This document of skill standards for the food service cluster serves as a guide to workforce preparation program providers in defining content for their programs and to employers to establish the skills and standards necessary for job acquisition. These 41 occupational skill standards describe what people should know and be able to do in an occupational setting. Each skill standard contains at least these three areas: performance area (summary of work to be performed); skill standard with conditions of performance, work to be performed, and performance criteria; and performance elements and assessment criteria. These sections may also be included: performance area and assessment and credentialing approach. Introductory materials include the developmental process; assumptions for food service management standards; table of contents; and performance skill levels. Skill standards include: ensure dining area readiness; serve customers; prepare various foods; perform purchasing functions; open and close establishment; plan menus; and maintain compliance with company policies and procedures and local, state, and federal laws. Appendixes include a glossary; lists of committee and council members; and workplace skills. (YLB)

MESSAGE TO ILLINOIS CITIZENS

Dear Citizens of Illinois:

Preparing youth and adults for entry into the workforce and the ability of individuals to contribute to society throughout their lives are critical to the economy of Illinois. Public and private interest in establishing national and state systems of industry-driven skill standards and credentials is growing in the United States, especially for occupations that require less than a four-year college degree. This interest stems from the understanding that the United States will increasingly compete internationally by increasing the skills and productivity of the front-line workforce. The major purpose of skill standards and credentialing systems is to promote education and training investment and ensure that this education and training enables students and workers to meet industry standards that are benchmarked to our major international competitors.

The Illinois Occupational Skill Standards and Credentialing Council (IOSSCC) has been working with industry subcouncils, the Illinois State Board of Education and other partnering agencies to adopt, adapt and/or develop skill standards for high-demand occupations. This document represents the work of the Hospitality Subcouncil and the associated standards development committee. Through this collaborative effort, skill standards products are being developed for a myriad of industries, occupational clusters and occupations. Upon completion of these products, there will be a period of feedback and comment from business, industry and labor representatives as well as educators.

These documents will serve as a guide to workforce preparation program providers in defining content for their programs and to employers to establish the skills and standards necessary for job acquisition. These standards will also serve as a mechanism for communication among education, business, industry and labor.

We encourage you to review these standards and share your comments. This effort has involved a great many people from business, industry and labor. Comments regarding their usefulness in curriculum and assessment design as well as needs for inservice and technical assistance in their implementation are critical to our efforts to move forward and improve the documents. A feedback instrument is included with this document.

We look forward to your comments.

Sincerely,

The Members of the IOSSCC
The Illinois Occupational Skill Standards and Credentialing Council (IOSSCC) endorses occupational skill standards and credentialing systems for occupations that (a) require basic workplace skills and technical training, (b) provide a large number of jobs with either moderate or high earnings, and (c) provide career advancement opportunities to related occupations with moderate or high earnings. The nine-member Council was established by the Occupational Skill Standards Act (PA 87-1210). The council, representing business, industry and labor and working with the Illinois State Board of Education in partnership with the Illinois Community College Board, Illinois Board of Higher Education, Illinois Department of Employment Security and Illinois Department of Commerce and Community Affairs, has created a common vision for workforce development in Illinois.

**Vision**

It is the vision of the IOSSCC to develop a statewide system of industry-defined and recognized skill standards and credentials for all major skilled occupations providing strong employment and earnings opportunities in Illinois. Information related to occupational employment and earning opportunities is determined by the Illinois Occupational Information Coordinating Committee (IOICC) in cooperation with business and industry.

**Subcouncils and Standards Development Committees**

The Council developed industry subcouncils (representing all major industries in Illinois) to review, approve and promote occupational skill standards and credentialing systems. In cooperation with organizations such as the Illinois State Chamber of Commerce, the Illinois AFL-CIO, the Illinois Manufacturers' Association and others, the Council established the first five subcouncils in 1995—Agricultural and Natural Resources, Manufacturing, Health and Social Services, Hospitality and Business and Administrative/Information Services.

