UNIVERSITY OF NEW HAMPSHIRE

Admissions Officer I
(Assistant Director of Admissions)

RESPONSIBILITIES: The University of New Hampshire seeks to hire two assistant directors of admissions. The assistant director must accurately and effectively represent the University to traditional and non-traditional prospective students, parents and college-bound students, and high school guidance counselors. She/he assists with the delivery of admission services to these groups, providing visitation and counseling services to prospective students, and serving in the recruitment and travel, travel and admission application review, territory management, correspondence and admitted student recruitment.

MINIMUM QUALIFICATIONS: Bachelor’s degree and one year of related experience in a counseling/advising position. The candidate must have a genuine interest in working with diverse student populations and be knowledgeable of the University’s work and the experience of an educational setting is preferred. Strong written and verbal communication skills are essential. Valid driver’s license and good driving record required. Salary: $23,893-

Columbia University Executive Director of the Center for Career Services

Columbia University in the City of New York began in 1754 and has evolved over more than two centuries. Today, Columbia is a major institution engaged in the advancement of knowledge through superior education and research. The University includes 15 schools with programs for undergraduate and professional degrees, and approximately 18,000 students and 10,000 faculty and staff members.

The Position: Columbia University seeks a professional in the field of career education to lead the Center for Career Services on the Morningside campus. The position reports to the Dean of Columbia College and works closely with the Director of the College’s senior administrative staff. In addition to serving students of the College, the Center serves other important constituencies including students from the School of General Studies, the School of Engineering and Applied Sciences, the Graduate School of Arts & Sciences, the School of the Arts, and the Graduate School of Architecture. Position responsibilities include the overall coordination and delivery of the activities of the Center for Career Services, including the supervision of six Managers in the administration of staff members; oversight of the ongoing planning and evaluation of recruitment programs; oversight of ongoing career development programming and alumni networks; oversight of the implementation of federal guidelines for work-study programs; oversight of the experimental programs and the Columbia Student Enterprise agencies; oversight of Graduate Student Programming and financial assistance services; preparation and management of the Center’s budget; and reporting to various schools and administrative divisions.

Qualifications: The successful candidates will have at least five years of experience in career development, either at a career center or institution of higher education, or within an appropriate field in industry. A bachelor’s degree, or the equivalent combination of education and experience, is required. Advanced degree preferred. Minimum of five years of substantial related experience in a University environment or in a corporate or higher education human resources setting, particularly college relations and recruiting, required. Demonstrated excellent oral and written communication, presentation, interpersonal and strong management and leadership skills required. Experience with information systems, technology and budget management and administration required.

Salary: Negotiable and commensurate with education and experience.

Application and Nomination: Review of applications will begin on April 5, 1999 and continue until the position is filled. Nominations of individuals to fill this position may be made to the Spelman & Johnson Group as indicated below. Applications for this position should include a copy of your resume and cover letter and should be sent with the names and telephone numbers of three references to:

Washington State University

NOTICE OF VACANCY

ASSISTANT PROFESSOR

COLLEGE OF EDUCATION

DEPARTMENT OF EDUCATIONAL LEADERSHIP AND COUNSELING PSYCHOLOGY

Washington State University

Vancouver

Title: ASSISTANT PROFESSOR

Salary: Competitive, commensurate with experience

Position: Permanent full-time, tenure-track

Effective Date: August, 1999

Position: The Department of Educational Leadership and Counseling Psychology is seeking a qualified applicant for a permanent full-time, tenure-track faculty position in Educational Leadership at the Vancouver, Washington campus.

WSU Vancouver: The WSU Vancouver campus is located in southwest Washington state just across the Columbia River from Portland, Oregon. A growing branch campus of the Washington State University system, WSU Vancouver expects to double its student body (currently 1,514 students) and faculty in the next six years.

Duties and Responsibilities: The Department of Educational Leadership and Counseling Psychology is seeking an energetic faculty member who can comfortably collaborate with colleagues across the College of Education, with professional colleagues from school districts and professional associations, and with community members. The person selected must be committed to preparation of school leaders for the challenges of the 21st century. In addition, this person must be prepared to:

1. Teach graduate courses in educational leadership and related areas (see preferred areas below),
2. Conduct research, write proposals for extramural funding, and publish in areas of specialization,
3. Advise and direct graduate student research at the masters and doctoral level,
4. Develop collaborative relationships with school districts, professional associations, and government agencies,
5. Supervise administrative interns in the State of Washington.

Required Qualifications:
1. Earned doctorate at time of employment in Educational Leadership or a related area
2. Evidence of teaching effectiveness at post-secondary level
3. Evidence of successful professional experience in the field of educational leadership, e.g., public school administrative experience
4. Specialized knowledge and experience to teach at least two of the following: educational leadership, policy formation, educational values and ethics, educational research, measurement and assessment of learning
5. Evidence of scholarly productivity
6. Evidence of experience in diversity education

Application and screening procedures: Review of applications will begin March 2, 1999 and continue until the position is filled. Both nominations and applications are encouraged. Persons wishing to apply for this position should send a letter of application addressing the qualifications criteria; three current letters of recommendation; and a current comprehensive vita including the names, addresses, and phone numbers of at least three additional references. Nominations and applications should be sent to:

Dr. Gay Selby, Chair
Washington State University Vancouver
14204 NE Salmon Creek Ave
Vancouver WA 98686
Phone: (360) 546-6660

Washington State University is an Equal Opportunity/Affirmative Action Employer and Educator. Women, Minorities, Disabled Persons, and Veterans are Encouraged to Apply.
President

THE STATE UNIVERSITY OF NEW YORK (SUNY) COLLEGE OF TECHNOLOGY AT DELHI, A RURAL, RESIDENTIAL COLLEGE IN THE CATSKILL MOUNTAINS, INVITES APPLICATIONS AND NOMINATIONS FOR THE POSITION OF PRESIDENT.

The President will lead a growing institution that is entering one of the most dynamic periods in its history. A member of SUNY's University Colleges of Technology (UCT) consortium, Delhi College is embarking on an era distinguished by this new collaborative working relationship and mission change approval which gives Delhi baccalaureate degree granting authority.

The college has earned state and national reputations for its academic programs in Hospitality Management, Veterinary Science Technology, Golf/Turf Management, and Construction and the Applied Technologies. Delhi offers more than 40 academic programs leading to baccalaureate and associate degrees and certificates. Included are emphases in: Business; Humanities; Social Sciences and Individual Studies; Nursing and Allied Health; and Science, Mathematics and Engineering Technologies.

As a member of the UCT, Delhi is linked with SUNY campuses at Alfred, Canton, Cobleskill and Morrisville in a 12,000-student consortium that serves statewide educational and work force needs.

CHALLENGES AND OPPORTUNITIES

The President is the educational leader and chief executive officer of the college. The president works closely with the College Council, senior administrative staff, UCT executive director, UCT Council of Presidents, and SUNY leaders to advance the State University; the UCT consortium and Delhi College. In addition to overseeing the SUNY and UCT priorities previously outlined, the president is expected to:

- Lead Delhi College through a critical period of mission, organizational and academic change and expansion.
- Position Delhi College and secure the resources required to make the college a leader in technical education.
- Advance the use of technology in teaching, learning, administration and management.
- Establish baccalaureate degrees as the priority for new program development.
- Direct the development of new academic programs by reallocating resources and identifying other funding opportunities.
- Oversee fiscal management and planning for the college's $28.2 million all-funds budget.
- Serve as the chief advancement officer for the institution by facilitating enrollment growth and resource generation.
- Lead the expansion of a student-centered, residential and learning environment.
- Foster community and industry partnerships.

QUALIFICATIONS

- An earned doctorate from an accredited institution
- Teaching experience at the college level.
- Three years administrative experience at a residential, higher education institution.
- Excellent administrative and leadership abilities.
- Proven fiscal management and organizational skills.
- Highly effective communication skills.
- Strong background in technical education.
- Strong commitment to diversity.

APPLICATION PROCESS

Applicants should submit a brief (three-to-five page) letter of application how they might address the identified challenges and opportunities and how they meet the qualifications. In addition, applicants should submit a current resume that includes the names, addresses, and business and home telephone numbers of at least five professional references. Additional references may be requested.

To maximize consideration, applications should be submitted by March 26, 1999. All inquiries and applications will be held in strict confidence.

APPLICATIONS SHOULD BE SUBMITTED TO:
Mr. Benjamin Nesbitt, Chair, Presidential Search Committee
Delhi College
Delhi, New York 13753
Phone: 607-746-4495

Delhi College has a strong commitment to the principles of Affirmative Action and cultural diversity. The College welcomes responses from women, minorities, veterans and individuals with disabling conditions.

For more information, visit Delhi College's web site at www.delhi.edu.
ANTICIPATED FACULTY OPENINGS

Western Nebraska Community College, a comprehensive community college, is located in the panhandle of Nebraska with centers in Scottsbluff, Sidney, and Alliance. The College was founded in 1926. STETSON UNIVERSITY

FACULTY DIVERSITY INITIATIVE

The students, faculty, administration, and trustees of Stetson University have joined in a affirmation of the importance of diversity to its curriculum and campus community. Building on long-standing commitments to excellence in education, the University has recently undergone a thorough self-study and endorsed a comprehensive Diversity Initiative. An important priority under this initiative is to hire five new faculty members, including two in the 1999-2000 academic year, over the next few years.

We seek applications from (or nominations of) outstanding teachers with strong credentials who can assist in the implementation of our diversity goals. While we have identified particular needs in African Studies (especially African and African-American history, biology, communication studies or mass communication, computer science, digital arts), we welcome candidates in other disciplines as well. We prefer candidates with the Ph.D. in hand, but we will consider ABD candidates for Divestiture Initiatives, which will include significant course reductions to support completion of the dissertation.

Stetson University is located in central Florida, near Orlando and Dayton Beach. The University enrolls approximately 5,000 undergraduates, emphasizes undergraduate teaching, and offers support for scholarly research and professional development. It is broadly committed to ethical inquiry, social and environmental responsibility, and international programs.

Candeciates should submit a letter, which addresses directly their commitment to diversity in teaching, scholarship, and service to a liberal arts setting, and a current c.v. Applications and nominations should be forwarded to Dr. Leonard Nance, Associate Dean of the College of Arts and Sciences, Stetson University, 421 N. Woodland Blvd., DeLand, FL 32740. Screening of applications will begin March 1 and will continue until the positions are filled. Individuals may request and receive additional information about Stetson University or its Diversity Initiative in care of the Dean at the university, or phone 904.822.7515.

Stetson University is an equal opportunity employer, affirmative action/equal opportunity employer, and is committed to diversity and strongly encourages the applications of women and candidates from historically underrepresented groups.

http://www.stetson.edu
Palo Alto College, one of four colleges in the Alamo Community College District and a Hispanic Serving Institution, is situated in a diverse urban community within the nation's tenth largest city. A comprehensive community college with an enrollment of 7,300, Palo Alto College has strong programs in liberal arts and applied sciences and maintains transfer articulation agreements with senior colleges/universities in Texas and outside of Texas. The College has established a national reputation in transfer programs, learning resource technology, and is the site of a nationally recognized Nazarotorium which hosts local, state, and national swimming and diving competitive meets. DIRECTOR,
EL CENTRO CHICANO

The University of Southern California (USC) is searching for a director of El Centro Chicano. El Centro Chicano is a program within the Division of Student Affairs focused on helping Chicano/Mexican American/Latino and other students achieve academic success, participate in co-curricular programs and engage in community service activities. The director provides overall leadership and management of El Centro while working closely with students, student organizations, faculty, staff, the parents’ council and the programs advisory board to develop programs that help students maximize their educational experiences at USC.

The ideal candidate will be bilingual; a leader with vision, creativity and a commitment to excellence. He/she must have experience in university-level student academic affairs program planning and administration; a strong interest in helping Chicano/Mexican American/Latino students be successful in a diverse educational community. The director must possess strong interpersonal, writing and oral communication skills. Competitive candidates will have earned a Master’s degree and have at least 7 years of experience. An earned doctorate in Education, Social Sciences, Humanities or Physical Sciences is preferred.

USC offers a full benefits package. Salary range $45,000 - $55,000 annually. Send resume and salary history, referencing requisition #5012 to: Employee Recruitment Services, USC, 3555 S. Figueroa St., Los Angeles, CA 90089-1260; e-mail: upcomo@usc.edu; fax: (213) 740-8784. AA/EEO.

EMPowerment of Hispanics through INFORMATION LITERACY

Information-seeking skills will be increasingly important to career success and survival. It should concern us all, then, that while there are many notable Hispanic librarians and information professionals, their numbers are not equitable. That has a negative impact on the profession and on the information available to and accessed by Hispanics nationwide.

Most librarians are educated in graduate programs accredited by the American Library Association (ALA). Only 19 percent of more than 5,000 new librarians who graduated in 1996-97 (the latest data available) were of Hispanic heritage, and only 24 percent of the faculty teaching them. Only five ALA schools that year graduated more than five Hispanic students—North Texas, Pratt, San Jose, California, South Florida, and Texas Austin.

Aware of underrepresentation, the ALA, at the behest of its then-executive director, Elizabeth Martinez, initiated the SPECTRUM Scholar program, which resulted in the recruitment of 17 new Hispanic heritage students nationwide.

Efforts have been made, too, to stimulate interest in serving Hispanic communities.

I committed group of librarians created REFORMA—theNational Association to Promote Library Services to the Spanish Speaking—active for 26 years. [REFORMA can be reached at http://latino.santana.edu/library/reforma/index.htm] The group is said to serve as a touchstone for Latinos in the field. Through its scholarship program, newsletter, and Web page, REFORMA provides mentoring, fosters collegiality, and focuses attention on relevant issues.

Through its annual Pura Beltrán (Children's Book Award), REFORMA honors authors and illustrators who portray and affirm the authentic cultural experience of Latino children. Its librarian of the year award recognizes outstanding professionals such as Camila Alire, the first Hispanic dean of an Association of Research Libraries institution.

REFORMA members share a widespread perception that language can be an obstacle for those who have not assimilated to mainstream culture by acquiring English proficiency. A further obstacle emerges: the development of telecommunication and computer technologies that are now an essential part of gaining access to information.

A major U.S. government report, Falling Through the Net, revealed a country clearly divided into information "haves" and "have-nots." The dividing line was often race or ethnicity. A second report, Falling Through the Net II: New Data on the Digital Divide, confirmed that the division remains and the differences between racial and ethnic groups have actually increased. White non-Hispanics (40.8 percent) are twice as likely as Hispanics (94 percent) to own a computer; more than twice as likely to have online access (Whites 21.2 percent; Hispanics 8 percent).

Several companies are beginning to recognize the importance of Hispanics as a growth market. Yahoo!, perhaps the most well-known online search engine, now has an all-Spanish version (http://www.espanol.yahoo.com). Two other excellent Web sites are Venezola Analitica (http://www.analitica.com) and Mundo Latino (http://www.mundolatino.org/latinas.com). Both provide wonderful entry points into the world of the internet through features in Spanish that review software and Web pages, provide HTML tutorials and, give links to Spanish-language sites.

The increasing "net presence" of Latinos is hearthing, but it must be remembered that the newer technologies will be used by Hispanics as a whole only if they are readily available in a public venue and only if library/information professionals provide the necessary training in information literacy—a significant reason why underrepresentation of Latinos in the profession is such a problem. The nation's libraries have a long way to go in making their staffs reflect the growing Hispanic population.

I work in central Florida, which has more than 26,000 seasonal workers of Hispanic heritage. Our faculty established a Task Force on Library Services to Farmworkers within the Tampa Bay Library Consortium. It's work formed the basis for a federal grant to fund a week-long institute on services to farmworkers.

A new ongoing course, Spanish for Librarians and Information Professionals, enables non-Spanish-speaking librarians to establish rapport with Spanish-speaking clientele through the use of simple conversational Spanish, as well as the specialized terminology of the library. The instructor has also edited a catalog of all Spanish-language books in the Tampa-Hillsborough County Public Library in collaboration with library staff, for distribution through west central Florida.

The school is this month co-sponsoring the 4th National Institute for Hispanic Library Education, "Library Services to Youth of Hispanic Heritage." The focus on youth—the potential librarians and information specialists who can empower their communities with unfiltered access to information—represents our best hope for the future. While certain states and metropolitan areas are better situated to make immediate gains in this area than others, that is quickly changing, as Hispanics become an ever-larger part of the U.S. population. Information access will play a key role in their lives.

How well positioned they are to make the most of their educational and career opportunities depends on how well we prepare the way today.
"You can recruit Hispanics, but if they're not represented in the faculty or administration, what message are you sending?"

Data-Driven Change

BY GUSTAVO A. MELLANDER

This year for the first time in the history of this country, there are more Hispanic children under the age of 12 than there are Black children. Demographic trends are clear. Hispanic children will be the dominant minority in our schools in the 21st century.

All of this is in the face of a grim reality. An alarming number of Hispanic youngsters do not graduate from high school. The dropout rate is as high as 40 percent in some urban areas. Chicanos in particular have a low high school graduation rate. But many Puerto Ricans and recently arrived Central Americans do not finish high school either.

Many who do manage to finish and go on to college have difficulty adjusting to college life and drop out in frightening numbers. There is therefore a potential for a growing number of Hispanic students to curtail their higher education expectations and, as a result, inhibit their socioeconomic advancement.

What can colleges do to help?

Some have suggested that the teachers they train must be introduced to these facts—the better to meet this growing problem. They believe that greater proficiency in data collection and its interpretation can lay the foundation for change.

To address these and other issues, a group of federally-funded technical assistance organizations co-sponsored “Data Strategies Institute II,” the second in a series of regional professional development gatherings for technical assistance providers and district teams committed to improving education.

One of its goals is to encourage colleges to train future teachers to use data to drive educational decision-making and equity reform. Participants came from across New England, New York, and the U.S. Virgin Islands.

One session addressed the potential contributions of colleges of education to this effort. It is generally agreed that the education profession is one where data usage is not integral to daily practice.

Part of the problem is that colleges do not generally prepare future administrators, counselors, and teachers to use data—or even to “consider” using data as a meaningful strategy—very effectively. Nor do most programs model the use of data so that teacher educators, program administrators, and students gain an “experiential” appreciation of the benefits of using data.

For example, pre-service programs could easily (but do not ordinarily) gather data on their (pre-service) students: aspirations, learning opportunities, and learning results. If those data were collected and studied, they could guide continuous improvement efforts relevant to curriculum, pedagogy, and faculty development.

Similarly, few schools or colleges model the use of data to guide their improvement efforts. This not only impairs school improvement efforts but also makes the recognition of local inequities improbable, because without viewing disaggregated data showing correlations between race, gender, and learning opportunities (tracking discipline, testing participation) and learning results (grades, test scores, graduation rates), it is easy to believe that things “ain’t broke” and don’t need fixing.

For these reasons, the Institute participants agreed that it would be very valuable for colleges and K-12 educators and teacher educators to work together to strengthen pre-service and K-12 educators’ use of data.

Panelists and participants recommended the following strategies:

Administrators, counselor, and teacher preparation programs could offer graduate/undergraduate courses in conducting action research to prepare educators to use data for continuous school improvement.

Teacher educators could provide technical assistance to schools to assist them in analyzing data to identify needed improvements in pedagogy, curriculum, equitable expectations of students, and the like.

Faculty and pre-service program students could join K-12 educators in conducting research focused on generating insights to inform local school improvement priorities.

Universities are able to publish books written by classroom teachers who wish to share their insights, e.g., about data usage to inform their classroom practice.

The online journal on professional development school practices From the Inside Perspectives on PDS Work accessed at http://aents.edupeds.journal is another vehicle to distribute practical ways that teacher educators and K-12 educators can collaborate regarding data usage.

Professional Development Schools

They also pointed out that K-12 partnerships known as professional development schools (or PDSs) can help.

PDSs are long-term partnerships between a teacher education program and a school or district.

The main goals of a PDS are, first and foremost, to raise K-12 student learning results by improving teacher preparation and improving teacher professional development.

Professors often encourage teacher educators, K-12 teachers, and pre-service students to conduct action research and to gather and use data related to school improvement goals for guiding future improvement efforts.

Finally, recently emerging national efforts to evaluate and accredit beginning teachers and teacher education programs, e.g., INTASC and NCATE, are challenging pre-service programs to gather and examine data on their students' results. Participants and panelists agreed that future institutions on data strategies should include efforts to involve teacher educators and to encourage them to partner with schools in strengthening local data usage at both the K-12 and teacher pre-service levels.

From these and other reform movements, it is hoped that the quality of education provided Hispanics will improve.

Dr. Mellander is a professor at George Mason University.
Letter from the Publisher

Dear Colleagues:

The community college just might be the most successful idea ever to take root in the field of higher education. And while it is not all things to all people, it can be, and it is quite a few things to many people.

The welcome it extends comes in many languages—the language of the immigrant, of the dropout longing to get back on track, the would-be entrepreneur, the retiree—anyone eager to engage a new world of ideas or anxious to embrace a new skill.

Nowadays, it often provides a “seamless transfer” of students to four-year institutions, and a seamless transfer, too, of downsized workers to industries with a good future, as it provides, in partnership with government and business, the training that once took place on the job, paid for out of corporate budgets.

Led by a board required by statute to fairly represent its potential constituents, staffed by people with flexibility, imagination, and a gift for local collaboration, the community college has become one of the most diversely populated institutions in the United States.

Hispanic Outlook is pleased to pay tribute to this national treasure—the community college—and to all who work so hard and so well within it.

¡Felicitaciones!

José López-Isa

Hispanic Stats at Two-Year Colleges: No Surprises!

BY MARI CARMEN SARRACENT

In taking a look at Hispanic enrollment and faculty in community colleges, a few things stand out—some not too surprising. According to figures compiled by the United States Department of Education, those schools that enroll the most Hispanic students nationwide are concentrated in areas where a large percentage of Latinos reside, such as New York, California, Florida, Texas, and Chicago.

Miami-Dade Community College in the state of Florida tops the list on both counts, boasting a 29,929 Hispanic student enrollment during the Fall 1996 semester, of which women account for 62.9 percent. Out of the top 50 two-year colleges enrolling the most Hispanics, Miami-Dade employed the most Hispanic faculty—863. El Paso Community College ranked second with 523.

Interestingly, one trend in Hispanic student enrollment in these schools is that the number of Hispanic women surpasses that of Hispanic males—in several institutions nearly doubling that of men students. At East Los Angeles College, Hispanic women students accounted for 7,031 compared to 4,604 males. Another example is at CUNY-Hos+tos Community College where 1,466 Latinos and 2,961 Latinas were enrolled in Fall 1996.

Where the number of Hispanic faculty is concerned, there still is plenty of room for improvement, even in areas that can be considered Latino hubs. In the Houston Community College System, Hispanic faculty represent 6.7 percent of the total 2,391. In many of the CUNY institutions in New York City, Hispanics account for less than 10 percent of total faculty. On the other hand, schools such as El Paso Community College, CUNY-Hostos, and Laredo Community College show impressive percentages—42.1 percent, 15.5 percent, and 39.9 percent, respectively.

Latinas also have made strides in academia, catching up to their male counterparts. At Southwestern College, City Colleges of Chicago-Harry S Truman College, Broward Community College, Chaffey Community College, Albuquerque Technical Vocational Institute, and Long Beach City College, for example, Hispanic male and female faculty are neck and neck. Also noteworthy is that in other two-year institutions, such as Valencia Community College, CUNY-La Guardia Community College, and El Camino College, Hispanic women have outnumbered Hispanic males.

The following charts from the U.S. Department of Education reflect Hispanic enrollment and Hispanic faculty at the 50 two-year institutions that enroll the most Hispanics.

Latina Community College Presidents

BY Michelle Adam

Community colleges are a phenomenon of the 20th century. They act as doorways to higher education and, as one of their presidents told HO, as “safety nets.” Because the public colleges accept all students and serve the needs of local communities and businesses, they often attract first-generation students. They also draw a large portion of minority students—50 percent. About half of these are Latino, according to the American Association of Community Colleges.

With so many first-time and minority students attending community colleges, it would seem likely that their CEOs would mirror their diversity. This is not the case. Although progress has been made, and extremely slowly, only 53 of approximately 1,200 community colleges are served by Hispanic presidents and CEOs, according to a 1997 report by the American Council on Education. Seventeen of these 53 are Latinas, an increase of five since 1986.

The Hispanic Outlook—in what is becoming a tradition—has selected and interviewed five Latinas with recent experience as presidents of community colleges. Their lives, including their successes and struggles, are presented here. If we were to summarize some similarities that prevailed among most of them, they would be the following: many attended all women’s colleges; many say they were lured because of their “open door” and collaborative approach to administration; all of them experienced discrimination, in one form or another. They knew they had to be twice as good to make up for an often unspoken belief that women, and especially Latinas, are less qualified than others to be effective leaders.

SYLVIA RAMOS

Dr. Sylvia Ramos could be described in a single word: determined. She was the first woman president of Latino origin to be at the helm of the Houston Community College System, and has now been president of its southeast campus for seven years.

“I want to be able to provide unique learning opportunities,” said Ramos. “There are so many underrepresented people of color. I do well setting up successful environments for all ages and types.”

“I knew I wanted to be president of something,” said Ramos. Her method: “I learned to keep focused. Winning is everything.”

This Mexican American Texana prides herself on being a southern belle at times, and at other times a Latina. It’s all about adapting appropriately to each situation, maneuvering like a shrewd businesswoman to get what she wants. As an introvert and loner by nature, she’s learned to do so by watching others carefully, learning the tricks of the trade. “I did all the things right. I knew the politics. I knew where the power points were,” she explained.

From the beginning, Ramos watched the ease with which her brothers walked in the world, taking naps while she helped her mother clean. She watched the way wealthy Anglos ran their lives while she cared for their children. “I wanted what they had in a big way,” said Ramos. And while many other Latina girls were out with their friends, or talking for hours over the phone, her mother insisted she work hard and become something more.

“I watched to see who the movers were, and they were men,” said Ramos. “I was very attracted to the way men worked.”

Since fourth grade, Ramos knew she would be president of something. Exactly what, she didn’t know.

Ramos began her career as an elementary school teacher in Victoria, Texas, but left the school after winning a race discrimination lawsuit against it. Her greater career opportunity presented itself when she began teaching adult education classes in Houston at what soon became part of the newly forming Houston Community College System of 1973.

It was three years later that she decided—within a few hours...
time—to convince the new executive vice president of the college to hire her as a campus administrator. Her master's degree in administration made her move possible. After that, Ramos served as dean until 1991, and then as president of Southeast College of the Houston Community College System.

"I really feel I have contributed a lot to this community," said Ramos, who was named "Person of the Year" during the local Fiestas Patrias. "It's so hard to win the respect of your own people," she said.

For Ramos, serving as a community college president is about bringing courses and educational opportunities to the community. It's also about empowering those, like herself, who might not have had educational opportunities, either as leaders or as students.

"I want to be able to provide unique learning opportunities," said Ramos. "There are so many underrepresented people of color. I do well setting up successful environments for all ages and types."

As a Latina, Ramos brings empathy and good coaching abilities to her role as president. She describes herself as a strong matriarch, grounded and capable of producing the kind of change necessary to build a more inclusive educational system. And as a role model, if there's one thing she's learned, it's that you can make things happen if you stay focused and plan. Think of yourself as a puzzle piece," she said. "You can take all the pieces and make it happen. You are the creator of your own life."

VERA MARTINEZ

Students often spend two to four years of their lives on a campus without ever seeing or knowing their president. It's a closed-door policy.

Dr. Vera Martinez was a different kind of president when she ran Fullerton College in California from 1995 until recently. She made time to meet with student organizations and made herself available for students to visit. She recognized employees and built a new inclusive decision-making structure. She was the first president in twenty years that the employees working the midnight shift ever met. Martinez attended their 5:30 a.m. Christmas party because she wanted to actually meet the people who worked for her.

"I went out and mingled with everyone," said Martinez. "They were surprised to see me on campus.

"It's a different style of leadership," she explained. "I believe it has a lot to do with the fact that she is Latina, a woman, and a Latina, she likes people. As a woman, she considers it important to build relationships and effective teamwork in order to get things done.

"According to Martinez, the more democratic decision-making processes are slower, more cautious, and people like herself are demonstrating that this style of leadership really works. When she needed to upgrade technology for the school, she included those who worked directly with the equipment in the decision-making process. Her actions, which would seem logical, are often left out of administrative decision-making.

"There was that kind of openness, the feeling you weren't going to be shut down if you opened your mouth," said Martinez. "I was able to work toward creating community inclusivity...shared responsibility."

Martinez was recently promoted to vice chancellor of instructional services for the North Orange County Community College District. But her four years as president still echo in the lives of students and the community at large.

"She's inspired a lot of people," said MECHA president Teresa Vásquez. "It's about time we got into higher positions. MECHA held a reception for Martinez upon her arrival at her new post.

"Fullerton is like many of California's community colleges—a quarter of its students are Latino; more than a third of its surrounding communities are Latino; yet only a dozen or so faculties are Latino.

Martinez was selected as president specifically because students had protested for recognition of their diversity. A fresh leader was desperately needed to build community. As the first woman president, as well as the first Latina and person of color, Martinez brought along her experience at Fullerton's dean, as well as Santa Monica College's dean, building innovative curriculum and instruction. Although the community was very responsive to her arrival, the administration was concerned that she would cause too much change at Fullerton and focus only on the Latino population. The two former presidents, both Caucasian males, had held their positions for 17 and 30 years, respectively.

"It's an expectation that we will focus on minority students only," said Martinez. "I made a point of reaching out and welcoming all students.

"According to Martinez, if there's anything that being Latina does bring to the picture, it's the ability to recognize that there are a lot of different perspectives on any situation. It's given me a lot of skill and ability," said Martinez. There isn't one way [on] to solve a problem."

Martinez was raised on a California farm, where her parents owned a canny. Her father wanted her to become a bookkeeper while her mother stressed education. Martinez followed her mothers advice, became a teacher, and then administrator, and hasn't regretted her decision since.

"To get out of a situation, to help the country, to create a better world—the key is education," said Martinez. And community colleges are important, she said, because they are "the safety net of the educational system."

Community college offers Martinez a transition point into what she described as "this unknown outside world." "It made it possible for me to experience success in college. It's like a neighbor- bood educational center."

Martinez created a writing center for students at Fullerton, and focused on hiring faculty who were sensitized to the needs of a diverse student population. She hopes, if having served as president, that she has opened doors to a more harmonious and enriched global community on campus.

She notes the difference she makes in students who reflect pride back at her with their renewed belief that if she can make it, then they can too. "It's just realizing that we don't need to be on the edges and the shadows," says Martinez. The fact that I have that position makes the possibility real.

VICTORIA MUÑOZ RICHARD

Dr. Victoria Muñoz Richard: vitae is twelve pages long, scan the pages, and you'll see she's taught ballet, written screenplays, worked as an interpreter and as a Web designer. Of course, she's also spent approximately 25 years as a teacher and a college administrator.

Richard is anything but ordinary when it comes to community college presidents. What exemplifies
and I firmly believe in what the board wants for its college,” she said.

When Richart describes her childhood, it sounds like a fairy tale. She was raised in the theater in Mexico City, her father a novelist and founder, and director of a classical theater, and her mother a costume designer. She followed her mother around looking for costumes and was part of her father’s critique team for his novels. At age 12, Richart had her first acting debut and attended French schools.

“I thought I’d become a novelist and actress,” she said.

Fate had a different plan. Though she married a Texan who lived in Mexico City but eventually brought Richart to this country, she learned English, received a bachelor’s degree in comparative literature in Texas, and then when she and her husband moved to Los Angeles, she taught bilingual education.

“The taste of being in front of a class was intoxicating,” said Richart. “I never thought I’d go into administration at all.”

Richart did move into administration, though, when she became a coordinator for programs for the disabled in the LA district. She learned that teaching and administration were one and the same, in a very obvious way.

“An administrator is someone who inspires when she works to achieve different things,” she said. “A teacher inspires a student to achieve a different level of knowledge.”

Richart was able to prove her abilities as an administrator, as someone who “likes setting out a goal and objective and achieving it. But it didn’t happen without some obvious examples of discrimination toward her as a Mexican woman.”

The man who hired her as coordinator for programs for the disabled admitted that he did so because he wanted “someone to control.”

He told me that because I didn’t turn out to be that way, said Richart. “I’ve never shed away from a good fight. He was in shock.”

Richart learned to fight for her rights as a woman in Mexico City, where the culture also expects her to be submissive. “I was amongst the few who said, ‘Wait a minute. I’m not going to be submissive.’”

Instead of taking on the attitude of oppression, Richart just says, “you learn more about me, and I’ll tolerate you.”

As president, she has the opportunity to hire women and minorities and build a campus with more adequate representation. But there have been many women, Latina women who have not responded to her offers to apply. Some women never consider themselves qualified enough, even though, upon looking at their resumes, Richart said they are more than qualified.

“Part of my speech to women is that we tend not to jump on opportunities. We belittle ourselves,” said Richart.

We live in a time, however, when women, and specifically Latina women, have a lot to contribute to the community colleges, she said. “Women are well positioned for a newer, more collaborative style of management. Minority women in general have a unique contribution to the tapestry. We have learned to fight for our voice being heard, for us to be respected as members of the management team. That level of inner strength gives us the understanding and compassion for those who are coming into the community college who are not as privileged.”

Richart is proud and excited to be a part of building community colleges. She describes them as the “best invention of the 20th century.” It is the most noble door to higher education, where a lifetime of destructor learning is sparked.

“Community colleges transform lives,” said Richart. And now, as she prepares Cascadia for the 21st century, it’s hard not to believe she can make a difference in this remark-
But Romero believes her background has helped build the skills necessary to get the job done. "My experience is that I am a more creative problem-solver because of having grown up in a multicultural society," she said. She was raised in a multicultural community in New Mexico, where two-thirds of her class went on to college. Romero also believes that having gone to an all-women's college, as did many of the other women interviewed, prepared her to succeed without being consumed by constant gender distinctions.

"The expectation was that you will speak up - that you will succeed."

The College of the Siskiyous has a predominantly Caucasian student body, with only ten percent minority representation. One of Romero's goals has been to increase the minority student and faculty population. "We've increased the percentage of minority faculty significantly," said Romero.

She has brought more minority students to campus as well. "If we are preparing the students for a global workplace, we need to learn to work with a wide diversity of people," she said.

Romero has high expectations of minority students. She believes that we need to stop expecting less from women and minorities, and begin setting high standards that we all can dream about and reach.

We have to deliberate on the agenda to advance. We advance all individuals, which includes people of color.

Now that Romero's children have grown, she can set beyond her primary goal of taking care of them and providing them with opportunities. She can extend her work to all students who come to the college for a chance to learn and advance in the world.

ADRIANA BARRERA

For Adriana Barrera, going to college was breaking the family mold. Her brothers were expected to receive a degree in higher education, but her more old-fashioned father primarily wanted her to get married and have children. "So, as you can imagine," Barrera said, "I did not grow up wanting to be college president."

After completing high school in South Texas, however, Barrera did go on to college. She was the only Latina there. In graduate school, she was the only Latina as well, along with one Caucasian woman in her class. "I felt the burden of being a Hispanic and Latina," she said. "When I did my dissertation, I was surprised that there were none on Hispanic female leadership. Hispanic women were not expected to take leadership roles."

Barrera continued her education beyond what she had planned. Since her husband was getting his master's degree and she wanted to go along with him. It was after graduation that the president of Austin Community College asked her to be his assistant, based on the effective work she had done as grants officer at the college. "I said no several times. I didn't want to be the Hispanic female in the president's office. I didn't want to be window dressing," said Barrera.

Don Angel, the president, however, convinced her otherwise, and ultimately became the mentor who led her to a presidency.

He was instrumental in helping me see I could make a larger contribution. That I was selling myself short," said Barrera.

Two years after leaving the assistant's position in 1992, Barrera was chosen as the first woman to lead El Paso Community College. She came in during a tumultuous time after students protested against the more traditional leadership resulting in internal administrative struggles. As executive assistant to the president, she was a prime candidate for the job.

My approach was spending time in the institution, paying attention to the people, working with new administrators," said Barrera. She told others, "I need your help as much as you need leadership."

"I call it careful attention to the college family. A certain amount of nurturing took place, a lot of talk and listening," said Barrera.

Although she recently moved on to act as consultant to the college, her contribution was noticed. "It was helpful that they could see a woman who took time to listen, who incorporated their input, and helped them weave a new path for the college," said Barrera. With 90 percent of the campus made up of Mexican Americans, it was also effective that she was Latina.

I had a feeling I could make a difference - a dramatic change. We established a system of shared governance, a decision-making model based on institutional effectiveness," said Barrera. Their open-administration model, in which everyone has a voice in organizational operation, was recognized by the state of Texas as being the best in the state.

As one of the many other women presidents agreed, women seem to be prime candidates for this kind of up-and-coming method of governance. Women are much more open to that approach," she said. Barrera focused on bringing more diversity to faculty as well, attempting to mirror more adequately the student body. It wasn't as easy implementing change on this level. As Barrera sad, admits, the power structure is still very white male oriented.

The typical subtle assumptions were evident. When attending functions, Barrera was often considered secondary to any man she was with, with people assuming he was at the helm instead of she. Many times she's one of only a few women or a few minorities at presidential conferences. It takes men, she feels, much longer to warm up to her as president than it takes them to do so toward other men.

Despite these subtleties and the power struggles that come with the territory of leadership, Barrera believes there are few excuses today for young women and minorities not to receive an education and make a difference. It is through community colleges that first-generation students usually achieve an opportunity to learn, and "now there's no excuse not to do so. There's financial aid. There are possibilities and opportunities," said Barrera.

She's learned that you can make it, but you can't mind rolling up your sleeves and really working. She attributes her success to being willing to clean up a classroom at one point because it helped forward the ambitions of the college. Whatever ambitions you have, remember that you might be asked to do some thing that seems inappropriate to you. Do it and excel," said Barrera.

Sometimes, she admits, it's depressing to see so few Latinas in positions of power. The odds are against Hispanic women, who have to document everything in their lives to prove their worth.

But, she said, "I see more colleges opening up doors to women. Barrera's goal is to support this process. Part of my vision is one of empowerment and open doors to enhance the whole crowd and say, 'Let's come along.'"
Examining the list of top community colleges that grant degrees to Hispanic students yields few surprises. Many are located in Miami, New York City, Los Angeles, and El Paso and Laredo (Texas), where large numbers of Hispanics reside.

But unlike restaurants and real estate, where location, location, and location are considered the three keys to success, other factors—such as creation of a nurturing environment and offering marketable career programs and supportive services—play a major role in helping Hispanics gain their associate degrees. Here’s how a number of the top community colleges succeed with Hispanics.

Creating a Climate of Belonging at Miami-Dade Community College—with 2,993 Hispanics receiving associate degrees

Los Angeles and New York might have larger Hispanic populations, but even their community colleges can’t come close to Miami-Dade when it comes to granting associate degrees to Hispanics.

“The issue of retaining and graduating Hispanics rests on creating a climate where they have a sense of ownership and belonging,” asserts Dr. Eduardo J. Padrón, M-DCC president. Too many schools falter by trying a Band-Aid approach, such as offering remedial ESL or special tutoring for Hispanics, he says. The school’s entire program must appeal to Hispanics, he says. The school’s entire program must appeal to Hispanics, in his view, not just an annual celebration of Hispanic Heritage Month.

U.S. Department of Education data. Padrón notes that Hispanics compose about 40 percent of administration staff and more than half of support staff.

Too many community colleges lower standards to attract minorities, says Padrón, whereas “Miami-Dade Community College is setting high standards.”

More than 90 percent of Miami-Dade’s students transfer to four-year colleges.

Creating Marketable Job Programs at El Paso Community College—with 506 Hispanics receiving associate degrees

Though the country’s unemployment rate has dipped to 4.5 percent, El Paso’s unemployment, due to the NAFTA agreement and the closing of many manufacturing plants, has increased to 12.5 percent. "Preparing our workforce is the mission of El Paso Community College," explains Dr. Raul Ramirez, its provost for Institutional Development. Of the 20,000 students in accredited programs and 8,000 students in non-credit programs at El Paso Community College, 80 percent are Hispanic, near all of Mexican heritage.

To meet its mission, the college established the Institute for Economic and Workforce Development (HEWD), which specializes in training and retraining for emerging job markets. Students can take courses in 80 different manufacturing specialties, including plastic injection molding, a growing field. In this program, students take a full academic program of math and English classes in order to pass TASP, the Texas Assessment of Skills Performance. "We’ve established this program to raise their basic skills and literacy skills, help them get an associate degree, and then a job," says Ramirez.

Community colleges have in the past had a difficult time retaining Hispanic students. EPCC created the Retention Action Program known by the acronym RAP.

“We find that most of the time it’s not academic problems that lead to dropping out. It’s their life...
problems, said Dr. Ramirez, himself an El Paso native. About 30 percent of the students in IHEWD go to RAP for assistance in housing, referrals to social services, resume writing, health care, and coping with life.

What does it take to help an Hispanic student gain an associate degree? "We've discovered," says Ramirez, "that Hispanic students who come to community college are older and have different needs than traditional 18-year-old students. We have to meet their academic needs, their living and social needs, and combine this with a culturally sensitive environment. And then the degree must lead to meaningful employment."

Co-op Programs and a Diverse Student Body Help Latinos Succeed at La Guardia Community College—with 993 Hispanics receiving associate degrees

Fiorella H. La Guardia Community College, a school within the City University of New York (CUNY) system, is located in Long Island City, Queens, a borough whose population is nearly as international as that of the United Nations. Diversity and co-op programs are two keys to the college's Hispanic graduation rate.

Students feel comfortable here, not because it's a Hispanic college, but because it's a diverse college," explains George Sussman, La Guardia's vice president for academic affairs. Hispanic undergraduates are not a monolithic population, despite being the largest minority at 3 percent of the school's population, but consist of many Hispanic nationalities. It's an environment where every student can feel comfortable, and no one is really in the majority," he says.

Co-op programs contribute to La Guardia. Students during their two-year programs are required to perform a six-week and 12-week internship, connected with their future career. A special program, "Gateway to the Workplace," prepares students for issues they are likely to encounter during their internship. Since the most popular majors are computer science, travel and tourism, business administration, computer technology, human services, nursing and physical therapy, students serve internships at a computer firm, a welfare office, a travel business, and so on. Many Latinos who were academically mediocre in high school thrive during their internships. "Internships can help build a student's self-confidence," Sussman states.

More than 20,000 students attend La Guardia's adult and continuing education program, which offers a special English-language institute. Many Hispanic students study ESL, master the basics, and then apply for an associate degree. The bilingual education associate program also attracts a lot of Hispanics, who know there will be jobs teaching the 1.1 million students in New York City's public schools.

To help students make the transition to college, many of La Guardia's incoming students are clustered together, taking three or four common classes. Faculty members operate collaboratively, making connections between the ESL and business courses, for example. "Students build a sense of solidarity," said Sussman, "and their courses are linked."

Borough of Manhattan Community College Doesn't Wait for the Hispanic Community to Come to Its Door—with 52 Hispanics receiving associate degrees

Located on Chambers Street, near the World Trade Center and less than a mile from Wall Street, CUNY Borough of Manhattan Community College (BMCC) is not surrounded by Hispanic neighborhoods. That's what prompted Dr. Antonio Pérez, president of the school, to say, "We're not going to sit here and wait for students to come to us. We're going to reach out to them. The school has been successful. Hispanics constitute 32 percent of its 4,000 student body.

New York City high school students who pass the CUNY Writing Assessment test can now take college-level courses taught by BMCC faculty at six high schools located in minority neighborhoods. "We're already reaching 150 students and would like to increase that number," notes Dr. Pérez. BMCC is also ironing out details to teach courses at four-year schools such as City College of New York and Hunter College to accommodate students who live closer to those schools who want to take BMCC courses.

BMCC offers a free summer immersion program to entering first-year students to reduce their remediation needs. During break time, it offers winter immersion, which attracted 1,000 students in 1998, to assist students in passing the CUNY Writing Assessment Test.

Innovative programs are planned, such as a digital technology program. Courses in place are a respiratory therapy program, paramedic program, social work, allied health science, computer science, and liberal arts.

Dr. Pérez notes that his high school guidance counselor advised him to enter the Marines because the advisor did not think that Perez had the academic stuff to earn a college degree. With his doctorate in hand, Dr. Pérez vows that BMCC students...
will be treated with more respect and with higher expectations.

Providing Academic Skills and a Caring Atmosphere: Laredo Community College—with 399 Hispanics receiving associate degrees

Ninety-five percent of the 7,000 students in degree-granting courses at Laredo Community College in Laredo, Texas, are Hispanic, reflecting the population of this border town, explains Dr. Ramón H. Dovalina, the school’s president since 1995. Much of his attention has been focused on helping students gain the skills to pass TASP, the Texas Academic Skills Performance (TASP), a test of reading, writing, and mathematics abilities.

Serving Students’ Bilingual Needs: Hostos Community College—with 30” Hispanics receiving associate degrees

In 1990-91, 30% Hispanics earned associate degrees at Hostos Community College, located in Bronx, New York. The college also was lambasted by New York Mayor Giuliani because only 10 percent of its students passed the CLNY Writing Assessment Test. Due to the mayor’s rebuke and the onslaught of media attention, Dr. Santiago Hostos’ president, resigned, and an acting president, Dr. Dolores M. Fernández, a professor of Education at Hunter College from 1990-98, was appointed in March of last year.

Hostos has succeeded at reaching Hispanic students because of its “bilingual mission,” says Dr. Fernández; “there’s a commitment of staff to all students, and particularly to Latino students,” she says. Fernández notes that many professors have Ph.Ds from Harvard, Yale, and Princeton, and could teach elsewhere but are committed to reaching Hostos students. The Hostos student body is 70 percent Hispanic. The typical Hostos student is a 23-year-old female parent who is on public assistance. To ensure that students receive support, the school has intensive counseling programs in place and a daycare center on site. (Though there’s a waiting list, says its president. Because most students are juggling a part-time job, school, and parenthood, most take seven to eight semesters or nearly four years to graduate.

To upgrade the students’ academic performance, Dr. Fernández has introduced Hostos Renaissance, a program that aims to ensure that all students graduate from the school speaking two languages. Approval has been granted for a core Language and cognition course, which will emphasize dual language programs. Students who already are fluent in English will learn primarily in English but also take courses in Spanish/Spanish, speaking students will learn primarily in Spanish while mastering English. Dual languages “will enhance students’ job marketability,” replied Dr. Fernández. “if you work in a nursing home in New York, you’ll need to speak two languages.”

Hostos’ allied health program has been one of its most popular programs. Students can major in nursing, dental hygiene, radiology, or gerontology, or study to become medical lab technicians and LPNs. The nursing program has helped put Hostos on the map, but the program did not move ahead at the pace it should have;” Dr. Fernández says. She is beginning to strengthen that program as well.

Students are encouraged to attend special writing workshops to enable them to pass the CLNY Writing Assessment Test. Early results show progress. In 1998, 22 percent of the students passed the test; in 1999, 12 percent increase over the previous year, but still a long way from the ultimate goal. “We intend to make Hostos a school of excellence, to attract a bilingual student body, and attract more than 18 percent of our students from New York City high schools,” said the newly named president.
The past year has been a time of significant growth for the Rancho Santiago Community College District. One important change is the approval of a multi-college system for the district. The result is two distinct colleges where there had been but one. This new organizational structure is intended to allow the district to better serve the residents of rapidly growing Orange County, California.

With its new-found independence, Santiago Canyon College began offering students enrolled at its campus the full range of student services—such as financial aid, admissions and registration, academic advising—previously accessed through Santa Ana College.

To accommodate enrollment growth at the flagship institution, Santa Ana College, and to provide equitable support for both colleges, the Board of Trustees voted to move district operations from Santa Ana College to a new facility at 2333 Broadway (in Santa Ana). Adjacent to the Interstate 5 freeway, the new operations center is accessible and conveniently located to all district campuses and sites. There also is new leadership to advance the district into the next century.

At the helm is Dr. Edward Hernandez, Jr., former executive vice chancellor and president of Santa Ana College. The Board of Trustees appointed Hernandez chancellor of the Rancho Santiago Community College District in July of 1998. A graduate of Nova Southeastern University in Florida with a doctorate in community college administration, Hernandez joined the district in 1989 as vice chancellor for student affairs. By instituting such sweeping changes, the Rancho Santiago Community College District has found a winning formula for serving its growing community; and these efforts land the district and its two community colleges onto the *Hispanic Outlook* Honor Roll.

The mission of Rancho Santiago Community College District is to "respond to the educational needs of an ever-changing community and to provide programs and services that reflect..."
academic excellence." The district's two colleges are to "promote open access and celebrate the diversity of both its students and staff, as well as the community." A recent survey of Orange County residents conducted by UC-Irvine shows a high degree of satisfaction among residents. Education is a priority factor in this and in previous annual polls. "To sustain the good times and extend these benefits to all county residents is our greatest community challenge," says Dr. Hernandez. It's the aim of his administration, he says, to serve the community...the entire community.

Hernandez sees "community connections" as a most important mission of a successful district, and notes that "Every student comes to us with relationships to a family, to an employer, to a faith, to civic and social groups—which extend our connections to the wider community we serve. Three quarters of our students work at full- or part-time jobs, nearly half are parents, and their average age is 30. Numbers that suggest the many community connections that students bring to the learning environment."

"More than ever," he adds, "we rely on our community partners to plan for the future. It's an investment in improvement of the quality of life for Orange County residents."

Rancho Santiago Community College District comprises 195 square miles in central Orange County, an area with a population of about 700,000. Enrollment in district programs in September of 1998

toted 4,596 students, with 24,706 taking college credit or non-credit courses. Community service programs serve 2,000 residents who enroll in non-credit, fee-supported classes.

Enrollment has been growing at Santa Ana College since 1995, with an increase of more than 10,000 students. According to Julie Stark of the district's research and planning department, the year 2000 should bring a 44 percent increase in the number of area high school graduates, with that figure expected to increase 100 percent by the year 2011. Stark estimates that 29 percent of these high school graduates will enroll at SAC, requiring the school to create 245 new classrooms to accommodate the influx. Moving some administration offices out of the college into the new central administrative complex should help free up some much-needed space.

Although it includes one of the oldest community colleges in the state, Rancho Santiago Community College District might not be a familiar name. The district has undergone a number of name changes in the last 80 years—the length of time that Santa Ana College has been in existence. In 1915, Santa Ana Junior College opened its doors to 25 students as a department of Santa Ana High School. It was the second junior college established in Orange County. An earthquake damaged the Santa Ana High School building in 1933, prompting a move to North Main Street, where it remained until 1947. A 1945 bond issue paved the way for development of a 48-acre campus on the corner of 7th and Bristol Streets.

During the college's 40th anniversary year, 3,057 students enrolled in both day and evening classes. Ten years later, the college had doubled its enrollment to 6,062 students. In 1971, Santa Ana College officially separated from Santa Ana Unified School District to form the Rancho Santiago Community College District. In addition to serving Santa Ana, the district also serves Anaheim Hills, Garden Grove, Orange, and Villa Park.

The district's annual budget is $130 million. Today, the multi-college district includes Santa Ana College, Santiago Canyon College, the Business and Industry Services Center, Centennial Education Center, the Criminal Justice Training Center, Garden Grove Center, Marketplace Education Center, Orange Adult Learning Center, and the Regional Fire Training Center.

Santiago Canyon College grew on a plot of 30 acres purchased from the Irvine Company in 1978. The first permanent classroom building was opened at Santiago Canyon in 1985, when more than 2,500 students enrolled.

Hispanics make up 37 percent of the student population enrolled for credit and 49 percent of non-credit enrollments. That makes Hispanics the largest group in both categories. White/non-Hispanics account for 32 percent of the credit enrollments and 24 percent of the non-credit population, with Black/non-Hispanics making up three percent of the for-credit enrollments and two percent of the non-credit students. Asian/Pacific Islanders number 20 percent of the credit enrollments and 14 percent of non-credit students.

Of the 1,44 part-time faculty, 12 percent are Hispanic. Twelve percent of the full-time faculty are Hispanic. Each semester, approximately 2,000 courses are offered by the district's two colleges. Course work may lead to Associate of Arts than 150 transfer and employment completion in 75 occupational programs and delivery of classes the Televisio Consortium. Continuing education, non-credit and high school credit courses.

Eight businesses, including B/E Interpore, MD Pharmaceutical, PC Management contracted with the disdaining and education for their employees. Received training through partnerships and community colleges.

The new district operations center on a four-story, 55,000 square-foot built operations functions such as accc services, facility planning, human resources and research and planning. In addition, tenants such as the Hispanic Chamber of Commerce, as well as the

The Santa Ana College el Don Pacemaker Award from the Association Media Advisors for the seventh time was recognized as one of the top papers for excellence in editing, design.
Brooklyn Scholars Program

Honors Academy raises hopes and academic levels.

BY JEFF SIMMONS

Lisa Calvente was not always at the front of the class. Growing up in Brooklyn, N.Y., she spent much of her school days daydreaming or skipping class.

Education was not a priority. In fact, it didn't seem to be anywhere near the top of the list of her goals in life.

Until one afternoon, when she was chatting with a classmate while cutting class. The girl "gave me this two-hour lecture" about how she struggled to overcome the obstacles set before her, and the perceptions of peers and teachers that she wouldn't amount to much.

"She just wanted to prove to everyone that she's not a loser and that she could do this. She wanted to prove to everyone else who thought of her in a bad way that she could actually be someone," Calvente says. "I realized at that moment that her life mirrored my life. So I went back to class."

She pauses while remembering this life-defining moment, and adds succinctly, "And I did well."

Ever since that moment, Calvente has waged her own struggle to succeed in school. Her grade-point average inched upward, then jumped dramatically. She fashioned dreams of attending college, which previously had seemed as foreign as the countries she had since visited.

That drive has made her a star among stars. Calvente was chosen to receive a Mellon Minority Undergraduate Fellowship at Brooklyn College, a highly selective program designed to help students become scholars in the humanities and other fields. She now avoids dwelling on the past and looks beyond the moment to a vast future ahead.

Since I've been in the program, I've wanted to study more about myself, about my education, and she is not alone. The effort is part of the Honors Academy at Brooklyn College, which drew together seven honors programs three years ago. Three hundred students of Brooklyn's 15,000 student body are enrolled in the academy this year.

The Honors Academy provides more than funding for these students, and focuses some of its work on addressing the needs—and raising the hopes and academic levels—of minority students. When it opened its doors, the academy offered students of the commuter campus a place not just to study—there are computer labs and a classroom—but a place to lounge and to meet each other.

That might not seem like much, but the academy offers a chance for students to find a family of peers when many are often rushing off to part-time or full-time jobs. Many are older than the average college student and juggling more obligations that press into time needed to study and learn.

"The honors program allows them to get to know each other, to have smaller classes, special professors, special research opportunities, and special programs such as conferences and seminars in small group settings," says Brooklyn College President Vernon L. Latun.

"They are highly motivated students, with 3.5 averages or better, who have an interest in becoming professors or doctors or pursuing careers in areas the programs focus on, and usually these students have intellectual interests beyond just their vocational interest."

Adds Dr. Kenneth Bruffee, the director of the Honors Academy: "They get to know each other very well. They attend class together, they do projects together, hang out together."

The Mellon Fellowship is funded by the Andrew W. Mellon Foundation. Besides humanities, students can become scholars in anthropology, earth sciences, geology, physics and mathematics. Students apply during the latter half of their sophomore year, but
only a few are accepted.

Students must be African American, Hispanic, or Native American. Most of the 11 students now in the Mellons Fellowship program at Brooklyn are African American, and nearly all are women.

Just getting into a program like this is a boost to their ego," says Margarita Fernandez Olmos, the director of the Mellon Fellowship at Brooklyn. Olmos screens the applicants and guides them through the two years.

The program also requires students to achieve high grades and to submit essays and faculty recommendations. But the rewards are generous: the program dispenses financial assistance to cover most tuition costs—an estimated $3,000 per year—during a student's final two years. Participants also receive two $3,000 stipends to spend summers abroad studying.

"One of the things that Mellon offers them which is such a plum is summer stipends for research," Olmos says. "A lot of them use this for summer study programs abroad, where they are able to travel and have a whole new world open up to them."

Calvente, who is half Puerto Rican and half Vietnamese, spent her summers in Mexico, studying Spanish and the culture for three weeks, and then Cuba, where she continued her studies of the language and culture.

Such cultural saturation altered her outlook, even her style. Although I was in the program, I was still rough around the edges," Calvente says. "I was still very street-wise, even in the way I dressed and spoke. I didn't have a wide selection of vocabulary. I spoke slang to everyone."

Now, I've changed. I didn't want to share my ideas with people, I was afraid they would think it was a stupid idea, but now I am willing to take chances. There was gradual change, but I changed.

Olmos cites another student, David Colon, who took part in a professional conference in Mexico. He really started feeling he was involved in the academic process because he was able to see it from the inside," she says.

It helped me pass for school, so definitely the financial aspect was what hired me," says Colon, a 21-year-old Brooklyn native who graduated with a major in English and a minor in Spanish.

Colon, who also was swayed by the Mellons focus on the humanities, spent his second summer in Ecuador gaining a firm grasp of the language. I was semi-fluent," says Colon, whose parents were from Puerto Rico. "It was an issue of being immersed—constantly be there where no one speaks a word of English—to get the facility of speaking."

Like Calvente, Colon was awarded not just the Mellon Fellowship but a Ford Colloquium Scholarship at Brooklyn. He is now pursuing a Ph.D. in English at Stanford University.

Calvente now goes in search of applicants to aid recruitment efforts. Professors say they receive far fewer applications for the program from minorities than from non-minorities.

Currently, about 18 percent of the students are Asian background. 12 percent are African American or African-Caribbean, and three percent are Hispanic. Six to seven percent are women, and 5 percent are men. But he points out that those percentages reflect the college's student body at large.

Often the low numbers are a reflection of the upbringing of
there already knowing how smart they are. Whereas many students come to a school like Brooklyn College not knowing these things and having to learn them as they go along, replacing their background to some extent without losing touch with their roots and their sense of identity.”

The Mellon fellowship encourages them to continue their studies toward a Ph.D. and to try their hand at seeking a career in higher education—where countless studies have spotlighted the dearth of minority professors and other role models.

Olmos, who was born in New York City to parents of Puerto Rican descent, stepped into the role to “help the students along, since I had myself been helped by people in my career.”

“I was helped every step of the way by people in the field,” she says. “I was lucky in that I met a lot of generous people. Every place I went, somebody took an interest. Not everybody is as lucky. This was an opportunity to sort of give back.”

“The whole purpose of this is to get more African American and Latinos and Native Americans involved in higher education,” she says. “Their confidence level gets a boost the minute they get into a program like this. They start to feel successful at something.”

Adds President Latton: “I think it’s a historical problem that the pipeline has been very limited. The number of minorities going to college has not been as large as the minority population, and the ones graduating weren’t going on to get doctorates.”

Latton notes that Brooklyn College ranks among the top 20 colleges in the nation for students who graduate to pursue Ph.D.s. “We want to make it larger so that more students can participate in it, and we hope that the quality of the honors program will attract even better students to come to Brooklyn College,” he says.

Calvente, who is 22 years old, now dreams of taking a year off after this semester, to travel to Africa and Vietnam, to learn about the other half of her heritage. But her studies are far from over—a reflection of her two years in the program.

“It means a lot because I probably would have graduated without it, but I probably wouldn’t be where I am today,” she says. “It’s a historical problem that the pipeline has been very limited. The number of minorities going to college has not been as large as the minority population, and the ones graduating weren’t going on to get doctorates.”

Improving the FUTURE for Hispanic Americans

The Role of Community Colleges

Why are community colleges critical to the educational success of Hispanics? What can these colleges do to increase their commitment to Hispanics?

We can begin with the demographics. As many HO readers know, by the year 2050 Hispanics will be the largest minority group, comprising 25 percent of the total United States population. A further review of the data shows that currently a third of Hispanic Americans are under age 15. By the year 2050, census projections suggest that Hispanic students age 5 to 18 will represent 25 percent of the total school population.

The potential impact of these numbers is evident if we examine the state of Hispanic education today. Although the U.S. Hispanic socioeconomic picture has improved somewhat in the last 15 years, and many Hispanics have climbed the educational and career ladders, the overall educational attainment of Hispanics has been poor. This is the fastest growing minority group in America, and yet it has the lowest educational attainment when compared with every other racial/ethnic group. Hispanics have the lowest completion rates at the high school and college levels.

A look at completion rates for the bachelor's degree for individuals 25 years and older shows: Non-Hispanic Whites, 25.6 percent; Blacks, 15 percent; Hispanics, 10 percent. Hispanics have the lowest completion rates and the highest school dropout rates of any group. In short, Hispanic students are at risk.

The many factors contributing to this rather bleak picture are undoubtedly complicated and

"The American dream will succeed or fail in the 21st century in direct proportion to our commitment to educate every person in the United States of America."

President William Jefferson Clinton
intervened Socioeconomic factors, overt discriminatory practices and policies, socialization factors, and the educational system's deficiencies all play a role.

Some of these variables need to be addressed at the legislative level. Congress, the Executive Branch of government, state and local governments, and the private sector all need to be involved, motivated, and committed to changing the status quo. In order to stem the tide of the Hispanic students' early dropout rate, intervention in the educational system must be made at the preschool, elementary, and high school levels.

The research shows that not only do Hispanic American students have a higher dropout rate than does any other group in America, but they also tend to leave school earlier than other dropouts. In 1993, 42 percent of Hispanic dropouts had not completed 8th grade. Another eight percent left before completing 10th grade. Consequently, nearly 60 percent of Hispanic students who drop out of the educational system have less than a 10th grade education.

We must focus on how the educational system, particularly the community college can and should act to improve college retention and completion rates of Hispanics. My focus on higher education for Hispanics stems from the disparities between postsecondary Hispanic student enrollment and degree-completion and from the Hispanic American presence in the general population. There is a gap between enrollment-completion rates and the available pool of Hispanic high school graduates. The rationale for focusing on community colleges is based on data showing that in 1991 about half of all Hispanic Americans enrolled in postsecondary education were attending them.

Community colleges have the ability to provide two years of excellent education that can lead to transfer to a four year institution and a bachelor's degree. Additionally, community colleges offer some students certifications and special training that can lead them to a place in the workforce.

Educational attainment is widely recognized as the key to improving people's futures—opening doors of opportunity, as well as enhancing socioeconomic mobility. A commitment to improving the plight of Hispanics is necessary not only because it is the right thing to do, but it is imperative that this fastest-growing and soon-to-be-largest minority population succeed in education as an investment in the future of the nation.

The magnitude of the crisis is unparalleled. According to every educational indicator, Hispanic Americans are making progress at alarming low rates—from preschool through grade school to junior high through high school, and on into higher education. The cumulative effect of such neglect is obviously detrimental not only to Hispanics but to the nation.

What Can They Do?

What can community colleges do? Many of these suggestions are taken from the report of the President's Advisory Commission on Educational Excellence for Hispanic Americans, September 1996. From the recent Third Annual Symposium of the National Community College Hispanic Council (NCCCHC), and from my own review of the literature on classroom atmosphere, here are some suggestions for community college administrations to improve retention and completion rates:

- Work with community groups to provide apprenticeships, mentoring relationships, and summer training programs.
- Equip educators in effective skill training in technology, computer skills training, basic education in the native language, ESL courses, GED courses, and parenting training courses to enable adults to participate more fully in the workplace, attain better paying and more satisfying jobs, and to become better advocates for their children.

Suggestions for faculty to improve retention and completion rates:

- Establish a welcoming classroom environment. Build rapport and connect with students by greeting them when they arrive, address their names, and use their names in class in ways that boost their self-esteem.
- Learn how to pronounce student names correctly. If needed, put notes in your roll book so you remember the correct pronunciations.
- The first day of class or early in the semester have students meet other students in the class. Many exercises can accomplish this. You could even devise your own exercise using your course material in some way. Many students have shown that the single most
important factor contributing to student success is that students experience a sense of belonging to an institution. One of the best places to build a sense of community is in the college classroom.

- Invite all of your students to visit you in your office during office hours. Offer particular encouragement for students who you sense are at risk of not doing well in your course. The earlier the first contact, the greater the chances for student success.
- Arrange seats in a way that students are facing each other, as for example, circles and semi-circles, in order to promote student-to-student interaction. Social-psychological research has shown that morale is highest in groups where people are engaged in discussion.
- Walk around the classroom to establish physical proximity with students who have selected to sit away.
- Establish eye contact with all the students in the class, not simply the ones in your immediate circle.
- Prolong and coach students who are reluctant to speak in class with, for example, “Very good. Can you tell us more about that?”
- Talk to your students in a language and at a level that is understandable to them. Do frequent checks in class to determine if students are with you. Try using the “Minute Paper” as a way of assessing where the class is. You can have students respond to two questions: What is the most important part of today’s class so far? What part of today’s class is still not clear to you?
- Encourage students to form study partners or study groups.
- Occasionally have students write their responses to your questions before answering them aloud. This brings more people into the discussion than those whose hands shoot up immediately.
- Increase your “wait” time when you ask a question by a few more seconds and you will engage more students in the discussion.
- Listen carefully to students questions and comments in class and give substantive feedback. Students need to feel that their ideas are worthy of consideration and that the class is a safe environment in which to speak. When a student gives misinformation in class, you might be able to refocus what has been said to correct it for the class without diminishing the students’ self-worth. Your tone of voice and demeanor are important in showing respect for your students even at times when you do not agree with, or perhaps do not respect, what they have said.
- Praise students for their questions and comments.
- Create a supportive atmosphere that promotes student success in your class from day one. Encourage students to work hard to achieve, to come to all their classes, to be on time for class, and to stay current with their studies. Don’t deliver a doom and gloom lecture about how difficult your course is and how many students fail. Share with them your high expectations but tell them about how other students have been successful. Some faculty share with their students written comments from students from the previous semester. This seems to be effective since students often pay more attention to their peers than to their instructors. Tell them about the college’s available services such as tutoring, learning centers, and writing centers. Give them tips on how to do well in your course.

Hopefully, these suggestions for both community college administrators and faculty will promote student retention and success. The community college, a vital part of society, as a whole, needs to be invested in the educational success of our Hispanic American people.

As President Clinton said at the 50th Anniversary Commemorative Services honoring Franklin D. Roosevelt, “Let’s not forget that we also have an educational dream. Education is the fault line in America today. Those who have it are doing well in the global economy, while those who don’t are not doing well. We cannot walk away from this fundamental fact. The American dream will succeed or fail in the 21st century in direct proportion to our commitment to educate every person in the United States of America.”

"Many studies have shown that the single most important factor contributing to student success is that students experience a sense of belonging to an institution. One of the best places to build a sense of community is in the college classroom."

It Is Time to Focus on Outcomes
Veteran Educator Proposes New Emphases

BY LEO CHÁVEZ

Dr. Chávez is chancellor of the Foothill-De Anza Community College District. Raised in El Paso, he received a B.A. from the University of Texas at El Paso, an M.A. and a Ph.D. in history from the University of Michigan. He has been a teacher and administrator in California community colleges for more than 20 years.

There are few words that carry more meaning to minorities than access. For Hispanics, access to a quality education and to the good jobs that typically result from such preparation represents much of what we struggle to gain.

Yet, today, most of our public policy debate seems to center on eliminating policies that enhance our ability to enter quality educational opportunities.

Whether one is referring to the Hopwood case in Texas or Proposition 209 in California, or news reports in virtually any state in the nation, there appears to be a widespread attack on access. The key tactic to ensure access, of course, has been affirmative action. As a result, we are expending great energy in defending affirmative action.

But I would argue that we are missing the point in the public policy debate regarding affirmative action, and that the misplaced emphasis is costing the Hispanic community a great deal. Nowhere is this lack of proper focus more evident than in education.

I would propose that the current debate regarding affirmative action ignores the fundamental issues that should be the focus of our concern.

First, affirmative action as a tactic means to an end and not the end in itself. As a tactic, affirmative action is designed largely to gain entrance or access. Yet as a plan of action, there is no clear evidence that the plan has succeeded at least not in the broad social sense. A preliminary study by a Steve Valley think-tank is about to report that the end of an affirmative action admission policy in the University of California system is not likely to impact the number of Hispanic students actually graduating from the university. In addition, while there have been some gains, we remain severely underrepresented in our educational institutions, in many occupations, and in corporate offices.

So in fact, our fierce defense of affirmative action has obscured the painful fact that after more than a generation of effort, it has not succeeded in a fundamentally important sense. Affirmative action has simply not been as successful as it needs to be.

Second, our defense of affirmative action fails to recognize the very real fear of the White middle class that their access will be diminished if affirmative action policies remain in effect. I understand and accept the fact that much of the current opposition to equal opportunity programs is due simply to racism. Nonetheless, we are alienating a significant group of individuals who might support our goals by failing to recognize that some opposition stems from legitimate concerns regarding access on the part of a middle class feeling threatened from any number of directions.

Third, and most important, by allowing the public policy debate to focus on the tactic, we are ignoring the more important issues of remaining committed to a long-standing social goal. If the United States of America stands for anything, it must be equal opportunity. We should, therefore, focus on a redefinition of that American principal of equal opportunity as a fundamental social goal for all Americans.

What is most disturbing about the current debate is the lack of concern in providing some commitment to equal access as a critically important social policy goal. It should be hard to disagree with equality of opportunity as a key element of American society, whether one is supportive of or opposed to affirmative action as a tactic. Whether one is a member of an underrepresented group or a member of the White middle class, by altering the terms of the debate from affirmative action the tactic to reaffirm and redefining our
commitment to equality of opportunity (the goal), we would find additional political allies.

Finally, we must constantly point out the differences between affirmative action and equal employment opportunities and practices. Most employment policies are designed to ensure fair employment practices and thus will not be affected by any changes in affirmative action laws. That is, equal employment opportunity is separate and distinct from affirmative action as most people use the term. Virtually every court case has left these procedures intact. This leaves much of the affirmative action debate centered upon outcomes such as special university admissions policies or employment quotas. Yet, it is precisely in this arena where the affirmative action debate is now largely irrelevant.

What is the point in achieving access if the individual is not equipped to succeed when given the opportunity, and when the academic institution is committed to admitting the student but is not committed to ensuring the student’s success?

Affirmative action and fair employment practices cannot eliminate deficiencies in preparation when individuals must compete for employment.

As educators, we must fundamentally alter the terms of the debate from merely achieving access to that of ensuring student success. In other words, access is a pipeline issue. Those of us in a position to hire know how difficult it is to find qualified Hispanic applicants for most of our high tech jobs or for most jobs requiring a college degree. We should cease our efforts to defend affirmative action as a means to gain admission and instead turn our full attention to demanding that our educational system equip all our students to compete successfully in a competitive employment environment.

How long must we tolerate high school dropout rates for Hispanics that often exceed 50 percent? Why should we debate affirmative action admissions policies when the majority of our students who do finish high school are not always equipped to succeed in the universities we are condemning for their admissions policies? Would it not be better to focus our energies on filling the pipeline with qualified students? Should we not demand that all students be treated equally by our schools in terms of outcomes and should we not hold our schools accountable for their results in this vital area?

Recent headlines in Silicon Valley and elsewhere have expressed the need to increase the number of visas allowing skilled, high-tech workers, largely from India, Pakistan, and other countries, to immigrate to the United States. Congress responded quickly to increase the number of these valued workers allowed to enter the United States. Is this not the ultimate irony of Hispanic Americans? Our dropout rates continue at unacceptable levels, and here in the heart of the world’s most technologically société, our Hispanic students remain on the margins while we fund it necessary to import high-skilled, high-wage workers to fill critical needs.

I believe our agenda should move away from defending a policy that has not proven successful to one addressing the fundamental issues raised here. We should adopt goals defining success for all students at each level of schooling, and we should focus our energies on developing tactics to ensure that all students achieve those performance goals.

These goals should be rather simple to articulate but meaningful in a broad sense. They should address the performance gaps encountered at all levels by Hispanic and other minority students. For example, in the elementary schools, we should begin by demanding that each student be able to read and write in English at grade level. In middle schools, we should demand that each student possess the math and science skills needed to succeed in high school. At the high school level, we should demand that each student successfully complete two years of algebra and two years of science courses and be prepared to succeed in subsequent math and science courses in college. We should further demand that each student be equipped to succeed in college if he or she chooses to attend.

We should then refine these goals at the college and secondary level by demanding that every four years the number of Hispanic dropouts be reduced by half. At every level, we must insist that performance gaps among different groups be eliminated. The percentage of students at grade level, the percentage of students who take the SAT test, scores on SAT and other standardized tests, and the percentage of students who graduate and who meet college entrance requirements must be essentially the same for all groups.

The same type of goals should be established for those entering certain highly sought professions such as engineering, computer science, health care, and other technical and professional fields. This would end much of the hostility of the current debate by allowing us to focus on outcomes, and would provide us all with goals we can support. Ultimately, the achievement of these goals would eliminate the need for tactics such as special admissions criteria and hiring quotas because the pipeline would be filling with fully qualified and capable students and job applicants.

These goals would also force us to focus on educational providers rather than on students from underrepresented groups as the nexus for needed change.

These goals are not meant to be inclusive but rather suggestive of the type of simple, yet broad goals that, if accomplished, will fill the pipeline with qualified Hispanic students prepared to succeed in the college or profession of their choice. They are meant to suggest that we are waging the wrong battle.

Without the proper tools, our Hispanic students will be condemned to a little attempt to gain access to the promise of American life. As educators, as leaders, as Hispanics, it is our responsibility to focus the national debate on what really matters—the inability of most of our schools to equip our students with the skills needed to compete and succeed.
Gerardo Mejía cradles a blade of grass in his hand. The landscape maintenance supervisor has made his living taking care of the stuff for 10 years.

But on this day, Mejía is studying it. He uses a small magnifying glass to get a better look.

His classroom is unlike any other in San Diego County. It’s in a cabin-sized room in the middle of the sprawling Miramar Wholesale Nurseries near Interstate 805 in San Diego.

Mejía’s classmates, like he, are landscape workers who live throughout San Diego County but originally hailed from Mexico. They step into a classroom after a day of maintaining the landscapes of private estates, golf courses, and public institutions.

They arrive, some still wearing their uniforms and dirt-caked boots.

They speak passable and not-so-passable English. But English fluency is not a requirement to attend these two-hour classes.

Bienvenidos, says Cuyamaca College horticulture instructor Donald Schultz. Welcome.

Schultz teaches his students a college-level course in Spanish. He covers everything from plant identification to turf management and irrigation basics. Most of the students know their turf already, he it bluegrass, tall fescue, or kikuya.

But there are still some technical terms with Schultz.

The horticulturist yields the floor during the second hour to Lyn Tanger of Cuyamaca College, an instructor in English as a Second Language. Her goal is to teach basic English. A recent classroom drill, with the class repeating, went like this: “I work,” “I study,” “You work,” “You study.”

Several students struggle with the English portion. They are primarily the ones who have never taken an English class before.

“The combination approach aims to improve the lives of an overlooked but hard-working segment of the local labor force. According to the last census, 19% of people in San Diego County employed in the horticulture field, including nursery workers and groundkeepers, about 60 percent were Hispanic, or those in supervisory positions, about 4% percent were Hispanic.

For Mejía and his classmates, the seminars offer an opportunity never presented before: to learn more about what they do for a living in a language they can understand clearly.

Indeed, that was the thinking when a local grower and a college instructor developed the seminars last year.

“We need the competence in our business,” said Tom Evans, president of Miramar Wholesale Nurseries and an active member of the local landscape industry.

Latino migrants make up the bulk of the county’s horticultural workforce. They work long hours, often for low pay. But a lack of education or English skills can keep them from advancing.

There are so many people who are very qualified in this industry, but they are held back because they are limited in their ability to speak English,” said Evans.

Local industry leaders have attempted to address these issues over the years, said Brad Monroe, coordinator of the ornamental horticulture program at Cuyamaca College.

For Mejía and his classmates, the seminars offer an opportunity never presented before: to learn more about what they do for a living in a language they can understand clearly.
College in El Cajon. But their efforts have been sporadic.

"One seminar here, another one there, not anything that led to a certificate of completion or was coordinated with ESL," Monroe said.

Monroe and Ewing put the course together knowing they would have to accommodate some special needs. Holding the classes at Cuyamaca did not make sense. The campus is not centrally located, and there were some concerns that the targeted students might be intimidated by the idea of taking classes at a community college.

So Ewing donated the use of a training room near his office. Students have come from as far as Escondido and Chula Vista to attend the classes since then.

The classes are offered as four-day seminars, six of them in all, plant identification, turf management, landscape pruning, weed control, irrigation basics, and horticulture problem-solving.

They began last November, and more than 100 students have enrolled since then. The cost per seminar is $6 for California residents and $86 for non-residents. Graduates of all six seminars receive a certificate and three college credits.

Mena needs to complete one more class to receive his certificate, but already he's planning to continue his education.

He breezed through the English instruction, having taken English courses before. He took classes in Chicago in the mid-1980s after he came from Mexico, and he took more in San Diego after moving here in 1994.

He started his career in landscape digging ditches as his English skills improved, he moved up. The Mission Valley man, who is married, and has two children, is currently a supervisor at Valley East Landscape Construction in San Diego. He oversees a work crew, takes customers' orders, and even fields the occasional complaint.

"He said he's always wanted to attend college but couldn't because of his schedule," Ewing said.

In February, he enrolled in the College Broadens Career Path for Landscapers.

San Diego County's landscaping industry is filled with workers who know their bluegrass from their tall fescue.

This is a skilled labor force, but with English-language instruction.

The seminars are open to all and are designed to provide technical horticulture training in Spanish and an introduction to the terminology in English.

"Schools offer this in English. This is the first time I've seen it in Spanish," said Gustavo Marquez, who owns a small landscape maintenance service.

Cuyamaca's Ornamental Horticulture program (OH) is well known for its interrelationships with the community and industry. The program has developed a connection with industry members in landscaping, golf courses, irrigation, nurseries, and other related businesses. This connection enabled the program to develop courses such as the combined horticulture and ESL seminars.

Six seminars are taught in Spanish, in combination with ESL. Plant Identification teaches how to recognize plants common to Southern California landscapes and nurseries. Irrigation Basics provides students with the elements and terminology of landscape irrigation operation and maintenance. Horticultural Problem Solving offers a method for students to diagnose problems typically encountered in Southern California landscapes and nurseries. Turf Management offers the theory, practice, and terminology. Landscape Pruning gives basic pruning theory, practice, and landscape pruning terminology. Weed Control explores weed identification and weed control methods.

Spanish-language classes at Cuyamaca Wholesale Nurseries. Then, in September, he enrolled in an English-language plant identification course at Cuyamaca College.

"For now, he's setting modest goals. It's important that I complete this course," he said. "In January, I'll start another course on pesticides.

"I'll take a course per semester, maybe I can get a degree," he said. "I can't say for sure, but who knows? All I know is I'm helping myself because many of the workers originally lived in Mexico, English is a skill that some lack.

In 1997, Cuyamaca College teamed with Tom Ewing, president of Miramar Wholesale Nurseries, to begin an ongoing series of horticulture seminars in Spanish together.
degree or certificate in landscape design, landscape technology, nursery technology, irrigation technology, golf and sports turf management, or horticulture and floral design. OHI has one full-time faculty member and 20 part-timers who are employed in the industry. The OHI program also cosponsors major conferences, honors industry leaders, and encourages career advancement through scholarship awards. Every year, OHI sponsors workshops of interest to the industry and the community, such as San Diego Landscape conferences and Green Industry Trade Shows. The Turf Management Seminar is a sold-out event every year, with well-known speakers drawing hundreds of participants. The Urban Forest Field Day and Spring Garden Festival offer hands-on presentations and demonstrations by professional organizations.

Community members not employed in the horticulture industry are selected annually to receive awards for volunteer work in the field. The awards are presented to San Diego County residents at OHI's annual Scholarship and Awards Banquet, at which Cuyamaca Botanical Society also honors a leader in the industry as the Horticulturist of the Year.

The opening this year on May 15 of the long-awaited $5 million Water Conservation Garden on campus will augment and enhance the OHI program. The idea for such a garden started in 1991 after a series of droughts hit California. A partnership between the college, local water districts, local governments, and the landscape industry led to a long-term solution to preserve and protect the local water supply. The 4.3-acre demonstration garden and resource center, built on campus land donated by Cuyamaca College and the Grossmont-Cuyamaca Community College District, promotes water conservation as a major alternative to new water sources. The state-of-the-art facility is an education tool and permanent showcase for water and resource conservation through creative and sustainable landscaping. There is also a large amphitheater built adjacent to the garden to host educational events and activities.

---

**SUMMER 1999**

**Universidad Complutense**

**MADRID - SPAIN**

**SCHOLARSHIP PROGRAM**

for High School, College Students, Counselors & School Administrators

Three and four weeks of intensive Spanish language study from **early July to early August, 1999**.

**Includes:** round trip airfare, three meals a day, room accommodations and instruction at Colegio Mayor Nebria of Universidad Complutense.

**Cost:** $2,499 
$1,000 Scholarships Available

For information, Write or Fax your request to:

**Center for International Studies**

42-32 De Bruin Drive
P.O. Box 451
Fair Lawn, NJ 07410-0451

Tel.: (201) 587-1260  
FAX: (201) 368-0433
Rivera Promotes Small Businesses in El Paso

In December, the El Paso (Texas) Hispanic Chamber of Commerce presented its "Keep It in El Paso" award to Leticia Del Barrio Rivera—program specialist for the University of Texas-El Paso’s (UTEP) Historically Underutilized Business Program—for her contributions to the promotion of local purchasing opportunities.

Del Barrio Rivera—who is involved in the Hispanic and Black chambers of commerce, sits on the UTEP Business Advisory Council, and produces the Let's Do Business radio talk show on KXCR—has contributed to El Paso’s changing economy by helping historically underutilized businesses secure contracts.

Menchú Tum Works with New Mexico Youth

"Healing Communities Torn by Racism and Violence" was the theme of the recent Peacelam Youth Conference held at the University of New Mexico at the conference. Mayan Indian leader and Nobel Peace Prize Laureate Rigoberta Menchú Tum spent two days working with area youth.

Menchú Tum is a Guatemalan leader internationally known for her work in the promotion of the defense of human rights, peace, and Indigenous Peoples' rights.

The Peacelam program is an international education program built around leading Nobel Peace Laureates who work personally with youth to pass on the spirit, skills, and wisdom they embody. The goal of Peacelam is to inspire a new generation of peacemakers who will transform their local communities, themselves, and the world.

Estrada Earns New Position at Texas A&M

Joseph A. Estrada recently became director of admissions at Texas A&M University in College Station.

Estrada, who previously served as registrar and director of admissions at Texas A&M University-Kingsville, has been active in the Texas Association of Collegiate Registrars and Admissions Officers, for which he has served as legislative representative. He has chaired Texas Higher Education Coordinating Board advisory committees on such subjects as residency, admissions, and transfer of credit. He holds memberships in several regional and national professional organizations for registrars and admissions officers.

Avellano Assumes Dual Positions

Dr. George P. Avellano, the University of Texas-Pan American's (UTPA) associate vice president for academic affairs for graduate programs and research since 1996, has become the interim dean of the UTPA College of Business Administration.

George will do a good job as interim dean. He is very aware of what is required of faculty and students in graduate programs and has been very involved in the recent progress of the College of Business Administration, said Dr. Rodolfo Arevalo, UTPA provost and vice president for academic affairs.

Avellano said he looks forward to maintaining the type of intellectual environment that will allow the college faculty to expand their contributions to the knowledge base in business administration.

Carrizal Active in Chicano/Latino Affairs

While serving as a representative on the school president's Chicano/Latino Advisory Committee and as a representative on a committee of the National Association for Chicana and Chicano Studies (NACCS), University of Minnesota journalism and Chicano studies major Elvira Carrizal has been getting a crash course on learning about life as a decision-maker.

The presidents advisory committee serves as a link between the university and the local Chicano/Latino communities, while the NACCS's national coordinating committee drafts resolutions and proposals on issues affecting Chicano/Latino studies.

Carrizal is a board member of the La Raza Student Cultural Center and belongs to the Farmworker Action Network and the university's Journalism Students of Color Association. She is a mentor/tutor with El Puente, a community service mentoring program designed by the university's Chicano/Latino Learning Resource Center.

Baca Addresses National Bilingual Conference

Professor Leonard Baca of the University of Colorado-Boulder (CU-Boulder) delivered a keynote address before about 7,000 people gathered for the 26th annual conference of the National Association for Bilingual Education (NABE), held in Denver.

Baca is the founder and director of the BEMO Center for Multicultural Education in the CU-Boulder School of Education and a
national author on bilingual special education and the education of non-English-speaking students.

Rudy Chávez, associate director of the CU-Boulder BLENO center, and Associate Professor Kath Esamilla were co-chairs of the NABE conference.

"Colorado's growing population includes a significant number of language-minority students," said Chávez.

**American College of Dentists Honors Sánchez**

Dr. Ramón A. Sánchez, clinical associate professor of restorative dentistry at Nova Southeastern University's College of Dental Medicine (Fla.), has been elected a fellow of the American College of Dentists.

Sánchez was inducted at the Convocation of Fellows ceremony, held in conjunction with the annual conference and scientific seminar of the American Dental Association.

The American College of Dentists is comprised of dentists who have demonstrated leadership and meritorious achievement and who have made exceptional contributions to dentistry, the dental profession, and society.

Sánchez serves as chairman of the Board of Trustees for Coral Gables Hospital and as president-elect of the Florida Academy of General Dentistry. He owns a private practice in the Iowa State University College of Dentistry.

**Flores Receives Scholarship**

Lina Flores, a senior at Albertson College of Idaho, is a 1998 recipient of a $10,000 scholarship awarded by Chela Financial, a San Francisco company.

Flores, a Spanish/math education major, was nominated for the scholarship based on her exceptional commitment to excellence and strong determination to excel in her field. She was one of 150 students selected from more than 100 candidates nominated by schools from a 10-state region to receive the Chela Financial scholarship.

Chela Financial is a nonprofit corporation that provides financial access and assistance to students pursuing a higher education.

**Franco Speaks at Latin American Conference**

Jean Franco, professor emerita at Columbia University (N.Y.), was the keynote speaker for the Latin American Literatures and Cultures Conference at the University of Southern Colorado this month.

Franco has written several books on Latin American literature, including The Modern Culture of Latin America, Cesar Vallejo, The Dialectical of Poetry and Silence, and Plotting Women: Gender and Representation in Mexico.

She was the first professor of Latin American literature in the U.S., holding positions at King's College, London University, and at Essex University.

Formerly the president of the Latin American Studies Association, she has been decorated by the governments of Chile and Venezuela for her work on Latin American literature.

**KSC Honors Márquez**

Keene State College (N.H.) has honored Sury Márquez, founder and executive director of The Alliance for the Progress of Hispanic Americans (ALPHA), with a Granite State Award.

As the executive director of ALPHA, Márquez has helped to provide essential services to New Hampshire's fastest-growing minority groups through programs such as SEP, which supports at-risk students in school and teaches parents how to advocate for the educational needs of their children.

She has a bachelor's degree from Queens College and a master's from @ Baruch College Graduate School of Business.

**Tijerina and Hinojosa Collaborate on Book**

Tijerina and Hinojosa are taught by Servando G. Hinojosa Tijerina at Austin Community College.

For the book, Hinojosa created scenes detailing historical and cultural details of ranch life in South Texas in his pen-and-ink drawings.

"One of the first drawings I finished was of the sillas, men cutting siller stones in a quarry," he said. Siller stones were the large blocks of caliche used as a primary construction material in 18th century Tejano ranches.

Hinojosa visited one of the original siller stone quarries of South Texas as part of his research.

**Añon joins UAH**

Havana, Cuba, native Jorge F. Añon has joined The University of Alabama-Huntsville (UAH) as the dean of the College of Engineering.

"The proximity to high technology companies in Huntsville is of great benefit to the university," Añon said. "I am happy to be a part of that association and look forward to strengthening the link between those high-tech companies and UAH." Añon said he is keenly interested in making students a top priority at UAH and said student retention and graduation rates are important to the success of the college.

A registered professional engineer in Texas, he received his undergraduate and graduate degrees from George Washington University.

**Méndez Exhibit at ASU**

ASU (Arizona State University) has "Codex Méndez: Prints by Teopoldo Méndez," the first major U.S. exhibition of the printmaker's work in nearly five decades, currently running until May 30.

Méndez (1941-2001) produced a vigorous body of work that included woodcuts, linocuts, and lithographs famous for their...
powerful images and incisive political views.

Leopoldo Méndez was one of Mexico’s most important print makers, yet there has been no major exhibition of his work in the United States in nearly half a century, said Jean Makin, Print Collections Manager of the AM Art Museum. “He reduced national and international events and problems to their very essence, and reframed them for the Mexican people in fresh, visual terms.”

Hispanic Heritage Council Scholarships at M-DCC

The Hispanic Heritage Council awarded four $1,000 need-based scholarships to Hispanic students in a ceremony at the Miami-Dade Community College-Inter-American Campus (Fla.).

The Council implemented the scholarship fund as part of the 30th annual Hispanic Heritage Festival, an event that celebrates Hispanic contributions to the cultural, economic, and social development of the nation. The students awarded represented Miami’s diverse community. Alicia Villalobos (painted at right) is Honduran, Jennifer Valera (at left) and Melena Noyola (third from left) are Cuban, and Johanda Rodríguez (second from left) is Puerto Rican.

New World Literature at Texas A&M-Kingsville

Texas A&M University-Kingsville’s Corner Museum recently displayed the exhibit “Fact, Fiction and the New World.”

A video program entitled “Voices of Latin America” told the story of Sor Juana Inés de la Cruz— an illustrious nun who was widely acknowledged in colonial Mexico for her intellect, talent, poetry, and for helping the poor. Other writers surveded in the video were Fray Juan de Zumarraga, first Archbishop of Mexico. This work exercised strong influence over the first missionaries in Mexico, some of whom attempted to organize their parishes by the Copanian model.

Avant-Garde Mexican Films at UCR

Avant-garde and experimental films from Mexico were the focus of the 1998-99 Películas de las Americas/Films of the Americas film series, sponsored by the University of California Institute for Mexico and the United States.

The Winter Quarter segment of the series, which was held at the University of California-Riverside, recently wrapped up.

The films series included, Men with Guns, by John Sayles; Guantanamera, a contemporary film from Cuba; The Sixth Sun, a documentary by Saul Landau; Viva Zapata: Abi está el detalle, starring Mario Moreno (Cantinflas); and Maria Candelaria, starring Dolores del Río.

Functioning in Spanish at Kenan-Flagler

The North Carolina Global Center and the Office of International Programs at the University of North Carolina-Chapel Hills Kenan-Flagler Business School is conducting a nine-month course where executives can learn to function effectively in Spanish-speaking work environments.

“You not only learn Spanish, but you absorb the nuances of culture affecting business in Mexico,” said Melissa Torres (pictured here), center assistant director. “By understanding the unique way that business is conducted by Mexican executives, and by being able to function adequately in Spanish, graduates have decided advantage over their competition.”

The ever-expanding class is aimed toward masters of business administration students.
Texas A&M-Kingsville's New Literature Course

A different type of class will be meeting during the fall 1993 semester at Texas A&M University-Kingsville.

Images of Mexican-American Women in Literature will offer students the opportunity to read literature written by Mexican American authors such as Sandra Cisneros, Rolando Hinojosa, Ana Castillo, Gloria Anzaldúa, Octavio Paz, Cherrie Moraga, and Wendell Mayo.

According to language and literature lecturer Elisa Garza, the course is meant to develop an atmosphere and a common vocabulary for students to examine how cultural images of women can develop, support, and/or challenge stereotypes of women and men.

In the News at Kean University

- Kean University's School of Education (N.J.) has been awarded a federal grant of more than $152,000 to encourage minority teacher aides to become special education teachers. The U.S. Department of Education grant of $152,000 will fund the third year of a $456,000 grant in support of Project USETPP (Urban Special Education Teacher Preparation Program). Begun in 1997, Project USETPP was developed to recruit, retain, and graduate minority teachers into special education.

- Dr. Ana Maria Schulmann (picture left), dean of Kean University's School of Education, has been appointed by the New Jersey State Board of Education to the state's first Professional Teaching Standards Board. Schulmann was one of 19 members selected by the New Jersey Commissioner of Education. The board members will play a crucial role in implementing the state's continuing education plan. She holds degrees from the University of Buenos Aires and Rutgers University.

USF Studies Migrant Farm Workers

USF - About 75% of Florida's migrant and seasonal farm workers are poor and few have health insurance, even for work-related injuries, according to a new study by the University of South Florida College of Public Health.

The report attempts to capture the work and health characteristics of Florida's migrant and seasonal farm workers, a mobile population for whom solid demographics are scarce.

"The report is the first of its kind for Florida. Its emphasis on health-related information makes it unique for the nation," said Martha Arrieta, M.D., principal investigator and a visiting assistant professor of epidemiology.

Eighty-six percent of Florida's farm workers are Hispanic.

GYSU Aids "Hurricane Mitch" Victims

Seven faculty members and 10 students from the kirkhoff School of Nursing at Grand Valley State University (GV) in Michigan spent nine days in Nicaragua providing health care to victims of "Hurricane Mitch." The group worked with the Nicaraguan relief organization Ayuda Obeha Sunita.

The nursing students—nine undergraduates and seven master's degree students—were to receive credit toward their courses in clinical nursing or advanced practice nursing.

GV Nursing Professor Charlotte Storey is fluent in Spanish and specializes in community health. Lorraine Rodrigues-Rusher, dean of the kirkhoff School of Nursing, is the only Latina nursing school dean in the country.

UM-Flint Newsmakers

- Rose Moreno, business manager for the Office of Research and Projects for Urban & Regional Affairs at the University of Michigan-Flint, was honored in November at a university-wide service awards reception for 25 years of service. She has a bachelor's from WMU Flint.

- Brette Vance, professor of Spanish at UM-Flint, will lead a language study tour of Costa Rica from July 18 to August 15. In conjunction with the Forestier Institute Internacional, students from UM-Flint will participate in morning Spanish classes where they will receive language instruction from beginning to graduate level Vance also plans to teach a literature class with the use of Costa Rican guest speakers and authors, so students can get a better understanding of the Spanish culture.

In the News at USF

USF - La Camerata Romeu, the celebrated classical all-female chamber orchestra from Havana, appeared in concert at the University of South Florida (USF) in November. The group was founded in 1993 by its conductor Zenaida Romeu.

- The U.S. Department of Education has funded a two-year grant to the USF College of Business Administration's Center for International Business to internationalize the college through faculty development, curriculum, community outreach programs, and student internships.

- Orlando García-Martínez, president of the Gienfuegos chapter of the Unión Nacional de Escritores y Artistas de Cuba and director of the Gienfuegos provincial archives, updated USF faculty on the climate for artists and writers in contemporary Cuba.

- Kathleen de la Peña McCook, professor and director of USF's School of Library and Information Science, has been presented the American Library Association's 1998 Elizabeth Louis Cahn Award for service.

- Mario Hernández, of USF's De la Parte Institute, has been serving as advisor and writer on the U.S. Surgeon General's Report on Mental Health.

- At the seventh annual USF Latino Scholarship ceremony, a charitable remainder trust in excess of $100,000 was established by Herman and Esperanza Leon, and a pledge of $100,000 was made by the Tampa Bay Latin American Medical Society. The State of Florida was to add $150,000.

Telethon Benefits M-DCC's Hispanic Students

Tomas Garcia East of Florida cable station teleman recently hosted Miami-Dade Community College's (M-DCC) first-ever telethon to expand a scholarship fund for Hispanic students at the college which claims the highest enrollment of Hispanics among all colleges and universities in the U.S.
Student ambassadors from the college's various campuses helped take phone calls and accept donations throughout the day in order to reach the $100,000 goal. M-DCC President Eduardo J. Padrón, various distinguished alumni, and students attending the college on scholarship were among those interviewed by Fusté on air during the telethon.

Fusté currently hosts TeleMiami's morning talk show Buenos Días Miami.

**Hispanic Culture Events at LIU**
- The Brooklyn Campus of Long Island University (LIU) in New York hosted a series of poetry and fiction readings by multicultural group of renowned poets and writers this spring semester. Among the authors was Cuban-born journalist Cristina García. García is the author of *Dreaming in Cuban* and *The Aguero Sisters, Dreaming in Cuban*, her first novel, was praised for its poignant depiction of women who struggle to regain a sense of personal and cultural identity in the aftermath of the Cuban revolution.
- A free afternoon symposium at LIU-Brooklyn in February brought together artists, educators, and performers. The symposium highlighted the work of visiting Cuban artist Raúl Villarreal, who discussed the impact of his heritage on the symbols and imagery found in his art.

**"Reading the World II" at USF**

"Reading the World II," a two-day conference focusing on multicultural literature for children and young adults, was recently held at the University of San Francisco (Calif.).

Flor Ada is an award-winning author of more than 30 children's books.

**Minority Youth Conference at USC**

The University of Southern Colorado was the site of the biannual Southern Colorado Minority Youth Conference in February.

The Conference is hosted twice each year to provide an opportunity for Hispanic, African American, Asian American, and Native American students to visit a college campus. The event was offered as a collaborative effort by the Movimiento Estudiantil Chicano de Aztlán, the Black Student Organization, and the Office of Admissions at the University of Southern Colorado in Pueblo.

According to Deborah Martínez-Martínez, who coordinated the event for the Office of Admissions, the conference was to feature cultural events and entertainment as well as workshops on financial aid and scholarships.

**PUBLICATIONS**

**The Successful College Athletic Program: The New Standard**

by John R. Gerdy

This volume offers a critical analysis of how college athletic programs can contribute to the mission of a university in meaningful ways that reach beyond their roles in providing revenue and entertainment.

Readers will be challenged to adopt a more futuristic view of athletics as a tool for meeting the university's broader objectives.

Daughters of Self-Creation: The Contemporary Chicana Novel
by Annie O. Eysturoy

How does the Chicana develop in her own novelistic world? How does the Chicana portray her quest for authentic self-knowledge? Feminist critics have shown that gender is a determining factor in the process of self-development. In this ground-breaking study of Chicana literature, Annie O. Eysturoy takes the task a step further by arguing that race and class are crucial components of the female coming-of-age process.

Book Review

By Eduardo Mendieta

Roberto Suro's book is journalism at its best—a gripping narrative that marries the daily drama of a people in the making with an analysis of trends that are slowly but ineluctably transforming the fabric of US society. In many ways, Strangers Among Us is a series of portraits painted with the skill of a realist but the perspective of an impressionist. Suro's book challenges us to look beyond the immediacy of the quotidiant.

This book is about how Latinos are challenging and changing the face of American cities, the terms of political discourse, and the very conditions of citizenship and membership in the nation.

Suro, who has been writing on Latino issues for the last twenty years, provides us with firsthand impressions of the different waves of Latino immigration. In the first three sections, Suro personalizes the history of these migrations north. American Mayans, Mexican women, illiterate peasants from Mexico are remade into members of a global economy. We also get some excellent urban portraits of the barrios that have emerged in Los Angeles, Houston, New York, and Miami. In each case, Suro tells the story of their emergence as he provides a narrative about the changing urban structure that was to support or not support the developing communities. In each urban portrait, Suro tells us about people and communities, and the ways in which these communities and barrios encountered political and economic conditions not of their choosing and, in many cases, beyond their power to influence. The fourth part of the book is devoted to Suro's prognosis and diagnosis.

First, and most importantly, Suro's journalism aims at disabusing us of the idea that we should blame the immigrants for the ills that have befallen them and "us." On the contrary—and here is where Suro's prognosis lies—immigrants and Americans have been betrayed, if not abused, by the lack of a coherent, forward-looking, effective, reasonable, and "legal" immigration policy. Since the mid-60s, the United States has de facto lacked a discernible immigration policy, and whatever steps have been taken to stem the growing tide of illegal immigration have instead exacerbated it and made it more unmanageable. Preying on the statist fears and easily excitable anxiety of Americans in recession, both Democrats and Republicans have foisted upon legal and illegal immigrants the bill for a globalized and destabilized economy.

Worst of all, Suro notes, in the haste to score electoral votes with a resentful American public, recent bi-partisan legislation has led to precedents whose logic threatens the very structure of American democracy. Suro reveals how recent welfare reforms established precedent for a differentiated citizenship: natives and naturalized. Indeed, citizens who have been naturalized must think of their citizenship as either suspended or abridged as regards the extent to which the nation-state provides a safety net to its citizens. Under the "declaring" clauses of the recent welfare reform, naturalized citizens must think of their family relationships as potential liabilities.

Suro also discusses bilingualism. But instead of waxing and waning rhetorically, he opts for a pragmatic approach. For him, it is not a question of language rights. Less is it a question of the right to ones language as a proxy for the right to ones culture. For Suro, bilingualism should only be a bridge to the life of the nation.

The book concludes with a call to Latinos: "Until Latinos themselves reject illegal immigration, they can never conclude the essential transaction that will win them acceptance on the basis of their contributions to American society." This is a rich, sophisticated, moving, and engaging book that raises serious questions about Latinos and the future of America in the coming century. These questions demand our urgent attention. Books like this should be read and highly recommended. In fact, Suro's book should become a standard text in a variety of courses and seminars, and not all of them dealing with Latinos.

Still, I have serious problems with Suro's appeal to Latinos to decide who they want to become by rejecting illegal immigration. I do not have to stand far off from Suro's own ground to find his conclusion not only weak, and even misguided, but simply incoherent. Suro writes: "...the most advanced postindustrial economy in the world has become dependent on a pre-industrial servant class" (321), which has been provided by "poor immigrants [who] are allowed into the country but not into the nation" (298). Having informed us of the intricate web of forces that has shaped Latino lives, Suro concludes that Latinos now are supposed to solve, by the sheer force of their will and rejection of their classes of kin, one of the great challenges of the coming millennium—how to keep the poor and destitute from storming the fortified walls of affluence.

Eduardo Mendieta is Assistant Professor of Philosophy and Associate Director of the Center for Latino Studies in the Americas (CELASA) at the University of San Francisco.

If interested in submitting a book review, please e-mail us at outlook@aol.com for Book Reviewers' Guidelines.
Indiana University
Bloomington Campus

Founded in 1820, Indiana University has a rich and distinguished history of providing educational opportunities for people from all walks of life. Following a comprehensive review by a national panel, the Bloomington Campus is in the process of restructuring its programs and services designed to recruit, retain, and graduate Latinos, African Americans, Native Americans, and other underrepresented students.

The leadership team under the new structure comprises a Vice Chancellor for Academic Support and Diversity and three Associate Vice Chancellors: Associate Vice Chancellor for Strategic Faculty Hiring and Support, Associate Vice Chancellor for Multicultural Affairs and Associate Vice Chancellor for Academic Support. Also reporting to the Vice Chancellor for Academic Support and Diversity are the Directors of the Honors Division and the Minority Achievers Program and Mathematics and Science Scholarships. This new leadership team will also share responsibility for student advocacy. Candidates are sought for the following positions:

**Associate Vice Chancellor for Academic Support**

The position of Associate Vice Chancellor for Academic Support is a key leadership role in the restructuring of the Bloomington Campus. The associate vice chancellor will be responsible for developing and implementing strategies to increase the success of students, particularly those who are underrepresented in higher education. This position requires a strong commitment to diversity, equity, and inclusion, as well as a proven record of success in student support and academic affairs.

**Associate Vice Chancellor for Multicultural Affairs**

The position of Associate Vice Chancellor for Multicultural Affairs is a critical role in promoting and maintaining a diverse and inclusive campus environment. The associate vice chancellor will work collaboratively with faculty, staff, and students to develop and implement programs and initiatives that support and celebrate the contributions of diverse communities.

**TO APPLY:**

Send letter of application and curriculum vitae to:

Dr. Ali Zohoori
Chair, Department of Speech Communication and Theater
Box H, SUNY Oneonta
Oneonta, NY 13820-4015

SUNY Oneonta is an EEO/A employer.

Women and minorities are encouraged to apply.

---

State University of New York
College at Oneonta
Speech Communication and Theater

The College at Oneonta invites applications for one tenure-track Assistant Professor position and one one-year Lecturer position in the Communication and Theater Department in Mass Communication beginning with the Fall 1997 semester. SUNY Oneonta, a four-year arts and sciences college with a pre-professional focus, offers liberal arts and professional programs at undergraduate and master's levels. Increasing emphasis is placed upon technology and community service across all disciplines and the campus has announced a new Master's Computer Access Program (MACAS) for its students. The College, with 5500 students and 400 full-time faculty, is located in the scenic Catskills, three and one half hours from New York City. See the Oneonta home page for additional information (http://www.oneonta.edu)

**ASSISTANT PROFESSOR**

Responsibilities: Teach courses in Introduction to Mass Communication, Writing for RTV/F, Broadcast Announcing, Audio Production, and Broadcast Journalism Qualifications: Ph.D and evidence of strong commitment to teaching required. Qualities: Academic professional experience and ability to teach in one of the following areas: Public Relations, Advertising or Media Law highly desirable.

**LECTURER**

Responsibilities: Teach Introduction to Mass Communication, Video Production, Media Law, and Culture Qualifications: ABD and evidence of strong commitment to teaching required. Ph.D preferred. Qualities: Academic professional experience and ability to teach in one of the following areas: Public Relations, Advertising or Media Research highly desirable.

**TO APPLY:**

Send letter of application and curriculum vitae to:

Dr. Richard M. Englert, Chair, Provost Search Committee
433 Conwell Hall, Temple University
Philadelphia, PA 19122

Temple University is an Equal Opportunity/Affirmative Action Employer.
Chair
Department of Biochemistry
School of Medicine and Biomedical Sciences
School of Dental Medicine
State University of New York at Buffalo

The School of Medicine and Biomedical Sciences seeks a tenure-track assistant professor for the position of Chair, Department of Biochemistry. The Department fulfills research, teaching, and administrative functions within the schools of Medicine and Biomedical Sciences and Dental Medicine, and is involved in interdisciplinary research within the University.

The successful applicant will have the administrative experience and personal skills necessary to direct this important academic unit, and will have an internationally recognized record of achievement in research. The chair will have a commitment to professional, graduate, and undergraduate teaching, and will be a leader in their field. The chair will be appointed at the level of Professor.

Applications and nominations should include a current curriculum vitae and the names and addresses of at least three referees. They should be sent to:

Dr. John Hay
Biochemistry Chair Search Committee
138 Farber Hall
SUNY at Buffalo School of Medicine
3435 Main Street
Buffalo NY 14214

Applications will be accepted until the position is filled.

State University of New York is an equal opportunity, affirmative action employer.

Assistant Dean of the University Office of International Programs and Director of International Education Programs and Studies

Primary responsibility will be to assist with the University's overall internationalization initiatives, to coordinate the unit's strategic planning efforts, to help manage the overall fiscal operation of the University Office of International Programs, to represent the Dean during periods of absence, and to fulfill other duties as assigned by the Dean. Also responsible for the development, implementation, and administration of credit-bearing programs abroad for both undergraduate and graduate students. As Director of International Education Programs (IEPS), this individual works with academic units in developing programs to meet student needs and oversees management of over 100 existing programs, both specifically designed group programs as well as reciprocal exchange programs. These responsibilities include fiscal management, personnel management, academic oversight, administrative and logistical support, and the like.

It is essential for candidates to possess an earned doctorate in a relevant academic field, teaching experience and scholarship sufficient to merit and hold a joint appointment in an academic unit relative to their discipline, experience with foreign institutions and cultures, excellent communication skills, and at least five (5) years relevant administrative experience at an institution of higher education, preferably a research university.

Salary will be competitive; position is available until July 1, 1999. The committee will start considering applications after April 1, 1999 and will continue until the position is filled.

A letter of application, full curriculum vitae, and arrangement for a letter of reference (4) will be sent to: Joseph T. Mattivi, Human Resources Coordinator, Pos #: H-491, 1A Old Main, Box IPAD, University Park, PA 16802. Please do not contact the unit directly. Penn State is committed to affirmative action, equal opportunity, and the diversity of its workforce.

Dean
Faculty of Social and Behavioral Sciences
The Richard Stockton College of New Jersey

Stockton College is an innovative, residential, liberal arts and sciences college, with a student body of 6000 and a recognized record of academic excellence. One of only six public institutions classified by the Carnegie Foundation as a Liberal Arts Institution, the College is located on a 1600-acre wooded campus in Southern New Jersey, 15 miles from the Atlantic Ocean, 1 hour from Philadelphia, and 2-1/2 hours from New York City. The Division of Social and Behavioral Sciences consists of 44 full-time faculty, strongly committed to teaching, scholarly research, and community service. The Division includes majors in Criminal Justice, Economics, Political Science, Psychology, Sociology/Anthropology, and Social Work as well as an interdisciplinary supporting study in Gerontology.

The Dean manages the Division, exercises curricular leadership, develops and administers the budget, oversees and monitors faculty development, manages faculty recruitment, and participates in overall academic planning. The Dean reports to the Vice President for Academic Affairs. The position is managerial and does not carry academic rank. The position is available Jul 1, 1999.

Qualifications
- A Ph.D. or equivalent in one of the disciplines within the Division
- An academic record that would merit appointment at the rank of Full Professor
- Five (5) years of academic administrative or equivalent experience
- A strong commitment to excellence in teaching
- An understanding of the role of scholarship and service in undergraduate liberal arts education
- An appreciation of the resources, including technology, necessary to support the social and behavioral sciences

Salary is competitive and based on qualifications and experience. Screening will begin March 31, 1999. Applications must include a letter of interest and a curriculum vitae. Applicants should submit the names and telephone numbers of three (3) references to the address below.

Nominations, applications and letters of reference should be sent to Dr. David L. Carr, Vice President for Academic Affairs, Social and Behavioral Sciences Dean Search, The Richard Stockton College, New Jersey, AAS1, PO Box 195, Pomona, NJ 08240-0195.

The Richard Stockton College is an AA/EEO.

Women and minorities are encouraged to apply.
new Jersey City University is a culturally diverse public urban institution located in the greater New York Metropolitan area, and is one of nine state colleges/universities in New Jersey. The University offers undergraduate, graduate and continuing education programs to approximately 8,500 students.

Director of Registration Services

Responsibilities: The Director is responsible for all aspects of registration. This includes classroom and course scheduling, maintenance of student records, audit of graduation reports, and the administration of academic policies. The Director maintains the University catalog and certifies all students for graduation. She is responsible for the routine functioning of the office, manages a staff of eight full-time employees and maintains appropriate computer systems to support University needs for supplying data to IPEDS and HEDS and for conducting various institutional research projects. The candidate will possess the ability to administer college regulations while working effectively with a diverse student, faculty and staff population.

Qualifications: Requires a Master's degree with at least 5 years experience as Registrar or Associate Registrar. Supervisory experience required. It is essential this individual will have the ability to prioritize and coordinate projects in a timely manner. Experience in utilizing computerized mainframe and PC networked software is essential.

Salary: $52,966-$79,488

Application Deadline: April 13, 1999

Director of the Learning Communities Program

Responsibilities: The successful applicant will administer all facets of the Learning Communities (TLC) Program, a support services program for low-income, first generation college students and students with disabilities. This is a full-time, twelve-month position funded by the U.S. Department of Education's TRIO Grant program.

Qualifications: Requires a Master's Degree in Counseling, Education, Administration or a related field. Must possess professional qualifications, demonstrated administrative abilities, and a commitment to the goals of the program to increase the retention and graduation rates of low-income, first generation college students and students with disabilities. Experience in administering projects, managing budgets, proposal writing, supervision of personnel, and public relations skills. Must have demonstrated ability to communicate effectively with a diverse student population and university personnel. Previous experience with TRIO programs, educational and/or social service fields are desirable.

Salary: $45,752-$58,040

Salary: $35,000-
University of Michigan
Director of Public Safety and Security

The University of Michigan is seeking a Director of Public Safety and Security. The Director of Public Safety and Security is responsible for assuming a leadership role in the development of policies and procedures for crime and loss prevention, law enforcement, and safety and security services at the University of Michigan. The selected candidate will plan and direct the administrative, operational, and financial responsibilities of the Department of Public Safety, and provide oversight management of the Hospital Security and Housing Security divisions; provide advice and guidance to the University community regarding law enforcement, and safety and security issues; maintain good relations with members of the University of Michigan community through active involvement with constituencies; and foster close working relationships with area law enforcement agencies.

The Department of Public Safety is a full-service police agency that provides police coverage for the entire Ann Arbor campus. The University community on the Ann Arbor Campus includes 37,000 students, with nearly 11,000 living on campus, and 30,000 faculty and staff members. The campus covers 3,114 acres, and contains 214 major buildings.

Necessary qualifications include a Bachelor’s degree in Criminal Justice or a related field, or an equivalent combination of education and experience; at least eight years of progressively responsible experience in law enforcement, public safety and security, or industrial safety; considerable knowledge of state and federal law; demonstrated leadership, creative problem-solving, and management skills; a demonstrated ability to work effectively in a complex, decentralized organization; excellent written and oral communication skills; the proven ability to initiate and maintain productive and collaborative relationships with internal and external constituencies; and eligibility for certification by the Michigan Commission on Law Enforcement Standards (MCOLES). In addition, candidates will be expected to have a demonstrated commitment to sustaining and advancing organizational diversity. A Master’s degree in Criminal Justice, Public Administration, Police Administration or a related field, and experience in higher education law enforcement is desirable.

Applications will be accepted until the position is filled. Consideration of candidate credentials is underway.

Chair of Director of Public Safety and Security Search Committee, Associate Vice President for Facilities and Operations, 3040 Fleming Administration Building, Ann Arbor, MI 48109-1340.

The University of Michigan is an affirmative action, equal opportunity employer. For more information about the University of Michigan and the Department of Public Safety, please visit the following web sites:

ASSOCIATE VICE PRESIDENT
UNDERGRADUATE STUDIES

The Associate Vice President, Undergraduate Studies is the principal leader, advocate, and administrator for all University-wide programs, policies, and services related to undergraduate education.

PRINCIPAL RESPONSIBILITIES OF THE POSITION INCLUDE:

- Management of undergraduate enrollment
- Development, implementation, and enforcement of undergraduate admissions criteria, academic policies, academic probation and reinstatement, and graduation requirements
- Management of the general education program, the University-wide curriculum process, and the provost's vision of academic support services
- Facilitate development of new undergraduate programs
- Management of Undergraduate Student Council staff

The Associate Vice President, Undergraduate Studies serves on the Provost's Advisory Council and various other committees. The position reviews undergraduate academic programs and manages undergraduate academic policies and practices. The Associate Vice President reports to the Provost and President for Academic Affairs.

Unions reporting to the Associate Vice President, Undergraduate Studies include: Admissions, Registrar, Financial Aid, University College, General Education, Reinstatement/Probation, Scheduling, and Honors. The Associate Vice President of Undergraduate Studies is responsible for a professional and support staff of about 150 individuals and a budget of over $5 million.

QUALIFICATIONS INCLUDE:
- Appropriate terminal degree academic achievement which meets appointment with tenure at senior faculty rank, and at least five years of demonstrated success in higher education administration at the level of department chairperson or higher. In addition, candidates should:
  - Have a demonstrated record of effective leadership in development of new undergraduate academic programs, policies, and initiatives
  - Demonstrate ability to work effectively and collaboratively with faculty, students, and staff
  - Have strong interpersonal and communication skills
  - Have a commitment to the mission of public higher education
  - Demonstrate a commitment to diversity

Illinois State University is a comprehensive institution committed to providing undergraduate and graduate programs of the highest quality in the state of Illinois. The central mission of the University is to expand the horizons of knowledge and culture among students, colleagues, and the general citizenry through teaching and research. The University has a teaching faculty of approximately 950 and approximately 21,000 students enrolled in 100 degree programs in the Colleges of Applied Science and Technology, Arts and Sciences, Business, Education, Menninger College of Nursing, and Fine Arts. The first public university in Illinois, Illinois State is located in Bloomington-Normal, a diverse, professional community of 100,000 people.

The University website address is http://www.isu.edu

APPLICATION PROCEDURE: To assure full consideration, send letter of application, curriculum vitae, statement of administrative philosophy, and the names, addresses, e-mail addresses, telephone and fax numbers of at least three references to: Illinois State University Office of the Provost Associate Vice President for Undergraduate Studies Search Campus Box 4000 Normal, IL 61790-4000 Telephone: (309) 438-2430 Fax: (309) 438-5602 gbennett@ilstu.edu

REFERENCE LIBRARIAN
University of Connecticut Stamford Regional Campus Library
(Search # 3993A12)

Working as a team environment, the incumbent participates in the public service programs of the Jerome Frank Library in Naugatuck, including reference and instructional services, computer-based services, and collection development. This position also serves as the Stamford Campus Library liaison to undergraduates on academic programs in history and political science and fills in as the Circulation Desk as needed. Evening and weekend hours are required.

MINIMUM QUALIFICATIONS INCLUDE:
- ALA-accredited MLS, knowledge of computer applications in libraries, and excellent written and verbal communication skills.

DESIRED QUALIFICATIONS INCLUDE:
- Reference experience in an academic or research library; effective teaching and instructional skills; and experience in e-mail/surfer Internet applications.

SALARY RANGE: University Librarian rank and salary commensurate with experience. A minimum starting salary of $48,000.

APPLICATION PROCEDURE: Submit a letter of application, resume, and the names, addresses, and telephone numbers of three professional references to Britta F. Frank, Director of Library Services, University of Connecticut Libraries, Box 950, 369 Fairfield Road, Storrs, CT 06269-1005.

Screening will begin immediately and continue until the position is filled.

For further information about the UConn Libraries or to see a complete job description for this position, see our homepage at http://www.lib.uconn.edu

At the University of Connecticut, our commitment to excellence is complemented by our commitment to building a culturally diverse staff. We actively encourage minority applicants and people with disabilities to apply.
SR. DEVELOPMENT WRITER

In this vital role, you will help secure funds for Lesley’s programs, with an initial emphasis on the Art Institute of Boston at Lesley College. The ideal candidate will have 3-5 years’ experience in corporate and foundation grantwriting. Excellent writing, research, and interpersonal skills required. Bachelor’s degree required, advanced degree preferred. Familiarity with arts-related funding sources helpful.

Send a letter of interest, resume, and two recent writing samples to: Human Resources, 4C, Sr. Development Writer, Lesley College, 29 Everett Street, Cambridge, MA 02138; fax to 617-349-8126; or email to HR@lesley.edu. Visit our website — http://www.lesley.edu

Lesley College prides itself on the achievement of a gender/racial/ethnic/linguistic balance among students, faculty, and staff. Persons of color are strongly encouraged to apply. Lesley College is an AA/EEO Employer.

Staff Therapist
Counseling Center
Syracuse University

The Syracuse University Counseling Center is seeking applicants for three full-time, nine-month staff therapist positions. Primary duties include providing individual psychotherapy, crisis intervention, consultation, and referral services to Syracuse University undergraduate and graduate students. Minimum qualifications and experience include a master’s degree in a mental health field and three years’ clinical experience (preferably with a young adult population) and/or equivalent combination of education and experience. Licensed or license eligible applicants are preferred.

Executive Director of Campus Living

The University of Maine is seeking an experienced, creative, and innovative professional with excellent communication and management skills to serve as its Executive Director of Campus Living. Reporting to the Vice President for Student Affairs, the Executive Director of Campus Living is responsible for the planning, management, and student-centered services associated with all campus dining and residential living at the University of Maine. Working collaboratively with colleagues in Student Affairs and Academic Affairs, the executive director is expected to develop a campus living environment that is supportive of the goal of the University of Maine to develop future citizens as a collegial community of learners. The executive director serves as a member of the Student Affairs Leadership Team and works to assure that quality services are available to residential students, commuter students, faculty, and staff.

Candidates should have a Master’s Degree or an equivalent in a discipline related to the administration of residential programs and dining services and extensive experience in management of the delivery of such services in higher education. In addition, the executive director should demonstrate strong skills and abilities to:

- provide collaborative leadership with an emphasis on continuous quality improvement
- effectively communicate with the entire University community
- foster values of diversity and tolerance
- establish and implement long range planning processes to assure Campus Living facilities and programs continue to meet the needs of a changing student population
- maintain a program of facility maintenance, renovation, and upgrade that assures quality residence and dining facilities
- establish and maintain financial policies that assure the fiscal viability of all Campus Living operations
- apply technology that is innovative and cost effective in the management and delivery of campus living programs
- develop and implement new and creative housing and dining options that contribute to the mission of the University of Maine
- foster the development of residential education programs that contribute to the academic and social success of students

Salary is negotiable and dependent upon experience and qualifications. Review of applications will begin on March 15, 1999, and will continue until the position is filled. Applicants should submit a letter of application, curriculum vitae, and the names, addresses, e-mail addresses, and telephone numbers of five references to:

- Campus Living Search Committee
- Student Affairs
- 5703 Alumni Hall
- University of Maine
- Orono, Maine 04469-5703

Located in Orono, the University of Maine is the state’s land grant and sea grant institution and the flagship of the seven-member University of Maine System. Enrollment is growing, standing currently at approximately 9,500 students, of which 2,000 are graduate students. The university is located eight miles north of Bangor. Set along Maine’s Stillwater River, the campus is within an hour’s drive of mountains, the ocean, and Acadia National Park.

The University of Maine is an Equal Opportunity/Affirmative Action Employer. Women and minority candidates are encouraged to apply.

ASSISTANT DIRECTOR OF ADMISSIONS/COORDINATOR OF MULTICULTURAL RECRUITMENT GR810

Due to significant growth in minority student enrollment at WPI, and in response to growing demands on the Office of Student Affairs and Outreach Programs, the University is expanding its student recruitment efforts. WPI is adding a full-time position to advance our already strong initiatives and commitment in this area and seeks to hire an Assistant Director of Admissions/Coordinator of Multicultural Recruitment. This position will report to the Director of Admissions.

The appropriate candidate will develop, maintain, and implement marketing plans designed to attain the University’s goals and objectives for multicultural recruitment. Responsibilities will include:
- Traveling to represent the University at targeted high schools, community colleges, college fairs, and other appropriate programs and sites, coordinating on- and off-campus programs for prospective students of color, and cultivating and maintaining relationships with college counselors and community agencies.
- Collaborating with faculty, student organizations, airmen, and other college offices including financial aid offices, to meet multicultural recruitment objectives.
- The successful candidate will also be responsible for providing support to the Director of Admissions, including overseeing prospective student interviews, conducting group information sessions, recruitment travel, and evaluating applications for admission.

The position requires a Bachelor’s degree, a strong commitment to cultural diversity, and a minimum of three years of experience working with multicultural students. Experience in a College or University Admissions Office is demonstrated. A strong creative and energetic personality is also necessary as part of the team. WPI is an equal opportunity employer. Applications will be accepted until June 1999. The successful candidate will begin their duties at WPI on July 1, 1999. Applications are encouraged from all qualified individuals. WPI is an affirmative action employer.

Institute of Science and Technology (WPI) is an innovative educational institution that conducts research, science, management, the humanities, and the social sciences. Experience in an environment of about 1,200 undergraduate students at WPI is preferred. For more information, contact WPI at 508-831-5715 or email to admissions@wpi.edu.

Indiana University
South Bend

TEACHING POSITIONS

The English Reading Communication Department invites applications and nominations for a tenure-track position in English and/or language arts teaching. Applicants are encouraged to apply by August 1999.

Preference is given to Master's degree candidates. Equivalent experience will be considered. The ideal candidate will have a strong commitment to composition and rhetoric in community college teaching and experience in one or more of the following: women's literature, women's studies, ESL, and composition pedagogy.

COMMUNICATIONS: requires a Master's degree in English Communication and prefers college-level teaching experience. The ideal candidate will have a strong commitment to composition and rhetoric in community college teaching and experience in one or more of the following: Public Speaking, interpersonal Communication, Gender Communication, and/or Writing in the Disciplines.

SALARY: Competitive; beginning annual salary.

APPLICATION REVIEW: Applications received by August 1, 1999 will be considered for the position.

TO APPLY: Submit a letter of application, resume vitae, writing sample, and three letters of recommendation to the Office of Human Resources, 114 Service & Maintenance Building, Onondaga Community College, 5501 Oncodaga Road, Syracuse, NY 13215-2099 (Attention: English or Communications search).

Women and minority candidates are encouraged to apply, as are applicants with disabilities. Onondaga Community College is an equal opportunity employer.

INDUSTRIAL & AUTOMOTIVE MAINTENANCE

Bachelor's Degree in Industrial Technology, Electronics, or with 20 credit hours in Industrial Maintenance, Electricity, and/or Robotics required. Consideration will be given to those with an Associate's Degree and comparable experience, teaching and/or related industrial experience.

INFORMATION SYSTEMS/ MICROCOMPUTERS

Bachelor's Degree in Management Information Systems or related field required. Master's Degree preferred in computer systems, Internet and object-oriented programming desirable. Two years teaching experience at the community college level important. Equivalent experience required. Programming or microcomputer experience required.

INFORMATION SYSTEMS/ NETWORK ADMINISTRATION

Bachelor's Degree in Management Information Systems or related field required. Master's Degree preferred. Consideration given to those with experience in networks and programming desirable. Two years teaching experience, preferably at the community college level, and/or applied information systems experience required.

Waubonsee Community College is a fully accredited college with a head count enrollment of 10,000. The college is located 40 miles west of Chicago in one of the fastest growing communities. Waubonsee provides outstanding service to students and residents through demonstration of its core values, service, value, innovation and accessibility.

Review of applications will begin April 12, 1999. To apply, send a letter of interest with resume and college application form to the Office of Human Resources.

Eastern Michigan University
DEAN
College of Business

Eastern Michigan University invites applications and nominations for the position of Dean of the College of Business. The Dean reports directly to the Provost and Vice President for Academic Affairs and provides academic, intellectual, and administrative leadership to the College.

The Dean will be responsible for improving and promoting the quality and effectiveness of the College's instructional and research programs, external affairs and fund raising. The successful candidate should have:

- relevant knowledge and experience in program planning and development, budgeting, and administration typically acquired through an earned doctorate in a College of Business discipline and/or a distinguished record of management and leadership achievements in the private sector or government.
- a record of teaching and research appropriate to the rank of full professor in one of the four departments in the College.
- demonstrated commitment to excellence in teaching, research and service.
- commitment to the expansion of off-campus academic programming.
- demonstrated expertise in faculty recruitment, program improvement, leadership of faculty and commitment to diversity and community; and

- ability to generate external resources for the College.

Eastern Michigan University is a public institution located in Ypsilanti, Michigan, just 7 miles east of Ann Arbor and 35 miles west of Detroit. The University enrolls approximately 24,000 students and employs 730 tenure-track faculty represented by the American Association of University Professors (AAUP).

The College of Business is housed in the state-of-the-art Owen Building opened in 1990. The College includes four departments: Accounting, Finance/Computer Information Systems, Management, and Marketing. There are 74 tenure-track faculty members in the College who serve 2,300 undergraduate students and 750 graduate students. The College is AACSB accredited at the undergraduate and graduate levels and offers programs leading to the Bachelor of Business Administration and Master of Business Administration, as well as Master of Science in Accounting, Master of Science in Human Resources/Organizational Development and Master of Science in Computer-Based Information Systems.

Review of applications will begin April 20, 1999, and will continue until the position is filled. The anticipated starting date for the Dean is July 1, 1999, but is negotiable. Salary is competitive and commensurate with qualifications and experience. Candidates should forward a letter of interest, resume and the names, addresses, and telephone numbers of at least three references to:

Dean Barry Fish, Chair, Search Committee
Position APAA9909
202 Bowen
Eastern Michigan University
Ypsilanti, MI 48197

Applications from women and members of minority groups are encouraged.

Vice President of Marketing & Development

CAST (Center for Applied Special Technology) — March 1999

CAST, the Center for Applied Special Technology, is seeking a Vice President of Marketing and Development to provide strategic leadership to the business side of this non-profit organization - to increase its visibility, broaden its funding base, distribute its products, and enhance its impact. The mission of CAST is to expand opportunities for individuals with disabilities through innovative uses of computer technology. It pursues this mission through research, product development, and model educational programs that further universal design. CAST is a national leader in Web-based educational development. The Vice President of Marketing and Development will direct the organization's efforts to increase revenue generation, decrease its dependence upon small local foundation support and individual gifts, and increase its access to universities, licensing fees, contracted revenue, large national foundation support, and federal grants and contracts.

This position requires a commitment to CAST's mission combined with marketing, general management, and leadership skills and relevant substantive knowledge of nonprofit development, publishing, and technology, especially as applied to education. The ideal candidate will bring some combination of the following:

1) leadership experience in the development of nonprofit organizations with significant or federal support from major foundation grants
2) familiarity with the business side of educational publishing
3) experience with the licensing and distribution of software and electronic multimedia products
4) experience managing the technology transfer activities of a nonprofit research institution
5) and comfort applying general marketing and business skills to a nonprofit mission

CAST seeks to broaden and reconfigure its funding base, increasing its visibility and securing new forms of financial support. While the skill set of the new Vice President may be drawn from either nonprofit development or for-profit marketing and business strategy, the individual selected must bring the individual to add value to both efforts at CAST.

All inquiries, nominations, and applications should be directed to:
Alan Witchel, Vice President and Director, Internal Box 18366
Isaacs, Mill, 334 Boylston Street, Suite 500, Boston, Mass.
02110-3806, Phone: 617-262-6500.
Fax: 617-262-6509, E-Mail: awitchel@imsearch.com

CAST promotes the acceptance and tolerance of all, regardless of race, color, national origin, religion, sexual orientation, sex, gender, or disability. We are an equal opportunity employer.

We are unable to accept phone calls at this time.
Harvard Law School

Graduate Program
Assistant Director, Admissions and Financial Aid

The Graduate Program in the division of Harvard Law School responsible for the Masters of Laws (LLM) and the Doctor of Juridical Science (S.J.D) degrees and for various aspects of graduate legal studies. Attracting lawyers of demonstrated intellectual and academic excellence from all over the world, the Graduate Program promotes awareness of foreign law and legal systems among the School's faculty, J.D. students and alumni.

Reporting to Deputy Director, oversees admissions and financial aid operations for LLM and SJD degree programs and visiting scholar and researcher programs. Manages operations review process, evaluates substantial portion of applications for both admissions and financial aid. Prepares statistical reports and trend analyses. Participates in development of admissions, financial aid and recruitment policies. Supports recruitment and fundraising. Admissions graduate scholarship and loan funds manages student visa and term-of-stay matters. Develops admissions and financial aid systems for the School's Masters of Law Program. Manages hiring of new students and reviews administrative tasks. Works closely with admissions and student services staff.

A required LL.M. or S.J.D. degree is preferred. Substantial experience in graduate program administration and/or legal education or admissions international experience preferred. Demonstrated strong written, verbal, analytical, and professional management skills. Sound administrative judgment and sensitivity to needs of students, faculty, and other university constituents required. Preference for web-based communication tools and familiar with Word, Access and web-based communication tools.

CONNECTICUT
Community-Tech Colleges

PRESIDENTIAL SEARCH - EXTENDED
GATEWAY COMMUNITY-TECHNOLOGICAL COLLEGE
NEW HAVEN, CONNECTICUT

Applications and nominations will be accepted until position is filled.

The Board of Trustees of the Connecticut Community-Technical College System invites nominations and applications for the Chief Executive Officer position at Gateway Community-Technical College, one of twelve colleges within the state system of two-year, comprehensive community-technical colleges.

Founded in 1992 as a result of the merger of Connecticut's systems of community and technical colleges, Gateway serves approximately 4,000 full-time and part-time learners in credit programs at its two campuses in New Haven and North Haven. Gateway also plays a strong role in the region's economic and community development through partnerships with area businesses, industries, educational institutions, and community organizations. To advance Gateway's position as a valued resource for the communities it serves, the Board of Trustees is most interested in candidates who will lead the college, working within a system, through strategic planning and progressive programming including learning technologies, advancing economic and community development, enhancing resources through development and marketing.

