This document is comprised of output from the Regional Clearinghouse on Population Education and Communication (RNEC) computerized bibliographic database on reproductive and sexual health and geography. Entries are categorized into four parts: (1) "Population Education"; (2) "Knowledge-base Information"; (3) "Audio-Visual and IEC Materials"; and (4) "Appendices," which consists of a list of publishers and sources, subject index, author index, and geographical index. Each entry includes a running number and bibliographic references that include author, title, imprint, collation, abstract, keywords, country keywords, classification number, and source code. (CCM)

INTRODUCTION

This issue of the Population Education Accessions List is an output from our computerized bibliographic data base using the Micro CDS/ISIS system. The Accessions List is being generated three times a year in three formats: printed format, diskette format, and via e-mail. In addition, it can be viewed on our web site: http://www.unescobkk.org/infores/rechpec

The list categorizes the entries into three parts:

Part I - Population Education consists of titles dealing with various aspects of population education arranged by country in the first section and general materials in the second section.

Part II - Knowledge Base Information consists of titles that deal with the different multidisciplinary aspects of population education. These entries are grouped into sections of the following major multidisciplinary topics:

1. Documentation
2. Environment and environmental education
3. Fertility and family planning
4. Reproductive health
5. Adolescent reproductive and sexual health
6. Health
7. HIV/AIDS
8. Information and communication
9. Migration, urbanization and human settlement
10. Population and sustainable development
11. Demography
12. Gender equality, equity and empowerment of women

Part III - Audio-visual and IEC materials consist of titles of various kinds of audio-visual and IEC aids (films, slides, charts, kits, videotapes, etc.) dealing with both knowledge base and population education aspects.

Part IV - Appendices consist of List of Publishers and Sources, Subject Index, Author Index, and Geographical Index.
Each entry or title is given a running number and bibliographical references that include: (i) either the author or corporate author; (ii) title; (iii) imprint; (iv) collation; (v) subject key words; (vi) country key words; and (vii) classification number. In addition to these, a source code is also given. The source code is an abbreviation of the name of the organization where a particular title can be acquired. For the complete names and addresses of the source codes, kindly consult the List of Publishers and Sources given in the Appendices.
PART I: POPULATION EDUCATION

1. By Country

2. General
BANGLADESH

00001

This document presents country profile, structure of the education system, population policy of the government, introduction of population education, emergence of the present project, and future directions in Bangladesh.
This training package is prepared to assist teachers in dealing with adolescence education. It groups lessons under twelve modules. Module I: Adolescence education & teacher preparation; Module II: Adolescent growth & development; Module III: Self concept & interpersonal relationships; Module IV: Developing personal & inter-personal skills; Module V: Sexual behaviour; Module VI: Reproductive health; Module VII: Sexuality, society and culture; Module VIII: Values; Module LX: education about parenthood; Module X: Family & society; Module XI: Drug abuse; Module XII: Counselling. Suggested activities and evaluation are also provided at the end of each lesson to measure the gain in knowledge and changes in the attitudes of teachers.

NEPAL

00004
UNFPA Country Support Team for SAWA.

This review briefly presents the mandate for education as contained in the successive Development Plans of HMG (particularly the Eight Plan) and in the Programme of Action of the International Conference on Population and Development. Selected educational statistics are furnished which give and overview of the system and status of school education in Nepal. This is followed by the mandate for population education in the ICPD POA and the Eight Five Year Plan (1992-97) of Nepal.

In this paper, a glimpse of the poped programme will be discussed followed by the challenges of programme implementation which embraces problems, gaps and inadequacies and how these were met through advocacy strategy and activities in the next chapter. Advocacy appeals: groundwork for mobilization which dealt on specific advocacy strategies used to promote poped at the regional and provincial levels is discussed in Chapter 3. In Chapter 4, advocacy: foundation of creative learnings is discussed with lessons learned in the advocacy of the programme. Appendices of the success stories of regional and divisional poped coordinators, parents testimonials, sample questions in regional/divisional achievement tests and the regional development council resolution follows. This paper will provide poped implementors and stakeholders through grounding in the success stories and lessons learned in the advocacy of the poped programme as well as practical approaches to the finest in the implementation of the programme.

Revitalized Homeroom Guidance Program for High School.

