ABSTRACT

This report provides enrollment trend information for public four-year colleges and universities for the period fall 1990 through fall 1997. Several trends are highlighted: during this period, total enrollment fell 0.5 percent to 5.77 million students; enrollment of racial/ethnic minorities rose 24.5 percent; white enrollment fell 10.8 percent. The number of men enrolled fell 7.2 percent, while the number of women enrolled fell 0.1 percent. Geographical analysis showed increased enrollment in the Southeast, Southwest, and Rocky Mountain states; and the sharpest decreases in enrollment in New England and the Plains states. Also discussed is the impact on enrollment of policy developments, demographic factors, enrollment patterns, affirmative action efforts at the national and state level, and key judicial decisions. Presentation of the data throughout the document is separated according to institutional membership in either the American Association of State Colleges and Universities (AASCU; n=425) or the National Association of State Universities and Land-Grant Colleges (NASUC; n=200). Two appendixes present total enrollment figures for AASCU and NASUC colleges and universities for fall 1990 and fall 1997. (RAB)

Executive Summary

- ◆ Total enrollment at public four-year institutions fell 0.5 percent from fall 1990 to fall 1997. During this period, enrollment of racial/ethnic minorities rose 24.5 percent at these institutions, while enrollment of white students fell 10.8 percent.
- ◆ Similarly, total enrollment at AASCU* institutions fell 0.6 percent over the same period. Minority enrollment at these institutions jumped 21.8 percent, while enrollment of white students declined 10.7 percent.
- ◆ NASULGC** institutions experienced a total enrollment drop of 1.5 percent from fall 1990 to fall 1997. As with other public institutions during this period, gains in minority enrollment at NASULGC colleges and universities (25.1 percent increase) were more than offset by a decline in white enrollment.
- ◆ At both AASCU and NASULGC institutions, the total number of men enrolled fell from fall 1990 to fall 1997 (4 percent at AASCU institutions and 5.4 percent at NASULGC institutions). Over the same period, the number of women enrolled at these institutions increased (2.1 percent at AASCU institutions and 2.3 percent at NASULGC institutions).
- ◆ Full-time enrollment continues to grow relative to part-time enrollment at public four-year colleges and universities. From fall 1990 to fall 1997, the total number of full-time students rose 2.5 percent at AASCU institutions and 2 percent at NASULGC institutions. At the same time, part-time enrollments fell 6.3 percent at AASCU institutions and 10.7 percent at NASULGC institutions.
- ◆ Public four-year colleges and universities are experiencing enrollment growth at opposite ends of the age spectrum. From fall 1991 to fall 1997, the greatest percentage increases in enrollment by age group at AASCU and NASULGC institutions took place among people under 20 (7.5 percent increase at AASCU institutions, 8.7 percent increase at NASULGC institutions) and 50 and older (29.9 percent increase at AASCU institutions, 10.6 percent increase at NASULGC institutions).
- ◆ From fall 1990 to fall 1997, AASCU institutions in the Southeast (10.2 percent increase), Southwest (1.2 percent increase), and Rocky Mountain states (17.2 percent increase) posted overall enrollment gains. Similarly, NASULGC institutions in the Southeast (6.5 percent increase) and Rocky Mountain states (8.5 percent increase) experienced increases in total enrollment over this period.
- ◆ A number of factors will significantly influence enrollment patterns and trends at state colleges and universities over the next several years, including:
 - Demographic developments, particularly the expected wave of high school graduates over the next decade
 - Continued change in enrollment intensity (e.g. delayed or interrupted enrollment in postsecondary education)
 - Policy changes and judicial activity related to affirmative action and college/university admissions

* Refers to the American Association of State Colleges and Universities, a Washington-based organization representing more than 425 public four-year colleges and universities and university systems.

** Refers to the National Association of State Universities and Land-Grant Colleges, which represents more than 200 public four-year colleges and universities and university systems.

Findings and Trends: Fall 1990 to Fall 1997

Introduction

During the 1990s, the overall enrollment picture at the nation's public four-year colleges and universities has been one of stability. Total enrollment, as well as enrollment by age and attendance status, have changed little at these institutions from the beginning of the decade through 1997.

