In an effort to reveal how closely cheating at community colleges resembles that at four-year colleges in both kind and quantity, a survey similar to the one used by Donald L. McCabe for university students was administered to 298 students at Raritan Valley Community College. A summary of the results are included in this report. The survey data suggests that students at Raritan are as likely to cheat and plagiarize, if not more so, as students at four-year colleges. They are more likely to help others cheat and less likely to report cheating committed by other students. They also are more likely to feel that cheating occurs often or very often at their campus. The reasons for these attitudes and behaviors may in part be suggested by their acceptance of cheating in society at large. What is not known is whether Raritan is representative of community colleges, which would imply that more cheating and plagiarism occurs at two-year than four-year colleges. If this were to be true, it suggests a possible relationship between the quality of student work and motivation and a willingness to cheat or accept cheating. Another area that deserves further scrutiny is the large discrepancy between the amount of cheating committed or seen by students at Raritan compared to that observed by faculty, who indicate that cheating is not an issue of great concern. (VWC)
Cheating And Its Vicissitudes
Academic Dishonesty at Raritan Valley
A Preliminary Report

M.L. Cozin
Raritan Valley Community College
May 1999
Comprehensive surveys completed by McCabe and others during the past decade indicates that student cheating at American colleges is widespread and takes a variety of forms (McCabe and Trevino, 1996). These surveys indicate that approximately 50% of students have copied from others during an exam, that a third of students have helped other students cheat on an exam, a fourth have used crib notes during an exam, a fourth have plagiarized, and nearly a third have falsified a bibliography. In addition, one out of seven students have handed in work written by another student and claimed it as their own, and half have collaborated on projects when the instructor had specified that only individual work was acceptable.

Cheating at Raritan Valley Community College

Although a large percentage of students attending college do so at community colleges, few studies of academic dishonesty report any findings from this sector. There are questions therefore, as to how closely cheating at community colleges resembles that at four year colleges in both kind and quantity. In an effort to reveal this information, a survey similar to the one used by McCabe was administered to 298 students at Raritan Valley Community College in early December 1998. A summary of the results are indicated on the survey itself (see pages 7-12). Sixty nine percent of students at Raritan completing the survey were nearing the end of their first semester of college.

The survey indicates that actions traditionally associated as ‘classical cheating’ — copying from another student on an exam with or without their compliance, was reported to have been committed at least once by 29% of Raritan Valley students. Twenty seven
percent of students reported having used crib notes during exams. Sixty two percent of students reported seeing another student cheat.

Variants of classical cheating were more common. For instance, forty one percent reported receiving questions or answers (or both) from someone who had already taken the exam. Thirty nine percent said they had helped another student to cheat on an exam.

Plagiarism and its variants was, in most cases, as common as simple cheating. Twenty nine percent of students reported copying material from elsewhere and submitting it as their own work, while thirty one percent reported having falsified a bibliography. More than half of the students surveyed claimed to have copied some material without footnoting it. In perhaps the most heinous form of academic deceit, thirteen percent of students reported having turned in the work of others as their own, while its reciprocal- writing or providing a paper for another student was admitted to by sixteen percent of respondents.

Other sundry forms of academic dishonesty are evident in varying quantities. Thirty eight percent of students collaborated with others even when they knew the instructor wanted individual work. Eighteen percent of students reported either copying the computer work of someone else or falsifying lab or research data. For the most part all of these activities were viewed as cheating by students, although collaborating with others on assignments was not seen to be as serious a transgression as individual acts of academic dishonesty. For almost all forms of deceit students reported that they were 'unlikely' or 'very unlikely' to be caught.

A comparison of cheating at Raritan compared to data McCabe has summarized from his surveys of non honor code four year colleges is revealing. Raritan students
believe cheating and plagiarism is more common on their campus compared to their counterparts at four year institutions. Thirty four percent of Raritan students felt cheating occurred often or very often at R.V.C.C. In comparison, only 20% of students at four year colleges felt that cheating occurred that often on their campuses. Thirty nine percent of Raritan students felt that plagiarism occurred often or fairly often compared to twenty eight percent of the four year college students surveyed by McCabe.