This workbook is a collection of readings and activities sequenced to follow the topical presentation of the Revitalized Homeroom Guidance Program (RHGP) modules. The readings and activities have been designed as integral parts of competency-based session guides, tested among high school students in various classroom settings and under different circumstances. This set of workbook consists of 4 levels. In this first year level workbook consists of three parts. Part 1 is the readings and activities revolve around self-awareness in relation to learning to live with others, personal and family values, Filipino family dynamics and wellness vis a vis stereotypes, and academic enrichment, including communication strategies. Part 2 contains readings and activities on goal setting and decision making, and career planning, including work skills identification. Part 3 consists of readings and activities which tackle the subjects boy-girl relationship, changes and adjustments which and adolescent undergoes, teenage pregnancy, early marriage and parenting, touch continuum, and sexually transmitted diseases, including HIV and AIDS.

This paper focuses on current status of population education in the Southern African sub-region. The analysis covers trends in the following key areas: institutional framework, educational levels and mode of incorporation of population education into school curricula, priority needs of population education in the sub-region.
00025
UNESCO Principal Regional Office for Asia and the Pacific. Regional Clearing House on Population Education and Communication.

The Clearing House produces on a bi-monthly basis this catalogue which consists of materials available in its collection and database. The topics covered include adolescent demographic profile, fertility and sexuality, marriage, pregnancy, childbirth, contraceptive use, STDs/HIV/AIDS, sexuality education, family life education, population education, teaching/learning pedagogy, counselling, in-school and out-of-school linkages, strategies and approaches in introducing adolescent reproductive and sexual health in education, community-based approaches and the like.

00026
World Health Organization. Division of Mental Health and Prevention of Substance Abuse.

Cover title: Life skills education in schools.

The material focuses on the teaching of life skills to children and adolescents in schools. This document is therefore targeted at organizations involved in school curriculum development, health education, and the development of schools based health and social interventions. The document has two parts. Part 1 is an introduction to life skills for psychosocial competence and Part 2 contains guidelines for programme development.
This document describes research related to the development, implementation and maintenance of life skills education in schools. The different aspects of research related to life skills education are described within a logical framework which can be used to develop more detailed research plans at country level. The document is a guide for project managers responsible for overseeing the development and evaluation of life skills education as well as for those who will undertake the research tasks.

These workshop materials and trainer's guide form part three of a set of materials to guide the development and implementation of life skills education programmes in schools. They should be used in conjunction with the first two parts, which are presented separately: Part 1 & 2, "Life skills education in schools: introduction and guidelines to facilitate the development and implementation of life skills programmes" (MNH/PSF/93.7A). This third part is primarily for the use of those who will be involved in the promotion of life skills education, the development of life skills programme materials and the training of life skills trainers. The reader can use, adapt and build on these workshop materials to design training courses for the development of life skills education.

Anglo-American cataloguing rules / prepared under the direction of the Joint Steering Committee for Revision of AACR, a committee of the American Library Association, the Australian Committee on Cataloguing, the Library Association, the Library of Congress. 2nd ed. Chicago, American Library Association, 1998. 676 p.

This latest revision includes the complete text of AACR2 and all revisions since 1988, integrating the 1993 amendments and all further amendments approved up to the end of 1997. It also includes additional rules and examples for nonprint materials, wider coverage of material for the visually impaired and revised appendixes and glossary.

Proceedings of a conference held on 17-20 September 1997 at Lesvos, Greece, organized by the Centre for Research in Library and Information Management (CERLIM), Manchester Metropolitan University.

This publication brings together papers of the 1997 Libraries Without Walls Conference, which address the principal strategic issues and best practice based on international, regional and sectoral approaches, arising from the provision of library services to distant users. This collection will enable library managers and information professionals in all sectors to be fully aware of the latest practice in this area.

This guide provides delegates, NGO participants, the media, and others with a handy tool for locating some of the many materials published since 1994 on the major issues outlined in the ICPD Programme of Action. The topics included in the guide are: adolescents; aging; migration; mobilizing public and private resources; population; environment, and sustainable development; reproductive health/family planning; reproductive health in emergency situations; reproductive rights/human rights; and the role of the private sector. The guide contains roughly 180 summaries of research, reports, and fact sheets on these topics.

Program for International Training in Health (INTRAH).