Beneath the surface of this relatively static picture, however, significant enrollment-related changes are underway in public higher education. In the face of marginal decreases in total enrollment, the number of minority students enrolling at state colleges and universities continues to climb. Given that minority groups have been historically underrepresented on the nation's campuses and given the current policy climate surrounding the issue of affirmative action in academia, public institutions in many states may be increasingly challenged to develop practically feasible and politically acceptable means of effectively serving this rapidly growing group of students. Additionally, institutions in some geographic regions—the Southeast and Rocky Mountain states in particular—have experienced significant enrollment growth in the face of overall decline, which raises issues related to institutional capacity and the migration of students into and out of those states.

It is increasingly apparent that these challenges will only grow in the years ahead. The number of high school graduates (prospective college students) is expected to grow substantially over the next decade, driven by a jump in the projected number of minority graduates. This growth is also projected to be uneven across geographic regions, which will only exacerbate concerns over institutional capacity and interstate migration of students. Moreover, the issue of affirmative action will lurk in the background, especially if the U.S. Supreme Court fails to revisit the issue in the foreseeable future. State colleges and universities should continue to prepare themselves for these challenges, with a keen eye to the policy environment surrounding them.

Total Enrollment and Enrollment by Race/Ethnicity

- ◆ Total enrollment at public four-year colleges and universities dropped from 5.91 million students in fall 1990 to 5.88 million students in fall 1997, a decrease of 0.5 percent. During this period, enrollment of racial/ethnic minorities at these institutions increased 24.5 percent, while enrollment of white students declined 10.8 percent. The minority groups posting the largest gains over this period were American Indian/Alaska Natives (42 percent increase) and Asian/Pacific Islanders (31.9 percent increase). [See Table 1]
- ◆ At AASCU member institutions, total enrollment fell from 3.37 million students in fall 1990 to 3.35 million students in fall 1997, a drop of 0.6 percent. Minority enrollment at these institutions, however, jumped 21.8 percent during this period, while enrollment of white students fell 10.7 percent. The fastest-growing minority groups (percentage terms) at these institutions were American Indian/Alaska Natives (36.4 percent increase) and Hispanics (28.6 percent increase). [See Table 2]
- ◆ NASULGC member institutions experienced a 1.5 percent decrease in total enrollment over the fall 1990 to fall 1997

Table 1

Total Enrollment in Four-Year Public Colleges and Universities by Race/Ethnicity Fall 1990 and Fall 1997

Race/Ethnicity	Fall 1990 Enrollment	Fall 1997 Enrollment	Percentage Change
African American	497,283	577,859	16.2%
American Indian/Alaska Native	38,043	54,039	42.0%
Asian/Pacific Islander	252,819	333,519	31.9%
Hispanic	314,341	407,016	29.5%
Total, Racial/Ethnic Minorities	1,102,486	1,372,433	24.5%
White, Non-Hispanic	4,607,396	4,109,522	-10.8%
Non-Resident Alien	197,063	219,981	11.6%
Race/Ethnicity Unknown		176,746	
Grand Total	5,906,945	5,878,682	-0.5%

Note: Totals for students not indicating their race/ethnicity (175,015 in 1990) were distributed among racial/ethnic categories according to a methodology developed by the National Center for Education Statistics. Because the 1997 data have not yet undergone final adjudication, this distribution has not yet been made.

Table 3

**Total Enrollment in NASULGC
Colleges and Universities by Race/Ethnicity
Fall 1990 and Fall 1997**

Race/Ethnicity	Fall 1990 Enrollment	Fall 1997 Enrollment	Percentage Change
African American	246,553	286,994	16.4%
American Indian/Alaska Native	19,173	26,791	39.7%
Asian/Pacific Islander	164,318	226,023	37.6%
Hispanic	162,544	201,531	24.0%
Total, Racial/Ethnic Minorities	592,588	741,339	25.1%
White, Non-Hispanic	2,548,548	2,235,697	-12.3%
Non-Resident Alien	146,123	159,990	9.5%
Race/Ethnicity Unknown		100,044	
Grand Total	3,287,259	3,237,070	-1.5%

Note: Totals for students not indicating their race/ethnicity (76,262 in 1990) were distributed among racial/ethnic categories according to a methodology developed by the National Center for Education Statistics. Because the 1997 data have not yet undergone final adjudication, this distribution has not yet been made.

