ERIC at hand for quick reference. It provides addresses and telephone numbers for the ERIC subject-specific clearinghouses and tells where to order ERIC database documents. All About ERIC contains a more comprehensive and detailed description of the ERIC network. It is used by professors and librarians to give students an overview of ERIC services and products. It's also helpful to individuals interested in learning more about ERIC, performing an ERIC search, or ordering publications.

In addition to A Pocket Guide to ERIC and All About ERIC, other free and low-cost systemwide awareness publications available from ACCESS ERIC include:

The ERIC Review—This free journal provides education practitioners (especially teachers, professors, principals, and educators) with research and news they can use. It announces important ERIC developments, new products, and services; it also presents recent research findings and critical trends and issues in education.

Conclusion Brochure series—Written for parents and teachers, these popular pamphlets cover such timely topics as school meetings, gifted students, preschool programs, saying no to drugs, and parent involvement. Useful, easy-to-read, and free, the pamphlets offer answers to commonly asked questions, organizations to call for help, and additional reading material. Call 1-800-LET-ERIC for current titles.

ERIC Users' Interchange—This free newsletter published twice a year, provides technical information on recent ERIC database developments to libraries, education media centers, and ERIC information service providers. It also provides general ERIC network news and ordering information for recent ERIC System publications.

Striving for Excellence—This compilation of 30 ERIC Digests is organized around the six National Education Goals. It summarizes research and program findings related to school readiness; high school completion; student achievement and citizenship; science and mathematics education; adult literacy and lifelong learning; and safe, disciplined, and drug-free schools. (Vol. 1, $5)

Resource and Referral Products Link You to Education Information

The ERIC System also offers a number of education resource and referral products, available in print and electronically. These include:

Catalog of ERIC Clearinghouse Publications—Educators, librarians, parents, and students will find nearly 500 current education titles—including teaching guides, bibliographies, research summaries, monographs, and more—published by ERIC's 16 subject-specific clearinghouses. Many of the publications are free; others are available at a minimal cost. The Catalog also includes ordering information and prices. ($10)

ERIC Calendar of Education-Related Conferences—The Calendar helps educators identify conferences important to their...
CALL ACCESS ERIC 1-800-LET-ERIC

areas of interest. It provides information for nearly 500 international, national, regional, and state events on a broad range of topics in education. Subject, sponsoring organization, and geographic indexes help you locate conferences of interest quickly and easily. ($20)

ERIC Directory of Education-Related Information Centers—This useful reference for librarians, researchers, students, and agencies that make frequent referrals lists 350 organizations providing information relevant to education. It includes organizations covering 250 education-related topics—from achievement to youth programs—that offer a multitude of services such as online searches, technical assistance, publications, reference, and referral. ($20)

Directory of ERIC Information Service Providers—Research organizations, libraries, and schools will want a copy of this free directory for patrons and staff. It lists 1,000 agencies and organizations (including addresses, telephone numbers, and services) that provide computerized searches of the ERIC database, have a sizable collection of ERIC microfiche, and/or subscribe to and collect ERIC publications.

ERIC Digests Online—ERIC Digests Online (EDO) puts the full text of more than 500 two-page research syntheses at your fingertips. The Digests, produced by the ERIC Clearinghouses, cover a full array of timely education topics.

For information about online access to the Education-Related Information Centers, Education-Related Conferences, ERIC Information Service Providers, and ERIC Digests Online databases, call 1-800-LET-ERIC.
**What Is ERIC?**

The Educational Resources Information Center (ERIC) is a national information system designed to provide users with ready access to an extensive body of education-related literature. Established in 1966, ERIC is supported by the U.S. Department of Education, Office of Educational Research and Improvement.

The ERIC database, the world's largest source of education information, contains more than 800,000 abstracts of documents and journal articles on education research and practice. You can access the ERIC database online via commercial vendors and public networks, on CD-ROM, or through the printed abstract journals, Resources in Education and Current Index to Journals in Education. The database is updated monthly (quarterly on CD-ROM), ensuring that the information you receive is timely and accurate.

**Who Uses ERIC?**
- Teachers
- Administrators
- School board members
- Librarians
- Students
- Journalists
- Professors
- Researchers
- Parents
- Community members

**The ERIC System**

The ERIC system, through its 16 subject-specific clearinghouses, associated adjunct clearinghouses, and support components, provides a variety of services and products that can help you stay up to date on a broad range of education-related issues. Products include research summaries, bibliographies, reference and referral services, computer searches, and document reproduction.

ACCESS ERIC keeps you informed of the wealth of information offered by the ERIC components (listed on pages 12-17) and other education-related organizations. With its toll-free number, 1-800-LET-ERIC, ACCESS ERIC makes it easy for you to locate and obtain education information.

This booklet describes the resources available through ERIC and serves as a quick reference for answers to the most commonly asked questions, including:

- Where do I call for education information? ........................................p. 3
- What products does the ERIC system offer? .........................................p. 4
- How can I access the ERIC database? ................................................p. 7
- How can I order ERIC documents and journal articles? ..............................p. 9
- How can I submit my work to the database? ........................................p. 11
- How can I contact ERIC components? .............................................p. 12
ERIC Reference and Referral Services

With the world's largest education database as their primary resource, ERIC staff can help you find answers to education-related questions, refer you to appropriate information sources, and provide relevant publications. Each year, ERIC staff answer more than 120,000 inquiries. Questions concerning the following should be directed to the sources listed:

Subject-Specific Topics
Subject-oriented questions should be directed to the particular ERIC Clearinghouse most closely associated with the subject matter involved (see list of clearinghouses on pp. 12–17) or call ACCESS ERIC at 1–800–LET–ERIC for a referral.

Computer Searches
Many people prefer to do their own ERIC searches at a library or through a commercial vendor of public network via their personal computer. If you need assistance, ERIC Clearinghouses will help you with your search strategy. To find out how you can access the ERIC database with a personal computer and modem, call ACCESS ERIC at 1–800–LET–ERIC or send an e-mail message to accerc@inet.ed.gov.

ERIC Clearinghouse Publications
In addition to selecting and preparing documents for the ERIC database, the ERIC Clearinghouses produce reports, summaries, digests, and other free and low-cost resources within their subject area scopes. Contact the clearinghouse most closely associated with your interest area for its publication list or call ACCESS ERIC to order the Catalog of ERIC Clearinghouse Publications ($10).

ERIC Systemwide Products

ERIC produces numerous products to help you access and use the information in the ERIC database.

Abstract Journals
ERIC produces on a monthly basis two abstract journals that are essentially print versions of the database. Resources in Education (RIE), which announces current education-related documents, can be obtained from the U.S. Government Printing Office (GPO) (202–783–3238). An annual subscription is $73; semiannual indexes are $30.* Current Index to Journals in Education (CIJE), which announces education-related journal articles, is available through Oryx Press (1–800–279–ORYX). The monthly subscription is $235; semiannual cumulations are also $235.

All About ERIC
This handy reference booklet provides basic information about searching the ERIC database and detailed descriptions of each component in the ERIC system and its products and services. Free copies are available from ACCESS ERIC (1–800–LET–ERIC).

Directory of ERIC Information Service Providers
This Directory lists the address, telephone number, and ERIC offerings (for example, CD-ROM, microfiche, Thesaurus) for more than 1,000 organizations that offer ERIC access to users. To order a free copy, call any ERIC component.

ERIC Database Tapes
Institutions interested in purchasing computer tapes of the ERIC database and programming their own search interface may purchase tapes from the ERIC Facility (1–800–799–ERIC).

The ERIC Review
This journal keeps practitioners informed of important ERIC and education-related developments. For a free copy, contact ACCESS ERIC (1–800–LET–ERIC).

Thesaurus of ERIC Descriptors
The complete list of index terms used by the ERIC system, with a cross-reference structure and rotated and hierarchical displays, is available from Oryx Press (1–800–279–ORYX) for $60. This publication is very helpful in developing a database search strategy and is generally available at libraries and other locations where the ERIC database can be searched.

* All prices current as of February 1994; prices subject to change without notice.
The ERIC database is one of the most widely used bibliographic databases in the world. Last year, users from 90 different countries performed nearly half a million searches of the database. The ERIC database and related databases can be searched via the online and CD-ROM vendors listed below. Individuals with computer and modem can also access ERIC through many public and commercial computer networks. Call 1-800-LET-ERIC for details.

The ERIC system also offers AskERIC, an Internet-based question-answering service for teachers, library media specialists, administrators, and parents developed by the ERIC Clearinghouse on Information & Technology. If you have questions about K-12 teaching and learning, child development, information technology, or educational administration, send them to askeric@erl.lib.umn.edu. Drawing on the extensive resources of the ERIC system, AskERIC staff will respond with an answer within 45 working hours. Similar AskERIC services are under development on several commercial networks such as America Online and CompuServe. For more information, contact ACCESS ERIC.

Reprints of ERIC Materials

ERIC Documents

The ERIC Document Reproduction Service (EDRS) is your resource for obtaining microfiche or paper copies of documents from the ERIC database, allowing you to:
- Access the latest education information for preparing papers, theses, position papers, reports, and bibliographies.
- Locate full-text documents.
- Build a low-cost education library.

In ERIC, documents are cataloged with an "ED" followed by six digits. EDRS provides full-text copies of most documents found in ERIC. ERIC's microfiche collection is available by monthly subscription from EDRS. EDRS also sells specialized microfiche collections and paper copies of individual documents on request. Fax and express mail service are available. To obtain price or ordering information, call EDRS at 1-800-443-ERIC.

ERIC Journal Articles

Journal articles are cataloged in ERIC with an "EJ" followed by six digits. You can obtain copies of many of these journals at a research library or through Interlibrary Loan. The two companies that provide reprint services for most journal articles found in ERIC are listed below.

University Microfilms International (UMI)
Article Clearinghouse
300 North Zeeb Road
P.O. Box 1346
Ann Arbor, MI 48106-1346
Toll Free: (800) 521-0500, Extension 2786
Telephone: (313) 761-4700
Fax: (313) 665-7075

Institute for Scientific Information (ISI)
Genuine Article Service
3501 Market Street
Philadelphia, PA 19104
Toll Free: (800) 523-1850
Telephone: (215) 386-0100
Fax: (215) 306-6262

To obtain journals that do not permit reprints and are not available from your library, write directly to the publisher. Addresses of publishers are listed in the front of each Current Index to Journals in Education (CIJE).

ERIC Directory of Education-Related Information Centers

and

1994 ERIC Calendar of Education-Related Conferences

Now Available in Print and on Searchable Disk!

ERIC Directory of Education-Related Information Centers

Education encompasses many disciplines and a broad range of topics. When you need education-related information there are many agencies to turn to—so many, in fact, that it is often difficult to locate quickly the appropriate source for your information needs. Now, one publication can help you quickly locate education-related resources. The ERIC Directory of Education-Related Information Centers lists alphabetically 450 national and regional organizations that provide services that include information dissemination, reference and referral, technical assistance, online searching, and outreach. For ease of use, the Directory also includes several indexes: Subject, Geographic, and Master Organization.

1994 ERIC Calendar of Education-Related Conferences

Interaction among educators is vital to the education profession, and conferences, meetings, and workshops are among the best ways to keep abreast of current trends, methods, and technologies in the field. The ERIC Calendar of Education-Related Conferences is designed to help you identify conferences in your areas of interest.

The 1994 Calendar includes 525 international, national, and regional events scheduled for the 1994 calendar year. Events are listed chronologically by date, and each entry provides information such as the site, sponsor, contact person, registration details, hotel rates, estimated attendance, topics covered, and audience.

For ease of use, the Calendar includes several indexes: Sponsor and Conference Name, Geographic, and Subject. Order yours today!!
ACCESS ERIC is pleased to announce that the ERIC Directory of Education-Related Information Centers and ERIC Calendar of Education-Related Conferences are now both available on searchable diskette. You can search for any word, phrase, or concept that might appear anywhere in an entry. Pull-down menus for beginners and mnemonic commands for experts support searching at all skill levels. And the Directory and Calendar on disk support full Boolean logic (AND, OR, NOT), allowing you to further refine your search specifications. Once you've identified organizations or conferences of interest, you can read about them on your computer screen, print them, or copy them to disk.

The ERIC Directory of Education-Related Information Centers and ERIC Calendar of Education-Related Conferences on disk operate on any IBM-compatible computer with DOS 2.0 or higher and 512K RAM (minimum). They offer fast performance—even on older computers equipped with 286 processors. Your hard disk must have at least 1.5 megabytes of space free for each disk. A color monitor is recommended but not essential.

The ERIC Directory of Education-Related Information Centers and ERIC Calendar of Education-Related Conferences on disk are priced at $25 each. Print versions of the Directory and Calendar are also available for $20 each, and both include organization name, subject, and geographic indexes. Free technical support is available from OPEN ACCESS Publishing Group, the company that created the electronic versions of these reference products. Order yours today!!

Return this order form to: ACCESS ERIC, 1600 Research Boulevard, JC-AL, Rockville, MD 20850-3172, 1-800-LET-ERIC.

1994 Catalog of ERIC Clearinghouse Publications

Catalog of ERIC Clearinghouse Publications

Educators, librarians, parents, and students will find more than 1,350 current education titles, including teaching guides, bibliographies, research summaries, digests, monographs, and more—published by ERIC's 16 subject-specific clearinghouses. Most of the publications are free; others are available at a minimal cost. The Catalog includes an extensive subject index, prices, and ordering information.

Striving for Excellence: The National Education Goals, Volume II

This compilation of 39 ERIC Digests, written by the ERIC Clearinghouses, provides research and program findings that relate to the six National Education Goals: ready, high school completion, student achievement, and citizenship, science, and mathematics, adult literacy and lifelong learning, and safety, health, and drug-free schools.

The Digests speak to a wide variety of educators—from school administrators to librarians, adult educators, and teachers involved in preschool to post-secondary education. They summarize current education information, literature, and research in a concise, practical manner. This 94-page booklet is available for $8. Feel free to reproduce it in whole or in part, and distribute it as you wish.

Striving for Excellence: The National Education Goals, Volume I is also available for $5.

New ERIC Training and Reference Tools Now Available

ACCESS ERIC, the promotional and outreach arm of the Educational Resources Information Center (ERIC) System, sponsored by the U.S. Department of Education's Office of Educational Research and Improvement, announces the availability of new ERIC training tools and reference publications.

ERIC: In Action, A new video on ERIC—Your Education Information Network!

Looking for an effective way to introduce the Educational Resources Information Center (ERIC) to your audience in plain, straightforward language? Check out ERIC: In Action, the new video produced by the ERIC Clearinghouse on Information & Technology. With library and education communities in mind, ERIC: In Action offers viewers a broad perspective on ERIC as their premier source for education information.

Available for $17, this 15-minute video covers four major topics:

- Basic structure
- Major benefits
- Key index features
- Options for locating materials

ERIC/IT staff members take turns presenting each section and offer insight into ERIC's evolution since 1966 into the electronic education information network. ERIC: In Action provides an excellent lead-in to further discussion of the many avenues of access to the ERIC system, including:

- the ERIC database, which includes bibliographic citations and abstracts of 800,000 education-related documents and journal articles and is available in print, online, on CD-ROM, and via the Internet;
- the subject-related ERIC Clearinghouses, which offer educational information support such as ERIC search strategy assistance and publications; and
- ACCESS ERIC, the reference and referral component of ERIC that operates the toll-free number, 1-800-LET-ERIC, and disseminates general information about ERIC.

Whether you're a librarian providing training for new ERIC users, or a library or education professor hoping to introduce your students to this powerful education resource and shed some light on the many facets of ERIC, this video is for you! Order your copy today!
ERIC: In Action

A new video on ERIC—Your Education Information Network!

Looking for an effective way to introduce the Educational Resources Information Center (ERIC) to your audience in plain, straightforward language? Check out ERIC: In Action, the new video produced by the ERIC Clearinghouse on Information & Technology with the library and education communities in mind.

ERIC: In Action offers viewers a broad perspective on ERIC as their premier source for education information. The 15-minute video covers four major topics:

- Basic structure
- Major benefits
- Key index features
- Options for locating materials

ERIC/IT staff members take turns presenting each section and offer insight into ERIC’s evolution since 1966 into the electronic education information network.

ERIC: In Action provides an excellent lead-in to further discussion on the many avenues of access to the ERIC system, including:

- the ERIC database, which includes bibliographic citations and abstracts of 800,000 education-related documents and journal articles and is available in print, online, on CD-ROM, and via the Internet;
- the subject-related ERIC Clearinghouses, which offer education information support such as ERIC search strategy assistance and publications; and
- ACCESS ERIC, the reference and referral component of ERIC that operates the toll-free ERIC number, 1-800-LET-ERIC, and disseminates general information about ERIC.

Whether you’re part of an education organization providing training for new ERIC users, or a library or education professor hoping to introduce your students to this powerful education resource and shed some light on the many facets of ERIC, this video is for you! Order your copy today!

Return this form to: ACCESS ERIC, 1600 Research Boulevard, Rockville, MD 20850-3172, 1-800-LET-ERIC.

INTERNATIONAL:

- Based on International Postage Rates in effect
- Allow 160 Microfiche or 75 Paper Copy pages per pound
- Specify exact mail classification desired

DEPOSIT ACCOUNTS

Customers who have a continuing need for ERIC Documents may open a Deposit Account by depositing a minimum of $300.00 (Domestic Customers); $500.00 (International Customers). Once an account is opened, ERIC Documents will be sent upon request, and the account charged for the actual cost and postage. A statement of the account will be furnished with each order.

STANDING ORDER SUBSCRIPTION ACCOUNTS

Subscription Orders for documents in the monthly issues of Resources in Education (RIE) are available on microfiche from EDRS. The microfiche are furnished on diazo film and without protective envelopes at $0.120 per microfiche. If you prefer silver halide film, the cost is $0.249 per microfiche, and each microfiche is inserted into an acid-free protective envelope. Prices are effective January 1, 1994 and are subject to change without notice. Shipping charges not included. A Standing Order Account may be opened by depositing $2,400.00 or submitting an executed purchase order. All orders placed from outside the domestic U.S. must be prepaid. The cost of each issue and shipping will be charged against the account. A monthly statement of the account will be furnished.

BACK COLLECTIONS

Back collections of documents in all issues of RIE since 1966 are available on microfiche at a unit price of $0.146 per microfiche. The collections are furnished on diazo film without envelopes. Prices are valid through December 31, 1994, and do not include shipping charges and applicable taxes. For pricing information, write or call toll-free 1-800-443-ERIC.

GENERAL INFORMATION

1. PAPER COPY (PC)

A Paper Copy is a xerographic reproduction, on paper, from microfiche of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

2. PAYMENT

The prices set forth herein do not include any sales, use, excise, or similar taxes that may apply to the sale of microfiche or paper copy to the customer. The cost of such taxes, if any, shall be borne by the customer.

Payment terms are NET THIRTY (30) DAYS by check or money order payable to CBIS in U.S. Dollars drawn on a U.S. Bank.

3. REPRODUCTION

Permission to further reproduce a copyrighted document provided hereunder must be obtained from the copyright holder, usually noted on the front or back of the title page of the copyrighted document.

4. CLAIMS POLICY

CBIS Federal will replace products returned within 6 months of delivery due to reproduction defects or incompleteness caused by EDRS.

This represents a 5.1% increase in Standing Order Customers from 12/91 to 12/93. This increase is attributable to an increase in foreign customers and an increase domestically of new Education Departments being started. Also, a number of schools are working in a current subscription into their budget and adding back collections as money becomes available either through grants or the budget process.

• On Demand Orders received increased from 9,421 in 1992 to 9,570 in 1993, an increase of 1.5%.

• Placed ad in ALA's American Librarian in cooperation with ACCESS ERIC. Ad ran in the December 1993 issue. Copies of "Know It All Kit" are available for your review.
Here's your opportunity to "Know It All" about ERIC information products available through the only document supplier for the Educational Resources Information Center (ERIC) — EDRS.

EDRS packages ERIC information to suit your needs and budget. Select materials from a treasure trove of information for practitioners, researchers, and parents — including teaching guides, instructional materials, research reports, issue papers, project/program descriptions, and much, much more.

You can easily and cost-efficiently expand your library's information resources and services. Choose from an entire ERIC collection on microfiche, subject-specific Clearinghouse collections, topical collections from ERIC, and on-demand delivery of a single ERIC document.

So what more do you need to know to "Know It All" about specific EDRS offerings? Read on and find out.

Did you know?

There are over 350,000 documents from 1966 to the present in the entire ERIC collection on microfiche. Call 1-800-443-ERIC to find out more about this invaluable collection.
ERIC Clearinghouse Collections

Subject-specific Clearinghouse collections are the answer to your information needs, if you have:

→ Specific reference requirements for your user community, or
→ Limited resources to build an education library.

There is sure to be at least one Clearinghouse collection that addresses your interests among the 16 subject areas of literature covered.

Clearinghouse collections can be acquired by years or even by specific months. Subscriptions enable subscribers to receive microfiche copies of documents added to their Clearinghouse collections on a monthly basis. Call 1-800-443-ERIC to find out more.

Clearinghouse backfile collections and subscriptions are available.
Topical microfiche collections are a time savings for busy administrators and researchers in the educational field. Our timeliness, school. collection, alternative assessment, black history, a cumulative index indicates an alt. other microfiche collections currently include: a microfiche survey.

An EDRS deposit account can be established with a deposit of $300. A deposit account eliminates the need for individual checks or purchase orders with each order. Simply provide your deposit account number when you order. EDRS deducts the amount from your account and sends you a statement. Call 1-800-443-ERIC to set up your account.