Position announcements may be obtained from, and letters of application addressed to:

Dr. Bruce H. Leslie, Chancellor,
BOARD OF TRUSTEES OF CONNECTICUT COMMUNITY-TECHNICAL COLLEGES,
61 Woodland Street, Hartford, CT 06105.

The Connecticut Community-Technical Colleges are equal opportunity, affirmative action employers, m/f.

ASSISTANT DEAN OF RESIDENCE LIFE FOR RESIDENCE EDUCATION

The Assistant Dean for Residence Education provides the primary leadership role for the comprehensive residential educational and social programming efforts within a diverse residential community housing 4000 undergraduate and graduate students in seven residence halls and 51 apartment buildings. The assistant dean oversees the academic, educational, developmental, spiritual, cultural, and social programs that create living environments that are consistent with the principles of a Catholic Jesuit university and that reflect a departmental commitment to connect students out-of-class experiences with their academic initiatives. She supervises a student staff of 15, including RAs and NHs, and directs and develops the student-centered activities for the four residence halls. The assistant dean coordinates departmental research and graduate student assessment studies and submits the annual section of the HACCS report.

Marquette University is a Catholic Jesuit university located in Milwaukee, Wisconsin. Founded in 1881, the university currently serves 11,000 students, including 3,000 graduate and professional students, in eleven colleges and professional schools. The university offers more than 50 undergraduate majors and more than 70 master's degrees and 18 doctoral programs.

The ideal candidate will possess the following qualifications:

- A commitment to and record of personal and professional integrity and character
- A master's degree in student personnel or a related field
- A minimum of three years in a similar position
- Excellent communication and organizational skills
- Ability to work well in partnership with students and colleagues in a variety of offices and departments
- Enthusiasm for promoting the Catholic, Jesuit mission of Marquette University
- A commitment to fostering diversity

Applications should include a cover letter, resume, and the names, titles, addresses, and telephone numbers of at least three professional references and should be addressed to:

Dr. Jim McMahon
Dean of Residence Life
Marquette University
PO Box 1881
Milwaukee, WI 53201-1881
(414) 288-7208

Applications cannot be returned in April to receive full consideration.

Compensation is competitive and includes a generous benefits package.

www.Marquette.edu/reslife
Chair, Department of Aging and Mental Health, Louis de la Parte Florida Mental Health Institute, University of South Florida

The Louis de la Parte Florida Mental Health Institute (FMHI) of the University of South Florida (USF) seeks qualified candidates for the faculty position of Chairperson, Department of Aging and Mental Health (AMH). The successful candidate will have a record of achievement commensurate with appointment at the rank of Associate Professor or Professor, tenure negotiable. Qualifications: a doctorate or other terminal degree in areas related to aging and mental health; an established record as a senior-level researcher in aging and mental health; a record of external funding; significant administrative experience; a history of developing collaborative relations, both internal and external to the university; and a commitment to work productively with diverse organizations and to the principles of equal opportunity. The applicant should be prepared to lead efforts by AMH faculty in conducting policy and practice relevant research and training that will result in improved mental health services for older adults and their families.

AMH consists of 7 faculty and 25 professional and support staff, with significant external grant funding and is one of four departments within FMHI, the state's only publicly oriented behavioral health research and training institute. FMHI receives approximately $10M in university funding, and $11M in contracts and grants, and works closely with numerous state agencies and organizations, as well as community behavioral healthcare provider agencies, aging services, consumer groups, and relevant committees and members of the Florida Legislature. USF is a major research university with a large consortium (Institute on Aging) of departments/divisions and centers with aging interests and degree programs. For more detail on this position and other aging interests at the University of South Florida, please visit our web site at: http://fmhi.usf.edu/amh

Application Process: Send letter of application, vita, names, telephone numbers, and addresses of three references postmarked by April 15, 1999 to Larry W. Dupree, Ph.D., Acting Chair, Department of Aging and Mental Health, Louis de la Parte Florida Mental Health Institute, University of South Florida, 13301 Bruce B. Downs Blvd., Tampa, FL 33612. Under Florida law, meetings of the search committee and all documents related to search are open to the public. USF is an equal opportunity, affirmative action, equal access institution. For disability accommodations contact Ms. Dee Keiser at 813/974-9810 at least 5 working days in advance of need.

EXECUTIVE DIRECTOR
OF CAMPUS PLURALISM
AND EQUAL OPPORTUNITY

University of Southern Maine

The University of Southern Maine (USM) invites nominations and applications for Executive Director of Campus Pluralism and Equal Opportunity. The Executive Director will provide leadership for USM’s newly established Diversity Plan.

Reporting to the President, the Executive Director holds a key position on the President’s Staff. The Executive Director provides leadership for achievement of a pluralistic and diverse University; serves as liaison and support to areas of the University with issues of equal opportunity; diversity, pluralism or bias and serves ex-officio on committees whose efforts are directed toward diversity and pluralism. This position handles EO complaint procedure at all levels and manages compliance for applicable regulations, laws and policies.

QUALIFICATIONS: The candidate must possess: earned Masters Degree in a relevant field, minimum of five years experience: or Baccalaureate Degree and seven years such experience. The candidate must possess excellent organizational, analytical, planning, mediation/conflict management, marketing and communication skills. The candidate must have a proven ability and skill in the investigation and management for civil rights complaints; and have the ability to work with students, professional, clerical staff and faculty in a variety of disciplines.

The University of Southern Maine, with campuses in Portland, Gorham, and Lewiston, is the largest of the seven campuses in the University of Maine System, with a graduate and undergraduate enrollment of more than 10,000. The student body is the most diverse in the State: half of the students are full-time; nearly 60% are women; and the average age of an undergraduate is twenty-seven. As a comprehensive university, it is a major educational force in the New England region committed to excellence in teaching, research, and public service.

The Greater Portland area, located on Casco Bay, is a small city offering an exceptional range of cultural and recreational activities, historical settings, and scenic beauty.

Review of applications and nominations commence immediately. To apply, submit a letter of application or nomination, a curriculum vitae, and the names of three references (contacted with permission) to:

Dr. Richard Maiman
Associate Provost for Graduate Studies
University of Southern Maine
P.O. Box 9300
Portland, Maine 04104-9300

Visit this web site at
www.usm.maine.edu/hr/s/job
for a full position description.

USM seeks candidates with a strong commitment to diversity and who are supportive of a welcoming work/classrooms environment.

EO/AA
AGNES SCOTT COLLEGE
THE WORLD FOR WOMEN

Agnes Scott College seeks highly qualified, experienced candidates for the position of Julia Thompson Smith Chaplain. An endowed position, the Julia Thompson Smith Chaplain fulfills a crucial role in the intellectual and spiritual life of the College. The dialogue between faith and learning at Agnes Scott College fosters academic freedom, as well as an appreciation of pluralism and a desire for diversity. Agnes Scott College is a highly selective, independent national liberal arts college for women located in metropolitan Atlanta. In offering the world for women, Agnes Scott’s curriculum encourages students to become fluent across disciplines, across continents and across centuries. Founded in 1889 by Presbyterians, Agnes Scott College is a diverse and growing residential community with one of the largest endowments per student of any college in the country.

JULIA THOMPSON SMITH CHAPLAIN

Responsibilities. The Chaplain provides intellectual and spiritual guidance to a diverse faith community of students, faculty and staff through worship, pastoral care and counseling. The Chaplain will also work in collaboration with the Office of Multicultural Affairs to create and lead an inclusive and inclusive community of faith. The position reports to the Vice President for Student Life and Community Relations/Dean of Students and works in collaboration with the Office of Multicultural Affairs and other campus units.

Qualifications. A seminary degree is required, as is ordination in the Presbyterian Church (USA). A doctorate in religious studies or ministry is desirable. Previous campus ministry experience will be very helpful. The successful candidate will demonstrate knowledge of worship leadership, qualified candidates will be proficient in counseling skills, small group leadership and homiletics. Excellent communication skills, both oral and written, are required. Send letter of application, current resume and names and phone numbers of three references to: Agnes Scott College, Human Resources, 141 E. College Avenue, Atlanta, Georgia 30030. Review of applications begins immediately and continues until position is filled.

Agnes Scott College does not discriminate on the basis of sex, race, color, religion, national origin, age, or disability in its employment.

Affiliated with the Presbyterian Church (USA), Agnes Scott College has a strong commitment to diversity and urges members of underrepresented groups to apply.

An Equal Opportunity Employer

Full description at: http://www.fullerton.edu/coo/offer/gero/gero.html

DEAN, GRADUATE STUDIES

SUNY Empire State College seeks a Dean of Graduate Studies to provide academic leadership for five masters degree programs (M.A. in social policy, business and policy studies, labor and policy studies; M.A. in liberal studies; M.A.) serving over 900 students annually in innovative formats that combine intensive residencies with distance learning. The Dean has responsibility for academic leadership and program quality, enrollment management, and program planning, including budget, faculty and staff resources and facilities. The Dean supervises personnel, participates in college-wide planning, and administers graduate student services.

Requires earned doctorate in field related to the graduate programs, substantial college level administrative and teaching experience, demonstrated interest in education of adult students, familiarity with learning technologies, distance education, and innovative program delivery, capacity to work collaboratively. Anticipated hire date: June 1, 1999, or after. Review of applications begin March 10, 1999, and continue until position is filled. Submit letter, resume, and reference letters to Dr. Marjorie L. Lavin, Vice President for Academic Affairs, SUNY Empire State College, One Union Avenue, Saratoga Springs, NY 12866. AAEEOE

Albion College
DIRECTOR OF MULTICULTURAL AFFAIRS

Albion College, a selective, private, residential liberal arts college, invites applications for Director of Multicultural Affairs. The successful applicant will work to foster an environment of mutual respect, acceptance, appreciation and caring for all members of the Albion community. Position reports directly to the VP for Student Affairs. Qualifications: Master's Degree in a relevant field such as higher education, required. Doctorate or significant progress toward completion of doctorate in a relevant field preferred. Minimum of five years' relevant, full-time experience, some in private college setting preferred. Required: successful track record of implementing programs which decrease discrimination and increase multicultural understanding and competence, extensive experience with minority students and student retention, understanding of training, management, interpersonal, public speaking, and problem-solving skills, awareness of and sensitivity to racial, cultural and gender-related equity issues, and demonstrated commitment to multicultural education. Review of applications begins immediately and continues until position is filled. For further information visit our website at: www.albion.edu and take a campus tour.
ASSISTANT PROFESSOR
SCHOOL OF EDUCATION (MULTIPLE POSITIONS)

Ph.D./Ed.D. or J.D. - location or related field required. Demonstrated excellence in teaching, scholarship, and in collaborating with schools and other appropriate settings and policy systems required. Must be well prepared to educate students from diverse socio-economic and ethnic/racial backgrounds and to ensure success and equity for all students. Dedication to realizing the best traditions of the land grant university is required. Area of expertise must be in one or more of the following:

- Teacher Education, in one or more of the following:
  - Reading and Literacy
  - Elementary and/or Early Childhood Education
  - Language Arts, with preference for secondary level
  - Science and/or Mathematics Education at the elementary, middle, or secondary levels
  - Middle Grades Education
  - Special needs of socially and economically disadvantaged students, multilingual education, culturally diverse populations, and/or special education and inclusion
  - Preparation of teachers in the application and integration of technology in the classroom

All of the former require a strong orientation to research-based professional practice; an understanding of, and commitment to, developmentally appropriate practices in the area of application; knowledge of, and experience with, practices that are consistent with research-based educational reforms in the area of application; and a record of scholarly accomplishment appropriate to the level of appointment sought.

- Adult Education, focusing on the preparation of adult educators in the areas of adult literacy, training and development, life-long learning, and continuing education;

- Educational Policy and Leadership, including the ability to provide substantive contributions and to develop strong programmatic research and service activities in one or more of the following: educational policy analysis, organizational development, leadership preparation and theory, systems analysis and change;

- Research Methods, including ability to provide instruction and advising to students in quantitative methods, action and policy research and evaluation, with a content focus that contributes to one or more of the priority areas noted in this announcement;

- Foundations of Education, including an emphasis on social and cultural foundations-related educational policy and practice and/or history and systems of education, and psychology of learning/educational psychology.

These are tenured-track positions beginning in the Fall of 1999. Level of appointment is contingent on experience and scholarly record, but it is anticipated that appointments will be made at the Assistant level unless there are exceptional circumstances. Review of applications will begin 4/14/99 and continue until all positions are filled. Please identify the area to which application is being made. Submit letter of application and resume to: Robert Feltner, Search Committee Chair, (Log # 131122), University of Rhode Island, P.O. Box 1, Kingston, RI 02881. The University of Rhode Island is an AA/EEO employer and is committed to increasing the diversity of its faculty, staff and students. Persons from under-represented groups are encouraged to apply.

POSITION OPENINGS—ECONOMICS
ASSISTANT, ASSOCIATE OR FULL PROFESSOR OF ECONOMICS

Responsible for teaching basic and advanced courses in economics at the Masters level, research in areas of expertise and interests, supervision of doctoral candidates; and interdisciplinary contribution to the research and teaching of other faculty members. While candidates at any level will be considered, this is primarily a senior level position, with preference given to candidates with a proven record of research and teaching. Ideally, candidates will have several years of experience, a research reputation, and will be able to make immediate contributions to the intellectual environment at the Johnson School, and to the M.B.A. and Ph.D. curricula. Rank will be commensurate with prior experience. Direct inquiries to Associate Dean John A. Elliott, Cornell University, S.C. Johnson Graduate School of Management, Ithaca Hall, Ithaca, NY 14853-6201. Applicants should have completed a dissertation or be at the dissertation stage of a doctoral program. Applications should include a vita, together with a dissertation proposal or abstract, and copies of recent papers. An Affirmative Action/Equal Opportunity Employer.

CLINICAL TEACHING

The Clinical Program at American University's Washington College of Law is seeking a practicing attorney interested in clinical teaching to fill an opening in the Community and Economic Development Law Clinic. Student's represent small neighborhood-based nonprofits and microenterprises in underserved areas of the District of Columbia. Students assist their clients in deciding on choice of entity, in gaining tax exempt status, in acquiring property and funding, in dealing with licensing and zoning issues, and in other transactional matters. The Clinic's clients include public housing-based landscaping and painting companies, transitional shelters, tenants co-ops and tenants' associations, and community development corporations. The Clinic teaches students through supervision of their cases, simulations, a seminar and weekly case staffing. The Practitioner-in-Residence will supervise students in their fieldwork and case staffing, and plan classes for and teach in the seminar. All in collaboration with the faculty director of the Clinic. In addition, the Practitioner-in-Residence will participate with the other clinical faculty in the Office of Clinical Programs in periodic small seminars concerning issues in lawyering and clinical teaching. The Practitioner-in-Residence will also have an opportunity to earn an LL.M. degree, and to engage in scholarly research and write for publication with the encouragement, feedback, and support of interested colleagues.

Minimum qualifications include at least 3 years of experience as a practitioner, preferably in any facet of transactional or community development law relevant to the work of the program. Applicants should demonstrate a commitment to working in low-income communities. A demonstration of scholarly interest in the relevant fields of law is beneficial. Because one of the goals of the program is to provide an opportunity for practitioners to develop the abilities and credentials necessary for careers as clinical teachers, applicants should have an academic and professional record that makes it likely that they would fulfill this ambition.

Applicants should send a cover letter and curriculum vitae to:

Prof. Ann Shalleck
Director of Clinical Programs
American University
Washington College of Law

Washington, D.C. 20016

With a copy to Professor Susan Bennett, the Director of the Community and Economic Development Clinic by April 1, 1999.

American University is an equal opportunity employer and we encourage applications from a diverse group of candidates.
University of Colorado

DIRECTOR OF EMPLOYEE BENEFITS

The Director of Employee Benefits provides leadership for the development and administration of the University’s employee benefit policies and programs. The Director will be responsible for creating a new Employee Benefits Department as part of the consolidation of payroll and benefits services for the University of Colorado system. The position reports to the Vice President for Budget and Finance.

Minimum Qualifications: Bachelor’s degree in Business Administration or related field, eight years experience with increasing responsibility in human resources with heavy emphasis in employee benefit planning, design, and implementation in a large organization, demonstrated success in the management of health care benefit vendor contracts, experience in working with both fully insured and self-funded employee benefits programs, and exceptional written and oral communication skills.

Preferred Qualifications: Advanced degree in related field, Certified Employee Benefit Specialist (CEBS) designation, public sector experience, and experience in higher education environments.

Salary: Competitive and commensurate with experience to apply. Send a letter of application and resume to Chair, Search Committee, University of Colorado, Campus Box 27, 914 Broadway, Boulder, CO 80309, or fax to 303/492-2674.

The University of Colorado is committed to diversity and encourages applications from women, minorities, persons with disabilities and veterans.
University of Notre Dame

DIRECTOR

CAREER AND PLACEMENT SERVICES

The University of Notre Dame invites applications for the position of Director of Career and Placement Services. Notre Dame is a Catholic university founded by the Congregation of Holy Cross with a student body comprised of approximately 800 undergraduates and 2200 graduate and professional students. The student body comes from all 50 states and over 70 foreign countries.

The Director will be expected to provide visionary leadership in advancing a strong student-centered career services office which is known for technological innovation and creative career programming. The office recently moved to substantially-expanded new facilities that will offer additional opportunities for enhancing career services.

PRINCIPAL RESPONSIBILITIES: The Director is one of 11 department heads within the Division of Student Affairs and supervises a permanent staff of 17 with an appropriate corresponding budget. The Director is in charge of campus career development efforts for all undergraduate and graduate students, with the exception of students in the Law School and the MBA program. It is the responsibility of the Director to articulate the department mission, to establish policies and procedures in support of student career service needs and to represent the department within the wider University community, as well as to a variety of external constituencies.

QUALIFICATIONS: Qualified candidates will have an advanced degree in counseling, higher education administration or a related field and a minimum of 5 years experience in college or university career services administration. An equivalent combination of education and experience will be considered. Excellent writing, oral and interpersonal skills are required. Candidates must also have experience in budget management, strategic planning and program implementation and evaluation. Extensive experience with the development of a technological infrastructure for university career services is necessary. In addition, the candidate should demonstrate an ability to build a strong network of external relationships. The successful candidate will also possess a commitment to fostering Judeo-Christian values, consistent with the mission of a Catholic university.

APPLICATION PROCESS: Interested applicants should submit the following material to the Department of Human Resources, Director of Career and Placement Services Search, Job # 8014-169, University of Notre Dame, Notre Dame, Indiana 46556.

- A current curriculum vitae.
- A letter outlining the candidates qualifications.
- A brief statement describing the role of a comprehensive career services center.
- A list of names, addresses and phone numbers of five references.

Nominations are also encouraged. Applications and nominations will be accepted on a rolling basis at the discretion of the Search Committee.

The University of Notre Dame is an Equal Opportunity/Affirmative Action Employer.
**THE COLLEGE OF ST. CATHERINE**

The College of St. Catherine, located in St. Paul and Minneapolis, Minnesota, seeks three deans to form a leadership team for its academic programs. Responsibilities include the integration and coordination of academic programs across the two college campuses. The positions are:

- **Dean of Arts and Sciences**
- **Dean of Professional Studies**
- **Dean of Health Professions**

The deans will work as a team to integrate and strengthen the College’s academic programs as it implements a strategic vision to become "the world’s preeminent Catholic college educating women to lead and influence." Founded in 1905 by the Sisters of St. Joseph of Carondelet, the College of St. Catherine is the largest Catholic college for women in the United States, and is entering a new era of growth and development under the leadership of President Andrea J. Lee, IHM.

The College of St. Catherine has a tradition of excellence in liberal arts and sciences. Programs in health professions are well established and respected in the health care community. Strong programs in education, social work and business form the core of professional studies. The College enrolls 4,100 students on campuses in Minneapolis and St. Paul, and offers graduate, baccalaureate, and associate degrees, and certificates. St. Catherine has an ongoing, historic commitment to educating women, fostering academic excellence, and providing access to students of diverse backgrounds. Programs are offered in day, evening, and weekend formats.

The deans will work in an environment of cooperation as part of a collaborative team. This team will implement the strategic plan, which includes the creation of four new Centers of Excellence—Women, Science, and Technology; Women and Health; Economic Justice and Public Policy; and Women and Spirituality.

**Priorities for Deans**
- Partner with the Vice President for Academic Affairs and other administrators to shape institutional culture
- Develop a diverse community
- Support to the education and development of women
- Strengthen and develop visibility for academic programs

**Leadership Characteristics**
- Opportunities in leadership and faculty development
- Capacity to develop systems and administration for a two-campus program
- Responsibilities include the integration and coordination of academic programs across the two college campuses
- Has commitment to continuous development of diversity and recruitment of diverse faculty and staff

The academic deans should possess the capacity to work with ease in a collaborative environment; provide leadership and direction in a period of change; partner in institutional planning; provide creative ideas and support; be committed to the improved achievement of academic departments and programs; and work cooperatively with faculty and academic support staff to build student-centered services and administrative processes.

**Dean of Arts and Sciences**
- Responsible for faculty and curriculum of traditional arts and sciences, including humanities, fine arts, natural and social sciences; general education; and liberal studies in associate degree programs for health professions. Duties include budget planning, faculty development and evaluation, student grievances, and scheduling and staffing of courses.

**Dean of Professional Studies and Continuing Education**
- Responsible for faculty, curriculum, and administration of departments in education (undergraduate/graduate/master's), Business (including the Center for Sales Innovation), Social Work (undergraduate/master's), Family, Consumer and Nutrition Sciences, Exercise and Sport Science, Masters in Library and Information Science, Masters in Organizational Leadership, and energetic administration of expanding Continuing Education and Weekend College programs.

**Dean of Health Professions**
- Responsible for administration, faculty, curriculum, and programs in the health professions. Programs include baccalaureate, associate, graduate, and professional programs in Nursing, Physical Therapy, Occupational Therapy, Respiratory Care, Health Information, Radiography and Sonography, Health Informatics, and other health-related disciplines. Must work closely with faculty and professional accreditors. Candidates should be entrepreneurial in creating partnerships with academic programs and with the health care industry as the Center for Women and Health evolves.

We seek a vital team with complementary talents and experience. The position of assistant to the dean in health professions may change with experience and talents of the individuals selected. The search will proceed separately but on a concurrent timeline concluding in the selection of a team of three deans. The new academic deans should be in place by the summer of 1999. The search will be assisted by Dr. Patricia Ruerker of Academic Search Consultation Services. The College anticipates appointment of the deans by June 15, 1999.

**Job Openings**
- **Associate Vice President for Workforce Education**
- **Dean of Workforce Continuing Education and Lifelong Learning**

This position will report to the Associate Vice President for Workforce Education.

**Requirements**
- Leads and develops the team which is responsible for continuing education, outreach to business, customized training and government-funded business training, and the Highland Business Center.
- Provides leadership in the development of training curricula in response to community needs.
- Maintains and transmits appropriate data to local, state, and federal agencies. Provides leadership in strategic and operational planning.

**DEADLINE**
- Submit resume/application to ACC, Office of Human Resources, 5930 Middle Fork Rd., Austin, TX 78752. Review of applicants will begin on March 22, 1999. For more information, visit our website at www.aceactivates.com or call (512) 223-7534/7553.

**Contact Information**

**AUSTIN COMMUNITY COLLEGE**

**DEAN OF WORKFORCE CONTINUING EDUCATION AND LIFELONG LEARNING**

(039916)
Anticipate an exciting future at Cuyahoga Community College, a 2-year institution with three modern campuses. Here, we’re back to basics providing a high-quality, affordable education for our students and enhancing quality of life for our multicultural community. We offer excellent opportunities to move your career ahead and enjoy a satisfying future.

Chief Executive Officer - Western Campus
District Vice President

This leader will provide executive-level vision, academic leadership and direction to the Western Campus of Cuyahoga Community College as its Chief Academic and Administrative Officer. The Western Campus has a current enrollment of 10,000 students and is the largest of three Campuses within the College District.

We’ll look to this visionary to plan, direct, manage and evaluate the instructional, student development and support service programs of the Campus, while using a collaborative leadership style. This role includes responsibilities for preparing and managing the Campus budget and undertaking personnel development initiatives to support existing and emerging programs.

The CEO will serve as a member of the College Cabinet, providing College-wide leadership for specific programs and functions as assigned by the Executive Vice-President for Academic and Student Affairs. This integral contributor will use a matrix approach within a multi-campus district to coordinate activities of the central district office with the Campus, as well as provide strategic outreach support to Campus service areas.

Qualifications include a doctorate degree and progressively responsible administrative experience in higher education. Teaching experience is preferred, particularly at the community college level. Sensitivity to diversity issues within the community and an ability to promote information technology applications to teaching/learning and administration are desired. Evidence of effective leadership in supporting community economic development and workforce training and the ability to work effectively within and across community institutions is desirable, as is a demonstrated record of building strong programs to increase enrollment and address student and community needs.

The College offers an excellent compensation and benefits package. Interested applicants should submit a current resume, a statement of your view of the role of a comprehensive community college, photocopies of transcripts for earned degrees, a list of three references (names, titles, addresses and telephone numbers of current/former supervisors), and an Employment Application Form. The application form will be forwarded with a letter acknowledging receipt of application materials. Submit materials to: Director Staffing HR, Cuyahoga Community College, 700 Carnegie Avenue, Cleveland, OH 44115. Fax: 216-987-4799.

Affirmative Action/Equal Opportunity Employer M/F/D/V

HEAD COACH - VOLLEYBALL/SOFTBALL

Agnes Scott College is accepting applications for the head coaching position for volleyball and softball, and an instructor in physical education. Responsibilities include, but are not limited to: instruction in physical education, coaching and recruiting, scheduling, budget planning, general program management, supervision of support staff, and administrative duties as assigned. Qualifications for this ten-month, full-time position: Masters degree is required. Demonstrated coaching and teaching experience preferred. Candidate must possess working knowledge in the areas of recruiting and budgeting, a commitment to supporting the academic progress of student athletes and an understanding of NIAA rules and regulations. The College is a member of the NCAA Division III and sponsors seven varsity sports. Send letter of application, resume, and references to: Human Resources, Agnes Scott College, 141 E. College Avenue, Atlanta, Georgia 30309 or confidentially to 404/471-6682. Applications will be accepted until the position is filled. Agnes Scott College is a highly selective, independent national liberal arts college for women located in metropolitan Atlanta. In offering the world for women, Agnes Scott’s curriculum encourages students to become fluent across disciplines across continents and across centuries. Founded in 1899 by Presbyterians, Agnes Scott is a diverse and growing residential community with one of the largest endowments per student of any U.S. college or university. Agnes Scott has a strong commitment to diversity and urges members of the underrepresented groups to apply. Equal Opportunity Employer. Visit our home page at http://www.agnesscott.edu

Director of the Office of International Education

Central Michigan University is a comprehensive state university with over 800 faculty serving an enrollment of approximately 25,000 students. The institution is nationally recognized for offering one of the most extensive off-campus learning programs in North America. The program serves more than 10,000 off-campus students in North and South America utilizing an additional 1,200 adjunct faculty. The university has eight colleges and offers more than 30 undergraduate and graduate degrees and 150 major areas of study.

The main campus is situated on a 854-acre site in Mount Pleasant, a city of 25,000 residents located in the heart of the Lower Peninsula of Michigan.

The university is searching for an outstanding leader with the vision to assist in efforts to move the university into the next phase as an internationally recognized and technologically based institution with a focus on internationalization of curriculum. The director reports directly to the assistant vice president for academic affairs. The successful candidate will have a clear vision and leadership in the planning and delivery of high quality international education programs and initiatives developed and assisted in the oversight of the university’s international student population and encourage, guide and assist faculty in the development and implementation of international education initiatives.

Qualifications for the position include a Master’s degree, earned doctorate preferred, minimum of three years of professional experience in international education professional or academic credentials sufficient to earn equivalency among faculties and administrators, successful prior experience in an international education leadership role, broad knowledge of international education issues, including international students and scholars, study abroad, and faculty exchange programs; the ability to communicate effectively with students, faculty and administrators; fluency in English is required. One or more foreign languages is highly desirable as is experience in non-immigrant and immigrant immigration regulations.

CMU provides flexible benefits, an excellent retirement program with tax-deductible investment options, tuition waiver for employee and family, and competitive salaries in an environment committed to excellence and customer service.

Review of applications for the above positions begins April 1, 1999 and will continue until the positions are filled. The anticipated start date is July 1, 1999.

Candidates should submit a letter of application, resume, and references to: Human Resources, Central Michigan University, 500 S. University, Mount Pleasant, MI 48859 or fax 517-774-3033.

Practitioner-In-Residence in Clinical Program

American University. Washington College of Law, is seeking two lawyers who are interested in careers in clinical teaching to fill two openings in its Clinical Program for a two years renewable term as Practitioners-in-Residence beginning in the summer of 1999. The Washington College of Law currently has the following clinics: civil practice clinic, community and economic development law clinic, criminal justice clinic (prosecution and defense), domestic violence clinic (criminal and civil), international human rights clinic, tax clinic, and women and the law clinic. The openings may be in the civil practice clinic, the criminal justice clinic, the community and economic development law clinic, and the women and the law clinic.

Students in the Civil Practice Clinic represent low-income clients in a variety of cases in administrative tribunals and trial courts in the District of Columbia. In the Criminal Justice Clinic, students spend one semester providing representation in juvenile and criminal cases in Montgomery County, Maryland and a second semester prosecuting cases in Maryland law students in the Community and Economic Development Law Clinic represent small neighborhood-based nonprofits and microenterprises in underserved areas of the District of Columbia. In the Women and the Law Clinic, students provide representation in the District of Columbia domestic violence, child neglect, and support cases, as well as any legal matters that assist a client in addressing the underlying problems that brought her into the legal system. Each clinic teaches students through supervision, seminars, simulations, and case rounds.

The Practitioners in Residence will:
- take part in a training program during the summer to prepare them to supervise students who are representing real clients in actual cases.
- supervise a group of law students practicing in the clinical program and be supervised by experienced clinical teachers while doing so.
- participate with the clinical faculty in planning the seminar portion of each clinic.
- share teaching responsibilities with the clinical faculty for seminar portion of the program.
- conduct case rounds with his or her supervising attorney.
- participate with the clinical faculty in periodic discussions of “problems in clinical teaching”
- participate in the intellectual discussion about law offices and clinical teaching that is an established part of the work lives of the clinical faculty at Washington College of Law
- have an opportunity to earn an LL.M degree in International Legal Studies, with a specialization in one of five areas: International Human Rights, Gender Studies, International Environmental Law, International Trade and Banking or International Organizations or an LL.M in Law and Government.
- engage in scholarly research and write for publication with the encouragement, feedback, and support of interested colleagues.

Because one of the goals of the program is to provide an opportunity for practitioners to develop the abilities and credentials necessary for careers as clinical teachers, applicants must have an academic and professional record that would make it likely that they would fulfill this ambition. Minimum qualifications include a J.D. degree, outstanding academic record, three years of experience as a practitioner in a field of law relevant to the work of the program and membership in a bar. A demonstration of scholarly interest in the relevant fields of law is helpful.

Applications should consist of a cover letter and curriculum vitae.

Prof. Ann C. Shaileck
Director of Clinical Programs
American University, Washington College of Law

AMHERST COLLEGE
DIRECTOR OF
DATABASE SERVICES

Amherst College invites applications and nominations for the position of Director of Database Services (formerly called Administrative Computing). Reporting to the Director of Information Technology, the Director will provide leadership and vision to support the data systems that allow the smooth and effective administrative functioning of the College. Candidate will supervise a group of eight staff. The position will also manage the conversion from an in-house campus-wide software system to a commercial, client-server system.

QUALIFICATIONS: Bachelor’s Degree required; minimum of five years of experience in computing, preferably in a higher-education setting. Understanding of the administrative functioning of a college or university preferred. Experience with software conversions and client-server architecture is essential. Knowledge of the Web and its role in data access and administrative functioning desirable.

Amherst College is a private coeducational liberal arts college of approximately 1,650 students, 170 faculty, and 500 staff employees. Located in western Massachusetts, Amherst participates with Hampshire, Mount Holyoke and Smith Colleges and the University of Massachusetts in the Five College Consortium.

Applicants should submit a letter of application and resume, including the names of three professional references to: Chair, Search Committee for Director of Database Services, Box 2204, Amherst College, Amherst, MA 01002-5000. Applications will be considered until the position is filled.

Amherst College is an Equal Opportunity/Affirmative Action employer and encourages women, minorities and disabled persons to apply.

Counselor

Houston Community College System is seeking a Counselor for the Central College.

REQUIREMENTS: Master’s degree in counseling and guidance, psychology, student personnel management or social work, or a master’s degree plus 18 graduate hours in courses with guidance and counseling prefixes. LPC preferred. (Photocopy of transcript must accompany the application.) Three (3) years of experience counseling with adult population, preferably in a community college setting. Ability to counsel students in career exploration and decision-making processes. Experience in counseling diverse student populations will be given preference. Prefer experience in Admissions/Recruitment and financial aid advertisement in higher education.

Starting salary range: $39,180 to $45,228 plus excellent benefits.

Please refer to Job Vacancy Notice # 4081 when making an inquiry or applying for this position. An HCCS application is required for consideration. To request an application, call (713) 718-8566 or fax request to (713) 718-8599, or you may download an application from the web site at www.hccs.cc.tx.us. All completed application materials must be in the Human Resources office by April 19, 1999.

HCCS is an Equal Opportunity Employer.

WICHITA STATE UNIVERSITY

PALEOClimAtOLOGY

The Department of Geology and Geography invites applications for a tenure-eligible position starting August, 1999, at the rank of assistant professor. The successful candidate will be expected to teach at both the undergraduate and graduate levels, supervise student theses, and to establish a productive research program in their field of expertise. The Department offers Bachelor of Arts and Bachelor of Science degrees in Geology, and Masters degrees in Geology and Environmental Science. Active participation in the University’s interdisciplinary Masters program in environmental science is required. The University’s interdisciplinary Masters program in environmental science is required. The candidate will be expected to foster interaction with ongoing research in paleoecology, carbonate sedimentology, geochemistry, and structural geology. In addition to the general employment requirements described above, the applicant will be expected to teach courses in their field of specialty and occasional courses in sedimentary geology, environmental geology, and computer applications.

A Ph.D. in the geosciences is required at the time of appointment. The successful candidate should have demonstrated research focus on paleoclimatological systems analysis as deduced from the rock record and be strongly field oriented. Preference in the interpretation of paleoclimatological records with diastic sedimentology and surficial geology is required. Preference will be given to applicants with expertise in computer applications such as GIS (Geographic Information Systems) or other large database systems.

Applicants should submit letter of application addressing qualifications and experience, curriculum vitae, description of teaching and research interests, selected copies of relevant publications, evidence of teaching excellence, transcripts of academic work, and the names of 3 professional references (include postal and E-mail addresses) to:

Send resume and cover letter describing your abilities and interests.

Teacher-7/8 English/Team Teacher
Co-ed Quaker day school in N.W. Washington seeks a 7th and 8th grade English teacher with at least three years of classroom experience. The successful candidate will exhibit demonstrable enthusiasm for teaching English, have a clear understanding of the needs of the age group, be able to work cooperatively with a group of adults in a team setting and in a larger faculty, be comfortable in and excited about working with children from diverse backgrounds, appreciate the Quaker philosophy that underlies the School, be committed to community service and be comfortable working with students on camping and field trips. The successful candidate will also be comfortable with teaching an advisory curriculum, communicating effectively with middle school children and providing thorough communication with parents. Candidates should send resume and a cover letter explaining why they would be a good match for these criteria.

Send to Office of Personnel Services, Sidwell Friends School, 3825 Wisconsin Ave., N.W., Washington, DC 20016.

Illinois Central College
FULL-TIME FACULTY POSITIONS
FALL 1999
Illinois Central College invites applications for the following full-time tenure track faculty positions:

FACULTY (FINANCE TRACK)

CHEMISTRY - Master's degree in chemistry or related field with at least 30 semester hours in graduate level chemistry.
EARTH SCIENCE - Master's degree in one of the earth sciences or related field with at least 30 semester hours in graduate level earth sciences.
CHEMISTRY/ EARTH SCIENCE - Master's degree in either chemistry or one of the earth sciences with significant coursework in the other field of study. Community college teaching experience desirable.
MATHEMATICS - Master's degree in mathematics or related field with at least 30 semester hours in graduate level mathematics. Three letters of recommendation required.

CHILD DEVELOPMENT - Master's degree in child development or related field.
COMPUTER SCIENCE - Master's degree with coursework in the computer field or a bachelor's degree with one or more years of experience in the computer area. Candidates should have a demonstrated ability to teach classes in one of the following areas: C/C++, and Data Structures or networking classes such as TCP/IP, SQL server, LAN installation and management (Novell or Windows NT).

TEMPORARY FULL-TIME ACADEMIC YEAR APPOINTMENT

SPEECH-LANGUAGE PATHOLOGY ASSISTANT - Master's degree in speech-language pathology; certificate of clinical competence in speech-language pathology, licensure in Illinois and five years of clinical experience across the life span. (The date of employment is June 1 - May 30, 2000).

Qualified individuals interested in these positions must submit a letter of application, current resume and two copies of transcripts by April 1, 2000. Doris Symonds, Human Resources, Illinois Central College, One College Drive, East Peoria, IL 61635-0001. Job Line (309) 694-8998. Website: www.icc.cc.il.us. E-mail: Hresources@icc.cc.il.us. A resume may be e-mailed but will not be accepted in lieu of the completed application form.

Dean of Student Development
Houston Community College System, the largest institution of higher education in the Gulf Coast of Texas, is seeking candidates for the position of DEAN OF STUDENT DEVELOPMENT for the Central College.

The Dean is responsible for the development and supervision of all facets of the comprehensive student development programs at the Central College. The position will also be responsible for facilitating the transition to a Learning College as it relates to student development to include organizational structure and service delivery.

REQUIREMENTS: Master's degree in counseling, higher education administration, student support services, or related field is required. An earned Doctorate is preferred. Official transcripts are required at time of employment. Minimum of three (3) years successful leadership and management of student affairs development programs and activities with increasing levels of responsibility.

Prefer knowledge of and commitment to counseling, enrollment management, financial aid, student development, and student judicial affairs. Familiarity/understanding and commitment to the core principles of the Learning College is desired.

Starting Salary Range: $60,420 to $70,488. HCCS offers an excellent benefits package.

Please refer to Job Vacancy Notice #4595 when making an inquiry or applying for this position. An HCCS employment application is required for consideration. To request an application, call (713) 818-8566 or fax request to (713) 818-8599, or you may download an application from the web site at www.hccs.cc.tx.us. All completed application materials must be in the Human Resources office by April 20, 1999.

The Florida State University is classified as a Research 1 University by the Carnegie Foundation for the Advancement of Teaching and is located in the State Capitol. The College of Education has a long and honored history as the second founded College in the University. The institution and the unit hold numerous accreditations. The advanced graduate and research mission is central to the College with 21 doctoral degree programs. Undergraduate education and the cooperative improvement of K-12 education are essential to the mission.

Assistant Professor
REHABILITATION COUNSELING
(Tenure-earning)

The Department of Human Services and Studies is searching for a faculty member in a Rehabilitation Counseling Program that consists of an undergraduate degree, a CORE-accredited master's degree, and a doctoral degree. The department which houses this program also includes a CACREP-accredited master-level counseling program, an APA-accredited program in Counseling and School Psychology, and programs in Leisure and Therapeutic Recreation. The position requires teaching undergraduate and graduate level courses in rehabilitation services, teaching graduate level courses in an alternative rehabilitation counseling master's program, supervision of practica and internships; pursue research in an identified area of rehabilitation, direct dissertations and serve on supervisory committees; and provide service activities to the profession and state.

Minimum qualifications include: earned doctorate in Rehabilitation Counseling, or a closely related area with a specialization in Rehabilitation, demonstrated interest and expertise in research and evidence of skills and expertise in clinical practice. Preference will be given to applicants who are CRC or CRC-eligible and have demonstrated interest and expertise in psycho-social-psychiatric rehabilitation, or vocational rehabilitation, grant writing, and innovative training programs for community professionals.

Send application package including letter of application, current vitae, and three letters of recommendation to Deborah Ebenzer, Chair, Rehabilitation Counseling Search Committee, Department of Human Services and Studies, 215 Stone Building, College of Education, Florida State University, Tallahassee, FL 32306-4458. For further information, contact her at (850) 644-3535 or email to ebenzer@garnet.acns.fsu.edu

Assistant Professor
ENGLISH EDUCATION
(Tenure-earning)

The Department of Curriculum and Instruction is searching for a faculty member in the English Education program who will do the following: teach undergraduate and graduate courses, develop new courses to reflect shifts in emphasis in the field, supervise the research of graduate students, supervise student teachers, participate in faculty governance.

Minimum qualifications include: Ph.D. or Ed.D in English Education or closely related field, teaching experience in grades 6-12, interest and experience in literacy issues as they related to teaching English/Language Arts, grades 6-12, experience in using technology to teach, and ability to teach uses of technology in the English/Language Arts classroom, expertise in written composition, literature theories and pedagogy, middle grades theories and practices, and/or reading. Preference will be given to applicants who demonstrate interest in, and have experience with, interdisciplinary grant and services projects.

Send application package, including letter of application, current vitae, and three letters of recommendation to Dr. Pamela S. Carroll, Chair, English Education Search Committee, 209 MCH, Florida State University, Tallahassee, Florida 32306-4490. For further information, contact her at (850) 644-2257 or email to pcarroll@garnet.acns.fsu.edu.

Assistant Professor
SPORTS ADMINISTRATION
(Tenure-earning)

The Sport Administration program at Florida State University is seeking a colleague who has a teaching and research expertise in one or more of the following content areas: sports management, governance, facilities, organizational theory, research design and methodology, and sport finance and economics. Additionally, this person will be expected to teach both undergraduate and graduate courses in sport administration, develop an active research agenda, mentor masters and doctoral students’ research, advise undergraduate and graduate students, contribute to department and university growth, and contribute to a sport administration community of scholars.

Minimum qualifications include: earned doctorate in Sports Administration or related field, college and/or university teaching experience, evidence of scholarly productivity, experience advising graduate student research, and some sport business industry experience.

Send application package including letter of application, current vitae, and three letters of recommendation to Dr. Brenda G. Pitts, Chair, Sport Administration Search Committee, Florida State University, Dept. of Physical Education, 109 Tully Gym, Tallahassee, FL 32306-4280. For further information and contact her at (850) 644-2489 or email to bpitts@garnet.acns.fsu.edu.

The Florida State University is an equal opportunity, affirmative action employer and women, minorities and individuals with disabilities are strongly encouraged to apply.

ASSOCIATE VICE PRESIDENT FOR RESEARCH AND SPONSORED PROGRAMS

Southwest Texas State University (STU) invites applications and nominations for the position of Associate Vice President for Research and Sponsored Programs. STU has significantly increased externally funded research and sponsored programs, achieving current total $19.4 million with a goal of $30 million by 2004. STU has also received foundations for University support of grants and has developed partnerships with Congress, federal agencies, universities, public agencies, school districts, and corporations.

The Associate Vice President leads STU’s efforts to expand externally funded grants and contracts and reports to the Vice President for Academic Affairs. Assisted by a support staff, the Associate Vice President helps faculty and staff obtain external funding from local, state, and federal agencies, disseminates information on funding sources, develops productive relationships with funding sources, promotes interdisciplinary research, manages grant and contract negotiation and coordination, implements grant and contract policies, and provides faculty professional development opportunities.

The successful candidate must possess an appropriate terminal degree, a professional record appropriate for appointment at a senior faculty rank, experience in academic or research administration, and demonstrated success in obtaining extramural support. A successful application should include evidence of the candidate’s ability to significantly advance the University’s research, teaching, and community-partnership agendas, sustain and enhance strong relationships with the Congress and federal agencies, build and sustain partnerships with universities, public agencies, and the private sector, and sustain a service-oriented organization dedicated to assisting faculty, across the University.

Review of applications will begin on April 15, 1999, with an anticipated appointment date of September 1, 1999. Nominations and applications will be accepted until that appointment is made. Expressions of interest, nominations, and applications should be sent to: Associate Vice President for Research and Sponsored Programs Search Committee Office of the Vice President for Academic Affairs Southwest Texas State University 601 University Drive San Marcos, Texas 78666

Applications should include a cover letter, current vita/resume, and the names, addresses, and telephone numbers of three references who can speak to professional qualifications. Finalists will be asked to furnish transcripts for each earned degree.

Southwest Texas State University is an Equal Opportunity/Affirmative Action Employer. STU is committed to increasing the number of women and minorities in faculty and administrative positions.

Toward Cross-Border Partnerships

The passage of the NAFTA in 1994 has caused us all to wonder about its long-term effects on our communities. The final verdict may be long in coming, but one thing is clear today: Many aspects of our society and every sector of our economy will be affected, and higher education is no exception.

NAFTA has created new markets, which in turn have created new demands for degree and training programs, which in turn have created a need for the most current technological advances in distance education—advances that can address a mix of students in real time on both sides of the border. Cross-border facilities can now, through technology, collaborate in creating new knowledge and building relationships. Working professionals, too, have new opportunities to seek advanced graduate education that did not exist previously on the border.

Given everything we hear about the rapidly changing border demographics, then adding the supercharger effects of NAFTA, it becomes prudent for educators to consider long-term planning. What do we want higher education to become along the U.S.-Mexico border in the 21st century? How can we best serve the economies of our two nations and their quality of life?

All educators, especially Latino educators, need to broaden their world view and prepare to provide the leadership needed by our industries and communities.

In higher education, I believe the picture is clear. We cannot, must not, enter the new century without preparing to strengthen both sides of the border economy through meaningful and functional cross-border relationships in higher education.

What might this mean? In 1999, the Texas Legislature allowed qualifying Mexican students to attend Texas’ border universities by paying Texas resident tuition and fees. This visionary legislation blunted a trail for thousands of Mexican students to attend Texas institutions. How can we maximize this opportunity? Essential pieces of the cross-border tapestry required for their attendance are still absent even from our thinking.

We have overlooked ways in which education on both sides can directly improve the overall border economy in the future. Cross-border education institutions are already poised to play an important economic role, but to do so, they must be willing to make bold changes in some of their time-honored traditions. A case in point: U.S. border community colleges increasingly find that their historic role as feeder institutions to flagship universities is of lesser importance, while the cross-border demand for workforce training is increasing faster than institutions can redirect their resources.

Mexican institutions have wisely taken their cues from European models and are well ahead of us in their thinking and action—tying skill standards training to education at the local level. Higher education must learn to respond immediately and decisively to local or regional employer needs.

One of our most obvious shortfalls is our failure to identify and articulate ways in which education can affect economies on both sides. Until recently, U.S. and Mexican institutions of higher education did not talk with one another at a functional level. High-level talks between elite institutions have always existed, but in the 21st century, the bulk of our students will be attending small regional universities, provincial autónomas, community colleges, and so on. Specifically, we must initiate and sustain a dialogue that leads directly to student benefits. This is beginning to happen. Now is the time, I believe, to appeal to a wider audience to join us in this effort.

Our lack of sustained and meaningful dialogue has kept us ignorant of our neighbors. In Understanding the Differences: An Essay on Higher Education in Mexico and the United States, Gill and Alvarez de Teja (1995) point out our lamentable lack of understanding of educational-political structures and systems across the border.

It is critical that we understand the funding and authorizing systems cross-border in order to deal with practical issues such as the assessment of credit for transfer to cross-border institutions or how courses are taught or in which language. Questions about using technology across international boundaries or intellectual property rights are also critical. Many believe that reform is under way, but until the educational leadership and policymakers at the highest levels make these issues a priority at their institutions, students will continue to fall through the cracks.

It is in the interest of educators and especially Latino educational leaders to think more seriously about how Mexican institutions figure into our future and we in theirs. A major effort to effect this end is taking shape.

I urge anyone with interest in the issue to consult the Consortium for North American Higher Education Collaboration/Consortio para la Colaboración de la Educación Superior en America del Norte homepage at <http://cooahc.org>, or ELNET, An Educational Leadership Network at <http://elnet.org>. From these two locations, the doors to understanding cross-border higher education are opened wide. I invite you to walk in.

Antonio Zavaleta is a native of Brownsville, Texas, and a student of border culture; he holds a Ph.D. in anthropology from The University of Texas at Austin. Dr. Zavaleta has served as a faculty member and administrator at Texas Southmost College and the University of Texas at Brownsville since 1976, and is currently the vice president for administration and partnership affairs at UTB/UTSC.

**ASSISTANT/ASSOCIATE DIRECTOR**
COORDINATOR OF CHICAGO REGIONAL PROGRAMMING
Offices of Admission and Alumni Relations

**The position:** Represent Grinnell College to prospective students and to alum in the Chicago area. Coordinate and assist in prospective student development activities, and host programs that increase the participation of Grinnell alumni in the programs and activities of Grinnell College. Manage a professional office in Chicago metropolitan area to increase enrollment and revenue and participate in the full range of admission and alumni work in Chicago and occasionally in other Midwestern communities. Reports to the Director of Admission and to the Director of Alumni Relations.

**Specific responsibilities:** Admission: Traveling to high schools, college fairs, and on-campus correspondence; developing a high school alumni campus. Organizing and hosting alumni events. Coordinating and managing alumni events, activities, and communications. Enrollment and extensibility responsibilities: Evening and weekend work required. Expected to spend time on the Grinnell campus, particularly during admission-visit season.

**Qualifications:** Requires a bachelor's degree and demonstrated experience in admission-related work. Experience with admission, alumni affairs, and/or graduate work in higher education is preferred. Should possess well-developed communication and organizational skills, the ability to articulate the value of a liberal arts education, enthusiasm, energy, creativity, and a commitment to working cooperatively. A valid driver's license is required.

Founded in 1846, Grinnell College enrolls about 1,300 undergraduates from every state and the District of Columbia in the United States and 40 other countries. The college's primary mission is to provide students with a broad, deep, and life-enhancing education that includes professional success, but also personal growth and social responsibility. Grinnell College offers an exceptional, rigorous, comprehensive, and opportunity-rich educational experience which has, at its heart, one-on-one interactions between students, faculty, alumni, and staff. Grinnell College is consistently ranked among the top nationally selective liberal arts colleges in the United States. It ranks in the top ten among all colleges and universities in endowment resources per student and the top twenty in alumni gifts per student. Additional information can be found at the college's web site <www.grinnell.edu>.

**Application Process:** To be assured of consideration, submit a letter of application, a resume, and a list of three employment references to Ms. Jan A. Veach, Office of Human Resources, Grinnell College, P.O. Box 505, Grinnell, IA 50112 by April 30, 1999. The position will remain open until filled.

Grinnell College is an equal opportunity/affirmative action employer committed to employing a highly qualified staff which reflects the diversity of the nation. No applicant shall be discriminated against on the basis of race, national or ethnic origin, age, gender, sexual orientation, marital status, religion, creed or disability.

Financial Aid Guidance for College Students

by Gustavo A. Mellander

College costs more than ever before. But the need to acquire the level of education is more important than ever before. So how can the thousands of Hispanics who want to go to college pay for their education? The first step is to learn about as many sources of aid as one possibly can.

A new publication, The Student Guide, is the most comprehensive resource on student financial aid available. Released by the U.S. Department of Education, it covers the department's major aid programs, including Pell Grants, Stafford Loans, and PLUS Loans.

About 70 percent of all student aid comes from the programs discussed in this guide. It is written specifically for students, and it even provides a toll-free student information hotline: 1-800-4-FED-AID (1-800-433-3243). But it is a useful document for parents and college financial aid officers as well. It is free and can be ordered by writing the Federal Student Information Center, P.O. Box 84, Washington, DC 20044-0084.

Written in simple, understandable everyday language and devoid of bureaucratic gibberish, the Student Guide contains the following sections:

Finding out about Student Aid
Choosing a School Carefully
General Information
  Student Eligibility
  Financial Need
  Dependency Status
  Applying
  Special Circumstances
  Deadlines
  Information Sources

Federal Pell Grants
Direct Stafford Loans
FFEL Stafford Loans

PLUS Loans (Loans for Parents)
  Direct PLUS Loans
  FFEL PLUS Loans

Direct Consolidation Loans

FFEL Consolidation Loans
Campus-Based Programs
  Federal Supplemental Educational Opportunity Grants
  Federal Work-Study
  Federal Perkins Loans
  Borrower Responsibilities and Rights

Loan Deferment Summary

Student Aid

The financial aid administrator at each college that a student is interested in attending can clearly tell potential students what aid programs are specifically available there. They can also develop a total aid package so the student can know how much the total cost of attendance will be.

The Student Guide explains federal student financial assistance (SFA) Programs and how to apply for them.

Two federal income tax credits—dollars-for-dollar reductions in tax liability—are now available for higher education expenses. The Hope Scholarship, a tax credit worth up to $1,500 per student, is available to first-and second-year students enrolled at least half time.

The Lifetime Learning Credit is a tax credit equal to 20 percent of a family's tuition expenses, up to $2,000, for virtually any postsecondary education and training, including subsequent undergraduate years, graduate and professional schools, and even less-than-half-time study.

State higher education agencies in each state can provide detailed information about state aid, including aid from the State Student Incentive Grant (SSIG) Program, which is funded jointly by state and local governments and the U.S. Department of Education.

Many Hispanics go to college to become teachers. Secretary of Education Richard Riley has formally announced that the nation will need two million new teachers in the next decade. Each state department of education for public elementary and secondary schools can provide useful information on the Robert C. Byrd Honors Scholarship Program (Byrd Program). To qualify for aid under the Byrd Program, one must demonstrate outstanding academic achievement and show promise of continued academic excellence.

For the address and telephone number of the appropriate state agency, contact one's college financial aid office or call the toll-free student information hotline.

A list of state education agencies can also be found on the Internet at the DOE's World Wide Web site at <http://www.ed.gov/offices/OPE/agencies.html>.

Other Source

The AmeriCorps program provides full-time educational awards in return for work in community service. Students can work before, during, or after their postsecondary education, and can use the funds either to pay current educational expenses or to repay federal student loans. For more information on this program, call 1-800-942-2676 or write to the Corporation for National and Community Service, 1201 New York Avenue NW, Washington, DC 20525.

Information on the AmeriCorps program is also available through the Internet at <http://www.cns.gov/americorps/>.

Many companies, as well as labor unions, have programs to help pay the cost of postsecondary education for employees, members, or their children. Students should check foundations, religious organizations, fraternal or sorority, or town or city clubs, community organizations and civic groups, such as the American Legion, YMCAs, 4-H Club, Elks, Kiwanis, Jaycees, Chamber of Commerce, and the Girl or Boy Scouts—all support students who want to study.

Students should also explore organizations connected with their fields of interest. The American Medical Association and the American Bar Association, for example, have scholarship programs. These organizations and many others are listed in the U.S. Department of Labor's Occupational Outlook Handbook and are listed in various directories of associations available in public libraries.

The U.S. Armed Forces also offer financial aid opportunities. For example, all branches of the Armed Forces offer the Reserve Officer Training Corps (ROTC) Program, which is a federal merit-based scholarship program that will pay for your tuition, fees, and books, and provide you with a monthly allowance. These programs are no longer restricted to males. For more information on the ROTC Program, call 1-800-USA-ROTC.

If one is a veteran or the dependent of a veteran, veterans’ educational benefits might be available as well. Check with your local Veterans’ Affairs office.

In summary, aid is available, and this free guide is a good first step in acquiring it.

Dr. Mellander is a professor at George Mason University.
Association of Governing Boards of Colleges and Universities

By Mari Carmen Sarracen

According to a 1997 AGB survey, of the 40,000 private/independent trustees, approximately 2.1 percent are Hispanic, 6.5 percent are Black, 1.2 percent are Asian/Pacific Islanders, and 4 percent are Native American Indian. Ingram adds that in public higher education, where we would expect more diversity, the numbers aren't much higher.

Under the banner of the importance of more effective academic leadership and governance, the Association of Governing Boards of Universities and Colleges emphasizes good working relationships between administrators and trustees via its cornucopia of programs, services, and activities. Members of the Washington, D.C.-based nonprofit organization are the governing, coordinating, advisory, and foundation boards of postsecondary education.

AGB History

Richard T. Ingram, association president, gives a brief chronology of AGB history. "This association goes way back to 1921, when it was started by public university trustees and regents. They would get together from time to time to discuss issues of the day, such as how the federal government related to the states, research, land-grant universities, etc. There was no staff until 1963—strictly public sector until then.

"Then in 1963, the founders applied for and received a grant from the Carnegie Foundation on condition that membership be open to presidents of private institutions."

AGB now boasts a total membership of 32,000: 15 foreign universities also are members.

"We've grown through the succession of three presidents, including me," notes Ingram, who is in his seventh year. The AGB staff currently consists of 29 men and women. "We also have a board of directors, public members, former state legislators, former U.S. Congressmen, etc."

Nationally, there are 50,000 trustees and regents—"=40,000 plus are from private or independent colleges and universities, which service 20 percent of the nation's students," notes Ingram. "Their boards are bigger—approximately 80 people—as opposed to public boards, which are smaller."

The remaining 10,000 come from public institutions and "are responsible for the education of 80 percent of 16 million students."

AGB receives support from foundations in addition to its annual budget of $4 million.

Gender and Race Representation

According to a 1997 AGB survey of the 40,000 private/independent trustees, approximately 21 percent are Hispanic, 6.5 percent are Black, 12 percent are Asian/Pacific Islanders, and 4 percent are Native American Indian. Ingram adds that in public higher education, where we would expect more diversity, the numbers aren't much higher.
numbers aren't much higher—51 percent Hispanic, 11 percent Black, 18 percent Asian, 6 percent Native American.

Regarding gender equity, the number of women members has grown over the years. Says Ingram: "There has been a steady increase in the number of women trustees since the first survey in 1971, when women represented only 3 percent (pre-AGB) on independent boards and 4 percent on public boards."

Current AGB statistics reveal that among public higher education institutions, 30 percent of all trustees are women, and women trustees among private higher education institutions total 26.4 percent.

AGB Programs

AGB hosts programs such as board self-study workshops, presidential and board assessment services, and a presidential search workshop.

"We have a variety of services and publications to encourage good working relationships between presidents and their boards," notes Ingram. An AGB signature is its publication Trusteeship: "It is getting a good response—the articles are timely, short, and sensitive. The magazine goes to members every two months. Priorities, which comes out two or three times a year, is another publication."

Ingram explains that Trusteeship runs several regular features and that the body of the magazine is devoted to five or six short articles that bear on innovative practices, public policy issues, and other matters affecting governance. Priorities, on the other hand, focuses on one or two strategic issues such as affirmative action, academic tenure, faculty productivity, and demographic changes.

The Board Self-study service involves a group of trustees, former presidents who are available to help governing boards review their performance.

AGB also sets up retreats. Says Ingram: "We have held more than 600 board retreats since 1971 for all kinds of institutions, including public college boards."

The Institute for Independents

Another key AGB service is the Institute for Board Chairs and Presidents of Independent Institutions. "We have been offering the institute for private presidents and chancellors for 14 years. Evaluations by attendees have been uniformly positive," says Ingram, adding that attendees find the institutes "effective in helping them solidify their working relationships" and in developing "strategies to higher levels of performance."

"We also offer it to front time to time for public boards, but it is a different program. We get into more of the issues of the day affecting public higher education. These individuals want to talk about the pressures and pulls they are undergoing by state governments and other external groups," explains Ingram.

AGB Annual Conference

Preconference workshops covered subject matter such as leadership issues for board chairs of public institutions, how to build a better board, and strengthening the relationship between the foundation board and its affiliated institution. Interactive sessions discussed strategies for presidential searches, principles of effective strategy planning, and the board's role in financial accountability, among other issues. Plenaries and roundtable discussions took place as well.

Conference speakers included Frank H.T. Rhodes, president emeritus of Cornell University, William Bowen, Mellon Foundation president, Jorge Klor de Alva, University of Phoenix president, Robert H. Amwell, president emeritus of the American Council on Education, and Carol Guarino, Cabrini College trustee.

In addition to the conference, AGB typically runs six to eight free-standing events—from strategic planning to fund raising to ac-

Dolores Fernández: Compassionate Catalyst

Heads Hostos Community College Renaissance

BY JEFF SIMMONS

"Since my head is from an enrichment perspective and not a remediation perspective, I could never understand how in the United States we could label people who have two languages remedial, and that's what happens in New York City's public schools and in education in general."

DOLORES FERNÁNDEZ, ACTING PRESIDENT AT HOSTOS COMMUNITY COLLEGE

The signs are clear that change is afoot at Hostos Community College in New York City, and not simply because there's a new leader sitting in the president's office.

Banners adorn walls "HOSTOS stretches across an elevated walkway. Strung from dozens of lightposts along a major thoroughfare slicing through the bustling campus are brightly colored cloths proclaiming a Hostos renaissance.

These are visual changes that belie a broader campaign to revive a school that came under attack from the highest political circles in New York City over the last two years. Hostos is a school that—three decades after it opened its doors in the South Bronx—is shaping a brighter future.

Even critics have pointed to the image change and shower credit on a relatively new name on campus.

Dolores Fernández, the acting president.

"She's been very effective," says Herman Badillo, vice chairman of the Board of Trustees of CUNY, the City College of New York System.

"We are lucky to have found her. Hostos was a real mess. It still is a large mess."

"But we're giving her enough time to see if she can come to grips with its huge problems. We chose her because she's not an insider. She came from the outside."

That, Fernández says, gave her a different perspective: a chance to begin at square one when she started at Hostos in March 1998, after holding down previous jobs as a professor at New York City's Hunter College and as a deputy chancellor with the New York City public school system.

"Nationally, we have developed this reputation that, in some shape or form, we are going to have to get rid of," Fernández says of her tallest order. "I go to a conference and you have on your nametag and people go, 'Oh, Hostos, you're part of CUNY.' There are smirks and remarks about how bad it is, and these are national conferences."

Badillo says it helps to have placed a Hispanic woman at the helm of a college whose enrollment is largely Hispanic. Fernández, who would not reveal her age, is of Spanish descent, and her father grew up in Puerto Rico.
When he finished, I said to him, I came in here to tell you I wasn’t even going to consider this, but I will go home and think about it.” At Hunter College that week, we had a speaker, a minister who sat on President Clinton’s committee on race relations. She was talking in the faculty dining room. Toward the end of her speech, she said, “For all of you who are sitting here representing minority groups, and you’re feeling very comfortable with yourself because you have degrees in your backpack and you’ve moved up the socioeconomic ladder, take a minute and turn around and look at your community and ask yourself how many people within your community have the same needed to get a slap in the face.”

Little by little, I started to make significant change happen. Since bilingualism is my area of expertise and the CWAT was what put this place on the map, this was my first major endeavor—to get in place a structure that could meet the needs of students who come to Hostos and whose first language is not English.

Since my head is from an enrichment perspective and not a remediation perspective, I could never understand how in the United States we could label people who have two languages remedial and that’s what happens in New York City’s public schools and that’s what happens in education in general.

“We are going to put in place English-only days on campus and have buttons that say, ‘Speak to me in English, please.’”

Dolores Fernández.
HOSTOS COMMUNITY COLLEGE PRESIDENT

HO: Why did you want this job?

Dolores Fernández: I went through this whole speech in my head about how I wasn’t going to take this job because I was really feeling very comfortable at Hunter. It was a very good professional life. The chancellor spoke to me about whatHostos means to the CUNY system in the sense of its mission and the population this school was designed to serve. He spoke to me about the importance of having an interim president who truly believed in the mission of the school options you have right now. And if you don’t feel comfortable with that answer, you have an obligation to pay back your community. I went from listening to that lady to my office and called the chancellor right away and told him, “I thought about it. I will take a leave of absence and go to Hostos.”

HO: What did you discover when you arrived?

Fernández: It has been a roller-coaster ride. I found a very disheartened staff. The morale was rock bottom. They have been raked over the coals, and some of it was justified. I think the institution presented to the faculty my design for a true dual-language school at this level, which would mean we would definitely have to have programs in place to meet the English language needs of our students because that’s primary. But we would also start to develop programs designed to meet the second-language needs of students who would arrive English-dominant and also want another language because they know that having more than one language will open more doors for them out there in the marketplace.

HO: What are some other changes?

Fernández: We had a profession development insular, three week for faculty and for staff. We actually finished a couple of things. It was chance to share ideas around academic programs, and it was at getting people to talk to each other again across departments. The was a camaraderie that came out this, which was so important.

People were just down in the dumps, and all of a sudden, people who hadn’t been talking to each other or had just given up rig after their last class were coming and they were talking and working on programs. It was really great.

We also put in place academic language corridors, which have content courses linked to English as a Second Language courses. It design came about as a result students requesting that there some connection for the language in order for it to make sense I them to even learn it. That was happening, so we started that this fall.

HO: What do you feel you must accomplish during your tenure?

Fernández: To put in a program that would truly make this institution dual-language institution got that reputation.

My initial goal was to put in a program to make sure that students who come in with another language other than English are able to read and write and function in English in this institution and go out there the world and function in English and that was not happening.

HO: Who is the typical Hostos student?

Fernández: Female, about 29 or 30 years old, a single head-of-house hold, probably on public assistance. So she’s got to find somebody to take care of her child. We [the welfare rules and regulations]
I know that we can provide tests that are designed for second-language learners that would test the same skills they were testing with the CWAT. We really need to sit back and consider the population that comes in with another language. I'm not saying don't test them. We definitely test them. But let's give them a testing instrument that is designed for them.

**HO:** How important is a college like Hostos to minority students?

**Fernández:** Very important. Like Medgar Evers is important to the African American population within the city. Not that I want to think of this as a Latino college. I don't want us to be labeled, although I believe it is labeled that way, because it is a community college in the South Bronx — and right now the population in the South Bronx is predominantly Latino.

It's important for populations to feel that a traditional school close to them gives them some place to go and that is what Hostos is for my community, a place for them to go. That's what brought me here; that's what will keep me here.

I leave here every day energized. I have a true sense that I am doing something for my community, that we can put in place programs that will help them. I'm looking to expand the continuing education program here; one of the poorest continuing education programs at CUNY, and that's outrageous.

That's a steppingstone for many people in the community to take a course. Because a lot of them don't believe they can do it. But if they sign up for one little course, they get their foot in the door and we counsel them that they can do better, sign up for something else, and get a degree.
**HO: What have you done to boost morale?**

**Fernández:** I went around and talked to all of the departments. We have a theme called "The Hostos Renaissance." That didn't come from me; it came from a faculty member. I was talking to different offices and telling them what I envisioned around dual language and what I wanted to do for the school, and somebody yelled out at one meeting that I was talking about a renaissance. I said, "That sounds good to me."

We've handed out buttons to the faculty who go to graduation, and we're having our first winter graduation ever. We got banners for the first day of school that deal with the renaissance, and put up flags of all the countries of our students, faculty, and staff.

**HO: So do students see change beyond the cosmetic?**

**Fernández:** They see it as a feeling of family, of coming together, of school spirit. These kinds of things send messages to the students who come in here. We're going to open a plaza and turn it into a community garden where I am going to have members of the community come in and work with Hostos faculty and students in the spring.

**HO: How has this job changed you, not just your outlook on education but on life?**

**Fernández:** I went back to Hunter the other day, a college on 68th Street and Lexington Avenue, nine blocks from Bloomingdale's, and I felt I didn't belong anymore. I was there for eight years and loved it. But I found something here that for some reason I had gotten sidetracked from.

I always worked in positions where I was really linked to community. At Hunter, I was involved, but very superficially; Hostos brought me back, and I love being back. I love working with the students. I love the challenge. If I can do anything here that would leave a small mark, I will walk away very satisfied.

**HO: When you were young, what did you dream about as a profession?**

**Fernández:** I always wanted to be in teaching. The love of my languages and my culture was instilled in me by my parents and my family, and bilingualism has always been a part of me. So it was a shocker for me in high school to be told I wasn't college material. I was an honors student for four years. I had graduated 10th in a class of 600.

**HO: Why weren't you college material?**

**Fernández:** I bombed on the SATs. I did so poorly because my dad was dying that summer. The day I sat for the SATs, he was at New York Hospital, and I remember that the last place I wanted to be was in that room taking that test. I was called into the counselor's office that fall and was told I had 400 on one part and an outrageous score on the other.

The person who advised me said I should rethink where I was going with my career. My dad had already died, and my mother wasn't anyone I could rely on for guidance because she was going through her own bad times. So I listened to someone who I thought was a professional, trained to guide students. So I had to rethink where I was going because I was in academic programs and had not gotten any skills in anything else. So I got typing and shorthand skills.

But there was always something in the back of my mind that said I wanted to teach—that gnawing voice always pecking at my brain. It kept up enough for me to decide to go back to school, and I did it the hard way. I talk to high school kids and say, "Because you might do poorly on one test does not mean you are not capable of doing something else. You have to really want something bad enough."

I don't know if I could do it today. I think about all of the challenges that I faced, but you do it, and that's why when I look at all these young women, my heart goes out to them, because I know how tough it is. The one person I wanted on that stage when I got my degree at Hofstra was the counselor who told me I couldn't do it.

**HO: What is the lasting perception you want people to have?**

**Fernández:** It's important that the public understand Hostos and what we're about. It bothers me when I go to visit politicians or community groups and I'm told, 'Oh, you're the president of that school in the South Bronx that doesn't teach English and that's for foreigners.'

That's so limiting for what this school is. It's unfortunate that perception is out there because the programs that are in place here are excellent programs, and the staff and faculty are excellent.
Cuban Institute Prepares for Thaw in Relations

Broad-based Florida International University Programs Building Bridges

By Ines Pinto Alicea

Lázaro Pérez was planning to leave for an academic trip to Cuba the week after his interview with this author but still had not gotten word from the U.S. government on whether he would be allowed to go. That is despite having asked for permission to take the trip two months earlier.

But Pérez, a professor of sociology and director of the Cuban Research Institute at the Miami-based Florida International University, takes the lack of news in stride. It’s something to which he is accustomed. The U.S. and Cuban governments heavily regulate travel to Cuba, and struggling to get permission to travel to or from it is part of the daily work of the scholars involved with the institute, launched in 1991.

The travel restrictions limit research about the island and leave large gaps in knowledge about the social, cultural, and economic lives of the people in Cuba.

“We haven’t been able to consistently observe the reality of life in Cuba,” said Pérez. “The relationship of hostility and the distance between U.S. and Cuban policies have been devastating on academic research. We are so close to the island, yet so behind in our research.”

The institute faces another large obstacle. Many Cuban Americans in south Florida strongly support limited contact with the island, and they are quick to get angry over some of the work at the institute because of the emphasis on encountering the island’s people.

“It is important for us to maintain contact,” said Pérez. “It establishes us at the academic forefront on Cuban and Cuban American Studies.”

Still, the work of the institute goes on, building bridges through numerous contacts on the island and throughout the world of scholars interested in Cuba, Cuban life, and Cuban Americans. Scholars with the institute say that even though the political situation remains unchanged, it is vital that the work continue, particularly because when the political situation does change, the institute will be in a good position to provide the scholarly information needed at the time, as well as to strengthen the contacts now in place. Its work has already garnered a great deal of respect worldwide among scholars in the fields of Cuban and Cuban American studies.

“We consider the Cuban...
Research Institute to be one of the leading institutions in Cuban affairs in this country and probably the world," said Cristina Eguizabal, Ford Foundation program officer for Latin American and Caribbean programs. The Ford Foundation has given the institute grants for several of its projects.

Following are some of the projects the institute has taken on in recent years through grants and other donations:

- The FIU Cuba Poll, an annual survey of Cuban Americans’ views on policy options toward Cuba, is conducted in collaboration with FIU's Institute for Public Opinion Research and the Center for Labor Research and Studies.
- The institute edited Cuban Studies, a prestigious multidisciplinary annual journal devoted to scholarly work on Cuba.
- The Cuban and Cuban American Studies Certificate program for undergraduate students consists of courses from eight departments, including economics, history, international relations, modern languages, political science, sociology, anthropology, theater, dance, and visual arts.
- Academic exchanges and research collaboration with Cuban scholars support trips to and from Cuba by FIU faculty and their colleagues on the island.
- The Children of Immigrants Project, a longitudinal study started in 1991 with support from the Spencer and Russell Sage Foundations, follows some 2,800 school children to study their aspirations, adjustment, academic performance, and ethnic identity.
- A research project in 1995-96 funded by the North-South Center entitled *The End of Exile: The Policy Consequences of the 1994 Rafters Crisis* was based on the 1994 event.

The institute also offers lectures, concerts, community events, and exhibits for the people of Miami and sponsors major conferences to bring together scholars interested in Cuban and Cuban American issues. A conference in March was scheduled to explore topics such as the commonalities between Cubans and Cuban Americans, life in Cuba between 1940 and 1950 and how power and resistance have been manifested in the Cuban context over time in relation to race issues, gender relations, human rights, gay, lesbian literature, and more.

Pérez said he would like to see the institute publish more of its own works, eventually offer a graduate-level certificate in Cuban and Cuban American Studies, and expand library holdings at the University of Cuban and Cuban American-related documents.

The institute plans to start taking groups of students to Cuba for academic and cultural exchanges in the summer of 2000. The plan is that students in that program will be taught by professors in Miami and by professors in Cuba, with part of the coursework being completed in south Florida and the rest on the island.

The institute was established to create and spread knowledge of Cuba and Cuban Americans through advanced scholarship and community programs. It is located at the Latin American and Caribbean Center of FIU, a member of the State University System of Florida. The university has 30,000 students.

The institute also offers a resident fellowship in humanities funded by the Rockefeller Foundation for residencies ranging from three months to a full academic year to explore the themes of sovereignty, identity, and reconciliation in Cuban intellectual and cultural traditions.

"Before the institute was created, this university had specialists on Cuba in every department," said Juan A. Martínez, but the specialists didn't have a place "where they

---

**BEST COPY AVAILABLE**
could get together.” Martínez, an associate professor of art history in FIU’s visual arts department, has taught classes at the institute.

Martínez said that creation of the institute was important not only to the scholars but also to the Cubans residing in south Florida, particularly the many students of Cuban descent who attend the university.

“The institute gives them a full picture of a place that to them is mythical,” Martínez said. “The institute provides them some knowledge of their native country beyond what is talked about at the dinner table. This is a place where they are connecting, learning. This is where they are rediscovering their roots.”

Martínez said that it was natural to create the Cuban Research Institute in south Florida, particularly at FIU because a majority of the students are of Cuban descent, and because Miami has the largest population of Cubans outside of Havana.

“The institute is a forum for research, sharing of information, and debate on Cuban issues,” Martínez said. “It has been very interesting experience. The institute is a valuable resource. It has put me in touch with individuals of other disciplines, and it has given me other perspectives on Cuba.”

al, economic, and artistic force. The institute strives to explore all aspects of Cuban life, particularly Cuban culture and literature. For example, the institute recently invited a Cuban visitor who shared her documentary on tattooing in Cuba.

“The institute is well placed and in a privileged position,” said Fernández. “We’ve opened up discourse on Cuba. Even though engagement with Cuba is cumbersome because of U.S. policy and Cuban policy, the institute has played a pivotal role in establishing relationships between Cuban scholars and scholars of Cuba outside Cuba.”

Fernández said that he would like to see the institute reach out more to the local community by offering more public lectures and non-credit courses.

Since 1991, the institute has raised more than $1 million in external support, much of it from university faculty to the institute to offer classes on Cuban politics, Miami politics, Cuban culture, Cuban painting, international relations, Cuban history, and more. The institute also receives help from undergraduate and graduate student assistants.

Program officer Eguizabal said that the Ford Foundation had been giving the institute grants for varied projects for more than five years, but they had not exceeded $50,000, and primarily paid for faculty exchanges between FIU scholars and scholars in Cuba. The Ford Foundation, she said, recently gave the institute a $5,000 grant in recognition of the positive work the institute does and in recognition that their grant money “goes a long way.”

The $5,000 will help the institute pay travel costs for graduate students researching subjects such as race relations, immigration issues, Cuban literature, and Afro-Cuban dance. It will help the institute serve as a clearinghouse for information that U.S. nonprofit organizations such as universities and museums need to initiate projects with Cuba. The grant will also help scholars gather documents and books from Cuba to build the university’s Cuban collection and assure that important historical documents are collected and preserved. Lastly, the grant will allow the institute to develop a guide that nonprofit organizations can use to launch projects with Cuba.

“We wanted to be a part of the reconciliation of the Cuban family,” said Eguizabal. “The people at the institute know how to work the intricacies of the Cuban and U.S. governments.”

“The institute provides them some knowledge of their native country beyond what is talked about at the dinner table. This is a place where they are connecting, learning. This is where they are rediscovering their roots.”

JUAN MARTÍNEZ, FIU ASSOCIATE PROFESSOR OF ART HISTORY

Pérez, Martínez, and Damian Fernández, chair of FIU’s department of international relations, all say that the institute tries not to focus on Cuba just as a political force, but rather as a social, cultural organizations such as the Ford Foundation and the Rockefeller Foundation. The university provides an additional $50,000 yearly in ‘spending money’ pays the salaries of two clerical positions, and lends.
The University of South Florida
Latin Advisory Group Sparks Growth and Change

BY ROGER DEITZ

As the century nears its close, it is evident that the development of South Florida as a center of Hispanic cultural and academic richness is one of the great stories of this nation’s history. Yet many have the notion that Hispanic immigration is solely a phenomenon of the latter third of the 20th Century.

Thanks to the work done by the University of South Florida Library in preserving and cataloging artifacts and documents of Tampa’s turn-of-the-century, thriving cigar industry, we have a clear picture of a very lively Latin population. Back then, cigar factories attracted thousands of Cuban, Spanish, and Italian immigrants called “Latin” in the vernacular of the region.

Gary Mormino, Duckwall Professor of Florida History at USF, says that “During the golden age of Ybor City, 1890-1930, an extraordinary Latin culture evolved, exemplified by a vibrant Spanish-language press, theatre, and material culture.” Mormino informs the Hispanic Outlook, “Records of the several mutual-aid societies document the cradle-to-grave role played by these remarkable institutions.” He continues that of special interest are the records—membership lists, bylaws and board minutes—of El Centro Asturiano, La Union Marti-Maceo, and El Circulo Cabano. Several of the clubs donated their extensive libraries to the university.

Mormino reports that the special collection also has thousands of historic photographs documenting everyday life in Ybor City and West Tampa. He adds that an extensive collection of cigar and tobacco memorabilia highlights the collection. Most notably are the embossed cigar labels and the Tony Pizzo collection, named after an avid collector of Ybor City historical materials such as rare Spanish-language papers, photographs, and clippings. At the University of South Florida, this collection of the past has come alive in the present as numerous USF faculty members have researched and published articles and books on individual groups, Latin women, radical politics, and the communities’ institutional life.

For bringing the past to light and to life, and making a great academic contribution to the people of the region, we welcome The University of South Florida to the Hispanic Outlook Honor Roll.

There are many such “Points of Pride” at USF. The Library Special Collections Web site was chosen...

much smaller organization on campus, not the powerful, important forum for USF student opinion that it is today—one of the top student associations on campus. Much has changed, she says, because of the Latin Advisory Committee. “Ten years ago, there were no Hispanic sororities or fraternities, and today there are two Hispanic sororities and a Hispanic fraternity. Ten years ago, we had no student chapter of the Society of Hispanic Professional Engineers, and today we do. And today we are highly ranked, on a national basis, as a source of bachelor’s degrees AND master’s degrees for Hispanic students.”

President Castor credits the members of the USF Latin Advisory Committee with establishing a “Hispanic agenda,” and with taking the steps to carry it out. After ten years, it is clear that the committee has done much to contribute to the leadership of the university and to establish linkages with Tampa Bay’s Hispanic community. “Overall,” reflects Castor, “because of the efforts of this committee, USF has become more inclusive. We have made strides in the recruitment of students, in the hiring of faculty, and in the awarding of honorary degrees—including those to Lauro Cabazos, Oscar Arias, and Al Lopez. We have created a month-long series of events, the Hispanic Heritage Celebration, to honor the roots of our community, and the university, in Latino culture. We have developed a very successful Latin American and Caribbean Studies Program, with numerous links to universities in Latin America. Because of the hard work and the persistent caring of the members of this committee and of its energetic director, Donna Parrino, the university support for the Office of Latin Community Advancement is strong and growing. The Latino Graduate Fellowship program is now a reality, helping Latino graduate students to participate in the expansion of USF’s role as a Research 1 institution. Make no mistake,” Castor concludes, “in every category, much remains to be done. We need to do more to make USF a diverse institution.”

Of the 33,826 students enrolled in the fall of 1998, 2,996 were Hispanic; 3,132, African American; 1,541, American Indian; and 1,632, Asian/Pacific Islander; while 880 were nonresident alien students. There are 1,695 full-time faculty at USF, with 56 Hispanics, 87 African Americans, seven American Indians, and 88 Asian/Pacific Islanders.

With a growing academic reputation and a dedicated faculty that includes 62 Fulbright Scholars, 35 Endowed Chairs, and 14 Endowed Professorships, USF is fast becoming a model urban research university for the 21st Century.

The university has surpassed the $100 million mark in sponsored research for four consecutive years, now totaling almost $135 million. USF ranks 26th nationally of 109 Research 1 and II universities. In the number of Black and Latino faculty. Of these higher research level institutions, USF leads the state of Florida in the percentage of its faculty that is Black and in the percentage of Hispanic faculty with tenure or on tenure tracks. USF’s libraries contain some 2.3 million volumes, as well as vast computer links to hundreds of library databases for the World Wide Web.

Speaking of libraries, during Kathleen de la Peña McCook’s five-year tenure as its director, USF’s School of Library and Information Sciences has achieved notable results in graduation rates, outreach programs, and grant support. Out of 5 libraries and information science schools in the U.S., Canada, and Puerto Rico, USF produces more graduates per faculty than does any other. “In fact,” Peña McCook points out, “we graduate the same number of students as FSU’s School of Library and Information Science, and they have double the number of faculty.” Through Peña McCook’s initiative, the school currently ranks among the top 10 in the U.S. and Canada in the number of minority graduates. Notably, USF graduates more Hispanic librarians than does any other school in the nation.

Donna Parrino, director of the Office of Latin Community Advancement, is enthusiastic about the strides made by USF on all fronts regarding the advancement of Hispanic issues at the university. She says that this translates into personal successes for so many students. Parrino observes, “Since its inception over four years ago, the University of South Florida Latino Scholarship Program has awarded $375,000 to more than 100 students. The renewable four-year scholarship has already produced 25 graduates, four in medical school, one in chiropractic school, three in law, and several in graduate school, while others have been gainfully employed.”

Parrino points out that the program’s successes encouraged the Tampa Bay Latin American Medical Society to pledge $100,000 this year for scholarships. Last year, the Krewe of Saint Yago pledged $100,000. Dr. and Mrs. Herman Leon, who have supported the program since its inception, announced a planned gift in the form of a $200,000 charitable remainder trust. In another area, a $600,000 contribution by the Honeywell Foundation and $400,000 in state matching funds will establish USF’s College of Engineering to conduct more research, recruit more Hispanic scholars, and provide them with scholarships. It is clear that, with regard to Hispanic issues—whether honoring the Latin communities of the 1890s or preparing young people of today for the 21st Century—the University of South Florida has brought 100 years of enlightenment in the past ten years of work. Now that’s a point of pride.
Honoring Teachers Who Honor Teaching

María Villar, Anthropologist

BY MIA ANDERSON

Arriving for the interview with HO, María Villar is struggling with a bad cold or the remnants of a bout with the flu but she taught her classes all week long. She has apologetically postponed the interview until this day because she is rushing to finish revisions on an article submitted to a major professional journal. As she describes the article, she reveals a passion for her subject.

Her article deals with the illegal Mexican immigrants who migrated to Chicago and then, during the US government-proclaimed amnesty period (May '87-March '88) sought citizenship. And it deals, too, with the dynamic between those who advocate for the immigrants and those who consider them a major problem.

There is a significant settlement of Mexicans in Chicago. Professor Villar tells HO, a settlement with a long history and lots of diversity. While many in that community organized to help the immigrants, others were fearful, for example, of the economic impact of the new arrivals. Villar spent a year in Chicago in 1987, meeting periodically with both the advocates and the immigrants, and has returned a number of summers since then.

She is clearly quite anxious to get those revisions in and the article published. Asked why, she grows and tells HO that she believes she lost a previous teaching position at the City University of New York’s Baruch College, because in four years she had published “only” four articles. She was surprised at the time, she says, and admits to having felt unfairly treated.

“They never tell you clearly what the problem is. Nobody will tell you. You have to have one book and six articles in four years, for example.” Still, she says, “I take part of the blame. If I had published more, they couldn’t have done it to me. They were happy with my teaching. Students wrote letters supporting me. My colleagues respected me as a teacher. And even today, I enjoy serving on committees which takes time away that I could be using for research and publishing.”

I'm concerned about the issues, like diversity, for example. But these things are worth nothing, it seems, when it comes to evaluations. The appeals committee backed me, but the president turned back the appeal.”

Professor Villar was born in Cuba in 1952, in Artemisa, a town at the western tip of the island. Her father worked as a chemical engineer in the sugar mill, and was the first in his family to leave Cuba.
then, a field that her father had liked but couldn't pursue. After two years, however, she discovered a growing interest in both the social and the hard sciences. She switched her major and went toward math and science. First, she says, because she thought she could get a better job in that field, and secondly because she saw a different world. She thought her father would have a heart attack if she chose the social sciences or the humanities—which is what her mother liked—because he equates them as Communist.

Vilar's next step was to enter the master's program in computer science at the State University of New York at Stony Brook, which offered her the best financial support through a teaching assistantship.

After graduating, she took a job there as a systems analyst at the computer center. But by late 1979, she started getting that eerie feeling. I wasn't craving to work with computers all the time. I really didn't want to get married to my boyfriend at the time. I was having computer study groups and really enjoying that. My mom was a fourth grade teacher for 15 years, and my dad continues, but anthropology is so broad that you can draw from the humanities, the sciences, and the social sciences, all of them.

She found herself at the University of Indiana in Bloomington. She worked on the doctorate for five years, completing it in 1989. But it was in the second year of study that my science background corrupted me—I was finding the humanities too soft. They were great for fun but not for hard research. So now I'm in the anthropology of demography—economics and populations was my area of study. People in India think Pines and they think Western women—very liberal, not family-oriented. I married in 1986, and then our second son was finding two jobs in the same place!

Vilar's husband found a good job in New York City, a post-doctorate position at Rockefeller University Hospital. She soon got her position at Baruch College, but lost it in 1995, just as her positive came to an end. He could not find another in the U.S. but did find one at the London Institution: Institute of Medical Research. While he was looking, she took one-year appointment at William Paterson University in Wayne, N.J. He left for England; she finished the year in New Jersey and then went to London to look for a position but there were none. She loved it there—London life is beautiful. It's less rushed; people socialize more. It met people more and made many friends. But when the tenure-track position opened up, William Paterson, I applied, was accepted, and returned to the U.S.

Her husband returns this month and will take a one-year position at Rockefeller, made possible through his old professor there. I write alone in London was very hard to him. Indians are ten times more family-oriented than Hispanics. I couldn't take it.

In the classroom

Asking about her teaching philosophy, Vilar becomes animated. My role is to talk them, to help them understand from within. I see myself as a mediator—to make students think. formulations of thoughts take a position I give you few answers. I present the idea and fuel discussion, and hope and actually happen—that students will bring up the positive that I have its different for teaching computers, where there is only one answer. In anthropology...
it's about life, it's about understanding reality. It's a beautiful course to teach if you frame the questions—the problems—right...

"I encourage them a lot to use e-mail to communicate with me. Participation is important, but some are very shy, like I was. When you open the door to e-mail, they express themselves, and we can have conversations."

"Anthropology deals with diversity all the time," Villar says in answer to a question. "It's much easier to present those issues that might be bothersome to some using cultures, talking about some feature of one culture, and then exploring the parallels or differences in another or one's own culture.

"We'll look at racism in South Africa, for example, and then look at it here. We'll look at sexism among the Amazon Indians, and then look at it here. The students have ideas that Muslim women are so suppressed, but women in that culture have tools that women here don't have."

Projects for the Future

Because of my roots, my ethnicity, Cuban, I would like to move into the Cuban cultural dynamics. I find Cuban societies—what's happening there now—fascinating. Second, I definitely want to move into strategies for challenging people's ways of thinking. One of the most frustrating things is, after a semester of challenging students—ethnocentrism, having a question in an exam reveal that students have not made much progress in that area. It's so hard to change people's thinking and attitudes. It's such a major challenge.

"Anthropology is a beautiful discipline. It makes you challenge your conceptions of who you are, and to see that underneath the diversities people are doing the same things in different ways. Villar makes a gesture to pull her hair, saying: "At the root of intolerance is such naivety. It's so difficult. I want to know more about why it's so difficult. And I would like to fight on the front of making anthropology a more relevant field of study. We need the truths that it can teach."

What Else Matters

"Yes, my Hispanicness, my Latinness is very much a part of me. On a personal level it's irrelevant to me, by the way, which label is used, but I'm aware of the connotations that groups have of other groups, so I do switch labels sometimes to fit the group but I never call myself American, though, I became a citizen in 97—and I love this country, and that is it. I feel very much a Latin American. Actually, growing up in Puerto Rico might be a part of who I am now."

"Religion plays a part in my life. My parents weren't particularly religious. And generally in Latin America it's very different. This is not. It has become much more important to me. This began when I was in London. I didn't have a religion then, but when I was watching TV, they're getting all kinds of work. It opened my eyes, and I thought, Jesus.

Founding Chair's Assessment

Founding chair of the William Paterson University anthropology department, Janet Pollak, says of Professor Villar that she is "a remarkable teacher with a strong following among both the anthropology majors and the general education students. As a colleague, she is truly extraordinary and a tremendous asset to our new department and undergraduate program."

Pollak cites, for example, Villar's volunteering to join a small group of College of Education faculty and anthropologists in offering a pilot workshop course for certification students.

"Dr. Villar taught in the same classroom with three other faculty traveled to Washington, D.C., to complete training sessions in multicultural communication offered by the American Anthropological Association, and has now completed a paper based on her statistical analysis of the workshops assessment instruments.

In a short time, Maria Villar has become an extremely effective advocate for anthropology at the university and has earned the respect of junior and senior faculty across the campus.

RENEDO
Toning up the Intellectual Muscle

St. John's College, Annapolis and Santa Fe

By Adalyne Hixson

This reporter first encountered St. John's as a teenager imported to Annapolis with friends to interact with midshipmen at the U.S. Naval Academy's weekend "tea dances." The "johnnies"—all tweeds, pipes and books—offered sharp contrast to the midshipmen and struck us as enormously, perhaps even abnormally, intelligent. Interviews with St. John's this month confirmed that the suspicion is still alive.

"What does it take to come to St. John's and hold your own intellectually and rhetorically with the other students?"

HQ asks this question because the Annapolis college, founded in 1056, and its Santa Fe counterpart, represent two quite different sorts of school—one that bases its curriculum on the "great books," enabling students to learn geometry by reading Euclid and Descartes, astronomy by Galileo and Copernicus.

A brochure announces: "The following teachers will return to St. John's next year: Homer, Aeschylus, Sophocles, Thucydides and so on, right up to Einstein, Heisenberg, and Wallace Stevens."

I'm not sure you have to think in terms of—come if this profile describes you," answers the dean, Harvey Flaumenhaft. "We started writing a series of letters to parents of students when they write for materials, when they apply, and when they're admitted. The letter I write addresses that question, and makes the point that it is easy to be intimidated, and a lot of people think that you have to be some sort of superstar to do well here, but that is a misapprehension.

"What you need is," he continues, "you have to like to read and you have to like to talk with people about it."

He tells HQ that all the classes are "discussion." And that all the classes are very small. The large classes, he says, include 18 students, with two faculty members; called tutors rather than professors. Other classes include 10-stu-
students with one faculty member.

In the classes, not only do we expect the students to converse with one another—wi th a light touch from the tutor—but in the math classes, we expect them to regularly go to the board and make presentations, and to translate in the language classes.

Math classes, or tutorials, in the St. John's prescribed curriculum include astronomy, the theory of relativity, and several forms of geometry. Language tutorials include Greek and Latin grammar, prose, and poetry. Laboratories explore atomic physics, optics, electronics and magnetism, and biology. Also included are melody, counterpoint, and harmony, and among the roster of returning teachers are Bach, Verdi, and Stravinsky.

Twice weekly evening seminars explore literature, philosophy, political science, and more. There is one lecture a week for the whole college.

A sampling from recent years includes "The Parable of Don Quixote" by the Evolution of Behavior in Humans and Dogs by Atkinson; "Intumescent Gallstones" by Later Nuclear Active Galactic Nuclei and Quasars; and "Telling Lies: A Deans-eye View".

I read all the applications for admission, says the Dean of Admissions, funny students tend to be how many students tell about how they sat and took notes and didn't talk with other students—that it was considered silly to be interested in school outside of class. They are delighted to discover St. John's and a lot of them say, "I still always think that's what a school should be—please take me!" They are delighted to discover there is such a place.

"The most important thing is an eagerness to study books that are not predigested textbooks—an eagerness to discuss them with other people. And of course, the work is hard. And they don't get chances. And some of it is heavy, so they have to be able to work—sustained to persist.

"We ask everyone who applies to come for a visit and to come to classes. Many visitors, he says, are surprised by how friendly and welcoming the students were when they came here. And that the worst part was having to sit quietly while observing and not take part!

The students here get a lot of help. Faculty are not running off consulting and not spending time writing. So I think that gives a long way toward making what could otherwise be very intimidating content much less so.

You really see so much of them and it is a small place. You often see them in different classes. Every term there is a conference called The Don Ray with all the teachers they had. They all report to one another. The student is present, and tells what it looks like from his or her point of view. That could be intimidating to a student at first. But they get some feedback.

"It takes a bit of doing to persuade students at first that if they are having trouble with something, their job is not to get their teeth and force their way through, but first to make that clear to their teachers and get some advice.

"I think it is a common misapprehension that St. John's is only for a very tiny element. The St. John's student, he says, have a wide range of ability. "Our best students are superb, but we have other students who are not so superb." He says making the point too that the best students in particular benefit a great deal from having to learn to communicate across a range.

Uniquely St. John's

"As a St. John's education differs from his own. Flahmehtaff says there are some big differences and some big similarities between St. John's and the University of Chicago, where he earned a B.A., M.A., and Ph.D. The chief similarity, he says, is that U.C. too offers a great books curriculum.

People who were active in setting up 'great books' in Chicago also worked with St. John's. So there was a lot of connection and overlap, he says, even though the programs were not organized in quite the same way.

Although the University of Chicago took this curriculum very seriously, 'it wasn't exclusively a great books' program,' he says, but a very big thing there, and there was a great deal of emphasis on activity in the classroom. And a taking for granted that what people did when they were in class was talk about the sorts of things they came here to study.

This set them both apart from other places," says Flahmehta's. He did the kinds of people attracted to the program—people very eager to be students.

"But I had a major which St. John's does not." And I took a lot of classes in which what we read were state-of-the-art things rather than classic texts. But though it was a universal, it had this in common— it was rather small—though much bigger than St. John's. You did have the sense that you could kind of survive the whole scene and get to know people with lots of different interests, and didn't have the sense that you were lost in a huge supermarket, or urban sprawl.

Flahmehta's vitae reflects broad-ranging interests and honors, including a Woodrow Wilson Fellowship at Harvard and fellowships with NASA, the Institute for Sino-Soviet Studies, and the National Endowment for the Humanities.

Minority Climate

"I asked about Annapolis itself vis-a-vis minorities: 'The town has much less of an old Southern feel I've been here for 30 years. A lot of people are commuting from Washington now and the Naval Academy has changed a great deal, so Annapolis is not uncomfortable'.

Santa Fe Campus

"I asked Dean Flahmehta how St. John's selected Santa Fe as the site of a second campus, launched in 1961.

"We were looking for pleasant places to be with a lot of local support. People in Santa Fe were quite eager to open a second St. John's.

It is a gorgeous place," he says, with an interesting diversity. He describes the Santa Fe supporters as very generous. The new campus attracts a fair number of students from southwest California and elsewhere. And man who go to Santa Fe transfer to Annapolis. All students have the option of moving between the two. It is not even as if Hispanics are evenly here, because there is a Santa Fe connection.
Finances

I can say one thing. Our policy is to decide who to admit, admit, and then to distribute the available financial aid strictly according to need," says Haumanffdt. "We don’t throw in extra for people we think of as more desirable."

"The college is expensive. It is private. We are not as wealthy as some places, but we do have a lot of students on aid, students with job-related aid. And people should not hesitate to apply because they don’t have much money."

A college bulletin advises that students who complete their financial aid applications before February 15 (for fall classes) or September 30 (for spring classes) have a significantly higher chance of receiving all the aid for which they qualify.

About 65 percent of students receive some form of assistance, and more than half receive grant aid from the college in addition to loans, grants, and jobs under federal programs, says the bulletin. Tuition alone at the Annapolis campus was $2,000 for $8,999 with room and board, an additional $1,000 for Santa Fe expenses are similar.

The Admissions Perspective

John Christensen, director of admissions, has been at St. John’s College for 20 years. He asks him,

...and how the St. John’s education "...and how the St. John’s education..."

I went to the University of California. Some of my classes were larger than the entire student body here.

The important thing is the requirement--that all of your classes are going to be discussion classes that you really engage in--not a way that a larger institution doesn’t allow you to be engaged.

I think the surprising thing for visitors when they come here is that the school is very much as it is described in our literature.

Another surprising thing is that there is not a lot of difference between what goes on inside the classroom and outside the classroom. Classroom life spills out into the social life. This is an unusual sort of community in which people are able to talk with one another because they have some common frame of reference--no matter how different they might be. That is what is striking about the school. Work is far more part of your social life."

Dean Haumanffdt, too, says, "We don’t need to encourage them to spend a lot of time together outside of class. The interaction, then, is a natural outcome of the interest generated in the classroom."

If Christensen tells HO that the Annapolis campus has about 115 students from all over the U.S., a similar number attend in Santa Fe.

"In the typical (first-year-student) class of 120 students, we would have 35 states represented--spread out all over the country. Hispanic students, he says, might be from Arizona or from Maine; no region or country of origin predominates."

Asking about retention, he says that the current return rate for sophomores is quite high, but is routinely 85 to 90 percent. The graduation rate he calls "pretty good," with the school graduating 40 to 70 percent of four years after they start. Extended to six years, it rises to about 75 percent.

That percentage, he says, is "a little bit lower than in some of the places that are very selective, with which we compete," and cites a few of the contributing factors. "There are no majors, and students are faced with a less prescribed workload, so can plan to your strengths. Students who become very interested in one subject area may want to pursue that interest elsewhere."

Dr. Christensen holds a B.A. from the University of California at Santa Barbara, an M.A. and Ph.D. in English from Northwestern University.

Positive Press

Walter Lippman, writing in the New York Herald Tribune in 1957, after St. John’s adopted its Great Books curriculum, described the college as the "seedbed of the American Renaissance."

More recent coverage has equally luminous.

"A May 9, 1992, feature in The Washington Post by Ben Greenberg was titled: "The College of Political Incorrectness," and subtitled: "At St. John’s They Study Dead White Men So Why Do the Students Seem So Intelligently Alive?"

Greenberg quoted Black graduate David Cherry as saying, "I could not have done anything more militar than coming here. The emphasis here is not on facts and memory but on building the foundation of reason and analytic thinking."

Cherry had just landed a coveted four-year teaching fellowship in physics at the College of William and Mary.

The article quotes faculty members Dean Eva Marr as saying the students are "really very ordinary people."

If they seem extraordinary, when you talk to them, it’s because they’ve been exposed to remarkable ideas," she says. Brann herself earned a B.A. from Brooklyn College, M.A. and Ph.D. from Yale and many fellowships, and served for 10 years on the Maryland Advisory Committee of the U.S. Commission on Civil Rights.

St. John’s president Christophe Nelson, B.A., St. John’s-Santa Fe, and Ph.D. University of Utah, comments that "the student not used to being listened to starts working much harder and contributes even more, and the whole process builds genuine respect for diversity in thought and opinion."

Karen Pope, writing in collegiate, that change lives: "At schools you should know about Even if You’re Not a Straight-A Student," said of: "last years earlier at St. John’s, I came as a student. This was the kind of education Jefferson had in mind as the surest path to American democracy."
Cornell Professor Rodríguez’s Students Explore Rain Forests

BY ROGER SEGELKEN

The scientific experiments were real, designed in the Cornell undergraduate students themselves and performed, in many cases, for the first time anywhere. The experimental materials were gathered from rain forests in South America and Africa, where exotic diseases and the medicinal plants that cure them thrive side by side.

Only the time frame was unrealistic. Students in BioG 442—Microbial Assays in Chemical Prospecting, had but one semester to complete experiments that can take years in the laboratories of pharmaceutical companies.

The class teaches laboratory methods for determining effects of natural chemicals on disease organisms. Student George C. Hunter had spent the previous summer in a Yekuan Indian village in the Venezuelan rain forest eating the same indigenous foods he was studying, through a Cornell-based program in ethnomedical field work. The senior’s field work showed him that the Yekuan children’s diet kept them remarkably healthy; the microbial assay class was his chance to discover why.

Tiffani Rogers, a senior, also had rain forest experience on her resume. Her field work took her up close and personal with 88 species of ants—including some of the world’s most aggressive—and she used the laboratory class to explore the chemistry behind myrmecophyte relationships, the mutually beneficial relationships some ants have with plants.

Taught by Elia Rodríguez, the university’s Perkins Professor of Environmental Studies and a researcher known for explaining why primates use medicinal plants, and by John P. Berry, a recent Ph.D. graduate of Cornell who studies African mountain gorillas and the plants they seek, BioG 442 is a hands-on class from day one. Students learn the techniques of chemical prospecting by performing them, extracting compounds from their plant and animal samples, and analyzing them with thin-layer chromatography and other techniques. They learn and promptly try a virtual arsenal of assays—including disc diffusion, minimum inhibitory concentration, vinegar, and protease inhibitor assays—to test natural materials for antibacterial, antimalarial, and antiparasitic activity.

The students pay special attention because any of the newly learned techniques could be the key to success in the experiments they are designing. Some of the projects take on a particular urgency. Lori Dolinger, a junior, examines microbiological activity in the Ugandan herbal preparations used to treat AIDS symptoms. Sophomore Linda Goodman tack-
les antimicrobial and antiparasitic activity in plants of South America, where malaria is making a horrific comeback.

Some of the lab techniques don't work the first time, no matter how diligently applied, or even the 15th time. Scientific experimentation on the biomedical frontier is like that, the students are discovering. As the December poster session approached, some results remained maddeningly elusive. 'Don't worry,' Berry told his students, 'Report what you have found.'

In the main conference room of Cornell's Biotechnology Building, the scene resembled poster sessions convened by distinguished scientists, although these investigators are younger and frequently better dressed. The task of cramming all the hard-won information was tougher than battling Amazon mosquitoes. The students agreed, and they nervously endured the scrutiny of learned scientists and 'celebrity judges' who perused their work.

An announcement made by Professor Rodriguez broke the tension with two pieces of good news: the fieldwork sites for the upcoming expeditions in chemical prospecting had been selected, and students in this laboratory course have an inside track on the coveted all-expenses-paid research opportunities. Furthermore, the first issue of the world's only journal of undergraduate research in chemical prospecting, *Emanations from the Rain Forest*, is going to press. Rodriguez said, waving a printer's proof copy. And the best of the studies conducted in BioG 112 will be reported in the second issue.

Then the poster-judging resumed. After the examinations, the results were announced. Yaner's Ramos, a sophomore, was a runner-up with her project, 'Medicinal use of Lobelia wullastoni by Gorilla gorilla hembegi.' So was Jennifer Laehnel, for Chemical Analysis of the Tropic of Bird Species and Secondary Metabolites. And the winner was Stephen Desouza, a junior, with Investigation of the Chemical Defenses Against Insect Herbivory in Young and Mature Leaves.

In one Cornell semester Desouza's experiments had shown that insects are more likely to eat mature leaves compared with younger ones, and he made a start at determining the chemistry involved. He has failed to detect antimicrobial or antiparasitic properties of the plants. He admitted, and he wasn't sure the phenolic chemicals he found were repelling the insects.

The next step will require further experiments. Desouza can't wait to get started.

**Journals Debut**

Field studies conducted in the Amazon rainforest by Cornell undergraduates and published in the first issue of the first journal of its kind are beginning to answer some long-standing questions.

**Will a cup of lichen tea four times a day cure urinary tract infection or even gonorrhea?**

**Can a bird's choice of nest-building materials boost its immune system?**

**Why do some Indians prefer the honey of stingless bees over honey from killer bees?**

Chemistry—not bee temperament—explains the antibiotic value of honey from the mellow insects. Student scientists report in Vol. 1, No. 1 of *Emanations from the Rain Forest*. Likewise, there is a chemical explanation for birds' disease resistance and for the curative power of a lichen that Piran Indians call *odoche jipacca* or ‘guana tear.”

The indigenous people and other inhabitants of the Amazon rainforest know what worked for them but not why—until Cornell undergraduates began their scientific expeditions in 1996. Every year since then, the students have returned to study ethnobotany and to query their Indian informant about the plants that they and the rainforest animals use. With the prescribed plant materials in hand, the students go to work in Cornell's field laboratories, performing chemical extractions and bioassays, hoping to learn why some plants are so effective against bacteria, fungi, and other pathogens.

And now they have a way to be the rest of the world know about their findings, the scientific journal about ethnobotany and chemicals. Ecology written and edited by college students. Financial support for the journal is provided by Cornell alumni.

The ongoing studies might lead to the discovery of important new drugs for a variety of epidemics, says Gustavo Arenal, a Cornell senior and editor-in-chief of the new journal. 'More importantly, these research efforts have implication for biodiversity conservation and indigenous rights in the region.'

Cornell junior and assistant editor Nicole Salgado adds: 'Sharing our knowledge is an essential way to ensure that these ancient lands are here to stay—or they shall disappear unrecognized, like myths of old.'

The Yutaq research site receive financial support from the Fogarty Minority International Research Program (MIRT) of the NIH Cornell University, and the Instituto Venezolano de Investigaciones.
An Arizona K-20 Consortium
Pooled Resources in a High-Need Region

By Don E. Schoening,
Nick L. Lund,
Gil Aguiles

The people of Yuma County, Arizona, take significant pride in their outstanding K-12 teachers, who are challenged to provide quality educational programs in a rapidly growing southwest border region. A nationally recognized lifelong learning K-20 Consortium between Arizona Western College, Northern Arizona University, Yuma Elementary School District 1, and Yuma Union High School District brings together institutions of different educational levels to ensure that culturally sensitive, professionally prepared teachers are in regional K-12 classrooms. This consortium also works extensively to maximize effective use of institutional shared resources.

The Yuma K-20 Consortium had its foundations in an educational partnership between Northern Arizona University (NAU) and Arizona Western College (AWC). AWC is one of two higher education institutions in Arizona designated as a Minority Serving Institution. As one of 10 Arizona community colleges, AWC serves Yuma and La Paz counties in the southwest corner of the state.

Between 1990 and 1995, AWC's service area was designated a "minority-majority" region, meaning that minorities make up more than 50 percent of the population in the service area. Hispanics comprise 90 percent of those individuals. The student population on the AWC-NAU-Yuma campus reflects the service area demographics.

In the 10-year university community college partnership, AWC provides first-year student and sophomore courses leading to associate degrees, and NAU provides junior and senior courses leading to bachelor's degrees, as well as graduate programs. AWC and NAU share the same campus in Yuma and attempt to provide a seamless student educational experience that offers a cost-effective option for the people of Southwest Arizona. A significant part of the curriculum includes teacher preparation programs which have strong bilingual-multicultural and English-as-a-second-language options.

Since the beginning of the NAU-AWC partnership, more than 1,800 baccalaureate and graduate degrees have been awarded by NAU on the Yuma campus. Currently, there are some 20 bachelors, seven masters, and one doctoral degree offered by NAU in Yuma, with the undergraduate programs closely articulated to AWC degree programs. The majority of these degrees are in various areas of education with student teacher placements in regional K-12 schools and many of the graduates remaining in the Yuma region as active professionals.

One measure of success of the teacher education programs is the Yuma County Teacher of the Year awards program. For example, of the more than 80 peer-nominated teachers in 1998, 32 earned bachelors or master's degrees through NAU in Yuma. Feedback from K-12 administrators supports the effectiveness of the bilingual multicultural
Feedback from K-12 administrators supports the effectiveness of the bilingual-multicultural and ESL components of the AWC-NAU higher education curriculum in meeting regional needs, especially since approximately 70-80 percent of the students are first-generation college students and for many, Spanish is their first language.

Based on the success of the YUAWC partnership, the Yuma K-20 Consortium was formed to share resources, operate more effectively as partner institutions, and enhance lifelong educational opportunities for the region. The consortium works on curriculum linkages as well as infrastructure and currently has functioning partnership operations in areas such as student transportation, microwave communications, employee health care benefits, wastewater treatment, and computer linkages.

Lifelong educational opportunities include such programs as early childhood education, school-to-work programs, high school-college express program, intensive language courses, and continuing education programs for senior citizens.

The high school-college express program is one example of coordinating curriculum across entities to enable smoother and more rapid student progress. In this program, high school students can complete AWC courses for college credit.

As an example of pooling physical resources, the consortium has an agreement among members for student transportation. Yuma Union High School District is the fiscal agent for operation of the transportation center, which is located on the AWC-NAU Yuma campus. School buses are purchased by the high school and elementary school district, and are pooled in usage, including coordinated routing, driver training, and operations. Service routes cover some 15,000 miles a day. AWC and NAU-Yuma use the transportation center for serving their comparatively few vehicles on a charge-back basis. This effective pooling of resources enables each entity to gain maximal, efficient use of the center and has saved considerable costs for each entity.

K-20 Consortium members and non-members may participate in agreements that are mutually beneficial. For example, an employee health care benefits program includes AWC, Yuma Elementary School District #1, and the Crane School District, which is not a formal member of the K-20 Consortium. The program has saved employees considerable health care costs by negotiating better benefits across a larger number of people.

Thus, the AWC-NAU partnership and the Yuma K-20 Consortium, by taking a partnership approach, preserve the mission and identity of each institution while providing expanded innovative, and more cost-effective opportunities to the people of Southwest Arizona.

Participants agree that partnering is difficult at times, involves considerable negotiations, and requires willingness to compromise for the overall good. The ultimate benefits for taxpayers, professional growth of citizens, and regional economic development make the efforts more than worthwhile.
YUMA, ARIZONA, PAST AND PRESENT

In 1912, Congress authorized and President William Henry Taft signed a resolution making Arizona the 48th of the United States of America. The area, formerly claimed by Spain, became a part of Nuevo Mexico when Mexico won its independence after three centuries of Spanish rule. In 1846, the United States and Mexico went to war. Two years later, the nation signed the Treaty of Guadalupe Hidalgo, and the U.S. gained “New Mexico”—a vast territory extending from Texas to California on the Pacific and including most of present-day Arizona. The remainder was bought from Mexico as part of the Gadsden Purchase.

Yuma County, located in the southwest corner of Arizona, adjoining California, is bordered on the west by the fast-flowing Colorado River. The river, and its 340 miles of sandy beaches, heads north to Lake Mead, the largest artificially made lake in the U.S.—115 miles longer than the 100-mile international border that Yuma shares with the Mexican state of Sonora.

Hispanics are Arizona’s largest ethnic group. Early missionaries in and explorers of Arizona include Alvar Núñez Cabeza de Vaca (ca 1536), Marcos de Niza (1539), Francisco Vázquez de Coronado (1540), Antonio de Espejo (1583), Juan de Oñate (1595), Eusebio Francisco Kino (1687), Francisco Tomás Hermentegildo García (1768), and Juan Bautista de Anza (1774). Raúl H. Castro became the state’s first Mexican American governor, elected in 1975. Mexican national holidays, such as Cinco de Mayo and Día de los Muertos, are celebrated as statewide festivals.

Arizona ranks eighth among the states in number of Hispanic residents, and third in number of Native Americans.

The Yuma region includes the Colorado River Indian Reservation, which is home to 7685 people on nearly 200,000 acres, and the Cocopah Reservation, which houses 799 people on 8885 acres.

Yuma County includes the Colorado Desert, part of the Sonoran Desert, which supports more than 400 edible plants and a host of miniature flowers said to be best viewed while lying face down.

Arizona is where the mule deer and the antelope play, as well as the gila monsters, rattlers, and chuckwallas—edible lizards.

At one time, its chief economic resource was called the three Cs—copper, cotton, and cattle. Silver and gold mining played a part in its history as well.

Spanish missionaries operated schools in Arizona in the late 1600s, teaching primarily religion to Native Americans. When the area was a U.S. territory, its constitution mandated free public education. Today, in addition to its three state universities, Arizona operates one of the largest systems of community colleges in the country. One of those community colleges, K-20 Consortium partner Arizona Western, is located twelve miles east of the city of Yuma, the largest in the area, with a resident population of 75,000 that doubles in the winter, attracted by some of the country’s best weather of the season. Much of the spacious AWC campus, 115 acres, is untrammeled desert land.

The closest large metropolitan areas are San Diego, California, and Phoenix, Arizona, each a five-hour drive away.

Located much closer, only 1 1/2 miles, is the Mexican border—at one time much farther north. Yuma has always experienced a high influx of Mexican immigrants, the highest in the state, according to the last U.S. Census, 1990.

In 1995, when the peso was devalued by 50 percent and nearly 10 percent of Mexican laborers lost their jobs, immigration from Mexico into Yuma nearly doubled. A survey of local employers conducted by AWC in 1997 showed more than half reporting that they came to Yuma for the cheap and plentiful sources of labor. Yuma’s non-immigrant low-skilled workers, especially young African Americans and Native Americans, might be blocked from entry-level opportunities by the competition, thus the gap between rich and poor widens. All groups can benefit from the passport that a college education represents.

These are some of the conditions and challenges facing members of the K-20 consortium. Against this backdrop, the successes of the students and alumni of Arizona Western College and Northern Arizona University at Yuma are the schools’ greatest strengths and greatest inspirations.

Most AWC students are first generation. They struggle against immeasurable odds to attend college, and struggle even harder to stay there. When they succeed, their lives change dramatically.

AWC graduate Erlinda Rubalcaba, Class of 94, a sixth grade dropout who once barely supported her family by following the crops, was nominated the “New Teacher of the Year” in her school district. Graduate Fernando Rangel won honors for writing the “outstanding report” for the University of Utah’s Summer Research Opportunity Program for Underrepresented Students. Rangel’s future, and that of other students following his path, is no longer limited to the lettuce fields.
Oroza Joins Leadership Program

Lourdes Oroza, chair of the Community and Distance Education Department at Miami Dade Community College's (Hialeah) Interamerican Campus, has been chosen by the Dade County Foundation to participate in its new leadership development program, Miami Fellows Institute.

Oroza, who along with 15 other future leaders will participate in various workshops with government officials, professionals, and community activists during a two-year period, is recognized by local and state leaders for her knowledge, expertise, and leadership in adult and vocational education. Throughout her career, she has focused on working with cultural and language minority students, enabling them to integrate into the mainstream and improve their quality of life.

She is a graduate of Talane University and holds a master's degree from the University of Miami and a doctorate from Florida International University.

Martinez New President at Grossmont

The Grossmont-Cuyamaca Community College (Calif.) District Governing Board recently named Dr. Ted Martinez Jr., president of Grossmont College.

I am honored to join a team that is so committed to its students, said Martinez. Planning to be active in the community, Martinez said he intends to be involved with local schools, colleges and universities, and business and industry.

Formerly the president of Richard I. Dales College (Ohio), he belongs to the American Association of Community Colleges, and Student Development Committee.
The president of the local TACHE chapter, Rudi Ortiz, said that an annual scholarship will be named for Valdez and will be awarded beginning with the next academic year.

**Padrón Joins State Board**

Dr. Eduardo J. Padrón, president of Miami-Dade Community College, has been appointed to the State Board of Directors of Take Stock in Children, Florida's educational program that provides college scholarships, mentors, and hope to deserving low-income youth.

As a member of the state board, Padrón joins other Florida leaders such as H. Wayne Huizenga, RogerCsvvis, and Frank T. Brogan, and represents Miami-Dade County in advocating a $2.8 million legislative budget item to expand Take Stock in Children. The funding will help extend the scholarship program to an additional 40,000 students over the next 10 years, potentially cutting the high school dropout rate in Florida by half.

**Olivarez New GRCC President**

Dr. Juan Olivarez has become the eighth school president in Grand Rapids Community College (GRCC), a 58-year-old history. He is the Michigan school's second president since it became a community college in 1991.

We are confident Juan will continue GRCC's strong commitment to serve the community with diverse educational instruction and services, said Jackson Day, chair of the Board of Trustees.

Olivarez was the dean of institutional research and CEO of the Community Learning Enterprise at GRCC.

**Andrews Speaks at MHCC**

As part of its Women's History Celebration, Mt. Hood Community College (MHCC) hosted Lkisa Padilla Andrews, owner and publisher of the El Hispanic News Oregon and southwest Washington's leading bilingual English-Spanish weekly community newspaper. Padilla Andrews is pictured here with Joe Vela, president of MHCC.

Padilla Andrews is well known for her "behind-the-scenes" advocacy on behalf of disenfranchised Hispanic families. She was instrumental in obtaining the funds needed to staff positions at three high schools to reduce the Hispanic student dropout rate, and founded the Hacienda Community Development Corp., which serves as a national model for affordable family housing.

She founded the Maria Garula Foundation, which raises millions of dollars for programs and students who wish to present information about their current academic work.

**Carrasco Attends MAES Symposium**

Rector Carrasco, dean of the University of Southern Colorado College of Applied Science and Engineering Technology, attended and accompanied 20 students to the Society of Mexican American Engineers and Scientists (MAES) 24th Annual National Symposium and Career Fair in San Antonio, Texas.

Carrasco, who serves on the National Board of Directors, was one of three outstanding individuals awarded the Medalla de Oro. The Gold Medal, MAES' highest recognition award, is presented to a professional who, in turn, becomes a Padre/Omad de la Comunidad, a "godfather/godmother" to a MAES scholar who has received a $3,000 academic scholarship.

**Medical Student Montalvo Wins Scholarship**

Cristina Montalvo, 22, of the University of Texas Southwest Medical Center-Dallas, has been awarded a $2,000 scholarship by the Dallas Concilio of Hispanic Service Organizations, a non-profit organization committed to working with volunteers and local agencies to enhance Hispanics' access to health and human services. The Dr. Onesimo Hernandez Scholarship commemorates the first Mexican American graduate of the University of Southwest Medical School.

Montalvo has completed her first year of medical school. She adds her community by lecturing to high school and middle school students about preventing sexually transmitted diseases. Upon completion of her medical training, she wants to be a family practitioner and serve as a mentor for Hispanic students who aspire to enter the medical field.

**Trujillo Speaks at Highlands**

New Mexico Highlands University alumnus Adam Trujillo returned to the campus in Las Vegas, New Mexico, to discuss the impact of the free trade agreement on the United States and Latin America.

Trujillo was with the Food and Drug
Administration for 38 years. He is an expert in the area of import export requirements, and has traveled extensively throughout Mexico and Latin America advising companies on international and U.S. standards for product quality.

He discussed efforts in the United States and New Mexico to increase participation in the Free Trade Area of the Americas, and provided ideas for careers in international affairs and international business in Latin America.

Pagan Awarded Fulbright Scholar Grant

Dr. José Pagan, assistant professor of economics and finance at the University of Texas-Pan American, was awarded a $10,000 Fulbright Scholar grant to conduct research on the underground economies of Mexico.

"I have been studying exactly how the informal underground economies, or the untaxed sectors in Mexico, have changed in recent years," said Pagan. "In my studies I have discovered that between 1985 and 1995, the number of employed in the untaxed sectors has decreased from 15 percent to 10 percent." Since then, he has been trying to find out what impact that drop will have on the overall economies in Mexico.

Pagan has been conducting the study with Dr. José A. Tijerina, former director of the Centro de Investigaciones de la Universidad Autónoma de Nuevo León in Monterrey, Mexico.

PLACES

Madonna U. Helps Empower Latinas

To expand access to higher education to women in Southwest Detroit, Madonna University in Livonia, Michigan, and the Religious Sacred Heart in Detroit established the Southwest Women's Educational Empowerment Project in the spring of 1998.

The project is geared toward women who wish to begin or resume their college studies and it strives to fulfill the educational needs of women, primarily Latina and African American, by giving them the opportunity to earn a college degree.

Pictured here at the Southwest Women's Educational Empowerment Project Mentor meeting in November are, standing left to right, Lisa Lopez, Guadalupe Serrata, Carmenita Bueno, and mentor Angelina Espino. Seated left to right are Maria Paulina Nazare, Myrna Maria de Leon.

HCC's Hispanic Committee Names Members

Sixteen people were recently named to Hillsborough Community Colleges (HCC) first Hispanic Advisory Committee.

Chosen to represent their communities were Angie E. Black, Jose Cabrera, Ana Crespo, Hecena De Leon-Devan, Margarita Gonzalez, Lyda Medrano, Tony Moreno, Rosalva Moreira, Fernando Nunez, Maria Pinzon, Brenda Santos, Carmen Sorondo, Jose Valiente, and Marc I. Vila.

During the inaugural meeting of the committee, Ricardo Rour (Esq.) was elected chair and Miriam Navarro was elected vice chair (both pictured above).

The stated mission of the Hispanic Advisory Committee is to increase the educational level of the Hispanic community in Tampa.

Sones de Mexico at St. Augustine

A concert by Mexican folkloric group Sones de Mexico was one of the latest cultural events to take place at St. Augustine College in Illinois.

St. Augustine College is the only bilingual institution of higher education in the Midwest. Since 1980, the college has served as a bridge to the future for Chicago's Hispanic community. Ninety-two percent of the students are Latino, of which 74 percent are women. Eighty percent of them are mothers.

The college is committed to providing an academically challenging yet comfortable multicultural environment.

Minority Engineering Program at CU-Boulder

The Success in Engineering through Excellence and Diversity (SEED) program, formerly known as the Minority Engineering Program at the University of Colorado-Boulder, has received national recognition in The Shape of the River (Princeton University Press, 1998), a book written by William Bowen and Derek Bok, former presidents of Princeton and Harvard universities, respectively.

A 25-year-old program that assists in the recruitment, retention, education, and career placement of underrepresented minorities in the College of Engineering and Applied Sciences, SEED was cited for its effectiveness in supporting students to achieve high academic marks.

The program has an average retention rate of 87 percent, nearly double the national retention rate of minorities in engineering.

Pictured here using computers donated by Lockheed Martin and Hewlett Packard to the SEED Resource Center are engineering students Michael Diaz and Yasmine Bryant, with Mark Espinosa in the background.
USF Celebrates Feast of Three Kings

The University of South Florida's (USF) Latin Community Advisory Committee and Major League Baseball’s Tampa Bay Devil Rays teamed up to host a feast of Three Kings picnic in January. The Feast of the Three Kings is the focal point of Christmas festivities in Latin America.

The annual picnic is held for committee members and students who receive the group’s four-year scholarship.

This year, the Devil Rays sponsored the event, and several players, including manager Larry Rothschild, attended the picnic. Devil Rays owner Vince Naimoli donated $500 to the committee’s scholarship program. Enjoying the festivities were, left to right, pitcher Wilson Alvarez, USF student Danna Host, Danna’s sister Sonia, and catcher John Hoherty.

M-DCC Elects Calderin and Diaz

Miami-Dade Community College Foundation, Inc., has elected Carolina Calderin and Victor H. Diaz, Jr., as vice chairs.

Calderin, who is a civil trial lawyer specializing in aviation and personal injury litigation with Podhast Orseck, Josephs-Bekman, Eaton, Meadow, Olins & Perwin, PA, is active in the Miami Beach Chamber of Commerce, Miami Beach Community Development Corporation, and Miami Design Preservation League.

New Mexico Tech Hosts Rep. Wilson

New Mexico Tech Vice President for Research Van Romero joined Tech administrators and faculty members in giving a technical briefing and overview of several ongoing projects when U.S. Rep. Heather Wilson (R-NM) visited the campus recently. The congresswoman was said to be duly impressed with the university’s extensive involvement in research of national interest.

Unc Child Center Using Spanish

The Frank Porter Graham Child Development Center at the University of North Carolina-Chapel Hill is reaching out to the Spanish-speaking community by translating two new assessment tools into Spanish.

These instruments can be used at Head Start, evaluation centers, specialized classroom programs, and early intervention programs.

RHC Expands Online Classes

At Rio Hondo College (RHC) in California, its Virtual College general education classes have been up and running this semester, each of which transfers to both the University of California and California State University systems.

A number of new, full-time faculty have joined the Borough of Manhattan Community College (BMCC) this semester. Among them is assistant professor of ethnic studies, has a bachelor’s from Franklin College, and a masters and doctorate from City University of New York (CUNY) Graduate School.

Francisco Campos, instructor in business management, has an associates from BMCC and a bachelors and masters from Baruch College.

New Fort Worth School of Public Health

A new School of Public Health has been unanimously approved by the Texas Higher Education Coordinating Board for Fort Worth’s University of North Texas (UNT) Health Science Center. The board recommended that the legislature fund the school.
Romero has a bachelor’s from Cornell University and a doctorate from the RAND Graduate School.

**UTEP Science Scholars Win Awards**

At the Rio Grande branch meeting of the American Society of Microbiology, three students from the University of Texas-El Paso were awarded prizes for their outstanding research presentations on the science of the region.

Gautiha Castillo and Melissa Tarango won first- and second-place honors, respectively, in the graduate student category for their research on parasitic and infectious diseases endemic along the U.S.-Mexico border.

Nichole Pérez earned first prize in the undergraduate student category for investigating techniques of bioremediation.

At a separate meeting of the American Geophysical Union, environmental science graduate student Fania Espinoza was granted an outstanding student paper award.

**AU Honors Huaita and Rioseco**

At a January dinner, American University’s Washington College of Law (WCL) honored Marcela Huaita of Peru and Liz Rioseco of Chile, the first graduates of its LL.M. Gender and Law specialization.

Huaita and Rioseco are the first women to complete the specialization, which is offered through the International Legal Studies Program at WCL. The specialization, inaugurated in 1997, is the first graduate law degree in the United States to focus on gender. The Gender and Law LL.M. consists of courses incorporating international, comparative, and domestic approaches to legal issues of importance to women’s lives.

---

**Cleveland State Embraces Romero**

Dr. Philip J. Romero, former chief economist to the governor of California, became the new dean of the James J. Nance College of Business Administration at Cleveland State University (Ohio) in January.

Romero, a professor of finance, served as chief economist and deputy cabinet secretary to California governor Pete Wilson from 1991 through 1998 before coming to Cleveland.

Cleveland State President Claire Van Hammersen praised Romero, citing his outstanding record of leadership and successful strategic and economic planning.

---

**Tejano Empire: Life on the South Texas Ranchos**

by Andrés Tierno

Andrés Tierno portrays the daily lives of South Texan of Mexican descent, particularly the Tejano ranch community following the Texas Revolution. Accompanied by colorful and detailed drawings, this book addresses the values, folklore, music, and beliefs of the Tejanos.

---

**Pilgrim Stories: On and Off the Road to Santiago**

by Nancy Louise Frey

Each year thousands of men and women from more than 60 countries journey on foot and bicycle across northern Spain, following the medieval pilgrimage road known as the Camino de Santiago. Their destination is Santiago de Compostela, where the remains of the apostle James are said to be buried. These modern pilgrims and the role of the pilgrimage in their lives are the subject of this book.

---

**Torn Lace and Other Stories: An English Translation**

by Emilia Pardo Bazán

Written a century ago, the 16 stories by Emilia Pardo Bazán collected in this volume are strikingly relevant to contemporary concerns. Noted for narrative complexity, stylistic variety, and feminist themes.
Bazins stories explore many aspects of the relationships between men and women.

Translation by Maria Cristina Urruela

The Cutter
by Virgil Suarez

When young Julian Campos attempted to leave Cuba five years ago, the Castro regime allowed his parents to travel on, but kept him back at the last moment. Julian was forced to become a cutter, laboring day after day in the mudd and sugar cane fields. Now it seems he might have found a way out—but is it impossibly dangerous? Julian has reached a point at which hope and forgiveness seem to be his enemies, and the shadows his only friends.

In search of Contemporary Spain—The Legacy of Franco

What is the role of the military in modern Spain? This program focuses on a captain of the elite parachute regiment who believes his job to be the moral manipulation of the conscripts who come to serve their time with his regiment. One thing becomes clear—the legacy of Generalissimo Franco endures.

All 52 min. (color)
Item #84906

In Search of Contemporary Spain—Andalusia: Cradle of Stereotypes

Andalusia, home of bullfighting and flamenco dancing, is the focus of this program, which looks at the changes wrought during and since the fall of Franco and its impact on the bull ranch and its employees. What is the relationship between the tourist and the real people who live in Andalusia today?

All 55 min. (color)
Item #84905
In Search of Contemporary Spain—The Image of Modern Spain

This program is set in Madrid and looks at the changes in Spain to determine whether they are deep-rooted or merely cosmetic and superficial. The focus which is on a young editor of a magazine, neatly reflects the difficulties Spain is currently facing and will continue to face in the years to come.

(52 min. Color) Item #FHI 2808

Conversations with Latin American Writers: Gabriel García Márquez

This program features a rare interview with the man some consider the finest Latin American writer of the 20th Century—Colombia’s Gabriel García Márquez. He discusses his life and work on a highly personal plane.

(Spanish 45 min. Color) Item #FHI 7006

Conversations with Latin American Writers: José Donoso

José Donoso, the Chilean writer, ranks high in the pantheon of great Spanish American novelists. In this interview, Donoso, now in his seventies, speaks about his work and his literary technique.

Book Review

By Ivania del Pozo

In recent years, there has been a major resurgence of interest in ethnography, both within anthropology and among diverse fields in the humanities. Not only has ethnographic study been revitalized in critiques and new perspectives originating in other disciplines, but its real substantive contributions to social and cultural knowledge are now being employed by social scientists in humanities disciplines such as history, comparative literature, and women’s studies, and by professional schools such as education, law, and business.

As the limitations of survey research and quantitative approaches are being recognized, ethnography also is gaining prominence in many social research fields. Two distinguished critics of educational policy, Bloome and Egan-Robertson, seek to sweep away the distortions, half-truths, and myths that cloud our understanding of ethnographic studies and multiculturalism in our society. They argue in this book that engaging students as ethnographic and sociolinguistic researchers involves fundamental questions about the knowledge base of classroom learning, about the nature of ethnographic and sociolinguistic research, and about the nature of writing. This is because ultimately, through their inquiry, these students become anthropologists and sociologists helping to define and explain how culture and language work.

In today’s passionate debate about teaching methods, this book represents a much-needed new direction in classroom education, generated by using ethnographic and sociolinguistic data. This compilation of insightful essays helps to frame the discussion. A volume in the series “Language and Social Processes” of the University of California at Santa Barbara, the book provides a much-needed forum for scholarly discussion as it seeks to illuminate one of the most stimulating new directions in classroom education: students as ethnographers.

The book has three sections. The first highlights the integration of students as community researchers of culture and language with concerns for academic learning. The second describes projects in which students studied language as sociolinguistics, and the last describes how students research on issues of culture and language was either part of or led to their taking social action.

A good introduction to ethnographic theories and methods can be found in the articles by Egan-Robertson and Watten entitled “Students as Ethnographers, Thanking and Doing Ethnography.” A Bibliography Essay on very pertinent additions are Carmen Mercado’s “When Young People from Marginalized Communities Enter the World of Ethnographic Research: Writing, Planning, Reflecting, and Sharing.” and Rose Andrade’s “Life in Elementary School: Children, Ethnography, Reflections.”

Many of the articles have an ethnographic perspective, and they use a holistic, textual, and comparative style to describe in many instances this new kind of learning environment formed of inner-city youths and university student-teachers, administrators, and teachers.