Source: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System Fall Enrollment Surveys, 1990 and 1997.

period, from 3.29 million students to 3.24 million students. These institutions also posted a substantial increase in minority enrollment (25.1 percent), offset by a decline in white enrollment (12.3 percent). The minority groups posting the largest percentage increases over the period were American Indian/Alaska Natives (39.7 percent

increase) and Asian/Pacific Islanders (37.6 percent). [See Table 3]

Enrollment by Sex and Race/Ethnicity

- ◆ At public four-year institutions, the number of women enrolled changed little from fall 1990 to fall 1997 (0.1 percent decrease), while enrollment of male students fell significantly (7.2 percent). For female students, a 28.7 percent increase in minority enrollment offset an 8.3 percent decline in white enrollment. For male students, a 19.1 percent jump in minority enrollment was offset by a 13.6 percent drop in white enrollment. [See Figure 1]
- ◆ At AASCU institutions, the total number of women enrolled rose 2.1 percent from fall 1990 to fall 1997, from 1.9 million to 1.94 million. This increase was driven by a 25.9 percent jump in minority enrollment, most notably among American Indian/Alaska Natives (36.7 percent increase) and Hispanics (31.7 percent increase). Over the same period, the number of male students enrolled at these institutions fell 4 percent, from 1.47 million to 1.42 million. For male students, a significant increase in minority enrollment (16.1 percent) was offset by a substantial decline in white enrollment (13.3 percent). [See Table 4]
- ◆ Similarly, enrollment of female students at NASULGC institutions increased 2.3 percent from fall 1990 to fall 1997, from 1.65 million to 1.69 million. As at AASCU institutions, this increase can be attributed to growth in minority enrollment (29.3 percent increase), with the largest gains posted by Asian/Pacific Islanders (46.7 percent increase) and American Indian/Alaska Natives (42 percent increase). Enrollment of male students declined 5.4 percent at NASULGC institutions over the same period, however. Growth in enrollment of male minority students (20.1 percent) was offset by a 15.1 percent drop in white male students. [See Table 5]

Enrollment by Age Level

- ◆ Total enrollment by age level changed only marginally at public four-year institutions from fall 1991 to fall 1997, but

Table 4

**Total Enrollment in AASCU Colleges
and Universities by Sex and Race/Ethnicity
Fall 1990 and Fall 1997**

Race/Ethnicity	Fall 1990 Enrollment	Fall 1997 Enrollment	Percentage Change
Males			
African American	129,491	143,901	11.1%
American Indian/Alaska Native	9,182	12,473	35.8%
Asian/Pacific Islander	61,467	69,428	13.0%
Hispanic	82,753	102,713	24.1%
Total, Racial/Ethnic Minorities	282,893	328,515	16.1%
White, Non-Hispanic	1,143,505	990,869	-13.3%
Non-Resident Alien	48,459	49,953	3.1%
Race/Ethnicity Unknown		45,825	
Total Males	1,474,857	1,415,162	-4.0%
Females			
African American	208,691	251,552	20.5%
American Indian/Alaska Native	13,319	18,209	36.7%
Asian/Pacific Islander	57,981	75,817	30.8%
Hispanic	115,340	151,954	31.7%
Total, Racial/Ethnic Minorities	395,331	497,532	25.9%
White, Non-Hispanic	1,471,407	1,344,274	-8.6%
Non-Resident Alien	29,102	39,210	34.7%
Race/Ethnicity Unknown and Other		55,364	
Total Females	1,895,840	1,936,380	2.1%
Grand Total	3,370,697	3,351,542	-0.6%

Note: Totals for students not indicating their race/ethnicity (110,056 in 1990) were distributed among racial/ethnic categories according to a methodology developed by the National Center for Education Statistics. Because the 1997 data have not yet undergone final adjudication, this distribution has not yet been made.