This abstract-bibliography contains the large number and variety of materials available free of charge from organizations around the world. It contains over 740 entries, organized into ten categories: overview of reproductive health, family planning, maternal and newborn health, maternal and newborn health, family and community health, reproduction and sexuality, STIs/RTIs and HIV/AIDS, gender, people and the environment, economic and community development, catalogs and resources. Each entry contains a brief description as well as bibliographic and ordering information, including restrictions concerning availability. The List also contains an index of materials by organization and by title.
The Clearing House produces on a bi-monthly basis this catalogue which consists of materials available in its collection and database. The topics covered include adolescent demographic profile, fertility and sexuality, marriage, pregnancy, childbearing, contraceptive use, STDs/HIV/AIDS, sexuality education, family life education, population education, teaching/learning pedagogy, counselling, in-school and out-of-school linkages, strategies and approaches in introducing adolescent reproductive and sexual health in education, community-based approaches and the like.

ENVIRONMENT AND ENVIRONMENTAL EDUCATION

00035
Economic and Social Commission for Asia and the Pacific.

This study of interrelationships between population, resources, environment and sustainable development is an attempt to increase the understanding of these factors and thus enable a better balance between human needs on one hand and population, resources and development on the other, all the while helping governments in their efforts to improve the quality of life of their people. It helps in overcoming some of the gaps with regard to the impact of population growth on natural resources. These issues are not always dealt with in other studies because of a lack of knowledge and awareness of the interlinkages involved. This study brings out the findings of a number of experts focusing especially on the situation in four countries of the region: Bangladesh, Indonesia, Nepal and the Philippines.

This report provides a brief history of human use of forests and considers the value of forests, their products and their services. It then reviews past discussions of the relationship between population and forest change and suggests new ways of considering this issue, especially in the context of the social investments.

This study is conducted to determine the following: 1) To understand how the public of Sri Lanka views the introduction of an emergency contraceptive pill; 2) To determine the marketing strategy for such a product; 3) The key areas that need to be addressed to market such a product.

This study is part of the continuous efforts of the ESCAP Population Division to assist the developing countries in the region in improving their family planning programme performance through evaluation exercised using modern methodologies. The report summarizes the underlying dynamics of programme efficiency and the impact of the programme on fertility change in participating countries. It also address broad methodological and other related issues.

These service delivery guidelines, based on the service delivery guidelines of the International Planned Parenthood Federation (IPPF), Pathfinder International, and the Program for Appropriate Technology in Health (PATH), to give family planning and reproductive health programmes the information they need to provide emergency contraceptive pills safely and effectively.

Silva, S. Victor de; Stembo, Sam; Subasinghe, Chandrika.

Conducted by the Family Planning Association of Sri Lanka with support from the World Health Organization.

The objective of the study is to effectively position the condom social-marketing programme, focusing specifically to the needs of the varied customer segments identified by the study, with special emphasis on promoting condoms for safe sex.
Suporn Koetsawang; Ford, Nicholas.

The report consists of five chapters: Introductory Chapter One presents the rationale and objectives of the project. This is done by reference to both, a summary, general overview of the HIV/AIDS and commercial sexual situation in Thailand, and a re-cap of some of the key findings from the investigative, first phase of this programme and the ways in which these informed and shaped the development of the intervention. Chapter Two presents the development of the intervention, identifies its final contents and format, and describes the research design which was used to evaluate it. Chapter Three describes the evaluation of the intervention. As well as discussing the major findings from the analysis this chapter also highlights important factors which affected its implementation and evaluation. Chapter Four presents the main conclusions from the project, reflecting upon some of the broader socio-political aspects of HIV prevention in the sex industry in Thailand as well as the more specific operational research and programme implications. The final chapter also notes the plan for further dissemination of the intervention package throughout Thailand. The Appendix includes a paper on the backgrounds and vulnerabilities of the Non-Thai sex workers in the study.

The present report contains the conclusions and recommendations from the Consultation on Family Planning Programme Sustainability organized by UNFPA in March 1994. The objective of the Consultation was to provide a forum in advance of the International Conference on Population in Development (ICPD) where the topic of sustainability of family planning programmes could be examined. The topics examined in this report directly address the ability to plan for the expansion and integration of reproductive health and family planning services.

This manual has nine chapters. The first provides a rationale for post-abortion family planning programmes, stressing the need to give these women the knowledge and the means to avoid another unwanted pregnancy. Chapter two identifies six essential elements of high quality care and reviews specific practices that needlessly restrict the contraceptive options available to these women. Clinical concerns are addressed in chapter three, which concentrates on medical problems, including complications of abortion. A detailed chapter on counselling advocates a problem solving approach, lists essential questions that need to be answered, and discusses the special needs of adolescents who have undergone an
abortion. The second half of the manual opens with a description of several interconnected components of service delivery, such as equipment, supplies, clientflow, staffing, referral, and costs, that managers must oversee. The remaining chapters discuss each of these components as they apply to services devoted to the emergency treatment of abortion complications, to general family planning services, and to services providing induced abortion and menstrual regulation.

