Grameen Banks are a model of successful support for the smallest businesses. The Grameen Bank began in 1976, when Muhammad Yunus, an economics professor at Chittagong University in southern Bangladesh, loaned Sufiya Khatun, a weaver of bamboo stools, $4 U.S. to buy supplies and raise her daily profit from 2 cents to $1.25. Her success prompted him, with help from his students, to set up a bank. Since the first loan, Grameen has grown to employ 14,000 staff in 35,000 villages in Bangladesh. In 1996 it provided 3.62 million loans with the average loan size of about $100 U.S., with a default rate of less than one-half of one percent. Six principles guide the bank: (1) it lends only to the poorest people; (2) women are the primary recipients; (3) loans are made without collateral; (4) borrowers control what business activity the loan will be used for; (5) the bank supports the borrower with training programs and incentives for saving; and (6) borrowers pay as little interest as necessary to keep the bank self-supporting. There are Grameen Bank replications in 30 countries, including the United States. The most well-established is ACCION International, originally founded in 1961 to aid Latin America. ACCION has six associate organizations in the United States (New York, Albuquerque, Chicago, San Antonio, San Diego, and El Paso), which function similarly to the Grameen Bank. By 2000, they hope to lend $50 million to more than 8,000 microentrepreneurs, creating or stabilizing 10,000 jobs, and then to expand to other U.S. cities. More than two dozen other projects based on the Grameen Bank are also operating in the United States. All are helping to eradicate poverty at the grassroots level and provide entrepreneurial opportunities to the poor. (16 references) (KC)
Grameen Banks
Digest Number 97-6
According to *Fortune* magazine, entrepreneurship is the key to job creation in the United States (Magnet, 1988). But how can people too poor to be considered good risks by traditional banks participate? Grameen Banks are a model of successful support for the smallest businesses. This digest looks at the history of Grameen Banks, discusses how the model has been applied in the United States, and lists sources for more information.

**History**

The Grameen Bank began in 1976, when Muhammad Yunus, an economics professor at Chittagong University in southern Bangladesh, met Sufiya Khatun, a weaver of bamboo stools and one of Bangladesh's 55 million landless peasants. She needed a loan of U.S. $4.00 to buy supplies and raise her daily profit from two cents to $1.25. He loaned her the money. Her success prompted him, with help from his students, to set up a bank.

Since the first loan, Grameen (whose name means 'rural' in Bengali) has grown to employ 14,000 staff in 35,000 villages in Bangladesh. In 1996 it provided 3.62 million loans with the average loan size of about U.S. $100.00. The default rate is less than one-half of one percent (“The Grameen Bank Today”, n.d.). More than 153,000 low-cost, tin roofed houses have been financed with their home loan program (Kamaluddin, n.d.). They are also experimenting with a Medicare scheme that will provide health care that costs U.S.$1.25 per family per year. Their social development agenda aims to improve the overall quality of life of their members.

**Grameen Bank Replications in the United States**

There are Grameen Bank replications in 30 countries, including the United States (Kamaluddin, n.d.). The most well-established is ACCION International. Originally founded in 1961 to aid Latin America, ACCION has opened six associate organizations in the United States: New York (1991), Albuquerque, Chicago, San Antonio, San Diego (1994), and El Paso (1996). Just like the Grameen Bank, they offer loans and business support to micro entrepreneurs who lack access to conventional credit. In lieu of collateral, borrowers form 'solidarity groups' of three to six people to receive and repay loans and offer social support. ACCION's three central goals are:

- to reach a significant percentage of the micro entrepreneurs in need of assistance.
• to achieve financial self-sufficiency within five to seven years.
• to maintain a high quality loan portfolio, to demonstrate that micro entrepreneurs can and will pay back their loans.

By 2000, they hope to lend $50 million to more than 8,000 micro entrepreneurs, creating or stabilizing 10,000 jobs. After they have achieved self-sufficiency, they will expand to other U.S. cities ("ACCION U.S. Programs", n.d.).

Based in inner-city Chicago, the Full Circle Fund, a part of the Women's Self-Employment Project, was founded in 1988. They have kept the basic Grameen group structure and lending methodology with a few alterations (groups meet fortnightly instead of weekly, savings are voluntary, and loans are distributed by check instead of cash). After a difficult beginning, their staff, membership, and loan portfolio have all grown (Counts, 1996).

In addition, over two dozen projects based on the Grameen model are operating in the United States. The Good Faith Fund serves entrepreneurs in rural Arkansas. The Coalition for Women's Economic Development extends credit to African Americans and Mexican Americans in south-central Los Angeles. The Lakota fund, based in South Dakota, helps Native Americans. Working Capital provides loans to inner-city Boston residents. All are helping to eradicate poverty at the grassroots level and provide entrepreneurial opportunities to the poor. As Professor Yunus observed "These millions of small people with their millions of small pursuits can add up to create the biggest development wonder" ("Grameen Bank", n.d.)

Additional Information Sources on the Internet

- Grameen Bank Support Group / Australia:

Part of the Informal Credit Home-page, this site introduces the Grameen Bank and its replications. Statements of purpose, profiles of Muhammad Yunus, articles from around the world, case studies, and a bibliography are featured.

- The Grameen Bank Support Group exists to support the Grameen Bank in Bangladesh and its replications throughout the world by making it known to the public, media, and policy makers. Membership is open to all.

- Microcredit Summit: http://www.micrcreditssummit.org/

The Microcredit Summit was held in Washington, D.C. on February 2-4, 1997. It launched a nine-year campaign to offer credit to 100 million of the world's poorest families. Governmental agencies, educational institutions, philanthropic groups, United Nations agencies, religious groups, financial institutions, and other corporations participated. Reports on progress toward their goal will be posted on this Web site.

- Micro Enterprise Programs Discussion List: microenterprise@listserv.aol.com

A forum for discussion of programs that assist micro entrepreneurs. To subscribe, send the e-mail message "sub MICROENTERPRISE your name" to listserv@aol.com.

Funded by the United States Agency for International Development, the MIP aims to provide microentrepreneurs with greater access to financial services and technical assistance. They perform research and provide grants to organizations that aid micro enterprise.

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign at the bottom of the page.

The sample sticker shown below will be affixed to all Level 1 documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY

M.B. Dockendorf

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 1

Check here for Level 1 release, permitting reproduction and dissemination in microfiche or other ERIC archival media (e.g., electronic) and paper copy.

The sample sticker shown below will be affixed to all Level 2A documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE, AND IN ELECTRONIC MEDIA FOR ERIC COLLECTION SUBSCRIBERS ONLY, HAS BEEN GRANTED BY

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 2A

Check here for Level 2A release, permitting reproduction and dissemination in microfiche and in electronic media for ERIC archival collection subscribers only.

The sample sticker shown below will be affixed to all Level 2B documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE ONLY HAS BEEN GRANTED BY

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 2B

Check here for Level 2B release, permitting reproduction and dissemination in microfiche only.

Documents will be processed as indicated provided reproduction quality permits.

I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.

III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS.)

<table>
<thead>