Did you know?
EDRS offers a free and affordable way to obtain individual documents from ERIC. Order documents on either microfiche or paper by calling EDRS toll-free at 1-800-443-ERIC, seven days a week, 24 hours a day. You may also order by fax, mail, or on-line services via DIALOG or OCLC.

EDRS provides timely regular delivery (typically three business days from receipt of order to shipping) or rush delivery on request via fax transmission or express shipping. For the greatest ease in document ordering, open an EDRS deposit account.

Access EDRS "hot topics" bibliographies from ERIC on-line via the Internet. Check out the AskERIC electronic library via this Internet address: askeric@ericir.syr.edu.

Find out how societal trends have influenced school changes over the past 25 years through EDRS's special publication tribute to ERIC. Call 1-800-443-ERIC to order your copy of "Beyond Reading, Writing, and Arithmetic: A Retrospective Look at How Schools Have Responded to Changing Societal Needs."

Scan the bibliographic records of all ERIC documents since 1966 using the ERIC Cumulative Index on microfiche.

Other Products
(Journal articles are not included.) Call 1-800-443-ERIC for the current price of this index.

Support and protect your ERIC collection with microfiche-related equipment and supplies from EDRS, including microfiche readers and reader/printers, cabinets, and protective envelopes. Call 1-800-443-ERIC to equip your library today.

MEMORANDUM

From: Nancy Johnson
To: ERIC Clearinghouse and Support Component Staff
Date: September 22, 1993
Subject: EDRS Free ERIC Bibliographies

I am sending each Clearinghouse and support component a set of our most recent "hot topic" bibliographies. We compile these bibliographies each time a new release of SilverPlatter arrives using a very straightforward strategy of searching on major descriptors. The trickier searches, where multiple related descriptors might be appropriate, are performed by our education consultant Laura Colker.

The bibliographies are sent free-of-charge to requestors on our mailing list, primarily practitioners and school and media center librarians. These resources are not definitive compilations. Rather, they offer practitioners a handy reference to some documents in ERIC on 11 current topics. The three bibliographies that accompany our topical microfiche collections are compiled with the greatest care, however, and with at least an initial consultation with someone at a Clearinghouse.

These free resources are very popular. So popular, in fact, that we have stopped publicizing their distribution in paper copy. To reach more people (and save money, too) we are beginning to offer bibliographies over public and commercial networks. See them this fall on OERI's INet, American Online, CompuServe, and AskERIC. More networks will be added in the future.

If you have any suggestions for enhancing search strategies or improving our product (for minimal cost, of course), or if you have any questions or comments, please call me at 1-800-443-ERIC. I would be happy to talk with you about our nontraditional resources for practitioners.

The Ins and Outs of Alternative Assessment: Outcome-Based Education and Other Innovations in Testing

In response to the many requests from school systems for information on outcome-based education (OBE) and other alternatives to traditional student assessment, the ERIC Document Reproduction Service (EDRS) is pleased to offer a special collection on this topic. Designed to meet the informational needs of teachers and administrators, this collection presents the state-of-the-art on OBE, performance-based education, classroom assessments, and student portfolios. Some of the topics included in this collection are:

- Outcome-based education as an approach to improving school quality;
- Case studies (e.g., Pasco, Washington and the Minnesota model) of states and districts where OBE has been adopted; and
- Comparisons of alternative assessment protocols with traditional testing techniques.

Infusing Multicultural Education Into Today’s Schools

Throughout the United States, school districts and State Departments of Education have been making a commitment to multicultural education. This new special collection from the ERIC Document Reproduction Service (EDRS) offers teachers and administrators the most recent and relevant information on the topic. The collection includes specific resources, bibliographies, and activities on multicultural topics; evaluation reports of efforts of states and districts to implement multicultural curricula; and, step-by-step instruction on addressing the needs of a diverse student body through multicultural programming. Topics covered in this special collection include:

- Infusing multiculturalism into the arts, literature, history, and other subject areas, including physical education;
- Appreciating African-American, Native American, Asian, and Hispanic cultures; and
- A theoretical rationale for including multicultural education in school programming.

Restructuring America’s Schools: A Blueprint for Action

Restructuring is central to educational reform. This new special collection from the ERIC Document Reproduction Service (EDRS) includes all documents on restructuring added to ERIC since 1988. This resource offers "hands-on" assistance to educational practitioners in all schools in their quest to better serve students. The collection includes exemplary programs, case studies, and actual guidelines for facilitating change at the local level. Examples of topics covered include:

- Developing a vision for change;
- The role of the principal in effecting reform;
- Teacher empowerment; and
- Decentralized budgeting and decision making.

Black History, Culture, and Literature: Curricula, Resources, and Activities in Honor of African-Americans

During Black History Month and throughout the year, Black achievements are a featured part of school programming. In this special collection from the ERIC Document Reproduction Service (EDRS), papers, curriculum guides, activities, and biographies are available for use in preschool-Grade 12 classrooms and school libraries. The materials in this collection include:

- Biographies of famous and lesser known African-Americans who contributed to America’s growth and culture, ranging from W.E.B. DuBois to Spike Lee;
- Articles on the history and survival of Black colleges;
- Essays for and against the need for an Afrocentric curriculum;
- Bibliographies of African-American authors and poets; and
- Activity guides for infusing Black history into existing K-12 curricula.

These microfiche collections are offered on an annual subscription basis for a cost of $195 each. The full subscription package for each includes the base collection, quarterly updates of newly released documents, a microfiche storage box, and hardcopy index (also updated quarterly).

Springfield, Virginia 22153-2852
A Celebration of ERIC

"Beyond Reading, Writing, and Arithmetic: A Retrospective Look at How Schools Have Responded to Changing Societal Needs."

proudly presented by
The ERIC Document Reproduction Service

operated by
Cincinnati Bell Information Systems Inc.

Price: $35

This special publication is a tribute to the Educational Resources Information Center (ERIC), a national information system that provides ready access to an extensive body of education-related materials. To celebrate ERIC's enormous contribution in building and preserving the world's educational literature since its inception in 1966, this book is a compilation of articles that examines how societal trends have influenced school changes over the past 25 years.

This book presents and analyzes these articles in each of four major trend areas to show what was going on in schools from 1966-70, 1971-75, 1976-80, 1981-85, and 1986-present. The four major trends, which have caused the American school to enhance its role beyond the basic core curriculum, are:

- The high rate of child poverty,
- The influx of non-English speaking workers and immigrants,
- The "epidemic" rates of teenage pregnancy, and
- The widespread use of drugs and alcohol.

The evolution of the school's mission is shown through discussions of the major changes in the school's curriculum, including programs of compensatory education such as Head Start; bilingual education and ESL; sex education; and drug, alcohol, and values education.

To place your order: call EDRS at 1-800-443-ERIC.
Meet Specialized Needs With Subject-Specific ERIC® Clearinghouse Collections

Why Order Subject-Specific Clearinghouse Collections?
Subject-specific document collections compiled by the 16 ERIC Clearinghouses are the answer to your information needs, if you have:
- Specific reference requirements for your user community, or
- Limited resources to build an education library.

There is sure to be at least one Clearinghouse collection that addresses your interests from among the 16 subject areas of literature covered. (Refer to the listing on back side.)

ERIC has over 25,000 teaching guides and student instructional materials, as well as information on timely issues in education, for school administrators and practitioners. Universities, colleges and community colleges rely on ERIC collections for their wealth of materials on specialized educational topics.

Clearinghouse Collections Committee
The 1990 ERIC Clearinghouse Collections Committee is responsible for developing the information or clearinghouses as a part of the ERIC Network. These Clearinghouses support the continuing needs of the educational community by acquiring the most significant educational literature available within their subject areas. They select the highest quality and most relevant material for inclusion in the ERIC database and document collection.

What Kind of Information Makes Up a Clearinghouse Collection?
Each individual Clearinghouse collection offers a broad variety of information, which may include:
- Teaching Guides
- Instructional Materials
- Research Reports
- Issue Papers
- Conference Proceedings
- Project/Program Descriptions
- Bibliographies
- Tests and Measurement Instruments

In addition, ERIC Clearinghouse collections are treasure troves of information on current "hot topics" in education, such as multiculturalism, integrating the arts into classroom activities, alternative assessment, distance learning, and other education technology issues.

Who Can Help You Acquire Your Clearinghouse Collections?
Call 1-800-443-ERIC (3742) for additional information.

ERIC Document Reproduction Service (EDRS) specializes in reproducing ERIC Clearinghouse collections by the way they were acquired by years or even by specific items, if desired. An annual subscription with EDRS to your Clearinghouse collections is available.

Subscriptions enable subscribers to receive microfiche copies of documents added to their Clearinghouse collections on a monthly basis.

BEST COPY AVAILABLE

245
ERI Clearinghouses

Adult, Career, and Vocational Education (ACA)
All levels of adult and continuing education from basic literacy training through professional skills upgrading. The focus is upon factors contributing to the purposeful learning of adults in a variety of life situations usually related to adult roles (e.g., occupation, family, leisure time, citizenship, organizational relationships, retirement, and so forth).

Assessment and Evaluation (AHE)
All aspects of tests and other measurement devices. The design and methodology of research, measurement, and evaluation. The evaluation of programs and projects. The application of tests, measurement, and evaluation devices/instruments in education projects and programs.

Community Colleges (CC)
Development, administration, and evaluation of two-year public and private community and junior colleges, technical institutes, and two-year branch university campuses. Two-year college students, faculty, staff, curricula, programs, support services, libraries, and community services. Interaction between two-year colleges and business/industrial/community organizations. Articulation of two-year colleges with secondary and four-year postsecondary institutions.

Counseling and Student Services (CSS)
Preparation, practice, and supervision of counselors at all educational levels and in all settings. Theoretical development of counseling and guidance, including the nature of relevant human characteristics. Counseling techniques and procedures. Group processes (counseling, therapy, dynamics) and casework.

Curriculum and Instruction (CII)
Curriculum and instructional programs and research/evaluation efforts that address the education of students in rural schools or districts, small schools wherever located, and schools in districts wherever located that serve American Indian and Alaska Natives, Mexican Americans, and immigrants, or that have programs related to outdoor education. Includes the cultural, ethnic, linguistic, economic, and social conditions that affect these education institutions and programs, formation programs, including related services, that train educators to work in such contexts.

Early Education and Child Care (EECC)
Early childhood education and care of children from birth through age eight. Includes the development of programs and services for early childhood education and care, including infant/toddler programs; family services; parent involvement; and education and care for children with disabilities. Includes the development of standards, research, and evaluation.

Elementary and Secondary Education (EEES)
All aspects of educational development and improvement in grades K-12. Includes the planning, organization, and implementation of curriculum; instruction; assessment; and student learning. Includes the development and implementation of innovative instructional strategies and technologies. Includes the development and implementation of new instructional models.

English Language Learning and Language Development (EEL)
All aspects of the acquisition of English language skills and development of language abilities. Includes the planning, organization, and implementation of instructional programs for English language learners. Includes the development and implementation of new instructional models.

Mathematics (EM)
All aspects of the teaching and learning of mathematics for all students, from preschool through the secondary level. Includes the development and implementation of instructional programs for English language learners. Includes the development and implementation of new instructional models.

School Libraries and Information Services (SLS)
All aspects of library and information services. All aspects of information management and information technology related to education.

Languages and Linguistics (LL)
Languages and language sciences. All aspects of second language instruction and learning in all commonly and uncommonly taught languages, including English as a second language. Bilingualism and multilingual education. Cultural education in the context of second language learning, including intercultural communication, study abroad, and international educational exchange. All areas of linguistics, including theoretical and applied linguistics, sociolinguistics, and psycholinguistics.

Reading, English, and Communication (REE)
Reading and writing, English (as a first language), and communications skills (verbal and nonverbal), kindergarten through college. Includes family or intergenerational literacy. Research and instructional development in reading, writing, speaking, and listening. Identification, diagnosis, and remediation of reading problems. Speech communication (including forensic), mass communication (including journalism), interpersonal and small group interaction, oral interpretation, rhetoric and communication theory, and theater/ drama. Preparation of instructional staff and related personnel in all the above areas.

Rural Education and Small Schools (RESS)
Curriculum and instructional programs and research/evaluation efforts that address the education of students in rural schools or districts, small schools wherever located, and schools in districts wherever located that serve American Indian and Alaska Natives, Mexican Americans, and immigrants, or that have programs related to outdoor education. Includes the cultural, ethnic, linguistic, economic, and social conditions that affect these education institutions and programs, formation programs, including related services, that train educators to work in such contexts.

Special Education (SES)
Curriculum and instructional programs and research/evaluation efforts that address the education of students with disabilities. Includes the development and implementation of instructional programs for English language learners. Includes the development and implementation of new instructional models.
Obtain ERIC® Documents Quickly and Affordably From EDRS

Microfiche and Paper Copies of ERIC Documents
The ERIC Document Reproduction Service (EDRS) provides you with fast and affordable copies of ERIC documents. Even library patrons with access to an ERIC Collection will find EDRS's fulfillment service the most practical means of getting copies of numerous or lengthy documents that are so time-consuming to reproduce in the library.

Orders can be easily placed by calling a toll-free number, faxing or mailing an order form, or on-line through Dialog or OCLC. ERIC document fulfillment provides:
- Timely mail delivery (typically three business days from receipt of order to shipping)
- Rush delivery upon request via fax transmission and Express Shipping
- Walk-in orders filled while you wait
- Multiple copies of documents

For the fastest and easiest document ordering, open a deposit account with EDRS for a minimum deposit of $300.00. A deposit account eliminates the need for individual checks or purchase orders with each order. Simply provide your deposit account number when you request a document; EDRS deducts the amount from your account and sends you a statement.

Call 1-800-443-ERIC for more information.

Cumulative Microfiche Indexes
EDRS can also provide you with a set of six indexes, categorized by subject, author, title, sponsoring institution, ERIC descriptor, and ERIC identifier. Along with the purchase of these indexes, you receive abstracts of all documents added to ERIC during the year.

To receive copies of ERIC documents that you locate with your indexes, simply call EDRS at 1-800-443-ERIC.
Establishment of the Ford Clinical Schools Clearinghouse as an ERIC Adjunct Clearinghouse

INTRODUCTION

Clinical schools, which are more widely known as professional development schools (PDSs), are among the most prominent and promising initiatives to emerge from efforts to reform schools, teaching, and teacher education. Significant resources have been invested in conceptualizing, developing, and implementing these schools. Funds from foundations (e.g., Ford, AT&T, and Exxon Foundations), state legislatures (e.g., Texas, Massachusetts), school districts, universities, and corporations have produced scores of PDS demonstration projects.

In January 1991, the Ford Foundation awarded to the American Association of Colleges for Teacher Education (AACTE) a grant to establish a Clinical Schools Clearinghouse (CSC) as a component of the Ford Foundation Clinical Schools Project (CSF). Oversight of the project has been shared by AACTE and the ERIC Clearinghouse on Teaching and Teacher Education (ERIC-SP).

The Clinical Schools Clearinghouse has four major purposes:

1. to provide a nationally identified source of information on clinical schools, professional development schools, partner schools, professional practice schools, and other similar institutions;

2. to acquire and process information on clinical schools and include this information in the ERIC database;

3. to produce publications on various aspects of clinical schools; and

4. to conduct a national survey of clinical schools.

Since CSC's inception, the staff has witnessed a growing interest in PDSs among members of the education community and others. It has also become evident that there is a need for an easily accessible source of information on PDS-related literature, which can be utilized by practitioners, researchers, policy makers, teacher educators, legislators, and others.

During its collaboration with the ERIC Clearinghouse on Teaching and Teacher Education (ERIC-SP), CSC has engaged in a number of activities that have advanced the objectives of both clearinghouses. Listed below is a sample of these activities.
Collaborative Activities between the ERIC Clearinghouse on Teaching and Teacher Education and the Clinical Schools Clearinghouse

1. The Clinical Schools Clearinghouse is a member of the Professional Development Schools Network, coordinated by the National Center for Restructuring Education, Schools, and Teaching (NCREST). The Network consists of representatives of networks, consortia, or other programs involved in clinical schools, professional development schools, etc. CSC's affiliation with both ERIC-SP and NCREST led to NCREST becoming an ERIC-SP partner in 1993.

2. Acquisition activities by the Clinical Schools Clearinghouse have resulted in standing acquisitions arrangements between the ERIC Clearinghouse on Teaching and Teacher Education and two institutions: the Holmes Group and the East Longmeadow/University of Massachusetts Professional Development School.

3. Clinical Schools Clearinghouse publications and factsheets have been disseminated during ERIC-SP workshops and conference exhibits. In addition, CSC staff have worked at ERIC-SP exhibits to answer questions, perform ERIC searches, and solicit materials related to clinical schools.

4. To date, CSC has solicited and received more than 300 information pieces, the majority of which have been abstracted and indexed, or are in the process of being abstracted and indexed, for inclusion in the ERIC database. Prior to January 1991, when CSC began operating, there were fewer than 25 identified PDS-related resources in ERIC. At present, there are approximately 140 on the CD-ROM versions of the database and more on-line.

5. To facilitate retrieval of PDS-related materials from the ERIC database, CSC and the ERIC Clearinghouse on Teaching and Teacher Education researched and prepared a submission to the central ERIC facility requesting the inclusion of the term "professional development schools" in the Thesaurus of ERIC Descriptors. Other terms, reflecting concepts and practices of particular relevance to PDSs (e.g., "teacher development") have also become ERIC identifiers, as has "professional development schools," through the efforts of CSC.

6. CSC staff have produced two ERIC digests, four mini-bibliographies, and an annotated bibliography on topics related to professional development schools. These publications feature ERIC sources and are disseminated through ERIC-SP's distribution network. (Attachment 1 lists CSC publications. An asterisk indicates publications that have been abstracted and indexed for ERIC.)

The mutually beneficial collaboration between the ERIC Clearinghouse on Teaching and Teacher Education and the Clinical Schools Clearinghouse will be strengthened and enhanced with the establishment of CSC as an ERIC adjunct clearinghouse.
RATIONALE

1. Official position as an ERIC adjunct clearinghouse will result in CSC being listed in directories, descriptions, and listings of ERIC system components, thereby publicizing CSC's existence and function. It is anticipated that this wider circle of knowledge will increase the number of transfers and initial submissions of PDS-related documents to the ERIC Clearinghouse on Teaching and Teacher Education.

2. Official position as an ERIC adjunct clearinghouse will enable CSC to collaborate with ERIC-SP on several planned publications, including an analysis of data gathered in a national survey of PDSs to be conducted by CSC during 1993-1994.

3. Adding the Clinical Schools Clearinghouse as an adjunct clearinghouse to the ERIC Clearinghouse on Teaching and Teacher Education will provide ERIC-SP with additional sources of conferences, meetings, other outreach opportunities, and with supplemental personnel to cover these activities.

4. CSC's growing network of contacts with PDS projects and institutions engaged in developing or researching PDSs will provide ERIC-SP with additional sources for standing acquisitions arrangements, clearinghouse partners, documents and authors and reviewers for ERIC-SP publications.

5. Adding the Clinical Schools Clearinghouse as an adjunct clearinghouse to the ERIC Clearinghouse on Teaching and Teacher Education will facilitate collaboration on several projects.

   - an electronic bulletin board focusing on PDS-related information

   - a national survey of PDS projects

   - production of information packets and other resources that are practice-oriented

FOR IMMEDIATE RELEASE

WORLD'S LARGEST TEST COLLECTION LIBRARY GOES ON LINE

PRINCETON, N.J. (Oct. 28, 1993) -- The world's largest collection of test records will soon be available internationally on Internet, officials at Educational Testing Service announced today.

The 9,531 ETS Test Collection descriptions will be available this November on Internet through the U.S. Department of Education's ERIC Clearinghouse on Assessment and Evaluation, located at Catholic University of America, in Washington, D.C. The ERIC Clearinghouse will also add the educationally oriented tests in the collection to its own data base.

The ETS Test Collection contains information on tests important to the fields of research, education, business and health. For each test, ETS provides information on the author, source, availability, target population, purpose and scope. The tests are organized into eight broad categories:

* achievement
* aptitude
* attitudes and interests
* personality

* sensory-motor skills
* special populations
* vocational/occupational
* miscellaneous

252
"ERIC has had great success using Internet to directly reach the education community," says Bob Stonehill, director of the ERIC Program at the U.S. Department of Education. "The materials we've made available through 'GOPHER' -- a user-friendly system for obtaining information on Internet -- are being used by thousands of people each week. We're very pleased to work with ETS to provide that same level of international access to their test collection database."

"This service will make test descriptions available to educators and researchers around the world," says Janet Williams, director of Library and Reference Services at ETS. "There's a growing demand for up-to-the-minute information on tests and testing. Now, all it takes is a personal computer with a modem."

The ETS collection represents tests and research instruments from ETS's own testing programs as well as other major test publishers in the United States and abroad. Under the agreement reached with the U.S. Department of Education, ETS will provide descriptive records of approximately 250 new measurement tools annually. These test records will be added to the collection available on Internet; in addition, these test records related to the broad field of education will also be entered into the ERIC database.

The ETS Test Collection will be able to be searched in a matter of minutes. Users must have access to a computer that has "GOPHER" access to Internet. To access the collection, users would type GOPHER CUA.EDU. This will present the

Announcing

ABA's National Law-Related Education Resource Center
An Adjunct ERIC Clearinghouse for Law-Related Education

The National Law-Related Education Resource Center (NLRC) has broadened its scope by becoming the newest addition to the Educational Resources Information Center (ERIC) system. As the Adjunct Clearinghouse for Law Related Education, in cooperation with the ERIC Clearinghouse for Social Studies/Social Science Education (ERIC/CHESS), NLRC will now make its resources available to a wider audience than ever before.