This publication provides practical information for people who are working with men on sexual health or would like to start working with men. It looks at ways of engaging men in discussions about sexual health and sexual responsibility, and men's role in reducing the incidence of unwanted pregnancy, sexually transmitted infections and sexual abuse. The publication includes information on sexual
health issues that concern men; exercises to support working on sex and sexuality with men; strategies for working with men on sex and sexuality, with examples for Africa, Asia and Latin America; basic information on men's bodies, growing up, what happens during sex, keeping safe during sex, and other concerns that men face.

In the first section of this paper, the global context in which abortion takes place is briefly described. The following two sections review the agreements made at the international conferences and provisions of human rights instruments that can be used to argue for access to safe abortion services. The final section describes strategies that are being used across a wide range of countries. Appendices provide ready reference to the most relevant paragraphs of the international agreements and human rights instruments.

House, William J.; Katoanga, Salesi F.  
**Reproductive health and family planning in the Pacific Island countries.** S.l., s.n., 1999. 27-29 p.

This article summarizes the ICPD Programme of Action, the Pacific Island context, the UNFPA Country Support Team based in Suva, Post Cairo initiatives, the RH/FP-SH challenges, identifying priority strategies, adolescent sexual and reproductive health, and improving reproductive health programme management.

Supported by the United Nations Population Fund (UNFPA), the Ford Foundation, the Swedish International Development Cooperation Agency (SIDA) and the Commonwealth Secretariat.

This is a report of the International Seminar on Managing Quality Reproductive Health Programmes: After Cairo and Beyond. The report covers five themes of the seminar. Theme 1. Creating and sustaining effective institutions and structures for implementation of quality RH programmes. Theme 2. Expanding services to include RTI/STD/HIV/AIDS prevention activities and services. Theme 3. Addressing social sensitivity, accumulating community acceptance and developing appropriate programme strategies and structures for youth reproductive health programmes. Theme 4. Addressing gender sensitivity and enhancing male involvement in quality reproductive health programmes. Theme 5. Creating and sustaining organizational commitment to improving quality of care in reproductive health programmes.
This paper focuses on reproductive health including family planning and sexual health in the South Pacific Island countries since ICPD-POA. It covers reproductive health definition; ICPD-POA calls for action under RH/FP-SH care programmes; the major RH/FP-SH issues of concern in the Pacific Island countries, identified after ICPD-POA; recommended strategies; success, constraints and challenges; and conclusion.

This handbook has been designed to assist well-established organizations to analyze the key steps involved in integrating family planning into their ongoing programmes.

Funded by UNFPA as part of the Mongolia Second Country Programme, Project MON/97/P07.

This situation analysis was undertaken to assess the current status of Mongolia's reproductive health services. The report presents the background of reproductive health in Mongolia, reproductive health services situation analysis and observations on safe motherhood services, family planning services, reproductive tract infections/sexually transmitted diseases, adolescent reproductive health services, post abortion care, infection prevention, laboratory services, and management of reproductive health services.

Mtawali, Grace.

This sourcebook is a modular training resource intended to help trainers integrate aspects of reproductive health into training curricula. Provides practical solutions for developing a performance-based curriculum for training primary providers to offer high quality, client-oriented, integrated reproductive health care services. It consists of 8 modules and 1 user's guide. Each module includes detailed analysis.
of a specific RH job, the related tasks, skills and knowledge required for providers to perform the job, as well as assessment tools to evaluate trainee achievements, and a reference list. Materials in the sourcebook are adaptable to specific field needs. This Module 3 contains the components for developing a curriculum or a curriculum unit on providing family planning services. Such services include: providing family planning for women at different life stages, as well as in various life situation; managing side effects and other problems possibly related to contraceptive method use; partially managing and/or referring for complications that cannot treated at the service site; and referral to other needed health care or social services.

Reproductive health training for primary providers: a sourcebook for curriculum development; Module 1. Counseling clients for family planning/reproductive health services; Module 2. Educating clients & groups about family planning/reproductive health services. Chapel Hill, NC, INTRAH, 1997. 1 v. (various pagings).