Several of the projects outlined use multiple methods to try to elicit the group members’ views of reality. Surveys and observations assess the degree to which all participants’ acquisition of knowledge and skills has increased. The essays present direct daily observations that document changes, augmented by a combination of journal records, parent interviews, self-evaluation, and portfolios as primary sources.

In the opening essay, by Victor Huyzendvulken, and entitled “Learning to See Learning in the Classroom: Developing an Ethnographic Perspective,” the authors examine how the theme of ethnography was used by fifth and sixth grade students to construct an inquiry-oriented classroom community.

In my university classes, I like the writers, emphasize that “knowledge is constructed, rather than given, and that learning is primarily a matter of inquiry and interpretation, rather than memorization or reproduction of known facts.” As a teacher, I am interested in exploring the relationships between among teaching, learning, culture, and language. One of the authors, Judith Green, has been engaged in exploring such questions guided by theories on the social construction of knowledge. Her goal is to identify principles of practices that teachers and other professionals can use to support equitable access for all students.

This collaborative dialogue among practitioners of ethnography as a commonly shared research methodology, cultural theory as a pluralistic field of scientific debate and critique, and applied research as a policy-oriented aspect of ethnographic work, will ensure the vitality of the book’s focus. While its center of gravity will be in classroom education, it will also promote the use of ethnographic methods and perspectives in other areas of research.

My conclusions are these:

1. This series provides one of the most astute assessments of the purpose of ethnography yet written, which is to “help people create better worlds.”

2. This text helps identify principles and practices that teachers and administrators can use to support equitable access for all students.

3. The educational techniques presented in this book have helped my students to write and research the subject matter using an ethnographic perspective.

But the most valuable aspect of the volume is the realization that students research on issues of culture and language can lead to taking social action.

Ivania del Pozo, associate professor, teaches in the Department of Foreign Languages and Literature, at Youngstown State University, Youngstown, Ohio. She also works with an after school outreach project called Mariposa (Butterflies) to symbolize the transformative power that education can have on young children.

It interested in submitting a book review, please e-mail me at outlook@edu.com for Book Reviewer’s Guidelines.
National Institutes of Health
National Institute of Mental Health
Division of Mental Disorders, Behavioral Research and AIDS (DMDBA)

Division of Mental Disorders, Behavioral Research and AIDS (DMDBA), National Institute of Mental Health, invites applications for the following position in its Office of AIDS Research.

- **Biologist/Virologist, GS-12/13**

  The incumbent will serve as a Biologist/Virologist supporting a major research program, the goals of which are to further understanding of the cellular and molecular mechanisms underlying the CNS dysfunction associated with HIV infection, and the subsequent identification of potential therapeutic interventions to prevent or reverse this CNS dysfunction. Incumbent will analyze current research activities and program needs to expand research on HIV-associated motor cognitive dysfunction.

  Basic qualifications for the position include an M.D. or Ph.D. in Biology, with some experience in molecular and cellular mechanisms underlying HIV effects. GS-12/13 Civil Service positions have a salary range from $48,796 to $82,481. Salaries include locality pay and the special salary for Medical Officers. Physicians may be eligible for a Physician’s Comparative Allowance (PCA) between $5,000 and $11,000 a year. This position may also be filled through the Commissioned Corps.

  The full text vacancy announcement is available via the World Wide Web at http://www.nimh.nih.gov/orb/pmh/jobs.htm. Interested candidates may contact Ms. Malca Glibin, NIMH Personnel Management Branch, at (301) 443-9094. Applications will be accepted if postmarked by April 30, 1999 and received within 5 working days.

NIH is an equal opportunity employer.

IOWA STATE UNIVERSITY
Where you can become your best.

Coordinator of Minority Recruitment
Office of Admissions

If you are an energetic, motivated, experienced professional interested in working with underrepresented students, Iowa State University has the position for you. Seeking to become the best land-grant university in the nation, Iowa State is committed to a diverse student population. Currently 1,700 ethnic minority students are enrolled. The successful candidate will be responsible for coordinating our minority recruitment efforts.

Iowa State is located in Ames, a community recently ranked as the second most livable city in the nation. More than 25,000 students from all 50 states and 115 nations are enrolled. The university is ranked as one of the top 30 public universities in the nation and has a national reputation for science and technology disciplines as well as highly acclaimed interdepartmental, broad-based programs. Visit our Web site at www.iastate.edu for more information about Iowa State.

The primary responsibilities of this position are to create and manage initiatives to attract and enroll minority underclassmen, develop meaningful partnerships with the university’s colleges and departments, assist in the recruitment of academically talented students for such programs as the George Washington Career Scholarship, and participate in a full complement of admissions duties including extensive travel and management of a territory. This full-time position reports to the director of admissions.

Candidates must have a bachelor’s degree and five years experience in a master’s degree and three years experience in student services. Duties include coordinating student recruitment; developing and implementing a plan for the recruitment of underclassmen; assessing the effectiveness of recruitment efforts; and providing leadership, direction, and support to staff. Applicants must possess excellent written and oral communication skills, strong organizational skills, and a valid driver’s license. Preferred skills for the successful candidate will also include experience in minority student counseling and recruitment.

Iowa State offers competitive salaries and an excellent benefit program.

Send letter of application resume and the names, addresses, and phone numbers of three professional references to: Enrollment Services Search #383 Student Hall Ames, IA 50011. To guarantee consideration, applications must be received by May 1, 1999. Application review will begin May 1 and will continue until position is filled. Contact Dr. Howard at 515-294-8011 or e-mail inhur@mail.iastate.edu if you have questions about this position.

Candidates with professional experience in the Criminal Justice System preferred. Teaching experience and a proven record of success in attaining and managing grant-supported research and demonstration projects will strengthen a candidate's application. The primary teaching responsibilities for one position will be on the Staten Island campus. Forward a letter of application, curriculum vitae, names and addresses of three academic/professional references to: Dr. Anthony Gabb, Associate Dean, Indicate on the envelope your position of interest. No telephone calls please.

Please send all applications, noting appropriate contact name, to:

St. John's University, 8000 Utopia Parkway, Jamaica, NY 11439
St. John's is an equal opportunity employer and encourages applications from women and minorities.
Indiana University
Bloomington Campus

Established in 1820, Indiana University has a rich and distinguished history of providing educational opportunities for people from all walks of life. Following a comprehensive review by a national panel, the Bloomington Campus is the process of restructuring its programs and services designed to retain and graduate Latinos, African Americans, Native Americans and other underrepresented students.

The leadership team under the new structure comprises a Vice Chancellor for Academic Support and Diversity and three Associate Vice Chancellors: Associate Vice Chancellor for Strategic Planning; Academic Support; and Associate Vice Chancellor for Multicultural Affairs and Associate Vice Chancellor for Academic Support. Also reporting to the Vice Chancellor for Academic Support and Diversity are the Directors of the Honors Division and the Minority Achiever Program. Mathematics and Science Scholars. This new leadership team will also share responsibilities for student advocacy. Candidates are sought for the following positions:

**Associate Vice Chancellor for Academic Support**

The person selected will lead a team of professionals responsible for a wide array of academic support services primarily for undergraduate students. Reporting to the AVC are the directors of the Honors Division and Minority Achiever Program. The position is responsible for the strategic planning and development of academic support services to ensure that they are effective and efficient in support of student success.

**Associate Vice Chancellor for Multicultural Affairs**

The University seeks a collaborative leader who is committed to creating and maintaining a climate that respects and celebrates diversity in the broadest sense of the concept. Advocacy for students of color is a major aspect of the responsibilities associated with this position, particularly for undergraduate students. The AVC works closely with the deans of all colleges and the Office of Student Life to ensure that students of color are supported and encouraged to succeed.

**Associate Vice Chancellor for Student Services**

The person selected will lead a team of professionals responsible for a wide array of student services programs designed to support the academic success of students. Reporting to the AVC are the directors of the Honors Division and Minority Achiever Program. The position is responsible for the strategic planning and development of student services programs to ensure that they are effective and efficient in support of student success.

**Associate Vice Chancellor for Administrative Services**

The person selected will lead a team of professionals responsible for a wide array of administrative services programs designed to support the academic success of students. Reporting to the AVC are the directors of the Honors Division and Minority Achiever Program. The position is responsible for the strategic planning and development of administrative services programs to ensure that they are effective and efficient in support of student success.

New York City Technical College of the City University of New York invites applications and nominations for the position of Provost and Vice President for Academic Affairs.

New York City Technical College is the designated technical college of The City University of New York, currently offering both baccalaureate and associate degrees, as well as specialized certificates. The college, located in downtown Brooklyn adjacent to the Metro Tech corporate and academic complex, enrolls 11,000+ students in the technologies of the arts, business, communications, health, and engineering; human services and law-related professions; technical and occupational education; and liberal arts and science and has approximately 275 full-time faculty. The continuing education division serves an additional 10,000 students. There is an operating budget of approximately $45,000,000.

The programs offered by the college have been developed in response to the expressed needs of business, industry, government, and the professions. A City Tech education provides its students with the necessary skills in their respective career areas and the foundation for lifelong learning. Students are vital participants in the college’s mission to help promote a literate, healthy, economically and educationally viable community.

The Provost should have the following professional and personal qualifications:

- A significant and progressively broader record of academic leadership on the executive level
- An earned doctorate
- Undergraduate teaching experience and credentials appropriate for appointment as a tenured full professor and administrative experience on a divisional or departmental level
- Significant experience in the development of new degree programs and the administrative structures required to support them
- Entrepreneurial skills and a record of initiating and completing successful projects
- Experience in and/or commitment to shared governance
- Familiarity with a collective bargaining setting
- An understanding of the importance of new information technologies and their role in the curriculum
- A record of scholarly contributions
- Evidence of leadership in fostering excellence in teaching, learning, research or other scholarly endeavors
- Effective communication skills and the ability to promote collegial working relationships among diverse groups
- Substantial experience and understanding of fiscal affairs in an environment where resources are scarce
- Experience in obtaining and managing external funding
- A deep commitment to the role of higher education in a multicultural setting

Applicants should send a letter expressing their interest in the position, their curriculum vitae and the names of five references (references will not be contacted without the applicant’s prior permission). Nominators should send a letter of nomination and, if possible, the nominee’s curriculum vitae. Applications and nominations should be sent to:

Job Description For Environmental Position

Sarah Lawrence College invites applications for a one-year renewable term appointment in environmental studies to teach on environmental ethics and environmental policy issues beginning September 1, 1999. The position is on a half-time basis (2.5 FTE). It is not possible to combine this position with another full-time position. We seek applicants with teaching and research experience in environmental ethics and who have training and expertise in environmental policy. The main responsibility of the position is to teach one course per semester. The course will focus on the ethical and political dimensions of environmental issues. The ideal candidate will have a Ph.D. in a relevant discipline and experience in teaching environmental ethics. We are particularly interested in candidates who can integrate ethical considerations into their teaching and research. The salary is competitive with other institutions in the area. Applications should be submitted by January 15, 1999. The position will remain open until filled. Please send a letter of interest, a curriculum vitae, and three letters of reference to: Dr. Donna A. Price, Chair of Environmental Studies, Sarah Lawrence College, 18 Seagrave Road, Bronxville, NY 10708-1099.

Director of Human Resources
Alfred State College
Alfred, NY 14802-1196

An Equal Opportunity Employer
FACULTY POSITIONS
DEPARTMENT OF SYSTEMS ENGINEERING
AND INFORMATION TECHNOLOGY

The University of Arkansas at Little Rock invites applications for Faculty positions in the Department of Systems Engineering and Information Technology. The metropolitan campus of the University of Arkansas System has been authorized and funded to establish a new College of Information Science and Systems Engineering with an entering Freshman Class in the Fall of 1999. The College will include the Departments of Computer Science, Engineering Technology, Applied Science and Systems Engineering. The screening for the faculty positions will begin on or about April 1 and continue until all open positions are filled. Faculty appointments will be made as early as June 1 and will continue to be made throughout the next academic year.

The new Department of Systems Engineering will offer 2 BS options, one in Computer Systems and one in Telecommunications Systems and will move as expeditiously as possible to full ABET accreditation. The College will also offer a MS degree in Information Science, which will be a broad-based, inter-disciplinary program to develop professional information technologists for a variety of assignments in today's information-based industry. In addition, the College will offer a minor in Information Technology for those students who want to supplement their programs in other disciplines with the tools and knowledge base to allow them to function effectively in the 21st Century world of knowledge and information-based industries.

The new College and the curriculum for the Information Science and Systems Engineering programs have been created in concert with the knowledge-based companies in Arkansas and will have long-term interactions with knowledge-based information-oriented companies in Arkansas and outside of Arkansas. The relationship with Accenture, Alltel, Arkema, Bell Labs, the ESI Group, and others. There will be opportunities for collaborative faculty research and joint appointments. In addition, faculty in the new Department will be able to participate in graduate programs (including the PhD) with the series of Applied Science options related to the departments in the College. The administration of the University of Arkansas System and the University of Arkansas at Little Rock are committed to creating a nationally competitive academic environment for both faculty and students.

Little Rock and the Central Arkansas Region represent areas with an outstanding quality of life and remarkable housing and recreational opportunities.

Qualifications: Essential credentials for this position include a PhD in Systems Engineering, Information Technology, or a closely related area. Preference will be given to applicants with industrial experiences or evidence of a close working relationship with an industrial partner. Specific areas of interest include computer systems, telecommunications, information systems, including databases, Internet systems, etc., systems simulation and related fundamental areas of signal processing, electromagnetic theory, etc. Applications will be welcome in any of these areas.

Applications: A letter of application or nomination, a complete, up-to-date curriculum vitae, and the names, addresses, and telephone numbers of three references are requested.

The University of Arkansas at Little Rock will offer competitive salaries and an environment that is conducive to excellence. The screening for the faculty positions will begin on or about April 1 and continue until all open positions are filled. Faculty appointments will be made as early as June 1 and will continue to be made throughout the next academic year.

Applications and nominations should be sent to:

ASSISTANT TO THE PRESIDENT
(Diversity/Equal Opportunity)

Southeast Missouri State University invites nominations and applications for the position of Assistant to the President for Diversity and Equal Opportunity.

Reporting to the President, this senior administrator will serve as one of the President’s key advisors, providing proactive, campus-wide leadership in the area of diversity and equal opportunity, and has responsibility for supervision, coordination, and development of practices designed to enhance the university’s community’s appreciation for cultural diversity, and climate of tolerance, respect for the rights of all persons, and its adherence to affirmative action and equal opportunity statutes, regulations, and policies.

The Assistant to the President shall seek to foster fairness, equity, justice, equality of opportunity, and respect.

The Assistant to the President will provide advice in policy and procedures development.

Primary Responsibilities
- Benchmarking with trend-setting universities to identify model programs and develops and facilitates the implementation of effective practices to increase the diversity of faculty, staff, and the student body.
- Serves as the University’s administrator responsible for implementing, as appropriate, suggestions of the President’s Commission on Minority Affairs.
- Provides leadership, proactive support and assistance to units at all stages of the employment process with special regard to developing pools of qualified individuals of diverse backgrounds from which a final selection may be made.
- Provides leadership to unit (college, departmental, etc.) diversity committees in planning and programming.
- Assures that the principles of equal opportunity are followed with respect to the hiring, promotion and involuntary termination processes at the University.
- Serves as the President’s chief liaison with, and chairs the University’s Affirmative Action Committee.
- With the advice of the Affirmative Action Committee, drafts a diversity strategic plan for submission to the President and oversees an annual report on Campus Climate, including complaints and issues and monitors the affirmative action program and related policies and activities, such as those dealing with increasing the diversity of the student body and faculty, and works with Institutional Research to prepare, review and update statistical reports on these subjects for internal and external use.
- Serves as liaison with the appropriate federal and state agencies charged with the task of compliance reviews and complaints of discrimination.
- Coordinates with the Southwestern Missouri Council for Development and Implementation of Equal Employment Opportunity policies and procedures.
- Develops and conducts training programs for employees and students in areas related to diversity and equal employment opportunity, including discrimination, harassment and related issues.
- Has approval authority in the employment processes of the institution in order to ensure compliance with federal, state, and local regulations.
- Performs other related activities as outlined in the Diversity and Affirmative Action Plans and other pertinent University policies and procedures.

Required Qualifications
- Bachelor’s degree
- Significant successful experience in areas such as diversity programming, conflict resolution, employee relations, human relations, and human resources
- Comprehensive understanding of the culture of higher education and the complex issues related to equal opportunity and affirmative action within that culture
- Experience with the principles of diversity, equal opportunity, and affirmative action practice and administration
- Evidence of experience as a successful facilitator of conflict resolution
- Demonstrated commitment to and a record of accomplishment in the area of affirmative action and the promotion of diversity
- Excellent written and oral communication skills
- Strong interpersonal skills, an activist orientation team orientation (i.e. the ability to motivate others, and creative and timely problem-solving skills)
- Evidence of strong organizational skills

Preferred Qualifications
- Terminal degree
- Successful experience in a higher education setting
- Appropriate knowledge of teaching and the curriculum in the higher education environment

Salary and Benefits
- Competitive and commensurate with experience and credentials. Position available August 1, 1999, or as soon as possible thereafter.

Application Procedure: Applications and nominations should be received as soon as possible. Review of applications will begin April 30, 1999, and continue until the position is filled.

Applications should be submitted to Debbi Cecil Robinson, Assistant Director, Personnel Services, Southeast Missouri State University, One University Plaza, Cape Girardeau, Missouri 63901.

HARRISBURG AREA COMMUNITY COLLEGE

FACULTY POSITIONS 1999-2000

TENURE-TRACK

Harrisburg Area Community College (HACC) announces tenure-track positions available for 1999-2000. Believing in a committed and diverse faculty to be the College’s most important resource and teaching and learning its most important mission, the President and Board of Trustees seek to strengthen the institution by filling the full-time faculty positions listed below.

Established in 1964 as Pennsylvania’s first community college, HACC is now a multi-campus institution offering a variety of degree, certificate and diploma programs that prepare students for the job market or continuing studies at a four-year institution. The college also plays a vital role in improving the quality of life in Central Pennsylvania by providing high-quality, low-cost educational opportunities, strengthening the local economy, training the region’s workforce, and sharing our cultural and educational resources with the community to enable people to make the most of their potential.

The College’s Wildwood Campus is located in Harrisburg, other campuses are located in Lebanon (25 miles from Harrisburg) and Lancaster (40 miles from Harrisburg), with the Gettysburg Campus located 42 miles from Harrisburg. Headcount enrollment (Fall credit) was 7,763 (Wildwood), 1,434 (Lancaster), 721 (Lebanon), and 558 (Gettysburg).

The College’s priorities emphasize multicultural initiatives, workforce development, a strengthened student-centered learning environment, a climate of personal attention, respect and inclusion, and high quality faculty and staff. The College, a multi-campus institution with over 10,000 credit students, seeks enthusiastic faculty members who share a commitment to these beliefs and priorities.

All positions require a related Master’s degree as specified in position announcement materials. Unless otherwise indicated, a demonstrated knowledge of and commitment to the community college mission. College teaching experience and knowledge of instructional technology are desirable. Competitive salaries and excellent fringe benefits. Application review begins April 5, 1999.

WESLEYAN CONNECTICUT STATE UNIVERSITY

Vice-President for Institutional Advancement

www.wcsu.edu

Wesleyan University is located in Middletown, Connecticut, and is home to the nation's first college to offer a degree in fine arts. The University is committed to providing a comprehensive education that is grounded in the liberal arts and sciences. Wesleyan offers 25 undergraduate majors and 12 graduate programs in a variety of fields.

DUTIES: The Vice-President for Institutional Advancement is a member of the University's senior administrative team and is responsible for the development and implementation of the University's strategic plan. The Vice-President oversees the Office of Institutional Advancement, which includes the Office of Communications, the Office of University Relations, and the Office of Alumni Relations.

QUALIFICATIONS: Applicants must have an earned master's degree or an advanced degree in a field related to institutional advancement, and at least five years of relevant experience in higher education. Demonstration of strong interpersonal skills and the ability to work effectively with a diverse range of individuals is essential.

APPLICATIONS AND NOMINATIONS ARE INVITED AND MUST BE RECEIVED BY APRIL 1, 1999.
Cleveland State University

Vice President for Human Resources Development and Labor Relations

Cleveland State University invites applications and nominations for the position of Vice President for Human Resources Development and Labor Relations. Reporting to the President of the University, this position provides strategic leadership for developing human resources plans necessary to support the University's mission. Working with faculty and administration, Human Resources implements initiatives and programs designed to improve the effectiveness of the University and enhance its ability to fulfill its mission and achieve its goals.

We are seeking a seasoned leader with a minimum of ten years of progressively responsible HR experience, at least three of which are in a director or comparable role, and with a Bachelor's degree. In addition, the successful candidate will have well-developed writing, speaking, and listening skills and a generalist HR background with working knowledge and experience in the areas of compensation, benefits, employee relations, labor relations, training, and employee development.

Preferred candidates will have a Master's degree in a related field and Senior Professional in Human Resources certification. In addition, they will evidence higher education HR experience, preferably in a medium size or larger public assisted university, as well as PeopleSoft experience in other IT functions and collective bargaining contract management experience. They will be effective team members who demonstrate an ability to work with diverse populations. A sense of humor and purpose are also desirable.

Cleveland State University is a public, comprehensive urban university serving Cleveland and the northeastern Ohio region, enrolling some 16,000 students and employing 800 faculty and more than 1,200 professional, classified, and other staff represented by four different unions. The metropolitan Cleveland area approximates 2 million people and features a thriving business community and outstanding cultural, recreational, and intellectual activities in a pleasant environment with a wide choice of attractive communities in which to live.

APPLICATION REQUIREMENTS: Applicants are encouraged to submit a current resume, statement of interest, and the names, addresses, and telephone numbers of three references to: Dr. Harold Allen, Chair, Vice President Search Committee, c/o Office of the President, Cleveland State University, Cleveland, OH 44115. Salary is competitive. Application review will begin on May 1, 1999. The position will be available July 1, 1999, and remain open until filled. Cleveland State University is an AA/EEO committed to non-discrimination. M/F/D/V encouraged.

AGNES SCOTT COLLEGE

AGNES SCOTT COLLEGE is a highly selective, independent national liberal arts college for women located in metropolitan Atlanta. In offering the world for women, Agnes Scott's curriculum encourages students to become fluent across disciplines, across continents and across centuries. Founded in 1889 by Presbyterians, Agnes Scott College is a diverse and growing residential community with one of the longest endowments per student of any college or university in the country.

ECONOMICS

ONE-YEAR POSITION

The Department of Economics at Agnes Scott College invites applications for a one-year faculty position starting August 1999. The qualifications and experience of the successful candidate will determine the rank of the position. The teaching assignment is three courses per semester and includes principles of economics, microeconomics, labor economics, and comparative public policy. Candidates are expected to have completed the Ph.D. by July 1, 1999.

To ensure full consideration, applications should be received by April 15, 1999. Send letter of application describing teaching experience and excellence as well as scholarly plans, CV, and names, addresses and phone numbers of three professional references to: Rosemary T. Cunningham, Chair, Department of Economics, 141 East College Avenue, Decatur, Georgia 30030-3797.

Agnes Scott College has a strong commitment to diversity and urges members of underrepresented groups to apply.

An Equal Opportunity Employer

www.AgnesScott.edu

UNIVERSITY OF WISCONSIN-MADISON
College of Letters and Science
Student Academic Affairs

The College of Letters and Science at the University of Wisconsin-Madison invites applications and nominations for the position of Associate Dean for Student Academic Affairs. The College is the largest academic unit in the University, with 45 academic departments and professional schools and 250 areas, of other academic programs. The College enrolls almost 35,000 students, of whom more than 60% are undergraduate majors at UW-Madison.

General Objectives of the Office of Student Academic Affairs: To advise and counsel undergraduate students regarding academic and related decisions including career advising. To provide accurate and current information about curricular requirements and other procedures that surround academic progress. To provide orientation programs to students of_college_honor students and other selected student groups. To terminate monitor and maintain policies and programs on behalf of the faculty. The staff of the Office consists of 75 full-time and part-time employees.

Qualifications: Ph.D. or equivalent terminal degree. Preference given to candidates with leadership and management experience in large organizations. Preference given to applicants with disabilities in disciplines represented in the College. A tenured appointment is possible for faculty with appropriate qualifications. The successful candidate will possess an understanding and appreciation of undergraduate education at a large university and experience with the diverse disciplines and cultures of an increasingly multicultural academic body. May also include a commitment to the growth of the liberal arts college and the policies to achieve these goals.

Personal qualities include: a sensitive understanding of human behavior, the ability to work effectively with faculty, staff, and students, the flexibility to move within an environment that is both stimulating and a sense of humor.

Duties: The Associate Dean will be an active member of the dean's management team of the College. The successful candidate will demonstrate strong written and oral communication skills and effective research and interpersonal skills.

Specific duties include: advising the dean and other College administrators on matters of policy and organizational issues affecting undergraduate education. Representing the College with the various student affairs areas in the University. Developing and implementing policies and procedures that reflect the College's mission and that are consistent with the University's policies and procedures.

Position Availability, Salary, and Application Procedures: The position is full-time, and is available August 1, 1999. Salary is dependent on qualifications and experience. The deadline for applications is April 23, 1999. Applications and nominations should be sent to:

Inquiries should include: letter of interest, resume, including names, addresses, and telephone numbers of three persons who may be contacted for reference.

ASSOCIATE DIRECTOR OF PLANNED AND MAJOR GIVING
Office of Development & Alumni Relations

The Associate Director of Planned and Major Giving will be a major gift officer with a focus on planned giving. This position will develop relationships with individual prospect, primarily Grinnell College alumni, who are interested in making gifts to the college or parts of the college as a volunteer. The Associate Director will work closely with others in the department to prospect new prospects, cultivate relationships, set solicitation strategies, write proposals, finalize gift arrangements, and steward a portfolio of major and planned gifts. The Associate Director will also organize and implement planned giving seminars around the country for alumni and friends of the College and prepare individual planned giving materials. This position will report to the Director of Planned and Major Giving. The candidate will need to have a degree in business, preferably in fundraising or related fields. The candidate must be able to work independently, be a self-starter, and be a team player. Strong written and verbal skills, excellent attention to detail, and the ability to work under pressure are essential.

Qualifications: Bachelor's degree preferred. Experience in major gift giving or related field preferred. Experience in writing proposals or making presentations preferred. Knowledge of planned giving and be willing to learn. Must be able to work independently, be a self-starter, and be a team player. Must possess excellent writing and communication skills. Excellent attention to detail and be able to work under pressure.

Application Process: To be considered for this position, submit a letter of application, a resume, and a list of three references to Ms. Jan A. Veach, Office of Human Resources, Grinnell College, P.O. Box 805, Grinnell, IA 50112. The position will remain open until filled.

EXECUTIVE DIRECTOR
Illinois Campus Compact
ILLINOIS STATE UNIVERSITY
Normal, Illinois

Illinois Campus Compact (ICC), is one of 22 state compact networks affiliated with Campus Compact, a national membership organization of college and university presidents committed to helping students develop the values and skills of citizenship through participation in public and community service. ICC member institutions include 21 private and public colleges, universities, and community colleges throughout Illinois. The ICC Executive Director is responsible for providing leadership and support to the members of the Compact, as well as advising between Campus Compact and member institutions, managing the operating budget and raising funds for programs development on member campuses and for ICC. Salaried competitive and includes a state benefit package.

Requirements: Bachelor's degree required. Master's degree preferred with a minimum of three years experience in non-profit management and/or higher education. Excellent administrative and leadership and communication skills and commitment to higher education required. Qualifications candidates should send a letter of application, resume, and contact information for three references to Michael Schermer, 2700 Student Life Office, Illinois State University, Normal, IL 61790-2700 by April 30, 1999 to ensure full consideration.

ILLINOIS STATE UNIVERSITY IS AN EQUAL OPPORTUNITY/ACCESSIBLE ACTION/AFFIRMATIVE ACTION INSTITUTION ENCOURAGING DIVERSITY

EXERCISE PHYSIOLOGY

Eastern College, an evangelical Christian liberal arts college in the southeastern United States, is seeking applicants for a tenure or non-tenure track position, beginning fall 1999. Candidates should possess a master's degree in Exercise Physiology. A strong interest in teaching undergraduate students and proven leadership and administrative capabilities are critical. Applications from under-represented groups are encouraged. Review of applications will begin immediately and continue until the position is filled. Interested applicants should submit a letter of application, curriculum vitae, including names and addresses of three references and copies of undergraduate and graduate transcripts to:

Eastern College, Human Resources, Attn: Exercise Physiology Search, 1300 Eagle Road, S. Davids, PA 19888-3696

Eastern College is an equal opportunity/affirmative action employer.

TOWARD MEANINGFUL MENTAL HEALTH SERVICES FOR LATINOS

Behavioral health services, however effective, are useless for Latino children and families if the services are not used. True for any child or family, it’s particularly so for Latinos of various ethnic and racial groups within the United States. Latino children are referred here for behavioral health treatment more often than are majority culture children, and they too frequently leave these services prematurely.

Research identifies many contributing factors. A particularly important one: behavioral health providers are often indifferent to Latino cultural and language characteristics. Providers too frequently fail to note ways in which Latinos approach seeking help, how Latinos identify mental health problems, and the conditions under which Latinos are referred to behavioral health. That indifference can cause families of children with serious emotional and behavioral problems to turn away from treatment, even after they have overcome significant obstacles in order to obtain help.

When providers ignore a patient’s culture, they often fail to meaningfully engage that person in the treatment process. The first issue to consider is the client’s beliefs about mental health. A client’s culture might define personal problems as either physical or spiritual in nature rather than as emotional or behavioral. A culture might not have a mental health concept similar to what exists in the U.S. Many Latino immigrants who do not identify personal problems as related to their mental health are unlikely to try to access services—or will prematurely leave services they believe to be unrelated to solving their problems.

Sometimes Latino parents are coerced by the schools, social services, or juvenile justice system into a behavioral health referral. This situation creates an association between behavioral health and the coercive referral. It then becomes a greater challenge for the health provider to establish a trusting relationship.

Latino families from different cultural backgrounds have been found to differ in the degree to which they identify behavioral and emotional problems in their children as either related to or serious enough to require professional remediation. Differences exist too in beliefs about whether the problems are likely to improve without professional support. When providers ignore or fail to acknowledge and understand a family’s cultural beliefs regarding a problem, their services are likely to be experienced as irrelevant at best and threatening at worst. The likely result will be premature termination of a treatment that might have prevented a psychiatric hospitalization or incarceration.

The process of seeking help frequently involves Latinos’ families or other social supports. Participation by an individual’s support network in treatment, especially during initial contact with a provider, is often expected by Latinos seeking help. The interactions that result can either discourage or encourage both continued and future contact with the provider. If the support network is not acknowledged by the provider or asked to participate in the process, it is unlikely that many Latinos will meaningfully engage in treatment. Because this situation is a common experience in the U.S., only a portion of Latinos who need behavioral health treatment actually remain in services or later seek such help. Sadly, it takes an emotional problem of relatively high severity to prompt Latinos to overcome the cultural barriers to seeking professional help.

Clearly, there is a need for mental health service providers to understand cultural variables that influence help-seeking. A fundamental requirement of ensuring culturally appropriate services is for providers to work in partnership with the Latino communities they intend to serve. This work should transcend the typical behavioral health focus on the “identified client” and consider community, cultural, and familial contexts within which those individuals live.

Latinos are likely to view behavioral health services that are community-oriented as less threatening and less stigmatizing. Becoming aware of these natural supports and adapting formal systems that work in partnership with communities is the goal that providers should seek to make their services accessible and useful. Health care providers who don’t modify their services will find their clients less likely to view offered services as useful. This can create a negative cascade effect, beginning with prematurely leaving needed services, and a consequent worsening of their mental health problem.

The role of cultural influences and the manner in which Latino children and families approach and use mental health services must be understood if effective treatments are to be created and delivered. What might be seen as a helpful service in mainstream U.S.A. might be seen as inappropriate or even disrespectful by many Latinos.

Uncovering these differences in order to change how services are defined and delivered should be the goal of behavioral health systems on their path toward cultural competence in planning and delivering services.
The BEST Colleges for Hispanics

Educational Prospects for Latinos Post-Affirmative Action...
Sources You Can Access

BY GUSTAVO A. MELLANDER

How to keep up with developments in education that are relevant and useful to those concerned with Hispanics and higher education?

That’s a large undertaking. "Outlook on Washington" tries to aid this process by focusing on the many developments that have a Washington slant.

Most of these developments deal with the federal government and its many programs, commissions, and reports.

Web Sites

It is important that those concerned with Hispanics and higher education be aware of the many tools available—tools that will help them access useful information no matter where they might be throughout the nation. These sources are available through the World Wide Web.

One of the most important and useful sources is the Web site for the Department of Education, located at <http://www.ed.gov>.

This excellent first-step Web site should be "bookmarked" for easy reference. It alone has links to more than 20,000 Web pages. Clearly one challenge in using such a large Web site is finding one's way around.

Not everything on the site is specific to Hispanics in higher education. But a great deal is very relevant to them.

Financial Aid

Comprehensive information on the kinds of federal financial aid available to college students and details on how to apply for that aid is available through The Student Guide to Financial Aid, accessible from the DOE home page or directly at <http://www.ed.gov/prog_info/SAF/StudentGuide/>.

Visit this site frequently as changes are always posted.

The very latest Student Guide is now available at that site. There, too, is the Free Application for Federal Student Aid (FAFSA) that students can use to apply for federal aid and for many state student aid programs.

A good introduction to the DOE is found in the Teacher's Guide to the Department of Education, accessible from the home page under FAQs and guides or directly at <http://www.ed.gov/pubs/TeachersGuide/>.

Among other information, the guide provides a breakdown of the department's structure and programs.

Specific to Hispanics

Three offices whose programs are of special interest to Hispanics are the Office of Postsecondary Education Programs, the Office of Bilingual Education and Minority Languages Affairs, and the Office of Migrant Education in the Office of Elementary and Secondary Education.

In addition to descriptions of its programs and the legislative authorities behind them, the DOE Web site sets forth information on how to apply for grants involving many of its ongoing programs. Again, this information is accessible either from the department's home page or directly at <http://www.ed.gov/moneys.html>.

The Department of Education is now simplifying its grant process which should prove helpful to those seeking program grants. A useful guide to Department of Education grants can be found at <http://www.ed.gov/pubs/KnowAboutGrants/>.

The Department of Education is a major repository of reports and emerging ideas and research projects. It maintains an extensive library of online publications. Many of these are available at <http://www.ed.gov/pubs/index.html>.

Also available are many useful publications from the National Center for Education Statistics (NCES), accessible at <http://nces.ed.gov/NCES/indextable.asp>.

An annual NCES publication available online that could be of particular interest is The Condition of Education. Faced with the point of distraction, it is a current, accurate storehouse of information. One particularly interesting section focuses on "postsecondary persistence and attainment" and contains much useful information on this perplexing problem for those in our colleges and universities.

Presidential Initiatives

The Department of Education Web site also places a special focus on initiatives and priorities established by President Clinton and Secretary Riley. Of particular interest to advocates for Hispanics in higher education is the policy priority that by age eighteen, students be prepared for and be able to afford college.

A discussion of this priority can be found at <http://www.ed.gov/updates/priorities/part2.html>.

This priority holds announcements as part of its higher education efforts. The Department will launch an initiative aimed at encouraging early preparation for college.

The department's first step in promoting this initiative is to get students and their parents to think college early. This involves making students, parents, and middle schools aware of "the importance of going to college and of the steps that every student should be taking to get prepared for college.

Remaining Informed

Because new content is continually added, it is useful to visit the DOE's Web site on a regular basis. Like most large Web sites, ed.gov has a link on its home page to a page that lists major additions that have been made to the site in the recent past.

One last way of keeping up with changes is by subscribing to EDInfo. EDInfo is free, and it sends subscribers two or three e-mail messages a week on "reports, studies, fundings, opportunities and publications." The following instructions from the Department's Web site explain how to subscribe:

1. Address an e-mail message to: listproc@inet.ed.gov
2. Write this (and nothing else) in the message: subscribe EDInfo <yourfirstname> <yourlastname>
   (If you have a signature block, turn it off)

One can easily get lost amid thousands of commissions, reports, and initiatives in official Washington, but there is much useful information to be gleaned for those interested in Hispanics and higher education.

G Mellander is professor at George Mason University
Dear Colleagues:

Twenty-one states and the District of Columbia are home to the 100 colleges and universities granting the most bachelor’s, master’s, and doctoral degrees to Hispanics. They stretch from the Atlantic to the Pacific and from the Canadian to the Mexican borders. Several are in Middle America.

Nearly everywhere in the United States, educational and commercial entities are taking note of Hispanics as a significant present and future force.

Taking the top ten colleges and universities as an aggregate, bachelor’s degrees to Hispanics were up 14 percent, master’s up 16 percent, and doctorates up 6 percent over the figures reported by our magazine last year. As students at all levels of higher education, Hispanic women equal or exceed Hispanic men in earning degrees. Our TOP 100 data comes from the U.S. Department of Education’s Center for Education Statistics, with 99 percent reporting.

In this issue, a senior education analyst praises the College Board’s Equity 3000 program for raising math scores in pilot districts of secondary schools working cooperatively with schools and parents. A leading Hispanic think tank, the Tomás Rivera Policy Institute, explores anew the influential relationship between the bilingual Hispanic community and the world of television.

Chicano college students in Colorado speak of their compelling desire to give back to their communities. And what those students want to give back—what all of us are working toward—is change. Not change in our family values but change in the welcome and the opportunities afforded Hispanics and other minorities by the dominant culture.

These are exciting times to be Hispanic, or Latina, or Chicano, or Nuyorican. These times are fraught with possibility—for the educated. Only for the educated.

And so it is with pride and pleasure that we salute all who work toward this goal of education—the students who persist to graduation, those who teach, counsel, motivate, and inspire them—and the millions more whose advocacy and whose charitable gifts and tax dollars enable tens of thousands of Hispanic youths to share in the Hispanic American dream.

Bravo.

</tbody>
</table>

Adults aged 19 to 54 had higher average literacy scores than those 55 and older. The differences in literacy between younger and older adults may be due to the higher level of educational attainment among younger adults.

Latinos in Education: Where Do We Go from Here?

Clifford Adelman on Statistics and Action Awards

By Michelle Adam

A report to the president of the United States, Our Nation on the Fault Line, called on this country to resolve the educational gap between Hispanics and non-Hispanics. "The education of Hispanic Americans is characterized by a history of neglect, oppression, and periods of wanton denial of opportunity," it reads. "The successful resolution of what has become nothing less than a crisis is embedded in the collective and collaborative response of the nation."

In The Condition of Education 1998, another report released by the U.S. Department of Education (DOE), the word "crisis" is used to describe the educational status of Hispanics: "Hispanic Americans are making progress at alarmingly low rates—from preschool through grade school, from junior high through high school, and on into higher education."

Although the Department of Education agrees that some measure of educational attainment is narrowing, it describes the achievement of Hispanic Americans in comparison to other Americans as intolerable. Fewer than 15 percent of all Hispanic Americans participate in preschool programs, according to DOE, and Hispanic students drop out earlier at unacceptable rates. Also, the total proportion of bachelor's degrees for Hispanic Americans has risen only slightly (from 5.5 percent in 1985 to 4.9 percent in 1993) since the 1980s, even though Hispanic student enrollment has modestly increased (from 5.5 percent in 1985 to 8.3 percent in 1993).

But sit back and talk to Clifford Adelman, senior research analyst for the DOE, and you might hear a different story. This man—described by co-workers as frenetic and outrageous—works nearly 10 hours a day to get a different kind of word out.

"Latinos are the only ethnic group to increase bachelor degree completion rates between 1972-82 period and the '82-'92 period," he said. And while he agrees that there are areas of concern in education for Latinos at other equally represent groups, he also believes that alarming reports, effective in whipping up the troops, are not effective in producing results and getting to the truth. "I have a political butt that says 'No more bull,'" he said. "Think a lot of the tensions encountered in higher education are the result of the lies we are told."

Since joining the DOE during the inception in 1979—first as a policy fellow and later as a senior analyst—he has worked on more than 50 publications and multiple studies. He was responsible for

researching information for The Nation at Risk national report in 1983, followed up by a higher education report, Involvement in Learning, in 1984. His name has appeared in opinion editorials and articles from the New York Times and Los Angeles Times to The Chronicle in Higher Education. His study, Women at 30 Something: Paradoxes of Attainment, which focused on unequal treatment of women in the workforce despite their successes in education, became the occasion for a CNN and 20/20 television piece in 1991. This was later included as part of his 1991 book, The Lessons of a Generation.

Adelman most recently published an article, “The Rest of the River,” criticizing William G. Bowen and Derek Bok’s book, The Shape of the River: Long-Term Consequences of Considering Race in College Admissions, for neglecting the vast majority of minority students who do not attend elite schools. He also spoke on a panel about the paths of Latino students at the One Third of a Nation Conference in 1997.

As an analyst, Adelman has focused a lot of his attention on Latinos and their progress through higher education. Why? “You’ve got a group that is growing in numbers, that is well established, and coming to terms with a new status,” he said. “It’s a very interesting group.” But Adelman admits that his interest in Latinos is part of his overall concern for issues of equity in education, no matter who the individuals. “In higher education, we have to respect where they are coming from and help them along the best we can so the bottom line of equitable results is better than it is now,” he said.

While statistics clearly show discouraging numbers of Hispanics engaged in higher education, in Table 2, following the progress of students from the high school classes of 1972 and 1982 until they were 30 years old show that Hispanics were the only group to increase the proportion of bachelor’s or higher education degrees among those who attended four-year institutions. “There is still a big gap [minority vs. White degree attainment],” he admitted; “but Latinos are the only group closing the gap.”

Those responsible for closing the gap among Latinos are the women, noted Adelman. “We all know girls are smarter than boys, and more focused on valuing education,” he said. As we might also know, the community colleges are still a dominant institution for Latinos, who use two-year schools as doorways to four-year education. “I describe it as a Latino institution,” said Adelman, who said it’s sometimes hard for Latinos to transfer effectively to four-year colleges in some states.

Latinos have also significantly increased their enrollment in post-secondary advanced mathematics courses (from 10 percent in 1982/1983 and statistics for the high school class of 1972 to 30 percent and 21 percent respectively in the 1992 class). “It’s about time we stop telling horror stories that throw people into despair,” said Adelman.

As a meticulous statistician, Adelman also described how figures for Latino high school dropout rates are often misleading. Latinos ranked the highest among White and Black populations, with a high school dropout rate of 29.4 percent among 11- to 24-year-olds in 1996, according to the Digest of Education Statistics. However, said Adelman, this figure [29.4 percent] includes students.

| 1995 | 12.0 | 8.6 | 3 | 13.8 |
| 1996 | 11.1 | 7.3 | 3 | 13.8 |
who were not born in the United States and, more importantly, did not attend school in the U.S. as children. "We can't take our tool box to Guatemala and Peru," he said. "We can only work on what happens in our borders."

Adelman, however, that the 18 percent dropout rate that remains for Latinos raised within our borders is still high—but not hopeless. Equalization of educational access, as he sees it, needs to be administered at the high school level. African Americans who drop out of high school are more likely than are Latinos to return to school and earn a GED. Among Latinos, the same needs to happen—to keep possible dropouts from becoming actual dropouts.

Although Adelman challenges negative and misleading statistics on Latinos, he recognizes that Latinos and minority students loom large in remedial courses and lag in degree completion in higher education. The one thing we know about four-year colleges is that somebody wants a degree at the end of the line," he said.

My question using all this data is—what does it take to get there, and what does this imply that we have to do in order to have a better outcome for minority students? Let's find out what really makes a difference, not just for getting there, but for finishing. Then we know where to take out the tool box and what tools to take when we go.

The main ingredients, said Adelman, start in secondary schools. "It has to do with providing an opportunity to learn, which isn’t there for lots of school districts." He listed several examples: high schools that don’t offer mathematics beyond algebra II or that fail to have laboratories for science.

"Minority students, particularly from poor districts, do not have the opportunity to learn this stuff. If they don’t have the opportunity to learn, we have to make sure it gets there," he said. Recent statistics give credence to his words: among 1988 Hispanic eighth graders, 24.6 percent rated below proficiency in math, 19.1 percent in reading, and 41.3 percent in science, according to 1988 figures from the National Center for Education Statistics.

"If the schools aren’t doing it, students could take remedial classes at a local college to make up for a limited high school curriculum."

A second area of concern for Adelman is the lack of advisory services for poorer students. "Students and their families need a lot more information... A lot of people have misconceptions about precisely what higher education is like. When we try to recruit minorities, we need to help them make better decisions."

Part of this process of informing minority students also involves letting them know about today’s alternative approaches to education. "We should not prepare the minority students for a world that has passed, while the world is changing," said Adelman. "There is a whole new world of providers and certifications that is emerging. If you say to minority students that the only thing that matters is this very traditional model of higher education, then..."

we are not doing minorities students any favors.

At California State University at Monterey Bay—where a majority of students are Latino and where degrees are given based on competence rather than credits—Latinos are doing well. Other students are benefiting from alternative degrees and certifications through distance learning and corporate learning centers.

Adelman and his colleagues hope their hard work will be followed up by reasonable educational policies and programs. Every year, he travels to a dozen college and university conferences, as well as workshops, advocating more effective methods aimed at the equalization of educational access and attainment.

Although the Clinton Administration has placed high priority on educational issues all along, it only recently seems that the results of extensive studies might be paying off. "A lot of us have been pounding the table. They are finally listening to us," said Adelman. A recently approved program, Gear Up (for information contact 1-800-USA-LEARN), will offer financial support to districts in need of course improvement, starting in middle schools.

While the need to better prepare underprivileged students for college has inspired a growth in school-college partnerships, not all of these programs are focusing well enough on academics. According to a Department of Education survey of the effectiveness of outreach programs, a majority of partnerships were concentrating on developing students' social skills rather than on improving course work. "It sure won't help them finish college," said Adelman.

One program that he is impressed with is Equity 2000, established eight years ago by the College Board, which created the SAs and PSAs. The College Board recognizes poor high school math and science curricula as key contributors to students' failures in higher education and has formed partnerships with districts to improve these areas.

The program coaches districts on curriculum standards necessary for improving student performance, and involves parents and local colleges in the mentoring and motivation of students. For the first five years, the program worked with six districts nationwide. After much success, it will expand annually into a dozen more districts.

Larry Dolan, coordinator of technical services for Equity 2000, believes it's a good time to expand programs like his. "We are seeing a lot of options in funding," he said.

While building effective programs for the betterment of education for all is a difficult task, there's no better time to begin. Schools and programs such as The College Board's have an opportunity to move beyond their role as gatekeepers and to provide the support and curriculum necessary to better develop student talent. And according to Dolan, the federal government is finally making funds available to support what he calls professional development—the building of staff and curriculum so all students can be best prepared for the educational opportunities ahead.

Hopefully, with the right information and support network, Latino students can continue to narrow the gap in educational inequalities, and years of collectine and analyzing data will pay off.

How THREE Top Colleges Appeal to Hispanics

BY GARY STERN

Special Efforts at Florida International University,
University of Texas, El Paso, and University of New Mexico Research Council

Of the top 100 colleges awarding undergraduate degrees to Hispanics, Florida International University (FIU) prevailed again as the No. 1 college, awarding 1,973, according to the latest Department of Education 1996-97 statistics. Had the University of Texas’ four campuses at El Paso, Pan American, Austin, and San Antonio been treated as one entity, then UT would have been ranked first, not second through fifth, awarding degrees to 4,049 Hispanics.

Rounding out the top 10 were four colleges in California—the University of California at Los Angeles, California State University, San Diego State University, and California State University at Fullerton—and the University of New Mexico in Albuquerque.

Hispanic Outlook in Higher Education examined special programs at three of the top 10 colleges, Florida International University (FIU), University of Texas (UT), and University of New Mexico (UNM), that attract and retain Hispanics: an Honors program at FIU that recruits academically gifted students, an ethnic center offering support services at UT, and a USM program aimed at increasing minorities in science, math, and engineering.

Attracting Top Students to FIU

Launched 10 years ago, FIU’s Honors College enables it to attract some of the best and brightest students from Miami and internationally. Reflecting FIU’s population, 54 percent of its Honors College students are Hispanic, 8 percent African American, 18 percent White, 4 percent Asian, and 16 percent international—from the Caribbean and elsewhere.

“We wanted to offer student two related experiences: the opportunity to be in close contact with some of the university’s best faculty and the experience of being a part of a small college with all the advantages of a large public university,” said Professor Fernando González-Reigosa, dean of the Honors College.

FIU’s enrollment of 30,583 students—51 percent Hispanic—qualifies it as a large urban university.

To gain acceptance into the program, students must possess minimum 3.5 GP and 1250-1300 SAT scores. One in the program students can major in English business administra-

istation, hospitality management or any other discipline. But the program emphasizes smaller classes: averaging one faculty member to eight to 18 students, whereas FIU first-year students might be in a lecture class with 200 students.

The Honors College specializes in interdisciplinary teaching, said González-Reigosa, in which three or four professors co-teach classes th-
combine several disciplines. A class on “Origin of Ideas and Ideas of Origin” focuses on how knowledge is created, transmitted, and dispersed, and includes reading books, visiting museums, seeing related films. “Insight Into the Future” concentrates on the technology explosion, ecological damage, and political viability of the Third World. Students in their senior year can choose “The Everglades: From Beginning to End,” in which they travel to the Everglades and read about its history and endangered status, or opt for architect Jamie Canaves’ class “Miami: an interdisciplinary study of the city’s neighborhoods, planning, architecture, and service course; serving an internship for example, at Food Runners, which distributes food, goods, and services to the homeless. “A full citizen does not serve himself but recognizes the importance of being useful to the community,” said the dean.

Though Ivy League and top schools compete for the brightest Hispanic students, the Honors College enables FIU to recruit top Latinos who might otherwise have attended another school. The Honors College, said its dean, “creates a nucleus of top students, but these students are not isolated and are in contact with the rest of the university.”

Last year, El Centro assisted close to 3,000 students of the 24,000 undergraduates who attend UNM. El Centro helps students in six major ways: two mentoring programs, a cultural program, and academic, financial, and career advising. Funded in part by New Mexico’s state legislature, El Centro has a $250,000 budget, supporting four full-time staffers and 24 part-time students.

Many Hispanic students at UNM are of Mexican American heritage, are graduates of small rural high schools, and face adjustment problems acclimating to a large public university. Most are commuter students.

Acclimating the Hispanic student to college life is one of the key goals of its mentoring program, which begins in a student’s first semester. Upper-division students are trained as mentors to answer incoming students’ questions. Many Hispanic students, noted Mendez-Cruz, enter college with a stereotype that “college is meant for the student who wears penny-loafers and pink cardigan sweaters, and they don’t realize how the university benefits from diversity.” She describes mentoring’s major benefit as encouraging first-year students to “become comfortable with the university setting.”

Another student-initiated mentoring program involves eight UNM upper-division students tutoring 20 Hispanic high school students each in four high schools. “We’re not doing enough to help our fellow Latino students get through the high school system was the sentiment that led to the formation of this program.

To fit into a mainstream college, many Hispanics think that they have to relinquish their cultural identity. “I’ve got to give up eating burritos, learn to eat sandwiches, and give up my way of dressing,” believe many students, noted Mendez-Cruz. Cultural programs sponsored by El Centro show them that they “do not have to lose sight of their cultural background.” El Centro sponsors a Cinco de Mayo festival, a speaker series during Hispanic Cultural Month, and even mariachi workshops.

El Centro offers tutoring in science, languages, and math to supplement UNM’s tutoring services.
and offers special financial aid,
augmenting LXM's often
swamped Financial Aid office.
Short-term counseling addresses
a broad range of factors affecting
Hispanic students: handling family
issues, dealing with faculty who are
not always sensitive to the needs of
a minority students, juggling part-
time work and scholastic responsibili-
ties, and coping with stress.

Creating an environment that
feels like home is another goal. In a
break room, students can find a
refrigerator, TV, and microwave, and
can obtain free cups of coffee—just
like at home. Instead of maintaining
a 9 a.m.-to-5 p.m. schedule, El
Centro opens at 7:30 a.m. and will
stay open until 12 p.m. if students
want to continue working on its 10
computers and five printers.

Some LXM professors have criti-
cized El Centro for being "exclusionary." Méndez-Cruz comments
that El Centro and other ethnic pro-
grams "are trying to support stu-
dents and welcome them," noting
that "ethnic programs play a criti-
cal role in the success of students
attending universities."

**Attracting and Retaining Math,
Science, and Engineering
Students at UTEP**

Increasing the number of
Hispanics in the sciences is imper-
native if the country wants to pro-
duce enough scientists and engi-
ners in the coming years, said the
Hudson Institute's acclaimed
"Workforce 2000" study. The
Alliance for Minority Participation
(AMP) attracts first-year students
who are interested in pursuing
math, science, engineering, or tech-
nology and then provides a variety
of programs to retain them,
explained Dr. Pablo Arenaz, pro-
gram director of the Louis Stokes
Alliance for Minority Participation
at the University of Texas at El Paso.
AMP strives to create a "sense of
community for minority students," 
emphasized Arenaz. "If students
can develop a sense of community
and connection to the institution
early on, you will keep them," he
said. A grant from the National
Science Foundation helped to
establish the Model Institution of
Excellence (MIE) program, which
aims to retain students through an
intensive first-year student orienta-
tion program, clustering students
and training teachers.

Entering the sophomore year
for AMP students is often the criti-
cal juncture in determining
whether they stay in school or drop
out. Why is the second year so criti-
cal? "In their first year, students are
busy meeting math, English, and
history requirements and don’t take
courses in their major until their
sophomore year," said Arenaz.
Students who succeed in biology
might face more difficulties studying
microbiology, he said.

Student development specialists
at UTEP counsel students on their
career, study habits, and what it
takes to pass more intensive
science courses. Interest inventories
are conducted to ascertain specific
career goals. If students need aca-
demic assistance, they are referred
to UTEP's tutoring center. If stu-
dents can gain confidence and pass
their major courses in their sopho-
more year, those successes build
momentum that often enables them
to continue until graduation.

AMP also has introduced a
"new teaching paradigm" or a gate-
way course, noted Arenaz, that
stresses building blocks of learning
and more sequential courses. If a
student can master calculus, for
example, it builds a strong founda-
tion to advance to more technical
math courses. "If you can’t get
through chemistry, it’s hard to
become a physicist," the director of
AMP noted.

In their junior and senior year,
five research stipends are awarded,
and students have an opportunity
to conduct independent studies in a
research lab.

The Model Institution of
Excellence (MIE) is helping to
"redefine the college experience,
said AMP’s director. Rather than
students passively learning the sci-
ences in anonymous halls of 20
students, science students are clus-
tered in smaller classes of 35 to 40
students and take three classes
together and are encouraged to
become active participants in the
learning. These cluster classes
"both in socialization and academ-
ic activities, help them feel more a part of the college. It also introduces them
to faculty in their disciplines early.
They develop a sense of communi-
ties among themseves so that student become responsible for their ow
learning," said Arenaz.

More than 1,000 undergradu-
ates at nine campuses at the
University of Texas and at bridge
programs at 10 Texas commun
colleges have taken math, engineer-
ing, science, and technology cour-
es. "On a systematic level, we’ve
been able to look at a common
problem: retention. As a result of
this program, we’ve been able to
promote a change of attitude
among faculty, able to make them
more aware of retention issues an
the unique needs of minority indi
viduals," said Arenaz. Indeed, th
program has affected the ver
teaching of a science course. "Do
you deliver a course and how do
you approach teaching" can go a
lot further in determining whether
the class meets the needs of a student
said Arenaz.

1077
The Promising Practices of Arturo Pacheco

UTEP Dean Improves Teacher Education

First-year teachers walk into a classroom with lots of textbook theory to prepare them for the coming school year. But, as for many of their colleagues, those first few years are a shock. Thirty to fifty percent of new teachers leave the teaching profession within five years.

Critics say what is taught in many teacher education programs is not enough to prepare these idealistic young people for the rigors of teaching.

Arturo Pacheco, dean of the College of Education at the University of Texas El Paso, was concerned about the attrition rate. About six years ago, he started reaching out to local public schools for help on how to better prepare his graduates for teaching jobs. This task was vital as UTEP provides about 70 percent of the teachers for public schools in West Texas and southern New Mexico.

Public school leaders said the students in the teacher education program needed more field experience and they needed a better understanding of the dynamics of the majority Latino population in El Paso. He heard their message and made a number of changes, among them requiring students to undergo one year of field experience rather than the typical one semester and requiring them to take classes on multiculturalism and working with parents at the schools.

Pacheco’s efforts have not gone unnoticed. The U.S. Department of Education recently called the teacher education program at UTEP a “Promising Practice” in its report on teacher education. The department commented the university for requiring that student teachers spend “50 hours in public school classrooms their last year of study; and for encouraging adoption of newer teaching methods, such as launching group discussions in the classrooms and urging students to ask questions so they might draw their own conclusions, rather than the traditional ‘chalk and talk’ lecture format.”

“Don’t be a sage on the stage, be a guide on the side,” said student teacher Stephanie Hadley, summing up the new method of teaching that discourages teachers from merely standing in front of the classroom to lecture.

The college is continually fine-tuning its approaches to better prepare its graduates, part of an ongoing trend among teacher education programs nationwide to find ways to improve. Jorge Descamps, professor of education at UTEP said the program is not necessarily revolutionary or unique but that officials are impressed that such a strong teacher education program, with many links to the local schools, has developed in a city along the U.S.-Mexico border and with a large Latino population.

“They’re saying, it’s not only a nice program but it’s in a place where they usually don’t do things that well,” said Descamps.

Pacheco said that the key to the success of the program is the development of those strong ties between the university and the local public schools. Some 30 public schools get 10 to 15 student interns each semester, and they pair those student interns with classroom teachers for a year of intensive field training. The interns spend two days each week at the university taking classes and discussing critical issues that arise in their public school classrooms; the other three days of the work week.

University officials meet at least five times every semester with all participants, the public school officials, and student teachers to discuss progress and needed changes. Everyone plays an important role in making decisions that are best for the program, said Pacheco.

Dolores De Avila, principal of Ysleta Elementary School, which has 620 students, 98 percent of them Latino, has been an active participant in the UTEP teacher education program from the start. Her school has taken 10 to 15 interns per semester for several years. She prides the program and the student teachers who participate.

“This is such a wonderful opportunity for students to be given the support they need to be successful teachers,” said De Avila.

De Avila said that by making the students spend a year in the field, they have more time to reflect on the practice of teaching and it gives them more of an opportunity to interact with the teachers in the public school classrooms and participate in the teacher training that the public schools offer. Descamps said the students must maintain daily logs of their work and the challenges that arise. The year of field work gives them the opportunity to reflect more on the events occurring on a daily basis and how they can continually improve, he said.

“We’re trying to prepare professionals who are proactive in trying to figure out why a certain kid is not responding to them,” said Descamps. One of the challenges...
teachers face is having a difficult relationship with certain students. The natural tendency is to always blame the student, he said. "We are teaching them to ask themselves. What can I do [to improve this situation]?

Pacheco likens the internship to medical school training in which student teachers spend their first three years learning the basics and then are sent to hospitals or, in this case, public elementary, middle, and secondary schools for the real-life application of what they learned in the classroom.

Vital components of the program include the following:

- A community component requires students to participate in activities such as PTA meetings and, in some cases, to visit families at their homes.
- The program sends 10 to 15 interns to each school rather than the one or two sent previously. Pacheco said that under the prior method, "they were often lost in the woodwork. Now they have an impact on the school. They bring fresh ideas and fresh vitality to the schools."
- Students are required to take certain courses, such as "Critical Pedagogy," in which they learn how to work with parents and cover critical issues such as gender diversity, equality, fairness and more. "These classes create an awareness in students that parents are great partners to have, particularly as students learn to read," said De Avila. Pacheco adds that these types of courses give students a better understanding and more thorough awareness of the students they are teaching. "It's very important that a teacher understand where their students are coming from so they don't approach the students with stereotypes or ignorance," said Pacheco.
- Student teachers are required to take two years of college Spanish since nearly 80 percent of the children in the public schools are Latino, Pacheco said.
- De Avila said the student teachers are not the only ones who benefit from the experience. The schools, the youngsters, and the veteran teachers grow from the yearlong internship.
- "I tell the students that they aren't the only ones learning," said De Avila. "The [veteran] teachers learn from the students too."

But Lucy Keising, a third grade teacher at Fannin Elementary School in Northeast El Paso, who was a student intern last year, said an individual student interns success depends on the strength of the relationship with the public school teacher to whom she or he is assigned. That interaction can make for a successful year or not-so-successful year.

"It's great if you get a good teacher who lets you teach, but I didn't get to teach on my own," Keising said. She admits, though, that the experience diminished the shock of being a first-year teacher.

Pacheco said another key to the success of the program is the collaborative relationship that has developed to better prepare the teaching graduates. The university's departments have joined forces to work together to create stronger graduates, he said. In fact, faculty of the different departments join the teacher education faculty and teachers from the public schools for 10 days of annual mini-retreats to discuss issues of teacher preparation.

"We as an institution are committed to preparing teachers," said Descamps. "That is one of the aspects that makes the program so strong."

The Department of Education report said that U.S. K-12 public schools will need to hire more than two million teachers during the next decade to match the enrollment growth in elementary and secondary classrooms. It also cites a finding from the National Commission on Teaching and America's Future report, What Matters Most: Teaching for America's Future, that fewer than 25 percent of America's teachers can be considered fully qualified. That is, they have studied child development and learning and teaching methods, hold degrees in their subject areas, and have passed state licensure requirements.

We must make sure that we are meeting strong standards with th teachers and that they know how to get their students to meet the standards," said Pacheco.

Pacheco said that UTEP has been successful in getting its teaching graduates to pass the stringer certification exam required by the state of Texas. More than 95 percent of UTEPs College of Educacio graduates do so. Also, the state requires that Texas' teacher education programs break down th exam results by race and ethnic and schools must show that more than 90 percent of each minority group taking the test passed. This makes the schools more accountable to the minority groups taking the test at the College of Education.

The university also has take steps to raise standards for admis sion. As have schools across the country. To be admitted into the education program and be allowed to stay in it, students must have minimum GPA of 2.5, up from 2.2. Students also are required to take additional math and science classes.

"We're sending out a tough breed," said Pacheco. "They know what they are getting into."
It takes a modern educational philosophy to land a university on the Hispanic Outlook Top 100 list. Having a noted philosopher at the helm of the institution doesn't hurt either. Last year, as San Diego State University celebrated its 100th anniversary, it was characterized by its philosopher/President Stephen L. Weber as "a wonderfully talented, diverse, energetic learning community" and "one of the nation's great universities." He renewed his dedication, he said, "to providing educational experiences, in and out of the classroom, which will embrace and develop the abilities of all individuals."

Weber is not a dilettante in this realm, but a student (and professor) of philosophy who has applied this knowledge in a number of administrative posts in higher education.

As the president of San Diego State, he finds his educational background in philosophy plays an important role in his approach to his job. "Philosophy is not a dogmatic science, and neither is running a university," says Weber. "There is a sense of humility common to both endeavors. At the start, you don't presume to know the questions, much less the answers. There's a logical, orderly progression toward the truth. There's a lot of questioning and a lot of listening." Indeed, asked about his plans for SDSU when his appointment was first announced, in late 1995, his answer was, "The first thing I plan to do is listen."

For listening to the needs of the community of learners and for 100 years of excellence as this university celebrates the distinguished history of the institution and embarks on the next 100 years, the Hispanic Outlook honors San Diego State University.

Established in 1897 as a Normal School, San Diego State University joined the California State College system in 1960 and was accorded university status in 1971. It is now classified as a Carnegie Doctoral II institution.

1,413 full-time and 241 part-time staff, 212 management, 906 full-time and 1,027 part-time faculty, 474 teaching associates, 225 graduate assistants, and 1,085 student assistants. Bachelor's degrees are granted in 14 areas, master's degrees in 55 areas, and the doctorate (in cooperation with other institutions) in 10 areas.

SDSU is a teaching university with strong research programs. Research and scholarship strengthen the instruction that students receive in the classroom and laboratory. SDSU's faculty conducts more than $65 million in funded research each year. The university notes that these projects provide unusual opportunities for students to work alongside faculty using state-of-the-art equipment and techniques. The university now offers bachelor's degrees in 74 areas, the master's in 55 areas, and doctorates in 10.

There is a great deal new and exciting to choose from at SDSU, and not all of it for philosophy majors. One exciting program is a new dual degree that emphasizes law and child welfare. The program allows students to earn a law degree and a Master of Social Work concurrently. The new program is being offered in conjunction with the California Western School of Law. Although there are a few similar programs in the nation, the dual degree offered by the two institutions is believed to be the first to focus on public child welfare, a subject of increased concern nationally.

The program is also the first MSJWJD degree to be offered by the 23-member California State University System. Dan Finnegan, graduate advisor for SDSU's School of Social Work, reports, "The program is intended for students who know they would like to work at the policy level, probably in administration or for a public interest organization, where backgrounds in both disciplines would be useful."

The school reports that the MSJWJD dual-degree program provides graduates with a major advantage in the job market because most child welfare service providers are interested in hiring those who have skills in both law and social work. Another big plus is that the program takes one year less to complete than if the two programs were pursued separately.

For those who had been thinking that they were secure in their professional endeavors yet learned that was anything but the case, SDSU's new Defense Conversion Center is retraining displaced defense professionals for new careers in emerging industries. This is a response to the decline in the defense industry, which suddenly went bust after the boom years of the 1980s.

Last October, the U.S. Department of Defense awarded 5 million to fund the retraining programs, added to the original $4 million that launched the center in 1994. The center also receives $1.2 million in state and local government matching funds. The first group of learners—nearly 50 people—have already graduated from the program. The skills the participants gain range from telecommunications to health data information management to entrepreneurial management.

Local businesses have been very supportive, rallying to help the program with technical assistance, donations of equipment, and instructors. Among the biggest supporters have been the local office of Hewlett-Packard Corp. and Science Applications International Corporation.

Career counselors are available to assist all students in the exploration of their skills, interests, and values as they choose a major and develop a career plan. A variety of computerized instruments are used in the career counseling and job search process. An extensive Career Resource Library is available to provide information about potential employers as well as current job positions for graduates. Career fairs are scheduled each semester, allowing students to meet their employers in an informal setting. The on-campus recruiting program brings prospective employers and graduating students together for career employment interviews. Students are assisted in preparing for these interviews and all other aspects of the job search through workshops and individual career counseling.

SDSU's Language Acquisition Resource Center (LARC) is "Expanding the Vocabulary" of students at the university and is on the cutting edge in developing new ways in which language is taught. It is an outstanding example of how technology can be used to advance educational objectives in the teaching of foreign languages—and another example of SDSU's leading the nation. The university is one of the first three national language resource centers funded by the U.S. Department of Education's Center for International Education to enhance language learning and teaching in the United States.

SDSU's LARC, in the College of Arts and Letters, began operation in 1990 with the funding of a $1 million grant. The grant focused on three areas: language testing, new teaching methodologies, and advanced uses of technology. One major program now in its final stages of development is the Computer Assisted Language Multimdia (CALM) software package. The user-friendly program incorporates culture as a component for activities such as the practice of language skills. It provides educators with a straightforward program for integrating their teaching materials into multimedia activities, endeavors supporting and enhancing course objectives. The LARC has hosted workshops and summer institutes for SDSU faculty and representatives from all of the UC and CSU campuses, and for educators from throughout the United States.

As for President Weber, his energy and vision appear to match that of SDSU and of the west as he moves on his new home. He concludes, "My sense is that San Diego—and the state of California—are young and vibrant places, places where new ideas and new people are welcomed. I'm sure there will be challenges, but I'm an outrageous optimist. The greater the challenge, the more I enjoy it. I'm the kind of guy who actually enjoyed his Ph.D. oral."

Enjoyed his oral? Now, that's academic philosophy.
University of Colorado-Boulder
Developing Latino Student Leadership

USHLI Program Under Way

by Adalyn Hixson and Monteith Mitchell

"The first session was an introduction to the program, what kinds of questions to ask, not to attack. I know these deans do get attacked. We want to build up relationships. We are more laid back, asking more normal questions. What do you do? How does your job work? How do you deal with all this stuff?"

HO is talking with Víctor Hernández, now in his first year at the University of Colorado at Boulder (CU), about the first stage of a new student program sponsored by the United States Hispanic Leadership Institute and hosted by the university—the Collegiate Leadership Development Program: Building the Next Generation of Latino Leaders. The six-week course aims to cultivate potential Latino leaders by encouraging greater activism on campus and in their communities.

The course is designed to create a better understanding between Latino students and university officials through constructive dialogue and interaction. The three components are administration, operations, and academics.

Araceli Rascon, a senior at USHLI, scholarship recipient believes the course will be valuable. "Last year we had seven incidents on campus...There were sit-ins. I'm OCI that some of her colleagues fe other approaches might be more beneficial. I important to have a dialogue with administrators because once we know who they are, we can be more comfortable knowing who their positions are and what role is in the university," she says.

A senior majoring in political science and sociology, she is the current chair of LMAS into Mexican American Student. "UMAS was founded at the university," she tells HO. "We're the Mexican American Students in the United States. We have about 50 members."

"As a leader of a student group I think it is important for all leaders to know who administrate are, because the policies they ma affect students' lives."

The new program was open up to all the Latino groups on ca
“Over the last two or three years, I’ve taken about 100 of our Latino students. So they obviously felt that we were committed to being part of the Institute.

“The number grows each year. The first year I took a couple, the next 10 and so on up to 50. And last year we were right up to around 50 students again.”

**Latino/a Groups on Campus**

Asked who’s participating in the new program, Trevino says, “Right now we have about 15 student leaders—mostly seniors, and a lot of them, which is good, are sophomores and freshmen. I am a senior. I’ll be leaving in April.”

HO asks Rascon if she or her group had any particular goals for the program, especially for the initial session.

“We met briefly a couple of weeks ago—our initial meeting. Our first session will focus on administrative policy. One main goal is just for us to learn to work proactively with the administration, so we can begin to have a constructive dialogue. To seek new avenues for communicating with the administrators—beginning to talk with them at different levels.”

Dale Trevino, campus coordinator of the new program, says HO this is the first joint program between the university and the U.S. Hispanic Leadership Institute. He says, because of its commitment to developing young Latino leaders.

“I’ve been participating at the conference since ‘86,” says Trevino. I was probably one of the few people—there were fewer than five—from the state of Colorado who had gone to the conference that year. And I’ve gone every year since.

“A lot of it, historically, has been student run, student generated. And these groups are really pretty solid on our campus. UMAS and MECHA have been here since the ‘60s—late ‘60s, early ’70s. They’re really our strongest groups.”

**Dale Trevino, Alumnus, Counselor, Campus Coordinator of NHLI Program**

Society for Hispanic Professional Engineers—a SHPE chapter works with our campus—part of the minority engineering program. We have some students from that. We have a student from the Multi-Ethnic Media Organization (MEMO). We have a Latino fraternity, Sigma Lambda Beta, a Latino sorority, Pi Lambda Chi—which is a pretty good thing. Another option for students. We have a Mexican American engineering and scientists organization, a Latino law students organization.

Asked to what he attributes this rather large number of Latino or as “part of Latino advocacy—basically faculty and staff that are Latino. And the university gives us a budget through them for funding whatever issues we have.”

“Always at the beginning of the year,” she says, “we hold a Chicano History Week.” She and HO agree that large numbers of Americans, including people in border states, seem unaware of Mexican American history, and fail to realize that substantial regions of the U.S. were once part of Mexico. “Even in our classes, a lot of the students don’t find out. They really believe Columbus discovered America.”

**Mentors Past and Present**

“We started attending the U.S. Hispanic Leadership Institute Conference,” says Rascon, “through Dale Trevino, and Cleo also.”

Cleo is Cleo Estrada, a senior counselor at the University, also mentioned by Dale Trevino. “Oh gosh—I have a lot of mentors,” he tells HO. “Cleo has been here since the late ’60s, early ’70s, as a former student and as a counselor. She served as my mentor when I was a student—helped me through my own identity development as a Chicano student. And so I find it a pleasure now to work under her and learn from her. To now be her colleague is a wonderful experience for me on this campus.”

The university, says Trevino, has a Cultural Unity Student Center, and Cleo Estrada works there too. But Trevino has earlier mentors.

“My parents have been working long and hard,” he tells HO. “They’re from Greeley—farmworkers. They obviously provided the foundation for myself and all my siblings to go to school and complete advanced degrees.” Those siblings include, he says, two lawyers, a Chicano studies major, a sister with a teaching certificate, and a brother who is a funeral director.

His parents, he says, “provided the foundation for us to be very successful in working in the community—giving back to the commu-
Ulta They were the typical Mexican family—neither one finished elementary school—a really strong family... família... with really strong values about education—that it was the way—that education was not our excuse to leave the community, but a way to provide for the community. This just happens to be my outlet.

"My particular piece—the leadership piece. I tied into what my parents have been saying. These young Latinos coming up need to have that as part of their vocabulary. They are going to go back and make some changes."

Araceli Rascon seems imbued with a similar sense of purpose. "I've always wanted to represent the Latino community in whatever way I can. Right now I'm looking into getting a master's in social work administration.

"I see people in circumstances where they don't always have the voice. I see my father working 12 hours a day, weighing bales all day long. My mother works for the same company, cleaning up."

Her parents, she says, want options for her and for her six siblings. Two are already teachers she says.

Victor Hernández, too, stresses parental influences. "Mom and Dad—they really have a big influence on how we grow up and identify our culture. They are the ones who made me the way I am—culturally aware."

"My dad and mom met when she was 21 and he was 26. He was still living in Mexico. He came over when he was about 28, got his green card. They moved to Greeley, Colorado. We were poor, and lived in a trailer court. Dad needed a better job so we moved to Denver, and bought our first house—that I still live in. That was a real big step for all of us. The first time we ever owned a house. I give credit to my mom and dad. They struggled. They did what they had to do.

But it was Hernández's older brother, Hugo, who introduced him to the cultural organizations such as MEChA. "He got me into all that stuff when I was in the seventh grade—introduced me to all the organizations and invited me when I was in high school. I attended Holy Family High School, a Catholic school. There was none of that there, and too bad, because there were maybe 50 students of color. I had to do it on my separate time, outside the school—maintain my heritage, my culture. Hugo Hernández, age 22, is graduating from CU-Denver in political science and plans to enter graduate school. Victor's mother is a teaching paraprofessional and getting her teaching certificate. His dad earned a certificate for auto body two years ago.

Araceli Rascon says that she and three of her siblings were able to go to college. "One of my biggest mentors was my sister, Josefa. She is the one who pushed me," Josefa is seven years older than Araceli. "We were raised in a rural town. They didn't expect her to go to college. They expected her to be a waitress or something like that."

Josefa is now a bilingual teacher at a middle school in Albuquerque.

College didn't become a reality, says Rascon, until I was a senior in high school. I was barely accepted into this program, which I think is wonderful. My school didn't have the calculus or the physics. I got accepted through the Academic Access Institute. It accepts you to the university on a probationary basis. I had to take different math courses, writing courses, in smaller classes with a slower pace. They definitely helped me integrate into the wider community on campus."

The year before last, Rascon was co-chair, with Curtis Esquivel, of the Chancellor's Committee on Diversity, an experience she describes as "really good." Sitting on committees, she says, "gives me more of an urge. I'm hoping this program is going to be wonderful."

"This is the first time we are implementing this training. Many of the students on campus couldn't even begin to give you the name of the Chancellor. Even if we don't accomplish very much, they will know who we are, and we will know who they are."

**Obstacles**

"It is a predominantly White campus," says Trevo, "and so the climate for some of these students is difficult for them to get through. When you are two or three Chicanos in a lecture hall of about 150 primarily White students and sometimes feeling like you don't have a sense of belonging—that is an obstacle. Boulder is a very predominantly White upper-class community. Many students feel like they are not welcome around here."

"The other obstacle is retention if not comfortable, they leave, so it gives the other students fewer role models. An obstacle, again, is that we don't have enough Chicano or Mexican faculty. If you are not reflected in the faculty, it is kind of hard for some to see good models up there."

The financial aid situation is always a problem here. We are a pretty expensive place for out-of-state students. In financing education there have always been obstacles, especially if it is first generation."
obstacles. "College is definitely expensive. And we hold jobs at the same time. White students can't comprehend why we have to think our parents support us in believing that we need a good education, but they can't support us economically." Asked if she recalled any of the White organizations reaching out to Latinos, she cited a group of environmentalists with issues it felt pertinent to Latinos as well.

Achievements

"Our admissions office," says Trevino, "is doing better in terms of making this a more welcoming place for all students."

"What I am really proud of here on campus is the community, the network of people of color—professionals—other staff of color. Even though it is a small network, I am proud of the fact that we really work together. It keeps us going and provides some stability for our students. For students who are coming into their own in terms of identity development, there are folks on campus—despite all the obstacles—to be here for them and to guide them throughout this whole maze."

"This coming together, this coalition-building, is working more and more," says Trevino, speaking of the student and staff connection. "We on this campus have really come together—out of necessity, yes, but are coming into a real multicultural society. We have to work with other minority groups. These students are really doing a good job in providing that."

Even the leadership program looks to a multicultural future. Plans include enhancing the program to include other groups.

Session One

The first of the six three-hour program components, which took place March 10, put the students together with Chancellor Richard Bynny, who had expressed great enthusiasm for the project.

"Leadership training, along with intellectual development, is an important element of a good education," he said. "Our campus is a dynamic place where learning happens in many different and innovative ways. This course presents an excellent opportunity for me and other administrators to work with students on developing leadership skills."

Students met, too, with Phil DeStefano, vice chancellor of academic affairs, who had said he was "looking forward to very active and interesting dialogue with these talented students," and Ron Stump, associate vice chancellor for student affairs and dean of students, who helped the opportunity to involve students not normally included in the mainstream.

"One of the results is a group of student leaders who feel better connected to the university and who are working in concert with it on behalf of student diversity. Long term, the program should enhance our student-life environment and better prepare our students to take their roles as involved citizens in society," said Stump.

Student Hernández tells HO the first session was "Really good. We enjoyed each other's presence. All of us had a connection that night, and I think we have something to carry on to the next meeting with the dean."

Coming Up

Among the campus figures slated to meet with the Latino leadership group is Carl Jardine, the university's director of housing. HO asked Jardine how he sees the administrators helping the potential Latino leaders.

"Our role as complementing the educational development experience of students, by serving as role models and mentors. Such opportunities were extended to me," he tells HO, "during my college experience. It is years later that I see the significance of such support by several university faculty and administrators—as extremely meaningful."

Asked what the college officials can provide that they themselves might have benefited from as students, Jardine says, "In the larger sense, to share life experience. On a more specific level, the opportunity to pass on information about skills and techniques. On many occasions, these are skills and techniques that you may not get within the formal classroom experience."

Knowing the ropes, says Jardine, is "critical for success. Whether it relates to academics or to your professional career."

Regarding challenges he faced or faces in his own career, Jardine, born in Panama and of African descent, says, "If your question is what did I face, I would say the absence of sufficient models that would represent my ethnicity or culture in leadership/management roles."

Asked what has changed most for minority students over the past decade, Jardine says that he believes students of color "feel a greater sense of pressure to be successful. Considering the highly politicized rhetoric regarding affirmative action in higher education, I wonder if many students of color feel an increased sense of disenfranchisement within the university community."

He sees "many similarities between today's students and those of the '60s as it relates to a sense of commitment to citizenship, activism, and civil rights issues. Along with this commitment, there is a sense of genuine pride towards one's own ethnicity and culture. I believe it is our responsibility, as university faculty and administrators, that we celebrate and encourage this personal growth in all students. After all, we are raising a small and humble role in developing our future leaders."

The program is said to stress the importance of student participation in the university structure. The goal is for students to see the opportunities they have to influence and create positive results on their campus.

Teresa Estrada, a sophomore, is looking forward to learning how to apply the principles of the program. "Our goals as student leaders are to be proactive instead of reactive, to solve problems before they arise and to take care of campus issues," Estrada says. "It's very important for members of all different Latino student groups to come together to unite for a common goal."
Latinos On and About Television
Second Report of the Tomás Rivera Institute

By Joy Hofer
The author is with the Tomás Rivera Policy Institute, Claremont, California, which last fall published Talking Back to Television. Findings from its groundbreaking survey of Hispanic viewing habits. Hispanic Outlook is pleased to present a small portion of the Institute's newly released second report on the important findings.

The richness of the Latino audience in terms of numbers and habits of watching more television than other populations make it a rich prize for programmers. The results of the Tomás Rivera Policy Institute survey of Latino portrayals on television offer a baseline for measuring how Latinos use the medium and how they feel they are portrayed by it.

Latinos are a predominantly bilingual population and are thus able to access television in both Spanish and English. At the household level, the routine use of both languages is evident. The language in which television was most often viewed often differed between parents and children. In approximately one-third of households, nativity among the adults differed, and this probably contributed to different language needs.

Latinos are a "tuned-in population." Almost all own television sets and watch regularly. Reinforcing findings of previous studies, we found that Latinos watched more television than did non-Hispanic Whites. Most also have access to Spanish-language broadcasts. This combination of individual linguistic abilities and structural resources form the foundation for the viewing patterns that we have reported.

Three-quarters of Latinos routinely watch both English and Spanish television.

Presentation of Latinos on Television
When asked to evaluate television on a scale of 0 to 100, with 100 being a very negative view and 0 being a very positive view, Latinos rated television at between 59 (Texas) and 62 (California and Florida). This generally positive view was extended to Latinos' evaluations of the portrayal of Latinos on the television news program most frequently watched and on English-language entertainment television programs in general.

Variation among the five states was slight. Latinos in Texas had the strongest positive views of the portrayal of Latinos on news programs. Slightly more than two-thirds reported that the portrayal of the Latino community was either very positive or somewhat positive. Latinos in California were the least likely to have positive views. Nevertheless, six in 10 reported that news programs presented Latinos in a very positive or somewhat positive light.

Overall, Latinos reported that Spanish-language television portrayed Latinos positively. This attitude was held by most Florida respondents and near majorities in Illinois, New York, and Texas. Only in California did the perception that Spanish-language television presented Latinos positively drop below 40 percent. Few Latinos reported that Spanish-language television presented Latinos negatively (between 12 and 19 percent), with no significant variation among states.

Concerns Raised about TV Programs
Despite these generally positive evaluations, Latinos raised a series of concerns about television programs. These concerns related to news programs, entertainment programs, commercials, children's programs, sex and violence on television, the role of English-language television in facilitating social harmony, and the presence of negative stereotypes on television.

While these concerns were remarkably consistent in all five states, several variations are worth noting. Latinos in New York State were much less likely to have access to Latino news anchors and newscasters. Only 21 percent reported that the news show they watched most frequently had a Latino newscaster or anchor. Only in Texas did most respondents report that the news show they watched most frequently had a Latino in these roles.

In all five states, Latinos said that...
having Latinos on the news show staff improved the quality of the coverage of the Latino community.

The absence of Latinos on the news is part of a more general concern that Latinos are absent from television programs in general. Survey respondents also reported that Latino characters “never” or only “sometimes” appeared on English-language entertainment programs. This perception of absence was held at roughly uniform levels across the five states. Survey respondents also noted the absence of Latinos in commercials. Again, there was little variation among the states, with a slight exception in Texas.

Children’s Television

Latinos also raised two concerns about children’s television. Most respondents strongly agreed with the statement that there were not enough children’s educational programs on Spanish-language television.

English-language television also was a target of criticism. Latinos were divided on whether English-language television provides positive role models for Latino children. In most states, roughly equal numbers of respondents said that English-language television does and does not. The one exception to this pattern was New York Latinos, who were twice as likely to believe that there were positive role models for Latino children on English-language television.

Sex and Violence

Latinos, like the population as a whole, believed there was too much sex and violence on television. Majorities or near majorities in all five states said that there was too much sex and violence on both Spanish- and English-language television. Held media in both languages equally responsible. However, between three and four times as many respondents across the states reported that there was more sex and more violence on English-language TV than on Spanish-language TV.

The content of this violence was also a subject of concern. Approximately six in 10 respondents reported that they agreed with the statement that English-language television was more likely to present Latinos as violent than was Spanish-language television. California Latinos were most likely to agree with this statement, and Florida Latinos were least likely. Latinos were divided over the role played by English-language television in building bridges U.S. society. Slightly more than a quarter believed that English-language television built bridges; another quarter believed that it perpetuated negative stereotypes.

Florida Latinos were most likely believe that it built bridges California, New York, and Texas. Latinos were virtually evenly divided on this question. Illinois respondents were slightly more likely believe that television perpetuated negative stereotypes.

Pluralities of Latinos reported that they had not seen negative stereotypes of Latinos on television. In no state did the number of respondents who reported seeing a negative stereotype approach the number reported that they had not.

California and New York Latinos were the most likely to stop watching the show when they saw a stereotype. Nearly six in 10 viewers turned off the show.

Roles Played by Latinos on TV

The final set of concerns raised by Latinos about television had to do with roles played by Latino characters and subjects of stories on news programs that feature Latinos and the Latino community.

It is important to remember when thinking about these concerns that Latinos noted a general absence of Latino characters stories about the Latino community on television.

In stories on Hispanic me the news programs that respondents watched most frequently crime and immigration/ill immigration were by far the common topics. In four out of five states, crime was more frequently subject than immigration/ill immigration. In Illinois, on the other hand, respondents reported that the two topics were covered about equally. Topics that portray Latinos positively and the diversity of the L:
experience in the United States—such as education, politics and elections, or sports—were rare in any of the five states.

News programs about Latino women followed the same pattern. Crime and immigration/illegal immigration and women as victims of crime topped the list of story subjects. Victims of crime topped the list in Florida and New York. Crime was the most frequent subject in stories about Hispanic women in California and Illinois. And, immigration/illegal immigration topped the list in Texas. A few Latinos reported that television news did not cover Latino women at all. However, more reported that they did not know of subjects of stories on Latino women than did those who reported that they did not know the subject of stories about Hispanic men. Survey respondents also indicated that entertainment programs presented Latinos negatively, though perhaps not as negatively as news programs.

Programs with Hispanic male characters most frequently presented them as police and criminals. Programs with Latino women characters often cast them as maids, prostitutes, housewives, and victims.

In Florida, one in four respondents reported that Latinos in entertainment programs were presented positively. This far exceeded rates in other states. Just one in 16 California respondents, for example, offered the same evaluation about Hispanic men in entertainment programs.

APPENDIX ONE

The Survey

The survey consisted of 1,013 Latino adults in the five states with the largest Latino populations (California, Florida, Illinois, New York, and Texas) and was conducted over an 11-day period in August 1998. We selected telephone numbers randomly from a list of households with Spanish-surnamed members and listed telephone numbers. In each case, we verified that the respondent was Latino, a regular member of the household, and over 18 years of age. Our initial sampling goal was 200 respondents from each state. Since multiple surveys were conducted at the same time, we slightly exceeded this goal in several states.

All respondents had the option of conducting the survey in Spanish or English, and all survey staff were bilingual. Natives from several Latin American nations translated the survey from English to Spanish to ensure that the Spanish was appropriate for a respondent pool from all parts of Latin America and the Caribbean. Nearly 85 percent of respondents completed the survey in Spanish. The average survey took about 15 minutes to complete.

In order to be able to offer context and comparison for the survey of Latino television behaviors and perceptions of Latino portrayals on television, we also conducted a survey of non-Hispanic Whites in the same states. This survey included fewer respondents (60+) and a shortened questionnaire that focused on their perceptions of the portrayal of Latinos on television that took approximately nine minutes to complete. Our sampling goal for the survey of non-Hispanic Whites was 80 respondents in each state, which we again exceeded slightly in several states.

Among the subgroups that we analyzed were Latinos who watch programming in Spanish, English, or a combination of the two. Latinos from different states, and Latinos who watch quite a bit of television on a daily basis versus those who watch less.

The Respondents

Respondents to the Latino survey ranged in age from 18 to 89, with an average age of 40. Although 58 percent had earned high school degrees, the average number of years of education among Latinos was 10.5. Slightly more than 70 percent of Latinos were foreign born. The median household income was between $20,000 and $30,000, although one-quarter of respondents did not disclose their household income (which is customary in telephone surveys such as this). A slight majority of Latino respondents were of Mexican origin or ancestry, but the remaining 46 percent came from all parts of the Spanish-speaking Latin America and the Caribbean. Twelve percent were Central American; 11 percent, Cuban; 10 percent, Puerto Rican; 8 percent, South American; and 5 percent, Dominican. Nearly six in 10 Latino households included children under 18.

Topics that might portray Latinos positively and suggest the diversity of the Latino experience in the United States—such as education, politics and elections, or sports—were rare in any of the five states.
Latinas Speak Out at Princeton University Roundtable

In March, an intimate but newsworthy gathering took place at Princeton University—the Latina Roundtable. In response to the growth of the Hispanic population in the United States, developments and trends in education and employment, and the social and educational needs of young Latinas, Moderator Amada Sandoval, English and American literature Ph.D. candidate at Princeton, coordinated the event. Four panelists—Maria Echaveste, White House Deputy Chief of Staff; Dr. Patricia Fernández-Kelly, professor of sociology, Princeton University; Dr. Elsa Gómez, professor of Italian and former president of Kean University; Sara Martínez Tucker, president of the National Hispanic Scholarship Fund, and Elena Reilly, of The Centro Cultural Consulado de México en Philadelphia—led the discussion.

From dealing with issues of ethnic labeling, choosing and obtaining the right education, and getting the necessary credentials to mentoring, making career choices, marriage and family—these women covered it all.

Poenant issues of the day were discussed at length during this four-hour convocation, and a dynamic, candid, and raw exchange took place between the audience and the panelists. In addition to their expertise and professional views about the state of Latinas in education, academia, and society, the panelists added a personal touch by sharing individual experiences regarding their climb to success. As the speakers noted and many Latinas in the audience concurred, success doesn’t come easy.

Amada Sandoval, moderator, summarized the reasons for the roundtable: “We are here because of the growing Hispanic population in the United States. This is a way of showing our concern about the education needs of women. Also, because we hear about the division in the Hispanic community—that many socioeconomic groups are covered under this label, how many ethnic origins, people from different races. But I think that one thing is common: that we have in common is concern for education, the value education, and our concern for women, which is why we have assembled this group of inspirations.”

The New Civil Rights Issue

Maria Echaveste brought the group up to date on White House initiatives—what we are doing terms of K-12: why the president track record on focusing on education continues to be front and center; and regarding higher education—the continuing debate on diversity and affirmative action.

“Folks like myself have a special responsibility to share our perspectives, especially for young women as they try to decide what they are going to do with their lives”

“A qua education the new civil rights. A civil right to move the sanctuary of discrimination has been pretty much eliminated. But if you look around the country, you’ll find cities that...”
cuts, region after region, community after community, a very disturbing pattern—achievement disparity between minority children and majority children. And I keep asking the question, how could it be— that California’s public school system ranked in the top five in terms of per student expenditure in the ’60s and ’70s and now it is the bottom five at a time when the school population has become relatively blacker, browner, Asian, more minority children?

“Don’t want to say racism— because then you have to question where the intent, where’s the proof. On the other hand, it is pretty amazing that at the time when the state has become the most diverse, that commitment to a quality public school education seems to be disappearing.

Echaveste notes that the country as a whole should be asking itself— “Are we really going to limit the kind of education our children have based upon what their families can afford? We have poor communities. Are we as a society going to let the level of education these children are going to have will not be as good as those in more affluent neighborhoods?”

According to national statistics, she quotes, 40 percent of our population is under 24. This is a huge issue not just for Latinos but for the country, and our economic wellbeing depends upon how well we are going to educate these children,” she adds.

The nation’s Capitol is working on developing solutions. There is an interesting fight in Washington DC right now regarding accountability and class size. The Republicans have figured out that they have to do something on education. Free up competition, have vouchers for schools— this is how we are going to improve the public school systems. I think that what they have learned (since there are many Republican governors) is that you are never going to have enough money to provide every family with vouchers for private schools. Let adequate academic preparation creates barriers and ultimately, in higher education and beyond, fosters a negative attitude.

The Education Flexibility Act can be part of the solution. Continues Echaveste. “This act leaves school districts free to choose what is best for the school district. But if want to do something about racial relations in this country, improve access to a quality education.”

According to Echaveste, equal education opportunity is a key element. “We owe it to our own self interest to reduce achievement disparities. For example, she mentions that in Boston there are three magnet high schools. 94 percent of the graduate go on to four year colleges. In the remaining 10 or 15 high schools less than five percent of the students go on to further their education. She notes. “Guess what? It’s mostly white. In the three magnet schools and it’s mostly minority in the other schools. Part of it is that the don’t have access to calculus and algebra; the don’t have the advanced classes so they can prepare for the SAT, etc. that leads to higher education,” says Echaveste.

Economic resources would leverage the playing field. Patrici Fernández-Kelly, professor of sociology at Princeton, adds. “There isn’t such a thing as failing public schools in the U.S. Most public schools are doing really well. It is only some schools that are doing very tough job— those in the highly segregated neighborhoods, in environments in which people are just not Latino or African American. They are basically marginalized. impoverished...”

“Why do institutions like Princeton do better in terms of recruiting not just minorities? We do have on this campus a whole lot of people like myself (foreign-born or coming from the upper crust society but who nonetheless have Spanish surname). We do a better job here partly because Princeton has the resources to recruit an compensate. And you know this; there are more undergraduat

“College education is the minimum requirement to gain entry into society. If not on an AP plan, students won’t get into college if they are behind [in taking AP courses].”

SARA MARTÍNEZ TUCKER, PRESIDENT.
THE NATIONAL HISPANIC SCHOLARSHIP FUND
deans here than there are stones in the buildings of the university. Those do provide a tremendous amount of support, and as a result we have some remarkable success stories. The fundamental point I'm making is that it is all about resources.

Affirmative Action and Support Systems

Regarding higher education, Echaveste said, "Absent some type of affirmative action, you'll see segregation. That's what's happening in California, in Michigan. We can't have the president be the dean of admissions for all universities. On the other hand, we can't stay silent while there is an increased campaign to stop any sort of program that tries to ensure diversity of the student population. Private institutions, like Harvard (seem to be doing a better job of achieving some diversity) look through applications, grades, background, etc. They have a multi-factor analysis. It's not just grades, SAT scores.

"But not all schools have the resources to invest in a thorough admissions process. "I don't think any of us would want to be in a situation where we are given an opportunity solely based on race. But as I like to say, you get the whole package. And being Latina is part of what you get, and that's neither good nor bad, but it's part of the package, it's going to make you an interesting person," concludes Echaveste.

Fernandez-Kelly concurs. "All the factors that used to work against them, race, gender and ethnicity, are part of a bigger package that becomes attractive in many settings."

A critical issue that Echaveste and the other panelists discussed is support—financial as well as psychological support—especially for women. "Our community is for the most part still concentrated in low-income occupations with minimal education, and so the value of taking four years to get a college degree is not readily apparent.

"We need to be really supportive of those Latins and men who decide to go beyond and try a new institution, not necessarily the local JC junior college. When it comes to it, institutions like this, where you go to school, who do you meet, who was your roommate, who you worked with. All of it helps in achieving positions of leadership," she notes.

In discussing this, Echaveste brought up her background to underscore her point—"I get a certain level of respect, at least a willingness to see what I'm capable of, whether it was in my corporate law practice or another setting, because I went to Stanford. Because I'm a minority woman and the expectation, whether it's unspoken or subtle, is you're not quite as good. But you went to Stanford, you went to Berkeley, you practiced for a major New York law firm—you must have something there."

"In sum, we must hold our leadership accountable. And if we don't educate the community to demand quality education, higher education will have to continue to fight to preserve diversity and ensure that in the next decade we are educating a diverse leadership. It's conceivable that if you don't turn back this assault on affirmative action, then in two decades, there will be very few people of color in positions of leadership because they won't go to law school, they won't get their doctorates, etc., that allow them to serve in positions of responsibility in government and in corporate America."

Sara Martinez Tucker discussed her perspective regarding Hispanics in higher education as it translates into the corporate world. Martinez Tucker, who is now at the helm of the renowned Hispanic Scholarship Fund, was formerly the vice president of human resources and the first Hispanic female to reach the executive level at AT&T. Her experience in climbing the corporate ladder made her an ideal candidate to speak on these matters. She noted that the statistics regarding the number of Hispanics going on to college and completion rates are frightening, as these affect their level of success in the workforce upon graduation. Martinez Tucker recites, "In 1996, two million Hispanics graduated high school (only half of our kids are getting a high school diploma); only 70,000 choose to go to college; 56 percent of those go to community colleges, about 68,000 of the two million will have a college degree.

"At the Hispanic Scholarship fund, we are committed to improving the transfer rate from community colleges to four-year institutions. Affordability of a college education is another important issue as the cost of going to college has outpaced inflation. In the '80s, fees were much kept pace with inflation. Since the early '80s, the cost of education has risen at twice the level of inflation. And our medium income is in the $20,000 range."

Hispanic Scholarship Fund focuses on groups with families have revealed that there are many misconceptions concerning going to college. Parents and students alike underestimate the affordability of college by 20 percent." Consequently, the fund has launched a Web site to teach browsers how to get to college. Martinez Tucker adds that the site walks people through all the neces
sary steps to applying and financing a college education.

The fund's efforts are making a difference. Martinez Tucker offered some statistics concerning Hispanic Scholarship Fund scholars: "98 percent of our scholars have completed a college degree; 43 percent have gone on to get a graduate education; and 65 percent do volunteer work in their communities."

One of the key points Martinez Tucker couldn't emphasize enough is that "college education is the minimum requirement to gain entry into society." Taking advanced courses is one enabler for students to get into college. "If not on an AP plan, students won't get into college if they are [in taking AP courses]," she adds. Access to financial aid, the support of family and mentor are other enablers.

Martinez Tucker shares her own experience to illustrate the difference that a college education and an advanced degree made in her life. "It took me my MBA to create a destiny. My undergraduate wasn't enough. [College] was my journey to find my talent and my voice. Knowing what you don't know. The important thing is to demonstrate results."

Upon obtaining the right credentials, the learning doesn't end there. "You have to be able to translate the knowledge you have into transformational skills. You become successful in a profession when you are a lifelong learner," notes Martinez Tucker.

In the Trenches

Elsa Gómez, professor of romance languages and former president of Kean College of New Jersey, talked about access and retention, and also shared her experience in higher education—the career choices she made, how she handled being "one of the few" during her presidency, etc.

Twenty years ago, she noted, access and retention were the issues of the day, and ESL was crucial. Struggling to remain the optimist, she adds, "Well, not much has changed."

"There were no role models. And today, we have no real role models on campus. It's not just getting academic support—its psychological, financial, and social support that is lacking. The first job is to get tenure," notes Gómez. But there are no shortcuts. "You have to work your way up, go through the ranks,"

Gómez also raised the issue that Latinos—women, for personal and cultural reasons, in particular—like to stay close to home, which unfor-

acation [positions] is diminishing. The action is elsewhere. Consequently, you have to be willing to take that risk [and go out-

key mentor connections—successful Hispanic role models as well as older, non-Hispanic, academically savvy octogenarians—can go a long way, and Latinos should not b shy about seeking these connections.

"Two points I keep on bringing to the attention of my students: on of them is that to be White, an male doesn't necessarily mean that you are wrong. And while I actually respect the intent and the impulsion of people who have been labeled a minority, and we have accept uncritically that definition, that the do want to have role model around them, people that look like them—people of color—I would argue that is it important, to women in particular, to attach themselves to people who for ger-

eration have had a real understanding of how the system work to actually serve as mentors. It is actually they who have an understanding of the untangible forms of knowledge that are actually very important in order to mobilize populations, information, connections, networks."
Landslide Win for NJIT Team at Academic Olympiad

by Carla Anderson and Adalyn Hixson

“Students participating in this Olympiad are very conscientious. They want to represent NJIT well, but at the same time, they are also very concerned with what is happening with Hispanic youth. They know that they are the exception to the rule, not the rule. Most of them came through the Educational Opportunity Program at NJIT because their math and science background was so weak at the high school level.”

HO spoke with the impassioned Carlonapo Ontaneda of New Jersey Institute of Technology (NJIT) about a team’s first-place victory in the National Science Olympiad, a science competition among Hispanic students from colleges and universities across the country.

The team from NJIT’s Hispanic Organization for Science and Technology/Society of Hispanic Professional Engineers (HOST/SHPE) traveled to Los Angeles, Calif., for the competition, held February 14. Contestants were three first-generation college students: José Fernando Lopez, a senior in electrical engineering from Clifton, N.J.; Paul Samaniego, a senior in mechanical engineering from Iselin, N.J.; and Pena Ortega, a senior in chemical engineering from Union City, N.J. Traveling with them coaching them, encouraging them, was fourth team member Linda L. hernández.

Regional champions and the National champions; he says, with understandable pride “And last year, of course, the team received first place at Regional, and second place at the National in Orlando—against the University of Kansas—described by Ontaneda as “the wonderful president of the SHPE/NJIT chapter, the student organization.” She tells HO that the chapter has “too members—posing members.”

“She was the catalyst,” says Ontaneda. “To bring all these male students to compete at the Regional and National Olympiads. Credit goes to her as well.” Ontaneda accompanied the SHPE chapter to the Regional Conference in Alexandria, Va.

“I don’t know if you are aware that this year they were the University of Texas-Austin, University of California, both Long Beach and Berkeley, and University of Illinois, Urbana. NJIT teams placed second nationally in 1993 as well as 1998. “For so many years, the Hispanic students at NJIT have represented the school so well.”

“Historically,” says Ontaneda. “SHPE/NJIT has been a sort of landmark because no other student chapter from the United States has consecutively achieved so much. And against students from MIT, from UC-Berkeley, from Virginia Tech—you name it.”

“Of our goals for the team,” says Lemarie, “was simply to do the best we can.” They studied together the night before the competition, she says, and tried to talk through the enormous weight of all the previous wins by other teams from NJIT. This was a completely new team for the school because the members from last year all graduated. When we got there, we saw all these other schools—Cal Tech Berkeley.”

“We know these are big, big schools, but this should not intimidate us.” was their pre-game reasoning—a kind of whistling in the dark. “We had so much pressure. We’d been winning the Regional conference every year with everyone there saying ‘NJIT is the school to beat.’ I was a little bit scared. I’d never been with the team before...”
because I didn’t yet have the engineering classes,” says Lemarie.

At this year’s National Olympiad, they faced teams from the University of California, Berkeley; California State University, Long Beach; the University of Missouri-Rolla; Vanderbilt University; and New Mexico High Lands University. And they won by a huge margin, with a combined score of 1,200 points. UC-Berkeley and UC-Long Beach tied for second place with a total score of 401 points each.

“I was not certain that we were going to win,” said Ortega. “But we were confident as a team. NJIT’s engineering programs give you a solid educational program.”

H.O. asks Lemarie when she began to feel “They’re going to win the game.” “I think it was during the second round of the game. I was like—OK, we’re on track now. We’re gonna do this.”

The Academic Olympiad is sponsored by the National Technical Career Conference (NTCC), the largest Hispanic engineering and science event in the country, according to Jose Rivera, regional vice president of SHPE. It brings together more than 3,000 attendees annually.

This year’s conference was the largest in its 25-year history. Companies from across the country attended in search of engineering talent. NJIT’s team members were granted interviews for full- and part-time internship opportunities with Hewlett-Packard, Exxon, Boeing, Microsoft, Xerox, Lucent Technologies, IBM, Andersen Consulting, and many other highly regarded corporations.

“Normally you are the one who has to sell yourself when you are looking for a job. When companies heard that NJIT was the winner they were the ones asking for me.” said Ortega.

The Academic Olympiad is a competition consisting of two rounds. Questions are assigned a point value based on the degree of difficulty. Players have 15 seconds to answer and incorrect responses result in point deductions.

“Asked how the Olympiad is conducted and what kinds of questions are asked, Lemarie says, “It’s a game, like Jeopardy. Questions are presented to the participants on a screen. There is a proctor who reads the questions in different categories—general chemistry, physics, math. Some history of the organization—officers or people like that. It’s the second round where the questions go into more detail—from chemical engineering, electrical engineering, mechanical engineering.

“For example, a mechanical engineering question might be: Find the stress of a certain material, given certain dimensions or certain conditions. Formulas are not given to the participants, so you have to know your stuff and be able to calculate and come up with the right answer. You can use a calculator.”

Team members can confer before answering, but Lemarie says that when the questions fall within a specific engineering category, they are typically answered by the team member with that expertise, without conferencing. And how much time did she personally put into preparing for the National Olympiad? “About 40 hours.”

Carlmagno Ontaneda, a former banker, was drawn into academia through volunteer work in the community, and has been enthusiastically recruiting students to NJIT for many years. He works extensively with high schools throughout New Jersey, especially in less advantaged areas, encouraging them to enhance their math and science programs, and travels outside the U.S. as well.

“Linda Lemerie, she is a student that I recruited. She is from Our Lady of Good Counsel, in Newark, N.J. The other student [and team member] I recruited is Pentel Ortega. He’s from Union Hill High School, in Union City, N.J. All the students on the team come from families with modest incomes and all four are first-generation.”

When she knew that she wanted to go to college, Lemarie says, “I’ve always wanted to go to college. It wasn’t a sure thing because of the money—and because I’m first-generation. I didn’t have the guidance from my parents. They did think I should continue my education, should get as far as I can.”

Lemarie was born in Ecuador and lived there about 12 years. “When I came here, I went straight to the ninth grade.” School in Ecuador, she says, is very different from here, especially the high school environment. “Over there, they are much more strict. You take more classes, have more homework. You need to spend a lot of time. I used to take double the classes I take here—fourteen classes, and here I had seven.”

Her English fluency is excellent. Had she studied much English in Ecuador? “Just the basics. The numbers. Hello, Goodbye.” But by the time she’d been here about a year, when she was a sophomore, she felt “much more comfortable with it.”

Working now toward a bachelor’s degree in chemical engineering, she plans to go for a master’s in Chem-E and later a Ph.D in environmental engineering.

“Right now,” she says, “I’m doing research in the synthesis of explosives. So far I like it a lot.” The research entails both laboratory work and scientific reading. Is it hazardous study? “We take our precautions. It is d-gerous.” And what are its applications? “Basically used by the Defense Department, because right now the elements they use as explosives contaminate the environment and are very dangerous. They are trying to come up with new components that are not as polluting.”

Lemarie has a brother who is attending college now, too, one of the all-too-rare Hispanics in higher education studying mathematics. Ontaneda, in an interview a few years back, had told HO that while recruiting in Puerto Rico, he encountered so many women interested in math and science that he was embarrassed to try to recruit more females back in the States.

“That’s the same impression I got when I went to a conference in Venezuela, a chemical engineering conference,” says Lemarie. “And I and I were able to go represer NJIT. We were the only ones I the United States. We met people from Venezuela, Colombia, South America, and compa—what kind of courses you taking? We noticed a lot of females in chemical engineering there than here.”

Raised in Ecuador by grandparents, now deca Lemarie says they taught him “never give up your dreams or goals.” Both she and NJIT are beneficiairs of their wise counsel.

Lemarie and the three team members who came up with many right answers—Jose Fern Lopez, Paul Samaniego, and P. Ortega—are to be honored at a banquet on April 29, with Congress Robert Menendez as the key speaker. A man Ontaneda describes as very committed to youth.

And isn’t it encouraging future students will have an that level fighting to give them opportunities? he asks.

NJIT is a public research university enrolling nearly 8,200 bachelor’s, masters, and doctoral students in 76 programs through its five college Newark College of Engineering, S of Architecture, College of Science Liberal arts, The School of Manage and the Albert Dorman Honors College. Research initiatives include medical imaging, microelectromicros, multilevel transportation, computer science astrophysics, environmental engi and science, and architecture.

Yahoo! Internet Life magazine named NJIT the second most “wired” in the nation; U.S. News and World Report’s 1999 Annual Guide to America’s Best College Buts rate it as the sixth best value among science and technology schools n among the top 100 overall.

1095
Freedom Forum Recognizes Vásquez

David Leo Vásquez, a junior print media student at the University of Texas-El Paso (UTEP), has been named one of The Freedom Forum’s Chips Scholars for 1998.

The Chips Quinn Memorial Scholarships for Minorities in Journalism is the premier media diversity award of The Freedom Forum, a nonpartisan, international foundation dedicated to preserving First Amendment rights. Recipients of the scholarships represent some of the top minority journalism potential in the country.

Vásquez receives a $1,000 college scholarship and a 12-week professional newsmaking internship.

He is a sports editor for the student newspaper and works part time for the El Paso Sun Times’ sports department.

Kidd Directing Co-op Ed Office at University of Texas, Pan American

Enedelia Piña Kidd is the new director of the Office of Placement and Cooperative Education at the University of Texas-Pan American (UTPA).

As director, Kidd oversees career placement, the cooperative education program, and student internships. As interim director since late last summer, she has implemented changes and new programs that strengthen the services UTPA provides to its students, alumni, and employers, said T. Edward Mercer, vice president for institutional advancement.

She has a bachelor’s degree and a master’s from UTPA, then Pan American University.

Posada Exhibit at University of New Mexico

The University of New Mexico (UNM) has been host to the exhibit “Sensational Social: The Mexican Popular Prints of José Guadalupe Posada,” taken from the Fernando Gamboa Collection, this spring semester.

University of Kansas Professor Patrick Frank—the author of Posada’s Broadsheets, a UNM publication—opened the exhibit with a lecture entitled “Morality and Sensationalism in Prints by Posada.” Posada, according to Frank, is the most celebrated artist of his time. The broadsheets—which are prints and stories—were sold on Mexican street corners for a penny apiece around the turn of the century and were the most popular art form for the general public.

University of New Mexico Honors Miera

The University of New Mexico (UNM) School of Engineering honored alumnus Bill Miera at the 1st Annual Distinguished Engineering Alumnus Awards banquet.

Miera earned a bachelor of science degree in mechanical engineering in 1980 and a master of science in mechanical engineering in 1990. He is the founder of Fiero Industries, Inc., which won a “Prime Contractor of the Year” award in 1997. His accolades include New Mexico Flying Forty (1997), Pinion and Roadrunner Awards from Quality New Mexico (1996 and 1997 respectively), recognition as the founder of one of the nations largest Hispanic-owned companies in Hispanic Magazine (1995), and as a finalist in the local Chamber of Commerce Outstanding Business Award.

García Social Work Student of the Year

Delissa García, a senior social work major at St. Edward’s University, has been selected as Social Work Student of the Year in Austin, Texas, by the Texas Chapter of the National Association of Social Workers. “Social work is a field I see as very gratifying, and it gives me the opportunity to work with diverse groups of people,” said García. “I just try to give my all to my studies, work, and volunteer activities.”

García, who co-chaired the Student Social Work Association at St. Edward’s and mentored at Dawson Elementary School, has a 4.0 GPA. She currently works part time at The Settlement Home, a treatment facility for abused children in Austin, and is completing her senior internship with Representative Elliot Naisbit in the state legislature.

NACME Award Winners

FORUM ’98 provided The National Action Council for Minorities in Engineering (NACME) an opportunity to honor its donors and alumni and to pay tribute to individuals who have dedicated their lives to educating engineers.

Geraldo Esparza (profiled here) and Eduardo Goenaga-Díaz were among the ten 1998 Techforce PreEngineering Prize winners outstanding students who have demonstrated academic excellence and leadership skills and a commitment to engineering as a career.

The NACME Alumni Awards honor men and women who are making a special contribution to engineering diversity and encouraging others to do the same. Juan Laguna-Díaz, an engineer reliability engineer at GI Transportation Systems, was one such winner.

In a special FORUM ’98 address, General
Colin Powell challenged attendees to do more to mentor children, provide safe environments, set high standards, and prepare them for the technical workforce.

**Esteves Speaks at Grand Valley State University**

Caribbean poet Sandra Maria Esteves gave a personal insight on the theme of border crossings in an address titled "Samba Rumba Cha-Cha Be Bop Hip-Hop, One Step at a Time, Creative Communication and Transformation: A Latina Poets Journey Through an English-Speaking Universe." at Grand Valley State University (GSU) in Michigan in February.

Esteves—who describes herself as a "Puerto Rican-Dominican Laine-Borinquena-Quiqueyana-African-American author born and raised in the Bronx"—was the keynote speaker at GUS’s fourth annual Conference on the Americas.

The special emphasis of this year's conference, "Race, Culture, and Border Crossings," was on the myriad ways in which Latin American culture transgresses the rigid boundaries that typify notions of race, ethnicity, and nationality in the U.S.

**IUPA's Rocha Completes Internship**

Dr. Rosalinda Rocha, interim dean of the College of Arts and Humanities at the University of Texas-Pan American (UTPA), returned after a semester-long internship at Southwest Texas State University in San Marcos under the auspices of the prestigious American Council on Education Fellows Program.

The purpose of the program is to train people to become tomorrow’s leaders in the issues facing higher education,” said Rocha. "When I was in San Marcos, my job there was to observe and learn, and to listen to what was going on. We need those kinds of skills as administrators.

Rocha has a bachelor’s degree and masters from Texas-Pan American University and a doctorate from Texas Tech University.

**Rivera-Berg Leads MIP**

Dr. Salvador Santiago Nunez, president of the Caribbean Center for Advanced Studies (ULP), has appointed Dr. Jose M. Rivera-Berg chancellor of the university’s Miami Institute of Psychology (MIP) campus.

Rivera-Berg, who received his doctorate from the Eberlau Graduate School at Yeshiva University, previously was director of the Goodman Psychological Services Center at MIP and has held other administrative and professional positions in the mental health field, both in the United States and in Puerto Rico.

**Gordon Honored for Community Service**

Dr. Milton A. Gordon, president of California State University Fullerton, was honored by the Hispanic Bar Association of Orange County during the organization’s 21st Annual Installation Dinner and Awards Ceremony. Gordon was presented with the César Chávez Community Service Award, presented annually to an individual for his or her involvement in issues affecting Orange County’s Latino community.

Gordon is being recognized for his commitment that Cal State Fullerton has demonstrated to the advancement, education, and graduation of Hispanic students. HBA ranked Cal State Fullerton 15th in a listing of the 100 colleges and universities conferring bachelor’s degrees on Hispanics. Currently, 21 percent of its student population is Hispanic.

**Morrison-Rodriguez New University of South Florida Dean**

Dr. Barbara Morrison-Rodriguez has joined the University of South Florida’s Louis de la Parte Florida Mental Health Institute as its new associate dean, bringing with her nearly 20 years of experience in the mental health and social work fields.

As associate dean, Morrison-Rodriguez will help to form and implement a strategic plan for enhancing the institute’s role as a national and international leader in mental health services research. She is also responsible for developing and implementing policies and procedures for the research and educational administration of the institute.

She has a bachelor’s degree from Rutgers University and a masters and doctorate from Columbia University.

**De la Cruz to Chair University of Miami Board**

South Florida entrepreneur Carlos M. de la Cruz, Sr. has been elected chairman of the University of Miami Board of Trustees, effective May 1. The 13-member board governs one of the leading private research universities in the Southeast.

De la Cruz is the chairman of the Board and CEO of Eagle Brands, Inc., the franchisee of South Florida’s Central Honda, Central Hyundai, and Sunshine Ford automobile dealerships. He is on the Board of Directors of both LNR Property Corporation and Georgetown University.

He has a bachelor’s degree and a master’s from the Wharton School, University of Pennsylvania, and a Juris Doctor from the University of Miami School of Law.

**Castillo and Martinez Join UT/B/SC**

At the University of Texas-Brownsville and Texas Southmost College (UT/B/SC), Hector Castillo was named executive assistant to the president, and Dr. Javier A. Martinez was named assistant to the president.

Castillo specializes in recruiting and retaining both students and faculty from underrepresented groups. Currently, a doctoral student at UT-Austin, he expects to graduate this year.
with a degree in educational administration with an emphasis in community college leadership. He has a bachelor’s degree and a master’s from East Texas State University.

Martínez will run the day-to-day operations of the president’s office and assist in the writing, correspondence, and research for the institution. He has a bachelor’s degree from UT-Austin, a master’s from UT-Pan American, and a doctorate from Ohio State University.

Rodríguez to Chair Milano Program

The Robert J. Milano Graduate School of Management and Urban Policy (NYU) announced the appointment of Dr. Aida Rodríguez as chair of its Nonprofit Management Program and professor of professional practice effective August 1. Rodríguez comes to the Milano Graduate School with more than a decade of experience in the conceptualization, design, implementation, and systematic evaluation of social policies and programs aimed at reducing poverty in inner-city neighborhoods. She is currently deputy director of Equal Opportunity Programs at The Rockefeller Foundation, where her work promotes the basic rights of minorities in the U.S. and increased job access and job creation for the economically marginalized in urban communities.

She serves on a number of philanthropic boards, including Women and Foundations and Hispanics in Philanthropy.

NCLR’s 10th Annual Capital Awards

The National Council of La Raza—the nation’s largest constituency-based Hispanic organization—honored two members of Congress for their staunch support of the Hispanic community, at its 10th annual Capital Awards. Formerly the Congressional Awards, Senator John McCain (R-AZ) and House Minority Leader Richard Gephardt (D-MO) were recognized for their work on civil rights, immigration, education, and other issues affecting Latinos.

Soledad O’Brien, an MSNBC news anchor, and Nestor Carbonell, co-star of the NBC comedy Suddenly Susan, were co-emcees Florencia Lozano, from the ABC daytime television program One Life to Live, and Congressional Hispanic Caucus Chair Lucille Roybal-Allard were the award presenters. Performing were mezzo-soprano Susanna Guzmán and Broadway performer Perry Laylon Ojeda.

News from King Juan Carlos I Center

The King Juan Carlos I of Spain Center of New York University (NYU), with the generous support of the Coca-Cola Foundation, is offering: a public school teachers forum, travel grants for NYU grad and undergrads, a foreign study initiative for NYU students, and a Connections small-grant program for NYU professors, competitive curriculum development grants for NYU faculty, and Spanish-language tutoring for NYU students. Call (212) 998-3650 for further details.

The Center recently held a Centennial Celebration of Jorge Luis Borges—featuring an exhibit of some 50 photographic portraits of Borges by such photographers as Avedon, Arbus, Comesaña, Freund, Tacio, and Rivis. A film series about Borges and a lecture series on the experience of reading and re-reading Borges was part of the celebration.

Estrella de Diego, professor of contemporary art at the Universidad Complutense de Madrid, has been co-teaching a course on Salvador Dali and organizing various activities for the center this semester.

The “Excepción en Educación” Conferences

The White House Initiative on Educational Excellence for Hispanic Americans held a conference in Los Angeles, Calif. last month entitled “Excepción en Educación: The Role of Parents in the Education of Their Children.” It was the second such conference held in the last few months—the first taking place in San Antonio, Texas, in October.

Sarita Brown (pictured second from right) is the executive director of the Initiative.

The conferences aimed to advance a national dialogue on the essential role parents play in supporting the education of their children and to build upon the strong Latino and community support for education.

Community leaders in New York, Chicago, and Miami have been working to stage similar conferences in 1999.

Northampton Community College Assists Nicaraguans

Late last year, students and faculty of Northampton Community College (NCC) in Pennsylvania personally delivered more than $3,000 to children in Comarca El Canon, a remote area of Managua, Nicaragua. The money—raised by TEAM Act 101, a student organization—was to be used for medical supplies for children who are at risk for malaria and other parasitic diseases. A clinic previously had been set up by a volunteer team that included NCC faculty member Uriel Trujillo.

The people have it rough,” said Steve Rivera, (pictured at right) TEAM Act 101’s former president, who now attends Penn State, “Most of them live in wooden shacks with dirt floors. There’s no running water. No sewage disposal. It’s amazing there isn’t more disease than there is.”

Readers wishing to contribute through TEAM Act 101 should call 610-821-5355.”
Pima Community College Presents New Play by Villarreal

Chicago Milegro, a new play by University of California Los Angeles Associate Theater Professor Ed Villarreal, in association with the Borderlands Theater Company, was performed recently at Pima Community College (Ariz.).

The story, which takes place just after the turn of the century, revolves around a Mexican immigrant (played at Pima by Pablo de la Cruz, a PCC student) who encounters an Irish landlady. Said Villarreal: "I wanted to write a fictional story of what it might be like for a Mexican arriving in Chicago when no one had ever seen one. I chose the theme of healing in terms of nontraditional folk customs...I wanted to explore healing and its relationship to hope: whether it is imagined or real."

Tango Buenos Aires at Rhode Island College

Direct from Argentina, performance group Tango Buenos Aires, in its first coast-to-coast tour of the U.S., appeared at Rhode Island College in February.

The three-part show by the company of 25 dancers and musicians showed tango's roots, richness, and passion as it took the audience from one production number to another as presented through 1905 to the present.

The Argentine tango has a mixture of African and Spanish antecedents, and also a strong influence from the Argentine milonga, which is sung by gaucho the Argentine 'cowboy.'

Texas Honors Kingsville Bilingual Group

Texas A&M University-Kingsville's student organization, the Texas Association of Students in Bilingual Education (TASBE), was honored by the state TASBE organization in February. TASBE president Elsa Montante (pictured, left), a senior bilingual major, received the award.

The Kingsville group, the first bilingual education collegiate organization in the U.S., was established April 11, 1975, by Dr. María E. Morales (right), education professor. The date was chosen to coincide with that of the first Bilingual-Bicultural conference, which was planned, organized, and facilitated by TASBE students and Morales. The conference, still held annually, celebrates its silver anniversary this year.

Miami-Dade Community College Initiates Corzo Scholarship

A new scholarship at Miami-Dade Community College (M-DCC) in Florida will be named after young Cuban engineer Rogelio González Corzo, an anti-Castro leader killed by a firing squad during the time of the conflicts at Playa Girón, Cuba, in the early 1960s.

"This scholarship will bring back the memory of someone who fought vigorously for Cuba's liberty. Corzo's dream of a better world will live on in the students who will now be able to continue their studies because of the scholarship bearing his name," said Sandra González-Levy (pictured here), president of M-DCC Foundation, Inc.

Miami-Dade County commissioner Javier Souto agreed to help raise funds for the yearly scholarship.

News from University of South Florida

• Luis García-Rubio, chairman of the University of South Florida's (USF) Department of Chemical Engineering, has received funding from the National Science Foundation for the fifth consecutive year for USF's Engineering Research Center for Particulate Science and Technology. García Rubio helps students gain scholarships to assist him in conducting research to make drinking water cleaner, house paint safer, and blood problems easier to diagnose.

• A new documentary film, demonstrating the hope and vision of Cuban educators and students about their country and their future, was shown recently at USF. Children Are the Hope of the World—produced by Alicia Rodríguez Bowers and directed by Lázaro Farinas—takes an in-depth look at six Cuban schools.

• In March, a National Institute for Hispanic Library Education conference was held at USF. The conference featured California State University's Isabel Schon, a leading authority on bilingual, bicultural literature.

Arizona Researchers Study Minority Achievement

A University of Arizona research study presented by Arturo González (pictured here) Adela de la Torre, and John A. García says that certain members of the State of Arizona's culturally diverse population are not being prepared to fulfill the state's promising potential for economic growth. The study says that the educational attainment of Arizona's Hispanic, African American, and Native American workers falls far short of the level needed to reap the benefits of Arizona's growing economy.

The study, Minority Student Achievement and Workforce Success in Arizona, provides a wealth of evidence that increasing educational attainment will be crucial to reducing the significant earning disparities between minority workers and those in the majority population.

Loyola Marymount University Hosts Argentinean Activists

Loyola Marymount University (Calif.) recently held a public dialogue with the leaders of the Mothers of Plaza de Mayo (Línea Fundadora), an Argentinean organization.

Human rights activists Nora Cornejo

1099
Margarita Gropper and Olga Marquez de Arredondo came to the university representing women demanding justice for their own children and the 30,000 who “disappeared” at the hands of the military dictatorship that ruled Argentina from 1976 to 1982. The mothers talked about their own cases and the progress they are making.

New York University Presents “Elegant Chaos”

The Asian Pacific American (APA) Studies Institute of New York University presented “Elegant Chaos,” a provocative evening of spoken word and performance, at the Joseph Papp Public Theater in February. The event was a component of the larger “Vestiges of War” project also sponsored by the Institute.

The event featured APA artist-in-residence Jessica Hagedorn’s human drama Dog eaters about searching for love, justice, and identity in the Philippines.

Multimedia artist, cultural critic, and author Guillermo Gomez-Peña presented Borderstasis, a spoken word performance. Having performed nationally, Gomez-Peña has received numerous awards, including a MacArthur Foundation Fellowship and the Prix de la Parole. He is pictured above, right, in “The Mexico/Border Project.”

University of the Incarnate Word Mentors Migrant Worker Students

Students from the University of the Incarnate Word (UIW) in Texas are participating in Project Estrella, which has them acting as Cyber Mentors to migrant secondary students from Texas working in Montana, Illinois, and New York. The migrant students and UIW student-mentors are equipped with laptops, modems, and e-mail addresses enabling contact regardless of where the migrant students work takes them.

UIW is the only university in the country participating in Project Estrella, which will hopefully lessen the impact of the migrant worker lifestyle on the workers’ children and increase the number of migrant students pursuing a postsecondary education.

University of Texas-San Antonio’s Women’s History Week

The University of Texas-San Antonio Center for the Study of Women and Gender chose “Mujeres de chispa/Chispas de mujer: Forging Communities” as the theme of Women’s History Week in March. Several events focused on Latina issues and contributions to their communities.

News from TACHE

Dr. Arturo Madrid and Dr. Michael Olivas won 1998 Texas Association of Chicanos in Higher Education (TACHE) Distinguished Faculty Awards for their academic work and helping to better the Chicano/Latino community.

Irma Rangel, the first Mexican American woman elected to the Texas House of Representatives and the first Mexican American elected as chair of the House Committee on Higher Education, was recognized at the TACHE 24th Annual Conference for her outstanding work as a legislator.

University of Texas at San Antonio Professor Joe L. Martinez, Jr. was named to the National Advisory Committee for the Decade of Behavior which promotes behavioral science research contributions to health, safety, and education.

Since last year, Southwest Texas State University’s Carlos Rodriguez has been enlightening the public as editor-in-chief of the Journal of the Texas Association for Bilingual Education.

San Antonio College’s Rosa Maria Gonzalez won the Chicana Educator Leadership Excellence Award, and Dr. Manuel Berrioza and Dr. Judge Valdez of the University of Texas-San Antonio won Educational Leadership Excellence Awards at a San Antonio TACHE Chapter scholarship fundraiser.

To help minorities, the National Institute of General Medical Sciences has granted St. Mary’s University School of Science, Engineering and Technology up to $17 million for five years.

The Texas Higher Education Coordinating Board has approved a doctor of education degree in educational leadership for the University of Texas-Pan American.

Allan Hancock Athletes Honored

In February, the Western State Conference and Allan Hancock College (Calif.) honored six student athletes from five different Fall 1998 sports for achieving a 3.0 or better GPA while playing a sport and maintaining at least 12 units.

Much of the students’ academic success is attributed to the college’s aggressive athlete retention program, which provides student athletes access to a complete education stress team—full-time counselors, faculty advisors, and a tutored study lab—as well as a series of classes that introduce students to college life and structure.

Some of the honorees included Lisa Ortiz, Alma Reyes, and Alma Rodriguez (pictured here with program coordinator Mardi Osbourne) —women’s soccer; Jorge Avila, Miguel Gamboa, Jesus Gutierrez, and Christian Maza —men’s soccer; Chris Rodriguez —men’s cross country; and Ibanos Brnell, Joseph Ogando, and Jeremy Aranzas —football.
Tejano Legacy: Rancheros and Settlers in South Texas, 1734-1900
by Armando C. Alonzo

This is a path-breaking study of Tejano ranchers and settlers in the Lower Rio Grande Valley from their colonial roots to 1900. The first book to delineate and assess the complexity of Mexican-Anglo interaction in South Texas, it also shows how Tejanos continued to play a leading role in the commercialization of ranching after 1848 and how they maintained a sense of community.

Cuentos de Cuanto Hay: Tales from Spanish New Mexico
by Joe Hayes, ed.

In the summer of 1931, folklorist J. Manuel Espinosa traveled throughout northern New Mexico asking Spanish-speaking residents for "cuentos de cuanto hay," tales of olden times. Espinosa's transcriptions were published in Spanish in 1937. Now storyteller Joe Hayes makes them available once again, in the original Spanish and now for the first time in English translation.

A Wake in Ybor City
by Jose Yglesias

This is the 35th anniversary edition of an American classic by the father of Cuban American literature, Jose Yglesias. Here is a timeless and dramatic portrayal of a proud, close-knit family standing on the brink of a terrible fall. This richly complex, entertaining peek into the workings of Cuban American culture was far ahead of its time when first published.

People and Issues in Latin American History: The Colonial Experience
Lewis Hanke and Jane W. Rauch, eds.

This reader on colonial Latin American history highlights eight important topics debated by historians. In addition to reading of the exploits of Bartolome de Las Casas, Antônio Vieira, Juan Garrido, Francisco de Toledo, Johan Mauritius, Sor Juana de la Cruz, and Alexander von Humboldt, readers will learn of nameless men and women of Spanish, Portuguese, Indian, and African persuasion.

1103
Book Review

By Jorge A. Hernandez, Ph.D.

Gutiérrez incorporates several provocative essays in this book. The authors he includes deal with subjects ranging from the first massive migration of Mexicans to the United States in 1848, the 1920s Anglo-American debate over immigration from south of the border, the Bracero Program, the perspectives of Mexican Americans toward the border, and the problems generated between Mexican parents and their female offspring by acculturation. These subjects generally enthral students especially Mexican Americans, because most of them have never learned them in a systematic manner. To acquaint individuals unfamiliar with this notable work, the following briefly describes several of the essays.

Sister Mary Collete Standart provides an excellent discussion of the Sonoran migration. Beginning with the factors that caused this extensive relocation of Mexicans to California in late 1847, she provides insightful details that reveal the numbers of people involved in the exodus. She also writes of the animosity exhibited by Anglo Americans toward these newcomers, who only a few months earlier had regarded California as part of their nation. As explained by Sister Standart, Sonoran officials strove to halt the massive departure of their constituents by informing them of the problems they would face in the gold fields: to the north severe winters, outrageous prices, a lawless province, and intense Anglo American hatred. Their efforts failed because the problems in the Mexican state—Apache Indians, a cholera epidemic, and economic depression—exceeded those in California. The gold nuggets carried to Sonora in the winter of 1849 proved irresistible.

In another selection, Mark Reuter details the Anglo American perceptions of Mexican immigrants during the 1920s. He maintains that both defenders and opponents of immigration from south of the Rio Grande regarded these newcomers in the same manner, as docile, lazy, and backward Indian peasants. According to Anglo Americans, the passivity of Mexicans stemmed from their childish mentality, and their eagerness to cease working as soon as they saved some money demonstrated their indolence. NATIVISTS, the main adversaries of immigration from south of the border, strove to convince the United States Congress that the presumed defects of those inferior people endangered the country. They indicated that by accepting military wages Mexicans undermined the financial stability of small Anglo American farmers, the backbone of course of American democracy. They also resisted as products of extensive racial intermixing, these wardsy newcomers would interfere willingly with white women, ending forever the possibility of creating a homogeneous society in the United States.

Manuel García y Grosso contributes an outstanding investigation of the Bracero program. He asserts that Mexico held an advantageous position during the first phase of this international labor agreement, a period that extended from 1942 to 1947. Benefiting from a perceived labor shortage during World War II, officials in Mexico City induced their counterparts in the United States to accept several concessions. Braceros crossed the border with a written contract, their Anglo American employers paid their transportation and subsistence costs from the recruitment centers to places of employment, their government reserved the right to deny the importation of workers to areas in the United States that engaged in discriminatory practices, and government agencies in the two nations directed the program. All of these provisions changed after 1947 as officials in Washington endeavored to boost profits for agricultural companies in their country, forcing Mexican sometimes by unilateral action opening the border to illegal immigrants, to accede to several alterations to the original Bracero program.