What Is the National Law-Related Education Resource Center?
The American Bar Association's Public Education Division created the NLRC in 1991 to collect and disseminate information on law-related education (LRE) programs and resources, substantive legal topics, funding sources, and teacher and resource leader training opportunities. Today, the NLRC serves K-12 schools, college and university students as well as the general public. NLRC also produces newsletters, technical assistance papers, anthologies, bibliographies, and books on LRE resources, such as 519 Current Videos and Software for K-12 Law-Related Education.

What is ERIC?
ERIC is the world's largest and most widely used educational database. It is organized into several clearings that acquire current educational materials in their subject field. Offering services worldwide, ERIC provides ready access to educational documents through its information storage and retrieval system. Among these materials are curriculum guides, teaching units, bibliographies, articles, and research reports. Document information is announced in Resources in Education (RIE); journal articles are announced in Current Index to Journals in Education (CIJE).

What is an Adjunct ERIC Clearinghouse?
The establishment of an adjunct ERIC clearinghouse allows for greater, more comprehensive coverage of a particular area of study within the scope of the larger clearinghouse. The Adjunct ERIC Clearinghouse for Law-Related Education expands the LRE content within the broader clearinghouse for Social Studies/Social Science Education (ERIC/CHESS), which monitors trends and issues about the teaching and learning of many social studies topics, including LRE. Many of the resources included in the adjunct clearinghouse database are cross-referenced in ERIC. People accessing ERIC to search for law-related topics will now find a larger number of documents in the field and will be referred to even greater numbers of materials available through NLRC. As the Adjunct ERIC Clearinghouse for LRE, the NLRC broadens the scope of available resource information that can otherwise be accessed through the ERIC system, such as videotapes, curriculum kits, computer software, and conference agenda.

Who can get services from the National Law-Related Education Resource Center?
The Resource Center is available to anyone by telephone, mail, or FAX. Among our target audiences are K-12 educators, attorneys, college-level faculty, and community organizations working to improve public understanding about the law. Contact: NLRC, ABA Division for Public Education, 541 N. Fairbanks Ct., Chicago, IL 60611-3314, 312-988-5735, FAX 312/988-5032.

How can I submit products for inclusion in the National Law-Related Education Resource Center?
If you have LRE documents you would like to submit to the National Law-Related Education Resource Center and the ERIC database, send two copies to Paul Nessel, ABA/PED, 541 N. Fairbanks Court, Chicago, IL 60611-3314. We are interested in LRE products such as: teaching/learning materials, curriculum guides and kits, videotapes, software, conference papers and agenda, and research reports. If you have any questions, call 312-988-5735.
ERIC PROCESSING POLICY

FOR

ELECTRONIC JOURNALS AND ELECTRONIC ARTICLES

1. DEFINITIONS

Electronic Journal - An electronic journal is a journal the content of which is available in electronic form. An electronic journal may be published in electronic form only or in both electronic and print forms. An electronic journal, when consulted in its electronic form, is usually viewed on a video display terminal or printed out on a printer connected to a computer.

Electronic Article - An electronic article is a single article appearing in an electronic journal. An electronic article is analogous to a regular journal article, varying only in its medium (i.e., electronic rather than print).

Bibliographic Levels of Journals - The following bibliographic levels of a journal (regular or electronic) can be identified for processing purposes and for discussion:

- Journal Level (i.e., the entire, complete journal, birth to death; the generic level)
- Journal 'Run' Level (e.g., a year or more worth of issues or output)
- Journal Issue Level (i.e., a single issue or update)
- Journal Article Level (i.e., a single article)

II. BASIC ERIC POLICY ON AVAILABILITY

All documents or articles processed into the ERIC database must be available to users, both now and in the future. Most documents are archived by ERIC on microfiche and are available from EDRS. Documents that are not archived by ERIC on microfiche must have a source of availability and future access outside ERIC (e.g., a publisher) that can be specified in detail (i.e., name, address, price).

Correspondingly, journals are covered by ERIC (in CIJE) only if their publisher, availability, and price can be specified in CIJE's "Source Journal Index". Seventy-five (75%) of the articles in CIJE are available from the UMI journal article reprint service. It is mandatory that UMI-available articles be identified in their records as such.

The creation of large numbers of ERIC records for items that a few years into the future could not be obtained would be frustrating for users and detrimental to the database. It is ERIC's basic policy to avoid creating database records for items that are or may become inaccessible to users.

III. ELECTRONIC JOURNAL ACCESSIBILITY CONCERNS

Electronic journals and their articles being published now may, of course, be consulted electronically now. However, future accessibility, after electronic publication may have ceased, can be problematic and is the main issue constraining the processing of electronic items into the ERIC database.

The policy stated here requires a guarantee of future accessibility for items at the article, issue, and run level. It does not require such a guarantee at the overall journal level (on the analogy that an electronic journal that ceases publication would be somewhat like a Level 3 commercial book that went out-of-print at the publisher).
IV. PROCESSING POLICY

A. **Journal Level** (RIE entry only)

A single entry for an entire electronic journal may be created for RIE at either Level 1, 2, or 3. The entry should provide full information concerning the publication's electronic address and how to access it. Standards for citing this information will be provided in the ERIC Processing Manual (EPM).

If an electronic journal also has a regular printed form and availability outside ERIC, that information should be cited by ERIC.

If an electronic journal has ceased publication and ERIC can obtain a printed-out version of the entire item, that should be acquired and processed as a single Level 1 or 2 document.

B. **Journal "Run" Level** (RIE entry only)

A single entry for a lengthy "run" of an electronic journal may be created only at Level 1 or 2, i.e., only when ERIC can serve as the archiving agency for the run. If some other organization is the archiving agency for the journal, then the journal should be entered into RIE at the journal level alone (see IV. A above).

C. **Journal Issue Level** (RIE entry only)

An entry for a single issue of a journal is only appropriate in the case of a "theme" issue that can be treated as if it were a monograph on the topic.

An entry in RIE for a theme issue of an electronic journal can be created only at Level 1 or 2.

D. **Journal Article Level** (CIJE if archived adequately; RIE if not and reproduction permission obtainable)

If the publisher of an electronic journal has provided for the non-ERIC archiving and future guaranteed accessibility of the journal (and its articles) in either paper copy, microfiche, or electronic form, then the articles from that journal should be entered into CIJE, just as any other journal article. It is the responsibility of the ERIC Clearinghouse processing the journal to judge whether the archiving arrangements will provide future ERIC users with adequate accessibility to the journal's articles.

If an electronic journal has no archiving provisions, an electronic article may be processed into RIE at Level 1 or 2 if ERIC can obtain reproduction permission for the printed-out article. This is permissible on the analogy of the current exception made for articles from "obscure" journals.

If an electronic journal has no archiving provisions and Level 1 or 2 permission cannot be obtained for an article, then the article cannot be entered into the ERIC database (neither RIE nor CIJE). In this event, the only recourse is entry of the journal into RIE at the overall journal level (see IV. A above).

Revised January 13, 1993 for:
The Bowker Annual Library and Book Trade Almanac

Word Count: 2178
Database Size and Growth

The ERIC database consists of two files: *Resources in Education* (RIE) and *Current Index to Journals in Education* (CIJE). The ED records announced in RIE represent documents; they are approximately 1800 characters long on average. The EJ records announced in CIJE represent journal articles; they are approximately 650 characters long on average. Overall, the ERIC database through 1993 contains 353,419 records for documents and 468,113 records for journal articles, for a grand total of 821,532 bibliographic records. Approximately 13,000 document records and 18,000 article records are added annually, for a total of 31,000 records per year. Overall, the ERIC database through 1993 is approximately 943 million bytes in size and growing at a rate of around 35 million bytes per year.

ERIC Clearinghouse Competition

The contracts for all 16 ERIC Clearinghouses were competed during the first six months of 1993, a factor that constituted a major distraction for all components during that period. After the dust had settled, two Clearinghouses had relocated and seven had changed their names, as reflected in the table below:

Adjunct Clearinghouses

Adjunct Clearinghouses are organizations that, at no cost to ERIC, assist ERIC in covering a specialized segment of the literature of education. Two new adjunct Clearinghouses were established in 1993, as follows:

Adjunct ERIC Clearinghouse on Clinical Schools
American Association of Colleges for Teacher Education (AACTE)
One Dupont Circle, NW, Suite 610
Washington, DC 20036-1186
Telephone: 202-293-2450
FAX: 202-457-8095
Internet: iabdalha@inet.ed.gov
Note: Adjunct to: ERIC Clearinghouse on Teaching and Teacher Education (SP)

Adjunct Test Collection Clearinghouse
Educational Testing Service (ETS)
ETS Test Collection
Rosedale and Carter Roads
Princeton, New Jersey 08541
Telephone: 609-734-5737
FAX: 609-683-7186
Internet: mhalpern@rosedale.org
Note: Adjunct to: ERIC Clearinghouse on Assessment and Evaluation (TM)
800 Numbers/Internet Addresses (for all ERIC Components)

All ERIC components have recently acquired (or are in the process of acquiring) national toll-free 800 numbers, for the benefit of users. In addition, all ERIC components have now acquired Internet addresses and connectivity. These two developments should result in a marked increase systemwide in question-answering and other reference activity.

ERIC Document Reproduction Service (EDRS) — 1994 Prices

The ERIC Document Reproduction Service (known conveniently as EDRS) is the document delivery arm of ERIC and handles all subscriptions for ERIC microfiche and on-demand requests for reproduced paper copy or microfiche. During 1993, the volume of Standing Order Customers (SOCs) subscribing to the total ERIC microfiche collection (about 12,750 titles, or 17,000 fiche cards, for approximately $2000 annually) rose above the 900 level for the first time after several years in the 800 range. SOCs include over 100 overseas addresses.

EDRS Prices were increased effective January 1, 1994, to the following:

ERIC Usage Fees (Plan Withdrawn)

In April 1993, the Director of ERIC announced that the tentative plan to charge online and CD-ROM vendors a 10% usage fee for use of the ERIC database in electronic form was being withdrawn indefinitely due to objections from the Information Industry Association (IIA) and the American Library Association (ALA). The objective had been to use the income from usage fees for needed system improvements.
Access ERIC

In 1993, ACCESS ERIC, the ERIC System’s outreach component, fielded more than 1,200 information requests per month, most of them through the toll-free line, 1-800-LET-ERIC. ACCESS ERIC also continued to work with the increasing number of computer networks, such as America Online, America Tomorrow, Compuserve, and GTE Educational Network Services, to provide ERIC information to the burgeoning number of users of these systems.

To aid librarians and other ERIC providers, ACCESS ERIC began in 1993 an extensive revision of the systemwide brochure, All About ERIC. The totally new All About ERIC, which will include reproducible worksheets and reference sections, will be available by Spring 1994. Other publication highlights of 1993 included the release of Striving for Excellence: The National Education Goals, Vol. II, a compilation of Clearinghouse-produced ERIC Digests particularly relevant to the national education goals, and the production of both print and computer disk versions of the comprehensive ERIC Directory of Education-Related Information Centers.

To broaden awareness and use of the ERIC System, ACCESS ERIC, working with the ERIC Public Information Task Force, developed and disseminated 500 press kits to education, library, and general media members. In the Fall of 1993, ACCESS ERIC, in conjunction with the ERIC Document Reproduction Service (EDRS), launched a promotional campaign to inform librarians and other information providers about the latest ERIC developments. The campaign was kicked off with an ad in the journal American Libraries and “Know It All” kit for all those responding to the ad.
ERIC on CD-ROM

The ERIC database is now offered on CD-ROM systems by four vendors, with perhaps more to follow. (A fifth vendor, OCLC, which announced in 1988, dropped out in 1992, bequeathing its subscribers to SilverPlatter.) The companies, their telephone numbers, and the year they first announced their product are as follows:

<table>
<thead>
<tr>

ERIC Digests

ERIC Digests (two-page concentrated treatments of key education topics, with suggestions for further reading) continue to be the most popular form of ERIC publication. The Clearinghouses each produce approximately 10 Digests per year, for a system-wide total of around 150 annually. Through March 1993, ERIC had produced a total of 1504 Digests, of which 1339 have been entered into the ERIC database (the remaining 165 are considered out-of-date or obsolete).

Of the 1339 in the database, 1062 have had their full text added to their basic bibliographic record and can be read or downloaded in full text via both the online and CD-ROM systems that carry the ERIC database. The full text of these 1062 ERIC Digests has also been made available from several locations via the Internet.

In January 1994, the next update to the Digest full text file will add approximately 150 new ERIC Digests and will also begin to add for the first time Digest-like publications from non-ERIC sources.

A printed bibliography describing all ERIC Digests through March 1993 can be obtained from the ERIC Facility.
ERIC Ready References

ERIC Ready References are brief handouts (usually one page, front and back) on database-related topics repeatedly of interest to users, e.g., ERIC component names, addresses, and telephone numbers; document types in the database; microfiche and document prices by size of document; accession number ranges by year; digest titles; etc. New ERIC Ready References are created regularly in response to user suggestions. During 1993, the following new titles were generated:

<table>

All Ready References can be obtained free of charge from the ERIC Facility.

Publications About ERIC

In January 1993, ERIC published “The Educational Resources Information Center (ERIC): An Annotated Bibliography of Documents and Journal Articles about ERIC (Covering the Period 1960-1993)” (ED-555 974). This comprehensive compilation contains a total of 689 citations (574 to items in the database; 115 to items not in the database). It supersedes all previous bibliographies on this topic. It can be obtained free from the ERIC Facility.

The ERIC Annual Report remains the best summary of ERIC’s last full year of operations. It is available free of charge from ACCESS ERIC (800-LET-ERIC) and is also entered into the database as soon as available.

Books in ERIC

Beginning in 1993, a policy decision was reached that ERIC should begin to cover education-related books, including the output of major commercial publishers. This literature had previously not been covered because it was copyrighted and could not be microfiched by ERIC and because it was already under good bibliographic control by conventional library mechanisms. During 1993, as a result of this new policy, a total of nearly 500 books were cataloged into the ERIC database. In 1994, it is anticipated that perhaps as many as 1000 books will be accessioned. The publisher's address or other source of availability, and price, is always included in the ERIC resume. Such items can be identified in searching by the Publication Type code 010 (representing “Books”).
ERIC Videotape

The ERIC Clearinghouse on Information and Technology (IR) has produced a new videotape, *ERIC: In Action* that offers libraries and educators an effective way to introduce ERIC to their users. The 15-minute videotape is organized under four major topics: basic structure, major benefits, key index features, and options for locating materials. Librarians training new ERIC users and library or education professors introducing students to ERIC as an education resource are invited to try it. The cost is $17 (including postage). Call 1-800-LET-ERIC for more information.

International ERIC

In October 1993, DIALOG Information Services announced a new CD-ROM product called “International ERIC,” containing separate databases for the *Australian Education Index* (AEI), *British Education Index* (BEI), and *Canadian Education Index* (CEI). This product captures the educational literature from the major non-U.S. English-speaking countries and is the first tangible product of the informal InterEd cooperation that has been going on between ERIC, AEI, BEI, and CEI for the last few years. It is available from DIALOG for an annual subscription price of $1295 (U.S.), $900 (non-U.S.).

Internet Activities

During 1993, ERIC’s Internet activities increased dramatically. By the beginning of the year, all components (and most individual staff) had acquired Internet addresses and stable connectivity. Internet-based e-mail has in many cases replaced correspondence and telephone calls for internal communications. Internet-based file transfer is now the basis for the transmission of bibliographic data from the dispersed ERIC Clearinghouses to the ERIC Facility (for editorial and database-building purposes). ERIC’s sponsoring agency, the Office of Educational Research and Improvement (OERI), acquired a node (INet) on the Internet around mid-year and rapidly became a so-called Gopher site. As a result, numerous ERIC publications and files are being loaded on INet and made available to the world at large via Internet.

AskERIC (Question-Answering Service)

AskERIC, a project of the ERIC Clearinghouse on Information and Technology, provides question-answering, help, and referral to K-12 educators through the Internet. AskERIC now receives an average of 250 electronic mail inquiries weekly. AskERIC draws on the total resources of the ERIC system to generate and send Internet responses to all inquiries within 48 hours.

In addition, AskERIC has established a growing file of full text resources on their FTP/Gopher site. This full text databank, referred to as the AskERIC “Electronic Library,” includes hundreds of lesson plans, news and information about ERIC and AskERIC, ERIC Digests in full text, completed searches on current topics, resource guides, popular Q’s and A’s, and the archives of some education-related listservs. This resource is now visited by users electronically at the phenomenal rate of 15,000 times a week! In 1994, the AskERIC “Electronic Library” is being expanded to include the full text of many publications of the ERIC Clearinghouses and other components. Eventually, contributors of documents to ERIC will be asked to provide both printed and electronic versions (if available), with electronic versions being considered as candidates for the full text “Electronic Library.” To reach Ask ERIC, telephone: 315-443-9114 or Internet: askeric@ericir.syr.edu.
ERIC'S CURRENT INDEX TO JOURNALS IN EDUCATION IS NOW ON CD-ROM AS A POWERFUL NEW RESOURCE FOR RESEARCHER AND PRACTITIONER

CIJE, in its 25th year, has become the bibliographic encyclopedia of American education. Now on CD-ROM, the complete database plus quarterly updates is being offered by Oryx Press for only $199.00 per year. This new research tool, designed to install in DOS or Windows formats, is searchable by menu or by free-text. With the April 1994 update CIJE On Disc will also include the full text of the entire collection (over 1,000) of ERIC Digests, short reports on topics of prime current interest in education, fully searchable by descriptors and identifiers, as well as by free text. With the July update, CIJE On Disc will become the only ERIC CD product to include a 1994 update of the Thesaurus of ERIC Descriptors prepared especially for Oryx Press. Oryx' CIJE On Disc provides the only complete collection of CIJE records, from 1969 to 1993, updated quarterly, in one searchable file, on one single disc, and available in a network version.

An annual subscription to CIJE On Disc provides access to nearly three decades of journal literature in the field of education, indexed and abstracted by ERIC, and gives key references on thousands of topics in education, social science, library and information science, policy studies, and more. Subscribers are provided with the entire database, nearly 500,000 records of journals with quarterly updates of more than 18,000 additional journal articles per year, reporting the most recent research results, successes, setbacks, and ideas, including opinions from world-renowned leaders in education.

News Release

Volume 18, No. 1, May 1994
Attachment 19-1
ERIC Administrative Bulletin (EAB)
CD-ROM technology allows easy and efficient access to an extensive source of information through user-friendly software, which provides the direct route to the bibliographic data and succinct description for each record. *CLIE On Disc* features the speed and convenience of the K Aware2 Retrieval System™, developed by Knowledge Access International, in both DOS and Windows formats. With the help of pull-down and pop-up menus, users of the CD product can:

- search individual fields of information
- search by terms, partial terms, phrases, or Boolean operators
- create a set of files to view, print out, or combine with other sets
- add their own notes in a special field
- get on-screen help whenever needed

Users can rely on *CLIE On Disc* to help:

- prepare for teaching
- develop new materials
- prepare literature reviews
- survey alternative practices
- locate resources
- write reports/articles
- identify new developments
- write proposals
- analyze data

Data also can be transferred to other analysis programs using output formats such as Lotus, dBase, comma delimited, and fixed field. The Oryx CD-ROM is unique in featuring the *Thesaurus of ERIC Descriptors* in three different displays, Alphabetical, Rotated, and Group Code, which allow users to preview and select appropriate subject terms for organized and efficient searches.

*CLIE On Disc* operates on all IBM-compatible PCs equipped with CD-ROM drives, and the program requires 640K RAM and 2MB hard-drive space. Usually priced at $250.00, it is now $199, reflecting a 20% savings—and a savings of $300 to $1,200 compared to similar CD-ROM products that cover education journal literature!
APRIL UPDATE OF ERIC'S CURRENT INDEX TO JOURNALS IN EDUCATION ON DISC NOW INCLUDES ENTIRE ERIC DIGEST FILE

With the April 1994 update, CUE On Disc will include the full text of the entire collection (over 1,000) of ERIC Digests, short reports on critical topics of current interest in education, fully searchable by descriptors and identifiers, as well as by free text. With the July update, CUE On Disc will become the only ERIC CD product to include a 1994 update of the Thesaurus of ERIC Descriptors prepared especially for Oryx Press. CUE, in its 25th year, has actually become the bibliographic encyclopedia of American education. Now on CD-ROM, the complete database plus quarterly updates is being offered by Oryx Press for only $199.00 per year for institutions and $99.00 for individuals. This new research tool, designed to install in DOS or Windows formats, is searchable by menu or by free text. Oryx’s CUE On Disc provides the only complete collection of CUE records, from 1969 to the present, updated quarterly, in one searchable file, on one single disc, and available to install on a network.

An annual subscription to CUE On Disc provides access to nearly three decades of journal literature in the field of education, indexed and abstracted by ERIC, and gives key references on thousands of topics in education, social science, library and information science, policy studies, and more. Subscribers are provided with the entire database, nearly 500,000 records, with quarterly updates of more than 18,000 additional journal articles per year, reporting the most recent research results, successes, setbacks, and ideas, including opinions from world-renowned leaders in education.

Now on CD-ROM—only $199 / year!

Use CIJE On Disc to—
- locate resources
- write reports or articles
- identify new developments
- prepare for teaching
- develop new materials
- prepare literature reviews
- survey alternative practices
- write proposals
- analyze data

FEATURES:
- The Thesaurus of ERIC Descriptors in three display formats: alphabetical, rotated, and group code
- The complete CIJE database
- Two great ways to search:
  - Menu searching by publication year, publication type, and target audience
  - Free-text searching of all other fields—subject, author name, article title, journal, descriptors, identifiers, and ERIC Clearinghouse number
- User-friendly software installs easily in DOS or Windows™

ORYX

Phoenix, AZ 85012-3397

BEST COPY AVAILABLE
CIJE On Disc features make it easy for users to:

- search by individual fields
- search by terms, partial terms, phrases, or Boolean operators
- create a set of records to view, print out, or combine with other sets
- add notes in a special field
- get on-screen help at any time

BEST COPY AVAILABLE
Use the CUJE database for your research if you already know the terminology of the topic, or if you are looking for a particular author, journal, article title, publication year, ERIC Clearinghouse number, target audience, or publication type.