The remaining subcouncils include Applied Science and Engineering Services, Legal and Protective Services, Transportation and Distribution, Educational Services, Financial Services, Marketing and Retail Trade, Communications, Construction and Energy and Utilities.

The Standards Development Committees, composed of business, labor and education representatives, are experts in the related occupational cluster and work with the product developer to
- develop or validate occupational skill standards,
- identify related academic skills,
- develop or review assessment or credentialing approaches, and
- recommend endorsement of the standards and credentialing system to the industry subcouncil.

**Expected Benefits for Employers, Educators, Students and Workers**

Occupational skill standards and credentialing systems are being developed and promoted by the IOSSCC to improve Illinois' competitiveness. Such standards and credentialing systems provide a common language for employers, workers, students and education and training providers to communicate skill requirements and quality expectations for all major industry and occupational areas.

**For Employers, skill standards will**
- Improve employee recruitment and retention by more clearly identifying skill requirements,
- Encourage improved responsiveness and performance of education and training providers,
- Enlarge the pool of skilled workers,
- Focus attention on the importance of training investment.
For Education and Training Providers, skill standards will
- Provide information on all major industries and occupations,
- Contribute to program and curriculum development,
- Strengthen relationships between educators and training providers,
- Improve career planning.

For Students and Workers, skill standards will
- Foster better decision making concerning careers and the training necessary to acquire well-paying jobs,
- Allow more effective communication with employers about what they know and can do,
- Allow more effective work with employers in career development and skill upgrading.

**IOSSCC Requirements for Occupational Skill Standards**

Any occupational skill standards and credentialing system seeking IOSSCC endorsement must
- represent an occupation or occupational cluster which meets the criteria for IOSSCC endorsement;
- address both content and performance standards for critical work functions and activities for an occupation or occupational area;
- ensure formal validation and endorsement by a representative group of employers and workers within an industry;
- provide for review, modification and revalidation by an industry group a minimum of once every five years;
- award credentials based on assessment approaches that are supported and endorsed by the industry and consistent with nationally recognized guidelines for validity and reliability;
- provide widespread access and information to the general public in Illinois;
- include marketing and promotion by the industry in cooperation with the partner state agencies.

**Definitions and Endorsement Criteria**

The definitions and endorsement criteria are designed to promote the integration of existing and future industry-recognized standards, as well as the integration of the Illinois academic and occupational skill standards. Because all skill standards must address the critical work functions and activities for an occupation or industry/occupational area, the Council further defined three major components:

- **Conditions of Performance**: The information, tools, equipment and other resources provided to a person for a work performance.
- **Statement of Work**: A description of the work to be performed by a person.
- **Performance Criteria**: The criteria used to determine the required level of performance. These criteria could include product characteristics (e.g., accuracy levels, appearance), process or procedural requirements (e.g., safety, standard professional procedures) and time and resource requirements. The IOSSCC also requires performance criteria to be further specified by detailed individual performance elements and assessment criteria.

The IOSSCC is currently working with the Illinois State Board of Education and other state agencies to integrate the occupational standards with the Illinois academic standards which describe what students should know and be able to do as a result of their education. The Council is also working to integrate workplace skills—problem solving, critical thinking, teamwork, etc.—with both the academic and occupational skill standards.
The Illinois Model

Illinois Occupational Skill Standards describe what people should know and be able to do and how well these skills and knowledge will be demonstrated in an occupational setting. They focus on the most critical work performances for an occupation or occupational area. As seen in the following model, Illinois Occupational Skill Standards contain at least these three areas:

- Performance Skill
- Skill Standard
- Performance Elements and Assessment Criteria

The following sections may also be included at the discretion of the specific standards development committee:

- Performance Area
- Assessment and Credentialing Approach

Illinois Occupational Skill Standards carry a coding at the top of each page identifying the state, fiscal year in which standards were endorsed, subcouncil abbreviation, cluster abbreviation and standard number. For example, the twenty-fifth skill standard in the Foodservice Skills Cluster, which has been developed by the Hospitality Subcouncil, would carry the following coding: IL.97.HOSP.FSM.25

A model for Illinois Occupational Skill Standards showing the placement of the coding and providing a description of each area within a standard is contained on the following page.
SUMMARY OF WORK TO BE PERFORMED. SUMMARY IS BRIEF AND BEGINS WITH AN ACTION VERB.