This sourcebook is a modular training resource intended to help trainers integrate aspects of reproductive health into training curricula. Provides practical solutions for developing a performance-based curriculum for training primary providers to offer high quality, client-oriented, integrated reproductive health care services. It consists of 8 modules and 1 user's guide. Each module includes detailed analysis of a specific RH job, the related tasks, skills and knowledge required for providers to perform the job, as well as assessment tools to evaluate trainee achievements, and a reference list. Materials in the sourcebook are adaptable to specific field needs. This Module 1 contains the components for developing a curriculum unit on effective interpersonal communication and counselling skills. It covers basic knowledge, guidelines, skills and process for interpersonal communication and counselling. In addition, it introduces situations in which trainees must deal with sexuality issues that are often encountered in family planning and reproductive health service delivery.

Module 2 contains the components for developing a curriculum or a curriculum unit on educating clients and groups about family planning and reproductive health. It covers basic considerations, techniques, skills and processes for
planning, conducting and evaluating FP/RH education sessions for clients or groups who would benefit from these services. Principles of interpersonal communication, counselling and information providing skills covered in Module 1 are applied in this module.

Visaria, Leela; Visaria, Pravin.

This case study examines the process of implementation of the government's new approach to family planning in the state of Rajasthan, in the northern part of India, and in Tamil Nadu, in the south. It examines issues such as the way in which the workload of the public-sector health workers is determined, whether the programme has become more responsive to the needs of clients, and whether the range and quality of services has improved.

This sourcebook is a modular training resource intended to help trainers integrate aspects of reproductive health into training curricula. Provides practical solutions for developing a performance-based curriculum for training primary providers to offer high quality, client-oriented, integrated reproductive health care services. It consists of 8 modules and 1 user's guide. Each module includes detailed analysis of a specific RH job, the related tasks, skills and knowledge required for providers to perform the job, as well as assessment tools to evaluate trainee achievements, and a reference list. Materials in the sourcebook are adaptable to specific field needs. This Module 5 contains the components for developing a curriculum or a curriculum unit on providing postabortion care services. Such services include: assessment of the need for postabortion care services; treatment of incomplete abortion and its immediate life-threatening complications; referral and transport for complications needing treatment not available at the service site; postabortion family planning; and referral to other needed health care or social services.

Women's Perspectives on Family Planning and Sexual and Reproductive Health, Dhaka, Bangladesh, 22-25 October 1996.

This report summarizes the presentations made and the discussions which took place during the "Workshop on Women's Perspectives on Family Planning and Sexual and Reproductive Health". The objectives of this workshop are to sensitize participants to gender issues and their implications for incorporating women's perspectives needs and priorities into family planning, sexual and reproductive health services and programmes; to develop a common understanding of gender and development terminology; to sharpen skills in gender analysis to enable participants to plan and implement gender responsive interventions and concerns; and to provide the opportunity to share experiences and skills.

Considerations in evaluating adolescent reproductive health programs. S.l., s.n., 1995. 9 p.

This paper outlines some of the issues that should be considered in evaluating adolescent reproductive health programmes. Attention is given to the important of determining a programme's definition of adolescence; recognizing the diversity in adolescent reproductive health programmes; carefully choosing key indicators; and understanding the limitations in data accuracy.

*Adolescent attitudes toward family size in India: the impact of gender, culture, and values.* New York, Department of Rural Sociology, Cornell University, 1998. 14 p. (Working paper series; no. 98.04)

A questionnaire containing items on desired family size was administered to about 15,000 secondary school students in three states of India. Mean desired number was 1.9, with a slightly higher figure for males in all three grades (9-11) and in all three states (Uttar Pradesh, Harayana, and Rajasthan). Results were roughly confirmed by use of a non-numeric measure of attitudes toward family size. Multiple regression analysis showed that culture (state), sex education, and general values regarding male dominance and religion were the key explanatory variables.

This is a study of the narrative mode of explanation and interpretation which constitutes common sense in adolescent culture. In this study, adolescents living in eleven African countries were asked to describe the most typical story of initial sexual experience, using a set of standard story options. The key finding of the study is presented.

This article examines change in health across persons born between 1915 and 1959 using data from the National Health Interview Surveys (NHIS) for the years 1982 through 1993. The analysis presented here looks at cohort differences in disability and disease presence across the adult ages. The article also examines whether cohort change is the same for men and women and for those of lower compared with higher socioeconomic status.