Use the ERIC Thesaurus to decide which descriptors come closest to the topic of your search and to see which broader, narrower, and related descriptors they are linked to.

You have the same options in Windows as in DOS!

Search the CUJE database directly or use the ERIC Thesaurus to help identify search terms.
Each CIJE record supplies complete bibliographic data and a concise description of the contents of the journal article. Many descriptions include research results and conclusions of studies covered in the articles. Often, the information you need can be found in the annotations alone!

You can even launch a hypertext search of the Thesaurus with a single term or multiple-word sequence to make certain you don’t overlook a single appropriate record.

IMPORTANT . . . BEST COPY AVAILABLE

You can display records, print them out, save them to disk, and even transfer CIJE records to other analysis programs using output formats such as:

- dBase  
- Lotus  
- comma delimited  
- fixed field

CIJE On Disc operates on all IBM-compatible PCs equipped with CD-ROM drives. The program requires 640 K RAM and 2 MB hard-drive space.

Attachment 21-9
ERIC Administrative Bulletin (EAB)
The AskERIC Service for K-12 Educators

ERIC is...

...the Educational Resources Information Center, a federally-funded national information system that provides access to an extensive body of education-related resources. The ERIC Clearinghouse on Information & Technology (ERIC/IT), sponsor of the AskERIC project, is one of 16 ERIC Clearinghouses nationwide that provide a variety of services, products, and resources at all education levels.

AskERIC is...

...an Internet-based question-answering service for teachers, library media specialists, and administrators, and others involved in K-12 education. The hallmark of AskERIC is the human intermediary, who interacts with the information seeker and personally selects and delivers information resources within 48 working hours. The benefit of the human-mediated service is that it allows AskERIC staff to determine the precise information needs of the client and to present an array of relevant resources, both from the ERIC system and from the vast resources of the Internet.

Anyone involved with K-12 education may send an e-mail inquiry (via the Internet) to AskERIC. Simply address your message to:

askeric@ericir.syr.edu

The AskERIC Electronic Library

The AskERIC Electronic Library is a Gopher/FTP site of selected resources for education and general interest. Some of the contents include:

- Lesson Plans
- ERIC Digests
- AskERIC Help Sheets
- Reference Tools
- Internet Guides and Directories
- Government Information
- AskERIC InfoGuides
- Archives of education-related listservs, such as EDPOLYAN, LM_NET, K12ADMIN, and KIDSHERE.
- Remote access to library catalogs
- Access to other Gopher sites
To Gopher to the AskERIC site:

A. If you have Gopher: Gopher to ericir.syr.edu (port #70) or

1. Access the National Gopher System through: gopher.micro.umn.edu
2. Move through the following directories:
   Other Gopher and Information Servers/
   North America/
   USA/
   General/
   AskERIC - (Educational Resources Information Center)

B. If you don’t have Gopher, telnet to a Gopher client on the Internet:

1. Telnet to: ericir.syr.edu
2. Login as directed (usual login is: ‘gopher’)
3. Access the National Gopher System
4. Move through the directories as above.

To FTP to the AskERIC site:

1. Log into your local host, and invoke the FTP program.
2. Write ericir.syr.edu as the remote host computer name.
3. For username, enter anonymous
4. For password, enter your e-mail username (e.g. tomt@machine.edu)

For More Information

We are excited about AskERIC's success to date and are eager to expand AskERIC question-
answering to new K-12 audiences and to further develop services and resources. Through AskERIC
Partnership, state networks and education agencies work cooperatively with the ERIC Clearinghouse on
Information & Technology to provide the highest level AskERIC information service to large groups of
educators. To discuss options, please contact:

Nancy Morgan
Richard Tkachuck

The AskERIC Service for K–12 Educators

ERIC is...the Educational Resources Information Center, a federally funded national information system that provides access to an extensive body of education-related resources. The ERIC Clearinghouse on Information and Technology (ERIC/IT), sponsor of the AskERIC project, is one of 16 ERIC Clearinghouses nationwide which provide a variety of services, products, and resources at all education levels.

AskERIC is...an Internet-based question-answering service for teachers, library media specialists, administrators, and others involved in K–12 education. The hallmark of AskERIC is a human intermediary who interacts with the information seeker and personally selects and delivers information resources within 48 working hours. AskERIC staff use an array of relevant resources, both from the ERIC system and from the vast resources of the Internet, to respond to information requests.

Anyone involved with K–12 education can send an e-mail inquiry (via the Internet) to AskERIC. Simply address your message to:

askeric@ericir.syr.edu

The AskERIC Electronic Library is...a growing file of resources on an FTP/Gopher site which includes such materials as:

- Lesson plans
- Internet guides
- Searches on current topics
- Popular "Q's & A's"
- Government information
- Full-text ERIC Digests
- Resource guides
- Reference tools

The site is now used at the phenomenal rate of 15,000 times per week! Refer to the left sidebar for instructions on how to access the AskERIC Gopher site.

For more information...about AskERIC on the Internet, contact:

Richard Tkachuck, Nancy Morgan, AskERIC Coordinators
Internet: askeric@ericir.syr.edu

Mike Eisenberg
Director, ERIC Clearinghouse on Information & Technology
Internet: mike@ericir.syr.edu

Have you tried PARENTS AskERIC?

Do you have questions on choosing child care? On how your child’s social development is progressing? On what research says about the kindergarten curriculum? If so, why not contact PARENTS AskERIC?

PARENTS AskERIC is a special part of the AskERIC information service designed for parents, educators, and anyone else with a question about the development, education, and care of children from birth through the high school years. Queries to AskERIC are responded to by staff of the ERIC Clearinghouses.

Recent questions to AskERIC of interest to parents have involved:

- outcome-based education
- mixed-age classrooms
- finding funds for computers for preschools
- determining whether your child's child care center provides high-quality care

To ask a question of PARENTS AskERIC or to use the more general services of AskERIC, simply send your request in an e-mail message to:

askeric@ericir.syr.edu

Phil Meyer

Internet Access Points to the [ERIC] Database and [ERIC] Digests Online

The following systems currently provide unrestricted Internet access to the ERIC database and/or ERIC Digests Online. For general information about ERIC, contact ACCESS ERIC, 1-800-LET-ERIC or accesseric@inet.ed.gov.

**Syracuse University (SUINFO)**
(last five years of ERIC; searchable fields include author, title, descriptor word, descriptor phrase, and abstract)

- Telnet acsnet.syr.edu (or 128.230.1.21)
- At > prompt, type SUINFO.
- At ENTER TERMINAL TYPE prompt, type ' She.
- Bypass the USERID and PASSWORD prompts with the tab key.
- At the COMMAND prompt, type SUINFO.
- When prompted, type Y (yes) to continue.
- Find ERIC through the menus (first type 1 for General Interest files, then the number corresponding to ERIC), or type ERIC to enter directly.
- Follow screen instructions to search. (If function keys don't work, type in corresponding commands.)
- To end the session, type LOGOFF.

**TIP:** Whenever MORE or HOLDING appears in the lower right corner of the screen, hit the HOME or ENTER key to advance.

**Auburn University Libraries**
(complete ERIC database, 1966- ; searchable fields include title, author, subject heading (descriptor), and keyword)
(Note: requires TN3270)

- TN3270 aeducaac.duc.auburn.edu (or 131.204.2.13).
- At the opening screen, tab to APPLICATION, and enter 01.
- At the main menu, type ERIC.
- Follow screen instructions to search.
- To end the session, type STOP.

**TIP:** The keyword search field allows use of Boolean operators, truncation, nesting, and other special search features. Type EXP K for a complete explanation.

**University of Saskatchewan Library System**
(ERIC database from 1983- ; searchable fields include author, title, descriptor, identifier, publication year, ERIC accession number, and journal title)

- Telnet sklib.usask.ca (or 128.233.1.20)
- At USER_NAME prompt, enter SONIA.
- At main menu, select 9, "CIE plus RIE: 1983 to Present."
- Type HELP to see a summary of search and display commands, field prefixes, and Boolean operators. (Sample search statement to find documents with the descriptor television: f d=television.)
- To end the session, type Q (quit).

**TIP:** Type BEGINNER to see a system tutorial.

**University of North Carolina, Chapel Hill (iaUNChpad)**
(more than 1,000 full-text ERIC Digests—summaries of current education topics written by th; ERIC Clearinghouses)

- Telnet bbs.oit.unc.edu (or 152.2.23.80)
- At the login prompt, type LAUNCH.
- Enter your first and last name as directed. (Remember how you enter your name for future sessions)
- Enter a password of your choice (and remember it).
- At the main menu, select 4, "Topical Document Search (WAIS)."
- Move through the list to ERIC Digests (138 or 139 as of this writing). Hit RETURN to select the file.
- Type one or more keywords and hit RETURN to start the search. Results will be displayed by title in a ranked order based on occurrences of the keyword.
- Highlight a title and hit RETURN to see the full text.
- To end the WAIS session, type Q (quit). To exit iaUNChpad, type Q again.

**TIP:** Type ? to see a list of all commands.

This information was condensed from the ERIC Clearinghouse on Information & Technology's ERIC Networker, "Internet Access Points to ERIC."
AskERIC recognized for its on-line service for educators

By John S. Tonello

A Syracuse University Internet-based question-and-answer service designed for K-12 educators has been nominated by NYNEX Corp. for the 1994 Computerworld Smithsonian Award in the education and academia category.

AskERIC, a project of the ERIC Clearinghouse on Information and Technology, has been recognized for its ability to quickly provide educators with personalized information over the Internet. The service—the first of its kind—was specifically designed for teachers, library media specialists, administrators and other educators. It is directed by Michael E. Eisenberg, professor of information studies.

"AskERIC is quickly achieving national recognition as the leader in information delivery," says Eisenberg. "We're proud to be nominated for this award."

The service, which provides information on teaching methods and tools, is essentially a huge reservoir of educational resources used by educators around the world.

Eisenberg says AskERIC, launched in November 1992, owes its success to a user-friendliness that's based on a human intermediary—a person who interacts with information seekers via electronic mail. The intermediary personally selects and delivers requested information within 48 hours. Moreover, an array of electronic information is accessible to teachers through AskERIC's Electronic Library, a menu-driven Internet site.

AskERIC responses are gathered from the U.S. Department of Education's ERIC system, a 27-year-old program that includes the world's largest educational database, and from the vast resources of the global Internet. continued on page 2

ERIC, the Educational Resources Information Center, is a federally funded national information system that provides access to a body of education-related resources. The ERIC Clearinghouse on Information and Technology (ERIC/IT), sponsor of the AskERIC project, is one of 16 ERIC Clearinghouses nationwide that provide a variety of services, products and resources at all educational levels.

Computerworld Smithsonian Awards recognize outstanding contributions to society through visionary uses of information and technology. Finalists will be announced April 20; winners will be announced June 6 at an awards dinner in Washington, D.C.
IST helps U.S. gov't release documents electronically

By Darryl J. Geddes

The School of Information Studies is helping the federal government realize the benefits of disseminating government documents electronically.

"A Citizen's Guide on Using the Freedom of Information Act and the Privacy Act of 1974 to Request Government Records," released by a subcommittee of the House Committee on Government Operations, is now available electronically through the Electronic Government Information Service (EGIS) at Syracuse University's ERIC Clearinghouse on Information Resources and Technology. EGIS, an experimental project run by the School of Information Studies, is intended to improve access to and dissemination of government information over the Internet. The ERIC Clearinghouse, directed by Professor Michael Eisenberg, is located in Room 4-298, Center for Science and Technology.

"This is the first example of a congressional committee developing a document with the intent that it be transmitted electronically on Internet," said Charles R. McClure, a professor of information studies who has emerged as a leading proponent of the National Research and Education Network, an electronic information superhighway.

"If the document were to be printed by the Government Printing Office, it could take anywhere from two days to two months to complete," McClure said. "ERIC enables individuals to get the document immediately.

"The use of ERIC to transmit this guide to millions of Internet users successfully demonstrates what can be done electronically," McClure said.

McClure has testified before various congressional committees urging the federal government to develop an information infrastructure that would allow quick release and access to government documents in electronic format.

Bob Gellmon, chief counsel for the House Subcommittee on Information, Justice, Transportation and Agriculture, and an advocate for improving the management of information resources, visited the School of Information Studies recently to review the EGIS project and to speak with graduate students and faculty about U.S. information policy.

"Bob was quite impressed with the role the School of Information Studies is playing in the development of U.S. information policy and procedure," McClure said.

During a seminar for graduate students, Gellmon spoke of the need for information policy analysts to assist the federal government in the development of federal information policy.

Rockville, MD 20850-4305

Dear Ted:

On behalf of Dialog and the three national to contributors to DIALOG OnDisc® International ERIC, I am pleased to send you a complimentary subscription DIALOG OnDisc® International ERIC. The product will arrive under separate cover within the next couple of weeks.

The members of the consortium have asked me to pass on this token of their gratitude to you and Ted and the ERIC organization for its instrumental assistance in getting the new product to market.

We are excited by this cooperative product and I am pleased to report that early reactions to this new product have been enthusiastic.

I understand from Bob Gibson at Micromedia that the ERIC organization may be able to provide some form of promotional assistance for the product in the United States. I would like to exchange some ideas with you on this subject and I will be calling you within the next week.

Sincerely,

Bonnie Zelter

New! DIALOG OnDisc®
International ERIC

International research is as easy as A B C with this exciting new CD-ROM product from DIALOG Information Services, the acknowledged world leader in electronic access and delivery.

DIALOG OnDisc® International ERIC is a co-operative enterprise. The individual members of the group have banded together to rationalize the coverage of international educational research literature, promote better exchange of information, build compatible retrieval tools, indexes and thesauri and to eliminate duplication.

DIALOG OnDisc® International ERIC is the first product released by the consortium. Throughout its formative stages, the project has received the active support and co-operation of ERIC, the U.S. national information system in education.

As the first international education service DIALOG OnDisc® International ERIC unites three national English-language educational research databases:

- **Australian Education Index (AEI)**
- **British Education Index (BEI)**
- **Canadian Education Index (CEI)**

Using DIALOG OnDisc® software, International ERIC provides unprecedented ease of access to comparative literature from Australia, Great Britain and Canada. Each national database is presented independently, with its own thesaurus.

Open up a whole new world of educational research with DIALOG OnDisc® International ERIC, available in Canada exclusively from Micromedia Limited.

**AUSTRALIA**

Covering both published and unpublished forms of literature originating in, and relating to Australia, the Australian Education Index includes monographs, research and technical reports, legislation, journal articles and more. All levels of education are covered.

An annual publication of theses from Australian universities and colleges, the Bibliography of Education Theses in Australia (BETA) contributes 400-500 theses per year to the AEI database.

**BRITAIN**

With coverage extending to approximately 300 British theses, and European English-language journals, the British Education Index is updated with 4,000 records annually. This database is a comprehensive collection of education-related periodical literature originating in, and relating to, Great Britain.

The British Education Theses Index (BETI) is a subject and author index to theses on all aspects of education since 1950. It is produced by the Librarians of Institutes and Schools of Education (LISE).

**CANADA**

Containing over 31,000 monograph records and 69,000 journal articles from 200 Canadian education journals in English and French, the Canadian Education Index is the most comprehensive database of Canadian educational research, increasing at the rate of approximately 5,000 records per year.

As a subset of the Canadian Education Index file, the ONTERIS database, which originated in 1976, is included with DIALOG OnDisc® International ERIC. ONTERIS covers research reports and curriculum documents originating from sources in the province of Ontario.

The Canadian content of DIALOG OnDisc® International ERIC supersedes the CD-ROM product formerly known as CD:Education.

All you need to run DIALOG OnDisc® International ERIC is an IBM® PC/Compati ble or Apple® Macintosh computer and a CD-ROM drive.

Each subscription includes cumulative discs, updated quarterly; DIALOG OnDisc software; complete, comprehensive documentation; quick-reference card; and customer support from Micromedia’s CD Centre.

DIALOG OnDisc is a trademark, and DIALOG is a service mark of DIALOG Information Services, Inc., a Knight-Ridder company.
NEW!
DIALOG OnDisc International ERIC

Try DIALOG OnDisc International ERIC, the exciting, new educational reference tool, absolutely FREE and without obligation for a full 30 days.

International research is as easy as A B C with this powerful CD-ROM product from DIALOG Information Services, the acknowledged world leader in electronic access and delivery.

As the first international education service, DIALOG OnDisc International ERIC unites three national English-language educational research databases:

Australian Education Index (AEI)
British Education Index (BEI)
Canadian Education Index (CEI)

Using DIALOG OnDisc software, International ERIC provides unprecedented ease of access to comparative literature from Australia, Great Britain and Canada. Each national database is presented independently with its own thesaurus.

Open up a whole new world of educational research with DIALOG OnDisc International ERIC, available in Canada exclusively from Micromedia Limited.

For your FREE trial, simply complete the information below and fax it to us at (416) 362-6161, or call our CD Centre toll free at 1-800-387-2669. This special offer ends December 31, 1993, so call now!

Each subscription includes cumulative discs, updated quarterly; DIALOG OnDisc software; complete, comprehensive documentation; quick reference card; and customer support from Micromedia's CD Centre.

Volume 18, No. 1, May 1994
Attachment 23-3
NOW YOU CAN SEARCH THE EDUCATIONAL RESEARCH LITERATURE OF MULTIPLE COUNTRIES ON ONE DISC USING DIALOG ONDISC INTERNATIONAL ERIC.

Available exclusively from Dialog, and only in CDROM format, International ERIC brings together educational research literature from Australia, Great Britain, and Canada. Three databases on one disc provide unprecedented access to comparative literature in fields of interest. And each database includes its own thesaurus, making it easy to find records on related topics. DIALOG OnDisc International ERIC consists of:

- **Australian Education Index (AEI)**
  Covering both published and unpublished forms of literature originating in, and relating to, Australia, AEI includes monographs, research and technical reports, legislation, and journal articles. All levels of education are covered. The *Bibliography of Theses in Australia* (BETA), an annual publication of theses from Australian universities and colleges, contributes 400 - 500 theses per year to the database. AEI is produced by the Australian Council for Educational Research.

- **British Education Index (BEI)**
  With coverage of approximately 300 British and European English-language journals, BEI is updated with 5,000 records annually. This database is a comprehensive collection of education-related periodical literature originating in, and relating to, Great Britain. BEI also includes records for theses from the British Education Theses Index (BETI), a subject and author index to theses on all aspects of education since 1950. BEI is produced by the University of Leeds. This database corresponds to DIALOG File 121 online and is enhanced in International ERIC by the addition of a thesaurus and abstracts.

- **Canadian Education Index (CEI)**
  Containing over 31,000 monograph records and 69,000 records for journal articles from 200 Canadian education journals in English and French, CEI is the most comprehensive database of Canadian educational research. Approximately 7,500 records are added to the database each year. CEI is produced by Micromedia Limited. CEI includes about 15,000 records from the Ontario Education Research Information Service (ONTERIS). ONTERIS records are searchable in International ERIC as part of the CEI database. ONTERIS covers research, reports, and curriculum documents originating from sources located in the Province of Ontario. Document delivery service is available from Micromedia Limited, Technical Information Centre.

Search DIALOG OnDisc International ERIC to find information on:
- Adult and continuing education
- Counseling
- Curriculum
- Educational administration
- Educational policy
- Educational psychology
- Educational systems
- Educational technology
- Language acquisition
- Management in education
- Multicultural education
- Research and measurement techniques
- Special education
- Teacher education
- Training
- Vocational education
- ...and more!

**Corresponding Online File:**
Corresponds in part to British Education Index (File 121)
OnDisc News and Offers

Have You Heard About
International ERIC?

Three organisations have agreed to supply their data to Dialog to form a combined unique CD-ROM database. The separate databases are:

- The Australian Education Index (produced by the Australian Council for Educational Research)
- The Canadian ERIC (produced by Micromedia)
- The British Education Index (produced by the University of Leeds)

Coverage will be from 1976 onwards for all three sets of data. The Dialog OnDisc will consist of more than 200,000 records initially, growing at a rate of 9,000 records per quarter. Dialog expects to have this new OnDisc product out this month. If you would like to try International ERIC on the Dialog OnDisc free 30-day Trial Programme, please contact the OnDisc Department.

Tel: +44 (0)865 326226.
Open Up a Whole New World of Educational Research with DIALOG OnDisk® International ERIC

Information on education in Canada has always been readily available in a variety of formats, through the many products offered by Micromedia Limited: Canadian Education Index, Microlog Education Collection, Canadian Curriculum Guides, and Educational Periodicals in Microform.

And now we've opened up a whole new world...

DIALOG Information Services, the acknowledged world leader in electronic access and delivery, has developed the first international education service, DIALOG OnDisk International ERIC, available only on CD-ROM, and exclusively in Canada from Micromedia.

In total, AEI contains approximately 50,000 records and increases by about 4,500 records annually.

Britain

With coverage extending to approximately 300 British theses, and European English-language journals, the British Education Index is a comprehensive collection of education-related periodical literature originating in, and relating to, Great Britain.

The British Education Theses Index is a subject and author index to theses on all aspects of education since 1950, which have been accepted for higher degrees by the universities of Great Britain, Ireland and the Council for National Academic Awards. Produced by the Librarians of Institutes and Schools of Education, this Theses Index lists over 11,000 records.