SKILL STANDARD

CONDITIONS OF PERFORMANCE

Includes all information, tools, equipment and other resources provided to the learner for performing the work.

WORK TO BE PERFORMED

Provides an overview of the performance with the major elements or steps being described under Performance Elements and Assessment Criteria.

PERFORMANCE CRITERIA

Includes product characteristics (e.g., accuracy levels, appearance) and/or process or procedure requirements (e.g., safety requirements). Time limits are specified whenever possible.

PERFORMANCE ELEMENTS AND ASSESSMENT CRITERIA

Statement of the major elements, components or steps of the overall performance and the assessment criteria for determining successful performance. Includes all major tasks, the knowledge to be demonstrated and specific assessment criteria.

ASSESSMENT AND CREDENTIALING APPROACH

Optional statement of suggested assessment approaches for the performance which also refers to existing assessment and credentialing systems.
DEVELOPMENTAL PROCESS

The Hospitality Subcouncil identified foodservice as the first industry segment for which performance standards should be developed. Based on labor market information and the fact that CHRIE (Council on Hotel, Restaurant, and Institutional Education) was in the process of developing national standards for Customer Service occupations, the Subcouncil charged the first standards development committee with adapting the CHRIE standards for Illinois.

The Illinois Occupational Skill Standards and Credentialing Council (IOSSCC), upon re-evaluating its endorsement criteria related to earnings, recommended a cluster approach for standards development and endorsement to reflect common standards within the foodservice cluster and the strong career ladder within that segment of the industry.

The Foodservice Cluster divisions were defined as Customer Service (Host/Hostess, Server, Busser and Cashier), Food Preparation (Utility/Cook’s/Baker’s Helpers and Cook/Chef) and Foodservice Management (Foodservice Manager, Assistant Manager, Dining Room Manager and Steward).

The Foodservice Cluster met developmental criteria established by the Council:

- Education (level and rigor)
- Opportunities for Employment
- Earnings Potential
- Career Opportunities

The Standards Development Committees, which finalized the developmental work, were composed of workers and immediate supervisors representing all occupations within the cluster. As the draft Customer Service and Food Preparation standards were completed, they were presented to one Standards Development Committee for review, revision and validation. A second Standards Development Committee reviewed and validated the draft standards for Foodservice Management.

A complete set of skill standards statements for Customer Service, Food Preparation and Foodservice Management was submitted to the Subcouncil for approval. Comments submitted by the Subcouncil were integrated into the final product. A statement of assumptions accompanied the standards to provide context for their development. Upon completion, the entire standards package was submitted to the Council for endorsement.
Skill standards statements assume:

1. Workplace/employability skills are expected of all learners. The interpersonal skills learners need to be successful in the workplace are significantly related to life-long career experience and are not solely a part of the initial schooling process.

2. Learners will follow standard operating procedures identified by the specific worksite or business advisory committee.

3. Skills progress from simple to complex. Once a skill has been successfully mastered, it should be incorporated as part of more complex skills.

4. The selection of skill standards is not intended to embrace the entire skill base or body of knowledge currently or futuristically associated with the foodservice sector.

5. Skill standards describe the skill only and do not detail the background knowledge or beginning skills related to the particular skill.

6. Although the skill standards enumerate steps to successful demonstration, rote approaches to outcomes are not prescribed.

7. Skill standards are selected because they meet industry and employer needs and professional standards of practice.

8. Skill standards are not intended to replace, supersede or serve as substitutes for procedural manuals.

9. Skill standards are to be performed under conditions consistent with safe and sanitary health practices, both of which are critical for a successful business operation in the foodservice sector of the Hospitality industry.