Raritan students also appear to be more likely to help other students cheat. Thirty seven percent said they would either give answers directly to a student who asked during an exam, or expose their answer to a similar request. A significantly lower percent (6%) of students at four year colleges said they would respond in similar fashion to a request for answers from a fellow student during an exam. Fewer Raritan students than those at four year colleges said they would report a student they observed cheating. Only five percent of Raritan students said they would do so, compared to fourteen of students at four year colleges.

Fewer Raritan students also view cheating to be categorically unacceptable. Only seventy-two percent agreed with the statement ‘under no circumstances is cheating justified’. Eighty seven percent of four year college students agreed with the same statement.

Students at Raritan appear to be less concerned with cheating in society at large than those at four year colleges. Twenty six percent of Raritan students agreed with the statement ‘Cheating is common in American society. It is an acceptable way to get ahead’. Only sixteen percent of students at four colleges agreed with the same statement. Only eighteen percent of Raritan agreed with the statement ‘I am bothered by the
cheating that goes on here’ compared to thirty nine percent of students at four year colleges who responded to the same statement.

The Faculty View

A survey of Raritan Valley faculty experiences and perceptions of student cheating was completed during the second week of February 1999. Thirty six of the fifty eight faculty (62%) who received the survey completed it. Members of departments representing the English, Social Science, Humanities, Science, and Business faculty responded. They averaged approximately 15 years of experience at Raritan, 36% having labored for 21 years or more. Their responses are summarized on the attached faculty survey (pages 12-15). Several of the questions are identical or nearly identical to those on the student survey. The resulting responses allow for some direct comparisons between student and faculty perceptions to be offered.

Generally, cheating does not appear to be an issue of great concern to the faculty. A quarter of the faculty reported never having observed cheating, and only 17% reported having observed cheating ‘several times or more’. Only 12% agreed with the statement ‘cheating is a serious problem at Raritan’.

Students at Raritan may have taken notice of the faculty’s lack of concern regarding cheating. Only twelve percent of Raritan students said the most likely outcome taken by a Raritan instructor in response to student cheating would be to fail them for the course. Seventeen percent of students surveyed by McCabe at four year colleges said that students caught cheating would receive a failing grade for the course.
Although over 80% of the faculty said they were familiar with college policy on cheating and plagiarism and over 50% felt that the policy was fair, 50% rated the policy as less than effective and only 28% said they actually followed the policy when they observed cheating. For reasons yet to be fully determined the faculty do not seem to support the prescribed policy.

This lack of support of official Raritan policy was not directly addressed by the survey but informal discussions with faculty members are suggestive. Some faculty at Raritan told me that the administrative process that deals with academic dishonesty is overly bureaucratic and time consuming. In addition, faculty are unaccustomed to the lack of control they experience outside the classroom and sometimes uncomfortable and unwilling to participate in an administrative fact finding process. They would, they claim, prefer to spend their time in ways other than trying to prove a case of cheating they are certain to have occurred. Lastly, faculty sometimes feel that the administration is not always supportive of their charges against students, or harsh enough in sanctioning students determined to have cheated.

Summary

The survey data discussed above suggests (considering that 7 of 10 who responded were first semester students) that students at Raritan are as likely to cheat and plagiarize, if not more so, than students at four year colleges. They are more likely to help others cheat and less likely to report cheating committed by other students. The reasons for these attitudes and behaviors may in part be suggested by their acceptance of cheating in society at large. What is not known is whether Raritan is representative of
community colleges, and therefore, whether more cheating and plagiarism occurs at two year than four year colleges. If this were to be true it suggests a possible relationship between the quality of student work and motivation and a willingness to cheat or accept cheating.

Another area that deserves further scrutiny is the large discrepancy between the amount of cheating committed or seen by students at Raritan compared to that observed by R.V.C.C. faculty. Is this discrepancy typical at community and four colleges, and if so, what accounts for these varied perspectives? Lastly, are there policies that are known to work at four year colleges in reducing academic dishonesty (e.g. honor codes) that could be implemented successfully at community colleges such as Raritan? These and other considerations suggested by the survey data are issues that need to be addressed.
RARITAN VALLEY COMMUNITY COLLEGE
ACADEMIC INTEGRITY SURVEY

SECTION I - BACKGROUND INFORMATION

1. What was your status when you first enrolled at Raritan?
   - 69% First semester at any college or university (Please skip to question 3.)
   - 13% Transferred to Raritan from another 2-year college
   - 12% Transferred to Raritan from a 4-year college or university
   - 5% Already had a college degree