In all, BEI contains more than 57,000 records and increases by about 4,000 records annually.

Canada

Containing over 31,000 monograph records and 69,000 journal articles from 200 Canadian education journals in English and French, plus government and research reports, provincial curriculum guides and graduate dissertations, the Canadian Education Index is the most comprehensive database of Canadian educational research.

A subset of the Canadian Education Index file, the ONTERIS database, which originated in 1976, is included with International ERIC. ONTERIS covers research reports and curriculum documents originating from sources in the province of Ontario.

The CEI has a current growth rate of approximately 5,000 records per year.

Over 200,000 Records!

By combining these three databases on one CD-ROM, DIALOG OnDisk International ERIC gives you over 200,000 points of reference for education in three countries, making this product an unbeatable source for educators and librarians.

Annual subscriptions to International ERIC include cumulative discs, updated quarterly; DIALOG OnDisk software; complete, comprehensive documentation; quick-reference card; and customer support from Micromedia's CD Centre.

International ERIC runs on a standard IBM PC compatible or Apple Macintosh computer with CD-ROM drive.

For a FREE 30-day trial of DIALOG OnDisk International ERIC, contact Micromedia's CD Centre at (416) 362-5211 ext. 2512.
The ABC of International Education

Everybody knows ERIC, but what about AEI, BEI and CEI? How do you find information about education in Australia, Britain and Canada?

If you look in ERIC you are not getting the whole picture. Australia, Britain and Canada have separate indexes which list journal articles, papers, reports, theses and monographs published in, or about, each country. These indexes have been available in print and through a variety of electronic media for some years. The Australian Education Index (AEI) is a comprehensive index to current literature, and has been available in print since 1958 and online since 1978.

But to undertake a comprehensive search covering Australia, Britain and Canada has been difficult. To help overcome this difficulty, the DIALOG Ondisc® International ERIC CD-ROM is publishing three bibliographic databases — the Australian Education Index, the British Education Index and the Canadian Education Index — on the one CD-ROM disk. As far as possible, the references indexed in each database are presented in compatible formats. Online thesauri are being provided to help with subject searching and, most importantly, the International ERIC databases are presented in a format which will facilitate searches run on the parallel ERIC databases. International ERIC will be available in late 1993 — more details are available from ACER or read the brochure enclosed.
INTERNATIONAL ERIC

International ERIC is a new CD-ROM product from Dialog Information Services, bringing together the Australian, British and Canadian educational databases from 1976 onwards. The producers of the three national English-language databases have undertaken this co-operative enterprise to rationalize the coverage of international educational research literature, to promote better exchanges of information, to build compatible retrieval tools, indexes and thesauri, and to eliminate duplication.

Each national database is presented independently with its own thesaurus. The Australian education index covers both published and unpublished literature, including monographs, research and technical reports, legislation, journal articles and theses. Coverage of the British education index extends to education-related periodical literature originating in, and relating to, the United Kingdom taken from European English-language journals and to theses. The Canadian education index contains monographs and articles from Canadian educational journals in English and French, with a sub-database, 'Onteris', devoted to research reports and curriculum documents originating from sources in the province of Ontario.

International ERIC runs on both IBM PC compatibles or Apple Macintosh computers equipped with a CD-ROM drive. The annual subscription (US$ 900 to non-US customers; US$ 1,295 to US customers) includes cumulative discs (updated quarterly), appropriate software, complete documentation and customer support services.

Educational Innovation, No. 77, December 1993
Enclosed is your latest DIALOG OnDisc® product update. The disc contains improved DIALOG OnDisc software. The enhancements include:

- Improved Data Compression
- Save or Print Search Strategy

See the enclosed Technical Note for more details on the new enhancements.

Please destroy your old disc by cutting it in half.

If you have questions about this shipment, please call CDROM Manufacturing and Fulfillment at 415-858-7820. For assistance with your DIALOG OnDisc products, please call Customer Service at 800-334-2564 or 415-858-3810.

Installation for the New DIALOG OnDisc Software

**DIALOG OnDisc for DOS**

Your DIALOG OnDisc product contains an automatic update facility. The DIALOG OnDisc software will automatically copy the new version of the software from the CDROM disc over the existing version on your local hard disk or network drive. Your autoexec.bat and config.sys files will not be altered during this process.

**LAN:** If DIALOG OnDisc is currently located on a network drive on your file server, you must have the proper WRITE access to the appropriate directory. Please contact your LAN administrator if you have questions regarding access. In certain LAN configurations, manual installation of DIALOG OnDisc may be required.

**DIALOG OnDisc for the Macintosh®**

1. Insert the new disc in the CDROM drive.
2. Open the disc by double-clicking on its icon.
3. Drag the DIALOG OnDisc application icon to the DIALOG OnDisc folder on your hard disk. You will see a message asking whether you want to replace the *older version* of the file.
4. Click on Yes.

Note: 2 MB of RAM is recommended.
DIALOG ONDISC® for DOS

Technical Note

Save Your Search History with Your Search Results

and

DISPLAY SETS PRINT (DSP) Command

Beginning with July 1993 database updates, you can save your search history (strategy) with your search results (records), including postings, to a disk or printer. This feature is available in both Easy Menu search and Command Search.

You can also print your Command Search strategy at any stage after the initial set, using the DISPLAY SETS PRINT (DSP) Command.

Instructions are given below, followed by examples of the way your file or printout will look. The examples are taken from a search in DIALOG OnDisc Environmental Chemistry, Health & Safety™.

Easy Menu Search

To save your search history with your results, use the option at the bottom of the PRINT TRANSFER menu: Include Search History. Set this option to Yes before you select a print or transfer option.

Note: The PRINT TRANSFER function is available while search results are displayed.

1. Press PRINT TRANSFER...

Notice that the Include Search History default setting is No.:

<table>
<thead>
<tr>
<th>Adjust Options, than PRINT or TRANSFER</th>
</tr>
</thead>
<tbody>
<tr>
<td>PRINT Currently Displayed Record Only</td>
</tr>
<tr>
<td>PRINT All: All Selected Records</td>
</tr>
<tr>
<td>PRINT Marked Records Only</td>
</tr>
<tr>
<td>TRANSFER Current Record Only to Disk</td>
</tr>
<tr>
<td>TRANSFER All Selected Records to Disk</td>
</tr>
<tr>
<td>TRANSFER Marked Records Only to Disk</td>
</tr>
<tr>
<td>Lines per page: 6</td>
</tr>
<tr>
<td>Page Break after Each Record: No</td>
</tr>
<tr>
<td>Transfer File Format: DISPLAY</td>
</tr>
</tbody>
</table>

2. To select Yes, highlight Include Search History; and press Enter.

Your print or disk file will include the search history at the top of the saved records:

8. . . .

Command Search

Use the DISPLAY SETS PRINT (DSP) command to print your search strategy or, following the 
SET PRINT command, to save the strategy and results to a file.

Print Your Search Strategy With Your Search Results

At the Command Search prompt:

• Type DSP(Enter).

Transfer Your Strategy and Search Results to Disk

1. Type SET PRINT followed by the target drive, directory, and filename; then press Enter.
   EXAMPLE: AASEARCHES:CFCAL

2. TYPE DSP(Enter).
3. TYPE PRINT [$4]/[format$]/record $s or ALL

Title: REPLACING CFCs: THE SEARCH FOR ALTERNATIVES.
. . . (See additional titles in Easy Menu Search example above)
Setup Option: Force Saved Records to Floppy Disk

Beginning with July 1993 DIALOG OnDisc product updates, DIALOG OnDisc administrators can now allow users to save search results to a floppy disk (or diskette) while preventing user access to the hard disk. Use the following instructions to force saved records to the A or to give users the option of selecting either the A or B drive:

1. Select Setup and Accounting from the Select Search Mode menu.

2. Select Setup Software from the Setup and Accounting menu.

You will see a new function at the bottom of the screen: Force file saves to floppy disk.

There are three setup options available for this function:

- **N**, for No (selection). This is the choice shown above, as the help line at the bottom of the screen explains.
- **A**, for the A drive.
- **B**, for the B drive or A:

With the B choice, when you select TRANSFER... of records to disk the Filename prompt indicates B as the default:

```
Filename: B
```

At this prompt, you may use the BACKSPACE key to delete B and type A.
3. To change the current setting, highlight Force file saves to floppy disk and press ENTER either once or twice to display the desired option.

4. When the desired option is displayed, press ESC to exit Setup mode.
   You will receive the following message:
   
   **Save changes (Y/N)?**
   
5. Enter Y to save your new Setup choice.
   You will automatically be returned to the Setup and Accounting menu – which you can "quit" by pressing ESC to return to the Select Search Mode menu.
Business Day

Dialog Information Systems Inc. is to announce a new fee structure based on the number of people who are authorized to view an electronic document or to receive their own electronic copies. Nancy E. Honig, associate general counsel of Dialog, has overseen the development of the new service.

Fee Plan to Share On-Line Data

By TERESA RIORDAN

WASHINGTON, April 5 — How should information be priced in the information age? That is the central riddle of the digital revolution.

Proposing an answer, Dialog Information Systems Inc., one of the largest publishers of electronic data bases for corporate librarians, will announce a new fee structure on Wednesday that departs from current industry pricing.

Prices that corporate clients pay to download documents like business directories and scientific abstracts from Dialog's electronic libraries will now be based on the number of authorized users of the documents.

Currently, corporate and professional customers of Dialog and competing services like Mead Data Central's Lexis-Nexis data bases, pay monthly-subscriber rates and on-line search fees that often total tens of thousand dollars a year. But industry pricing has generally assumed that only the person conducting an on-line search of the data base would read the documents retrieved. Not only is there usually no pricing provision for sharing the information with coworkers, but also doing so may be a copyright violation.

Now, Dialog means to sell clients the right to share the documents retrieved electronically. While some industry experts call the plan unworkable because it will be difficult to enforce, others see it as an understandable effort by Dialog to insure a revenue stream from the deluge of information it pumps through its computer networks. And clients may benefit, too, some experts say.

"It's risky, but they've got no choice," Barbara Quint, editor of Searcher, a magazine for professional data base users, said. "They charge an awful lot of money for data which you are inhibited from using in any meaningful way."

Dialog, a Palo Alto, Calif., subsidiary of Knight-Ridder whose electronic search service includes 450 data bases, said it would announce the new service here Wednesday at a conference for its subscribers. Some customers have been using the service on a trial basis since early March.

Industry experts said the move went a long way toward addressing the central paradox of such data base services. For publishers of corporate and professional information like Standard & Poor's corporate register, computer networks represent a

Data by the Dollar

The computerized data-base service Dialog Information Systems, which is used primarily by corporate librarians, will begin basing its fees on the number of people within a corporation who are authorized to read documents downloaded from Dialog. Based on a formula using "multipliers," it will be cheaper for a Dialog client to let many people share computer access to a single document than to make many copies and distribute them electronically. The examples are based on a document that would cost $2 to read remotely.

She estimates, however, that Dialog and its publishers are losing millions of dollars a year on electronic copies. Ms. Quint, the Searcher editor, said some publishers "are nervous about somebody taking their data once and then using it a million times."

"The carrot Dialog is dangling," she said, "is that the producers will see the extra money, and that there's a lot of money to be made.

Keystrokes for E-Mail

By adding a few keystrokes at the end of their search, Dialog searchers, many of whom are corporate librarians, will be able to send hundreds of copies of an article through a company's electronic mail system. Or they will be able to store an archival copy of the document, which employees can read from their own computers. Besides the fee for retrieving the document, additional fees will be levied depending on how many people will be able to use it. With a $2 document, for example, it would cost $6 for up to 25 people to have access to the document through the corporate archive. The client would pay $6 for permission to send electronic copies directly to 25 people.

It is too early to say how the copyright laws will be affected, but the new method of distributing electronic documents is already raising questions. The Copyright Law at Issue

"Until now, that's been impossible to do without violating copyright law," Ms. Hong said. "She would have had to call every individual publisher and get permission from each one, and they all would have had different requirements."

"Dialog's main competitor, Mead Data Central, which is based in Dayton, Ohio, said it had no plans to offer a similar service. "Right now, mass distribution like that is not a priority for us," a spokesman, Anthony A. Sprague, said. "Our emphasis is more on the individual end-user."

Although the two companies are increasing overlap in the data bases they supply, Mead in its LEXIS-NEXIS service has traditionally specialized in full-text retrieval of newspapers, newsletters, public records and legal documents - information more likely to be requested directly by individuals conducting their own on-line searches. Dialog has traditionally specialized in business directories and scientific literature, which is data more likely to be requested by a corporate or professional librarian for co-workers.

But Ms. Quint, the Searcher editor, argued that Mead could not long avoid the copyright issue. Some people doubt that such a payment system, which will operate on the honor system, can work.

"We're talking about something you can reproduce instantly with no cost to yourself," John Perry Barlow, vice chairman of the Electronic Frontier Foundation, a nonprofit group devoted to computer network issues. "The only thing restraining you is your conscience."

John S. Rosenberg, the head of Online Resources, Inc., a research firm in Falls Church, Va., that specializes in data base searches, is a big Dialog customer, commended Dialog's new policy but said it could prove costly for the scrupulous.

"There's going to be a fairly direct price increase for people who are honest," he said. "In the past it was so hard to get permission to do it, you just did it. It's information, after all."

But Ms. Quint maintained that because Dialog was for professionals, unlike consumer-oriented on-line services like Compuserve and Prodigy, compliance with the new fee structure might be strong.

"They're institutional creatures," she said of the professional searchers. "They're not going to do anything illegal."

She added that the system would allow them to avoid potentially expensive copyright infringement cases like that experienced recently by Texaco Inc. A large group of scientific publishers recently won a copyright infringement case against Texaco, which they said had routinely photocopied articles illegally. Texaco is appealing the case.

Moreover, Ms. Hong said that Dialog intended to win at a big stock. "We're not going to be out there policing, but if it comes to our attention that a customer is abusing copyright law, we're going to take action," she said. Theoretically, it could involve a lawsuit.

"Of course," she added, "we would feel terrible about suing a customer. It would have to be an egregious case."

FOR IMMEDIATE RELEASE

TARGET — A NEW WAY TO SEARCH ON DIALOG*

PALO ALTO, CA, 1 November 1993 — Dialog Information Services, Inc. will preview TARGET, a relevance ranking tool for searching in text files, at the Online/CD-ROM '93 Conference in Washington, DC on November 1-3, 1993.

Billed as "a new way to search on DIALOG," TARGET is particularly useful for initial or general searches of full-text information when the searcher:

- wants the most relevant records on a subject without having to wade through many records
- is unfamiliar with a subject area and needs to conduct an initial search to "get a feel" for what is out there
- is not an expert searcher

Based on statistical weighting rather than pure Boolean logic, TARGET automatically evaluates which articles are the most relevant to the searcher. It does this by examining the
number of times key terms appear in each document. TARGET then generates a list of up to 50 articles, sorting them in descending order, with the most statistically relevant at the top of the list.

TARGET can be accessed either by a menu mode, ideal for users with little or no search experience, or with a command mode for experienced searchers. TARGET works with the OneSearch* multiple-file search capability and can be used in most text or bibliographic databases. There is no surcharge for TARGET.

Dialog Information Services, Inc., a Knight-Ridder company, is the acknowledged world leader in electronic information access and delivery. The DIALOG service contains more than 450 databases, primarily in the business, news, scientific, and technical areas, used by over 155,000 customers in 100 countries. The DIALOG OnDisc* collection of databases on CDROM consists of more than 40 titles offered in six subject families: Business Information, Education & Humanities, Health & Biomedicine, Law & Government, Newspapers, and Science & Technology.

Customers interested in more information on TARGET should contact their account representatives or the Sales Department at Dialog Information Services, Inc., 3460 Hillview, Palo Alto, CA 94304, or phone: 800-3-DIALOG (800-334-2564) or 415-858-3785, or fax: 415-858-7069.

*DIALOG, DIALOG OnDisc, and OneSearch are service marks (registered U.S. Patent & Trademark Office) of Dialog Information Services, Inc. Dialog Information Services, Inc. is a Knight-Ridder company.

Eric Processing & Reference Facility
1301 Riccard Drive, Suite 300
Rockville, MD 20850
Attn: Ted Brandhorst

Dear Mr. Brandhorst:

As of January 1, 1994, SilverPlatter will no longer require subscribers to return superseded CD-ROM discs. Subscribers will be required to destroy each superseded disc. The terms of the subscribers' license agreements will continue to prohibit use of superseded discs. We have changed our return disc policy because of the burdens which the current program imposes on customers and on us, because we believe the costs of administering the program to have the superseded discs returned far exceeds any possible loss of revenue which might occur as a result of violation of the license agreements, and because we are confident that it will benefit the overall sales and renewals of your database.

In the past two years, we have experimented with a "no return disc" policy with several of our public domain databases and have found no detrimental effects. Our experience indicated that second copy subscriptions to these public files did not decline—and, in fact, overall subscriptions increased. We will monitor compliance with the license agreements, and will not tolerate unauthorized use of superseded discs.

Currently, we are devoting a significant amount of time and resources to maintaining an elaborate system to track each returned disc, and to send a dunning notice to each subscriber worldwide who failed to return a disc. Customers have complained that returning discs is time-consuming and costly. Further, when returned discs are not received at SilverPlatter, customer updates are delayed—resulting in unhappy customers and postponed renewals. We believe that we can mutually benefit from redirecting our energies toward expanding the market for your database.

We are committed to increasing the number of new subscribers who will benefit from your database, and to renewing subscriptions of those customers who already use your database.

Should you have any questions about our new superseded disc policy, please do not hesitate to contact me or your IP Relations Account Executive.

Sincerely,

Nancy Knight

Dear SilverPlatter Information Provider,

Enclosed is an advance copy of our new WinSPIRS software for the Microsoft Windows environment. As you are aware, for the past several months, WinSPIRS has been in beta test at over 50 sites worldwide. The response and feedback have been extremely positive. Because we have found this beta software to be highly stable, and the desire for a Windows version of SPIRS to be overwhelming, we are making a beta copy of WinSPIRS available to you on a controlled basis in order that you can preview your database with our technology.

WinSPIRS is the result of a major development project at SilverPlatter. We have redesigned both our search engine and retrieval interface to take advantage of the many benefits of a Graphical User Interface. WinSPIRS offers the best of retrieval technology and delivers a new, high performance search software.

This is a special opportunity to preview WinSPIRS and to experience the benefits of this powerful new search software. We hope that you will begin to use WinSPIRS. It is for use with all PC-SPIRS compatible databases.

Over the next few months, we intend to make WinSPIRS 1.0 available in General Release to all of our users, worldwide. This version of WinSPIRS will include several bug fixes and enhancements to the beta test software which is enclosed. Please read the enclosed material for information on all of the known bugs in this version and for other release notes relevant to this WinSPIRS beta software.

If you have any questions or comments, please contact SilverPlatter or your IP Relations Account Executive.

Very truly yours,

Nancy Knight
Vice President
IP-Relations

BEST COPY AVAILABLE
Software Release Notes

The following is a list of helpful hints and known bugs which may occur when using SilverPlatter's WinSPIRS 1.0 BETA software. We have indicated which bugs will be fixed with WinSPIRS Version 1.0. Customer Support has provided solutions where they are available.

DATABASE SPECIFIC

ERIC's DE field is searchable, but it does not display unless there is a hit in that field. In addition, users cannot display the DE field through the Show Options box. This will be fixed with Version 1.0.

When searching multiple discs, users may receive an error message searching PsycBooks with the Hotlinks feature. PsycBooks should be searched by itself. This will be fixed with Version 1.0.

AUTOMATIC SUBJECT LOOKUP (ASL)

ASL is designed to help users define their searches by mapping user input to the database controlled vocabulary and suggesting alternative search terms. The list of suggested terms is presented in order of occurrence with less relevant terms at the bottom of the list.

Although ASL is available with most SilverPlatter databases, the function should only be used with specific databases and may produce an error message when used with others. To avoid the error message, we recommend that you use it with only the following databases:

- AgeLine
- AIDSLINE
- Applied Science & Tech. Index
- Art Index
- AV Online
- Biography Index
- Biological & Agricultural Index
- Book Review Digest
- Business Periodicals Index
- CANCERLIT
- ClinPSYC
- Cumulative Book Index
- Education Index
- ERIC on SilverPlatter
- Essay & General Literature Index
- General Science Index
- HealthPLAN-CD
- Humanities Index
- ICONDA
- Index to Legal Periodicals
- Information Science Abs. Plus
- Int'l Nuclear Info. System (INIS)
- Int'l Pharmaceutical Abs. (IPA)
- Library Literature
- Life Sciences Collection
- MDX Health Digest
- MEDLINE Express
- MEDLINE Professional
- MEDLINE Standard
- NTIS on SilverPlatter
- Nursing & Allied Hlth (CINAHL)
- OCLC Computer Library
- OCLC Education Library
- OCLC Environment Library
- OCLC Music Library
- PsycINFO
- PsycLIT (Journals & Books)
- Readers' Guide Abstracts
- Readers' Guide to Periodical Literature
- RSWB
- Social Sciences Index
- Social Work Abstracts Plus
- TROPAG & RURAL
- WastInfo
- WATERLIT
- Wilson Business Abstracts

INSTALLATION

The CINAHL disc must be placed before any MEDLINE discs in a tower of CD drives. Otherwise, if users search the databases simultaneously, the CINAHL subject headings will not be searchable or displayable. This will be fixed with Version 1.0.
Special instructions are needed to use WinSPIRS as the Windows shell for a dedicated workstation setup. Please call SilverPlatter's Customer Support department for more information.