Source: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System Fall Enrollment Surveys, 1990 and 1997.

the changes that did occur have significant future implications. One age category that experienced enrollment growth during this period was that of students 50 and older, which grew from 1.6 percent of total enrollment in fall 1991 to 2.0 percent of total enrollment in fall 1997. Such an increase suggests that middle-aged Americans are returning to campuses to update their skills or prepare for second or third careers, trends that are likely to accelerate with the continued shift toward an information- and service-based economy. A second group that posted measurable enrollment gains during this period was that of students under 20, which increased its share of total enrollment from 20.3 percent in fall 1991 to 22.6 percent

Table 5

**Total Enrollment in NASULGC Colleges
and Universities by Sex and Race/Ethnicity
Fall 1990 and Fall 1997**

Race/Ethnicity	Fall 1990 Enrollment	Fall 1997 Enrollment	Percentage Change
Males			
African American	100,095	110,859	10.8%
American Indian/Alaska Native	8,541	11,690	36.9%
Asian/Pacific Islander	86,772	112,270	29.4%
Hispanic	74,130	88,864	19.9%
Total, Racial/Ethnic Minorities	269,538	323,683	20.1%

Total, Racial/Ethnic Minorities	323,050	417,656	29.3%
White, Non-Hispanic	1,284,768	1,163,151	-9.5%
Non-Resident Alien	46,199	60,496	30.9%
Race/Ethnicity Unknown and Other		51,307	
Total Females	1,654,017	1,692,610	2.3%
Grand Total	3,287,259	3,237,070	-1.5%

Note: Totals for students not indicating their race/ethnicity (76,262 in 1990) were distributed among racial/ethnic categories according to a methodology developed by the National Center for Education Statistics. Because the 1997 data have not yet undergone final adjudication, this distribution has not yet been made.

Source: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System Fall Enrollment Surveys, 1990 and 1997.

in fall 1997. This growth signals the beginning of a new wave of traditional-age college students (see discussion in "Demographic Developments" below). [See Figure 2]

- ◆ From fall 1991 to fall 1997, three age groups posted enrollment gains at AASCU institutions:

- under 20 (7.5 percent increase)
- 25-34 (6.6 percent increase)
- 50 and older (29.9 percent increase) [See Table 6]

- ◆ At NASULGC institutions, only two age groups experienced enrollment growth from fall 1991 to fall 1997:

- under 20 (8.7 percent increase)
- 50 and older (10.6 percent increase) [See Table 7]

Enrollment by Academic Status and Enrollment Intensity

◆ The 1990s have been a period of enrollment growth for first-time freshmen (3.9 percent increase) and graduate (7 percent increase) and first-professional students (5.5 percent increase) at state colleges and universities. This period, however, has been one of contraction for enrollment of upper-division undergraduate students (1.8 percent decrease) and non-degree seeking students (10.5 percent decrease) at these institutions. Additionally, full-time enrollment is on the rise at public four-year institutions, while enrollment of part-time students is on the decline

(8.2 percent decrease). These trends have had a definite impact on the programs and services offered by these institutions, but the combination of rising freshman enrollment and falling upper division enrollment suggests that public colleges and universities need to continue the search for innovative approaches to student retention. [See Figures 3 and 4]

- ◆ At AASCU institutions, total undergraduate enrollment (full-time and part-time) fell from fall 1990 to fall 1997, both for first-time freshmen (1.1 percent decrease) and for upper division students (1.4 percent decrease). Over the same total period, graduate and first-professional enrollment (full-time and part-time) increased (12 percent and 5.6 percent, respectively), and enrollment of non-degree seeking students (full-time and part-time) dropped signifi-

Age Level	Fall 1991 Enrollment	Fall 1997 Enrollment	Percentage Change
Under 20	655,757	704,856	7.5%
20 to 24	1,370,167	1,327,405	-3.1%
25 to 34	702,086	748,688	6.6%
35 to 49	441,687	428,967	-2.9%
50 and Older	60,590	78,728	29.9%
Unknown	170,036	36,574	-78.5%
Total	3,400,323	3,325,218	-2.2%

Note: Due to nonresponse by some institutions, the fall 1997 total does not correspond exactly with the total given in Table 2.
Source: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System Fall Enrollment Surveys, 1991 and 1997.