In yet another essay, Mario I. García analyzes Mexican American attitudes toward the border. He achieves this goal by scrutinizing the ideas expressed in *La Opinión*, *El Espectador*, and *Suf Frenteras*. Started at a time when immigrants formed the majority in numerous Mexican communities across the Southwest, *La Opinión* urged its readers to regard themselves as visitors in the United States. This newspaper exhorted Mexicans to resist adopting Anglo American customs by isolating themselves in their barrios and by creating schools where students focused on learning Spanish and Mexican history and traditions.

*El Espectador*, in contrast, concentrated on the beliefs of the “Mexican-American generation.” Emerging in the 1930s when immigration from south of the border nearly stopped and an increasing number ofbrero residents comprised individuals born in the United States, this faction claimed that many of their countrymen and women never planned to return to their native country. Consequently, contributors to *El Espectador* counseled their readers to acquire prosperity in the United States by assimilating Anglo American customs and by participating in struggles for civil rights.

Finally, Chicanos radicals issued *Suf Frenteras*, in which they demanded political and cultural autonomy. Their objective included detaching the Southwest from the United States, incorporating this region to Mexico, and forging a workers’ state. They also called for the institution of a bilateral program that familiarized Mexicans with the Spanish language and their history and traditions.

Unquestionably, *Between Two Worlds: Mexican Immigrants in the United States* deserves perusal by individuals teaching courses in Mexican American history. The essays constitute important episodes that elucidate the past and that generally fascinate students, especially those of Mexican descent. The authors supply extensive, lucid accounts that enable teachers to discuss these subjects in detail and students to readily grasp the material.

Dr. Hernandez teaches in the Department of Liberal Arts at Sul Ross State University in Eagle Pass, Texas.

The University of Michigan

Walden University celebrates its diversity

Walden University is proud to rank among the nation's leaders in graduate degrees awarded to minority students. In a competitive ranking that included top U.S. research universities, Walden came out a winner. Our students represent one of the country's most culturally diverse learning communities.

In a national comparison for awarding doctoral degrees, Walden ranked:
- 2nd for Health Profession Ph.D.s to African Americans
- 5th for Social Science Ph.D.s to Hispanic Americans
- 8th for Total Ph.D.s to African Americans
- 9th for Education Ph.D.s to African Americans
- 27th for Total Ph.D.s to Hispanic Americans
- 37th for Total Ph.D.s to All Minorities

We count our diversity among the university's many assets - along with our commitment to making quality higher education accessible to working adults. And we make it a goal to foster the personal and professional development of minority students.

Walden University offers distance-delivered doctoral degrees in Management, Education, Psychology, Health Services and Human Services. On-line master's degrees are offered in Education and Psychology. Through innovative learning models and advanced technology, we make it possible for busy professionals to earn graduate degrees without interrupting career and family commitments.

George Mason University

INSTITUTE FOR COMPUTATIONAL SCIENCES AND INFORMATICS
ASSISTANT RESEARCH SCIENTIST/RESEARCH SCIENTIST

The Center for Earth Observing and Space Research, Institute for Computational Sciences and Informatics, George Mason University, Fairfax, Virginia. The Center for Earth Observing and Space Research (CEOISR) at George Mason University, Fairfax, Virginia has an immediate opening for the position of Assistant Research Scientist or Research Scientist to support the Seasonal-Interannual Earth Science Information Partnership (SIESIP). The level of appointment will be commensurate with the applicant's experience and the salary will be in the range of $40,000 to $60,000. The objective of the SIESIP is to develop, implement, and operate a distributed data and information system that will address the research and application needs of the Seasonal-Interannual Research community. http://www.siesip.gmu.edu. The successful applicant will solicit requirements and feedback from the science and application users, develop data sets and access tools, and promote user input to the design, development, and implementation of the SIESIP system. The applicant should be familiar with:

(a) data analysis and access tools, such as IDL, GIADS
(b) large scale earth information systems and databases
(c) data formats such as HDF
(d) programming skill, particularly in Fortran, C, or HTML
(e) an MS or higher degree in engineering or sciences, and
(f) good oral and written communication skills.

The position will be located in the GMU Fairfax or Goddard Space Flight Center, Greenbelt or both. Immediate hiring is desired. Review of applications will begin on April 30, 1999. Please send resume and salary requirements to Professor Menas Katatso

Women and minorities are encouraged to apply.
TECHAS A&M UNIVERSITY
CORPUS CHRISTI

VICE PRESIDENT FOR INSTITUTIONAL ADVANCEMENT

Applications and nominations are invited for the position of Vice President for Institutional Advancement at Texas A&M University-Corpus Christi. The warm waters of Corpus Christi Bay surround the University located on a 240-acre island campus just 8 miles from downtown Corpus Christi, Texas, one of the fastest growing universities in Texas. A&M-Corpus Christi's modern facilities include over $120 million in construction within the past five years. The University's growing academic curriculum is divided among four colleges: Arts and Humanities, Business, Education, and Science and Technology. The university offers bachelor, masters and doctoral degree programs in addition to numerous teacher certification and continuing education programs. Given its location as an international port city with a free trade zone status, Corpus Christi and its University are working together in a dynamic environment to launch the Coastal Bend area into the next century as a major economic force in North America. For additional information, please visit our website (www.tamucc.edu).

Reporting to the President and serving on the President’s Cabinet, the Vice President for Institutional Advancement is responsible for designing and implementing all fund-raising programs, overseeing annual and capital campaigns and supervising the operation of all public affairs and publications programs, including the production of materials for the University. The Vice President for Institutional Advancement is expected to build the University’s relationship with all groups that have the potential to support Texas A&M University-Corpus Christi. These constituencies range from faculty and staff to the general public, the media, and the corporate community, the alumni, donors and volunteers. Extensive travel is required.

The successful candidate will have a strong record of successful accomplishment and experience in the following areas:

- Managing capital campaign annual giving planned giving programs and major gift solicitations
- Utilizing various advancement information systems
- Supporting activities related to major gift planning, including those related to advertising, public relations, direct mail, market research, special events and publications
- Maintaining high ethical standards

Strong organizational, communication, supervisory and interpersonal skills are essential. A master's degree with at least five years of demonstrated success in development in a higher education environment is required. Experience interacting with national foundations and corporations is preferred. Intercollegiate athletics fund raising experience would also be a plus.

To ensure full consideration, applicants are encouraged to submit materials prior to May 17th. Applications and nominations will be accepted until the position is filled. It is hoped that the successful applicant will assume this position on or about September 1, 1999. Applications should include a letter of interest, resume and three references. Nominations are encouraged. Send inquiries to:

TAS A&M UNIVERSITY—CORPUS CHRISTI IS AN EQUAL OPPORTUNITY EMPLOYER COMMITTED TO DIVERSITY.
DIRECTOR
Intercollegiate Athletics

Montclair State University is seeking a dynamic and experienced administrator to lead its 23 sport NCAA Division III intercollegiate athletics program. The new director will be expected to lead the University’s athletics program to new levels of experience and spearhead efforts to update its athletic facilities, while contributing toward the enhancement of student development and the improvement of campus life.

Responsibilities include administering the Department’s $2 million budget, fund-raising and marketing initiatives, personnel, fiscal and facilities management, maintaining strong relations with students, faculty, administrators, alumni, media, and the public. The director will be expected to maintain strict adherence to NCAA and Title IX regulations in a context of academic and athletic excellence, and will be actively involved in the formulation and implementation of institutional, conference and national association policies and rules.

Qualifications: Candidates must possess a Master’s degree in a related field and significant athletic administrative experience in higher education with at least two years experience in personnel and fiscal management. Preference will be given to candidates with demonstrated skills in fund-raising, communication, and development and implementation of strategic plans. A commitment to gender equality is essential.

Salary Range: $55,000 to $64,000
Starting Date: August 1, 2016

Apply by: Submit a letter of application, complete resume, and names and telephone numbers of four references by May 15, 2016.

Send letter and resume to: Chair Search Committee Office of Institutional Advancement Montclair State University Box C116
3600 Laverne Avenue, Upper Montclair, NJ 07043

An Equal Opportunity/Affirmative Action Institution
Announcement of Position Vacancies

Three Positions: Two Assistant or Associate Professors of English and one Instructor or Assistant Professor of English Journalism

Description: First, the two nine-month, tenure-track positions in English will carry the rank of assistant or associate professor. The primary duty is teaching 15 hours each semester of composition, with some opportunities to teach survey courses in literature. These professors will also be responsible for academic advising, committee service, and special projects related to division and college goals.

The other position, for English Journalism, is also tenure track and will carry the rank of instructor or assistant professor. Duties include advising ABAC’s award-winning student newspaper, The Stallion, teaching introductory courses for journalism majors, and teaching two and three sections of composition each semester.

Qualifications: For the English positions, Ph D in English or rhetoric composition required. Instructional experience and desire to teach composition in a two-year college with a dynamic freshman-year writing program is a plus. For the English Journalism position, a MA in English and experience or training in newspaper production is required.

Salary: $32,000 to $35,000, depending on qualifications and experience.

Closing Date: May 3, 1999

Employment Date: August 1, 1999

Location: Abraham Baldwin Agricultural College, a residential college located on 390 acres in Tifton, Georgia, offers 53 different majors, including 31 college transfer programs and 22 career technology majors. The student body of approximately 2,500 is taught by a faculty of 101. Tifton is an attractive community known for its quality of life.

A Complete Application: A letter of application addressing the above responsibilities and qualifications, unofficial transcripts, resume, and names, addresses, telephone numbers, and e-mail addresses of three references should be sent to:

Dr. Oscar Patton
Abraham Baldwin Agricultural College
ABAC 20, 2802 Moore Highways
Tifton, Georgia 31794
Phone: 912-386-3091

The Managing Director will provide strategic and tactical Human Resource leadership for the employees and administration of the College. Masters degree required in Industrial Relations, Business Administration, HR, or related field. Five years senior level HR management policy-making experience required, higher education experience preferred. Must have demonstrated skills in collective bargaining, contract administration, plus working knowledge of relevant laws and regulations, skills in advising, counseling, and conflict resolution. Must also have a proven record of implementing and maintaining organizational diversity. Salary commensurate with experience. Interested send resume by May 10 to

Peg Gorman
Director of Human Resources
Elgin Community College
1700 Spartan Drive
Elgin, IL 60123

BAYLOR
DIRECTOR
OFFICE OF HUMAN RELATIONS

Be responsible for developing, implementing, and coordinating programs for the purpose of fulfilling the University’s diverse missions, providing support services for quality students, faculty, and staff, while promoting academic excellence, and promoting cultural awareness among all student, faculty, staff, and the Waco community. Masters degree in Sociology, Counseling, Multicultural Studies, Administration, Student Personnel, or a related field and 3 years of related experience strongly preferred.

To apply, submit letter of application, resume, and Salary History to Personnel Services, Baylor University, R.O. Box 79783, Waco, TX 76798-7833

Salary will be commensurate with experience and qualifications. Application will be accepted until position is filled. See Available Positions and Administration at www.baylor.edu.

Baylor is an Equal Opportunity/Affirmative Action Employer. Individuals with disabilities to apply.
The Roosevelt University College of Education is seeking nominations and applications for two positions in the Department of Educational Administration and Supervision.

We are looking for educational leaders who can make a significant contribution to a doctoral program that serves educators in a large metropolitan area. Applicants should provide a cover letter which describes research, teaching, and administrative experience, a curriculum vitae, and a list of three references (complete with addresses and phone numbers). We will request letters of recommendation to be sent directly to Roosevelt for a small number of applicants.

All appointments are made pending Board of Trustees approval. Positions require teaching at both the Downtown and Schaumburg campuses. Salary will be determined on the basis of qualifications, including experience. Applications will be reviewed beginning on April 30, 1999. The positions will remain open until filled.

The College is committed to hiring individuals who demonstrate a significant interest in urban and suburban issues related to equity and social justice. We seek faculty who values diversity, critical thinking, and innovation. AA/EEO. This is a redetermination, those who have already applied need not reapply.

Associate or Full Professor, Chair of the Ed.D Program

We are looking for a candidate with a record of publications that matches the emphasis of the Roosevelt University College of Education on transformational leadership and the development of partnerships with schools and school superintendents. Experience in public school administration is preferred.

Responsibilities include administration of the Ed.D Program, including program promotion and continued program development. Teaching graduate level administration courses is required.

Applicants must include an earned doctorate in Educational Administration or a closely related field, experience in public school administration, university teaching in a doctoral program in educational administration, supervision of doctoral dissertations; evidence of administrative leadership, record of research, record of sustained scholarship consistent with the position of associate or full professor, evidence of excellence in teaching. Experience in public school administration is preferred.

Visiting Assistant or Associate Professor

We are looking for an educator with extensive leadership experience in public education. The position is currently a tenure-track position, but a multi-year contract can be negotiated. Responsibilities include teaching of graduate courses at the MA and Ed.D levels, course development, and course evaluations. Establishing and maintaining contact with schools and school districts is required.

Computer and Network Systems Administration

We are seeking a highly motivated and motivated individual to help develop and teach in a new program that will train students in computer and network systems administration. Experience in computer administration at an NSL environment is required. Teaching experience and professional certification in related areas (MCSE, MCNE payment) is preferred. The successful candidate must possess hardware and software administration and an understanding of network administration.

DIRECTOR OF INFORMATION TECHNOLOGY/CHIEF INFORMATION OFFICER

Founded in 1848, the University of Wisconsin-Madison is one of the largest land-grant universities in the United States. The university has approximately 2,000 faculty, 5,300 professional and administrative staff, 5,000 classified employees, over 40,000 students, and a budget of more than $1.25 billion.

The Director of the Division of Information Technology (DoIT), reporting directly to the provost, leads the university in developing and carrying out strategic plans for information technology applied to instruction, research, and administration; manages central information technology services at the university; and represents the university with industry, government, the UW System, and other academic institutions. The position is a leadership position in the Division of Information Technology and is responsible for providing leadership in the coordination, development, and use of information technology to support and enhance the university's instructional, research, public service, and outreach activities within a decentralized and diverse academic environment.

The position will be available after 1 July 1999. Applications and nominations must be received by 21 May 1999 to ensure consideration. Later applications and nominations may also be considered. The search committee particularly encourages applications and nominations of women and persons of underrepresented groups. Applicants should include a current resume and cover letter that addresses how their strengths match the qualifications for the position, and what they see as challenges and opportunities of the position, as well as the names and addresses of five references. Candidates will be informed before references are contacted. Please note that under Wisconsin statutes the names of nominees and applicants who explicitly request confidentiality will not be made public. However, the university is required to release the names of the finalists who will be interviewed by the chancellor and the provost. Submit applications and nominations to:

Professor Gregory A. Moses, Chair
Search and Screen Committee for the
Director of Information Technology
University of Wisconsin-Madison
500 Lincoln Drive, 133 Bascom Hall
Madison, WI 53706
(608) 262-9337
Fax: (608) 262-5728

The University of Wisconsin-Madison is an Equal Opportunity Employer.

Wharton
Lecturer

The Graduate Division of the Wharton School invites applications for faculty positions in the Management Department to serve as faculty in the Leadership Program for the Fall 1999 semester. The successful candidates will be responsible for developing and teaching courses in leadership within the graduate curriculum and for related administrative responsibilities, initiating and participating in course planning and development, advising professional staff, supervising graduate fellows, possibly teaching in undergraduate, and other MBA and Executive Education Programs. It is expected that the Leadership Program faculty would be interesting in working with their colleagues on conducting R&D activities related to the teaching objectives of the Leadership Program (e.g., on methods of skill assessment) and on generating new teaching materials (e.g., instructional cases and videos).

Please submit a letter of application, a resume, and three letters of recommendations by May 15th to:

Dr. Stewart Friedman, Director
Wharton Leadership Program
3723 Spruce Street
318 Vanse Hall
Philadelphia, PA 19104-6358

ITHACA COLLEGE
DIRECTOR OF MULTICULTURAL AFFAIRS

ITHACA College is committed to a multicultural and diverse campus environment and invites applications and nominations for the position of Director of Multicultural Affairs. The successful candidate will provide academic leadership and direction in creating and maintaining a campus environment conducive to racial and cultural diversity. This position reports to the Assistant Provost-Special Programs in the Academic Affairs Division.

The Office of Multicultural Affairs has a primary responsibility to students who identify as African-American, Latino, Asian-American or Native American (ALANA) and will work with all students to promote understanding and cooperation.

The director will work cooperatively with the campus community to establish and evaluate campus-wide multicultural efforts and to increase awareness. As an advocate for ALANA students, the director will serve as a catalyst for actions which enhance student retention and will interact cooperatively with the Office of Opportunity Programs and with the Division of Student Affairs.

A bachelors degree and significant experience are required. An advanced terminal degree in student personnel administration, counseling, ethnic studies, or other related field is preferred. Demonstrated success in multicultural initiatives and special programs is required. The successful candidate will have excellent administrative, interpersonal, counseling, and organizational skills with significant experience in the college setting.

ITHACA College has an enrollment of approximately 5,800 and is located in the beautiful Finger Lakes region of New York State. Ithaca College is an undergraduate comprehensive residential college consisting of liberal arts and professional schools and is one of several higher education institutions in the Ithaca area.

Review of applications will begin on November 15, 1989. The search will remain open until the position is filled.

ITHACA College is an Affirmative Action/Equal Opportunity Employer. Members of underrepresented groups (including people of color, persons with disabilities, Vietnam veterans and women) are encouraged to apply.

Applications should be sent to:
Dr. N. Saunders
Assistant Provost-Special Programs
312 Danby Road

Virginia Tech
Director of Institution Research and Planning Analys

Virginia Tech seeks an experienced professional to fill the position of Director of Institutional Research and Planning Analysis. The office of Institutional Research and Planning Analyses (IRPA) serves as the central source for information on institutional research and planning. The position is to be filled by a strong individual with a proven track record of success in conducting and disseminating research and analysis, and in managing the office to ensure that institutional research and planning needs are met. The Director reports to the Associate Provost for Academic Planning and Space.

The Director will be responsible for:
- Developing and implementing a comprehensive institutional research and planning program.
- Managing a staff of professionals to conduct research and analysis.
- Developing and disseminating information to support strategic planning and decision making.
- Coordinating the collection, analysis, and reporting of institutional data.
- Representing the office in the university community and in external forums.

Applicants should have a strong background in institutional research and planning, with a demonstrated ability to conduct research and analysis, and to present findings in a clear and comprehensible manner. A Ph.D. in a relevant field is required.

Applications will be accepted until the position is filled.Virginia Tech has a strong commitment to the principle of diversity and, in that spirit, seeks a broad spectrum of candidates including women, minorities, and people with disabilities.

Individuals with disabilities desiring accommodations in the application process should notify Kathy Welle at (540) 231-6996, and TTY number, (800) 828-1120 by the application deadline.
Lesley College, a private institution located in Cambridge, Massachusetts that specializes in preparing professionals in the fields of education, applied social sciences, the arts and management, invites applications for positions in these areas:

CREATIVE ARTS IN LEARNING DIVISION
An interdisciplinary master's degree program, the Creative Arts in Learning Program integrates music, visual arts, drama, dance, storytelling, poetry and technology into a variety of learning environments ranging from classrooms and museums to community programs.

For the following two positions, candidates must have a Ph.D. or Ed.D., experience in graduate-level teaching, K-12 classroom work and/or teacher training, and personal involvement in creative/artistic work. Candidates must also have a record of applied research or artistic scholarship.

DIVISION DIRECTOR
The position of Division Director is a full-time faculty position available at the Associate or Full Professor rank. We seek candidates who possess the ability to assume an academic leadership role, which includes program development, the skill to supervise and work collaboratively with faculty and staff, and administrative experience in planning, budgeting and marketing.

FACULTY POSITION
This is a full-time, 12-month position at the Assistant or Associate Professor rank. For the above two positions, send your letter of interest, CV and three references to Kimberly Goff-Crews, Associate Dean, Creative Arts in Learning Search Committee.

EXPRESSIVE THERAPIES DIVISION
The Expressive Therapies Division prepares professionals to integrate the modalities of dance, music and art, and intermodal expressive therapies.

FACULTY/ACADEMIC COORDINATOR OF INTERNATIONAL PROGRAMS
The position is a half-time, 12-month faculty position at the Assistant or Associate Professor rank. The Coordinator will be responsible for planning and implementing the Israeli Extension academic programs on campus for international students including ongoing student advising. The skill to supervise and work collaboratively with faculty, staff and other educational institutions is necessary. The job entails some travel abroad.

Candidates must have a doctorate and be state-licensed in one of the allied mental health fields. Graduate teaching experience and clinical practice with diverse populations is expected. Personal involvement in creative/artistic work is also required. Candidates must have a record of research or artistic scholarship. Expressive Therapists who are credentialed/certified in dance or art/expressive therapies are strongly preferred.

Send your letter of application, CV, portfolio and three letters of reference to Julia Byers, Division Director, Expressive Therapies Division. Lesley College, 29 Everett Street, Cambridge, MA 02138. Visit our website: http://www.lesley.edu

OFFICE OF HUMAN RESOURCES

DIRECTOR

Grinnell College has reopened its search and invites applications and nominations for the position of Director of Human Resources. Reporting to the newly created position of Dean of College Services, the Director is responsible for the effective leadership, planning, and administration of the following areas: non-faculty recruitment, staff training and development, compensation and classification, employee relations, human resources information systems, and other administrative and planning duties related to the College's human resources functions.

Required Qualifications: include a bachelor's degree and progressively responsible human resource or analogous experience as a member of an administrative team. The position requires strong written and oral communication and presentation skills. A strong service orientation, the ability to collaborate effectively with diverse constituencies and a commitment to excellence in education for students in the sciences is essential. A thorough knowledge of applicable federal and state regulations is expected. Collective bargaining experience is preferred.

Fourth in 1862, Grinnell College enrolls about 1,300 undergraduate students from every state and the District of Columbia in the United States and 40 other countries. The College's primary mission is to provide students with a broad, deep, and integrated education that includes professional success, but also personal growth and social responsibility. Grinnell College offers an exceptional comprehensive and opportunity-rich educational experience that has its heart on one interaction between students, faculty, and staff. Grinnell College is consistently ranked among the top ten selective liberal arts colleges in the United States and among the best values in college and university endowment resources per student. Additional information can be found at the College's website www.grinnell.edu.

Application Process: Submit a letter of application and resume, including a list of the names, addresses, telephone numbers and e-mail addresses of three employment references to Russell K. Osgood, President, Grinnell College, P.O. Box 805, Grinnell, IA 50112-0805. Applications will be reviewed upon receipt and will continue until the position is filled. To be assured of consideration, applications should reach the President by May 21, 1999.

Grinnell College

Grinnell College is an equal opportunity employer committed to employing a diverse and staff that reflects the diversity of our student body and the communities we serve and we strongly encourage applications from individuals on the basis of race, national origin, ethnicity, gender, sexual orientation, disability, and age.
HUNTER COLLEGE
OF THE CITY UNIVERSITY OF NEW YORK

DIRECTOR OF THE OFFICE OF INSTRUCTIONAL AND INFORMATION TECHNOLOGY HEQ

DUTIES: The Director of the Office of Instructional Computing and Information Technology (OICIT) is responsible for all computing operations and services as well as audio/visual services, voice and data telecommunications. The Director is responsible for overall technology planning for Hunter College, academic and instructional computing; administrative computing, including registration, admissions and financial aid systems; directing hardware and software acquisition and infrastructure support, including internet and clients server computing. The Director guides staff and faculty development; faculty, staff, and student educational programs; coordinates and supports new technologies such as multi-media, distance learning and web based instruction. The Director reports to the Provost.

QUALIFICATIONS: This individual must have a minimum of 8 years experience in computing, preferably in a college or university context, with at least 5 years experience in a management capacity of increasing responsibility. He or she must have strong leadership skills, including planning, budgeting, staff development and team building. A commitment to service collaborative problem solving, and the ability to communicate and work effectively with staff, faculty and students are critical. The successful candidate will have strong leadership and management skills and a deep understanding of all facets of computing in a university environment. A Bachelor's degree is required, a graduate degree in a related field preferred.

TEXAS WOMAN'S UNIVERSITY

PRESIDENT

The Board of Regents for Texas Woman's University seeks applications and nominations for the position of President. Founded in 1901, Texas Woman's University is a comprehensive public university emphasizing the liberal arts, health professions, and specialized professional studies. The nation's largest university primarily for women, it has a main campus in Denton and clinical centers in Dallas and Houston for upper level and graduate studies in the allied health fields. TWU has eight schools and colleges and offers nearly 190 majors leading to bachelor's, masters and doctoral degrees. With an enrollment of more than 9,300 and a full-time faculty of almost 700, the university approaches its centennial with a renewed sense of commitment to innovative and distinctive education. The President must be committed to sustaining the mission of Texas Woman's University and will bring to the position a record of significant accomplishments and demonstrated leadership. The President is expected to have:

- Ability to expand and implement a strategic plan that encompasses a wide range of opportunities for the university's second century
- Ability to communicate persuasively the university's distinctive mission and achievements to diverse groups including alumni, donors, students, faculty, staff and the media in an effort to encourage and sustain support
- Ability to lead the university with a collegial structure in concert with all members of the university family
- Ability to recruit and motivate executive faculty, staff and administrators and to create an administration that supports collaborative decision making
- Record of successful tenure-level administrative achievement with evidence of experience in planning, fiscal management and fund raising

CARLETON COLLEGE
NOTICE OF THREE POSITION OPENINGS
ADMISSIONS OFFICE
Nominations and Applications Invited

Carleton College is a highly selective, private, liberal arts college with a long and distinguished history. The college seeks to attract students who are leaders in their fields and who are committed to excellence in scholarship and service. The college offers a wide range of undergraduate programs in the arts, sciences, and social sciences. The college is located in northern Minnesota and is home to the Carleton College School of Business and the Carleton College School of Nursing. The college has a strong commitment to diversity and inclusion and is dedicated to providing equal opportunities for all members of the community. The college is accredited by the Middle States Commission on Higher Education.

ASSOCIATE DEAN OF ADMISSIONS AND COORDINATOR OF PREMIUM FINANCIAL AID
Carleton College seeks an associate dean of admissions and coordinator of premium financial aid. This position is responsible for overseeing all aspects of premium financial aid and the admissions process. The associate dean will be the primary advisor to the financial aid staff and will be responsible for managing the financial aid process and ensuring that all students receive the assistance they need to succeed academically.

QUALIFICATIONS:
- A minimum of a bachelor's degree is required. An advanced degree or equivalent experience is preferred.
- A minimum of 5 years of experience in financial aid or a related field is required.
- Strong leadership skills and the ability to manage a team effectively are essential.
- Strong interpersonal and communication skills are essential.
- Strong attention to detail and the ability to work independently are essential.

ASSISTANT ASSOCIATE DEAN OF ADMISSIONS
Carleton College seeks an assistant associate dean of admissions. The position is responsible for overseeing the admissions process and ensuring that all students receive the assistance they need to succeed academically.

QUALIFICATIONS:
- A minimum of a bachelor's degree is required. An advanced degree or equivalent experience is preferred.
- A minimum of 5 years of experience in admissions or a related field is required.
- Strong leadership skills and the ability to manage a team effectively are essential.
- Strong interpersonal and communication skills are essential.
- Strong attention to detail and the ability to work independently are essential.

ADMISSIONS COUNSELOR
Carleton College seeks an admissions counselor to assist in the recruitment and selection of new students. The position is responsible for working with high school students and their families to ensure that they understand the admission process and are able to make informed decisions.

QUALIFICATIONS:
- A minimum of a bachelor's degree is required. An advanced degree or equivalent experience is preferred.
- A minimum of 5 years of experience in admissions or a related field is required.
- Strong leadership skills and the ability to manage a team effectively are essential.
- Strong interpersonal and communication skills are essential.
- Strong attention to detail and the ability to work independently are essential.

DEAN OF COLLEGE SERVICES
Reports to the President of the College and oversees the operations of the College Bookstore, Office of Human Resources, Office of Security, Campus Mail Services, and the Service Bureau (copying operation). It is the responsibility of the dean to ensure that the areas of oversight are managed effectively and efficiently. The dean is responsible for managing the financial operations of the areas of oversight and ensuring that the services provided are of high quality.

QUALIFICATIONS: A minimum of a bachelor's degree is required. An advanced degree or equivalent experience is preferred. A minimum of 5 years of experience in financial management or a related field is required. Strong leadership skills and the ability to manage a team effectively are essential. Strong interpersonal and communication skills are essential. Strong attention to detail and the ability to work independently are essential.
Vice President
Finance and College Resources

Serves as the College’s chief business, financial, facilities, and human resources officer and is the President’s principal advisor concerning financial and business operations of the College. Responsibilities include overseeing management of Business Office and Human Resources Office operations, management and maintenance of College facilities, budget formulation and control, the College Bookstore, purchasing and risk management, and other related functions. Requires a graduate degree in finance/accounting or business OR Bachelor’s degree plus a CPA. Five years of administrative experience in business management, including facilities and human resource management, experience as chief financial officer in education preferred; demonstrated knowledge of policies/regulations in public financing, knowledge of and commitment to the mission of a comprehensive community college; understanding of and appreciation for a collaborative work environment that values shared governance and collegiality, commitment to faculty and staff diversity; the demonstrated ability to work effectively with a racially and culturally diverse faculty, staff, and student body; and the ability to plan and implement the following: a total system for financial, facilities, and human resources planning and management, current and accurate systems for recordkeeping of the College’s business functions; and a comprehensive operation that maintains liaison with all areas within the College and with appropriate State and Federal agencies, school districts and other educational institutions. Review of applications is expected to begin on April 26, 1999. Submit letter of interest, unofficial transcripts, and resume to the Office of Human Resources, Harrisburg Area Community College, PIN 102, One HACC Drive, Harrisburg, PA 17110

Cazenovia College

COMMUNITY COORDINATOR
Office of Residence Life

Cazenovia College, a two and four-year college for men and women located in a beautiful central New York village 20 miles southeast of the city of Syracuse, seeks energetic, committed professionals to further the development of its innovative residence life community development program. The Community Coordinator is a member of the Student Services team and is primarily responsible for the day to day operations of a residential community of approximately 130 students. Specific duties include supervision of undergraduate Community Advisor staff, advising individuals and student groups, community development, social and educational programming, enforcement of community rules and regulations, appropriate referrals and advisement responsibilities as assigned.

Each Community Coordinator will assume responsibility for the coordination of one or more of the following areas as advisor assignments serving as Coordinator of Multicultural Education, Health Education, Judicial Disciplinary Education, Summer Conferences and Adviser to Student Clubs and Organizations such as the Yearbook, Student Government Association and Residence Hall Association.

Head and Assistant Coaching responsibilities in a variety of NCAA Division III programs are also a possibility for the right candidate as is the possibility of teaching in our Freshman Focus program.

Community Coordinators also serve as part of the on-call duty rotation and participate in an inclusive governance model.

This is a twelve-month, live-in administrative staff position. At least two years of related experience on the undergraduate or post-graduate level is required.

A Master’s degree in a related field is preferred. Candidates must be able to demonstrate superior communication and programming skills.

Experience with multi-cultural populations and the ability to work well with students, staff and faculty is expected. Excellent written, oral, and interpersonal skills are required.

Compensation includes a furnished one-bedroom apartment, meal plan when classes are in session, a full benefits package and a base salary of $24,000.

Candidates should forward a letter of application, resume and the names and telephone numbers of three references to:

COMMUNITY COORDINATOR SEARCH
Cazenovia College
Human Resources Office
10 Seminary Street
Cazenovia, New York 13035

Applications will be accepted until the positions are filled; however those received prior to April 30, 1999 will be given priority.
OFFICE OF PUBLIC RELATIONS

Grinnell College is seeking to fill three positions in the Office of Public Relations. Each position reports to the Director of Public Relations. We seek individuals interested in working collaboratively with a team of professionals in an intense, egalitarian, diverse, and student-focused environment. Familiarity with and commitment to a private, residential, undergraduate liberal arts education and learning environment is strongly preferred.

PROMOTIONAL WRITER

Responsibilities: Write, edit, and coordinate the development of a variety of publications, including brochures, newsletters, programs, etc. This position will function as the "senior account manager" of projects for all campus clients - most frequently Academic Programs, the Office of Admission, the Office of Alumni Relations and Development, and the art gallery in the new Buckbaum Center for the Arts.

Qualifications, Skills, and Abilities: Bachelor's degree and five years of writing/editing experience for persuasive and promotional material. Proficient written, verbal, interpersonal, organizational, and time-management skills. Capacity to think broadly and creatively, coordinate multiple tasks, solve problems, and complete projects effectively under pressure and tight deadlines.

ONLINE MEDIA AND WEB COORDINATOR

Responsibilities: Coordinates the electronic media and marketing presence of Grinnell College, including the World Wide Web, internet-based direct marketing, CD-ROM, and other digital media. Maintains a high-quality graphic and rhetorical presentation consistent with the college's institutional identity in other media. Coordinates the production and maintenance of electronic media projects relating to the external image and market presence of the college, especially the college's official web site. Interacts often and collaboratively with multiple campus administrative offices, faculty, and students. This is a new position, so the appointee will have some latitude to shape its vision and configuration.

Qualifications, Skills, and Abilities: Bachelor's degree, three years of applicable experience, and demonstrable skills in technical and graphic design. Advanced working knowledge of HTML, Web browsers, PC/Macintosh, and related design/production software including PageMaker and/or QuarkXPress, Photoshop, PageMill, Illustrator, and other HTML editors. Experience with Unix, CGI programming, and Java useful. Excellent skills in graphic design and presentation, excellent written and oral communication skills, fluency in web site architecture. Thorough understanding of photographic imaging. Capacity to think broadly and creatively as a problem solver. Ability to work well independently and in a team environment with a variety of people.

PRESS RELATIONS SPECIALIST/DIRECTOR/COORDINATOR

Responsibilities: Plans, organizes, and manages a comprehensive media relations program; serves as the primary contact with local and state media; assists the director with regional and national media coverage.

Qualifications, Skills, and Abilities: Requires a Bachelor's degree and five years of public/media relations experience, preferably in higher education. Excellent oral, written, and interpersonal communications skills. Capacity to think broadly and creatively, coordinate multiple tasks, and solve problems demonstrated ability to think clearly under deadline pressure; understanding of and familiarity with the news media, a record of positive story placements. Must be energetic, enthusiastic, and persuasive.

Founded in 1846, Grinnell College enrolls about 1,300 undergraduate students from every state and the District of Columbia in the United States and 40 other countries. The College's primary mission is to provide students with a broad, deep, and life-enhancing education that includes professional success, but also personal growth and social responsibility. Grinnell College offers an exceptional, rigorous, comprehensive, and opportunity-rich educational experience which has, at its heart, one-on-one interactions between students, faculty, alumni, and staff. Grinnell College is consistently ranked among the top one percent of all colleges and universities in endowment resources per student, the top twenty in alumni gifts per student. Additional information can be found at the college's web site <www.grinnell.edu>.

Application Process: Submit a letter of application and a resume, including a list of the names, addresses, telephone numbers, and e-mail addresses of three employment references to: Ms. Jan A. Veatch, Office of Human Resources, Grinnell College, P.O. Box 805, Grinnell, IA 50112. Applications will be reviewed upon receipt; and will continue until the position is filled. To be assured of consideration please file an application by May 7, 1999.

Grinnell College is an equal opportunity/affirmative action employer committed to employing a highly qualified staff which reflects the diversity of the nation. No applicant shall be discriminated against on the basis of race, national origin, religion, color, age, gender, sexual orientation, marital status, "handicapped" or "disabled."

**Walden University**

155 Fifth Avenue South
Minneapolis, MN 55401

**MBA PROGRAM Core Faculty Positions Available Summer 1999**

Walden University, a leader since 1970 in distance graduate education, seeks qualified individuals for appointment as core faculty for a new MBA program which anticipates enrolling its first students in September 2000. These positions are for part-time independent contractors and allow individuals to work through online and distance communication from their present locations. Core faculty will participate in developing syllabi and other course materials during the first year of their appointments. Then, beginning with the first student enrollments, they will teach the courses they have prepared.

We anticipate appointing a core faculty members with each person working to prepare and potentially teach, one of the following courses:

- **MBA 6100 Management Practices**
- **MBA 6105 Organizational Behavior**
- **MBA 6110 Management Information Systems**
- **MBA 6120 Business Statistics**
- **MBA 6130 Principles of Marketing**
- **MBA 6140 Managerial Accounting**
- **MBA 6150 Managerial Economics**
- **MBA 6160 Managerial Financial Management**
- **MBA 6170 Global Management**
- **MBA 6180 Legal and Ethical Issues for Managers**
- **MBA 6190 Strategic Management and Planning (Capstone)**

Among Walden's current enrollment of more than 1,500 students, 55% are female and 55% come from under-represented populations. Our mission is to prepare scholar-practitioners who are effective agents of change in their fields, professions, and communities. As a virtual university, Walden uses a unique distance-learning model to deliver graduate programs to working professionals through ongoing electronic networking with faculty and library access provided through a partnership with Indiana University-Bloomington. Walden University is accredited by the North Central Association of Colleges and Schools and is an equal opportunity employer. Women and individuals from under-represented groups are encouraged to apply.

**Qualifications:** Candidates must hold an earned doctorate, have at least three years teaching experience in a graduate business program and/or a business management position; have experience in preparing course manuals and/or syllabi; be comfortable and effective in the electronic environment have outstanding communication skills, demonstrate the highest levels of academic integrity and be strongly student-centered. Preference will be given to candidates with experience in management, adult learning, distance education and/or instructional technologies. To be considered for a position at Walden University, applicants who are primarily affiliated with another institution must retain all appropriate approvals from that institution and be in compliance with its conflict of commitment interest policies.

Please send a letter of application and current curriculum vitae to Mr. John Allen at Walden University, 155 Fifth Avenue South, Minneapolis, MN 55401 or email applications to jallen@waldenu.edu.

- Experience with college admission study abroad work-study.
- Experience with college admission study abroad study tours.
- Experience with college admission study abroad study abroad programs.
EDUCATIONAL PROSPECTS FOR LATINOS POST-AFFIRMATIVE ACTION

Education has been and will continue to be the key to equal opportunity. Higher education has offered Latinos the license to pursue rewarding professional careers that enable us to give back to our families and communities. It has meant individual and collective political and economic empowerment. It has prepared Latinos with the knowledge and leadership skills necessary in our struggles for social justice.

Latinos have historically struggled for a better education for our children. Men and women of my generation of the 1960s created the Chicano and Boricua movements, which made possible significant changes in education—desegregation of the schools, bilingual programs, the hiring of Latino teachers and staff, and the inclusion of the Latino experience in the curriculum.

They opened the university doors to Mexican-American, Puerto Rican, and other Latino youth traditionally and systematically excluded. Those movements produced affirmative action for all Latinos just as the civil rights movement had for African Americans.

The result! Since the 1960s, we have witnessed the emergence of a visible Latino professional and middle-class Latino America remains largely absent from corporate upper management. But there has been a dramatic increase in Latino small businesses; a substantial increase in Latino elected officials and Latino lawyers; a significant increase in teachers, social workers, and medical doctors; and Latino artists, actors, and writers have gained public prominence. All of this has been possible largely because of Latino struggles and affirmative action in higher education.

Despite the long road we have come since the 1960s, the progress of many Latinos has been modest at best when viewed in a larger perspective. Latino youth have the highest public school dropout rate in the nation. Only 52 percent graduate, which means that 48 percent drop out or, as I prefer to put it, are pushed out because of a racist schooling system that breeds alienation. In comparison, 75 percent of African American and 83 percent of White youth earn a high school diploma.

Latinos fare much worse in higher education. Only 9 percent get the opportunity to earn a bachelor's degree, compared to 15 percent of African Americans and 24 percent of Whites. The data for graduate education is worse still, with only 1.5 percent of Latinos earning a Ph.D. When I joined the faculty of the University of California back in 1970, the presence of Latinos was even less visible. I was one of a handful throughout a public university system that includes eight different campuses. Prior to the 1960s, only a handful of Latinos had Ph.Ds. I was able to find only four Mexican Americans with a Ph.D. in history and the social sciences. I became the fifth Mexican American to earn a Ph.D. in political science. Thanks to affirmative action, our Ph.D. numbers have grown throughout the social sciences, but we are far from achieving a substantial presence as faculty. There is only one Latina Ph.D. in the discipline of geography in the entire country—Professor Laura Pulido at the University of Southern California.

The end of affirmative action in California and Texas is denying Latinos the opportunity to continue their modest gains in higher education. Proposition 209 and the Hopwood decision have generated a nationwide anti-affirmative action politics that threatens to take us back to pre-1960s conditions.

At the University of California-Berkeley, for example, Latino undergraduate enrollments have declined significantly. After growing by 14 percent in 1995, with affirmative action in place, last year the first without that process, 8 percent fewer Latino youth were admitted. Of the students denied admission, 400 had GPAs of 4.0 and above! Without affirmative action, similar results are expected in graduate student and faculty ranks. No doubt Latino graduate enrollment will decline from the 6 percent it had reached. I also anticipate that fewer Latinos will be hired as faculty, where our numbers are only 1 percent.

In sum, Latinos will continue to be underrepresented at all levels of the University of California system. The result will be that fewer Latino professionals will be produced for the state's public and private sectors, even as the Latino population, continuing its dramatic growth, becomes the largest racial and ethnic group in the 21st Century.

The prospect for a higher education for Latinos is not bright. What can be done? Latinos have no choice but to continue their national struggle for their human rights to a higher education. The conservative Republicans responsible for Proposition 209 in California are attempting to duplicate their successful war against affirmative action in Michigan and Florida. They must be stopped. But the lessons of Proposition 209 and Hopwood in Texas must be learned.

The first lesson is that Latinos cannot afford to have faith in a political system controlled by White voters and two political parties whose interests are mainly maintaining the status quo in favor of White racial preference.

The second is that we cannot have faith in a federal court system controlled by judges appointed by Presidents Reagan and Bush. The time has come for Latinos to organize a new grassroots human rights movement that will help develop an authentic Multiracial Democracy based on principles of social justice and educational equal opportunity for all.

America's Mantra: “Blame the Teachers!”

Recent polls indicate that education is among the top three concerns of all American citizens. It is therefore not surprising that it has quickly become one of the top agenda items for both the Democratic and Republican parties.

But education has long been an open sesame for politicians. Criticism of America’s educational system has been a spectator passtime for decades. It is very popular. Some observers think it has entered the national political psyche. It’s like Pavlov’s bell and salivating dog. We hear, we respond.

Politicians run for office on pre-education platforms. And once elected, they vie with one another for the “pro-education” label. We see that scenario repeated in our state capitals as well as in Washington. But problems persist.

Who to blame?

Many schools in Hispanic neighborhoods, especially, have low student scores and a very high dropout rate. Teachers faced with low student scores have been criticized endlessly for years. Many are accused of being poorly prepared.

So it is popular to criticize the colleges and universities from whence they graduated. Colleges frequently blame the high schools for sending them poorly prepared students, and they in turn blame the elementary schools.

Teachers and administrators on the front line often throw up their arms and blame society. There is food for thought here. Our society has changed. Television, drugs, violence, the collapse of the family structure, and the diminishment of religious influences in our lives have all been studied.

State Policies

NASBE contends that the problem is really the result of uncoordinated, inefficient, and often conflicting state policies.

The report starts by agreeing that state boards have the primary responsibility for spearheading far-reaching and systemic reforms that ensure sufficient numbers of high-quality teachers. Current reforms in schools to hold students to high standards will fail, it asserts, without skilled, well-trained teachers to guide students. Yet only a handful of states have developed comprehensive policies to improve and support their teaching force.

Our year-long study group effort found that, despite the conventional wisdom, there is not a teacher shortage, but instead a shortage of qualified teachers in certain subject areas and in certain types of school systems. NASBE Executive Director Brenda Welburn told HO, “In addition, there is a rather stark and troubling mismatch between the diversity of the student population and the relative homogeneity of the teaching force.”

What to do?

The report suggests a set of state policies to address key issues:

State boards must simultaneously develop a standards-based system of teacher preparation, evaluation, and development while continuing to recruit more promising teacher candidates to the field. Further, they must find effective ways to encourage them to stay.

“Between 33 percent and 50 percent of new teachers leave the field in the first five years,” Welburn notes. “Worse than that, it is often the best and most promising new teachers who leave during those first few years.”

The NASBE study group, chaired by Byron Darden, president of the Arizona State Board of Education, sets out a series of recommendations to help states devise policies addressing the multiple factors negatively impacting the quality, distribution, and quantity of the nation’s teaching force.

Key Findings and Recommendations

- States must devise policies that fairly recruit and distribute a diverse teaching pool across all school districts. This can address the situation where an overall surplus of teachers exists—yet there is a shortage in rural and urban schools or a shortage of subject area teachers in areas such as special education, science, or foreign language.

- With regard to pre-service and in-service education, states must devise ways to incorporate the best of education and training knowledge into a standards-based system of teacher education.

Solving the real issues of teacher supply and quality, the report concludes, will require policies very different from ad hoc policies of past decades, which responded to alarms of a general teacher shortage.

Rigorous, coherent, standards-based policies for education, training, and recruitment will need to be linked with distribution policies sufficiently flexible to respond to the diverse needs of diverse school districts.

Copies of the report can be obtained for $1000 plus $200 shipping from the National Association of State Boards of Education, 1012 Cameron Street, Alexandria, VA 22314, (1-800-220-5888).

Dr. Mellander is a professor at George Mason University.
A hundred years ago, only 10 percent of all business persons, mostly men, had attended college. Colleges were for the country’s elite.

A hundred years ago, less than 20 percent of all youngsters finished high school. Most dropped out by their early teens. Some unfortunate ones had their formal education end in their elementary school years as they entered the labor market—such were the economic needs of those times.

A hundred years ago, only 10 percent of all business persons, mostly men, had attended college. Colleges were for the country’s elite. White, Anglo-Saxon, financially secure men went to college.

A hundred years ago, most Americans who sought graduate education and certainly the esteemed Ph.D. went to Europe to study. England, France, and Germany in particular were home to the most respected graduate schools in the world.

USA Today

That has changed, and changed dramatically. Today the world beat a path to American higher education institutions. Many of the world’s students and academicians wish to study in America’s colleges and universities. Graduate education in this country is a magnet and recognized as the world’s finest. The world’s best and brightest want to come here.

The graduate populations of engineering schools at many universities reflect a high percent of foreign-born students. It has inadvertently created a “brain drain” from these students’ countries of origin. Students come to the United States, attend our graduate schools, and then remain. The U.S. has benefited enormously from that reality. Special visa arrangements have long existed to enable many to stay here once they graduate.

Last year, Congress passed a bill making it easier for higher-level computer experts to immigrate to the United States. Many foreign-born scientists will now be able to move to the U.S. It is estimated that more than 70 percent of those who will qualify have been trained in United States graduate schools. Many presently study in this country.

What of Hispanics?

Few Hispanics earn doctorates in this country. They lag behind other groups. The latest figures—1997’s—as reported in Survey of Earned Doctorates, issued this year by University of Chicago National Opinion Research Center, note that 42.7% of doctorates were awarded up from 42.4% in 1996.

Whites earned 78 percent of them, followed by 10.5 percent for Asians, 4.8 percent for Blacks, and 5.8 percent for Hispanics.

Whites earned most of their doctorates in arts and humanities, social sciences, education, and business administration.

Asians were clustered in engineering, physical sciences, and life sciences. Blacks, in education and business administration.

Hispanics chose the social sciences, arts and humanities, and education.
Clouds in Eden?

America's graduate education is excellent, highly respected, and still growing—1997 saw the 15th consecutive year that American universities awarded a record number of doctorates.

Are there clouds in that academic Eden? Frustration among graduate students, appropriateness of degree, and realistic employment opportunities for graduates are a few of the "hot" topics concerning those who reflect upon graduate education.

Graduate Students

Graduate students have long felt put up on. Underpaid albeit called upon to assume professional responsibilities, treated as less than developing colleagues, and symbiotically tied to faculty members who sometimes, for a variety of reasons, prove to be poor models, graduate students report that they suffer fromordinate stress, isolation, and anxiety. These factors alien to their goal of acquiring knowledge and becoming scholars, frequently sour what should be exciting years of personal growth.

This is not new. From time immemorial, graduate students have felt put upon. Some have surreptitiously written plays or short stories about the lives of doctoral candidates. Heavily on the inconsistencies and indeed pain of surviving graduate education, dog-eared copies are sprinkled among the student body. Some are just theater. Some are clearly exaggerated. But these stories do reflect the frustration and alienation with which many graduate students live.

Some institutions address the issue head on. The roles of advisors and students are carefully detailed and monitored. The obligations of a mentor are taken seriously and regulated.

When it works—as it does in many graduate schools—it is a blessing for all concerned. When it doesn't—pain, anger, and frustration, not to mention failure follow. There is still work to be done.

Appropriateness

Not every bright individual needs to go to graduate school. One can become a useful citizen and fulfill one's intellectual potential without a Ph.D. or an MBA. Yet society and so many young people feel that they must go to graduate school.

Universities, most for altruistic reasons, develop programs to meet the demand. But some create programs for a less noble reason—to capitalize on a popular trend. Remember the number of perfectly good undergraduate colleges that rushed to offer MBAs in the '70s and '80s?

Has there ever been a proliferation of doctoral programs? Can we really justify churning more doctorates out each and every year for the past thirteen years?

For a while, universities created ethnic study programs that did little more than prepare their graduates to work in similarly narrow programs. The tragedy was that those jobs did not exist.

Lately there has been a proliferation of Ph.D.s in Women's Studies. Three were established just this year. Their appropriateness as compared to a "regular" discipline. It was the same problem faced by graduates, say, in Latin American Studies. What were they? Were they historians? Economists? The upshot was that many were simply not hired.

Yet a lack of academic employment is not a problem faced merely by specialized, nontraditional doctorates. For decades, many in the humanities and social sciences have had difficulty securing employment at our colleges and universities.

There was a recent flap about the appropriateness of community colleges hiring Ph.D.s. Some colleges feel that it will add prestige to their institutions. But many point out that a Ph.D. is a research degree. Ph.D.s have not been trained to work in community colleges. Most of them have never had a single course in the history, tradition, or culture of community colleges.

As faculty at teaching institutions, community college professors are not expected to conduct research. Furthermore, most community college instructors teach a very heavy load—typically five classes every semester, including developmental courses, a teaching subdivision not even addressed in Ph.D. programs.

For these reasons, many believe that the Doctor of Arts, a teaching degree, is a more logical terminal degree for community college faculty. So who are highly specialized Ph.D.s flocking to community col-
leges? Because heretofore there have been so few jobs at four-year colleges and universities.

It's changing. More jobs are becoming available throughout all institutions. But during the devastating 1990s, many community colleges faced with budget cuts began to rely more heavily on adjuncts. Some have up to 75 percent of their courses taught by adjuncts. Community colleges have now started to rebuild their full-time faculties.

Jobs

During the 1960s, doctoral candidates had to be careful not to accept prematurely; one of the main jobs that came their way. Many colleges sought out students nearing completion without much inquiry from the student. The offers were lush, and many a graduate student snapped one up before completing the degree. Unfortunately, academia is littered with too many ABDs (All But Dissertation) as a consequence.

But that envied job market began to dry up in the 1970s. The 1980s were worse yet, and the 1990s were just dismal years. The painful frustrations of graduates' not being able to secure appropriate employment for decades has impacted today's graduate students. They have begun to pressure their universities and their discipline associations to help them secure employment. Some question the ethics of universities' churning out doctorates when nationwide there is a dearth of jobs.

Graduate students in the humanities have been particularly active in raising these issues. The graduate student caucus presented its demands at the annual meeting of the Modern Language Association. They are fearful that after years of study, they will not be able to find tenure-track positions. In recent years, universities, like much of higher education, have turned more and more to adjuncts. And students allege the MLA has not done enough to reverse that trend. Instead it has concentrated on urging newly minted doctorates to seek employment outside of higher education.

Another segment of doctoral students, T.A.'s (teaching assistants), aren't happy either. They have unionized at several institutions and are presently locked in combat at the trend-setting University of California. If they win there, that victory will reverberate throughout the nation.

Conclusion

What a difference a century makes!

By virtually any standard, American graduate education is a huge success. It offers superior education and is widely respected as the best in the world.

It has met many challenges, but has a few human ones yet to resolve.

What will graduate education be like a hundred years from now?

---

SUMMER 2000

Universidad Complutense

MADRID - SPAIN

Scholarship Program

for Teachers, Counselors & School Administrators

Three and four weeks of intensive Spanish language study from July 3 to August 3 or 10, 2000

Includes: round trip airfare, three meals a day, room accomodations and instruction at Colegio Mayor Nebrija of Universidad Complutense. From $1,200.

For information, Write or Fax your request to:

Center for International Studies
42-32 De Bruin Drive
P.O. Box 451
Fair Lawn, NJ 07410-0451

Fax: (201) 368-0433
When the Pew Charitable Trusts began in 1948, it is unlikely anyone could have imagined that 50 years later its assets would be valued at almost $5 billion. Today, in education alone, the Trusts give away some $30 million each year spread out among several dozen grants.

Established by two sons and two daughters of Sun Oil Co. founder Joseph N. Pew and his wife, Mary Anderson Pew, the Trusts are among the largest and oldest philanthropic foundations in the country. “We are old family money and always in the Top 10 in terms of our assets,” said Pew spokeswoman Sharon Gallagher. “But there’s a lot of new money out there from the high-tech sector. And it will be interesting to see how Bill Gates will impact the rankings this year with his recent giving announcement.”

Still overseen in part by members of the Pew family, who comprise a majority of the board of directors, the Trusts consist of seven individual charitable funds established between 1948 and 1979 that support nonprofit activities in several areas: culture, education, the environment, health and human services, public policy, and religion. Although the Trusts are separate legal entities, its grantmaking activities are managed collectively and guided by a single set of programmatic priorities. The overall mission of the Trusts, which is based in Philadelphia, is to make investments that encourage and support citizen participation in addressing critical issues and affecting social change.

In education, the foundation splits its contributions between K-12 and higher education and gives on an ongoing basis to a select
group of institutions with which it has long-standing relationships, explained Ellen Wert, program officer for the Trusts’ Education Program.

In recent years, the organization has changed its giving plans somewhat as it has focused more on what it calls “strategic philanthropy,” Wert said. “In 1995, our board really turned toward the idea of strategic philanthropy. We want to focus our resources on issues and problems in which we can help make a difference, rather than trying to be all things to all people. And this may make us seem, at times, less responsive to individual institutions and organizations.”

One case of strategic philanthropy is an unusual program that is aimed at turning average citizens into the civic leaders of tomorrow. The Pew Civic Entrepreneur Initiative (PCEI) is taking potential leaders from cities across the country and giving them national and local training to empower them to become catalysts for change in their home communities. In setting up the program, the Trusts selected a number of cities—Albuquerque, N.M., Jersey City, N.J., Providence, R.I., and Santa Ana, Calif.—with high Hispanic populations. Started in 1995, this program is in the third year of a 42-month, $3.6-million grant.

Santa Ana, for example, is 41 percent Hispanic, and its population has a median age of 26. Participants from this city of 300,000 included a diverse mix of residents, from full-time students to a woman who cleans houses for a living to community activists. But they all found common ground in their goal of wanting to work for the betterment of Santa Ana, particularly its youth. “Our goal is to help them develop their leadership skills and build connections to each other,” said Teresa Mercado-Cota, program director for PCEI and special projects director for Santa Ana’s Rancho Santiago Community College, where the program is administered. “Assuming that they stay in Santa Ana, our hope is that in the future they can work together and engage each other in a positive way.”

Last fall, some 200 of these civic entrepreneurs from all over the country gathered in Colorado for a four-day training institute. “It was an eye-opening and energizing experience,” said Mercado-Cota. “Some of these people had never been on an airplane, so just making the trip was incredible enough. Once we were there, what struck me was the diversity of the group. If you looked around the room, you saw people from so many different backgrounds—Latinos, Native Americans, Anglo. It was great that we could come together and share and network.”

While this program nurtures future Hispanic civic leaders, Pew is developing the campus leaders of tomorrow through several programs aimed at increasing the number of Hispanic Ph.D.s and faculty.

From 1980-97, Pew provided three grants totaling $1 million to the Tomás Rivera Policy Institute based in Claremont, Calif., to support the Manuscript Completion Program. This program helped Hispanic doctoral candidates finish writing their dissertations. About two dozen Hispanic students were brought to Trinity University in San Antonio, Texas, for six weeks in the summer. The group included faculty members, graduate students who seemed right on track to finish, and others who had taken a “pause” in their studies and were more of a gamble. “This gave them the time, attention, and resources to get through that final push to finish writing their dissertations,” said Wert. “And, almost more importantly, they got the support from colleagues who were struggling as well.”

A majority of these candidates completed their dissertations and have gone on to become faculty members at institutions all over the country. “It was a very successful program, and I can say that because I had nothing to do with its design or implementation,” joked Tomás Rivera Policy Institute Vice President and Director of Research Rudolfo de la Garza, who is also a professor in the Government Department at the University of Texas at Austin. In the academy, Latinos enter the workforce faster than Anglos, and too many times, their dissertation is set aside and never finished. This program was effectively breaking that cycle for Latino doctoral candidates.” But, on a serious note, he added that he is extremely disappointed the funding was ended. “There is still a need for this type of help for Latinos,” said de la Garza. “I wish they would bring this program back. Sometimes it’s good to stop riding a horse, but this is one horse they should get back on. I would start it up again in a minute here in Austin—if we could get the funding.”

In another effort, last year the Trusts helped launch a five-year program aimed at advancing the scholarship of teaching that also might help minority faculty earn tenure. The Pew Scholars National Fellowship Program will give 122 faculty over the next five years the opportunity to investigate and document significant issues and challenges in the teaching of their fields. This program is one component of the Carnegie Teaching Academy, a $6-million project of the Carnegie Foundation for the Advancement of Teaching. (Pew is providing the lion’s share of the funding with a grant of $4.76 million, while the Carnegie Foundation gives the remaining $1.24 million.)

This effort is aimed at improving the quality of student learning.
and raising the status of teaching. Pat Hutchines, Carnegie Foundation Senior Scholar, who directs the project, said, "One premise behind the project is that teaching will matter more if there's the same research and documentation that we find in other disciplines. And I really think this is the time for it. There are a lot more people publishing now about these pedagogical issues."

This project does not have any particular emphasis on increasing the numbers of minority faculty. But one hope is that young minority faculty members, who are often pulled in many different directions, will benefit if quality teaching gains more cachet on campus. Assistant Professor Donna Blancom, who is of Puerto Rican descent and among the 15-person pilot group chosen last year for this program, believes the weight placed on research and publishing over teaching can hurt minorities. "We get stretched so thin," said Blancom, who teaches an innovative third-year core course in the Department of Management at Arizona State University. "I spend an incredible amount of time mentoring minority students, and I advise our Hispanic MBA group and a Latino fraternity and work with the National Society of Hispanic MBAs. And the question is whether that time is valued when it comes time to be reviewed for tenure."

Another program supported by Pew also plants seeds to help increase the number of Hispanic faculty. Back in 1995, Pew gave a planning grant to the Western Interstate Commission for Higher Education (WICHE) to start what is now a nationwide program in three states called the Compact for Faculty Diversity. WICHE, along with two other regional interstate higher education compacts, the New England Board of Higher Education and the Southern Regional Education Board, has established this effort to prepare new minority faculty and to improve graduate education at the departmental level. Pew has given $55 million to Hispanics. Of this group, 50 have successfully completed their doctorates. Almost 100 colleges and universities are participating including some with large Hispanic populations, like the University of Arizona and the University of Texas Pan-American. Ken Pepion, Senior Project Director Student Exchange Program/Doctoral Scholars, said "Pew has been extremely helpful. It's safe to say this wouldn't have happened without their initial support."

Indeed, it's possible that Compact scholars, such as the University of Utah's Linda Castillo who is looking into special issues faced by depressed Mexican American women, might not be working on their doctorates without the Pew Trusts.

Certainly, in the 1940s, when the Trusts were started, its impact and reach could not have been imagined. And who knows what the next five decades will bring.

Amalia Duarte is an editor in public relations at Lucent Technologies.
NSH MBA, the National Society of Hispanic MBAs, calls itself the most rapidly growing Hispanic professional organization in the United States, with 15 chapters across the nation and Puerto Rico and more than 1,500 members.

Many of those members and many of its elected officials, including past presidents and several chapter presidents, are women, giving it a level of gender diversity that is not yet found in corporate boardrooms and senior management posts.

Indeed, it was a lack of Hispanic representation, male or female, at upper levels of corporate America that spurred the founding of NSH MBA eleven years ago.

Its founding chairperson, Henry Hernández, recently named a Senior Fellow of the Mexican-American Solidarity Foundation, received a B.A. in engineering from Rice University, then an MBA from the Anderson School of UCLA. His career path included TRW, the CIA, and Lockheed Martin Advanced Environmental Systems. He is now managing director of Strategic Advisory Services with Soza International, Ltd., and a frequent speaker on diversity, the environment, NAFTA, leadership, and professional development.

Co-founder Maggie Peña, its second president, ran the operational activities of NSH MBA out of California group promoting the establishment of a UN-sponsored ICC—International Criminal Court. Currently with Deloitte & Touche, she consults with companies under restructuring or those preparing for IPOs.

According to its mission statement, "NSH MBA exists to assure open avenues for the development of Hispanic business leaders so important for the continued economic well-being of our nation."

One look at the publication describing its 1998 annual conference in Dallas convinced this editor that many avenues have been opened indeed. The "lead sponsor," AMR Corporation, was joined by platinum, gold, silver, and bronze corporate sponsors representing a veritable Who's Who of American business. The platinums alone included Disney, PepsiCo, Ford, Dell, and other corporate entities with instant name recognition.

NSH MBA's Annual Conference and Career Expo features participation of the nation's top corporations, universities, and professional organizations.

The glossy conference magazine...
for 1998 is replete with corporate advertising that probably turns competing nonprofits an envious green. Everything about it shouts “success.”

And there seemed to be plenty going on at that conference and expo that would help position attendees for success. Its Professional Tracks offered multiple workshops in five distinct areas: entrepreneurial development, professional and personal development, project management, industry spotlight, and consulting. The how-to menu ranged from sourcing capital to mastering corporate etiquette to making the switch from corporate management to consulting.

A separate track for MBA students offered seminars on teambuilding, brand-management, gaining marketshare, benefits of a PhD, and more. The Professional Track seminars earned Continuing Professional Education (CPE) credits; the Student Track offered learning certificates.

This year’s annual conference will take place in Denver. The 1998 event took place in Dallas, home to the organization’s headquarters.

NSHMBAs Executive Director John Honaman came to the organization from Frito-Lay, where he had worked as a marketing analyst and, earlier, on its sales force. But before joining the corporate world, Honaman worked as director of the annual fund-raising campaign of the Roman Catholic Diocese of Dallas and as director of its Mission Awareness office. Earlier, he was associate director of administration and development for Catholic Charities of Dallas, a major recipient of funds from the United Way of Metropolitan Dallas—traditionally an excellent source of corporate connections.

“We have a lot of people who are interested in helping us. We have a lot of business professionals who want to help us. We have a lot of business professionals who want to help us.”

The organization’s literature says Honaman’s guiding vision is one of service to all its constituencies—companies, corporations, universities, and its membership. And the organization seems to deliver a lot of service to those constituencies, especially in light of the low cost of membership, which is $15 per year for undergraduates and MBA students, and $50 for regular and associate members.

A chief benefit of membership is access to national and local Hispanic business leaders through local chapter affiliations, and those chapters are situated in prime locations: Dallas/Fort Worth, New York City, San Francisco, Denver, San Antonio, Houston, San Juan, Chicago, Miami, Los Angeles, Hartford, Phoenix, Orlando, Orange County, and Washington, D.C.

Other benefits cited are a national career connection telephone hot-line, career networking through national and chapter employment leads, and inclusion of a member’s resume in the annual Membership Profile book and other career-related publications.

Eyes on the Future

Co-founder Hernandez warned, “Unless we turn the tide of the Hispanic dropout rate and increase the pool of Hispanics entering graduate business school, we will not see more Hispanic MBAs, and we cannot, nor should not, expect to see more Hispanics as future CEOs.”

NSHMBAs appears to be heeding his words, for its scholarship program has performed splendidly: For 1998, the scholarship fund distributed $200,000, a one hundred percent increase over the total awarded in 1997.

When this exciting news was announced, Ramiro J. Atristain-Carrion, then chair of the National Board of Directors, attributed the dramatic growth to “the increasing realization in our community that we can’t rely on external sources to solve our issues, [that] we are accountable for leadership and want to be an active participant.”

“A fundamental belief of NSHMBAs,” he said, “is that the potential for success is present in every member of the Hispanic community. It is critical that those of us who are achieving and participating in the business world help other

114
Latinos develop their unique skills and abilities," Aristain-Carrión is a visiting professor at DePaul University.

NSHMBAs scholarships typically range from $1,000 to $5,000, with one for $10,000. They are awarded on a competitive basis to full-time or part-time graduate students who want to pursue a masters degree in management/business.

Applicants must be U.S. citizens or permanent residents with Hispanic ethnic parentage who have been accepted in an accredited graduate college or university. Reviewers require undergraduate transcripts showing a degree or a graduate transcript reflecting a GPA of 3.0 or better on a 4.0 scale.

The 1999 scholarship applicant process requires a one-page summary of community service activities, and a one-page essay, "How can Hispanics best assert themselves as leaders in the business world while at the same time build bridges of cultural understanding and respect with other ethnic groups?"

The scholarship process asks those writing letters of recommendation to evaluate candidates on leadership ability, community involvement, motivation to achieve educational and professional goals, and intellectual potential.

According to the scholarship application, NSHMBAs encourages questions via phone (214) 428-1622, fax (214) 428-2254, and email: rdelrio@gsm.uchicago.edu. And though it states that applicants will be judged on academic achievement, community service, financial need, essay, and letters of recommendation, the application thoughtfully adds, "If you are weak in one area, you may make it up in another area. NSHMBA encourages all individuals interested in a scholarship to apply.

Rick Tobias, elected National Chairperson for 1999, plans to ensure an increase in scholarship awards. "We're looking at possibly $250,000-$300,000 this year." He wants to set up a separate group of seeking sponsor contributions toward the scholarship fund, whose investment performance increased 21 percent in its first three months.

Tobias, who earned both his B.A. and MBA from UT-San Antonio, is seeking other growth as well. "I want to look into the feasibility of expanding into four or five additional chapters beyond the two currently in formation [Orlando and Detroit]." he says. "Based on initial research, demographic data, and the locations of our current chapters, it appears that we should be able to support additional chapters in Texas, California, Washington, Massachusetts, and another chapter elsewhere in the Northeast, like New Jersey or Pennsylvania."

While he was San Antonio Chapter President, Tobias tripled the chapter's membership. He was also instrumental in bringing together the new leadership team whose recruitment efforts increased chapter membership another 85 percent in 1998. With that experience, he is expected to be able to offer chapters very clear direction for growth at the local level.

Tobias, who is assistant treasurer of PG&E Gas Transmission, Texas Corporation, a nearly $3 billion subsidiary, chaired NSHMBAs National Finance Committee and served on the National Executive Committee in 1997 and 1998.

Early this year, Tobias signed the landmark National Hispanic Partnership Agreement, which is expected to produce as much as $2.5 billion in new SBA loans to Hispanic businesses by the year 2000. Stimulating entrepreneurial development and providing increased access to federal procurement contracts. The SBA (Small Business Administration), headed by Aida Alvarez, has a portfolio of business loans, loan guarantees, and disaster loans worth more than $5 billion, making the agency the nation's largest single financial backer of small business. America's 22 million small businesses employ more than 50 percent of the private workforce, generate more than half of the nation's gross domestic product, and are a principle source of new jobs in the U.S. economy.

The formal agreement, which took shape under past chairman Aristain-Carrión, is a Memorandum of Understanding that states that the SBA and NSHMBAs will join forces to help Hispanic-owned businesses build and grow into the 21st Century.

Since 1870, Hunter College was among the first institutions of higher learning to champion a pioneering concept among colleges and universities—that competitively qualified young women of all races and backgrounds deserve a first-class public higher education. The Normal College, as Hunter was then called, was first established as a teacher-training school. Soon, the curriculum was broadened to offer a classical liberal arts degree. Even after turning co-educational in 1964, Hunter’s student body continues to be predominantly female today (74 percent), and the college remains in the forefront of pioneering education and women’s issues.

A number of historic firsts and accomplishments underscore the importance of Hunter to the movement of gender equality in higher education. One is the fact that from 1920-1973, among women who held Ph.Ds, more received their undergraduate degrees from Hunter than from any other college in the United States.

Hunter is the only college in the world to produce two women Nobel Prize winners in medicine. Rosalyn Sussman Yalow received one in 1977 for the development of radioimmunoassay, a pioneering test to measure concentrations of insulin, hormones, and other substances in humans; and Gertrude B. Elion in 1988 for fundamental research into the technology that led to the development of AZT and other chemotherapy drugs. Soita Menschikoff, the first woman to be named dean of a law school (Harvard) and the first woman partner of a major American law firm, was a graduate of Hunter.

Hunter is also a leader in offering educational opportunities to minorities. The first Black woman ordained as an Episcopal priest was a woman rights advocate and lawyer Pauli Murray, a Hunter alumna. From the performing arts, add actress/activist Ruby Dee and opera stars Regina Resnik and Martina Arroyo. In the area of public service, the list includes former congresswoman Bella Abzug and Judge Carmen...
Beauchamp Ciparick, first Hispanic named to the New York State Court of Appeals. Open to all qualified women, Hunter admitted eight African American students in 1873 and—prior to the 1950s—enrolled more African American women than did any other institution outside of the traditional Black colleges. The Wistarians, an African American alumni group, celebrated its 40th anniversary in 1996. The Hispanic Outlook is pleased to have such a pioneering institution join the Honor Roll.

David A. Caputo became Hunter’s twelfth president in July 1995. President Caputo stresses Hunter’s “underlying commitment to excellence in research, service, and teaching…. Representing a wide range of cultures and viewpoints, our students add immeasurably to the intellectual vibrancy of a Hunter College education. I’m proud not only of their academic accomplishments but also of the commitment of so many to use their knowledge to serve their communities and the city of New York.”

Indeed, Hunter College recently celebrated 125 years in the service of educating New Yorkers. Founded in 1870 by Irish immigrant and social reformer Thomas Hunter, the school began as a teacher-training school for women. Since its inception, Hunter College has enjoyed a distinguished reputation for programs in liberal arts and sciences and for its professional schools. Hunter opened its first college to educate young women, and subsequent years brought many changes—including tuition and co-education—but nothing compromised Hunter College’s tradition of excellence. The college still exemplifies its founder’s vision of opportunity based on merit, not color, social class, or country of origin. In his own words, “There was a ‘finishing course here and there which never finished anything. There was a smattering of French, of Italian, of music, drawing, natural science and pure mathematics, but of useful and practi-
-cal information, there was very little. This was the condition in 1869 of the schools in which girls were educated when the board undertook to establish a Normal and High School in the City of New York.

With more than 19,000 students on five campuses (approximately 15,000 undergraduates and 4,000 graduate students), Hunter is the largest branch of CUNY—the City University of New York. The college offers 83 majors leading to a B.A. or B.S. 10 joint B.A./M.A. programs, and 62 graduate programs. Six doctoral programs are based at the college—a distinction usually reserved for universities. Admissions requirements to Hunter are among the highest in CUNY. Hunter's most popular undergraduate majors include psychology, English, sociology, accounting, and media studies. The largest graduate programs are social work, elementary education, special education, nursing, and health sciences. The college is very proud of its distinction of being ranked in the top twenty of The Hispanic Outlook's "100 Best Colleges for Hispanics." The Hunter School of Social Work is consistently rated in the top 15 schools of social work in U.S. News and World Report's "America's Best Graduate Schools.

As of Fall 1998, incoming first-year students need a high school average of at least 86, based on twelve college-preparatory academic units. Hunter supports a center for returning women students and a nationally renowned women's studies program. Student interns provide nearly one million hours of service to government and nonprofit agencies. Hunter also educates a large portion of New York's professionals—teachers, nurses, social workers, and community health practitioners. The majority of these graduates put their skills to work in the metropolitan area.

The college reports that two-thirds of Hunter students work: some at more than one job, yet many have won Ford Foundation Awards, Fulbrights, Howard Hughes Fellowships, National Science Foundation Fellowships, Mellon Foundation Fellowships, and other prestigious academic honors.

In sports, The Hunter Hawks had a memorable 1997-1998 season, landing nine out of 15 CUNY Athletic Conference titles. The men's basketball team hosted and won its first NCAA (Division Three) Tournament game in four years, and fell just three points short of reaching the Final Four after reaching the Elite Eight for the first time in Hunter History.

Of those responding, 23.5 percent of undergraduates, and 16.9 percent of graduate students are Hispanic for an overall group total of 22.2 percent. African Americans make up 20.1 percent of the undergraduate census and 17.3 percent of the graduate population, with Asian/Pacific Islanders accounting for 17.4 percent and 8.4 percent respectively, and Native Americans making up 2 percent of the total. Hunter College of the City University of New York continues to be in the forefront of efforts within American higher education to increase the number of students from minority communities who pursue advanced degrees. Hunter actively recruits students from minority backgrounds for its own graduate programs, particularly in the sciences.

Of the entire workforce at Hunter, females number 661 or 51 percent. Presently, minorities total 592 employees or 45 percent of the total workforce. 222 or 17 percent are Hispanic. Females number 260 or 50 percent of the faculty. Minorities number 125 or 24 percent. The number of Hispanics in this group is 57, making for 7 percent of the total.

In 1989, Hunter was the first public institution to be considered in the prestigious Andrew W. Mellon Minority Undergraduate Program (MMUP) and of the original 19 colleges and universities to receive a $300,000 Mellon grant. Today, the program has expanded to 20 schools. Hunter is one of only three public institutions remaining in the program, with its funding renewed for an additional four-year period in the fall of 1997. The Mellon program was begun to rectify the underrepresentation of African Americans, Hispanics, and Native Americans on college faculties. Participating colleges and universities select up to five academically talented minority undergraduates each year to receive MMUP stipends of $5,000 (CUNY also waives its tuition). These students pursue a doctorate in any of the humanities, or in history, anthropology, political science, sociology, theoretical mathematics, or physics. Another prominent program, Career Opportunities in Research Education and Training (COR), encourages minorities to pursue graduate degrees and enter research careers related to mental health or a related social science field. Then there are the MARC and MBRS programs funded by the National Institutes of Health (NIH) that train and support minority students to pursue advanced careers in biomedical research by earning Ph.D. or M.D./Ph.D. degrees.

Professor Adolfo Betancourt, a Central American refugee who once lived in a Brooklyn ghetto, is one of Hunter's many MBRS success stories. After graduating in 1986 with a B.A./M.A. in physics, he attended MIT, where he majored in mathematical physics. He is now in a tenure-track teaching position at Princeton. Hunter also claims credit for two of MIT's four African American women ever enrolled in its physics Ph.D. program—both were MBRS students.

Another notable Hunter College feature is the Centro de Estudios Puertorriqueños or Center for Puerto Rican Studies (CENTRO) and its distinguished archival material. Gabriel Haslip Viera, acting director of CENTRO, says, "The Center for Puerto Rican Studies is the premier research institution for the study of Puerto Ricans in the United States. The Center produces research, sponsors public events and publishes a journal and other publications. The Center's library and its internationally acclaimed collections of documents on the history of Puerto Rican migration are the most extensive in the world."

In July of 1995, the Center was selected by the government of Puerto Rico to be a custodian of The Historical Archives of the Puerto Rican Migration to the U.S., the most extensive and richest collection of government documents on the migration. The archives consist of records created by various Puerto Rican government agencies that operated in the United States from 1930 to 1989. Founded in 1973, the Centro de Estudios Puertorriqueños at Hunter College is the only university-based research institute in America dedicated to the interdisciplinary study of the migration. The Center recently received a grant of $200,000.00 from the Rockefeller Foundation towards organizing and making available the historical archives. The grant matches a $200,000.00 grant received last year from The Andrew W. Mellon Foundation.
Choosing Between the Languages of Oppression and Liberation

BY DAVID ABALOS

Choosing Between the Languages of Oppression and Liberation

The classroom has always been political, people like you and I make choices by which we include people or exclude them. When we adopt texts or novels, make up a course outline or a bibliography, we are deciding what is valuable for students to know and, by omission, what is not important. The language that we use in the classroom is just as important. There is no such thing as neutral language: our words and examples have consequences, and they either include others or make them feel like outsiders. For this reason, I have learned to make a distinction between two kinds of language—the language of oppression and that of liberation and transformation.

I made a political decision some time ago never to use the following language in the classroom: minority, non-white (which is the absence of something), subgroup, subculture, disadvantaged, marginal, or underprivileged. All of these words convey a theme not only of victimization but of permanent victimization and condescension on the part of the powerful that obscures the personal, political, historical, and sacred reality of each of our students. If I reject this language of oppression, then what do I offer as an alternative?

The language and discourse of liberation and transformation recognizes and honors the right of all people and groups to name themselves. This is not about a fad, being politically correct, or a commercialization of difference; to name oneself and one’s community is at one and the same time a personal, political, historical, and sacred act. To name yourself a Chicano, a Boricua, an African American, a Native American Indian, an Asian American, a lesbian or a gay, a woman, or a person of color is one of the ways to take ourselves back from those who named us and who set the agenda.

We choose to participate in creating a context, a place in American history for the acceptance and nurturance of the personal faces of our being—whether they are brown, black, yellow, female, red, white, or gay—that had been made invisible.

To name ourselves is to put into play the political face of our being as a people who do not want to be the recipient of others’ largesse or violence but who seek to participate in creating a more loving and just society.

We no longer wish to deny the historical faces of our being by acting out set roles; rather, we wish to be playwrights still growing our own history as new and more compassionate turning points.

Most of the European American students and many of the students of color in my classrooms either have assimilated or plan to fully assimilate into American society. In our rush to join the powerful, too many of us have forgotten our native language and know almost nothing of the struggle of our foremothers and forefathers, either in their own homelands or in this country. For those who are light skinned, for the most part, it is easier to join the powerful. But part of the high price of assimilation, for any group, is to have stripped away from us our heritage and anything else that prevents us from being like the others, the powerful. I set all of the standards for wealth, prestige, power, beauty and respectability.

I spend time drawing comparisons between the struggle for justice of European American ethnic groups and that of communities of people of color. All of us have suffered from the story of tribalism that separates all people into two groups: the blessed and the outsiders. There are only five ways for the allegedly superior to relate to the others: as invisible people who don’t count, as persons who are allowed to work but who must accept their inferiority in the society, as those who submit and therefore are allowed to assimilate (and to be exiled should they prove disloyal); and, finally, the outsiders who, in extreme cases, can be exterminated.

This story has been with us since the beginning of the Republic, as witnessed by Native American Indians and by African Americans. But too often we see this story only in racist terms and forget that the Irish, a White ethnic group, were hated by the English elites who practiced this story of tribalism. The sadness is that all incoming groups felt the wounds of this story from the previously excluded who are now the powerful. Thus the Irish turned on the Italians as a potential threat, as competitors for jobs and power knowing this kind of thematic and comparative historiography
greatly helps students to see that the enemy is not their fellow students but a blind acceptance of the stories of the society; an acceptance that we continue to repeat. If we were once all victims, it is within our capacity to participate in the politics of transformation and put an end to this destructive story and do all that we can together to fulfill the story of democracy.

I want to give a further example of how I teach this material in the classroom. I do not require my students to use any terms that I employ when referring to communities of people of color. I give historical, cultural, and political reasons for the names that I have chosen to use. When I say that I choose not to use the term Hispanic, I give the following explanation. The term Hispanic was first used on a national level by the Census Bureau in the 1970s when the Spanish-speaking communities began to become more visible through growth. This government bureaucracy simply grouped all of us together under one heading, which denied much of our inherent diversity. No one word or series of labels can do justice to the different histories and cultures of a variety of groups. But there are names that begin a dialogue and that open up new and better understandings of our common inheritance as well as our differences.

The term Hispanic carries with it historical and political baggage that is too limiting. Hispanic emphasizes Spain, Spain, and the world of the European, White Catholic, Christian heritage. To this day, many Latin Americans consider the coming of the conquistadores to have been the beginning of the destruction of their cultures. Often the powerful in Latin America are still too wedded to the Spanish side of their ancestry and are somewhat contemptuous of the indigenous people and of the mestizos, who are the majority of the population in most of Latin America.

Historically, the Spaniards sought to deny any kind of mixture of blood or culture. This grew out of the fierce struggle to reconquer Spain from the Muslims. But in so doing, they distorted their own history and culture. Too often when we ask who and what is a Spaniard and what are a Spaniard’s roots, the answer is that Spaniards are the descendants of the Romans, the Visigoths, the Franks, the Gauls, or other European group. But anybody who knows Spanish history knows that a Spaniard is a Jew, a Christian, and a Muslim. These three groups lived side by side, although often in names. Some of these converts came to the New World as conquistadores. When they arrived in the Americas, they found 500 different indigenous cultures. As a result of intermarriage between the Spanish soldiers and the Indian groups, the New World became populated largely by a mestizo people.

Africans were brought here against their will as slaves. Many of them intermarried within the mestizo community and so enriched what we have come to call the mestizaje of Latin America. In addition, when our foremothers and forefa-

MBA Programs where the Environment Matters

BY ADALYN HIXSON

"Because people are inspired by ideas, empowered by knowledge, and moved to change by greater understanding, the Institute provides—and helps other institutions provide—objective information and practical proposals for policy and institutional change that will foster environmentally sound, socially equitable development."

So reads page 47 of a 1998 publication of the World Resources Institute, a center for policy research and technical assistance on global environmental and development issues. WRI's mission is "to move human society to live in ways that protect earth's environment and its capacity to provide for needs and aspirations of current and future generations."

Given the growing news of ozone depletion, imperiled rain forests, and mad cow disease outside our borders, as well as toxic dumps, polluted air, and tainted waters between and along those borders, the WRI mission statement strikes a welcome note.

Last year, WRI published Grey Pinstripes with Green Ties: MBA Programs where the Environment Matters, a report based on its survey of related activities, present and proposed, at 67 business schools ranked at the top by U.S. World and News Report and Business Week. Fifty schools responded.

High praise for the report came from no less an authority than former EPA Director William Ruckelshaus. He spoke on the topic, effectively "making sure that future managers understand the context in which their businesses operate," at an education conference at Dartmouth and at a WRI conference at UCLA, said Jennifer Finlay, co-author with Rich Bunch, and Brian Neubert, all three current or recent members of the Institute's team.

According to Ruckelshaus, the report "tells us which business schools are preparing future managers for the immense environmental challenges ahead of them." In his view, the study "will forge critical links between a company's need for environmentally savvy managers, the corporate recruiters trying to find those managers, and the schools that are producing them."

Praise came, too, from corporate America. David Buzzelli, Director and Senior Consultant with Dow

"There is a real need for increased mainstream voices talking about environment and sustainability topics as core issues even for individual decision-making. It can't be perceived, as an issue that is captured by a small group of people with a particular political leaning.”

JENNIFER FINLAY
CO-AUTHOR OF WRI REPORT.
Mainstreaming the Cause

HO spoke with report co-author Jennifer Finlay about the rationale for teaching environmental issues within a business curriculum, and about moving through or around the "loggers versus the tree huggers" imagery associated with those issues.

"There is a real need," Finlay said. "For increased mainstream voices talking about environment and sustainability topics as core issues even for individual decision making. It can't be perceived," she said, "as an issue that is captured by a small group of people with a particular political leaning."

If mainstreaming the cause is one of WR1's strategies, the report certainly scores points toward that goal. Responses from the business schools cited in the report as well as those of its corporate readers hang the drum quite persuasively.

Paul Tebo, vice president, safety, health & the environment, E.I. du Pont de Nemours Corporation, wrote, "As DuPont begins to measure success by the value added to each of our stakeholders relative to the footprint created, future leaders will be those who understand and can think strategically about creating business opportunities in fundamentally different ways than we have in the past."

Paula Mcenten, manager of sustainable development, Monsanto, wrote, "For the world to move in the direction of sustainability, enormous efforts must be made on many fronts. Businesses that are leading the effort toward sustainable development will need people with a keen awareness of an interest in solving the world's pressing environmental and social problems while creating shareholder value. The schools with MBA programs at the cutting edge are unique in leading the way to provide this critical education for our future leaders."

The response has been good enough, said Finlay, to garner cooperation in this year's survey from several highly ranked holdouts in 1998.

Underlying Rationale

HO asked Finlay several questions about the ABC's of environmental management: "Let me start by addressing a question that I thought was really critical here. Why is environmental management continued, is to articulate the actual up side of environmental stewardship. On the cost side, it is easier for business schools to understand that you should manage environmental issues. On the opportunity side, it is much more of a challenge."

"If I were a manufacturer of insulation—and I were thinking about business drivers, it is very unlikely that I would think that climate change might be one of the issues that would increase sales of my insulation materials. Making quantitative assessments—particularly, what are the positive opportunities—remains one of the critical issues.

"The schools with MBA programs at the cutting edge are unique in leading the way to provide this critical education for our future leaders."

Paula Mcenten, Manager of Sustainable Development, Monsanto

VOE now integrated into business school curriculum?

There are several important indicators, she said, "that it should be a part of the curriculum. And the reasoning is just plain business sense. Running an efficient, high-quality management system is a business fundamental. Any waste—and most environmental emissions represent a loss of resources—has a cost. All things input into the process—such as natural resources—have a cost. Any waste indicates that you are not running an efficient operation."

The costs associated with waste generation or inefficient use of electricity result in both business costs and, where those wastes can be hazardous, loss of corporate reputation brand image, or other very significant business costs.

The hard part here, she con-

The Parallel Struggle

Finlay defined the cause in which she serves as a parallel struggle. On one hand, she said, WR1 is trying to bridge a gap between business and environment so that businesses start to regard environment and sustainability literacy as a part of what they are looking for when they hire, for example, a financial analyst. The heightening of that awareness is one challenge.

Asked to define "environmental literacy," Finlay said that it is just an understanding of the important topics or subjects that affect business in its operations, in its strategies and planning, and in the sale of its products.

One of what she called the "institutional challenges" is the fact that business disciplines often make their own decisions about curriculum.

"It has been a struggle for many faculty champions to integrate environmental topics into the discipline's curriculum," Finlay and WR1 found that in academia as in corporations, "it is very important that there is an administrative emphasis or support for integrating these kinds of issues, just as there was for international issues a decade ago."

Asked who some of the leading spokespersons within academia are, Finlay quickly named Robert Sullivan, University of North Carolina; Joseph White, University of Michigan; and Don Jacobs, Northwestern's Kellogg School of Business. But she said too that there has been a lot of "juggling around" of environmental faculty in the last couple of years. "A number of them left because they didn't receive tenure," she told HO. "There is not necessarily the recognition among their peers that this kind of research is on the cutting edge."

"It is core, fundamental, creative business thinking!"
Survey Findings

MBA programs "at the forefront" in 1998, in alpha order, were George Washington University, New York University (Stern), Northwestern University (Kellogg), University of Michigan, University of North Carolina (Kenan-Flagler), University of Tennessee-Knoxville, University of Virginia (Darden), and University of Washington.

George Washington's was the only program to garner a full four stars in each of the three categories on which the programs were ranked: student opportunities (50 percent), Institutional Support (30 percent), and Faculty Publications (20 percent).

The first category looked at the number of required courses, number of electives, and number of environmental electives in other university programs. Category two looked at the number of faculty with an environmental focus, extracurricular business-environment activities sponsored, and relevant mentions in school catalogs and course bulletins. The third involved literature searches of academic journals, general business journals, and books.

Grey Pinstripes reports that six of the 50 schools responding to last year's survey were planning new initiatives on business and the environment, "including a statewide University of California initiative."

Grey Pinstripes reports that six of the 50 schools responding to last year's survey were planning new initiatives on business and the environment, "including a statewide University of California initiative."

"For this year's survey, we are building a whole new process. This year we are exploring how social issues are emerging. We thought it was important for us to go talk with faculty and with administrators and students for a more qualitative or personal assessment of what topics are important, how they are emerging, what are the issues in teaching about social issues in business." She told HO that diversity and culture are emerging themes in business school curricula, and the new report will include a chapter that discusses those issues.

The day after the HO interview, Finlay was headed for the much about the international development angle as it is about being smarter about the kinds of choices we make."

Grey Pinstripes co-author Rick Bunch is director of WRI's U.S. Business Education and the Business Environment Learning and Leadership Program (BELL) and its representative to the Alliance for Sustainability through Higher Education, a group of organizations dedicated to the "greening" of higher education. His B.A. in political science is from Yale; his MBA and Environmental Management Certificate from the University of Washington, which has the longest and most well-recognized program in the field.

Third co-author Brian Neubert had worked on "every element of the BELL program," including regional faculty development, demand creation, and curriculum, before joining the U.S. Department of State in the Foreign Service. Neubert holds a B.S. degree in International Politics with a Certificate in Science, Technology and International Affairs from Georgetown University.

The WRI Web site at <http://www.wri.org> and that of its Management Institute for Environment and Business at <http://www.wri.org/wri/meb> offer more information on its work and publications, including curriculum offerings for high school and higher education.

- a. Schools are listed in alphabetical order within each quartile. See “Survey Methods” for a description of the criteria used in each category to calculate rankings.
- b. Represents 50 percent of overall ranking. Includes number of environmental topics in required curriculum, number of environmental electives offered, and number of environmental electives in other university programs.
- c. Represents 30 percent of overall ranking. Includes number of faculty with environmental focus, extracurricular business-environment activities sponsored, mention in school literature.
- d. Represents 20 percent of overall ranking. Includes literature searches of academic journals, general business journals, and books.
Rosie Rodela: Compassionate Counselor

BY INÉS PINTO ALICEA

Rosie Rodela knows the confusion and frustration of dealing with college advisors who are not helpful. As a college student, she did not have good counselors.

Now an undergraduate advisor in the College of Business Administration at the University of Texas at El Paso (UTEP), she is winning awards for her outreach efforts to students, particularly those transferring from local community colleges.

"Many students come to us having taken more classes than they needed to because they believed they had to earn an associate's degree before transferring to UTEP to work toward their bachelor's degrees—and that's not true," she said. "We can accept only 66 credit hours from any two-year institution, and many other courses simply are not transferable. That misunderstanding can result in a lot of wasted time and money for these students, who often can't afford it. I just decided that something had to be done."

Her interest and efforts in helping students garnered her an award from the university, the UTEP Star award, which honors individuals whose outstanding service to the university and its students extends beyond their normal job responsibilities. She received it in recognition of an initiative she launched last year to bridge the advising gap between UTEP and local community colleges and to help students at the community colleges who wanted to study business administration at UTEP eventually compile credit hours transferable to UTEP.

"The initiative was entirely Rosie's idea and effort," said Director of Business Academic Programs John Starner, who nominated Rodela for the award. "It came in response to her awareness of a need and her resolve to give of herself to fill that need."

Rodela's strategy is straightforward. She visits business classes at the different campuses of the El Paso Community College (EPCC) to talk to students, provide information on degree plans at UTEP, share transfer guides with the students, and explain upper-division admission policies at the university. She also sponsors breakfasts for EPCC advisors to cover the same information. And she attends as many college recruiting sessions as she can in her spare time to meet with community college students one-on-one.

"Rosie is a major part of the reason the College of Business Administration has a reputation among students for friendly and accurate advising," said UTEP President Diana Natalicio. "In her initiative to coordinate with the El Paso Community College advisors and students, Rosie is in the vanguard for the college and the university."

Maria Dolores Rios, 26 and a UTEP student majoring in human resources management at the UTEP College of Business, said she feels very fortunate to have Rodela as a college advisor. Rios, who graduates in July, said that Rodela has always taken her time to explain all of the ins and outs of getting through college and graduating.

"No matter how much time it takes, she takes her time with you," said Rios. "She's never rush rush."

Rios also said that she has never seen Rodela lose her patience or turn a student away. She said Rodela, instead, helps students get out of hitches. For example, Rios said Rodela helped her on several occasions by convincing professors to take her in at the last minute despite the class being closed or filled, or she has talked university
Rodela provides not only transfer guides but degree plans that clearly outline what is expected of them once they have transferred.

She provides them with contacts at UTEP who should be able to answer their questions.

“It’s great when we go over to the community colleges,” Rodela said. “It’s the best way we can communicate with the students. It helps students feel more secure. They just want to see the end of the tunnel.”

Rodela admits that sometimes counselors are not blame for students taking the wrong classes or too many classes prior to transferring because a lot of students don’t ask advisors for assistance.

“They will say ‘I wish I had known this before,’” said Rodela. “But for those who do seek help, Rodela said it’s important that they have advisors who can establish a good rapport with the students and provide them with information in an understandable manner. Some courses offered by the community colleges might cover the same curriculum as a class at UTEP but won’t be accepted in the transfer because at UTEP, the class is considered an upper-division course. If students are clear about what classes they should take, says Rodela, they will save themselves a lot of heartache.

“I didn’t have a great counselor in college, and that’s probably why I want to help our students so much,” said Rodela. “I didn’t want them to go through the same thing. I like to help out. I advise them to not wait until the last minute so they don’t waste time or money.”

The response by EPCC to Rodelas program has been enthusiastic. She has initiated a similar program for local high school students.

“It’s good to catch the seniors before they [start college],” Rodela said. “Those students will take the right classes at the college, not be confused, and know where to go if they have questions.”
Bastida Named Outstanding Teacher

Dr. Elena M. Bastida, chair of the department of sociology at the University of Texas-Pan American (UTPA), has received this year's Chancellor's Outstanding Teaching Award at UTPA.

President Miguel A. Nevarez and Vice President for Academic Affairs Rodolfo Arevalo presented a $1,500 check to Bastida.

“All you have to do is talk to her students to know just how good an instructor and researcher she is,” Nevarez said of Bastida. Nevarez also said Bastida was a key player in recently bringing a $1.4 million grant to UTPA to conduct a health study on Hidalgo county’s elderly population.

Benavidez Directing UCLA Communications Team

Max Benavidez, a veteran public relations and journalism professional, is the new assistant vice chancellor of university communications at the University of California-Los Angeles (UCLA).

Benavidez is responsible for overseeing all internal and external communications for the campus, including the College of Letters and Science and professional schools. He provides communications counsel to the UCLA Health Sciences enterprise and the university’s public arts programs. Marketing, services, publications, and Web-based communications also are under his direction. University communications is a division of the UCLA Department of External Affairs.

University of Texas-San Antonio Honors Saldaña

Noé Saldaña, assistant director of the Research Development Office at the University of Texas-San Antonio, has won a Staff Excellence Award for 1999. Saldaña, along with four others, was selected by a special task force from dozens of candidates nominated by the university community-at-large and received a cash award and a plaque.

Solis Scholarships Aid Chicano/Latino Students

California State Senator Hilda L. Solis (pictured here) was an honorary guest at the Third Annual Scholarship Dinner & Reception held in her name at California State Polytechnic University-Pomona.

Writer/director Gregory Xava won an award, and Chicano artist Simon Salva was the keynote speaker.

The goal of the annual event is to improve the quality of scholarships offered to Chicano/Latino students and to recognize their accomplishments.

Sergio Rodriguez (pictured), a geographic information systems major who received a scholarship last year, said, “I used to work full time, but with the help of scholarships like the Hilda L. Solis scholarship, I’ve been able to focus entirely on my studies and maintain a 3.8 GPA.”

Over the last two years, 18 students received scholarships.

Ontiveros Named to North Orange County Community College District Board

Manuel Ontiveros, a federal probation officer and Anaheim community activist, has been appointed to the North Orange County Community College District Board of Trustees. He is to serve until the year 2000.

Ontiveros is a member of the Anaheim Parks and Recreation Commission and serves on the Board of the Anaheim Independencia Community Center.

A law enforcement professional since 1996, Ontiveros is a graduate of the University of California-Irvine and Fullerton College. He has been enrolled in the master's degree program in public policy and administration at California State University-Long Beach.

Alonso Arranges WOU Conference

Western Oregon University (WOU) student Teresa Alonso (pictured here) was the lead organizer of the recent Women of Color Conference, sponsored by WOU’s Multicultural Student Union. The topic of the conference was “Wisdom Shared Through the Words of Women.”

Jeanette Pei-Espinosa, vice president of the Metropolitan Group, was the keynote speaker for the event, which commemorated Women’s History Month. Guadalupe Quinn, a community activist involved with Network for Immigrant Justice/CUSA, was the guest speaker. The day-long conference included various informational sessions as well as a closing reception featuring the Oregon State University Aztec Dancers.
University of Texas-San Antonio Faculty Serves Disabled

Juanita Firestone and Louis Mendoza, along with 13 other faculty members at the University of Texas-San Antonio, have been recognized for their outstanding service to students with disabilities.

Firestone, an associate professor of sociology; Mendoza, an assistant professor of literature; and the rest of the group were honored during the university’s observance of Disability Awareness Week in March.

University of Arizona Names Vélez Distinguished Professor

Dr. William Vílase Vélez, a mathematics professor at the University of Arizona (UA), has been named a Distinguished Professor this year.

As an undergraduate in the 1960s, Vélez was advised not to pursue a career as a mathematician. “The only advice I got in college was bad advice,” said Vélez.

After initial struggles with calculus, Vélez got an “A,” found the subject interesting, and decided to get a doctorate in math or physics.

Today, he aggressively recruits Hispanics and other ethnic minorities into the UA mathematics department. Currently, nearly 300 minority students are enrolled in the three-semester calculus sequence required for science and engineering majors.

“I lose students to chemistry or biology or sociology, but I’m not really losing them. They’re going into another field that they have found interesting—and probably with more mathematics than the average student in that area.”

Tamargo Awarded Fulbright Scholarship

Miami-Dade Community College (M-DCC) professor of photography Joseph Tamargo, of Miami, Florida, has been awarded a Fulbright Scholarship to lecture on street photography in Chile and research the South American country’s approach to that genre.

Tamargo will spend July to September in Santiago and Valparaiso teaching and studying the work of Chilean street photographers from the beginning of the 20th Century to the present.

Having taught at M-DCC’s Wolfson Campus since 1986, he has co-chaired the Juried Photography Exhibition of the Miami Book Fair International and has served as the curator of photo exhibits for the Frances Wolfson Gallery since 1995.

Díaz on College Board Commission

José M. Díaz, a teacher of Spanish at Hunter College High School (N.Y.), is on a special 15-member College Board commission established to explore ways to strengthen the positive impact of the Advanced Placement Program on American (AP) education.

In early 2001, the Commission will recommend how the College Board can maintain the program’s quality as it continues its rapid growth, and strengthen its ability to improve American education. APP is considered a model of cooperation between schools and colleges.

Founded in 1900, the College Board is a nonprofit association that supports preparation for and transition to higher education for students around the world through collaboration of its member schools, colleges, universities, educational systems, and organizations.

Rodrigues Demonstrates Math Technology

Mariano Rodrigues, Rhode Island College professor of mathematics, gave a presentation at the International Conference on Technology in Collegiate Mathematics in New Orleans.

In his presentation, “Using Advanced Graph, Graph, Graph (sic) for Graphing,” Rodrigues demonstrated how this inexpensive but powerful and effective device can be used to quickly graph functions. Used with Word 97, it can help students to prepare sophisticated homework documents as well as internet Web pages.

He also conducted a mini-course on “Easing Students into Submitting Work via Web Pages” wherein he showed students how to prepare materials that are very readable, and demonstrated Web-based submitted work and the use of Chat in cyber classes.

Cruz Drama at New Jersey Performing Arts Center

The New Jersey Performing Arts Center (NJPAC) presented, in March, the McCarter Theatre’s world premiere production of Hijo Sisters and a Piano, a passionate, political drama by Cuban-born playwright Nilo Cruz. The play was one of only three in the nation to receive a prestigious 1998 Kennedy Center Fund for New American Plays Award.

A sultry and subtle story of personal freedom and oppression, the play is inspired by the life of Cuban writer María Elena Cruz Varela, who, after writing a manifesto against the Communist regime, was placed under house arrest for two years.

Cruz earned his master’s degree at Brown University.

Pérez Emphasizing Borderland Studies

Emma Pérez, associate professor of history and assistant vice president for graduate studies at the University of Texas-El Paso (UTEP), is recruiting students to a new doctoral program in borderlands history that, as Pérez says, “emphasizes borderland studies in a region where the border is a persistent reminder of a unique
geographic location.” She calls UTEP “the place to examine the border both politically and geographically.”

Pérez finds her work in graduate studies “both rewarding and challenging given that UTEP has been in the forefront of offering new doctoral degrees for this majority-minority population of approximately 68 percent Hispanic students.”

One of only 15 Chicana historians in the U.S., Pérez has written two books—the Decolonial Imaginary: Writing Chicanas into History (June 1999, Indiana Press), and Gulf Dreams (1996, Third Woman Press)—and is at work on another.

Ramos Named Director at Trinity

Valeriano Ramos Jr., a college administrator with extensive experience in civic and cultural affairs, has been appointed director of community service and civic engagement at Trinity College (Conn.).

In his position, Ramos manages service-related initiatives linking Trinity students and faculty with the Hartford community. He also oversees the Boys & Girls Club, which is staffed by Trinity students and is the first campus-based Boys & Girls Club in the country.

Ramos has a bachelor’s degree from Yale University and a master’s from New York University.

Molina’s Work Exhibited at School of Visual Arts

Carlos Molina was one of two students at the School of Visual Arts (SVA) in New York to have his work exhibited at the school’s Eastside Gallery.

Molina’s photographs are flat and graphic. Using photography in its most literal sense, Molina manipulates light to illuminate mannequins in intensely rich planes of color. The focus shifts from the female contour to the shapes of color and light that dominate the photographs. He is a third-year student in the BFA Photography Department.

The exhibition, “The Body without Figure,” also featured student Chris Ramsey’s work.

González Wins Long Island University’s Polk Award

Juan González, a columnist for the New York Daily News, was one of 13 nationwide winners of the 1998 George Polk Awards for excellence in journalism. The Awards sponsor is Long Island University.

Honored for his “street-savvy, unflinching columns,” González makes the distinction that he is “not writing about outcast neighborhoods, but from them.”

In the forward to Roll Down Your Window: Stories from a Forgotten America, a compilation of his work, González wrote that much of his time in the past two decades has been spent writing about neighborhoods where “strangers roll up their windows as they pass through.” He says he attempts in his writing to roll down the windows to depict the complexities of America’s communities of color, the struggles of its labor movements, and the flaws of its politicians.

Chang-Díaz Joins Panel at American University

Franklin Chang-Díaz, the first Hispanic American in space, discussed the risks and rewards of space exploration and its place in the next century during “Space 2000: Space Exploration at the Millennium,” at American University in Washington, D.C.

Chang-Díaz participated in the Space Station design and helped build closer ties between astronauts and scientists. He is currently developing ultra-fast rockets for NASA. A veteran of six space flights, including the final Shuttle/Mir docking mission, he has logged more than 1,260 hours in space. He is tied with John Young and F. Story Musgrave for having flown six missions, the most of any astronaut. A native of Costa Rica, Chang-Díaz earned a doctorate from the Massachusetts Institute of Technology.

YWCA Honors Santa Monica College President

The YWCA of Santa Monica, Calif., honored Santa Monica College (SMC) President Dr. Piedad F. Robertson and two other women at its annual Women of the Year Dinner in March.

Robertson was selected for her outstanding contributions to education. She has been superintendent/president of SMC since July 1995 and has earned a reputation for leadership in innovative educational programs, workforce development, fund-raising, community and government relations, planning, and effective management. A native of Cuba, Robertson earned her bachelor’s and master’s degrees from the University of Miami, and was awarded an Ed.D. from Florida Atlantic University.

Along with Robertson, the YWCA honored Dr. Linda Burnes Bolton and Sister Marte Madeleine Shonka.

Diaz-Marcos Wins Literary Prize in Spain

University of Massachusetts (U.Mass.) graduate student Ana María Díaz-Marcos has been awarded Spain’s Asturias Young (Young Asturians) prize by the Principado de Asturias (regional government of Asturias) for her collection of short stories The Affections of Heat. The prize, awarded annually to a young writer of the Asturias region of Spain, includes a monetary gift of $1,800 and publication of the collection.

A native of Spain, Díaz-Marcos, 30, was inspired by: the desire to write something good before turning 30 (which she did), a trip she took to Puerto Rico, both U.Mass. and the old Massachusetts landscape, and a desire to empower women.

“In many ways, Spain is only now emerging from a very macho, sexist period in its history,” said Diaz-Marcos. “I wanted to give
literal voice to the women who had lived through this period.”

**Romo New President of University of Texas-San Antonio**

Dr. Ricardo Romo, former vice provost for undergraduate education at the University of Texas-Austin (UT-Austin), was named president of the University of Texas-San Antonio (UTSA) early this year.

Tom Loeffler, a member of the Board of Regents from San Antonio, said, “The board has been tremendously impressed with the experience and accomplishments of Dr. Romo. He is a superb administrator, a highly regarded scholar, and a dedicated teacher. He has a highly distinguished record of service at UT-Austin, and we are confident that he possesses the knowledge, skills, and values necessary for effective leadership for UTSA.”

Romo has a bachelor’s degree from UT-Austin, a master’s from Loyola University in Los Angeles, and a doctorate from UCLA.

---

**PLACES**

**University of New Mexico and EPA Sign Memo**

A Memorandum of Understanding (MOU) between the University of New Mexico (UNM) and the United States Environmental Protection Agency (EPA) Office of Policy has been signed. Formally strengthening the ties between UNM and the EPA, the purpose of the MOU is to enhance the education and training of minority students and to increase the relevance of university research to the EPA’s mission.

The goal of the program is to strengthen the growth of mutually beneficial research, educational, and outreach programs to be conducted cooperatively. The intention of the MOU is to provide positive impact in a number of areas, including: the relevance of EPA’s programs to Hispanic communities nationwide, particularly in New Mexico; the relevance of the UNM’s research projects to EPA’s environmental mission; and the number of Hispanic students electing to pursue graduate study and research careers in environmental-related fields.

According to Francisco Dóñez (pictured here), Hispanic employment program manager at the Office of Policy at the EPA, the EPA wants to establish relationships with minority institutions.

**Newsmakers at Eastern New Mexico University**

Lloyd Chaves (pictured here), a psychology instructor at Eastern New Mexico University-Roswell (ENMU-R), will be receiving a 1999 Teaching Excellence Award from the National Institute for Staff and Organizational Development (NISOD) this month at its International Conference in Austin, Texas, on Teaching and Leadership Excellence. He has bachelor’s and master’s degrees from ENMU.

A team of students enrolled in the Upward Bound Program at ENMU-R was winning participants in the regional Science Olympiad in Roswell, N.M. According to Upward Bound Program Director Andrew Gamboa, this was the first year that ENMU-R competed.

Senaida Herrera has been named to the All-State Academic Team sponsored by the New Mexico Association of Community Colleges. Set to graduate from ENMU-R this month, Herrera has a 4.0 GPA, is a member of her local Phi Theta Kappa, and for the last two years has mentored at-risk students.

**Latinas Speak at Southwest Texas State Conference**

“Latinas: Afirmación y Poder (Empowerment and Affirmation)” was the theme of the fourth annual Images of Women conference held at Southwest Texas State University. The conference committee had determined that as the population of Latinas in the United States increases, there is a continuing need to assure that their political, economic, and cultural needs are met.

Cherrie Moraga, Chicana writer, artist, playwright, and poet, and Christy Haubegger, president and publisher of *La Catrina* magazine,
gave keynote addresses.
Other speakers included Anita Marcos, Shelly Soto, Josefina Castillo, Susana Almanza, Laura Zárate, and Sandra Guzmán.

**TC3 Offers Study Program in Costa Rica**

Tomkins Cortland Community College (N.Y.), Elmira College (N.Y.), and Casa Yemana in Costa Rica have joined together to provide a unique summer study opportunity for students. From July 22 through August 13, enrolled students will study Women and Development.

Students will be able to gain a first-hand understanding of the participation of women in development, educational, environmental, business, recreational, and cultural projects in Costa Rica. Students have the option of studying the Spanish language for one or two additional weeks.

Students combine pre-trip readings with on-site lectures, discussions, and meetings with different people working in a variety of women's projects. Students will be in Costa Rica for 25 days.

**National Conference of Spanish in the U.S. at Florida International University**

The 17th annual National Conference of Spanish in the U.S., sponsored by Florida International University (FIU), was held in March.

Designed to bring to light the latest research and linguistic aspects concerning the Spanish language in the U.S., the conference covered bilingual education, culture, identity, and history.

“This conference brings the foremost experts in the study of linguistics together to discuss language issues that affect educators and the community at large, especially in large bilingual areas such as South Florida,” said Ana Roca, conference chair and organizer, and FL's associate professor of modern languages, Dr. John Lipski, of the University of New Mexico, and Dr. Guadalupe Valdés, of Stanford University were the keynote speakers. (Roca and Lipski are pictured here.)

**Cal State L.A. Recognizes Dr. Seuss**

In March, California State University-Los Angeles child development major Epi serrato (pictured here) presented an animated reading of *The Foot Book* by Dr. Seuss, and shared his special insect collection with the kindergartners at City Terrace Elementary School as part of Read Across America, a national campaign to encourage children to read.

The project at Cal State-L.A. featured special presentations by teams of student readers assigned to their six respective schools throughout Los Angeles.

“We are proud to be part of this national effort to expand children's understanding of the world through reading,” said Jorge Uraña, America Reads project director at Cal State-L.A.

**International Film Series at Purdue-Calumet**

Purdue University-Calumet (Ind.) recently wrapped up its International Film series, featuring films in Farsi, French, German, Portuguese, and Spanish. The series was sponsored by the university's department of foreign languages.

Among the entries were *The Green Wall* (in Spanish w/ English subtitles), presented by associate professor of Spanish José Castro-Trioste, and *Tristana* (in Spanish w/ English subtitles), presented by assistant professor of Spanish Marí Luisa García-Verdugo (pictured here).

**Multicultural Symposium at University of Texas-San Antonio**

The University of Texas-San Antonio (UTSA) recently held “Multiculturalism at the Century’s End,” a symposium sponsored by the UTSA College of Social and Behavioral Sciences.

It delved into a wide range of multicultural issues, including bilingual-bicultural education, intimate violence, and women on the Texas-Mexico border.

Patricia Zavella of the University of California-Santa Cruz presented the keynote speech, “Multiculturalism's Unfinished Work.”

**St. Joseph's College Art Exhibition**

The work of painter/lithographer Frank Diaz Escalet was exhibited at St. Joseph’s College (N.Y.) in March, as part of the college’s Celebrate Diversity! Week.

A self-taught artist whose paintings and lithographs are in art museums, college art collections, and private collections, the Puerto Rican-born Escalet first began painting at age 55. His subjects are largely Latino and African American, drawn not from life, but from his mind. “My imagination takes me all over. Everywhere,” Escalet says.

Many of his images deal with poverty and discrimination, and ask the viewer to empathize with the situations. (Pictured here is “Cumple Año Chicano, 1994.”)

**University of Houston News Briefs**

Published by University of Texas Press, the book...
was named the Golden Lights Awards Photography Book of the Year, and it was selected for inclusion in Choice's 35th Annual Outstanding Academic Books List.

UH alumnus Eduardo Elizondo received the George Magner Award for Excellence in Undergraduate Academic Advising. Elizondo is program coordinator of the Center for Mexican American Studies' Urban Experience Program, which offers individualized learning sessions, support services, full academic scholarships, and internships. He has a bachelor's degree and a master's, both from UH.

Smithsonian Institution Traveling Exhibition

A major Latino photography exhibition from the Smithsonian Institution in Washington, D.C., recently began a nationwide tour. The new traveling exhibition, "Americanos: Latino Life in the United States," presents an intimate portrait of the Latino community through the work of prize-winning photographers. The 120 photographs—organized around themes such as family, community, arts, and sports—reflect the breadth and variety of the Latino experience. A book, published by Little, Brown, and an HBO documentary special, will accompany the exhibition.

The exhibit, a project of Olmos Productions, has been organized by the Smithsonian Institution Traveling Exhibition Service and the Smithsonian Center for Latino Initiatives. The National Museum of American History Smithsonian Institution is currently hosting the exhibit until June 6, 1999. From September 15, 1999, through January 2, 2000, the Museum of the City of New York (NYC) will play host.

1999 Latino International Film Festival

The annual Latino International Film Festival is being held in Denver, Colo., this year, June 18-20. Founded by actor/producer Edward James Olmos, the festival began in Los Angeles in 1997. The event showcases feature films, documentaries, and videos from Latin America, Spain, Portugal, and the United States. It will include workshops, symposia, conferences, presentations, and panels featuring discussions on film.

Community interest spawned the idea to bring the film festival to Denver: "We have had a tremendous demand from the Latino community for more Latino films," said Marie McCord, festival director and vice president of Community Relations for Olmos Productions.

Latin American Women Dramatists: Theater, Texts, and Theories

Catherine Larson and Margarita Vargas, eds.

Contributors discuss 15 works of Latin American playwrights, delineate the artistic lives of women dramatists of the last half of the Twentieth Century—from countries as diverse as Argentina, Brazil, Chile, Mexico, Puerto Rico, and Venezuela—and highlight the problems inherent in writing under politically repressive governments.

Cuba y Cuba
by René Burri

In contrast to the impression most Americans have been given, that Cuba is paralyzed by communist austerity and drained by economic isolation, Swiss-born documentary photographer René Burri's new book shows a people emanating quiet pride even as they wait for change. Accompanied by an essay and poems, these striking pictures pay tribute to a people determined to meet the future with passion and equanimity.

The Hapsburgs: The Dream of an Empire

Although Rudolph von Hapsburg was crowned in 1293, the Hapsburg dynasty did not firmly establish itself until Frederick III passed the crown to his son, Maximilian I, in 1493. This program traces the roots...
of the struggle and shows how the Hapsburg dynasty established itself, both in Austria and Spain, shaping the course of European history for the next six centuries.

(33 min., color)
Item #FFH 8992

The Hapsburgs: Cross and Crescent

The internal and external forces set in motion during the 18th and 19th Centuries changed Europe forever. This program examines the political, religious, and class conflicts that led to the Thirty Years War. It shows how the Turkish forces advanced to the gates of Vienna and were defeated, establishing the boundaries of modern Europe.

Item #FFH 8993

The Hapsburgs: The Jewel in the Crown

After the death of Charles VI in 1740, there was a dynastic crisis and conflict between the Hapsburgs and the Hohenzollerns. Because she was a woman, Maria Theresa claimed to the throne was not widely accepted. The ensuing Seven Years War was a pivotal struggle that firmly established Maria Theresa on the throne, where she ruled for 40 years.

ECS National Forum and Annual Meeting

July 21-14
The 1999 national forum and annual meeting of the Education Commission of the States-
Book Review

by Gloria Duarte-Valverde

The Memories of Ana Calderón, by Graciela Limón.

Spanning forty-five years, Graciela Limón’s The Memories of Ana Calderón chronicles the rags-to-riches story of the protagonist, Ana Calderón, starting as a migrant farm worker and ending as a very successful businesswoman of Calderón Enterprises. Reminiscent of the narrative style in Sylvia López-Medina’s Cantaros, Limón’s narrative alternates between a first-person viewpoint and a third-person omniscient. The journey motif structures the novel, which begins in a fishing village near Puerto Real in southern Mexico. After his wife’s death, Rodolfo Calderón must raise eight children, seven “useless” girls and one son. Due to the Cristeros Revolution and the lack of work, he moves his family, including Octavio Arce, an orphan, north to work in the fields of Sonora. Their physical journey takes them from Puerto Real to Veracruz, to Mexico City, and finally to Hermosillo in northern Mexico where Rodolfo and the children harvest tomatoes. After approximately three months, he sneaks his children out of the camp at night because they are so indebted to the company store that they cannot make ends meet. Reyes Soto, the family’s benefactor, helps the Calderón family escape the conditions at Rancho la Concepción and transports them to a Los Angeles barrio, where most of the narrative action occurs.

Several historical wars—the Cristeros Revolution, World War II, and the Korean War—provide the background for the novel’s action. Just as important as these wars is the personal conflict raging within Ana Calderón. Hated by her father, Ana suffers knowing that her father blames her for poisoning her mother’s womb because after her birth, all the male babies died except the last one, César. Ana battles inside forces that constantly threaten her sense of identity. To help her cope, she withdraws towards herself when she is betrayed by two Mexican men, her father and her lover. Two Anglo men subsequently function as Ana’s surrogate fathers: Franklin Bast, who helps her raise her son, and Ezra Faermann, who gives her a job and then bequests her clothing enterprise and estate to her.

Graciela Limón interweaves Biblical and mythical elements into The Memories of Ana Calderón. The epigraph to the novel from Genesis 16:8,11 prepares the reader for the comparison between Ana and Hagar. While living with the Basta, Ana personalizes the passage from Genesis to her own situation; this same passage later becomes crucial in helping her recognize her own importance as an individual. Intertwined with this Biblical element is the Oedipus myth. Like Pelops, who curses Laius and his descendants, Rodolfo Calderón curses Ana and her unborn child, swearing “that only wretchedness and tragedy would fill their empty lives.” Three years later, when she returns to her father’s house, Rodolfo curses Ana and her son a second time. Like the Mexican teleseries, the novel is fraught with melodrama: physical abuse, betrayal, attempted murder, prison, incest. Upon her release from prison, Ana attempts to find her son without success. Ironically, she hires him to work for Calderón Enterprises, and the parallel to the Oedipus myth unravels to its tragic end. Like Iocasta, Oedipus’ mother, Ana falls in love and has an affair with her son. Upon discovering his identity, she realizes her father’s maldición has come true.

Two major feminine images that dominate Ana’s life: a woman with her legs spread apart, giving birth, and a penitent woman, praying at the Shrine of Guadalupe in Mexico City. The latter image of the sinful woman appears seven times in the novel and forewarns Ana: “You, too, will commit my sin. You, too, will do what has been forbidden.” Predictably, Ana seeks absolution for her own transgression and journeys to the Shrine of Guadalupe in Mexico City, where she becomes the penitent woman. Not finding the answer there, Ana returns to Los Angeles. Several years later, in 1975, she receives Amy Blast’s Bible with the underlined words, “The Lord has heard you in your humiliation.” Ana then undertakes one final journey to Puerto Real, the place of her birth, where the novel ends and where she symbolically sees “what light had been blurred shadows.” The narrative comes full circle with Puerto Real framing the novel.

My purpose in teaching novels such as The Memories of Ana Calderón in my Mexican American literature class is twofold. The first is to increase the students’ knowledge of the Mexican American culture by exposing them to works that focus on the relationships within families and between individual members and society. Second, because the majority of the students in this class are Mexican American females (at least two-thirds), I want to introduce them to female authors such as Denise Chávez, Sylvia López-Medina, Sandra Cisneros, and Graciela Limón, who write about female protagonists who struggle with cultural issues as they strive to maintain their identity and ethnicity. Because these students have experienced similar conflicts, they are much more vocal and enthusiastic about sharing and discussing with others in class such cultural issues as machismo, Marianismo, paznacco, la Virgen de Guadalupe, la l lora, and campesino.

Gloria Duarte-Valverde is associate professor of English at Angelo State University in San Angelo, Texas. She received her Ph.D. in Contemporary British Literature from Texas Tech University in Lubbock, Texas. She has five years teaching experience at the high school level and twenty years at the university level. De Duarte-Valverde teaches a variety of courses at ASU: English Composition, British Fiction, English as a Second Language, Comparative Literature, Women in Literature, and Mexican American Literature. She is very involved in ASU’s International Education Committee and directs the exchange program with Mexico.

We’re on the air and on the move

Sam Houston State University is proud to be listed among the top 100 colleges in graduating Hispanic students, but we’re not satisfied with that position. We’re doing little things to climb higher, like weekend Spanish programming on our campus radio station, and not-so-little things like holding an annual conference on Culturally and Linguistically Diverse Populations. Our S1 Million Project UpBEATT program is helping relieve the nation’s critical shortage of skilled bilingual educators. Those are just some of the reasons our Hispanic enrollment is also on the move — up 10 percent in five years.

Cindy Contreras reads the news on KSHU-FM. Sam Houston State University’s radio station.

St Jude Children's Research Hospital

**Postdoctoral Fellowships in Cancer Biology**

Postdoctoral Fellowships supported by an NIH/NCI Training Grant in Cancer Biology are currently available. Candidates with an interest in the application of basic research to understand the biology of cancer and who have recently completed the Ph.D., M.D. or Pharm.D. training are encouraged to apply. The St. Jude Cancer Institute comprises interdepartmental programs that involve both basic scientists and clinicians. Fellows will work under the direction of a research scientist in one of the following cancer-related programs: hemato-oncology and stem cell biology, signal transduction and malignancies, transplantation and autoimmune disorders, and viral oncopogenesis and immunity. Only U.S. citizens and permanent residents are eligible for these positions. Minority candidates are particularly encouraged to apply.

Applicants are encouraged to visit our website for additional information (www.stjude.org). Qualified applicants should provide a curriculum vitae along with a brief description of research interests and have three letters of reference sent to:

Janet A. Houghton Ph.D.
Program Director
NIH/NCI Training Grant in Cancer Biology
Source Code: MOHE599
Department of Molecular Pharmacology
St. Jude Children’s Research Hospital

DIRECTOR OF ADMISSIONS AND OUTREACH
San José State University is accepting applications for the position of Director of Admissions and Outreach. Reporting to the Associate Vice President for Enrollment Services, the Director will be responsible for managing the operation, budget and strategic direction of the University's undergraduate recruitment and admissions services. This position plans and supervises the University's recruitment and admissions staff, implements and evaluates university enrollment plans, optimizes the use of information technology, serves as a member of the Enrollment Services Management Team and co-chair of the Student Affairs/University Management team, and collaborates significantly with the campus community and external communities.

The University has begun the transition to FasTrack, an administrative software, including a student information module, it is expected that this position will be actively involved in the transition to this new system.

Qualifications: The successful candidate must have demonstrated effectiveness in managing programs in a diverse environment and have a commitment to educational equity efforts, sophisticated understanding of effective recruitment and admissions practices, including student information systems, successful enrollment strategies, operational excellence, ability to work with external constituencies, and a proven record of success.

The University offers a competitive salary, benefits, and a comprehensive benefits program. Position is available immediately. For more information, please call 408-924-7934. San José State University is an Equal Opportunity/Affirmative Action Employer.

Applications must include a letter of interest, resume, and three letters of recommendation. Completed applications must be received by May 15, 1999. The position will remain open until filled. The anticipated start date is August 1999.

MBA Funding for Tomorrow’s Business Leaders

The changing face of America’s Business

It's bright. It's intelligent. It's full of hope. And, it's definitely different from what it used to be. Because, as the face of America changes, so does the face of America's Business. Today, America thoroughly understands that behind those faces are valuable minds that reflect unique knowledge and viewpoints. And, it nurtures these minds through something equally as valuable – the Consortium for Graduate Study in Management. Through us, America's most respected corporations provide funding and support for the brightest and best Asian, Hispanic, and Native American students, enabling them to achieve their MBAs.

Equally as integral a part of the Consortium are the member universities that our students will be attending — top schools whose generous contributions are vital to the success of our program.

Yes, the face of American business is changing. And, as a result, so are its perspectives, opinions and valued cultural backgrounds. A broader, wiser, more diverse corporate America is our commitment and America's future. Ready to face the future?

Call the Consortium at (888) 658-6814.
Or, visit our website at www.cosmusmi.edu/8010.

CONSORTIUM for GRADUATE STUDY in MANAGEMENT

Member Universities: University of California, Berkeley • Indiana University Bloomington • University of Michigan Ann Arbor • New York University • University of Notre Dame at Chicago IL • University of Rochester • University of Southern California • University of Texas A&M • University of Virginia • Washington University in St. Louis • University of Western Michigan
V.P. or Ph.D.?

Some titles last as long as the job...

others last a lifetime.

Sure, a corporate career can be fast-paced, exciting. But if you were to obtain your business doctorate, you would not only have a stimulating, lifelong career, you would have a lifelong influence on others as well.

If you're an African-American, Hispanic-American, or Native American, The PhD Project is your link to your doctorate...the definitive source for everything you need to know to reach that goal. Think of it as your Ph.D. guidance counselor.

Then, think about this - obtaining your doctorate and becoming a business school professor will, in turn, encourage greater minority participation in business careers, as well as better prepare all students to work in a diverse environment. It has far more significance than a career move - it is your opportunity to realize a dream, to make a difference, to mentor a generation and, ultimately, to diversify America's business leadership.

The PhD Project was created for those with excellent academic credentials, the commitment and passion needed to enter the field of higher education, and the daring to take a risk. If you feel that you fit that description, call 1-888-2GET-A-PHD or visit us at www.phdproject.com for complete details.

Because you may be "V.P." today, but you could be "Dr." forever.

For more information, call 1-888-2GET-A-PHD

Walden University offers graduate programs that enable busy adults to pursue an advanced degree without interrupting career and family. Unlike traditional campus-based programs, your classroom is as close as your computer. Through distance delivery, Walden students set their own schedules and work from their own location when it's convenient to them.

Walden University gives working professionals the chance to earn a Ph.D. in Applied Management and Decision Sciences. Within the Management Division, specialized study is available in:

- Leadership and Organizational Change
- Finance
- Operations Research

Graduate programs are also offered in: Education (M.S./Ph.D.); Psychology (M.S./Ph.D.); Health Services (Ph.D.); and Human Services (Ph.D.). Master's programs can be completed entirely online in less than two years. Innovative Ph.D. programs combine technology, faculty mentors and flexible residencies.

Global in reach... Personal in approach... Our student-centered programs have been serving distance learners for three decades.

E-mail Walden University's Office of Recruitment at request@waldenu.edu, visit our Web site at www.waldenu.edu or call 1-800-444-6795, ext. 500 for more information.

Send resume by 5/20/99 to: Julie Deely, Human Resource Office, North Shore Community College, P.O. Box 3340, One Ferncroft Road, Danvers, MA 01923, Fax: 978-762-4017.
ASSISTANT DIRECTOR OF ALUMNI RELATIONS AND ANNUAL FUND
OFFICE OF DEVELOPMENT & ALUMNI RELATIONS

Alumni relations and annual fund programs seek to increase the involvement of alumni, parents, and friends of Grinnell in the life of the college. The assistant director will collaborate with department staff and alumni and parent volunteers to facilitate this participation through event planning, fundraising, and sharing of career information. A primary focus will be to work with students to increase their appreciation of the many opportunities available to them within the broader college community. Additionally, the assistant director will participate in the planning and implementation of a national program of regional events and the annual Town and Gown campaign.

QUALIFICATIONS: Bachelor's degree required. Candidates must have strong written, verbal, and interpersonal skills. We encourage candidates who have a high level of energy and self-motivation, initiative, follow through, a willingness to participate in evening and weekend functions, and the ability to represent broadly the mission of Grinnell College.

Founded in 1846, Grinnell College enrolls about 1,300 undergraduate students from every state and the District of Columbia in the United States and 40 other countries. The College's primary mission is to provide students with a broad, deep, and life-enhancing education that includes professional success, but also personal growth and social responsibility. Grinnell College offers an exceptional, rigorous, comprehensive, and opportunity-rich educational experience that has, at its heart, one-on-one interactions between students, faculty, alumni, and staff. Grinnell College is consistently ranked among the top nationally selective liberal arts colleges in the United States. It ranks in the top ten among all colleges and universities in endowment resources per student and the top twenty in alumni gifts per student. Additional information can be found at the college's web site: [www.grinnell.edu](http://www.grinnell.edu).

APPLICATION PROCESS: To be assured of consideration, submit a letter of application, a resume, and a list of three employment references to: Ms. Jan A. Vanek, Office of Human Resources, Grinnell College, P.O. Box 809, Grinnell, IA 50112 by May 28, 1999. The position will remain open until filled.

Grinnell College

Grinnell College is an equal opportunity/affirmative action employer committed to employing a highly qualified staff which reflects the diversity of the nation. No applicant shall be discriminated against on the basis of race, national or ethnic origin, age, gender, sexual orientation, marital status, religion, creed, or disability.

ACADEMIC PEDORATRIC ORTHOPEDIC SURGEON

The Department of Orthopedic Surgery at the SUNY Health Science Center at Syracuse is seeking a BC/BE pediatric orthopedic surgeon to join the full-time faculty. Applicants must either have completed a pediatric orthopedic fellowship or have specific academic experience. Clinical responsibilities include the management of patients with general pediatric orthopedic problems, neuromuscular conditions, and complex spine deformities. Academic rank and salary commensurate with education and experience. Submit letter of inquiry and curriculum vitae to:

David G. Murray, M.D.
Professor and Chairman
Department of Orthopedic Surgery
SUNY Health Science Center
750 East Adams Street
Syracuse, NY 13210

The State University of New York is an Affirmative Action/Equal Opportunity Employer.

SAINT AUGUSTINE'S COLLEGE
Raleigh, North Carolina

PRESIDENT

The Board of Trustees of Saint Augustine's College invites applications and nominations for the position of President. Saint Augustine's College is a private, coeducational, four-year college of liberal arts located in the desirable living triangle area of North Carolina. A historically black college, Saint Augustine's offers the Bachelor of Arts and the Bachelor of Science degrees in a wide range of disciplines and is fully accredited. The College was founded in 1867 by and maintains its association with the Episcopal Church.

The academic programs offered by the College are broadly arranged in five divisions: Business Education; Liberal and Interdisciplinary Studies; Natural Sciences; Mathematics and Applied Health; and Urban Social and International Studies. With over 1600 students and approximately 90 full-time faculty, the College has an operating budget of $25 million with an endowment of about $20 million.

The new President must have credibility, stature, and the capacity to move quickly into the challenges of the position. The President will be a skilled communicator, an effective listener, and a strong advocate for academic excellence and collegial relationships with the College's faculty, staff and students; be an advocate of the principles and traditions of historically black colleges and ""en"" implementing solutions to ensure academic excellence and financial equilibrium.

The successful candidate will possess appropriate academic credentials, preferably an earned doctorate; an appreciation for and understanding of the academic and value-laden mission of the College; be a knowledgeable, articulate, seasoned administrator with at least ten years of senior administrative experience in higher education or similar organization; possess an ability to work in partnership with the Board of Trustees and provide principled leadership as the chief executive officer, with strong managerial oversight of college activities and human and fiscal resources. An open, innovative, and energetic leadership style capable of advancing Saint Augustine's and bringing together diverse constituencies coupled with the ability to enhance college resources is desired.

Screening of materials will begin immediately and continue until the position is filled, ideally for the upcoming school year. For full consideration, applications should be submitted by May 24, 1999 and should include a curriculum vitae and a cover letter sent to the consultants supporting the College in this search.

Walden University

155 Fifth Avenue South
Minneapolis, MN 55401

MBA PROGRAM Core Faculty Positions Available Summer 1999

Walden University, a leader since 1978 in distance graduate education, seeks qualified individuals for appointment as core faculty for a new MBA program which anticipates enrolling its first students in September 2000. These positions are for part-time independent contractors and allow individuals to work through on-line communication from their present locations. Core faculty will participate in developing syllabi and other course materials during the first year of their appointments. Then, beginning with the first student enrollments, they will teach the courses they have prepared.

We anticipate appointing 11 core faculty members with each person working to prepare, and eventually teach, one of the following courses:

MBA 6100 Management Practices
MBA 6105 Organizational Behavior
MBA 6110 Management Information Systems
MBA 6120 Business Statistics

MBA 6130 Principles of Marketing
MBA 6140 Managerial Accounting
MBA 6150 Managerial Economics
MBA 6160 Financial Management

MBA 6170 Global Management
MBA 6180 Legal and Ethical Issues for Managers
MBA 6190 Strategic Management and Planning (Capstone)

Among Walden's current enrollment of more than 1,300 students, 55% are female and 35% come from under-represented populations. Our mission is to prepare scholar-practitioners who are effective agents of change in their fields, professions and communities. As a "virtual" university, Walden uses a unique distance-learning model to deliver graduate programs to working professionals through ongoing electronic networking with faculty. Library access is provided through a partnership with Indiana University-Bloomington. Walden University is accredited by the North Central Association of Colleges and Schools and is an equal opportunity employer. Women and individuals from under-represented groups are encouraged to apply.

