Students in grades 3 through 8 of the Wake County Public School System (WCPSS) took the North Carolina End-of-Grade (EOG) multiple choice tests during May and June 1999. All EOG tests are designed to measure student achievement of knowledge and skills of the North Carolina standard course of study. The multiple choice tests are required in reading and mathematics and are optional in social studies and science. This report describes results for WCPSS students on the reading and mathematics tests. The percentage of WCPSS students meeting or exceeding grade level standards in reading and mathematics at all six grade levels was higher than every before. Average scale scores also reached new highs in most grade levels, with only very small declines in reading at grades 4 and 5. Attachments contain results for the individual schools for each grade level. (SLD)
1998-99 End-of-Grade Multiple Choice Test Results

Caroline Fejoku
1998-99 End-of-Grade Multiple Choice Test Results
July 22, 1999
Author: Caroline Fejoku

Background
Wake County Public School System (WCPSS) students took the North Carolina End-of-Grade (EOG) multiple choice tests during the months of May and June. Traditional calendar schools tested from May 17-21 and year-round schools tested until June 18, depending on the track.

The EOG tests have several components including: computer skills, open-ended tests, multiple choice tests, and the writing assessment. All EOG tests are designed to measure student achievement of the knowledge and skills of the North Carolina Standard Course of Study for students in grades three through eight. The multiple choice tests are required in reading and math and are optional in social studies and science. During the May/June 1999 administration, WCPSS students took the reading and math multiple choice tests.

The EOG tests are a vital part of the North Carolina Annual Testing Program. They are the basis for the accountability program referred to as “ABCs”—Accountability, Basics, and Control. The goal of the ABCs is to hold individual schools accountable for student achievement in the basic subjects of reading and math. Under this program, test scores will be the basis for rewards or corrective action for individual schools.

Districtwide Results
WCPSS EOG multiple choice results for 1998-99 were higher than previous years at all grade levels. More than 80% of WCPSS students demonstrated at or above grade level achievement in reading at all grade levels, and in mathematics, the percentage of students at levels III and IV exceeded 84% in grades 4 through 8.

Achievement Levels Over Time
The percentage of students meeting or exceeding grade level standards in reading and math in all six grade levels (3-8) are the highest WCPSS students have ever achieved.

Average scale scores also reached new highs in most grade levels (see figures 5 and 6 on page 4). The only declines, which were very small, were in reading at grades four and five. Average reading test scale scores are the highest ever achieved in grades 3, 6, 7, and 8, and math test scores reached new highs in grades 3, 4, 5, 6, 7, and 8.

Achievement Level Scores
The achievement level score attempts to categorize student achievement according to four broad levels, defined as follows:
Achievement Levels

Level I: Students performing at this level do not have sufficient mastery of knowledge and skills in this subject area to be successful at the next grade level.

Level II: Students performing at this level demonstrate inconsistent mastery of knowledge and skills in this subject area, and are minimally prepared to be successful at the next grade level.

Level III: Students performing at this level consistently demonstrate mastery of grade level subject matter and skills and are well prepared for the next grade level.

Level IV: Students performing at this level consistently perform in a superior manner clearly beyond that required to be proficient at grade level work.

One important way of examining test scores is to follow the progress of a cohort of students over time. The shaded and unshaded boxes in the tables below show the scores of cohorts of students. For example, students who were in 3rd grade in 1994 completed 8th grade in 1999. Over time the percentage of students in that cohort who are in levels III and IV and are therefore considered to be “at or above grade level” in reading has increased from 71.4% to 87.1%. In mathematics the cohort increased from 71.8% to 83.8% at or above grade level.

Changes Within Grade Levels Over Time

By comparing scores for a grade level to scores achieved in previous years, we see some indication of instructional changes over time, although it must be noted that different groups of students are in each grade level each year. The following graphs show changes within each grade level over the past five years.

Figure 3
Percent of Students in Levels III and IV in Reading

![Graph showing percent of students in Levels III and IV in Reading for grades 3 to 8 from 1995 to 1999.]

Figure 4
Percent of Students in Levels III and IV in Mathematics

Scale Scores

The EOG scale score was developed by staff at the Thurstone Psychometric Laboratory at UNC-Chapel Hill. The scale covers the entire span from grade 3 through grade 8, and is designed to show growth over time. It begins at 98 and ends at 204 with a mean of approximately 150 (anchored at the fifth grade). Scale scores for cohorts are expected to increase as students move through grade levels. Same-grade-level comparisons (Figures 5&6) across years indicate more increases than decreases.