Users may receive an FC27 error when trying to access MEDLINE Express on hard disk. Please call Customer Support if you encounter this problem.

MeSH THESAURUS

When a term is searched in the MeSH thesaurus, the highlight appears over that term within the MeSH list. This gives users a chance to scroll through MeSH. When the highlight bar is moved to another term, search options are not grayed out (single-term or explode) even though the term has not yet been selected by the user. Users must highlight the second term in order to select it. This will be fixed with Version 1.0.

If users enter EXP <TERM> /ALL at the search window for a MeSH term that has no narrower terms, WinSPIRS will perform an accurate single-term search, although the search history will display the search statement as an explode.

If users search <TERM>/ALL, either from the thesaurus or at the search window, for a MeSH term that allows no subheadings, WinSPIRS will execute the search accurately although the search history statement displays "all subheadings".

LIMIT FIELDS

When limiting a search, the entire limit field or limit value may not show in the Limit Options box. Users may not be able to see the entire limit value until it has been selected and added to the new search.

SHOW, PRINT OR DOWNLOAD

WinSPIRS does not automatically clear marked sets once they have been printed or downloaded. Users may get duplicate sets of previously printed or downloaded marked records unless they select Clear Marked Sets from the Records menu after each print or download.

Currently there is no way to remove document numbers (e.g., 12 of 30) from downloaded records. ProCite users should remove these numbers from the file before importing it into their database. This will be fixed in Version 1.0.

The "Show Brief Fields" button shows the fields specified by the user in the Show Options box. If a user specifies ALL fields in the Show Options Box, selecting "Show Brief Fields" and "Show All Fields" produces the same results.

There is currently no way to change the format of a downloaded file. Users who cannot correctly print unformatted ASCII text to a dot matrix printer can import the file into a word processor. This will be fixed in Version 1.0.
The keyboard navigation keys may not work in some areas (e.g., the arrow keys).

LATERAL SEARCHING

When lateral searching a multi-word term that contains a comma, only one term is highlighted when double clicking on the multi-word term. For example, when users double-click on the term GENETICS, MEDICAL, only GENETICS will be highlighted and searched. To avoid the bug, highlight the entire term and click on the “Add to Search” button. This will be fixed with Version 1.0.

INDEX FUNCTION

The behavior of the scroll bar in certain limit field index boxes that contain a large number of entries is inaccurate. For example, in the AN index, the “thumb” control may appear at the bottom of the scroll bar, regardless of the portion of the index that is being displayed. In addition, users may not be able to view the entire list. Indexes that include one entry for every record in the database will be purged from view in the future.

In MEDLINE, there are duplicate entries in the Checktags index (e.g., human and human-). They result in the same number of hits. This will be corrected in the 1994 Edition of MEDLINE.

NETWORK ISSUES

If you receive a General Protection Fault at address 0001:49E4 when starting WinSPIRS, ensure that there are no drive letters mapped to other versions of SilverPlatter software.

HELPFUL HINTS

The field defaults for Show, Print, and Download are pre-set. Users can change these settings when they enter WinSPIRS. However, the pre-set defaults cannot be permanently changed.

To print or download “held titles only” records when using Library Holdings, select Show Held Titles Only from the Records menu, then print or download all records.

To mark records, click on the small box next to the record number, or select a record by clicking anywhere in the record with the mouse and choose Mark Current Record from the Records menu.

When reconfiguring SPIRS to select legal drives for the download and search history functions, users will receive a message if they place spaces in a list of drive letters. Separate drive letters by commas, not by spaces.
Installing WinSPIRS

TO INSTALL THE WinSPIRS 1.0 BETA SOFTWARE:

1. Insert WinSPIRS 1.0 BETA Setup Disk 1 into a floppy drive.
2. Start Windows from the DOS prompt.
3. From the Program Manager, choose File, then Run from the menu.
4. At the command line, type the drive letter where the WinSPIRS disk is located and the word setup, such as a:setup, and click OK (or press ENTER).
5. When the WinSPIRS Setup screen appears, click CONTINUE to continue the installation.
6. The next dialog box displays a prompt asking you to confirm the WinSPIRS subdirectory. Click CONTINUE to accept the default subdirectory C:\WINSPIRS, or type a new subdirectory and click CONTINUE.
7. After Disk 1 is finished installing, you will be prompted to insert Disk 2. Insert Disk 2 and click OK or press ENTER to continue the installation.
8. After the installation is complete, you can click OK to accept the default configuration options, or you can click the RECONFIG button to change the options. Options can be changed at any time through the WinSPIRS RECONFIG program.

Once done, you will return to the Program Manager. A new program group named WinSPIRS, containing the WinSPIRS icon and the WinSPIRS Reconfiguration icon, will be displayed in the Program Manager.

You are now ready to use WinSPIRS. For more information, see the WinSPIRS Getting Started Guide.

March 28, 1994

Mr. Ted Brandhorst
ERIC Processing and Reference Facility
1301 Ricard Dr., Suite 360
Rockville, MD 20850

Dear Ted,

I enjoyed our conversation last week regarding the Internet and SilverPlatter's project investigating its use for data delivery. I have summarized our discussion in this letter outlining our current progress. Please feel free to call me with any questions.

Background.
Over the past year, SilverPlatter has noticed the possibilities available by the myriad of computer networks collectively referred to as the Internet. It is clear to us that the Internet will radically transform the information delivery landscape. SilverPlatter has built its reputation using CD-ROM as a method of distribution, we are beginning to explore how to best use the Internet as a means of creating an additional service for serving our customers and business partners.

Description of Beta Test.
SilverPlatter is currently in the early stages of testing Internet delivery of information. The goal of the project is to create a commercial channel that will offer our Information Providers and distributors a new opportunity, and to offer customers a reliable, hassle-free method for accessing the data they need.

The project is based on SilverPlatter's ERL technology which uses client-server architecture. SilverPlatter is hosting 10 databases on an Intel-based server in our Norwood, MA office. These databases are available on a no charge basis via Internet for approximately 20 customer sites. These customers are full Internet nodes and access the data with our DOS client software. The Windows and Macintosh clients will be available later this spring.

We are planning to expand both the number of users and databases that are part of the beta test. We would like to increase the number of users to approximately 60 around the world. We would also like to offer the opportunity for additional data providers to become involved by making more data available to this beta group.
Testing Business Models.
In addition to testing the hardware and software components of this service, a very important consideration will be determining which business model to use in making this a commercial service that adds value for you. Throughout this test phase, we are especially interested in hearing from you about how you will be best served by this type of service. Again, our goal is to build a secure method of data delivery that helps our data providers achieve their goals.

SilverPlatter has considered several possible models which are outlined below. Consider these a starting point for our discussion.

I) Single Database subscription
This approach is similar to our existing CD-ROM subscription model except the data will be read off of a server over Internet. The goal is to offer the user a choice of how they want to access the data.

II) Group/Library Subscription
The second type of subscription could be to a "library" of products. In this scenario the user would subscribe to a predetermined number or group of databases. Simultaneous usage to these databases will be for the group of databases rather than for each individual database as is the case with CD-ROM. This will limit the amount of usage that any one database may get which could allow us to offer the package of databases at a price below the sum of their individual subscription fees. The idea is to extend use of the data to new markets that previously wouldn't buy a full subscription.

If you would like more information on our Internet delivery project by please feel free to call me at 800-343-0064.

Sincerely,

Mark Sutton
Director of Marketing/Internet Delivery Project
Dear BRS Customer,

I’m pleased to announce that CD PLUS Technologies has signed an agreement to acquire the BRS Online Products division of InfoPro Technologies. I would like to explain how this will affect you as a BRS customer. I think you’ll find our vision an exciting one.

First and foremost, I’d like to reassure you that the BRS service will operate as usual for a number of months as we work through a transition period. After this time, the CD PLUS OVID interface will replace the BRS interface. Because OVID supports the dot-dot command syntax and powerful searching tools you are familiar with, you will experience no interruption in service.

**Improved Search Capabilities**
OVID also offers new capabilities for you as a professional searcher. These include natural language mapping to subject headings, database specific limits and searchable tree displays and permuted indexes. Occasional searchers will benefit from OVID’s full screen menus and context sensitive HELP. When our client/server OVID software is released, Internet customers will be able to search via Windows, DOS and Macintosh interfaces, and using either the Windows or Macintosh interfaces, access images within the full text journal collection and have all the functionality associated with graphical user interfaces.

**More Access Options**
Like BRS, CD PLUS has specialized in serving the information needs of the biomedical and scientific community. Our focus, however, has been on local search solutions for single users, institutions and consortia. Combining the resources of CD PLUS and BRS will place us in the unique position of being able to provide you a complete range of information service options, from CD-ROM to local magnetic networks, to centrally loaded files available via phone lines and the Internet.

**Flexible Pricing Options**
We recognize the need for predictable online costs and flexible payment options. To this end, we are currently evaluating a number of possibilities, including fixed fee and simplified pay-as-you-go alternatives.

Let me conclude by assuring you that we are committed to providing you with superior products and services. As the transition progresses, we will be sending more detailed information about our plans. If you have any questions about our services or suggestions about things you would like to see us do, please contact CD PLUS Technologies at 800-950-2035 x400 or 212-563-3006 x400.

We look forward to working with you to create the kinds of services and products you need.

Sincerely,

Mark Nelson
President, CD PLUS Technologies

Volume 18, No. 1, May 1994 Attachment 26(A)-1 ERIC Administrative Bulletin (EAB)
InfoPro Technologies Sold and Divided: BRS to CD Plus, BRS Software to Dataware, ORBIT to Questel

The rumors have finally come true. MHIC Inc., the holding company for remaining Maxwell/Macmillan interests, has announced the sale of the divisions of InfoPro Technologies, a subsidiary of the late Robert Maxwell’s U.S. publishing holdings. A group of three firms negotiated the sale, with each company acquiring the assets of InfoPro Technologies’ existing divisions. CD Plus Technologies acquired BRS Online Products. Dataware Technologies took BRS Software Products, and Questel now owns ORBIT Online Products. Each company will operate the businesses separately.

InfoPro Technologies itself will cease operation, with some facilities taken over by new owners, and other operations moved or closed. InfoPro Technologies was established in 1989 through the merger of the ORBIT Search Service (in operation since 1973) and Bibliographic Retrieval Service (which began commercial operations in 1977). Currently BRS and ORBIT run data operations on computers in Illinois at the Official Airline Guides service. By the end of June, new owners will have to remove their data from those machines.

Andy Gregory, president of InfoPro Technologies, congratulated the new owners and predicted that “a large part of the strategies we started at InfoPro Technologies will go forward in whole or in part and customers will continue to get good information at good value.” Not all InfoPro Technologies employees could expect to transfer to staff positions with the new owners, but Gregory expected from 70 to 85% of the jobs would remain for the present.

What Will Happen to BRS?

According to Mark Nelson, founder and president of CD Plus Technologies, the firm intended to start an online dial-up operation sometime this year anyway. The goal of CD Plus’ strategy is to develop “media independent access from CD-ROM stand-alone discs to local magnetic networks to centrally loaded files accessible via phone lines and the Internet.” The chance to buy BRS operations seemed an excellent opportunity. CD Plus, like BRS, targets scientific, biomedical, and academic content changes to announce. They do plan to review current content with an eye to market and database strengths. According to Martin Kahn, they will definitely keep the major medical and academic databases, but may drop some smaller files. The Comprehensive Core Medical Library (CCML), collection of full-text sources on BRS constituted a major attraction for the BRS purchase, according to Kahn. CD Plus plans to add more full-text in the future, both in the number of titles covered and in the addition of electronic delivery of journal article images of graphics, tables, pictures, etc. They will move BRS operations to their New York headquarters before the end of June. Ovid software already supports overlapping databases with BRS, e.g., Medline, PsyclINFO, Embase, ERIC, etc. According to Mark Nelson, they might ultimately run the BRS operation outside New York City.

When the transfer of database operations to New York is complete sometime after June, CD Plus will replace the BRS/Search software engine with its own Ovid software. The Ovid software can work in client/server versions with DOS, Windows, and Unix operating environments. “Dot-dot” BRS searchers should find Ovid’s command mode familiar. CD Plus plans to deliver images of charts, tables, and figures from journal articles over the Internet as compressed graphics files using a standard graphics format like TIFF. The software will decompress and display when client hardware and software permit.

With the new acquisition, CD Plus was busy examining BRS contracts with database producers and key clients. They are setting up new negotiation sessions to deal, among other things, with the expanded media opportunities of CD Plus’ local area network, magnetic tape, etc.

(continued on page 14)
and CD-ROM product lines. According to one CD Plus executive, they may phase out the BRS name or possibly combine it with CD Plus designations. They may keep the Colleague name in some form, too. BRS/Colleague targeted health professionals with a menu system and special marketing.

There seems little doubt that BRS will never be the same again, but CD Plus does promise new software options, new full-text options, and increased support to large customers. The most immediate downside of the switch would be the fate of small, exclusive files with limited revenue potential. However, the ever declining cost of operating small databases, combined with cheap network access, primarily the Internet, should offer any dropped database producers several options for recovering their online availability. Academic databases might turn to campus computer networks. Present CD Plus in general concentrates on major sales to major customers rather than the retail-oriented marketing, except for Colleague. However, one of the contracts CD Plus Technologies will find in the BRS pile is the gateway arrangement with Telebase Systems’ Easynet Knowledge Gateway. Again the rise of network access options could switch general marketing of CD Plus/CD-ROM data to customers acting as user intermediaries. Time will tell.

What Will Happen to BRS Software?

Rumors persist that BRS Software Products, home of BRS/Search text and image database management software, constituted the most profitable center of InfoPro Technologies operations at one time. BRS created BRS Software in 1982 as a separate division for marketing its text information management software. In 1993, BRS Software Products’ revenue totaled approximately $9,000,000 from some 1,200 customers, with over 1,500 installations worldwide. Dataware Technologies provides software and services to the rapidly growing CD-ROM marketplace. Dataware’s software is used by more than 400 organizations worldwide, distributing more than 600 CD-ROM titles to over 100,000 end users. The software runs on DOS, Windows, Unix, and Macintosh-based systems. In 1992, according to one expert study, Dataware Technologies and BRS Software Products tied for third in market share of the text retrieval DBMS market. The acquisition should put Dataware in first place, according to an industry observer.

Founded in 1988, Dataware Technologies went public in July of 1993, registering over $33,000,000 in assets. BRS Software Products is not the only recent acquisition by Dataware. In January they also filed a letter of intent to acquire the assets of PCD-Consult AB, a Swedish distributor of Dataware’s CD-Answer and CD-Author products. In the same month they purchased Megalith Technologies Inc., a Canadian CD-ROM distributor, for $3,000,000.

Dataware plans to preserve individual BRS Software product names, e.g., BRS/Search, after the integration. According to Kurt Mueller, chairman and CEO of Dataware, the combination of Dataware’s CD-ROM with BRS’ online/client-server support should provide a complete solution for customers. The combined product services will include data capture and conversion (data, text, graphics, multimedia), custom software development, project consulting, CD-ROM mastering and CD-recordable services, maintenance services, training, and multimedia production services. Muller also indicated they planned to start working with BRS Software Products’ employees and customers immediately. Currently, Dataware employs some 180 people worldwide and has established distribution in twelve European countries as well as the Pacific Rim and Canada. BRS currently employs some 110 people. In time, Dataware will create a next generation of products in each category that will replace BRS Software products, but customers will get an upgrade path to move to new products. Dataware plans to continue offering and supporting all products from the combined organizations until next generation software is produced. Current prices should stay the same under existing agreements, though Dataware plans to add some additional pricing options. New limited upgrades will involve no extra expense to customers, but next generation products with major new features and enhancements may involve a price increase.

What Will Happen to ORBIT?

Nancy Lambert, The Better Mousetrap columnist

Patent and sci-tech literature searchers who depend on ORBIT breathed a sigh of relief at the big news of February 1, 1994. After several years of uncertainty following the troubled Maxwell Communications Corp., ORBIT is now in the hands of Questel, a division of FTLIS, France Telecom Software and Systems Division, which has bought the ORBIT portion of the former InfoPro Technologies.

I interviewed Frederic Spagnou, managing director of Questel; Richard Kurt, general manager of the U.S. Questel office; Marilee Winiarski, vice president of Marketing and Business Development at ORBIT; and Faud Khorsandian, vice president of Sales at Derwent Inc., whose World Patents Index is the largest single patent database mounted on both hosts. From there I gleaned facts and opinions.

In the U.S., the offices will merge; Questel staff in Alexandria, Virginia, will move into ORBIT’s offices in McLean, Virginia. By the way, the three principal Questel people in the U.S. — Richard Kurt, Holly Chong-Williams, and David Dickens — all came to Questel from ORBIT and have intimate knowledge of both systems. Richard and Holly also worked for Derwent before ORBIT. In Europe, the organizations will maintain two offices, the original Questel office in Paris and the ORBIT office in London. The two will share responsibility for managing the expanded company.

The press release announcing the purchase stressed that, at least for now, the changeover should be transparent to

(continued on page 16)
(continued from page 14)

users. Questel will maintain the ORBIT system as well as its own, each searchable by its own software. Further, each will have its own marketing and customer support, much of it by current Questel and ORBIT staff. Contacts and help-desk phone numbers will stay the same for both systems. So will online prices, for now. (If you want to read the press release, you can find full text on the PIJG (Patent Information Users Group) public bulletin board on DialMail.)

Within 18 months, Questel plans to introduce a client/server architecture, a common platform for Questel and ORBIT customers that will in effect merge the best features of each software. Initially it will connect the hosts and permit searching of both with either command language. This will take place in a Windows-type environment that will deliver images as well as text. I will report more details as they become available.

The real benefits of the merger will become evident only after the interface is up and working. This is true not only for users but also for database producers, especially those now paying to mount their databases on both hosts. Questel, however, should benefit immediately from the economies of the merger. Revenues from both hosts will go into the same pot. Questel management promised increased investment in ORBIT's technological growth.

From the user's point of view, the merger seems logical, certainly more natural than the ORBIT-BRS merger (which, in fact, never really took place). The two hosts serve similar customers. Both have strong collections of scientific and intellectual property information, and each has valuable, unique databases. Together they mount a most impressive catalog of databases in these areas. Questel wants to expand its U.S. market and to expand ORBIT usage both here and abroad. It wants, in other words, to become a truly global company, with customers and information resources all over the world.

Several important questions remained unanswered at press time:

1. What will Questel name the new organization?
2. Who will head US operations of the merged Questel-ORBIT?
3. Will Questel maintain ORBIT's practice of locating field representatives in their own territories?
4. How will the gateway deal with search features unique to one host? For instance, Questel's MEM command can take selected parts of a field (e.g., only U.S. patents from an international patent family field) and place them on a select list for further manipulation. Questel has double truncation, numeric ranging, and other desirable features that ORBIT does not. ORBIT, in turn, has PowerSearch, a cross-file search and de-duplication feature that works on patent files as well as some bibliographic databases. Searchers will want to use the strong features of both hosts together.
5. ORBIT had planned to add a number of European and French patent and trademark databases now on Questel. Will they still do so? Will they, perhaps, add only those most likely to succeed, and wait for the host interface to market the others on Questel to U.S. customers?

Answers to these questions and reports on developments as they occur will appear in later columns. If any readers want us to ask some other questions (or to share reactions), please get in touch.
Winter 1994

LOCAL TITLES AND SDI FEATURES ARE NOW AVAILABLE ON ERIC

To Our ERIC Subscribers:

If ERIC is Already Installed...

ERIC is pleased to send you your updated ERIC disc. To install this new disc, all you have to do is remove your previous ERIC disc and replace it with the updated ERIC disc. If you subscribe to the full ERIC file you will have received Discs #1 and #2, if you subscribe to the current file only, you will have received Disc #1. (If you are within ERIC, just exit to the C:\> prompt before attempting to remove the disc.) Please Note: In order to make use of the New Local Titles and SDI features Eric Full File clients should reinstall by typing D:INSTALL ERIC and press [Enter]. ("D" represents your CD-ROM drive letter in the installation command. Substitute your drive letter if different.) Access ERIC as usual by typing ERIC at your C:\> prompt. Your disc will install itself automatically. For more detailed instructions, please refer to your manual.

If This is Your First ERIC CD-ROM Disc...

Welcome to the innovative CD-ROM world of EBSCO Publishing. With the enclosed disc, you will soon be enjoying the most sophisticated and practical information available in this technology. If you subscribe to the full ERIC file you will have received Discs #1 and #2, if you subscribe to the current file only, you will have received Disc #1.

Installation of this disc is easy, provided you follow these simple directions!

1. Microsoft Extensions, version 2.1 or greater, must be installed before installing this CD-ROM disc. If you are using EBSCO's workstation, Extensions has already been installed. DO NOT REINSTALL! If you purchased your computer elsewhere, please be sure that Microsoft Extensions has been installed once.

2. Turn on your computer. Type: CD\ and press the [ENTER] key. This accesses the root directory of the hard disk. If you get the same prompt, you are already there.

3. Insert the ERIC CD-ROM disc in the player. If you ordered the full ERIC file, and you have only one CD-ROM player, then insert Disc #1 in the player. EBSCO workstations and some other CD-ROM players require the use of a cartridge disc holder. Place the disc in the cartridge and insert it into the player.

4. Your ERIC software must be installed before you use it. To install ERIC, type: D:INSTALL ERIC and press the [ENTER] key. ("D" represents your CD-ROM drive letter in the installation command) NOTE: Most EBSCO workstations
use "D" as the drive letter where you have placed Disc #1. "D" and "E" are the most common drive letters assigned to the CD-ROM player by the Microsoft Extensions program. Substitute your drive letter if different.