Qualifications: Candidates must hold an earned doctorate, have at least three years experience teaching in a graduate business program and/or a business management position, have experience in preparing course manuals and/or syllabi; be comfortable and effective in the electronic environment; have outstanding communication skills; demonstrate the highest levels of academic integrity and be strongly student-centered. Preference will be given to candidates with experience in management, adult learning, distance education and/or instructional technologies. To be considered for a position with Walden University, applicants who are primarily affiliated with another institution must obtain all appropriate approvals from that institution and be in compliance with its conflict of commitment policies.

Please send a letter of application and current Curriculum Vitae to: Mr. John Allen at Walden University, 155 Fifth Avenue South, Minneapolis, MN 55401 or e-mail applications to: jallen@waldenu.edu

Walden University is accredited by the North Central Association of Colleges and Schools. 111 North LaSalle Street, Suite 2000, Chicago, Illinois 60602-3904. © 1994. All rights reserved.
VACANCY ANNOUNCEMENT

New Jersey City University is a culturally diverse urban institution located in the New Jersey/New York metropolitan area. The university serves over 8,000 students and employs a faculty of 250. It is comprised of three colleges: Arts and Sciences, Professional Studies and Education. The College of Professional Studies offers graduate and undergraduate degrees in Business Administration, Criminal Justice, Fire Safety, Security Administration, Health Sciences and Nursing, and includes a sports and leisure studies service program.

COLLEGE OF PROFESSIONAL STUDIES

Assistant Dean

Responsibilities include: identifying and developing innovative programs; promoting and supporting the use of instructional technology; establishing linkages to other colleges/universities and the community, working with advisory boards; data collection and analysis; assisting students; and supporting the Office of the Dean as needed.

Qualifications: Position requires terminal degree from regionally accredited institution and credential to teach in one of the College's departments. Successful candidate will demonstrate commitment to furthering the educational goals of diverse student body and possess record of success in higher education administration. Full-time college teaching experience preferred. Expertise in computer technology essential. Must be innovative, well organized, demonstrate strong leadership and interpersonal skills and show evidence of ability to work collaboratively with constituents of the college. Excellent opportunity for forward looking professional who enjoys challenging, fast-paced environment.

Qualified candidates should submit a letter of application, curriculum vitae and the names, addresses and telephone numbers of three references by June 7th to:

Sandra Bloomberg, Ph.D., Dean
College of Professional Studies

BROOKDALE COMMUNITY COLLEGE

Faculty Position

One of the nation's premier community colleges, Brookdale Community College is an innovative and comprehensive-open admissions-two-year institution. We're proud to maintain the highest standards in education and proud of our dedication to the community. We seek colleagues who share our commitment to quality instruction, collaborative relationships, service, diversity, innovation and technological literacy. We invite applications for the following faculty position for September 1999. This is a full time, tenure track, entry level position.

STUDENT DEVELOPMENT SPECIALIST - COUNSELOR

Master's degree in Counseling or closely related field required. Counselors employ a variety of individual/group counseling methods to provide a full range of professional counseling and advisement services. There is an increasing emphasis on planning and implementing innovative, comprehensive strategies and interventions to support student growth and development and facilitate academic success in today's highly transitional and diverse educational environment. A highly flexible team orientation, faculty and staff, is required. Essential job functions include counseling, and understanding of the diversity of today's student population are essential. Experience in community college setting and/or related work experience, is preferred.

POSITION INFO: One part-time position is available. This is a full time equivalent position.

APPLICATION PROCESS: Candidate must possess a bachelor's degree in counseling or related field. A master's degree is preferred. Candidate should also possess a strong commitment to diversity and its role in the educational process.

BROOKDALE COMMUNITY COLLEGE

765 NEWMAN SPRINGS ROAD - LINCROFT, NJ 07738

ATTENTION: Human Resources Department

APPLICATION DEADLINE: Materials must be received postmarked no later than May 28, 1999.

Visit our website at http://www.brookdale.cc.nj.us

This is an Equal Opportunity/Advisement/Action Employer.

The Manager will provide strategic direction, technical guidance, and team leadership in updating, maintaining, and operating the college's administrative information system. The successful candidate will possess a Master's degree in Computer Science or related discipline or equivalent training and experience. Three years' experience managing systems development, computer systems administration, and operations and system support activities in a complex environment. Excellent knowledge of information technology is essential. Experience with systems analysis and planning is also essential. To apply, visit our website at http://www.washenaw.cc.mi.us/jobs.
VICE PRESIDENT FOR DEVELOPMENT AND ALUMNI RELATIONS

The University of Vermont announces its search for the Vice President for Development and Alumni Relations and invites nominations and expressions of interest.

As an institution chartered as a private college in 1791 with ten percent of its current $281 million operating budget supported by the State, the University of Vermont is comprehensive, combining an undergraduate, graduate education and education for the professions for 9,000 students, taught by 880 faculty members. Its new president and her leadership team are committed to moving UVM to a new level of excellence and visibility among the nation's public research and teaching universities. It is located in a beautiful environment near the shore of Lake Champlain with the Adirondack Mountains to the west and the Green Mountains to the east.

The Vice President for Development and Alumni Affairs is the senior development officer of the University. The Vice President will report to the President and serve as a member of her Executive Committee, working collaboratively with the Provost, the Provost's Council and the Board of Trustees.

The Vice President will establish a well-coordinated development and alumni relations team at the University and focuses into a capital campaign scheduled to begin next year in support of its newly affirmed academic goals and aspirations.

The Vice President will create the strategy for the development and alumni relations initiatives and implement that strategy, with the support of a 50-member staff. Mentoring, managing and mentoring that team, assessing activities to strengthen their impact, galvanizing support among the University constituencies, and establishing the infrastructure to support their success are critical. Given training and support, the Board and the faculties will become important allies in the campaign effort.

The successful candidate will bring solid senior level management and fund-raising experience to the University. Ideally, the candidate will possess an advanced degree. Superior communication skills are essential. An appreciation of the complex nature and needs of a public private university will be valued as will support for its academic mission.

Screening of background information will begin immediately. Please submit nominations and expressions of interest in confidence to:

The University of Vermont
COE Educational Management Network/Witt/Kieffer
3 Park Avenue, 29th floor
New York, New York 10016

For further information, please contact Mark Elizabeth Littke at 212-880-2666 or at

3825 Wisconsin Ave., N.W.
Washington, DC 20016

Executive Director

To lead the Graduate Record Examinations Program

Educational Testing Service (ETS) is the nation's largest educational assessment organization and a leader in educational research. We develop and administer achievement, occupational, and admission tests (such as the SAT, GRE, and TOEFL) for clients in education, government, and business.

For our Princeton, NJ headquarters, we seek a well-qualified individual for a challenging and rewarding Executive Director position. Reporting to the Vice President of Graduate & Professional Education, the Executive Director directs, manages, and plans for the Graduate Record Examinations Program (GRE) under the auspices of the GRE Board (a policy council comprised primarily of graduate deans). The GRE Board sets policy for the GRE Program and represents the graduate community. The Director explores and proposes new programs and activities to the GRE Board. The Director serves as lead administrator for the GRE Board, acts as primary liaison between the GRE Board and ETS, and manages the day-to-day activities of the GRE testing program, services and research. The Director also represents the GRE program to other organizations and agencies such as the Council of Graduate Schools (CGS) and the Association of Graduate Schools (AGS) and may participate in their workshops and annual meetings. The Director will lead efforts to redesign the current computerized test to meet the evolving needs of graduate education. In addition, the Director develops budgets for review by the Board's Finance Committee and provides overall leadership and management of a high-level professional and support staff for the GRE Program.

Requirements:

- Masters degree (Doctorate in a sub-related area strongly preferred)
- Substantial experience in college administration, vocational/technical program development and teaching at the college level with a record of increasingly broad responsibilities
- Excellent communication and organizational skills
- Annual Salary Range: $49,205-$57,210

Requirements for Dean of Occupational & Technical Education:

- Masters degree (Doctorate in a sub-related area strongly preferred)
- Substantial experience in college administration, vocational/technical program development and teaching at the college level with a record of increasingly broad responsibilities
- Demonstrated success in innovative programs that enhance student success outside the classroom
- Excellent communication and organizational skills
- Annual Salary Range: $49,205-$57,210

Please deliver or postmark one application packet per position of interest by May 28, 1999.

PRESIDENT
Colby College, a private, highly selective liberal arts college, consistently ranked among the country's finest, seeks nominations and applications for the position of President. The new President will succeed William Cotter, who will retire on June 30, 2000 after 21 years of distinguished leadership.
Chartered in 1813 and located in Waterville, Maine, Colby has approximately 1,800 undergraduate students and 162 faculty. The College has an operating budget of approximately $71 million and an endowment of $242 million. In December 1999, the College plans to successfully conclude its Campaign for Colby, exceeding its $100 million goal. Located on an attractive and well-maintained 714-acre campus, the College is engaged in $40 million of building and renovation projects, to include science, fine arts, athletics and residential facilities.

The ideal candidate will have a record of outstanding achievement in higher education or other professional field. Demonstrated strengths in intellectual leadership, fund raising, planning, and fiscal management are essential. An earned doctoral degree or its equivalent is expected. The College seeks a leader who possesses integrity, intellect, imagination, and energy, along with an understanding and the ability to embrace the College's mission and its liberal arts philosophy. The successful candidate will be committed strongly to excellence in teaching and scholarship, and maintaining a close working relationship among faculty, students, trustees and administrators. A candidate should demonstrate a commitment to the liberal arts and sciences as a central component of higher education, be dedicated to the success of students of all backgrounds and varied interests, be committed to the College's role as a contributor to the intellectual and cultural life of the nation, and have a demonstrated commitment to diversity and the development of all students as scholars and leaders. The College seeks a candidate with a record of achievement in administration and significant academic leadership experience. The College seeks a candidate who will bring to the College a broad base of understanding of higher education and the College's mission.

Members of the search committee will begin reviewing applications immediately and continue until the search is filled. For best consideration, please send materials no later than June 4, 1999. Nominations, inquiries and expressions of interest should be forwarded, in confidence, to:
James Crawford, Chair
Presidential Search Committee

WAYNE, NEW JERSEY
www.wpu.edu
An Equal Opportunity Institution Committed to Diversity

FULL-TIME FACULTY POSITIONS
Harford Community College is a comprehensive two-year institution located in Bel Air, Maryland with easy access to Baltimore City, Washington, Philadelphia, and the Chesapeake Bay. The College is a dynamic and progressive institution for higher education committed to excellence in all of its programs and services. Systemic change in a collegial environment and life-long learning. Applicants are encouraged to examine and whose interests and perspectives will be reflected and broadened the cultural and ethnic diversity of our campus and curriculum. Applicants must be innovative and dynamic academics and curriculum and feel comfortable teaching in a non-traditional environment.

APPLIED TECHNOLOGIES INSTRUCTOR (TENURE-TRACK POSITION): Responsible for teaching a variety of technical courses and coordinating the associate of applied science degree program for high performance manufacturing and computer-aided drafting and design (CADD). A masters degree and experience required in one of the following areas manufacturing technology, CAD, electronics, mechanical engineering, and technology education or computer and/or computer science. Experience in teaching CADD, mechanical computer-aided drafting, computer-numerical control systems, mechanics, hydraulics, pneumatics, and manufacturing processes is also required. Must be able to coordinate student advising, course scheduling, program assessment and student development. Full time.

COMPUTER INFORMATICS SYSTEMS INSTRUCTOR (TENURE-TRACK POSITION): Requires a masters degree in computer science or related field. This college teaching experience preferred. Must have demonstrated expertise with a variety of computer applications, including Microsoft Office 97 products, Windows 95, Power Point and Excel. Experience with telecommunications, internet technologies, computer programming and computer development experience is desirable. Full time.

Full-Time Positions Available At One Of The Nation's Leading Community Colleges

Brevard Community College • Florida

DATA BASE SYSTEM ANALYST, SENIOR
Bachelor's degree in Computer Science or related field and at least two years experience of equivalent combination of education and experience working with Oracle database. Experience with SQL and knowledge of DSS/Banner software desired.

SENIOR PROGRAMMER/ANALYST
Bachelor's degree in related field or equivalent experience programming with C/S or related tool. Two to three years related experience.

WEBMASTER
Bachelor's degree in related field with at least two years of the following experience or an equivalent combination of education and the following experience: maintaining and supporting a UNIX server; maintaining and setting up websites, programming in HTML, C, Perl, and CGI scripts; and database programming for the web. Familiarity with internet standards such as HTTP, FTP, VRML, JAVA, and XML.

DEAN
School of Communications and Theater

Temple University seeks a creative and experienced leader as Dean of its highly respected School of Communications and Theater. The School has won national recognition for its departments in Broadcasting, Telecommunications and Mass Media, Film and Media Arts, Journalism, Public Relations and Advertising, and Theater.

The new Dean will be part of the University's significant investment in initiatives to enhance its national reputation. Temple seeks candidates with a strong record of success in academia and in the communications industry. The University seeks candidates with a strong record of success in academia and in the communications industry. Candidates should show intellectual achievement, possess entrepreneurial and advocacy skills, and offer strong external contacts. An advanced terminal degree or equivalent experience in an appropriate field is desirable. Salary is highly competitive and commensurate with experience.

Temple is a Carnegie Research University with 30,000 students from all 50 states in the U.S. and 96 countries worldwide. Temple has five campuses in greater Philadelphia, the fourth largest media market in the U.S., a city with vibrant cultural and economic sectors. The University also has campuses in London, Rome, Tokyo, and programs around the world.

Review of applications begin on March 15 and will continue until the position is filled.

Send a current C.V. personal statement and four references to Professor Concetta M. Stewart, Chair, Dean Search Committee, School of Communications and Theater, Office of the Provost, 401 Conwell Hall, Temple University, Philadelphia, PA 19122.

Temple University is an affirmative action equal opportunity employer.

Vice President for Research & Dean of the Graduate College
University of Oklahoma

As President, I am committed to providing the resources and environment required to strengthen the research and graduate education at the University. We seek to create a dynamic momentum in this area to ensure that we will remain one of the outstanding comprehensive research universities in the nation. — David L. Boren, President

The University of Oklahoma invites applications and nominations for the position of Vice President for Research and Dean of the Graduate College, Norman Campus.

THE UNIVERSITY: The Norman campus—home to more than 21,000 students, including more than 3,700 graduate students. The University is the largest in the state and is proud of its presence in research priorities, graduate students, and faculty and research and total external funding. The mission of the Norman campus is to develop research programs and creative activities of national significance, to provide quality programs at the baccalaureate, master's, and doctoral levels, and to be a public university, to provide programs of continuing education and public service to the state. The campus offers baccalaureate degrees in 25 areas and doctoral degrees in 14 areas. Additionally, the University has a large graduate and undergraduate education program with 12 degrees delivered in a range of areas. The University is located in Norman, a progressive, growing city that provides a welcoming environment.

The University is going through a period of unprecedented growth and achievements. One example of this includes the growth in endowments, which have doubled in the last five years, growing from $254 million to $522 million. Another example is the recruiting of an outstanding student body that we are now first in the number of merit scholars per capita of any public university in the United States. During this time, sponsored research expenditures have increased more rapidly than for any other school in the Big 12 since FY95, with external funding across the Norman and Health Science campuses having exceeded the $300 million mark.

PRIMARY RESPONSIBILITIES:

- Provides dynamic leadership in developing innovative and internationally recognized research programs and significant increases in external funding for research and creative activity.

- Provides dynamic leadership in developing excellence in graduate education and research.

OTHER RESPONSIBILITIES:

- Promotes and allocates all research funding.

- Coordinates graduate programs and serves as president's officer for the Graduate Council.

- Reports to the President.

QUALIFICATIONS:

- Demonstrated success in research and creative activity.

- Awareness of broad range of scholarly, research, and creative activities.

- Successful administrative experience in positions of significant responsibility.

- Substantial experience in grants and contract activities, with government agencies and/or private sector.

- Awareness of national funding agencies, foundations, and grant programs.

- Experience in governmental teaching and research supervision.

- Terminal degree and experience in a discipline appropriate for tenure appointment.

- Knowledge of research, training, and professional development of faculty.

Review of the candidates will begin May 14, 1996, and continue until an appointment is made. The salary will be competitive.

A complete application consists of a letter of application and curriculum vitae, and a list of five references. Please send nominations and applications to:

Dr. James P. Pappas, Vice Provost for Outreach
Chair, Search Committee for Vice President for Research
University of Oklahoma
CCE Administration Building, 1700 Asp Avenue, Room 111
Norman, OK 73072-5400
Tel: 405-325-6361 FAX: 405-325-7319

Women are encouraged to apply. The University of Oklahoma is an Equal Opportunity/Affirmative Action Employer.
KERN COMMUNITY COLLEGE DISTRICT

CHANCELLOR

The Board of Trustees of the Kern Community College District (KCCD) invites application for the position of Chancellor. The multi-campus district serves an area of approximately 24,800 square miles in parts of Kern, Tulare, Inyo, Mono, and San Bernardino Counties. Geographically one of the largest community college districts in the United States, the Kern District serves a population base of about 700,000 and an estimated enrollment of 22,500 with an annual operating budget of approximately $82 million.

INQUIRIES SHOULD BE DIRECTED TO:
Mrs. Lauraine A. Cook
Assistant Chancellor
Kern Community College District
2100 Chester Avenue
Bakersfield, CA 93301-4099
Telephone: (661) 336-3109
E-Mail: pwhitney@kccd.edu

Applications will continue to be accepted until the position is filled. The Chancellor Screening Committee will begin reviewing applications June 7, 1999.

Palo Alto College

Dean of Arts & Sciences

Palo Alto College, one of four colleges in the Alamo Colleges District and a Hispanic Serving Institution, is situated in a diverse urban community within the nation's third largest city.

A comprehensive community college with an enrollment of 15,300, Palo Alto College has strong programs in liberal arts and applied sciences and maintains transfer articulation agreements with ten colleges/universities in Texas and outside of Texas. The College has established a national reputation in transfer programs, learning research technology, and at the site of a nationally recognized National Science Foundation grant and special programs.

This position is expected to serve as a team leader in concert with the College President, faculty and staff. The successful candidate will have the vision and energy to address academic issues of the 21st century and have demonstrated commitment to diversity, instruction, operational programs, and distance learning.

- Masters degree in a job related area strongly preferred
- 5 years full-time instructional teaching or institutional administrative experience preferably at a community college with a diverse population
- Budget and planning experience
- Knowledge of principles and practices related to curriculum and program development and evaluation
- Excellent communication and organizational skills
- Annual Salary Range: $40,000-$55,000

Please deliver or postmark application b. May 21, 1999.

LATINOS, HUNGER, AND NUTRITION

On a late November afternoon, two outreach workers make their way through the hustle and bustle of Hartford’s Latino community. Merengue music blares out of tiny speakers from shops that dot the potholed sidewalks. As restaurant doors open, the rich aromas of chicharrón, arroz con gandules, and bacalao wait in the cold, damp New England air.

The women enter a side street and approach an old house in need of paint. As they walk up its dimly lit stairwell, they hear children at play. The apartment they visit is tidy but sparse. In the dusty and nearly bare cupboards, they see some cereal, a small bag of rice, and dry milk. The refrigerator door opens, a flickering light revealing empty shelves. Thanksgiving is just around the corner.

Although the U.S. is experiencing unparalleled economic growth, millions of us are touched by hunger every day. Women and children living in poverty, older adults, the homeless, and ethnic minorities are at special risk. Thousands of others are what researchers and policy experts call “food insecure.” Even if they do not go hungry, their access to nutritionally adequate and safe foods is limited or uncertain.

Research shows that food insecurity and hunger are 200 percent more prevalent among Latinos than among Whites. In Hartford, Conn., a study of low-income Latino families with children between one and six years of age found that 41 percent were food insecure and that more than one in five children had been exposed to hunger.

In the long term, food insecurity can result in a poor quality diet, undernutrition and problems such as iron-deficiency anemia. Undernourished children can suffer cognitive deficits, have difficulty concentrating in school, and are more susceptible to infection due to immune suppression. Malnourished adults, especially the elderly, suffer, too, in terms of disease resistance.

Food insecurity can result in overnutrition and obesity, as people consume a poor quality diet high in fat and refined sugar and low in fruits, vegetables, and lean meats. Obesity is linked with increased lifetime risk of chronic illness, including coronary heart disease, type 2 diabetes, hypertension, and some cancers.

Recent years have seen a large increase in the number of obese children, a trend perhaps associated in part with limited physical activity due to the lack of safe playing areas in inner cities. The prevalence of obesity in some Latino groups is among the highest on record.

It seems paradoxical to have hunger and food insecurity in the land of plenty. Yet the factors responsible are evident. Many of the people at risk reside where the cost of living is high. Payments for rent and utilities often leave little money for food. To stretch the food dollars, people tend to buy lower-price items—which are often high in fat and sugar.

Over the years, many supermarkets have fled the inner city. Between 1968 and 1991, Hartford went from 13 supermarkets to two. The lack of competition often leads to rising food prices that further tax those on limited incomes.

Low-income people might not have access to private transportation. The cost of public transportation—especially taxi services—can cut into already stretched food budgets.

The loss of farmland in many states and the lack of locally grown produce might limit the availability of fresh produce in economically depressed areas.

For many reasons, food insecurity among Latinos deserves more attention. While the poverty rate for other minorities has gone down in recent years, that rate has increased to 29.5 percent for all Latinos. The rates are even higher for Latino families (33 percent for Puerto Ricans, 38.4 percent), and Latino female-headed households (50.9 percent).

The accelerated rate of growth of the Latino population in the U.S. in recent years (53 percent vs. 7 percent for non-Latinos) suggests that by 2050, one in five Americans will be of Latino origin. This rapid growth along with a high level of poverty places Latinos at risk for food insecurity.

Latinos are not a homogenous group but rather a rich mosaic of cultural groups with different social and economic experiences. Programs intended to alleviate hunger through direct assistance and/or education need to take this diversity into account and not rely on a “one size fits all” model.

Recent data show a drop by one-third in the nation’s food stamp rolls. While some see this reduction might be attributed to the strong economy, research shows that there are eligible Americans who are not enrolling in the program. Food and nutrition programs need to become culturally competent to improve their effectiveness and target those who are truly in need. In the long term, improvements in nutrition will help reduce health care costs.

Not long ago, the federal government pledged to reduce by one-half the number of food-insecure people in the U.S. by the year 2015. To accomplish this, the root cause—food insecurity need to be addressed. Education, training, and job opportunities provide avenues for escaping poverty and food insecurity. Until then, we might continue to see empty refrigerators and cupboards in the midst of our country’s prosperity.
the INSTITUTE for
the ADVANCED STUDY
of RELIGION at YALE

ELIGIBILITY

Candidates from various disciplines are invited to apply, so long as their research interests involve religion as a key component or variable. Research must also relate to the theme: Religion, Race and Ethnicity.

AWARDS

Senior residential scholars will be awarded up to $75,000, and junior residential scholars up to $55,000. All residential fellows will be entitled to a housing subsidy, travel expenses and a $1,000 research account.

Non-residential dissertation fellows will be awarded a stipend of $17,000 and post-doctoral fellows will receive a stipend of $34,000.

APPLICATION PROCESS AND DEADLINES

Applicants should send a complete institute application form, a letter of intent, a copy of the R.A. and a brief description (3-5 pages) of the research topic and two letters of recommendation by individuals acquainted with the applicant's work. Applicants for dissertation fellowships should also send a copy of their graduate school transcripts. The Institute will be contacted by contacting the Institute by phone at 203 432 4040 by email at asry@yale.edu or through our website at www.yale.edu/asry

The application deadline for residential and non-residential fellowships for the 2000-2001 academic year is November 15, 1999.

THE INSTITUTE FOR THE ADVANCED STUDY OF RELIGION AT YALE

The Institute for the Advanced Study of Religion at Yale, established through a grant from The Pew Charitable Trusts, centers comprehensive interdisciplinary research around the broad themes of American Religion in a rapidly changing world and opens opportunities for scholars throughout the world to confront issues about the role religion has played nationally as well as globally.

2000-2001 RESIDENTIAL FELLOWSHIPS

Three advanced scholars will be invited to Yale to pursue individual research and writing within an interconnected environment of seminars, symposia, lectures and scholarly presentations. Fellows will interact with Yale faculty fellows and a wide panoply of staff, students, academic centers and departments throughout Yale.

Fellows will be expected to be in residence from September through May, to attend all Institute functions and to produce significant scholarship individually or in conjunction with other fellows. Fellows will also be given the option of reaching an undergraduate or graduate course.

For the 2000-2001 academic year, the Institute will extend the theme on Religion, Race and Ethnicity.

2000-2001 NON-RESIDENTIAL FELLOWSHIPS

The Institute will award between four and eight non-residential dissertation fellowships and post-doctoral (or first book) fellowships.

Non-residential fellows will be expected to complete their dissertation or first book during their tenure as fellows. They will also be expected to visit Yale twice during their fellowship year, first for the Fall Fellows Seminar and again for a national conference during the spring term. As participants in the conference, fellows will share their work with their colleagues and invited critics.

Whitney Humanities Center, 33 Will Street, Room 320, New Haven, Connecticut 06520, Phone: (203) 432-4040, Fax: (203) 432-1681, Email: asry@yale.edu, Website: www.yale.edu/asry

Serving Undergraduate Students

BY GUSTAVO A. MELLANDER

Most Hispanics begin their higher education at their local community college. Others go off to their state universities, and a few seek off to the most prestigious of the nation’s independent institutions.

The question is—how well are they being served? By all reports, teaching at the community college level is excellent. What about our most prestigious universities? Specifically, what is the quality of the teaching they encounter there?

University Endowments

The booming economy has been a blessing for our institutions of higher learning throughout the 1990s, with the prestigious research universities being the most favored.

Endowment funds have swelled with cash donations and with appreciated stocks, artwork, and other gifts as well. In turn, college investments in stocks, bonds, and real estate have benefited from the exceptional bull market and good economic times.

As to be expected, Ivy League schools have done particularly well as of mid-1997. Princeton’s endowment topped $5 billion, Yale had $5.7 billion, while Harvard led the pack with $41 billion. These riches have since risen considerably even with the occasional dips in the stock market.

Undergraduate Teaching

The Carnegie Foundation, however, has pointed out that America’s top universities have too often failed, and continue to fail, their undergraduate populations.

The report notes that this nation’s 125 research universities—those that offer a range of baccalaureate and graduate degrees and receive several million a year in federal funding for research—are focusing on high-level research work at the expense of students.

“University recruitment materials display the world-famous professors, the splendid facilities, and the ground-breaking research that goes on within them—but thousands of students graduate without ever seeing the world-famous professors or tasting genuine research.”

Some of their instructors are likely to be badly trained or even untrained teaching assistants who are groping their way toward a teaching technique, some others might be tenured drones who deliver set lectures from yellowed notes, making no effort to engage the bored minds of the students in front of them.

Many students graduate having accumulated whatever number of courses is required—but still lack a coherent body of knowledge or any inclination as to how one sort of information might relate to others. And all too often, they graduate without knowing how to think logically, write clearly, or speak coherently.

Is this the reality at our most prestigious institutions? Yes, for the schools studied by the commission include the cream of our education establishment: Harvard, Stanford, Yale, Princeton, Duke and Rice. They are, in short, some of our most respected (and most expensive) institutions.

Worse yet, the report clearly points out that undergraduate tuition is one of the major sources of university income, helping to support research programs and graduate education.

In plain English, undergrads and their parents are subsidizing the programs that divert university attention and resources away from these educational needs of those very undergrads.

Options

Clearly, something must be done to remind universities that their primary goal should be to teach students, to provide them with the best education possible—not to give professors the most free time to pursue research.

Research is important and indeed necessary. But it should not be subsidized on the backs of the most vulnerable of all—undergraduate students.

It has long been suggested that prestigious universities should concentrate on teaching. A few years ago, Stanford’s president pledged his institution to focus on undergraduate teaching. Others have advocated comprehensive exit examinations. Design an exam, it is touted, to be administered to students entering college and again just prior to graduation to measure their progress. But most people are cool on yet another exam.

Another option would be a consumer revolt. Students, parents, and alumni could unite and begin demanding more for their money. Even the most nostalgic, school-spiritual alumni must be disturbed by the Carnegie report. Does the present generation of students deserve any less of a quality education than did previous ones? If alumni were to tie their annual donations to good and effective undergraduate teaching, visible improvements would follow.

There are already indications that public pressure has worked in other arenas. Recently, Princeton, concerned about a decline in middle- and lower-income applicants, announced plans to provide more student grants as opposed to loans. Yale promptly followed suit.

A handful of universities, most notably Stanford and Columbia, also pledged to stop the widespread practice of reducing school-awarded aid to students who win scholarships from other sources. Moreover, tuition increases have slowed considerably since 1993, though this might be less the result of public pressure than the fact that inflation is so low.

Such actions are a clear step in the right direction. But they are only a first step and a relatively small one. It’s time to insist that our top universities start living up to their reputations and their price-tag.

Bottom line

Hispanics must not only go to college. They must be guaranteed the best education possible. Hispanics start college with high expectations. But in many cases, their limited budgets and at times less than stellar high school experiences make it a high-risk venture. That being the case, should not institutions of higher learning, all of them, devote themselves to providing outstanding classroom teaching?

Dr. Mellander is a professor at George Mason University.
Showcasing the Best and Brightest

AAHE's Hispanic Caucus at the Smithsonian

By Adalyn Hixson

Sixteen years ago, the Hispanic Caucus of the American Association of Higher Education was created by three academic colleagues—Rodolfo Arévalo, now Provost at UT-Pan American, Héctor Garza, now a vice president of the American Council of Education, and Laura Rendón, now a professor in the Graduate School of Education, Arizona State University. Each served a turn as Caucus chair, starting with Garza.

Their Hispanic Caucus reached new heights on March 20 in the nation’s capital with its gala celebration at the renowned Smithsonian’s National Museum of Natural History—the first such event held there since the appointment of colleague Refugio Rochin as director of the Smithsonian’s Center for Latino Initiatives.

There was another first. “This was the first year that we sponsored the event,” said Art Ruiz, executive with the State Farm Insurance Companies. “We were very pleased, especially, to be able to help highlight positive role models and people in our community who are making things happen,” he said, noting too that State Farm has supported several other projects related to Hispanics in education.

Ruiz recommends most highly a newly opened exhibit. “The Americans...one of the largest photo exhibitions ever put together by the Smithsonian. Time Warner is a major sponsor. There’s a traveling tour; a CD, and a book as well as the actual exhibit.” And he tells HO night were the praises of Hispanics working in diverse fields, and praise as well to State Farm for its interest and to Dr. Rochin for lending the historic site, as well as staff support.

Dr. Loui Olivas, assistant vice president of academic affairs at Arizona State University, and head of the Caucus Institutional Sponsorship Committee, told HO that co-sponsoring with the Smithsonian “sends a message to higher education advocates and to educators across the country about the significance of Hispanic contributions in education—contributions made by Hispanic educators in leadership positions, as teachers, as scholars, artists, and authors of works that affect the Hispanic population.”

“The Hispanic Caucus has showcased, over the past twelve years, the contributions that Hispanics continue to make in all levels of education, as well as in the greater community,” he said.

Virginia Gonzalez, outgoing chair of the Caucus, a professor in the counseling area at Northampton Community College, told HO, “We really appreciated that this was the
first thing Dr. Rochlin did from his center. It was a very, very special event because it took the different constituencies coming together to be able to pull off the kind of special evening that we had. Without Refugee support, we could not have been there."

That special evening featured concert pianist Martha Marchena, a professor in the music department of XJ's Keen University, called the leading champion of Latin American music, her playing "exquisite and breathtaking," her repertoire applauded for its inclusion of "lost and underrepresented composers of her heritage."

Her first CD, Sonorin Rituals, 20th-Century Latin American Piano Music, won a Grammy nomination in 1997, received widespread acclaim abroad, and special honors in Vienna.

But the chief stars of the night were not Héctor Villa-Lobos or Juan Morel Campos, but the living, breathing men and women selected for this year's tributes from the Hispanic Caucus.

Chosen as Outstanding Latina/O Faculty in Higher Education was Dr. Kris Gutiérrez, of CLAY's Graduate School of Education and Information Studies. Her long-term ethnographic studies of LA schools enlargeth the understanding of effective literacy practices, implications of urban policies, effects of Proposition 22 (the vote to eliminate bilingual ed), and issues of equity and excellence. An associate professor in the Division of Urban Schooling, Gutiérrez has published extensively in leading journals and is a keynote speaker internationally.

Chosen in the category of Latino Cultural Arts was DV producer/director and award-winning documentarian Héctor Galán, whose company, Galán Productions, now in its 15th year, has created many programs for PBS as well as three specials for the National Council of La Raza. Recently he was invited to screen a new work--Chicano! The History of the Mexican Civil Rights Movement for President Clinton. Galán got his start as a camera operator in his hometown of San Antonio, Texas, and takes great interest, it is said, in providing workshops and internships to media aspirants.

The honoree for Distinguished Leadership in Higher Education was Jesus Rangel, former journalist and editor, now vice president of corporate relations for Anheuser-Busch Companies, Inc., who oversees community development programs. A founder of the National Association of Hispanic Journalists, he was a correspondent in Texas, California, Miami, Boston, New York, and Washington, DC. Rangel sits on the Board of Directors of Anheuser-Busch, Inc., and also of the National Hispanic Scholarship Fund, MALDEF, and the Tomas Rivera Center.

For Outstanding Support of Hispanic Issues, the selected was Congressman Rubén Hinojosa, longtime South Texas business man, and native of the Lower Rio Grande Valley. Elected a U.S. Representative in November 1996, he quickly staked a claim as advocate on education and more. A member of the

"I need to go and feel that everything that I believe in and that I am working very hard to achieve in higher education is being shared and understood by someone else. That's what I get by coming to the Hispanic Caucus."

DR. VIRGINIA GONZÁLEZ

Education and the Workforce Committee and chair of the Congressional Hispanic Caucus' Education Task Force, he succeeded in his first major legislative initiative— the Higher Education for the 21st Century Act, which significantly benefits HSIs.

A Special Tribute was paid to Dr. Alfredo de los Santos Jr.—a much revered man in whose name the Distinguished Leadership Award is given. He notes that de los Santos—sought out by leading foundations and institutes over many years, praised to the skies, yet with great specificity, when awarded the McGraw Hill Prize last year—got his start as do so many other Latinos, with a degree from a community college. After earning one at Laredo, three more came from UT-Austin, and the rest is Hispanic American history.

Others were recognized, too. State Farm Insurance Companies and Anheuser-Busch, Inc., for Corporate Sponsorship, Refugio Rochin for Partnership, and Paul W. Belles for Personal Contribution.

Emceeing the event was the Caucus Chair-elect, Dr. Tito Guerrero III, president of the University of Southern Colorado. Presenting awards were Maria Medina-Santos, CSU; Dr. Olivas, Dr. de los Santos; Dr. Henry F. Inele, UTPE; and Dr. Jaime Chahin, Southwest Texas State.

"Art Ruiz said to me—We need occasions like this to celebrate our heritage of accomplishments" said González. "We usually con-
duct this awards program, but it’s been embedded in our business meeting or at our forum. This was the first time that we really tried to get a broad-based audience, to get to meet each other, and to really celebrate the fact that we have a lot to contribute to the American society in a very positive way and in a lot of different sectors.”

“These were outstanding people from very different segments. They had all done tremendous things,” said González.

But as she spoke further, it became clear that the awardees’ accomplishments were by no means the only outstanding and tremendous things about the Hispanic Caucus.

**Coming Home**

“I was a Hispanic Leadership Fellow in 1986, and that was my first exposure to AAHE. But then I started coming regularly, and I have actually attended every single year since 1988. Peg Smith—AAHE president—asked me why I keep coming back. And I said, the Hispanic Caucus.

“It’s a wonderful group of people you go to Caucus, and these are people you know—that you share some common background with—people who have some similar perspectives from shared experiences. They are willing to network, are willing to support one another.

“Kind of like coming home. Once a year I need that. I need to go and feel that everything that I believe in and that I am working very hard to achieve in higher education is being shared and understood by someone else. That’s what I get by coming to the Hispanic Caucus. My whole AAHE attendance is around the Hispanic Caucus.

“Not that the AAHE conference is not worthwhile, but at the Hispanic Caucus—the common experiences there—you don’t have to get into a lot of detail—these are people who start nodding their heads and saying ‘Yes. Exactly.’”

**The Hispanic Caucus has showcased, over the past twelve years, the contributions that Hispanics continue to make in all levels of education, as well as in the greater community.**

**DR. LOUI OLIVAS**

**The Next Generation**

“On top of what else we do, we bring in graduate students whom we sponsor, ten to eleven grad students each year, pay for conference registration, provide mentors, set them up in rooms, and provide special sessions in which we basically answer questions they might have,” said González.

“I have gotten beautiful letters and responses back from students,” she told *HO*. “One had said, and I paraphrase, that throughout his master’s he got to the point where he was disillusioned with higher education, but once he met all of us, he realized what a doctorate could do in terms of putting you in a position where you could effect change. ‘Now I am re-energized.’ He said, adding that he wasn’t going to let the politics of higher ed make him think—Why should I do this?”

“A young woman wrote that it was a very valuable experience. Everybody’s advice and attention was very meaningful. I will not forget it.” Other students wrote, “If it weren’t for this, I couldn’t...”

“So it’s not only that we are going there to renew ourselves,” said González. “There is also a role for you to help guide the next generation. So many of us in this Latino generation are the first to go to college, so there isn’t someone behind us able to say, ‘This is what you should do.’ Especially when you are negotiating graduate school and some of these other levels, it gets very complex, and the decisions you make have lasting ramifications.

“The Caucus needs to expand... grow. The more that we have there, the more people we can acknowledge. You can only acknowledge the ones you know.”
Destination Equality

Asked by HO whether her term as chair presented any surprises, Virginia González responded promptly and candidly.

"The only thing that happened that wasn't planned was that a conflict developed between us and the Black Caucus," she said. "The AAHE conference location had changed from San Francisco to Anaheim, and because of the anti-affirmative action rhetoric in California, both the chair of the Black Caucus and I expressed our concern to the leadership of the AAHE. Anaheim was the seat of such anti-affirmative action rhetoric—an initiating area.

"For very complex reasons, one of which was to support the people in higher education who are living with this every day, the board of directors decided to remain in California." The Black Caucus, she said, decided not to participate in the year 2000 and wanted the Hispanic Caucus to join them in this pullout.

"While both of us had the same level of concern about the dynamics of what went into the decision in the change of location, the Hispanic Caucus took a different stance. HACU was going to have two major conferences in California within a year of the AAHE conference, and a lot of our people have dual memberships in AAHE and HACU. So deciding not to participate based on geographic locations was not what we could do.

"HACU is very much advocacy oriented, and up to this point, we had not been. We went back to the AAHE leadership and said, 'If you are willing to make this conference a platform to really look at the issues—at what some of these changes have been—and to look at what the impact is on our student population, then we will continue to participate.'" feeling, she said, that both the Black Caucus path and that taken by the Hispanic Caucus would be advocating for the needs of minority students and maintaining diversity of campuses.

"AAHE has committed to doing that at the Anaheim conference, and I'm going to be part of a steering committee. In the interim, we are developing a statement on diversity, which they never had up to this point, so there has been a tremendous response.

"That was something I did NOT anticipate going in as chair—that a group that we had always tried to maintain very close linkage with we would then find ourselves in contention with.

"That ended up being resolved. Through a lot of dialogue and a lot of communication between the two Caucuses, we now have come to the point where we respect one another's stance."

Affirmative Action

"People are thinking—we are beyond this now. We don't need affirmative action. Everybody has the same opportunity! And they're feeling it will all work out in the end. So to me, AAHE has really been as responsive as I could hope for, and I think that is a lot due to the new president, Peg Miller," said González. "She has really listened, and she has responded, and she is really working hard to be sensitive to the concerns of the caucuses. And she was very new to the presidency when this happened."

González told HO that there had never been a situation of such magnitude and such long-term potential. The Hispanic Caucus, she said, is maintaining ongoing dialogues too with the Asian Caucus and Native American Caucus, and "it has brought us together, realizing that we all need to communicate better with and among ourselves. And to understand where the same kind of issues might take a slightly different dynamic in terms of what we need. But it doesn't mean that we are far apart."

She told HO that the anti-affirmative action lawsuits being brought by the Center for Individual Rights are not just against public institutions. "Roland Smith at Rice is being sued—a private institution."

The Chill is On

Conservatives Attack Race-Based Admissions

BY AMALIA DUARTE
Amalia Duarte is an editor in public relations at Lucent Technologies

This spring, the number of Hispanic students offered admissions to the University of California at Los Angeles increased over the number in 1998, as did the percentage of underrepresented candidates who got a coveted thick acceptance package in the mail. However, the upswing is nothing to get excited about, concedes even the UCLA Director of Admissions Rae Lee Siporn.

"We are talking about handfuls of students," said Siporn. "I'm afraid it's not all that much different over last year. There's just not much we can do to try and maintain the diversity of the past."

UCLA is not alone in finding it difficult to enroll a diverse student body. Black and Hispanic students are finding themselves increasingly shut out of California's most competitive public universities and facing new obstacles to higher education in other parts of the country. Thanks to voter referenda and lawsuits aimed at ending affirmative action.

And the situation might get even worse as a conservative public-policy law firm rolls out a campaign focused on getting students and university trustees to challenge affirmative action policies at their institutions. The U.C. system's changing demographics might provide a glimpse of what could happen at greater numbers of colleges and universities in the coming years. On the heels of an anti-affirmative action referendum, Proposition 209, an earlier U.C. Board of Regents vote to end affirmative action in admissions, the outlook is getting bleaker for Hispanic and African American students vying for slots in the U.C. system.

As U.C. finishes its second cycle of admitting students without taking ethnicity or race into account, the results are surprising even to those on the front lines of this struggle. Adding to the problem is the fact that highly selective schools such as U.C. are now admitting a smaller percentage of applicants because more and more of those who are accepted decide not to enroll.explained Siporn. This spring, for example, U.C.L.A. offered admissions to just 1013 Hispanic students, an incredible 33 percent drop from two years ago when affirmative action was still in place. The acceptance rate for Hispanics at U.C.L.A. has declined from 41 percent in 1997 to 24 percent today. And the odds of getting in for African American applicants are even worse. In the past two years, the acceptance rate for African Americans has plummeted from 38 percent in 1997 to 23 percent in 1998 and today stands at 21 percent. Of the 1,410 African Americans who applied as first-year students to U.C.L.A. this year, only 300 were admitted.

"It's been shocking to many of us," said Theresa Fay-Bustillos, vice president of legal programs, Mexican American Legal Defense and Education Fund (MALDEF) in Los Angeles. "Most people expected to see a drop but not the size of the drop that's occurred. It was a splash of cold water in the face. What the long-term effects are—whether this is really some kind of drastic resegregation—we don't know yet."

A recent study completed by the Tomas Rivera Policy Institute based in Claremont, Calif., highlighted this disturbing downward trend for Blacks and Hispanics applying to U.C.'s best schools. "Even though these minority students continue to apply in record numbers, the
acceptance rates have dropped dramatically," said the center president, Harry Pachon. These figures point to a discouraging tightening of opportunities for Black and Hispanic students at U.C. The larger question is how many minority students who enroll in university are able to graduate with a degree.

Other Universities Affected

Further up the West Coast, the University of Washington was hit on two fronts and forced to radically reduce its affirmative action efforts. First, a lawsuit challenged the law schools' admissions process; then, last fall, voters passed Initiative 200, which effectively banned the consideration of race, ethnicity, or gender in admissions at the university. The lawsuit caused the university to scuttle its dual-admissions process. As a result, in the fall of 1998, the total undergraduate student enrollment declined across the board for all minority groups: Asian Americans, Native Americans, Blacks, and Hispanics. And this spring, the number for minorities accepted into the University of Washington declined even further.

"We were hit right in the middle of our admissions process," said Associate Director of Undergraduate Admissions and Director of Recruitment/Outreach Enrique Morales. "It was a very difficult situation. The number of African American undergraduate students accepted for the fall of 1999 decreased by 18 percent from last year. Native American acceptances dropped by 15 percent, and Hispanic acceptances dropped by 10 percent," said Director of Admissions Tim Washburn. (Graduate and professional school enrollment was more of a mixed picture, with some groups showing upticks and others experiencing declines.)

Meanwhile, in the Midwest, the University of Michigan is facing a lawsuit brought by a White female student who claims the university's admissions policies are unconstitutional. The lawsuit is being fought by the Center for Individual Rights (CIR), a conservative Washington, D.C.-based public-policy law firm that won a similar lawsuit against the University of Texas in 1996 and is also behind the suit against the University of Washington's School of Law. The CIR has been successful to date in its court proceedings. But now its tactics have become more aggressive, perhaps hoping to put it out of court.

Earlier this year, the CIR launched a campaign aimed at encouraging students and university trustees to investigate whether or not their college is breaking the law on race and admissions. CIR hired its latest law firm in January when it took out provocative, full-page advertisements in 15 campus newspapers across the country promoting its new handbook, *Racial Preferences in Higher Education: The Rights of College Students*.

In the book, the CIR argues that institutions of higher education are violating the Supreme Court's landmark *Bakke* decision by creating dual-admissions systems. "You can take race into account as one of many factors," said CIR Senior Counsel Terence Peli. "It could be a plus factor for a Black applicant, for example. But schools shouldn't use it if the sole purpose is to achieve racial diversity. It's regrettable that college administrators continue to defy the limits set by the Supreme Court."

The handbook gives students a primer on what CIR believes is permissible when it comes to race and admissions, and then pushes students to do some digging for themselves. The reference book tells students to search for data on their school's diversity policies—everywhere from the Internet to speeches or other events by administrators—and then gives instructions on how to interpret the information. The book includes a sample Freedom of Information request and admonishes students to "be persistent and tenacious" in their investigation.

Geared for students who were rejected from the school of their choice, the book details how you can seek compensation for emo...

Sources: Office of Undergraduate Admission & Relations with Schools
Even though these minority students continue to apply in record numbers, the acceptance rates have dropped dramatically.

Harry Pachon

The acceptance rate for Latinos fell at every campus. Again, the greatest decrease was at Berkeley, where the acceptance rate dropped from 44.3 percent for Latino applicants to 20.6 percent. The smallest drop was at Riverside, where the acceptance rate slid from 81.2 percent to 75.4 percent. Despite this drop, the number of admitted students increased at both Riverside, where the number rose from 1,376 in 1997 to 1,648 in 1998, and at Santa Cruz, where the numbers increased from 1,363 to 1,406. Overall, 11,901 Latino students were admitted in 1997 compared to only 9,836 in 1998, a drop of 17.4 percent.

The Latino attendance rate increased at every campus. At Davis, for example, 40.6 percent of admitted students chose to enroll in 1998, compared with 29.8 percent in 1997. The smallest increase was at San Diego, which grew from 26.2 percent to 27.0 percent.

As was the case with Latino students, applications from Black students increased at every UC campus with the exception of Los Angeles. Overall, that number grew from 6,032 in 1997 to 6,444 in 1998. The greatest increases occurred at the Riverside and San Diego campuses, with an increase of 106 applications at each.

“We need to rely on a well-educated Latino, African American, and Asian workforce. This country is not going to get ahead unless we have a real inclusive mentality.”

Theresa Fay-Bustillos,
Vice President of Legal Program, MALDEF

of Washington are continuing vigorous outreach efforts to convince minority students to enroll once they get in. This wooing of prospective students is allowed since they’ve been admitted without regard to race or ethnicity.

“We’ve expanded our direct outreach to do more mailing and campus visits.” said the University of Washington’s Tim Washburn. “We want to affirm the university’s commitment to those students and provide encouragement to those who might be sitting on the fence.”

Likewise at UCLA, the spring promised to be a frenzy of outreach to those lucky few Hispanics and Blacks who were admitted. Among the scheduled activities were telephone calls, visits to high schools by UCLA Chancellor Albert Carnesale, special tours, private receptions hosted by alumni, day-long academic conferences, and weekend introductory programs for students and parents. UCLA and the UC system also have implemented new developmental outreach programs aimed at K-12 districts in the greater Los Angeles area. The hope is that these efforts will significantly increase applicants and admitted students to UCLA within the next few years from underrepresented communities.

“We need an overhaul of the K-12 system, no question,” said UCLA Director of Admissions Rae Lee Siporin. “In the meantime, I despair that we are going to lose a generation of students.”

While universities reach out to this pool of potential students, the Mexican American Legal Defense and Education Fund (MALDEF) has challenged the new admissions system. In March, MALDEF filed a class-action suit against the University of California at Berkeley charging that its admissions process is discriminatory. The suit chal-

Hispanics on the Hill

In the Lead on Education

BY MIRIAM RINN

Congresswoman Lucille Roybal-Allard has an easy-to-understand definition of the mission of the Congressional Hispanic Caucus: "In 20 years, Latinos will become the majority population in states such as California, New York, Texas, Illinois, and Florida," the California representative said. "We must invest today to ensure that our children will be prepared to lead these states into prosperity. In the 106th Congress, the Caucus will focus on education, economic development, and access to health care. All of these issues are critical to the well-being of the Latino community and to the nation as a whole. Latino issues are American issues."

Organized in 1976 to provide a national voice for the Latino community, the Congressional Hispanic Caucus now has 17 members, all Democrats. Roybal-Allard, the first woman to chair the Caucus, represents the 33rd congressional district in California, an area that includes the cities of Los Angeles, South Gate, Bell Gardens, Vernon, Commerce, and Huntington Park. (Her father, Congressman Edward R. Roybal, who served as a member of Congress for 30 years, founded the Hispanic Caucus more than 20 years ago.) Other Caucus members represent constituents in Texas, California, Illinois, Puerto Rico, New Jersey, New York, and Arizona.

The Caucus also had two Republican members, Representatives Lincoln Diaz-Balart and Representative Ileana Ros-Lehtinen, both from Florida, but they left after the previous chair, Rep. Xavier Becerra, a Democrat from California, visited Cuba and then refused to make a public call for democratic elections on the Communist-led island. Those two members have not returned, Roybal-Allard said, because the Caucus cannot satisfy their demands. Although the two Republicans insist that the Caucus pass a resolution on Cuba, the administration to support our educational budget, and we were very pleased with that," Roybal-Allard said. "We are excited that President Clinton's 2000 Budget includes funds for the programs that are critical to the Latino community, such as education, health care, and services for legal immigrants."

In Chicago, the administration has decided not to take positions on Cuba or on Puerto Rico, the chairwoman explained. There is no hope of agreement on these two issues, according to Roybal-Allard, so there's no point in spending a lot of time on them.

What she hopes to focus on is education, something that most Caucus members—and most Americans—can agree on. "We've been successful at getting the CHCs recommended spending on Hispanic-Serving Institutions was $625 million, and the President proposed spending $423 million, a healthy percentage of CHCs' goal. While she agrees that those colleges and community colleges that serve lots of Hispanics need support, public school construction and modernization is one of Roybal-Allard's primary goals. "Before we can even get our kids into college, we have to educate them beforehand," Roybal-Allard believes.

Public schools all over the country are desperately overcrowded or in need of immediate renovation. The "baby boom echo," children born to baby boomers, and increased immigration have filled elementary schools to bursting. Nationwide, school enrollment has increased 16 percent from 1988 to 1998. According to the Congressional Budget Office, 43 percent of California's school have at least one building in need of extensive repair. "My district is one of the best examples of that," Roybal-Allard said. "When it rains, they have to put out trash cans to collect the water."

The Caucus faces an enormous challenge if it wants to tackle education reform. Educational attainment rates of Hispanic students at all levels are deeply disturbing. Although Hispanic children account for 14 percent of the school population, they have the lowest high school completion rates of any major population group. Thirty-eight percent drop out before completing high school. In California, only 8 percent of Latino fourth graders are proficient readers while 20 percent of non-Latino fourth graders are reading well. Twenty-nine percent is bad enough—two-thirds of California fourth graders cannot read fourth grade material—but 92 percent of Latino fourth graders are unable to read on grade level is frightening. According to the Caucus has...
proposed that $320 million be
spent to strengthen basic reading
and math skills, and $22 billion in
new bonds be raised for school
construction and modernization.

Roybal agrees that sitting in
bilingual classes for many
years—which many Spanish-speaking
children do—has not worked and is,
as she said, "completely unacce-
tirable." In fact, the movement that resulted in the passage of California's
counterpart Proposition 227, which
allows most students one year of
intensive English study before main-
streaming them, was started by
Latino parents in her district, she
said. She added, however, "We need
to have some flexibility to allow for
differences in learning skills.
Learning English only should not be
the goal. They should be able to keep
up with other subjects that are
equally important."

Rubén Hinojosa, a Democrat
from South Texas, is chair of the
Caucus Education Task Force. A
third-year Congressman, Hinojosa
also serves on the House Committee
on Education and the Workforce,
along with several other members of
CHC. This is where I was meant to
be," said Hinojosa, a longtime pro-
ponent of education. The Congressman
is deeply concerned about the high
Hispanic dropout rate, which continues to
climb even as other groups' dropout rates
slip downward. "Good jobs of the future are
going to be knowledge intensive," Hinojosa
said, emphasizing that it is imperative that
the Caucus and the Administration deal
with the disastrous lack of education of
Latino youth. This is a problem that can be
ignored no longer, Hinojosa believes. If
many Hispanic young-
sters leave school
because of familial responsibilities,
they need to be educated about the
benefits for themselves and their
families of staying in school, according
to Hinojosa.

Many of the provisions of
Hinojosa's Higher Education for the
Twentieth Century Act found their
way into the House higher education bill,
including an increase in the
authorization level for HSIs from
$45 million to $300 million. He also
managed to secure a special section
for these institutions under Title III
of the Higher Education Act. For his
efforts, Hinojosa was honored,
along with the other Caucus, by
The Hispanic Education Coalition.
Although the Congressman does not
believe that money alone will solve the
problem, providing more money
to schools and colleges that serve
Hispanic populations is a good first
step. The schools have to be there:
after all, if Latino students are to
attend them.

The CHC had better luck with its
education proposals than with its
proposed spending on services to
legal immigrants. The President's
budget did not allow for any spend-
ing for low-income immigrants who
were in the U.S. prior to August
1986 and later became poor or old.
That meant reflects some of the
country's anti-immigrant feeling,
which is often expressed by the
Republican-controlled Congress.
The Congress has been introducing
legislation and attaching amend-
ments that seem to target both ille-
gal and legal immigrants, as well as
minorities in general. One such
amendment to the Higher
Education Act, that proposed by
Rep. Frank Riggs of California, who
happens to be a Democrat, would
ban affirmative action in college
admissions nationally. The CHC
opposed the Riggs amendment,
along with GOP-sponsored amend-
ments to campaign-finance-reform
legislation that would ban bilingual
voting materials and enact voter-
Menendez of New Jersey, "They
don't want us to be informed, they
don't want us to be registered, and
they certainly don't want us to
come out and vote."

Attempts to limit immigrant
participation at the ballot box
might be an indication of the fear
some politicians feel at the growing
power of Hispanic legislators.
Besides the increasing numbers of
elected Latino officials, members of
the Caucus are winning more and
more important committee
appointments in Congress.
Xavier Becerra sits on the
Ways and Means Committee,
which handles tax issues.
Roybal-Allard was recently
appointed to the House
Appropriations Committee,
one of the most powerful in
Congress, and Bob Menendez
was just elected vice chairman of
the House Democratic Caucus.
Along with Chairman
Martin Frost, a Texan,
Menendez will run the weekly
meetings of all 211 House
Democrats. It's in these meet-
ings that Democratic legisla-
tion and strategy are crafted.
When trying to convince his
fellow Democrats to elect him,
Menendez argued that
Hispanic voters will be more and
more important in the future, and
that they should not be taken for
granted. Republicans Jeb and
George W. Bush won nearly half of
the Hispanic vote in Florida and
Texas in their successful runs for
governor, after all.

The ideologies of Caucus
members vary, but there seems to be an
agreement that growing Latino
political power has given Latino
politicians the self-confidence to
move towards broader issues and
away from the narrow focus on
Hispanic concerns that might have
characterized them in the past.
After all, if they are going to repre-
sent majorities populations, they
will have to behave like people in
power. "It's going to be a very excit-
ing time," Roybal-Allard agrees.
"There are a lot of things we can do
as a caucus. You're going to see us
involved in economic development,
especially small business. The
issues that are really important
to the Latino community and
Americans in general are not
divisive. We don't disagree on health
care, education, social security.
There is plenty to agree on." 

Hinojosa concurs that the future is
bright. "It can be done."

Southern Connecticut State University

Honoring the American Dream

BY ROGER DEITZ

At a recent commencement ceremony, Connecticut Congresswoman Rosa DeLauro described Southern Connecticut State University (SCSU) as a place “where the American Dream is best honored and most valued.” University President Michael J. Adanti is in full agreement, and he should know. President Adanti is a member of the SCSU class of 1963. The president affirms the assessment made by Congresswoman DeLauro, saying, “She’s right. Southern Connecticut State University has spent more than a century making the American Dream a reality for thousands of people.”

President Adanti adds to this that he understands that a great many work and difficult choices go into realizing that dream, not the least of them being the student’s task of choosing a school that is the right fit. President Adanti suggests that a student should look into SCSU, where he or she will discover “...a community of students and faculty, administrators and staff, all dedicated to learning—learning about ideas and about ourselves.” Adanti continues, “When we talk about ‘higher education’ at Southern, we mean education in all its forms: academic and personal, theoretical and practical, professional and emotional. We are committed to educating the complete person—the person who wants a career and a life.”

To Michael J. Adanti and the SCSU community, the creation of a well-rounded and better-educated individual is the aim and SCSU has been immensely successful in hitting this target. For 25 years, SCSU has made a full-scale effort in the recruitment and retention of minority students—giving them access to the American Dream. By offering an open door to students of diverse backgrounds learning to attend an institution of higher learning, we install Southern Connecticut State University on the Hispanic Outlook Honor Roll.

Southern Connecticut State University is a campus of the Connecticut State University System, governed by the Board of Trustees of that system. In addition to SCSU, the CSU system includes Central Connecticut State University at New Britain, Eastern Connecticut State University at Willimantic, and Western Connecticut State University at Danbury.

Southern’s philosophy of education grows out of four related functions: liberal education, professional education, graduate study, and research, and public service. With these four functions in mind, SCSU...

Southern's programs in graduate study and research challenge mature students who wish to extend and strengthen a liberal education or improve their professional skills. As to public service, SCUS is a community school in many additional ways. Southern provides educational and cultural opportunities for everyone in the geographic area. Its School of Extended Learning offers courses on a part-time basis, day or evening, for professional advancement or personal enrichment. SCUS clinics provide diagnosis and treatment of speech, hearing, and reading problems and learning disabilities. In the fine arts, Southern plays host to conferences, institutes, workshops, expositions, and performances that both instruct and entertain the residents of the region.

Founded in 1893 as the New Haven State Normal School, Southern became a four-year college with degree-granting powers in 1937. Ten years later, Southern joined with Yale University's department of education to offer a graduate program leading to a master of arts degree. In 1954 the State Board of Education authorized the institution, now called the New Haven State Teachers College, to assume complete responsibil-
introduced many new fields of study and research.

In March 1983, Southern became a university, completing its evolution. Today, Southern Connecticut State University is composed of six academic schools: the School of Arts and Sciences; the School of Business; the School of Communication, Information and Library Science; the School of Education; the School of Health and Human Services; and the School of Graduate Studies.

Overall enrollment at SCSU is 11,395. Of this group, the number of minority students is 1,368, approximately 11.3 percent of the total student population. The undergraduate percentage of minority students is 18.6 percent. Hispanic students number 267 and make up 4.8 percent of the overall figure. There are 382 full-time faculty, and of that number, seven are Hispanic. An education is affordable at Southern. For a student who lives off campus and is a Connecticut resident, annual tuition and fees (for a full-time undergraduate student) total $3,600. Add room and board on campus, and that figure rises to an average of $9,350.

Those student expenses can be defrayed in many ways, including scholarships, loans, and work-study. Southern awards financial aid on the basis of demonstrated need, and more than 50 percent of Southern's undergraduates receive financial aid. About 3,200 Southern students receive aid through such programs as the Federal Pell Grant, the Federal Supplemental Educational Opportunity Grant, Connecticut State University Grant, and the Scholastic Achievement Grant Program. More than 3,000 students receive student loans, for example, the Perkins Loan and the Federal Stafford Student Loan Program. In addition, more than 600 students take advantage of on-campus Student employment and Federal Work Study Programs, holding clerical, maintenance, and other types of part-time positions.

Students reaching the sophomore year become eligible for one of the Alumni Association's more than 70 annual scholarships aimed at undergraduates. A Tuition Installment Plan is a further option to help make the SCSU education more attainable.

Students of color have even more options at SCSU. Special efforts have been made for more than twenty-five years at SCSU to serve minority students and increase minority representation on campus. Ever since 1972—when President Nixon was in the White House and students were demonstrating on college campuses across the country—SCSU has worked to change the face of its institution. A SCSU spokesperson reminds us that only a year before that, the U.S. Supreme Court had sanctioned busing to enforce the desegregation of the nation's public schools. This is the backdrop against which Southern Connecticut State University inaugurated its Summer Educational Opportunity Program to encourage minority students to attend college. At the time, the representation of minority students at Southern was one-tenth of one percent of the total enrollment.

The SEOP has been a great success in boosting minority enrollment. "The transformation of the university two decades ago was literally top to bottom," says James Barber, Southern's director of Student Supportive Services. "The first step was to begin hiring more minority faculty and staff to make the campus less intimidating to students of color; we learned that people go where they feel comfortable. As your numbers increase, and your visibility increases, people begin to listen to you."

Remembering the program as it was more than a quarter century ago, Barber recalls, "Then we started with 50 kids in the program, and now those kids are all over the world! With more than 900 graduates in all," Among these graduates is Denese Chisolm of Hartford, recently appointed by Governor John Rowland to serve as a workers' compensation commissioner. Nearly 1000 students apply each year to attend the program, to which 50 are admitted. The goal of SEOP is to prepare minority students for the challenges of university life, both academically and personally. Once students complete the program, they are automatically admitted to Southern for the following fall term.

"What we are looking for are students who are highly motivated," says Diane Rosner, assistant director of Student Supportive Services and coordinator of the program. Rosner observes, "Some of them may not have done really well in high school, but they have a desire to do this."

Another program at Southern Connecticut State University that attracts promising disadvantaged students to academics is ConnCAP, the Connecticut Collegiate Awareness and Preparation program. ConnCAP is helping academicians at Southern prepare Hillhouse High School students for university studies by "basing their academic skills." The program is funded with a $100,000 grant from the Connecticut Department of Education that is used to offer academic support for more than 40 ninth and 10th graders. The students are also taught how to select a college and how to apply for admission and financial aid. The ConnCAP program includes after-school tutoring and, for those students who are able to participate, a Saturday academy at SCSU, which runs from 9 a.m. to noon and includes classes in science, computer science, and math.

In addition, a six-weeks-long summer academy on campus offers courses such as environmental studies and chemistry and arranges many cultural outings. "We pick the students based on their desire and need to improve their academic performance," reports James Barber, whose Department of Student Supportive Services oversees the ConnCAP program. Barber notes, "The purpose is to advance their skills to help them succeed in college."

ConnCAP ties in with another program at Southern, the SCUS Hillhouse Teacher Preparation Program. Full-tuition scholarships are awarded to five top Hillhouse seniors who commit to teach in the New Haven Public schools for three years upon graduation.

Enhanced by Music, Dining, and Dance

BY MARIELA ALVAREZ

Miami has long been known for its strong Hispanic influence and its role as the gateway of the Americas. For years, people from across the country have been coming to the city to experience its Latin flavor and to negotiate international business deals. Now Miami is also becoming known as the número uno place to learn how to speak Spanish in the U.S.

There is no other program in the world like our week-long intensive Spanish course,” says Germán Pavia, Spanish program coordinator at the Intensive Language Institute at the University of Miami School of Continuing Studies. “Our university is the ideal place to learn Spanish because Miami has Hispanic businesses, restaurants, television—so many opportunities to practice the language,” says Pavia.

The university location is not the only draw to the program, which runs classes in January and August in both Spanish and Portuguese. As part of the curriculum, Pavia brings in professional Argentine dancers to teach students the tango and a Mexican mariachi band to sing along with, all in Spanish, of course.

“I think the program should not be only an academic program, with the emphasis only on conversation and grammar,” says Pavia, who was born in Colombia, “but we should familiarize students with the different Hispanic cultures. Dancing and
music enhance the learning of foreign languages, breaking the monotony and routine. Students come from California, Washington, Connecticut, Washington, D.C., and from all over South Florida to attend UM's Intensive Language Institute. But Pavia envisions marketing the program internationally. "People from all over the world are doing business in Miami and in Latin America—it's one reason why there's such a high demand for Spanish," he says.

Earlier this year, it was reported by People magazine, that actress Melanie Griffith, who is married to film star Antonio Banderas, had paid $10,000 for a "four-day course" in Spanish to be able to communicate with her Spanish in-laws. "Mrs. Banderas should have come to the fine teachers and fine program we have here at the University of Miami. Our price is right," says Pavia. The week-long sessions at UM cost $895—and include lunch, he added.

The inclusion of Latin cuisine as part of the education package is one feature Pavia has added since he started with the program as coordinator in 1994. During the January course, which drew nearly 100 students from all over the U.S., Pavia hosted two dinners at Argentine and Peruvian restaurants. The waiters were instructed not to speak to the students in English, forcing them to place their orders in Spanish. "They sang and danced—especially after they had some wine!" says Pavia.

The only time students are allowed to speak English is during the one-hour tutoring sessions held when the grammar and conversation classes end for the day. Even when students break to sip cafe cubano, they must converse only in Spanish. To enforce the rules, Pavia has developed a strong deterrent: anyone who breaks the rules and speaks in English must dance, recite, or sing in Spanish in front of the class. "They get a big kick out of it," says Pavia. "They laugh and enjoy it. Of course, we applaud."

The cultural immersion doesn't stop there. Students are led by a Spanish-speaking tour guide through an exhibit at the Lower Art Museum on the UM campus, hearing about the latest collection on view and holding a discussion afterward—in español. Visiting the program are various guest speakers from different countries, including consuls and past students. A former student tries to emulate that, he says.

Other features of the most recent program included a visit by local art gallery owner who showed slides of contemporary paintings from Latin America and asked students to discuss the themes and styles of the artwork, and a Mexican attorney and writer who spoke about the role of women in business in Latin America. Pavia adds that guest speakers allow students the opportunity to inquire about and probe different aspects of Hispanic culture.

"I try to get qualified instructors from Spain, Argentina, Colombia, Paraguay, Cuba, Nicaragua, the Dominican Republic, Peru, Venezuela, Mexico, and Panama in order to expose the students to different accents and enrich their knowledge of the language."

Nicaragua the Dominican Republic, Peru, Venezuela, Mexico, and Panama in order to expose the students to different accents and enrich their knowledge of the language."

For 13 years, Pavia taught and was chairman of Spanish, French, and Latin at The Harpeth Hall School, a private girls' school, in Nashville, Tenn. There, several of his students competed in the National Spanish Examination, being ranked in the top 10 percent in the country for students of Spanish language.

Pavia came to Miami in 1990 to head up the French, Latin, and Spanish languages department at Palmer School, a private high school. Three years later, he joined the Dade County Public School system, teaching English to speakers of other languages at Miami Beach High School. In 1989, he began teaching at the University of Miami as a professor of Spanish language, and in 1994 joined the Intensive Language Institute, where he chooses textbooks and materials and the professors, personally interviews potential students to determine their level of Spanish knowledge, and even pitches in to teach a grammar class.

"We warned some that they will experience culture shock at first," says Pavia. "But we told them to relax. We are very patient, speak slowly, and use cognates so they will be able to recognize the words."

There are three levels of classes—beginner, intermediate, and advanced. The first two groups are divided into different sublevels depending on skill and exposure to the language.

In a day, each class will have between five and six teachers. We rotate the teachers so that there's a different teacher every hour," says Pavia. "I try to get qualified instructors from Spain, Argentina, Colombia, Paraguay, Cuba, and Nicaragua. We have Spanish speakers from all over the world."

For more information on University of Miami's Intensive Language Institute, call 305-284-7272; Next session August 7-16.
Orlando Brenes: the Coach with the Midas Touch

That formula of using soccer as a bridge toward educational success is one that Brenes knows well, having used it himself throughout his life.

If everything that King Midas touched turned to gold, then every soccer team coached by Orlando Brenes is a success.

There are, of course, many different ways to measure success. In soccer, it comes through goals and victories and ultimately championships. For the 43-year-old Brenes, a native of San Jose, Costa Rica, and a longtime resident of Southern California, there has never been a shortage of that kind of success. He is a player or a coach at the high school or college level.

But there are other ways to measure success in the game of soccer. Things that don’t necessarily show up on a statistics sheet following a game. For Brenes, it is seeing a young Latino earn a college education while building self-esteem on the playing field that has fueled his tireless coaching career over the past two decades.

“A degree to me is very important. As a Latino, it is something we should emphasize,” says Brenes, who has worked as a high school physical education teacher for the past 18 years and coached soccer at the college level since 1986. “If they have the ability that God gave them, they should use that to further their opportunity. But their education is most important.”

And that formula of using soccer as a bridge toward educational success is one that Brenes knows well, having used it himself throughout his life.

Born in San Jose in 1955, Brenes learned the game of soccer from his father Jaime, who played with some of the country’s top club teams. “My father taught us how to kick soccer balls,” says Brenes, who could always strike up a little game with any of his three brothers—Eddie, Marcos, or Jaime.

In 1959, Brenes’ father moved the family to Southern California. There, the sons’ passion for the game grew. “My father started playing in Sunday leagues out here in semi-pro leagues,” Brenes recalls. “He would take my brothers and myself to games to watch. That’s what sparked my interest in games—his playing. He was determined to make us players.”

And players they were. At St. Gable High School, Brenes won a pair of state titles, one as a sophomore (when his brother Jaime was a teammate) and another as a junior. While the competition wasn’t as widespread in his playing days, Brenes says there were just over 400 high school teams back then today there are more than 800), the level of play was equal, if not greater. “Today you’ve got quantity, but not necessarily quality,” he says.

After graduating from St. Gable, Brenes moved on to East Los Angeles Community College, where he was a walk-on with the men’s soccer team. By his second year, in 1975, he was team captain and leading East LA to its first-ever state championship. “That opened up all sorts of avenues for me,” says Brenes, who was suddenly drawing interest from big-time schools like UCLA and Cal State-Fullerton.

A severe ankle injury dampened those prospects, however, and Brenes instead continued his education at Whittier College, where he again walked onto the men’s soccer team and ended up serving as captain in 1977 and ’78. By the time Brenes graduated with his B.A. in physical education and health in 1978, he was an All-America player and Whittier had won its conference for two straight years, qualifying for the National Association of Intercollegiate Athletics playoffs. “It was a great feel for Whittier,” says Brenes, who honed his soccer skills in the off-season by playing for a semi-pro team in the Western Alliance League.

Out of college and on his own, Brenes landed a teaching job in the early ‘80s at Bell Gardens High School, and he is still there today. There he embarked on his high school coaching career, a career that
has now spanned some 18 years. In that time, Bell Gardens has amassed a record of 320 wins, 66 losses, and 53 ties. It's won the league championship 15 times (never finishing less than second), and it has won three California Interscholastic Federation championships.

"It's a nice situation at Bell Gardens," says Brenes, who went on to get his master's degree in administration while teaching and coaching at the high school. "We're really from a low socio-economic area, and a lot of these young men try to make it and go on to a four- or two-year institution."

Besides teaching them at the high school level, Brenes has found another way to further his player-college aspirations. In 1986, Brenes began working as an assistant men's soccer coach at Cerritos Community College. Then, in 1988, Brenes heard of an opening at East LA, his alma mater, which was resurrecting the soccer team that had been dormant for several years.

Just as he did as a player, Brenes helped put East LA soccer back on the map. From 1988 to 1997, Brenes guided East LA to a record of 155-18-12. His team won the South Coast Conference championship nine times, earning the state title in 1990 and finishing second in '94. "We really had an incredible run," says Brenes, who could recruit his players from Bell Gardens. High to play at East LA, getting their feet in the college door.

While his soccer plate was already more than full, Brenes couldn't resist taking on another challenge. In 1996, the athletic director from Rio Hondo Community College approached Brenes and asked him about starting up a women's soccer team at the school. Brenes accepted, and for an entire season he got up at 5 a.m. taught at the high school, then went to Rio Hondo to coach the women before driving over to East LA to coach the men. "I realized I couldn't do this anymore," says Brenes, whose first-year women's team went 3-12 that season. "I couldn't be in three different places in one day—I could be in one spot or maybe two."

So Brenes decided to hang up the whistle at East LA and focus solely on Rio Hondo. Where in 1997, he began the men's soccer team, as he saw with the Rio Hondo women's squad, starting a first-year program is never easy. But the Rio Hondo men bucked this trend, reeling off an improbable 21-2-1 final overall record that carried them all the way to the state championship game, where the Road Runners were finally stopped, 5-1, by De Anza College.

"Teams were saying, 'Who's this new kid on the block?,'" laughs Brenes, who was named South Coast Conference Coach of the Year that season after Rio Hondo went undefeated in the league at 13-0-3. In addition, the Road Runners ended up ranked No. 7 in the nation for Division 3 community colleges, which was the greatest honor bestowed on the program. Brenes says, 

And the Rio Hondo men didn't let up in 1998, tearing through the SCC for a second straight crown at 13-1 and finishing 21-2-1 overall. Led by SCC Player of the Year Juan Carlos Bolaños, a first-team All America player, and first-year player Marvin Quijano, the Road Runners proved that 1997 was no fluke and that they were indeed a program to be reckoned with.
I didn't know what to expect when I got there," says Quijano, who heard about the Rio Hondo team from his friend Jose Mejilla, one of four returning players from the 1997 squad. "But I didn't have anywhere else to go, so I gave it a shot."

Quijano ended up finishing second on the team in goals with 30 while adding 19 assists, and he credits Brenes' work as coach for the Road Runners' success. "He worked us hard," says the 19-year-old Quijano, who is currently practicing with the Los Angeles Galaxy of Major League Soccer, where he is hoping to land a roster spot. "We were ready for every game."

When we started the team, no one knew what to expect," adds Bolaños, who played for Brenes for four seasons at Bell Gardens, leading the team in scoring as a junior and senior before coming to Rio Hondo in 1997. "But after that first year, they knew we had a good team! It's good to be the underdog because once the game starts, you just run right by them."

While Bolaños enjoyed a great high school soccer career at Bell Gardens, he, like Brenes some 20 years earlier, wasn't sure what the future held afterwards. He didn't know much about Rio Hondo until Brenes extended the invitation. "I didn't have a chance to go to a four-year school," says the 19-year-old Bolaños, who is now planning on transferring to a four-year institution, where he wants to study computer programming and further his soccer career.

"He's helped me a lot," Bolaños adds of Coach Brenes. "I wouldn't be in this position if it weren't for him."

And to Brenes, those kind of words are much more important than the team-leading 33 goals and 15 assists that Bolaños produced last season, or all the league championships rolled into one.

"I try to make the Latino kids see that they can use their ability to play soccer in school as their way out," says Brenes, who is now passing the game of soccer on to his own sons—Joshua, 6, and Isaiah, 11. Even his wife, Elena, Brenes says, is becoming partial to the sport.

Of course, Brenes understands how gifted players can become lured by the chance of playing soccer professionally. He once had those dreams himself. But Brenes just hopes that his players never lose sight of the most important definition of success—"I used my soccer career to get my education," he says. "In my senior year in college, I had an invitation to try out with the Dallas Tornadoes of the old North American Soccer League. I didn't go because I didn't want to leave school. Had I left school, I might have regretted it now."

And so too would have the countless players over the past two decades who have benefited from Brenes' golden coaching touch.
Women's Leadership Conference Uplifting

Candid Discussions of Racism, Sexism, and Oppression

BY
ARLENE BRYANT, MEDIA SPECIALIST, CAL POLY-POMONA

"Lifting as we climb" was the motto of the National Association of Colored Women, founded in Washington, D.C., in 1890. Now, more than 100 years later, the phrase was reiterated at the second annual Women's Leadership Conference recently held at Cal Poly Pomona, in Pomona, Calif.

Sponsored in part by the university's office of diversity and compliance programs, the conference featured the Southern California debut of Shakti Butler's groundbreaking documentary, The Way Home.

"Together, as illustrated in The Way Home, we can find common ground, understand the uniqueness within us and among us, and move forward to the next step, lifting as we climb," said Donna Albro, Cal Poly Pomona executive director, Diversity & Compliance.

The Way Home was filmed over the course of eight months and features 64 women, representing a cross-section of cultures, who met in eight councils separated by ethnicity—African American, Arab, Asian, European American, Indigenous, Jewish, Latina, and Multiracial. With candor and courage, the women speak their hearts and minds about resistance, love, assimilation, standards of beauty, power, school experiences, race, gender, class, and more. The result is a rich compendium of stories that reveal the far-reaching effects of social oppression. Woven throughout are collages of historical and family photos, dance sequences, visual images, and music from more than 20 cultures.

The film acts as a catalyst for transformative learning—experiencing a deep shift in the basic premises of thoughts, feelings, or actions. "Transformative learning shifts the seat of consciousness," said Butler. "When this shift takes place, the lens through which we see is dramatically and permanently altered."

A doctoral candidate in integral studies at the California Institute of Integral Studies in San Francisco, Butler's passion lies in her desire to uplift humankind, and in her belief that we are all truly interconnected and bear responsibility to the whole. She is one of the principle partners of World Trust, a nonprofit organization founded in 1987 to create new ways for people to come together to talk about issues of race and culture.

For 21 years, her work has challenged and inspired learning through the use of interactive processes such as her "Heart to Heart Conversation" model. The Way Home was created to act as a catalyst for these conversations, and after each showing, a panel of some of the women featured in the film share their stories and invite the audience to join in the discussion.

"What I'm after is challenging our basic assumptions," says Butler. "Oppression is internalized, Oppression is as much a part of all of us as our breath."

How that oppression manifests itself in the next generation was a major com...
Don’t Be so Defensive!

"When used with compassion, thoughtfulness, and respect, language becomes a powerful tool for liberation." Evelyn C. White, editor, The Black Women's Health Book

Building on the insights gained through The Way Home video and panel discussion, Sharon Ellison and Fabienne McPhail rounded out the Women's Leadership Conference by conducting a workshop on how to have powerful, non-defensive communication.

"Traditional communication patterns can hold us back, lock us into stereotypes, and contribute to the glass ceiling that still suppresses women," said Ellison, a therapist and consultant for 33 years. "For centuries, Aristotle's war model for communication has been taught in Western Culture as the art of winning arguments. In the war model, if at any given time we don't have mutual cooperation, we find we must either give in to others, withdraw from the situation, or try to gain control over the other person. This strategy makes us defensive, undermines our self-esteem and confidence, and causes needless power struggles both at work and at home."

"To realize our potential as women in the 21st Century, we must stimulate others to value our competence and leadership styles," added McPhail, director, Women's Center, and graduate residence dean, Stanford University. "Women are often viewed as either aggressive and harsh, or nice and ineffectual—while men are seen positively as unemotional and competitive. Even when we demonstrate strong leadership qualities, we still struggle for respect."

Do you still beat your wife?

Many times in the "war model" style of communication, there is no "good" response. Take that old vaudeville routine, "Do you still beat your wife?" Whether you answer yes or no, you're still admitting the crime. Ranging from denial to counterattack, here's a sampling of some defensive reactions that might have a familiar ring: "He was just joking. He didn't really mean it." "I'm sorry you took it that way." (Meaning, the way you took it is the real problem, not what I said.) "I'm not being too sensitive! This is an important issue!" "I can't believe you would think that about me!" "Don't you think women supervisors are hard to work for?"

Forget Aristotle

The non-defensive model uses questions, statements, and predictions to help us understand others better, communicate more effectively, and often resolve conflicts without getting into power struggles.

• Questions

Use sincere questions to draw out the other person in order to understand their experience, thoughts, and feelings. For example, if someone says, "I can't learn this computer program!" ask them to clarify: "Are you saying that you need help or a break, or that you want to quit completely?"

The non-defensive question must be sincere and open. Its purpose is to collect data. This is much easier said than done. We are so used to asking questions in a tone and with a body language that expresses our
own opinions and feelings that it is hard to ask a simple, sincere question. But the power of a sincere question is immense because it stimulates others to disarm or drop their defensive trend, and to respond in a sincere and honest way.

• Statements

Statements help clarify our own position and our view of another person's position. For example, if someone says, "That idea won't work!" instead of arguing "Yes, it will!" try "There are several reasons why I believe it will work, and I'd like to tell you about them."

We can have much more influence when we simply express our own thoughts and feelings instead of stating our opinion as fact or trying to convince others to agree with us. When others feel our security and confidence, they are more likely to listen openly and respectfully.

• Predictions

Predictions describe the different consequences that might result from different choices, without trying to directly control which choice is made. For example, if someone responds to an idea with "That won't work," you might say, "If you just say it won't work, without giving any reason why, then I don't want to try to convince you or discuss it. If you tell me a specific reason why you think it won't work, then I would like to talk to you about it."

Non-defensive predictions do not coax, punish, or falsely threaten. In this example, you have made a prediction that prevents another person from just throwing a wet blanket on your idea without explaining why. You also make it clear that you won't accept the statement unless the person is more specific. Further, if the person is more specific, whether you agree or not, you will consider the person's opinion respectfully.

According to Ellison, employing this strategy protects you from people who are attempting to put you down or manipulate you. It gives the person a clear picture of how you will respond to each choice, and it does so in a respectful way.

"Using non-defensive communication, we can gather accurate information, speak with clarity, protect ourselves, and hold others more accountable," concludes Ellison. "People are more likely to respect us, and we can strengthen our personal and professional relationships."

Biographical Notes:

Sharon Ellison, M.S., Founder of Ellison Communication Consultants, based in Oakland, California, is an award-winning speaker who provides workshops and keynote addresses for professional organizations and conferences nationwide. Clients include educational and social service groups and corporations, among them Hewlett-Packard and Nordstrom. She has been featured on TV talk shows and on NPR and Radio International for Peace. Her book, Don't Be So Defensive! - Taking the War out of Our Words with Powerful, Non-Defensive Communication, explains how to communicate successfully, even in oppositional situations or with people who are intimidating.

Rab:item McPhail, M.A., was on the faculty of the women's studies department at SFSU for seven years and is the former co-director of Aum Lute Books in San Francisco. Her work in progress, The Ultimate Betrayal: Woman on Woman Violence, deals with violence by both heterosexual and lesbian women. She is also developing a project for non-violent relationships to be conducted throughout the country.

State University of New York at Buffalo
ASSISTANT PROFESSOR 10M
PART-TIME

Duties: The candidate will be teaching in a clinical setting, doing research with the ability to conduct evaluations and supervise MSW-JD joint-degree students with SPSS and research projects.

Minimum Qualifications: Candidate must have a JD and admitted to practice in New York State with trial experience, preferably with individuals who have experience working knowledge of SPSS. Minimum 10 years of experience in the field of domestic violence, and experience in grant writing and grant administration

To apply: Send letter of application and resume to

Legal Assistance Program
P.O. Box 9
Getzville, New York 14068-0009

Materials must be received by May 26, 1999 to ensure full consideration. Salary $22,500-$30,000, commensurate with experience; generous benefit package.

The University at Buffalo is an Equal Opportunity Affirmative Action Employer. The University is interested in identifying candidates with diverse background, including prospective minorities and women candidates and professionals with disabilities. No person in whatever relationship with the State University of New York at Buffalo shall be subject to discrimination on the basis of age, creed, color, disability, national origin, race, religion, ethnicity, sex, sexual orientation, marital or veteran status.

Waonanaw Community College

STUDENT DEVELOPMENT AND ACTIVITIES DIRECTOR

A comprehensive two-year college dedicated to student, community, and staff success is presently seeking an individual for the position of Student Development and Activities Director. This individual will be responsible for the development and supervision of all facets of the comprehensive student development program for the college. The College is located in the city of Ann Arbor, MI, a community of over 100,000 people, who are surrounded by a cultural, entertainment, Big Ten Sports, and the surrounding metropolitan area. The successful candidate must possess a Masters degree, preferably in student affairs, higher education administration, counseling, recreation or related fields, minimum of two years successful work experience in human resources, adults, or senior citizen development program activities with increasing levels of responsibility, and willingness to work a flexible schedule, including evenings and weekends.

Annual salary range is $44,000-$54,400 on a 12-month basis, dependent upon education and related experience with numerous fringe benefits.

Deadline for receipt of Waonanaw applications: June 1, 1999.

Interested persons should send a completed Waonanaw application form with credentials (transcripts) to the Office of Human Resource Management, Waonanaw Community College, PO Box 31, 4800 E. Huron River Dr., Ann Arbor, MI 48108, 734-743-1200, Fax Hotline: 734-743-5351.

For more information, see our website: http://www.waonanaw.cc.mi.us/jobs/
Dominican College Celebrates Latino Art and Film

Rivera, Hidalgo, Valdés and More

By Alexis Ruppanner

What began as a small school for girls in 1890 in a historically White community is today a liberal arts college with an enrollment of more than 1,400 men and women of all races and ethnic backgrounds. Dominican College went from a history of exclusiveness to a reputation for inclusiveness, in the tradition of the religious order it's name indicates. Now, more than 100 years after its founding, Dominican College in San Rafael, California, is as a hub for celebrating and embracing global art.

Continuing its commitment to the arts and multiculturalism, last year the college helped make possible two major events celebrating the spectrum of Latin American cultures. Last November, alumni and Latin American art collector Michael Wornick bundled 38 paintings and one sculpture in bubble wrap and shipped them to his alma mater for an exhibit, "The Human Figure in 20th-Century Latin American Art: Selections from the Michael Wornick Collection."

A dozen or so undergraduate students in a Museum Studies class curated the Latin American art exhibit in the Alemany Library on campus. In a comprehensive effort to heighten cultural awareness, students researched each artist and wrote museum-quality wall labels and then, after hours of deliberation, arranged the artwork. The exhibit featured works of renowned artists such as Diego Rivera, José Clemente Orozco, María Izquierdo, Armando Morales, Francisco Toledo, and Rodolfo Morales.

"The Human Figure in 20th-Century Latin American Art" exhibit at Dominican College was a thrill for Wornick and for those who visited.

"There was a lot of excitement. Students and the community were turned on to this new area of fine art," Wornick said.

Open for six weeks and free to the public, the exhibit drew many Bay Area residents. "An exclusively Eurocentric perspective in art is limiting," said Dorothea Reyna, director of corporate foundation and community relations at Dominican.

"This exhibit celebrated the beauty and depth of Latin American art, which is important. One-third of Dominican College's student population are students of color. Showing art that reflects the diversity of our student body and California fosters mutual understanding."

Recognizing that culture is taught and transferred in film as well, Dominican collaborated with the Second Annual Latino Film Festival of Marin last fall. Featuring films from Latin America, Spain, and the United States, the festival paid tribute to artists such as Luis Valdez and Edward J. Olmos, and offered a wide selection of foreign and domestic independent films. The five-day festival featured 15 films and videos, nine academic seminars, a tango class, a gala honoring Argentine film icon Laura Hidalgo, and a closing night fiesta complete with salsa dancing, wine, and tenement. Hundreds of people, ranging from students to corporate professionals, attended the festivities.

Dominican's academic seminars in this First Annual Cine Latino Forum offered such topics as The Immigrant Experience, The Best of Video Art, and Contemporary Mexican Short Films. With open doors, Dominican invited the campus community and the public to...
attend all seminars without charge.

"It's critical to learn about the bias we see in the United States," said Carlos Rodríguez, assistant professor of English at the college. "Hollywood offers us only a narrow view of the world. It's important to see the world from the perspectives of Latinos from within and outside the United States."

Not only did the film festival entertain and educate; it also provided a network for Latinos. With visiting professors from across California, the local film festival had tremendous outreach.

"Film is a treat to watch," Rodríguez said. "And a film festival can reach community members within and beyond the county, the state, and the nation."

With films from college students as well as polished network producers, the festival offered only the highest quality. Films included "Tango: The Obsession," by recent college graduate and Bay Area local Adam Boucher; "Caídos del Cielo/Fallen from Heaven," directed by Francisco Lombardi; and "Mas Allá del Olvido/Beyond Oblivion," the Argentine Vertigo, starring Laura Hildalgo, made two years before the Hitchcock masterpiece.

"A great film, like a great novel, is one rich in narrative," Rodríguez explained. "That is a story, based in the human experience told in a compelling manner that balances all aspects of narrative storytelling."

Highlighting Latino artistry is just as important as providing positive and contemporary images of Latinos in film. "Images of Latinos in Hollywood are scarce," commented Rodríguez. "And the images we do see tend to be negative. Latinos play only minor characters; sadly, there are actors, scripts, and images unseen."

Proving that there is a film industry alternative to Hollywood, the Second Annual Latino Film Festival of Marin offered enjoyment and advancement of the Latino culture. Alfred López, O.P., assistant professor of Humanities at the college, is working many hours to get the third film festival off the ground, hoping that the "sensitivity and excitement of the films and seminars will allow the discovery of and a reawakening to a heritage many Latinos are lacking."

Although the festival required a lot of sweat, tears, and elbow grease, Dominican College will continue to showcase Latino artistry. The film festival, like the art exhibit, accentuated an imperative message, a lesson for life.

"We want people to get in touch with cultures, respect cultures, and to grow," López said. "To see people as people, and to allow for differences."

Dominican College, founded in 1890, is a coeducational Catholic liberal arts college located on 80 wooded acres in San Rafael, California. The college offers more than 30 bachelor's and master's degrees.

---

**Diversity and the Arts**

by Joseph R. Fink, President, Dominican College of San Rafael

Dominican College upholds the arts, beholding the humanities as equally important as other scholarly disciplines. Likewise, the college emphasizes equality and diversity. Dominican College has a stated institutional commitment to diversity.

Recognizing the large number of Latinos who are first-generation college students, Dominican blends the arts with appropriate career preparation so that students who have worked hard and whose families have sacrificed much will find rewarding careers once they leave our institution.

To further ensure the success of Latino students, Dominican College offers both traditional scholarships and financial aid packages as well as scholarships expressly for students of color. Fortunately, independent colleges like Dominican are unafettered by the limitations of the affirmative action ban. Thus, we are able to offer students a seeding ground enriched with myriad experiences and narratives.

Our commitment to diversity does not stop in the classroom. Our dedication to multiculturalism has manifested itself, in part, in such activities as the Latin American Art Exhibit and the Latin American Film Festival, of which the College was a co-sponsor.

The benefits of such activities are many. Firstly, our commitment to diversity is reaffirmed in a very visible and public way. In addition, the college's interdisciplinary approach to education is broadened and strengthened. And, significantly, such activities provide valuable outreach and contact with prominent artists and thinkers from diverse backgrounds.

In addition to the arts-related activities like the art exhibit and film festival, the college has brought to campus an extensive series of lectures on multiculturalism. Leveraged upon these activities are other multicultural initiatives, including recent appointments to increase faculty diversity. The James Irvine Foundation has helped make much of this progress possible.

The nation's growing diversity underscores the importance of our understanding those who are different from ourselves. Our graduates must be able to function effectively in an increasingly manifold workplace.

Surrounding students with art and multiculturalism instills appreciation living a life infused with creativity and acceptance toward such variance in our world tomorrow.

López-Contreras Named Modern Languages Chair

Dr. Enrique López-Contreras is the new chairman of the Department of Modern Languages at California State University at Stanislaus.

López-Contreras, an expert on bilingual and multicultural issues, was a member of the faculty at Simón Bolívar University in Venezuela for 25 years. He has initiated exchange programs of faculty and students between CSL-Stanislaus and Simón Bolivar.

López-Contreras earned a master's degree from Virginia Tech and a doctorate at Simón Bolivar and has published three books on language and bilingual issues.

Cepeda Named President of Santa Ana College

Rita M. Cepeda has been named president of Santa Ana College, one of California's oldest community colleges. Cepeda will guide the college in fulfilling its mission of responsive service to student and community needs. This includes planning, organizing, and implementing educational policy and procedures to develop curriculum and student support services.

"Ms. Cepeda comes to us with the highest commendations, and we are eager for her to join our organization," said Dr. Eddie Hernandez, Jr., district chancellor.

Cepeda earned her bachelor's and master's degrees from California State University Long Beach. She has been working on her dissertation for her doctorate at the University of Southern California.

New School University Names Blakely Graduate School Dean

New School University (NYU) President Jonathan F. Fanton has announced the appointment of Edward J. Blakely as the dean of the Robert J. Milano Graduate School of Management and Urban Policy and professor in the Urban Program beginning September 1999.

Blakely has been dean and Dask professor of Planning and Development at the School of Urban Planning and Development of the University of Southern California for the past five years.

Blakely serves on the National Academy of Sciences Panel on Urban Development and Transportation. He is an advisor to the Organization for Economic Cooperation and Development and to state governments in the United States, Australia, Sweden, and Japan.

He has a bachelor's degree from the University of California-Riverside, a master's from the University of California-Berkeley, and a doctorate from the University of California-Los Angeles.

Duran on New York-Farmingdale College Council

Dr. Michael J. Vinciguerra, acting president of State University of New York (SUNY)-Farmingdale, has announced that James E. Duran has been appointed to the College Council.

Duran is an Airport Duty manager at John F Kennedy International Airport.

He serves on SUNY-Farmingdale's Aerospace Technology Curriculum Advisory Committee and the Alumni Association Board of Directors. His community involvement includes the South Hempstead Baptist Church Senior Citizen Board, Project Pride Civic Association, and the NAACP.

Duran has an associate's degree from SUNY-Farmingdale, a bachelor's from Western Michigan University, and a master's from SUNY-Stony Brook.

DiBiaggio: Raising Hispanic Graduation Rates "Imperative"

Calling it a "moral and practical imperative," Tufts University (Mass.) President John DiBiaggio said high schools and universities must look for ways to increase their Hispanic graduation rates.

In a visit with students at Belen Jesuit Preparatory School in Miami, Fla., DiBiaggio hailed the high school's standing Hispanic graduation rate. Belen graduates nearly 100 percent of its students, many of whom enroll in some of the finest institutions of higher education in the United States.

DiBiaggio, who is the American Council on Education board chairman, said that the number of Hispanic students pursuing higher education has increased by nearly 90 percent in the last decade, but fewer than half of them graduate from public colleges and universities.

Brown Speaks at Latino Education Conference

ASPRA Dr. Sara E. Brown, an expert in educational opportunity who heads President Clinton's White House Initiative on Educational Excellence for Hispanic Americans, presented a keynote address at the First Annual Latino Education Conference, held at Harrah's Hotel in Atlantic City, N. J. The conference was sponsored by ASPRA, Inc., of New Jersey.

Brown facilitates the work of the President's Commission on Educational Excellence for Hispanic Americans, and provides the connection between the Commission, the White House, the U.S.
Department of Education, and the rest of the federal government.

William Cohen, executive director of ASPRA, said Brown's presentation provided the national perspective on issues that directly affect the education of Latino children.

**Villas Named to Border Health Commission**

Dr. Paul Villas, executive director of the University of Texas (UT) System Texas-Mexico Border Health Coordination Office, located on the campus of UT-Pan American, has been appointed by President Clinton to serve as a member of the federal United States-Mexico Border Health Commission.

Villas is an associate professor in the Department of Health and Kinesiology at UT-Pan American.

The commission, which is under the administration of the Office of International Health of the U.S. Department of Health and Human Services, was created with the intent of finding ways to improve the health status of Americans living along the border.

Villa earned his doctorate at the University of Tennessee.

**Perez Named American Council on Education Fellow**

Dr. Jorge V. Perez, chairman of the Mathematics Department at LaGuardia Community College in New York, has been named an American Council on Education (ACE) Fellow for the 1999-2000 academic year. Since 1965, the ACE Fellows Program has worked with colleges and universities to identify and prepare leaders in higher education.

As an ACE Fellow, Perez will spend one semester working at a host institution where he will be included in the highest level of decision-making while participating in administrative activities.

Perez is the author of six textbooks on topics ranging from college algebra to abstract algebra. He earned a master's degree from State Technical University in Santiago, Chile and another master's as well as a doctorate from Columbia University's Teachers College.

**Maricopa College District Names Cárdenas Acting Chancellor**

Dr. Raúl Cárdenas, president of Paradise Valley Community College (Ariz.), has been named acting chancellor of the Maricopa Community College District (Ariz.) for one year, beginning July 1.

"I am pleased to have this opportunity to assume the leadership role of an outstanding community college system," said Cárdenas. "It is my hope to continue to maintain the successful track record our colleges have managed to achieve."

Cárdenas recently received the College Boards Exemplar Award, the most prestigious award authorized by the Western Regional Assembly. The award recognizes those who have offered meritorious service to their profession and proven their ability as a leader of leaders.

He is a founding member and former president of the National Community College Hispanic Council, a charter member of the Hispanic Association of Colleges and Universities, and a member of the coordinating council for the Kellogg Foundation's Hispanic Border Leadership Institute in Arizona.

**Cellular Biologist Soto at Ramapo**

Dr. Ana M. Soto, a professor in the Department of Anatomy and Cellular Biology at Tufts University (Mass.) School of Medicine, gave a lecture at Ramapo College (NJ.) entitled "Is There Anything Wrong with the Way We Study Cancer?"

Since arriving in the United States in 1973, Soto's research interest has been the control of cell proliferation in metazoan organisms. In particular, she studies the regulation of cell proliferation by sex steroids in breast and prostate cells, and possible health effects in humans due to hormone active agents and other panels dealing with endocrine disruptors. In 1998, she shared with Dr. Carlos Sonnenschein the Marla Frazin Award for breast cancer research. Soto and Sonnenschein are currently working on a book concerning the control of cell proliferation.

**In the Spotlight at Bristol Community College**

Salete Antunes-Kenyon and Margie Pacheco, both from the Greater New Bedford Women's Shelter in Massachusetts, gave a lecture entitled "Portuguese American and Puerto Rican Women: Culture, Community, Identity Issues" in March at Bristol Community College (BCC). Antunes-Kenyon and Pacheco examined the role culture plays in Portuguese American and Puerto Rican concepts of identity, family, community, relationships, child-raising, education, employment, sex and sexuality, and social action.

Elaine Vieira, professor of office administration at BCC, was named Massachusetts Business Teacher of the Year by the Massachusetts Business Educators Association. She was nominated on the merits of both her leadership and teaching skills.

**Mass Bay Appoints Norman President**

Massachusetts Bay Community College has named Dr. Lindsay D. Norman the third president in the school's history.

Norman's decision to come to Mass Bay was influenced by the unique potential of the college to become a leader in education and training in Boston and the MetroWest area. "Considering the location of Mass Bay," Norman noted, "we are poised to develop many more business and industry alliances and will widen our academic program offerings to better serve our community.

We anticipate program expansions in the health professions, advanced technologies, the liberal arts, business and careers, profes-
sional development, and personal lifelong learning.”

Norman received his bachelor’s degree, his master’s, and his doctorate from the University of Maryland.

Sánchez Becomes Texas-Austin VP for Research

On April 1, Dr. Juan M. Sánchez became the permanent vice president for research at the University of Texas (UT)-Austin. Sánchez, a veteran researcher and author, is responsible for fostering effective research and for maintaining healthy relationships with constituents who have strong connections to the university.

“Research is a vital component of any great university, and it must be properly nurtured,” said Sánchez. “We must also look to the future, and position the university so that it can achieve its full potential during the next century.” He said it is important to redefine and enhance the role of UT-Austin in the development of the new Texas economy.

Saldívar Lectures on “Border Identities” at Texas-Austin

Ramón Saldívar, vice provost for undergraduate education at Stanford University (Calif.), presented the 15th Annual Américo Paredes Distinguished Lecture in April at the University of Texas (UT)-Austin.

The lecture, “Transnational Migrations and Border Identities: Immigration, Postmodern Culture, and the Pedagogy of Conjunto,” was sponsored by the Center for Mexican American Studies at UT-Austin.

Saldívar is a professor of English and comparative literature and an associate dean in the School of Humanities and Science at Stanford. He has a bachelor’s degree from UT-Austin and a master’s and a doctorate from Yale University.

Postesdad at University of San Francisco

A play by Argentine playwright Eduardo Pavlovsky focusing on the effect of Argentina’s “Dirty War” on a middle-class family was presented at the University of San Francisco.

Postesdad is set during Argentina’s “Dirty War,” in which thousands of the country’s citizens disappeared because of political oppression. The play dramatizes the complications of the war that affects a typical middle-class family.

The play was sponsored by the Davies Forum and The Center for Latino Studies in the Americas.

Hispanic Education Conference at Modesto Junior College

Modesto Junior College (MJC) in California, the Hispanic Leadership Council, and Pacific Bell were the sponsors of the 15th Annual Hispanic Education Conference, held at MJC.

The conference offered over 30 workshops on career education. The theme of the conference was Latinos in the entertainment business. David Gill, production director of the CinéVista Television Station in Phoenix, Ariz., was the keynote speaker.

Two-Day Immigration Conference at University of Houston

“Coming to America: Asian and Latino/a Experiences in the 1990s,” a conference exploring immigration and policy issues that affect both the Asian and Latino communities, was held at the University of Houston (UH) in April.

Sponsored by the UH Center for Mexican American Studies, the Center for Immigration Research, and the Asian American Studies Center, the event featured noted speakers from the Houston area and from out of state. Topics discussed included “The Law and Myths about Immigration,” by Dr. Michael Olfas (pictured here) and Professor William Bates, “The

St. John’s Mock Trial Team in Nationals

St. John’s University’s (N.Y.) Mock Trial Team was headed to the National Championships after successfully defeating Columbia University, New York University, and the University of Pennsylvania in the regional finals. St. John’s came in second behind Yale University in the local competition and was to compete for the top prize against 60 teams from other prestigious schools in the country.

During the local competition, St. John’s student Annie De las Nueses, a native of the Dominican Republic majoring in criminal justice, was selected as one of the 10 outstanding witnesses. Fellow student Kareem Vessup was selected as the No. 1 outstanding attorney for the region.

Master Drawings at the Carlos Museum

MC Drawings are perhaps the most intimate form of art, recording most directly an artist’s vision and documenting a creative process. Current Emory University’s (Ga) Michael C. Carlos Museum is presenting “Master Drawings from the Worcester Art Museum,” an exhibition of 100 European and American drawings from about 1250 to 1750. Because of the potentially harmful effects of exposure, drawings cannot be permanently on view, therefore, this survey of 700 years of art provides a rare opportunity to study such a distinguished selection of works.

This exhibition, which runs until July 11, fea
tutes works by luminaries in the history of art, such as Parmigianino, Tepole, Bouche, Van Gogh, Homer, and Hockney, as well as others.

**Barry University News Briefs**

Barry University (Fla.) has closed on the purchase of the assets of the University of Orlando School of Law. After signing a letter of intent in December 1998, Barry began a period of due diligence, ending its examination and receiving Board of Trustees approval in March. "No woman-founded college has ever had a law school," said Barry President Sr. Jeanne O'Laughlin, OP. "We're making history. Also, Barry's Catholic heritage makes ethics central to our educational mission."

Also in March, *Miami Herald* columnist Robert Steinback moderated a National Issues Forum (NIF) on Affirmative Action. "How Can We Be Fair? The Future of Affirmative Action." The NIFs have shed light on the public's perception of important public issues and whether people are willing to work together to resolve certain issues.

The forum followed the announcement that Ward Connelly, a Black California businessman and the nation's leading opponent of racial preferences, will lead a campaign for a statewide ballot measure to ban affirmative action in Florida government, public universities, and colleges.

**Pima College Hosts Minority Youth Conferences**

Pima Community College welcomed more than 9,000 middle and high school students from throughout Arizona for a series of minority youth leadership conferences entitled "Leadership for the New Millennium." The March event consisted of the 1st annual Native American Leadership Conference, the 3rd annual African American Leadership Conference, and the 10th annual League of United Latin American Citizens (LULAC) Youth Leadership Conference. LULAC's conference targeted the presentation of dropouts and encouraged secondary education. Their conferences have been recognized nationally for their contributions to at-risk youth. Keynote speakers this year included U.S. Secretary of the Army Louis Caldera, LULAC National President Enrique "Rick" Dosaluna, and Texano singer Paquita Torres.

**Anonymous Gift for Loyola-Chicago Women's Center**

The Ann Ida Gannon, BVM, Center for Women and Leadership at Loyola University-Chicago has received a gift of $32,000 from an anonymous donor. The gift, directed to the center's endowment fund at the donor's request, puts the endowment past the $25 million mark. The goal for the endowment is set at $3 million.

According to Carolyn Farrell, associate vice president and director of the Gannon Center for Women and Leadership, the gift to the endowment fund will allow the center to continue its core activities, such as the annual women's conference: maintenance of a women and leadership archives; production of the LINKAGE newsletter; and development of the Gannon Scholars program.

**Westchester Colleges Receive $20,000 Grant**

Westchester Colleges Project on Racial Diversity, a consortium of 10 institutions in higher education in the country, has received a two-year $20,000 grant from Texaco Inc. In 1988, the colleges formed this group to promote diversity and combat racism by providing students with leadership training skills. The Texaco funding will enable the consortium to increase its effort in this area.

**Through the consortium, a diverse group of students is helped to develop leadership skills and apply them to campus life, with the assistance of professional consultants. (Pictured here are students at a training session by Westchester Colleges Project on Racial Diversity.)**

**"Classical Vocal Music from Latin America" at DePaul**

DePaul University's College of Education presented a three-concert series, "Classical Vocal Music from Latin America," celebrating multiculturalism in music, as part of the school's year-long centennial celebration.

Classical, jazz, Afro-Cuban, and folk-influenced music by a variety of male and female composers was presented. The multilingual program included songs with lyrics in Spanish and English. Italian arias written by Latin composers, and Brazilian works in Portuguese.

"There is a particularly rich cross-cultural musical repertoire in Latin America because of its geography, history, and colonization," said Linda Hirt, coordinator of the concert and DePaul's vocal performance program.

**Xmas Daily News Insults Puerto Rican Actress Jennifer Lopéz**

The New York Chapter of the National Hispanic Media Coalition (NHMC) has contacted Fred Dresner, chief executive officer of the New York Daily News, to express widespread Latino community concern regarding the newspaper's insulting portrayal of popular Puerto Rican actress Jennifer López. In an article and caption in an accompanying photograph published in March, López is referred to as a "Reformed Tramp," and she was said to have "ditched her usually trashy look for one of serene sophistication." (NHMC's emphasis)

"We are requesting that officials at the Daily News provide us with an explanation for this article," said Angel F. Alcón, senior policy executive with the Puerto Rican Legal Defense and Education Fund and Steering Committee member of the NHMC New York chapter.

**Craford Hills College Hosts High School Students**

Members of the San Bernardino High School Partnership Academy (pictured here) were among 45 high-school students to visit Craford Hills College (CHC) in California on High School Visitation Day. The CHC
Counseling Department sponsored the event to provide information about CHC to prospective college students.

The Visitation Day included campus tours and informational workshops for high school students and counselors.

**Latin American Art Exhibition at Miami-Dade College**

A Latin American Art Exhibition run by Joshua Gonzalez, a pre-law student, and Patricia Jimenez Xader, a communications student, was held recently at Miami-Dade Community Colleges (Fla.) InterAmerican Campus. There was $25 million worth of artwork by famous Latin American artists Fernando Botero, Cundo Bermudez, Miguel Padura, Victor Manuel, Carlos Enriquez (whose artwork is pictured here) and others on display.

The exhibit included paintings, sculptures, and drawings representing more than half a century of Latin art history.

Exhibiting artists Padura and Fernando Tovar were expected to attend the reception for the show's opening.

**Art of Peace Awards at St. Mary's**

The Art of Peace Award, the first annual recognition of three San Antonio women whose poetry promotes peace and social progress, was given out March 30 at St. Mary's University (Texas) by the St. Mary's University President's Peace Commission. The awards ceremony was part of a three-day program, entitled 'Sex, Money and Power Women in the Global Economy,' on how men and women interact in an increasingly interconnected interdependent world marketplace.

Receiving the Art of Peace Award were Dr. Carmen Tafoya, Paulette Jiles, and Angela de Hovos.

Tafoya is critically acclaimed for her work on multicultural and educational issues. Jiles writes non-fiction, poetry, and prose poetry. De Hovos is widely published in textbooks, literary journals, and anthologies.

**Cal State-L.A.'s Hall of Fame Inductees**

The Athletics Hall of Fame at California State University-Los Angeles (Cal State-L.A.) has inducted (pictured left to right) Abdon Piñon, baseball; Jennifer Lyda, women's tennis; and Bill Mallory, men's basketball, during their annual awards ceremony.

Piñon was a four-year letter winner with the Golden Eagles baseball team and holds multiple school records as a pitcher. Having earned his degree at Cal State-L.A., he is now a detention officer for the Los Angeles County Probation Department.

Lyda won the 1990 NCAA Division II Doubles Championship, with her partner Edna Ovarez-Aguirre, a 1996 Cal State-L.A. Hall of Fame inductee. Among other honors, she was an Academic All-American, a Scholar Athlete of the Year, and a Golden Key National Honor Society member. She works for the Torrance Police Department.

Mallory is a Division I basketball official in California. He ranks among the schools' all-time leaders as a basketball player. In 1975, he was chosen State-L.A.'s male Athlete of the Year.

**Dominican-American Writing Discussion at City College of N.Y.**

"Fiction and the Nightmare of Migration. Dominican-American Writing in New York" was the title of a discussion, reading, and booksigning held in March at the City College of New York. The event, sponsored by the City University of New York Dominican Studies Institute and Dominicans 2000, featured special guests: Loida Maritza Pérez, Annecy Báez, and Carolina González.

**Afro-Latin Religiosity Discussion at Long Island University-Brooklyn**

Long Island University-Brooklyn Professor Andrés Pérez y Mena, an authority on Afro-Latin religions, presented a lecture on HIV infection and Afro-Latin religiosity in March on the school campus.

Pérez y Mena is a professor of educational anthropology and Afro-Latin religion at the Brooklyn Campus' School of Education. His talk focused on the alternative healing systems found in Haitian voodoo, Cuban Santería, and Puerto Rican spirituality. He reviewed research that points to alternative healing techniques among the Afro-Latin Caribbean urban population with access to Western scientific medication but also using traditional healing practices.
Latin American History: From Independence to the Present
Lewis Hanke and Jane M. Rausch, eds.

It is Jane M. Rausch's hope that a careful examination of these materials will introduce undergraduates to the fascinating complexities of historical analysis and to some of the memorable men and women who have helped shape the destinies of Latin American nations.

The Dominican Republic: A National History
by Frank Moya Pons

The "standard Dominican history book" (according to the Hispanic-American Historical Review)—this publication examines the distinct political periods in the country's history, such as the Spanish, French, Haitian, and U.S. occupations and the several periods of self-rule. It pursues a socioeconomic history, and it examines contemporary events up to 1990.

Freedom's Web: Student Activism in an Age of Cultural Diversity
by Robert A. Rhoads

In the 1990s, as in the 1960s, college students have turned to campus demonstrations as a means to advance social change. Through illustrative case studies, Robert Rhoads reveals the significant connections between contemporary student activism and the efforts of a previous generation of student activists to advance participatory democracy and civil rights.

Modernismo, Modernity, and the Development of Spanish American Literature
by Cathy L. Jade

"Modernismo" arose in Spanish American literature as a confrontation with and a response to modernizing forces that were transforming Spanish American society in the late 19th Century. In this book, Cathy L. Jade undertakes a full exploration of the "modernista" project and shows how it provided a foundation for trends and movements that have continued to shape literary production in Spanish America throughout the 20th Century.

José Zorrilla: Don Juan Tenorio
José Zorrilla's play was the most successful of the 19th Century in Spain. The reason is made obvious by this stylish, lavish, and captivating production.

(Spanish. 2 hrs., 30 min. color)
Item #FHI 5231

El Greco

The program provides an unusual glimpse into the art, life, and times of this famous 16th-Century painter. The program details El Greco's travels to Italy before settling in Toledo, Spain, in the 1570s.
the artist's confrontations with Spanish monarch Philip II are documented, along with his struggles to maintain his artistic integrity.

(29 min. color)
Item #FFH 8806

Pablo Picasso

This program explores the reasons why Picasso might have placed a number of strange, indecipherable figures within "Crucifixion," his classical representation of Calvary. Many allusions found in the work's enigmatic composition seem to indicate that the painting might have been created during a personal crisis.

(33 min. color)
Item #FFH 7701

Goya

Under the direction of Paloma Chamorro, this new RTE production explores the life, works, and epoch of one of Spain's most beloved painters, utilizing images from his pictures, drawings, and exclusive imprints. Avoiding polemic interpretations of Goya's creations, it presents his work within the context of the events of his life and the period in which they were printed.

CONFERENCES

The Macalester Forum on Higher Education

June 2-3

Diversity and Stratification in American Higher Education is the theme of this higher education forum sponsored by Macalester College. The keynote address, 'Life on the River: Talking about Race-Sensitive College Admissions,' will be delivered by William G. Bowen, president of The Andrew W. Mellon Foundation. At the Mariquette Hotel, St. Paul, Minn.

Contact: fax to (651) 696-6500.

National Multicultural Institute

June 3-6

The 14th annual national conference sponsored by the National Multicultural Institute (Washington, D.C.): "Embracing an Inclusive Society: The Challenge of the New Millennium." Thirty half-day, two-day, and four-day workshops will include: Training of Diversity Trainers; Building Cultural Competence: Evaluating and Assessing Diversity Initiatives; Building Diversity Skills for Managers; Conflict Resolution Workshops; and Cultural Competency in Health Care.

Contact: XMCI, (202) 483-0700; e-mail <nmc@nmc.org>, Web site at <www.nmci.org>.

NCORE National Conference

June 3-7

The 12th annual national conference on Race & Ethnicity in American Higher Education (NCORE '96) will be held at the Peabody Hotel in Memphis, Tennessee. Program highlights include: four keynote addresses; 45 major workshops providing in-depth focus on critical issues and concerns; five multiple-session institutes, each providing a coherent, integrated set of curriculum; six practicums, providing hands-on training to develop selected tools, skills, and end products: a series of documentary film screenings and discussions; approximately 100 different concurrent sessions selected from responses to a national call for presentations; a student leadership development conference scholarship program; and a series of special events and performances. NCORE is sponsored by the Southwest Center for Human Relations Studies, Public and Community Services Division, College of Continuing Education, The University of Oklahoma.

NACADA - National Academic Advising Association

June 27-July 2

The Academic Advising Summer Institute will take place at the Radisson Hotel in Burlington, Vt.
Dean of Admission and Financial Aid

The President of Wesleyan University seeks nominations and expressions of interest for the position of Dean of Admission and Financial Aid. Located in Middletown, CT, Wesleyan University is a highly selective liberal arts institution of 2,700 undergraduate students, 150 graduate students, and 270 faculty.

The University seeks a Dean who will have broad-based responsibility for implementing student recruitment and financial aid programs. Wesleyan maintains its historical commitment to need-blind admissions, and distributes over $15 million annually to its undergraduate students based on their financial need. The new Dean will oversee a staff of 29, a combined admission and financial aid budget of $17 million, and supervise Wesleyan’s Director of Financial Aid who manages the Financial Aid office and function. As an officer of the University, the Dean will report to the President and serve as a member of the senior staff.

The successful candidate will have a commitment to diversity and liberal learning, demonstrate significant successful management experience, and will have, through education and experience, a thorough understanding of the goals of Wesleyan’s liberal arts education. An undergraduate degree is required; an advanced degree preferred. Excellent communication and interpersonal skills are essential.

Please forward nominations and expressions of interest in confidence to:

Middletown, CT 06457

San Juan College
Position Announcement

DIRECTOR

PHYSICAL THERAPIST ASSISTANT PROGRAM

San Juan College is one of the largest two-year comprehensive community colleges in New Mexico and offers academic, occupational, and community service programs. The campus is located on a 600-acre site in northeast Farmington, and serves students in San Juan County as well as the Four Corners area of the American Southwest.

A detailed position description and list of desired/required qualifications may be obtained by contacting the Personnel Office as noted below. Successful candidates will value diversity and have a multi-cultural perspective with adult/immature students, and have a strong commitment to the community college philosophy.

DUTIES & RESPONSIBILITY

The PTA Program Director is responsible for coordination and supervision of the instruction program associated with the Physical Therapist Assistant degree program. Responsibilities include coordinating to meet all accreditation requirements of the APTA; recruiting adjunct faculty; recruiting student employees; and student advisement.

QUALIFICATIONS

Bachelor’s degree in Physical Therapy or equivalent, or eligible for licensure in the State of New Mexico required. Masters degree highly desirable. Successful candidate will have graduated from an accredited program and should have at least two years of clinical experience; experience in physical therapy education or administrative experience at either the clinical or academic level.

SALARY: Range is $47,000 to $52,000 per year commensurate with education and experience. Position is a professional staff, 12 month contract.

STARTING DATE: June, 1999

CLOSING DATE: Open until filled

SELECTION PROCESS:

Interested candidates must submit a 15-page application for employment and a current resume. A letter of application indicating how the candidate meets the above listed qualifications requirements: transcripts of all academic work, and three current letters of reference. The selection committee will base the resume submitted. The successful candidate will be reimbursed for expenses.

Fax (505) 599-0521

An equal opportunity/affirmative action employer.
Book Review

by Manuel Avalos

No policy issue in higher education today sparks such heated ideological debate as that of affirmative action. At the center of the debate is the issue of standards and qualifications for admittance and race and gender classifications of applicants as one of the criteria used in the admissions process by most colleges and universities over the last 35 years. Much of the debate over the last few years has relied on anecdotal evidence, assumptions about "facts," and conjectures by conservative and liberal critics alike.

William Bowen and Derek Bok, in *The Shape of the River*, offer the first comprehensive empirical longitudinal study of the effects of affirmative action policies in higher education and their consequences for African American and White students. Using a comprehensive database, called College and Beyond (C&B), of more than eighty thousand undergraduate students who enrolled at twenty-eight academically selective colleges and universities in the fall of 1978, 1979, and 1980, the authors provide a wide-sweeping analysis of the impact of well-known contextual (race, gender, college admission test scores, high school grade point averages) and socioeconomic variables (individual and family characteristics) on college admissions and student outcomes for three student cohorts.

The most revealing findings of this study are: 1) the vast majority (70-80 percent) of all colleges and universities accept all qualified applicants and do not award special status to any group of applicants defined by race or any other criterion; 2) in the analysis of applications to five selective college, more than 75 percent of Black applicants had math and verbal SAT scores higher than the national average for White test-takers; 3) once admitted, 75 percent of Black students in the C&B database graduated within 6 years (a figure far above the national average at NCAA Division I schools [40 percent Black graduation average and 39 percent White graduation average]); 4) earnings for Black 1976 graduates of C&B schools were higher than the average earnings of "X" students of all races (the top 11 percent of all students in the national control group for this study) who entered colleges nationwide in the same year; and 5) by any standard, the authors conclude, the achievements of Black students in the C&B database have been impressive.

Despite the many contributions that this book makes to the affirmative action debate, however, there are several serious problems that limit the impact of the study due to methodological flaws in design and in sample frame. The authors' decision to limit the analysis to Black/White college students is puzzling. Given the fact that Latinos will become the largest minority group population by the year 2000 and given the increasing immigration of new Asian groups, one must ask why these emerging groups were absent from this study.

The authors' use of Black conservative Shelby Steele's comment, "The real racial divide in American was and remains black and white," to support their decision to include only Black subjects in their sample simply panders to the mistaken Black essentialist argument in race relations. The failure to include Latina/o subjects as part of the study cannot be justified by the Black essentialist argument nor the argument that Latinas/os are too heterogeneous and small in numbers within colleges and universities to be adequately sampled. If the authors had examined reference sources such as Hispanic Serving Institutions, it would have been possible to construct a sample of colleges and universities with an adequate sample of the three largest Latina/o ethnic groups: Mexican, Puerto Rican, and Cuban.

A final shortcoming of this book involves the failure of the authors to engage in the historical and political nature of the affirmative action debate. The center of the debate today is not the question over what constitutes merit, but questions about who has access to higher education and privilege in American society. A more powerful book would have been one that, using a rich empirical database, examined the historical impact that affirmative action policy has had on different groups (Black, Latina, Asian, and American Indian).

In light of these shortcomings, this book will be of only marginal interest to Latino scholars in the social sciences or in higher education. I would urge readers to be on the lookout instead for three forthcoming and exciting books by Latinas/os on a variety of issues in higher education: Carolyn Sotello Turner and Samuel Myers, eds., *Faculty of Color in Academe: Bittersweet Success* (University of Minnesota Press); Gloria Holguin Quadra, *A Plume in History: Chicanas in the Era of Affirmative Action* (Temple University Press); and Celia Alvarez, *Intersection Lives: Puerto Rican Women as Community Intellectuals* (Temple UP). These books will be of more significant value in expanding our understanding of the impact of affirmative action on the lives of other groups of color.

Manuel Avalos is an associate professor of politics in the Department of Political Sciences at Arizona State University West, teaching undergraduate courses on race and politics, urban political economy, and research methods. His recent research focuses on questions of social, political, and economic inequality of racial and ethnic groups. He is completing a book to be published by NYU Press, *Race and Politics in the American: The Rise and Decline of the Racial Empire* (co-authored with Anthony Alfano, Providence College, and Melanie V. Jackson, Virginia Commonwealth University).

CONNECTICUT
Community Technical Colleges

BOARD OF TRUSTEES OF
COMMUNITY-TECHNICAL COLLEGES

Connecticut's Community Technical Colleges are seeking graduate students interested in Administrative or Teaching Fellowships through the
DIVERSITY FELLOWSHIP PROGRAM

- Experience the excitement and challenges of the two-year college sector where 50% of the nation's undergraduates begin their higher education
- Gain valuable professional experience
- Enhance the ethnic, racial, and intellectual diversity that the colleges seek to promote (emphasis will be placed on increasing the participation of African American and Hispanic applicants in the program)
- Serve as a role model for students
- Develop professional relationships in your field
- Earn financial support for your educational expenses: $3,000 per semester.

The selected candidates should be currently enrolled at least in the second year of a graduate program. All candidates should be in good academic standing, willing to spend 6 hours per week in classroom-related activities or in a structured administrative setting under the direction of a mentor. These individuals will be involved in faculty and staff meetings, Fellowship Orientation, and will assume increased responsibilities as the Fellowship year progresses.

For further information contact: Kenneth G. Armstrong, Affirmative Action Officer, Connecticut Community Technical Colleges Board of Trustees, 61 Woodland Street, Hartford, CT 06015; (860) 725-6606.
The Board of Trustees is an Affirmative Action/Equal Opportunity Employer M/F.

VACANCY ANNOUNCEMENT
Search Extended

New Jersey City University is a culturally diverse public urban institution located in the greater New York Metropolitan area, and is one of nine state colleges universities in New Jersey. The University offers undergraduate and graduate programs in the liberal arts and professional studies to over 8,000 students, an extensive cooperative education program, and an expanding continuing education program. Faculty number almost 250.

COLLEGE OF EDUCATION—Yiping Wan, Ph.D., Dean

Assistant Dean

Assists Dean in the management of the College by aiding in the determination and formulation of policies and providing overall direction for the College. Assists in planning, directing, and coordinating instructional, research, and administrative functions.

Qualifications: An earned Doctorate in Education, demonstrated excellence in teaching, scholarship, and professional service, direct involvement in K-12 educational settings, and in the pre-service and in-service preparation of teachers. University for Applications: June 2, 1998

NEW JERSEY CITY UNIVERSITY
2039 Kennedy Blvd., Jersey City, NJ 07305

In an affirmative action equal opportunity employer: we encourage applications from women and minorities.

CHAIR
Department of Mass Communication
Southwest Texas State University

Southwest Texas State University invites applications and nominations for the position of chair of the Department of Mass Communication to begin on or before August 1, 2000.

The chair provides leadership for a department of 27 faculty members, who instruct 750 majors and 750 minors in five sequences of study leading to the Bachelor of Arts degree in advertising, broadcasting, print journalism, public relations, and general mass communication. A new master's program has been established, and the department is currently exploring ACEJMC accreditation. Mass Communication is in the School of Fine Arts and Communication, which also houses the departments of Speech Communication, Art and Design, and Music and Theater.

Candidates should have an earned doctorate relevant to the programs offered by the department. The candidate should have an outstanding record of teaching, scholarship, and professional service consistent with appointment to the rank of full professor. A history of working collaboratively with faculty and other members of the academic and professional communities, fund raising, and previous administrative experience in higher education is desirable.

Review of applications will begin September 24, 1999 and will continue until the position is filled. Applicants should send a letter of application addressing their qualifications for communication education, writing, and public relations, and three letters of recommendation to: Dr. Barbara Lyman, Chair of Search Committee, Department of Art & Design, Southwest Texas State University, 601 University Drive, San Marcos, TX 78666 816 01609000000.

Southwest Texas State University, founded in 1899, is a public state-supported educational institution. With a student enrollment of over 24,000 and faculty exceeding 1,000, the Institute is the state's second largest institution of higher education.

Southwest Texas State University consists of seven schools and three professional departments, offering a wide range of degrees at the baccalaureate and master's levels.

Affirmative Action/Equal Opportunity Employer
Opportunities at New School University

DIRECTOR OF RESEARCH

Position #99049

A proactive professional is sought to manage a non-program staff serving the University's decentralized development operations. The director will research the interests and gifts capacities of major individual prospects for University-wide initiatives and prospects for targeted capital drives or for the University's seven schools; identify corporate and foundation prospects; and help expand the pool of prospects for the annual fund. Conduct research on donors and keep an up-to-date record of giving. Maintain and report on gift-cultivation strategies, and solicit the cultivation and solicitation of major gift prospects. Participate in strategic planning and prospect-screening sessions involving the University's key volunteer leadership. Five years experience in research, preferably in foundations or related field, and expertise in sophisticated online databases is required. Strong writing and communication skills, solid understanding of the financial indicators of wealth, and ability to attend to detail essential.

COORDINATOR OF SPECIAL EVENTS

Position #99051

The Coordinator will assist with all aspects of event planning and implementation of annual special events: verifit, entertainment, and functions sponsored by the University and its academic divisions. Duties include maintaining special events database and planning the invitation process. Must have at least 3 years related experience. Proficiency in Microsoft Word and Excel and excellent verbal and written communication skills. Attention to detail and the ability to handle several projects simultaneously are essential. Must be available for evening work.

New School University offers a dynamic, fast-paced environment and excellent benefits, including tuition and comprehensive health insurance. Position available immediately. Please forward resume and cover letter indicating position of interest and salary requirements to Ruth Kalla, Director of Development and External Affairs, NEW SCHOOL UNIVERSITY, 53 West 11th Street, New York, NY 10011. New School University is an affirmative action employer and encourages applications from women and under-represented groups.

UNIVERSITY of HOUSTON

DIVISION OF RESEARCH

DIRECTOR OF THE OFFICE OF GRANTS AND CONTRACTS

The University of Houston is seeking an innovative and experienced director to fill this key administrative position. The Director of the Office of Grants and Contracts reports directly to the Vice Chancellor/Vice President for Research and Intellectual Property Management and will play a major role in expanding the University's extramural support for research at the University of Houston. The Director will manage a professional staff responsible for processing all proposals and awards for outside funding in support of research and scholarship activities and will act as liaison between faculty, university officers and sponsoring agencies on research-related issues. Responsibilities include the review of federal and state regulations and the design and implementation of procedures to ensure compliance and monitor developments with federal, state and private agencies and foundations.

The successful candidate will hold a Bachelor's degree in Business Administration or an equivalent. A minimum of five years of relevant experience is required. A master's degree is highly desirable. Analytical and organizational skills are required. Although a law degree is not required, it is preferred that candidates have legal experience with the ability to negotiate. Experience in data analysis and electronic research administration is desirable.

The University of Houston offers a full range of undergraduate, graduate and professional programs to more than 35,000 students from across the United States and around the world. Located in an attractive 250-acre campus near downtown Houston, the University is home to 14 colleges and schools.

This is a sensitive, sensitive position and a criminal history record investigation will be conducted. Applicants should submit a letter of interest, current resume, and three references via email to Beth Bitler, bbilir@uh.edu or through the mail attention:

Search Committee Chair, Beth Bitler
Research Financial Center
University of Houston
Houston TX 77204-2163

Applications will be accepted immediately and continue until the position is filled.

The University of Houston is an equal opportunity/affirmative action institution. Women and minorities are encouraged to apply.
BUSINESS MANAGER

The University of Arkansas Physical Plant invites applications for the position of Business Manager. Reporting to the supervising department and administering a $19 million - operating budget and new construction project budget of $162 million. The main campus established in 1871 as a Land Grant institution, is situated in Fayetteville, in the Ozark Mountains of Northwest Arkansas on 420 acres in 265 buildings totaling 8.1 million square feet. The student enrollment is 14,322 with 3600 faculty staff. The Fayetteville population is 52,000 with the 2 county Northwest Arkansas corridor exceeding 100,000 residents. The Northwest Arkansas metropolitan home to Beaver, JB hunt and Wal-Mart, currently ranks in the Forbes list of 18 U.S Cities which offers cost of living below the national average. Northwest Arkansas has a 5 year job growth rate of 30%.

Position Description

The successful candidate will manage the departments' accounting office, computer operations, campus key office, and the campus service center. The individual will be responsible for the departments' budgets, providing financial management reports to the facilities administrators, preparing budget forecasts, and new budget, as well as overseeing personnel functions and records, providing facilities expenditure information to campus customers, generating utility distribution and campus bills, and overseeing the facilities switchboard, receptionists, and accounting technicians.

Qualifications

Bachelor's degree in accounting or a related degree in business or finance and three years experience in accounting. A CPA accreditation is preferred but not required.

Benefits

Salary is competitive, based on experience and educational professional qualifications. University employees earn 11 official paid holidays per year, 12 paid vacation days annually, and 4 paid days off at the rate of 8 hours per each full month of employment.

The University currently pays 60% of an employee's monthly health care premium and offers 3 different health care plans, a vision care plan, and pays the full cost of a basic long-term disability plan with optional additional coverages available at the employee's expense. The University also offers several flexible spending accounts to include a medical care reimbursement account, and a dependent care reimbursement account.

Employees are eligible to request to enroll in University courses for fees as low as $5 per credit hour and to receive tuition dependent on the required enrollment. The University offers a 401(k) defined contribution retirement plan and will automatically contribute an amount equal to 5% of the employee's salary to the retirement account, and, if the employee's election, will match the employee's own contribution up to 1%.

Application Procedures

Submit letter of application with detailed resume, and names, telephone numbers, and addresses of three references by June 10, 1999 to Human Resources Department, University of Arkansas, Administration building, room 222, Fayetteville, Arkansas 72701. Women and minorities are encouraged to apply.

FACULTY POSITIONS

DEAN OF CONTINUING EDUCATION AND NON-TRADITIONAL PROGRAMS

Reporting directly to the Provost/Vice President for Academic Affairs, the Dean is responsible for providing vision and leadership in the planning, development, and implementation of the University's continuing education activities and non-traditional degree programs. The Dean also serves as Director of the summer school.

Qualifications include an earned doctorate from an accredited university with at least five years of full-time university teaching experience; relevant university administrative experience; successful grantmanship and research experience; proven ability to work with business, community, and service constituencies as well as faculty, students, and other administrators; and experience working with a diverse student population in an urban setting, and strong communication skills.