10. Sanitation Certification is an additional credential that is highly recommended for all employees in the foodservice sector.

11. Time elements identified for individual standards are based on the consensus of the Standards Development Committee; food preparation time elements are dependent upon specific recipes.

SKILL STANDARD

CONDITIONS OF PERFORMANCE

Given instruction on company procedures, government safety regulations and the following:

- Safety checklist
- Clipboard
- Material safety data sheets
- Floor signs
- Pen or pencil
- Cleaning supplies and equipment

WORK TO BE PERFORMED

Check work area for safety hazards; eliminate safety hazards from work area and report work area safety violations to designated person. Complete reports as needed.

PERFORMANCE CRITERIA

All hazards that can cause falls, burns, cuts, poisoning or other accidents are eliminated.

The worker successfully completes the performance elements listed below, performing all tasks safely, efficiently and according to company standards and procedures.

PERFORMANCE ELEMENTS AND ASSESSMENT CRITERIA

- Check work area for safety hazards.
  1. Check for electrical cords or other objects located where they could cause workers to trip or fall.
  2. Check for grease and other spills on floors and work surfaces that could cause workers to trip or fall or cause equipment to slide.
  3. Check for pot handles facing the front of cooktops which could cause workers to bump into them and spill hot ingredients.
  4. Check for pot holders or gloves conveniently located where hot equipment or hot plates are handled but not located too close to heat sources.
  5. Check for Class A, B, C fire extinguishers within easy reach wherever grease fires or other fires could occur.
  6. Check expiration dates on fire extinguishers.
  7. Check electrical cords for fraying.
  8. Check for combustible materials near heat sources.
  9. Check for caustic or poisonous substances near food preparation areas.
  10. Check for appropriate labels on caustic and poisonous materials, including government-specified symbols, instructions for use and antidotes.
  11. Check that required material safety data sheets are available and easily accessible.
12. Check for cutting instruments that are dull, damaged or improperly stored.
13. Check for appropriate warning labels on mechanical equipment.
14. Check for mechanical equipment requiring maintenance or repairs.
15. Check for gas appliances requiring maintenance or repairs.
16. Check all exit signs and warning indicators.
17. Check suppression systems annually.

*Time limit: Ongoing activity.*

- **Eliminate safety hazards from work area.**
  1. Remove any objects located where they could cause workers to trip or fall.
  2. Clean up or temporarily cover all spills on floors and work surfaces.
  3. Position pot handles so they face away from the front of cooktops.
  4. Return fire extinguishers to designated locations.
  5. Move combustible materials away from heat sources.
  6. Move caustic or poisonous substances away from food preparation areas.
  7. Store all cutting instruments properly.

*Time limit: Varies with conditions.*

- **Report safety violations to supervisor.**
  1. Report missing fire extinguishers.
  2. Check level of charge on fire extinguishers.
  3. Report fire extinguishers with expired dates.
  5. Report unlabeled or improperly labeled caustic or poisonous substances.
  6. Report missing material safety data sheets.
  7. Report mechanical equipment missing appropriate warning labels.
  8. Report mechanical equipment requiring maintenance or repairs.

*Time limit: Ongoing activity.*
FOLLOW ACCIDENT RESPONSE PROCEDURES.

SKILL STANDARD

CONDITIONS OF PERFORMANCE

Given instruction on company procedures, first aid training and the following:

- First aid kit
- Accident report and record forms
- Instruction in filling out forms
- Instruction in what to say to a guest who is injured

WORK TO BE PERFORMED

Follow company policy in administering first aid; complete accident reports and records.

PERFORMANCE CRITERIA

Each injured party is treated appropriately; accident report and record forms are completed correctly and accurately.

The worker successfully completes the performance elements listed below, performing all tasks safely, efficiently and according to company standards and procedures.

