ABSTRACT

In keeping with a model of intelligence that identifies at least 12 intelligence "talents," formal and informal intelligence or talent assessments have been developed. This paper presents some of these informal instruments that can be used to assess convergent and divergent forms of intelligence. These nontraditional instruments have been designed to be enjoyable. Twelve tests are included. (SLD)

## NONTRADITIONAL INTELLIGENCE TESTING:

### SAMPLES OF EASY TO USE INSTRUMENTS

The assessment of intelligence has changed greatly in the last 30 years. With the development and use of the Wechsler and Kaufman scales standardized IQ testing has been much improved over the old group tests. One of the basic roles of school psychologists and counselors is the interpretation of IQ testing data to other educators and parents. Braden (1990) in a recent article on "Experimental Methods for Assessing Intelligence," stated: "The present and future of intellectual assessment is shaped by many forces, including public, legal, and professional issues.... This mini-series highlights the role of scientific research and its impact on the present and future of intellectual assessment by describing and reviewing three experiemntal approaches to the measurement of intelligence," (p. 397).

In another paper the present author has outlined a conceptual model dealing with the categorization of intelligence. In that paper "intelligence" is synonymous with the term "talent". The author has identified at least twelve such talents (see Figure One). Within this context, the author has developed both formal and information intelligence or talent assessments. What the reader will find in the following pages are examples of nontraditional instruments that can be used to assess both convergent and divergent forms of intelligence.

## THE WYOMING INTELLIGENCE TEST (WIT) I

Directions: Please write an answer to each of the items below. In some cases, there may be more than one correct answer.

- (1) If you set a traditional alarm clock for 7 o'clock in the morning and you go to bed at 6 o'clock, how many hours of sleep will you get?
- (2) Do they have a Fourth of July in Great Britain?
- (3) You are living in a home which has southern exposure on all sides. A bear walks by. What color is the bear?
- (4) You give a dime to one son and fifteen cents to another. What time is it?
- (5) I have in my hand two coins which total thirty cents. One of them is not a nickel. What are the two coins?
- (6) You are lost in a snowstorm when you stumble upon a cabin. Inside the cabin you find a match, a stove, a lantern, and a candle. Which item would you light first in order to keep from freezing to death?
- (7) How much dirt can you get out of a hole three feet by three feet by three feet?
- (8) A rabbit finds a barrel in which there are sixteen ears of corn. The rabbit carries away three ears a night. How many nights will it take to empty the barrel?
- (9) Form a word with five letters, take two and leave one. What is the word?
- (10) A girl works in a candy store in Cheyenne. She is five feet, seven inches tall, wears a size seven shoe, a size ten dress, and loves peanut clusters. What does she weigh?
- (11) Divide forty by half and add ten. What is your answer?
- (12) Take three apples from five apples and what do you have?

Directions: Identify the adages listed below.

- (1) Vermillion-hued cummulus formations observed during matinal hours cause considerable agitation to mariners, while the appearance of a visible garnet mass of vapor during nocturnal-periods-produces euphoria among those who traverse aqueous bodies.
- (2) All substances which exhibit a reflection of light particles emanating in dazzling profusion are not necessarily composed of a dense, metallic chemical which possesses a high degree of ductility, malleability and value.
- (3) A pair offers possibility of companionship; while triploideaties considered as an aggregate assume overpowering characteristics of a multitude.
- (4) Lavation is in proximity to a state of piety.
- (5) A warm-blooded, plumed vertebrate which activates its energies quickly, from a state of nocturnal hibernation is able to seize by force or stratagem the slender, soft bodied, segmented anuman which lives by furrowing underground.
- (6) An overabundance of culinary experts often vitiates the bouillon.
- (7) The art of combining vocal or instrumental sounds or tones in varying melody, harmony, rhythm, and timbre in order to form structurally complete expressive compositions mollifies the uncultivated primitive.
- (8) Individuals who inhabit domiciles composed of intangible substances containing silicon compounds should be wary of casting hard, non-metallic mineral matter.
- (9) Undue velocity produces lavish prodigality.
- (10) It is not judicious for an individual to engage in lachrymation concerning an unintentional overflow of lacteal substances.
- (11) It is not considered prudent to enumerate an individual's stock of domestic fowl in advance of the termination of the period of gestation.
- (12) A non-metallic mineral substance of definite density which is in the process of periodical revolution in orbit does not assemble quantities of lichenous material.

The purpose of the present paper has been to describe and present several informal instruments that can be used to assess convergent and divergent forms of intelligence. These instruments are not meant to supplant properly used individual standardized IQ tests, but have been used to teach the concept of "intelligence" in psychology and educational psychology classes. Such nontraditional instruments are usually well-received and enjoyable. The reader is encouraged to contact the author for answer sheets if any of the instruments described in this paper are used.