This manual is a step-by-step guide to implementing a Teens for AIDS (TAP) programme in a school or community-based organization. It is intended as an adaptable resource for many different settings in which a TAP programme can be developed. It identifies and covers the key components essential in creating a successful TAP programme. The steps are outlined through the following chapters: 1. Introduction presents and overview the need for HIV and AIDS education and the effectiveness of peer education; 2. Building support highlights the importance of laying the groundwork in a school or community, the chapter outlines ten reasons to implement TAP and presents arguments to counter possible opposition to the programme; 3. Getting started focuses on programme planning, budgets, and funding as well as a job description and tips for the programme coordinator and the explanation on how to recruit youth participants; 4. Activities describes some educational efforts that TAP members can design and implement and suggests approaches to supporting their efforts; 5. Taking the message to the media provides basic guidelines on how to interact with the media; 6. Resources presents a listing of educational materials - videos, curricula, pamphlets and books for additional information.

This instructional manual is developed to support on-going efforts to fight the spread of HIV/AIDS in the Philippines, particularly among students in the secondary level. The intended users are high school teachers who need to impart basic knowledge and facts about the HIV/AIDS epidemic. It consists of six modules: Module 1. Being at risk focuses on adolescent sexual behaviours and HIV/AIDS; Module 2. Facts and fallacies focuses on basic facts on HIV/AIDS; Module 3. The science behind HIV/AIDS focuses on scientific-biological health perspectives; Module 4. Taking extra precautions focuses on HIV/AIDS prevention; Module 5. Showing love and concern focuses on societal response to the HIV/AIDS phenomenon; Module 6. Providing support focuses on government and private sector efforts to fight HIV/AIDS. Each module includes the following components: objectives, subject matter, materials and references, teaching strategies, valuing, evaluation, and assignment.

MIGRATION, URBANIZATION AND HUMAN SETTLEMENT

00134
Hadi, Abdullahel.

This article reveals that the flow of remittances, along with the diffusion of secular values, are the key processes through which various forms of migration operate to improve the socio-economic well-being of the household members left behind. It argues not only that the flow of remittances contributes to raising economic well-being but also that the social and cultural aspects of overseas migration have the potential to modify the livelihood and behaviour of the sending communities through the interaction of secular ideas with traditional values.

Trends in health and ability to work among the older working-age population / Eileen M. Crimmins, Sandra L. Reynolds and Yasuhiko Saito.
Tokyo, Nihon University, 1999. p. S31-S40. (NUPRI reprint series; no. 72)
This article investigates trends in health and work ability among the older working-age and early retirement-age population (aged 50 to 69) during the 1982 to 1993 period. Three questions are addressed: Is there evidence of improving work ability in the older working and early retirement ages? Are any trends in work ability the same for subgroups of the population? Can any trends be explained either in terms of the composition of the population or the prevalence of underlying health conditions?

The impact of married women's labor supply on the distribution of family income in Japan / Naohiro Ogawa and John Bauer. Tokyo, Nihon University, 1999. 29 p. (NUPRI research paper series; no. 66)

This paper analyzes, heavily drawing upon micro-level data gathered from the 1994 round of the National Survey on Family Planning, the changing pattern of employment of married Japanese women and the impact of their earnings on family income inequality. The next section of the paper describes (i) how Japanese married women have changed their labour supply and work status over time, and (ii) to what extent their earnings have improved relative to their male counterparts in recent years. Section III deals with a brief description of the source of data and the methodology to be used. Section IV discusses the extent to which Japanese wives' earnings have an equalizing effect on the distribution of family income, as viewed from their life-cycle stages, and the factors which affect the impact of women's earnings on income distribution. The final section summarizes major findings and examines potential future trends.

Coming up short: struggling to implement the Cairo Programme of Action.
The 1994 International Conference on Population and Development, agreed that international donors should contribute one third of the $17 billion needed annually by the year 2000 for population and reproductive health programmes. UNFPA projects a continued financial shortfall would likely lead to over 100 million additional unwanted pregnancies during 1995-2000, resulting in hundreds of thousands of maternal deaths, millions of infant deaths and tens of millions of abortions.

This report is prepared as a contribution to ICPD+5, a process led by the United Nations to review the first five years of global and country achievements since ICPD and to identify actions needed to ensure full implementation of the ICPD Program of Action. It highlights the range of USAID programmes in family planning, reproductive health, and women's empowerment, and the progress that has been made toward meeting the goals of the ICPD Program of Action.
Aghajanian, Akbar; Mehryar, Amir H.