PERFORMANCE ELEMENTS AND ASSESSMENT CRITERIA

- Follow company policy in administering first aid.
  1. Determine degree of injury.
  2. Perform appropriate action to assist an individual who is choking.
  3. Determine whether an injured individual is in shock or bleeding excessively.

  Time limit: Varies with conditions.

- Complete accident reports and records.
  1. Fill in all information the forms require.
  2. Review forms for completeness and accuracy.
  3. Submit forms to the supervisor or other designated person.
  4. Discuss accident with the supervisor or other designated person to determine how such accidents can be prevented.

  Time limit: As required.
FOLLOW SECURITY PROCEDURES.

SKILL STANDARD

CONDITIONS OF PERFORMANCE

Given instruction on company procedures and the following:
- Security checklist
- Pen or pencil
- Clipboard

WORK TO BE PERFORMED

Follow company loss prevention procedures; report suspicious circumstances to designated person.

PERFORMANCE CRITERIA

All conditions that could lead to theft or cause losses are eliminated or reported.
The worker successfully completes the performance elements listed below, performing all tasks safely, efficiently and according to company standards and procedures.

PERFORMANCE ELEMENTS AND ASSESSMENT CRITERIA

- Follow company loss prevention procedures.
  1. Store and secure supplies according to company procedures.
  2. Distribute supplies to authorized personnel only.
  3. Lock all doors that should be locked.
  
  Time limit: Ongoing activity.

- Report suspicious circumstances to supervisor.
  1. Report the presence of unauthorized individuals.
  
  Time limit: Ongoing activity.
FOLLOW SAFE FOOD HANDLING AND SANITATION PROCEDURES.

SKILL STANDARD

CONDITIONS OF PERFORMANCE

Given instruction on company procedures and the following:

- Sanitation checklist
- Cleaning equipment
- Sanitizing agents labeled with safe handling instructions
- Transport cart
- Side towels
- Trays
- Material safety data sheets
- Storage procedures
- National and local health codes
- Cleaning supplies labeled with safe handling instructions
- Protective gloves
- Garbage can liners
- Drying racks
- Aprons
- Hairnets or hats
- Appropriate bags for items that can be recycled

WORK TO BE PERFORMED

Practice safe food handling techniques; clean and sanitize nondisposable items that come in contact with foods; clean and sanitize work area according to company schedule.

PERFORMANCE CRITERIA

All measures are taken to avoid food contamination or spoilage.

The worker successfully completes the performance elements listed below, performing all tasks safely, efficiently and according to company standards and procedures.

PERFORMANCE ELEMENTS AND ASSESSMENT CRITERIA

- Practice safe food handling techniques.
  1. Identify and correct food safety violations.
  2. Store food at proper temperatures and under appropriate conditions.
  3. Cook food to proper temperatures.
  4. Maintain proper food holding temperatures.
  5. Cool cooked products within required time limits.
  6. Comply with national and local health codes.
  7. Handle raw meat, poultry, seafood and surfaces that come in contact with them in a manner that eliminates risk of contamination.
  8. Discard any foods that show signs of spoilage or contamination.

Time limit: Ongoing activity.
• Clean and sanitize nondisposable items coming in contact with foods.
  1. Clean and sanitize glassware, dinnerware and flatware.
  2. Clean and sanitize cooking and baking utensils and equipment.

  *Time limit: Ongoing activity.*

• Clean and sanitize work area according to company schedule.
  1. Clean and sanitize work area windows, walls, floors and counters.
  2. Clean and sanitize equipment used to transport food.
  3. Clean and sanitize food preparation equipment.
  4. Clean, sanitize and line trash and garbage containers.
  5. Pick up and dispose of trash according to company procedures and local environmental requirements.
  6. Clean and sanitize dry food cabinets.
  7. Clean and sanitize refrigerated and freezer storage.
  8. Inspect for signs of rodents and insects.