Age Level	Fall 1991 Enrollment	Fall 1997 Enrollment	Percentage Change
Under 20	684,996	744,305	8.7%
20 to 24	1,480,426	1,375,742	-7.1%
25 to 34	712,350	705,371	-1.0%
35 to 49	353,338	309,824	-12.3%
50 and Older	49,957	55,275	10.6%
Unknown	32,059	26,935	-16.0%
Total	3,313,126	3,217,452	-2.9%

Note: Due to nonresponse by some institutions, the fall 1997 total does not correspond exactly with the total given in Table 3.
Source: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System Fall Enrollment Surveys, 1991 and 1997.

cantly (9 percent decrease). Enrollment of full-time students at these institutions rose during this period (2.5 percent increase), while part-time enrollment fell (6.3 percent decrease). [See Table 8]

- ◆ NASULGC institutions presented a mixed picture of total undergraduate enrollment (full-time and part-time) from fall 1990 to fall 1997, with first-time freshmen posting a gain of 5.4 percent and upper-division enrollment registering a loss of 4.1 percent. Total graduate and first-professional enrollment (full-time and part-time) at these institutions rose over the period (4.9 percent and 6.8 percent, respectively), but enrollment of non-degree seeking students (full-time and part-time) declined considerably (8.5 percent). As at AASCU colleges and universities, enrollment of full-time students at NASULGC institutions increased slightly over the period (2 percent), while part-time enrollment fell significantly (10.7 percent). [See Table 9]

Enrollment by Region

- ◆ Despite an overall enrollment drop of 0.5 percent nationwide from fall 1990 to fall 1997, public four-year institutions in the Southeast, Southwest, and Rocky Mountain states posted enrollment gains over this period (8.1

percent, 0.6 percent, and 15.6 percent, respectively). The regions that experienced the largest percentage decreases in total enrollment during this period were New England (8.7 percent decrease) and the Plains (7.7 percent decrease). [See Figure 5] Recent projections of high school graduates suggest that these geographic enrollment patterns will continue for the foreseeable future, which raises issues related to institutional capacity in high-growth areas and policies designed to regulate interstate migration of students.

- ◆ AASCU institutions, which experienced a 0.6 percent loss of enrollment nationwide from fall 1990 to fall 1997, registered growth in three regions:
 - Southeast (10.2 percent increase)
 - Southwest (1.2 percent increase)
 - Rocky Mountain (17.2 percent increase)

Over the same period, the largest percentage decreases in enrollment were posted by AASCU institutions in the following regions:

- Outlying areas (19.5 percent decrease)
- Plains (8.9 percent decrease)
- New England (8.3 percent decrease) [See Table 10]

Figure 3
Percentage Changes in Enrollment at Four-Year Public Colleges and Universities by Academic Grade Level, Fall 1990 to Fall 1997

Source: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System Fall Enrollment Surveys, 1990 and 1997.

◆ NASULGC institutions, which experienced a 1.5 percent loss of total enrollment nationwide from fall 1990 to fall 1997, registered increases in two regions:

- Southeast (6.5 percent increase)
- Rocky Mountain (8.5 percent increase)

At the same time, NASULGC institutions in the following regions posted the largest percentage declines in total enrollment:

- Outlying areas (24.2 percent decrease)
- New England (9.2 percent decrease)
- Plains (8.1 percent decrease) [See Table 11]

Policy Developments and Related Issues

A good deal of the recent discussion related to change in American higher education has focused on how external forces

stand to transform state colleges and universities. Of particular interest is the role that information technology is to play in program content and delivery, as well as the role that alternative providers might play in meeting the educational needs of a growing population.

Equally as important, however, are the dramatic changes related to internal forces, especially those related to the composition and behavior of the student population to be served by public four-year institutions. Knowing exactly who our students are and where they end up are essential to meeting their needs, but recent shifts in demographics, student attendance patterns, and policy directions pose increasing challenges to institutions' efforts on this front. The following points strongly suggest that for state colleges and universities, the bar for meeting these challenges is being raised even higher.

Figure 4
Percentage Changes in Enrollment at Four-Year Public Colleges and Universities by Enrollment Intensity, Fall 1990 to Fall 1997

Source: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System Fall Enrollment Surveys, 1990 and 1997.