5. You will be prompted to answer several questions during the installation process. When the installation is complete, the following message will appear: "Successfully completed installation of ERIC." If you are networking and need networking directions, please contact Technical Support. For additional information please refer to your User Guide.

**Practical Information**

EBSCO Publishing has added Local Title and Selective Dissemination of Information (SDI) capabilities to ERIC/EBSCO CD-ROM. You are now able to flag titles that you have in your collection, give the user specific information about certain titles, and compile reports of usage. Your ERIC/EBSCO CD-ROM Local Titles and SDI Features Supplement contains all the information you need to use these new features.

**For Our Network Users**

If you have your EBSCO-CD software installed on a LAN (Local Area Network), please refer to your network manager for installation of your new disk. It is important to be aware that you must have sufficient privilege to install and that no other users can be logged in during the installation process. You will find additional networking installation instructions in your EBSCO CD-ROM manual.

We look forward to assisting you and making your EBSCO CD-ROM experience a pleasant one. Help is available from our Technical Support Department at our toll-free line (1-800-758-5995) from 9 a.m. to 7:00 p.m. Eastern Time, Monday through Friday or FAX our Technical Support Department at 1-508-535-8523. Our Customer Service and Sales staff telephone number is 1-800-653-2726.

Debi Therriault
Customer Service
Mr. Robert Stonehill, Director
ERIC Program
U.S.D.E./Office of Education Research and Improvement
555 New Jersey Avenue, NW
Washington, D.C. 20208-5720

January 19, 1994

Dear Mr. Stonehill:

I feel we made some good progress in our conversation yesterday. Let’s keep up the dialog. As an afterthought, I’m enclosing a few items about NISC, and what our data suppliers can expect from working with us. These documents, however, apply to the usual type of arrangement which we structure and not the type of cooperative association we are trying to build. Under no other circumstances would I ever make as large a file as ERIC available through our software at such a low price point as I have pledged to you (i.e., $38.00 for a quarterly updated CD-ROM, 1980-Present -- as well as the one-time backfile, 1966-1979). Please accept these documents as background material only since some of it may not be relevant to what we want to do. With this understanding, feel free to share these materials with your colleagues.

Please note that NISC alone provides statistics on database usage, as gathered from both CD-ROM and Internet users. We collect over a hundred statistics including all the search text itself, and whether or not the search was successful. With this information, it’s easy for database managers to assess the real, practical needs of users. You can be sure that no significant trends will slip by (or show up too late to be acted upon). Both acquisitions and thesaurus development can respond quickly and appropriately to new patterns and events. As the Internet begins to accelerate the use and provision of education resources, this kind of rapid, quantified feedback will become more and more valuable. Please read page two of Database Publishing with NISC for more details of our statistics-gathering module.

I look forward to demonstrating the thesaurus module as soon as we can schedule a meeting. I remain interested in your suggestions for refinements to the interface, and would be pleased to modify our software as you and the other ERIC officers consider appropriate for the types of end-users we hope to attract. Such interaction can lead to valuable insights.

Please be in touch with any questions or ideas. Good luck with the board meeting.

Sincerely,

Fred Dürr
Publisher

Encl.
Please follow the installation instructions at the bottom of this letter.

October 29, 1993

Dear ERIC on CD-ROM Subscriber,

Welcome to the first edition of NISC's ERIC on CD-ROM. Please note that this issue (like all other NISC DISCs) must be installed directly from the CD-ROM. Installation instructions are provided below.

Our goal is to publish the best CD-ROM edition of ERIC. The data on this NISC DISC is clearer and more comprehensive than what is available on other systems. We permit three search modes. Choices range from simple to the most flexible (and informational) mode of set searching (see User's Guide, pages 39-53). Our January issue of ERIC will include fully functional display and search features for the ERIC Thesaurus. Please let your colleagues know about this free offer to ERIC on CD-ROM.

As always, where you think improvements can be made, please inform us. We promise to respond to your suggestions in a timely fashion. In one sense, ROMVISION™ is your software, should you choose to influence its future development.

Sincerely,

W. Frederick Dürr
Publisher

INSTALLATION INSTRUCTIONS:
The software is installed directly from the CD-ROM. Place the NISC DISC in the CD-ROM drive, switch to the DOS prompt for the CD-ROM drive letter and type:

```
INSTALL <ENTER>
```

No installation code is required. NOTE: The 1980 to Present disc must be used to install the software. This installation enables use of both the ERIC 1966 - 1979 as well as the 1980 - Present discs.

Follow the installation instructions as they appear on the screen. Read Chapter 2 of the User's Guide for additional information. Pages 19-21 explain the new (optional) NISC DISC configuration program - NWCONFIG.EXE.

To start the NISC DISC, type NISC from the root directory (usually the C:> prompt) to access a menu to all the different NISC DISCs you have installed and select the NOVICE, ADVANCED or EXPERT mode of searching. Type:

```
C:> NISC <ENTER>
```

A Company in the Public Interest
Suite #6 • Wyman Towers • 3100 St. Paul Street • Baltimore, Maryland 21218 USA
Tel: (410) 243-0797 Fax: (410) 243-0982
FREE with subscription to any other NISC DISC ($500 or higher) • No LAN charge! Superior ROMWRIGHT™ software • Includes the Thesaurus of ERIC Descriptors

"I am impressed!...Your search package is a real step forward...the power of the system doesn't obscure a basic search process. When I switched to the EXPERT level (without reading the instructions) I expected to suffer the usual confusion. Not so!...You have done your homework on problems of doing searches, and have developed a search package that is considerably better than any I have seen."

— Robert Chesley, Education Consultant & former ERIC Director, December, 1993

If you currently use ERIC on CD-ROM, here's a great way to upgrade and save hundreds of dollars. Join the thousands of NISC DISC subscribers who've discovered the best search software. NISC DISCs are faster and more powerful, yet SilverPlatter™ and Dialog™ users feel right at home. Better still, ERIC on CD-ROM is free with another NISC DISC subscription! Your users will thank you, you'll save hundreds of dollars, plus you get two NISC DISC subscriptions for one low price.

ERIC on CD-ROM is the entire ERIC database, plus new documents announced in RIE and CIJE. You also get all ERIC Digests and the Thesaurus of ERIC Descriptors. This two-disc set can be used on any CD-ROM platform — single-user PCs or networks. No extra charge for LAN or WAN access!

The Educational Resources Information Center (ERIC) database is the world's largest collection of educational materials, spanning more than a quarter century of federally-supported education resource management. ERIC has more than 830,000 bibliographic records of documents and journal articles, and approximately 8,000 records are added quarterly. Research papers, dissertations, conference proceedings, literature reviews, syllabi, curricula, and articles from approximately 800 education-related journals are indexed and abstracted for the database. And, NISC provides the exact hard-copy price of documents available from the ERIC Document Reproduction Service (EDRS).

ERIC Digests are timely two-page research syntheses reflecting the most valuable material entering the ERIC database. Prepared by specialists in the twenty main and adjunct ERIC clearinghouses, roughly 1,000 digests address all major topics in education.

The Thesaurus of ERIC Descriptors is the complete list of almost 10,000 official index terms used by the ERIC system. You'll be amazed by NISC's electronic implementation of the thesaurus. Advanced "word tree" navigation makes search term selection a snap.

OVER

A Company in the Public Interest
Suite #6 • Wyman Towers • 3100 St. Paul Street • Baltimore, Maryland 21218 USA
Tel: 410/243-0982 Fax: 410/243-0982
ERIC is used by teachers, students, parents, librarians, school boards, administrators, journalists, civil servants, and other professionals in every state and over 100 countries. Documents are acquired on specialized topics by the vast network of ERIC clearinghouses and related service organizations. Make the best use of the entire ERIC collection with NISC’s ERIC on CD-ROM.

This advanced new ERIC CD-ROM is yours free with a subscription to any other NISC DISC priced $595 or higher. Why is NISC doing this? What better way to get to know NISC — a fast-growing publisher of bibliographic and full-text databases. As a company in the public interest, NISC firmly believes that the work of education is too valuable not to make widely available. NISC’s ERIC on CD-ROM is simply the best available, at an unbeatable price. Save even more time and money with each search of one of the world’s most popular databases. Your order will arrive either quarterly or semi-annually, depending on the NISC DISC you choose. Don’t miss this terrific two-for-one opportunity.

Title: ERIC on CD-ROM

Software: Standard NISC DISC user interface and context-sensitive help; NOVICE, ADVANCED, and EXPERT search modes. Powerful ROMWRIGHT software with full Boolean and proximity retrieval. Unparalleled search speed, field-specific index browsing, record display, sorting, and output. Intended for the new or experienced CD-ROM user requiring basic or sophisticated searching and database analysis. Administrators may control the interface, output, and other options, e.g., choose only the EXPERT set-searching mode.

Hardware: Any DOS-capable PC (IBM-compatible PC, XT/AT, PS/2, etc.) — single station or network; any CD-ROM drive; monochrome or color monitor; 512k RAM available.

Availability: Disc I, ERIC 1966-1979, and Disc II, ERIC 1980-Present, are shipped with the first issue of your “parent” NISC DISC subscription. Thereafter, Disc II updates are shipped with the parent NISC DISC update (either quarterly or semi-annually depending on the paid subscription update cycle).

Terms: ERIC on CD-ROM discs are yours to keep, but cannot be used for commercial access, contribute to any form of revenue generation, or become part of any other electronic product or service. No extra charge for LAN or WAN use.

Price: FREE with a direct subscription to any NISC DISC priced $500.00 or higher. Sorry, owing to cost considerations, this offer is not available through distributors.

To order: NISC USA: 410/243-0797 Fax: 410/243-0982

Call for information on other NISC DISCs in the natural and social sciences, humanities, and general interest. Subscribe to both Consumers Reference Disc and ERIC on CD-ROM for just $695.00!

Volume 18, No. 1, May 1994
Attachment 28(B)-3 ERIC Administrative Bulletin (EAB)
BIBLIOGRAPHIC SEARCH & RETRIEVAL SOFTWARE AT ITS FINEST

Baltimore - National Information Services Corporation (NISC) is pleased to announce completion of Phase II of ROMWright™, featuring the latest advances in CD-ROM search and retrieval software for bibliographic and full-text databases. Users appreciate ROMWright™'s thoroughly intuitive responsiveness and clarity of design. Superior search speed, title browsing, record tagging for a variety of output, and a truly interactive automatic index are hallmarks of NISC DISC quality. No other software provides three distinct search modes for accessing the same database; search levels can range from the simplest to the most sophisticated. ROMWright™ is truly faster and more capable, yet easier to use than any other CD-ROM system. And now, several major new capabilities distinguish this powerful software - the premier choice for database users and publishers alike.

SOME OF THE LATEST IN ROMWRIGHT™:

✔ New EXPERT search mode for set searching
  A powerful, innovative update to the online set searching approach. Sure to set new standards for flexibility and convenience.

✔ Superior plural searching
  Automatic, on or off - this is the best implementation in the industry.

✔ Greater selection of record display formats:
  Browse by title and year, or choose among several citation or whole record formats. Many more features for display and output.

✔ Sorting and incremental sorting
  Sort records by field for display and output. Or sort incrementally - sort-within-a-sort!

✔ System Administrator module
  Control the OPTIONS MENU settings for all users, output to specific drives. Many more system configuration options for LANs.

✔ All-new output features & formatting options
  Every printing and downloading method has been made easier to use. And now you can set margins, line and page length, etc.

✔ Output in citation, display, or custom format
  Choose the default citation format, the current display format, or a custom format you create and save. Fully configurable.

✔ New 50-line record display option
  See more records and more of each record on-screen at a time - very convenient.

✔ Full-text databases, of any size
  You won't have to learn a new software, just a few great new features. And great new databases - check out Federal News!

✔ Outlines for full-text databases
  Outlines help make lengthy records as easy to access as short citations.

NOTHING IS FASTER THAN ROMWRIGHT™!

Compare for yourself. Some databases, such as ERIC, are also available from other publishers. If you're using one of their versions, we invite you to try a NISC DISC. Test identical databases side-by-side - you'll be amazed by ROMWright™'s much greater search speed and more thorough search capability. Robust search aids, configurable options, and straightforward display and output make your entire NISC DISC session quicker and more productive. Busy libraries and end-users can save time with every search, regaining hours over the course of a week.

Volume 18, No. 1, May 1994
Attachment 28(B)-4
ERIC Administrative Bulletin (EAB)
National Information Services Corporation (NISC), a CD-ROM publishing company, was founded by Fred Dür in 1988. As of 1994, NISC is launching online and Internet services to broaden access to the full-text and bibliographic files it provides. NISC also produces such well-respected databases as Selected Water Resources Abstracts. Titles cover a wide range of topics in the natural sciences, social sciences, arts, and humanities. The two Latin American Studies volumes are one example of a comprehensive series on a particular region. NISC also publishes many popular titles, such as Toastmaster and Speakers' Materials on CD-ROM. Among our latest products are the POPLINE database of world population information, and the Federal News CD-ROM, featuring complete coverage of the premiere via satellite political news service, with full text of the speeches, interviews, and written statements of U.S. and world leaders.

NISC is a privately-held company whose staff is dedicated to serving the public interest. Offering top-quality information products at the lowest possible rates, NISC serves both the educator and the educated consumer. We are pleased to offer the complete ERIC database of education materials on CD-ROM free with a regular subscription to a NISC DISC. Other vendors charge as much as $1,850.00/year for this service. Also, because of its social importance, NISC's Child Abuse and Neglect CD-ROM is available free by written request, with no obligation.

A considerable portion of revenue is invested in product improvement and new product development. Product marketing is focused and efficient. NISC possesses an extremely valuable, regularly updated online and CD-ROM press release database and network of contacts. New titles are guaranteed to receive wide coverage in CD-ROM directories, catalogs, and books. NISC DISCs are regularly featured in such publications as Information Today's "CD-ROM Today," CD-ROM Librarian, CD-ROM World, International CD-ROM, and CD-ROM Professional. Committed to the interests of its customers and the general public, NISC is the conscientious choice of researchers seeking comprehensive coverage, superior software, and consistent value.

Global Perspective

NISC searches worldwide for high-quality data files. We solicit your help, regardless of database size, scope, or electronic format. Databases which are already available electronically (CD-ROM/online) usually can still be published on a NISC DISC or added to the NISCnet™ online services. If you are aware of a file which may be of value to your profession, and would like it published by NISC, please contact us.

Forty percent of NISC subscribers are foreign, a fast-growing, very significant market. As many as fifty foreign --and several domestic-- distributors list NISC DISCs among their information products. NISC DISCs are sold to the library market by Microninfo, Updata, Readmore, and regional library cooperatives, as well as by general subscription services, such as EBSCO, Faxon, Serials Management of Canada, etc. NISC DISCs are used by professional organizations and individuals all over the world, on all types of PC equipment. NISC is particularly strong in developing countries, where CD-ROM is often the only practical means of access to large volumes of data. No other format puts each database in front of as many users worldwide.

A Company in the Public Interest

Suite #6 • Wyman Towers • 3100 St. Paul Street • Baltimore, Maryland 21218 USA
Tel: (410) 243-0797 Fax: (410) 243-0982
NISC is a family business with global perspective. We are dedicated to the publication of significant collections of information, for their research value and for dissemination in the scholarly and professional communities. NISC DISCs are produced according to the highest standards, from data "clean-up" and reformatting to indexing in various ways. The name of our search-and-retrieval software, "ROMWRIGHT"*, reflects the craftsmanship that goes into each NISC DISC. We share the library community's devotion to the advancement of knowledge worldwide, and through our products and services, promote responsible social and ecological practices.

CD-ROM Publication

CD-ROM (Compact Disc - Read Only Memory) is one of several variations on the compact disc format popularized by the audio recording industry. CD-ROM allows rapid access to huge collections of data. The print equivalent is approximately 400,000 pages. The high-density storage of compact disc media, about 1800 times that of a floppy diskette, permits access to such a tremendous volume of data from a standard desktop computer. Advanced data compression technology lets NISC provide still more information -- as much as 1.5 gigabytes on one disc! NISC has been able to place more of the ERIC database on one disc than any of its competitors.

NISC's team of software engineers is constantly developing superior products, using state-of-the-art techniques and standards. Their expertise, and close relationships with subscribers, have led to ROMWRIGHT*, the finest CD-ROM publishing software available. Users of other softwares find it familiar in appearance and easy to use, but with greater power and speed.

"I am impressed!...Your search package is a real step forward...the power of the system doesn't obscure a basic search process. When I switched to the EXPERT level (without reading the instructions) I expected to suffer the usual confusion. Not so!...You have done your homework on problems of doing searches, and have developed a search package that is considerably better than any I have seen."

~ Robert Chesley, Education Consultant & former ERIC Director, December, 1993

The same ROMWRIGHT* software is used for both CD-ROM and online services. POPLINE switched from SilverPlatter to NISC, both for ROMWRIGHT*'s advanced features and to cut training time by forty percent worldwide. NISC provides direct technical assistance by fax, phone, or our new bulletin board service on the Internet.

Using a NISC DISC -- A Search Mode to Suit Every User

ROMWRIGHT* is designed for all users, from the curious high school student to the most demanding information specialist. Each NISC DISC has three search modes, NOVICE, ADVANCED, and EXPERT. The NOVICE mode searches the important textual portions of each record regardless of field (though searches can be restricted by Author and Publication Year). ADVANCED mode provides the versatility of "fill-in-the-blank" designation for all

BEST COPY AVAILABLE

33'
fields, which can be searched individually or in any combination. The EXPERT server-searching mode is ideal for pursuing a topic at length. New searches can be built upon others, and sets combined to yield precise results from a broad strategy. EXPERT greatly improves upon the search format most familiar to online users. Information professionals, online searchers, and other skilled users have given NISC high marks for EXPERT mode’s flexible design and power.

All three search modes feature an important, interactive search aide, the AUTODEX™ (AUTOMATIC INDEX). This pop-up index window lists every possible search word or phrase, displayed in either alphabetical or permuted order. Typing the first three letters of a word pops-up the index at the nearest match. Terms can be selected directly from the AUTODEX™—an easy way to construct searches without typing or spelling errors. Or, you can select any variant of the term. Also, for files which were indexed using a hierarchical thesaurus, NISC’s automated thesaurus is completely state-of-the-art. Advanced navigation and browsing features make it easy to find terms at any level. Never before has thesaurus-based searching been this simple and rewarding.

NISC databases can be searched effectively with little or no training. Each title has its own system of context-sensitive help, which covers unique database fields as well as standard ROMWRIGHT™ commands and features. There is also a special program to provide extra software control in a multiuser environment, such as a library. Each NISC DISC includes a separate, very simple configuration program which lets the administrator customize the software as desired, restrict end-user control of software options, and optimize use on a network (LAN). For example, a specialized research library might use the NWCONFIG program to make available only the ADVANCED and EXPERT search modes, while a public library might choose just NOVICE to suit its walk-in patrons. You can tailor the software to suit your tastes, your end-users, and your hardware.

"NISC has a descriptive and attractive introductory menu screen which Dialog and other publishers should adopt... Online help is excellent, with clear sample search examples."

A simple, user-friendly interface and unequalled search power is only half the story. Retrieved records can be displayed, sorted, and output in ways to suit any research purpose. NISC DISCs make it easy to print a citation for the reference desk, or compile an entire bibliography. Output can be sent to any printer, or to a file on disk. A variety of export formats make it simple to use the data in popular software applications, such as word processors, databases, desktop publishing programs, and bibliography managers. If necessary, however, NISC can restrict print or electronic file output.

More about NISC and making NISC DISCs

NISC adapts quickly to changes in the evolving CD-ROM industry. NISC is unique among CD-ROM publishers in its use of several database platforms (software architectures). This structural flexibility ensures optimal performance for each database. At the user level, however, commands

BEST COPY AVAILABLE 338
and screens are consistent across the entire product line. In addition, NISC’s development team is constantly achieving new levels of search speed. Unsurpassed search speed allows for more revisions or extensions of each search (and more searching). On a busy library network, the time saved can quickly add up to hours per week.

For qualitative feedback, NISC listens carefully to customers and data suppliers. Additionally, the software itself collects usage statistics, a detailed record of how each NISC DISC is being used. Over a hundred aspects of searching and output are recorded, but all behind the scenes so as not to disrupt or slow the user. NISC DISC customers return their statistical record on diskette (provided with each update), while the NISCDNET online use is recorded at our site. Once the data has been tallied and analyzed, we know which terms are being searched, and how often, regardless of whether the search was successful. NISC uses these findings to guide product development, uniquely tailoring its software to the exact needs of its customers. Now for the first time ever, data suppliers can receive this essential information, which they can use to enhance their database services. No other electronic publisher provides this service.

NISC has many years of experience in all phases of optical disc production: equipment, data preparation and processing, database design, field definition and arrangement, data loading, compression, indexing (structured and free text), encryption, user-interface design, retrieval software, pre-mastering, and mastering in the standard High Sierra/ISO 9660 format. NISC uses its own ROMWRIGHT authoring system, ROMWRIGHT’s superior access speed and retrieval power, advanced data compression, and full range of features including customization of the software options, have made it the first choice for discerning libraries and data suppliers. The U.S. Geological Survey, a recognized leader in U.S. Government CD-ROM efforts, subscribed to 150 of NISC’s Water Resources Abstracts discs for its Reston, VA, headquarters, but to none of the same database as produced by OCLC, Silver Platter, or Compact Cambridge. Only NISC managed to put the data on just one CD-ROM. (George Knapp of the USGS’s WRSC division, 703/648-6823, conducted the review), ROMWRIGHT’s superior data clean-up, conversion, and optimization, as well as the design and user interface of every NISC DISC, provide several major advantages over the CD-ROMs available from competing vendors.