Applications including a cover letter, resume, and three letters of reference should be submitted no later than May 10, 1999.

ASSOCIATE COORDINATOR 
CENTER FOR PUBLIC POLICY

The Union Institute, a national university dedicated principally to baccalaureate and doctoral degree programs for adults, seeks an Associate Coordinator for the Changing Country Project of the Center for Public Policy (CPP) to begin work on July 1st. The Center is a division of the University's applied research units: the Office for Social Responsibility, and is located in Washington, D.C. The Changing Country Project will help the nonprofit sector analyze and respond to the needs of its fundamental nature and purpose and will strengthen the network's capacity to respond effectively to social and developmental challenges. The project consists of five research and design components in order to examine the key issues facing the sector (e.g., asset engagement, commercialization, diversification). The Coordinator will help conceptualize, design, implement and manage one or two components. The successful candidate will have experience managing research and organizational strengthening initiatives, executed new and written communications and interpersonal skills, knowledge of adult education techniques, knowledge of and experience in developing, implementing, and managing development programs and strategies designed to enhance organizational diversity, and the ability to work collaboratively with a wide range of people in various organizational settings. Candidates should send a letter of interest, resume and letter to: Eric S. Feinberg, President, The Union Institute, 1710 Rhode Island Ave., NW, #1100, Washington, D.C. 20036-3007

ONONDAGA COMMUNITY COLLEGE

Computer Studies Faculty Vacancies

The Computer Studies Department invites applications for two (2) tenure track positions: an advanced in Computer Information Systems (CIS) and Computer Science (CSC). Beginning August 1994, the CIS and CSC desire a Master's degree in computer science or a related discipline and demonstrated ability to teach.

CIS applicants should evidence knowledge of modern computer theory and computer application systems. CIS prefers expertise in either (1) networking hardware and software or (2) data base systems and data warehousing.

CSC applicants should evidence knowledge of modern computer theory and computer architecture and languages.

The Computer Studies Department seeks applicants who demonstrate the ability to work in a high-energy environment with a high level of student interaction, the ability to work on a team, and the desire to work in a diverse community. For more information on the department, please visit the website: http://www.sunyocc.edu/programs/cs/

Applicants invited to interview will be expected to give a twenty (20) minute presentation on a computer topic included in a typical introductory course in Computer Information Systems or Computer Science. Applicants may choose their own topics. Examples include an introduction to Excel and algorithms for iteration. Questions about the presentation and other requests for multimedia equipment should be directed to: kirbve@aurora.sunyocc.edu

Salary: Contingent upon rank to which appointed.

Application Review: Begins June 1, 1994 and continues until the positions are filled.

To Apply: Submit a current résumé, application cover letter, names, addresses, and telephone numbers of three professional references to:

DEAN OF GRADUATE STUDIES

Chicago State University invites applications for the position of Dean, Graduate Studies. Reporting to the Provost/Vice President for Academic Affairs, the Dean is the senior administrator who provides vision, leadership and support for the development and overall administration of the university's graduate programs.

Qualifications include an earned doctorate from an accredited university with at least five years of full-time university teaching experience, a record of scholarly activity, and success in securing grant support for academic program development. Strong interpersonal skills, a commitment to diversity, multiculturalism, and academic excellence, and ability to lead effectively are essential.

Applications, including a cover letter, resume, and three letters of reference, should be submitted no later than May 31, 1994 to:

Ms. Adela Hernandez
Director of Administrative Affairs & Cultural Diversity
Chicago State University
9501 South Martin Luther King Drive
Chicago, Illinois 60628

(Chicago State University is committed to an affirmative action, nondiscrimination policy.)
DIRECTOR OF HUMAN RESOURCES

Anne Arundel Community College, a comprehensive community college located just outside of historic Annapolis, Maryland, with easy access to Baltimore, Washington, DC, and the Chesapeake Bay, moves applications for the position of Director of Human Resources. Approximately 2,050 faculty and 375 staff members comprise the regular workforce serving over 15,000 credit students and 22,000 non-credit students annually.

Reporting to the Vice President for Finance, Planning, and Human Resources, the Director is responsible for administering a comprehensive human resource program, including recruitment of faculty and staff, job classification, compensation, benefit administration, performance appraisal, training and development, employee relations, personnel payroll system, and personnel control. In addition, the Director serves as an advisor to management on college human resource issues.

QUALIFICATIONS INCLUDE: Master’s degree or equivalent combination of education and management experience required. Current human resources certification preferred. Five years of progressively responsible administrative or management experience in a human resource-related function preferred in an institution of higher learning. Demonstrated knowledge of one or more of the following areas: compensation, benefits, training and development, employee relations, personnel payroll system, affirmative action and Equal Employment Opportunity procedures, state and federal statutes relating to personnel functions. Demonstrated supervisory skills and experience required.

Review of applications is currently under way. The position will remain open until filled. For further information visit our website at www.aacc.ccc.md.us.

Please send a cover letter and resume to:
Office of Human Resources
Anne Arundel Community College
101 College Parkway
Arnold, MD 21012

Associate Directors
Admissions

Barnard College, a women’s liberal arts college affiliated with Columbia University, seeks two Associate Directors of Admissions to join the senior staff. Reporting to the Dean of Admissions, the Associate Directors will assume responsibility for the admissions programs, organize and execute candidate evaluation and selection processes, and develop and oversee special admissions programs. Special projects will include direct mail, athletic recruitment, communications, admissions technologies, including Web pages, EPS, ASQ, and other projects related to the experience and skills of the candidate.

Requires a Bachelor’s degree from a liberal arts institution, 4-5 years’ experience in college or university admissions; understanding of the values of a liberal arts education for women and the ability to articulate these effectively. Strong verbal and written skills, time management, and organizational skills, and interpersonal skills are essential. Computer literacy and a driver’s license are also necessary. Must be willing and able to travel for up to 3 weeks at a time. Start date early July.

Send letter with resume and salary requirements to Employment Manager, Barnard College, 3009 Broadway, New York, NY 10027-6598. Fax: (212) 854-2100.

Barnard is an equal opportunity-employer and encourages applications from persons of diverse racial, ethnic, and cultural backgrounds.

Springfield College invites nominations and applications for the position of Vice President for Institutional Advancement.

Springfield College, an independent, co-educational college located in Springfield, Massachusetts, with a national and international reputation in the education of leaders for the allied health, human service, and physical education professions. Springfield College offers more than 40 undergraduate and graduate degree programs to more than 4,000 traditional, nontraditional, and international students enrolled at the main campus and at satellite programs in six states and three foreign countries. Its new president, Dr. Richard Filz, assumed office on March 1, 1999.

The Vice President for Institutional Advancement reports directly to the president and serves as a member of the president’s cabinet. The vice president is responsible for the overall leadership and management of the College’s development, alumni relations, marketing and communications activities. The top priority of the vice president will be to work closely with the president to prepare for and implement a major capital campaign. The vice president is expected to establish goals and objectives to augment the College’s ability to fulfill its mission, and to advance the understanding and support of the College with alumni, trustees, students, faculty and staff, parents, friends, corporations, foundations, government agencies, and the general public.

Ivy Tech State College
Wabash Valley Region

...by providing quality technical education to students across Indiana and by providing a dynamic and exciting work environment where your contribution is appreciated.

Chancellor

Ivy Tech State College is seeking a dynamic and visionary leader to serve as Chancellor in west central Indiana (Wabash Valley Region).

Ivy Tech State College is Indiana's third largest public post-secondary institution with 22 campuses located throughout the state. Ivy Tech will enroll over 70,000 students statewide this academic year and offers the Associate of Science and Associate of Applied Science degrees. Technical Certificates, industry and skill-specific certifications, and business, industry, and apprenticeship credit and non-credit training.

The Ivy Tech system is administered by a President within the policies established by a state board of trustees. Each geographic region of the state (typically 4 to 8 counties) is administered by a Chancellor, who serves as the Chief Executive Officer of the campus and who meets regularly with and receives advice, counsel and direction from a regional board of trustees.

The Chancellor provides the vision, planning and leadership to assure that the educational and training needs of the students and employers in the 8-county Wabash Valley region are met. The Chancellor will provide executive oversight for the deans and directors assigned to the academic affairs, student affairs, business affairs, human resources, facilities management, public relations, business and industry training, and development functions of the regional administration. The Chancellor will establish and maintain a positive presence in the academic, business and service communities and provide personal leadership in the development (fund-raising) efforts of the College.

Qualifications:

A Master's degree in education, public administration or a related field is required. A Doctorate and previous post-secondary teaching experience are preferred. Position requires substantial leadership experience, preferably in a post-secondary educational environment. Candidates should be able to demonstrate on their resume a career of progressively more responsible positions. Prior experience with fund-raising a plus.

The successful candidate will be a visionary, have strong interpersonal skills, a collaborative working style and the ability to effectively interact with faculty, staff, students, trustees, state and local college administrators, legislators and the general public. Candidates should also demonstrate experience in working with local community and economic development entities.

Ivy Tech offers a comprehensive compensation package, including TIAA-CREF. To apply, submit a resume and a letter of application that describes your philosophy about the role of the technical college in the continuum of higher education opportunities, and three current letters of reference. To ensure consideration, please submit your application materials by May 31, 1999 to:

Mr. John Adkens
Director of Regional Affairs

I POINT FINAL!

GOING WHERE WE HAVE TO GO

Last year I was asked to be the keynote speaker at the Forum for Diversity in Graduate Education being held in San Francisco. The conference coordinators hoped that I would present a reasoned answer to the question, "Who go on to graduate school?" My audience included some of California's brightest college students whose ethnicities are very much underrepresented in graduate schools.

It wasn't an easy question to answer. While I would have liked to tell them clearly and unequivocally that they should pursue graduate work, the truth is that I, like many other Latinos, let the world define my choices and path in life for a fairly long time before I finally discerned my own desires and choices. My path was more circuitous than linear, reminding me of the repeated line in a poem by the late Theodore Roethke, "I learn by going where I have to go."

As I again contemplate the question about graduate school, I realize that higher education in general, and the role of professors in particular, face the same circular path of learning by going where they need to go. Responding to both external and internal pressures for change, due in large part to the demand for access, higher education is faced with having to assess its role in the current and future environment, and adapt to new directions. And one clear direction that is emerging is toward the primacy of teaching and of educating future professors to teach. This shift will have a profound impact on the research model as the primary vehicle for training and preparing future faculty.

It has been estimated that the world store of information doubles every seven years. Imagine what such a statistic means to an institution like CSU-San Marcos that is approaching only its 10th anniversary, and how our young professors must be constant, fast-paced learners or risk being left behind in yesterday. The traditional role of the professorate is being challenged, not only by the pace of information but also by challenges to reinvent itself and make teaching more of a goal in graduate training.

Traditionally, the triad of teaching, research, and service has been at the heart of the profession. Depending on the type of institution, research or teaching is emphasized, one more than the other. However, the research endeavor has always been viewed more positively, and research institutions have been at the top of the academic hierarchy.

Today we are witnessing at all types of institutions a movement away from the primacy of research toward the emphasis on teaching. A recent report from the Carnegie Commission called for a much higher priority for teaching at the undergraduate level and recommended that faculty be rewarded for outstanding teaching on a level equal with cutting-edge research. Included in the findings were items for revitalizing the freshman-year experience, reducing class size, better utilizing technologies for students, and providing mentors for all students. Realistically, research institutions represent about 5 percent of the universities where graduate students will be hired after their Ph.D. The vast majority of the positions that are available in academe are at non-research institutions such as my own. The movement toward the emphasis on teaching at all types of institutions cannot come soon enough.

Why the push for these and other changes? The purpose is to guarantee a quality undergraduate education for all students. The primacy of teaching is especially critical for Hispanics. Consider the relative sizes of university systems in California alone. The California State University system my university is a part, educates more than 75,000 Hispanic students each year, compared to only 20,000 by the University of California system. Those statistics indicate that the majority of doctoral graduates will find jobs not in research institutions but in large university systems like the CNSL, where teaching is the primary focus. As we draw faculty from research universities, the quality of instruction for our students will depend in large part on a renewed focus to train future professors to teach well.

I told the prospective graduate students in my speech a year ago to seek out mentors or role models at the undergraduate level in preparation for advanced study. I noted that "they don't have to look like you; they just have to believe in you." The reality is that for a long time to come, the odds are quite high that their role models won't look like them. But for the short run, we can at least ensure that they will bring strong teaching to institutions like the CNSL. That can only result in more Hispanic students choosing to pursue graduate study and reinforcing new ideas for making teaching a focal point in addition to engaging in research and scholarly activities.

If done correct, these changes will bring about an educational system that is more responsive and better suited to the changing faces and needs of students. To matter their background. Donald Kennedy, former President of Stanford University, has written that higher education is recognizing that academic freedom, the cornerstone of the modern university, has as its counterpart academic duty. This implies that the Academys must be responsive to the needs of its students. The long-term results of this will make higher education more accountable for what it does and how it is done and will benefit Hispanics at all levels of academic.
SCOPING MEDICAL CAREERS

THE HISPANIC OUTLOOK IN HIGHER EDUCATION
ASSOCIATE DEAN FOR TECHNOLOGY AND RESEARCH

Borough of Manhattan Community College of the City University of New York seeks applications for the position of Associate Dean for Technology and Research. The Associate Dean will report to the Vice President of Academic Affairs and have managerial, planning, and fiscal responsibilities for all aspects of academic technology and research at the college. The Associate Dean will be responsible for innovation, advancement, and short and long range implementation in the areas of technology and institutional research. The Associate Dean will supervise the directors of instructional technology, media center and institutional research. Workload and faculty, the Associate Dean will develop the program and provide guidance and instruction on the use of instructional technologies in classrooms and labs. The Associate Dean will perform other duties as assigned by the Vice President of Academic Affairs.

An earned doctorate in an appropriate or related field, a demonstrated record of distinction in college teaching and research, and a successful record of grant funding are required. A minimum of five years of higher education leadership with broad technical knowledge relative to both academic and administrative computing is required. Candidate must be visionary and possess excellent oral and written communication skills and budget and financial management experience. Candidate must also have the ability to work with support personnel who provide academic technology support and research services for the instruction in all academic programs and departments. Salary: $82,050 A - $102,749 A. Vac #770

ASSISTANT DIRECTOR OF FINANCIAL AID (Higher Education Associate)

Serves as the Assistant Director, assuming responsibility for the program in the Director's absence. Manages the day-to-day administrative operations of the program for optimal efficiency and student service; in concert with the Director, plans, designs and implements operations, policies, procedures and compliance activities; responsible for the coordination of the office services with College and University offices and programs; supervises, train, train, and monitor staff and manage computer operations including the design and implementation of mainframe and PC support systems; coordinate systems activities with College and University data centers. BA degree required. Master’s degree preferred. Familiarity with financial aid and experience in a progressively responsible position. Demonstrated commitment to student-centered services. Extensive knowledge on and experience with electronic processing and the application of technology to financial aid administration particularly in the design and implementation of mainframe and PC systems. Familiarity with federal and state financial assistance programs. Excellent written and oral communication skills. Must possess strong administrative and leadership skills. Ability to respond to competing priorities and deadlines in a dynamic environment. Salary: $40,123 A - $64,306 A. Vac #769

ACADEMIC ADVISORS (Assistant to Higher Education Officer)

As a member of the Department of Advisement and Counseling, the successful candidate will report to the Director and will work with faculty, student affairs and other College officers to deliver coordinated academic advising and advising services to a diverse urban community college student population. The selected candidate will be responsible for large groups of students on an individual basis and will conduct developmental pre-enrollment workshops and programs. The position requires occasional evening hours and may also include some weekend programs for new and continuing students. Bachelor’s degree and two years experience in higher education counseling/advising required. Master’s degree in Counseling or Student Personnel preferred. Experience with registration orientation programs, knowledge and experience in word processing, technology, study skills and excellent written and oral communication skills. Salary: $25,796 A - $47,337 A. Vac #771

DIRECTOR OF PUBLICATIONS (Higher Education Associate)

Management of the Office of Publications. Provide leadership and direction in development of a preeminent electronic and print media image for the College. Oversee the design and printing of all college publications, including college web-site using a computer desktop publishing system. Maintain, edit, and maintain publication guidelines and protocols for the College. Supervise staff. Manage budget and bid process for all college publications and advertising. Bachelor’s degree with a minimum of three years experience required. Excellent written and oral communication skills. Ability to work in a diverse college environment. Computers and desktop publishing experience essential. Salary: $40,173 A - $64,266 A. Vac #772

ADMISSIONS COUNSELOR/RECRUITER (Assistant to Higher Education Officer)

Serves as a recruiter for high school, community and corporate agencies; evaluates transfer credits; supervises the processing of admissions applications and requests for materials and counseling students. Minimum of 18 hours with two years experience. Familiarity with outreach or recruiting community college programs and communities. Excellent written and verbal communication skills and commitment to urban students are required. Schedule includes some weekends. Salary: $25,796 A - $47,337 A. Vac #773

INSTRUCTIONAL COMPUTER SERVICES COORDINATOR (Higher Education Assistant)

Reports to the Director of the Learning Resource Center. The Coordinator is responsible for the user computer support services. Leads training workshops for staff, students and tutors, develops training materials, lab procedures and equipment, and maintenance for the Learning Resource Center's instructional computer labs. Supervises assigned staff, manages and maintains database and report generation functions; and interacts with faculty on methodologies, instructional materials, and services for students. Bachelor's degree in Computer Science or a related area; four years of full-time relevant work experience; preference given to individuals with strong programmer skills and good supervisory or management skills. Knowledge of operating systems is required. Experience with instructional technology a plus. Evenings/Saturdays teaching may be required. Salary: $30,829 A - $57,099 A. Vac #735-A

FULL-TIME TEACHING POSITIONS • INSTRUCTOR OR ASSISTANT PROFESSOR

MEDICAL-SURGICAL NURSING

MATERNITY AND CHILD HEALTH NURSING

Bachelor's degree in Nursing clinical specialization, fifteen (15) related credits beyond Master's degree required. Professional license required. Student Workload Hours: 36. Experience in obstetrics and gynecology preferred. Salary: $38,480 A - $57,099 A. Vac #773

PHYSICAL/ENGINEERING

Teach: physics, electrical engineering and computer methods. Develop: electrical engineering lab. Help: coordinate multiple sections. Vac #778

PHYSICS/ASTRONOMY

Teach: physics, astronomy and computer methods. Help: supervise the labs and coordinate multiple sections. Vac #777

ORGANIC CHEMISTRY/BIOCHEMISTRY

Teach: organic chemistry and general chemistry. Oversee: organic chemistry lab. Knowledge or interest in application of organic chemistry to biological and health science desirable. Full-time, extra-curricular and professional activities expected. Ph.D. preferred. College teaching experience required. Vac #778

PSYCHOLOGY

Teach a range of courses in following areas of Psychology: Introduction Developmental Social Child Personality, Abnormal. Gender Studies. Vac #779

SOCILOGY

ANTHROPOLOGY

Teach and develop a range of courses in Anthropology. Doctorate. B.A. preferred. Knowledge of instructional technologies an asset. Knowledge of instructional technologies an asset. Minimum of three years teaching experience required. Vac #781

ELECTRONIC RESOURCES LIBRARIAN

Coordinate electronic resources, including libraries website, CUNY, search engines and print service. Assist in development of virtual library. Liaison with campus instructional technology departments and CUNY Computer Center. Evaluate and maintain electronic resources and participate in the creation of virtual resources and in resource guides. Knowledge of HTML required, experience in ILTS, network, library and learning systems preferred. ILTS required for instructor and instructor for all assistant professor rank. Minimum of 2 years professional library experience required. Vac #782

SPANISH

Teach all levels of language and surveys courses in literature. Commitment to current language teaching techniques and technology. Participation in scholarship, activities college and departmental activities essential. Ph.D. preferred. B.A. considered. Vac #783

MATHEMATICS

Teach: Mathematics courses from developmental math through differential equations. Demonstrated interest in productive scholarship, grantsmanship. Service to college and department. College-level teaching experience required. Experience in one or more of the following preferred: graphing calculator function of computer lab, life science, computer-based learning, software development, grant proposal writing, curriculum development, and/or innovative pedagogy. Ph.D. in Mathematics or Mathematics Education is preferred. Vac #784

ETHNIC STUDIES

Teach courses representing the Social Sciences and Literature of the Caribbean. Ph.D. in a field of Caribbean Studies and teaching experience required. Vac #785

HEALTH INFORMATION TECHNOLOGY

Teach: range of Health Information Systems courses. Masters degree. B.S. in computer science required for Instructor. Vac #786

COMPUTER INFORMATION SYSTEMS

Teach range of computer courses including object-oriented programming, telecommunications systems, database management, etc. Vac #787

SALARY:

Instructor: $29,409 A - $44,533 A
Assistant Professor: $32,682 A - $55,830 A

Binge Drinking Must Be Stopped

By Gustavo A. Mellander

For the past several years, many higher education leaders have been concerned about binge drinking at our colleges and universities. Although studies do not exist, as yet, on how many Hispanics are involved in this practice, there is no reason to believe that they are any less involved than the majority population.

We are not talking about a few drinks on a Friday night, nor even a fraternity beer blast of years gone by. We are not talking about social drinking as a rite of passage that for some will be anything but harmless.

We refer to irrational, deadly behavior—behavior that reflects either woeful ignorance or willful stupidity.

Binge drinking means excessive drinking by college men and women. It means not only drinking to inebriation but drinking to oblivion.

Binge drinking means ingesting as many as twenty-four or more cans of beer in an hour or so. Or chugging a half a fifth of hard liquor. Encouraged and egged on by their classmates, many pass out. Some, as drunk as they are, get into automobiles and drive away. Serious life-changing, death-dealing accidents have ensued.

Others have fallen to their deaths from roof tops or dorm windows. Some have died of alcohol poisoning.

There is another hidden problem. Given the realities of youthful exuberance and the times we live in, drunkenness can lead to other deadly outcomes. Promiscuous, unprotected sexual activity in our age can lead to HIV infection, dehydration, and ultimately death.

A National Problem

Finding a way to curb binge drinking is a problem faced by all college administrators and teachers. It is not a matter of preaching morality; it’s a matter of saving lives.

Last year, the problem had alarmed so many administrators that Stanley O. Steenbrey, president of the American Council on Education (ACE), decided to launch a nationwide campaign to try to stem binge drinking.

He wrote an open letter to every president highlighting the alcohol-related deaths of college students. He urged them to redouble their efforts to end the scourge.

The issue had already been a subject of substantial discussion at the national meetings of ACE, Association of American Universities, AASCU (American Association of State Colleges and Universities), and NASULGC (National Association of State Universities and Land-Grant Colleges), and was the focus of a panel discussion at ACE’s annual meeting.

The ’80s and ’90s

The problem has bedeviled administrators throughout the 1980s and ’90s. According to the widely circulated 1995 report by the Commission on Substance Abuse at Colleges and Universities, binge drinking among college students has sharply increased in the last 20 years.

Binge drinkers pay a price. The students targeted in the 1995 report were found to perform more poorly academically, to be subject to more disciplinary sanctions, and to engage in such high-risk behaviors as driving under the influence of alcohol and having unprotected sex.

Washington Reacts

In the same period during which binge drinking increased significantly, Congress adopted a series of measures aimed at restricting alcohol abuse among young adults.

In 1984, Congress adopted the National Minimum Drinking Age Act, which withdrew federal highway funds from any state that failed to adopt and enforce a minimum drinking age of 21. Every state was in compliance within two years.

Alarmed by reports of commuting alcohol abuse by college students, Congress then passed the 1989 amendments to the Drug-Free Schools and Communities Act, amendments that required every college and university to adopt and enforce a program for prohibiting alcohol use by students under 21 years of age.

Additionally, among the requirements of the Campus Security Act of 1990 is the stipulation that annual campus security reports include statistics on alcohol-related incidents and policy statements regarding alcohol education programs.

Two Useful Reports

What can a college administrator do? Where can she or he turn for information?

In 1998, the Higher Education Center for Alcohol and Other Drug Prevention formed the Presidents’ Leadership Group to develop a set of policy recommendations to address the problem of underage and dangerous drinking.

The group’s report, Be Vocal. Be Visible. Be Visionary., was mailed to ACE’s membership last year. It is a good starting point. The authors built their recommendations around three key ideas:

1. Be Vocal. College presidents should openly and publicly acknowledge that alcohol and other drug abuse problems exist. They should announce that the institution is going to address the problem.

2. Be Visible. College presidents should take an active, public stand on alcohol and other drug issues. Expectations and standards should be clearly conveyed to all. They should remember that they serve as a role model to other senior administrators, faculty, and students. Their words and actions carry weight.

3. Be Visionary. College presidents should make alcohol and other drug abuse prevention a central part of their institution’s strategic plan. Alumni and parents should be enlisted to help.

Another helpful report is “Promising Practices: Campus Alcohol Strategies,” by David Anderson and Gail Gleason-Milgram. It highlights pragmatic and sensible successful programs already in place at colleges throughout the nation.

We can all think of situations at our institutions when some of our Hispanic students have been enticed into drinking too much. Steps must be taken to help them. As Hispanics are finally finding their way into higher education, we must mobilize so that their bright futures are not cut short.

Dr. Mellander is a professor at George Mason University.
The Triple Whammy: Hispanics in Allied Health Careers

Remedies from Southwest Texas State

By Rumaldo Z. Juárez, Ph.D.

Hispanic and in allied health is indeed a "triple whammy." We are underrepresented in the ranks of allied health practitioners (especially in our own Hispanic communities), severely underrepresented in the student population preparing for careers in allied health, and almost nonexistent in the ranks of higher educational institutions. That's the bad news.

The good news is that considerable momentum is developing throughout the higher educational continuum, from community colleges to health science centers and four-year universities and colleges, to address this underrepresentation. This momentum is largely reinforced by programs being put in motion by both public, private, and community-based organizations and by professional associations such as the Texas Society of Allied Health Professions and the National Association of Schools of Allied Health Professions.

For example, beginning in Fiscal Year 1999, the Bureau of Health Professions of the Health Resources and Services Administration (HRSA) in the U.S. Department of Health and Human Services is requiring grantees to provide outcome data that address the Bureau's four cross-cutting goals:

- Promote a health care workforce with a mix of the competencies and skills needed to deliver cost-effective quality care (increase the number of schools/programs with culturally appropriate curricula).

- Support educational programs' ability to meet the needs of vulnerable populations (increase the number of faculty and trainees in settings serving underserved areas, low-income populations, and/or high-risk populations).

- Improve cultural diversity in the health professions (increase the number of minority faculty and the number of minority/disadvantaged graduates in health professions).

- Stimulate and monitor relevant systems of health professions education in response to changing demands of the health care marketplace (increase the number of...
schools/programs with active partnerships or cooperative working agreements with public and private community-based organizations, such as managed care sites, rural health organizations, community health centers and others.

Numerous programs funded by HRSA under the Health Careers Opportunity Program are assisting minority and disadvantaged students (e.g., those from low-income families, rural areas, and the underrepresented Health Professional Service Area) to pursue these types of programs in community colleges, health science centers, universities, and four-year colleges. A few of these programs are targeting students in high school, and others are targeting students in community colleges who might be interested in pursuing a four-year or more advanced degree.

Two shining examples in Texas of community-based programs targeting minority and disadvantaged students are the Center for Health Policy Development, Inc. (HCOP funded) and the Mexican American Physicians Association (privately supported). Both are extremely effective in grassroots work with high school students and their parents from the barrios of San Antonio. What makes them unique, besides a committed and dedicated staff and corps of community volunteers, is their credibility and reputation in the community and the bilingual/bicultural approach in working with the students, their parents, their school teachers, and their counselors.

After providing students with a curriculum that contributes toward enhancement of self-esteem, awareness of the various health professions careers, development of testing skills, information about financial aid, and knowledge about how to access the various health professions programs in the state, they close the loop by helping them pursue a college education.

Both programs have a working relationship with the School of Health Professions at Southwest Texas State University in San Marcos. They also have access to a rich network of other higher educational institutions in San Antonio that offer programs in the health professions, such as the University of Texas Health Science Center at San Antonio, Our Lady of the Lake, San Antonio College, Palo Alto College, St. Philip’s College, Alamo Community College District, and the University of the Incarnate Word.

Southwest Texas State University (SWT) itself has an HCOP program, now in its fourth year. Its purpose, under the direction of Dr. Ruth B. Welborn, associate dean of the School of Health Professions, is to facilitate the transfer of minority and disadvantaged students from health professions programs in community colleges to one of several baccalaureate programs in health professions offered at SWT. In particular, the allied health professions targeted by this program are respiratory care, health information management, and clinical laboratory science.

SWT collaborates closely with Austin Community College, Laredo Community College, Palo Alto College, San Antonio College, Southwest Texas Junior College, St. Philip’s College, and Blinn College. Eligible students are those who have completed one year at their community college.

During the summer after completing their first year in the community college, students attend a six-week residential program at SWT and then return to their community college to complete their sophomore year. Participants who complete both the summer program and their sophomore year are guaranteed admission to the health professions program of their choice.

Once again, programs such as these are successful because of the committed staff that directs them, the strong support and commitment they receive from the respective institutions administration, and the desire by community colleges to see their students go on to earn baccalaureate degrees that will benefit not only the graduate but the patients and the communities they will serve.

In addition to publicly supported programs, there are those sponsored by private foundations. This year a consortium of foundations announced its 1999 request for proposals “to address the longstanding underrepresentation in the health professions of certain racial/ethnic groups, especially African Americans, Hispanics, and Native Americans.” This initiative “challenges schools of the health professions to develop educational partnerships with undergraduate colleges, community colleges, local high and middle schools, and community groups that improve student performance by systematically developing their academic skills and interest in careers in the health professions.” (Project 5000 by 2000 Health Professions Partnership Initiative 1999). The foundations involved are the W.K. Kellogg Foundation, the Robert Wood Johnson Foundation, the Association of American Medical Colleges, and the Association of Schools of Public Health.

Currently, the Southwest Texas State School of Health Professions has approximately a 33 percent minority enrollment, most of whom are Hispanic.
Despite opportunities and successes such as these, there remains a lot of ground to cover before we can begin to realize a better representation of Hispanics.

Today, Hispanics represent about 11 percent of the total U.S. population but only about four percent of the nationwide enrollment in health information management, eight percent in clinical laboratory science, and eight percent in respiratory care. Less than three percent of the physical therapists in the country in 1994 were Hispanic, and the proportions in occupational therapy aren’t much better. These statistics are only the tip of the enchilada. Other professions, such as nutrition analysis, speech/language pathology and audiology, physician assistant, health administration, radiation therapy, dental hygiene, and long-term care administration, have such minimal representation that percentages cannot even be calculated.

It stands to reason, then, that if the representation is low in our enrollments, what will follow is underrepresentation of Hispanic allied health practitioners in our communities and, even worse, almost no representation in the ranks of higher education. We can expect that these figures will either get worse before they get better or, at best, stabilize for a while at a level that might seem stagnant.

Several factors support this prediction. Court rulings such as Hopwood in Texas will no doubt slow the momentum and make recruitment more difficult in some states of the Southwest. Managed care is certainly playing havoc with both the training needed by the new cohorts in health professions (that is, a trend toward multi-skill training) and the job redistribution effects in terms of geography and type of health care setting for practice. Also, in recent years, we have begun to see a “degree creep” phenomenon in which the entry-level degrees in several areas have moved from the one-year certificate to the associate degree, from the associate degree to the baccalaureate degree, from the baccalaureate degree to the master’s, and from the master’s to the doctorate. What are the implications for Hispanics in this regard? It means that fewer will get into some of these professions, at least for a few years, until there is an adjustment to the new requirements.

But these are merely lumps in the atole (hot cereal). They are destined to dissolve, and there will eventually be a smooth serving.

Will it get better in the future? Of course it will, but it will be a very slow and gradual process and will require considerable long-term commitments by state and federal agencies, institutions of higher education, allied health professional associations, and accrediting bodies, and it will require lots of information dissemination. Information has to be very widely and loudly spread so that all will hear. Most of all, I believe that it will require a different approach to recruitment, modeled after what community-based organizations like the Center for Health Policy Development, Inc. and the Mexican American Physicians Association in San Antonio are doing. They are working with both the students and the parents at the community and middle school and high school levels.

It is my contention that one of the major reasons Hispanics are poorly represented in the allied health professions is that our families don’t know about the exist-
tence of these health professions and their indispensable role in the health care system, and our families lack of knowledge about the salaries and rewards that these professions have.

The minimum starting salary for a clinical lab scientist (medical technologist) in 1997 was $26,033. The median salary was $35,100. Health information managers had an average salary of $51,200 in 1996, and those having advanced training earned even more. Health service administrator salaries vary by size of the facility. In 1997, ISAs of small group practices were averaging $56,000, and those in large practices were averaging $70,000. Also in 1997 the majority of hospital CEOs earned more than $90,500. Administrators of long-term care facilities earned an average of $69,500 in 1996. Speech-language pathologists just starting their careers in 1997 were averaging $35,000. During the same year, audiologists were averaging $42,700, with those in private practice generally earning more than those in salaried positions. Physical therapists in 1996 averaged $40,300, with those employed in hospitals and medical centers averaging about $48,000.

So, how about it? Are these good careers or not? You bet! Are they secure and rewarding careers? You bet! Would I want my son or daughter to go into them? You bet!

For years we have been wanting our sons and daughters to become physicians and dentists and were lured by the aura and status given to these professional degree-holders. Pre-med majors continue to enroll by the dozens, and many aspiring and ill-advised Hispanic high school scholars are drawn to the glory of the white coats. Uninformed parents or those who did not achieve their own dreams continue to force their aspiring children into becoming a “doctor” or “doctora,” not realizing that there is another rewarding world in the health professions that is just as indispensable as the physician, and that is the allied health professional.

At Southwest Texas State University, we are fortunate to have an HCOP program that is helping to recruit minorities and other disadvantaged students into several of our allied health programs, and we also are fortunate in the success we have been having in attracting these types of students in general. Currently, the School of Health Professions has approximately a 33 percent minority enrollment, most of whom are Hispanic. This success did not just appear overnight and without some intervention and commitment. The department and program chairs are aware of and sensitive to the under-representation of minorities in their professions and have committed themselves to improving representation. Such efforts will succeed, however, only if the entire administration is behind it. A testament to this being the case at SWT is clearly reflected in one of the four goals of the institution’s Strategic Plan for the next four years: To recruit, retain and maintain a faculty and staff workforce that is representative of the diverse stakeholders in the state.

Students desiring information about health professions programs offered at SWT can visit our website at www.southwest.edu. For those desiring information about a school of health professions in their state, visit the website of the Association of Schools of Allied Health Professions at www.assoc.org.

Doctor Juárez is a professor and dean of the School of Health Professions, Southwest Texas State University, San Marcos, Texas.
Prescriptions for More Hispanic Doctors

By Amalia Duarte

Medical school is tough. But it can be even tougher for young Hispanics who are often the first in their families to pursue higher education—let alone to aspire to complete the years of training required to become a physician. Faculty members at the University of Texas Health Science Center at San Antonio have seen Hispanic medical students wrestle with emotional and psychological difficulties.

The prognosis for Hispanic medical school students should start to improve in the near future, thanks to the efforts of two nascent organizations that are gearing up to boost the number of Hispanic physicians in the United States.

The National Hispanic Medical Association (NHMA) and the Hispanic-Serving Health Professions Schools are out to give Hispanic students a double dose of support. Formed three years ago, the Hispanic-Serving Health Professions Schools has a new president, Dean Ruy Lourenco of the New Jersey Medical School, and a new executive director, Dr. Elena Ríos, both of whom are trying to refocus and reenergize the organization. And there would seem to be lots of opportunities for this group to work with NHMA, especially since Dr. Ríos is the executive director of both organizations.

The challenges faced by these two groups, however, are growing. On one hand, the nation’s Hispanic population is rapidly increasing due to immigration and a higher-than-average Hispanic birth rate. Early in the next century—some prognosticators say as early as 2010—Hispanics are expected to surpass African Americans as the largest minority group. Yet currently, just four percent of the nation’s doctors are Hispanic, and the number of Hispanics in medical schools has dropped, thanks to assaults on affirmative action.

Adding to the problem is the situation in which Latin American physicians who emigrated from places including Cuba and the Dominican Republic in the ’50s and ’60s are moving into retirement, with fewer young immigrant doctors to replace them.

“The older-generation doctors in our communities are starting to retire, and it’s harder for foreign-born doctors to get in now,” said Dr. Ríos. “It’s much more difficult.”

Faced with this crisis, both NHMA and the Hispanic-Serving Health Professions Schools are hoping to produce U.S. born Hispanic doctors at higher rates.

Established in 1994 to address the interests and concerns of the nation’s 26,000 licensed Hispanic physicians and 1,800 medical faculty, NHMA recently has launched a number of programs aimed at helping Hispanic medical students. In Texas, for example, a pilot mentoring program is pairing Hispanic doctors-in-training with local Hispanic physicians. The program, which just got off the ground in January, is under the auspices of the NHMA.

“We would like to develop a national program where we match Hispanic medical students with Hispanic physicians or physicians who are experienced in treating Hispanic patients,” said Dr. Ríos.

“Hispanic medical students, overall, don’t have doctors as role models within their families. They usually are not the sons and daughters of doctors. We need to encourage them to develop their own potential and understand they have lots of career options.”

A second mentoring program is planned for Massachusetts General Hospital, where they will work with students from medical schools in the greater Boston area, including Harvard and Tufts. The mentoring program seems particularly needed in Texas since the state’s public university system was forced to cut back its affirmative action initiatives following a lawsuit against the University of Texas. (Known as the Hopwood case, this lawsuit forced the University of Texas to dismantle its dual-admissions process for minority applicants.)

Post-Hopwood, the University of Texas Health Science Center at San Antonio saw its Hispanic medical school enrollment drop by 50 percent, said Dr. Martha Medrano, director of the Medical Hispanic Center of Excellence at the University of Texas Health Science Center. The Health Science Center is composed of five schools: Dental School, Medical School, School of Allied Health Sciences, School of Nursing, and the Graduate School.
of Biomedical Sciences, with more than 2,700 students in some 55 degree programs. While the numbers have gone up at the medical school this year, they are not back to the diversity of the early 1990s.

In this context, the mentoring program is carefully pairing up potential mentors and medical school students to make sure the relationship will prove beneficial.

"We actually interview the prospective mentors to get a feel for their personalities, and then they take a survey," said Dr. Medrano. "We want to make sure this works."

By the end of March, Dr. Medrano had managed to match some 35 Hispanic students with mentors and was expanding the program to include e-mail mentoring of students at nearby Texas A&M in College Station, Texas. "There's a real need for more Hispanic doctors in Texas, where Hispanics make up 25 percent of the population, and it goes as high as 80 to 90 percent in some border towns. We're nowhere near parity."

For further professional exposure, Dr. Medrano brought ten of her medical school students to the NHMA annual conference held in Washington, D.C., last March. The conference theme focused on "A National Agenda: Increasing the Number of Health Hispanic Families." This continuing medical education conference had four tracks: "Increasing Hispanic Families with Chronic Illnesses," "Healthy Systems Strategies That Target Latinos," "Medical Education and Research," and "Health Promotion Strategies." Panels included discussion on everything from Latino Elderly Health to Career Opportunities for Residents. The four-day meeting drew more than 500 Hispanic doctors, students, and others involved in Hispanic health care.

Surgeon General Dr. David Satcher spoke on the U.S. Department of Health and Human Services' Race/Ethnic and Health Disparities Initiative, and author Via Castillo addressed the group with a personal message.

"It was a really exciting event. We had doctors from all different types of clinics and health departments as well as from private practice and academics in attendance," said Dr. Rios. "It's a continuing health education conference, of course, but it's also a real chance for networking. They had the opportunity to learn new skills and successful strategies from each other."

In its third year, this annual confab is becoming more popular among medical school students as well. It drew some 60 medical school students, including members of the National Network of Latin American Medical Students, who held their annual business meeting at the conference. This national organization serves as an umbrella group for five regional Hispanic medical student collectives.

NHMA held pre-conference training seminars for some of its other initiatives. The NHMA Research Network, started last year, involves providing more research opportunities for Hispanic doctors. An initial group of 100 researchers is participating in this effort.

A second venture, called the NHMA Leadership Fellowship Program, offers 20 mid-career Hispanic health care professionals training in government and public policy. The program includes a week at New York University's Wagner Graduate School of Public Service and a week with public officials in Washington, D.C., including meeting with the Hispanic Congressional Caucus staff.

"We hope they learn how to push an agenda forward," said Dr. Rios. "These are health care professionals we have identified who have the potential to fill high-level policy positions." A similar program started by NHMA will provide leadership training for Hispanic medical residents. Ten residents will be chosen from California and 10 from New York to learn more about government and how it operates. "We'll take them to the state capitals to give them firsthand exposure," said Dr. Rios.

While NHMA has launched all of these efforts, the Hispanic-Serving Health Professions Schools has been slower in getting off the ground. The organization started back in 1996 as part of the Hispanic agenda for Action announced by the U.S. Health and Human Services Department. The decision was made to start out by focusing on the nation's medical schools. Some 16 medical schools with a Hispanic enrollment of at least 5 percent and a commitment to diversity were invited to join. But changes in leadership stalled the launch.

Today, the group is headed by Dr. Rios, serving as executive director, and Dean Ron Lourenco from the New Jersey Medical School in Newark. A federal study of national Hispanic medical schools has already been budgeted by the DoD. But with changes in leadership stalled the launch.

The organization plans to improve the profile of medical schools by reaching all the way down to middle school student with a national advertising campaign promoting math and science.

"We need to improve the pipeline of students," said Rios. "Unfortunately, students have been scared off by the anti-affirmative action movement. The states with the largest numbers of medical school students--California and Texas--are those that have been targeted by this movement. We're heading for a disaster in another couple of years if the climate doesn't change. With all that's happen now, there's an even greater need--perhaps more than ever--for organizations like NHMA and Hispanic-Serving Health Professions Schools. No one else is doing this work."

Vandali Duarte is an editor in public relations at Reactivate Technologies.
On the Move with Dr. Martha Medrano

Outstanding Leader, Hispanic Center of Excellence

Simply put, Dr. Martha Medrano is an expert at leading people in the right direction. As the new director of the Medical Hispanic Center of Excellence at the University of Texas Health Science Center at San Antonio and as a newly inducted San Antonio Women’s Hall of Fame honoree, she is providing invaluable guidance for Hispanic students, fellows, faculty, and future health care providers. She’s also enlightening Hispanics and non-Hispanics on cultural diversity issues in medicine.

A native of El Paso, Texas, Dr. Medrano completed her bachelor of science degree at the University of Texas at El Paso and her doctor of medicine degree at the Health Science Center. She is assistant professor of psychiatry.

“We are at a very exciting time at the Center and continue to be a significant piece of the university in the areas of student recruitment, curriculum development, faculty development, information resources, and other things,” said Dr. Medrano. “We have liaisons with many, many people, so we can lead them in the right direction.”

Student Recruitment

While I stay here and work the fort, Dr. Miguel Bedolla, the previous director of the Center, travels throughout the South Texas region to recruit new students into the health professions,” said Dr. Medrano. He visits a number of independent school districts, community colleges, community-based organizations, and undergraduate institutions along the United States/Mexico border.

Curriculum Development

Dr. Medrano’s primary area of interest is curriculum, particularly the inclusion of cultural competence, cultural diversity, and minority health issues in the medical school’s curriculum. Working with the Health Science Center medical curriculum committee and with course directors, Dr. Medrano is trying to secure a grant to develop curricula focused on cultural competence. The group composed of Dr. Medrano, Dr. David Schneider, associate professor of family practice, and Dr. Gavin Corcoran, assistant professor of medicine, wants to purchase 200 case vignettes developed at Harvard University.

“The case vignettes incorporate cultural, religious, ethnic, and belief issues,” explained Dr. Medrano. “We studied that the clinical profession might not have the same health beliefs as eastern physicians, for example. When physicians and patients are from different backgrounds or parts of the world, communication is significant. Issues might fall through the cracks. The vignettes deal with those issues and focus on a variety of cultures.”
Together, these educators are changing the Medical School’s Clinical Integration Course to include cultural diversity and minority health issues in the simulated patient exercise.

Dr. Medrano’s guidance also is strengthening the Medical School’s simulated patient training. An individual, the “simulated patient,” is trained to take on disease symptoms: high blood pressure, heart failure, and a diagnosis of cancer. Previously, this simulated patient exercise was intentionally gender- and culturally neutral. These simulated patients would pretend to have hypertension, a headache, or hearing loss, for example.

“Dr. Schneider and I wanted to integrate the case vignettes that we were getting from Harvard into the simulated patient exercise,” said Dr. Medrano. “Dr. Schneider had extensive experience in training simulated patients, and I had the expertise in minority health issues, but I’ve never trained a simulated patient.”

Sensing the need for a consultant, Dr. Medrano obtained the assistance of Dr. Judy Ann Biggs from Harvard University. Together, these educators are changing the Medical School’s Clinical Integration Course to include cultural diversity and minority health issues in the simulated patient exercise. Second-year medical students in the Advanced Clinical Examination Skills Course also will benefit from this effort in that simulated patients are used as part of the course.

The Health Science Center’s students’ education in cultural diversity will not stop in the classroom or teaching lab. They will be traveling to remote areas of South Texas to provide clinical care as part of the family practice third-year clinical rotation.

“The clinical rotations in that region will be very educational,” said Dr. Medrano. “We felt it was important to assist students in being prepared for some cross-cultural communication unique to South Texas.

“The people in South Texas do not comprise a homogeneous group: it’s a very heterogeneous group,” Dr. Medrano added. “Health beliefs and practices that occur in Laredo, for example, may or may not be similar to those of the residents in McAllen. Immigration patterns, even within families, have resulted in different health beliefs.”

“Cultural diversity includes religious values, socioeconomic status, and occupational issues—it’s not just about race and ethnicity,” said Dr. Medrano. “With these rotations, we can enhance what students learn and give them an opportunity to observe different types of health beliefs relative to South Texas.”

The Health Science Center’s students participating in clinical rotations in South Texas. “We’re really trying to develop a continuum of education for students throughout medical education.”

Research

The Center of Excellence facilitates summer research programs and it places students in ongoing research programs in which the learn specifically about Hispanic health issues. The Health Science Center’s Aging Research & Education Center (AREC) directed by Dr. Walter Ward, associate professor of physiology, and Dr. Arla Richardson, professor at Methodist Hospital Foundation.
chair in the Department of Physiology, is one such interest. The Center of Excellence is identifying faculty to serve as mentors for students interested in gerontology and is recruiting more minority students to do geriatric research. Among those mentors is Dr. David V. Espino, associate professor of family practice and gerontologist, noted Dr. Medrano.

"We received a grant from the National Hispanic Medical Association to develop a mentorship program beginning in January," said Dr. Medrano. "That's exciting because the Health Science Center has been selected to develop a mentorship model that will be used at other institutions. Next year, Harvard will implement a mentorship program using our model. The grant funded 10 Health Science Center students invited to attend a National Hispanic Medical Association annual meeting in Washington, D.C., in March.

The Center of Excellence has two senior faculty fellows. "The Center essentially has 50 percent of their time, so they can do research," Dr. Rene Olvera, assistant professor in the Department of Psychiatry, and Dr. Robert Castro, associate professor of pediatrics, are the fellows. Also, Dr. Albana Dassori is a junior faculty fellow, with five percent of her time funded.

The Center facilitates a tutoring program at the Health Science Center and a monthly support group. "We also provide tutoring for students preparing to take the USMLE ['United States Medical Licensing Examination'], and there's a five-week preclinical program focused on medical terminology, verbal comprehension, and study skills that helps incoming first-year students get a head start," Dr. Medrano stated.

Faculty Hispanic Association

While the Center of Excellence touches the lives of numerous students, it also facilitates faculty interests. "The Health Science Center has an Hispanic Faculty Association, which began in 1996, that anyone with an interest in Hispanic health issues can join," said Dr. Medrano. "We help orient new faculty to the campus, assist them with grant information, review C.V.s or resumes, and sponsor a poster session during Hispanic Heritage Week. We also work closely with the campus Briscoe Library to ensure the availability of resources related to Hispanic health issues."

Beyond her commitment to the Hispanic Center of Excellence, Dr. Medrano does research on the effects of child and adult trauma in women drug addicts. She is certified in addiction psychiatry and is in the Alcohol and Drug Addiction Division of the Department of Psychiatry.

At the March 25 induction into the San Antonio Women's Hall of Fame, Dr. Medrano was recognized for her work with the San Antonio Metropolitan Health District that began in 1987. She and colleagues created the Maternal Substance Abuse Program targeting recovering women and their infants. As a result of her work, the Integrated Family Treatment Program, with two residential facilities, was born.

Also, Dr. Medrano, a child psychiatrist, established an Annual San Antonio Women's Health Issues Conference in 1994. It has grown into a regional conference that was awarded $50,000 in federal funding this year, with an anticipated attendance of at least 250 health professionals.

She also serves as the women's outreach director for a community outreach AIDS program. Along with a team of researchers, she provides HIV testing and educational intervention to help women and men reduce their risk of contracting AIDS and to motivate them to enter treatment.

Last month, she hosted participants—including researchers from Harvard, Yale, Brown and Stanford Universities—for "The Interface Between Research and Treatment: Women, Drugs and Trauma" conference.

Dr. Medrano's interests include art and Latin America, exercise, and travel. She'll be ushering in the new millennium in Australia.

Whether she's working with students, faculty, fellows, or patients, Dr. Medrano is directed towards better health care and educational enrichment for people of all cultures.
It was an auspicious occasion for the Hispanic population of the Miami, Florida, region and an historic landmark for American higher education as well. Effective May 1, South Florida entrepreneur Carlos M. de la Cruz was installed as chairman of the University of Miami Board of Trustees. When he took office, he became the first Hispanic to chair the board of a major U.S. university. This was significant indeed because the University of Miami's 67-member board governs one of the leading private research universities in the Southeast.

De la Cruz is the chairman of the board and CEO of Eagle Brands, Inc., the Anheuser-Busch distributor in Miami-Dade County, and of CCL Inc., the Coca-Cola bottler in Puerto Rico. He serves as chairman of several local automobile dealerships and is also a member of the Board of Directors of LXR Property Corporation.

UM President Edward T. Foote II remarked, "Mr. de la Cruz brings a wealth of business experience and civic leadership to his new position on the UM Board. He is a widely respected businessman who has served the university exceptionally well for a long time." The president added, "I look forward to working with him in the building of a great American university."

Born in Havana, Cuba, de la Cruz has lived in New York City and Madrid, Spain, and has been a resident of Miami since 1975. After graduating from Phillips Academy in Andover, Massachusetts, he earned a bachelor of science degree in economics and a master of business administration from the Wharton School, University of Pennsylvania, as well as a Juris Doctor degree from the University of Miami School of Law. He has served as a member of the UM Board of Trustees for the past 11 years.

"The University of Miami is a vital resource for our community. As a national research university with a major medical school, it has a tremendous educational, economic, and cultural impact on South Florida, Latin America, and beyond," de la Cruz said. "I am honored to serve on the UM Board along with other community leaders and to have a role in shaping the future direction of this great university."

Congratulations to the University of Miami and to Chairman de la Cruz for another distinction, installation on the Hispanic Outlook Honor Roll.

Founded in 1925, the University of Miami is the largest, most comprehensive private research university in the southeastern United States. With its 260-acre main campus located in the suburban city of Coral Gables, UM currently enrolls 13,422 undergraduate and graduate students from all 50 states and 148 foreign countries. The university offers 10 undergraduate programs, 95 master's programs, 55 doctoral programs, and two professional areas of study through its 14 schools and colleges.

Students can choose from the following fields of study: architecture, arts and sciences, business, communication, continuing studies, educat-

Edward T. Foote III, University of Miami president,

tion, engineering, international studies, law, marine and atmospheric sciences, medicine, music, and nursing. In his assessment of the university's remarkable strength and prosperity, President Foote disclosed that last year, "applications to study here were the most numerous in our history," adding, "nearly 12,000 people applied for 1,800 places in the next first-year student" class. Philanthropic contributions of $80.3 million was the highest ever. The endowment, at $418 million, is the largest it has been, thanks not only to the surging stock market but also to several major gifts. Competitive research and sponsored program expenditures were at an all-time high—$161.2 million—one of many tributes to the faculty, significantly strengthened over many years by a steady infusion of new talent." And, he adds, "The budget is balanced."

In 1989, the university completed one of the largest fund-raising campaigns in higher education, a five-year campaign that raised $517.5 million in commitments for buildings and equipment, endowments, and scholarships. That fund-raising success is ongoing. Giving by alumni, friends, and organizations of the $80.3 million noted by President Foote for 1998 represented the top year in private giving at the University of Miami—in addition to the fact that the institution's 1,865 full-time faculty members generated the above-mentioned $161.2 million in 1998.

The National Science Foundation ranked University of Miami 50th in the nation among institutions receiving federal research funds, first among universities in expenditures of federal funds for research and development in 1996.

More than 97 percent of the full-time faculty hold a Ph.D. or terminal degree in their field. At its medical campus near downtown Miami, the University of Miami is best known for research in AIDS, cancer, dia
According to U.S. News and World Report, the University of Miami was ranked in the top 10 universities in the nation for its campus diversity. The undergraduate class is composed of 48 percent White, non-Hispanic; 35 percent Hispanic (2,750), 12 percent African American, and six percent Asian. Approximately 46 percent of these students come from South Florida, 11 percent are from elsewhere in Florida, and 34 percent are from the rest of the United States and 15 territories, and nine percent are international.

There were 499 Hispanics among last year's entering first-year student class, and 1,086 Hispanics enrolled in graduate and professional programs.

U.S. News and World Report also ranked UM among the top 10 universities in the United States for its share of international undergraduate students. More than half of the classes for undergraduates have 14 or fewer students, and more than 75 percent have 24 or fewer students. The student-to-faculty ratio is 12.5 to one. Two-thirds of entering first-year students are in the top fifth of their high school class. Approximately 1,544 students participate in the Honors Program. UM has 55 academic honor societies, including Phi Beta Kappa.

Nearly 5,200 enrolled students live on campus, including 70 percent of new first-year students and 58 percent of all degree undergraduates. UM has five residential colleges as well as on-campus apartments. Also available are fraternities and special housing for disabled students.

The Otto G. Richter Library is the central library. There also are libraries serving the School of Architecture, School of Law, School of Medicine, School of Music, and the Rosenstiel School of Marine and Atmospheric Science. The combined holdings of the libraries total more than two million volumes, 20,353 serial subscriptions, and more than three million microforms. Richter Library is a Federal Government Documents Depository.

The mission of the University's North-South Center is to promote better relations and serve as a catalyst for change among the United States, Canada, and the nations of Latin America and the Caribbean. It seeks to do so by advancing knowledge, understanding, and addressing the major political, social, economic, and cultural issues affecting the nations and peoples of the Western Hemisphere. North-South Center Director Anthony Moss, Jr., says, for over a decade, the North-South Center has been dedicated to the intensive study of complex global problems with special emphasis on the Western Hemisphere. As an independent research and educational organization, it produces policy-relevant research aimed at facilitating the revolution of the most critical issues. The Center's research, cooperative study, education, and training have benefited citizens of the Western Hemisphere by supplying significant knowledge and expertise relevant to an inter-American agenda that grows more pressing each year.

Strategically located in Miami—the natural gateway between the United States and most of Latin America and the Caribbean and a key metropolis for Europe in the region—the Center hosts leaders and scholars who value opportunities for dialogue, study, and exchange in an ambiance free of partisan agenda. Moss notes that the Center engages and informs government and opinion leaders throughout the Americas by means of conferences, public affairs activities, and research resulting in timely publications.

"A valuable national and global resource," reports Moss, "the Center has become a focal point for cooperative study, a respected clearinghouse for ideas, and an adept coordinator of international projects." Moss continues that among the crucial international issues that challenge the Americas are the searches for freedom and democracy, the economic crises that divide rich and poor, the pursuit of a path toward sustainable development, and the construction of trade partnerships that cross international borders.

Further building on Miami's status as a global city, the University of Miami is constructing a new School of International Studies set to offer both undergraduate and graduate programs. The creation of the new school underscores UM's long-standing involvement in international education dating back to the University's founding in 1925. Programs from the existing UM Graduate School of International Studies will be folded into the new school, which will also incorporate the department of geography and regional studies, currently part of the College of Arts and Sciences.

The new School of International Studies will assume full responsibility for an undergraduate program, a professional master's program, and a 'highly selective, research-intensive Ph.D. program.' Roger Kanet, former dean of the Graduate School of International Studies, has been tapped to head the new school, which formally began accepting students last fall.

"The new school represents a more focused effort to develop a strong, interdisciplinary international program at the undergraduate level, in addition to our already existing graduate program," says Kanet. "The School of International Studies will provide an opportunity for the University of Miami to draw upon and use its excellent faculty resources. As a result, both our undergraduate and graduate students will benefit greatly."
Hispanics in this country are a young population. The majority are under 25, and there is a tidal wave of Hispanic children in our elementary and high schools. The societal environment that is shaping them is revolutionary and different.

Patricia Hersch is a former contributing editor of Psychology Today. She was the editor of the "Women in Development" newsletter for the United Nations. Later, she conducted an ethnographic study of homeless adolescents in San Francisco and New York City for the National Institute of Drug Abuse and Georgetown University Child Development Center.

She lives in a placid suburb of Washington, D.C.—Reston, Virginia—a small town outside a large metropolis. It's perhaps not that different from other small towns nationwide whose names have been burned into our nation's psyche: Jones, West Paducah, Pearl Littleton.

Hersch has written a riveting book that has been making the rounds on Capitol Hill. A Tribe Apart portrays teens in the nineties as very alone and isolated from adults.

Last year, the nation's attention was focused on the Quiet town of Jones, Arkansas, and we all wondered how and why two young boys, ages 11 and 13, could suddenly become killers. Those shootings came only a few months after multiple shootings at schools in West Paducah, Ky., and Pearl, Miss.

They mobilized public concern about school violence and left parents, politicians, and psychiatrists wondering why youngsters would be moved to shoot their classmates.

To signal the national impor-
tance of these tragic incidents, President Clinton asked Attorney General Janet Reno to find experts who could analyze the schools where shootings occurred to identify similarities and advise on how to prevent attacks.

Solutions were not found in time to avoid the madness, tragedy, and pain that will always scar a sleepy "All-American" town in Colorado called Littleton. The undulating waves of pain and shock will continue to affect all of us no matter where we live.

How can such senseless anger, which led to cold-blooded murder, be hidden within the bosom of youngsters—youngsters who should be more interested in reading, proms, sports, and, yes, in tentative reaching out to friends both male and female.

Patricia Hersch's book provides some insight into what is happening nationwide. She writes from the experience of spending three years with adolescent kids. Her findings are chilling:

"We as a society have inadvertently abandoned this age group. We have failed to provide boundaries, direction, consistent values, and places to be and be listened to.

"We're so busy [that] we're just relieved when our kids are old enough to be left alone. But it turns out that kids want more of us, and as a tragic incident like this reveals, they need us more than we can imagine."

A Tribe Apart

Hersch explains that today's kids have very few resources with which to process the confusion and pressures of being an adolescent. They figure things out and make significant decisions about their lives—decisions about drugs, alcohol, sex, and relationships—on their own.

She notes, "With the availability of guns, they can literally get away with murder." In the absence of community and involved adults, they have created "a tribe apart."

Patricia Hersch travels deep into the teenage subculture to show us how American adolescents have fashioned a culture of their own, one that most of us neither see nor imagine. It is a culture of unequaled freedom and baffling complexity, with rules but no structure, values but no clear morality, codes but no consistency, in every sense "a tribe apart." Hersch paints a disturbing portrait of life for today's average teens—a powerful exhortation to adults to pay attention.

Good Kids

In eight riveting portraits of "good kids" from 7th to 12th grade in her home town of Reston, Virginia, Hersch shatters the prevailing myth that "it's not my kid that does those things; it's everybody else's."

"It's simply not true," says Hersch, who followed eight "average" teenagers over a three-year period. "All kids are affected by the teen culture in which behaviors that were once considered 'normal' are now accepted as 'normal.' Good kids from good families do experiment—sometimes in risky or dangerous ways."

At the same time, A Tribe Apart is a compelling rejoinder to the 67 percent of Americans who equate adolescence with "rudeness," "irresponsible," and "wildness" (Public Agenda Foundation, 1997). Once Hersch moves past the fragile persona teens usually offer up to adults, she shows us what resilient, searching, passionate people teens can be—and how much they long for real contact with adults.

Our piecemeal attempts to fix, protect, motivate, or rescue our kids from potential harm obscure a much larger and more significant reality—we don't really know them.

Adolescence à la '90s

In these moving portrayals, Hersch lets us see how in the transition from elementary to middle school, our nation's children slip into a netherworld of adolescence that too often becomes a self-fulfilling prophecy of estrangement.

"I noticed that everyone was hysterical about teens in the aggregate," says Hersch, "but no one was paying much attention to individual kids."

Hersch spent three years following her subjects through their daily lives—attending classes and assemblies, accompanying them to fast food restaurants, malls, and all-night track meets, watching as they grew, changed, and matured, and listening to their stories. "They knew I wasn't there to judge but to listen," said Hersch. "And [being listened to], it turns out, was what they all craved."

Hispanic children are no exempt from America's cauldron isolation, loneliness, and gun violence will affect many of them.

The stories that comprise A Tribe Apart are raw, intimate evocations of adolescent life in process—the good, bad, the frightening, the inspiring—because they portray society in which teens spend far to much time alone, one in which far to many adults have reigned on their responsibilities to children. Inspired because no matter how much kids mess up or risk their lives or make stupid decisions, they're struggling to figure out what's right, and to make their lives mean something."

Dr. Mellander is a professor at George Mason University.
Women in Academic Medicine

Leveling Off

Angela Díaz knew her calling ever since she was a youngster growing up in an impoverished area in the Dominican Republic. She wanted to be a doctor.

Decades later, she not only has realized that dream in the United States but has risen to the top of her field. A few months ago, Dr. Angela Díaz was appointed to the prestigious role of director of the Mount Sinai Adolescent Health Center in New York City, and was named vice chair of pediatrics for the entire hospital.

The long hours, perseverance, and allegiance to her goals paid off, as she now is considered one of the highest ranked women of color in hospital administration in the country.

"I never forgot what it was like to know that there was someone for me to go when I was worried and confused," she said, recalling how she emigrated to New York City without health insurance and therefore without the ability to visit a hospital of her choice.

"I wanted to do my part to ensure that every teenager in this city has the same opportunity," she says.

In Díaz's view, she seized upon an opportunity to realize her goal and attain new heights. And her entrance into a medical profession came during a period when women were shoving the doors open wide and stepping into the field of medicine in larger numbers than ever before.

But that surge has now slowed considerably. The burst of women applying to medical school during the 1970s and the steady increase during the 1980s has now virtually plateaued. That's the finding of a recent statistical analysis, the 1998 edition of Women in U.S. Academic Medicine, by the Association of American Medical Colleges (AAMC).

The report, which culls information from hundreds of medical institutions across the nation, is more extensive than in previous recent estimates.

The number of women applicants fell at a higher percentage than did the number of male applicants. The authors found that between 1996-97 and 1997-98, for the first time in a decade, the number of women applicants dropped by 8.8 percent, while the number of men applicants declined by 8.1 percent.

However, women fare better in acceptance rates to medical schools: 31 percent of women and 39 percent of men were accepted. Women over age 24 were more likely to be accepted than were younger women when compared to men.

The report does not focus heavily on ethnic diversity among the ranks of male and female applicants, but it does track the racial breakdown of female faculty in medical schools. As of September 1998, there were 17,409 or 5.8 percent—white female faculty at U.S. medical schools, while there were 7,074 non-white female faculty.

A further breakdown shows that Asians represented the highest numbers (2,319 or 10.1 percent) and Latinos the lowest (Puerto Rican, 250 or one percent, and other Hispanic, 420 or 19 percent).

"There's actually a higher proportion of women minority faculty than men," says Janet Bickel, the AAMC's associate vice president for Institutional Planning and Development. She says the report provides a window into which institutions can look to determine whether stronger efforts are needed to expand the number of women in leadership positions.

"This is an effort to encourage schools to pay more attention," Bickel says, reflecting on this second analysis of gender roles on a school-by-school level. "We can tell that schools that have not taken a responsibility in this area are starting to do that. Many schools already do look at their data every year with regard to women and minorities on staff."

And the report provides statistical portraits for school officials to view in many areas, such as residences, faculty ranks, salaries, administration, and funding of medical programs. Among the findings:

- The number of women in residency programs spotlights the leveling off of women entering the
field of medicine. For instance, the number of female residents ballooned from 1980—when they accounted for 22 percent—to 1996, when they accounted for 35 percent. But that number grew by only one percent in 1997, the last year statistics were available.

- For the first time in the 10 years—the period of time that the AAMC has tracked women in medicine—the proportion of full-time female faculty remained stagnant, at 26 percent, and did not increase by a full percentage point. The number inched up only from 22,479 in 1997 to 22,970 in 1998.

Women continue to attain pediatric faculty positions at the highest rate (40 percent). The most sizable increases in representation by women since 1989 took place in emergency medicine, ophthalmology, obstetrics, gynecology, dermatology, and internal medicine.

At the other end of the spectrum, however, are faculty positions in orthopedic surgery. The number of women in that field has increased by only 1.1 percent since 1989. It's a disturbing statistic that the authors of the report hope will be more diverse in order to meet the patient and student needs.

However, Bickel noted that the smaller number of women faculty also points to a larger trend, a slowing down of full-time faculty at medical schools.

"I really believe it was a brief plateau," she says, "I do believe that the proportion of women on the faculty will continue to grow."

- The ranks of professors also remain dominated by males. For example, there were 834 basic science professors in 1998, and 811 the year before, a .05 percent increase.

Overall, the report cites, 11 percent of all professors and 22 percent of associate professors are women, numbers that did no change between 1997 and 1998. However, the number of female full professors is increasing slightly.

On average, the report notes there are 19 women full professor per medical school compared to 16 men full professors.

- Men are much more likely to
earn tenure than are women. According to information provided by the schools, 5 percent of men had achieved tenure, compared to only 1 percent of women.

• The study points out that many schools are now performing regular salary analyses to uncover any gender inequities, but the authors were unable to thoroughly compare salaries.

The authors write that “a number of schools report that their studies revealed no disparities, but a greater number found some unexplainable undercompensation of women, ranging in amount from minimal to substantial, affecting a small to sizable group of women.”

• Women do not serve on institutional committees as frequently as do men. Schools polled for the report cited 360 committees, but only a fraction provided enough information for a thorough analysis. The authors point out that of 109 specific schools, 34 had no important committees headed by a woman. Women were least likely to chair financial committees.

• Women are least likely to pursue surgical subspecialties such as orthopedic surgery (seven percent), urology (10 percent) and thoracic surgery (five percent).

The authors note that the numbers of women residents are increasing in all specialties, and the same areas is that “many women are apparently still not finding mentors in or are discouraged from entering surgical fields, raising questions about whether women enjoy the same access as men to the full range of specialty choice opportunities.”

Bickel says “it’s a combination of women trying to maintain their family responsibilities during the same interval in which they have to prove themselves professionally. If only there weren’t such time pressures in their late 20s and 30s to achieve a certain level, if only there was more flexibility in our systems. These are areas that we are particularly interested in helping medical schools with.”

Díaz agrees that striking the appropriate balance is tantamount.

She now supervises a health center visited by more than 10,000 patients annually, and has helped found programs focusing on substance abuse, HIV prevention, smoking, teen depression, and pregnancy prevention.

“I do a lot of public speaking, and people are very curious about the field and medical school, and they ask about what it takes and what it’s like,” she says. “People, especially women, are interested in knowing how to balance work and family.”

“I basically think it’s a combination,” she says. “I worked toward my goal. I’m very committed. I work very hard, and I think people appreciate that. I don’t wait for people to hand me things. I actually try to figure out the best way to obtain the objective I am pursuing.”

However, she believes that medical institutions need to do more to attract greater numbers of women into medicine.

“Women need to be promoted to higher positions to serve as role models, especially for the younger generation, because they are looking for more,” she says “young people can see what they can achieve. They can see you have a family and a job and actually achieve in your profession. They can see women have the skills and can do it.”

Minority Medical Students at Largest-Ever Symposium

High School Students Win $5 Million in Fellowships for Disease-Careers

Thirty-two of the nation's most gifted minority medical students gathered at the headquarters of the Bristol-Myers Squibb Pharmaceutical Research Institute in Princeton, New Jersey, from March 10th through 12th, to present findings of their biomedical research projects during the annual symposium of The Fellowship Program in Academic Medicine for Minority Students.

The meeting was the largest annual gathering of minority medical students in the United States.

The symposium also included a Role Model Roundtable where students from New Jersey high schools participated in small-group discussions with the medical students about the challenges and rewards of their chosen careers.

The fellowship program is designed to encourage medical students from minority groups under-represented in academic medicine and biomedical research to explore and pursue careers in these fields.

African Americans, mainland Puerto Ricans, Mexican Americans, and Native Americans make up 18 percent of the population in the United States—but less than four percent of the M.D. faculty in the nation's medical schools.

“Diversity in the scientific and medical communities strengthens the quality of life and health for everyone,” said John L. Damonti, president of the Bristol-Myers Squibb Foundation. “The fellowship program helps achieve this goal.”

More than 400 fellows have completed the program since its founding in 1984. The fellowship program has received nearly $5 million from the Bristol-Myers Squibb Foundation, which has supported the program since 1990 and has acted as sole funder since 1993.

Areas of Research

This year's 32 fellows are researching a broad range of topics, among them the use of lasers in the early detection of glaucoma, identification of underlying disease mechanisms in lupus, use of growth factors in early brain development, treatment of trauma-related infection, measurement of balance disorders, and apoptosis (cell death) in stroke.

The fellows are third- and fourth-year minority medical students who are nominated by their deans and chosen by a committee of distinguished medical school faculty and biomedical researchers. Fellows are selected based on their academic achievements, leadership abilities, and potential for assuming responsible roles in academic medicine.

Key Role of the Mentor

Each fellow spends eight to 12
weeks on a research project of interest under the guidance of an established medical school-based researcher who acts as a mentor and supervises the fellow's research progress.

"The mentor plays a key role in helping the fellow in his or her chosen career path," said Vivian Manning Fox, president of National Medical Fellowships, Inc., a not-for-profit organization that administers the program. "The vast majority of fellow-mentor relationships endure well beyond the conclusion of these research projects."

Overcoming Challenges
Fellows frequently have to overcome tremendous obstacles before they become physicians. Alfredo Quiñones-Hinojosa, an honors student at Harvard Medical School, spent his childhood as a migrant farm worker in California after immigrating from Mexico. Now studying ways to prevent brain damage in stroke, Quiñones-Hinojosa has received five highly competitive research fellowships and is well on his way to becoming a skilled neurosurgeon.

Many of the fellows are involved in mentoring minority youth. Linda Barry, a student at the Joan and Sanford A. Weill Medical College of Cornell University, volunteers in a mathematics and science mentoring program for minority high school students.

Richard Lyn-Cook, a Yale University School of Medicine student, has worked with young people in New Haven, Connecticut, Queens, New York, and Washington, D.C.

UCLA School of Medicine student Gary Schoeman, a member of the Potawatomi Tribe, has volunteered with urban Native American youth at the Bellflower, California, American Indian Clinic since his days as an undergraduate student.

The Role Model Roundtable
Fellows had the opportunity to serve as mentors the first morning of the symposium during the Role Model Roundtable. Minority high school students who exhibit an interest in science and medicine from 12 Northern and Central Jersey school districts participated in small-group discussions with fellows on their experiences leading up to and during medical school.

The program provides the high school students with an opportunity to gain insight, inspiration, and guidance from the fellows during discussions of their challenges and successes.

Bristol-Myers Squibb, a research-based company, believes that diversity in the scientific community is crucial for ensuring that research serves the needs of society as a whole. By encouraging minority medical students to pursue careers in academic medicine, the Fellowship Program in Academic Medicine for Minority Students helps ensure that minority perspectives are reflected in future biomedical research and health policy.

Founded in 1984 by the Commonwealth Fund, the fellowship program is one of several science education initiatives supported by the Bristol-Myers Squibb Foundation.

National Medical Fellowships, Inc. (NMF) is the only national, private, nonprofit organization in the United States dedicated to increasing the number of minority physicians. NMF pursues this goal by offering need-based scholarships, special fellowships, and academic awards to African American, mainland Puerto Rican, Mexican American, and Native American men and women.

Alfredo Quiñones-Hinojosa
Harvard Medical School

In the last 12 years, Alfredo Quiñones-Hinojosa has traveled far. He has journeyed from his Mexican birthplace to Harvard Medical School, from being a non-English-speaking migrant farmworker to the recipient of many academic honors who is training to become a neurosurgeon.

Quiñones-Hinojosa, a fourth-year medical student, is examining the role of medications known as Interleukin-1 beta enzyme (ICE) inhibitors as part of a "pharmaceutical cocktail" in preventing the death of brain cells (apoptosis) in stroke. Currently, there is no effective medical treatment for stroke.

"Down the line, emergency medical technicians might be able to deliver a cocktail of agents" that can protect from further brain damage once a stroke begins, Quiñones-Hinojosa believes. He hopes his work plays a role in developing new treatment protocols.

The first member of his extended family to go to college, Quiñones-Hinojosa is already the recipient of five research fellowships. This June, he will begin a neurosurgery residency at the University of California at San Francisco. He hopes to work as both a neurosurgeon and scientist, and he would like to practice in an urban setting, where he can "have the most impact on underprivileged communities," he says. A strong believer that it is necessary to encourage more underrepresented minorities to attend medical school, Quiñones-Hinojosa has been a student leader since his days as an undergraduate. He sat for two years on the Harvard Medical School Committee on Admissions and, since he was a second-year medical student, has co-chaired the Hinton-Wright Biomedical Research Society, an organization that focuses on the research achievements of minority group members.

Christopher S. Ogilvie, M.D., associate professor of surgery and chief, Cerebrovascular Surgery, Massachusetts General Hospital, and Kenneth L. Maynard, M.S., Ph.D., assistant professor of surgery, Harvard Medical School, are Quiñones-Hinojosa's mentors.
by Adalyn Hixson

HO interviews Alfredo Quiñones-Hinojosa as he is about to leave Harvard Medical School and drive cross-country to San Francisco with his wife, Anna, and their four-month-old baby, described as "so beautiful—out of a movie!"

"My wife was in San Francisco last week," he tells HO, "and they couldn't believe it. Where did you get that pretty baby?"

"And not only physically. Neurologically she is developing so rapidly—already doing what is expected of a six-month-old—reaching, discovering her hands and feet."

As he heads for his residency in neurosurgery at UC-SF, Quiñones-Hinojosa sounds like the happiest and luckiest man on earth. And indeed he has traveled a lot of ground since his childhood in Mexico.

"When I was about two years old, my little sister died of diarrhea, which is still the Number one cause of death in underdeveloped countries."

He speaks of the bifurcation of classes in his home country, Mexico. "There were the very very poor and the very very wealthy. HO asks if his sister's death influenced his choice of a career in medicine. "I really think that was the beginning of it all."

"I was very close to my grandfather," he tells HO. "Out of 52 grandchildren, he thought I was the one who had something to offer. That was the beginning of a sort of self-fulfilling prophecy."

HO notes that his academic achievements are quite remarkable and asks about the genesis of his academic drive—a question he says he has often asked himself over the years. "I took all the way back, and ask why is it that I have a desire inside of me that every day makes me get up early in the morning and do what I do. I don't have an eloquent answer. I think that probably it was thanks to my parents, and because I was growing up in Mexico."

"We grew up in a very humble background. No running water. No electricity. My parents always said that the only way to succeed in this world was by getting an education."

"My dad said, 'If you don't always want to work for a patron, if you don't want to be a menial laborer all your life, you need to go to school and get an education.'"

Alfredo came to the U.S. having completed secondary school in Mexico. On arrival, he worked as a migrant farmhand. His first exposure to American education was an ESL class.

"I went to a community college—San Joaquin Delta College, in Stockton, California. I think that is the place. I was taking ESL classes, and when I jumped from ESL to normal classes. I met the first people who were sort of mentors to me—Mr. Nichols and his son Peter. They literally took me under their wing and pointed me toward UC-Berkeley."

"Mr. Nichols was the coach of the debate team at San Joaquin Delta College, and I eventually came to be captain of the debate team." Nichols, he says, pointed him toward UC-Berkeley. "And that's when I met two very important figures—Hugo Mora and Joe Martinez, who is now a big professor at UT-San Antonio. He was already a full professor, with three appointments. At UC-Berkeley. Both of these gentlemen believed in me."

"The epitome of how little I knew at the time—I wanted to find out about research, so I called Stanford, and Stanford said, you might want to talk with Hugo Mora. Hugo said, 'Fax me your CV and your grades,' and I did."

"The same afternoon he called and said, 'Alfredo, I'm looking at your CV, and I think that you are a highly qualified student—you could apply to Harvard.' And I remember thinking—this individual is really a nice person but clearly doesn't know what he is talking about! But eventually we became best friends."

"The same thing happened with Joe Martinez. He gave me an award to do research. I had no experience in research, but he gave me a project and a whole space, a postdoctoral fellowship in his lab."

"We became very successful with that project and then another, and that is how I became involved in biomedical research. And that's when I applied to Harvard."

"He had colleagues here too who were very famous in research and full professors at Harvard. That was again a break."

"The main message here is—I haven't done it alone. It has been thanks to all these people in these institutions. There was Berkeley; then I came to Harvard and met two very famous and committed people—Edward A. Kravitz, the youngest-ever tenured professor at Harvard, also a distinguished professor, and David D. Potter, chairman emeritus of neurobiology at Harvard. Both took me under their wings. And I have done things that I never dreamed of doing academically at this institution. And I've broken into one of the best residency programs in neurosurgery in the United States."

"I'm only stating the facts. I don't want to take credit. I have to be clear. The only thing I did was seize the opportunity."

"I hope I will never be full of myself. I don't ever want to say 'I did it alone—I am the greatest.' As I have seen happen with some of my colleagues."

"I want to acknowledge that the only way we can succeed in this country is by helping one another."

1987
Allied Health Survey Yields Useful Data

Rapid Placement in Many Fields

BY FRED LENHOFF

According to a 1998 publication of the American Medical Association, recent graduates of physical therapist and physical therapist assistant educational programs enjoy a near-100 percent rate of job placement. At the other end of the spectrum, the employment rate for athletic trainers is below 40 percent in their field after completing an accredited educational program. There are several valid explanations for this variation—for example, many newly graduated athletic trainers, like graduates in other fields, are pursuing additional education.

These data on the percentages of students who found jobs and/or pursued additional education—collected in the annual American Medical Association (AMA) Survey of Health Professional Education Programs—can be useful to the health professions' associations, researchers, and policy-makers trying to project current and future health care workforce needs.

The 1997 survey, conducted by the AMA in collaboration with 13 accrediting agencies, gathered information from more than 4,000 accredited postsecondary education programs in more than 40 health professions in more than 40 health professions.

Data from the 1998 survey will be published later this year in the 1999-2000 directory.

To get a picture of employment opportunities and plans for additional education, the 1997 survey included the following question: “Of students graduating from your program last year, what percentage found jobs within six months and/or pursued additional education?” Responses could exceed 100 percent if graduates did both.

Generally, professionals with a high rate of job placement had a correspondingly low rate of additional education pursued, and vice versa. For example, 98 percent of physical therapists found work while only five percent pursued additional education. Conversely, 70 percent of clinical laboratory technicians/medical laboratory technicians (certificate) found jobs, while 28 percent continued their studies. Many of them, presumably, are earning an associate’s

Because few ophthalmic medical technicians and medical assistants were reported as pursuing additional education (one percent and seven percent, respectively), the data suggest that graduates in these fields were not readily able to find employment in their fields in a desired geographic area.

The data collected for the Survey of Health Professions Education Programs and published in the directory also include statistics on program enrollment, graduates, and attrition, broken out by occupation, gender, and state.

The directory includes educational programs in the four most prominent health care fields related to medicine and information on work environments and salaries as well as educational prerequisites and curricula.

The directory has added 18 new professionals over the last three years.

New in 1996-1997 were: audiologist, dental assistant, dental hygienist, dental laboratory technician, dietitian/nutritionist, dietetic technician, and speech-language pathologist.

New in 1997-1998 were: art therapist, music therapist, ophthalmic dispensing optician, ophthalmic laboratory technician, rehabilitation counselor, and therapeutic recreation specialist.

New in 1998-1999 were: genetic counselor, kinesiotherapist, orthoptist, physical therapist, and physical therapist assistant.

The directory is used by students, career counselors, educators, medical librarians, physicians, researchers, and policy-makers.

It is possible to work with the AMA to extract and publish findings on data specific to your organization's field. The contact is Fred Donini-Lenhoff, editor of the Health Professional Directory. who can be called at (312) 464-4655 or e-mailed at fred_lenhof@amattassn.org.

Culture, Collaboration, and Caring
Michigan State University and University of Guanajuato, Mexico: Partners in Nursing Education

BY CONNIE CURRIER, MILDRED OMAR, AND GERALDINE TALARCYZK

Connie Carrier, MPH, is coordinator for International Programs, MSU College of Nursing. Mildred Omar, Ph.D., RN, is associate professor, MSU College of Nursing, and Geraldine Talarczyk, RN, Ed.D., is associate professor and associate dean for Academic Affairs, MSU College of Nursing.

"In order to meet emerging local, state, national, and international needs, it is important that we educate nurses who are culturally and linguistically competent to work with Hispanic populations. The study abroad program in Mexico is one step toward that goal," said Marilyn Rother, RN, Ph.D., FAAN, dean of the College of Nursing at Michigan State.

I enjoyed my experience in Mexico. I received valuable information that I will use to improve my nursing practice once I become an RN (registered nurse). I've also realized the importance of participating in professional organizations to promote the advancement of nurses. Studying in Mexico has given me a greater respect for nursing globally.

This was typical of comments made by nursing students returning from a study-abroad program in Guanajuato and Celaya, Mexico, offered by the College of Nursing (CON) at Michigan State University (MSU) in collaboration with the University of Guanajuato in Fall 1998.

For the first time, the College of Nursing offered Nursing and Health Care in Mexico, a semester-long study-abroad program for senior nursing students that includes a strong Spanish component, family home stays, and nursing courses required for graduation. A new cohort of students presently is being recruited to attend the program in Fall 1999.

The changing demographic and economic environment of the region requires that the profession of nursing in the U.S. expand its vision. By 2005, the percentage of Hispanics in the U.S. population is expected to exceed the percentage of non-Hispanic Blacks.

The growing Hispanic population has major implications for health care. In order to meet emerging local, state, national, and international needs, it is important that we educate nurses who are culturally and linguistically competent to work with Hispanic populations. The study abroad program in Mexico is one step toward that goal," said Marilyn Rother, RN, Ph.D., FAAN, dean of the College of Nursing at Michigan State.

Economic forces shaping the region are having an impact on the profession of nursing as well. The North American Free Trade Agreement (NAFTA) has stimulated research into the comparability of approval and accreditation of nursing education programs, licensure/registration of nurses, and standards of practice across the discipline of nursing in Canada, Mexico, and the United States.

"We need to begin building bridges to work more closely with our neighbors to advance the profession of nursing," said Dean Rother.

Michigan State University has a long history of providing study abroad opportunities, and currently it offers more than 95 programs in more than 40 countries on six continents to accommodate the needs and interests of the growing number of students seeking international experiences.

MSU President Peter McPherson recently set an ambitious goal that by the year 2000, 40 percent of graduating MSU seniors will have a study abroad experience at a cost comparable to on-campus study.

The College of Nursing developed a new study-abroad program in collaboration with the University of Guanajuato School of Nursing and Obstetrics in Celaya, Mexico. This new initiative will begin to prepare MSU students for the challenges of in-
content from the corresponding on-campus courses to ensure that the courses were comparable. Dr. Marta Elena Espino, faculty from the School of Nursing and Obstetrics, taught content on issues in professional nursing in Mexico as part of NUR 415. The elective course on the health care system in Mexico was taught by Ms. Mercedes Azevedo, faculty from the School of Nursing and Obstetrics in Guanajuato.

Dr. Millie Omar, lead faculty member from the MSC CON, visited the students at the School of Nursing and Obstetrics monthly to provide course seminars, oversee the clinical component of NUR 420, collaborate with SNO faculty, and meet with students to ensure the appropriateness and quality of the learning experiences.

All students and faculty who participated in the Mexico experience believed that the first offering was a success. At the end of the program, students felt they had learned as much, if not more, than in their on-campus counterparts. According to one student, "It was very comparable to campus offerings, with the added bonus of also having the cultural experience." Another student appreciated the fact that she had fewer competing obligations while in Mexico, which enabled her to focus more on her studies. "I was surprisingly more interested in the course content and spent more time studying here than I would have been able to had I been in the U.S."

Dr. Omar shared these observations of students’ progress during the semester: "As time passed, students were able to see their experiences through a new 'lens.' The lens was a kaleidoscope that provided alternate images and expanded students’ viewpoints so they could appreciate the variations in health care practices and priorities in Mexico, and compare these to the practices with which they were familiar in the U.S. They were able to see that while practice varied, the applied underlying principles were the same.

Students lived with families in both Guanajuato and Celaya, which allowed them to interact on a daily basis in a different language and culture. The immersion experience forces students to challenge their values and preconceived notions of other countries and cultures. And to develop a new appreciation for people from different backgrounds.

One student noted, "Initially, I was very homesick and had to ration my phone calls home. It was a sort of' in Mexican which I had to adjust to different eating times, larger meals, and a conservative family. Yet when asked at the end of the program what they liked most about their experience in Mexico, all of the students referred to their families, friends, and nurses in the hospital and community.

'My Spanish improved tremendously. I also made special friendships with the families and some of the nurses at Medicina Preventiva. I will never forget this experience.'

The opportunity to work in Mexico was equal to my own experience for Dr. Omar, who said, "This study abroad experience has been an adventure for me as well. It has required me to expand my own vision and broaden my perspective."

Upon returning to Michigan, students who attended the program are searching for ways to return to Mexico—either to visit their families and friends, to seek employment—or to join the Peace Corps in another Latin American country.

"Study abroad in a country with a culture and language very different from your own is a life-changing experience," said Ms. Connie Currier, CON coordinator for International Programs. "Students will take what they’ve learned from Mexico into their nursing practice, and we will continue to develop their language skills and appreciation for the culture, either through travel, work with minority populations in the U.S., or work abroad."

The College of Nursing has been privileged to establish close collaborative relationships with the University of Guanajuato/Celaya School of Nursing and Obstetrics faculty, and MSC CON students have benefited from interactions with Mexican nursing students as well. The opportunity to learn about and experience cultural diversity firsthand has given all involved greater insight, sensitivity, and understanding of culture, collaboration, and caring within the nursing profession, the health care system, academia, and within ourselves.
Let the Children Walk

A Barry Mission Aids the Indigent

BY FRANCISCO J. DUQUE
Reprinted with permission from Barry University Magazine: Fall 1998.

A Barry mission to aid the indigent in Yucatan, now in its third year, has helped hundreds gain proper use of their feet.

Seven-year-old Didier González had never played soccer with the other boys in his hometown of Chicxulub, an Indian village in Yucatan. He was born with spina bifida, a congenital defect that compelled him to walk with a crippling limp on the side of his right foot. Half the time, when his foot was too weak, he had to be carried by his mother. Corrective surgery, commonplace in the U.S., was prohibitive for his impoverished family.

In the late morning hours of Saturday, June 26, Didier's life dramatically changed. His thin, brown body lay anesthetized on an operating table as two American doctors scrubbed his deformed right foot in preparation for surgery. Within a couple of hours, he would be lying groggy in a nearby recovery room, waiting for his mother to take him home.

Didier is just the latest of dozens to receive free foot surgery through a program initiated two years ago by Dr. Charles Southerland and Barry's podiatric medical faculty. In this sunny peninsula, riddled by the Gulf of Mexico and mottled with the ruins of the Mayan Empire, hundreds of children could have grown up defenseless against crippling foot deformities. Even clubfoot, a condition routinely corrected in the first year of life, usually goes untreated until Dr. Southerland and a dedicated corps of others took up their cause. Podiatric care remained out of the reach of most people. The doctors say they derive profound rewards from their voluntary time and services.

"Nobody stands taller than he who stoops over to help a child," said Southerland, professor of podiatric medicine at Barry. "It gives me great personal satisfaction to see improvement in Mexico—the 20-year Barry Crippled Children's Project staffed by doctors from California colleges. The groundwork had already been laid. The Hialeah Foundation in Miami, which had mobilized massive aid to Yucatan in 1988 after Hurricane Gilbert's devastation, putSoutherland in touch with the mayor of Progreso, a sun-baked seaport town of 35,000. A local family support group agreed to provide administrative support, and Southerland performed the first surgery at O'Hara Hospital in Merida, the state capital, on July 1, 1996.

Since then, on roughly bi-monthly visits, an itinerant team of four doctors and residents arrive in Merida on Friday night, perform surgeries on Saturday, and screen future patients at the DIF center in Progreso on Sunday. On this late June weekend, marking the second anniversary of this mission, Southerland said that 1,200 patients have received treatment, including 43 who have undergone surgery.

"The need is so pressing," said Keith Kashuk, DPM, podiatric surgeon and residency director at Larkin Hospital. "Our inner-city charity hospitals are palaces compared to this place. If patients get medicine or good food, it comes from their families."

On Thursday, June 25, Southerland once again flew into Yucatan. He led three graduates from Barry University...
School of Graduate Medical Sciences—Dr. Yasmin Zamorano, a Yucatan veteran traveling for the fourth time, and two first-timers, Dr. Luz Colón and Dr. Yania Bermúdez. Each will gain his or her own perspective.

"Some of the cases you encounter here you seldom see in the United States," said Colón. "You have a chance to train in different surgical procedures."

Friday June 26, 8:30 a.m.

In a small conference room at the Holiday Inn, podiatric doctors from around Merida were finishing a breakfast of stuffed tortillas and chicken. In a few minutes, Dr. Zamorano, chief resident, would give a slide presentation on US surgical procedures for flatfoot.

Zamorano, 35, a Puerto Rico native who graduated from Barry in 1995, completed her residency at Palmetto Hospital in June. She faced seven male doctors, some of them twice her age. Mexican podiatrists don't always intervene for flatfoot, and she feared that some might seriously question her presentation. She had been awake since 4 a.m. preparing for the presentation. "They know much more than I," she said.

But the presentation was well received. "Very clear, very didactic," said Dr. Alfredo Molina, an orthopedic surgeon from Merida. "She explained some very important concepts."

Later that morning, surgery began on seven-year-old Didier. Southerland and Dr. Arturo Ríos, an orthopedic surgeon who oversees the project in Mexico, began by making two incisions, one on each side of the foot, just below the ankle bone. The procedure lasted two-and-a-half hours. Zamorano, Colón, and Bermúdez applied a cast to the entire lower leg, while Southerland took a break in an adjacent dressing room, quietly sipping a soda before the next surgery. As usual, expenses occupied his idle thoughts.

"Right now we're able to raise $10,000 to $15,000 a year for this project, but we constantly run in the red," he said. A single trip including three more surgeries and the screening of 40 to 60 patients costs less than $2,000. Southerland keeps hoping to secure a large stock of supplies so he won't have to worry if he'll have enough for each trip.

The cost of airfare presents the major obstacle. Barry University has been unsuccessful in repeated attempts to secure complimentary tickets from the national airline, AeroMexico. Round-trip fares usually run $300 for each of the four doctors. This expense alone forced the Yucatan Crippled Children's Project to scale back its plans from monthly to bi-monthly visits.

Despite its name, the mission also has started serving the elderly. "There was a cry of discrimination from the local people," Southerland said. "They asked: 'Shouldn't the elderly also have consideration?'" Heeding this call, the doctors now attend the medical needs of the elderly, unless they present other health complications.

Saturday, June 27

It's 10:30 a.m. A crowd of 50 mostly women and children, has spilled out of the DIF center in Progreso as Southerland and the residents pulled up to the front of the building. In single file, the doctors climbed the short steps to the main entrance, as the women and children watched in anticipation.

For two weeks the DIF had run ads in area newspapers announcing the arrival of the American podiatrists. Rosario Sierra, director of the center, had to turn people away after scheduling some 60 patients for consultation.

Inside the center, Southerland and Zamorano took their positions in separate rooms. Colón and Bermúdez shared a third room. At 11:20 a.m., the cries of children echoed down the hallway as the podiatrists examined one by one the patients in the incessant stream.

Some examples, like Maria Alejandra, offered hope. The 11-year-old had been born with her toes fused together into a single lump of flesh and bone. Southerland had carved out two skinny toes in a previous operation. After the follow-up examination, Maria unveiled a shy, warm smile and slipped into her tan leather sandals.

In all, the doctors saw 65 patients in three hours. They slated five for surgery in August, when the team was to return.

Later that day, local officials held a ceremony to mark the project's two-year anniversary. Some 200 townspeople packed the 150-year-old Palacio Municipal. "May this program continue for the good of Progreso and its children," said Miguel Vega, Aguilera, representative for the eighth district.

Way beyond the festivities, Didier, the seven-year-old from Chicxulub, sat on his mother's lap during the midnight ride back to his village across the dense, warm night. He whispered something into her ear. He wanted to know, his mother said, when the doctors would take off the cast so he could play soccer with his friends in the village.

More than a month later, Dr. Southerland reported that Didier was doing well. The cast was removed and he was walking on the bottom of his right foot. Soon his wish to run and play will become a reality.
López Named Goldwater Scholar

University of New Mexico (UNM) student Roberto G. López, double-majoring in biology and economics, has been named a 1999 recipient of the prestigious Barry M. Goldwater Scholarship. López, who will receive a two-year, $15,000 scholarship, is the first UNM student to be named a Goldwater Scholar since the program was established in 1986. He is among 304 students selected on the basis of academic merit from a nationwide field of 1,181 mathematicians, science, and engineering students.

López said he plans to pursue a doctorate in plant pathology and then hopes to obtain employment with the U.S. Department of Agriculture.

Duasso Wins American Values Award

Manuel Duasso, a Miami-Dade Community College (M-DCC) professor of communications, arts, and philosophy, is a 1999 recipient of the American Values Award, presented by the United Way of Miami-Dade, Fla., and the Green Family Foundation.

The award, which was presented along with $5,000, celebrates public servants who perform their duties with excellence and help their community through voluntary service.

Duasso has taught writing classes at M-DCC since 1994, despite having lost his vision due to a gunshot received during a mugging more than a decade ago. He initiated and led several departmental activities designed to help students gain as much as they can from their academic experience.

Espada at Community College of Baltimore

The 13th Annual Creative Writing Forum at the Essex campus of the Community College of Baltimore County (CCBC-Essex) featured poet Martín Espada, currently an associate English professor at the University of Massachusetts-Amherst. Espada explored the connection between the personal and the public, the private and the political. According to The Nation, his work "defines political poetry for the turn of the century."

Izquierdo Named "Unsung Heroine"

Elena Izquierdo, assistant professor in the teacher education department at the University of Texas-El Paso (UTEP), was named one of nine "unsung heroines" by the El Paso Women's History Month Coalition, which stages the annual event to recognize local women who do important community work in many capacities—not rarely get recognized.

Izquierdo was honored for her work in the professional development of teachers who work with bilingual special education students. She has been working as well to address the professional development needs of teachers in rural school districts.

UTEP student Norma Espina was honored as an "up-and-coming unsung heroine" for her volunteer work with Americorps.

Rodriguez Wins Harry S. Truman Scholarship

Adrian Joseph Rodriguez, government and economics major at the University of Texas-Austin, has been awarded the prestigious Harry S. Truman Scholarship. Rodriguez is one of only "70 college and university students nationwide this year to receive the award from the Harry S. Truman Foundation, which provides winners $30,000 each to further their education.

Rodriguez has maintained high grades while gaining valuable governmental experience working at the state capitol of Texas. He is a legislative aide with the office of state Rep. Norma Chavez of El Paso.

After he graduates, Rodriguez, whose parents grew up in poverty in El Paso, would like to help to develop the economy along the U.S.-Mexico border.

Atencio-Pacheco Named Truman Scholar

University of New Mexico (UNM) student Juana Chamiza Atencio-Pacheco, a political science and economics philosophy major, has been named a 1999 Truman Scholar.

"Receiving a Truman Scholarship is a great personal honor, but moreover, it is a testament to the support and faith of those who have surrounded me throughout my life, particularly my parents, Tomas Atencio and Consuelo Pacheco. Their guidance has been augmented at UNM by that of Dr. Diane Rawls and of my fellow UNM Regent Scholars," Atencio-Pacheco said. UNM Regent Scholarships, which offer full-tuition, are the most comprehensive and prestigious offered by UNM.

Atencio-Pacheco plans to enroll in law school.

Garcia and Herrera-Sobek Win Southwest Book Awards

Two University of California-Santa Barbara Chicano studies professors, Mario Garcia and
Maria Herrera-Sobek have received Southwest Book Awards from the Border Region Library Association for literary excellence and enrichment of the cultural heritage of the Southwest.

García was honored for "The Making of a Mexican American Mayor: Raymond L. Telles of El Paso."

Herrera-Sobek was recognized for her work with co-editor David Nacel of California State University-Dominguez Hills, Culture Across Borders: Mexican Immigration and Popular Culture

Attorney López Visits DePaul University

Attorney Gerald P. López, in April, lectured at the DePaul College of Law (Ill.) on the plight of the Los Angeles garment workers at the turn of the century. López, a professor of law at the U.C.L.A. has represented the Los Angeles garment workers. He is one of several distinguished and diverse speakers sponsored by the College of Law to help commemorate DePaul's centennial year.

Passionate about public interest law, López has a long history of working in civil rights and community organizing. He lectures around the country on such subjects as race, immigration, poverty, economic development, and progressive law practices.

New Jersey Channel Honors Unanue

Images Imagines NJ Public Televisions award-winning Latino public affairs program presented "The Joseph F. Unanue Story: The Man, the Lamb, and the Tradition." In April

At 41 years of age, Joseph Unanue was already an icon in the corporate sector," said William Sánchez, series producer. "More important, he was a visionary, an inspirational leader, and a friend to his colleagues and to the Hispanic community.

He lost his life to cancer but left a legacy of love and family values we can all admire."

NJN is New Jersey's public telecommunications network and a PBS member.

Ensemble Kalinda at Wright State University

traditional folk and popular music from Puerto Rico, the West Indies, and Latin America display strong African influences that are also the roots of today's American popular music. Ensemble Kalinda, an eight-member musical group, brought a diversity of influences to Wright State University's (Ohio) Artist Series.

Ensemble Kalinda's repertoire includes Cuban dances, traditional Brazilian songs, and Puerto Rican ceremonial pieces. Its musical style includes chants, ska, reggae, and calypso. The kalinda is considered "the universal Caribbean dance," and has been danced since the late 15th Century. Eventually, the music reached New Orleans, and it continues to be danced today in Trinidad and in Caracas.

Sánchez-Mulcahy Shows Dedication at University of New Mexico

Deanna Sánchez-Mulcahy, manager of enrollment services for the University of New Mexico (UNM) continued education non-degree credit program and academic advisor Sonja Shew track the progress of approximately 1,000 students per semester at UNM.

We strive to provide the best and most convenient student services," said Sánchez-Mulcahy.

She was on the planning committee for the annual New Mexico Academic Advisors Association conference, held in March, as a scholarship chair on the board of directors of the Association for Non-Traditional Students in Higher Education, whose conference will be held in October. She meets monthly with UNM advisors to discuss professional development, procedural changes, and core curriculum issues.

Denoya Named Fulbright Scholar

Dr. Laila E. Denoya has been selected for a J. William Fulbright Scholar award in Honduras during the 1999-2000 academic year. Denoya was the director and principal investigator of the Upward Bound Program at State University of New York-Fredonia.

Over the past 15 years, Denoya has been responsible for establishing and directing pre-college programs with funding from the National Science Foundation, which has invited her to serve as a primary grant reader, as has the U.S. Department of Education.

Denoya has a bachelor's degree from the Central University of Venezuela, and a master's and doctorate from the University of Pittsburgh.

Vergara Photos to be Exhibited at Cooper-Hewitt

The photographs of documentarian Camilo José Vergara, revealing profound changes in the built environment of Los Angeles County, will be exhibited at Cooper-Hewitt National Design Museum, Smithsonian Institution, 2 East 91st Street in New York City. On view June 20 through Sept. 5, "El Nuevo Mundo. The Landscape of Latino Los Angeles by Vergara's personal account of the transformation in the physical character of Lo
Angeles County as its population has become increasingly Latino.

"Far from seeking a place to reinvent themselves, Latinos are desperately trying to keep in close contact with their families and their culture," says Vargas. "In a place so culturally different from home, they want to maintain their identity.

**Valis Earns Tenure at Yale**

Professor of Spanish Noël Valis, an authority on Spanish peninsular literature who has taught such topics as 19th-Century literature, the post-Civil War Spanish novel, and the theme of Spain in Spanish literature, has been appointed to a tenured position at Yale University (Conn.).

Valis, who also has taught modern Spanish theater and contemporary Spanish women novelists, is the author of *The Decadent Vision in Leopoldo Alas* and the Novels of Jacinto Octavio Picón and co-edited *In the Feminine Mode: Essays on Hispanic Women Writers*.

A Phi Beta Kappa graduate of Douglass College, Valis received her doctorate from Bryn Mawr College.

**Graduate Education Recognized by Women and Minorities**

Years of work as a psychiatric nurse convinced Lucy Montes-Sandoval to return to New Mexico State University (NMSU) for a doctoral degree. Owing three degrees in nursing from NMSU, Montes-Sandoval believes a doctorate will take her to the "next plateau." She is among increasing numbers of women and minority students who see graduate school as leading to more successful careers, said NMSU graduate school dean Tim Pettibone.

Women make up 58 percent of the 2,578 graduate students at NMSU, while total minorities account for 25 percent. Hispanics make up 21 percent.

Pettibone notes that enrollment in education and health and social services has steadily increased over the past five years.

**González Named VP at University of North Texas Center**

Adela N. González was appointed vice president for administration and institutional diversity at the University of North Texas Health Science Center in Fort Worth.

González is responsible for administrative services, human resources, community relations, and for coordinating multicultural enrichment programs for students, faculty, and staff. She has held several posts at the Health Science Center since her appointment as acting director of the Public Health Program in 1994. She is the former director of the Department of Health and Human Service for the City of Dallas.

**Viramontes Speaks at Texas A&M-Corpus Christi**

Critically acclaimed Chicana author Helena María Viramontes read from and discussed her work during Women's History Month at Texas A&M University-Corpus Christi.

Currently an assistant professor of English at Cornell University, Viramontes has written three novels (most recent, *Their Dogs Came with Them*) and co-authored two anthologies. She has a bachelor's degree from Immaculate Heart College and a master's from the University of California-Irvine.

**García y Griego to Direct Texas-Arlington Mexican-American Center**

Manuel García y Griego, an international expert in U.S.-Mexico relations and immigration issues, has been appointed director of the University of Texas-Arlington's (UTA) Center for Mexican-American Studies (CMAS), starting in September.

Griego is a political science professor at the University of California-Irvine. He will be an associate professor of political science at UTA.

"I am impressed with García y Griego's experience in designing and administering Chicano/Latino studies programs in California institutions and at institutions in Mexico," said UTA provost George Wright.

Visit the UTA-CMAS Web site at <www.uta.edu/cmas>.

**DaimlerChrysler Contributes to Hispanic Education Funds**

Jaime Vélez, Jr., received a $5,000 scholarship from the DaimlerChrysler Corporation at the 4th Annual Hispanic Business 500 Salute in San Francisco. The automaker was a Gold Sponsor of the Salute, which honored Bay Area Latino entrepreneurs included in *Hispanic"
Texas A&M-Kingsville Receives Grant for Bio Research

The National Institute of Health awarded Texas A&M University-Kingsville’s National Institutes of Health/Minority Biomedical Research Support (NIH/MBRS) program $380,680. The purpose of the grant is to try to attract minority students into scientific careers, said Dr. Enrique Massa, assistant biology professor and director of the NIH/MBRS program.

This is the first time in the 24-year history of the grant that it has had three investigators—Massa, Dr. John C. Pérez, biology professor, and Dr. Jamie C. Laurenz, assistant animal and wildlife sciences professor. The investigators are examining key aspects of biomedical research and providing data and information regarding questions of biomedical relevance and importance.

Mi Barrio Primero at New Mexico Highlands

La Compañía presented Mi Barrio Primero, by playwright M. Salomé Martínez, at New Mexico Highlands University in March. A successor to the Martínez play Estoy en el rincón, Mi Barrio Primero addresses two of the most pressing issues facing communities—youth alienation and gang violence.

In Mi Barrio Primero, Martínez explores the culture of gangs, including the web of community lies and self-deceptions that breed them. But it also alludes to a sense of belonging and space to be preserved and protected.

Intel Partnership Benefits Texas-Pan American

In March, the University of Texas-Pan American (UTPA) received a gift of Pentium® III computer from the Intel Corporation. Throughout the years, Intel has donated more than $74 million worth of equipment and scholarships to UTPA, the only comprehensive university in the predominantly Hispanic Rio Grande Valley of South Texas.

"We feel very fortunate to have a corporate partner like Intel," said Dr. Miguel A. Nevárez, president of UTPA (photographed). "The contributions of funding, equipment, and intellectual capital help us provide students with the most advanced education in the high tech field."

The Midwest Hispanic Student Leadership Conference

The United States Hispanic Leadership Institute sponsored the recent spring Midwest Hispanic Student Leadership Conference (MHSLC), held in Chicago. The featured speakers were Illinois Congressman Luis V. Gutiérrez, and Dr. Estela López (photographed), provost at Northeastern Illinois University.

Hispanic student leaders representing approximately 80 colleges attended.

The MHSLC seeks to develop student leadership skills, promote unity among Hispanic students in colleges and universities, and advocate the implementation of the Collegiate Leadership Development Program.

Seminar on the Amazon at Long Island University-Brooklyn

Dr. Eloí Rodriguez, a professor of environmental studies at Cornell University, and an expert on rainforest biomedicine, presented a special seminar, "Exploring the Amazon Jungle for Novel Medicines: Entomocides from Giant Antheads and Antitumor Drugs from Tropical Vines," at Long Island University-Brooklyn (N.Y.).

Considered one of the world's leading plant chemists, Rodriguez is part naturalist and part explorer. He looks to nature as a source of beneficial and medicinal substances through interdisciplinary research.

Congressional Budget Resolution Misguided, Says National Council of La Raza

The National Council of La Raza (NCLR)
deeply concerned over certain Congressional budget resolutions, passed by both the U.S. Senate and House of Representatives, that threaten to funnel scarce federal resources away from critical domestic programs to pay for a significant tax cut that would largely benefit the wealthiest Americans.

The resolutions impose direct cuts for fiscal year 2000 in justice and international program areas. The resolutions impose cuts in a range of domestic program areas that could result in deep cuts for Head Start, summer jobs, housing assistance, health services for women and children, and the Women, Infants and Children program.

NCLR President Raúl Yzaguirre released a statement saying that Republican leadership's budget proposal promises to decimate the very programs that are vital to preparing America's future workforce.

**International Friendship Festival at U.S. International University**

United States International University's (USIU's) 10th annual International Friendship Festival was held in May. The day-long, outdoor event featured food, crafts, and entertainment from around the world. Many international student clubs—students from more than 70 countries attend USIU-sponsored booths highlighting food and crafts from their home countries, such as Thailand, Kenya, Mexico, Germany, Indonesia, Korea, and others.

Performers included East Indian recording artist Maya Mal Jager and the Edelweiss Band, belly dancer Melench, flamenco with Adriana de Cillo, and the Runningpath Native American Dancers.

**Del Mar College Receives Workforce Grants**

The Texas Workforce Commission (TWC) awarded Del Mar College three Skills Development Fund Grants totaling $267,607.

"Every time a dollar is spent to improve someone's skills, it enables that person to make better wages to support themselves and their families while at the same time help the Coastal Bend economy," said Texas State Rep. Gene Seaman. Combined, the TWC grants provide funding to train 322 individuals and create 162 new jobs in the Coastal Bend area.

Pictured here, Seaman (left) presents a check to Mark P. Costello, of SEMTECH Corporation; Bob Cuveller, vice president of Rabalais I&E Constructors; Jay L. Posze, of KOCH Refining Company; and Bud Harris, dean of Del Mar College's Center for Business and Community Education.

**International Day at Salem Community College**

Salem Community College's (N.J.) United Nations Organization sponsored "International Day" in March. The annual event celebrates cultural diversity on campus. Participants sampled ethnic foods and enjoyed music, dancing, and multicultural decorations.

**University of Redlands Town and Gown Honorees**

Each year, Town and Gown, a University of Redlands (Calif.) support group, honors 10 outstanding local women at its "A Woman's Place Is Everywhere" luncheon. The women are recognized for their achievements in work and in community service.

Pictured here are, left to right, Judith Valles, the second woman to hold the position of mayor of San Bernardino, Connie Cisneros, the first Hispanic woman elected to the Colton City Council, where she served for 19 years; Gloria Macías Harrison, Crafton Hills College vice president of instruction, and founder of El Chicano newspaper; and JoAnn Roberts, owner of the Phoenix Information Center, the largest African American bookstore in the Inland Empire.

Other honorees included Carol Baker, Kay Beattie, Gloria Lynch, Martha Flumer Mendoza, Angie Westergard, and Peggy Fouke Wertz.

**10th Annual Latino Youth Conference at Citrus College**

Citrus College (Calif.) recently celebrated its 10th annual Latino Youth Conference.

The keynote speaker was Dr. Michael Hurtado, interim dean of continuing education at Citrus. In step with the theme "Si Se Puede," Hurtado talked about the choices he made in life and how Citrus instructors helped him to make the choice to succeed while he was a college student. "It's a great time to be Latino Society is experiencing a renaissance of the Latino culture," said Hurtado.

The conference aims to attract Latino students to Citrus. "The presenters at the workshops serve as role models to the students, which encourages them to continue on with their education," stated Laura Garcia, Citrus College transfer advisor.
U.S.-Mexico Conference at Texas-Pan American

The University of Texas-Pan American (UTPA) in cooperation with the Universidad Autónoma de Nuevo León (UANL) hosted their first U.S.-Mexico conference in accounting and business.

The goal of the conference was to promote and foster intellectual discussions between UTPA and Nuevo León, according to Dr. Lino García Jr., assistant vice president for academic affairs for international programs at UTPA. “Hopefully this conference will stimulate and increase joint research projects between students and faculty from both universities,” said García.

Topics included international business, the evolution of value-added tax rates and government tax revenues in Mexico, the association between UANL and the North American International Trade Corridor, the Foreign Corrupt Practices Act, and current immigration issues.

Spanish Studies Partnership at Towson

Recognizing the increasing need for certified Spanish teachers in Baltimore County, Md., middle and high schools, the department of modern languages at Towson University has formed the “Partnership for Spanish Studies” with Baltimore County public schools.

Puerto Rico’s Revolt for Independence: El Grito de Lares

by Olga Jiménez de Wagenheim

This book interprets Puerto Rico’s first and most significant attempt to end its colonial dependence on Spain. The author explores why the island’s independence movement began decades after Spain’s other colonies of the region had revolted.

More Hispanics Entering Texas Medical School

The University of Texas Health Science Center is among the nation’s leaders in training Hispanic physicians. The medical school enrolled 36 Hispanic students in 1995, 38 in 1998, and 42 in 1999.

The White Minority in the Caribbean

Howard Johnson and Karl Watson, eds.

This collection of essays by historians, anthropologists, and a political scientist represents an attempt to locate a discussion of the White minority in the Caribbean in the mainstream of the social scientific literature on the region. This is especially important because White minorities—particularly in their elite dimes
Understanding Diversity: A Learning-as-Practice Primer
by Barbara F. Okun, Jane Fried, and Marcia L. Okun.

By using readers' own personal development as the framework for appreciating others, the authors turn the field of multicultural studies inside out. Readers will learn that diversity is about borders and groups, but also about people and perspectives.

Victoria Ocampo: Writer, Feminist, Woman of the World
by Patricia Owen Steiner

Victoria Ocampo, the powerful Argentine writer and publisher, was a key figure in Twentieth-Century Latin American letters. Until now, most of her work has been unavailable in English. This book makes Ocampo's memoirs, letters, and essays accessible to readers with interests in autobiography, the literature and culture of Latin America, and in the development of feminist thought.

Iraferri Ferrara is co-author of *Green Prosthetics with Green Ties: MBA Programs where the Environment Matters*, a WRI report. She is not associated with the Thomas Rivers Policy Institute. We apologize for the error in the May 7 issue.

**Reference Librarians**

American University Libraries invites applications for tenure-track reference librarians who seek an exciting opportunity to contribute to a newly configured team-based reference unit.

**Responsibilities:** Apply creativity and initiative in providing reference service to a broad range of users in a dynamic and fast-paced environment. Assist in members in developing patron services and new models of instruction, literacy, and in reaching out to a broad based multi-cultural community. Provide research assistance in the use of the online catalog and library database of the Washington Research Library Consortium, the World Wide Web, and other electronic and print resources. Conduct library instruction sessions, prepare publications, participate in outreach and special services. Contribute constructively to team-based planning and development within the library, across campus, and with other library functions. Build the collection as a subject selector and perform other reference responsibilities as assigned. Evening and weekend work required.

**Requirements:** ALA accredited M.S. Reference experience and experience with electronic information resources. Excellent communication skills. Ability to work independently and collegially in a dynamic environment. Preferred: academic reference experience and library instruction experience. Demonstrated ability to work on a shared decision-making group. Experience in a multicultural environment. All other standards considered, including economic or social sciences especially helpful.

American University Libraries, incorporated in 1895, offers a wide range of undergraduate and graduate programs, with international focus, to over 11,000 students. Its proximity to centers of politics, justice, world affairs, communications, science, business, and art in Washington, D.C., enhances the learning environment.

The University Library serves the University through a collection of over 688,000 volumes, 21 library faculty, 52 full-time staff plus over 160 student assistants, and a budget of over $6 million. The University Library is an active member of the Washington Research Library Consortium with a shared Endeavor system that includes an online public catalog and numerous bibliographic databases and full text databases. The Reference Department employs nine full-time library faculty and two support staff.

Salaries commensurate with experience. Review of applications will begin immediately and continue until position is filled. Send letter of application, resume, names, addresses, and telephone numbers of three references to

Michele Mikkelson
Library Personnel Officer

The American University is an AA/EEO University committed to diversity and student body.
by Mark Saad Saka, Ph.D.

Tejano Legacy is an important study of the Tejano (Mexican American) population of South Texas from the earliest Spanish settlements in the 1730s through the American annexation and its aftermath. Armando C. Alonzo is a professor of history at Texas A&M and a specialist on the borderlands. Alonzo dispels many Anglo myths and stereotypes that hold Mexicans as docile and trapped in a fatalistic culture that failed to adapt to the 19th Century. Indeed, through meticulous archival research and a sophisticated framework of analysis, Alonzo demonstrates that the Tejano people of South Texas proved highly resilient and tenacious in their adaptation to a rapidly changing society.

The first Hispanic families to arrive in South Texas settled along the Rio Grande and established a series of military colonies that formed the genesis of many of the South Texas cities that exist to the present. The military character of these settlements resulted from the continuing threat posed by the Apache and Comanche peoples, who raided northern Mexico in search of livestock, and the Spanish Crown sought to create a buffer between northern Mexico and the mounted nomadic threat. A vibrant ranching economy grew alongside the military encampments, and over the course of the 18th Century, a dynamic and resilient people and culture emerged throughout South Texas.

An important distinction emerged between the Texas ranching economy and the long-established ranches of Central Mexico. In Texas, the Spanish Crown granted heads of households land titles, and a more egalitarian economic base formed as opposed to that in the Central Mexican regions, where large land-holding haciendas developed. In addition, race and gender restrictions more characteristic of Mexico City and the Valley of Mexico failed to materialize on the Mexican frontier. This ranchero ethos laid the basis for a regionally distinct culture and identity that continues to mark Tejano society to the present time. Between 1730 and 1836, a stock-raising and export trade economy dominated South Texas, and the growth of an Hispanic ranching society laid the basis for the Southwestern cowboy culture that is so often interpreted as uniquely "American."

The American annexation of the Southwest in 1848 marked a watershed event in the history of Texas although Tejanos remained the majority (85 percent) of the South Texas population for the remainder of the 19th Century. However, even though Anglo's constituted a minority population among the Tejano majority, the challenge of an Anglo-dominated political economy threatened to undermine traditional Tejano cultural and social autonomy. Between 1846 and 1900, Anglo economic penetration of the region, dominance of marketing connections, formation of an English-biased judicial system, and increasing Anglo control over the political machinery put Tejanos on the defensive. Yet in spite of the challenges of the new order, Tejanos defended their interests in an increasingly difficult environment.

Alonzo points out a number of factors to demonstrate the vibrancy of the Tejano peoples during the 19th Century: First, the Tejano family served as the nucleus of culture and society; and the persistence of family values, adoption practices, religious faith, holiday celebrations, music, dances, and language transmitted Tejano culture from one generation to the next. Second, Tejanos placed tremendous value and importance on education and thus founded numerous schools, both parochial and public. This is an important issue for Hispanics as it relates to secondary and higher education. Popular Anglo myth in Texas has often stressed the fatalistic nature of Mexican culture and a general lack of interest among Mexicans in education. Alonzo's work dispels this stereotype by demonstrating the long-held interest among Tejanos in education for their children. Third, Alonzo underscores the popular participation and seriousness that Tejanos held toward politics. Throughout the Nineteenth Century, Tejanos declared their right to vote and actively participated in the electoral process. Finally, Tejanos held their own when it came to landholding, a crucial issue in an agricultural and ranching economy. Tejanos fought in the courts for the right to maintain their ancestral lands, and this allowed for an expansion of the ranching economy until the 1890s.

The strength of this book is its demonstration of a determined and flexible people who survived and prospered during decades of tremendous change and upheaval, fighting, in some circumstances, overwhelming odds and a market economy that impeded economic and political mobility. Professor Alonzo has produced for us an important work on the ingenuity of the Tejano people, a legacy that serves as a model for Hispanic youth and a legacy for all Americans to appreciate.

Dr. Saka, a Fulbright scholar, completed his Ph.D. at the University of Houston in 1995. He is a Mexican specialist whose areas of interest include peasant social movements and agrarian unrest in the Central Mexican countryside. An American of Arab ancestry, Professor Saka has taught in the Department of History at Sul Ross State University, Alpine, Texas, since 1995.

OCCIDENTAL COLLEGE
VICE PRESIDENT FOR INSTITUTIONAL ADVANCEMENT

Occidental College, a selective liberal arts college in Los Angeles, California, seeks a mature, highly successful development/external relations professional for the position of Vice President for Institutional Advancement. Founded in 1887, Occidental College’s mission of Excellence and Equity is to provide a gifted and diverse group of students with a total educational experience of the highest quality— one that prepares them for leadership in an increasingly complex, interdependent and pluralistic world. The Vice President for Institutional Advancement must be committed to this mission and be able to serve as the College’s spokesperson to our several constituencies.

Reporting to the President of the College and serving as a member of his leadership team, the Vice President for Institutional Advancement is responsible for designing and implementing all fund raising and public relations initiatives, including the oversight of annual and capital campaigns and maintaining and improving donor relations. The offices of Community Relations and Marketing, Alumni Relations, Major and Planned Giving, Corporate and Foundation Relations, and Advancement Services are all report to this individual. The Vice President works closely with the Board of Trustees, serving as the administrative liaison to various committees.

The successful candidate must demonstrate an outstanding record of accomplishment in a comprehensive development and/or external relations program, preferably at an institution of higher education. A proven record of success in the identification, cultivation, solicitation and stewardship of major and planned gifts is imperative, as is experience working directly with boards of trustees. It is important for the Vice President to have had some background working with all facets of external relations. This individual must be a highly energetic, creative, team builder with excellent leadership (organizational) and communications skills. Successful management of a staff of at least 15 is mandatory, and work experience in a diverse urban setting is highly desirable. A Bachelor’s degree is required, and an advanced degree is preferred.

Occidental College offers a compensation package designed to attract an outstanding individual. Submit a cover letter, resume and three references by July 1, 1989 to:

Belvedere Partners
100 Larkspur Landing Circle, Suite 120
Larkspur, CA 94939

TAYLOR UNIVERSITY

PRESIDENT

Taylor University is an evangelical interdenominational Christian liberal arts institution integrating faith and learning. The University is seeking a new president to experience a shared vision and to encourage the mission of teaching, research, and knowledge dissemination. The next president will be expected to foster a diverse student body and to lead the University in the development and implementation of strategic initiatives.

Founded in 1846, Taylor University operates campuses in Upland and Marion, Indiana, and offers over 200 undergraduate programs and 18 graduate programs. The University is consistently ranked among the nation's finest educational institutions.

The Principal Qualities Being Sought in a New President are:

Spiritual Leadership: The Taylor community is deeply committed to a biblical worldview and to the development of a life-giving community that is deeply rooted in Christian values. The next president should be a person of high integrity and personal faith, able to lead the University in a way that is consistent with the University's mission and vision.

Educational Leadership: The next president should have a strong understanding of the challenges facing higher education and be committed to excellence in teaching, research, and service. The president should be able to lead the University in the development of innovative programs and initiatives that meet the needs of students and society.

Institutional Leadership: The next president should have a strong understanding of the challenges facing higher education and be committed to excellence in teaching, research, and service. The president should be able to lead the University in the development of innovative programs and initiatives that meet the needs of students and society.

Master's in Biology required. Knowledge & experience teaching life Science. Knowledge of biology and anatomy & physiology. Position begins 1/1/2019. Contact (561) 452-8500 or e-mail jrusakijrcc@icloud.com for application.
WESLEY THEOLOGICAL SEMINARY
ANNOUNCEMENT OF A POSITION IN CHRISTIAN ETHICS

Wesley Theological Seminary seeks to fill a tenure-track position in Christian Ethics. Teaching responsibilities include introductory courses in the history, method and scope of Christian ethics as well as particular responsibility for courses in the areas of political and social ethics. Position includes shared teaching and administrative responsibilities for an intensive program in ethics, theology and public issues. Candidates should have a broad background in the history and theoretical traditions which undergird Christian ethics. Interest in making use of the seminars located in the Nations Capital as a setting for exploring the interface between Christian ethics and social and political issues in public life would be a major asset. Acquaintance with critical perspectives towards the social ethics in political, economic and international issues is especially desirable. Candidates should show evidence of engagement in the life of the local, national and international issues of justice. Ph.D. required. M.Div. or equivalent degree preferred. Position open until filled. 31 Dec. 2006.

ANNOUNCEMENT OF A POSITION IN PASTORAL THEOLOGY

Wesley Theological Seminary seeks to fill a tenure-track position in Pastoral Theology. Teaching responsibilities include introductory courses in Pastoral and Congregational Theology and Care. Teaching needs include core courses in pastoral care and counseling. Experience in group processes, psychologies of change, seminary teaching, pastoral ministry, group work, and administrative systems is also important. Candidates should have expertise in contextual theology. Disciplined knowledge of the field of pastoral care as well as interpretive and constructive approaches to the formation of the congregation as a healing community is desired. Candidates should have a deep commitment to the practice of pastoral ministry and a personal history of engagement in the local church. Emphasis in the church, the educational, and communal levels is desirable. Ph.D. or equivalent degree preferred. Position open until filled.

Send letter of application, curriculum vitae, letters of reference and academic record to Dean Bruce Birch, Wesley Theological Seminary, 4500 Massachusetts Avenue, NW, Washington, DC 20016. Deadline: October 1, 1999.
SAN JUAN COLLEGE
DIVISION DIRECTOR
MATH, SCIENCE, AND HEALTH CAREERS

San Juan College is one of the largest two-year, comprehensive community colleges in New Mexico and offers academic, occupational, and continuing education programs. The campus is located on a 600-acre site on northern Farmington, and serves nearly 3,600 students in San Juan County as well as the Four Corners area of the American Southwest.

A detailed position description and list of desired and required qualifications may be obtained by contacting the Personnel Office as noted below. Successful candidates will be evaluated on their ability to contribute to the mission of the college and their capacity to maintain and advance the institutional mission.

DUTIES & RESPONSIBILITY
Position is responsible for administering the affairs of the division. Will report to the dean and work 40 hours per week in a full-time capacity. Responsibilities include developing, implementing, and evaluating academic and administrative programs; providing oversight and direction to faculty and staff; and coordinating with other divisions, departments, and external partners.

QUALIFICATIONS
A Master’s degree in one of the disciplines taught in the division is required. A doctorate or equivalent is preferred. Two or more years of teaching, research, and administrative experience in higher education are required. The candidate should have strong communication skills, excellent interpersonal skills, and the ability to work effectively with a diverse population.

SALARY: Salary range is $50,000 to $65,000

STARTING DATE: August 1, 1999

CLOSING DATE: June 18, 1999

SELECTION PROCESS: Interested candidates will submit a letter of interest, a current resume, a cover letter, and three letters of reference. All materials should be submitted via email to the President.

CONTACT:
San Juan College, Personnel Office, 4601 College Blvd., Farmington, NM 87402
(505) 599-0215 FAX: (505) 599-0521

NORTHEM MOUNT HERMON SCHOOL
Northfield, Massachusetts

An interfaith leader in private secondary education for nearly 125 years, Northfield Mount Hermon School eagerly anticipates the new millennium. A school on the move, NMH has recently reorganized its academic structure and curricular offerings, positioning itself as a leader in educational innovation. The task ahead is to secure financial support to ensure the ongoing success of this exciting new direction.

Located in scenic northwestern Massachusetts, Northfield Mount Hermon School enrolls nearly 1,200 students from over 40 countries. The community of students, faculty, staff and friends carries on the mission of the school on two campuses of 3,500 acres, renting in rolling hills on the east and west banks of the scenic Connecticut river.

As part of its dynamic fundraising and community-building effort, the External Affairs Department seeks competent, enthusiastic professionals to join its 25-person fundraising team to help reach out to and involve over 24,000 alumni, parents and friends.

DIRECTOR OF DEVELOPMENT

Interested in developing and implementing a comprehensive program for cultivating, soliciting, and stewarding donors capable of making gifts in the $50,000-$1,000,000 range? The director will build a program focused on those most able to support NMH. As one of three development heads who establish policies, the Director of Development report will work to the Director of External Affairs and will supervise a team that includes but will not be limited to, three major gifts officers and one planned giving officer. As the development program matures, additional opportunities will be pursued.

Applicants must possess a bachelor’s degree and five to seven years of development experience. Further, the successful candidate will have demonstrated success in managing and motivating teams of professionals and volunteers, cultivating a broad range of life income deferred gift vehicles, experience using databases to track and manage prospects, and outstanding organizational, written and verbal communication skills.

The candidate must also have proven track record of soliciting large gifts, and must be available to travel several days each month.

ASSISTANT DIRECTOR OF DEVELOPMENT/VOLUNTEER RELATIONS (two positions)

Responsible for identifying, cultivating, soliciting, and stewarding prospects capable of making gifts in the $50,000-$1,000,000 range, and development of a volunteer program in partnership with the External Affairs department.

Applicants must possess a bachelor’s degree, preferable in a field of development experience (including association of prospectus) and outstanding organizational, written and verbal communication skills as well as excellent interpersonal skills. The successful candidate will have a self-starter candidate, self-directed, independent, and will perform as a major gifts team in a complex organization. He/She must be available to travel at least ten days each month or as required.

Qualified candidates should send a resume and letter of interest to: Alice_none@nmh.org

Director of Personnel
Northfield Mount Hermon School
206 Main Street
Northfield, MA 01360
The Office of Public Service and Urban Affairs, University at Buffalo, is seeking a Senior Staff Assistant/Executive Director for OUPP to (a) formulate and direct precollege initiatives/activities/programs (currently Undergraduate Bound-two programs, Liberty Partnerships Program, Science & Technology Enrichment Program); (b) develop proposals for new grants; (c) supervise and evaluate all budget/personnel/computing functions; (d) interact with relevant community groups and constituencies; (e) supervise and provide leadership to project directors and staff.

EDUCATION & EXPERIENCE REQUIREMENTS: Master's degree required (Ph.D. preferred) with five or more years of progressively responsible experience in administrative leadership and office program management and supervision; five or more years' experience with grants development and writing; working knowledge of computing systems.

SALARY RANGE: $41,626 TO $65,000. POSTING #P-9057. POSTING ends 06/23/99. All correspondence should be directed to: Mr. Donnell G. Mueller, PSUSC, Cape Hall, Room 349, Box 60169, University at Buffalo, Buffalo, NY 14260-1609.

University at Buffalo is an Equal Opportunity, Affirmative Action Employer.
HILLSBOROUGH
Community College

Hillsborough Community College (HCC) is a dynamic multi-campus, state-supported Community College accredited by the Southern Association of Colleges and Schools. Located in the Tampa Bay Area on Florida's west coast, HCC assists individuals in developing academic excellence by providing university parallel, technical and continuing education programs complemented by comprehensive student support services. The College supports community growth and development through participation in programs dedicated to environmental conservation, promotion of fine arts, development of a productive and contributing citizenry, joint economic development initiatives with business and industry, partners and cooperative arrangements with other educational and healthcare institutions. AMHERST COLLEGE

DIRECTOR OF ANNUAL GIVING

Amherst College seeks an organized, creative and enthusiastic supporter of undergraduate liberal arts education to oversee the Annual Giving Program, including the Alumni Fund, Reunion Giving, the Parents' Fund and the Special Gifts Program in a combined alumni relations/fundraising environment. The Annual Fund raises $6.5 million from 65% of the alumni, the special gifts portion of the Campaign is responsible for individual solicitation of five-figure gifts from identified prospects. Strategic oversight, planning and management of the Fund including direct mail, information technology, and volunteer training: staff management; and support and solicitation of high-end donors and volunteers to ensure a strong program of leadership giving in the fund are also included.

Amherst College is in the final two years of a $200 million comprehensive campaign and the continued growth of the Annual Fund through the Campaign and beyond is crucial. The Director will develop a post-Campaign plan and fundraising strategy to implement in the year 2001. In addition, the Director will manage a group of alumni classes in all fundraising and on-fundraising areas.

The successful candidate will be an energetic, effective communicator and manager with exceptional motivational, strategic, analytical, leadership, creative and interpersonal skills. Fundraising and alumni experience preferred. Bachelor's Degree required.

Inquiries, nominations, and applications, which should include a current resume and the names and addresses of three references should be sent to Office of Human Resources, Box 2204, Amherst College, Amherst, MA 01002-5000. Consideration of applications will begin July 12, 1999 and continue until the position is filled.

GRAND VALLEY STATE UNIVERSITY

SPECIAL ASSISTANT TO THE PRESIDENT FOR CAMPUS EQUITY

Grand Valley State University is accepting applications for the position of Special Assistant to the President for Campus Equity. The Special Assistant is charged with the responsibility of providing leadership to promote equity practices throughout the University. The position is dedicated to the goal of promoting equity for students, faculty, and staff in the context of the University's overall mission and values. A major focus will be promoting the awareness of services available to women and communicating and publicizing relevant information to the media, alumni, students, university faculty, staff, administration, and community. The successful candidate will be responsible for developing, maintaining, and disseminating materials, resources, and research relating to equity on campus, fostering a positive work environment and community relations policies, building vehicles for effective communication with students and staff, and conducting other outreach activities. He or she will be expected to develop an institutional vision of inclusiveness and an integrated approach to gender and equity issues.

The successful candidate will have extensive leadership experience in developing policies and administrating programs related to women's issues and other equity issues. A master's degree and significant relevant experience are required. A Doctorate is preferred. Success working with a wide array of women, students, and equity issues and interacting with varied constituencies must be demonstrated. This is an executive officer of the University and a member of the President's senior executive staff.