  *Time limit: Ongoing activity.*

| **Critical Work Functions** | Distinct and economically meaningful sets of work activities critical to a work process or business unit which are performed to achieve a given work objective with work outputs that have definable performance criteria. A critical work function has three major components: 
  - **Conditions of Performance**: The information, tools, equipment and other resources provided to a person for a work performance. 
  - **Work to Be Performed**: A description of the work to be performed. 
  - **Performance Criteria**: The criteria used to determine the required level of performance. These criteria could include product characteristics (e.g., accuracy levels, appearance), process or procedure requirements (e.g., safety, standard professional procedures) and time and resource requirements. The IOSSCC requires that these performance criteria be further specified by more detailed individual performance elements and assessment criteria. |
<p>| <strong>Credentialing</strong>     | The provision of a certificate or award to an individual indicating the attainment of a designated set of knowledge and skills and/or the demonstration of a set of critical work functions for an industry/occupational area. |
| <strong>Illinois Occupational Skill Standards and Credentialing Council (IOSSCC)</strong> | Legislated body representing business and industry which establishes skill standards criteria, endorses final products approved by the industry subcouncil and standards development committee and assists in marketing and dissemination of occupational skill standards. |
| <strong>Industry</strong>          | Type of economic activity or product or service produced or provided in a physical location (employer establishment). They are usually defined in terms of the Standard Industrial Classification (SIC) system. |</p>

I. Occupational Definition and Justification

A. Occupational Definition

The Hospitality Subcouncil began skill standards development with a cluster of occupations in the Foodservice segment of the industry. The cluster consists of occupations from three areas: Customer Service (Host/Hostess, Server, Busser and Cashier), Food Preparation (Utility/Cook's/Baker's Helpers and Cook/Chef) and Foodservice Management (Foodservice Manager, Assistant Manager, Dining Room Manager and Steward). Definitions for the three components of the cluster are provided below.

Customer Service

Customer Service is a category of occupations which includes Host/Hostess, Server, Busser and Cashier. These occupations are critical to the success of the foodservice establishment. Job responsibilities include greeting and seating customers; supervising and coordinating activities of the dining room staff; taking orders and serving food and beverages; answering inquiries; setting and clearing places; monitoring diners' progress; totaling the bill; accepting payment and completing the transaction; and providing courteous, rapid service to the customers.

Food Preparation

Food Preparation is a category of occupations which includes Utility/Cook's/Baker's Helper and Cook/Chef. These occupations are critical to the success of the foodservice operation. Job responsibilities include preparing, seasoning and cooking soups, meats, vegetables, desserts and other foodstuffs; ensuring that safety and sanitary procedures are followed; ordering, receiving and inventorying supplies; keeping records and accounts; planning menus; and pricing menu items.

Foodservice Management

Foodservice Management is a category of occupations which includes Foodservice Manager, Assistant Manager, Dining Room Manager and Steward. These occupations help ensure the successful operation of the foodservice establishment. Job responsibilities include supervising and coordinating activities of the kitchen, dining room and non-cooking workers; inspecting facilities to ensure safety and cleanliness; ordering, receiving and inventorying supplies; maintaining appropriate records; approving invoices and bills; hiring, training and discharging employees; and forecasting and promoting customer traffic.

B. Employment and Earnings Opportunities

While not all occupations within Customer Service and Food Preparation Standards meet the earnings criteria established by the IOSSCC, they contain the necessary skills and foundations that an individual needs to move to the higher wage-earning occupations associated with Foodservice Management. That movement is currently supported by strong industry-based training opportunities which are most often provided through internship or apprenticeship.

There is also clear evidence that a strong career path exists between the entry-level positions and the top-level foodservice manager as evidenced by the fact that over 60% of restaurant owners and managers began as dishwashers, servers and cooks.
Employment Potential

Employment projections for Illinois indicate that occupations in all three areas of the foodservice cluster are large and growing at more than the statewide average rate. Thus, considering the large number of additional job openings due to replacement needs, job opportunities in all parts of the state should be plentiful. The need for qualified persons to fill management positions is acute. According to U.S. News and World Report (October 30, 1995), the hospitality industry is one of the fastest growing. The Bureau of Labor Statistics estimates jobs in foodservice management will jump 44% by the year 2005.