This article analyses data related to the Iranian fertility transition that took place during the period 1976-1996. The study found that the demographic factors behind the decreasing crude birth rates are lower exposure to marriage through an unprecedented increase in the female age at marriage and decreases in marital fertility. The fertility decline is explained by demand and ideational factors including a broad reduction in infant mortality and persistent economic pressure. The increase in the educational level of women of reproductive age has also played a role. The most important ideational factor is the changing social atmosphere about having smaller families and using contraception. There is every indication that the declining fertility trend will continue; however, it is estimated that about 12 million women will be added to the age group 15-49 during the period 1996-2006, which could result in a "baby boom" in the next decade.

Active life expectancy of the elderly in selected Asian countries / Vicki L. Lamb. Tokyo, Nihon University, 1999. 22 p. (NUPRI research paper series; no. 69)

This research examines the active life expectancy of the elderly, i.e., persons aged 60 years and older, from selected countries in Asia. For each country, the age-specific prevalence of functional disability will be used to calculate active life expectancy. Countries will be compared in the proportion of total life expectancy that is estimated to be free of disability, for males and females, at various ages.

The 1998 Philippines National Demographic and Health Survey is a nationally representative survey of 13,983 women age 15-49. It provides information on levels and trends of fertility, family planning knowledge and use, infant and child mortality, and maternal and child health.
This consultations for ICPD + 5 focus on the needs of adolescents and youth, men as supportive partners in reproductive and sexual health and policy and programme issues in India. Their objectives are to: understand and clearly define the post-ICPD situation in India in relation to the three priority areas identified; provide and share information on best practices, as well as obstacles, and the strategies used to overcome them; and identify critical areas that will move the ICPD agenda forward in the country in the next five years.

00159

Convened as part of the substantive preparations for the International Conference on Population and Development, 1994.

Contained in this volume are the report and recommendations of the Meeting and the papers submitted to the Meeting. It serves as useful tools for future research on the relations between population, environment and development and further the work of the United Nations in those areas. It is divided into nine parts. Part 1. Report and recommendations of the Expert Group Meeting on Population Growth and Demographic Structure; Part 2. Population growth and socio-economic development; Part 3. Confronting poverty in developing countries: demographic, social and economic responses; Part 4. Demographic impacts of development patterns; Part 5. Demographic and health transitions; Part 6. Population growth, employment and education; Part 7. Social changes and the elderly in developing countries; Part 8. Social development and ageing in developing countries; Part 9, Discussion notes.
00160

This volume presents the comprehensive tables from the United Nations 1998 Revision of the official United Nations world population estimates and projections. The comprehensive tables are part of a three-volume set; the other volumes will provide the sex and age distribution of the populations of all countries of the world, and a description of the results, methods and sources. This volume divided into two parts. Part 1 is demographic indicators by major area, region and special group; and demographic indicators by country or area. Part 2 is population size and growth, fertility, mortality, and dependency ratios.

00161

This volume presents estimated sex and age distributions for the period 1950-1995 and projected figures, according to medium-, high- and low-fertility variants for 2000-2050. Data are presented for countries with a population of at least 150,000 in 1995. The data for smaller countries are included in the regional population totals but are not presented separately. This report supplements the volume entitled "World population prospects: the 1998 revision, volume I: comprehensive tables", which presents a summary of the major demographic findings and the major demographic indicators for the world, regions and countries.

Viet Nam. National Committee for Population and Family Planning. 

The 1997 Viet Nam Demographic and Health Survey is a nationally representative survey of 5,664 ever-married women age 15-49 selected from 205 sampling clusters throughout Viet Nam. It provides information on levels of fertility, family planning knowledge and use, infant and child mortality, and indicators of maternal and child health.
The aim of this paper is to discuss the position of Malaysian women in development process and to ascertain their status. Comparison is also made with women in other Asian countries to see if there are differences in women's status across societies in the region. The paper begins with an introduction on the Malaysia nation and its general socio-economic characteristics. The ensuring discussion is divided into five main sections covering women's status and position in different aspects of life. The approach undertaken is to compare the position of women vis-a-vis men and to determine whether women's position has been improving or deteriorating over the years. The main intervening gender issues which affect women's quest towards gender equality are also highlighted. The five main areas discussed are as follows: 1) Demographic profile including family formation, fertility, family planning and mortality; 2) Education attainment; 3) Labour force participation; 4) Migration; 5) Economic and cultural issues.