To apply, send letter of application, resume, and three letters of reference to: President Arnd L. Lubbers, 22 Zumberge Library, Grand Valley State University, Allendale, MI 49401. Review of applications will begin immediately and the search will continue until the position is filled. Grand Valley State University has a strong commitment to an inclusive educational and work environment. Women, minorities, and disabled individuals are invited and particularly encouraged to consider this opportunity and to apply. See our website at www.gvsu.edu for more information about Grand Valley State University.

I PUNTO FINAL!

THE (UNNECESSARILY) UGLY AMERICAN ABROAD

Travel—what a magical word. Faraway places, exotic peoples, gastronomic delights. A chance to finally see, in person, the places we have visited via the glass eye on the world in our living rooms. But if we saw our carry-ons in the overhead compartments, we need to remember that we carry with us more than just physical baggage. Our perceptual and emotional baggage colors what we see and how we react.

Growing up in central Florida (Tampa), I was exposed to a number of cultures. We shopped and ate and danced in Ybor City—Tampa’s Latin Quarter—with its strong Cuban and Italian communities. We spent Epiphany in the Greek Orthodox basilica and enjoyed festivities in Tarpon Springs and celebrated at the Scottish festival in Dunedin. We went to any and every cultural celebration I assumed everyone was the same: we just had different ways of expressing ourselves.

As a college student, I had friends from other countries, and visited with them at their homes in the Caribbean, Latin America, and the Far East. The trips were different, sometimes unsettling. But they made me think about what was important to the people I met and the experience of each place.

Over the years, I saw many Americans staying in American chain hotels, boarding air-conditioned tour buses, disembarking for an hour or two in a rigidly scheduled walking tour, watching American movies on TV back at their hotels. They didn’t stroll to the café two doors down from the hotel, buy coffee, and watch the city life unfold before them. They complained.

At the other extreme were the Americans who romanticized the people, the place, and the culture. Refusing to see reality, they preferred to view the local people as simple, close-to-nature primitives who were being corrupted by foreigners (excluding, of course, themselves).

Twenty years later, on a recent trip south of the border. I saw the same behaviors in Americans. One woman complained incessantly about her coffee. After an hour of her complaints, I walked over, introduced myself, and asked what was wrong with her coffee. The café con leche had too much milk. She didn’t want black coffee. Who couldn’t the water just put a little bit of milk in her coffee? Who didn’t speak English? If they wanted American business, she ordered her a café marron. She was delighted. But throughout my stay at the local hotel, I heard a constant stream of complaints from her and other travelers—about the weather, the traffic, the lack of springs in the taxis, the crowded streets, the shifts, people looked at them, the problems with electricity, with water, with heat. The bus, they complained, was old and had no air-conditioning, no springs, no toilet. Not a word about the wonder-filled travel up the mountains, the views around each bend, the lush plant and tree canopies over the road, or the skill of the driver navigating the narrow road up and down the mountains—the latter something for which I was particularly thankful, since I come from very flat country. They were embarrassing. I didn’t want to be associated with or apologize for those kinds of Americans. But I was also angry. Why didn’t they relax and appreciate the beauty of the day? Or be polite? Perhaps even try to speak a little Spanish? To say buenos dias por favor, or gracias as the occasion arose? I was glad when the tour left.

I thought things had changed since I encountered my first group of American tourists twenty years ago. Now I am not so sure. As other cultures have become more familiar to Americans through movies, television, food, and music, there seems to be a mentality that prevents us from enjoying the richness of language and culture. I’m reminded of the book and movie The Accidental Tourist, in which the main character travels the world but recommends the McDonalds in Paris in his travel guide for business travelers. “The point,” he observed, “is to travel abroad without ever leaving home.”

Then who bothers to leave? No university requires travel to a foreign country to present current research. It’s a choice. With that choice comes the responsibility to behave appropriately, to be polite, to remember that it is not “home” but an incredible venue for personal and professional growth.

Travel taught me the value of patience, determination, and flexibility. It forced me to become independent and find ways to communicate with others who didn’t always speak my language. I practiced the language, however rudimentary or mumbled I felt. It helped me appreciate someone’s attempts to speak to me in English. However broken or stilted I know the exhilaration of actually holding a short conversation with storekeepers or foreign colleagues in their language. I feel a personal connection now with a place or a people when I hear or read a news story on the country.

I suggest you enter into travel with an open mind. The lessons you learn will be limitless.
The League for Innovation in the Community College invites applications and nominations for the position of President/CEO

**President/CEO**

After 23 distinguished years as President of the League for Innovation in the Community College, Dr. Terry O'Banion has indicated his desire to retire. As a measure of his leadership role, he has consulted with 600 institutions, written 12 books and numerous monographs, and has secured over $50 million to support League projects. It is the intention of the Board to continue and extend the League's involvement in community college leadership at the local, state, national and international levels.

**League Highlights**

The League for Innovation in the Community College is the only major consortium in North America specifically committed to improving community colleges through innovation, experimentation, and institutional transformation. Twenty CEOs from some of the most influential, resourceful, and dynamic community colleges and districts in the United States and Canada comprise the League's Board of Directors. In addition, 650 members participate in the League's Alliance for Community College Innovation.

**League Members**

- Central Piedmont Community College
  - Pat Anthony Zesar, President
- Cayuga Community College
- Jerry Sue Stinson, President
- Dallas County Community College District
  - J. William Warench, Chancellor
- Delta College
  - Peter D. Boyce, President
- Foot Hill-De Anza Community College District
  - Leo E. Chavez, Chancellor
- Humber College of Applied Arts & Technology
  - Robert A. (Space) Gordon, President
- Johnson County Community College
  - Charles J. Cartman, President
- Kern Community College District
  - Joe Cone, Acting Chancellor
- Kirkwood Community College
  - Norman R. Nielsen, President
- Lane Community College
  - Jerry Moots, President
- Mankato Community Colleges
  - Paul A. Gieme, Chancellor
- Manatee-Dade Community College District
  - Eduardo J. Patrino, President
- Monroe Community College
  - Peter A. Spina, President
- Moraine Valley Community College
  - Vernon O. Crawley, President
- Saint Louis Community College
  - Vivian Blevans, Chancellor
- San Diego Community College District
  - Augustine S. Gallego, Chancellor
- Santa Fe Community College
  - Lawrence W. Tyres, President
- Seattle Community College District
  - Peter C. Ku, Chancellor
- Sinclair Community College
  - Ned J. Siffleston, President
- University of Hawaii Community College System
  - Joyce S. Tsunoda, Chancellor

**Selected Qualifications**

- Education and leadership experience
- Demonstrated vision, enthusiasm, commitment and skills which will extend the League for Innovation initiatives as the "most dynamic organization in the community college world." *Change Magazine*, January, 1998

**Application Process**

The successful candidate will describe in writing how s/he meets each of the above profile items. (Include specific examples)

In addition, applicants should submit a current resume, and the name and business and home telephone numbers of six references.

Dr. David H. Ponitz, President Emeritus, Sinclair Community College serves as search consultant to the League Board. He may be contacted at Sinclair Community College

444 West Third Street
Dayton, Ohio 45402-1460

Phone: (937)512.2865
Fax: (937)512.5130
dponitz@sinclair.edu

The position will be open until filled, however, review of applications will commence on June 1 and continue through August 1, 1999, and materials should be submitted by that date to ensure thorough consideration.

The consultant and the Search Committee will screen applications. Final interviews will be conducted by the Board of Directors in the early Fall.

All inquiries, nominations and applications will be held in strict confidence.

**League for Innovation**

Headquarters for the League is 26522 La Alameda, Suite 370, Mission Viejo, California, 92691, (949) 367.2884, www.league.org

The League for Innovation is an equal opportunity employer and does not discriminate on the basis of race, color, national origin, gender, sexual orientation, disability or age.

Did Somebody Say "Technology"? bac cov
State of American Education

By Gustavo A. Mellander

Recently, Secretary of Education Richard Riley delivered his 6th annual State of American Education address here in Washington, D.C.

In it, he outlined a new approach for states to consider in reforming teacher licensure and compensation. He also announced steps that the Department of Education will take to address accountability and teacher quality.

Five Dynamics Transforming American Education

In his introductory comments, Riley outlined five key issues impacting America’s education.

1. Schools are encountering the “millennium generation” — and need to educate a record 53 million young people.
2. With one out of five children living in poverty, and growing numbers of the overall population requiring teachers to broaden their skills.
3. The American population is aging, and the family structure is changing. As a result, fewer families in the future will have children. This means more effort is needed to keep families without children supporting schools and involved in education.
4. Knowledge and the earning gap both continue to explode. Far too many people are not being educated to succeed in the 21st century. At the same time, millions of Americans have attended college. And the financial benefits are impressive. College educated Americans now make 78 percent more than do high school graduates.
5. Technology is at the heart of change in society and will become fundamental to how we teach and learn.

America’s Teachers: Value Them

In a recently released Teacher Quality report, fewer than half of America’s teachers felt “very well” prepared to teach in today’s classroom. With that as a base of discussion, the Secretary called upon the country, especially governors and state legislators, to take a hard look at the profession of teaching.

As the nation needs to hire 2.2 million teachers in the next 10 years, the Secretary asked for a sea change in public thinking about the value of teaching. This should include raising standards for teachers, paying teachers a “knowledge and skills-based pay,” requiring licensing while ending emergency certification and out-of-field teaching. Further, state laws should be strengthened to better accommodate mobility, such as across state borders. Finally, working conditions for teachers must be improved, and their professional development can be enhanced by providing career ladders.

Accountability

But it is not a one-way street. The “A” word — accountability — is part and parcel of his agenda. Riley outlined a new approach for states to consider in reforming teacher licensure and compensation scales. The Department is committed to taking the following steps:

- Create a National Job Bank
- Sponsor the National Conference on Teacher Quality
- Establish a National Commission on Mathematics and Science Teaching for the 21st Century
- Support a National Academy of Sciences study on teacher testing.

The Secretary challenged Americans to develop a new realism mixed with hope — to be proud of advances in education and then to go the extra mile. He pointed out that all states have developed standards, but many states have not moved those standards into the classroom.

He also developed the theme that education is a continuum. We have powerful new research on early brain development and on teaching reading, and new data showing that the nation’s reading, math, SAT, and AP scores are up — but there are still too many students who do not have basic skills. Too few quality teachers are available to teach them, especially in math and science.

The doors of college are open wider than ever before, but there is still a stubborn achievement gap between well-off and poor schools. Sadly, after years of reforms, too many high schools do not provide students with rigorous academic experiences.

Responsibility and Achievement

It is easy to focus on shortcomings. It is important to remember that some schools are succeeding. What are their characteristics? They exist in communities where teaching is a first-class, respected profession, where children are prepared and supported to pass (not simply socially promoted or retained). School leadership is shared among many in the community, and they implement proven strategies to turn around low-performing schools. Such positive results are the reality in North Carolina, Maryland, Texas, and Kentucky.

In addition, the Secretary committed to three specific goals that are of interest to Ho readers:

1. He suggested joining with hundreds of college and university presidents in “national college week” to step up efforts to encourage young people to plan for college early. Studies indicate that these children who yearn and plan to go to college while still in elementary school do indeed act and succeed once they get there.
2. Since many Hispanics engage in teaching, Riley’s announce that he will support a national public commitment to transform the Coalition for Education to launch major national recruitment campaigns to attract more America.
3. Finally, he urged all America to learn at least two languages.

George Mason University
Diego Rivera: Art and Revolution

Cleveland Museum of Art Premieres Retrospective

The Cleveland Museum of Art (CMA) recently premiered the first major exhibition in over a decade to review the broad scope and appeal of legendary artist Diego Rivera (1886-1957). A national icon in Mexico, Rivera ranks among the most significant artists of the 20th Century. This retrospective exhibition, entitled "Diego Rivera: Art and Revolution," shows nearly 120 paintings and drawings, including works rarely or never exhibited in the United States. Lent by museums and private collectors in the U.S., Europe, Japan, and Mexico, these works trace Rivera’s prolific career, starting with a seldom-seen drawing of a classical sculpture completed when the artist was 12 years old. The exhibition examines his relationship to many of this century’s artistic movements, including symbolism, cubism, social realism, and surrealism, as he fused the innovations of European modernism with the traditions of Mexico’s pre-Columbian past and its indigenous peoples.

After its premiere at the CMA February 12 through May 2, the exhibition continued on a national tour, opening May 30 at the Los Angeles County Museum of Art, then to The Museum of Fine Arts, in Houston, September 19 to November 28, and finally to the Museo de Arte Moderno, Mexico City, December 1 to March 19 of the year 2000.

"Diego Rivera" is organized by the Consejo Nacional para la Cultura y las Artes through the Instituto Nacional de Bellas Artes (INBA, Mexico), and the CMA, in partnership with the Ohio Arts Council. AT&T is the international corporate sponsor. CMA director Robert P. Bergman praised the exhibition:

"Diego Rivera’s life comprises one of the great histories of 20th century art and politics, and the quest for validation of indigenous American cultures. This new retrospective of Rivera, a modern artist who rivals Picasso in his productivity and influence, positions Rivera as a key innovator in 20th-century art, examining not only his artistic production but the social, political and humanistic impulses behind it. "Rivera helped to define the terms of the Mexican-American cultural dialogue that continues to this day."

Bergman also noted that in addition to AT&T’s generous support, "we are deeply indebted to the National Endowment for Humanities and the Raymond John Wean Foundation for their foresight in recognizing the importance of the exhibition with major grants.

Robert P. Bergman, CMA Director

"Rivera helped to define the terms of the Mexican-American cultural dialogue that continues to this day."

combined Mexican and American curatorial perspectives and by the inclusion of several paintings and drawings that are little known and seldom seen outside Mexico.

William H. Robinson, CAM’s associate curator for paintings, is co-curator with Agustin Arteaga, INBA’s former national coordinator and director of the Museum of the Palace of Fine Arts and Louis-Martin Lozano, professor of art history at the National University, Mexico City.

Dr. Robinson describes the artist: “He was denounced by both conservatives and doctrinaire leftists, the latter for his anti-Stalinist views and his ‘bourgeois’ attraction to folkloric themes. This dichotomy of opinion persists today. Some historians regard Rivera as the vanguard painter of a post-colonial, non-Eurocentric sensibility. Others criticize him for adhering too strictly to European traditions and for painting ‘tourist images to please his conservative patrons.’ This exhibition examines these controversies by assembling works from every phase of Rivera’s vast artistic career. Collectively, the works reveal the intricate relationship between revolutionary aesthetics and radical politics in the art of one of the century’s most complex, multifaceted personalities.”

The exhibition includes Rivera’s signature masterpieces, such as “Flower Day, 1925,” which won the purchase prize at the 1925 Pan-American exhibition at the Los Angeles County Museum of Art. These familiar paintings are joined by lesser-known works that surfaced in the course of research and through INBA’s work in registering all Rivera works under laws of national patrimony, a role that has provided INBA unparalleled access to information about Rivera’s art in public and private collections, as well as to related archives and documents.

**Highlights**

The exhibition is presented in four thematic sections. The first two—Rivera’s Formative Years and Radical Political and Artistic Transformations—follow Rivera’s progress from an academic painter trained in Mexico to his engagement with the European avant-garde and his immersion in the social and political concerns of his time.

The exhibition begins with Rivera’s student work in Mexico through his departure in 1907 to study painting throughout Europe. Early academic drawings include the one executed at age 12 (“Classical Figure Leaning on an Urn, 1899”), signaling the emergence of a gifted and precocious artist. This section also features early paintings, a little-known self-portrait, painted by Rivera at age 20 (1906), among the works on view that have never been shown in the United States.

Rivera’s exploration of a symbolist-inspired modernism after his arrival in Spain in 1907 is seen in a group of rarely shown paintings, including the melancholy and evocative corner view of “The House of Vizcaya” from a private collection in Mexico and—in his imagination—to Mexico. His monumental, seven-and-a-half-foot tall “Portrait of Adolfo Best Mangular (1915),” considered the masterpiece of Rivera’s early career, depicts a fellow Mexican painter, seen from the window of Rivera’s studio in Paris, with the Montparnasse train station in the background. This painting’s style, which shocked contemporaries, is the Paris cityscape with expressive distortions that arose from Rivera’s study of the visionary paintings of Spain’s great Renaissance master, El Greco.

“Mural Landscape,” formerly...
nformation from a cubist, who produced complex images for connoisseurs, into a populist painter for the masses. He began with innovations combining modern and neoclassical styles, as seen in "Still Life, Paris (1918)" and "Nude Woman (1919).

I used by Mexican Minister of Education José Vasconcelos to return to Mexico from Europe to promote mural painting as a form of populist art for the masses, reflecting the ideals of the Mexican revolution of 1910-1920. Rivera settled again in Mexico in 1921. He pursued an intensive study of indigenous art and traditional culture while traveling through southern Mexico. He also began amassing a personal collection of pre-Columbian and folk art that would eventually total some 60,000 objects—a collection often referenced in his later murals and easel paintings.

The third section of the exhibition, Art for the Masses, examines Rivera's activities as a muralist through the display of drawings and cartoons for a variety of projects. Included is a study for the mural cycle in the Chapel of the National Agricultural School in Chapingo—"Back of a Seated Nude (1926)—for which Italian American photographer (and Rivera lover) Tina Modotti served as model.

During the 1930s, Rivera spent much of his time in the United States, where he created numerous frescoes in New York, Detroit, and San Francisco. Murals painted by Rivera and other Mexican masters had a wide-ranging influence on American social realist painters. Among related studies on view is a pencil drawing (1932) for Rivera's ill-fated "Man at the Crossroads" mural for the RCA building, in which his portrait of Lenin led to the artist's patron conflict that resulted in the destruction of the mural—one of the most notorious scandals in the history of art.

The last section of the exhibition, Vision of Mexico and World Harmony, surveys the tremendous variety and seemingly contradictory impulses in Rivera's art of the last four decades of his life. During this time (1921-1957), he portrayed many different subjects in styles ranging from surrealist fantasy to the monumental, heraldic simplicity of pre-conquest Indian art. "Tortilla Maker (1930)," for example, reflects Rivera's ambition of creating a vast "portrait" of Mexico.

Rivera, an ardent Marxist and intellectual, was also attracted to themes present, and, in the process, to restore its marginalized indigenous peoples to their rightful and essential place in society. This effort to forge a new, multiracial national identity is seen in a series of works that includes "History of the Religion of Mexico" (1950); "The Creation of Man" and other illustrations for the ancient Mayan sacred text, Popol Vuh (Book of the People) from 131, and "Danzante (1947)," a practically unknown painting of the portrait dancer Jesús Robles (Rivera's friend), who performed with a group dedicated to preserving the ancient ceremonies of the

"Collectively, the works reveal the intricate relationship between revolutionary aesthetics and radical politics in the art of one of the century's most complex, multifaceted personalities."

WILLIAM H. ROBINSON, CMA, CO-CURATOR WITH
AGUSTIN ARTEAGA AND LUIS-MARTIN LOZANO

The other side of Rivera's personality—not the populist, but the sophisticated synthesizer of 20th-Century intellectual ideas—is seen in a group of highly imaginary, sometimes nightmarish images, including "Postwar," depicting an anthropomorphic tree, assuming the shape of a woman with a sword thrust in her heart. The tortured, writhing body set against a desolate landscape was probably intended as a metaphor for the suffering victims of World War II.

The exhibition concludes with Rivera's private images of friends and colleagues, including the
Grupo Teatro Tunanta Enriches Classrooms

Sparks Debate at University of Georgia

BY ELIZABETH R. WRIGHT

One of Dr. Alvarez's graduate students, Diego del Pozo, adapted this year's production from a Senel Paz short story as part of an innovative approach to the traditional master's thesis.

When in the fall of 1996, José Bernardo Alvarez arrived at the University of Georgia with little but a bed, twenty boxes of books, and a motorcycle, he added item number five to the full plate of junior-faculty obligations that keeps new professors working upwards of seventy hours each week. Dr. Alvarez says, "I wanted to integrate my teaching, research, and creative activities and, at the same time, provide students with a learning environment that extended beyond the classroom."

Fortunately, his senior colleagues gave their support, and a cadre of dedicated graduate students embraced the chance to make their studies and research in Spanish-language literature come alive. In this way, Grupo Teatro Tunanta took shape, adding experimental Spanish-language theater to the list of cultural riches in a town famous for the B-52's, R.E.M., and a thriving community of visual artists. Now in its third season, the members of Tunanta have become testaments to the growing importance of Latinos in the southeastern United States, presenting their productions and holding workshops at the University of Georgia and other institutions.

The group's selections of plays to date reveal a commitment to the idea of taking the study of literature beyond the pages of a book and the walls of a classroom— in particular, each work has placed a spotlight on how political upheaval requires difficult personal choices. The group's debut, presented in 1997, featured Paloma Pedrero's La llamada de Laura, a work that highlights the vertiginous changes that swept Spain after the dictator Francisco Franco died and Spaniards grappled with the opportunities and challenges of new freedoms. Problems and responsibilities in a democracy likewise came to life in their second production, Ariel Dorfman's direct and devastating La mujer y la doncella, in which a married couple ready to become leaders in the newly democratic Chile find themselves facing a demon from the past—one of Pinocchio's sadistic torturers, now the seemingly harmless, elderly victim of a flat tire. Should people forgive their trespassers who themselves showed nothing but sadistic malice? While about Chile's recent history, it's hard to imagine a message better tuned to a university in the heart of the south, where new economic prosperity emanating from Atlanta cannot and should not erase the questions that linger from the legacy of slavery. Such a play shows how Tunanta offers a chance to think about a changing Georgia population: new Latino residents and long-time Georgians share common ground in that both groups must plan for the challenges of the future with an eye on lessons from past injustices.

This year's production, Tres de chocolate en una biergalla, adapted from Senel Paz's 1991 short story "El lobo, el bosque y el hombre nuevo," brought the tradition of examining the connection between

June, 1996: To do/Pendiente:

- Walk the aisle in commencement gown.
- More across the country.
- Plan new classes.
- Initiate a new research program.
- Start an experimental dramatic troupe to involve students, faculty, and community in Spanish-language theater.
political freedom and personal choices still further. In his film, *Fresa y chocolate* (1993), that the late Tomás Gutiérrez Alea directed drew widespread admiration. The story, set in Cuba in 1979, brings to life an unlikely friendship between David, a university student committed to Castro's revolutionary ideology, and Diego, a free spirit devoted to keeping alive Cuba's vibrant pre-revolutionary intellectual culture. Despite the regime's official policies of ideologically rooted social realism, this friendship triumphs. Gutiérrez Alea's film offers a powerful example of the struggle for freedom and the importance of maintaining cultural heritage in the face of political pressure.

The Post-show debates are fundamental to the mission that guides Dr. Alvarez and other members of the company, precisely because they broaden the time and space in which learning takes place. The debates foster a climate of open discussion, allowing participants to explore different perspectives and engage in critical thinking. They encourage mutual respect and understanding, contributing to a more inclusive and diverse environment. The discussions often revolve around the themes of resourcefulness, resilience, and the pursuit of knowledge. The post-show debates not only raise awareness about the challenges faced by individuals in oppressive environments but also inspire viewers to reflect on their own roles in supporting those who seek freedom. They play a crucial role in promoting dialogue and empathy, which are essential for creating a more just and equitable society.
ollows encourages a soul-searching not bound by place and time. David and Diego, at that moment, could be any people anywhere who draw closer despite their differences.

In the end, Diego’s outspoken criticism of artistic censorship prompts the police to raid his apartment, and officials to drive him from the island. Emphasizing the despair of exile but the hope of such a friendship, the group choreographed a final scene where David, once rabidly homophobic and afraid of Diego’s touch, embraces him to bid farewell. Through thoughtful staging, the men have come full circle, from the split-screen moment when the two were shouting in one another’s faces but did not see each other to this mutual acknowledgment of love and dependence.

How has this experimental theater in Spanish changed life at the University of Georgia and in neighboring communities? Dr. Carmen Tesser, a senior member of the Spanish faculty at the university, appreciates the excitement that comes as Tunanta “brings literature to life.” This life lasts well beyond the running of the shows themselves. She notes that the theatrical productions have enhanced both her undergraduate and graduate classes. For instance, this year her undergraduate students worked on “translations” of *Fresa y chocolate en una barquilla*, adapting the story for a class about Eighteenth-Century Spanish culture. To do so, they had to apply their course readings and class discussions to answer the question, “What controversies in the 18th Century had the same resonance as homosexuality in revolutionary Cuba?” One group thus dramatized the story of a young woman who aspired to have an advanced education. Truly bringing literature alive, this kind of exercise extends the life of a production and empowers students to become translators of stories. So doing, they think about their own times in relation to other times.

In a similar vein, Elena Adell, a graduate student and an ensemble member, says that she values the pedagogical opportunities that Tunanta has engendered, saying it creates culture in stereo, bringing a sense of immediacy for my students in an Introduction to Hispanic Literature course. For example, in the fall of 1998 she taught a literature class in which they supplemented a reading of *La muerte de la doncella* with a video recording of the Tunanta production. When mid-semester, the controversy arose surrounding former Chilean dictator Augusto Pinochet, students took a much greater interest in the events because of their direct experience with Tunanta’s adaptation.

Indeed, post-show debates are fundamental to the mission that guides Dr. Alvarez and other members of the company, precisely because they broaden the time and space in which learning takes place. The Grupo Teatro Tunanta has progressed from a modest start—with little beyond a “black box” and the bed that numbered among the few possessions Dr. Alvarez brought to Athens in August 1996—to standing-room-only audiences. This issue of space becomes vital for building on steps made in nurturing a truly holistic approach to education in Hispanic language, literature, and culture.

It’s hard to imagine a message better tuned to a university in the heart of the south, where new economic prosperity emanating from Atlanta cannot and should not erase the questions that linger from the legacy of slavery.

Adell also notes how rewarding the collaborative work has been, bringing together a whole community with creative talents, as colleagues gave their assistance in design, set-building and lighting. Off campus, the group has also made a mark. Faculty members at Furman University in Greenville, South Carolina, said that the Tunanta production of *La muerte de la doncella*, besides giving them a rare, cherished opportunity to enjoy Spanish theater inspired debates about Latin America and world politics.

Dr. Alvarez says, “I will seek to gain administrative recognition for the teachers and students who take part, in order to underscore that linking performance to literary studies is not an extracurricular activity or a hobby but rather a vital part of the intellectual lives of students, teachers, and their neighbors.”

Georgia and its southeastern neighbors are new frontiers for Hispanic culture in the United States, since the communities of old Dixie begin to attract more and more immigrants. Creative, thought-provoking productions of Spanish-language theater provide multicultural educational opportunities and build a sense of community as the population changes.
Hispanics and the Opera

Plácido Domingo in Top Post Next Year

Love of opera has long been a tradition among Spanish-speaking people throughout the world. The first opera house in North America was in Mexico City, Argentina, with Buenos Aires' renowned Teatro Colón, can claim continuous operatic activity since 1850. Today, championed by a rising tide of Hispanic opera singers, the operatic Spanish zarzuela, with its origins in the 17th Century, has begun to receive prominent stagings in major opera houses.

And as many surely know, two of the "Three Tenors," José Carreras and Plácido Domingo, are Spanish-born. Domingo having grown up in Mexico.

Los Angeles Opera created a sensation with its debut production of Verdi's Otello, starring Mr. Domingo, in October 1980. Under the leadership of General Director Peter Hemmings, L.A. Opera has become a company of international stature, presenting eight operas in a season that runs from September through June and with a subscriber base of more than 16,000 season ticket-holders. With leading productions in the standard repertory as well as new and rarely staged operas, L.A. Opera brims some of the world's finest artists to Los Angeles.

Plácido Domingo has been closely connected with the company since 1984, when he joined the Music Center Opera Association Board. He served as the company's artistic consultant starting that same year, and has appeared with L.A. Opera every season. In 1995, he was named Artistic Advisor and Principal Guest Conductor. Now he has been named Artistic Director designate. He will succeed Peter Hemmings in June of 2000, when Hemmings retires.

Domingo has achieved worldwide renown as a singer, conductor, and arts administrator. One of the most widely recognized singers in the world, he has appeared in 110 different roles, more than any other tenor in the annals of music.

As a recording artist, he has made a staggering ninety-three complete recordings of sixty different operas in addition to his solo and duet discs. To date, he has won eight Grammy Awards and three Emmy Awards.

Mr. Domingo has made more than fifty videos and starred in three acclaimed opera films, Zeffirelli's La traviata and Otello and Rossini's Carmen. He opened the Metropolitan Opera 1998-99 season for the seventeenth time with performance of Saint-Saëns: Samson et Dalila—thereby tying the record set by Enrico Caruso. The performance, televised nationally, marks to the precise day the thirtieth anniversary of his Metropolitan Opera debut. In addition to a substantive performing and conducting schedule, other milestones for Mr. Domingo in 1998-99 include the celebration of his twentieth-fifth anniversary in Paris and his first performance of Gherman Tchankovskiy's The Queen of Spades, his 111th role.
Other Latin and Hispanic Voices

In addition to Plácido Domingo, the company regularly features important Hispanic and Latino singers from around the world. These artists include Mexican tenor Ramón Vargas, Chilean soprano Verónica Villarroel, Argentinean tenors José Cura and Luis Lima, baritone Justino Díaz and soprano Ana María Martínez from Puerto Rico, Spanish baritone Juan Pons, and tenor Manuel Lanza, as well as numerous American singers of Latino heritage, such as Suzanna Guzmán, Yvonne González, Héctor Vásquez, Jorge Garza, and Charles Castronova, among others.

From its inception, the company has maintained a talented roster of resident artists—young singers who perform regularly both in mainstage productions as well as in the company’s community programs. The ensemble prepares young artists who have the potential for major careers in the opera profession by providing needed experience and training. Suzanna Guzmán is among the distinguished artists nurtured by L.A. Opera who have gone on to enjoy national and international success.

Community Programs

In thirteen seasons, L.A. Opera has served nearly 500,000 students, seniors, and other audiences through its internationally recognized Community Programs.

L.A. Opera presents dress rehearsals of some mainstage operas for low-income seniors, Los Angeles County schoolchildren, and other traditionally underserved groups. This season, L.A. Opera’s world premiere of Tobias Picker’s Fantastic Mr. Fox will have been seen by 6,000 elementary and middle school students in special matinee performances, and 1,000 high school students will have attended the final dress rehearsal of Madame Butterfly.

“I invite all members of L.A.’s Hispanic community to open their hearts and let the music flow through them.”

GILBERT MORET, CHAIRMAN, HISPANICS FOR L.A. OPERA.

L.A. Opera’s participatory In-School Opera Program, which serves as a national model, brings L.A. Opera artists into area schools to work with students from elementary through high school levels, providing performances as well as an opportunity for students to learn about opera. Last year 10 secondary schools participated in performances of Nerd-Landaia, an opera that addresses issues facing Latino teens. Nerd-Landaia was composed by Carlos Rodríguez with libretto by Gary Soto, a leading Mexican American author for youth. Teachers of all grade levels are invited to learn about opera through a special year-long seminar series. During the 1998-99 season, a unique collaboration with the local United States Academic Decathlon teams has brought hundreds of high-achieving teenagers and their teachers to the opera. Senior citizens from across Los Angeles County were invited to the final dress rehearsal of Falstaff, while public employees and their families were invited to the dress rehearsal of Fantastic Mr. Fox.

After tremendous response in its first year, L.A. Opera will expand the College Project to include six colleges and universities throughout Los Angeles. This project, which premiered two years ago, encourages college students to explore L.A. Opera through on-campus recitals and low-cost performance tickets.

Support groups such as Hispanics for L.A. Opera, African-Americans for L.A. Opera, and the L.A. Opera League seek to increase involvement in and attendance at L.A. Opera performances and special events.

The company has benefited enormously through the years from individual and corporate donors—both large and small. In particular, L.A. Opera celebrates the vision and extraordinary generosity of the “Founding Angels,” a group of benefactors led by Warner Henry, whose commitment to the company has ensured the future of opera in Los Angeles.
History

The L.A. Opera traces its roots back to 1948, when a company called the Los Angeles Civic Grand Opera presented a performance of Rigoletto in a church hall in Beverly Hills. The company, under the directorship of Francesco Pace, staged productions through the 1950s, and in 1964 it presented the first opera in the brand new Dorothy Chandler Pavilion (one of three theaters that comprise the Music Center of Los Angeles County).

Shortly after its third production at the Pavilion, The Italian Girl in Algiers, starring Marilyn Horne, the company abandoned its own production projects and recreated itself as the Music Center Opera Association. For two decades, the Association brought opera from other cities to the Music Center. By far the lengthiest arrangement was with the New York City Opera, which brought productions to the Music Center every fall from 1966 to 1982.

In 1984, the Music Center Opera Association hired Peter Hemmings to be its first General Director and gave him the task of creating a company. Hemmings had previously run Scottish Opera and the Australian Opera and had just completed a five-year tenure as Managing Director of the London Symphony Orchestra.

Among L.A. Opera's most noteworthy productions was the company's debut production of Verdi's Otello, with Domingo, and Richard Strauss's Salome, directed by Sir Peter Hall with Maria Ewing and Donald Runnicles. A production of Prokofiev's The Fairy's Kiss and Wagner's Tristan und Isolde, with the Los Angeles Philharmonic conducted by Zubin Mehta, and directed by Jonathan Miller and designed by David Hockney.

A co-production of John Adams's Nixon in China, under the direction of Peter Sellars, the production was later nationally broadcast, winning an Emmy. Berlioz's The Damnation of Faust, directed by Francesco Zambello and designed by John Conklin—only the second time the piece had been staged in the L.A. The world premiere of the Sallinen opera, Kullervo, in conjunction with the Finnish National Opera.

Janáček's The Makropulos Case, in a co-production with the Deutsche Oper Berlin, The Magic Flute, designed by British artist and satirist Gerald Scarfe and directed by Peter Hall.

A new production of La Bohème, staged by film director Herbert Ross, a critically acclaimed production of Richard Strauss's Ariadne auf Naxos, designed by David Hockney.

A critically acclaimed production of Handel's Xerxes, directed by Stephen Wadsworth; and Peter Sellars controversial staging of Debussy's Pelléas et Mélisande.

Frau ohne Schatten, designed by David Hockney.

In addition to Plácido Domingo, the company regularly features important Hispanic and Latino singers from around the world.

In 1991, that relationship was formalized with the founding of Hispanics for L.A. Opera.

Company leaders asked Ed and Alicia Garcia Clark, already enthusiastic supporters of the opera, to use their love of opera to help the company reach more of Los Angeles. For Alicia, the task was simple: "Find the thousands of Hispanics from all around Los Angeles County who like opera and invite them to become a part of the beautiful world of Los Angeles Music Center Operas."

A significant contribution by ARCO helped get the group going. Its first "night at the opera" was organized for a performance of Puccini's Girl of the Golden West with Plácido Domingo. Many went backstage to meet the famous tenor, who later became the group's honorary chairman.

One of Hispanics for L.A. Opera's milestone achievements was its November 1991 Spanish music gala concert and dinner. Corporate heiress from Levitt, KAMEX, and Unvision and the enthusiasm of honorarium chairman Domingo made possible the sold-out concert at the Pasadena Civic Auditorium. "A Celebration of Spanish Music" featured Domingo and soprano Verónica Villaroel at a gala benefit afterwards raising $88,000 for L.A. Opera.

In close collaboration with the IKEA group, L.A. Opera developed a three-year Hispanic Audience Cultivation Project to draw more Hispanics into the family atmosphere with the company. Audience members, subscribers, and box office members were the core of this project around three stunning new productions that were select to reflect distinctly Hispanic Opera over the years that knows the company's commitment to the community, and in Los Angeles that translates into strong ties with the city's Hispanic population.
musical styles, themes, and artists. The first production, a rare American production of Manuel Penella's El Gato Montes, was the company's first Spanish-language work. Starring Domingo, it was broadcast nationally on PBS's Great Performances in June 1996.

The second production, the world premiere of Journey to Cordoba is an original opera reflecting Mexican American culture and featuring Latino artists. The opera, like all of L.A. Opera's in-school productions, had students performing alongside professional opera singers and musicians. Emmy Award-winning composer Lee Holdridge wrote Journey to Cordoba with librettist Richard Sparks. Staging was by award-winning director José Luis Valenzuela and Ira McAliley, with set designs by noted Chicano artist Gronk. The lead role of La Mulata was written especially for mezzo soprano Suzanna Guzmán, an East Los Angeles native. The support of Hispanics for L.A. Opera helped make Journey to Cordoba's unprecedented 1995 community tour a reality.

The third production, the premiere of a new co-production of Gaetano Donizetti's The Elixir of Love, showcased the talents of one of the fastest-rising artists today—hailed by many as the successor to this generation's Three Tenors—Mexican tenor Ramón Vargas. Events surrounding his appearance included a special luncheon and press conference on April 3, 1996, hosted by the Mexican Consul General and honoring Hispanics for L.A. Opera's fifth anniversary. Ramón Vargas was the guest of honor.

Hispanics for L.A. Opera has become indeed a very enthusiastic support group. With the Clarks as co-chairs through 1998, the organization made great progress in bridging Los Angeles Opera with the Latino community of Southern California. The group has reached out to more than 1,200 Hispanic households and claims a membership of 1,200 with the majority of its members attending the opera through regular events. Membership privileges include attending at no charge, a dress rehearsal, video screenings, and lectures, as well as meeting opera stars at special receptions. Opportunities for volunteering exist as well.

In the 1997-98 season, the organization played an integral role in bringing Mexican composer Daniel Catán's new Spanish-language opera, Florencia en el Amazonas, to Los Angeles, and in September 1998, the company welcomed the return of Ramón Vargas in L.A. Opera's first production of Ritter.

Early this year, L.A. Opera announced the appointment of well-known community leader Gilbert Moret as new chair of the Hispanic organization. Moret, a prominent lawyer and an enthusiastic opera lover and singer, and his wife, Margarita, have been active with Hispanics for L.A. Opera over the years. Mr. Moret has chaired several fund-raisers for the group, including its annual Tardeada and the Plácido Domingo Awards dinner, which raised more than $50,000 for the Opera's education and community programs. This year's Tardeada, held at the Morets' home in San Marino, featured dinner, mariachis, singing, dancing, and a live auction.

Says Moret, "I invite all of you to come to L.A. Opera. For those of you who have never been to the opera, let me say this— opera is not an exclusive club. "I invite all members of L.A.'s Hispanic community to open their hearts and let the music flow through them. The real secret to becoming an opera enthusiast is to react emotionally to the music first and analyze it later."

Ed and Alicia Clark have pledged to "continue to work with Gilbert Moret and with Los Angeles Opera. Our love for opera grows and grows, and we want to help more people, young and old, of all races and colors, to enjoy it as well."

Educators at Manhattan’s Fashion Institute of Technology (FIT) will tell you that “in education—as in real estate, publishing, finance, and fashion—location is everything.”

“This is why FIT is such an ideal choice,” they say, “for students considering a career in the many related design, marketing, and manufacturing industries.” The Institute’s campus is on Seventh Avenue at 27th street, “not in some rural, remote setting from which students must travel to reach reality.”

Anyone who follows the fashion world knows that this area of Seventh Avenue is at the heart of the industry. It is not just Manhattan’s, but the fashion center of the world. A Seventh Avenue address places this unique educational institution in an ideal real-world setting, a spokesperson adds, and because of the school’s unique location, “there’s no need for students to seek out real-world experiences—they are a routine part of FIT’s educational and campus social life.”

FIT’s new location on the Hispanic Outlook Honor Roll is a rather distinguished location as well, so welcome to the Fashion Institute of Technology, and congratulations on arriving there in style.

Last year, Dr. Joyce E. Brown was named the sixth president of the college as well as the chief executive officer of the Educational Foundation for the Fashion Industries, an advisory and support body to FIT. She is the first woman, and the first African American, to hold the position of her appointment, Brown observed, “I do not believe FIT was trying to make a statement about gender and ethnicity. I think we all felt I was the right person at the right time. In 1998, it would be nice to think that some of those barriers are no longer so overwhelming, and that we can think of ourselves not as revolutionaries but as forward-looking.”

The new president did, in fact, have the credentials. Brown served for one year as dean for Public and Community Affairs during Mayor David Dinkins’ administration and has held a number of senior administrative posts at The City University of New York, including the position of vice chancellor for Student Affairs and Urban Programs. She was also acting president of Baruch College where she had earned her B.A.

Brown, who holds a doctorate in counseling psychology and completed Harvard’s Management Institute, calls education “the most important service we can provide, it transforms peoples’ lives. Public higher education
tion provides opportunities that people wouldn't otherwise have, and helps them develop their potential. It finds that very exciting, and I have dedicated most of my personal and professional life to that end.

Brown observes that FIT "speaks to industry and feeds into the economic development of the city in ways other institutions do not. She notes that she will press to have FIT take an even more active role in the economic life of New York.

"FIT has a unique niche in the world of higher education. It is unique in the way it addresses the needs of businesses and industries, and it enjoys wonderful relations with key industry people. I believe an institution is only as strong as its faculty, and FIT has a wonderful faculty. Our students are incredible—wonderfully talented and creative. We have lots to build on.

There are many, many career and program choices at FIT. The college offers associates degrees that can be completed in the traditional two-year period, as well as one-year associate degree programs for those who have already earned appropriate college credits. Bachelor's degree and master's degree programs provide advanced study. FIT's Presidential Scholars program offers honors students specially designed educational pathways.

FIT students also have the opportunity to learn in the real world, all over the world, through any number of the colleges many internships and international study abroad programs. There is even a visiting students program that gives students from other colleges the opportunity to take courses without formal transfer. If you think that only dress designing is learned here—think again! The list of options is enormous.

Today FIT offers programs that go well beyond the school's original curriculum. A student may choose from—Accessories Design, Advertising and Marketing Communications, Advertising Design, Computer Animation and Interactive Media, and Cosmetics and Fragrance Marketing. There are programs in Direct Marketing, Display and Exhibit Design, Fabric Styling, Fashion Design, Fashion...

So, is the word "fashion" a misnomer? Not really. The name Fashion Institute of Technology reflects the college's origin in the 1940s as a trade school devoted exclusively to educating students for careers in the apparel industry, then known as the needle trades. As the above list of fashion-related fields suggests, FIT has grown dramatically in scope and sophistication as it has won national and international renown.

The school is a public institution, receiving its principal financial support from the State and City of New York. Founded in 1944 as an answer to the recognized needs of the fashion industry for professionally prepared professionals, FIT is today a State University of New York College of Art and Design, Business, and Technology.

In 1951, FIT became one of the first community colleges under the program of the State University of New York empowered to grant the Associate of Applied Science degree. In 1953, FIT moved into its first real home, a new nine-story building on Seventh Avenue, in the heart of the garment district. The building was planned for 1,200 students, but by 1965, there were 4,000.

An amendment to the education law of New York State was approved in 1975 to permit the college to confer Bachelor of Science and Bachelor of Fine Arts degrees. In 1979, another amendment was approved authorizing the granting of master's degrees.

Master of Arts Programs first introduced in 1985 are offered in the areas of Gallery and Retail Art Administration, Museum Studies, Applied Arts, and Museum Studies, Costume and Textiles.

By 1979, six more buildings had been added, including two dormitories, and the Shirley Goodman Resource Center, which houses the Gladys Marcus Library and The Museum of FIT, which includes the college's costume and textile collections.

FIT has transformed itself from a tiny trade school into an internationally recognized college that prepares students for a wide variety of professions.

Today, the college has an eight-building campus serving 12,000 students, day and evening, from all 50 states, 64 foreign countries, and majoring in 30 different subject areas.

Who goes to FIT? First there are the superstar alums such as Calvin Klein, Carlos Torres, Norma Kamali, John Bartlett, Mary Ann Restivo, Jhane Barnes, and Victor Alfaro. But other graduates hold positions of influence throughout the industries and fields that the college serves, and thousands of men and women—successful and talented professionals—are found everywhere in the fashion industries.

The ethnic mix of the student population is approximately 14.4 percent Hispanic, 22.4 percent Asian, 12.1 percent Black, and 0.2 percent Native American. From a class of 100 in 1944, the school now serves 11,696 students. Full-time enrollment is 5,601 and part-time students number 6,095. There are 1,375 total faculty and staff, with 165 full-time faculty, and 652 part-time faculty. The college has grown to 36,000 Sixteen A.A.S., nine B.F.A., nine B.S., and three M.A. degrees are offered.

In-state tuition for the A.A.S. degree is $1,492.50 (out of state, $3,400). and for the M.A., New York residents pay $2,750 (out of state, $4,500).

The Fashion Institute of Technology attempts to remove financial barriers to college entrance by providing scholarships, grants, loans, and part-time employment for students in financial need. FIT directly administers its own institutional grants and scholarships. These are provided by the Educational Foundation for the Fashion Industries. Federal funding administered by the college includes Federal Supplemental Educational Opportunity Grants, Federal Perkins Loans, federally subsidized loans for students and parents, as well as the Federal Work Study program. New York State residents who meet state guidelines for eligibility can also receive Educational Opportunity Program funds through FIT.

High school students interested in exploring the course offerings at FIT can sample everything from comic book drawing to patternmaking, television production to jewelry design and toy-making, by participating in FIT's Summer Live classes, an innovative summer outreach program. Based on financial need, and upon written recommendation of teachers and guidance counselors, young New York State high school age residents are eligible for limited financial assistance for Summer Live in the form of grants covering half of the course fee. If eligible, students can receive a Nancy M. Yeldin Memorial Award, in honor of the former secretary of the college and director of college relations. The Yeldin award covers the entire course fee.

Three FIT Fashion Design students recently received scholarships from Hispanic Designers, Inc., a not-for-profit organization founded in 1985 to increase the visibility of young designers and artists, and to support their education through scholarship and internship programs. The $3,500 Patricia V. Asip Scholarship was awarded to Finella L. Marty, who will graduate in 2000. She received the award for devising a merchandising strategy for a ready-to-wear collection targeting the U.S. Hispanic market. The other scholarship winners, Cecilia Castillo and Peggy Lee Lopez, received $1,500 and $1,000 respectively.

Ruben Cruz, an adjunct instructor in Fashion Design, who, along with adjunct assistant professor Josephine Vargas, helped guide students through the application process, observes, "Many Hispanic students at FIT work full time in addition to keeping up their studies here. Scholarships can really make a difference in their lives and help them realize their educational and professional goals."
El Greco AND a New Building

The Meadows Museum at Southern Methodist University has acquired a painting by El Greco, long a priority for the collection. The acquisition is particularly important to the museum because El Greco is the only major Spanish old master not already represented in the Meadows Museum Collection—the most comprehensive and one of the largest collections of Spanish art outside Spain. Highlights of the collection include Renaissance altarpieces, monumental baroque canvases, exquisite rococo oil sketches, polychrome wood sculptures, impressionist landscapes, modernist abstractions, and a comprehensive collection of the graphic works of Goya.

The El Greco work, "Saint Francis Kneeling in Meditation," is a 30" by 25" oil painting on canvas. One of the artist's later works, it was painted between about 1605 and 1610. It was acquired at a recent auction at Christie's in New York. The painting, which has never before been publicly shown, will be exhibited in the Meadows Museum beginning September 8.

"Acquisition of a capstone painting by El Greco has long been the dream of the Meadows Museum Foundation and family," said Dean Carole Brandt of the Meadows School of the Arts at SMU. "Quite simply, this artist has been the missing piece in an extraordinary collection of Spanish old masters. The painting is luminously beautiful and will assume its rightful place as one of the most treasured of our treasures. The Meadows School and SMU will be honored to bring the work to our community of students, faculty, staff and friends."

The painting depicts Saint Francis meditating upon eternal life, as represented by the crucifix leaning against a skull. The theme is underscored by the branch of ivy, a symbol of immortality, set prominently against the dark wall of a cave. This depiction of Saint Francis is one of 10 different compositions that El Greco created for representation of the saint. These works emphasized the themes of penitence and contemplation of death, which had not previously been so closely associated with Saint Francis. It was the artist's habit to repeat his compositions, often on different scales and over long periods of time. The new Meadows acquisition is a smaller, later version of a well-known painting belonging to The Fine Arts Museums of San Francisco.

The painting was long obscured by discolored varnish and extensive overpainting. The quality of the canvas had been impossible to

"El Greco is often called the painter of Saint Francis because he popularized the image of the saint when it was a relatively new subject for artists in Spain," Jordan said. "Saint Francis was one of El Greco's most successful subjects. This version is an extremely sensitive and poignant example of the artist's late style. The quality of the painting is superb."

The painting was in the collection of the Marques de Amurrio in Madrid at least by 1926 and subsequently in another private collection in Madrid. The Meadows Museum purchased the painting through museum acquisition funds previously provided by The Meadows Foundation, private donations, and university funds. A portrait by El Greco in the Kimbell Art Museum in Fort Worth is the artist's only other uncontested painting in Texas.

"Spain has contributed several artists of great genius and central importance in the history of Western art," Meadows Museum Director John Lunsford said. "Among the old masters they are Velazquez, El Greco, Zurbaran, Murillo, Ribera, and Goya. More recently, they include Picasso and Miro. Of these artists, all but El Greco were already excellently represented in the Meadows collection, in most cases by more than one work.

"El Greco is in some ways the most modern of the old masters," Lunsford said. "His painting technique, with its distortion of form and virtuoso brilliance of execution using loose and overlapping brush strokes to suggest shapes and details, was used as freely again in European art until the late 19th Century. Because of this technique, El Greco speaks directly to artists today, perhaps more than any of the earlier painters."

Born in Crete, artist Domenicos Theotocopulos (1541-1614), better known by his Spanish nickname El Greco, spent the majority of his island career in Spain where he settled in 1571 and established himself.

The Meadows Collection, which opened in 1965, spans more than 1,000 years of the art of Spain and the Hispanic world, including masterpieces from the 9th to the 20th centuries. Lunsford said it is one of the few specialized art collections of comparable stature including the Yale Center for British Art, Harvard's Busch-Reisinger Germanic Museum, and the University of Delaware's Winterthur Museum of American and decorative arts.

The Meadows Museum has one of two primary collections of Spanish art outside Spain, the other being that of the Hispanic Society of America in New York, which opened in 1908. More broad representation of the development of Spanish painting than the Hispanic Society’s collection, the Meadows Museum offers perhaps the best overall view of Spanish painting in the western hemisphere, Lunsford said.

The Meadows Museum Collection will soon have a new home. Construction of a new museum building began in May. The 66,000-square-foot building, designed by the Chicago-based architecture firm of Hammond Beeby and Partners, will be six times larger than the present museum and will double the present exhibition space, allowing more
endowment will allow for significant expansion of educational programming, which presently provides interactive docent-conducted tours for several thousand school children each year. Other ongoing educational activities will include gallery talks, family days, teachers workshops, a summer art program for children, and special events for museum members. The distance-learning studio will allow presentations to be transmitted electronically from the museum to classrooms at SMU and schools in the Dallas-Fort Worth area and beyond.

The entire second floor of the museum will be devoted to exhibition galleries, with separate areas for the permanent collection and special exhibitions. The expanded space will allow for display of considerably more of the permanent collection than is presently possible. Special galleries will be provided for works on paper, such as the extensive collection of Goya etchings, which currently have no space for permanent exhibition.

Dean Brandt says the new museum will "strengthen the collection's role in the teaching and research mission of the university, and allow for expansion of programming to off-campus constituencies."

The space currently occupied by the Meadows Museum will be renovated to provide additional studios and classrooms for the Division of Art and the Division of Art History in Meadows School of the Arts. The construction project also includes a two-story, 520-car parking structure, which will be usable by August of next year.

The Meadows Museum and its distinguished collection evolved from the dream and dedication of the late Algur H. Meadows, Dallas oil financier and philanthropist. While engaged in oil exploration in Spain in the 1950s, he made many visits to the Prado Museum in Madrid, which led him to develop a strong interest in Spanish art and to begin his own collection.

Through the Meadows Foundation, he gave SMU funds in memory of his first wife, Virginia Garrison Sturtevant. Meadows, for the construction and endowment of a museum to house his collection of Spanish art. In 1967, two years after the museum opened, Meadows and The Meadows Foundation began an aggressive but highly selective acquisitions program that transformed what had been a small private collection into a comprehensive one of the highest professional standards.

The Meadows Foundation was created in 1948 by Algur and Virginia Meadows. Before the latest $20 million gift for a new museum, the Meadows Foundation and Mr. Meadows had contributed more than $45 million to SMU, primarily for the museum and School of the Arts, the latter named to honor him in 1969, nine years before his death.

The Meadows Foundation, now in its 51st year, supports programs related to health, education, arts and culture, human services, and civic and public affairs, throughout Texas. One of the largest private foundations in the state, it has dispensed more than $880 million in grants to nonprofit institutions and programs over the past half century.

The $80 million commitment for the new museum is one of the largest single gifts ever received by SMU. Others include $25 million in 1981 from Robert H. and Nancy Dedman to endow the school of humanities and sciences, later named Dedman College; more than $25 million from Ray L. and Nancy Ann Hunt to establish the Hunt Leadership Scholars Program in 1993; $30 million from the Dedmans in 1997 for the Dedman Life Sciences Building and other uses; and $20 million from Gerald Ford in 1997 for a new football stadium.

The construction of the new Meadows Museum will fulfill one of the chief goals of SMU's $550 million capital campaign launched in April 1997. This five-year campaign is the most ambitious in the university's history, with the largest goal ever sought by an institution in North Texas.

SUMMER 2000

Universidad Complutense

MADRID - SPAIN

Scholarship Program

for Teachers, Counselors & School Administrators

Three and four weeks of intensive Spanish language study from July 13 to August 3 or 10, 2000

Includes: round trip airfare, three meals a day, room accommodations and instruction at Colegio Mayor Nebrija of Universidad Complutense. From $1,200.

For information, write or Fax your request to:

Center for International Studies
42-32 De Bruin Drive
P.O. Box 451
Fair Lawn, NJ 07410-0451

Tel: 201-587-1260  FAX: 201-587-0433
The past few years of Laura Angélica Simón’s life have been a whirlwind. She went from elementary school teacher in a rough Los Angeles neighborhood to award-winning documentary filmmaker. She is highlighghted by Hollywood honchos for future movie projects. Even Washington D.C. has noticed the impact of her film. First Lady Hillary Rodham Clinton saw it and sent a congratulatory note.

The buzz surrounding Simón, who immigrated to the United States from Mexico with her family at the age of 6, started when the film she directed, Fear and Learning at Hoover Elementary, won the 1997 Freedom of Expression Award at the Sundance Film Festival in Park City, Utah. A few months later, five million viewers saw the film, which examines the emotional costs of bringing the immigration debate into the schools. On PBS After that, Simón’s phone started ringing nonstop.

She has been interviewed by Dateline, The Today Show, People Magazine, The New York Times, and other major news organizations and she has received book film and television offers. She also has won numerous awards from organizations, including the Hispanic Public Relations Association, the National Organization of Latina Women, the U.S. Environmental Protection Agency, and a Commendation Award from the City of Los Angeles.

"Winning at Sundance was unbelievable," said Simón. "The people were very hostile towards her. She felt she needed to move on from her teaching position because of the tensions that arose from the public and the content of the film itself, among other reasons.

"Some people saw me as a saint and some saw me as a muckraker," Simón said.

"But," Simón said, "teaching and directing require many of the same skills—crowd management and organization—so the transition to filmmaking has not been difficult despite the doubts many had that an elementary school teacher with no previous filmmaking experience could make a film worth of notice.

"As a teacher, you have to manage a lot of people and try to get them to be as creative as they can be," Simón said. "It’s very similar on a film set. You have to sense what strengths and weaknesses people have and work with that.

Geoffries Gilmore, director of Sundance Film Festival at which she won an award, said Simón’s lack of experience as a filmmaker gave her film a unique quality.

Too much about documentary filmmaking is to frame people in..."
"I know that their lives are very poor, often violent, and they are extremely aware that society does not want them here. Yet, despite all these obstacles, they are full of hope and talent."

LAURA ANGÉLICA SIMÓN

...preordained boxes," said Gilmore. "She allowed the characters in her film to reveal themselves. It wasn't a work where she demonized people, where you would say these are good people, these are bad people. She painted shades of gray and showed the contradictions within people themselves. The film really affects people and makes them think about the issues."

"A sense of desperation" over the passage of Proposition 187, which among other things would ban undocumented immigrants from public schools, drove Simón to chronicle the emotional impact of passing such a law.

"After voters passed Proposition 187, Simón walked into her classroom, and one of her students asked, "Are you a cop? Are you gonna kick me out of this room?"

"The idea that she would think that I was somebody who would hurt her that way, someone who would have her deported or kicked out of the classroom, was just devastating," said Simón.

Shortly thereafter, Simón borrowed a video camera and began to tape the lives of her students at Hoover Elementary, which is 96 percent Latino and located in the Pico Union section of Los Angeles, one of the poorest and most violent neighborhoods in town. So dangerous, in fact, that filming in the neighborhood was challenging. Simón instructed her volunteer crew to dress as inconspicuously as possible—no jewelry, no makeup, and to cover any tattoos. They also hid their cameras at times and filmed early in the mornings so as not to attract the attention of gang members.

Many of the Hoover Elementary students are economic and political refugees from Mexico, Guatemala, and El Salvador, and some of Simón's teaching colleagues had voted for the proposition. The issue drove many of them apart. Simón also wanted to capture that divergence of opinion through interviews with students and teachers.

"I found out I didn't know people as well as I thought I did," said Simón.

"While the movie was shot within a few miles of Hollywood studios, the world of Hoover Elementary's nearly 5,000 students is vastly different. The school itself shares the block with a known crack house. The students at the school not only struggle to fit into American society; they also struggle simply to survive. Many of them live in cramped housing and must deal daily with the violence that envelops their neighborhood and with the grinding poverty that faces many immigrants."

"I wanted to sensitize the rest of America to the life of my students, who are mostly undocumented immigrants," said Simón. "I know that their lives are very poor, often violent, and they are extremely aware that society does not want them here. Yet, despite all these obstacles, they are full of hope and talent. I wanted to show that if given a chance, many of us who crossed the border legally or illegally, can do great things, and become Americans that society can be proud of."

Simón taped 40 hours of material, which she whittled down to 5 minutes. She and a good friend, Traces Trench, who co-produced the film and who was working as an executive at Twentieth Century Fox, plunked down all of their life savings to produce the documentary. And when Trench submitted rough cut of the film to Sundance officials, the two women didn't know where they would get the remaining $20,000 to $30,000 the needed to polish the film for public display.

"We were always begging and borrowing," said Simón. "We struggled to make it," said Trench, who added that selling the film to PBS and distributing it on video has helped the women recoup the nearly $150,000 it cost them to make the film.

"We weren't sure anyone would ever see it. So many projects are made and never get seen because the people don't have the money..."
finish them.

That changed once they got word that their documentary was one of 34 films out of 800 submissions chosen to participate in the film festival. Trench's bosses at Fox gave the women the money they needed to get a finished product.

"I would never interrupt Laura when she was in school, but when I got the call from Sundance, I just had to call her to tell her," said Trench. "I told her, 'We got into Sundance. Isn't that exciting?' She said to me, 'I've got a huge classroom, so I've got to call you later.' I was just left there hanging on the line.'

That dedication to her classroom and to her work is what kept the project on track, said Trench, who met Simón several years ago and visited her students and invited the classes to her movie studio over the years.

"She felt this story had to be told," said Trench, now an independent producer whose projects include Fox's Cinderella starring Angelina Jolie and Drew Barrymore and a Disney Christmas film called I'll Be Home for Christmas.

"Laura had never made a film, and for her to say that she wanted to direct this was a huge obstacle. But she's very convincing, and when people meet her, they want to work with her. She's incredibly passionate. At times, we felt like giving up on the film, but she never gave up."

That dedication has been a part of Simón's entire life.

"I was born in Mexico, and my family immigrated to the United States when I was 6," Simón said. "Neither of my parents went to college, and my mother went only to school through 3rd grade. That easily could have been my fate as well if it weren't for the American school system."

Simón herself did not know English when she started kindergarten in San Francisco. But by high school, she was valedictorian. She earned a scholarship to Claremont College near Los Angeles, where she majored in economics and philosophy. She was the first member of her family to attend college. She also speaks a third language, Italian.

Simón got into teaching by accident. After college, she planned to work as a substitute teacher only to save money for travel. Instead, she was offered a permanent job because the Los Angeles Unified School District desperately needed bilingual teachers.

"I love the public school system," Simón said. "That's where I learned to become an American. That's where I learned the language. That's where I learned the history. It really is the only shared experience we have as Americans to form an identity."

Still, Simón said she is very disturbed by what she sees in the education system today. In her second documentary, then tentatively titled Black Fox Brown Girl, she examines the race personas in high schools. One of the most poignant parts of the documentary, she said, is one in which she asks students to recount when racist remarks had first been directed at them. In all instances, the students said a teacher had been the culprit.

"The issue of race is a big one, and schools need to discuss it more, especially among the teachers," Simón said.

"Unfortunately, there usually isn't a forum for teachers to discuss these issues."

When HO talked with Simón, court challenges had kept Proposition 187 from taking effect. But Simón said, the challenges to the Latino community are always there, and cited the challenge to bilingual education, which she called "an effort to rid us of our language."

"The debate is not about whether students are learning English," she said. "It's about retaining our Spanish. The best way to end a culture is to take away a language."

END
The American Place Theater (APT) is a not-for-profit theater, Off-Broadway, and now celebrating its thirty-fifth season. APT, which got its start in a church, has a special mission “to offer audiences a challenging theatrical experience by developing and presenting new plays by living American playwrights and writers and by producing theatre that is meaningful and enriching to a diverse population.”

The theater offers three or four new productions each season. They run for an average of 40 performances, and often extend for several months.

American Place Theater has received more than 35 Village Voice OBIE Awards recognizing its contributions to Off-Broadway theater, including a special OBIE citation for “uncompromising commitment to unconventional and daring plays.” It has also received 12 AT Delco Awards for Excellence in Black Theatre and the Marge Jones Award.

Significant productions over the years have included: Sam Shepard’s “State of Shock,” Eric Bogosian’s “Drinking in America,” Emily Mann’s “Still Life,” James Deljouh’s “Do Lord Remember Me,” Ronald Rihman’s “Journey of the Fifth Horse,” Laurence Holder’s “Zora Neale Hurston,” and Jonathan Reynolds’ “Stonewall Jackson’s House.” And this year, “Dreaming in Cuban,” a four-person production which appeared at the theater in late April and May as part of its Literature to Life Program.

**Performer Eileen Galindo**

Eileen Galindo, “Pilar” in “Dreaming in Cuban,” is a native New Yorker and fifth-generation Latina American “who proudly descends from Cuban, Puerto Rican, and Spanish heritage.” Director Handman recruited her to work on “Dreaming in Cuban” in July 1997. She has worked extensively in Ariano, in Miami as It Is in Heaven, Sabina and Lucrecia, at the Puerto Rican Traveling Theatre; and the self-penned One Woman Who Multicultural Disorder, at the Next Stage Company.

Her film credits include The Super with Joe Pesci, and the upcoming Row Your Boat with Jon Bon Jovi. Her first starring role is in Eduardo Machado’s Exiles in New York, her second, now in production, is in Double Parked.

She dedicates her performance in “Dreaming in Cuban” to “The González Montesinos, and Galindo Women—five generations of strength, grace and love.”

Michael John García

Performance pieces by this actor-playwright-director include world without end (Red Dive “Inhabited”), t.r.u.s.t. (Yuyorica Poet’s Cafe), running the re (Peculiar Works Project—Big Art) and mouth pièces (P.S. 322) He interacts with INTAR, HERE, Joe’s Pub Labyrinth Theatre Company, an Aaron Davis Hall.

Plays he has written include suits, directed by Sturgis Warner (Twilight Theatre Company), no and then (LEFT Theatre “Positive Women”), other intrusion and barn way (INTAR New Works Lab), jitters (LaMaMa ETC), and up for a between visits, Pun Baldi, and deeper (T American Living Room).

García has direct plays at Repertorio Español, Puerto Rican Travel Theatre, INTAR, Nada, Tea, and LaMaMa ETC.

Cristina García

Havana-born Cristina García wrote the novel, “Dreaming in Cuban,” which was nominated for a National Book Award. She wrote the essay that accompanied the photographs in The Car's
Cuba (Harry N. Abrams, 1995). She has worked as a national correspondent for Time magazine; her reviews and interviews have been published in The Washington Post and other major newspapers.

Garcia has received fellowships from the Council of Humanities at Princeton University, the Guggenheim Foundation, and the Cintas Foundation. She received a Whiting Writers Award in 1996.

Garcia holds a bachelor's degree from Barnard College and a master's in European and Latin American Studies from Johns Hopkins University. During her early childhood in Puerto Rico, she grew up in New York City, and in 1998 moved to Los Angeles, where she now lives with her 6-year-old daughter.

Wynn Handman

APTS Artistic Director is Wynn Handman, a co-founder back in 1963. An acting teacher for more than 45 years, Handman has trained many outstanding actors, including the late Paul Rui, Alex Baldwin, Michael Douglas, Richard Gere, Joel Grey, Frank Langella, John Leguizamo, Phyllis Newman, Burt Reynolds, Anna Devere Smith, Mira Sorvino, Christopher Walken, Denzel Washington, and Joanne Woodward.

Handman directed Dancing in Cuban and Other Works (originally titled Rhythm, Rum, Cafe con Leche and Nuestros Abuelos), and adapted the title monologue from the book by Cristina Garcia, a first novel, published by Alfred Knopf in 1992. Handman's many honors include an Al DECO Award for Excellence in Black Theater, the Lucienne Lorat Lifetime Achievement Award in 1995, presented by the League of Off-Broadway Theaters, Carnegie Mellon Commemorative Playwriting Award in 1990, and the Rosetta LeNoire Award in 1994 from Actors Equity in recognition of artistic achievements and contributions to the "universality of the human experience in American Theatre."

Felix de Jesús

"Dance facilitator" for Dreaming in Cuban, de Jesús is a native of Cuba. At age nine, he appeared in the movie Lambchop, later joining the National Folklorica Cuba. He also appeared in many in upscale New York and in Vermont, and presently offers classes at the Diamante Dance and Drum Center and Abuzal Dance Studio in Manhattan.

Bethina Sayegh

Also billed as "Dance Facilitator," Sayegh was born in Caracas, Venezuela, and raised in Lima, Peru. As soon as she finished high school, she moved to New York to start her career.

Luis Mojica

Mojica, music supervisor of Dreaming in Cuban, was born in Ponce, Puerto Rico. He started his music studies at age 12 at the Juan de la Cruz Campos School, later moving to the U.S. where he earned a BFA in Arranging and Composition at the City College of New York. He then worked with the East Harlem Music School and the NYC Board of Education as a band and orchestra director.

His compositions include: "Sentimiento," played by Charlie Palmieri; "Smoothly," performed by John Purcell's Quintet; and "Winter Time," performed by Speculum Musicum.

In 1980, Mojica continued his studies at Teacher's College, Columbia University, earning an MA and an MFA. Mojica is now completing his doctoral studies at Columbia, where he has created a multicultural curriculum for instrumental music instruction, and he is directing his own nonprofit corporation—The Multicultural Music Group.

Manuel Vega

Scenic designer for the production, Vega, a native New Yorker, is a visual artist who utilizes a wide range of media, including graphics, murals, illustration, printmaking, painting, theatrical design, and costume design. He is also a scholar of the popular cultures of the Americas—in particular, Brazil, Puerto Rico, and the United States. Currently, Vega is an Artist in Residence at the Guggenheim Museum, where he is an instructor for the "Learning Through Art" program. He also conducts visual arts workshops for several institutions throughout New York State. Vega's prior artist residencies were at El Museo del Barrio, Taller Boricua, and in Bahia, Brazil.
It is 7:30 p.m. as we enter the elevator of the American Stage Theater on 16th Street in Manhattan. The operator, a young woman with mocha skin and tight blonde curls, tells us, "Help yourself to the rum punch—compliments of Captain Morgan. And the café con leche, compliments of Goya Foods."

"There's nonalcoholic punch, too," she adds, before escorting us toward a replica of a Cuban café. The anteroom holds a leather bar, the walls a series of photographs depicting life in Havana and environs. Once inside the performance space, we are invited to sit at one of twenty or so small tables around a semi-circular stage. Background music has begun. Gentle cha-cha and mambo.

While getting the rum punch, my companion discovers there is food too—roast pork, black beans and rice, Cuban classics, at a modest $7 a plate. It is delectable, lightly perfumed with vinegar. This is not a typical New York theater district experience.

The walls of the low-ceilinged room hold perhaps six or eight ledges, between pilasters. Each ledge bears maximum memorabilia. Dried flowers. Ceramic dancers with flowered skirts, flourishing fans. Old LPs whose jackets have lost their shine. One reads "Poquito y Filomeno." There are timeworn photographs, too, in silvered frames. The arrangements look vaguely religious, like devotional stations, but no saints or crucifixes are in sight.

The réveillon shifts to a more lively beat. Without fail, an attractive couple in formal dress enters the room, dancing amidst the tables, whispering casually to one another, smiling. She wears a slim, pale lime chiffon empire dress with bead- ed, upturned hem, and thin-strapped silver shoes. He wears a white dinner jacket. They are featured performers Bethana Sayegh and Félix de Jesús, but for now, they are merely setting the mood.

At just about 8:00, there being no curtain in sight, actors Eileen Galindo and Michael John García step up onto the stage and perform "También," a fast and spirited bilingual piece about being bicultural—about their forebears' migration to the U.S. They sing of Guanatamara, they smoke of fresh liCigars of Calle Ocho. Of Key West, Of Del Monte. And of being in MEE-ab-MEE. One tells of grandparent who wound up in...did he say Nebraska? Oh, why didn't I spend more time studying my Spanish?

My linguistic shortcomings banish the urge to change scenes, and of course. For "Manchito Gozon," the willowy Sayegh, whose face could launch a thousand rafts, wears what appears to be a creamy avocado tube top with beige-hair straps, and matching half-slip skirt, golden heels, her hair hanging free. De Jesús is handsome, too, in gold crucifix and black leather pants. But in truth, it is the music and dancing that intoxicate. The couple's subtle gyrations, pulsations, and titillations are defamiliarizing. The mambo edges out the tango as my favorite danse du jour.

Dreaming in Cuban

When Eileen Galindo retakes the stage, she is Pilar, the Lou Reed-loving teenager of Cristina García's first novel, Dreaming in Cuban. Pilar is "trying on French style garters and push-up bras in the dressing room of Abraham & Strauss" when she hears the voice of her father. She looks out and sees him with his girlfriend, "huge and blond and puffy like a 1950s beauty queen gone to seed," a woman with "a cloud of bleached hair and high-muscled calves as if she's been walking in those heels since birth."

"That's it," she says. "I'm going back to Cuba." A Cuba she left at the age of two and hasn't seen since. Back to Cuba to see her beloved abuela, Celia, a devoted fan of El Lider, Fidel. And to escape from her mother, a Brooklyn bakery-owning capitalist who embraces all things American, as in USA, especially the sticky buns, and loathes the Cuban Revolution. Four feet eleven inches high, weighing in at 217 pounds, described by Pilar's boyfriend, fondly, she implies, as an impertinent despotic frustrating tyrant bitch godde... Galindo is utterly believable as Pilar, in whose voice the entire performance is delivered. And by the time the solo is completed, the audience has developed warm feelings for all three of García's women, and for Galindo.

Later, checking notes scribbled on the scene against the book itself, it seems the script was taken verbatim from García's novel. Looking further through the novel, I appreciate the skill of adapter Wynn Handman in shaping a brief but complete story from the larger one by García. It is a story with far more than wit, for the universal theme of intra-family alienation is deepened by a heightened consciousness of loss suffered by Cubans on both sides of the Bay of Pigs. This is what I found myself thinking about during intermission, amid the photographs of Havana in the anteroom.

Cha-Cha-Cha

God bless Félix de Jesús and Bethana Sayegh. Back on stage, they restored with just one dance the reputation of the cha-cha-cha, which had suffered irreparable harm at the hands and feet of dancehemic noireamericans in the suburbs of the '60s. Entrenched images of robotic clunking to a cha-cha-chified "Tea for Two" faded with their every nuance.

The drama of the pause—the hesitation—along with many other elements of a well-executed Latin dance, had been lost in translation. What a pleasure to welcome it all back.

Aguadiente

Michael John García is all smiles as he launches his performance piece, Aguadiente, and the audience laughter comes easily and often. But the shotglass in his hand, and the sight of a dozen more filled shotglasses on the bar that is the only furniture in this act, are early warnings that you are in emotionally shark-infested waters.

García, who wrote the piece, portrays a grown man recalling his abuelo, one a dark-complexioned Cubano exiled by wife and daughter but somehow granted one catalytic week with a young grandson. And if ever a week there was that week was it. Seven days of sovin the seeds of machismo. The shoes, the yours, the dancing, the wooling an postseduction hatred of women. And that aggrandizement of liquor, almost liquor, as though inebriation were the divine right of reyes.

This abuelo had six wives—one of them first two Cuban, the implication being, thought, that subsequent Cubanas we too wise to buy his merchandise. But the abuelo was a bilingual performance, and nasal pronunciation would have done me no better to his goal. But the laughter dwindled as García descended deeper in this tale of booze and deceit, his performance gaining such intensity it was nearly too hot to handle. This Don Juan truly was in hell. The performance was blistering as the piece hurtled to a close.

Nuestros Abuelos

The American Place Theater has a tradition, says the publicist, "Offerings—where the audience is led to reflect on its own heritage and given a chance to share personal responses."

But what would Eileen Galindo and Michael John García retool the stage to elicit these responses, we, the audience were too still shellshocked to enter a warm and fuzzy world. It would take powerful medic to get us moving.

That medicine arrived in the form of Jesús and Sayegh, who joined Galindo and García in a final round of dance with the audience—or however many were there—until ultimately became the ground for a multiculural, multigeneratio conga line that had us all smiling as we walked out into the night.
Amazing Argelia—Scholar, Dancer, Activist

UCLA Honors Exceptional Student

By Stuart Wolpert

Argelia Andrade-Glez is founder, choreographer, and director of Nuestras Raíces Ballet Folklórico, a children’s dance group in Gardena, where she teaches dance to children between ages three and 20. She herself continues to dance as a member of LiRitmo (Flamenco) Dance Company. And she was coordinator of Grupo Folklorico de UCLA, a group dedicated to the traditional dances of Mexico.

Argelia also tutors adult immigrants at her church as they learn English as a second language.

Despite her busy schedule, the grade point average of this UCLA student is 39.

“I like to be busy,” she says. Argelia won six scholarships for academic excellence and outstanding community service, and in late February, she was honored as one of UCLA’s most exceptional students at the university’s annual College of Letters and Science Awards Dinner—the College’s “mini Academy Awards” ceremony.

At the Regent Beverly Wilshire Hotel the night of February 23, she was one of two students to win this year’s Charles E. and Sue K. Young Undergraduate Student Award.

Argelia Andrade-Glez vividly recalls the night she cried herself to sleep. She was ten years old when her family moved to Gardena, Calif., from a small town in Tepatitlán, Mexico, and she spoke not a word of English.

When Argelia’s sixth grade teacher walked into the classroom, the 10-year-old stood, as a sign of respect, as all students in Tepatitlán did. Here, the other children laughed at her.

“Nobody was there to explain the customs to you,” she remembers.

Today, not only does Argelia speak flawless English, but Portuguese as well, and she is learning German.
Driven by personal experience and a continuing fascination with language, Angelia is majoring in Spanish and linguistics. As part of her undergraduate work, she is conducting research for an honors thesis on how teenagers and adults learn a second language.

"Language is a window to the mind," she says. "Languages tell you amazing things about people and their culture. Learning a new language opens another world. There is no question that you can understand people better when you speak their language. Living in L.A. makes me want to learn different languages. I want to help other people to become bilingual.

"I would not say that I know a language unless I can read, write, dream, and function in that language."

Shirley Mora, UCLA professor of Spanish, praises Angelia, calling her "one of the most extraordinary students I have known in my 35 years" at UCLA.

Recalling her difficult adjustment to a new country, language, and culture, Angelia says, "I believed at times that I was a child of a lesser God, and that the task of relearning the previously learned was impossible, but I knew I had to do it. I wasn't going to drop out of school in sixth grade."

She started by devoting herself to math because "numbers were the one thing I could understand." By the end of her first year in this country, she felt comfortable speaking English. By junior high school and high school, she was earning A's in all of her classes.

Angelia gives most of the credit to her academic success to the love and support she received from her family and to her belief in God. Others who know her well emphasize her work ethic, her determination, and her positive attitude.

"My family has always been tremendously supportive, and God has seen me through the most difficult times," she said.

"One key is not to dwell on all the walls you're going to hit. Instead of wasting energy feeling sorry for yourself, just get on with it. You can feel trapped, or you can determine what you want to do and pursue your dreams."

"There were many nights when I cried, but even then, I knew it was better to do something than to whine all day.

"I knew I wanted to go to college and that my parents couldn't afford to send me, and I knew I had to work hard to get there. But I also enjoy studying; it's fun to get A's."

Angelia always preferred reading and dancing to watching television or getting involved in the gangs that she saw others join.

"Gangs are an identity issue, and with the help of my family, I learned to sense my strengths and admit my weaknesses," she said. "Other people weren't studying so much, but it's OK not to be like everyone else. I was not a child of a lesser God; I just had a distinct past that made my determination stronger."

For high school, Angelia went to the California Academy of Mathematics and Science, where she won awards for outstanding achievement and choreography, and founded a club to teach Latino students about culture.

Choosing a university was easy for Angelia.

"I always knew I would come to UCLA," she says. "I knew that whatever I wanted to study at UCLA—math, psychology, linguistics, sociology—I would be going from No. 1 to No. 1."

As a high school student, Angelia visited UCLA one day to receive one of her several scholarships. When she came home, a UCLA admissions offer was waiting in the mail to greet her. She felt proud to have that dream come true, but other dreams still beckoned.

Angelia will graduate from UCLA next year but plans to come right back for her graduate work.

"UCLA has been very good to me—one of the most positive experiences of my life," she says. "I am considering various universities, but I think I would prefer to stay here."

She plans to earn her Ph.D. and then be a university professor during the day and a dancer at night.

Meanwhile, she has learned to love her adopted city.

"Los Angeles is where South Americans, Europeans, and Central Americans all come together and make a new American culture," she said. "In the small town where I grew up, everyone looks like me and everyone thinks the same. Here you have to know what you believe and what your values are, all the while accepting people who are different."
Latina Takes Paris Prize

Houston CC Student Wins Design Contest

When Myrna Vallejo went to France, she traveled in style—literally.

Vallejo, a student in the Fashion Design Program at Houston Community College-Central, earned the top U.S. prize at the 15th annual International Young Fashion Designers Contest, conducted in Paris last December.

In accordance with the contest theme of “travel,” Vallejo designed and tailored a woman’s outfit made of common travel materials—a buster created from luggage straps, a skirt of laminated travel brochures, and a hat resembling a handbag.

The prestigious contest featured competitors from 15 different countries, displayed their versions of travel vogue—from imaginative space suits to a suitcase that opens into a coat. Only 10 young designers represent each competing country, and Vallejo earned the top award of the U.S. team, which included students from Drexel University, Miami Fine Arts College, and other institutions.

Vallejo was striving for a design that reflects the frazzled indecision that often comes with trip-planning.

“I was thinking of how we travel and we often don’t know what to wear,” she said. “We have so many choices.”

So in October, she started visiting travel agencies and leather shops to collect the building blocks of her inspiration—travel brochures and baggage parts. The library staff at HCC-Central helped her laminate the literature, and leather workers at the local Tegano Boots provided guidance in sewing leather.

“I kind of used the concept of luggage—handles and straps and all sorts of things,” she said.

Kay King, head of the Fashion Design Program at HCC-Central, said 1997 was the fifth year Houston Community College-Central had been selected to participate in the Paris competition, but it was the first time an HCC student had ever won.

“Myrna is truly one of the rising stars in our department,” King said. “She’s going to make it in the professional world of fashion design.”

King said fashion design is an intricate process. Vallejo designed a pattern for the garment, from which she cut out the pieces. And before tailoring the multi-layered garment, she assigned an order and procedure for the assembly.

“She is very adept at solving the design and construction challenges,” King said. “She knows how to logically think through a concept and make a real garment that real people can wear. That’s what makes her an excellent young designer.”

Ultimately, Vallejo created a garment whose character came about—reminiscent of designs by Gianni Versace and Jean Paul Gaultier.

“She created a lot of animation in that garment,” King said. “Like the way the brochures move as the skirt flows.”

In the end, Vallejo’s work turned the heads of some of the world’s top fashion designers. As the U.S. winner, Vallejo won $3,000 in francs, which she plans to use toward further education. She intends to continue her fashion training at Houston Community College.

“I want to get as many classes as I can and transfer to F.I.T. [the Fashion Institute of Technology] in New York,” said Vallejo, a business-turned-fashion major. “My final goal is to have my own business and sell clothes.”

END
Hillary Clinton Launches Lecture Series at Columbia University

First Lady Hillary Rodham Clinton delivered the inaugural speech of The Jill and Ken Iscol Lecture Series, established recently at Teachers College, Columbia University (N.Y.). Clinton, a leading advocate for children and their families, launched the annual speaker series with the speech “Re-Imagining Education: A Matter of Justice and Possibility.”

Throughout her career in public service, Clinton has been a champion of improved health care for children and their families, early childhood development and learning, and equal educational opportunities. She has worked tirelessly to raise public awareness for the need for community involvement, appropriate interventions, and important changes in the way the nation educates and treats its children.

Lynn University Honors Padron

Dr. Eduardo J. Padron, Miami-Dade Community College president, was awarded an honorary Doctor of Humane Letters from Lynn University (Fla.) during the annual Spring Honors Convocation.

Dr. Donald E. Ross (picted left), Lynn University president, presented the degree to Padron in recognition of his outstanding academic achievements.

Padron holds a doctorate from the University of Florida and is the chief administrative and academic officer of the largest single-district, multi-campus community college in the nation. He has been recognized by many of America’s foremost leaders, as evidenced by his appointment to posts of national prominence by Presidents Bill Clinton, George Bush, and Jimmy Carter.

Latino Affairs Pride Awards Honors Ceara

Aida Ceara was recently honored at the Governor’s Advisory Commission on Latino Affairs Pride Awards in Pennsylvania.

A vital community leader in Lancaster since her arrival in 1984, Ceara, an assistant professor and director of the Act 101/PACE Program at Millersville University, saw an immediate need to acknowledge and highlight the Latino presence within the university and Lancaster community. She helped form and is the faculty advisor of the Society on Latino Affairs, the first Latino student organization on campus; she chairs the Hispanic Liaison Committee, and she became president of the Board of Directors of the Spanish American Civic Association. Ceara, with other community leaders, helped form a charter school that provides educational alternatives to community students who are “at promise” of succeeding in an innovative, social, and educational environment.

Rodriguez-Andrew Named California Social Worker of the Year

Sylvia Rodriguez-Andrew, dean of the College of Social Work at San Jose State University, was named Social Worker of the Year by the California Chapter of the National Society of Social Workers. She was honored for her leadership in education and her service to the community.

We applaud her leadership in fostering a college which has embraced the mission of social work by tending the needs of the community, and educating the next generation of social workers, said Cheryl Blankenship of the California Chapter of the National Society of Social Workers.

Rodriguez-Andrew has a doctorate from the University of Texas-Austin.

Business Awards Gala Honors Morales

City University of New York’s City College vice president of student affairs, Thelma Morales, was honored at the National Puerto Rican Day Parade’s 1999 Dr. Ramon Emeterio Betances Business Awards Gala in April, for his contributions to New York’s Puerto Rican community.

Morales has chaired the County Human Relations Commission, and sits on boards of the American Associa University Administrators and the New York Healthcare Systems of New York, and is advisory board of the Highland Residential Center Community’s Youth Division.

“By recognizing Dr. Morales’ accomplishments we wish to support his efforts in a positive role model for our youth,” Inspiring the development of their self-said Ramon S. Velez, president and CEO National Puerto Rican Day Parade Inc.

Cantu Named Fresno City College Dean of Instruction

Anthony Cantu, Fresno City College Dean of Instruction, has been named dean of humanities at the college faculty as the new dean of instruction, beginning July 1.

“I think Mr. Cantu will do an outstanding job as he’s done in the past with our district,” said Fresno City College President Dr. Daniel Laros. “He has some big shoes to fill, but I believe he’s up for the task.”

Cantu holds bachelor’s degree in California State University, 1975, and a masters from CSU-Fresno. He is currently pursuing a doctorate in education.
leadership from CSU-Fresno University of California-Davis.

**Persistence Pays off for Morales**

Allan Hancock College (Calif.) student Ms. Maria Morales says: "If you really believe in what you are trying to do in life, you will succeed."

Morales, 22, has been accepted to California Polytechnic State University-San Luis Obispo as a social science major. Born in Zacatecas, Mexico, and originally speaking only Spanish, she started out as a migrant education student, spending her preschool years traveling across the United States and back again with her family as her parents worked as field laborers.

Now, Morales has been working in the Allan Hancock College counseling office and has volunteered at a church, running youth programs and helping organize their annual fiesta.

In March, she won a "Women of Excellence" award from the Santa Maria Women's Network.

**Santos to Represent American Bar Association at U.N.**

José (Tony) Santos, a partner in the Miami, Fla., law firm office of Broad and Cassel, was appointed to represent the American Bar Association (ABA) at the United Nations Economic and Social Council in New York.

Santos is part of a select group of six ABA leaders headed by former U.S. Attorney General Benjamin Civiletti that represented the ABA at the United Nations in New York and Geneva. The ABA has Consultative Status at the United Nations and frequently provides input to the council on a variety of issues relating to the world economic, social, and legal order.

Santos received both his bachelor's degree and juris doctor at the University of Miami.

**Caldeiro at Farmingdale's 80th Commencement**

Fernando (Frank) Caldeiro, a NASA astronaut and 1978 graduate of the State University of New York (SUNY)-Farmingdale, was a speaker at the college's 80th commencement.

Born in Buenos Aires, Caldeiro was hired by NASA in 1991 as a cryogenics propulsion systems expert for the Safety and Mission Assurance Office. He completed his training and evaluation for NASA in 1998 and is qualified for flight assignment as a mission specialist. Currently, he is assigned technical duties as a space station environmental controls and life support system expert at the Astronaut Office Station.

Caldeiro has an associate degree from SUNY-Farmingdale, a bachelor's from the University of Arizona, and a master's from the University of Central Florida.

**Treviño Joins Texas-Arlington Mexican-American Center**

Roberto Treviño, an expert in Mexican-American history and the religious culture and practices of Mexican Americans, is now a research associate for the University of Texas-Arlington (UTA) Center for Mexican-American Studies as well as an assistant professor of history.

UTA President Dr. Robert Witt cited Treviño's knowledge of Chicano history as a valuable asset to the school.

Treviño has taught Chicano history, race and ethnicity in American history, and religion in American history. He has a bachelor's degree from Houston Baptist University, a master's from the University of Houston, and a doctorate from Stanford University.

**Gonzalez Named Archbishop of San Juan**

Siena College (N.Y.) graduate Roberto O. Gonzalez, O.F.M., recently became the new Archbishop of San Juan. Puerto Rico: he was appointed by Pope John Paul II. Gonzalez succeeds Cardinal Luis Aponte Martinez, who had served San Juan since 1964.

At one time, Gonzalez was the youngest U.S. Catholic bishop. He has served the national church as chairman of the U.S. bishops' Committee on Hispanic Affairs, he currently chairs the bishops' Committee on the Church in Latin America, and he also serves as a consultant to the Committee on Liturgy, and he is a member of the Committee on Pro-Life Activities.

**Aguirre Lectures at Southern Methodist**

Peruvian Constitutional Court Justice Dr. Manuel Aguirre recently spoke at the Southern Methodist University Law Institute of the Americas 1999 Distinguished Lecture in Texas.

Aguirre discussed the role of the constitutional courts in Latin America. He spoke of the impact a constitution has on social, political, and economic development in a country; how a constitution works; why politicians respect the constitution; and where constitutional judges derive their power.

This past year, Peru's Congress has been sharply criticized for its decision to oust members of the constitutional court who ruled that President Alberto K. Fujimori could not seek a third consecutive term.

**Hernandez-Walker Assumes Post at Louisiana State-Baton Rouge**

Bobbie N. Hernandez-Walker, former vice president for student affairs at the University of Texas-San Antonio (UTSA), has become vice chancellor for student life and academic services at Louisiana State University-Baton Rouge, considered Louisiana's flagship institution of higher learning.

Walker has been a catalyst for progress.
across the board at this university, said UTSA President Samuel A. Kirkpatrick. "She has worked diligently on programs both to facilitate delivery of services to students and to enhance the university experience as a whole."

**Clinton and Tinajero Speak at Desegregation Conference**

U.S. Congresswoman Carol Moseley-Braun, University of Texas at El Paso Associate Dean Jo Watson Tinajero, and other education leaders who appeared at the National Committee for School Desegregation’s 20th Annual Conference in Washington, D.C. President Bill Clinton topped the list of speakers.

Tinajero, who is the president of the National Association for Bilingual Education, participated in panel discussions on improving Americas schools and on bilingual education.

Other speakers included Lois Harrison Jones, president-elect of the National Association for Bilingual Education; Dr. Howard Koller, the Committee on Education Reform; and Lois Jean White, national PTA president.

**Barraza’s Artwork at Texas Capitol**

Works of artist Santa Onofre Barraza, chair of Texas A&M University-Kingsville’s art department, are featured in a public art exhibit that opened in May in recognition of César de Mayo, the anniversary of the defeat of the invading French at Puebla, Mexico, by Mexican soldiers and Puebla residents. The exhibit will be on view in the office of Laura Bush, first lady of Texas, in the state Capitol until July 5. The site of San Antonio de Austin is also featured.

Barraza is known for her colorful retablo-style paintings on metal. She draws inspiration from her mestiza heritage—a blending of Native American and European cultures—and often includes subject matter taken from Vez and Mayan legends.

**Hispanic Magazine Donates Archives to Southwest Texas State**

Hispanic magazine has donated its archives to the Southwestern Writers Collection at Southwest Texas State University.

The materials, consisting of editorial files from 1994 through 1998, including manuscripts, correspondence, memos, research, press kits, and notes, were donated to the collection for preservation and research.

"The addition of the Hispanic archives represents a significant step forward for the Southwestern Writers Collection," said curator Connie Todd. "We are on our way to becoming a major resource for Mexican-American studies."

**Tomás Rivera Conference at California-Riverside**

Yarel Arizmendi, an actress from the film, *Like Water for Chocolate*, was a keynote speaker at the 12th annual Tomás Rivera Conference at the University of California-Riverside.

"Culturas y Comidas. Gifts of the Americas" was the theme of the conference, which explored the magical and culture-shaping qualities of food—a theme that also ran through the 1993 film based on a novel by Laura Esquivel. Arizmendi played Rosaura, one of three daughters in a family where emotions displayed in the kitchen seem to invade food served to houseguests, causing magical chaos during weddings and other family events.

Chef John Rivera, co-author of *Modern Southwest Cuisine* and co-author of *Latinas*, was also a keynote speaker.

**Nazareth College inaugurates Miller, Celebrates Anniversary**

Nazareth College, in April, celebrated the inauguration of President Robert A. Miller and the 75th anniversary of its founding.

During his inaugural address, Miller shared his three-pronged academic vision for the college, which builds upon Nazareth's strong traditions while anticipating society's changing expectations for higher education. He focused on exceptional teaching, off-campus learning, and inclusive community.

During a festive 75th anniversary celebration, guests travelled through the eras of Nazareth history with celebrations recreating a USO concert, a rock-n-roll/disco party, 1960s coffeehouse with folk singer, and a video dance party. A short commemorative film was also shown.

**38th Honors Convocation at Cal State-L.A.**

California State University-Los Angeles University Honors Convocation recognizes more than 2000 students whose academic record places them in the upper fifth percentile of their peers. Dean's List honorees, recipients of scholarships, grants, and alumni certificates of honor, and general education honors program participants were honored at the program.

Cal State-L.A. alumnus John Huerta, general counsel for the Smithsonian Institution in Washington, D.C., was the keynote speaker at the convocation. Huerta directs an office of 11 attorneys. He has lectured extensively on civil and human rights to professional associations, civil rights organizations, and university groups throughout the United States, Europe, and Latin America.

**Bomba Dance Fever at Long Island Brooklyn**

A blow-the-lid-off bomba dance party, *bomba*, in which dancers and drummers take to the stage in Puerto Rico's newest dance craze based on a centuries-old art form, took place at Long Island University Brooklyn (NY).

I would like bomba to be appreciated at its richness in the same way that r
lions of people appreciate the other great Afro-Latin dances such as salsa, merengue, samba, and tango," said Halbert Barton (pictured here), anthropology professor, bomba performer, and the driving force behind the event. El Bombazo de Puerto Rico, a team of 12 bomba educators from the community arts organization Centro de Investigaciones Culturales Raíces Eternas, provided expert instruction on the lively and infectious art of bomba dancing.

Santa Monica College Wins Diversity Achievement Award

Santa Monica College (SMC) has won the prestigious California Community Colleges Diversity Achievement Award for 1999.

The award is given to the college district that has demonstrated outstanding success in affirmative action and commitment to diversity, equity, and equal employment opportunities. Chancellor's office officials say they do not look at districts' figures of employees from underrepresented populations but at their overall effort on diversity.

“This award really reflects on all the state's community colleges, our open-door campuses that mirror the rich diversity of California,” said Robert Sammis, SMC vice president of human resources.

City University of New York Shares Dominican Experience

"Contemporary Visions of the Dominican Experience," a discussion, reading, and book-signing featuring recently published works on Dominican life, was held at City University of New York's (CUNY) City College.

Silvio Torres-Saillant, of City College, greeted the guests, and Ydains Rodriguez, of the Dominican Youth Union and Dominicans 2000, offered welcoming remarks.

The guest speakers included Jacqueline Limoner Polanco, a political scientist at the John Jay College of Criminal Justice, fiction writer Ynocencia Villar, and journalist Michelle Wacker.

The event was sponsored by Dominicans 2000, Building Our National Agenda, and the Institute of Dominican Studies Institute.

Texas-Arlington Promotes Bobadilla

University of Texas-Arlington (UTA) Provost George Wright has announced the promotion of UTA director of admissions Michele Bobadilla to assistant vice president for outreach initiatives with responsibilities for enhancing the university's partnerships with the Dallas County Community College District, the Dallas Independent School District, and with other school districts. Bobadilla will also work closely with members of the business community and civic organizations in Dallas, establishing partnerships and raising the profile of the university.

Bobadilla will work closely with Manuel Garcia y Griego, the director of UTAs Center for Mexican-American Studies, and will introduce him to key leaders in Dallas and the Metroplex.

Latino Symposium at Susquehanna

"Our Heritage: Our Future/Nuestra Herencia: Nuestro Futuro" was the theme of the 4th annual Latino Symposium at Susquehanna University (Penn.) in April. The theme was inspired by the oral histories collected by six regional Latino high school students and Susquehanna University students of Hispanic heritage during the Latino Oral History Project last fall.

Panel presentation topics included Susquehanna’s service-learning projects, gender roles in the Hispanic community, ethnicity in Pennsylvania, and a multi-media presentation of the Latino Oral History Project Susquehanna University student Latino dance troupe Fuego Latino performed at the symposium.

García Lorca Exhibition at St. Mary's

The exhibition "Federico García Lorca: In Word and Image" was recently on display at St. Mary's College (Ind.). The exhibition was sponsored by the Spanish Department, the Saint Mary's College department of modern languages, and the Center for Academic Innovation. Celebrated Lorca's literary and visual artistry, Lorca was a prolific Spanish poet, artist, and intellectual who was executed during the Spanish Civil War.

An opening reception included poetry readings by Saint Mary's Professors Gerald Conger and Max Wesler, as well as a performance by Juliette Singler, soprano and visiting assistant professor of the department of music, and Saint Mary's Spanish major Andrea Sondag. Dr. Carmen García de la Rosilla organized both the exhibit and the reception.

Loayla Marymount Event Explores Faith and Culture

Loayla Marymount University (Calif.) in April, presented "A View from the Inside: The Intersection of Faith and Culture in the Work of a Latina Writer and a Latino Musician.

The event featured Graciela Limón (pictured here), chair of Chicano studies, reading from her new novel, Día de la Luna/Day of the Moon, and musical guest Francisco Herrera. Also, a panel discussion explored the thematic interplay and interconnection of social justice, female gender roles, mestizaje, and theology in the works of both guests.

Mexican Poet Inspires University of San Francisco Exhibit

A mixed-media art installation inspired by the life and writings of 20th-century Mexican poet, intellectual, and nun Sor Juana Inés de la Cruz (1648-1695) is currently on exhibition at the University of San Francisco (Calif.).

Pictured here: debt to rights are Laura Elena Hernández, a Mexico City-based artist, Carló-
Tello, The Consul General of Mexico, Mondo Jud Hart, exhibit producer and San Francisco-based artist; the Rev. Thomas Lucas, director of fine and performing arts at USF and exhibit host; Noemi Atanoros, a journalist with the Excelsior newspaper in Mexico; and Lilia Aguilera, executive director of the Mexican Cultural Center in San Francisco.

The exhibition, at the USF Gleeson Library-Thuenger Gallery, ends July 25.

Talking About People: A Guide to Fair and Accurate Language
by Rosalie Maggio

The organization of this book is fairly simple. The writing guidelines give you the rationale for fair and accurate people language, some general guidelines and practical help and suggestions about handling special situations. There are sections on who controls the language; on ridicule, and on everybody being "so sensitive." These days, the Dictionary of Terms consists of some 8,000 words and phrases that are or might be perceived as problematic.

University of San Diego

Director of Undergraduate Admissions

The University of San Diego is an independent, Catholic university committed to a value-centered, liberal arts education. Overlooking San Diego's Mission Bay, USD enrolls approximately 6,600 undergraduate and graduate students. The University of San Diego seeks gender, cultural and ethnic diversity in its populations. For more information about USD, visit our website at www.acusd.edu.

The Director of Undergraduate Admissions reports to the Director of Enrollment Management (EM) and assumes a successful admissions and outreach operation. USD's freshmen applications have increased an average of 10% per year the last three years and the mean grade point average of entering freshmen has increased from 3.3 to 3.7. The statistics for fall show an increase of over 21% with more than 6,300 freshmen applications for a class of 1,025. This position is an integral part of the undergraduate enrollment team working with the Provost, the Director of Financial Aid Services and the Director of EM. The Director of Undergraduate Admissions supervises a staff of 21, determines resource allocations and manages an increasingly selective admissions process.

A bachelor's degree is required. An advanced degree is preferred. Candidates must have a working knowledge of data systems. marketing, selective admissions and have an ability to effectively select, train, and manage a diverse staff. The ability to make decisions based on subtle differences in academic personal qualities is essential. Must have a sense of humor, creativity, excellent communication skills, encourage staff development and operate as a team member working in an environment with the University’s mission statement. Familiarity with College Board services such as PSAT and ASAP is important.

Application review will begin immediately and continue until position is filled. Salary is commensurate with qualifications, experience, and education. Excellent benefits package.

Please submit a cover letter, resume, salary history, three letters of recommendation and college transcripts to: Human Resources, Dr. Warren Muller, University of San Diego, 5998 Alcala Park, San Diego, CA 92110-2492.

Central Michigan University

EXECUTIVE DIRECTOR
MARKETING RESEARCH AND PLANNING
COLLEGE OF EXTENDED LEARNING

Through its College of Extended Learning (CEL), Central Michigan University is one of the largest providers of off-campus degree programs in the United States. The college offers both undergraduate and graduate programs and operates in more than 50 locations throughout the United States, Canada, and Latin America. CEL seeks a proven researcher to initiate and direct its marketing research and strategic marketing planning process on the Mt. Pleasant campus.

General R. responsibilities: Responsible for market analysis, competitor profile analysis, needs assessment, and the design of quantitative and qualitative market studies. Leads the development of a CEL-wide marketing strategy that identifies key programs and locations for continued growth. Makes recommendations for increasing market share based on short and long-term forecasts. Manages, monitors, and allocates marketing budgets totaling $1.3 million. Supervises and directs activity of CEL marketing and publications staff.

Qualifications: Minimum of five years in an upper management position showing a complex, multifaceted environment is important. Review of applications for the above position begins immediately and will continue until the position is filled. A position of action is subject to confirmation of educational and administrative philosophies and the names, addresses, and phone numbers of three to five references to: Executive Director/Marketing Research and Planning Search, Office of the Dean, College of Extended Learning, Central Michigan University, Mt. Pleasant, MI 48859 or fax to (517) 774-3322. Starting salary up to $81,500 commensurate with qualifications.
Central Michigan University is an AA/EQ institution. It strongly and actively committed to increasing diversity within the community. See www.cmich.edu accessibility.
Book Review

by Sylvia R. Lazos Vargas

Like Richard Rodriguez's Hunger of Memory and Manolo Urreos' Nobody's Son, this autobiographical tale of a "Mexican" Latino, son of a Mexican American mother and an Anglo father, is effective because Johnson's intimate narrative helps us focus on our own journeys of racial identity. The honesty and courage of this book make it memorable. The implacable powers of observation that Johnson turns on others, he also turns on himself.

His could be the prototypical "successful immigrant" story—Harvard law degree, tenured professorship, good marriage, nice house in the White suburbs. His mother, divorced when he was young, raised her boys with a gamely mix of child support and welfare. Johnson works throughout high school, Berkeley, and Harvard Law School—as dishwasher, cook, parking attendant. He spends each dollar carefully, relating poignantly how the careless forswearing of a rich schoolmate to repay $5 affects his weekly food budget. Johnson shows the mythic qualities that transform poor immigrant sons—discipline, ambition, and grit.

But his tale differs in one important way. His central theme is “finding and becoming comfortable with racial identity,” which he calls with typical understatement, “probably one of the most difficult things a member of a racial minority will ever face.”

Johnson's mixed racial heritage presents unique choices: to remain silent and let friends, employers, even strangers assume that he is White—one of them—or to come "out" as Mexican American and thereby subject to stereotypes and assumptions, as well as to intrusive queries that prove his racial legitimacy. In high school, seeking inclusion, he stands silent as his "friends" routinely put down "natives" and viciously attack Blacks. As a young lawyer, he allows the firms partners to assume that he is White, until he is well on his way to making partner. As a boy and young man, he floats along and lets others choose for him.

But as he matures, Johnson becomes more conscious. Applying to university, law schools, and law teaching, Johnson checks the box as Mexican American. Does he do this to gain an "affirmative action" advantage at the university level, he was ignorant of the gamesmanship of college applications and the importance of attending a prestigious university. As a mature man, applying for a law professorship, he is no longer blind or ignorant. He hesitates, considering the implications of becoming a tenure. His wife asks, "Why not mark the box?" and "Are you ashamed to be a Mexican American?" Johnson checks the box. He is not ashamed, but rather "decides" to be Latino.

Johnson chooses "metaphorical borderlands: a concept given modern usage by Gloria Anzaldúa, to illustrate his journey of self-recognition and racial identity. He lives in borders between White and Mexican American, poor and middle class, scholarship boy and California beach boy. He consciously traces the borders of his multiple identities. His Anglo father encourages him to be proud of his Mexican heritage, and instills in him a sense of social justice. At Berkeley, he blossoms amid Chicano professors and learns more about the Mexican American experience. As a young lawyer, he discovers the most satisfaction in his pro bono representation of Central American refugees seeking asylum. Above all, he views his family, though troubled, his culture, and Catholicism as undeniable parts of himself.

Johnson's work deviates from the proverbial successful immigrant tale. It challenges the American myth and mandate that to "make it" as an American, minorities must assimilate and abandon their Mexican mothers or fathers. He presents a valuable counterexample to the assimilationist views of Richard Rodriguez and Linda Chavez. For Rodriguez, "assimilation happens"—an irresistible transformation occurs in the journey from uneducated, poor, and devout Catholic to scholarship boy, middle class, and reluctant Catholic. For Chavez, assimilation is a utilitarian and American cultural norm challenged by opportunistic minority leaders only to capitalize on political factionalism.

Johnson argues that assimilation is a coercive mandate. Deploying critical race theory and LatCrit insights, Johnson argues that it is not possible for minorities to assimilate because of the dominance that society constructs around notions of race, culture, and class. In a passage illustrating his deep belief that assimilation distorts the inner self of the culturally and racially different, he proposes that assimilationist social pressures aggravate his mother's mental illness. He quotes research describing schizophrenia as "a special strategy that a person inverts in order to live in an unlivable situation.”

Johnson's rare combination of personal insight and academic rigor makes this a good teaching tool in university-level course such as sociology, American cultural studies, and race studies. The final chapters document contemporary academic arguments and provide an excellent bibliography. The book also could be used in secondary school. The narrative style of autobiographical essay, engaging and immediate, is an ideal vehicle for presenting contemporary arguments on race and multiculturalism.

Johnson's book shows that the personal can be good scholarship. It can also be good teaching material, and worthwhile, albeit sometimes painful, pleasurable reading.

Sylvia R. Lazos Vargas is an associate professor at the Missouri Columbia School of Law. Her articles, which address contentious, polarizing issues of discrimination, have appeared in top law reviews. Born in Venezuela, Professor Vargas considers herself a "transHispanic" having practiced business law in Puerto Rico, and being part of a large extended family with roots in San Antonio's Mexican American community.
BOWLING GREEN STATE UNIVERSITY

...the premier Learning Community in Ohio
and one of the best in the nation

seeks nominations and applications for the position of

PROVOST AND VICE PRESIDENT FOR ACADEMIC AFFAIRS

Bowling Green State University invites applications and nominations for the position of Provost and Vice President for Academic Affairs. As a state-assigned Doctoral 1 Institution with a strong enrollment profile, BGSU is located in Bowling Green, Ohio (population 25,000), 27 miles south of Toledo, 120 miles south of Cleveland, and 150 miles from Columbus, the state capital. Located on 175 acres of the Ohio turnpike, the University includes: a Graduate College; College of Arts and Sciences; College of Business Administration; College of Education and Human Development; College of Health and Human Services; College of Musical Arts; College of Technology and Finlands College, a two-year regional campus located near Sandusky, Ohio. The University's 165 undergraduate degree programs, 5 master's programs in 6 fields, 3 specialist programs and 14 doctoral programs with more than 60 areas of specialization enroll over more than 18,500 students, including 3,700 graduate students and 1,229 students at Finlands College.

MINIMUM REQUIREMENTS: In identifying qualified candidates, the University seeks a leader with the following proven qualifications: an earned doctorate or equivalent terminal degree with an academic portfolio suitable for appointment as a tenured full professor; and an established record of success in a senior academic administrative position; and an appointment for diverse populations. The successful candidate must have an administrative style that is open and collegial, and a proven willingness and capacity to work in a collaborative manner with all of the University's internal and external constituents.

ADDITIONAL QUALIFICATIONS: Bowling Green State University seeks to recruit a Provost and Vice President for Academic Affairs who possesses the ability to think strategically, focusing on the growth and development of the institution and its academic programs. The successful candidate will work collaboratively with others in adapting to the many changes facing higher education today, and is an individual of strong intellectual purpose, with the full responsibility of integrating the University's three missions: teaching, research, and service. The Provost and Vice President for Academic Affairs would be well served by having a strong background in current/future trends in educational research, including: information technology/network administration, and network support infrastructure, and the ability to articulate issues related to computing and instructional technologies to a variety of audiences. Possessing a strong commitment to the personal and professional growth of students, faculty, staff and administration, the successful candidate is an individual whose research values encompass integrity, intellectual curiosity, the promotion of learning, and the discovery of new ideas. Ultimately, the successful candidate is an individual with the vision, energy and expertise to lead the academic programs to yet higher levels of national prominence, building upon the traditions of excellence at BGSU and mirroring the vision of the University to become the premier Learning Community in Ohio and one of the best in the nation.

The Provost and Vice President for Academic Affairs is a member of the University Senate and reports directly to the President. Reporting to the Provost and Vice President for Academic Affairs are the Dean of the Graduate College, the Dean of Libraries and Learning Resources, the Dean of Continuing Education, International, and Summer Programs and three Vice Provosts, including the Chief Information Officer.

APPLICATION PROCEDURES: BGSU seeks to fill this position as soon as possible. Review of applications will begin immediately. Interested individuals should send: a letter of interest which addresses the above stated requirements and qualifications; a current resume and the names, titles, addresses and telephone numbers of five references who can access the candidates qualifications for this position. Nominations and applications should be addressed and sent to: Provost/VPA Search Committee, Bowling Green State University, Bowling Green, 43403 (419) 372-4446 (Fax) (419) 372-2213 (Phone)

Bowling Green State University is an affirmative action equal opportunity employer and encourages applications from women, minorities, veterans and persons with disabilities.

The University of Medicine and Dentistry of New Jersey-Robert Wood Johnson Medical School, has campuses in Piscataway, New Brunswick, and Camden, New Jersey with a total enrollment of approximately 600 medical students. In support of the Associate Dean for Admissions and Student Affairs, the following Assistant Dean opportunities are available:

Assistant Dean for Multicultural Affairs

The Assistant Dean will develop and implement innovative programs with the school to foster diversity among the student body, residents and faculty. Applicants must hold a M.D. or Ph.D. or equivalent degree and have strong verbal and written communication skills and proven organizational and managerial skills.

Assistant Dean for Admissions (Part-Time)

The selected candidate will initiate the development of creative recruiting programs to facilitate enrollment of high quality students. Applicants must hold a M.D. or Ph.D. or equivalent degree and have strong verbal and written communication skills, as well as proven organizational and managerial skills.

Send curriculum vitae, indicating position of interest, to: David Selden, Ph.D., Associate Dean for Admissions and Student Affairs, UMDNJ-Robert Wood Johnson Medical School, 675 Hoes Lane, Piscataway, NJ 08854-5635. UMDNJ is an Affirmative Action/Equal Opportunity Employer, M/F/D/V, and a member of the University Health System of New Jersey. Regrettably we can respond only to those candidates chosen for an interview. Visit our website at: http://www.umdnj.edu/hrweb/

KEAN UNIVERSITY

Kean University, a comprehensive metropolitan university, is committed to excellence and access and to fostering initiatives for retaining undergraduate students. Kean University takes pride in its continuing efforts to build a multicultural professional community to serve a richly diverse student body.

PROFESSIONAL POSITION
DIRECTOR OF RETENTION SERVICES

Reporting directly to the Office of the Provost, the Director of Retention Services will coordinate all retention efforts at the University. In this capacity, the individual selected will propose as well as develop new initiatives, coordinate with the directors of various academic service units, and manage new as well as ongoing initiatives designed to enhance the retention of undergraduate students, and aim to ensure success. The successful candidate will have prior experience and a record of achievement in the development and management of university-wide initiatives for retaining undergraduate students. Experience in coordinating multiple initiatives, expertise in the development of tools for measuring satisfaction and quality, skills in data collection and analysis, the ability to establish strong collaborative relationships, and knowledge of cutting edge developments in the field is essential.

Masters degree required and a minimum of three years experience with student retention. Background in higher education. Minimum of two years experience in student affairs. Candidates should send letter of interest, resume, and names, addresses, and telephone numbers of references. Official transcripts and three letter of recommendation required before appointment. Consideration of applicants begins immediately and continues until a successful candidate has been selected. Applications should be submitted to: Keen University, 1000 Morris Avenue, Union, New Jersey 07083. Salary is competitive and commensurate with qualifications and experience. Comprehensive benefits program included. Keen University is an EOE AA institution.
POSITION ANNOUNCEMENT

DIRECTOR OF HOUSING AND RESIDENCE LIFE

The University of Wisconsin-Stout is seeking a Director of Housing and Residence Life. The position reports to the Executive Director of Student Life Services and is responsible for providing visionary leadership, direction, and oversight for all aspects of Housing and Residence Life.

The University of Wisconsin-Stout, located in Menomonie, Wisconsin, is a special mission institution which serves a unique role in the University of Wisconsin System. Stout has an enrollment of 4,000 undergraduate and graduate students with over 2000 students living in nine residence halls located on campus. The residence halls are staffed by 85 Resident Advisors and nine full-time professional Hall Directors.

RESPONSIBILITIES

The Director is responsible for administering a Housing and Residence Life Program that coordinates and supports the mission of the University. Responsibilities include:
1. Developing a Housing and Residence Life Strategic Plan
2. Leading the implementation and evaluation of the strategic plan
3. Managing the budget and finances of the program
4. Providing leadership in the development and implementation of programs and policies
5. Building and maintaining collaborative relationships with other campus departments
6. Overseeing the hiring and supervision of staff

QUALIFICATIONS

DESIRED

- Demonstrated ability to manage and lead others in accomplishing the mission of Housing and Residence Life
- Having professional staff supervision skills and experience
- Demonstrated ability and experience in budget planning, development, and administration
- Knowledge and successful application of college student development theories within a Residence Life environment
- Strong communication skills and demonstrated ability to work in a team environment
- Demonstrated ability to manage multiple priorities and meet tight deadlines

REQUIRED

- Masters Degree and at least five years of successful professional staff management experience in university housing and residence life operations; 5 years in administration with experience and qualifications.

APPLICATION

Interested parties should submit a cover letter, a statement of housing and residence life philosophy, and a list of three current references with phone numbers to:

Search Committee
Director of Housing and Residence Life
100 Price Commons
University of Wisconsin-Stout
Menomonie, WI 54751
Phone: 1-715-232-2503
Fax: 1-715-232-1421

Application reviewed after August 16, 1999.

ASSOCIATE PROVOST OF ADMISSIONS AND ENROLLMENT

Cornell University is seeking candidates for the position of Associate Provost of Admissions and Enrollment. The position is a comprehensive and complex university comprising both independent and publically supported units and administrated by partnerships between central administration and decentralized units. The Ithaca campus, near by 19,000 students are served by more than 1,500 faculty in twelve distinct schools and colleges, each boasting a world-renowned academic curriculum in its field.

The Associate Provost of Admissions and Enrollment will lead strategic initiatives to enhance undergraduate admissions and enrollment university-wide. She will regularly assess current recruitment, admissions and enrollment practices, develop new directions to address market changes and develop and execute policies and programs that support the University's goal of attracting a highly qualified, diverse student population. The Associate Provost will report to the Provost and be responsible for keeping the President and Trustees informed of plans and improvements. She will oversee the University Office of Admissions and the Office of Financial Aid with a combined staff of over 90 and will work collaboratively with admissions offices in the seven undergraduate schools and colleges.

The successful candidate should possess the appropriate academic credentials, have a proven track record in leadership and development, preferably in the field of admissions and financial aid, have excellent communication skills, be action-oriented, have proven strategic planning and implementation experience, and be adept at creating an environment of shared responsibility.

Applications will be accepted until the position is filled. Nominations and expressions of interest should be directed to:

Chair, Search Committee
Office of the Provost
Cornell University
Ithaca, NY 14853

Cornell University is an Equal Opportunity/Affirmative Action Employer. Women and minority candidates are encouraged to apply.
Assistant Vice Chancellor
Human Resources

The University of California, Irvine, seeks a talented professional to serve as the Chief Human Resources Officer. This position will direct, plan, and manage human resources programs for the UCI Campus including the Employment, Benefits, Employee Relations, Classification, Compensation, Policy, Campus Temporary Employment Services, Labor Relations, and Staff Development functions. Will oversee a budget of approximately $1.5M per year.

Must possess a demonstrated track record of leadership and the ability to organize effectively. Must have a demonstrated ability to maintain a positive, cooperative work environment attuned to excellent customer service. Additional requirements include: understanding of the higher education environment; effective communication skills (both oral and written); experience with continuous process improvement using Baldridge principles; and the ability to interact effectively with diverse groups of people, representing all levels and sectors of an organization. Additionally, an advanced applied knowledge of theory and accepted principles of the human resources field, including a broad representation of the various HR disciplines is required.

UCI has an enrollment of nearly 17,000 and annual expenditures exceeding 650 million dollars. In addition to the comprehensive array of schools and research institutes, UCI has a large health sciences program, including a medical center and medical school.

For consideration, please send resume referencing Job #HCU-3211E to: University of California, Irvine, Human Resources, Berkeley Place Bldg. #2500, Irvine, CA 92697-4600. Visit our website at http://www.hr.uci.edu. UCI is an Equal Opportunity Employer committed to excellence through diversity.

RICE UNIVERSITY
PROVOST

Rice University invites applications and nominations for the position of Provost. The Provost is the chief academic officer, responsible for all academic programs of Rice University. The eight academic deans report to the Provost on matters of policy, personnel, and budget. The Provost is directly responsible to, and works closely with, the President.

Rice University is an independent, co-educational, nonsectarian, private university dedicated to undergraduate and graduate education, research, and professional training in selected disciplines. Located in Houston, Texas, the fourth largest city in the country, Rice has an undergraduate student population of 2,720, a graduate and professional student population of 1,525, and a full-time faculty of 460. Established in 1891, the University has an operating budget of approximately $285 million and an endowment of $2.8 billion.

Applicants must have a distinguished record of scholarship appropriate to a tenured appointment at Rice University. The ideal candidate will have outstanding leadership and communication skills as well as relevant experience in a complex academic environment. Women and minorities are encouraged to apply. Applications that are received by September 17, 1999, will receive earliest consideration, but the search will remain open until the position is filled.

To apply, please send a letter discussing your qualifications, along with a current curriculum vitae and the names, addresses, telephone numbers, and e-mail addresses (if available) of five references to:

Shelly Weiss Storbeck
Managing Director and Vice President
Education Practice
A.T. Kearney, Inc.

DIRECTOR OF HUMAN RESOURCES

Bryn Mawr College invites nominations and expressions of interest for the position of Director of Human Resources. Bryn Mawr College is a highly competitive private liberal arts college, located in suburban Philadelphia, that enrolls 1,200 undergraduate women as well as 500 men and women in the Graduate Schools of Arts and Sciences and of Social Work and Social Research.

The new Director of Human Resources will oversee operation of the Human Resources Department to include programs for positive employee relations, cost-appropriate compensation and benefits, recruitment and staffing for all non-faculty positions, training and development, employee assistance, and an integrated HRIS. S/he will be expected to provide leadership for college administrators on the development and implementation of effective management techniques and methodologies and develop and maintain a cost-effective budget for the operation of the Human Resources function. The Director of Human Resources reports to the Treasurer and Chief Financial Officer and is a member of the Senior Administrative Staff.

Candidates must demonstrate the capacity to articulate innovative and responsive human resources programs to reflect the College’s mission and strategic goals. S/he must have successful experience in developing and implementing plans, policies, and employee relations programs and possess a broad knowledge of labor, employment, and benefit regulations and practices. A master’s degree plus ten years of significant human resources experience in a complex organization is preferred. Experience in higher education is desirable; commitment to developing and maintaining a diverse community of employees is essential.

Please forward nominations and expressions of interest, in confidence, to:

Director of Human Resources
Bryn Mawr College
c/o Educational Management Network/Witt/Kieffer
98 Old South Road
Naumkeag, MA 02554-6000

DEAN
SCHOOL OF NATURAL RESOURCES

The University of Vermont (UVM) invites applications and nominations for Dean of the School of Natural Resources (SNR). The Dean is the chief administrative officer of the School and reports directly to the Provost. The Dean, in cooperation with the faculty in SNR, is responsible for the administration and planning of instruction, research, service, faculty development, and fundraising programs in the School.

The mission of the School of Natural Resources is to cultivate an appreciation and enhanced understanding of ecological and social processes and values aimed at maintaining the integrity of natural systems and achieving a sustainable human community in harmony with the natural environment. The School offers several undergraduate majors including forestry, wildlife and fisheries biology, environmental studies, recreation management, resource economics, natural resources and environmental sciences, as well as four related masters programs. There is also an interdisciplinary doctoral program. The philosophical and intellectual foundation of the School emphasizes integration of the natural and social sciences to achieve a holistic, interdisciplinary approach to natural resources and environmental issues. The School includes approximately 30 faculty, an administrative and research staff, and approximately 500 undergraduate and 70 graduate students.

We seek candidates whose personal and professional qualities and experiences assure superior leadership in all areas of academic endeavor. Demonstrated ability to promote the success of others and facilitate groups spanning diverse disciplines is an essential qualification. Candidates must demonstrate a commitment to academic excellence, affirmative action, and cultural diversity. Candidates should demonstrate leadership in basic and applied research and have an understanding of their roles within the mission of a comprehensive, land-grant university. Candidates must also present a record of both teaching and scholarly achievement meriting a tenured professorship in the School.

Established in 1971, UVM is located in Burlington, a small city situated between the Adirondack and Green Mountains on the shores of Lake Champlain. The eight undergraduate colleges and schools of the University have an enrollment of 7,000 Graduate, Medical, and Continuing Education students bring the total enrollments to approximately 10,000. More information can be found on http://www.uvm.edu, the university's website.

Applications must be received by August 15, 1999 to receive full consideration. The University welcomes applications from all qualified individuals, especially people of color, women, and people with disabilities.

Nominations and applications, including a letter describing the individual's qualifications for the position, a curriculum vitae and names, addresses and telephone numbers of three references, should be sent to:

Dr. Rebecca R. Martin
Chair, Dean, School of Natural Resources Search Committee
Office of the Provost

WCSU is an Affirmative Action/Equal Opportunity Employer

SPRINGFIELD COLLEGE

VICE PRESIDENT FOR ADMINISTRATION AND FINANCE

Springfield College invites nominations and applications for the position of Vice President for Administration and Finance.

Springfield College is an independent, comprehensive, co-educational college located in Springfield, Massachusetts. With a national and international reputation in the education of leaders for the allied health, human service, and physical education professions, Springfield College offers more than 40 undergraduate and graduate degrees. More than 4,000 traditional, nontraditional, and international students are enrolled at the main campus and at satellite programs in six states and three foreign countries. Its new president, Dr. Richard Flynn, assumed office on March 1, 1995.

The Vice President for Administration and Finance reports directly to the president and serves as a member of the president's cabinet. The vice president is the chief advisor to the president on financial and administrative matters. The vice president is responsible for the overall leadership and management of a number of functions at the College, including business operations, physical plant, internal audit, campus police, human resources, information technology systems, and contracted auxiliary services. The vice president also serves as the liaison to the board of trustees committees on fundraising, buildings and grounds, audit and compliance, and business affairs. The vice president has major responsibility for the preparation of the annual operating budget and is expected to establish goals and objectives to augment the College's ability to fulfill its mission and to advance the understanding and support of the College.

For more information on qualifications and responsibilities for this position, please contact: Vice President for Administration and Finance Search, Office of Human Resources, 263 Alden Street, Springfield, Massachusetts 01109.

UNIVERSITY OF WISCONSIN MILWAUKEE

SCHOOL OF ALLIED HEALTH PROFESSIONS

The University of Wisconsin-Milwaukee invites nominations and applications for the position of Dean of the School of Allied Health Professions. UW-M seeks a Dean with qualifications matching the School's mission related to academics, research, and community outreach, as well as a proven record of leadership and administration.

The University and School of Allied Health Professions: The University of Wisconsin-Milwaukee is a Research II University that offers baccalaureate, masters, and doctoral degrees in twelve colleges and schools that serve over 25,000 students. The campus is located in an attractive, modern setting near the shores of Lake Michigan. UW-M has a strong tradition of shared governance. The School of Allied Health Professions is a vibrant and progressive component of the University with approximately 50 full-time faculty and professional academic staff. The School offers seven undergraduate degree programs (Clinical Laboratory Sciences, Communication Sciences and Disorders, Health Information Administration, Health Care Administration, Kinetics, Occupational Therapy, Recreation), and five masters programs (Clinical Laboratory Sciences, Communication Sciences and Disorders, Human Kinetics, Occupational Therapy, Physical Therapy). The School has been approved but not yet implemented.

Responsibilities: The Dean is expected to provide leadership for the School and exercise responsibility for its academic, administrative operations, including personnel, budget, programs, and physical facilities. Areas of responsibility include: programmatic development and leadership at both undergraduate and graduate levels, as well as for outreach and continuing education leadership; establishment and strengthening research, clinical practice and educational programs, development of extramural funding sources, fundraising, and alumni relations; and effective representation of the School within the University and the community.

Qualifications: The position of Dean requires an earned doctoral degree. A distinguished academic record commensurate with potential for tenured appointment as a full professor in a School of Allied Health Professions or a closely related department in the University is preferred. Experience is competitive and compassionate with professional qualifications. Candidates with demonstrated strengths in the following areas will be especially competitive:

- Strong background in undergraduate and graduate education capability to provide strong intellectual leadership
- Commitment to and expertise for leadership in interdepartmental development of a creative research and service support infrastructure for the School
- Commitment to creative and maintaining an environment of diversity in the School
- Effective management, communication, and interpersonal skills, ability to provide administrative leadership, and ability to work with individuals at all levels of the organization
- Ability to develop the human resources and program resources of the School
- Ability to develop and maintain partnerships and collaborations with the community, health care facilities, and other educational institutions
- Experience in fundraising and alumni relations

Application Procedures: Nominations at potential candidates' encourage. Candidate applications must include a letter of interest, curriculum vitae, and three letters of reference. Position screening of candidates will begin July 9, 2013, and will continue until a qualified candidate is selected. Nominations, applications, or inquiries to:

EXECUTIVE DIRECTOR of the Clarice Smith Performing Arts Center

The University of Maryland seeks to appoint an Executive Director for the Clarice Smith Performing Arts Center, which is expected to begin operation in academic year 2000-2001. The Center is a $100M+ million, 318,000 gross-square-foot facility that will house the university departments of Dance, Theatre, the School of Music, and the Performing Arts Library. The Center will possess six state-of-the-art performance venues including a Concert Hall (1,135 seats), Recital Hall (400), Dance Studio (200) and Proscenium Theater (467). Funding for this state-of-the-art structure has been provided by the State of Maryland, Prince George's County, and private funds. The University of Maryland is a comprehensive research university and is located in College Park, Maryland, and is only a half-hour's drive from downtown Washington, DC and less than an hour from downtown Baltimore.

Employment Category: Full-time Academic, Administrator, non tenure-track

Duties: In its six performance venues, the Center will feature performances by students and professionals, the latter drawn from the region and the world. As its chief administrator, the Executive Director will be responsible for the successful performance of all non-academic Center functions relating to artistic programming, facilities, finance, marketing and communications, development and production. The Executive Director will be responsible for integrating Center presentations with academic and community programs and activities. The Executive Director will serve as a spokesperson for the Center, will cooperate closely with the Office of University Advancement to obtain outside funding for the Center and its operations, and will supervise the Center's professional staff. The Executive Director will report to a three-person Executive Committee responsible for setting overall operating policies for the Center and will cooperate closely with the head of performing arts academic units and the Dean of the College of Arts and Humanities where the Center is administratively housed.

Qualifications: The Executive Director should be an experienced arts manager with a record of success in a senior management position. He or she should have at least five years of successful artistic programming and management experience, excellent interpersonal skills, sensitivity to the special requirements of the performing arts and alumni in an academic setting, experience in staff supervision, knowledge of business procedures.

A B.A.B.S degree or equivalent is required. An advanced degree in one of the performing arts or a related field is desirable.

Salary: Commensurate with qualifications and experience

Position available: Upon appointment

Application Process: Persons seeking to be considered for the position should submit a letter of application describing their qualifications and explaining their interest in the position along with a detailed resume to:

Executive Director Search Committee
Office of the Dean of Arts and Humanities
University of Maryland
1102 Francis Scott Key Hall
College Park, Maryland 20742

or

James Abruzzo
Vice President and Managing Director
Nonprofit Practice
A.T. Kearney, Inc.
153 East 53rd Street
New York, New York 10022
Fax: 212-359-3111

The University of Maryland is an EEO/AA Employer.

Women and minorities are encouraged to apply.

The Search Committee will begin its review of applications for the position by June 1, 1999 and continue its review until the position is filled. Inquiries are to be directed to the Chair of the Committee. Dr. James F. Harris, Dean of the College of Arts and Humanities, University of Maryland, College Park, MD 20742 (phone: 301-405-2095; email: jfharris@deans.umd.edu).

ASSOCIATE VICE PRESIDENT FOR ACADEMIC AFFAIRS
 THE UNIVERSITY OF TEXAS AT BROWNSVILLE
 AND TEXAS SOUTHMOST COLLEGE

The University of Texas at Brownsville and Texas Southmost College is seeking an academic leader who can develop and lead the professional development of faculty, teachers and learning processes, as well as provide a leader role and evaluation program assessment. The successful candidate will be responsible for the academic and administrative management of the academic programs in Academic Affairs. The Associate Vice President reports to the President and is responsible for all academic operations at UTB and TSC, with the primary focus on Students and Academic Affairs, with direct reports in other divisions.

UTB TSC is an open access community college and a university with graduate programs. More than 55 percent of our students are ethnic Mexican Americans, Mexican, Mexican American, and students from other Latin American countries. Located five minutes from Mexico, the University and College are committed to bilingual education.

Required Qualifications:

- Ph.D., or other terminal degree in an academic department
- Experience in administration, including above average responsibilities, and
- At least three years' experience as a department chair

Preferred Qualifications:

- An extensive experience in academic affairs
- Ability to communicate with a diverse range of audiences and
- Knowledge of Title VI/Title VII programs

Salary:

- $70K plus

Applications should be submitted with three letters of reference and a two-page position statement of current and future role. While the candidate will be responsible for academic affairs, the position will be responsible for all academic affairs.

Human Resources:
The University of Texas at Brownsville
and Texas Southmost College
1 East Brownsville, Brownsville, Texas 78521

UTB TSC does not discriminate on the basis of race, color, national origin, sex, age, religion, or disability.

George Fox University is seeking qualified candidates for eleven current openings. George Fox University is an evangelical Christian university with a national reputation for academic excellence. Employment of 2,300 includes students in undergraduate, graduate, and professional programs. The main campus is located in Newberg, a small community of 17,000 located 25 miles southwest of Portland, Oregon. Visit our web site at www.georgefox.edu for more information. We invite qualified applicants for the following positions:

- Associate Registrar
- Dean of Students
- Director of Academic Computing
- Web Production Manager
- Dean of Admissions for Continuing Education
- Assessment Counselor for Continuing Education
- Assistant Director of Development
- Assistant Director of Alumni and Parent Relations
- Bookstore Manager
- Sports Information Director
- Writer/Editor (half-time)

Because George Fox is a Christ-centered liberal arts university, employment requires an evangelical Christian commitment and lifestyle consistent with the University's goals. Within these goals, George Fox is an equal employment and admissions opportunity institution. Interested candidates are encouraged to apply.

Call the George Fox Employment Line at (503) 554-3865 or email georgefox.edu

In compliance with the Americans with Disabilities Act, we are committed to providing equal employment opportunities for all candidates regardless of race, color, national origin, sex, age, religion, or disability.

SUPERINTENDENT/PRESIDENT

The San Joaquin Delta College Board of Trustees invites nominations and applications for the position of Superintendent/President to succeed Dr. L. H. Horn Jr., who is retiring after 12 years of successful service to the district. The Superintendent/President is the chief executive officer of the district and reports directly to an elected seven-member Board of Trustees.

APPLICATION INFORMATION

The profile brochure, with details on San Joaquin Delta College District, the Challenges and Opportunities, the Superintendent/President Profile, and the application instructions, should be requested by contacting: The Presidential Search Committee, c/o Diane Lee Lawson, San Joaquin Delta College, 6333 Pacific Avenue, PMB 282, Stockton, CA 95207, Telephone: (209) 954-5020; FAX: (209) 954-5644; e-mail: dlawson@sjdced.cc.ca.us

Nominations and applications will be accepted until the position is filled. The Search Committee will determine who will be interviewed by mid-September 1999. Preferred starting date is January 2, 2000. Candidates who cannot make themselves available until a later date will be considered, but are asked to indicate their date of availability. Salary is competitive for institutions of comparable size.

For confidential telephone inquiries regarding the position contact Jim Tatum, ACCT Search Consultant, at (417) 886-3862 or FAX (417) 847-5321.