CD-ROM remains the best publishing medium for electronic data, providing convenient and cost-effective access to huge amounts of data. No telecommunications time or special environment such as a mainframe is needed, nor peculiar accompanying software. A vital extension of the desktop publishing industry, CD-ROM brings a wealth of new information products to the PC user. Many specialized products for niche markets, long-desired but previously not commercially viable, are now appearing thanks to the economies of CD-ROM.

Mr. Durr is co-chair of the CD-ROM standards committee CD-CINC, the CD-ROM Consistent INterface Committee, which meets regularly at the Library of Congress. Composed of prominent librarians and CD-ROM industry representatives, CD-CINC’s goal is to recommend consistent commands and function key assignments for CD-ROM interfaces. A guiding principle in ROMWRIGHT’s development has been to make switching among different CD-ROMs as easy as reading from one journal to the next.

DATABASE PUBLISHING WITH NISC

Only NISC has ROMWRIGHT™ software

Database already available? Please read on. While many databases are available from multiple vendors, or are simply loaded onto the Internet, availability is not the same thing as accessibility. Thousands of customers, and many data suppliers, choose NISC because of the ROMWRIGHT™ software. Whether it's CD-ROM or the Internet, ROMWRIGHT™ puts databases in their best light and helps them get used. NISC's software brings order to each file, and centralizes data for new, organized constituencies of users. Though the information "superhighway" is still chaotic, NISC is the vehicle in the fast lane. So even if your database is already "out there," take another look at what NISC's ROMWRIGHT™ software can do for you.

The Publishing Agreement

The typical contractual arrangement NISC makes with a data supplier is a publishing agreement. Types of agreements range from an informal oral confirmation to substantially negotiated licenses. Enclosed is either a sample letter of permission, a memorandum of understanding, or our standard non-exclusive agreement. Many organizations, including federal agencies, have been fit to endorse one of these agreements with few changes, if any. Negotiations may be desirable for issues such as restricting output of records to paper or file, or publishing exclusivity (for databases with limited marketability, high preparation costs, or market development requirements). Please let us know which clauses in this document would be problematic. Licenses typically run five years.

NISC DISC Subscriptions

Most NISC titles are available only by subscription; a subscription is a license to use the data for one year. Neither NISC nor its customers have any right of ownership to the data. Following the initial release, update discs are sent at regular intervals (typically quarterly). Updates are cumulative, containing the previous issues' coverage plus new and corrected records. An update may feature the addition of a new database or valuable supplementary material. Any such addition would be selected for its ability to enhance the title and complement the files of the charter participants.

No obsolete versions will circulate. Subscribers are required to return or destroy the previous disc upon receipt of an update, and to return the final disc if not renewing.

Enforcement of the Subscription License

The database is encrypted to prevent direct browsing or downloading of files by non-subscribers. To prevent unauthorized installations, each subscriber receives a unique, four-character installation code with each issue of the NISC DISC. LAN and WAN licenses are similarly protected by unique codes. As an extra precaution, NISC DISCs contain a software device which renders the disc useless within a couple of months after the official expiration date. If the subscription is cancelled, the final disc becomes inoperable.

A Company in the Public Interest

Suite #6 - Wyman Towers - 3100 St. Paul Street • Baltimore, Maryland 21218 USA
Tel: (410) 243-0797 Fax: (410) 243-0982

BEST COPY AVAILABLE 340
Note: Discs available for purchase, and some subscription discs, such as ERIC on CD-ROM and the Child Abuse and Neglect CD-ROM, require no installation code, nor return of the disc(s), nor do they expire.

Benefits of the Publishing Partnership

There is no cost to the data supplier in money, time, or preparation beyond an agreement and supplying the data. The only cost is to download and send us the database on 9-track magnetic tape, DAT tape, or diskette of any recorded density, format, and record layout/block specification. (See separate sheet How to Send Your Data.) The supplier in turn receives a complementary lifetime subscription to the volume produced, including updates, and may even enjoy discounts on additional subscriptions. A number of suppliers also receive a royalty for each subscription sold and renewal thereto.

The supplier retains complete control and authority over the database. Full credit for developing the database is provided on the product label, on the introductory screen, and in documentation, including all promotional materials. All rights and copyrights are solely noted. As a result, data suppliers fully share the rewards of end-user and critical acclaim.

Statistics on Database Usage – A Unique NISC Service

NISC is the only CD-ROM publisher which provides its data suppliers with detailed statistics on how their databases have been searched. User statistics are collected by the NISC DISC’s ROMWRIGHT software itself. All statistics are recorded unobtrusively, i.e., without disrupting or slowing the user in any way. Over a hundred aspects of software usage are recorded, including all search criteria and whether or not the search was successful. The statistical data is written to a floppy diskette which we provide with each update disc. We tally the data, analyse the different types of searches performed, and use these findings to guide product enhancement and development. Uniquely, NISC can tailor its software to the exact needs of its customers.

We provide these analyses to the data supplier. Included are separate indexes all for search terms which were found in the database or attempted (i.e., not found). From this data we can deduce the most sought-after topics. Another valuable statistic is the total number of records downloaded from the database, including subtotals for records output to a printer or to file. For the first time ever, data suppliers can receive this essential information, which they can use to maximize database usefulness.

NISC DISC Production and Product Support

The databases and successive updates thereto are prepared, processed, defined, arranged, loaded, compressed, indexed, encrypted, pre-mastered, mastered, and duplicated on an optical disc. All this is done entirely at NISC’s expense and risk. NISC also produces and integrates the product’s retrieval software, the disc label, and the NISC DISC packaging. The supplier has no responsibility for providing technical support, user manuals, instructional materials, training, or product updates. NISC does all of that as well as provide the NISC DISC User’s Guide, a comprehensive reference manual. We usually ask the supplier to develop or assist with a brief "insider’s" guide to the database. This would be an opportunity to describe the file’s content, years of coverage, publications indexed, suggested search strategies, and other special considerations as appropriate.

Marketing and Sales Expectations

First releases inevitably require more data preparation and programming enhancements than updates. The
second release will incorporate the refinements that stem from user reaction and critical reviews. Thereafter, NISC requires only twenty working days to produce each update.

Initial sales can be deceptively slow. It often takes six to eighteen months for prospective customers to learn about a new product. Then, customers often need to consult colleagues to gain purchase (subscription) approval, and/or work the subscription into the following year’s budget.

We first obtain press coverage and list the title in all the proper CD-ROM database directories and distributor catalogues. We then mail directly to selected lists, post notices on appropriate electronic bulletin boards, and advertise to appropriate niche markets.

Breaking the Agreement

NISC would request, under a “gentlemen’s agreement,” that the files not be provided to a second CD-ROM publisher for at least 18-24 months following publication. We ask for this consideration so that we may have time to market the product and recover our production costs. NISC would not expect this request to be honored in the event that the supplier becomes truly dissatisfied with the product.

Typically none of our agreements binds the supplier to publishing exclusively with NISC. We feel the quality of our work should determine the continuance of our publishing partnerships, just as our unique integration of databases creates well-appreciated research tools for our customers. In some instances, however, we may require an exclusive arrangement in order to secure the product’s market position. That would be the case for a database requiring an inordinate amount of our time and expense to clean-up and reformat.

Who Now Publishes with NISC?

NISC titles cover a range of topic areas from general consumer interest to the highly specialized information needs of academia and industry. We have much experience in publishing our trademark anthologies, or multidatabase NISC DISCs, which take best advantage of the unrestricting CD-ROM format. Databases in our international anthologies are provided by highly regarded institutions and professional societies in a host of different countries. Many of our data suppliers also publish paper copy; these institutions value CD-ROM publication for the additional exposure it gives hard-copy sales, and vice versa. We would be happy to supply you with references to our data suppliers, and/or customer references.
Introduction

As professional communicators, educators, and human service providers, you are in a unique position to shape the public image of people with disabilities. The words and images you use can create a straightforward, positive view of people with disabilities or an insensitive portrayal that reinforces common myths and is a form of discrimination.

Here is a set of clear guidelines to help you make better choices in terms of language and portrayal. These Guidelines offer suggestions for appropriate ways to describe people with disabilities and explain preferred terminology. They reflect input from over 100 national disability organizations and have been reviewed and endorsed by media and disability experts throughout the country. Although opinions may differ on some terms, the Guidelines represent the current consensus among disability organizations. Portions of the Guidelines have been adopted into the Associated Press Stylebook, a basic text for media professionals.

Please use the Guidelines when you write or report about people with disabilities. If you would like more information, additional copies of the Guidelines, or an attractive 14 x 20 poster of disability writing style “do’s” and “don’ts,” contact: Media Project, Research and Training Center on Independent Living, Bureau of Child Research, University of Kansas, Lawrence, KS 66045. You can also phone: 913-864-4095 (voice/TDD).

Portrayal issues

Please consider the following when writing about people with disabilities.

1. Do not focus on a disability unless it is crucial to a story. Avoid tear-jerking human interest stories about incurable diseases, congenital impairments, or severe injury. Focus, instead, on issues that affect the quality of life for those same individuals, such as accessible transportation, housing, affordable health care, employment opportunities, and discrimination.

2. Do not portray successful people with disabilities as superhuman. Even though the public may admire superachievers, portraying people with disabilities as superheroes raises false expectations that all people with disabilities should achieve at this level.

3. Do not sensationalize a disability by saying afflicted with, crippled with, suffers from, victim of, and so on. Instead, say person who has multiple sclerosis or man who had polio.

4. Do not use generic labels for disability groups, such as "the retarded," "the deaf." Emphasize people not labels. Say people with mental retardation or people who are deaf.

5. Put people first, not their disability. Say woman with arthritis, children who are deaf, people with disabilities. This puts the focus on the individual, not the particular functional limitation. Because of editorial pressures to be succinct, we know it is not always possible to put people first. If the portrayal is positive and accurate, consider the following variations: disabled citizens, non-disabled people, wheelchair-user, deaf girl, paralyzed child, and so on. Crippled, deformed, suffers from, victim of, the retarded, infirm, etc. are never acceptable under any circumstances.

6. Emphasize abilities not limitations. Consider: uses a wheelchair/braces, walks with crutches, rather than confined to a wheelchair, wheelchair-bound, or is crippled. Similarly, do not use emotional descriptors such as unfortunate, pitiful, and so forth.

Disability groups also strongly object to using euphemisms to describe disabilities. Blind advocates dislike partially sighted, because it implies avoiding acceptance of blindness. Terms such as handicapped, mentally different, physically inconvenienced, and physically challenged are considered condescending. They reinforce the idea that disabilities cannot be dealt with upfront.

7. Do not imply disease when discussing disabilities that result from a prior disease episode. People who had polio and experience aftereffects years later have a postpolio disability. They are not currently experiencing the disease. Do not imply disease with people whose disability has resulted from anatomical or physiological damage (e.g., person with spina bifida or cerebral palsy). Reference to disease associated with a disability is acceptable only with chronic diseases, such as arthritis, Parkinson's disease, or multiple sclerosis. People with disabilities should never be referred to as patients or cases unless their relationship with their doctor is under discussion.

8. Show people with disabilities as active participants of society. Portraying persons with disabilities interacting with nondisabled people in social and work environments helps break down barriers and open lines of communication.

Appropriate terminology

Listed below are preferred words that reflect a positive attitude in portraying disabilities.

Blind. Describes a condition in which a person has loss of vision for ordinary life purposes. Visually impaired is the generic term preferred by some individuals to refer to all degrees of vision loss. Use boy who is blind, girl who is visually impaired, or man who has low vision.

Cleft lip. Describes a specific congenital disability involving lip and gum. The term hare lip is anatomically incorrect and stigmatizing. Use person who has a cleft lip or has a cleft palate.

Congenital disability. Describes a disability that has existed since birth but is not necessarily hereditary. The term birth defect is inappropriate.

Deaf. Deafness refers to a profound degree of hearing loss that prevents understanding speech through the ear. Hearing impaired is the generic term preferred by some individuals to indicate any degree of hearing loss—from mild to profound. It includes both hard of hearing and deaf. Hard of hearing refers to a mild to moderate hearing loss that may or may not be corrected with amplification. Use woman who is deaf, boy who is hard of
hearing, or people who are hearing-impaired.

**Developmental disability.** Any mental and/or physical disability that has an onset before age 22 and may continue indefinitely. It can limit major life activities. Term includes individuals with mental retardation, cerebral palsy, autism, epilepsy (and other seizure disorders), sensory impairments, congenital disabilities, traumatic accidents, or conditions caused by disease (polio, muscular dystrophy, etc.)

**Disability.** General term used for a functional limitation that interferes with a person’s ability, for example, to walk, lift, hear, or learn. It may refer to a physical, sensory, or mental condition. Use as descriptive noun or adjective, such as persons who are mentally and physically disabled or man with a disability. Impairment refers to loss or abnormality of an organ or body mechanism, which may result in disability.

**Down syndrome.** Describes a form of mental retardation caused by improper chromosomal division during fetal development. Mongol or mongoloid are unacceptable.

**Handicap.** Not a synonym for disability. Describes a condition or barrier imposed by society, the environment, or by one’s own self. Handicap can be used when citing laws and situations but should not be used to describe a disability. Say *The stairs are a handicap for her.*

**Head injury.** Describes a condition where there is temporary or long-term interruption in brain functioning. Use persons with head injury, people who have sustained brain damage, woman who has traumatic brain injury, or boy with a closed head injury.

**Learning disability.** Describes a permanent condition that affects the way individuals with average or above-average intelligence take in, retain, and express information. Some groups prefer specific learning disability, because it emphasizes that only certain learning processes are affected. Do not say slow learner, retarded, etc. Use has a learning disability.

**Mental disability.** The Federal Rehabilitation Act (Section 504) lists four categories under mental disability: psychiatric disability, retardation, learning disability, and (physical) head trauma. Use these four terms for specific instances; otherwise, mental disability or cognitive impairment is acceptable.

**Mental illness.** Words such as crazy, maniac, lunatic, demented, and psycho are offensive and should never be applied to people with mental health problems. Psychotic, schizophrenic, neurotic, and other specific terms should be used only in proper context and checked carefully for medical and legal accuracy. Acceptable terms are people with emotional disorders, psychiatric illness, mental problems, or mental disabilities.

**Handicapped.** Appropriate term for people without disabilities. Normal, able-bodied, healthy, or whole are inappropriate.

**Seizure.** Describes an involuntary muscular contraction, a brief impairment or loss of consciousness, etc. resulting from a neurological condition, such as epilepsy. Rather than epileptic, say girl with epilepsy or boy with a seizure disorder. The term convulsion should only be used for seizures involving contraction of the entire body.

**Small/short stature.** Do not refer to people under 4’10” as dwarfs or midgets. Use person of small (or short) stature. Dwarfism is an accepted medical term, but it should not be used as general terminology. Some groups prefer “little people.” However, that term implies a less than full, adult status in society.

**Spastic.** Describes a muscle with sudden abnormal and involuntary spasms. Not appropriate for describing someone with cerebral palsy. Muscles are spastic, not people.

**Special.** Describes that which is different or uncommon about any person. Do not use to describe persons with disabilities (except when citing laws or regulations).

**Speech disorder.** A condition in which a person has limited or difficult speech patterns. Use child who has a speech disorder. For a person with no verbal speech capability, use woman without speech. Do not use mute or dumb.

**Spinal cord injury.** Describes a condition in which there has been permanent damage to the spinal cord. Quadriplegia denotes substantial or total loss of function in all four extremities. Paraplegia refers to substantial or total loss of function in the lower part of the body only. Say man with paraplegia or woman who is paralyzed.
ENROLLMENT FORM

EVELS OF MEMBERSHIP

There are four different membership options available for enrollment in the NDA.

The NDA is dedicated to the improvement of American education through the identification, transfer, and implementation of proven educational practices and products.

NDA
National Dissemination Association
4732 North Oracle Rd., Suite 217
Tucson, Arizona 85705
602/888-2838
FAX 602/888-2621

an invitation to join...
You are invited to become a member of a professional association supporting the dissemination and implementation of effective educational systems, programs, and practices...the National Dissemination Association (NDA).

What do members receive?

The NDA provides all of its membership with a variety of benefits, including:

- Marketing and promoting educational dissemination.
- Networking dissemination professionals and organizations.
- Providing professional development in the field of educational dissemination.
- Representing the interests of the professional dissemination community to Congress, federal administrators, and national educational policy decision makers.
- Publishing an annual catalogue of effective programs—Educational Programs That Work—describing all the educational programs validated by the U.S. Department of Education.
- Holding workshops and seminars. Each year the Association sponsors one or more professional development seminars. The meetings focus on a variety of issues identified by NDA members as critical to their professional growth.
- Making available free or at a discount to its members a variety of publications of professional interest.
- Providing an association membership/discount card (as professionals in the field of educational dissemination generally travel), honored by major hotels, car rental agencies, and other travel brokers.
- Publishing and distributing a monthly newsletter, The Update, providing timely information to members about issues affecting the dissemination of effective educational systems, programs, products, and processes.

The Update is mailed to every state, all U.S. territories, and to Canada. It is read on Capitol Hill, at the Department of Education headquarters, and in the Executive Office Building adjacent to the White House.

One NDA member called The Update the "finest education report" she receives; another member has remarked that The Update is the "only newsletter I read as soon as it arrives, and every word."

How are current NDA members?

Sharing a dedication to the mission, the NDA is comprised of members from all parts of the United States. They are teachers, program directors, school staff members, parents, district administrators, community educators, and others—all of whom care about improving the quality of American education.

How do I become a member?

The NDA is currently enacting a planned, gradual expansion of its membership to allow it to extend the message of dissemination as an effective means of educational improvement to a wider audience. The Association's board of directors believe that most educators desire growth and are receptive to the adaptation and implementation of effective practices.

If you would like to be a part of the NDA's leadership efforts, simply complete and return the enrollment form attached.
The ERIC database contains many types of publications. Each document and journal article in the database is assigned a Publication Type Code that is searchable online and on CD-ROM. Combine the publication type with your subject matter to limit your results to a particular publication type.

The major vendors offering the ERIC database provide access to publication type data; searchers can use this field to limit the output and improve the relevance of their search. Examples below show how this is done.

**DIALOG (Online or CD-ROM Command Search)**

Access using the prefix DT= followed by the Publication Type Code (see reverse for a list of the codes)

Example: \textit{DT=143} and vocational education

This will retrieve research and technical reports in vocational education.

*For CD-ROM Easy Menu Search, use Document Type search option*

**BRS (Online Only)**

Access using the Publication Type Code followed by .PT.

Example: \textit{052.pt.} and adult-literacy

This will retrieve teaching guides in adult literacy.

**SilverPlatter (CD-ROM Only)**

Access using the Publication Type Code followed by in DT.

Example: \textit{120 in dt} and career-change

This will retrieve viewpoints and opinion papers regarding career change.

On the back of this page is a list of the ERIC Publication Type Codes.

**Change of Address Policy:** CBIS requires all customers to inform us of any changes in their delivery address as soon as possible. United Parcel Service (UPS) assesses a fee for packages forwarded to a new location. To date, CBIS has absorbed this cost, however, due to the increase in the number of these charges, CBIS will immediately begin to invoice the customer for these charges. Please inform all appropriate departments and personnel of this matter. You may fax or mail your written notice to: EDRS/CBIS Federal Inc., 7420 Fullerton Road, Suite 100, Springfield, VA 22153-2852 (800) 443-ERIC or (703) 440-1400; FAX (703) 440-1408.

**March 31, 1994**  
ERIC Resources in Education (RIE) Microfiche, March 1994 issue. ED 362 622-363 636 (1065 Titles)  
Remakes: ED 353 350; ED 359 932; ED 360 220; ED 360 221; ED 361 029; ED 361 130 (3 of 3); ED 362 439  
(1506 Total Microfiche)

**CLAIMS POLICY:** CBIS Federal will replace products returned within 6 months of delivery due to reproduction defects or incompleteness caused by EDRS.

**ADDRESS REMINDER:** We want to remind you that EDRS/CBIS Federal is the Sole Source Provider for ERIC RIE microfiche. Please inform all appropriate departments and personnel of this matter.

**QUESTIONS OR COMMENTS:** Should you have any further questions or comments, please feel free to contact me or one of our customer service representatives at 1-800-443-eric or (703) 440-1400; or fax your comments to (703) 440-1408.

[Information summarized above was taken from transmittal memorandums from EDRS to Standing Order Customers during the period August 1993 - March 31, 1994, and from the Packing Slips for the corresponding shipments.]
diaskeuast
\di-e\-'sky\-ast\ n : one who makes a revision : editor

With Thomas Wentworth Higginson serving as diaskeuast, Lavinia gathered together the poems that her late sister had squirreled away and published them in 1890 as "Poems of Emily Dickinson."

I have a spelling checker, It came with my PC;
It plainly marks four my revue
Mistakes I cannot sea.

I've run this poem threw it,
I'm sure your pleased too no,
It's letter perfect in it's weigh,
My checker told me so.

Calvin and Hobbes
By Bill Watterson

I USED TO HATE WRITING ASSIGNMENTS. BUT NOW I ENJOY THEM.

I REALIZED THAT THE PURPOSE OF WRITING IS TO INFLATE WEAK IDEAS, OBSCURE POOR REASONING, AND INHIBIT CLARITY.

WITH A LITTLE PRACTICE, WRITING CAN BE AN INTIMIDATING AND IMPENETRABLE FOG. WANT TO SEE MY BOOK REPORT?

THE DYNAMICS OF INTERBEING AND MASCULINE IMPERATIVES IN DICK AND JANE: A STUDY IN PSYCHIC TRANSCREATIONAL GENDER MODES. ACADEMA, HERE I COME.

From a paper on Journalism Education, RIEFEB93 (CS 214 029)