Earnings Potential

Customer Service occupations (including Host/Hostess, Server, Busser and Cashier) receive median earnings, but do not quite reach the wage criteria set by the Council. However, the strong career ladder and the critical position of these occupations with this segment of the industry allow inclusion of this area in the foodservice cluster standards. In addition to an hourly wage, many of these occupations will receive tips, bonuses or other compensation.

Food Preparation occupations (including Cook/Chef and Utility/Kitchen/Baker’s Helper) receive a middle range of earnings that meet or exceed the Council’s criteria for endorsement. The middle range earnings for chefs, as reported in 1994, was $20,380-$28,600. The wage figures continue to rise along with the demand.

Foodservice Management occupations (including Foodservice Manager, Dining Room Manager and Steward) will exceed the Council’s wage criteria. The middle range of annual earnings as reported in 1994 was between $18,000 and $28,000. The industry reports a substantial increase in this range with wages rising in proportion to the tremendous demand for qualified people in these occupations.

C. Career Opportunities and Education and Training Requirements

The occupations associated with the foodservice cluster require technical, workplace and related academic skills. The relationship of academic skills and the occupational skill standards will be identified using the Illinois Learning Standards.

II. Occupational Standards and Credentials

A. Occupational Standards

Foodservice standards were developed for a cluster of occupations in three major areas: Customer Service, Food Preparation and Foodservice Management. Information from the national foodservice standards project, which addressed customer service occupations, was adapted in the development of the Illinois standards. Illinois standards were also aligned with the national foodservice pre-management curriculum project, Pro-Start. Future standards revisions or development will also be aligned with the newly formed national hospitality consortium.

B. Assessment and Credentialing System

A number of existing credentials are compatible with the Illinois standards. As a core of standards, their achievement is preparation for credentials that require years of experience, professional involvement and/or further course work in addition to the demonstrated achievement of the standards. Such advanced credentials exist for cooks/chefs through organizations such as the American Culinary Federation. Advanced credentials in foodservice management can be acquired through the National Restaurant Association and the American Hotel and Motel Association. A secondary level pre-management certification is also available through the National Restaurant Association.
The subcouncil will review and consider all alternatives for assessing skill standards for foodservice. The need for additional credentialing or certification will be reviewed with strong consideration given to embedding the assessment in the instruction provided at the site. The assessment will be valid and reliable.

III. Industry Support and Commitment

A. Industry Commitment for Development and Updating

1. The development of skill standards for the Foodservice Cluster is the direct result of efforts put forth by the Hospitality Subcouncil and two Standards Development Committees. Lists of Subcouncil and Standards Development Committee members are located in Appendices C, D-1 and D-2, respectively.

2. In developing the products, the following steps were completed:
   a. Identification and prioritization of developmental categories.
   b. Review of resources.
   c. Development of draft performance skills.
   d. Convening of Standards Development Committee of incumbent workers.
   e. Review, validation and approval of skill standards by the Standards Development Committee.
   f. Review and approval of standards by Subcouncil.
   g. Acceptance of Recognition Proposal by the Council.

3. The Hospitality Subcouncil supports a regular review and revision process for standards to reflect the rapidly changing industry.

B. Industry Commitment for Marketing

The Hospitality Subcouncil is committed to marketing and obtaining support and endorsement from the leading industry associations impacted by the skill standards.

Subcouncil members will coordinate efforts to provide awareness and obtain full industry commitment to this effort. In addition, the Subcouncil will also assist in developing a full industry marketing plan.

The Subcouncil encourages the availability of skill standards to the public including learners, parents, workers, educators at all levels, employers and industry organizations.