*Investing in women: progress and prospects for the World Bank.*

This policy essay examines specific initiatives and projects aimed to benefit women in major sectors of World Bank project lending and considers the potential of the Bank to do even more. The study examines selected projects that have aimed to benefit women in major sectors of the World Bank lending, spotlighting ones that have seemed to work well and drawing lessons from them; explores areas that remain as yet unrealized opportunities for Bank investments in women; and discusses a number of crosscutting issues that bear importantly on all of the World Bank's efforts to improve women's lives.

Paolisso, Michael.

*New directions for the study of women and environmental degradation.*

This paper presents the findings from a comprehensive review of the available literature on the costs to women of environmental degradation. As a precursor to presenting the review's findings, discussion first focuses on the potential impacts of environmental degradation on women, given women's environmentally-linked agricultural, income-earning, and family health roles. Next, the review's findings in terms of the quality, coverage, and conceptual and methodological strengths and weaknesses of existing studies are presented. The paper concludes with a call for more multidisciplinary, gender-disaggregated research that integrates concerns about the effects of environmental degradation on women into a wider range of environment and development initiatives.

Perez, Aurora E.

This paper presents the circumstances of contemporary Filipino women in pursuing both their reproductive and productive roles. The first part of this paper provides a descriptive analysis of a mix of survey and census data on major spheres that shape the conditions for women's active participation in development and determine women's share in the benefits derived from development. The second part of the paper discusses existing legislation that bears on the connection between women and development. More specifically, discussion is related to policies addressing issues of women empowerment and gender equity and how those affect women's roles in overall socio-economic development. On the whole, the paper should be treated as a first step in moving from the level of principles to a level of examination of evidence, which can provide policy directions in the midst of recently emerging views on women, population and development.

This paper addresses the theme of women in development in Singapore from the sociological perspective of stress generated by conflicting role expectations. It is divided into four sections. A brief background on relevant socio-economic and demographic features of Singapore is provided in the first section. The main factors or contradictory signals of women's role in development are described and discussed in the second section, followed by the analysis of the struggle and striving for coherence in the third section. The fourth or concluding section summarizes the main findings.

This cartoon booklet describes what is a period and what to do when girls and women start having periods.

This is a booklet about "Healthy Choices - Nga Kowhiringa Totika". It's about thinking about yourself and your feelings. It's about how to handle yourself when you're going out with someone. It's about things to consider if you're thinking about getting intimate. It's about decisions you'll need to make if you have chosen to start having sex and some advice about where to go if things get difficult. Mostly its about taking control and getting the most out of a time in your life when things can change quickly and keeping a hold on yourself can be hard.
This booklet gives parents a hands-on guide to improving parent-child communication by using television to begin discussions. Included are strategies for making TV, conversation starters and suggested family activities.

Open up, listen up! is a packet of educational materials, pamphlets, resources and activities which will help parents, care givers, and teachers answer children's questions about sexuality and use "teachable moments" to convey values and beliefs. One packet has been developed for parents of 8-13 year olds and another for parents of 14-18 year olds. Also an excellent resource for parents and professionals, including members of faith communities, who plan and offer sexuality education for adults.

VIDEOCASSETTE

00196

This videotape tells the story of our population future. It uses the Plan of Action, an agreement forged at the United Nations Cairo Population Conference, as a way of introducing the issue. The central goal of this fast-paced programme is to paint a vivid picture of where the world stands today in this "race between education and catastrophe." The videocassette includes exclusive interviews with a dozen of the world's foremost population and environmental leaders. Interviews include: Tim Wirth, Under Secretary of State and formal US Senator; Nafis Sadik, General Secretary of the Cairo Conference; and Paul Ehrlich, author of "The Population Bomb".

Accompanied with a teacher's guide.

Jam Packed produced by and distributed under the auspices of Population Communications International. It is awarded first prize in the "Earth Vision '98 Environmental Film and Video Competition". The video along with the teacher's guide, addresses the consequences of our planet's explosive growth in human numbers and offers solutions to the problem. Host Alexandra Paul, star of Baywatch, explores how individuals affect our world through their choice of family size, buying habits and use of resources. It looks at the population crisis from a young adult point of view. The decisions teenagers make today about their
sexual and consumptive behaviour will have a profound impact on their children and grandchildren. It encourages teenagers to look at their own behaviour, and through self-examination, learn to make choices that will lead to a healthier lifestyle and a positive future for our planetary home. The accompanied guide includes basic information concerning overpopulation, suggested classroom activities, and a variety of population resources for further research.