2. For how many semesters, including summers and this term, have you attended Raritan?
   - __________ Semesters

3. What is your program of study here at Raritan?
   - Liberal Arts 39%
   - Education 13.4%
   - Criminal Justice 8.3%
   - Business 7.4%
   - Communications 4.6%
   - Other 27.4%

4. Are your Raritan courses this semester primarily...
   - 94% Daytime
   - 6% Evening
   - __________ Week-end

5. Do you plan to transfer after leaving Raritan?
   - Yes 84%
   - No 4%
   - Undecided 12%

6. What kind of occupation do you plan to enter?
   - Arts 10%
   - Business 19%
   - Education 28%
   - Engineering/Science 7%
   - Law 5%
   - Medical/Allied Health 8%
   - Public/Government Service 8%
   - Technical 1%
   - Other 18%
   - Undecided 1%

SECTION II - ACADEMIC INTEGRITY AT RARITAN

7. How frequently do you think the following occur at Raritan?
   - Plagiarism on written assignments
     - Never 4%
     - Very seldom 12%
     - Seldom 39%
     - Often 33%
     - Very often 6%
   - Cheating during tests or examinations
     - Never 5%
     - Very seldom 23%
     - Seldom 38%
     - Often 28%
     - Very often 6%

8. How often have you seen another student cheat during a test or exam at Raritan?
   - Never 42%
   - Once 11%
   - A few times 36%
   - Several times 8%
   - Many times 3%

9. Have you ever reported another student for cheating?
   - Never 97%
   - Once 2%
   - A few times 1%
   - Several times __
   - Many times __

PLEASE TURN TO QUESTION 19
19. How likely is it that:

- you would report an incident of cheating that you observed?
  - Very Unlikely: 64%
  - Unlikely: 31%
  - Likely: 5%
  - Very Likely: <1%

- the typical student at Raritan would report such violations?
  - 50%
  - 44%
  - 6%
  - <1%

- a student would report a close friend?
  - 88%
  - 10%
  - 1%
  - <1%

SECTION III - PERSONAL DATA

20. Please provide the following information about yourself. It will be used to help us analyze the overall results of this survey. We remind you that all individual information is completely anonymous.

Are you: Female 64% Male 36%

What is your estimated GPA or grade point average? 2.95

21. When you were in high school how often:

- Did the typical student cheat on a major written assignment?
  - Never: 4%
  - Once: 9%
  - A few times: 44%
  - Several times: 28%
  - Many times: 15%

- Did you cheat on a major written assignment in any way?
  - Never: 39%
  - Once: 12%
  - A few times: 34%
  - Several times: 11%
  - Many times: 4%

- Did the typical student cheat on a test or exam?
  - Never: 47%
  - Once: 9%
  - A few times: 39%
  - Several times: 28%
  - Many times: 20%

- Did you cheat on a test or exam?
  - Never: 29%
  - Once: 14%
  - A few times: 39%
  - Several times: 13%
  - Many times: 5%

22. What was your grade average in high school? (Please circle your answer below.)

- A
- A-
- B+
- B
- B-
- C+
- C
- C-
- D+ or lower

Mean = 4.41

23. How does the level of test/exam cheating at Raritan compare to the level of cheating at your high school:

- Much higher in high school 29%
- Higher in high school 37%
- About the same 22%
- Lower in high school 8%
- Much lower in high school 4%

24. Please use this space for any comments you care to make or if there is anything else you would like to tell us about the topic of cheating in college.

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign at the bottom of the page.

The sample sticker shown below will be affixed to all Level I documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 1

Check here for Level 1 release, permitting reproduction and dissemination in microfiche or other ERIC archival media (e.g., electronic) and paper copy.

The sample sticker shown below will be affixed to all Level 2A documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE AND IN ELECTRONIC MEDIA FOR ERIC COLLECTION SUBSCRIBERS ONLY HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 2A

Check here for Level 2A release, permitting reproduction and dissemination in microfiche and in electronic media for ERIC archival collection subscribers only.

The sample sticker shown below will be affixed to all Level 2B documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE ONLY HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 2B

Check here for Level 2B release, permitting reproduction and dissemination in microfiche only.

Documents will be processed as indicated provided reproduction quality permits.

If permission to reproduce is granted, but no box is checked, documents will be processed at Level 1.

I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.
