Introduction

Bibliography on Higher Education in Canada

This bibliography represents an initial attempt to compile a comprehensive list of publications dealing with postsecondary education in Canada. Inclusion has been limited to books and/or major reports of substance. While there has been no limitation on the period of production, items published prior to 1970 have been included only if recommended as seminal or of significant influence.

The list has been compiled on the collective advice of about 40 individuals chosen from the membership of the Canadian Society for the Study of Higher Education. In subsequent years the number of individuals from whom advice will be sought is to be expanded considerably.

Readers are strongly urged to forward additions to the bibliography and to comment upon the quality of items in the current list. The author fully anticipates that many important works have not been included and that some in the present list may not qualify under the criteria used.