Academic Grade Level	Fall 1990 Enrollment	Fall 1997 Enrollment	Percentage Change
Full-Time			
First-Time Freshmen	384,253	394,689	2.7%

Demographic Developments

It is by now a well-known fact that the coming influx of 18-24 year-olds in the U.S. population (termed the "Baby Boom Echo"), as potential college enrollees, will have a substantial impact on public four-year institutions. The composition of this influx, however, is expected to significantly change the face of the nation's collegiate population. This is an important development, given shifting attitudes about the use of racial/ethnic preferences in college and university admissions (see discussion below).

Projections from The College Board and the Western Interstate Commission on Higher Education (WICHE) indicate that the number of public high school graduates will increase 7.7 percent from 1998-99 to 2011-2012. This increase is expected to be composed entirely of racial and ethnic minorities, as the number of non-minority (white) graduates is projected to fall 7.2 percent nationwide over this period. By contrast, the number of minority graduates from public high schools during this period is expected to jump 51 percent nationwide.¹ Because these groups have historically been underrepresented in higher education and stand at the center

of the current controversies over college and university admissions policies, these trends have potentially serious policy implications.

Enrollment Patterns

Shifting enrollment patterns represent another developing challenge for state colleges and universities. The notion of completing a baccalaureate degree in four years without interruption is increasingly becoming an antiquated one, as students strive to balance a number of competing external demands and work toward their degrees in a more sporadic fashion. The term "stopout,"^{*} virtually unknown in the higher education lexicon several years ago, is becoming commonplace in describing the American college student. Because colleges and universities are increasingly being held accountable for the retention and degree completion of their students, understanding these enrollment patterns and designing programs and

* Defined by the National Center for Education Statistics as: "A beginning student who interrupted his or her enrollment in the first year with a break of more than four months (but less than four years) before re-enrolling."

policies that account for them will be an important institutional challenge in the years ahead.

- ◆ Nearly three-quarters of beginning undergraduate students in 1989-90 at public four-year institutions (73.2 percent) had received a degree or were enrolled toward one five years later, compared with 75.5 percent for all four-year institutions and 80.4 percent for private four-year institutions.
- ◆ At public four-year institutions, 11 percent of undergraduate students who began their education in 1989-90 left their original institution for more than four months but less than four years and then resumed their education, either at their original institution or at another institution. Of those students who returned to their original institution, just over half (50.6 percent) had received a degree or were enrolled toward a degree five years after their initial enrollment. This compares with 58.4 percent for all four-year institutions and 77.8 percent for private four-year institutions.
- ◆ At both public and private four-year institutions, factors associated with "stopping out" include low grade point average, delayed enrollment in postsecondary education, less direct contact with faculty and fellow students, increased employment, and educational attainment of the student's parents.²

Affirmative Action Developments

Debate over the use of affirmative action programs in college and university admissions and financial aid continues to loom large over public four-year institutions. While the battle over this issue rages in statehouses and courthouses and at the ballot box, it is increasingly surfacing in other venues. One is the halls of academia, as new scholarly studies on the effectiveness of affirmative action programs are being hailed as definitive evidence and decried as "spin" in the ongoing debate. Another is the federal regulatory process, where colleges and universities are now being warned about the use of standardized tests in admissions and aid decisions because of alleged racial/ethnic bias in the tests.

With vows by affirmative action foes to continue their state-by-state efforts to end racial/ethnic preferences in higher education, it is a virtual certainty that affirmative action will remain at the forefront of the higher education policy agenda for the foreseeable future. In such an environment, state colleges and universities are increasingly likely to reassess and even revise their admissions and aid policies. According to AASCU's 1998 State Issues Survey, 28 percent of the presi-

dents and chancellors sampled (representing 14 states) indicated that they were reviewing and/or revising their admissions policies in light of judicial or electoral developments in their state or other states. In light of the developments summarized below, that percentage may climb in 1999.