San Joaquin Delta College District is an equal opportunity/affirmative action institution. Applications and nominations of individuals who would enrich the college's diversity are strongly encouraged.

DEAN OF THE FACULTY

Trinity College invites applications and nominations for the position of Dean of the Faculty. The Dean of the Faculty is the chief academic officer and second ranking administrator of the College. A tenured member of the faculty, the Dean is responsible for ensuring the integrity of the College’s curriculum, overseeing academic affairs, the academic calendar, supporting the academic support services, and conducting the academic budget. The Dean has a support staff which includes three Associate Deans.

The College seeks a Dean of scholarly distinction who is an accomplished teacher and has considerable experience in academic administration. The Dean must be committed to the values of undergraduate education in the liberal arts and be an effective representative of the faculty and the College.

Applications (including a statement of interest, curriculum vitae, and four references) may be directed to: Professors David Ahlgren and Jan Cohn, Co-Chairs, c/o Secretary: Dean of the Faculty Search Committee, Trinity College, 300 Summit Street, Hartford, CT 06106. The Search Committee will begin the review of candidates July 15, 1999, and expects to begin interviewing by October 1, 1999. The appointment of the Dean begins July 1, 2000. Consistent with the College’s interest in diversity, women and minority candidates are encouraged to apply. Trinity College is an Equal Opportunity/Affirmative Action Employer.

M  MIAMI INSTITUTE OF PSYCHOLOGY

DIRECTOR OF UNDERGRADUATE STUDIES

The Miami Institute of Psychology has an immediate opening for a dynamic, organized, detail, and task oriented individual responsible for directing and coordinating the undergraduate program. Qualified candidates should have a MS degree in Psychology or related field, and 2 years of academic/administrative experience at a university setting. Responsibilities include long range planning and overall direction and development of the undergraduate level program at the Miami Campus. Bilingual (Eng./Span.) preferred. Interested candidates, submit resume, statement of interest, transcripts, and 3 letters of recommendation to: Human Resources Office, Miami Institute of Psychology, 8180 NW 36 St., Miami, FL 33166 or fax to (305) 592-7930.
SEWANEE
The University of the South, Sewanee, Tennessee
VICE CHANCELLOR AND PRESIDENT

The University of the South, commonly known as Sewanee, seeks nominations and expressions of interest in the position of Vice Chancellor and President. The new Vice Chancellor and President will succeed Dr. Samuel R. Williamson, who will retire June 30, 2000, after more than a decade of distinguished leadership and service to the University and the Sewanee community.

Founded in 1855, and located on Tennessee's Cumberland Plateau, the University is comprised of a high-quality, undergraduate liberal arts college, ranked among the nation's finest with a student body of about 1,300 and a faculty of 70. It has a graduate School of Theology with some 50 students in residence and faculty of 15. Owned by 28 southern dioceses of the Episcopal Church, the University is governed by a 15-member Board of Trustees, with an ex-officio acting as Chancellor and Chair and by an 8-member Board of Regents. The Vice Chancellor and President serve as the University's chief executive officers. Additionally, the Vice Chancellor serves as chair to a committee of 250 members and steward of its $100 million endowment.

The University seeks a leader of intellect, integrity, creativity, and energy who has the capacity and the energy to embrace the University's commitment to the liberal arts, its academic excellence, and its relationship to the Episcopal Church, the relationship between the College of Arts and Sciences and the School of Theology, and its traditions. The ideal candidate will have a record of outstanding achievement in higher education or another professional field. An earned doctorate or an equivalent is expected, as is proven intellectual leadership, an ability to fundraise, and solid experience in strategic planning and fiscal management. The successful candidate will be committed to excellence in teaching and learning, and the development and support of faculty across the disciplines. The candidate will understand the pressures and issues facing liberal arts colleges and possess courage, resilience, humor, and compassion.

For best consideration, please forward nominations and expressions of interest to:

Vice Chancellor and President
The University of the South
90 Old South Road
Sewanee, TN 37375

PROVOST

George Mason University invites nominations, applications and expressions of interest for the position of Provost, the chief academic officer of the university.

The Provost serves as a member of the President's Executive Council and as senior staff to the Board of Visitors' Faculty and Academic Standards Committee. The Provost oversees three Vice-Provosts, the Deans of six colleges and schools, the Directors of five academic institutes, and selected special support programs.

GMU, part of the renowned system of higher education in the Commonwealth of Virginia, serves 25,000 students on three campuses throughout Northern Virginia in the dynamic and growing Washington, DC metropolitan area. Since attaining university status in 1972, GMU consistently has been among the fastest developing academic institutions in the nation. The university often is noted as a prototypical model of the emergent major metropolitan university for the 21st century.

An institutional plan adopted in 1998 and other information on GMU and the Provost's position can be reviewed on the university's website at www.gmu.edu.

The successful candidate will have:

• senior-level managerial experience in a complex and dynamic institution;
• a demonstrated record of decisive leadership and decision making;
• a commitment to academic excellence and fiscal responsibility;
• outstanding communication skills, including technological literacy;
• a broad understanding of undergraduate, graduate, professional, and lifelong education;
• a proven record of accomplishment and an excellent work ethic;
• an earned terminal degree and credentials for appointment as a tenured full professor; and
• documented achievement in teaching, research, and service.

The Provost's position is available beginning in September. The university will begin reviewing credentials on June 15, 1999, and the process will continue until the position is filled.

What is it about “technology” that gets us Latin...as so worked up? It is the idea that we do not have access. Access receives the attention because it pertains to how policies are written. And to how many computers are found sitting on desks in barrio schools.

Some say that Latinas/os are not a technologically literate cultural group and therefore “do not perform well” in “high tech environments”—claims made with no research base and despite vast existing research to the contrary. Latinas/os do quon-well in such environments, especially when we infuse bilingual, bicultural, and international modes of team-teaching, learning, research, and assessment.

The use of computer messaging systems or CMS (from e-mail to synchronous bilingual “chat rooms” to computer mediated and focused/organized dialogues) is but one powerful example of how basic technology greatly impacts teaching and learning from K through the Ph.D. A clear demonstration is our computer networking project, BESTNET (Bilingual English and Spanish Telecommunication Network), which for nearly 20 years has involved thousands of culturally and linguistically diverse student groups from dozens of schools in the U.S., Latin America, Europe, and Africa. In BESTNET, we have both caused and evaluated many features of Internet networked learning—learning that is truly bilingual, bicultural, and global in focus. We have shown that CMS designed for Spanish/English global settings greatly augments regular classroom instruction and is a viable technology on- and off-campus.

CMS provides bilingual/bicultural students with individual and group attention that cannot be obtained using monolingual, majority, dominant-cultural classroom feedback. It supports a Frierean method of instruction, with students acting rather than passive Latinas report that the “playing field” is leveled as well. Students report too that the anonymity promotes bilingual discussions that otherwise would be inhibited.

An outstanding example is the success of math courses incorporating CMS. Calculus One professors, for example, add CMS to existing syllabi. It is a viable option for team-teaching, small-group study, bilingual chat rooms, and conference dialing. Using a calculus book that is printed in Spanish and English-Strokowskis, for example—one professor could be U.S.-based, the other in a Spanish-speaking country. Both should be bilingual/bicultural. Other electronic pedagogies could be adapted—encouraging students to answer a math equation through text or word, allowing them to work in virtual groups that they form with students of other dominant language to write a text-description (in Spanish or in English) about how they would arrive at the answer, in lieu of or in addition to numeric calculations.

In this environment, most bilingual students choose to solve problems through text, in both languages, as a group, and then attempt the numerical approach with more confidence. A behavioral paradigm shift occurs as they understand that there are multiple ways of knowing, and begin to view math from multiple perspectives.

In this setting, all approaches to problem solving are viable and “mathematical” even in the emerging Western European scientific sense. Hence, CMS is encouraging other ways of knowing and diversity, by design.

Many bilingual global group settings could be formed for conducting classes, assessment, group research, and more over the Internet. CMS, relatively low-cost, has had a dramatic positive impact on teaching, learning, and access.

People in Latin America have been much more successful at utilizing CMS for they are accustomed to “going the last mile.” They define “access” in terms of how they will change their personal behavior for seeking it through existing technology. In the U.S., we often complain about insufficient access before becoming innovative about the access at hand.

Administrators equate access with numbers of computers on tabletops. It is often more a matter of changing behavior. In most Latin American settings, one computer can be assigned to 60 or more students. How? The answer is in the perspective. Students are taught how to get online wherever possible—at work, at a library, at a friend’s house, and maybe on the computer that was assigned to them and 80 other people.

In the U.S. we must inculcate what César Chávez called the “Si se puede” attitude—a “you can do it!” paradigm for looking at our own barriers, taking a chance, becoming part of the solution, and learning from our “Third World” counterparts. Our children here can and must “go the last mile.” We in the “technological inner-cities” will continue experimenting with designs for massive influence. But we need as a group to send a strong message to every barrio in the U.S. that you must value and learn to maximize the opportunities at hand.

CMS promotes student-to-student interaction and collaborative work. Computer naive students learn as well as computer sophisticates. Many Latinas/os students who traditionally were not heard now have emerging voices. The self-efficacy effect on Latinas/os alone is something to look forward to early in the 21st Century.
Hispanics Making the Marks in Media

Should we put this in the comedy section, the horror section or the adult section...

Ramirez, Los Angeles Times

Yo quiero trabajar en Taco Bell.
SULLIVAN COUNTY COMMUNITY COLLEGE is seeking to fill the following positions:
(All positions are subject to budgetary approval)

Instructor, Communication/Media Arts
Experienced in all aspects of media production and theory. A Master’s degree in an appropriate field and abilities in all aspects of audio and digital audio, video, and multimedia are required. Demonstrated experience in teaching media production and theory courses to a diverse student population is also required. To be considered, candidates must submit a cover letter, resume, VHS or 3 1/4” videodisc portfolio.

Faculty/Coaching positions:
- Instructor of Physical Education/Head Women’s Basketball Coach
- Instructor of Physical Education/Head Women’s Volleyball Coach

Successful candidates should have a minimum of three years of coaching and teaching experience related to recreational leadership and sports management. Bachelor’s degree in physical education or a related field is required. A master’s degree is preferred. A strong commitment to program building in a small college setting, with students of diverse cultural backgrounds, is essential. Teaching experience in other sports will be an asset.

Biology Instructor
Courses to be taught may include general biology, genetics, marine biology, botany, environmental science, microbiology, and/or physiology. A strong background in biology is necessary. Knowledge of Molecular Biology is desired. Abilities to teach an occasional basic math or physical science courses an asset. Demonstrated excellence in teaching development of labs, the ability to communicate with students of all levels is essential. Master’s degree in Biology required. Ph.D. preferred.

Electrical Engineering Technology Instructor
Courses to be taught include DC and AC Circuits, Digital and Analog Electronics, Electro-Mechanical systems and related EET courses and math. During 1999-2000 year individual will help develop Program and teach 3 courses. Demonstrated excellence in teaching, development of labs, and the ability to communicate with students of all levels is essential. Minimum 3 years of related industrial experience, at least 2 years of teaching experience, and Master’s degree in related field required. Ph.D. preferred.

English Instructor (two positions)
The department has identified a need in several areas of expertise, including ESL, Expository and Creative writing, Composition, Literature, Philosophy, Speech and Theatre. The department is seeking individuals who have combined abilities and experiences with address the majority of these needs. Master’s degree required, Ph.D. preferred. Demonstrated excellence in teaching a diverse student population is necessary. Some administrative experience will be an asset.

Psychology Instructor
Primary responsibilities will include a combination of General Psychology, Abnormal Psychology, Behavior Modification, and child Psychology. Teaching experience in the Office of Institutional Development and Outreach is necessary. Master’s degree in an appropriate area required. Demonstrated experience teaching a diverse student population.

Executive Assistant to the President
For Institutional Development and Outreach
Qualifications: Master’s degree in mathematics, statistics, educational or social science research, or a related field. Ph.D. preferred. At least five years of experience in administrative computing, institutional research, education research administration, statistical analysis, or other areas of experience. Excellent written, oral communication, and interpersonal skills. Experience with tools and technologies used in institutional research (e.g., statistics, management information systems, DMS or related software packages and report generation systems, computerized student information systems, research design and implementation, and at least 5 years of supervisory experience. Duties include: but are not limited to the following: Supervise the data base operations of the Office of Institutional Development and Outreach, provide necessary data for reports to federal, state, local, and accrediting agencies, conduct demographic studies, support marketing, recruitment, and enrollment management activities. Serves as liaison to the Board of Trustees and assists with coordination of Board activities.

The Center provides a developmentally appropriate program that serves the needs of our student parents and communities, as well as a learning center for our Early Childhood Educator programs. The Director is responsible for the personnel budget, program, coordination of the Center and the academic programs, recruitment, teaching, Early Childhood Education courses and maintaining a high level of excellence in both the Center and the academic programs. Master’s degree in an appropriate major and three years experience required. Demonstrated experience teaching a diverse student population.

Counselor
Duties include personal counseling and crisis intervention career counseling and assessment, and workshop presentations relating to issues of personal growth, transition to college, and cognitive skill development. The successful candidate must demonstrate experience with students from diverse backgrounds including urban and rural students, minorities, and students at academic risk. The counselor position includes coordination of intervention programs for students on academic probation. Requirements include a Master’s Degree in Counseling or a related field and three years counseling experience, preferably in a community college setting.

Access and Public Services Librarian
(Search Extended)
Responsibilities include: supervising MultiMedia circulation system, reserve collection, interlibrary loan, and serials functions, participating actively in library and college wide information literacy instruction programs by conducting classes in computerized research methods, and providing reference assistance to students. Qualifications: Master’s Degree in Library Science; excellent communication skills; demonstrated ability to work effectively with students, faculty, and the general public. At least 2 years of experience with information technology, including Internet, CD products, and library web page development. Teaching experience desirable. Salary depends upon experience and qualifications.

Admissions Counselor
Duties include: Active involvement in on-campus and off-campus recruitment programs, and extensive overnight and of week-end travel over a 6-month period of time. Qualifications: Bachelor’s degree, admission experiences, excellent communication and interpersonal skills, ability to meet with groups and interact with the public in many different types of situations.

Alcohol And Drug Abuse/Health Services Programs Coordinator
The position entails recruiting and advising students, maintaining and enhancing our relationship with the NYS Office of Alcoholism and Substance Abuse Services (OAASAS) and the Addiction Transfer and Technology Center (ATTTC), working with our Director of Grants and Resource Development to identify and apply for grants, and serve as the liaison for the PAER program. Teaching assignments will comprise half the position load. Qualifications include Bachelor’s degree in psychology, human services, social work or counseling. Master’s degree in one of the fields listed, education or a related field, at least five years experience in the field and at least two years of teaching, preferably at a community college. Excellent communication, interpersonal and organizational skills, a demonstrated ability to interact with people at all levels, and computer proficiency in Windows, Microsoft Word, internet and e-mail, database development and use.

Coordinator of Information Technology Services
Qualifications: Bachelor’s degree in an appropriate field required. Master’s preferred. Experience with IBM PS/2, 400, 300 operations and maintenance, proficiency in OS/2, 400, BROWZER, database management systems experience a plus. Windows 95/98 and NT networking (LAN, WAN, Novell), training experience in mainframe and microcomputer, a background in 11 functions, excellent interpersonal skills and the ability to work with a diverse student and staff population. Duties include: administrative, academic, and instructional technology functions, the campus network, and microcomputer support on a multi-platform environment, supervising and scheduling the production of payroll, inventory, and data management reports and providing training for faculty and staff on mainframe and microcomputers.

Send cover letter, resume and names, addresses, and phone numbers of 5 references to Office of Human Resources, Sullivan County Community College, 1000 Leno Road, Loch Sheldrake, NY 12759 or Email to sedes@sullivan.suny.edu. Resumes will be accepted until positions are filled. MINORITY/HISpanic/AFFIRMATIVE ACTION EMPLOYER.

Information Unlimited

BY GUSTAVO A. MELLANDER

Washington continues to be an
amazing fountain of information.
Since last September, the National
Center for Education Statistics (NCES)
had more than thirty statistical reports.
I have selected those that impact directly
on Hispanics or on higher education
topics that interest many of us. They include
such varied topics as
the condition of education
academic progress
international
libraries
students
postsecondary education

Below, I list titles, descriptions, and
URLs of these reports, for which the full
texts or highlights are available online.

The Condition of Education

The Condition of Education, 1998
ed. This annual report to Congress
focuses on 60 indicators, representing
a consensus of professional judgment on
the most significant national measures of
the condition and progress of education at the
time. Each indicator is available in HTML
and the entire report is in PDF.

Academic Progress

Report on Brief: NAEP 1996 Trends in
Academic Progress. Executive summary of
results from the National Assessment of
Educational Progress (NAEP) surveys. It
contains long-term assessments of
science, mathematics, reading, and writing.

International

International Archive of Educational
Policy Documents. Represents data collected
annually by NCES from the 1960s to the
present Sponsored by NCES and located at
the Inter-University Consortium for
Political and Social Research (ICPSR)
University of Michigan.
http://www.icpsr.umn.edu/ICED

Libraries

1994 Academic Library Data File
Provides large downloadable files in several
formats of micro-data on academic libraries
at 3,903 institutions of higher education.

Status of Academic Libraries in the
U.S. Results from the 1994 Academic
Library Survey. With Historical
Comparisons to 1974. Goes on data on
the collections, staffing, and expenditures of
the nearly 3,903 academic libraries.

Mathematics

Long-Term Trends in Student
Mathematics Performance. Shows a
positive linear trend for all age and racial
groups since the first assessment in 1973
using data from the NAEP 1996 Long Term
Mathematics Assessment.

School Policies and Practices
Affecting Instruction in Mathematics.
Focuses on who teaches math, what
emphasis math instruction receives in the
school, and who resources are available in
schools that support math learning.

Postsecondary Education

Choosing a Postsecondary Institution. A comprehensive study that
examines student characteristics and
decision making.

Degrees & Other Awards Conferred
in Degree-Granting Institutions 1995-
96. Covers the 50 states and DC. The data
includes summaries by race/ethnicity, field
of study, and gender.

Descriptive summary of 1995-96
Beginning Postsecondary Students With
Profiles of Students Entering 2- and 4-Year
Institutions. Presents data on age,
degree status, finances, financial aid, test scores, and
other factors.

F.D. Tab Fall Enrollment in
Postsecondary Institutions 1996. Presents
detailed tabulations for Fall 1996, with
comparisons to previous years, for students
enrolled in postsecondary institutions in the U.S.

F.D. Tab Salaries, Fringe Benefits
1996-97. Provides results of
an analysis of data on salaries of full-time
instructional faculty on 9- and 12-month contracts.

Generational Status and Educational
Outcomes Among Urban and Hispanic
1998 Eighth Graders Uses the National
Education Longitudinal Study (NELS:88)
to examine the impact of generational status
on educational achievement, enrollment
in postsecondary education.

Indicators of the Month: Graduate
Field of Study, By Sex. From the Condition

Indicator of the Month: Racial and
Ethnic Differences in Participation in
Higher Education From the Condition

Student Loan Borrowing Among
Undergraduates Who Leave College In Their First Year.

Student Financing of Postsecondary
Education 1995-96. With an essay on
Student Loans. Describes the role of student
loans within the context of tuition, the total
price of attendance, and other financial aid
available to undergraduates in 1995-96.
Includes information on the cumulative
amounts of federal loans borrowed by
students throughout their undergraduate
education. Provides profiles of student borrowing
and financial aid for each of the 4 major
types of institutions. Includes tables describing
more detailed information on student
loans, tuition, and the price of attendance:
financial aid, net price of education, and
general background characteristics of undergraduates.

Technology

Safeguarding Your Technology: Guidelines to help administrators
and staff at the building campus, district, and state levels
understand why and how to secure their
organization's sensitive information.

Technology @ Your Finger Tips. The
popular guide to implementing
technology solutions for education agencies and
institutions is now available in HTML format.

Writing

Long-Term Trends in Student Writing
Performance. Shows a decline in scores
for grade 11 students over the period 1984-1996
using data from the NAEP Long Term
Trend in Writing Assessment. Found that
scores for students in grades 4 and 8 remained unchanged and that
White student continued to have higher scores than
Black and Hispanic students in all grades.

George Mason University.
Pulling No Punches
Editorial Cartoonist Hits Hard and Direct

By Marilyn Gilroy

Michael Ramirez, who has been called "one of the country's best and most provocative cartoonists," won the Pulitzer Prize in 1994. He currently works for the Los Angeles Times and is syndicated in more than 550 newspapers throughout the world through the Copley News Service.

A frequent contributor to USA Today and a regular guest on "The News Hour with Jim Lehrer," Ramirez also is president of the Association of American Editorial Cartoonists.

In addition to winning the Pulitzer, Ramirez has received several other prestigious honors. A 1984 graduate of the University of California, he was selected for the 1998 UCI Medal (the equivalent of an honorary doctorate), for exemplifying commitment, energy, and innovation. He also received an award for his cartoons in 1997 from the Society of Professional Journalists, Sigma Delta Chi. In accepting the award, Ramirez stated, "I regard myself as an equal opportunity offender who believes the pursuit of the truth to be neither partisan nor philosophical but a matter of delineating between right and wrong. In the process of doing the job, the editorial cartoonist is constantly subjected to a barrage of criticism and open resentment from readers. But that is just an indication that the work is having an impact."

"Essentially, I get paid to be obnoxious," said Michael Ramirez, the Pulitzer prize-winning editorial cartoonist, as he addressed a group of student journalists at this year's national college newspaper convention in Huntington Beach, Calif.

"My drawings are a vehicle to convey a point of view" and to "try and get people involved. I hope to incite them."

And his work does just that. It is impossible to sit through a presentation of his most famous cartoons and not feel the sting of truth that is revealed in these images. The audience of approximately 100 students and their professors was often amused and sometimes moved by the portfolio of drawings that he displayed as he spoke. His subjects veered from politics and bilingual education to violence, racism, and U.S. policies abroad. Using cartoons and just the right wording, Ramirez is able to make pointed statements about current events and, by his own description, "engage readers in a debate."

"The great thing about being on a newspaper is that you get immediate reaction," he said. "If I don't get at least three or four calls a day, I'm not doing my job."

He has been so successful at his craft that he was awarded the Pulitzer Prize in 1991 "for his trenchant cartoons on contemporary issues" when he was working for the "Commercial Appeal" in Memphis, Tenn. He was lured away by the "Los Angeles Times," but only after he was sure that he would have control over his subject matter. Ramirez says that "Los Angeles Times" editors do not interfere with his work unless something is factually incorrect or in extremely bad taste.

And though his vehicle of expression is the cartoon, Ramirez takes his work very seriously: "It is a profession about ideas. We are the prosecutors, defense, judge, and jury of journalism," he said. "And in order to be effective, we have to be informed. We have to read and do extensive research."

And what happens when a cartoonist doesn't do his or her homework? Lots of mail and complaints, says Ramirez. For example, he was once lampooning the Federal Aviation Administration's decision to strengthen drug testing procedures for commercial airline pilots. His cartoon featured a pilot holding a beer and contemplating (à la Hamlet) the procedure with the phrase "To pee or not to pee?"

He received a lot of mail on that one, he says, not because of the subject matter but because he drew the airline pilot's uniform with three stripes on the sleeve, not four. Apparently, the plane's navigators, not pilots, wear three stripes.

Ramirez admits that his drawings reflect his own beliefs and political point of view. "You cannot draw a cartoon that you do not believe or cannot substantiate," he
explains. These days he feels very strongly about racism in U.S.
society and believes that our society is
becoming divided by race, gender,
and religion. He also is concerned
that fewer and fewer citizens are
involved in the political process
and pointed to the last presidential
election where voting rates dipped
below 50 percent. His own
upbringing and travels abroad have
convinced him that participation in
Democracy is essential to the sys-
tem's well-being.

Ramírez's roots can be traced to
Mexico, where his grandfather
fought in the Mexican revolution
but ultimately escaped to America
and became a migrant farmworker.
Ramírez says that his grandfather
believed in hard work but did not
believe in the value of education.
Fortunately, Ramírez's father felt
differently and was determined that
Ramírez and his sisters and broth-
ers would go to school.

Ramírez was born in Tokyo. His
father had joined the army and
traveled around but never aban-
donied his goal to make a better life
for his family. All of the children
went to college, and today,
Ramírez's four siblings are doctors.

Ramírez believes that his family's
living proof that hard work in
America will be rewarded and that
barriers can be overcome.

"As a Hispanic, there is nothing
you can't achieve. As an American,
there is nothing that will stand in
your way," he advised the young
journalists in his audience. He
reminded the college students of
the achievements of Martin Luther
King, Jr., and César Chávez.

In addition to encouraging oth-
ers to stay involved in society and
care about issues, Ramírez is politi-
cally active himself. Prior to
appearing at this conference, he
had traveled to Cuba, where he and
other American journalists
observed first-hand the effects of
the U.S. embargo. The purpose of
the visit was to make recommenda-
tions on whether or not the embar-
go should be continued. In general,
says Ramírez, his group reached
the conclusion that the embargo
should be continued because it is
finally beginning to work.

Asked by an audience member
if he considered himself an artist,
Ramírez answered, "No." As a mat-
er of fact, he explained, drawing is
the "labour" part of this work.
Coming up with the right word or
phrase is actually the most chal-
cenging part of the job.

As he works at each cartoon, he
tries to put a twist on a familiar
image to capture the reader and
gain attention. For example, when
he poked fun at the broadcast net-
works for their endless daily atten-
tion to the Clinton-Lewinsky scan-
dal, he took the familiar network
call letters and changed them to
reflect the coverage. The cartoon
read: CNN-Clinton News Network;
NBC-Nothing But Clinton; CBS-
Clinton Broadcasting System; ABC-
All About Clinton.

Ramírez never loses sight of the
fact that the core of his work is
often humor. But while his car-
toons can sometimes produce
laughs, he knows that the overall
purpose is to produce a more seri-
ous result.

"The letters I receive, whether
they be commendations or con-
demnations, demonstrate that our
republic is secure and its citizenry
attentive," said Ramírez. "It is fur-
ther evidence that people are
watching, reading, cursing, and
participating in the national debate
and free exchange of ideas.

As a veteran journalist, Ramírez
offered some final words of
encouragement to his audience of
up-and-coming reporters.

"This is a great profession," he
concluded. "The work we do is very
important. We can have a tremen-
dous impact on the political
process as a whole."
Many student journalists dream of working for a major metropolitan newspaper or a national magazine. Others see themselves writing copy at radio and television stations or perhaps working on a media-related Web site. With the growth of electronic and print news outlets, there are more job opportunities than ever for budding journalists.

But mapping the road to a professional position requires planning and hard work. For many students, the path starts in high school and is more clearly defined during their college years. These students gain experience and skills working for thousands of college newspapers and radio and television stations as they publish issues or assemble newscasts.

And with the growing diversity of the nation's population spilling over onto college campuses, student media outlets are more than ever serving as the training ground for minorities who will be tomorrow's editors, reporters, and news media managers.

For many students, that training requires not only discipline and determination but a willingness to sacrifice other priorities.

Just ask Theresa Salinas, a sophomore at Santa Ana (Calif.) College and editor of *el Don*, the college's student newspaper. "When I became editor, everything else in my life, and I mean EVERYTHING—my family, my school student editor assigns stories, hounds student reporters to meet deadlines, supervises layout, deals with printers, writes editorials, and replies to letters.

But the other side of the coin, Salinas says, is that this is the best "hands-on" experience she could ask for. "This paper is totally written and produced by students," she explained. "And it is a great way to learn."

Salinas, who is 21 and hopes to be a professional editor some day, paid for—a form of tuition grant that is common at college newspapers. In addition to tuition payments, some schools are also offering small salaries or honoraria to their student reporters and editors.

At San Antonio (Texas) College's student newspaper, *The Ranger*, stipends range from $200-$400 per month.

"It's not much, considering how hard they work," said Irene Abrego, faculty advisor to the paper. "But it is somewhat of an incentive."

Abrego noted that the population of San Antonio is 53 percent Hispanic and that the staff of *The Ranger* reflects those demographics. For example, Hispanics on the staff include artist Alfred Perez and photographer Juan Orihuela—both earn monthly stipends for their work on the weekly edition of the paper.

But students working in college media are doing more than honing their skills as reporters, editors, and publishers. They also are getting lessons in ethics and responsibilities of the press. These lessons
often come with a dose of controversy and strike.

At Latiguadua Community (N.Y.) College, the student newspaper, The Bridge, became entangled in a struggle to survive after it printed a racist opinion piece that caused a debate over funding of the paper and led to several lawsuits. The paper folded in a cloud of contention and ceased to exist for a while.

Last year, under the leadership of editor Shawn Torres, The Bridge was revived and transformed into a glossy magazine which he and his staff created to “reflect and represent the open community on campus.” Latiguadua enrolls 5,000 students representing 104 nationalities. In the tradition of crusading journalists, Torres and his staff adopted the credo “Nosotros somos el futuro” (We are the future) and set about to change the image of The Bridge.

Internships

Working at college media outlets is an important step in building a career in journalism; however, most professionals recommend that students do internships in the field. The Associated Collegiate Press (ACP), the largest organization representing campus media, publishes a guide to internships at newspapers and magazines across the nation.

But students will most likely start by gaining experience at small community newspapers near their home. The ACP encourages college students, even first-year students, to work every summer, thus chalking up several internships on their resumes. Students might or might not get paid for these internships, but they are definitely the stepping stone to professional positions.

For students who have set their sights on landing a job in the national media, there is the Dow Jones Newspaper Fund, Inc. (DJNF), one of the most prestigious and comprehensive organizations offering internships for minorities. Last year, the fund hosted 114 internships from universities in seven states. The interns went to work at 55 newspapers across the country and, when they returned to college in the fall, received a $1,000 scholarship.

One former intern, Jose de Jesus Ortiz, who covers sports for the Bradenton (Fla.) Herald, began his career as a student journalist by covering soccer, basketball, and baseball for the school newspaper at Texas A&M. He did summer internships at some local papers but eventually took a Dow Jones Fund Internship at The Houston Chronicle and research internship at The Dallas Morning News Mexico City bureau.

“There wasn’t one day when I didn’t draw something from my internships,” de Jesus Ortiz said in a recent DJNF profile. And he sees diversity as a pressing goal for newspapers in the future. “I realize how drastically our industry needs more Latino and minority sportswriters,” he wrote recently. “Young journalists should seek internships and mentors to help them grow.”

Professor Abrego at San Antonio College agrees wholeheartedly with that view. She has encouraged her students to seek DJNF internships and cites the example of Estella Duran, past student editor of The Ranger, who has done internships at the Boston Globe and The New York Times.

Abrego also runs a workshop for high school students funded by the Dow Jones Newspaper Fund. One of the participants, Josie Garcia, wrote a story entitled, “Driving on a Trail of Tears.” The story examined training and competency of teen drivers, including a popular girl who died in a fiery crash on her 50-mile commute to high school. Garcia’s article, published in The S.A., the San Antonio College workshop newspaper, concluded: “The crash can only serve as a warning for other teen drivers each time they take to the roads.”

Looking back on her training in high school and at the DJNF workshop, Garcia said, “Three years ago, when I was first introduced to a journalism class, my teacher made me realize how powerful words can be. He also taught me how writers have the ability to leave the reader with a different emotion each time.”

There are many resources available to student journalists seeking scholarships or internships. The following is a partial list of organizations offering programs that are especially supportive of minority journalists.

English department faculty in cultivating student writing assignments for possible publication. As Nogueras said, “We want people to read The Bridge. We want it to be an essential part of the information process on campus. We want to get people involved.”

This year, newly appointed assistant features editor Jasmin Nogueras has brought what she calls her “passion for writing” to the task of producing the magazine. Nogueras and the staff have been heightening the buzz on campus to gain support for their cause. They have enlisted the help of the
California Chicano News Media Association
Joel Garcia Memorial Scholarship
University of Southern California
3706 S Hope St, Room 326
Los Angeles, CA 90007
(213) 744-2410
www.ccnma.org

Twenty to 30 scholarships are awarded to Latino students who are able to prove sincere interest in pursuing a career in journalism or mass communications.

Concerned Media Professionals Scholarships
Hispanic Alumni Association
University of Arizona
111 N Cherry Ave
Tucson, AZ 85721

Two tuition scholarships are awarded to Hispanic students who are enrolled at the university and plan to major in journalism.

Dow Jones Newspaper Fund, Inc.
PO Box 300
Princeton, NJ 08543-0300
(609) 452-2830
www.dowjones.com/newsfund

Offers 100 internships to college students to work as copy editors, editors, and desk editors in newspapers and 20 internships to students to work for on-line newspapers. Interns are paid regular wages by the news organizations where they work. Interns returning to school will receive $10,000 scholarships.

Florida Society of Newspaper Editors Journalism Scholarships
Eight scholarships are awarded to minority high school graduates who plan to attend Florida public community college. Scholarships are paid at $1,200 per year. Students should apply through the financial aid office at their community college.

Hispanic Link News Service/National Association of Hispanic Journalists
129 W St NW
Washington, DC 20004
(202) 833-0280
www.hlns.org

Five internships are awarded to Hispanic students majoring in journalism. Internships cover all branches of the media regarding print, radio, television, and online.

MALDEF Communications Scholarship Fund
6125 E Spring St
Burbank, CA 91504
(818) 504-4147

Provides financial support to Latino students enrolled in graduate or professional degree programs in communication, including print and broadcast journalism.

National Association of Hispanic Journalists
1105 National Press Building
Washington, DC 20005
(202) 662-7583
www.nahj.org

Scholarships ranging from $1,000 to $5,000 are awarded each year to students interested in pursuing careers in the media.

Student Guide to Mass Media Internships
Intern Research Group
Box 172
University of Colorado
Boulder, CO 80309

Lists internships available at newspapers, magazines, and radio and television stations across the United States.
Evelyn Martinez darts across New York City in her television station's sparkling white Chevy, the car's press plates signaling her purpose before she can even scoot up her video camera from the trunk.

One day, she covers the daily media conference with Mayor Rudolph Giuliani. The next, she is anxiously positioned outside a courthouse awaiting attorneys in a high-profile case. She's a fresh, young face among a band of seasoned veterans, camera operators, and reporters alike.

At Martinez's non-union station, New York 1 News, reporters often serve as videographers too. Despite the frenetic pace and rugged chores, Martinez dresses sharply each day, and rarely if ever loses her cool.

"I am nosy," she announces, when asked why she has selected this career route. "I love to know everything that's going on. I like to talk to people and eventually present their story in a fair way so the viewer can see both sides of the story and decide what is right."

At 31, Martinez is breaking into a business that long ago she doubted would easily allow her entry because of her ethnicity and her gender. "I thought it would be really hard," she admits, suddenly becoming more animated. "But if you turn on the television now, you see a lot of Latino women. The scene has gotten better, but it is still slow."

**Window Dressing**

Twenty-two years ago, a federal study of a sample group of network television news correspondents concluded that a mere three and a half percent were minority women. And of that group, none was Hispanic.

The report, *Window Dressing on the Set: Women and Minorities in Television*, revealed that "Minorities and women rarely appeared as newsmakers and furthermore, rarely served as correspondents" and that "minorities and women were considered to be neither significant nor important."

The face of network television reflected the largely white face of local television as well at the time, although the report discovered that in the major markets, television news was being delivered increasingly by minority and female correspondents and anchorpersons.

That report by the United States Commission on Civil Rights spotlighted a disturbing trend that many expected would be addressed in the coming years. But now, 22 years later, it appears that while there have been gains, "they have been moderate at best, and that the media workforce—not just television but radio and print—remains a largely White workforce."

A 1999 survey of the newsroom workforce by the American Society of Newspaper Editors disclosed in April that the number of minority journalists rose by only one-and-a-half percent since the previous year, now at 11.55 percent. And that the number of Hispanic journalists had "remained virtually unchanged," remaining at 5.46 percent of all working print journalists.

When it came to women, the numbers were similarly small. The ASNE survey found that women on daily newspaper staffs amounted to 20.35, with minority women numbering 2,920 or only 14 percent. Says ASNE president Edward Seaton. "We wish that the number of minority newshounds had increased more."

He added, in his statement, "Newspapers can't do business any more if they hope to present an accurate report of the increasingly diverse communities they serve. It will take unprecedented urgency, money, commitment, coordination, and advocacy."

Advocacy still remains strong and appears to be growing with each study. The National Council of La Raza noted in one report that Latinos are almost non-existent in the news media, hold few "gatekeeper" positions in network news operations, and are highly underrepresented as correspondents and anchors.

At the same time, La Raza pointed out that coverage of issues involving Latinos was similarly skewed, and not in their favor. The majority of stories focused on crime, immigration, welfare, and affirmative action.

"Hispanics are virtually invisible in the new media," says Lisa Navarrete, deputy vice president for public information at La Raza. On recent analysis, she said, found that there was only one Hispanic in the top 50 television correspondents in the nation.

There is no question that there has been a
increased interest in the Latino community," she says. "However, if you look at the numbers, they are still very, very bad. Newspapers are doing a much better job than television going out and recruiting and hiring minorities, but it's still not where we'd like it to be."

Trailblazing

María Hinojosa first wanted to be an actress, but let go of that dream after one too many rejections. So she became involved with a local radio station at Columbia University in New York City, where she spun Latin tunes and interviewed Latino personalities.

"That was my first experience, and it was all live," she says. "It was just what I wanted to do."

She stuck with it, and now Hinojosa can be heard on National Public Radio and seen on the Cable News Network (CNN). Her success speaks to a drive and enthusiasm that has quashed her initial insecurities, ones in which she worried about others questioning her motivations for suggesting Latino-oriented stories.

In 1985, Hinojosa became the first Latino hire at NPR's headquarters in Washington, D.C. The then-assistant producer swallowed her fears and pitched stories for her show, a news program called Weekend Edition with Scott Simon.

"Being the first Latina there, there was nobody I could bounce these ideas off of, and I was feeling out of place. It was a real challenge to me because I would force myself to believe that what I was going to say in a story proposal meeting was important, even though I was questioning myself. Is this right? Maybe I should just be quiet. I forced myself to swallow that insecurity."

"Inevitably, nine times out of 10 people were interested in hearing the stories," she says. But she recalls one awkward experience, when a popular NPR personality approached her after one segment and said, "Weren't you terrified to be in those neighborhoods?"

"I said, 'No. I've lived in those neighborhoods.' What happens is people forget that we have different experiences that depend on our relationship to how we grew up." The rewards for her drive came almost immediately; the show won a number of awards that first year.

Hinojosa, five years later, moved to NPR's New York office and carved out a beat covering youth issues and diverse communities. "I wasn't afraid to go into communities that other reporters were afraid to," she says. "My deep interest in getting those stories told weighed much more heavily. I always wanted to find a level of humanity in whoever I was interviewing."

Perhaps, she says, the most disturbing assignment she undertook was to infiltrate a skinhead supremacist group in rural Pennsylvania, one in which she met with a group privately and became friendly with some of its members. In one interview, she asked her subject, "What would you say to me as a Mexican immigrant?"

His response, she recalls, was "Well, just because I like you, I can give you this piece of advice: You should leave the country and go back home, because the face wars are going to happen, and you don't want to be killed."

Hinojosa, who joined CNN two years ago and reports on urban affairs issues, is paired with a Latino producer, Rose Marie Arce, an accomplished award-winning journalist with both a print and television background. Both often speak on panels to budding journalists.

Arce occasionally is questioned about diversity efforts by media outlets and believes they have become "somewhat hollow."

"I'm not sure why," she admits. "Perhaps there hasn't been an appreciation for why diversity is important. There used to be a combination of guilt and pressure to look good. But that pressure has subsided. It would have been more substantial if they felt it was important to have diversity because it produces better journalism."

Arce and Hinojosa say their teamwork provides a unique Latina voice in the business.

"Those of us who are committed to being good journalists and who are committed to telling untold stories have a huge responsibility to tell young journalists of all backgrounds, and in my case that's young journalists of color and Latinos, that what will make them the best journalists possible is to not become like everyone else," Hinojosa says. "Remember that being different and unique is a powerful thing, and don't silence your voice."

The voice of Hispanic journalists has grown louder. Membership in the National Association of Hispanic Journalists has grown to more than 1,600 since it was founded 18 years ago, and it has stressed diversity as a goal and studied trends to alert members to troubling patterns.

One recent survey found that only 112 of the roughly 12,000 news stories produced by network newsgroups focused on Latinos or Latino issues in 1997. That represented a 25 percent drop from the previous year.

That study showed that Hispanics represented just under one percent of the country's network news stories, even though Hispanics represent about 10 percent of the nation's population.

The Washington, D.C.-based group focuses attention on addressing such concerns, while helping Hispanics in the news media industry. Each year, it brings together journalists from radio, print, and television at a convention, at which a job fair is a key attraction.

"We have a lot of participation from broadcast and print to interpret members and convention attendees—and not just those looking for jobs but those who want to network and want people to track their careers and remember them..."
when opportunities come up, says Nancy Baca, the NAHJ's president.

This year, the NAHJ will be one of four minority groups to participate in the UNITY '94 conference in Seattle in July. During the last conference in 1993, more than 6,000 journalists attended. It's a conference in which journalists can not only network but share experience and learn what works and what doesn't work in the media market.

Leaders discuss diversity issues, how many newsrooms often talk about achieving more ethnic diversity but have diminished such efforts. Additionally, there are seminars to teach members everything from management skills to dealing with office politics.

In her role, Baca has been able to notice trends on where Latino women have assumed more positions and more positions of power, in the media. While she has more often seen a Latina by-line or a Latina face bringing viewers the news, she has not as often heard the Latina voice on the radio.

Often, progress hinges on geography. Larger urban markets are not alone in providing greater opportunities for minority women. Media outlets are studying demographics more and are striving to reach out to communities that have become less white and more diverse.

"I have noticed in Albuquerque over the last four or five years, they have hired more Hispanic females in this area than I've seen in the entire time I've lived here, which is all my life," Baca says.

Baca, who is now a features editor at the Albuquerque Journal, said the working environment for minority women journalists can be tough because of the lack of minority women mentors. The pay also is not as encouraging, particularly in the city.

"Some people leave the business altogether to get jobs that pay more, so that's one reason for the low numbers of minority journalists," she says. "People aren't sticking with it long enough to get management positions. Maybe some feel the openings are limited; they feel they aren't going to get promoted. Hispanics are not getting promoted in some places."

Elizabeth Llorente has been a reporter at The Bergen Record in Hackensack, N.J., for the last decade. She has not set her sights on a management position. Instead, she has crafted a career out of a beat that has won her considerable notoriety and acclaim in the state.

Llorente, who is of Cuban descent, covers immigration issues for the state's second largest daily newspaper. Originally, when the native New Yorker was offered the position, it was framed to reflect a positive, fluffy premise: covering immigrants who realized the American dream.

But Llorente, who earned her stripes reporting on town hall politics, diplomatically accepted the job. And then maneuvered her coverage into an untapped area in the region. She reported on the changing communities in Bergen County, one of the most populous in the state, researching issues of importance to new immigrants and brought global issues into her readers' living rooms.

"I was determined not to make this into an 'American Dream' beat," the 38-year-old says, "because that's not the whole story of immigration in the United States. The other part is the hardships that many immigrants face. That includes discrimination, abuse—to a minority."

Llorente views her role not as an advocate but as a storyteller. At the University of Missouri, she says, she was the "best gossip," someone always curious about why things were. She says that even then, as now, she wanted to understand as many different perspectives as possible.

"That is a skill you develop when you grow up with two cultures and two languages," she says.

But she disputes contentions that ethnicity offers an immediate edge on hiring. "I think that being a minority is overestimated as an advantage by non-minorities. It will help you as long as you have the talent, too."

She says that despite the low visibility of Latinas in the workplace, she has always been a "workhorse," someone who set her sights on a career in journalism. "I have ink in my blood," she says. "I see it as a part of me, like my brown eyes, like my last name. Llorente."

Sobering Assessment

While a number of minority journalists persevere, many leave in disgust, citing a lack of encouragement, pay equity, mentors, and opportunities. One study offered a sobering assessment of the newsroom environment.

A 1993 survey by the Associate Press Managing Editors discovered that a third of all journalists were dissatisfied with their jobs, an increase from seven years earlier, when a quarter of all journalists were displeased.

Mercedes Lynn De La Torre, who teaches journalism at the University of Texas in Austin, says that studies have shown that almost half of the journalists with graduate degrees are not happy with their work, and even more minorities. 62 percent, are displeased: 16 percent of those wanted to leave the profession altogether.

"When you have figures that show that as recently as 1995 there is a lot of job dissatisfaction among journal-
ists who are probably the most sought-after of journalists, it’s going to be hard to diversify,” she says.

According to the journal, *Journalism and Mass Communication Educator*, 10 percent of all bachelor’s degrees were received by African Americans, and six percent went to Hispanics in 1997. Six percent of all master’s degrees went to African Americans, and three-and-a-half percent to Hispanics.

The figures can be interpreted to show that corporations shouldn’t be singled out for failing to advance diversification in the workplace. “I have trouble blaming corporate America as the bad guy in this situation,” De Urrarte says. “Some of the blame has to be meted out to journalism education” because “if you don’t train them, then you can’t hire them.”

Such training begins in the lower grades, when many students aren’t treated to extracurricular activities like school newspapers or television production studios. Often, she points out, schools don’t provide journalism classes.

At college comes the realization that the salaries for journalists, especially those just beginning in the business, aren’t lucrative. Many students are dissuaded from pursing a career in journalism by the responsibilities of paying off college loans. And often, De Urrarte points out, internships are unpaid. De Urrarte also faults diversity efforts that focus primarily on “genetics,” but not intelligence.

“Everybody is defining diversity as if by virtue of somebodies looking different you are going to get a different product and it’s going to do a better job. But if you don’t have intellectual diversity, you are not going to have much difference.”

That diversity, she says, is “people who do not at all think alike nor who are forced to define newsworthiness in the same ways by newsroom editors.” She adds, “The industry is going to have to look at a number of challenges in ways that are more creative than they have been in the past, and there are some indications they may be ready to do this.”

The Changing Market

*TV Guide* recently hired Chiqui Cartagena as a consultant to reach out to Latina readers and viewers. Since last November, the 3-year-old has been developing projects for the Hispanic community. She is a voice behind the scenes but effectively chart the magazine’s future in public.

“They wanted me to help them understand the needs of Hispanic TV viewers in the United States and abroad,” she says, “and to do an overall cost analysis of how *TV Guide* currently serves those needs, and how we can improve them.”

Cartagena sees this as a sign of progress in a field where progress has been slow. She has worked in television, newspapers, and magazines for more than a decade, and has seen newsrooms with little diversity. The Latina faces have become less visible with each step up the corporate ladder.

“My experience has been more of being the only Latino at the table when working for American corporations and often the only voice striving for coverage of Latino issues,” she says, pausing. “Often when I get hired by big corporations, I am the highest-ranking Latino at that corporation.”

She says she has not minced words, at the risk of being perceived as an advocate. Often, she says, more “jailed” professionals view her as armed with an agenda that won’t meet the needs of their wider audience. She says she watched others navigate this avenue and often struggled to explain a story’s or issue’s relevance.

“When I get that reaction, my work is much more difficult to get done,” she says.

That scenario has changed in recent years. She last worked for *People en Español*, where she was a senior editor. In recent years, she has noted a growing awareness of the growing Latino community in the nation and a newfound respect for what she, as a Latina, brings to the table.

“I see myself as one of those frontier women in the sense that bringing me on and more like me is a step in the right direction, and I think corporations are realizing they need more voices around that table,” Cartagena says.

Minority journalists, educators, and experts who have studied trends involving minorities in the media and Latinas breaking into the business, say that the future will look only as bright as the views of the corporations that run the media outlets. They say that decisions to improve diversity must be well thought out and that there must be a concentrated focus on improving diversity for all the right reasons, not simply to play a numbers game.

At the same time, budding journalists have to understand their mission as well from the start.

“I think a lot of young Latinos who want to get into the media think that the only way they’ll be able to succeed is by silencing their uniqueness as opposed to bringing that perspective into the newsroom,” Hinopoa says.

Martinez, who admits that she’s still got much to learn, says she’s a fighter. She’s already working in the No 1 market, though at a small station, where she’s able to learn and grow. “We need to push a little more,” she says. “If someone says to me, ‘You’re not right for the job,’ I go somewhere else. I don’t just give up.”

Hispanic Education Action Plan

Advocates Applaud Plan...But Propose Fine-Tuning

by Inés Pinto Alicea

Latino education advocates are funding a White House initiative to significantly boost funding for several federal education programs aimed at improving educational opportunities for Hispanics and lowering the Latino dropout rate, but the advocates expressed concern that not enough is being done to assure that those programs will better serve Latinos.

The initiative, formally called the Hispanic Education Action Plan, was designed to increase funding for federal programs that already serve large numbers of Hispanics, such as Hispanic Serving Institutions (HSIs), and to make sure that programs such as Head Start and TRIO, a group of programs designed to help disadvantaged youth get through school and move on to college and beyond, reach more Hispanics, said Jonathan Schur, associate director for domestic policy for Vice President Albert Gore.

"To help these kids, you have to strengthen the institutions where these kids are," said Schur.

While Latino advocates applaud the effort, which started in 1998 with an increase in funds for many federal education programs and is being supplemented with an additional but increase in federal funds for fiscal year 2000, these advocates say that more needs to be done and more effort needs to be expended.

The plan is good at getting to issues affecting the academic progress of Latinos, but it's short-sighted because it does not go far enough," said Guadalupe Salas, vice president for governmental relations at the Hispanic Association of Colleges and Universities. Some of the areas that still need to be addressed, he said, include strengthening federal vocational and technical education programs to better serve Latinos, improving programs that encourage Latinos to pursue higher education beyond the bachelor's degree so that Latinos move into college faculty positions, and significantly increasing funding for HSIs.

"They increased funding for HSIs, but they need more because they are training so many of our young people," said Salas. "The money [$28 million in fiscal year 1999] that was targeted will not be quite enough because we have so many colleges and universities [his 135 community college and four-year institutions that are designated as HSIs]."

The Hispanic Education Action Plan is the result of months of consultation with the Congressional Hispanic Caucus, education and Latino organizations, and the White House Initiative on Educational Excellence for Hispanic Americans. It is a response both to the final report of the Hispanic Dropout Project, titled "No More Excuses," and to the earlier recommendations in the report of the President's Advisory Commission on Educational Excellence for Hispanic Americans, titled "Our Nation on the Fault Line."

"The message of this initiative is clear: We want Hispanic Americans to be full partners in America's prosperity," said Vice President Gore of the initiative. "America's future prosperity depends on our ability to provide a sound education to all our children. The president's Hispanic education initiative will offer Latino students a chance to develop their full academic potential so they can contribute the full force of their talent to the success of America in the 21st Century."

The Hispanic Education Action plan was launched in the fall of 1998 when Congress approved $520 million in increases for the fiscal year 1999 for the following federal education programs:

- Title I
- Bilingual Ed
- Adult Ed
- Comprehensive School Reform
- TRIO
- HSIs
- Migrant Ed
- Equivalency Program (HEP)
- Col Assistance Migrant
- Program (CA-P)
- Migrant Youth Job Training Program

In addition, two new programs, Gear Up (to support programs for students in college and teacher recruitment and training) which improves training for teachers dealing with bilingual and multicultural students) received funding. Moreover, the early childhood program Head Start was later given a boost in funding.

The programs that will receive the increase generally do not designate benefit according to ethnic or racial categories, rather, they target students or school
according to poverty levels or to meet specific challenges, such as schools with large populations of students who speak little English or schools with high dropout rates. The White House noted that a large number of Latino students would qualify for all of the programs under these standards.

About 14 percent of the school-age population is Latino; by 2020, the proportion will grow to about 22 percent. Only 21 percent of Hispanic three-year-olds are enrolled in preschool programs compared with about 40 percent of Whites and Blacks. Latinos also have had the highest dropout rate (more than 30 percent) of any major ethnic group in the country since 1998. Moreover, about 5 percent of the students who are classified as limited-English proficient are Latino.

"These funds are not going specifically to the Hispanic community, but a big chunk is going to Hispanics," said Alejandro Cabrera, a spokesman for the vice president. "This is a priority for the vice president. He is aware of the high Hispanic dropout rate.

While Roberto Rodriguez, school reform coordinator for the National Council of La Raza, an Hispanic advocacy organization, praises the White House effort, he said that he believes it has a number of shortcomings that need to be addressed.

"Some of these programs do serve high numbers of Latinos," said Rodriguez. "But there seems to be no system that accounts for making sure that the money is getting to Latinos.

Rodriguez cites the TRIO programs as an example of federal largesse failing to reach a significant and growing portion of the U.S. population—Latinos. The TRIO programs were created to serve disadvantaged children and youth by providing intervention services, such as outreach to school dropouts, to increase secondary school completion rates, and to provide disadvantaged students with support services as they strive to complete postsecondary education. Two big components of TRIO are student search, which provides counsel-
The University of New Mexico is an institution of higher learning where dreams come true for students of many backgrounds, in particular, a number of recently honored Hispanic undergraduates. This past semester, on March 25th, President William C. Gordon proudly announced that U NM student and Albuquerque native Juanita Chamiza Atencio-Pacheco, a junior majoring in political science and economics philosophy, was named a 1999 Truman Scholar, as a result of a rigorous national competition. The prestigious scholarship carries a $30,000 award.

With this announcement, Atencio-Pacheco became the third U NM student selected as a Truman Scholar within the past two years. Last year, Manuel Montoya, who is also a Rhodes Scholar, and Fred Melendres were selected to receive Truman Awards.

At the time of the Atencio-Pacheco announcement, Gordon said he was "extremely pleased" with her selection, and proud too of the earlier achievements of Montoya and Melendres. "This selection demonstrates once again that our students are very competitive globally. It also speaks very well for the quality of U NM's academic programs. For three of U NM's students to receive this honor within a period of only two years is truly remarkable."

Little did Dr. Gordon realize that a mere five days later, he would make yet another joyful announcement. On March 30th, U NM honors student Roberto G. Lopez, a sophomore double majoring in biology and economics, the son of Gerardo and Anna Lopez of Albuquerque, was named a 1999 recipient of the prestigious Barry M. Goldwater scholarship. Lopez, who will receive a two-year, $15,000 scholarship, is the first U NM student to be named a Goldwater Scholar since the program was established in 1986. Dr. Gordon found himself reflecting again on the success of U NM and on the achievements of these able students. He observed, "These are the most prestigious, most competitive scholarships there are. It is extremely difficult for a student to win any one of these highly regarded awards. We at U NM are very proud of our students and their enormous achievements."

Well, Dr. Gordon, we have another achievement for you to announce. . . The Hispanic Outlook welcomes the University of New Mexico to our distinguished list of Honor Roll inductees. Congratulations to you, and to your wonderful institution.

These personal triumphs indicate that academically U NM is shoulder to shoulder with the best in the world. In News and World

are found to remain state residents, strengthening the state's economy and improving the quality of life.

UNM is one of the state's largest employers, in the fall of 1997 employing approximately 18,600 people, including 5,200 students, with an annual payroll of approximately $334 million. The annual budget for the University rose to about $994 million in FY'98. It is estimated that employment-related activities and expenditures produced 28,900 additional jobs elsewhere in the economy.

UNM strives to meet the state's current needs through a combination of teaching, research, and service activities. The University plays an important part in the daily lives of many New Mexicans in so many ways. The school houses the state's only one trauma center, hosts more than 250,000 patrons annually at cultural events, and entertains more than 500,000 spectators each year at athletic events. In addition to graduate and undergraduate degree-seekers who come from the state and elsewhere, many New Mexicans find educational opportunities at the University. The University also offers them hope and a place to learn a great range of academic and life-improvement subjects.

According to University spokesperson Frank D. Martinez, UNM's Division of Continuing Education and Community Services has a long and distinguished history of reaching out to nontraditional learners and giving them an abundance of educational options.

"No other component of the University of New Mexico affects the community as broadly as does the growing UNM Division of Continuing Education and Community Services," Martinez declares, adding that the division is often referred to as UNM's "shadow university." He says that the Division annually provides certificate programs, cultural events, and instruction in many topics, both serious and light, as well as other services, to some 35,000 people of all ages and backgrounds. This past year, the Division observed two very significant milestones: its 70th anniversary and its expansion into a new, 30,000-square-foot, two-story educational complex, located next to the Division's existing conference center. Jeronimo Dominguez, dean of the Division of Continuing Education and Community Services, predicts that the $3-million facility "will serve as an innovative and comfortable center that inspires life-long learning and community interaction." Dean Dominguez adds, "The new building is the result of the community's confidence in the division. The South Complex, as it is known, brings program and administrative offices together for the first time in six years." The South Campus houses Computer, Professional Development, and Personal Enrichment Program offices.

UNM offers more than 4,000 classroom courses. Its degree programs range from associate through doctoral. The University is nationally recognized for its programs in Latin American Studies, anthropology, photography, biology, nuclear pharmacy, laser optics, and environmental studies. The Latin American and Iberian Institute (LAII) is consistently rated one of the nation's top ten. The LAII publishes the Latin American Research Review. The Southwest Hispanic Research Institute is one of the long-term members of the Inter-university Consortium for Latino Research. In addition to an academic program in Chicano Studies, there is a minor and research centers for Regional Studies, Spanish Colonial History, and Southwestern Studies. More than 128,000 degrees have been awarded since the school's inception. Today, UNM main and branch campuses offer 0+ certificates, 60 associate's degrees, 143 bachelor's degrees, 98 master's degrees, 10 educational specialist certificates, and 9 doctoral and first professional degrees, including degrees in law and medicine.

The University comprises 11 degree-granting schools and colleges: Anderson Schools of Management, Architecture and Planning, Arts and Sciences; Education; Engineering; Fine Arts; Law; Medicine; Nursing; Pharmacy; and University College. Statistics from the fall of 1998 show that of the total of 30,241 students enrolled at all campuses and graduate centers, 42.7% came from underrepresented groups (109 percent Native American, 21 percent African American, 2.8 percent Asian, and 26.9 percent Hispanic). Total degrees awarded in 1997-98, on the main campus, were 22.7 percent Hispanic. UNM's distinguished School of Law and leading School of Medicine have a 25 percent enrollment of Hispanic students. The UNM faculty represent an exceptionally diverse range of academic disciplines, with some 88 percent of the 1,611 Fall 1997 full-time faculty on the main campus holding an earned doctorate or other terminal or professional degree. On the main campus in 1998, there were 92 Hispanic tenure-track faculty, or 10.4 percent of the group of professors, associate professors, and assistant professors. That gives UNM one of the highest percentages of Hispanic faculty in the nation.

An additional point of pride is the announcement this spring that UNM's Center for High Technology Materials (CHTM) was awarded $5.4 million in a nationwide competition. This is a five-year award in a Multidisciplinary University Research Initiative (MURI) competition for its proposal, "Deep Sub-Wavelength Nanolithography." Research is a high priority at UNM, and during FY'98, federal agencies, industry, national laboratories, foundations, and the State of New Mexico provided $1759 million in contracts and grants for UNM-sponsored projects, ranging from engineering to medicine and education to the humanities. Among UNM's outstanding research units are the Cancer Center, the New Mexico Engineering Research Institute, the Center for High Technology Materials, The Center for Micro-Engineered Ceramics, The Center for Non-Invasive Diagnosis, and the High Performance Computing Education Center. UNM is a Carnegie Research 1 university, one of 88 in the country; but one of only two in the entire nation that are officially labeled "Hispanic-serving institutions." UNM was the first research university to become a member of the Hispanic Association of Colleges and Universities (HACU).
Media Women on Women in Media

What motivates women to fight the odds and forge careers in the competitive and often cutthroat world of broadcast journalism? Is it the desire for fame and glamour, or the lucrative salaries that are often associated with this career choice?

Money is not what motivates Joanne Santiglia, the news director and anchor for Time Warner Cable's Channel 10 (located in northern New Jersey). Rather it is the love of working in the industry.

And working in TV or radio can be one of the most creative and rewarding careers for women. At least that was the sentiment when Santiglia and some of her colleagues spoke at a recent forum about women in media. The participants included Monica Pellegrini, co-anchor of the nightly Fox 9 SportsCast; Lynne Grasz, president of the New York City Chapter of the American Women in Radio and TV (AWRT), and Linda Moats, engineer with WNJU-TV, part of the Spanish language Telemundo television network. Hispanic Outlook also spoke with Gina Barros, a reporter for WNJU-TV.

The group discussed career paths, the television industry, breaking into the business, and what it was like starting out in a field dominated by men. The women also shared their personal experiences, gave plenty of advice, and answered questions from audience members in attendance at the forum.

Monica Pellegrini, who won an Emmy and an Associated Press Award for Sports Reporting, said she believes that all of the forum participants considered themselves journalists but have chosen to explore different paths within the industry.

"Mine is particularly neat because I am a sportscaster," says Pellegrini. "When I started in this field nearly 15 years ago, there weren't a lot of women doing what I'm doing. I was a journalist, but I chose a man's branch of journalism to break into it."

Pellegrini says that being a woman in the field was "quite difficult at times," but also "rewarding." She recalls the early part of her career, when she knocked on the doors of nearly all the TV stations in the North and Southeast, hoping to find someone who would give a woman an opportunity to cover sports. Her first women sportscasters only fueled her ambition.

It also didn't hurt that the owner of the TV station was a woman, one whom Pellegrini believes helped keep her on the air.

"Women were sticking together at the time," she says. "If there was one woman behind me and 100 men who hated me at that time, at least that one woman had the power.

Joanne Santiglia, who began her career as a student at Seton Hall (N.J.) University, where she was a news director of the campus radio station, encouraged media students to gain experience at their own college radio stations.

"I think it's an excellent way to begin a career," she explains, "if you want to end up in radio—particularly in TV news."

Santiglia said that more jobs are available in radio and it's an easier arena in which to begin a career. It is also not too difficult to make the transition from a career in radio to television. And jobs in television are not solely in front of the camera.

"I would encourage students to consider working behind the scenes as well, because that's where the interesting stuff goes on," says Santiglia. "That's where you can be in the field, meet newsmakers, meet personalities. That's where people will share their stories with you."

These "behind the scenes" people include Lynne Grasz and Linda Moats. Grasz, a sports director at WABC, Inc., the president and CEO of Grasz Communication, a company she founded in 1991. She attended the University of Nebraska, and while a student there, she hoped to become an on-air reporter, but was frequently discouraged by others since at that time women were not on the air. But lacking female role models in the industry didn't stop Grasz from succeeding.

"In my entire career, I've never had a mentor. I've been my own mentor, or my friends have been my mentors," she explains. "Any negative reinforcement she might have received was..."
challenged into developing her writing skills and achieving career goals. After networking, interning, and making lots of sacrifices, Grasz began her career as a newspaper editor for United Press International in Detroit. She moved up to a variety of positions, including that of director of communications for CBS in New York City.

"If I could leave students with any advice, it's to take risks," said Grasz. "I look around and see who the successful people are—and they are all risk takers."

Linda Moats can be considered just that—a risk taker, fulfilling a job in the technical part of the field, where women have been underrepresented. After finishing college, Moats wondered how she could secure a job in this competitive industry. She was advised to obtain an FCC license and try entering the field as an engineer.

"Well, 21 years later, I'm still on that same road. And there have been a lot of challenges along the way. But it has been a wonderful and rewarding career, and although it's engineering, it hasn't been just one-dimensional," says Moats.

When these women were asked about the most fulfilling aspects of their careers in television, the answers ranged from the abilities to tell a good story accurately and on deadline, to achieving their best work and to being a good communicator.

Mónica Pellegrini also answered her share of inquiries about being able to enter the men's locker room after a game, to which she replied: "I'm in the locker room and I'm looking at my shoes all the time."

In a separate interview, reporter Gina Barroso of the Telemundo television network and host of Hispanic Horizons, a public affairs show, spoke about her passion for her work: "I think I'm a privileged person to be able to work and do what I love... Every day I learn something new," she says. "Every day is a different chapter in a book. It's never the same."

Barroso finds that even when she covers the same types of stories, such as police brutality, they are each unique. It is through the development of the human-interest side of every story and through the different people involved that each assignment takes on a unique angle. Moreover, this dimension keeps Barroso learning and keeps her job interesting.

But in general, Barroso, a five-time Emmy nominee, believes women are still treated like second-class citizens in the field. "We're still not allowed to age gracefully on camera... You have to be a certain weight. You have to have a certain look. And, I think that men get away with a lot more," she says. However, she is hopeful that as more women are empowered behind the scenes and land such jobs as news director and producer, changes will be made in front of the cameras. Maybe that is when the public will be seeing not only more women on-air but older women in the forefront.

She also thinks that changes are already taking place in the field, such as a rise in the number of Hispanic women on television. "I think it's a good time for Hispanic women in general in this business," says Barroso. "But I think we also need more Hispanic people behind the scenes."

"I think it's a good time for Hispanic women in general in this business," says Gina Barroso, host of Hispanic Horizons, Telemundo TV network. "But I think we also need more Hispanic people behind the scenes."
"Americanos" Debuts at Smithsonian

BY ADALYN HIXSON

Back in March, Time Warner announced that it had joined American History, with the formal opening of a traveling photography exhibition organized by the Smithsonian Center for Latino book of portraits, essays, and commentary by many notable figures in the Hispanic community. "Americanos has been a labor of love and vision to support an effort that honors the generations of Latinos who have helped make the United States as great and as strong as it is today."

As reported in past issues of Hispanic Outlook, Edward James Olmos is a community activist who dedicates substantial time to working on behalf of Latinos. Film and stage star Rita Moreno and musician Carlos Santana have worked extensively with him on a program to reduce school dropouts. Olmos is a scheduled speaker at more than 150 schools, juvenile institutions, and charitable events a year, often addressing young people directly with his persuasive motivational messages about pride and possibilities.

Time Warner Chairman and CEO Gerald Levin, in announcing the project, expressed his own pride in the support Time Warner's businesses are giving the project, calling Americanos "indicative of our commitment to the Latino community and to fostering a greater understanding of the important contributions made by Latinos to American culture."

The Olmos Connection

Olmos Productions Inc. has a vision—to develop quality entertainment with socially relevant and
educational content—and several missions: to document the experiences of Latinos in various media, including nonfiction documentaries, feature films, and photo documentaries; to create culturally diverse programming for network television, focusing on Latino, Asian American, and Native American works; and to increase the number of Latinos working in the entertainment industry by developing craftspeople from different disciplines.

The company began in 1980 with the production of The Ballad of Gregorio Cortez. Since then it has helped produce feature films such as Stand and Deliver, Talent for the Game, American Me, Roosters, and Mingoes.

Olmos Productions is concerned over the high level of violence in our society and is committed to “doing its part” in addressing the issue. According, its documentaries include Lives in Hazard, which is about gun violence, and It Ain’t Love, which deals with date violence. These productions are two of a three-part series on violence in America and its impact on youth. The third documentary will center on gun violence.

Throughout its history, Olmos Productions has helped to produce hundreds of public service announcements. The company is also involved in extensive outreach projects in communities across the country, ranging from gang and domestic violence to AIDS awareness.

Since 1995, Olmos Productions has been located at the ABC Entertainment Center, and has contracted with ABC to develop diverse programming, including miniseries, sit-coms, and movies made for television, in what Olmos calls “a significant step for the Latino community.” Production of Americanos is another such step.

The Traveling Exhibition

The centerpiece of the project is the exhibition, which presents an intimate portrait of the Latino community through the work of 30 prize-winning photographers. The 120 photographs in the exhibition are organized around themes such as family, community, work, and sports, and attempt to reflect the breadth and variety of the Latino experience.

At the Smithsonian from March 27 through June 6, the exhibition next traveled to the Museum of the City of New York, where it will remain from September 15 through January 2, 2000. The next stop will be the Eiteljorg Museum in Indianapolis, January 22 through April 16, 2000. Additional tentative stops include Chicago and San Antonio, with 12 cities to be visited in a five-year period.

This important collection of photographs reveals people who are diverse in culture, color, ideas, and dreams, who share a common desire to make life better for themselves, their families, their neighbors, and the nation,” said Olmos.

Each of the six sections of the exhibition is introduced by personal statements written by prominent Latino writers or citizens. They include Carlos Fuentes, Julia Alvarez, Sandy Alomar Jr., and Celia Cruz. The photographs address such issues as national origin, education, religion, economic status, and language.

The photographs commissioned for the exhibition were selected by a distinguished jury of photojournalists, including Pulitzer Prize-winners Michael DuGille, picture editor, Washington Post, and José Gálvez, director, Mexican American Cultural Art Center; Mark Hanoosy, director of photographs, Chicago Tribune; and Liliana Nieto Del Rio, whose photographs appear regularly in the New York Times and the Los Angeles Times. Photos by Gálvez and Del Rio also appear in the exhibition.

Corporate support for the exhibition came not only from Time Warner but also from 15 West and from Farmer’s Insurance.

Solomon D. Trujillo, president and CEO of US West wrote of Americanos, “My heart and my head both told me this was something people would love to see. In the West and across the nation, Latinos have made wonderful contributions to our nation’s culture. Their depiction through photographs taken by the nation’s best Latino photographers has great appeal.

“It’s about community. It’s about family. It’s about dreams. And it’s about pride.”

Trujillo, who sponsored the show with Olmos in Los Angeles, also said, “When you get Eddie Olmos and the Smithsonian working together, you know you’ll get excellent results.”

Americano—the Book

Filled with bilingual essays, poetry, and commentary from exceptional artists such as Carlos Fuentes, who wrote the introduction, and Maya Angelou, Americanos, the book, also succeeds in capturing the astounding diversity and energy of today’s Latino American communities.

The people gathered therein represent a wealth of Latino nationalities—Cuban, Panamanian, Puerto Rican, Mexican, Argentine, and an incredible variety of experiences, including those of astronauts, musicians, veterans, cowhands, farmers, and White House staffers. Readers can look into the lives of such celebrities as Gloria Estefan, Andy Garcia, and Tito Puente as well as share in
meaningful moments in the lives of everyday heroes.

Editors of the Fo-page book are Olmos, Dr. Lea Ybarra, and Manuel Monterrey. Dr. Ybarra is executive director of the Institute for the Academic Advancement of Youth at Johns Hopkins University. Ybarra has received many awards for her teaching, research, and community activities, including Hispanic Educator of the Year, the Rosa Parks Award for Outstanding Community Service, Hispanic Women Making History and Business/Professional Woman of the Year.

Monterrey is a photojournalist. He began his career with the Associated Press in Washington, D.C., was an assistant chief photographer for the Journal Newspapers, and was chief photographer and photo editor for Black Issues in Higher Education. Introduced in the spring, this Little, Brown and Company publication is available in hardcover and in paperback.

Americanos—the CD

Americanos: Latino Life in the United States-A Musical Celebration is a journey through the myriad styles of Latin American music. Including Latin jazz from Tito Puente and Eddie Palmieri, classic salsa by Celia Cruz, Afro-Cuban dance rhythms from Willie Bobo, Tejano swing by Flaco Jimenez (accompanied by R. Goober), producer of the Grammy-winning Buena Vista Social Club, raza rock from Santana and War, and more. Ruben Blades, Los Lobos, Pedro Luis Ferrer, Frankie Negron, Mark Ribot, Los Cubanos Postizos, and Yuda a los Puebros are represented.

Younger Latino artists are highlighted as well, among them the L.A.-based hip-hop rock and roll collective Oomath and Mexican American singer Thula.

The album closes with a selection performed by Paquito D’Rivera, accompanied by the Orchestra of St. Louis.

Released by Atlantic Records in association with WEA Latina, this compilation was produced by Steve DeBro.

To "celebrate the spirit of Americanos," a contribution was made by Warner Music Group to the Hispanic Scholarship Fund and the Hurricane Mitch Relief Fund.

The HBO Documentary

Conceived and co-produced by Olmos, and directed by the Oscar-nominated team of Andie Young and Susan Todd (Clues in Hazard), Americanos: Latino Life in the United States features three- to six-minute profiles filmed in Los Angeles, San Diego, New Mexico, Illinois, Miami, New York, and other locations, focusing on Latino-American individuals or groups and the unique ways in which they express their culture and individuality.

The documentary makes the point that Latinos are not one nationality or one culture, but many.

It highlights the contributions made by Latinos to our country, emphasizing that we are a nation of diverse backgrounds.

Set to debut on HBO this fall, Americanos includes segments on a border patrol agent Garvey, her and down "like bunnies." And to Espanola, New Mexico, 40 miles north of Santa Fe, for a celebration of the settlement of the New World by the Spanish conquistador Oñate with horses, costumes, and mariachi.

Performance artists Guillermo Gómez-Peña and Roberto Silva of L.A., attack misconceptions about Latinos, exaggerating Latino stereotypes to make their audience feel what it is like "to be absurd, to be the other."

For HBO, executive producer of Americanos is Sheila Nevins; supervising producer is Nancy Abraham.

This story was compiled from materials provided by Atlantic Recording Corporation, Warner Music Group, HBO, Little, Brown and Company, Olmos Productions Inc., Smithsonian Institution Inviting Exhibition Service, Time Warner and I West.
Good News for the Friends of Diversity

BY TED OVIATT

Every so often the friends of diversity take action, boosting the spirits of those of us who could otherwise remain dismayed by the anti-affirmative action climate that seems to dominate our lives as well as the news. Over the past seven years, the Leadership Alliance, centered at Brown University, has encouraged and supported the dream of graduate study for nearly a thousand students from the underrepresented minorities. This has been achieved by an auspicious link between “haves” and “have-nots,” bringing together prestigious Eastern universities (including all of the Ivies), ten historically Black colleges, the University of Puerto Rico, and several tribal colleges in Montana.

Happily, other “haves” from both the private and public sectors have jumped on the bandwagon and been financially supportive. Names like the Howard Hughes Medical Institute, the NIH (National Institutes of Health), and the NSF (National Science Foundation)—all public—have been joined by IBM, Citibank, Hewlett-Packard, and the Schering-Plough Corporation to work together to increase the number of underrepresented minorities in graduate school.

To achieve this end, a consortium of twenty-five colleges and universities was formed in 1992. Given the national movement against “special” arrangements for minority candidates, which preceded the high profile cases in Texas and California but was evident even then, the focus would be on graduate research opportunities for African, Hispanic, and Native Americans. While the relatively brief period of affirmative action had increased significantly the numbers of these minorities in colleges and universities, the playing field could not and still cannot by any means be considered to be level.

Indeed, the bumps in the field are perhaps best revealed at the graduate level, where a serious shortage of underrepresented minorities exists. The numbers especially in scientific research, lag far behind those of Whites and Asians—in many cases so far behind as to be statistically negligible. Jeffrey Mervis, writing in Science Magazine for August 28, 1998, calculated that “while African Americans, Hispanics, Latinos, and American Indians comprise 23 percent of the U.S. population, they make up only 4.5 percent of those holding scientific doctorates.”

Sadly, efforts to increase these numbers have recently been blocked in the courts, which have
found such "affirmative action to be discriminatory at the expense of minority students. The Meris article, entitled "Wanted: A Better Way to Boost Numbers of Minority Ph.D.s," reported the end of an NSF program that reserved a portion of its prestigious graduate research fellowships for minority students seeking to launch a career in science.

NSF had held a separate competition for underrepresented minorities, thereby reserving 15 percent of its 900 fellowships for minorities. The decision to abandon the program resulted from a White student's lawsuit claiming that the separate competition was discriminatory.

This desire to put the gears of progress in reverse had also reared its head in California when the university Regents followed the wishes of the voters who had passed Prop 209, and the "set-asides" of affirmative action were discontinued, first at the graduate level, and now at the undergraduate level as well. Likewise, in Texas, the Hopwood suit has reversed 40 years of progress for civil rights and poses the threat of "re-segregation" in Texas, according to the university president.

"These setbacks hurt our people, our schools, and our science. We want to see the same opportunities for everyone; we want the richness that diversity brings to our schools; and in an area that is seeking cures for cancer, AIDS, and other equal opportunity killers—none of us wants to bypass any potential prize-winning scholars."

Hence, the Leadership Alliance has placed its emphasis on preventing the loss of talent by finding it early—to increase the scope of choice for the able minority student and to tap a neglected pool of potential problem-solvers for society at large. In 1992-93 the Alliance's Summer Research Early Identification Program came into being. Nineteen weeks of mentoring at 18 research institutions were fully funded for qualified minority students, who gained not only from the knowledge and the contacts but also from the opportunity to have the hands-on experience that tells us if this is the kind of work we are going to enjoy. A medical student who never considered research as a career could find either that he or she preferred this exciting endeavor of working directly with patients, or that research was not his or her cup of tea.

During more than forty years of teaching, I have seen more than just a few young people who thought they wanted to teach—until that hit the employment market each year.

One current Alliance fellow, a biology major at Morgan State, relates especially to the resume-enhancing aspect of her internship, pronounced by the Class of 1993. She says, "This gives me the opportunity to advance, to go a step above, to have an internship experience and a research experience. Graduate schools want to see people who've gone a step beyond just going to class."

Individual successes and perceptions show that the improved environment and expanded opportunities provided through the Leadership Alliance really work for the students. Sheila Rodriguez, a Brown psychology major of the Class of 2001, used the Early Identification Program internship as a smooth transition to Brown's by environment. She says, "I got into the SR [Summer Research]-EIP before I got accepted into Brown. It was very convenient—the summer program was great training for Brown. I'm the first one in my family to go to college and I want to go as far as possible. I have to take the opportunity."

Wayne Wilson, a graduate student in religion, became interested following Brown's summer program and ended up working with prize-winning novelist Tom Morrison at Princeton. Wilson, whose mentor at Brown was John Reeder, professor of religious studies, adds, understandably, just a dash of preaching to his enthusiastic summary. "The ongoing relationship with my faculty mentor is the most powerful part of the SR-EIP program, plus the fact that the program was an integral step toward thinking beyond a master's degree. Without that change in mindset, I wouldn't be here. The SR-EIP said there is a broader future, and not only that, but there is support network and a committed leader in Jim Wcehe [the executive director of the Leadership Alliance, who has guided the original consortium through its steady growth to the present day], who has dedicated himself to seeing this happen. With all of the affirmative action backlash, it's imperative this continue and for me to join in—there's no choice."

An Alliance publication, written by Linda J. P. Mahdesian, quotes an equally enthusiastic Frank De Silva, a graduate of Morehouse College, now in his fourth year of graduate study in biology at Brown. "I was previously heading in an M.D. direction, but research showed me a new way that's more exciting to me. The Leadership Alliance is more than just showing me what science is all about. It's also given me a lot of support. Being a minority in a predominantly white institution at times gets somewhat lonely. A lot of professors here are very understanding of that—both black and white professors. I've gotten a lot of support and encouragement here that I didn't expect to get. It made the transition much easier and more comfortable."

Reflecting the same commitment and responsibility shown in Wayne Wilson's enthusiastic to join in. Latasha Wright from Tougaloo College in Mississippi, who spent a summer at Johns Hopkins, agrees: "We need to be examples. We need to be role models. We need to show..."
other young people that we can do this." Latasha is a doctoral candidate in cell and molecular biology.

Perhaps the most glaring absence of role models due to a lack of academic opportunity is found among Native Americans. Bill Mills, the gold medal winner from the Tokyo Olympics, might be the only national hero known beyond the Native American community—hence the inclusion of seven tribal colleges in the Alliance program. Richard Little Bear, vice president of Cultural Affairs at Dull Knife Memorial College, has been pleased to see this image-changing opening to graduate study for his students. He says, "I think the membership of the tribal colleges will help balance the Leadership Alliance. We fall into self-fulfilling prophesies by thinking that Native Americans aren't supposed to be scientists and mathematicians. This is one way to get out of that stereotype. We've fallen behind on a lot of these disciplines because we don't have that access to networking, to information, to funding. We need to get more of our students interested in the various sciences.

One such student is not only interested but off to a great start. Dion Tame, a junior at Montana State University-Bozeman majoring in Natural Resources, participated in the EIP at Dartmouth in 1996. Of his experience he states, "The Alliance developed my awareness of the basic needs and goals of indigenous people and helped me assert myself in higher education and culture." Tame is the president of the American Indian Club and also of MSU's chapter of the American Indian Science and Engineering Societies. The recipient of a student leadership award, he has also spent the last two summers working on the Northern Cheyenne Reservation, where he had the chance to be a positive role model for his community.

The work of the Alliance is filling a tremendous need in making graduate opportunities available to future role models for minority youth. It would be easy for Black, Hispanic, and Native American youngsters to interpret today's anti-affirmative action legislation and discouraging court decisions to mean "We don't want you!" In fact, minority applications dropped at California colleges when Prop 209 was enforced.

Im Wache, the Alliance executive director, has noticed an encouraging change in just a few years. "It gets pretty lonely to go to professional meetings and have only a few people of color as colleagues," he says. "What I enjoy is seeing students members of my own professional society—the American Society of Cell Biologists—and know that their presence is a direct result of this program." He points out that during the last two years, forty-five Alliance alumni, with Ph.D.s under their belts, have become full members of the ASCB.

"There haven't been forty-five people of color in the last hundred years in that group—so already there's been a change in the landscape in a short amount of time."

Having attended Williams College (1,200 students in 1955), where it was easy, and common, to have coffee, engage in casual discussions, or just play ping pong with distinguished professors who published, did research, and counseled presidents and foreign governments, I took a lot for granted—not realizing that at a large university, and at many smaller schools, this close and casual contact is difficult to achieve and therefore rare. Making such opportunities available to minority candidates is a wonderful experience that can never be measured and might often be overlooked when the advantages of the Alliance are enumerated.

This plus, however, has not been lost on Stanford Carter, Jr., of Morgan State's Master of Science program. "There I was, sitting next to Tom Pollard, the president of the Salk Institute," he says. "We were talking baseball and about his time at Johns Hopkins. He took me through his whole life story."

Carter, an accomplished athlete, compares the Alliance experience to a baseball training camp. Meeting leaders in the field like Pollard and working with his Morgan State mentor, Dr. T. Joan Robinson, dean of Computer, Math, and Natural Sciences, have given him the chance to develop as a scientist. "The doctors can lead you through the steps, much as the coaches in a sports camp would do. Carter adds that he values the communication that has opened up for him—with scholars at both Hopkins and Morgan State and with the experienced dignitaries he has met at various conferences and symposia made possible by the Alliance.

The Alliance projects that during the next ten years between 300 and 500 students such as Carter will be enrolled in doctoral programs worldwide. Already the original collaborative vision has exploded into a global network of schools, with research opportunities in such places as Dominica, Ethiopia, Sweden, and France.

Our nation is indeed a schizophrenic land. We are the most philanthropic people in the world, and yet many of us worry about the "What's in it for me" materialism that also abounds. As the anti-affirmative action backlash begins to pull us away from true integration and equal opportunities for all, other movements—like The Leadership Alliance and its growing number of academic and corporate supporters—step up to reassure us that our glass is at least half full.
New Jersey Nets Grant Nunez Scholarship

Bloomfield College first-year student Judith Nunez, of Newark, N.J., received a $4,000 scholarship paid over four years from the New Jersey Nets Foundation through the Community Youth Organization. Bloomfield College will match this scholarship and will provide a mentor to Nunez as part of the program.

The presentation was made at half-time of a National Basketball Association game between the Nets and the Washington Wizards, and featured a 30-second profile of Nunez produced by the New Jersey Network.

Nunez, a computer information systems major, holds a 3.16 GPA. She hopes to work for a software or computer firm and pursue a master's degree in computer science.

Arias Addresses International Economic and Social Rights at Hunter

In April at Hunter College of the City University of New York, Dr. Oscar Arias Sánchez, president of Costa Rica from 1986-1990 and 1994-1998, was awarded the 2007 Nobel Peace Laureate, was the featured speaker in the fourth lecture of a national series titled “Human Rights—The Unfinished Agenda for the New Millennium.” These lectures commemorate the 50th anniversary of the Universal Declaration of Human Rights (1948-1998)—a document whose preliminary drafts were prepared in meetings at Hunter College in 1946.

Arias, pictured here with Hunter College President Dr. David A. Caputo, spoke with passion of a “leadership, spiritual, and human rights crisis...when 1.3 billion people live on income of less than $1 a day.”

De la Cruz Chairman of University of Miami Board of Trustees

South Florida entrepreneur Carlos M. de la Cruz, Sr., has become chairman of the University of Miami (UM) Board of Trustees, a 16-member board that governs one of the leading private research universities in the Southeast.

De la Cruz is chairman of the board and CEO of Eagle Brands, Inc., the Anheuser-Busch distributor in Miami-Dade County, and of CCL, Inc., the Coca-Cola bottler in Puerto Rico. He serves as chairman of several local automobile dealerships, including Miami Honda, Central Hyundai, and Sunshine Ford.

“It’s a privilege to follow persons who have such strong commitment and love for U.M. I know that the university will continue to gain national and international prominence,” said de la Cruz.

C.H.I.E.E Award Given to Olga and Carlos Saladrigas

The Most Rev. John C. Evañora, archbishop of Miami, and Rev. Msgr. Franklin M. Casale, president of St. Thomas University, presented the Champions of Higher Independent Education in Florida award to Olga and Carlos Saladrigas at a reception in April. More than 80 guests attended the reception at the Coral Gables home of Ivette and Carlos Planas.

Carlos Planas is a member of the St. Thomas University Board of Trustees.

Olga and Carlos Saladrigas are local supporters of Catholic higher education at St. Thomas University, where Carlos is a member of the university’s President’s Board of Advisors.

Ulibarrí Honored at University of New Mexico Commencement

University of New Mexico (UNM) Professor Emeritus of Spanish and well-known author Sabine R. Ulibarrí (pictured) received an Honorary Doctor of Letters at the University of New Mexico’s 1999 Spring Commencement.

The undergraduate student speaker was Manuel-Julian Rudolpho Montoya, who received a bachelor’s degree. Montoya is the recipient of a Rhodes Scholarship and a Truman Scholarship. He is the first UNM student to win a Rhodes Scholarship since 1978.

The Provost and Vice President for Academic Affairs F. Chris Garcia was the master of ceremonies

Martinez Speaks at Palo Alto Commencement

Dr. Ernest A. Martinez, executive vice chancellor of the Alamo Community College District (ACCD) in Texas, presented the commencement address during Palo Alto College’s 15th Commencement in May.

Martinez has been executive vice chancellor of the Alamo Community College District.
District since November 1995. He serves as chief operating officer of the 50,000-student WCSD and is the senior administrator responsible for day-to-day management of the district.

A founding member of the National Community College Hispanic Council, Martinez has a bachelor's degree from New Mexico Highlands University, a master's from Sonoma State University, and a doctorate from the Universitats of California-Berkeley.

Rodriguez a Barry Success Story

Joel Rodriguez, 29, arrived with his parents from Cuba in the Mariel boat lift at the age of 10 without knowing a word of English. However, he always did well in school. After high school, he joined the U.S. Marines, where he served in the 1990 invasion of Panama, and was a squad leader during the Persian Gulf War.

In 1996, Rodriguez entered Barry University's (Fla.) Minority Access to Research Careers program and was selected for a prestigious internship at Yale University in the summer of 1998.

In May, Rodriguez received a bachelor's degree in psychology from Barry. He will begin a doctorate program at the University of Michigan, and afterwards, he plans to work in sociology with a focus on minorities and race relations.

Martinez Honored at Washington State University Banquet

Washington State University (WSU) student Cecilia Martinez was honored during WSU's 20th annual Gabriel Cardenas Banquet. WSU junior political science major, Martinez was one of two students receiving scholarships honoring the event's namesake. She also was named Chicana del Año in WSU's M.E.Ch.A.

Martinez is involved with a variety of groups, including the Children of Alien Sharing Higher Education, the Society of Latino Engineers and Scientists, Mujeres Unidas, and the Semana de la Raza Task Force Committee.

Carmen and Tony Cardenas, who attended the event, created the scholarship to encourage Chicano Latino students. Their son

Gabriel died in an automobile accident in 1997, after completing all of his course work for a WSU doctoral degree.

Vallejo Wins Russett Award

State University of New York Rockland Community College Vice President for Student Affairs Maria M. Vallejo received the 1999 Dr. Carol S. Russett Award. She was selected by the American Council on Education/National Network of Women Leaders.

The award is given to a woman who has dedicated herself to serving higher education and to serving as a role model and mentor to other women.

Pescador Presents Ohlti Award to Maciel

Jose Angel Pescador, Consul General of Mexico, presented his government's prestigious Ohlti Award to California State University-Dominguez Hills (CSUDH) Professor David Maciel in May.

Maciel, chair of the CSLDH Department of Chicano/Chicana Studies, was cited by the Consul General for his contribution to the knowledge of Mexican culture, his outstanding academic research on Mexican cinema, and because he has constituted a bridge between the people of our two countries.

The Ohlti Award is given to one individual in the United States who has consistently demonstrated outstanding efforts in promoting cultural pride, self-improvement, and the well-being of Mexican compatriots.

Ceniceros in Fulld Fellowship Program

For the third time since 1995, a nursing student at Eastern New Mexico University (ENMU)-Roswell has been selected to represent New Mexico in a prestigious leadership program. Lucy Ceniceros, a first-year nursing student, is one of 25 nursing students selected from nursing programs across the country to participate in the 1999 Fulld Fellowship program, which focuses on emerging leadership issues in nursing.

Ceniceros is on the ENMU-Roswell Dean's List and is a member of the National Student Nurses Association. A graduate of the New Mexico Military Institute, Ceniceros has been a platoon leader and an executive officer. She plans to become a second lieutenant in the U.S. Army in order to experience the nursing field throughout the United States and the world.

Colin Achieves High Academic Standing

Ernesto Colin graduated as Loyola Marymount University's (Ca.) valedictorian and was named the winner of the 1999 Ignatian Award. The Ignatian Award is presented to the graduating senior male who has achieved high academic standing and distinguished himself in leadership and service to the student body and the university.

The son of Mexican immigrants, Colin plans to pursue a career as a secondary school teacher, and will enter Loyola Marymount's School of Education in the fall. This summer, he is helping to provide training and professional development workshops to the faculty at the Universidad Rafael Landiva in Guatemala.

Cal State-Fullerton Recognizes Hernandez

The California State-Fullerton Nursing Department sponsored a display of memorabilia chronicling the life of World War II nurse Maria Dolores Hernandez.

Hernandez, whose family settled in Fullerton after fleeing the Mexican Revolution in 1915, was Orange County's first World War I nurse called for active service. After becoming a major in the Army, Hernandez transferred to the Air Force and was stationed in the Far East and Europe. She retired with 20 years of service and returned to Fullerton to work as a nurse.

At her death at age 90 two years ago, she left more than $780,000 to Cal State-Fullerton.
to endow a Nursing Department scholarship for deserving students dedicated to helping the disadvantaged.

Cisneros Lectures at California-Santa Barbara

UCSB Internationally recognized Chicana writer Sandra Cisneros delivered the 36th annual Edwin and Jean Corde Memorial Lecture in front of some 900 people at the University of California-Santa Barbara (UCSB) in May.

The author of such popular books as *The House on Mango Street, Loose Woman*, and *Woman Hollering Creek*, Cisneros drew strong reactions from the audience when she read from her forthcoming novel *Caramelo*, which she promised to complete this year.

Called "an icon for Latina women," by Nancy Reyes, a UCSB student and member of MÚJER, *Mujeres Unidas por Justicia. Educación y Revolución*, Cisneros stressed the importance of Latina writers' ability to support themselves and be independent.

Olmos Speaks at Cal State-Hayward

Edward James Olmos, award-winning actor and producer, spoke at California State University-Hayward in May. His talk, "Celebration of Our Nation's Diversity," was part of the university's Cinco de Mayo Week celebration.

Olmos has been recognized for both his acting and directing skills. He also is a United States Goodwill Ambassador for UNICEF and a national spokesperson for the Juvenile Diabetes Foundation. He speaks frequently at schools, charities, and juvenile institutions. (See story, page 22.)

After his address, Olmos signed copies of *Americanos: The Faces of Latino Culture*, a book of photographs that he co-edited.

Arias Speaks at Nazareth

Dr. Oscar Arias, former president of Costa Rica and winner of the Nobel Peace Prize in 1987, delivered the commencement address at Nazareth College (NY) on 22nd undergraduate commencement. It was the first commencement at Nazareth for Dr. Robert A. Miller, the college's newly inaugurated eighth president.

Arias, a former president of Costa Rica, drafted a peace plan to end strife in Central America. The Arias Peace Plan culminated in the signing of the Esquipulas II Accords and earned him the 1987 Nobel Peace Prize. He is a prominent spokesman for peace, democracy, democratization, and human development, and advocates frequently for Third World concerns.

Padrón Chairing Florida Campus Compact Board

Dr. Eduardo J. Padrón, president of Miami Dade Community College, has been appointed co-chair of the Board of Directors of Florida Campus Compact, the state chapter of the national membership organization of college and university presidents committed to helping students develop the values and skills of citizenship through participation in community service.

As co-chair of the Florida Campus Compact Board of Directors, Padrón will represent higher education in Florida with Betty Castor, president of the University of South Florida, and Steven Ullfelder, member of the State University System Board of Regents. The co-chairs will function as the executive committee of the Board of Directors.

Garza Addresses St. Mary's Graduates

Omar P. Garza, a career foreign service officer nominated by President Clinton to serve as US ambassador to Nicaragua, was the keynote speaker for the St. Mary's University (Texas) 19th commencement. Garza graduated from St. Mary's University in 1970 with a bachelor's degree in sociology. He was director of admissions at St. Mary's from 1970-71 and assistant director of the university's Upward Bound program. His diplomatic career began in 1971.

Garza has served as U.S. consul general in Guadalajara, Mexico, since last August. At press time, he awaits confirmation.

Kean Names Sánchez "Teacher of the Year"

Dr. Jose E. Sánchez, a professor in Kean University's (N.J.) sociology and anthropology department and the criminal justice program, was named "Teacher of the Year" by the university's alumni association.

Sánchez was nominated for the award by his students, who have described him as a "conscientious teacher" and one who "is willing to help students accomplish their goals."

Sánchez is a frequent conference presenter and has written more than a dozen articles on a wide variety of topics including Hispanic-student retention, milieu therapy, and criminal negligence.

Alamo Community College District Receives Recognition

San Antonio Mayor Howard Peak (pictured, center) presented an official city proclamation to Alamo Community College District Executive Vice Chancellor Dr. Ernest...
A Martinez (left) and Board of Trustees Chair Donald L. McClure, Sr. (right).

In reading the proclamation, Peak stated that the community colleges "bring educational advancement within reach of all persons and segments in the community."

Peak also recognized the college district as one of the largest employers in San Antonio and acknowledged the colleges contribution to the economic development of the city.

Cal State L.A. Mini Baja Team Wins Again

Continuing its exceptional achievement in competitive engineering contests, California State University-Los Angeles placed first overall at the Society of Engineers International 1999 Mini Baja West competition for the third time since 1996, outperforming 63 other teams. Each team designed, built, promoted, and raced a prototype of a 4-wheel single seat, off-road recreation vehicle for the competition. The event was hosted by Kansas State University.

The team's advisors were mechanical engineering professor Richard Roberto and technical staff member Dan Robertson.

Team members included Jaime Garcia, Eric Gama, Rogelio Ramirez, Daniel Peña, Christopher Gonzales, Mario Salomon, Rafael Martinez, Raul Vallejos, Ulalito Medina, Jose Barragán, Efren Gonzalez, Jose Mendoza, Ignacio Villa, and Oscar Garcia.

Houston Community College Forms Partnership with Hockey Team

Houston Community College (HCC) has joined the International Hockey League's Houston area to promote the power of learning in their communities.

Both of us are after the same diverse audiences," said HCC Chancellor Ruth Burgos-Sasscer, pictured here standing next to the new HCC Zamboni, supposedly the only community college zamboni ice resurfacer in the country.

With an enrollment of about 54,000, HCC is the largest institution of higher learning on the Texas Gulf Coast. It recently was designated a "Hispanic-serving institution" after its Hispanic enrollment grew, due in part to newly implemented marketing aimed at attracting more students from Houston's fastest growing ethnic group.

Lt. Governor Perry Visits Houston

Pictured l. to r. Laurie Brucker and Esther Campos, both trustees for the Houston Texas Independent School District. Lt. Governor Rick Perry and Eva Loreda, principal of the Mario M. Gallegos Sr. Elementary School, gathered during Perry's visit to the school. Perry was in Houston to tour Sen. Mario Gallegos' senate district.

Texas-San Antonio Receives NEH Grant

The University of Texas-San Antonio's Division of Bicultural Bilingual Studies received a $150,000 National Endowment for the Humanities (NEH) grant to sponsor "Perrumbando: Frontier Breaking Boundaries," a summer institute for the inclusion of Mexican American and Latino Literature and Culture in the Classroom.

The award marks the first time UTSA received a grant of this type, according to Institute Director Ellen Riojas Clark. UTSA associate professor of bicultural bilingual studies. The NEH dedicated grants for secondary teacher summer institutes to only eight other universities nationwide. "We congratulate Ellen Clark on her achievement. The award conforms UTSA's leadership in bicultural education," said UTSA Provost Guy Bailey.

Texas-Kingsville McNair Scholars at National Conference

Texas A&M University-Kingsville students in the Ronald E. McNair Scholars program presented their research at the 15th National Conference on Undergraduate Research, held in April at the University of Rochester in New York. This is the third year that McNair Scholars have presented their research at this national conference.

Senior chemist engineering majors Arturo Castillo and Ivan Luna, junior biology majors Rosemary Ramirez and Liza Soliz, and biology graduate student Gloria Chapa—all participants at the conference—are part of the Ronald E. McNair program, named after Dr. Ronald E. McNair, an astronaut who died in the space shuttle Challenger and was the second African American to fly in space.

Pictured here (standing, l. to r.): Mary Gonzalez, assistant director of the McNair program; Castillo, Ramirez, Soliz, Chapa, Luna, and (McNair mentor) Sylvia Lopez. Seated is Dr. Alberto Olivares, dean of the College of Graduate Studies.

San Antonio College Hosts Youth Conferences

The San Antonio College Women's Center in Texas held its annual Young Women and Young Men's conferences, reaching more than 300 San Antonio area high school students, parents, mentors, and counselors.
Dr. Mary Helen Vera, women's counselor/coordinator, said, "The conferences target youth who are often not actively encouraged to attend college. Through motivational speakers, workshops, and exposure to positive role models, we hope to instill in these students a desire to further their education."

Alamo Community College District Trustee Vincent Lazaro (pictured) presented a workshop for young men titled "Give Back Through Public Service." CCD Trustee Luz Maria Prieto also attended the conference.

**Bristol Celebrates Portuguese Language Day**

To celebrate the 25th anniversary of the Portuguese Revolution, Bristol Community College (BCC) in Massachusetts held a Portuguese Language Day.

The day-long event featured a team of teachers, singers, and playwrights from Portugal. Musical performers included Manuel Freire, Carlos Alberto Moreira, Zezé Medeiros, Dionísio Batista, and Raul Rodrigues. Tenente Coronel Victor Alves, founder of the Movimento das Forças Armadas (the Armed Forces Movement), also attended (pictured on left).

**William Paterson Receives $1 Million Donation**

The John Victor Machuga Foundation donated $1 million to the William Paterson University (NJ) Foundation.

The gift, to be distributed over seven years, will include $350,000 in scholarships for financially needy students, $150,000 to endow the John Victor Machuga Scholarship Fund for high-achieving students, and $300,000 to fund new initiatives in student programming at the Student Center.

John Victor Machuga, born in Paterson, N.J., during the Depression, was a highly skilled investor who amassed a considerable fortune.

**Hispanic Heritage Youth Awards Expand**

The Hispanic Heritage Awards Foundation (HHAF), one of the nation's most prestigious organizations promoting Hispanic excellence, has expanded its regional youth program. In May, the 1999 Hispanic Heritage Youth Awards were awarded to 45 regional high school winners across the United States (an increase of 40 more awards than last year's live). In August, the five national winners will be announced.

"We are proud to expand our search for youth who today are making important contributions, and will surely be tomorrow's leaders," said Raul Espa (pictured), chairman of the HHAF.

Students were recognized for their accomplishments in Leadership, Sports, Art, Literature, Journalism, and Academic Excellence.

**Ford Motors Establishes Scholarship at Texas A&M International**

A $25,000 check, from Ford Motor Company representatives on behalf of Texas A&M International University students, was presented to A&M International President Dr. Charles B. Lbett. The check established the Ford Motor Company Endowed Undergraduate Scholarship in Science and Mathematics at A&M International.

A&M International, more than 50 percent of the students are the first in their family to earn a college degree, and more than 90 percent are Hispanic. More than 80 percent qualify for financial aid, but student need routinely outstrips available resources.

Pictured from left to right are Dr. Jaime Hermann of the Ford Motor Company, Dr. Jennett, Aldo Ochoa of the Ford Motor Company, and A&M International Provost and Vice President for Academic Affairs Dr. Ray Beck.

**Texas-Kingsville Announces Seminar Winners**

Awards and scholarships were presented at the First Annual President's Distinguished Student Research Seminar at Texas A&M University-Kingsville, organized by biology professor and mentor Dr. John C. Perez (picture here with monoclonal technician Maria Susana Ramírez).

The "Distinguished Friend of Biology Award" was given to Dr. Roger Campos, a San Antonio dentist with three dental practices. Armando García, an investigator and auditor for the Food and Drug Administration, and a commissioned officer for the United States Public Health Services, received the "Distinguished Research Biologist Award." Biology majors from campus Carlos Galindo and Armando-Linera Jr. won scholarships.

**Jose Costa** (pictured on right), associate professor of Portuguese at BCC, said, "It is important to understand and respect this language and culture."
Pérez, who has taken the lead in introducing young Hispanic students to the techniques of science, previously became the first recipient of an Undergraduate Institution Mentoring Award, sponsored by the Society for Advancement of Chicanos and Native Americans in Science.

Spanish Drama at Rhode Island College

Spanish Theatre of Rhode Island College presented its 19th annual spring Spanish drama, El Medio Pelo (The Ordinary Man), by acclaimed Mexican playwright Antonio González Caballero.

The story takes place in Apaseo, described as a "one-horse" town. The female protagonist, Paz, who once had money and is considered part of the upper class, is forced to work outside the home due to the debts of her father and the untimely death of her husband Guadalupe Marcial, the "ordinary man," declares his love for Paz, and it goes from there.

Cast members were: María Lancellotta and Steve Rusillo (both pictured), Carla Cuellar, Frances Cruz, Yovanny Peña, Rosemary Moronta, Robert Taboada, Luis Escobar, Leslie Rodriguez, Cristina James, and West Warwick Professor M. Francis Taylor was the director.

Health Issues Conference at Texas-Pan American

A.R. "Tony" Sánchez of Laredo, Texas, a member of the University of Texas (UT) System Board of Regents, discussed the UT System's Regional Academic Health Center, located in the Rio Grande Valley, at the First International Conference on Health Issues at UT-Pan American. Sánchez is chairman of the board and CEO of the Sánchez Oil and Gas Corporation.

The three-day conference was designed to provide a forum for the international exchange of health-related information and research and to bring together physicians, health educators, nurses, other healthcare providers, and local businesspersons for possible future collaboration in healthcare research, service, and education.

South African Court Justice at Southern Methodist

South African Constitutional Court Justice Dr. Albie Sachs, who was a leader in the struggle to end apartheid in South Africa, gave a lecture at the Southern Methodist University (SMU) School of Law in Texas. Sachs (pictured on the right with SMU Law Dean John Attanasio) spoke on the Truth and Reconciliation Commission proceedings and their aftermath.

A civil rights lawyer in the 1950s and 1960s, Sachs was twice imprisoned by the Security Police and endured 178 days of solitary confinement because of his beliefs that White and Black people should be equally respected under the law. He was nearly killed by a car bombing in 1988, which severed his right arm.

Texas-Austin Mourns Paredes

Professor Emeritus Américo Paredes (pictured here in an early photo of the University of Texas at Austin) was noted author and one of the founders of the Center for Mexican American Studies and the Center for Intercultural Studies at Folklore and Ethnomusicology at UT-Austin. Died Mas 5, at age 85.

With pen in hand, Paredes challenged the writings of legendary and contemporary historians and their versions of life along the Texas-Mexico border. His descriptive novels about treacherous lawmen and valiant peasants along the Rio Grande borderlands set in motion a revolutionary approach to writing about the way things and people had been in early Texas. In so doing, he helped to shape a positive cultural identity among Mexican Americans and influenced a whole new generation of scholars.

UT-Austin President Larry R. Faulkner said, "Américo Paredes was a great part of the soul of the University of Texas and the Austin community for many decades. He will be sorely missed. The entire university community reaches out with fond regards to the members of his family."

University of Rhode Island Honors Valdés

The University of Rhode Island (URI) saluted the accomplishments of Luis Valdés at its 113th Commencement. In recognition of his contributions to URI, the people of the State of Rhode Island, and the nation, Valdés received an honorary Doctor of Arts degree.

Valdés is the founder and artistic director of the internationally renowned El Teatro Campesino, the theatrical troupe he founded during the Great Delano (Calif.) Grape Strike of 1965. Over the years, El Teatro Campesino's productions throughout the United States, Mexico, and Europe have garnered critical acclaim and recognition, including an Off-Broadway Obie Award and numerous Drama Critics Circle Awards in Los Angeles and San Francisco.

Proyecto Access-Tucson Prep Wins Honor

A Pima Community College (Ariz.) program that fosters stronger math and science skills among middle and high school students was selected No. 1 by the Arizona Commission in the Best Education Practices Awards Program.

According to Dr. Ana M. Mantilla, a math instructor at Pima’s Downtown Campus who is the program director, Proyecto Access is an eight-week program that attracts students
who are interested in working or teaching in engineering, science, or other math-related fields. The objective is to improve students' critical thinking and problem-solving skills with lessons in logic, computer science, probability, and physics.

**News from U.S. Hispanic Leadership Institute**

United States Hispanic Leadership Institute (USHLI) Board Chairman and co-founder Rev. B. González was honored as one of seven "unsung heroes" by NBC Chicago and named a 1999 Jefferson Award winner. The award honors the highest ideals and achievements in volunteerism and public service.

Howard Payne University (Texas) bestowed on Dr. Juan Andrade, Jr., USHLI president, an Honorary Doctorate of Humanities. Andrade's professional career has lasted nearly 30 years.

For the fourth consecutive year, Texas A&M University hosted the Southwest Student Conference on Latino Affairs, organized by the Committee for the Awareness of Mexican American Culture.

A Midwest Association of Hispanic Student Organizations is being formed by student leaders on college campuses in Ohio, Michigan, Indiana, Illinois, and Wisconsin. Student groups interested in joining can contact Yolanda Bueno at (800) 950-SFL.

Ameritech awarded USHLI $25,000 for research and $15,000 for the 17th annual United States Hispanic Leadership Conference.

**Paradise Valley Community College Honors Colosio**

The life of Mexican visionary Luis Donaldo Colosio Murrieta was honored on Cinco de Mayo at Paradise Valley Community College (PVCC) in Arizona. The ceremony was attended by dignitaries from the State of Sonora, Mexico, the State of Arizona, and the family of the late political leader and educator.

The event, co-sponsored by the Arizona-Mexico Commission Fundación Colosio, was a tribute to a man who was a strong proponent of education as the basis for strengthening justice and furthering social and economic progress in Mexico. Colosio, a 1994 candidate for President of Mexico, envisioned a vibrant, democratic state, devoid of violence and corruption.

Raúl Monreal (pictured), director of Student Development and Special Services, was instrumental in acquiring the bust of Colosio for PVCC.

BENTLEY COLLEGE

THE BUSINESS SCHOOL FOR THE INFORMATION AGE

Faculty Position-Marketing and Information Technology

The Marketing Department at Bentley College invites applications for a full-time, tenure-track position, beginning Fall 2000. We are specifically searching for candidates at an rank who have a doctorate in marketing or related fields and who have exhibited expertise in teaching and research at the intersection of marketing and information technology. The faculty member will teach in Bentley's new Information Age Marketing programs.

As the Business School for the Information Age, Bentley College has embarked on a broad range of new initiatives, including a new full-time Information Age MBA and programs in accounting information systems, global financial analysis, change management, human factors and information design, and information age marketing. Faculties include a state-of-the-art Trading Room, a planned Marketing Technology Showcase and specialized labs in accounting information systems, enterprise automation and information design. The Smith Academic Technology Center, opening in 2000, will combine leading-edge information technology with space to teach, learn and think creatively.

Candidates will be considered until the position is filled. For best consideration, should submit a curriculum vitae, three letters of recommendation, and any other supporting materials (i.e. teaching evaluations, working papers, published articles) by July 15, 1999 to: Dr. Abdi Eidighi, Associate Professor of Marketing, Chair of the Marketing Department Search Committee, Bentley College, 175 Forest Street, Waltham, MA 02452-4705; e-mail: aeadighi@bentley.edu;

Bentley College and its affiliates are Equal Opportunity/Equal Access Employer.

For other employment opportunities, call our 24-hour Job Hotline at (781) 891-2889.

DIRECTOR OF INTERNAL AUDITING
Internal Auditor

The position reports to the President and is responsible for conducting financial, operational, and compliance audits of University departments and programs and for evaluating the system of internal controls. Specific responsibilities include providing management with independent analyses and evaluations of the adequacy and effectiveness of internal operational controls, the reliability and integrity of financial information, compliance with policies and regulations and the efficient use of resources.

Qualifications: Candidates must possess a bachelor's degree in accounting, finance or a closely related field; MBA with CIA certification preferred. Eight to ten years' experience in progressively responsible roles in internal auditing with higher education experience preferred. The candidate should also have administrative or managerial experience, knowledge of electronic data processing systems, problem solving ability, strong analytical and reporting capabilities and the ability to effect change. Excellent communication skills and the ability to interact with a wide range of constituencies required.

Salary Range: Commensurate with experience and qualifications.

Starting Date: September 1, 1999

Apply by: Consideration of candidates will commence on July 15, 1999. The search will remain open until the position is filled.

Send letter and resume (include V-number to: Valerie L. Van Baaren, Search Chair, Montclair State University, Box C316-V033/HOHE, Upper Montclair, NJ 07043.

An Equal Opportunity/Affirmative Action Institution
Book Review

By Agapito Mendoza, Ph.D.

In the foreward, the author summarizes the history of the embittered relations that have existed in the border area between the United States and Mexico. "The borderlands...has never been a place for the fairhearted," he writes. "From the beginning...neither the sluggish Rio Grande that stretches like a wet scar from the Gulf of Mexico to El Paso, nor the thirsty, sun-blasted deserts and mountains that extend from there to the Pacific Ocean, have ever halted the march of armies, the attacks of nomads or the depredations of outlaws who have marauded across the bloodsoaked frontier."

Mee's narratives guide the reader through a detailed trip, beginning with the European incursion into Mexican-held territory in the 18th Century, culminating with the aftermath of the war between the U.S. and Mexico in 1848. Then General Zachary Taylor had given the Texas Rangers absolute power to use whatever methodology they saw fit to suppress efforts by Mexicans to express their rights. Later, General Winfield Scott, who described the Rangers as having "committed atrocities to make heaven weep and every American of Christian morals to blush for his country," gave them the role in the War of keeping supply channels open to the U.S. troops within Mexico. These "Diablos Tejanos" developed a hatred for the Mexicans, who, in turn, referred to the Rangers as "Los Rinches," for whom it was common practice to shoot orlyninnocent Mexicans as they pleased.

Mee expertly details the relationship as the Mexican Revolution unfolds along the border area. The birth of that conflict, according to Mee, occurs in 1906 (rather than the accepted 1910), when disruptions at the U.S.-owned Cananea copper mine in the state of Sonora resulted in the deaths of hundreds of Mexican citizens. The 7000 or so Mexican workers at the mine were not only fed up with their treatment at the hands of the foreigners, but the reign of Porfirio Díaz, described by many, Mee says, as "the father of foreigners and the step-father of Mexicans," had soured many Mexican citizens about the state of the economy. It was during the Díaz regime that U.S.-owned ventures in Mexico profited the most, since the government in Mexico City continuously ruled in their favor when disputes arose.

Ricardo and Enrique Flores Magón spearheaded the fiercest challenge to the Díaz government, conducted largely through the publication of the newspaper Regeneración. They called for the violent overthrow of the government from various U.S. sites, including St. Louis, Mo. They were harassed and jailed in the U.S. by a government that showed little interest in helping overthrow a Mexican government that had helped U.S. financial interests.

The impact of that revolution, which unraveled quickly after 1910, had a tremendous effect on border cities, especially El Paso, Tex. It was here that U.S. citizens interacted with individuals such as Pancho Villa and Pascual Orozco. Many lazy afternoons were spent on rooftops gazing across the border as the Francisco Madero forces, led by Garibaldi, Villa, and Orozco, lay siege to Juarez, Mexico, and to the Federales, led by Diaz-appointed General Juan Navarro. stray bullets wounded some and killed some of those watching the grisly encounters from across the muddy river.

Many European and U.S. soldiers of fortune joined the battles, enlisting with the side providing the highest salaries. Some newspaper writers joined for the stories or adventure. It was a steady time along the border. This colorful, motley group included writer Tracy Richardson; Sam Dreban; General Guiseppe Garibaldi, whose grandfather is known as the liberator of Italy; General I. Thord-Grar from Sweden; General Benjamin Villaen, a comando in the Boer War; and Dr. Ira J. Bush, a doctor from Mississippi. They were collectively referred to as El Falange de Los Estranjeritos, the Foreign Legion of the Mexican Revolution.

After the controversial 1916 invasion of Columbus, New Mexico, by Villa's troops, relations were re-inflamed as U.S. troops, led by Gen. John J. Pershing, invaded Mexico under the guise of a punitive expedition. This continued until the 1930s, best exhibited by the "notorious Nacos," two towns of the same name, one in Arizona, the other in Sonora, described by Mee as "the most notorious-set of twins since Sodom and Gomorrah." At this juncture was witnessed the first airplane bombing ever in the continental U.S. and the first tank battle in the Western Hemisphere on the Mexican side.

Bloody Border is a valuable resource to both the historian and to the casual reader interested in how conflict has affected our relationship with Mexico over the years. This continuing conflict, now manifested with immigration and sovereign issues, provides the ground for understanding why our neighbors to the south continuously lament their presence "so far from God and so close to the United States."

Dr. Agapito Mendoza completed his bachelor's and master's degrees at the UT-El Paso and his Ph.D. at the University of Oklahoma in 1984. He was director of La Casa Cultural Latina at the University of Illinois at Champaign-Urbana and is presently provost at the University of Missouri-Kansas City.

UNIVERSITY OF CONNECTICUT

The University of Connecticut invites nominations and applications for the position of Chancellor and Provost for University Affairs. The successful candidate will possess demonstrated qualities of academic achievement and managerial leadership and experience to continue the transformation of the University into one of the leading Research I institutions of higher education in the nation.

The Chancellor and Provost for University Affairs is the chief academic and chief operating officer and as such coordinates and supervises all the University’s programs of instruction and research; coordinates and formulates the policies and administration of all schools, colleges, divisions, institutes, and regional campuses (excepting those under the supervision of the Chancellor and Provost for Health Affairs); and oversees the policies and administration of the University of Connecticut Research Foundation.

The Chancellor is located at Storrs on the University’s main campus. The University is in the midst of a historic building program called UConn2000, a nationally unprecedented ten-year, $1 billion program to renew, rebuild and enhance its campuses. (Further information is available on the Web at http://www.uconn.edu)

Candidates must have an earned doctorate or other terminal degree, along with outstanding academic credentials in teaching and scholarly activities which merit a senior faculty appointment in an academic department of the University. Further, candidates must have experience as a vice president, academic dean, or in otherwise managing significant academic units, and should have demonstrated the ability to manage a large, complex academic institution.

Candidates should possess: a commitment to excellence in teaching and the capacity to implement programs to strengthen instruction at the undergraduate, graduate, and professional school levels; a commitment to excellence in research and scholarship and an accompanying ability to identify and prioritize areas of research, and to enhance the support environment as well as external financial support for research; a commitment to principles of diversity and the demonstrated ability to translate that commitment into action; a commitment to achievement of strong programs in student life, with a focus on community and civility across the campuses; proven leadership and communications skills; ability to work within a collective bargaining environment, an understanding of the role and tradition of a land grant university; and high standards of professional and personal integrity.

Compensation is competitive with that at other Research I universities.

Letters of nomination and application should be sent to R. William (Bill) Funk, Managing Director-Education Practice, Korn/Ferry International, 3232 Lincoln Plaza, 500 North Akard Street, Dallas, TX 75201. Screening will begin immediately. The goal is to select a Chancellor by October 1, 1999. Applications will be accepted until the position is filled.

The University of Connecticut has a strong commitment to diversity and seeks a broad spectrum of candidates.

Pima Community College
Tucson, Arizona

Revised Full-Time Staff Position Openings

Pima Community College is the fourth largest multi-campus community college in the nation and opens its doors to more than 65,000 credit and non-credit students each year. ASSISTANT DIRECTOR OF ADMISSION:
COORDINATOR OF MULTICULTURAL ADMISSION

The position: Develops, implements and monitors a comprehensive recruitment plan designed to attract and retain academically talented and diverse student body. Advises the Director of Admission, serves as liaison to the Office of Multicultural Affairs and student multicultural groups, and works closely with admission colleagues as well as student, faculty, and alumni volunteers.

Specific responsibilities: Traveling to high school and college fairs, handling correspondence, interviewing prospective students, reviewing applications for admission, other projects as assigned. Travel would include outreach to community-based organizations and agencies.

Qualifications: Requires a bachelor’s degree and two or more years of demonstrated experience in extending educational opportunities to U.S. students of color. Experience in admission, graduate work in higher education and proficiency in Spanish are preferred. Should possess well-developed communication and organizational skills, the ability to articulate the value of a liberal arts education, enthusiasm, energy, creativity, humor and the commitment to working cooperatively. A valid driver’s license is required.

Founded in 1846, Grinnell College enrolls about 1,300 undergraduate students from every state and the District of Columbia in the United States and 40 other countries. The College’s primary mission is to provide students with a broad, deep, and life-enhancing education that includes professional success, but also personal growth and social responsibility. Grinnell College offers an exceptional, rigorous, comprehensive, and opportunities-rich educational experience which has, at its heart, one-on-one interactions between students, faculty, alumni, and staff. Grinnell College is consistently ranked among the top nationally selective liberal arts colleges in the United States and also consistently ranked in the top ten among all colleges and universities in endowment resources per student and the top ten in alumni giving per student. Additional information can be found at the College’s website www.grinnell.edu.

Application Process: To be considered for appointment, submit a letter of application, a resume, and a list of three employment references to Ms. Jan A. Veach, Office of Human Resources, Grinnell College, P.O. Box 805, Grinnell, IA 50112. By October 1, 1999. The position will remain open until filled.

PROGRAM DIRECTOR
Job # 149
Comprehensive School Reform Demonstration

The Comprehensive School Reform Demonstration program assists states, schools, and districts in responding to a federal initiative to boost achievement in low-performing schools. The CSRD approach to whole-school reform is adaptation of proven, research-based, comprehensive models. The program director will provide intellectual leadership and management to a scope of work that includes assistance to all four states in WestEd's region (Arizona, California, Nevada, and Utah), networking of schools (in-person and via the web), research on implementation, and participation in national activities. The director will also be expected to develop and maintain connections with reform communities in California and to coordinate with other whole-school reform efforts at WestEd.

Qualifications:
Solid grounding in school reform in high poverty schools, including direct school experience and knowledge of the research literature; demonstrated expertise working with educators and policymakers at multiple levels; demonstrated success managing multi-faceted programs and developing teamwork among staff. Doctorate or equivalent education/experience in relevant areas. Salary Range: $66K-$102K, plus excellent benefits.

Application Process:

CALIFORNIA STATE UNIVERSITY MONTEREY BAY
The 21st Century Campus for the 21st Century

Dean
Center for Arts, Human Communication, and Creative Technologies

California State University Monterey Bay (CSUMB), is a comprehensive public university that is committed to serving the diverse people of California, especially the working class, historically under-served, and low income populations. The university values an educational environment of cultural and linguistic diversity and gender equity; ethical reflection and practice; effective and experimental use of technologies as resources to people and catalysts for learning; and the integration of cross-disciplinary models enabling students, faculty and staff to engage in innovative instruction and coordinated service learning. The curriculum is organized around student learning outcomes in 14 interdisciplinary undergraduate and graduate degree programs. It is global in perspective, and as sufficient breadth and depth to meet local, regional, and statewide needs, specifically those of both isolated rural communities and inner-city populations. The campus is located on Monterey Bay, 100 miles south of San Francisco.

The Center for Arts, Human Communication, and Creative Technologies (2HCT), supports four academic degree programs: Human Communication (Integrated Humanities), Visual and Public Art, Music and Performing Arts, and World Languages and Cultures. The Dean of the Center reports directly to the Provost/Vice President for Academic Affairs.

CSUMB is seeking:

- an academic leader who understands experientially the value and importance of multiculturalism; values collaboration, community-building, and shared governance; seeks wide-spread participation in decision-making; and models integrity, ethical reflection, and practice;
- an academic administrator with a successful record in budget development, strategic planning, and grant acquisition; demonstrated ability to lead through collaborative and shared decision making, and to maintain a strong and collegial relationship with faculty, students, staff, and administrators; the ability to balance advocacy with the needs of the wider campus community;
- an educator and scholar whose academic achievements are commensurate with appointment as Full Professor in an AHCT degree program; experienced in developing and leading academic programs that meet the learning needs of an ethnically, culturally, and linguistically diverse student population;
- an innovator with demonstrated understanding of new paradigms in the arts and humanities; who understands and can translate the value of Liberal Arts education in an interdisciplinary context; who values and supports the integration of new media technology in arts and humanities education.

Minimum Qualifications: Ph.D. or appropriate terminal degree. Educational and scholarly achievement commensurate with appointment as Full Professor in the AHCT Center. Experience developing and leading academic programs that serve educationally, ethically, and linguistically diverse student populations. Substantial administrative experience as a dean, associate dean, department chair, or in a comparable position. Evidence of strong and collegial collaboration with faculty, staff, students, and administration.

Process: Priority filing date for this position is October 1, 1999 (position available January 1, 2000). Send two copies of resume, letter of application, and the names, addresses, telephone numbers, and email addresses of five professional references to: Recruitment Office, Academic Personnel, CSUMB, 100 Campus Center, Seaside, CA 93955-8001 tel: (831) 582-3509 fax: (831) 582-3811 CSRS/TDD users: (800) 735-2929. E-mail applications are encouraged and may be forwarded to: faculty_recruitment@monterey.edu. Please reference job # CSUMBHCT-9914. Individuals requiring accommodation with the application process may call (831) 582-3567.

AA/EOE/ADA Employer
Southern Connecticut State University

Dean of Student Affairs

Southern Connecticut State University (SCSU) invites applications and nominations for the position of Dean of Student Affairs. SCSU, a unit of the Connecticut State University System, is an urban, multipurpose, comprehensive state university founded in 1893. Southern is a fully accredited institution of higher education authorized by the Connecticut General Assembly to offer courses and programs leading to bachelor's and master's degrees in the arts and sciences and in various professional fields. Southern also offers a master's degree in social work.

The Dean of Student Affairs has direct supervisory responsibility for Counseling Services, Residence Life, Career Services, Student Center, Performing Arts Center, Women's Center, Food Service Interfaith Office, and campus student organizations. The Dean also supervises the budgets of most student activities, new student orientation, and university discipline and chairs several important committees which serve to meet the needs of individuals and groups.

The Dean reports to the Vice President for Student and University Affairs and assists in providing leadership for the Division. The ideal candidate will be committed to student development, experienced in student affairs administration, responsive to student needs, organized, innovative, and will have excellent communication skills.

The Dean will have a master's degree in a related field, together with at least five years of higher education experience, demonstrated ability to manage and direct diverse and complex campus programs and services, and experience in student affairs administration, responsive to student needs, organized, innovative, and will have excellent communication skills.

Send letter of application, professional vita, and names, addresses and telephone numbers of three references to: Vice President David A. Pedersen, Division of Student and University Affairs, Southern Connecticut State University, 501 Crescent Street, New Haven, CT 06515 by August 1, 1999. We encourage applications from underrepresented groups, including minorities, women and people with disabilities.

Harvard Divinity School welcomes further nominations and applications for the assistant professorship in History of Christianity advertised in late 1998. The guidelines for this position are unchanged. Candidates may be specialists in any major period (e.g., the Reformations) or approach (e.g., the history of theology), but they should be qualified to teach courses that span longer periods of European history. Interest in interdisciplinary collaboration within the Divinity School and the University will be highly important, along with ability to contribute to the Divinity School's ministerial studies program. Candidates should be prepared to utilize forms of analysis that address race, gender, and social location. An applicant must have the doctorate, or an approved doctoral dissertation, in hand by January 1, 2000. Please send applications, nominations, and inquiries to:

Pamela Maassey
Faculty Search Office
Harvard Divinity School
45 Francis Avenue
Cambridge, MA 02138
(617) 495-1698; pamela_maassey@hds.harvard.edu

Completed applications should arrive no later than November 1, 1999.

Harvard Divinity School is an Equal Opportunity, Affirmative Action employer. Applications from women and/or ethnic minority and international candidates are especially encouraged.

Moravian College

DIRECTOR OF MULTICULTURAL AFFAIRS: to foster diversity in its programs, activities, and curriculum through active engagement with the entire Moravian College community. The Director will provide academic, personal, and environmental support to underrepresented students and groups. The successful candidate will have familiarity with multicultural issues and concerns, a high energy level, a commitment to undergraduate education, and outstanding interpersonal skills. A master’s degree in a related field, previous experience in higher education, and a background in multicultural programs or activities are preferred. Position is full-time for ten months a year, and will report initially to the Executive Assistant to the President.

DIRECTOR OF INTERNATIONAL STUDY: to establish and coordinate an international study program encompassing study abroad programs for American students, the support of international students enrolled at Moravian College and Moravian Theological Seminary, and the generation and coordination of programs and events that promote a global perspective in the life of the institution. Candidates should have successful experience in international program administration and the ability, as time permits, to offer academic courses and cross-cultural workshops that advance the institution’s global engagement goals and initiatives. An earned or nearly completed doctorate is preferred. The position is full-time throughout the year, and will report to the Vice President for Academic Affairs.

INFORMATION ABOUT THE COLLEGE: Moravian College is a selective liberal arts and science college in the beautiful Lehigh Valley of Pennsylvania with 17 academic departments and 90 full-time faculty. It enrolls 1,250 students in its regular day session and another 500 in the evening division, which includes an MBA program. Founded in 1742, it is the 6th oldest college in the country. As a member of the Lehigh Valley Association of Independent Colleges, Moravian is engaged in a variety of cooperative programs with Lehigh University and with Allentown, Cedar Crest, Lafayette, and Muhlenberg Colleges. Moravian’s proximity to New York and Philadelphia presents unusual opportunities for professional and cultural enrichment. As students, candidates are expected to possess the skills, knowledge, and values that support student development, creative teaching, community and diversity, global engagement, institutional history and traditions, and affordability. Graduate programs in theology and pastoral counseling are offered through Moravian Theological Seminary with which the College shares a campus and certain resources.

TO APPLY: Please send letter of interest, resume, and the names, addresses, and phone numbers of three references to: MS. DEBORAH SMULL, Director of Personnel, MORAVIAN COLLEGE, 1200 Main Street, Bethlehem, PA 18018-6650. Applications will be accepted until the positions are filled. Desired start date for the successful candidates is September 1, 1999. Women and minorities are encouraged to apply. Moravian College is an equal opportunity employer.
A quiet revolution is taking place in higher education. Universities and colleges are finding that it is dangerous to lag behind in the area of distance learning. By the droves, they are hiring deans, directors, and coordinators to run their distance-learning programs in an effort to stay abreast of rapid advances in technology and instruction delivery. In the United States alone, nearly 70 universities already offer distance-learning instruction ranging from certificate programs to complete baccalaureate degrees.

Open University in Great Britain has at least 27,000 distance-learning students enrolled in different courses at any given time. OC officials have agreements with more than 80 universities around the globe that validate their credits. They even deliver biology and chemistry lab kits to complete core courses.

What does this mean to Latin American students? Or even to Hispanics and Latinos in the United States? It means that—finally—they have more higher education options. They are already receiving this development with open arms, especially in countries where education is available only to a very limited population or selected few.

How is this new technology helping education to cross borders and prepare students for the future? Students in Latin American countries are thrilled to hear that more universities around the world, especially those in the United States, are launching distance-learning programs available to those students where they live, making them direct beneficiaries of some of the best instruction that higher education has to offer.

I have had the opportunity to teach instructional technology in some universities in South America, where my audiences were primarily graduate students and university teachers. In each country and at each institution, they wanted to learn more about the developments of distance-learning and its components in order to compare approaches and to consider delivering programs in the same way. How do we find more information? Who can sign up for these courses? Can we have these credits recognized in our traditional universities? These are among the questions I heard time and again.

In Europe and the United States, there are higher education institutions that place a great deal of emphasis on Latin America and on how they can help students in that region access academic programs. Many of these institutions offer scholarships and even hands-on experiences to professors, but these have historically been limited opportunities, and only a privileged few have access to such a fine education. But through technology and connectivity, computers and creativity are providing such opportunities to more and more students in Latin American countries. Once students register to take courses or programs from these institutions, they become part of the student body, interacting with fellow students and receiving instruction and advice from real faculty; all via television feed or the Internet. All of this is possible thanks to the new technologies and to distance-learning efforts being developed and tailored to the needs of local and international students.

The most important factor about this new approach to education is that it affords students an opportunity to develop better skills and to prepare themselves for better career opportunities. Recognizing this, many companies are even paying their employees' tuition. Industries like the convenience of this type of education, which often allows workers to access classes in a more time-efficient manner, even in nontraditional hours or from the comfort of their homes. Hard-working people, single parents, dropouts, and others are seeing many of the logistical barriers that prevented them from entering higher education fall by the wayside.

It is obvious that educational institutions have an understandable second agenda in offering this new technology—to beef up enrollment numbers and take in more tuition. Some in higher education, however, recognize the greater social good that is the ultimate potential of such efforts and are working toward that end. The Inter-American Distance Education Consortium, for example, promotes conferences and seminars around the United States, Canada, and other countries, seeking to increase access to education worldwide and to encourage international educational partnerships to confront some of the most important political, economic, and social problems that affect humankind. These conferences are usually open in more than one language, including English, Spanish, and Portuguese. The possibilities inherent in such collaboration are breathtaking.

Traditional education is merging with technology to accommodate students from around the world. In the emerging product of that merger, our distance-learning programs, and "virtual universities," everyone can benefit, no matter what their nationality or racial or ethnic background.
I know that town.
I'm from that town.
I have a good idea as to where it's been and where it's going.
Senior Vice President for Finance

Loyola University Chicago, a Catholic and Jesuit urban institution serving approximately 14,000 students, invites applications and nominations for the position of Senior Vice President for Finance and Business Services. The Senior Vice President reports directly to the President and is the chief financial officer of the University, encompassing the University's eight colleges primarily located on three campuses. The major areas of responsibility include: oversight and responsibility for the financial budget; the overall business operations of the University; the capital budget; coordination of the University's budget planning process; oversight of the university's investment portfolios; serving as the primary administrative liaison with the Finance and Audit committees of the Board; and interacting and cooperating with the Chief Finance Officer for Loyola University Health System and the budget officer for the Loyola Stritch School of Medicine. Reporting to this Senior Vice President are: (1) the Vice President for Investments and Treasurer, (2) Associate Vice President for Finance and Controller, and (3) Director of Internal Audit.

The Senior Vice President for Finance is expected to provide accurate and timely financial information to all units and constituencies within the institution to enhance management decision-making and overall service. This Senior Vice President is responsible for strengthening the financial operations of the University while maintaining the fiscal integrity and internal control. The Senior Vice President for Finance is a member of the senior management team. The goal of the team is to provide comprehensive, high quality, and cost effective support to the core academic activities of the institution.

Required Qualifications:
