This paper describes the structured faculty mentoring program at the Pittsburgh Technical Institute (Pennsylvania), which is designed to provide a system of support for new faculty, who encounter many stressful situations on a daily basis, and provide guidance and encouragement. One of the primary goals of the program is to improve the quality of instruction, with the ultimate goal of benefiting students and the institution. Some of the possible benefits of the program include increased student retention and graduation rates, higher levels of faculty satisfaction, and lower rates of faculty attrition. In addition to the brief introductory material, the paper includes information on applying for a faculty mentor position, and explains the institution's teaching philosophy; faculty mentor responsibilities (including teaching responsibilities, working with mentees, and completing activity reports); desired faculty mentor traits; eligibility; request process; and salary range. The application form asks the applicant to respond to questions on why he or she wants to be a mentor, on teaching and classroom observation experiences, on personal characteristics, and on professional development. The final portion of the document is a syllabus for the faculty mentor development program. (RH)
FACULTY MENTORING PROGRAM

The Faculty Mentoring Program exists to provide a system of support for new faculty. New teachers encounter many stressful situations on a daily basis and as a result may experience feelings of insecurity, exhaustion, frustration and disappointment. New teachers need to be able to go to someone to lean on for support, guidance or maybe just a few words of encouragement. Faculty mentors can fulfill these needs.

Faculty mentors are experienced instructors selected for their expertise, desire to help new teachers and commitment to students. Mentors can broaden their horizons by relating to their “mentees” and assisting them on many different levels.

Faculty mentoring can have a powerful effect on the mentor, mentee, students and the institution itself. New faculty members are paired with those who are experienced and have undergone a selection process to earn the title of Faculty Mentor. Mentors undergo a series of training sessions focused on the development of requisite skills and knowledge necessary for becoming an effective mentor.

One of the primary goals of the faculty mentoring program is to improve the quality of instruction. As this goal is reached, it follows that students and the institution will also benefit. Some of the possible benefits include increased retention and graduation rates, higher level of teacher satisfaction and lower rates of teacher attrition.