State Developments

Twelve states considered legislation to curb or eliminate affirmative action programs in 1998, with none passing. States considering similar measures in 1999 include Michigan, Missouri, South Carolina, and Tennessee.³

A number of states have seen attempts at voter-based initiatives related to affirmative action, but most have failed to get the requisite support for ballot placement. The notable exception is Washington State, where voters approved

Initiative 200 (which bans the use of racial preferences in state hiring, contracts, and college admissions) in 1998. States that may attempt ballot measures in the near future include Colorado, Florida (see below), Michigan, Nebraska, Ohio, and Oregon.⁴

California—The state is continuing its implementation of Proposition 209, a 1996 measure that bans the use of racial preferences in state activities such as public college and university admissions. The measure has prompted new efforts by the state's colleges and universities to boost geographic and racial/ethnic diversity, including a new plan to grant admission to the University of California to the top four percent of graduates from each high school in the state. The plan is expected to increase UC enrollment by about 3,600 students systemwide when it takes effect in 2001, and it is estimated

that about one-fourth of the newly eligible students will be black or Hispanic.⁵

Michigan—The University of Michigan is currently preparing to defend itself against lawsuits filed by unsuccessful applicants to its undergraduate and law programs. The applicants, represented by the Washington-based Center for Individual Rights, claim that the University's use of racial preferences in its admissions policy (which awards bonus rating points to applicants from racial/ethnic minority groups) violates the 14th Amendment's Equal Protection Clause and the Civil Rights Act of 1964.⁶

Massachusetts—The University of Massachusetts at Amherst announced in March that it is changing its admissions policy to reduce the "plus" factor given to minority applicants. The change is seen as a response to a 1998 ruling from the U.S. Court of Appeals in the First Circuit, which struck down the minority admissions policy of an elite public high school in Boston (see below). The policy change will complicate the University's objective of increasing its minority enrollment to 20 percent, a benchmark set in 1997.⁷

Florida—The signature drive for an anti-affirmative action initiative is underway here, led by California businessman and University of California Regent Ward Connerly. The drive is opposed by Republican Gov. Jeb Bush, who is mobilizing GOP constituencies to keep the measure off the ballot, at least until 2002.⁸

Federal Developments

In May 1999, the U.S. Department of Education's Office for Civil Rights issued a draft memorandum of guidance to institutions of higher education regarding their use of standardized test scores in determining admissions eligibility, warning that:

"The use of any educational test which has a significant disparate impact on the members of any particular race, national origin, or sex is discriminatory, and a violation of Title VI and/or Title IX, respectively, unless it is educationally necessary and there is no practicable

alternative form of assessment which meets the education institution's needs and would have less of a disparate impact."

The guidelines, if adopted as drafted, could have a significant impact on state colleges and universities, many of which heavily weight standardized tests scores in making admissions decisions.⁹

Judicial Developments

Washington State—A federal trial judge here ruled that the principle of considering race in college and university admissions, as set forth in *Regents of the University of California vs. Bakke* is still valid as applied to the University of Washington School of Law. The judge also ruled, however, that the school's admissions program must be carefully examined to determine whether it is focused strictly on the objective of fostering diversity. The school is being sued by an unsuccessful white applicant who argues that her right to equal protection was violated by the school's differential admissions policy and that promoting diversity is not a sufficiently compelling state interest to justify such a policy. The case is currently being reviewed by the U.S. Court of Appeals for the Ninth Circuit.¹⁰

Massachusetts—In November 1998, the U.S. Court of Appeals for the First Circuit ruled that while the idea of race as a "plus" factor in admissions decisions is still constitutionally valid, the entrance criteria of an elite public high school in Boston relied too heavily on racial/ethnic preferences. In a 3-2 decision, the court ordered the school to abandon its policy and admit a white student who had been turned away. As a result, several colleges and universities in the First Circuit (Maine, Mass., N.H., R.I., P.R.) are re-examining their admissions policies, and the University of Massachusetts at Amherst has already announced changes in its policy (see above).¹¹

Conclusion

Enrollment patterns and trends lie at the heart of some of the most prevalent and controversial higher education policy issues—the push for greater accountability measurement by institutions, the movement from funding mechanisms based on input factors to those based on performance, and the call to

revisit or rebuke affirmative action, to name a few. Amid the discussion and debate, the enrollment picture at the nation's state colleges and universities is changing markedly. Increasing numbers of the oldest and youngest students are enrolling at these institutions, and enrollment of racial and ethnic minorities continues to grow. All of these groups bring different experiences and educational needs to the campus, needs that institutions must endeavor to meet while navigating the sometimes treacherous policy environment surrounding enrollment-related issues.

The combination of these factors indicates that for state colleges and universities, knowing exactly who their students are and what is happening to them is more than a research question. For a growing number of public institutions, it is a question of surviving or thriving in a new century.
